INTRODUCTION

The following Tables are included in this volume.

C—Series

- C-I Composition of sample households by relationship to head of family classified by size of land cultivated
- C-II Age and Marital status
- C-III Part A—Age, sex and education in all areas
Part B—Age, sex and education in urban areas only
Part C—Age, sex and education in rural areas only
- C-IV Single year age returns
- C-V Mother tongue (alphabetical order)
- C-VI Bilingualism
- C-VII Religion
- C-VIII Scheduled Castes and Scheduled Tribes
Part A—Classification by literacy and industrial category of workers and non-workers among Scheduled Castes
Part B—Classification by literacy and industrial category of workers and non-workers among Scheduled Tribes

The Tables showing the particulars of Scientific and Technical personnel are given in the Appendix to Table C-III.

D—Series

- D-I Non-Indian Nationals
- D-II Place of birth
- D-III Migrants classified by place of birth and duration of residence in place of enumeration
- D-IV Migrants to cities classified by sex, broad age groups, educational levels and in case of workers also by occupational divisions and groups
- D-V Cities showing population born locally, migrants from rural areas and migrants from other towns and cities
- D-VI Distribution of Industrial Categories of Workers and Non-workers by place of birth

Questions 2 to 7 of the Individual slip relate to the age, marital status, birth place, duration of residence, nationality, religion, Scheduled Caste or Tribe, literacy

& education and mother tongue etc., of the persons enumerated. The instructions issued to the Census Enumerators for recording the answers to these questions are reproduced below :

Q. 2 Age in completed years last birth day. Write age in years completed last birth day. For infants below one year of age, write 'O'. You will find many persons who cannot state their age correctly, you should assist them to state the correct age. If you are not able to elicit correct age directly you should stimulate their memory by referring to historical incidents or religious events, etc. You may use any local calendar of such events that may have been prepared for the purpose.

Q. 3 Marital status—for Never married write NM
Married „ M
Widowed „ W
Separated or Divorced „ S

For a person who has never been married write 'NM'. For a person married, whether for the first or another time write 'M'. Write 'M' also for persons who are recognized by custom or society as married and for persons in stable *de facto* union. Even if a marriage is disputed in the locality write 'M' if the person concerned says he or she is married or in stable *de facto* union. For a widowed person whose husband or wife is dead, and who has not been married again write 'W'. For a person who has been divorced in a lawful manner, either by decree of a law court or by a regular social or religious custom but who has not remarried, or a person who has been separated from wife or husband and is living apart with no apparent intention of living together again, write 'S'. For a prostitute return her marital status as declared by her.

Q. 4(a) Birth place

1. If born in village or town in which enumerated write PL
2. If born in another village or town of district in which enumerated write D
3. If born in another district in the State of enumeration write name of district
4. If born in another State in India write name of district and State if name of district is known; otherwise write name of State
5. If born in a country outside India e.g., Pakistan or any other country write name of country

6. Persons born at sea or in air or in railway carriages or on road transport e.g., buses etc., should be entered as such

Q. 4(b) *Whether born in Village or Town*

1. If born in a village write R
2. If born in a town which is considered a town at the present time even if it was not so considered at the time of birth write U

Q. 4(c) *Duration of residence*

1. For a person born in village or town or city in which enumerated write X
2. For a person born in another village or town or city of district of enumeration or who was not born in the district of enumeration write the number of completed years this person has been in the village/town/city of enumeration. (Do not take into account periods of temporary absence on leave or holiday or tour or business)
3. If the duration of residence is less than one year write O
- If the duration of residence is one year or over write the actual number of completed years of residence.

Q. 5(a) *Nationality*

1. For Indian nationals write I
2. For other nationals write the nationality in full

Q. 5(b) *Religion*

- For Hindu write H
- Muslim write M
- Christian write C
- Jain write J
- Buddhist write B
- Sikh write S

For others write the answers actually returned.

Q. 5(c) *Scheduled Castes & Scheduled Tribes*

The answer to this question will be recorded only if a person belongs to a Scheduled Caste or Scheduled Tribe. If the person belongs to a Scheduled Caste or

Scheduled Tribe obtaining in your State, or in your district write the name of the caste or tribe to which he belongs. For all others, write 'X' in this column.

If the person belonging to a Scheduled Caste or Scheduled Tribe returns his caste or tribe by a synonym or a generic name of a caste or tribe as given in your list, write the name as returned and the name of the relevant caste or tribe, as per printed list, within brackets.

Do not write the names of Scheduled Castes in general terms as 'Harijan', 'Achhut'. You should ascertain the name of the caste when it is returned and write it. If a person is negligent and insists on calling himself merely 'Harijan' tell him that this description will not earn the person any benefits under the Constitution permissible to Scheduled Castes and Scheduled Tribes. This may persuade him to give out the correct name.

Scheduled Castes can belong only to the Hindu or Sikh religions. If a person belongs to a Scheduled Caste, there will be either 'H' or 'S' in the answer to question 5(b). Scheduled Tribes may belong to any religion.

Q. 6 *Literacy & Education*

I. Illiterate or Literate

For a person

1. Who can neither read nor write or can merely read but cannot write in any language write O
2. Who can both read and write write L

The test for reading is ability to read any simple letter either in print or in manuscript, i.e., if the person can read one of the examples in the Enumerator's Hand book with felicity he may be taken to have passed the test for reading. The test for writing is ability to write a simple letter. The test for literacy is satisfied if the person can with understanding both read and write.

II. Standard of Education

If the person can both read and write and has also passed a written examination or examinations as proof of an educational standard attained write the highest examination passed instead of L.

Q. 7(a) *Mother Tongue*

Write the mother tongue in full including dialect as returned by the person enumerated. Mother tongue is the language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy write the language mostly spoken in the person's home in childhood. In the case of infants and deaf mutes give the language usually spoken by the mother.

Q. 7(b) *Any other language(s)*

After recording the mother tongue enquire whether the person knows any other language(s), Indian or

foreign and write the language(s) returned by him against this question. In case he does not know any other language put 'X'.

The number of languages recorded against this question should not be more than two. These languages should be other than his mother tongue which he speaks and understands best and can use with felicity in communicating with others. Such language or languages will exclude dialects of the same language.

The tables in the C-Series in this volume correspond more or less to similar tables of the 1951 Census. In view of the fact that distribution of working population and non-workers by broad age-groups is already available in the economic tables, it was not considered necessary to prepare any table similar to Table C-II of the last Census giving the livelihood classes by age-groups.

The age tables for the 1951 Census were prepared on the basis of a 10% sample of the slips taken out at the initial stage of sorting. At the present Census the age tables were prepared on the basis of full count. The broad age-groups adopted for the Economic Tables were only further subdivided in respect of the age tables and the quinquennial age-groups as recommended by the United Nations for population Censuses were adopted.

In the case of mother tongue at the 1951 Census, the languages and dialects were published in the tables

as they were returned with the result that many odd names with insignificant numbers were published. In the present Census the languages and dialects were scrutinized by the Linguist, Office of the Registrar General, India on the basis of the Grierson classification, before the mother tongue tables were finalised.

Tables giving the total population of Scheduled Castes and Scheduled Tribes and their distribution by the industrial categories and also by literacy are included in this series. Special tables for Scheduled Castes and Scheduled Tribes prepared in the present Census are published in Part V-A volume.

The migration statistics in the earlier Censuses were based on the birth place returns. These were found inadequate for a demographic study of the population with reference to internal migration. In view of the growing industrialisation of the country, rural-urban migration is also taking place on a large scale. In order to make a more detailed study of migration, two new questions were introduced; the first to ascertain from a person who is not born at the place of enumeration whether the birth place was rural or urban and the second to find out the duration of his residence at the place of enumeration.

Tables D-I, D-II and D-VI correspond to similar tables of the 1951 Census. Table D-IV is a special table for cities with population of 1 lakh persons and over. Table D-III and D-V relate to the two new questions on migration referred to above.

TABLE C-I

**COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF
FAMILY CLASSIFIED BY SIZE OF LAND CULTIVATED**

TABLE C-I
COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY
CLASSIFIED BY SIZE OF LAND CULTIVATED

This table is based on a 20% sample of the household schedules and figures are given separately for total, rural and urban population. It gives the composition of the households in terms of family and non-family members. Among the family members, heads of households and their spouses, married sons and other married relations separately by sex, other male and female relations who are never married, widowed, divorced or separated, are shown separately. The number of males and females among unrelated persons are also indicated. The particulars of rural population are cross tabulated by (a) households engaged neither in cultivation nor household industry, (b) households engaged in household industry and (c) households engaged in cultivation. The last category is further divided according to the several ranges of size of holding viz. (i) less than 1 acre, (ii) 1.0-2.4 acres, (iii) 2.5-4.9 acres, (iv) 5.0-7.4 acres, (v) 7.5-9.9 acres, (vi) 10.0-12.4 acres, (vii) 12.5-14.9 acres, (viii) 15.0-29.9 acres, (ix) 30.0-49.9 acres, (x) 50 acres and above and (xi) size of holding unspecified.

The data in the Table are based on the information recorded by the enumerators in the Census Population Record given on the back of the Household Schedule. The information in the population record is actually an abstract of information contained in the Individual slip. This abstract gives the infor-

mation, on the individuals composing the household, like name, sex, relationship to the head of the household, age and marital status and the nature of work. It is a modified form of the National Register of Citizens prepared during the 1951 Census. But unlike the National Register of Citizens, the Census Population Record was filled in by the enumerators themselves during actual enumeration and brought up-to-date after the revisional rounds to every household, with reference to the sunrise of 1st March 1961. From this Census Population Record two Tables viz., B-XVII and C-I dealing with the size and composition of households have been prepared. Table B-XVII is published in Part III Household Economic Tables. A 'Household' has been defined as a group of persons living together in the same house, not necessarily bound by ties of relationship and taking their meals from a common mess. While in 1951, data were tabulated on the basis of sample households (1 in every 1000), in 1961 a large sample of 20% was adopted.

This table will be of sociological interest because it gives an idea of the strength of the joint family system.

The following statement shows the composition of family members in 1000 households in the total, rural and urban areas of Andhra Pradesh.

(c) Households engaged in Cultivation.

Note : The heads of households are shown as less than the total number of households in some areas on account of the fact that some enumerators had apparently not indicated any person as the head of household in the Population Record, where the conventional head of household was absent from the household at the time of enumeration and had not been enumerated in that household.

TABLE C-II

AGE AND MARITAL STATUS

TABLE C-II
AGE AND MARITAL STATUS

This Table corresponds to Table C-III of 1951 Census and gives the marital status of Males and Females separately for 15 different age-groups viz., (i) 0-9 years, (ii) 10-14 years, (iii) 15-19 years, (iv) 20-24 years, (v) 25-29 years, (vi) 30-34 years, (vii) 35-39 years, (viii) 40-44 years, (ix) 45-49 years, (x) 50-54 years, (xi) 55-59 years, (xii) 60-64 years, (xiii) 65-69 years, (xiv) 70 years or more and (xv) Age not stated. The particulars are given separately for total, rural and urban population.

Question 2 in the Individual Slip relates to age. Instructions were given to the enumerators to record 'age' as the number of years completed on the last birth day. In the case of infants below one year, the age was recorded as '0'. Persons whose age could not be elicited even after stimulating their memory by referring to historical incidents or religious events etc., were classified under 'Age not stated'.

Question 3 in the Individual Slip relates to "Marital Status". The following "Marital Status" have been recorded.

(i) *Never Married* :—A person who had never been married was classed under "Never Married".

(ii) *Married* :—Persons married for the first or another time, persons who had been in stable *de facto* union and persons who were recognised by custom or society as married were all classed as "Married". If the person concerned said that he was married or in stable *de facto* union, he was classed as "Married" even though the marriage was disputed in the locality.

(iii) *Widowed* :—Persons whose husbands/wives were dead and who did not marry again were classed as "Widowed".

(iv) *Separated or Divorced* :—Persons who had been divorced in a lawful manner either by decree of a law court or by a regular social or religious custom but who had not remarried or persons who had been separated from their wives or husbands, as the case may be, and who were living apart with no apparent intention of living together were classed as "Separated or Divorced".

(v) *Unspecified Status* :—Others not falling in any of the four categories mentioned above were classed under "Unspecified Status".

For purposes of this Table, persons in the age group 0-9 have been treated as "Never Married" irrespective of the entries given in the individual slips.

If there was an omission in the individual slip relating to "Marital Status", males under 21 and females under 16 years were treated as "Never Married" and others as "Married".

The data relating to Marital Status were not collected during the first Census of 1871. Three classifications Married, Never Married and Widowed were adopted in 1881. Divorced and separated were classified with widowed persons. This classification was maintained till the 1941 Census. The question on marital status is put only to persons above the legal age of marriage in some countries. The marital status of all persons below that age is presumed to be "Unmarried". This practice may not be realistic in India where child marriages are observed even today. Hence this question was put to persons of all ages, though in tabulation persons belonging to age-group 0-9 years were treated as "Never married".

Table C-II of the 1961 Census has been prepared for the entire population while the corresponding Table C-III in the 1951 Census was prepared only for a 10% sample population.

The age-groups 15-24, 25-34, 35-44, 45-54 and 55-64 of Table C-III of 1951 Census have now been split up into 2 groups each with 5 years duration i.e., 15-19, 20-24, etc. The persons aged 75+ were put under one group in the 1951 Census whereas persons 70+ have now been grouped together for this Table. Particulars for age 0, 1-4, and 5-14 were given in the 1951 Census whereas they have been grouped as 0-9 and 10-14 in the present Table. The present age-groups conform to international requirements.

In 1951, particulars were given only for "Unmarried", "Married" and "Widowed or Divorced" whereas in the present Census, 5 categories of Marital Status as detailed above have been given. Particulars for "Divorced" were, however, given separately in the Fly leaf to Table C-III in the 1951 Census.

The statement on the next page gives the proportion of males and females under different Marital Status per 1000 males and 1000 females in the respective age-groups.

The data on married females by age-groups can be utilized for forecasting future births from age-specific birth rates. From this Table it can be ascertained whether the proportions in the various marital status have increased or decreased since the last Census

and whether any trend is observed in the age at marriage. This will give an indication of mortality in different marital status and also in different age-groups.

TABLE C-III

AGE, SEX AND EDUCATION

TABLE C-III
AGE, SEX AND EDUCATION

This table consists of 3 parts viz. (i) Part A dealing with age, sex and education in all areas (ii) Part B containing similar particulars in respect of urban areas and (iii) Part C giving these details for rural areas. This table corresponds to Table C-IV of the 1951 Census.

This table is prepared for the entire population whereas Table C-IV of the 1951 Census was prepared for a 10% sample.

Literacy is defined as the ability to read with understanding and to write a simple letter in mother-tongue or in any other language. In the three Censuses of 1871, 1881, and 1891, people were classified into three categories (i) Literates (ii) Illiterates and (iii) people under instruction or people attending school, college or under private tuition. The people 'not under instruction' were classified as literates and illiterates while people 'under instruction' though counted as literates in estimating total literacy figures, were shown separately. In 1891, the language best known to the person or the language in which the person was literate was also recorded, in addition to the ability to read and write English. Besides English only one Indian language, was entered in the schedule, as best known to the literates. In 1901 the category of "under instruction" was deleted and the Tables prepared showed the literates in different Indian languages separately. The literacy in English was also ascertained and the definition of literacy was modified as ability to read and write a letter to a friend. A person who was able to read and write a letter in English was treated as literate in English. The Census questionnaire of 1911, 1921 and 1931 followed the same pattern.

In 1941 the question on specific educational attainment or highest examination passed was included. The question on literacy was given as follows :

(i) Can you both read and write, (ii) if so what script you write? (iii) Can you only read? The particulars collected in 1941 were not however tabulated because detailed tabulation was not undertaken due to the exigencies of the Second World War. The question on literacy in English was eliminated in 1951. The concept of a partial literate person who could read only which was considered in the 1951 Census was given up in 1961.

Question 6 in the Individual slip of the 1961 Census relates to literacy and education. A literate, according to instructions is a person who can *both* read and write. If in addition to being a literate, he

possessed any educational qualifications such qualifications were mentioned.

Age-group-wise particulars were given only in respect of 'Literates' and 'Illiterates' in the 1951 Census. In the present Census, age-group-wise particulars have been given for (i) 'Illiterate' (ii) Literate (without educational level), (iii) Persons with Primary or Junior Basic qualification and (iv) Persons with qualification of 'Matric and above' for *all* and *rural* areas; while in the case of *urban areas*, in addition to the first three categories mentioned above, particulars have been given for those with (i) Matric or Higher Secondary qualification (ii) Technical diploma not equal to degree (iii) Non-Technical diploma not equal to degree (iv) University degree or Post-graduate degree other than Technical degree (v) Technical degree or diploma equal to degree or Post-graduate degree in (a) Engineering (b) Medicine (c) Agriculture (d) Veterinary and Dairying (e) Technology (f) Teaching and (g) Others.

(Degree in law which was separately classified in Table D-VII of the 1951 Census has now been included in the category (g) 'Others'.)

Persons in the age-group 0-4 have been treated as 'illiterates' for purposes of this table.

The particulars in this Table are given for 11 age-groups viz. (i) 0-4 years, (ii) 5-9 years, (iii) 10-14 years, (iv) 15-19 years, (v) 20-24 years, (vi) 25-29 years, (vii) 30-34 years, (viii) 35-44 years, (ix) 45-59 years, (x) 60 years and above and (xi) 'Age not stated'. The age-groups 15-24 and 25-34 given in Table C-IV of the 1951 Census have now been split up into 4 age-groups of 5 years duration and the 4 age-groups 45-54, 55-64, 65-74 and 75 + have been broadly grouped into 2 age-groups viz. 45-59 and 60+.

The statements on the next two pages show district-wise distribution of 1,000 males and 1,000 females by different educational levels separately in rural and the urban areas.

Table C-III will measure the growth of literacy in the total population as well as in the different age-groups since the last Census. This table is of special interest to the Ministry of Education for purposes of future planning. This is also likely to furnish information to that Ministry on the spread of adult education.

SCIENTIFIC AND TECHNICAL PERSONNEL (STPI—STPVIII)
AGE, SEX AND EDUCATION IN RURAL AREAS ONLY

APPENDIX TO TABLE C-III

SCIENTIFIC AND TECHNICAL PERSONNEL

Tables showing the data relating to Scientific and Technical Personnel which were collected at the instance of the Council of Scientific and Industrial Research during the enumeration of 1961 Census are given in this Appendix. The form of the card used for the purpose of collecting this information is reproduced on the next page. The instructions which were issued to the enumerators for the special enumeration of Scientific and Technical personnel are reproduced below :

"You will be given a few special Enumeration cards intended to be filled in by Scientific and Technical personnel.

During the enumeration if you come across a household where you find any person or persons having Science or Technical qualifications as listed out below (which you would no doubt record against Q. No. 6 of the Individual slip) you should immediately hand-over a card for each such individual to fill in himself. There is no need for you to fill the card excepting the location code number of the house.

Science : Any one holding a degree of B.A., or B.Sc., or M.A., or M.Sc., in Science or any other higher degree (Ph.D.) with subjects like Physics, Mathematics, Chemistry, Agriculture, Geology, Geo-Physics, Geography, etc.

Engineering : Any one holding a recognised diploma like L.E.E., L.C.E., L.A.E., A.M.I.E. or degree in Engineering like B.E., M.E., etc.

Technology : Any one holding a degree or diploma in Technical subjects like Chemical Technology, Leather Technology, Textile Technology, Glass & Ceramic Technology, Food Technology etc.

Medicine : Persons holding a degree or a diploma in medicine and/or surgery.

Undergraduate Scientists (*i.e.* those who have not got any Bachelor's degree) or Mechanics and Technicians even though holding certificates will not come under the enumeration.

Before handing over the cards you should note the location code number in the rectangle provided on the card. You need not make any other entry in the card. During your revisional round from 1st to 5th March, 1961, or even earlier if you find it convenient to do so, you should collect back the cards and pass them on to the Charge Superintendent through the Supervisor. If for any reason the cards could not be filled in by the person concerned by the time of your second visit he may be instructed to post the card directly to the Registrar General, India, New Delhi. He need not affix the postal stamps. Postage has been pre paid. If you fall short of the cards you should ask the Supervisor.

Note : You should *not* handover the cards to every graduate but only to those holding Science or Technical qualifications as listed above.

About 5,00,000 cards were distributed for the enumeration of Scientific and Technical personnel in Andhra Pradesh but only 19,609 filled in cards were received back. The enumeration of Scientific and Technical personnel was voluntary. As such the response was inadequate. The filled in cards were tabulated at Delhi and the following 8 Tables were prepared dealing with various characteristics of the enumerated Technical personnel ;

Table 1 Classification of qualified persons by branch and sub-branch of Science or Technology

Table 2 Type of activity and marital status of the persons in each branch of Science or Technology

Table 3 Year of graduation or of obtaining Post-graduate degree

TABLE C-IV

SINGLE YEAR AGE RETURNS

TABLE C-IV
SINGLE YEAR AGE RETURNS

This Table corresponds to Table C-V of the 1951 Census and gives the single year age returns sex-wise for the State as well as the districts with break up for total, rural and urban population.

Table C-V of 1951 was prepared for a 10% sample population whereas this table is prepared for the entire population.

The age given in the Table indicates the number of completed years of age, which was recorded against Question 2 of the Individual slip. In other words the age figures given are those actually furnished by the people and no smoothing formula has been applied. Para 2 in the Fly leaf to C-II may also be referred to.

The collection of correct age data has always been a problem. There is a tendency among persons even in advanced countries to approximate their age returns to round figures ending with 0 and 5.

Data relating to age have been collected from the time of the first Census in India i.e., from 1872. Till 1921, age was defined as the number of completed years on the last birth day prior to the date of enquiry. In 1931 age was recorded according to the nearest birth day. According to Mr. Yeatts, the then Superintendent of Census Operations, Madras "It is doubtful whether this modified definition brought in more accurate information because the majority of the illiterate people were totally ignorant of the month and dates of birth and in most cases even the year of birth was often a guess".

From the subsequent Census i.e., from 1941 onwards the earlier definition of age was adopted.

In 1871 and 1881 it was left to the discretion of the enumerator to fix the age of the people who did not know it. In 1891 it was suggested to the enumerator that if a person could not state the age correctly he should refer the person to some well-known events of local importance such as famine, cyclone and 'Pushkara' festival with a view to link the year of birth with such events. This method was followed till the year 1931. The event to be referred to was left to the choice of the enumerator. In 1941 a calendar of outstanding occurrences, chronologically arranged, was supplied to the enumerator. In 1951 the calendar was brought up-to-date. It is likely that the accuracy of the age returns has been gradually improving because of the spread of literacy.

This is a very important demographic Table which has been used by the Registrar General's Office for computing the mortality rates from the age data of the earlier Censuses and for the preparation of life Tables. It will also afford useful study on bias in age returns at the Census.

There are 2,381 centenarians (900 males and 1,481 females) in this State according to the 1961 Census. The oldest person enumerated in the State returned his age as 140 years; he is from Adilabad district. The statement below gives the distribution of persons above 100 years of age in the State.

TABLE C-V

MOTHER TONGUE
(Alphabetical Order)

TABLE C-V
MOTHER TONGUE

This table gives the number of speakers of each language with sex break up. The State figures are given for total, rural and urban population but figures for districts are given for total population only. The languages returned are shown in alphabetical order.

The Census questionnaire in 1961 contains two questions on language. Question 7(a) relates to the mother tongue which has been defined as language spoken by a person since early childhood. Question 7(b) deals with other languages known to the individual. Two such languages were recorded against Question 7(b). The language so recorded should be one which a person speaks and understands best and can use with a facility in communicating with others.

The mother tongue data were first collected in the 1881 Census; mother tongue was defined as the language ordinarily spoken in the household. If the father and mother spoke different languages, both were returned. In 1891 the same definition was adopted but the question was termed as 'parent tongue'. In the 1901, 1911 and 1921 Censuses the parent tongue was changed to a "Language ordinarily spoken in the household." The question has been named as 'Mother Tongue' since the 1931 Census.

The list of languages as returned during enumeration were sent to the Linguist for scientific scrutiny and classification on the basis of Linguistic classification of Sir George Grierson as given in his great work 'Linguistic Survey of India'. The languages presented in the Table were finally listed out by the Linguist after careful scrutiny. The spellings of the speeches were also standardized by him. In some cases of unknown languages the concerned speakers were re-interrogated with the help of the Test slip issued by this office before finalisation.

The following statement shows the proportion of speakers with different mother tongues per 1,000 of total population.

This Table is important for our country where a large number of languages and dialects are spoken. Philologists are interested in this Table.

Appendix to Table C-V :

Statements showing percentage change in each decade (1911-61) of population speaking the three numerically most important languages in Andhra Pradesh viz., Telugu, Urdu and Rajasthani were prepared in the Registrar General's Office and they are printed as Appendix to this table (C-V). Enclosures to these statements showing the dialects included in the above three languages in each decade are also printed along with the statements.

The fly leaf prepared by the Linguist explaining the details of classification of languages as done by him is reproduced below.

Note 1

(i) The following mother tongues arranged in alphabetical order in Col. 1 of the table given below as per Table C-V have been classified in the Linguistic Survey of India. The Linguistic Survey of India Classification No. is mentioned against each mother tongue in Col. 3.

(ii) If in Col. 3 no Classification No. is given against any mother tongue of Col.1 then it would mean that the name refers to either old or middle Indo Aryan language or a language group or branch or family name from the Linguistic Survey of India.

(iii) Wherever a tongue is mentioned in Col. 3 it is to be understood that the mother tongue is either a

dialect or another name or form of the tongue mentioned against it in Col. 1 which in its turn has been classified by the Linguistic Survey of India in the appropriate place for that tongue.

(iv) If in Col. 1, there is a tongue which bears no classification number in the Linguistic Survey of India then in Col. 2 the name of the classified language or group will be given of which the mother tongue of Col. 1 is either a dialect or another name or form. In such a case the number of classified language of Col. 2 has been given in Col. 3.

(v) In Col. 2 standardized spellings according to Linguistic Survey of India has been given against each mother tongue of Col. 1.

TABLE C-VI

BILINGUALISM

TABLE C-VI

BILINGUALISM

This Table furnishes the details of bilingualism or the subsidiary languages known to each of the linguistic groups. This Table is prepared only for total population. In the State Table mother tongues without any subsidiary language are omitted.

The data in this Table are based on the entries made against Q. 7(b), any other language(s), of the individual enumeration slip. Of the two languages required to be noted against this question the first language was taken into consideration for the purpose of tabulation.

For the first time in the 1931 Census two questions on language were included, one on 'Mother tongue' and the other on 'other language'. The other languages were restricted to Indian languages only. In 1941 the wording of the second question was slightly modified as "Other Indian languages in common use". The following instructions were given to enumerator

in 1941. "It is not enough that a person should merely know the language and speak it occasionally. Second language can be entered only if it is habitually used by the person concerned." No information about foreign languages were collected except on English. In 1951 the restriction of habitual usage was eliminated and the language other than the mother tongue which a person commonly spoke was elicited. But it was restricted to one Indian language. In the 1961 Census it was sufficient if a person was able to communicate with others in other languages besides his mother tongue. The enumerators were instructed to record two such languages in order of importance according to the enumerated though for purposes of tabulation the first language was considered. The following statement gives the distribution of persons speaking different subsidiary languages per 1000 of total population.

Total Population	Total No. of persons returned as speaking a language subsidiary to the mother tongue	Proportion of subsidiary language speakers to total speakers							
		Telugu	English	Urdu	Hindi	Kannada	Tamil	Marathi	Oriya
1	2	3	4	5	6	7	8	9	10
1,000	108	56	25	9	8	5	2	2	1

Thus only 108 persons out of every 1000 persons speak a subsidiary language in addition to their mother tongue.

TABLE C-VII

RELIGION

TABLE C-VII

RELIGION

This table corresponds to Table D-II of the 1951 Census and indicates the distribution of population by religion for total, rural and urban areas.

In Censuses before 1951, it was the practice to show the distribution of population by religion down to the village or town level but since then this practice has been discontinued.

In 1872 Hindus and Muslims were shown separately and others grouped under "Other religions". In 1881 all religions were shown separately. In case of Hindus the data were classified by castes. In 1891 the data on religion, the sect of religion and the caste particulars of Hindus and Jains were collected. In the case of tribes living in forests and hills whose religious affiliations could not be ascertained, definitely, they were classified as "aboriginals". The racial origin of those other than Hindus, Jains and tribes was also ascertained. The Census questionnaire of 1901 contained two questions on the subject. The first dealt with the religious affiliation and the second with the caste of Hindus and Jains and tribe or race in the case of others. The sub-sects or sub-divisions were entered for Christians and for others the main name of the religion was entered. The special classification of aboriginals was given up and the name of tribe or caste as returned by the individual was entered. Particulars of race in the case of those other than Hindus, Jains and tribes were also collected. The same pattern was followed in 1911 and 1921. In 1931 sects and sub-divisions of all religions were entered and other questions on caste, tribe and race remained unchanged. In 1941 the question on sub-sects of religion was eliminated and the names of religions only were required to be recorded. The question on race, tribe and caste was retained. In 1951 the information on religion only was collected and the question on caste, or race of the people was given up as a matter of national policy.

In 1941 and the earlier Censuses, the primary sorting and tabulation were based on religion. In 1951 the economic classification of livelihood classes became the basis of tabulation and in the 1961 Census also economic classification formed the primary basis of the tabulation.

The particulars of religions which are clubbed with "Hindus", "Muslims" and "Zoroastrians" in this Table are given below :

8,622 persons, who returned their religions as detailed below, are included under "Hindus".

TABLE D-I

NON-INDIAN NATIONALS

TABLE D-I
NON-INDIAN NATIONALS

This Table gives the number of persons belonging to different foreign nationalities who were residents of Andhra Pradesh during the 1961 Census enumeration. This Table excludes Non-Indian Nationals who are employed in Foreign Embassies, Missions etc.

The nationals of Pakistan, Nepal, U.K., U.S.A., Burma and China represent 32.3%, 16.7%, 11.3%, 8.2%, 5.0% and 4.1% respectively of the total non-Indian nationals in the State.

Out of a total 3,701 non-Indian nationals enumerated in the State, 885 and 715 persons have respectively been returned from Hyderabad and Visakhapatnam districts. East Godavari, Krishna and Guntur districts with 319, 297 and 222 persons respectively follow in that order. The number of non-Indian nationals returned in other districts of the State is less than 200.

The distribution of 1000 non-Indian nationals in the State is given below.

Nationals of countries in Asia beyond India (including U. S. S. R.)		Nationals of countries in Europe (excluding U.S.S.R.)		Nationals of countries in Africa		Nationals of countries in America		Nationals of countries in Australia

Important countries in each continent are shown separately and nationals of the countries which have contributed insignificant numbers are grouped under "Elsewhere" in that continent. The details of these countries grouped under 'Elsewhere' have been furnished in the Appendix to this Table.

The question of nationality was introduced for the first time in 1951 Census and this Table corresponds to Table D-VI of 1951.

PLACE OF BIRTH

TABLE D-II
PLACE OF BIRTH

This table gives the number of migrants in the State as a whole and in each district classified by their place of birth.

In the D-Series tables, migration is solely determined by the concept of the place of birth, with the result that the true migration is often artificially inflated or re-migration to the place of birth is not accounted.

The places of birth have been classified as follows :

- A Born within India . Rural/Urban/Unclassifiable
- I Born within the State . Rural/Urban/Unclassifiable
- (a) Born in the place of enumeration . Rural/Urban/Unclassifiable
- (b) Born elsewhere in the district of enumeration . Rural/Urban/Unclassifiable
- (c) Born in other districts of the State . Rural/Urban/Unclassifiable
- II States in India beyond the State of Enumeration

B to F

Born in Countries in Asia beyond India (Including U.S.S.R.) /Europe/Africa/Two Americas/and Oceania

G Born at Sea

H Unclassifiable

Born within India includes those born in Sikkim also. No one was enumerated as Born at sea in this State.

Persons born outside the country are shown only in respect of some important countries and the remaining are grouped under 'Elsewhere'. The details of the countries shown under "Elsewhere" are presented in the supplement to Table D-II.

In the past Censuses, due importance was not given to migration. In 1881 its scope was confined to finding out the name of the district if the person was born inside the Province, the name of the district and Province or State if the person was born outside the Province and the name of the

Country or the State if the person was born outside India. The instructions given to the enumerators read as follows :

"Enter the name of the district where the person was born and add the name of the Province if he or she was not born in the Province in which his or her name was recorded. If the person was born outside India, the country will be named. No further detail is needed". The scope of the enquiry remained unchanged till 1951 when a separate question on Nationality was added. Till then the Nationality was presumed to be identical with the country of birth. Another change made in 1951 was the inclusion of the question on displaced personnel from Pakistan and the year of their arrival in India. Its aim was to find out the number of refugees and displaced persons who moved into India from Pakistan.

In Table D-IV of the 1951 Census, particular for A-I(a) & (b) put together were available as "Born in the District of enumeration". As such comparative figures for persons "born at the place of enumeration" and "born in the District other than the place of enumeration" cannot be had from Table D-IV of 1951 Census.

Of the total population in the State, 68.1% were born in the place of their enumeration only. This percentage also includes people who may have been away for long as well as short periods but have come back to their place of origin at the time of enumeration. The migrants as such account for the remaining 31.9%. The percentages of migrants according to their birth places are given below :

1. Born elsewhere in the District of enumeration 23.9%
2. Born in other districts of the State . 6.3%
3. Born in other States and Union Territories in India 1.6%
4. Born in other Countries beyond India and Birth place unclassifiable 0.1%

Of the total migrants from other States and Union Territories, Mysore, Madras, Maharashtra, Orissa and Kerala States have respectively contributed 31.4%, 29.4%, 16.9%, 7.3% and 4.3%.

Of a total of 19,198 migrants from other countries Burma, Pakistan and Nepal account for 6,923, 6,515 and 1,860 persons respectively.

TABLE D-III

**MIGRANTS CLASSIFIED BY PLACE OF BIRTH AND DURATION
OF RESIDENCE IN PLACE OF ENUMERATION**

TABLE D-III
MIGRANTS CLASSIFIED BY PLACE OF BIRTH AND DURATION OF RESIDENCE IN PLACE OF ENUMERATION

This is a new table introduced in the 1961 Census and gives the duration of residence at the place of the enumeration of the migrants given in Table D-II. The particulars are given with Rural/Urban breakup. The particulars of duration of residence have also been given separately for the following categories :

- | | |
|--|----------------------------|
| 1. Born elsewhere in District of enumeration | Rural/Urban/Unclassifiable |
| 2. Born outside the District but within the State of enumeration | Rural/Urban/Unclassifiable |
| 3. Born in other States (State-wise) | Rural/Urban/Unclassifiable |
| 4. Born in Nepal | |
| 5. Born in Pakistan | |
| 6. Born in other countries outside India | |
| 7. Birth place unclassifiable | |

The durations of residence have been grouped under the following 6 categories.

- (i) Less than 1 year
(ii) 1-5 Years

- (iii) 6-10 Years
(iv) 11-15 Years
(v) 16+ Years; and
(vi) Period not stated

As in the case of age, the duration of residence also has been taken as the number of completed years of residence of the person at the place of enumeration. The periods of temporary absence on leave or holiday or tour or business were not taken into account in estimating the duration of residence. The persons, in whose cases the duration of residence was not specified have been classed under the category "Period not stated".

This Table is intended to supplement the information given in Table D-II relating to birthplace, for a detailed study of in-migration. The group 11-15 years will yield information on population displaced by the partition. As stated in para 1 above, the particulars for persons born in Pakistan have been given separately.

The following statement shows the percentage distribution of male and female immigrants in different periods of residence at the place of enumeration.

TABLE D-IV
MIGRANTS TO CITIES CLASSIFIED BY SEX, BROAD AGE-GROUPS, EDUCATIONAL LEVELS
AND IN CASE OF WORKERS ALSO BY OCCUPATIONAL DIVISIONS AND GROUPS

This is a new table introduced in the 1961 Census and is prepared only for cities. The workers and non-workers have been presented according to broad age-groups and cross tabulated for educational levels. The non-agricultural workers have been further distributed into occupational groups.

This table gives an idea of the occupations that attract migrants to cities. The educational standards indicate the skilled and unskilled workers, among the migrants.

The description of the occupational divisions and groups adopted in the table is given below.

National classification of occupations showing divisions and groups

TABLE D-V

CITIES SHOWING POPULATION BORN LOCALLY, MIGRANTS FROM RURAL
AREAS AND MIGRANTS FROM OTHER TOWNS AND CITIES

TABLE D-V

**CITIES SHOWING POPULATION BORN LOCALLY, MIGRANTS FROM RURAL AREAS AND
MIGRANTS FROM OTHER TOWNS AND CITIES**

This is a new Table introduced at the 1961 Census and gives the particulars of migrants separately to the 11 cities in the State (population 1 lakh and above).

The particulars of immigrants to the cities have been separately given for those

- (i) Born in RURAL/URBAN areas of the District,
- (ii) Born in RURAL/URBAN areas outside the District but within the State, and
- (iii) Born in RURAL/URBAN areas outside the State.

These particulars have been separately given for immigrants who have been resident in the city for (i)

less than 3 years and (ii) 3 years and more. The immigrants whose birth place is "Other countries" or "Unclassifiable" or those whose birth place could not be classified as to whether it was "RURAL" or "URBAN" or those in whose cases, the period of their duration in the city was not stated, have not been shown in the main Table. Hence the total population shown against each city excludes the particulars mentioned above.

This Table gives an adequate idea of acceleration or deceleration of the volume of migration in terms of 3 years and more. Whether a particular city has been able to exert its pull or attraction for migrants depends upon whether the volume of migration has been more in the last 3 years or not than before.

TABLE D-VI

**DISTRIBUTION OF INDUSTRIAL CATEGORIES OF WORKERS AND
NON-WORKERS BY PLACE OF BIRTH**

TABLE D-VI
DISTRIBUTION OF INDUSTRIAL CATEGORIES OF WORKERS AND NON-WORKERS BY
PLACE OF BIRTH

This is a new table introduced at the 1961 Census and gives the Industrial classification of Workers and Non-Workers by place of Birth. The particulars are given for Total/Rural/Urban also for the 11 cities in the State.

The classification of the place of birth as given in the Table D-II has been followed in this table.

Rural/Urban/Unclassifiable given in Col.2 refers to the place of birth and not the place of enumeration.

The following procedure has been adopted in the printing with a view to reducing the bulk of the table.

The RURAL part of the table is presented only for the following categories.

- A. I Within the State of Enumeration
 - a Born in place of Enumeration
 - b Born elsewhere in districts of Enumeration
 - c Born in other districts of the State
- II 4 numerically most important States of immigration (may be adjoining or distant).

The lines containing the figures against "Unclassifiable" in Col. 2 have been committed in all the 3 parts of the Table, as the figures are less than 5% of total population in the particular main group in col. 1 (A.I, A.II etc.).

Appendix I to Table D-VI

In the main table (Total), States with less than 1% of the total immigrants under Head II (States in India beyond the State of enumeration) are deleted and presented in the Appendix I.

The corresponding figures of these State in the main table (Urban) are also omitted and shown in the Appendix I.

Appendix II to Table D-VI

The particulars of the countries grouped under "Elsewhere" in table D-VI are presented separately in the Appendix II to Table D-VI.

A statement showing the distribution of migrants in the industrial categories of workers and non-workers, according to birth places is given on the next pages.
