NOTE

Part II-B, designed for producing the nine economic tables of the 1961 Census based on the general population, has been organised into two sub-parts for convenience of presentation. This sub-part is the second of the two, the first being already issued.

Although questions on economic characteristics of the population have always enjoyed a measure of prominence in Indian Censuses ever since 1872 (a reproduction of extracts from the questionnaires will be found overleaf), the classification schemes and the concepts of participation have of necessity undergone some variations from time to time to reflect the major changes in economy and the shifts from traditional skills to the industrial ones. Thus in 1901 we moved on from the customary one-way classification of the population between those who had occupation and those who did not have any to a clearer enunciation of the theme of principal and subsidiary occupation and of means of subsistence of dependents and introduced in 1931 a further refinement in the notion of dependency by bringing in an intermediate category of economic semidependents called partly dependents in 1941 and earning dependents in 1951 in which later year the concept of the ICEC was evolved. The adaptations notwithstanding, an element common to all the schemes was the treatment of income as the determining factor of economic characteristics—a theory unequivocally eschewed at the 1961 Census which, for the first time, gave up the concept of dependency and livelihood and adopted the concept of work for the production of goods and services. Another distinguishing feature of the 1961 scheme, full details of which are redundant here for they have already been entered into in the Introductory Note to Part II-B (i), is the application of a two-fold classification of all non-agricultural workers by occupation, i. e., function or exact work, and industry, i. e., branch of economic activity.

This principle of two-fold classification finds its application in table B-V which, coming first in this book and occupying its bulk, gives the occupational classification of persons by Families of the NCO, cross-tabulated by the main industrial categories adopted for the primary economic classification. Table B-VI, prepared for urban areas only, shows the population under each occupational Division classified by broad age-groups and educational levels while table B-VII presents a cross-tabulation between specified principal and secondary activities. Tables B-VIII and B-IX relate to the non-working population, the former to the unemployed and the latter to the economically inactive population generally. To each table a fly-leaf has been added explaining conceptional and procedural matters. Data are presented down to the district level.

Compilation of census statistics is so essentially a matter of concerted labour on the part of an army of workers that it is seldom possible to pick up from amongst them a few for special mention. I thank all my colleagues for the hard work they have had to do against many odds not the least of which is the absolute insecurity of a census job.

OCCUPATIONAL CLASSIFICATION BY SEX OF
PERSONS AT WORK OTHER THAN CULTIVATION

**TABLE B-V—OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK
OTHER THAN CULTIVATION**

This table gives the Occupational Classification of persons who are working in the non-agricultural sector of the economy. For this purpose the National Classification of Occupations (reproduced in Annexure I to this fly-leaf) has been generally followed, subject to the modifications stated in paragraphs 5 to 8 below. Data are furnished, by Sex, for Total and Urban Population separately, down to each Occupational Division, Group and Family. Figures for Rural Population may be obtained by subtracting 'urban' from 'total'. Under each Division, Group and Family separate figures have been furnished for persons working in the different categories of industry adopted for the Industrial Classification. For convenience of reference, the categories have been explained in Annexure II.

2. It was for the first time in 1961 Census that data on the economic activity of a person at work other than cultivation were classified separately according to the returns for Industry and Occupation. The economic classifications followed in the earlier Censuses were based on neither a purely Industrial nor a purely Occupational Classification of the population, but were combination of both. This table, therefore, will be of special interest and will serve the purpose of a study of the cross-relations between Industry and Occupation.

3. Incidentally, it will be useful to note that the exact implication of the term 'Occupation' in the present Census differs from the concept attributed to it in the past Censuses when it used to indicate generally the means of subsistence or livelihood of the supporting sector of the economy. It is only in the 1961 Census that the term has acquired a precise connotation as the 'function' or 'exact work' which a person performs *e.g.*, fitter, carpenter, etc. whereas the term 'industry' has been used to denote the particular sector of economic activity in which the worker is engaged, such as 'textile industry', 'automobile industry' etc.

4. For economy in space Families having less than 1 per cent of the workers of the respective Division (less than 0.5 per cent in case of Families in Division 7-8) have not been shown in the main table, but are given in an Appendix to the table, Divisions thus affected have been marked with an asterisk (*) in the main table.

5. Occupational Families 400 and 401 in the National Classification of Occupations represent Cultivators (Owners) and Cultivators (Tenants) respectively. As these two types of activity are covered by Category I (Workers engaged at Cultivation) these Occupational Families are

beyond the purview of this table. Similarly, this table will not show figures for Occupational Family 414—Agricultural Labourers, covered by Category II.

6. According to the detailed National Classification of Occupations, Cultivator (Vegetables) and Cultivator (Fruits) are classified under Family 400. But the definition of 'Cultivation' for purposes of the Census excluded vegetable and fruit growing from its scope and so Family 409 was allotted to the Occupation 'Vegetable and Fruit growing' as decided by the Registrar General.

7. In the National Classification of Occupations, Occupational Group XO is assigned to Workers without Occupations. The three Occupational Families under this group are X00—Workers without Occupations : Matriculation and above, X08—Workers without Occupations : Literates, and X09—Workers without Occupations : Others. Now, persons who are not actually at work but are seeking employment have been treated as Non-workers in the 1961 Census. Occupational Group XO and its three Families have, therefore, been excluded from this table.

8. It is necessary to point out other minor variations from the National Classification of Occupations in the Occupational Code Structure followed for the purpose of this table. The International Labour Organisations, to whom the Standard Occupational Classification was referred, made certain comments on it. As a result of the examination of the comments the following changes were made in the standard classification :

Family 010	Chemists except Pharmaceutical Chemists
Family 047	Optometrists and Opticians
Family 069	Jurists and Legal Technicians, n. e. c. (including Petition Writers) (Family 063 was omitted)
Family 072	Statisticians and Actuaries
Family 073	Geographers (Family OX4 was omitted)
Family 202	Ticket Sellers, Ticket Inspectors including Ushers and Ticket Collectors (excluding those on moving transport)
Family 211	Typists
Family 280	General and other Ministerial Assistants and Clerks

- Family 289 Miscellaneous Office Workers including Record Keepers, Muharrors, Despatchers, Packers and Binders of office papers
- Family 290 Office attendants, Ushers, Hall porters, etc. n.e.c.
- Family 660 Inspectors, Supervisors, Station Masters and Permanent Way Inspectors
- Family 673 Teleprinter Operator (New)
- Family 690 Ticket Sellers, Ticket Inspectors including Ushers and Ticket Collectors on moving transport
- Family 771 Shipwrights and Body Builders (Wood)

9. It will be seen that most of the changes are merely explanatory in nature.

10. As already stated, it was for the first time in the 1961 Census that distinct concepts were enunciated for 'industry' and 'occupation'. Although coding for Industry and Occupation was done simultaneously, classification of the working population by industry was finalised at the early stages of the sorting operation and the figures according to the Industrial Classification were published before the Occupational Classification and the cross-tabulation between Industry and Occupation were completed. When the tabulation results of Table B-V became available, certain cases of apparently incompatible cross-classifications between Industry and Occupation came to notice. It was difficult, for example, to visualize that there should be such occupations as Judges and Magistrates (Occupational Family 060), Ship Engineers (601) etc. in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities (Industrial Category III); Architects (Occupational Family 000), Meteorologists (013), Teachers (052) in Household Industry (Category IV); Historians, Archeologists, Political Scientists and Related Workers (078) in Manufacturing other than Household Industry (Category V); Geographers (073), Movie Camera Operators (970),

Embalmers and Undertakers (990) in Construction (Category VI); Physiologists (034), Village Officials (104) in Trade and Commerce (Category VII); Biologists and Animal Scientists (020), Miners (500), Barbers, Hairdressers and Beauticians (940) in Transport, Storage and Communications (Category VIII) and Pawn-Brokers (341), Hunters (420), Tram Car Drivers (640) in Other Services (Category IX). Misclassifications of this nature have occurred in Table B-V due to one or more of the following reasons: (i) incomplete, obscure or wrong entries in the Enumeration Slip, (ii) error in the assignment of Industrial code number, (iii) error in the assignment of Occupational code number, (iv) error in the sorting for Industrial Classification, (v) error in the sorting for Occupational Classification and (vi) error in tabulation. Little could be done to remove the defects in enumeration records. Errors due to mistakes in Industrial Coding or Industrial Classification could also no longer be rectified, as the Industrial Classification was already made final. Errors caused by wrong tabulation were corrected with reference to the Sorters' Tickets and Compilers' Posting Statements. As for the other errors, i.e., those caused by mistakes in Occupational Coding or Occupational Classification, an attempt was made to isolate as far as possible those Enumeration Slips in respect of which the errors were committed. This was not altogether an easy task, because the slips had already undergone a number of hand sorting operations and were packed in thousands in boxes made up according to sex and industrial category.

11. It is for these reasons that in the cross-classification shown in this table between Industry and Occupation the desired degree of perfection could not be achieved. It is, however, required to be stressed that the extent of the misclassifications is by no means of such a magnitude as is likely to interfere with the usability of the table. It has been estimated that taking into consideration all conceivable cases of classification caused by the six factors enumerated above, the number of workers affected is hardly 1.47 per cent of the working population, i.e., 0.23 per cent of the total population.

ANNEXURE I NATIONAL CLASSIFICATION OF OCCUPATIONS (CODE STRUCTURE)

which classifies occupations into

331 Occupational Families (three-digit code numbers)

ANNEXURE II

INDUSTRIAL CLASSIFICATION OF WORKERS

At the 1961 Census the working population has been classified in the following nine broad Industrial Categories, viz., those engaged :

- I—As Cultivators ;
- II—As Agricultural Labourers ;
- III—In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities ;
- IV—At Household Industry ;
- V—In Manufacturing other than Household Industry ;
- VI—In Construction ;
- VII—In Trade and Commerce ;
- VIII—In Transport, Storage and Communications ; and
- IX—In Other Services.

Category I

This category includes both owner cultivators and tenant cultivators. Along with workers doing manual work on land are also included persons who are engaged in active supervision or direction of cultivation. All persons working in cultivation of land on which they have either ownership or tenancy rights are included in this category.

Category II

All other persons working on land as labourers on wages without holding any right upon the land are classified as agricultural labourers and included in the second category.

Category III

Workers in mining, quarrying, livestock, forestry, fishing, hunting, plantations, orchards and allied activities are included in this category.

Category IV

“Household Industry” is defined as an industry conducted at home in urban areas or within the village in rural areas by the head of the household himself and/or mainly by the members of the household. A household industry is not run on the scale of a registered factory and relates to processing, servicing, repairing or making of goods. This may include sale of goods, but should not be confined merely to buying and selling. Thus, the main criteria for household industry are its smaller scale, its being run at home in urban areas and within the village in rural areas and the participation of the head of the household and/or one or

more members of the household. Professional, personal and such other ‘Services’ are not covered by this definition, although they may be run at home. A person working as an employee in another person’s household industry has also been treated as working at household industry.

Category V

“Manufacturing” includes all types of production, processing, servicing or repairing of goods. This category does not include production, processing, etc., which is carried on at household level and is classified as household industry.

Category VI

This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph and telephone lines, waterways, reservoirs, etc.

Category VII

This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estate and properties, stocks and shares, insurance, money-lending, banking, etc.

Category VIII

This category includes workers engaged in transport activities by air, rail, road and water and in services incidental to transport such as packing, carting, loading, unloading etc. Workers engaged in storage, warehousing and communication services such as Posts, Telegraphs, Telephones, Wireless Signalling, Information and Broadcasting are also included in this category.

Category IX

This category includes (i) Public Utility Services like electricity, gas or water supply and sanitary services ; (ii) Central, State, Quasi-Governments or Municipal employees in administrative departments or offices ; (iii) Professional services ; (iv) Trade or labour associations, recreational and personal services ; and (v) Services not elsewhere classified, etc.

The non-working population has been classified as the tenth category.

No age-limit has been applied for recording an individual’s economic activity. The workers of each category include workers of all ages.

OCCUPATIONAL DIVISIONS OF PERSONS AT
WORK OTHER THAN CULTIVATION CLASSIFIED
BY SEX, BROAD AGE-GROUPS AND EDUCA-
TIONAL LEVELS IN URBAN AREAS ONLY

TABLE B-VI—OCCUPATIONAL DIVISIONS OF PERSONS AT WORK OTHER THAN CULTIVATION CLASSIFIED BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS IN URBAN AREAS ONLY

This table is prepared only for Urban areas of the State/Division/District. For the principle governing rural-urban classification, attention is invited to the Fly leaf to Table B-II.

2. In this table the working population (other than those working as Cultivators or Agricultural Labourers) of the urban areas has been classified by Occupational Divisions of the National Classification of Occupations and by Sex. Literate workers have been further classified into different Educational levels and into the following broad Age-groups : 0-14, 15-34, 35-59, 60+ and 'Age not stated'. The Educational levels are :

Literate (without educational level)
 Primary or Junior Basic
 Matriculation or Higher Secondary
 Technical diploma not equal to degree
 Non-technical diploma not equal to degree
 University degree or post-graduate degree other than technical degree
 Technical degree or deploma equal to degree or post-graduate degree :
 Engineering
 Medicine
 Agriculture
 Veterinary and Dairying
 Technology
 Teaching
 Others

3. The Census concept of literacy has been explained in the Fly-leaf to Table B-III, and the limitations with which the National Classification of Occupations has been followed in the Occupational Code Structure for the Census have been discussed in the Fly-leaf to Table B-V.

4. The table will reveal Educational level prevailing in different Occupations and will show the manner of utilization of educated man power.

5. Lines with nil entries have been omitted. All the Occupational Divisions are spelt out below in terms of their description.

Divisions

0 Professional, Technical and Related Workers.
 1 Administrative, Executive and Managerial Workers.
 2 Clerical and Related Workers.
 3 Sales Workers.
 4 Farmers, Fishermen, Hunters, Loggers and Related Workers*.
 5 Miners, Quarrymen and Related Workers
 6 Workers in Transport and Communication Occupations.
 7-8 Craftsmen, Production Process Workers, and Labourers not elsewhere classified.
 9 Service, Sport and Recreation Workers.
 X Workers not classifiable by Occupation

*Excluding Families 400, 401 and 414.

TABLE B-VII

PART A—PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY (ii) AS CULTIVATOR OR (iii) AS AGRICULTURAL LABOURER

PART B—INDUSTRIAL CLASSIFICATION BY SEX OF PERSONS WORKING IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE WHO ARE ALSO ENGAGED IN HOUSEHOLD INDUSTRY

All the economic tables presented in this volume, except the present table, are based on the principal work of the person enumerated. In this table a cross-tabulation has been done between certain specified principal and secondary activities.

2. In the enumeration for the 1961 Census four questions were asked on the productive activity of the person enumerated. These questions were numbered 8, 9, 10 and 11 in the Enumeration Slip and related respectively to Cultivation, Agricultural Labour, Work at Household Industry and Other Work. The following instruction regarding principal and secondary work was issued to the Enumerators :

“ After you have filled up the answers to questions 8 to 11 if you find that in the case of any person more than one productive activity has been recorded, *i.e.*, more than one of the questions, 8, 9, 10 or 11, has been filled up by some work you should ask him which one of the activities that has been recorded for him is his principal work. The principal work is the one on which the person spends most time. Put a ring round the number of the question 8, 9, 10 or 11, according to the work on which the person says he spends most time. You should invariably ask for the principal work where more than one work is recorded and put a ring round the question relating to the principal work.

It may be that in a few cases you find that you have recorded more than two productive activities in questions 8 to 11, *i.e.*, more than two of the questions, 8 to 11, would have been filled up by some work. In such cases you should first ascertain the principal work, *i.e.*, the one on which the person spends most time and put a ring round the number of the question. You should then ascertain the work which is the next in importance to his principal work, *i.e.*, the work after his principal work which occupies most time. You should put a tick against the question number of that work on the right hand side of the question number.

The ring and the tick should be put clearly so that any difficulty will not be felt to recognise them clearly.”

3. If the person enumerated had two or more economic activities all of which related to Question No. 11 (other work), there was no means of recording more than one work against that question. In such cases the work on which the person devoted more time was recorded. This meant that only persons who had principal or subsidiary occupation as Cultivators or Agricultural Labourers or in Household Industry could have a secondary occupation recorded.

4. It will be seen that the cross-tabulation between principal and secondary work has been confined to selected activities only. In Part A the cross tabulation is for persons whose principal and secondary work both fall in any two of the following three types of activity : (i) Cultivation, (ii) Agricultural Labour or (iii) Household Industry. Part B of the table gives the data for those persons who are principally engaged in Non-household Industry, etc., but also work in a Household Industry. It thus shows the extent by which Household Industry supplements Non-household Industry, Trade, Business, Profession or Service.

5. No cross-tabulation has been done between principal work in agricultural sector and subsidiary work in Non-household Industry, etc., and *vice versa*. There has also been no tabulation for principal work in Household Industry supplemented by secondary work in Non-household Industry etc.

6. In both parts of the table figures are shown for Total, Rural and Urban Population separately. Divisions and Major Groups refer to the Standard Industrial Classification (descriptions overleaf).

7. The corresponding table for 1951 Census was Union Table B-II where Secondary Means of Livelihood of Self-supporting Persons and Earning Dependants were shown.

TABLE B-VII PART A—PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY (ii) AS CULTIVATOR OR (iii) AS AGRICULTURAL LABOURER

This table presents a cross-tabulation between specified principal and secondary activities. For purposes of the Census, principal work was taken to be the one on which a person spent most time. In this part of the table the cross-tabulation given is for persons whose principal and secondary work both fall in any of the following three types of activity :

- (i) Cultivation
- (ii) Agricultural Labour and
- (iii) Household Industry

2. Principal work at Household Industry has been classified by Divisions and Major Groups of the Standard Industrial Classification. For description

of the Divisions and Major Groups reference is invited to page 520.

3. Figures have been shown for Total, Rural and Urban population in three consecutive lines under each type of Principal Work. Whenever there are no figures for the Urban population the line for Urban has been omitted.

4. For economy in space, Major Groups of Household Industry where persons having secondary work as Cultivators or as Agricultural Labourers are less than 5 per cent of the persons having the Major Group as principal work, have not been shown in this table, but are given in the Appendix to this table. Divisions thus affected are marked with an asterisk (*).

**TABLE B-VII PART B—INDUSTRIAL CLASSIFICATION BY SEX OF PERSONS WORKING
IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR
SERVICE WHO ARE ALSO ENGAGED IN HOUSEHOLD INDUSTRY**

This table presents a cross-tabulation between specified principal and secondary activities. For purposes of the Census, principal work was taken to be the one on which a person spent the most time. In this part of the table the cross-tabulation given is for those persons who are principally engaged in Non-household Industry, Trade, Business, Profession or Service, but also work

in a Household Industry. It thus shows the extent by which Household Industry supplements Non-household Industry, etc.

2. Figures are shown for Total, Rural and Urban Population separately. Divisions and Major Groups refer to the Standard Industrial Classification. Major Groups with nil entries have been omitted.

PART A—PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS IN URBAN AREAS ONLY

PART B—PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX AND EDUCATIONAL LEVELS IN RURAL AREAS ONLY

In the 1961 Census a significant departure was made from the earlier Censuses in the concept for the collection of economic data. Discarding the earlier criteria of income or economic independence stress was laid in 1961 on *work*, so that the population was divided into two classes : (i) all people who work, including family workers who do not receive any income and (ii) those who do not work including rentiers etc., who earn but do not work. The principles of classification have been broadly outlined in the Note at the beginning of Part II-B(i). All the economic tables from B-I to B-VII relate to the Workers. Tables B-VIII and B-IX are on the Non-workers.

2. The Non-workers for the purpose of the 1961 Census included the following :

- (i) a full-time student or child attending school who did no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business ;
- (ii) a person engaged in unpaid home duties (like house-wife or other adult female) who did no other work, such as make articles at home for sale or wages, not help regularly even part-time in family cultivation, industry, trade or business ;
- (iii) any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age ;
- (iv) a retired person who was not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he did not have to work and who did no other work ;
- (v) a beggar, vagrant or independent woman without indication of source of income

and others of unspecified source of existence ;

- (vi) a convict in jail (an undertrial prisoner has been shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution ;
- (vii) a person who had not been employed before but was seeking employment for the first time ; and
- (viii) a person employed before but now out of employment and seeking employment.

3. The present table deals with the unemployed persons, *i.e.*, those who are included in the last two categories of Non-workers, *viz.*, those not employed before but seeking employment for the first time and those employed before but now out of employment and seeking employment. Part A of the table relates to Urban areas only. In this part unemployed persons of age 15 and above have been classified by their Educational levels, Age-groups and Sex. Separate figures are shown for persons seeking employment for the first time and for persons who were employed before but are now out of employment and seeking work. In the first case the age-groups shown are 15-19, 20-24, 25-29, 30-34, 35+, and Age not stated. For the second category of unemployed persons the age-groups are : 15-19, 20-24, 25-34, 35-44, 45-59, 60+ and Age not stated. The Educational levels in both the cases are the same as in Table B-III Part A.

4. Part B relates to Rural areas only. In this part figures for total unemployed persons aged 15 and above have been clubbed together. There is no classification by Age-groups, and the Educational levels are confined to Literate (without educational level), Primary or Junior Basis, and Matriculation and above.

5. This table is useful for assessing the extent of educated unemployment and also the quality and extent of available man-power.

**TABLE B-VIII PART A--PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX,
BROAD AGE-GROUPS AND EDUCATIONAL LEVELS IN URBAN AREAS ONLY**

This part of the table relates to Urban areas only. It presents data for unemployed persons of age 15 and above classified by Educational levels, Age-groups, and Sex. By unemployed persons are meant two categories of Non-workers, *i.e.*, those who were not employed before but are seeking employment for the first time, and those employed before but now out of employment and seeking employment. Separate figures have been presented

for each of these two categories of unemployed persons. The age-groupings shown for the first category are 15-19, 20-24, 25-29, 30-34, 35+, and Age not stated. For the second category of unemployed persons the age-groups are: 15-19, 20-24, 25-34, 35-44, 45-59, 60+, and Age not stated.

2. The Educational levels adopted in both the cases are same as in Table B-III Part A.

**TABLE B-VIII PART B—PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX
AND EDUCATIONAL LEVELS IN RURAL AREAS ONLY**

This part of the table relates to Rural areas only. Like Part A of the table, this part also presents figures for unemployed persons of age 15 and above, but the classification by Age-groups has not been done. Figures for the two different categories of unemployed persons, viz., those who were not employed before but are seeking employment for the first time, and those employed before but now out of employment and seeking

employment have been clubbed together.

2. The classification by Educational levels is confined to the following :

Illiterate

Literate (without educational level)

Primary or Junior Basic

Matriculation and above.

**PERSONS NOT AT WORK CLASSIFIED BY SEX,
BROAD AGE-GROUPS AND TYPE OF ACTIVITY**

TABLE B-IX—PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD AGE-GROUPS AND TYPE OF ACTIVITY

This table supplements the information given in Table B-I. In Table B-I, the Workers and Non-workers were classified into five broad age-groups, and in each age-group the Workers were further classified into nine different categories of industrial activity. In the present table, for the same age-group classification (i.e., 0-14, 15-34, 35-59, 60+, and Age not stated), the non-working population in each age-group is further classified into different types of activity. The eight different types of activity for a Non-worker are :

- (i) a full time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business ;
- (ii) a person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, not help regularly even part-time in family cultivation, industry, trade or business ;
- (iii) any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age ;
- (iv) a retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work ;
- (v) a beggar, vagrant or independant woman without indication of source of income and others of unspecified source of existence ;
- (vi) a convict in jail (an undertrial prisoner has been shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution ;
- (vii) a person who has not been employed before but is seeking employment for the first time ; and
- (viii) a person employed before but now out of employment and seeking employment.

2. This is entirely a new table for the 1961 Census. In no previous Census was this type of tabulation attempted, nor, for that matter, was

any question asked to ascertain how Non-workers spent their time.

3. This table will furnish important data on different aspects of the socio-economic life of the State. As for example, separate data of school going children by age-groups will be important from the point of view of those who plan and control the field of education. Figures will be available in respect of housewives who do the very important job of looking after the household affairs but have not been classified as doing an economically productive work. This table also furnishes useful data for that sector of the economy which consists of those persons who earn income without doing any work.

4. It should be clearly understood that the 'Inmates of Institutions' shown in this table do not correspond to the 'Institutional Population' figures shown in Appendix III to Table A-I (printed in Part II-A—General Population Tables Volume). The figures in the Primary Census Abstract represent the number of persons enumerated in penal, charitable or mental institutions, hostels, hotels, hospitals, boarding houses, etc., irrespective of the means of livelihood of these persons. But a person was classified as an Inmate of Institution for purposes of this table on different considerations. For an undertrial prisoner enumerated in a jail, he was returned not as a Non-worker, but for the work or kinds of work he was doing before he was apprehended. Similarly a person temporarily in hospital or a similar institution was recorded for the kind of work he was doing before he was admitted into the hospital or institution. But a convict in a prison, or a long term inmate of a penal, charitable or mental institution was classified as a Non-worker under the group 'Inmates of Institutions'.

5. It is stated here by way of clarification that the returns of whole time students at comparatively higher age-groups should not be considered unusual. These returns generally represent those persons who had discontinued their studies early in life on financial reasons for taking up odd jobs, and then reverted again to schools or colleges as soon as they were able to lay by small resources to finance their education. There may also be widowed or unencumbered women who re-enter schools or colleges at higher ages.

6. The total absence of male figures under the head 'Household duties' needs a little explanation. In the Instructional Booklet issued by the Registrar General, India, on Enumeration, the following

direction was given about the circumstances under which a person could be returned as a Non-worker under the Category HW (Housewives) :

"For a person engaged in unpaid home duties (like housewife or other adult female) who does no other work such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business—write HW."

7. It was noticed that by way of illustrating the types of persons who could be returned as HW, the Registrar General mentioned "Housewife or other adult female".

8. In another context, in connection with filling up answers to Questions 11(a) and 11(b) of the Enumeration Slip, the Registrar General had stipulated that "in the case of married or grown-up women who do any of the work mentioned above in addition to the usual household duties such work should be fully described and HW written in brackets after the full description". Accordingly, as the meaning of the term "Housewife" as given in the Chambers's Dictionary is "the mistress of a house ; a female domestic manager", the Enumerators were directed not to record any male under the Category of "Housewife". An adult female, for purpose of this classification, was a female of and above the age of 18 years.

9. No male will, therefore, be found under the Category of "Household duties" in West Bengal or Sikkim.

10. A study of the relationship between the total number of full time students in age-group 0-14 as revealed by this table, and the total number

of literates in the same age-group as per Table C-III (printed in Part II-C (i)—Social and Cultural and Tables Volume) will be of great interest. The concept of literacy as adopted for the purpose of the 1961 Census has already been defined in the Fly-leaf to Table B-III. It will follow from that definition that literates in the age-group 0-14 years are drawn from three sections of children in this age-group. The first section consists of a portion and only a portion of the student community. The second section consists of children who become literates at home, without attending any school and the third section consists of children who do not remain students till they attain the age of 14 years but give up study after becoming literate. Generally, the students reading in Primary Schools form a substantial portion of the student community in the age-group 0-14 years and the proportions of children who become literate without attending schools and those who do not continue study till they attain the age of 14 years together do not offset the number of children reading in the Primary Schools. As children reading in Primary Schools are overwhelmingly illiterate, the literates should generally be less than the students in the age-group 0-14 years. This is in fact the actual situation in every district of West Bengal if the student community in the age-group 0-14 years is viewed as a whole and not divided by Sexes or by Rural-Urban classification. The peculiar phenomenon of literates being more than the students in the age-group 0-14 years is observed in a few districts only among girls and that also in Urban areas. The proportion of the home educated is obviously larger among the literate girls than amongst literate boys.
