CORRIGENDUM
CENSUS OF INDIA, 1961
VOLUME IV
BIHAR

Part II-A—Flyleaf to Union Primary Census Abstract—

Add the following to the penultimate paragraph on page 350 :

It has been discovered subsequently that the figures under Scheduled Castes 'Unclassified' include 31,909 persons belonging to Bhuiya or Bhumij Caste wrongly returned as Scheduled Caste from districts where, according to the aforesaid Presidential Order, they are not so. These 31,909 persons are distributed as indicated below :

Bhuiya				Bhumij			
District		Persons		District		Persons	
1. Monghyr	..	..	4	1. Santal Parganas	..	10	
2. Bhagalpur	..	..	4	2. Singhbhum	..	4	
3. Purnea	..	..	5				
4. Santal Parganas	..	..	78				
5. Hazaribagh	..	..	4,260				
6. Dhanbad	..	..	26,512				
7. Singhbhum	..	..	1,032				
Total	..	..	31,895				

Thus, while 31,909 persons have wrongly been returned as belonging to Scheduled Castes in the above districts, 1 male and 13 females have been left out by mistake from the population of Scheduled Tribes.

As a result of the above mistake, the following corrections may be incorporated in the tables on pages 351 to 353:

Page no.	State/District/Town	Col. no.	For	Read
351	Bihar State	3	9	8
		5	10	9
	Hazaribagh district	3	11	10
		5	12	10
	Dhanbad district	2	19	16
		3	15	11
		4	18	17
		5	17	14
	Dhanbad (M)	3	6	5

Page 352, Sub-para of Para 1 may be substituted as follows:

Dumarkunda (31 per cent), Angarpathar (30 per cent), Bodh Gaya (29 per cent), Loyabad (26 per cent), Chaitudih (25 per cent), Bhowrah (24 per cent), Latehar (24 per cent), Kargali (24 per cent), Sijua (23 per cent), Tisra (21 per cent), Jainagar (21 per cent), Hussainabad (21 per cent), Kerkend (20 per cent), Chirkunda (20 per cent), Dalsinghsarai (20 per cent), Rajgir (19 per cent), Hajipur (19 per cent), Jasidih (19 per cent), Hisua (18 per cent), Dumra (18 per cent), Jamtara (17 per cent), Jamadoba (16 per cent), Kumardhubi (16 per cent), Murliganj (16 per cent), Jogabani (16 per cent), Khagaul (15 per cent), Mokameh (15 per cent), Bakhtiarpur (15 per cent), Sherghati (15 per cent), Sheikhpura (15 per cent), Bermo (14 per cent), Fatwah (14 per cent), Warisaliganj (14 per cent), Mahnar Bazar (14 per cent), Barbiga (14 per cent), Jamui (14 per cent), Jhajha (14 per cent), Nirmali (14 per cent), Dinapur Cantt. CENSUS OF INDIA 1961

VOLUME IV

BIHAR

PART II-A GENERAL POPULATION TABLES

S. D. PRASAD
of the Indian Administrative Service
Superintendent of Census Operations, Bihar

PUBLISHED BY THE MANAGER OF PUBLICATIONS, DELHI
PRINTED AT THE BIHAR SECRETARIAT PRESS, PATNA
1963

Price—Rs. 9.05 or 21 sh. 2 d. or \$ 3.26

THE 1961 CENSUS PUBLICATIONS

The Census Publications for Bihar relating to the 1961 Census will form part of the all-India series called "Census of India, 1961". In this series each State or Union Territory will have a volume number and all publications relating to that State or Union Territory will be primarily denoted by the volume number. Bihar has been allotted Volume no. IV. All publications relating to Bihar will, therefore, be denoted in terms of Parts to Volume IV, and have uniform size, demy quarto $8\frac{3}{4}'' \times 11\frac{1}{4}''$.

The various Parts relating to the Census Report, Volume IV—Bihar, are indicated below—

Central Government Publications

- I-A .. General Report
- I-B .. Report on Vital Statistics of Bihar, 1951—60
- I-C .. Subsidiary Tables of 1961 including reprints, if any, from previous Census Reports.
- II-A .. General Population Tables *
- II-B .. Economic Tables
- II-C .. Cultural and Migration Tables
- III .. Household Economic Tables
- IV-A .. Report on Housing and Establishments†
- IV-B .. Housing Tables†
- IV-C .. Establishment Tables†
- V-A .. Special Tables for Scheduled Castes and Scheduled Tribes
- V-B .. Ethnographic Notes on Scheduled Castes and Scheduled Tribes
- VI .. Village Surveys ‡ (37 monographs on 37 selected villages)
- VII-A .. Selected Crafts of Bihar
- VII-B .. Fairs and Festivals of Bihar
- VIII-A .. Administration Report on Enumeration **
- VIII-B .. Administration Report on Tabulation
- IX .. Census Atlas of Bihar

ACKNOWLEDGEMENTS

“It takes two to make a Census—the citizen and the enumerator, and of the two, the former is the more important.” My first thanks are, therefore, due to the hundreds and thousands of people all over the State without whose generous help and willing co-operation the Census of 1961 would not have been possible.

Next, my thoughts go to the vast multitude (exceeding 72,000) of enumerators and supervisors through whose hard toil and efforts the stupendous task of taking the census of a population as big as that of France was accomplished.

I must also express my indebtedness to, and admiration for, the district administration—particularly the Charge Superintendents (mostly Block Development Officers and Anchal Adhikaris), the Subdivisional Officers, the District Census Officers and the District Officers. It is really they who had to bear the main brunt of the census operations. That, by and large, they did it magnificently well needs no saying. The main burden of selecting, training and supervising the census agency—in a way, building up the entire field organisation—fell on them. The great smoothness and remarkable orderliness with which the operations passed off throughout the State is itself an eloquent measure of their success and efficiency.

I am greatly beholden to Dr. Zakir Hussain, Vice-President of India (then Governor of Bihar), and the late Dr. Sri Krishna Sinha, Chief Minister of Bihar for their kind and inspiring messages on the eve of the census-taking.

I am also grateful to the State Government—specially to the Appointment, Community Development, Education, Finance and Revenue Departments—for various acts of help and kindness in organising the operations. To the two Chief Secretaries, Sri M. S. Rao, I. C. S., and later Sri S. J. Majumdar, I. C. S., I am particularly indebted for their kind interest and helpful attitude always. I am also obliged to Sri R. B. Lal, I. A. S., Director of Statistics, Bihar for his excellent co-operation, particularly in the matter of deputation of a large number of his selected and experienced workers to the Census.

Enumeration is but a stage in census work. It is followed by the complicated task of tabulation. Like everything else in census, this work had also to be organised on a gigantic scale. Eight tabulation offices were set up in different parts of the State as indicated below:—

Name of office	Districts dealt with	Deputy Superintendent	Tabulation Officer
1. Patna Urban ..	All urban areas of the State ..	Sri R. N. Misra ..	Sri R. B. Pandey
2. Patna Rural ..	Patna, Shahabad, Dhanbad, Palamau.	Sri K. M. Sinha ..	Sri R. B. Singh
3. Muzaffarpur I ..	Champaran, Darbhanga ..	Sri U. P. Shrivastava	Sri S. N. Prasad
4. Muzaffarpur II ..	Saran, Muzaffarpur ..	Sri C. K. Prasad ..	Sri B. N. Gupta
5. Deoghar ..	Monghyr, Santal Parganas ..	Sri S. Sharan ..	Sri G. Prasad
6. Bhagalpur ..	Bhagalpur, Saharsa, Purnea ..	Sri B. M. Prasad ..	Sri U. N. Saha
7. Hazaribagh ..	Gaya, Hazaribagh, Singhbhum (Part).	Sri K. K. Chakravorty	Sri J. N. Singh
8. Ranchi ..	Ranchi, Singhbhum (Part) ..	Sri K. B. Shrivastava	Sri S. K. Sinha

Work in a tabulation office is apt to be trying and exacting in the extreme. Great accuracy has to be ensured along with high speed from a rather unwieldy contingent of purely temporary hands, mostly raw and inexperienced. Notwithstanding these difficulties, almost all the tabulation offices maintained a high standard of efficiency and output, and Bihar was among the earliest in India to complete the work of sorting and compilation. My earnest thanks are due to the above-named officers and also to the large and enthusiastic band of sorters, compiler-checkers, supervisors and other workers, whose sustained efforts and unremitting labours are hidden behind all the census tables.

On completion of the work in regional centres, a Central Tabulation Office was set up at Patna early in 1962 to scrutinise the district tables and compile the State tables. Sri U. P. Shrivastava, Deputy Collector has been in charge of this unit, ably assisted by Sri R. B. Pandey, Tabulation Officer. They have worked hard and with a commendable sense of devotion, care and responsibility. I cannot too fully acknowledge the debt I owe them on this account. I should also like to place on record the valuable services rendered by Sarvashri U. N. Sinha, T. N. Verma, Maheshwar Prasad (all Statistical Assistants) and Shri K. P. Mehrotra, Tabulation Assistant in the preparation and checking of the tables.

I must also make a mention of the hard work put in by most members of my staff in the main office. In particular, I should name Sri K. K. Chakravorty, Deputy Collector and Sri Jwala Prasad, Head Clerk, who have been of immense help and assistance to me in day-to-day work.

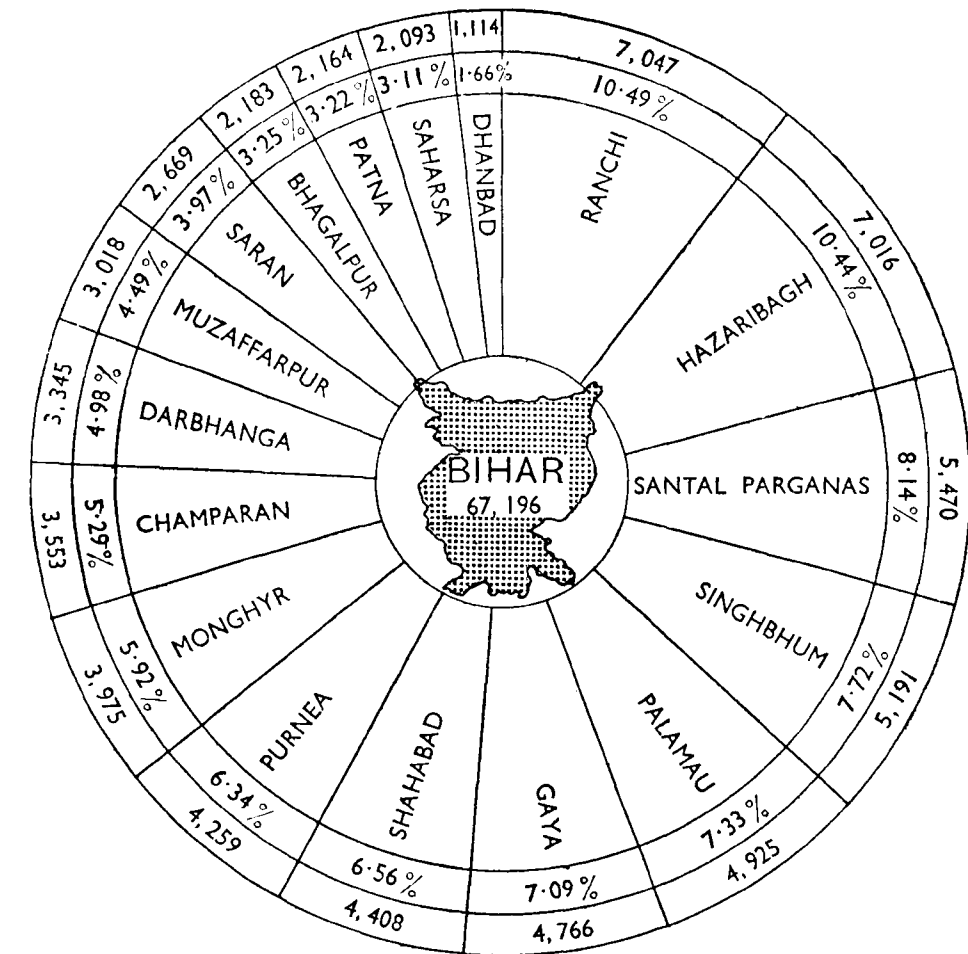

No acknowledgement in regard to the Census of 1961 can be complete without a tribute to the inspiring leadership, profound scholarship, noble character and affectionate nature of Sri Asok Mitra, I.C.S., Registrar General and *ex officio* Census Commissioner of India. Much of what is being presented in this volume, or will come out in later volumes, owes its origin to him. To Sri D. Natarajan, Deputy Registrar General, my special thanks are due for all the help and attention received from time to time. Shri K. D. Ballal, I. A. S., Central Tabulation Officer and his staff in the Central Tabulation Unit, New Delhi also deserve fully my most grateful thanks for the detailed scrutiny and foolproof checking of the tables. One could hardly have asked for a more perfect scrutiny than was done there.

Before I conclude, I must express my earnest thanks to Sri S. N. Chatterji, Superintendent, Secretariat Press and his staff for the great care and attention they have always bestowed upon census work.

NOTE

The Census of 1961 was the tenth in the all-India series which started as far back as in 1872. Though the actual enumeration was spread over a period of 24 days (10th February to 5th March, both days inclusive), the reference date, i.e., the point of time with reference to which the count was taken, was the sunrise of March 1, 1961. The point of reference was precisely the same as in the 1951 and 1941 Censuses.

For the purpose of a census, the entire population may be divided into three broad categories, viz., (i) household population, (ii) institutional population, and (iii) houseless population. The first category no doubt comprises the main bulk of the population.

The enumeration of household population was spread over a period of 24 days, i.e., from the 10th February to the 5th March, 1961. During the enumeration period (10th February to 28th February, 1961), a person designated as "enumerator" visited every household within his specified area (called "block") and enumerated all members of the household found present at the time of his visit. The enumeration was done by means of an Individual Slip, which was filled in separately for each and every individual enumerated. Even absentee members, who were normal residents of the household but had left their house after the 10th February or were likely to return before the 28th February, 1961 (if left before 10th February), were enumerated at the place of their normal residence. Only those who had left their house before the 10th February, 1961 and were not likely to return there till the 28th February, 1961, were excluded from being counted at the place of their normal residence. They were enumerated at the place where actually found. The enumeration was followed by a final check (called "revisional round") between March 1 and March 5, 1961 during which every house was revisited by the enumerator concerned. The object of this revisional round was to bring the enumeration up to the reference date (i.e., sunrise of March 1, 1961). For this purpose, the enumerator had to (i) enumerate every birth that had taken place in the household since his last visit, (ii) cancel the slip for any death that might have taken place in the house since his last visit, and (iii) enumerate any visitor in the household who stated that he had not been enumerated, *provided* that he had remained absent from his place of normal residence during the entire enumeration period.

Inmates of large institutions (having more than 300 members) were enumerated, more or less, in the same manner as household population. For small institutions (having a population of 300 or less), the enumeration was done towards the end of the enumeration period so as to keep the data as close to the reference date as possible.

Houseless persons, e.g., beggars, *sadhus*, vagrants, etc., were enumerated on "simultaneous" basis on the night between the 28th February and the 1st March, 1961. No revisional round was necessary in their case.

As stated earlier, the enumeration is done by means of census schedules, which contain a number of questions for eliciting information on various aspects of the citizen's life. Much care and thought have, therefore, to be bestowed on the preparation and designing of census schedules. The importance of this work has been emphasised in the United Nations' Handbook of Population Census Methods in the following words—

"The preparation of census questionnaires and the instructions for their use merits the most careful consideration, for the result of a census can be no better than its questionnaire. While it may be possible partly to correct the errors in other phases of the census work, there is no remedy for a badly planned and poorly worded questionnaire which leads to the gathering of defective information."

NOTE

A significant feature of the 1961 Census was, therefore, the pretesting of draft census questionnaires and instructions. This work was taken up by the Office of the Registrar General, India even before an organisation for the 1961 Census had been set up in the States. The first pretest was carried out by the State Statistical Bureau in March, 1959. In this, Junior Statistical Supervisors were generally employed as enumerators, and District Statistical Officers as supervisors. The operation was, therefore, conducted through a more enlightened agency than could be employed for actual census. The second pretest was organised and conducted by the State Census Superintendent between the middle of July and end of August, 1959. Ten places were selected for this purpose in five districts, rural and urban areas having equal shares. An attempt was made to make the sample fully representative of different regions of the State from social, demographic and geographical points of view. In all, 5,497 households comprising 29,126 individuals were covered by this operation. Enumerators were drawn mostly from among village school teachers, and supervisors from among the non-gazetted Anchal staff. This agency was precisely the same as was employed subsequently for actual census. The two pretests helped greatly in streamlining the design and content of census schedules and instructions, and in testing their practicability in the field. Many significant improvements were made at the first Conference of Census Superintendents in September, 1959 as a result of these pretests. After finalisation, the three census schedules, viz., the Houselist, the Household schedule and the Individual slip were translated into different regional languages. The translations were checked centrally for uniformity of nuances and purport. The forms were printed centrally at Government of India Presses through the Registrar General, India.

For proper planning and efficient conduct, the census operations were divided into six main stages. These are briefly described in the following paragraphs.

The first stage consisted of the formation of census divisions. It implied the delimitation of the entire area into smaller units. This was done with reference to maps taking into account all up-to-date changes in the boundaries of different units. The smallest unit was an enumerator's block which, on an average, consisted of 750 persons or 150 households in rural area and 600 persons or 120 households in urban area. No block could, however, contain more than one revenue *mauza*. Five to six enumerator's blocks constituted a Supervisor's circle which, in rural area, was made co-extensive with the Gram Panchayat as far as possible. The next higher unit consisted of a census charge which was made to coincide with the Anchal in rural area and town in urban area. The adoption of Anchal as a census charge in place of police station constituted a significant departure made in Bihar at the 1961 Census from previous censuses. (The term 'Anchal' has been used here and elsewhere in the Census Reports and Tables of 1961 in a general sense, and embraces all Anchals irrespective of whether they are Development Blocks or not.) Above the charge level, census divisions corresponded to the usual administrative divisions, viz., subdivisions and districts.

The second stage related to the setting up of a census hierarchy so as to cover the entire State. The District Officer, assisted by the District Census Officer at the district level and Subdivisional Officers at the subdivisional level, formed the apex of the census organisation in the district. The Block Development Officer/Anchal Adhikari/Circle Officer was invariably appointed as Census Charge Superintendent for his Anchal. In municipal towns, the Chairman or the Vice-Chairman was appointed as such, if there was no Executive Officer. In non-municipal towns, the local Registrar or the Sub-Inspector of Police or the Headmaster of the High School was generally employed in this capacity. Supervisors were chosen from among the non-gazetted Anchal staff, e.g., Social Education Organisers, Gram Panchayat Supervisors, Co-operative Supervisors, High School teachers, and employees of other Government Departments. As far as possible, they were required to be matriculates. Village Level Workers, Gram

NOTE

Sevaks, Karmacharis and School teachers were considered suitable for appointment as enumerators.

A comparative idea of the size of enumeration organisation at the 1961 Census can be had from the following figures—

Year	Enumerators	Supervisors	Charge Superintendents
1961	60,336	11,426	757
1951	101,728	7,231	648
1941	101,856	8,450	700
1931	158,746	12,387	Not available

It was possible to effect considerable reduction in the number of enumerators at this Census by ensuring full work-load for every enumerator. This implied that the prescribed size of enumerator's block was, more or less, strictly adhered to. A smaller number of enumerators is always preferable, because better human material can be selected, and their training and operation controlled more effectively. Two developments, which helped in making this improvement, were (i) considerable reduction in the number of non-officials among the rank of enumerators by the employment of mainly government or quasi-government servants in their place—thanks to the very large increase in the number of school teachers during the last decade; and (ii) payment of a small amount of honorarium to enumerators and supervisors, which took the sting out of the previous system of unpaid enumeration and provided the much-needed incentive for shouldering more work individually than was possible at previous censuses.

The third stage, viz., houselisting and house-numbering, was carried out between the middle of September and end of October, 1960. Unlike some other States where the permanent revenue agency is employed for doing this work, it was done in Bihar through the *ad hoc* enumeration agency set up for the census. The importance of this stage lay in the fact that it prepared the frame on which the actual count was taken subsequently. It also gave a preliminary estimate of population on the basis of which indents of forms were prepared and the adequacy or otherwise of the enumeration agency was checked up.

A distinguishing feature of the houselisting operation at this Census was the preparation of a block map by each enumerator giving a rough sketch of the inhabited portion of the village together with the lay-out of roads, lanes, temples, tanks and other important land marks, and also indicating therein the order in which the houses were numbered.

The importance of houselisting was further enhanced at the 1961 Census because this operation was utilised also to collect certain valuable data on housing conditions and industrial establishments. Perhaps for the first time in Indian Census history, a common houselist form was prescribed for the entire country. The main items of information collected on housing related to (i) purpose of use, e.g., dwelling, shop, factory, business house, shop-cum-dwelling, restaurant, etc., (ii) material of wall, e.g., timber, mud, burnt or unburnt brick, stone, etc., (iii) material of roof, e.g., tile, corrugated metal sheet, asbestos, brick, concrete, etc., (iv) number of rooms in use by each household, and (v) whether the household is living in owned or rented house. On industrial establishments, information was collected in respect of (i) name of product(s) produced, repaired or serviced; (ii) name of the firm or proprietor; (iii) average number of persons employed daily; and (iv) kind of fuel or power used. Housing and industrial tables compiled on the basis of these data will be presented for the State in a separate volume (Part IV).

A unique feature of the houselisting operation in Bihar was the preparation of a Village Note for each village. The object of this Note was to summarise the main points of administrative and social importance in the village so as to give an index to

NOTE

the life of the locality. Certain essential data relating to the existence of communication, rural electrification, ancient monuments, fairs and festivals, and cottage and small-scale industries were also collected in this Note, perhaps for the first time. The main results compiled from these notes will be presented in the District Census Handbooks.

The fourth stage related to the training of enumeration staff. The training of District Census Officers, Subdivisional Officers and Charge Superintendents was taken up earlier in stages and completed much before the houselisting operation. Enumerators and supervisors were trained in two stages—first for houselisting and house-numbering, and second for actual enumeration. Great importance was laid from the very beginning on proper training. In every Anchal or town, enumerators and supervisors were formed into batches, generally not exceeding 40 in each. At least three training classes were held for each batch in houselisting and house-numbering. This included practical training. After the completion of house-numbering, an intensive programme of training in actual enumeration was launched all over the State. A minimum of six classes was prescribed for each batch. In several cases, the number of classes actually held was much more than the prescribed minimum.

The fifth stage consisted of actual count. It was spread over a period of 19 days (10th February to 28th February) primarily with a view to lighten the burden of enumerators and also to neutralise the considerable volume of short-term migration. During this period enumerators visited each and every household within their allotted blocks and enumerated in the prescribed manner every “normally resident” member of the households. Two schedules were prepared at this stage. The Individual Slip, filled in separately for each individual, contained as many as 24 questions intended to define his demographic, social and economic characteristics. A Household Schedule was also filled in for each household as separate entity.

The sixth and the last stage consisted of the revisional round and the reporting of provisional population figures. For the latter, a system of relay of information in the form of an abstract from different levels by the quickest possible means was organised. The efficient manner in which the district administration organised this operation can be judged by the fact that all the provisional population figures were received at the State headquarters by the evening of 8th March, 1961 and the State totals were communicated by the Census Superintendent to the Registrar General, India on telephone the same evening. This was a record of which we can be justly proud. Notwithstanding this great hurry, the difference between the final and provisional figures was ultimately found to be 1,432 only in a population of 46,455,610, or a mere 0.003 per cent.

The different stages described above could not be accomplished without strict adherence to a detailed time-schedule. A Census Calendar was, therefore, prepared. From the very beginning, a sense of urgency was inculcated among all categories of census staff, and it was impressed on them that nothing was more sacred in census than the Census Calendar. The following is a reproduction of the Census Calendar of Bihar. Incidentally, it also gives an idea of the different stages of work.

CENSUS CALENDAR FOR 1961 CENSUS

Serial no.	Stage of operation	Date by which to be completed
1	Preparation of Census Register for rural and urban areas ..	29th February, 1960
2	Appointment of Charge Superintendents ..	15th March, 1960
3	Formation of census divisions and preparation of census maps	15th April, 1960
4	Submission of two copies of District and Thana Census maps to the State Superintendent	30th April, 1960
5	(i) Compilation of Charge Registers ..	1st May, 1960

NOTE

Serial no.	Stage of operation	Date by which to be completed
	(ii) Submission of Abstract of Charge Registers ..	15th May, 1960
6	Submission of nominations by Charge Superintendents for the appointment of Supervisors and Enumerators	1st June, 1960
7	Finalisation of Code numbers for districts, towns and Anchals	15th June, 1960
8	Appointment of Supervisors and Enumerators	1st July, 1960
9	Distribution of Parwanas of appointment, Circle Registers, Houselists and instructions for the preparation of village notes	15th August, 1960
10	Training of Enumerators and Supervisors in houselisting and house-numbering and in preparation of village notes	15th September, 1960
11	(a) Preparation of houselists and village notes by Enumerators	10th October, 1960
	(b) Filling in of Circle Registers by Supervisors	10th October, 1960
12	Final check of (a) Houselists, and (b) village notes by Supervisors and Charge Superintendents	19th October, 1960
13	House-numbering	Begins 20th October, 1960 Ends 27th October, 1960
14	(a) Supervisor's report to Charge Superintendents regarding completion of house-numbering	5th November, 1960
	(b) Despatch of village notes to Charge Superintendents ..	5th November, 1960
15	Submission of (1) Charge Superintendent's report regarding house-numbering, (2) final indent of pads and (3) village notes to S.D.Os.	12th November, 1960
16	Submission of S.D.O.'s report to Superintendent of Census Operations regarding completion of house-numbering	20th November, 1960
17	Distribution of pads to S.D.Os. by District Census Officers ..	15th October, 1960
18	Distribution of pads by S.D.Os. to Charge Superintendents ..	Begins 15th December, 1960; Ends 25th December, 1960
19	(i) Distribution of pads by Charge Superintendents to Supervisors	Begins 15th January, 1961 Ends 22nd January, 1961
	(ii) Distribution of pads by Supervisors to Enumerators ..	1st February, 1961
20	Training of Supervisors	Begins 5th November, 1960; Ends 30th November, 1960
21	Training of Enumerators	Begins 1st December, 1960 Ends 9th February, 1961
22	Enumeration of household population	Begins 10th February, 1961; Ends 28th February, 1961
23	Enumeration of houseless population	During the night before 1st March, 1961
24	Revisional round by Enumerators	Begins 1st March, 1961 Ends 5th March, 1961

The three census schedules, viz., (i) the Houselist, (ii) the Household Schedule and the Census Population Record, and (iii) the Individual Slip, used at the 1961 Census, together with brief instructions on each, are reproduced in Annexures A, B and C respectively at the end of this volume.

The 1961 Census records have been stored for the present in the Census Tabulation Offices at Patna, Muzaffarpur and Hazaribagh. The arrangement has been done mainly on geographical basis subject to the availability of space, and the following indicates the allocation of districts among the three offices for the purpose of storage—

Patna—Patna, Shahabad, Palamau and Dhanbad districts, and all urban areas of the State.

Muzaffarpur—Saran, Champaran, Muzaffarpur and Darbhanga districts.

Hazaribagh—Gaya, Monghyr, Bhagalpur, Saharsa, Purnea, Santal Parganas, Hazaribagh, Ranchi and Singhbhum districts.

NOTE

The block maps referred to earlier have been arranged Anchalwise for every district. One set of houselists for the entire State is at present in the Central Tabulation Office at Patna for the compilation of housing and industrial data, while the other set is preserved at the aforesaid three places. Household Schedules, Census Population Records and Individual Slips of different districts arranged Anchalwise and Townwise are also kept in the aforesaid offices in the manner indicated above.

The Census of 1961 can claim several unique features. It will be of interest to recount them here briefly—

- (i) *Block maps*—These will enable physical identification of every house on the spot with reference to the houselist. They will, therefore, be of immense help in undertaking any sample enquiries during the intercensal period.
- (ii) *Uniform Houselists and Housing Tables*—In previous censuses, each State devised its own houselist form with the sole object of census enumeration. There was no uniformity between one State and another, nor any continuity from the one census to another. At the 1961 Census a common houselist form was adopted for the whole country and its columns were designed so as to yield valuable data on housing conditions and industrial establishments, perhaps, for the first time in census history. Five Housing Tables have been prepared from the data.
- (iii) *Household Schedules and Census Population Records*—The Household Schedule was an innovation of the 1961 Census. The object of this schedule was to collect data on the two chief economic activities of household, viz., cultivation and household industry. It is evident that in a country of such economic status as ours, where not all the goods produced enter the money market and where much of what is produced is consumed by the family itself, collection of information purely on the basis of individuals may tend to be slightly misleading unless such information is supplemented by information relating to chief economic activities of the household as an entity.

At the back of the Household Schedule was the Census Population Record designed to give the following information in an abstract form in respect of each individual member of the household—(i) Sex, (ii) Relationship to the Head of the household, (iii) Age, (iv) Marital status, and (v) Description of work. Volumes of Census Population Record arranged by villages, *Panchayats* and Anchals, will serve the purpose of the National Register of Citizens whose preparation at the 1951 Census marked a significant step in census history.

Seven Household Economic Tables have been prepared on the basis of returns in the household schedules. They will throw much light on the extent of land under cultivation, nature of household industry, period of working of household industry, and the number of persons who are employed therein either as family workers or as hired labourers.

- (iv) *Industrial and Occupational Classifications*—The 1951 Census tables gave only the distribution of population by eight livelihood classes and their further subdivision into self-supporting persons, earning dependants, and non-earning dependants. There was a cross-tabulation of self-supporting persons and earning dependants with reference to the secondary means of livelihood, which was confined only to the eight livelihood classes. Self-supporting persons not engaged in cultivation were classified by divisions and subdivisions of industries and services according to the Indian Census Economic Classification. There was also cross-tabulation of the eight livelihood classes by age-groups and by literacy and educational standards.

NOTE

At the 1961 Census, it was felt that “a strict application of the criterion of income or economic independence suppressed those who worked in family economic activities but did not actually earn an income, like men other than the Head of the household and women of the family or children working at cultivation or cottage industries of the household”. The basis of determining economic characteristics has, therefore, undergone a fundamental change at the 1961 Census. Stress has now been laid on “work” so that all people who work, including family workers, who are not in receipt of any income or working children who cannot earn enough for their maintenance, are also included as workers.

For primary economic classification, the population has been divided into the following ten categories—

- I Working as Cultivator.
- II Working as Agricultural labourer.
- III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities.
- IV Working at Household Industry.
- V Working in Manufacturing other than Household Industry.
- VI Working in Construction.
- VII Working in Trade and Commerce.
- VIII Working in Transport, Storage and Communication.
- IX Working in Other Services.
- X Non-workers.

Non-workers, shown above as a separate category, have been subdivided into the following eight classes—

- (i) Full-time students or children attending school who do no other work ;
- (ii) Housewives and persons engaged in unpaid home duties ;
- (iii) Infants and other dependants including permanently disabled or old persons ;
- (iv) Retired persons, rentiers and others who are in receipt of income without doing any work ;
- (v) Beggars, vagrants, and others of unspecified sources of existence ;
- (vi) Convicts in jails or inmates of penal, mental or charitable institutions ;
- (vii) Persons not employed before but seeking employment for the first time ; and
- (viii) Persons employed before but now out of employment and seeking employment.

The number of Economic Tables to be produced for the 1961 Census is more than twice the number prepared at the 1951 Census. The tables are also more elaborate. The working population is classified separately according to the returns for occupation and industry. The Standard Industrial Classification and the National Classification of Occupations adopted by the Government of India have been followed for the preparation of these tables. There are more than 300 occupational families and industrial minor groups for which figures will be given and the population under each will be distributed by sex.

UNION TABLE A-I—AREA, HOUSES AND POPULATION

This Table corresponds to General Population Table A-I of 1951 and Imperial Table I of previous censuses, and is the basic population table for the census. While the Union Table gives figures up to the district level only, it is followed by a State Table which contains similar information also for units lower than a district. Area has been given this time both in square miles and square kilometers. In the Union Table, two sets of area figures have been given. One relates to the Surveyor General of India and the other to the State Survey Office. In the State Table, however, only one set of figures has been given. Up to the district level, it is in accordance with the State Survey figures. For units lower than a district, *e.g.*, Subdivisions and Anchals, the areas have been worked out from village areas (as given in the Thana Jurisdiction lists) for rural portion, and from the reports of local authorities for urban portions. An important feature of the Table this time is that a column giving the density of population per square mile for each unit has been included. For the first time, the number of inhabited and uninhabited villages has also been shown separately.

There are three appendices to this table—

Appendix I—This Appendix details all the changes in the jurisdiction of various administrative units, *e.g.*, State, District, Subdivision and Police Station within the last decade (1951-61). It shows how the present jurisdiction of each unit is related to the 1951 jurisdiction.

Annexure I to this Appendix draws the relationship between Anchal-*cum*-Development Blocks on the one hand and Police Stations, Revenue Thanas, Subdivisions and Districts on the other. Since the Anchals came into existence much after 1951, they could not be shown in the main Appendix. Anchals have, however, been adopted as the main unit for presentation of census data this time. The information contained in this Annexure will provide the basis for relating the figures of this Census with those of earlier censuses.

Sub-Appendix to this Appendix is a Table showing changes in the areas of municipal towns during the period 1951-61.

Appendix II—One of the criteria for a place to be treated as town is that it should normally have a population of 5,000 and over. For various reasons many places with a population of 5,000 and over are not treated as towns while a number of places with less than 5,000 population are treated as towns for Census. This Appendix gives the numbers of such places with their population. The names of new towns under 5,000 population as well as of old towns under 5,000 which have been declassified as rural, with their areas, are given in list A and list B to the Appendix.

Appendix III—This Appendix furnishes figures for houseless population and institutional population separately and for rural and urban areas. For purposes of studying different characteristics, this population has been included along with the household population elsewhere.

CHANGES IN AREA OF THE STATE

At the beginning of the present century, Bihar formed part of the Presidency of Bengal which also included Assam and Orissa. In 1905 came the famous partition of Bengal dividing it into (i) a Governor's Province of West Bengal, Bihar and Orissa, and (ii) a Lieutenant Governor's Province of East Bengal and Assam. The dismemberment of Bengal led to widespread agitation not only in Bengal, but also in Assam, Bihar and Orissa, all of whom wanted to be formed into separate provinces for their development. Following the famous declaration at the Delhi Durbar

on the 12th December 1911, three new provinces were created in 1912 (*vide* Notification nos. 289, 290 and 291, all dated the 22nd March 1912, published in the *Calcutta Gazette* of March 27, 1912) in the manner indicated below—

- (i) A separate province of Bihar and Orissa was formed comprising Bhagalpur, Patna, Tirhut, Chotanagpur and Orissa Divisions ;
- (ii) East Bengal was re-united with West Bengal and formed into one Governor's Province; and
- (iii) Assam was constituted into a Chief Commissioner's Province.

During the next decade, 1921-31, three minor adjustments took place in the provincial boundary involving a loss of 25 square miles to Bihar. These have been noted below in the paragraph dealing with changes in area of districts.

On the report of O'Donnel Commission in 1932, a separate province of Orissa was formed on the 1st April 1936. After the separation the province of Bihar, as it was then called, consisted of four Divisions, namely, Bhagalpur, Patna, Tirhut and Chotanagpur comprising a total area of 69,745 square miles, according to the Census Report of 1941.

Consequent upon the merger of princely States with the Indian Union after independence, the Government of India in their communique issued on the 13th May 1948 decided to transfer Seraikela and Kharsawan States to Bihar. The administration of these States was accordingly taken over by the Bihar Government on the 18th May 1948 though formal merger took place on the 1st August 1949 under the States' Merger (Governor's Provinces) Order, 1949. This resulted in an addition of 602 square miles to the area of Bihar. The Census Report of 1951 gives the area of Bihar as 70,330 square miles which means an increase of 585 square miles only. The difference of 17 square miles is due to variations in the area of some districts as noted in the Census Reports of 1941 and 1951. Most of these variations were presumably due not to actual changes of jurisdiction, but to computation errors.

Following the Report of the States' Reorganisation Commission in 1955 and the passing of the States' Reorganisation Act and the Bihar and West Bengal (Transfer of Territories) Act in 1956, the seventeen police stations named below of Purulia district with an area of 2,407 square miles, the entire police station of Goalkpokhar and portions of 5 police stations, namely, Thakurganj, Chopra, Islampur, Kishanganj and Karandighi of Purnea district comprising an area of 732.88 square miles, were transferred to West Bengal—

Purulia Mufassil, Purulia Town, Arsa, Baghmundi, Balrampur, Banduan, Hura, Pancha, Manbazar, Barabazar, Kashipur, Neturia, Santuri, Raghunathpur, Para, Jhalda and Jaipur.

Of the five police stations of Purulia district which remained in Bihar, Chas and Chandankiari were later attached to the newly formed Dhanbad district and Patamda, Chandil and Ichagarh were tagged on to Singhbhum district.

As a result of the changes mentioned above, Bihar lost an area of nearly 3,140 square miles. The area of Bihar, as shown in the present table, is 67,196 square miles, which means a loss of 3,134 square miles. The difference of 6 square miles is due to slight revision in the area figures of a few districts as now supplied by the Surveyor General of India.

DISTRICT AREAS

The figures relating to areas of districts vary considerably from census to census. In the past, these discrepancies were attributed, in a rather general way, either to inter-district or inter-State changes, or to more accurate surveys during subsequent decades. Till 1931, the area figures given in Imperial Table A-I appear to have been obtained from the State Survey Office, and these approximate closely to area figures

noted on the district maps. Slight variations here and there occur presumably due to inter-district transfers or mistakes in computation. Since 1941, however, a different system has been followed. The areas of districts given in the Imperial Table A-I of 1941, the General Population Table A-I of 1951, and the present Union Table A-I are those supplied by the Surveyor General of India, while the corresponding figures given in the Provincial Table I of 1941, the Summary Table E of 1951, and the present State Table A-I are based on the figures of the State Survey Office. The following table compares the area figures given in the Union Table A-I at successive censuses since 1901. For easy reference, the area figures obtained from the State Survey Office and noted in State Table A-I since 1941, have been shown within brackets just below the district figures—

STATEMENT OF AREAS OF DISTRICTS IN IMPERIAL TABLE A-I, 1901-61

		(FIGURES IN SQUARE MILES)						
State/District		1901	1911	1921	1931	1941	1951	1961
1		2	3	4	5	6	7	8

						(3,877)	(4,475)	(5,153)

NOTES—(1) Figures in the above table are as they appear in the Census Reports; that is, no attempt has been made to make adjustment for changes during subsequent periods.

(2) There is a difference of 1 square mile in the total area of the State for 1961 according to the Survey Office figures due to "rounding off".

(3) The area figures of Saharsa and Dhanbad districts for 1951 have been taken from 1951 Part II-A, Bihar although these districts were formally created after 1951 census.

It will be seen that there are no marked differences in district areas from one census to another till 1941 so far as the State Survey figures are concerned, except where these were occasioned by changes of jurisdiction. But the figures of the Survey of India and the State Survey Office show a good deal of variation during the following period. In fact, the two sets of figures do not agree in a single case. These variations are attributable to the different methods of computation adopted by

the Survey of India and the State Survey Office. No reconciliation between the two is, perhaps, possible. That even the Survey of India's figures are capable of undergoing minor changes in some cases from time to time can be easily seen from the above statement. The reasons for these differences have been ascertained from the Director, Map Publications, Survey of India, and are briefly indicated below—

- (i) *Shahabad*—The previous area figure was slightly wrong.
- (ii) *Bhagalpur and Saharsa*—The error of 1 square mile in 1951 figures was due to rounding off. The total area of the two districts taken together has remained unchanged.
- (iii) *Purnea and Dhanbad*—The difference is due to fresh computation of area of these two districts following changes in their jurisdiction as a result of the States' reorganisation.
- (iv) *Santal Parganas*—The excess of 18 square miles is on account of boundary changes.
- (v) *Palamau*—The area has been "worked out afresh from larger scale maps and an error of 29 square miles discovered".
- (vi) *Ranchi and Singhbhum*—The differences have arisen due to changes in jurisdiction.

It may be of interest to note here that three different sets of figures representing district areas can be arrived at even from the State Survey figures. One is based on the extraction of area from district maps. The second set represents the sum-total of revenue thana areas as printed at the end of thana lists. The third set is arrived at by taking the *mauza* areas and working to the district area. It is surprising that the *mauza* areas do not, in many cases, add up actually to the revenue thana area as printed. A possible reason for this kind of discrepancy may be printing errors in the area of *mauzas* as given in the thana lists, but we have no means of ascertaining these. Therefore, the discrepancies could not be reconciled. Another reason may be a certain amount of duplication in computing urban areas, particularly of municipal towns having portions of revenue *mauzas* within their jurisdiction. This would seem to explain the cases where the sum-total of *mauza* and urban areas exceeds the printed revenue thana areas.

The following table gives the three sets of figures (rounded off to the nearest integer) and also indicates the margin of differences—

State/District	Area (in square miles) according to			Difference		
	District maps	Revenue Thana totals		Column (2) minus Column (3)	Column (3) minus Column (4)	
		As printed	As the sum of <i>mauza</i> and urban areas			
1	2	3	4	5	6	
BIHAR	..	66,936	65,294	65,155	+ 1,643	+ 139
Patna	..	2,128	2,126	2,147	+ 2	-21
Gaya	..	4,746	4,746	4,723	Nil	+ 23
Shahabad	..	4,392	4,297	4,292	+ 95	+ 5
Saran	..	2,681	2,676	2,684	+ 5	-8
Champaran	..	3,531	3,247	3,254	+ 284	-7
Muzaffarpur	..	3,020	3,020	3,021	Nil	-1
Darbhanga	..	3,359	3,307	3,314	+ 52	-7
Monghyr	..	3,938	3,946	3,958	-8	-12
Bhagalpur	..	2,126	2,091	2,095	+ 35	-4
Saharsa	..	2,106	2,078	2,071	+ 28	+ 7
Purnea	..	4,224	4,224	4,246	Nil	-22
Santal Parganas	..	5,489	5,423	5,223	+ 66	+ 200
Palamau	..	4,914	4,642	4,640	+ 272	+ 2
Hazaribagh	..	6,986	6,915	6,907	+ 71	+ 8
Ranchi	..	7,035	7,007	7,035	+ 28	-28
Dhanbad	..	1,109	1,109	1,126	Nil	-17
Singhbhum	..	5,153	4,440	4,419	+ 713	+ 21

The differences between columns 2 and 3 are invariably positive (except for Monghyr) and particularly marked in cases of Singhbhum, Champaran, Palamau, Shahabad and Hazaribagh. These are presumably due to the existence either of large unsurveyed forest tracts or of *diara* (alluvion) areas. The districts of Singhbhum, Champaran and Palamau are known to have large tracts of unsurveyed forests. In the case of Santal Parganas, the difference appears to be due to the areas of several hill villages not having been correctly included in the thana lists. This inference is supported by the following instances—

- (a) In Rajmahal Subdivision, the printed area according to thana list is 613.77 square miles, but the area approved by the Board of Revenue is 775.75 square miles, the difference being of the order of 162 square miles.
- (b) In Dumka Subdivision, the total area according to the thana list is 1,436.21 square miles, but the area approved by the Board of Revenue is 1,454.12 square miles. This accounts for another 18 square miles.

Only in Monghyr, the difference is in the negative. It seems that the area of Monghyr town has not been included in the district area given by the Survey Office.

The district area figures, as obtained from the State Survey Office this time, show considerable variation from earlier figures. It seems that a small degree of variation is unavoidable on account of shifts in the course of rivers. This would, perhaps, explain the slight variations in Patna, Shahabad, Saran, Purnea and some other districts having major rivers on their boundaries. But there are some districts such as Hazaribagh and Ranchi where the areas have differed even though their boundaries are not formed by any major river.

ANCHAL AREAS

In the State Table A-I, the area figures noted in column 3(a) up to the district level are as obtained from the State Survey Office. For arriving at the figures in column 3(b), the conversion ratio of 1 square mile=2.59 square kilometers has been adopted. Below the district level, figures for urban areas have been obtained from the municipal authorities in case of municipal towns and from the District Officers in case of non-municipal towns. These have been checked further in the census office, as far as possible. The Anchal areas have been worked out, perhaps for the first time, in the census office directly from the thana jurisdiction lists and the Primary Census Abstracts. An attempt has also been made to relate the Anchal and Police Station areas to Revenue Thana areas, and to district areas. The results are incorporated in Annexure I to Appendix I.

It has already been indicated how the sum-totals of *mauza* areas (which lead to Anchal areas) differ in most cases from the district areas given by the State Survey Office (*vide* columns 3 and 4 of the above table). In as many as six districts, *viz.*, Patna, Saran, Muzaffarpur, Monghyr, Purnea and Dhanbad, the district area as given by the Survey Office (column 2) is less than the sum-total of Anchal areas (including urban areas). In the case of Ranchi only, the two figures agree. In other cases, the district map areas are more than the sum-total of areas of *mauzas* and towns. These differences may be due to (i) mistake in arriving at revenue thana totals in the thana jurisdiction list, (ii) the areas of urban localities having been computed on the high side, and/or (iii) the existence of unsurveyed forest tracts or *diara* lands. As for (i), it is possible that the revenue thana area as given in the thana jurisdiction list is correct, while the discrepancy observed by us is due to some mistake in the printing of areas of few villages. In the case of (ii), there is also a possibility of the same area being counted both in urban and rural area figures, particularly when portions of one *mauza* are included

partly in urban area and partly in rural area. But in neither of these two cases, it is possible for the census to unearth the real causes of discrepancies. In spite of our best efforts, we have only succeeded in reducing the margin of differences.

An important point to be noted in this connection is that in the State Table A-I, the rural areas of Anchals will not in any district actually add up to the total rural area of the district. The reason is that the latter figure has been arrived at by deducting the total urban area from the district total area as obtained from the State Survey Office. Since the district areas given by the State Survey Office and the sum-totals of Anchal areas do not agree, this kind of discrepancy cannot be helped.

The State Survey Office did not have area figures for smaller units in Seraikela and Kharsawan regions. The figures given in Table A-I are those obtained from the Directorate of Statistics, Bihar.

CHANGES IN JURISDICTION OF DISTRICTS

The following districts underwent changes of jurisdiction and area since 1901; these would explain in part the differences in the foregoing tabular statement—

Between 1901 and 1911—

“Patna, Saran, Muzaffarpur, Purnea and Santal Parganas (for Singhbhum, the difference is due to revised figures of area having been supplied by the Survey Department; and in the case of Saran, Muzaffarpur, Darbhanga and Ranchi, the area was ascertained in the course of the survey and settlement of those districts).”

Between 1911 and 1921—

“Patna, Gaya, Monghyr, Ranchi and Palamau (a decrease of 1 square mile in the area of Santal Parganas appears to be due to transfer of a small area from the Santal Parganas to Birbhum in Bengal; the decrease of 12 square miles in the area of Singhbhum is not explained).”

Between 1921 and 1931—

- (1) 13 inhabited *mauzas* were transferred from Santal Parganas to the district of Malda in West Bengal.
- (2) One *mauza* (Baratabari), formerly included in Malda district, was treated as a part of Purnea district. Conversely, one *mauza* (Garra) belonging to Purnea was treated as a part of Malda. Formal transfer of jurisdiction took place later, but in census they were taken into account on the basis of *de facto* administration.
- (3) In addition to the inter-provincial transfers mentioned above, inter-district transfers were made from Shahabad to Patna, and from Purnea to Santal Parganas.
- (4) The area of Manbhum district was found, as a result of the cadastral survey, to be 52 sq. miles less than the area formerly shown.

Between 1931 and 1941—

(Full details not available; presumably, the changes relate only to Saran, Bhagalpur, Purnea, Santal Parganas and Singhbhum districts. The 1951 Census Report of Bengal shows a transfer of 0.13 sq. mile from Murshidabad to Santal Parganas, 16.72 sq. miles from Santal Parganas to Malda, and 2.20 sq. miles from Purnea to Dinajpur.)

Between 1941 and 1951—

(Area figures do not agree in any district. Reasons not clear. Details of changes in jurisdiction not available.)

Between 1951 and 1961—

- (1) Saharsa, which was hitherto treated as a sub-district, was constituted into a full-fledged district comprising the Subdivisions of Supaul and Madhepura, vide Notification no. A/JI-109/54-P. G.—517, dated 29th March, 1954.
- (2) The following 39 villages of Tamar P. S. in Khunti Subdivision of Ranchi district were transferred to Kharsawan police station in Seraikela Sub-division of Singhbhum district, vide Notification no. A/JI-1017/54-P.G.—1226, dated 5th August 1954—
 - (1) Ichadih, (2) Selaidih, (3) Janalong Baredih, (4) Kudadih, (5) Badu, (6) Meram Janga, (7) Gumeyadih, (8) Hatnabera, (9) Karerango, (10) Korwadih, (11) Baruhatu, (12) Torangdih, (13) Jojohatu, (14) Sursi, (15) Sosokara, (16) Bijar, (17) Dhunadih, (18) Dalbhanga, (19) Parea, (20) Bandhdih, (21) Deswapahar, (22) Siyadih, (23) Mutugora, (24) Rugudih, (25) Ramdih, (26) Taramba, (27) Atra, (28) Punisir, (29) Gelua, (30) Basgutu, (31) Rolahatu, (32) Buruhatu, (33) Dangil, (34) Ludubera, (35) Kasrauli, (36) Korra, (37) Komai, (38) Jamro and (39) Sikramba.
- (3) Dhanbad, which was hitherto treated as a sub-district, was constituted into a full-fledged district comprising the local areas included in the old Dhanbad Subdivision and Chas and Chandankiari police stations of Purulia district, vide Notification no. A-9911, dated the 24th October, 1956.
- (4) Patamda, Ichagarh and Chandil police stations of Manbhum (Purulia) district were transferred to Singhbhum district, vide Notifications nos. A-9909 and 9910, dated the 24th October, 1956.
- (5) The entire police station of Goalpokhar and portions of five police stations, namely, Thakurganj, Chopra, Islampur, Kishanganj and Karandighi of Purnea district comprising an area of 732.88 sq. miles were transferred to West Bengal as a result of the Bihar and West Bengal (Transfer of Territories) Act, 1956.
- (6) The Purulia Subdivision of Manbhum district, excluding Chas, Chandankiari, Chandil, Ichagarh and Patamda police stations was transferred to West Bengal as a result of the Bihar and West Bengal (Transfer of Territories) Act, 1956.

Changes in the jurisdiction of administrative units lower than a district during the decade 1951-61 have been indicated unitwise for each district in Appendix I to the Table A-I. It may be noted here that according to the Chief Secretary, Government of Bihar's letter no. I/P1-108/55(PP)-AR—929, dated the 5th July 1955, the entire State (excluding towns with population of 1 lakh and over) was carved out into 575 Anchal-cum-Development Blocks (briefly referred to hereafter as Anchals). These Anchals have been adopted as the main unit of administration for purposes of all development, revenue and administrative work. For this reason, the 1961 Census data are being presented Anchalwise this time, as far as possible. An idea of the inter-relationship between Anchals and other administrative units, viz., Police Stations, Revenue Thanas, etc., can be had from Annexure I to Appendix I.

RURAL AND URBAN CLASSIFICATION

For census purposes, all municipalities, notified areas, civil lines and cantonments are treated as towns irrespective of their size, density of population or livelihood pattern. Certain other places without municipal administration can also be given the status of town provided they possess "distinctively urban character". What constitutes "distinctively urban character" was not clearly defined in the past. Generally, "the importance of a place as a centre of trade or industries, arrangements of houses in rows of streets instead of in blocks, etc., were regarded as justifying the classification of a locality as urban. In some cases, historical associations were also taken into consideration" (Census Report, 1951). The line between a rural and an urban area is, however, not always clear. It would be interesting to recall in this connection the following remarks of P. C. Tallents, the Census Superintendent of 1921—

"The distinction between urban and rural is not an easy one to draw; the great majority of the rural area is indeed rural in the most unqualified sense, but the urban character of some of the urban units is not above suspicion and in some cases it is hard to decide whether particular collection of houses should more correctly be treated as a large village or small town."

TOWNS

In the past, the question of determining non-municipal towns was left entirely at the discretion of individual Census Superintendents. As a result, there were marked variations in the standards applied, not only from State to State but also within the same State, from one census to another. The position being so, any comparison of urbanisation trends in different States or at successive censuses within the same State was bound to be difficult and unrealistic, if not misleading at times.

In this Census, an attempt was made at the instance of the Registrar General to apply certain uniform standards all over India for determining the non-municipal towns. The standards laid down were that such places must ordinarily have, (a) a population of not less than 5,000, (b) density not less than 1,000 persons per square mile, and (c) at least three-fourth of the adult male population engaged in non-agricultural livelihood. The lists of places treated as towns at any time since 1901 as well as the list of newly developed places of importance were carefully scrutinised in consultation with District Officers, and a fresh list of towns was prepared for this Census taking into consideration the aforesaid criteria. By and large these criteria were strictly adhered to, exception being made only in very few cases on account of their historical importance (e. g., Bodh Gaya), tourist interest (e. g., Netarhat), or administrative significance (e. g., Subdivisional headquarters).

As a result of the adoption of the aforesaid criteria, 5 towns of 1951 (1 in Class IV, 2 in Class V and 2 in Class VI) have been eliminated in 1961. On the other hand 51 new urban areas have been listed in 1961. Of them, 3 towns are in Class III, 18 in Class IV, 25 in Class V, and 5 in Class VI. Of these new towns, three, viz., Doranda, Jugsalai and Dinapur Cantt. are not really new as they were treated as urban in previous censuses also. In 1951, they were all included within Ranchi, Jamshedpur and Dinapur respectively, though Jugsalai and Dinapur were treated as independent urban units in some earlier censuses. The reason why they have been counted as "new" towns for the 1961 Census is that they are now being treated as independent urban units. For fuller details in respect of these, a reference may be made to the Appendix to Table A-IV. A list of changes in the jurisdiction of municipal towns has been given in Sub-Appendix to Appendix I to Table A-I.

The following table indicates districtwise the progress in the number of towns since 1901—

DISTRICTWISE PROGRESS IN THE NUMBER OF TOWNS SINCE 1901

State/Division/District	Number of towns						
	1961	1951	1941	1931	1921	1911	1901
1	2	3	4	5	6	7	8
BIHAR	153	108	84	66	63	59	57
Patna Division	29	26	25	21	20	20	21
Patna	10	8	9	8	6	7	7
Gaya	10	10	8	7	8	7	8
Shahabad	9	8	8	6	6	6	6
Tirhut Division	27	28	17	15	14	14	14
Saran	6	5	3	3	3	4	4
Champaran	9	10	3	2	2	2	2
Muzaffarpur	6	6	5	5	4	4	4
Darbhanga	6	7	6	5	5	4	4
Bhagalpur Division	42	26	21	17	17	14	12
Monghyr	13	13	10	6	6	4	4
Bhagalpur	5	2	2	2	2	2	2
Saharsa	6	Nil	..	..	..	..	..
Purnea	8	4	4	4	4	3	3
Santal Parganas	10	7	5	5	5	5	3
Chotanagpur Division	55	28	21	13	12	11	10
Palamau	5	3	2	2	2	2	2
Hazaribagh	10	8	6	3	3	4	3
Ranchi	9	3	3	3	3	3	4
Dhanbad	19	4	2	1	1	Nil	..
Singbhum	12	10	8	4	3	2	1

NOTE—1961—All the constituents of town-groups have been treated as separate towns.

1951—Suburbs shown independently as towns in some of the earlier censuses have been amalgamated with main towns. This has been done in seven cases namely, Patna, Jamshedpur, Muzaffarpur, Dinapur, Katihar, Dhanbad and Chakradharpur.

1941—The portion of Ranchi town administered by the Doranda Notified Area Committee, and the railway settlements at Katihar, Dhanbad, and Chakradharpur have been treated as suburbs of the adjoining municipalities and not shown separately in the list of towns.

1931—The New Capital Area at Patna, the portion of Ranchi town administered by Doranda Notified Area Committee and the railway settlements at Katihar, Dhanbad and Chakradharpur have not been treated as separate towns. Cantonments at Dinapur and Muzaffarpur have been treated as entirely separate towns.

1921—The New Capital Area at Patna, the Military Cantonment at Dinapur, the portion of Ranchi town administered by the Doranda Station Committee, and the railway settlements at Katihar, Dhanbad and Chakradharpur have not been treated as separate towns.

1911—Dinapur Cantonment forms part of Dinapur Municipality and has not been treated as separate town.

1901—The population of cantonments (Dinapur and Doranda) has been added to that of the municipalities to which they adjoin.

VILLAGES

A "village" means the same thing as a revenue *mauza* which was defined in the Census Code as follows—

"A *Mauza* means a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of the cadastral survey or at the time of the revenue survey. It may contain no houses at all or, on the other hand, several hamlets each bearing a different name."

In earlier censuses, the number of villages given in this table related to "*mauzas* other than those which are wholly absorbed in towns, and uninhabited *mauzas*". An innovation made this time is that the present table gives figures for both inhabited and uninhabited *mauzas* in separate columns. It follows, therefore, that only the numbers of *mauzas* wholly absorbed in towns are left out.

For determining the number of *mauzas*, each separate entry in the Thana list with a specific thana number has been treated as a separate *mauza*. In the districts of Bhagalpur and Monghyr as well as some other districts, there are several entries with *bata* (fractional) numbers. We have treated them as independent *mauzas* wherever their areas have been given separately. Similarly, in the Damin area of Santal Parganas, each separate entry in a Damin Bungalow or a Hill Block having a separate number has been counted as an independent village.

The following statement gives the number of inhabited villages as reported at successive censuses since 1901—

NUMBER OF INHABITED VILLAGES 1901—1961

State/Division/District	Number of inhabited villages						
	1901	1951	1941	1931	1921	1911	1901
1	2	3	4	5	6	7	8
BIHAR (1)	67,665	68,150	66,528	65,299	66,763	68,828	73,618
Patna Division	13,328	13,119	12,980	13,108	13,054	13,211	18,338
Patna	2,335	2,288	2,260	2,315	2,319	2,342	4,952
Gaya	6,236	6,102	5,991	6,058	6,031	6,187	7,871
Shahabad	4,757	4,729	4,729	4,735	4,704	4,682	5,515
Tirhut Division	14,357	14,087	14,107	14,047	14,160	14,338	15,831
Saran	4,425	4,285	4,259	4,305	4,341	4,320	5,855
Champaran	2,642	2,622	2,612	2,548	2,554	2,651	2,623
Muzaffarpur	4,147	4,171	4,129	4,059	4,088	4,220	4,120
Darbhanga	3,143	3,009	3,107	3,135	3,177	3,147	3,233

NUMBER OF INHABITED VILLAGES 1901—1961—*concl.*

State/Division/District	Number of inhabited villages						
	1961	1951	1941	1931	1921	1911	1901
1	2	3	4	5	6	7	8
Bhagalpur Division	20,903	21,984	20,445	19,287	20,207	18,977	17,378
Monghyr	3,464	3,073	3,311	2,610	2,768	2,530	2,516
Bhagalpur	2,489	2,291	2,224	1,955	2,564	2,468	3,063
Saharsa (2)	1,195	1,268	1,112	1,125	1,265	1,070	
Purnea (3)	3,687	3,830	3,540	3,437	3,454	3,324	2,632
Santal Parganas	10,068	11,522	10,258	10,160	10,156	9,585	9,167
Chotanagpur Division	19,077	18,980	18,996	18,857	19,342	22,302	22,071
Palamau	3,194	3,201	3,110	3,134	3,120	3,101	3,184
Hazaribagh	6,162	6,129	6,066	6,087	6,168	8,399	8,848
Ranchi (4)	3,858	3,891	3,858	3,799	3,837	3,886	3,134
Dhanbad (5)	1,462	1,505	1,566	1,657	1,823	2,016	2,016
Singhbhum (6)	4,401	4,233	4,396	4,180	4,394	4,900	4,889

NOTES—(1) No adjustment has been made on account of changes in jurisdiction during the period before 1951.

(2) The number of villages for 1901 for Saharsa district has been included in Bhagalpur, as separate figures are not available.

(3) Adjustment has been made on account of 723 villages transferred to West Bengal as a result of the States' reorganisation.

(4) 39 villages transferred to Singhbhum district have been deducted from the figures of 1951 and earlier censuses.

(5) In 1951 figures, 264 villages of old Manbhum district retained in Bihar after the States' reorganisation have been added. In the figures of earlier censuses, only the numbers of villages in Dhanbad Subdivision and Chas Revenue Thana of old Manbhum district have been taken into account. For 1901, the 1911 figures have been repeated, as separate figures for this census cannot be worked out.

(6) In 1951 figures, 463 villages of old Manbhum district retained in Bihar after the States' reorganisation and 39 villages transferred from Ranchi district have been added.

The following numbers of villages have been added to the figures of earlier censuses—

	1941	1931	1921	1911	1901
(a) Seraikela and Kharsawan	864	672	882	888	1,079
(b) Chandil Revenue Thana	312	307	311	472	472
(c) Patamda P. S.	149	149	149	149	149
(d) Ranchi District	39	39	39	39	39
TOTAL	1,364	1,167	1,381	1,548	1,739

The total number of villages, inhabited or otherwise, is fixed. A certain amount of variation in the number of inhabited villages is, however, possible because some may get deserted or denuded (e.g., by riparian action) while some others may become inhabited. However, it would be wrong to attribute all the variations in the above table to these causes only. In fact the main cause, as noted in the Census Report of 1931 as well as of 1951, is the failure of the local staff to adhere strictly to the definition of a village and their proneness to treat the larger hamlets as independent villages.

The total number of inhabited villages in Bihar, according to the 1961 figure is 67,665. It is less than the corresponding figure of 1951 by 485. With the growth of population, one would normally expect an increase in the number of inhabited villages from one census to another assuming, of course, (i) that the definition of "villages" has been strictly adhered to, and (ii) that the loss in the number of inhabited villages due to natural calamities or other reasons has not been considerable. A mere glance at the district figures would confirm this view generally, except in cases of Muzaffarpur, Saharsa, Purnea, Santal Parganas, Palamau, Ranchi and Dhanbad. In Muzaffarpur and Palamau the difference is so small that it needs no explanation. In Saharsa, the decrease may be due to a considerable number of inhabited villages having fallen within the Kosi embankment and become depopulated. In Purnea, Santal Parganas and Ranchi, the 1961 figures agree more closely with the figures of all other censuses except 1951, and it may be inferred that the big spurt in 1951 was perhaps due to a not-too-strict application of the definition of "villages". The decrease in the case of Dhanbad is explained by the fact that as many as 30 *mauzas* treated as rural in 1951 have been included in urban area this time.

A statement showing districtwise for 1961 (1) the total number of *mauzas* borne on the Jurisdiction lists; (2) the number of *mauzas*, (a) uninhabited, and (b) inhabited; (3) the number of *mauzas* included in towns, (a) fully, and (b) partly; and (4) the number of towns, is given below—

STATEMENT OF VILLAGES AND TOWNS IN THE STATE, 1961

State/District	Total no. of <i>Maupas</i> borne on Thana Jurisdiction Lists	No. of <i>Maupas</i>		Number of <i>Maupas</i> included in towns		Number of towns	Total of columns 3, 4 and 5	Difference
		Uninhabited	Inhabited	Wholly	Partly			
1	2	3	4	5	6	7	8	9
BIHAR	79,039	10,428	67,665	887	160	153	78,980	-59
Patna	2,004	199	2,335	73	32	10	2,607	+3
Gaya	6,855	583	6,236	36	11	10	6,855	Nil
Shahabad	6,092	1,311	4,757	35	16	9	6,103	+11
Saran	4,891	438	4,425	28	9	6	4,891	Nil
Champaran	2,849	177	2,642	30	8	9	2,849	Nil
Muzaffarpur	4,519	308	4,147	85	17	6	4,540	+21
Darbhanga	3,689	469	3,143	77	4	6	3,689	Nil
Monghyr	4,936	1,294	3,404	148	16	13	4,906	-30
Bhagalpur	3,663	1,046	2,489	30	3	5	3,565	-98
Saharsa	1,355	145	1,195	15	3	6	1,355	Nil
Purnea	4,402	677	3,687	38	17	8	4,402	Nil
Santal Parganas	12,250	2,106	10,068	76	9	10	12,250	Nil
Palamau	3,602	388	3,194	28	1	5	3,610	+8
Hazaribagh	7,101	887	6,162	52	7	10	7,101	Nil
Ranchi	3,915	24	3,858	35	2	9	3,917	+2
Dhanbad	1,626	107	1,462	57	4	19	1,626	Nil
Singhbhum	4,690	269	4,401	44	6	12	4,714	+24

Figures in column 2 of the above statement have been arrived at by actual counting of entries in the Revenue Thana Jurisdiction lists, while those in columns 3-7 are based on entries in the villagewise Primary Census Abstracts and relevant tables of the 1961 Census. It is obvious that the totals of columns 3, 4 and 5 should normally tally with the figures in column 2. It is so in the case of Gaya, Saran, Champaran, Darbhanga, Saharsa, Purnea, Santal Parganas, Hazaribagh and Dhanbad districts. There are, however, minor differences in other districts, which are explained below—

Patna District—*Mauza* Mohammadpur Nakatpura (Thana no. 164 of Revenue Thana Bihar) occurs in the P. C. As. of both Bihar Anchal and Asthawan Anchal. This village lies on the boundary between the two Anchals, and it seems that portions containing distinct hamlets of the *mauza* have been included in both the Anchals. Similarly, *mauza* Rajawan (Thana no. 168 of Revenue Thana Bihar) finds place in the P. C. As. of Rahui and Asthawan Anchals. These two entries account for the excess of 2 between columns 8 and 2. The excess of 1 more is due to village Mahmuda, which is reported by the local B. D. O. to be an independent Revenue *mauza*, though it does not find mention either in the Thana Jurisdiction list or in the Revenue Thana map.

Shahabad District—There is an excess of 11 in the total number of villages according to the 1961 Census due to the inclusion in the P. C. A. of 10 unsurveyed *diara* villages, and of village Bhelsand whose enumeration was done by the census authorities in U. P., but figures were included in Bihar State according to a subsequent decision.

Muzaffarpur District—There is a difference of 21 due to the merging together of Thana nos. 540 and 541 of Revenue Thana Muzaffarpur as one independent village in Minapur Anchal, and the occurrence of 18 *mauzas* twice and 2 *mauzas* thrice (as mentioned below) in the P. C. A. presumably because *tolas* were treated as independent *mauzas*—

Thana no.	Revenue Thana	Remarks
594 and 696	Muzaffarpur	Both in Boohaha and Musahari Anchals (+2)
253	Ditto	Twice in Kurhani Anchal (+1)
837 and 940	Do.	Twice in Sakra Anchal (+2)
783 and 786	Do.	Thrice in Dholi Anchal (+4)
784, 785 and 905	Do.	Twice in Dholi Anchal (+3)
496	Do.	Twice in Kanti Anchal (+1)
153	Paru	Twice in Baruraj Anchal (+1)
163 and 253	Katra	Twice in Gaighatti Anchal (+2)
19	Sheohar	Both in Baigania and Majorganj Anchals (+1)
502 and 503	Mahua	Twice in Pateypur Anchal (+2)
335	Lalganj	Twice in Lalganj Anchal (+1)
213	Ditto	Twice in Vaishali Anchal (+1)
418	Muzaffarpur	Twice in Musahari Anchal (+1)

Monghyr District—In this case, the Census figure is less than the Thana Jurisdiction list figure by 30. On a scrutiny of the villagewise P. C. As., it appears that 30 entries in the Jurisdiction lists having fractional Thana numbers have been merged with the *mauza* having whole Thana numbers.

Bhagalpur District—There is a difference of 98 for reasons similar to those stated in the case of Monghyr district.

Palamau District—The excess in the Census figure is explained by the inclusion of 8 forest villages in the unsurveyed jungle tracts of the district.

Ranchi District—Entries in respect of two *mauzas* namely, Namkum (Thana no. 214) and Dumri (Thana no. 294) of Revenue Thana Ranchi, have been repeated in the Primary Census Abstract, presumably giving figures separately for distinct *tolas* (hamlets) within these *mauzas*.

Singhbhum District—There is an excess of 24 in the Census figure. Of this, 20 is due to the inclusion of forest villages in the unsurveyed jungle tracts of the district—18 in Manoharpur Revenue Thana and 2 in Chakradharpur Revenue Thana. Thana nos. 21, 41 and 51 of Revenue Thana Chakradharpur have been repeated in Chakradharpur and Sonua Anchals, presumably for reasons similar to those stated in the case of Ranchi district. *Mauza* Chota Bankau (Thana no. 31) of Chakradharpur Revenue Thana has been transferred to Kolhan Revenue Thana, but Thana no. 31 still occurs in the P. C. A. of Sonua Charge within Revenue Thana Chakradharpur under the name, Dalkutam. Presumably, it is a *tola* of the main *mauza* transferred to Kolhan Revenue Thana.

For the State as a whole, there is a difference of 59 only between the total number of *mauzas* according to the Jurisdiction lists and according to the Census tables. The total number of uninhabited *mauzas* is 10,428. This differs from the figure reported at page 5 of the 1961 Census—Final Population Totals (Census of India, Paper no. 1 of 1962) by 134. The difference has arisen due to subsequent enquiries and checking made in connection with missing *mauzas* and *mauzas* included in towns. Santal Parganas has the largest number of uninhabited *mauzas*. The districts of Shahabad, Monghyr and Bhagalpur also have a large number of them. In the last two districts, the main reason seems to be the occurrence of a surprisingly large number of fractional thana numbers in the Jurisdiction lists. Incidentally, these figures also establish the fact that the *mauza* is essentially a revenue, and not a demographic unit. Further, as many as 160 *mauzas* have been split in the formation of towns. This has happened almost entirely in municipal towns, whose constitution is not necessarily based on the *mauza* as the unit.

CENSUS HOUSES

A "house" was defined in this Census as "a structure or part of a structure inhabited or vacant, a dwelling, a shop, workshop, factory or place of worship or shop-cum-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a *separate entrance*". In 1951, it meant "a dwelling (or a place which can be used as a dwelling) with a *separate main entrance*". It is obvious that the concept was enlarged this time so as to embrace all kinds of structures irrespective of whether they were used for residential or non-residential purposes, or were lying vacant. Such modification was considered necessary as the houselisting operation this time was combined with a complete census of houses and industrial establishments of different kinds. The term "occupied residential house" refers only to such houses as are used for dwelling purposes or where any other purpose of use is accompanied by the element of dwelling, e.g., shop-cum-dwelling, workshop-cum-dwelling, etc. Instances of "occupied non-residential house" are shops, workshops, factories, schools, restaurants, etc. A "vacant house" is one which is not occupied at all or used for any purpose.

The figures relating to "occupied residential houses" in the enclosed table are based on information extracted from the household schedules filled in at the time of enumeration. More detailed information regarding the number of houses and different kinds of uses to which they are put, can be had from Table E-I in the Housing Report (Part IV).

The statement below gives an abstract of districtwise figures relating to census houses divided into three broad categories of residential, non-residential and vacant.

The figures in column 2B have been compiled from the household schedules, while those in other columns from the houselists. Some variation in the numbers of occupied residential houses (columns 2A and 2B) is noticeable in each district. A part of it is accountable to changes during the period of nearly six months intervening between the houselisting and actual enumeration (when the household schedules were prepared), but much of it seems to be due to errors during the houselisting.

State/District	1	Occupied Houses			Vacant Houses
		Residential		Non-Residential	
		2A	2B	3	4
BIHAR	..	6,975,707	6,885,541	1,501,103	264,968

Singhbhum	78.50	21.50	398	316	7,025

*According to area figures supplied by the State Survey Office

Persons per occupied residential house—The number of persons per occupied residential house in Bihar varies between 5.18 and 7.91, Singhbhum district having the lowest and Saran the highest average. The districts of Patna, Muzaffarpur, Saran and Darbhanga, which have density of population well above 1,300 persons per sq. mile, also have a high average of persons per occupied residential house. Shahabad, Gaya and Monghyr districts have, however, high average in respect of persons per occupied residential house, although their population densities are comparatively less. The districtwise variations in figures relating to the number of persons per occupied residential house show a definite pattern in Bihar. There are three clear and almost continuous belts stretching from north to south-west, Champaran district being the only exception to it. The first is a low-ratio belt stretching along the eastern and southern extremities of the State and comprising the districts of Purnea, Santal Parganas, Dhanbad, Ranchi and Singhbhum, where the average is below 6 persons per occupied residential house. The second is a medium-ratio belt consisting of Saharsa, Bhagalpur, Hazaribagh and Palamau districts where the average varies between 6 and 7. Champaran district lies within this range, but does not form part of the continuous belt. The remaining districts of Patna, Gaya, Shahabad, Saran, Muzaffarpur, Darbhanga and Monghyr comprise one compact block of high-ratio belt in which the average is above 7 persons per occupied residential house. As is natural, the average in urban areas is less than the average in rural areas except in 4 districts, namely, Bhagalpur, Santal Parganas, Hazaribagh and Singhbhum.

Sex-ratio—The sex-ratio is determined by the number of females per 1,000 males. Only in 4 districts, namely Saran, Darbhanga, Muzaffarpur and Gaya, the sex-ratio is favourable; that is, there is an excess of females over males. In the districts of Hazaribagh, Ranchi, Palamau, Santal Parganas, Monghyr, Shahabad and Champaran, the sex-ratio is more or less balanced, and varies between 975 and 1,000. In Bhagalpur and Singhbhum districts, it is somewhat low but above 950. In Patna, Saharsa and Purnea districts, however, the sex-ratio is even below 950 but above 900. Dhanbad district has a really adverse sex-ratio with only 792 females per 1,000 males. It may be pointed out here that the pattern of sex-ratio in Bihar is greatly influenced by migrations, seasonal or otherwise, of male labourers within and outside the State. But the possibility of biological factors shaping the pattern to some extent cannot also be ruled out completely.

Rural-Urban Population—Only 8.43 percent of the total population of Bihar in 1961 was found to be urban. This marked an appreciable improvement upon the corresponding figure of 6.77 percent in 1951. But Bihar is still far behind the all-India average of 17.97 percent in 1961. Within Bihar itself, Dhanbad district had the highest percentage (25.02) while Saharsa, Saran and Darbhanga happened to be the most rural.

Density per sq. mile—According to the area figures of the State Survey, the average density of Bihar in 1961 was 694 persons per sq. mile, as against 579 in 1951. The districts of Patna, Muzaffarpur, Saran and Darbhanga constitute the most densely populated regions of the State having well over 1,300 persons per sq. mile. Next comes Dhanbad with 1,045 persons per sq. mile. In the districts of Monghyr, Champaran, Saharsa, Bhagalpur, Gaya, Shahabad and Purnea the density varies between 700 and 900. In the remaining 5 districts, the density is below 500, Palamau having the least (242).

NOTES—1 Under columns 3(a) and 3(b), (a) represents the area figures furnished by Surveyor General of India, (b) represents the area figures furnished by the State Survey Department. The Urban areas are based on the area of individual towns furnished by the local authorities. The Rural area for a district is obtained by subtracting from the State Survey Area, the Urban area.

2 The sq. km. and density figures of Urban areas of District/Division/State are worked out using the area figures corrected up to 2 places of decimals obtained by adding the areas of the towns in the respective units and not using the area figures given in the Table. In addition to this the area figures relating to sq. km. are further adjusted to make the District/Division/State totals tally.

3 Population per square mile has been calculated on area figures supplied by State Survey Office.

NOTE.—(1) °The sq. km. and density figures of urban areas of Anchal/Subdivision/District/Division/State are worked out using the area figures corrected up to 2 places of decimals obtained by adding the areas of the towns in the respective units and not using the area figures given in the table. In addition to this the area figures relating to sq. km. are further adjusted to make the Anchal/Subdivision/District/Division/State totals tally.

(2) Towns treated as such for the first time in 1951 census which continue as towns in 1961 Census are shown with asterisk (*) on their left.

(3) Towns treated as such for the first time in 1961 are printed in italics.

(4) The following abbreviations have been used for the status of town, e.g.,

M.C.—Municipal Corporation

M.—Municipality.

N.—Notified Area

Cantt.—Cantonment.

Where no symbol occurs but the place is shown as Urban, it means that the place has been treated as town for census purposes, according to the definition explained in the flyleaf.

(5) The rural areas of units smaller than the district do not add up to the total rural area of the district, because the rural areas of units smaller than the district have been computed from thana jurisdiction lists, while the total rural area of the district has been arrived at by subtracting the total urban area of the district as supplied by the District Officer, from the total area of the district as supplied by the State Survey Office.

(6) (a) Muzaffarpur (M) and Darbhanga (M) have become cities only at the 1961 Census, i.e., after the formation of Anchals-cum-Development Blocks and so they have been shown as included within their respective Anchals.

APPENDIX I TO TABLE A-I

This appendix contains a statement showing 1951 territorial units constituting the present set up of each unit up to police station. Since Anchals did not exist in 1951 and were all created during the last decade, they have been left out altogether from this statement. However, a separate statement (Annexure I) has been prepared showing the inter-relationship among Revenue Thanas, Police Stations and Anchals. This statement should serve as the key for conversion of figures given in the 1961 Census Tables to corresponding units of previous censuses. The Sub-Appendix to Appendix I shows the 1951 and 1961 areas of those municipal towns which have undergone changes in area since 1951 Census due to jurisdictional alterations or due to revised computation.

APPENDIX I TO TABLE A-1
Statement showing 1951 Territorial Units constituting the present set up of Bihar

- (1) Only those names/areas which have undergone changes since 1951 have been shown below.
- (2) The location code number (Thana number), name and area of each village (wherever available) transferred from one territory to another or incorporated in a territory by transfer from another will be found in the respective District Census Handbook for the Census of 1961.
- (3) The areas of the transferred units have been taken from the Thana Jurisdiction Lists, and so they may not necessarily agree with the areas appearing in the 1951 District Census Handbooks.

†At the 1961 Census, the enumeration of the whole of mauzas Sheopur Diar and Jawahi was done by the agency in Bihar while that of mauza Bhelsand in U.P. During the stage of sorting and compilation, however, the slips relating to mauza Jawahi (P-2,811, M-1,432, F-1,379) and a portion of mauza Sheopur Diar lying in Simri Anchal (P-5,431, M-2,602, F-2,829) were sent by mistake to the Tabulation Officer, Gorakhpur in U.P. and those of mauza Bhelsand (P-737, M-337, F-400) were similarly received in the Tabulation Office at Patna. The slips of the remaining portion of mauza Sheopur Diar lying in Barhampur Anchal comprising a population of 10,003 (M-4,988, F-5,015) were, of course, retained in the Tabulation Office at Patna. At the stage of tabulation, it was decided by the Registrar General that without prejudice to the dispute between the two States in regard to these three villages census data relating to Bhelsand and part of the village Sheopur Diar lying in Barhampur Anchal will be incorporated in the Census Tables of Bihar, while those of Jawahi and part of Sheopur Diar lying in Simri Anchal in the tables of U.P.

*The area figures for Police Stations involved in the transfer as worked out from village area given in the Thana lists, actually add up to 733.4 sq. miles, the area of 270 villages of Karandighi being 150.2 sq. miles. But the figure of 732.9 sq. miles and the area of 270 villages as 149.7 sq. miles, is being taken by us on the basis of Ministry of Home Affairs corrigendum published in Part II, Section III (ii), *Gazette of India*, dated the 11th July, 1960. The difference of 0.5 sq. mile remains unexplained and may be attributable to the transfer of a few part villages.

At the 1961 Census, there was some controversy about the enumeration of mauza Gobindpur (Thana no. 349 of Katihar Revenue Thana) on Bihar-West Bengal border. Of the seven tolas in the village, West Bengal claimed five. It was finally decided by the Registrar General, India that the census of these five tolas would be done by the West Bengal authorities subject to two conditions—

(a) Separate identities would be kept of each disputed tola, and

(b) The census would be done without prejudice to the claims of either Government, pending final settlement of the issue between them.

‡ Sub-items (i), (ii), (iii) and (iv) of item (a) and item (b) were transferred to Darjeeling District of West Bengal and subsequently transferred to West Dinajpur District of West Bengal; Sub-item (v) of item (a) transferred to Darjeeling District of West Bengal.

79

ANNEXURE I TO APPENDIX I TO TABLE A-I

This statement has been prepared to show the inter-relationship among Revenue Thanas, Police Stations and Anchals for each Subdivision and District of Bihar. In this connection, the following points may be noted—

- (1) Figures within brackets following each Revenue Thana in column 1 indicate the number of villages in it according to actual counting of entries in the Thana Jurisdiction List. Normally the figures in columns 3 and 4 should add up to the figure in column 1. Wherever there are differences, a reference may be made to the flyleaf for necessary explanation.
- (2) Villages included wholly within towns have been shown against them. But villages included partly in towns have been excluded therefrom and counted entirely in the rural portion.
- (3) Figures shown against Anchals include those for urban areas within the Anchals, separate figures have been given for cities, as they do not form part of Anchals.
- (4) (N), (M), (M.C.) or Town has been mentioned against each town according as it is a "Notified Area", a "Municipality", a "Municipal Corporation", or a town without status.
- (5) The word "Anchal" has not been written against Anchals in column 11.

Annexure II to Appendix I to Table A-I contains the names, thana numbers and areas of villages involved in each change. This will be presented separately for each district in the respective District Census Handbooks.

Inclusive of cantonment
Inclusive of railway colonies
†Includes the area of Doranda for 1951

APPENDIX II TO TABLE A-I

This appendix shows for each unit of territory the number of villages with a population of 5,000 and over and of towns with a population under 5,000. Demographically, the dividing line between a town and a village is at 5,000. This appendix, therefore, indicates the number of over-grown villages which would have qualified for being treated as urban, had they fulfilled the other two conditions, viz., three-fourth of adult male population engaged in non-agricultural livelihood, and the density of population exceeding 1,000 persons per square mile. At the same time, it also gives an idea of the number of places included in the urban category even though they did not strictly qualify according to the population test, i.e., they did not have population of at least 5,000.

There are altogether 485 villages in the State, each having a population of 5,000 or more. Their population is 3,436,356, constituting 8.08 per cent of the total rural population. Darbhanga district has the largest number (104) of such over-size villages, followed by Muzaffarpur (55) and Monghyr (54). It will be seen that in Chotanagpur Division and Santal Parganas generally, the number of villages having population of more than 5,000 is very small. Palamau has only one such village, Ranchi 2, Santal Parganas 3 and Singhbhum 4. In 1951, the total number of villages in the State having more than 5,000 population was 233. Thus, the number of such villages has more than doubled itself during the last decade. This would seem to suggest that the number of villages on the border-line of 5,000 is quite considerable.

There are 8 towns having a population of under 5,000. Their population, 30,036, comprises 0.77 per cent of the total urban population of the State. In 1951, the corresponding figures were—number of towns—11; total population—42,403; percentage to the total urban population of the State—1.57. The reduction in the number of such towns in 1961 has evidently been brought about by a stricter application of the criteria relating to towns. Of the eight towns belonging to this category in 1961, four towns, viz., Lauthaha in Motihari Anchal, Dumra in Dumra Anchal, Jasidih in Deoghar Anchal and Kharsawan in Kharsawan Anchal had Notified Area Committees, and were thus statutorily qualified to be treated as towns. It may also be added that Lauthaha is not really as small a place as its isolated population figures would seem to suggest. It adjoins Motihari town having a population of 32,620 and, for all practical purposes, actually forms part of it. Dumra is similarly related to Sitamarhi town, and Jasidih to Deoghar town. Of the remaining 4 towns, viz., Bakhtiarpur in Bakhtiarpur Anchal, Netarhat in Mahuadarr Anchal, Muri in Silli Anchal and Panchet in Nirsa-cum-Chirkunda Anchal, three are border-line cases having missed the 5,000 mark by a narrow margin. Only Netarhat has really a small population to be treated as a town. But it is certainly not a village. A famous hill resort and an important tourist attraction in Palamau district, it has all the urban amenities, with a predominantly non-agricultural population.

APPENDIX III TO TABLE A-I

This Appendix furnishes figures for houseless population and institutional population separately for each unit of territory and sex. For purposes of studying different characteristics, however, this population has been included along with the household population.

Houseless population refers to that section of the population which has, literally, no "house" to live in, that is, people without a roof over their head. The definition of a "house" at the 1961 Census was quite comprehensive and covered almost all kinds of structure having an entrance. Even semi-permanent huts, and the worst of shacks, sheds or hovels should have been treated as house, provided they were not likely to be moved from place to place during the enumeration period. It is thus easy to see that, except in big cities like Calcutta or Bombay where there are pavement dwellers who sleep on footpaths at night and roam about the city during day-time, there could not be many houseless persons at other places. Even beggars generally have some sort of dwelling. The category of houseless population would, therefore, seem to be confined specially to a few wandering tribes, *Sadhus*, tramps and, may be, a limited number of beggars. The instructions were that the existence or arrival of such persons within any block during the enumeration period should be noted carefully, and they should be enumerated on a simultaneous basis on the night between the 28th February and the 1st March, 1961.

According to the 1961 Census, there were 30,777 houseless persons (21,658 males and 9,119 females) in Bihar. Of them, 24,414 were enumerated in rural area and 6,363 in urban area. Purnea district returned the largest number (7,267), and Palamau the smallest (217). Among the cities, Jamshedpur had the highest number (647), followed by Muzaffarpur (585) and Darbhanga (317).

Comparative figures of houseless persons for previous censuses are not available. It is, therefore, difficult to judge the extent to which these figures can be deemed to be reliable. At first sight, it would seem that there must have been under-enumeration of houseless persons, as many of the enumerators would not have cared to be on their feet at night. But a careful look at the figures in the Appendix, together with a probe into the villagewise break-down of figures in the Primary Census Abstract would amply convince that, if anything, there might have been over-enumeration of such persons owing, perhaps, to a lack of proper appreciation of what really comprised houseless population.

It will be found that though in most villages the number of persons returned under this category is either nil or small, there are few villages in which the number is large. It may be that many of these sporadic cases are accountable to the temporary influx from outside of agricultural or seasonal labourers (e.g., brick-kiln workers), or of congregation of visitors to an important local fair or *mela*, or to some such event. Yet, in quite a few cases, such explanation is not easy to find. A more or less balanced sex-ratio in these cases tends to suggest that the figures actually relate to household population comprised of beggars or such other persons of the less-privileged classes whose lowly dwellings did not, in the enumerator's view, appear worthy of being treated as houses. Some examples may be cited to illustrate these points. Patna Rural Anchal in Patna district has returned an unusually large population of houseless persons. This is explained adequately by the large number of brick-kiln workers in villages Sabbalpur (586), Digba (851, etc.). Similarly in Sidhau Anchal of Champaran district, there are concentrations in villages Bhainsalotan (428), Sheoraha (148) and Barwal (132), presumably due to the influx of labourers engaged in Gandak Barrage Project. In Purnea district as a whole, the figure is high, apparently because of the

well-known fact of a large number of fairs being held in different parts of the district from October to April every year. In several other Anchals, e.g., Phulwari and Islampur in Patna district, Kargahar in Shahabad district, Colgong in Bhagalpur district, however, the sex-ratio is so even among them as to suggest a population different from that of houseless persons. But the case of Purnea East Anchal, where out of 727 houseless persons 561 are females, seems to be inexplicable.

The term, "institutional population", refers to persons living in institutions such as jails, hospitals, asylums, hostels, after-care homes, reformatories, etc. While a census household is generally composed of persons bound by some sort of relationship by birth or marriage living together and taking their food from a common mess, an institution can be regarded as a special type of census household of "unrelated persons". The main distinction between an ordinary household and an institution, therefore, lies in the absence of hereditary or marital ties among its constituents. It also follows that a school or a library or such other place commonly known as "institution," does not *ipso facto* get treated as "institution" in census, unless it has in it the traits of a household, viz., it has a group of unrelated persons living together and taking their food from a common mess unless exigencies of work prevent any one from doing so.

Generally speaking, the definition of institutional population was correctly understood by the enumerators, and the enumeration of large institutions particularly was done by special agencies. There is, thus, no possibility of any under-enumeration of the population in this category. In urban area, the figures would seem to corroborate this observation fully. But it is likely that in some cases in rural area, teachers dwelling within the school premises with or without their families or such other persons, might have been included in the group. Strictly speaking, they should have been classified as normal household population. Such mistakes, though not very common, might have resulted in slightly inflating the figures of institutional population.

The institutional population in Bihar, according to the 1961 Census, consists of 117,186 persons, of whom 97,845 were males and 19,341 females. Of them 46,670 were found in rural area, and 70,516 in urban area. Ranchi district had the largest institutional population (17,547) followed by Patna (13,289) and Bhagalpur (8,821). Both Ranchi and Santal Parganas has a large number of institutions run by missionaries, and the figures of institutional population would seem to corroborate this fact.

The houseless and institutional population put together accounted for 147,963 persons in Bihar, or less than 0.319 per cent of the total population. In other words, out of every 1,000 persons enumerated in the State, more than 996 belonged to the category of "normally resident household" population.

TABLE A-II

VARIATION IN POPULATION
DURING SIXTY YEARS

TABLE A-II—VARIATION IN POPULATION DURING SIXTY YEARS

This table corresponds to General Population Table A-II of 1951 and Imperial Table II of earlier censuses. It compares the 1961 population of each district and State with that of the six previous censuses (1901 to 1951). The figures for previous censuses differ in some cases from those given in the old census reports, because adjustments have been made for subsequent changes in area or jurisdiction. These figures thus represent the population enumerated within the boundaries of the units *as now constituted*. For details regarding changes in the areas of these units, a reference may be made to the flyleaf of Table A-I. The populations of Champaran, Darbhanga and Hazaribagh districts have remained unaffected by any change. For the remaining districts, the following table gives the details of adjustments made—

District	Adjusted Unadjusted	1951	1941	1931	1921	1911	1901
1	2	3	4	5	6	7	8
Patna	Adjusted	..	2,144,552	..	1,576,879	1,608,674	1,624,231

During the last decade, only the districts of Purnea, Singhbhum and Ranchi underwent changes of area and jurisdiction the first two in the wake of the States' reorganisation and the third one as a result of the transfer of 39 villages from Tamar P.-S. of Ranchi district to Singhbhum district. Other figures in this table should tally with those given in Table A-II of 1951. Details of the area and population affected by changes during the last decade are given in the Appendix to this table. These should explain the adjustments necessary to bring the 1951 Census population of the district or State to the jurisdiction of the district or State as at the 1961 Census.

The following statement shows the percentage decade variation in the population of the State and Districts during 1901-1961. The rural and urban break-up of population has been adjusted according to the list of towns for 1961 to the extent that while deductions have been made from the urban population figures of earlier censuses for places declassified from the list of towns in 1961, no corresponding additions have been made in the earlier figures for new places treated as towns in 1961. The latter was not possible as population figures of constituent units for censuses earlier than 1951 are not available.

During the last decade Purnea District recorded the maximum increase (37.02%) and Saran the minimum (13.62%). In urban population, the growth in Dhanbad District has been phenomenal (293.89%). This is mainly due to inclusion of a large number of places, hitherto treated as rural, in the urban list for 1961.

The statement below shows changes in the proportion of the sexes (number of females per 1,000 males) during 1901-61:-

For several reasons, the year 1921 has often been called 'the great divide' in Indian Census. This observation seems to justify itself fully in so far as it concerns the changing pattern of sex-ratio during the period, 1901-61. The statement clearly shows that till 1921, the sex-ratio was favourable at the State level as well as in all the districts except Patna, Saharsa, Purnea and Dhanbad. After 1921, however, the picture changed suddenly. Since 1931, more districts as well as the State have been recording adverse sex-ratios. The over-all picture has, however, remained more or less stationary during the period 1931-61. The districts of Saran, Muzaffarpur, Darbhanga and Gaya have consistently maintained favourable sex-ratios during this period, as also in the earlier one.

TABLE A-II—VARIATION IN POPULATION DURING SIXTY YEARS

State/Division/District	Year	Persons	Decade variation	Percentage decade variation	Males	Females

TABLE A-II—VARIATION IN POPULATION DURING SIXTY YEARS—concl'd.

APPENDIX

DISTRICTS SHOWING 1951 POPULATION ACCORDING TO THEIR TERRITORIAL JURISDICTION IN 1951; CHANGES IN AREA AND THE POPULATION INVOLVED IN THOSE CHANGES

State/District	Area in 1961*		1961 population	Area in 1951*		1951 population according to jurisdiction prevailing in 1951	Population in 1951 adjusted to jurisdiction of 1961	Net increase or decrease between columns 7 and 8
	Sq. Miles	Sq. Km.		Sq. Miles	Sq. Km.			
1	2	3	4	5	6	7	8	9
Ranchi a ⁵ ..	7,035.2	18,221.2	2,138,565	6,917.0 (+118.2)	17,915.0 (+306.2)	1,861,207 (-15,395)	1,845,812	-15,395
Dhanbad a ⁶ ..	1,198.8	2,871.8	1,158,610	(+1,198.8)	(+2,871.8)	(+905,783)	905,783	+905,783
Singhbhum a ⁷ ..	5,152.6	13,345.2	2,049,911	4,475.0 (+677.6)	11,590.2 (+1,755.0)	1,480,816 (+219,774)	1,700,590	+219,774

NOTE.—*Area figures shown under columns 2, 3, 5 and 6 relate to the area supplied by the State Survey Office. The figures in columns 5 and 6 differ from those in columns 2 and 3, even though the districts were not in all cases affected by territorial changes. Such differences may have arisen due to changes in the course of boundary rivers or due to revised computation. These will not also agree with the differences in areas as given in Appendix I to Table A-I because the figures in the latter are based on the summing up of affected village areas as obtained from the Thana Jurisdiction Lists.

The figures given in brackets in columns 5 and 6 represent the difference in area between 1951 and 1961; and the figures shown in brackets under column 7 show the difference in population between the areas as per the jurisdiction in 1951 and the present jurisdiction.

† Includes an area of 4,112.0 sq. miles of Manbhum District which was an administrative unit of 1951, but does not exist in 1961; hence it is not shown in column 1; to that extent the figures against State in columns 7 and 9 will not tally with the total of figures for the districts appearing in those columns.

‡ Includes 2,273,259 population (1951) of erstwhile Manbhum district as follows:—

- (1) portion transferred to West Bengal: 1,169,097,
- (2) portion merged in Dhanbad district: 905,783,
- (3) portion merged in Singhbhum district: 204,379.

(a¹) An area of 3,003.0 sq. miles with a population of 1,439,763 was transferred from Bihar to West Bengal under the "Bihar and West Bengal Transfer of Territories Act, 1956".

(a²) An area of 2,139.8 sq. miles with a population 1,308,198 of Supaul and Madhepura Subdivisions of this district was transferred to newly formed Saharsa District vide Notification no. A/JI-109/54-PG-517, dated the 29th March 1954.

(a³) Newly formed district with 2 subdivisions, viz., Supaul and Madhepura covering an area of 2,105.5 sq. miles with a population of 1,308,198 transferred from Bhagalpur district, vide Notification no. A/JI-109/54-PG-517, dated the 29th March 1954. The difference between the area figures given here and in Note a² above is explained by the fact that the State Survey figures have undergone changes. In 1951, the area of Bhagalpur (including Saharsa) was 4,266 sq. miles, while in 1961 the corresponding figures is reported to be 2,126.2+2,105.5=4,231.7 sq. miles. The area figures given in Note a³ has been arrived at by subtracting the 1961 area of Bhagalpur District from the 1951 area of the same district (including Saharsa district).

(a⁴) The entire Police Station Gopalpokhar and portions of five Police Stations, namely, Thakurganj, Chopra, Islampur, Kishanganj and Karandighi covering an area of 660.9 sq. miles and population of 270,666 were transferred to West Bengal under the "Bihar and West Bengal Transfer of Territories Act, 1956".

(a⁵) An area of 118.2 sq. miles and population of 15,395 covered by 39 villages, viz., Thana nos. 6—26, 28—33 and 35—46 of Tamar Police Station of Khunti Subdivision of this district was transferred to Seraikela Subdivision of Singhbhum District under Notification no. A/JI-1017/54-PG-1226, dated the 5th August 1954.

(a⁶) Newly formed district out of the portions of former Manbhum District.

(a⁷) An area of 677.6 sq. miles with a population of 219,774 was added to this district due to the inclusion of—

- (i) Police Stations Chandil and Ichagarh of Chandil Revenue Thana and Police Station Patamda of Barabhum Revenue Thana of Purulia Subdivision of Manbhum District as a result of the implementation of the "Bihar and West Bengal Transfer of Territories Act, 1956".
- (ii) 39 villages, viz., Thana nos. 6—26, 28—33 and 35—46 of Revenue Thana Tamar of Khunti Subdivision of Ranchi District under Notification no. A/JI-1017/54-PG-1226, dated the 5th August 1954.

TABLE A-III

VILLAGES CLASSIFIED
BY POPULATION

UNION TABLE A-III—VILLAGES CLASSIFIED BY POPULATION

This table corresponds to General Population Table A-III of 1951 and Imperial Table III of previous censuses, but makes an important departure. In the past, towns and villages were put together in this table. The present Table deals exclusively with villages. Its importance lies in the fact that it gives the distribution of rural population in villages of varying sizes by seven population ranges, viz., less than 200, 200—499, 500—999, 1,000—1,999, 2,000—4,999, 5,000—9,999, and 10,000 and above. More than 4 per cent of India's population live in villages with population of less than 1,000. A little less than two-thirds of the population live in villages of less than 2,000 population. To give a better idea of the distribution of population in villages of the first category, the group 'less than 500' of the last Census has been split up into two groups : less than 200 and 200—499.

As the table relates only to villages, the largest group consists of only one slab, viz., 10,000 and above.

A 'village' has been defined in the flyleaf to Table A-I. According to census instructions, when a village lies partly in a town and partly outside, the rural portion (that is, the portion lying outside) is treated as a complete village. In other words, only such inhabited villages have been excluded from this table as are wholly constituted within urban areas.

The following table gives the percentage of population living in villages of various population sizes :—

PERCENTAGE OF POPULATION LIVING IN VILLAGES OF VARIOUS POPULATION SIZES WITH REFERENCE TO THE TOTAL RURAL POPULATION IN EACH DISTRICT, 1961

State/Division/District	Less than 200	200—499	500—999	1,000— 1,999	2,000— 4,999	5,000— 9,999	10,000+

Bihar's rural population is nearly 92 per cent of the total population. More than in villages with population less than 2,000. Only 1.31 per cent live in villages with percentage (84.98) of rural population living in small villages of population less than Saharsa district live in villages having population between 1,000 and 4,999. Numerically less than 1,000) and Saharsa the least (54.06).

The percentage of villages and population by different class-ranges in 1901, 1921,

PERCENTAGE OF VILLAGES AND POPULATION BY

Except for some districts in Bhagalpur Division, the number of villages as well as dwindling fast everywhere since 1901. In Bhagalpur Division, a different pattern seems different censuses. A mere glance through some of the thana lists of Monghyr and fractional thana numbers. It seems that sometimes they were treated as independent separate mauzas wherever their areas were given separately in the thana list.

In the remaining classes, the percentage of number as well as of population has percentage of population in the class-range 500-999 in Bihar during the last decade. and above, though small, has recorded steep increase during the last decade. Though the total rural population.

A statement showing the districtwise sub-totals of inhabited villages divided into 5,000 and above, is given below :—

VILLAGES CLASSIFIED

State/Division/District	Total number of inhabited villages	Total Rural Population			Villages		
		Persons	Males	Females	0-499

the percentage of population living in villages of less than 500 persons has been to have emerged, presumably due to differences in counting the number of villages at Bhagalpur districts would show that there are several mauzas with large number of mauzas, sometimes not. In this Census, we have generally treated them as

been going up steadily, for the State as a whole, except for a slight decrease in the The percentage of population living in villages of class-ranges 5,000—9,999 and 10,000 a mere 0.72 per cent of the total number, they contain as much as 8.08 per cent of

four population ranges, viz.: (i) 0—499, (ii) 500—1,999, (iii) 2,000—4,999, and (iv)

TABLE A-IV

TOWNS (AND TOWN-GROUPS)
CLASSIFIED BY POPULATION
IN 1961 WITH VARIATION
SINCE 1901

**TABLE A-IV—TOWNS (AND TOWN-GROUPS) CLASSIFIED BY POPULATION
IN 1961 WITH VARIATION SINCE 1901**

This table corresponds to General Population Table A-IV of 1951 and Imperial Table IV of earlier censuses. It traces the growth of each town and town-group since 1901. For the definition of a town, attention is invited to the flyleaf of Table A-I. In this table, cities, town-groups and towns have been arranged for the State as a whole in decreasing order of population according to the 1961 Census. All towns are classified by population in the following six groups: I—those with a population of 100,000 and above; II—those with a population of 50,000 to 99,999; III—those with a population of 20,000 to 49,999; IV—those with a population of 10,000 to 19,999; V—those with a population of 5,000 to 9,999; and VI—those with a population of less than 5,000. If two or more urban units are contiguous to one another and so constituted that they form together a compact urban unit, the entire area has been treated as one town-group. The concept of town-group is new and has been introduced for the first time at this Census. It is hoped that the adoption of this concept will enable a better appreciation of the needs of such units which, though technically separate, actually form part of one complex and should be treated as such for the planning and development of urban amenities such as sanitation, water supply, drainage, electricity, etc. It is necessary that the requirements are worked out for the town-group as a whole instead of for each individual unit.

According to the 1961 Census, there are 7 cities in Bihar, as against 5 in 1951. Muzaffarpur and Darbhanga are the new entrants to the rank of cities which in 1951 included Patna, Jamshedpur, Bhagalpur, Gaya and Ranchi. If town-groups are also taken into account, 2 new areas, viz., Dhanbad-Jharia-Sindri and Monghyr-Jamalpur town-groups qualify for being included within the category of cities.

48 new towns shown in italics with an aggregate population of 497,532 appear for the first time in this table. One more town (Doranda in Ranchi district) has also been shown in italics in this table for the purely technical reason that it is being treated as an independent Urban Unit for the first time in this Census. Details regarding the units constituting these towns are given in the explanatory note A to Appendix to Table A-IV. If these places had been treated as towns in 1951, the urban population of the districts and State would have been as indicated below—

State/District	Urban population in 1951 Census	*Urban population in 1951 Census had the new towns of 1961 been treated as such in 1951
BIHAR	2,626,261	2,973,637
Patna	457,794	463,116
Gaya	216,692	222,320
Shahabad	180,579	183,649
Saran	126,158	135,081
Monghyr	267,117	297,015
Bhagalpur	122,045	149,824
Saharsa	..	44,111
Purnea	94,879	127,570
Santal Parganas	96,780	110,813
Palamau	37,007	44,215
Hazaribagh	133,126	152,588
Ranchi	125,045	153,155
Dhanbad	79,475	190,455
Singhbhum	288,917	299,078

*In this column even for a part village included in a town, 1951 population of the entire village has been taken into account.

Five places, namely, Rajauli in Gaya district, Kesaria in Champaran district, Mau in Darbhanga district, Chas in Dhanbad district and Manoharpur in Singhbhum district, which were treated as towns in 1951, have been dropped from the urban list in this Census. If these places had not been so declassified in 1961, the urban population of the districts and the State in 1961 would have been as under (*) —

State/ District	Urban population in 1961 Census	Urban population in 1961 Census had the towns not been declassified
BIHAR	3,913,920	3,954,064
Gaya	265,008	280,434
Champaran	145,645	150,481
Darbhangā	190,555	196,031
Dhanbad	289,913	297,349
Singhbhum	440,651	447,711

(*)Phulwaria in Monghyr district which was treated as town in 1951, is included in Barauni town of 1961, hence its population does not appear in the above statement.

The following table gives the urban population of the districts and State in 1951, (i) if those places treated as new towns in 1961 had been treated as towns in 1951, and (ii) if those places treated as towns in 1951 but declassified in 1961 had been treated as declassified in 1951 too.

Urban population in 1951 on assumptions (i) and (ii) above —

State/District	Urban population in 1951 Census	*Urban population in 1951 on above assumptions
BIHAR	2,626,261	2,940,855
Patna	457,794	463,116
Gaya	216,692	269,617
Shahabad	180,579	183,649
Saran	126,158	135,081
Champaran	104,860	100,553
Darbhangā	100,091	154,396
Monghyr	267,117	297,015
Bhagalpur	122,045	140,824
Saharsa	..	44,111
Purnea	91,879	127,570
Santal Parganas	96,780	110,813
Palamau	37,007	44,215
Hazaribagh	133,126	152,588
Ranchi	125,045	153,155
Dhanbad	79,475	184,532
Singhbhum	288,917	294,314

*In this column even for a part village included in a town, 1951 population of the entire village has been taken into account.

The following statement shows changes in the classification of towns of 1961 Census at successive censuses from 1901 to 1961—

CHANGES IN CLASSIFICATION OF TOWNS 1901 TO 1961

Cities/Town-Groups/Towns	District	1961	1951	1941	1931	1921	1911	1901
1	2	3	4	5	6	7	8	9

A statement showing the number of towns of each class during 1901—1961 is given below—

NUMBER OF TOWNS OF EACH CLASS DURING 1901—1961

[Figures shown against (a) have been obtained by treating each town as an independent unit, and those against (b) by treating each town-group and town (other than those included in any town-group) as an independent unit]

Class	1961	1951	1941	1931	1921	1911	1901
1	2	3	4	5	6	7	8
I(a)	7	5	3	1	1	1	1
(b)	9	6	4	1	1	1	1
II(a)	7	6	8	6	4	2	3
(b)	7	7	7	7	6	4	4
III(a)	33	19	13	10	10	11	10
(b)	28	17	14	8	7	8	9
IV(a)	52	37	30	21	17	16	16
(b)	42	31	25	20	17	16	15
V(a)	46	30	25	26	26	24	22
(b)	35	28	20	23	24	22	20
VI(a)	8	11	5	2	5	5	5
(b)	5	9	5	2	5	5	5
TOTAL(a)	153	108	84	66	63	59	57
(b)	126	98	75	61	60	56	54

The number of towns in all the classes has been generally increasing from census to census, except in classes II and VI. This is mainly a result of the steady rise in the number of towns, which has almost trebled since 1901. Classes II and VI seem to suffer at times due to the elevation of some towns from their ranks to the next higher class without similar addition to their own ranks.

The following statement gives the percentage of towns in each class to total number of towns and the percentage of population in each class to total urban population from 1901 to 1961. A town-group has been classified according to total population—

PERCENTAGE OF TOWNS IN EACH CLASS TO TOTAL NUMBER OF TOWNS AND PERCENTAGE OF POPULATION IN EACH CLASS TO TOTAL URBAN POPULATION DURING 1901—1961

[Figures shown against (a) have been obtained by treating each town as an independent unit and those against (b) by treating each town-group and town (other than those included in any town-group) as an independent unit]

Class	1961		1951		1941	
	Percentage of no. of towns	Percentage of population	Percentage of no. of towns	Percentage of population	Percentage of no. of towns	Percentage of population
1	2	3	4	5	6	7

(b)	.. 3.28	0.27	8.33	1.92	8.93	2.02	9.20	1.60

The percentage of city-dwellers to the total urban population has remained almost constant during the last decade. It may, however, be of interest to note that the percentage has increased by nearly three times within the last 60 years. The percentage of population in class II towns (having population between 50,000 and 99,999) shows a steady decline at every census since 1931. Clearly, the increase in city-population has been due to the elevation of erstwhile class II towns to class I. In class III towns, the percentage has sometimes increased, sometimes decreased. Since 1941, however, there has been continuous increase. It is significant to observe that in class IV towns, both the number and population have retained a more or less constant percentage to the total urban population throughout the last sixty years. The percentage in class V and VI does not show any definite trend.

Area figures of towns are not available for censuses earlier than 1951. The following statement, therefore, compares the percentage of area of towns in each class to the total urban area of the State and the density of population per square mile in each class for the 1951 and 1961 Censuses.

PERCENTAGE OF AREA OF TOWNS IN EACH CLASS TO TOTAL URBAN AREA OF STATE AND DENSITY OF POPULATION PER URBAN SQUARE MILE IN EACH CLASS DURING 1901—1961

[Figures shown against (a) have been obtained by treating each town as an independent unit and those against (b) by treating each town-group and town (other than those included in any town-group) as an independent unit]

Class	1961		1951	
	Percentage of area to total urban area.	Density per square mile	Percentage of area to total urban area	Density per square mile
1	2	3	4	5
I(a)	13	12,722	18	10,886

*Dinapur Cantonment in 1901 population 10,841 (5,939 M, 4,902 F); in 1911 population 9,959 (5,655 M, 4,304 F); in 1921 population 9,210 (5,373 M, 3,837 F) and in 1951 population 13,514 (8,068 M, 5,446 F) was part of Dinapur. The combined population of Dinapur Municipality and Dinapur Cantonment for 1901, 1911, 1921 and 1951 has been shown against Dinapur Municipality. In 1931 and 1941 Dinapur Cantonment was treated as a separate Urban Unit.

†Phulwaria town of 1941, population 9,554 (4,848 M, 4,706 F) and of 1951, population 12,446 (6,271 M, 6,175 F) merged with Barauni.

‡Separate area figures for Barauni and Barauni Railway Colony are not available. Their areas have, however, been included in the main town.

NOTES—(1) Towns treated as such for the first time in 1951 Census which continue as towns in 1961 Census are shown with asterisk (*) on their left.

(2) Towns treated as such for the first time in 1961 are printed in italics.

(3) The following abbreviations have been used for the status of town:

M.C.—Municipal Corporation M.—Municipality N—Notified Area Cantt.—Cantonment

Where no symbol occurs but the place is shown as Urban, it means that the place has been treated as town for Census purposes, according to the definition explained in the flyleaf.

NOTE.—Area figures as shown in col. 5 of the above table differ in nine cases (indicated by asterisk marks on the left in col. 2 against the names of towns) from the area figures as given in Table A-IV. These discrepancies have arisen because the area figures for Table A-IV were obtained initially from local officers, while those for the above table have been worked out in the census office from available records.

PRIMARY CENSUS
ABSTRACT

UNION PRIMARY CENSUS ABSTRACT

This table combines two tables of 1951—(i) Table E—Summary figures by Subdivisions, Revenue Thanas and Police Stations, and (ii) Table A-V—Towns arranged territorially with population by livelihood classes. Revenue Thanas and Police Stations have been replaced this time by Anchals. To facilitate comparison with the 1951 figures for units below a Subdivision, full particulars have been given in the Annexure I to Appendix I to Table A-I.

The Union Primary Census Abstract gives figures down to Subdivisions, Anchals and Towns. The statistics presented in this table relate to the area in sq. miles, occupied residential houses and households, general population by sex and total, and population (by sex) of Scheduled Castes and Scheduled Tribes, of literate and educated persons, and of workers classified into the following nine industrial categories and non-workers, for each unit—

- I Cultivator ;
- II Agricultural labourer ;
- III Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities ;
- IV Household Industry ;
- V Manufacturing other than Household Industry ;
- VI Construction ;
- VII Trade and Commerce ;
- VIII Transport, Storage and Communications ;
- IX Other Services ; and
- X Non-workers.

The definition of a census house has already been given in the flyleaf to Table A-I. A house is a structure or a part of structure, a dwelling, a shop, a workshop, factory or place of business, or a shop-cum-dwelling having a *separate entrance*. A household means “a group of persons who commonly live together in the same census house and take their meal from a common mess unless the exigencies of work prevent them from doing so”. It follows that while the census house is a physical unit, the census household is a social unit. In some census houses, there may be more than one group of persons, each group with a common mess. In such cases, each group is regarded as a separate household for census purposes. A dwelling is “a census house where one or more households live”. A shop-cum-dwelling indicates a census house used both for dwelling and shop purposes. A workshop is a place where some kind of processing, repairing, servicing or manufacturing is done. A workshop-cum-dwelling, therefore, stands for a census house used for the dual purposes of a workshop and a dwelling.

The following table gives the percentage of households to number of houses in rural and urban areas for each district and State—

PERCENTAGE OF HOUSEHOLDS TO NUMBER OF HOUSES IN RURAL AND URBAN AREAS

State/Districts	Percentage of households to number of houses		
	Total	Rural	Urban
1	2	3	4
BIHAR	121	122	115
Patna	120	120	120
Gaya	116	117	110
Shahabad	122	123	118
Saran	132	133	116
Champanan	117	117	113
Muzaffarpur	135	136	117
Darbhangha	142	143	122
Monghyr	134	135	123
Bhagalpur	124	125	121
Saharsa	117	118	114
Purnea	110	110	108
Santal Parganas	112	111	122
Palamau	117	118	111
Hazaribagh	121	122	114
Ranchi	107	106	114
Dhanbad	108	109	108
Singhbhum	106	106	108

For the State as a whole, there are 121 households for every 100 occupied residential houses. In most districts as well as the State, the excess of households over occupied residential houses is more pronounced in rural areas than in urban areas. In other words, census households tend to coincide with occupied residential houses to a greater degree in urban areas than in rural areas. No conclusion can be drawn from this about the extent of congestion in living conditions in any area. These figures merely throw some light on the lay-out, design and construction of houses, in rural and urban areas. The provision of separate entrances to serve every household is more common in urban areas than rural areas. Notable exceptions to this observation are the districts of Santal Parganas, Ranchi and Singhbhum. Darbhanga, Muzaffarpur and Monghyr are the three districts recording the highest percentages of households to occupied residential houses. These are also the districts with very high density of population. Singhbhum has the lowest percentage. It is also interesting to find that the districts with lower density of population have smaller percentage of households to occupied residential houses.

The statement below indicates the density of households per square mile for each district by rural and urban areas—

DENSITY OF HOUSEHOLDS PER SQ. MILE IN RURAL AND URBAN AREAS

State/District	Density of households per sq. mile		
	Total	Rural	Urban
1	2	3	4
BIHAR	125	115	904
Patna	225	183	1,393
Gaya	127	118	906
Shahabad	116	107	1,244
Saran	223	215	1,364
Champanan	154	148	604
Muzaffarpur	245	238	996
Darbhangha	248	239	1,953
Monghyr	156	142	864
Bhagalpur	146	132	1,199
Saharsa	147	143	440
Purnea	137	130	551
Santal Parganas	93	89	662
Palamau	47	45	418
Hazaribagh	63	58	562
Ranchi	57	52	544
Dhanbad	207	161	974
Singhbhum	81	65	1,402

Darbhangha district stands at the top followed closely by Muzaffarpur. The density of households per sq. mile is the lowest in Palamau district. Incidentally, these results are strikingly similar to those we get on considering the density of population per square mile.

SCHEDULED CASTES AND SCHEDULED TRIBES

Under Articles 341 (1) and 342 (1) of the Constitution of India, the President is empowered to specify, by public notification, the castes or tribes which will be deemed to be Scheduled Castes or Scheduled Tribes in relation to any particular State. According to the Government of India, Ministry of Home Affairs'

Notification no. SRO-2477A, dated the 29th October 1956, issued under these provisions, the following is the list of Scheduled Castes and Scheduled Tribes in the State of Bihar—

Scheduled Castes	Scheduled Tribes
(I) Throughout the State—	(I) Throughout the State—
1. Bantar	1. Asur
2. Bauri	2. Baiga
3. Bhogta	3. Panjara
4. Chamar (or Mochi)	4. Bathudi
5. Chaupal	5. Bedia
6. Dabgar	6. Binjbia
7. Dhobi	7. Birhor
8. Dom or (Dhangad)	8. Birjia
9. Dusadh, including Dhari or Dharhi	9. Clero
10. Ghasi	10. Chik Baraik
11. Halalkhor	11. Gond
12. Hari, Mohtar (or Bhangi)	12. Gorait
13. Kanjar	13. Ho
14. Kurariar	14. Karmali
15. Lalbegi	15. Kharia
16. Musahar	16. Kharwar
17. Nat	17. Khonl
18. Pan (or Sawasi)	18. Kisan
19. Pasi	19. Kora
20. Rajwar	20. Korwa
21. Turi	21. Lohara or Lohra
	22. Mahli
	23. Mal Paharia
	24. Munda
(II) In Patna and Tirhut Divisions, and the districts of Monghyr, Bhagalpur, Purnea and Palamau—Bhumij	25. Oraon
	26. Parhaiya
	27. Santal
	28. Sauria Paharia
	29. Savar
(III) In Patna, Gaya, Shahabad and Palamau districts—Bhuiya	(II) In the districts of Ranchi, Singhbhum, Hazaribagh, Santal Parganas and Dhanbad—Bhumij

The figures relating to Scheduled Castes and Scheduled Tribes given in this table should, therefore, be read and interpreted in the above context. During sorting, it was observed that a number of slips bore entries such as "Harijan", "Adivasi", "S.C.", "S. T.". Though the name of no specific caste or tribe was indicated in such slips, it was decided to include them all under Scheduled Castes or Scheduled Tribes, as the case might be, and put them under the category "Caste or Tribe unclassified".

The following table gives the percentage of Scheduled Castes and Scheduled Tribes separately to total male and female population by rural and urban areas of each district, and in cities and towns of 50,000 and over.

Attached to C.S. No. 1.
(attached to p. 1)

PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES IN EACH DISTRICT, CITIES AND TOWNS OF 50,000 AND ABOVE

*Figures below 0.50 per cent have been treated as nil

Proportions of S. C. and S. T. in Urban areas of the State are 9 per cent and 3 per cent respectively. In the following towns of population below 50,000, the proportion of S. C. is higher than the average for the State —

Angarpathar (48 per cent), Chaitudih (43 per cent), Tisra (41 per cent), Dumarkunda (34 per cent), Sijua (32 per cent), Kerkend (30 per cent), Bodhi Gaya (29 per cent), Bhowrah (29 per cent), Loyabad (29 per cent), Latehar (24 per cent), Kargali (24 per cent), Jainagar (21 per cent), Hussainabad (21 per cent), Chirkunda (21 per cent), Dalsinghsarai (20 per cent), Rajgir (19 per cent), Hajipur (19 per cent), Jasidih (19 per cent), Hisua (18 per cent), Dumra (18 per cent), Jamtara (17 per cent), Jamadoba (17 per cent), Kumardhubi (17 per cent), Murliganj (16 per cent), Jogabani (16 per cent), Bermo (16 per cent), Khagaul (15 per cent), Mokameh (15 per cent), Bakhtiarpur (15 per cent), Sherghati (15 per cent), Sheikhpura (15 per cent), Fatwah (14 per cent), Warisaliganj (14 per cent), Mahmar Bazar (14 per cent), Barbiga (14 per cent), Jamui (14 per cent), Jhajha (14 per cent), Nirmuli (14 per cent), Jorapokhar (14 per cent), Katras-cum-Salanpur (14 per cent), Dinapur Cantt. (13 per cent), Jehanabad (13 per cent), Daudnagar (13 per cent), Lalganj (13 per cent), Lakhisarai (13 per cent), Sultanganj (13 per cent), Supaul (13 per cent), Jaridih Bazar (13 per cent), Khelari (13 per cent), Gomoh (13 per cent), Maithon (13 per cent), Barh (12 per cent), Jagdishpur (12 per cent), Bhabua (12 per cent), Gopalganj (12 per cent), Chakia (12 per cent), Samastipur (12 per cent), Banka (12 per cent), Purnea (12 per cent), Madhupur (12 per cent), Garhwa (12 per cent), Barki Saraiya (12 per cent), Bundu (12 per cent), Tikari (11 per cent), Nawa-da (11 per cent), Aurangabad (11 per cent), Rusera (11 per cent), Begusarai (11 per cent), Birpur (11 per cent), Kishanganj (11 per cent), Sahibganj (11 per cent), Mithilam (11 per cent), Hazaribagh (11 per cent), Giridih (11 per cent), Dinapur Nizamat (10 per cent), Bikramganj (10 per cent), Kharagpur (10 per cent), Khagaria (10 per cent), Bokaro (10 per cent), Ghatsila (10 per cent).

Similarly the proportion of S. T. is higher than the State average for urban in the following towns of population below 50,000 —

Netarhat (58 per cent), Simdega (52 per cent), Jhinkpani (47 per cent), Noamundi (42 per cent), Gumla (39 per cent), Khunti (30 per cent), Khelari (29 per cent), Gua (22 per cent), Chaibasa (17 per cent), Mithilam (15 per cent), Lohardaga (15 per cent), Bundu (14 per cent), Kharsawan (14 per cent), Muri (13 per cent), Pakaur (12 per cent), Bermo (12 per cent), Ghatsila (12 per cent), Latehar (8 per cent), Ramgarh Cantt. (8 per cent), Sindri (8 per cent), Tisra (8 per cent), Godda (7 per cent), Moubhandar (7 per cent), Kargali (6 per cent), Dumarkunda (6 per cent), Panchet (6 per cent), Chakradharpur (6 per cent), Purnea (5 per cent), Madhupur (5 per cent), Doranda (5 per cent), Bhowrah (5 per cent), Maithon (5 per cent), Dumka (4 per cent), Jamtara (4 per cent), Jasidih (4 per cent), Jaridih Bazar (4 per cent), Kerkend (4 per cent), Seraikela (4 per cent).

The following table compares districtwise the percentage of population of Scheduled Castes and Scheduled Tribes at successive censuses since 1931 —

STATEMENT SHOWING THE PERCENTAGE OF POPULATION OF SCHEDULED CASTES AND SCHEDULED TRIBES AT DIFFERENT CENSUSES FROM 1931 TO 1961

Districts	Scheduled Castes				Scheduled Tribes			
	1961	1951	1941	1931	1961	1951	1941	1931

(i) Figures have been recast according to the jurisdiction and definition of Scheduled Castes and Scheduled Tribes in 1961 Census.

(ii) *Figures less than 0.005 per cent have been omitted

LITERACY AND EDUCATION

The concept of literacy at this Census was the same as in 1951. The relevant instructions given to enumerators on this subject are reproduced below—

“The test for reading is ability to read any simple letter either in print or in manuscript, i.e., if the person can read one of the examples in the Enumerator's Handbook with felicity he may be taken to have passed the test for reading. The test for writing is ability to write a simple letter. The test for literacy is satisfied if the person can with understanding both read and write. If the person can both read and write and has also passed a written examination or examinations as proof of an educational standard attained, write the highest examination passed.”

The statement below gives the percentage of literacy and educated persons to total population, males and females, by rural and urban areas of each district and cities and towns of 50,000 and above.

PERCENTAGE OF LITERACY AND EDUCATION BY RURAL AND URBAN AREAS

State/District/Cities and Towns of 50,000 and above	Percentage of literate and educated persons					
	Rural			Urban		
	Persons	Males	Females	Persons	Males	Females

The following towns of population below 50,000 have literacy higher than the average (43 per cent) for the State in urban areas—

Lauthaha (60 per cent), Chaibasa (58 per cent), Dumra (57 per cent), Doranda (57 per cent), Khagaul (55 per cent), Samastipur (54 per cent), Deoghar (54 per cent), Daltonganj (54 per cent), Dumka (53 per cent), Chakradharpur (53 per cent), Hazaribagh (52 per cent), Gumla (52 per cent), Maithon (52 per cent), Dinapur Cantt. (50 per cent), Seraikeha (50 per cent), Sindri (49 per cent), Musabani (49 per cent), Dehri (48 per cent), Pakaur (48 per cent), Lohardaga (48 per cent), Jharia (48 per cent), Gomoh (48 per cent), Jugsalai (48 per cent), Motihari (47 per cent), Jhajha (47 per cent), Giridih (47 per cent), Moubhandar (47 per cent), Khagaria (46 per cent), Madhupur (46 per cent), Ramgarh Cantt. (46 per cent), Katras-cum-Salanpur (46 per cent), Panchet (46 per cent), Jamtara (45 per cent), Bokaro (45 per cent), Muri (45 per cent), Aurangabad (44 per cent), Sahibganj (44 per cent), Khunti (44 per cent).

WORKERS AND NON-WORKERS

There has been a basic change in the approach to economic enquiries at this Census. The concept now adopted for this purpose is "work". In the 1951 and earlier censuses, the concept used to be related to "income". All persons were classified into three main categories—earners, earning dependants and dependants. This mode of classification was not found to be satisfactory as a large number of women, who help in cultivation, household industry or other work as family workers, were liable to be placed in the category of dependants, i.e., "economically inactive" section of the population for the simple reason that they had no separate income of their own. Yet in most cases, their contribution to the economic efforts of the household was by no means negligible. The adoption of "income" as the basis of determining that section of the population which is "economically active", might have, it was thought, resulted in excluding a significant portion of the population which should have been included in this category (and in including persons who should have been excluded). The ranks of "economically inactive" persons were thus inflated considerably without much valid reason. This gave a somewhat wrapped picture of the real economy of the country. On the other hand, persons such as pensioners, rentiers and beggars, making no contribution whatsoever to the country's economy were classified as earners or earning dependants, i.e., "economically active", as they got "income". The criterion was, therefore, changed at this Census. The basis now adopted for all economic studies was "work" instead of "income".

All persons must belong to either of the two broad categories—workers and non-workers. Questions 8 to 11 of the individual slip were intended to bring out the characteristics of workers who were classified into four main groups—(a) Cultivators (Q. 8), (b) Agricultural Labourers (Q. 9), (c) Workers in household industry (Q. 10) and (d) Workers in other sectors of activity, e.g., workers in industries other than household industry, or in business, trade, profession or service (Q. 11). The following is a reproduction of the instructions to enumerators on these questions—

"Questions 8 to 11—Working—These questions apply only to workers. A person who is working may be working as a Cultivator, as an Agricultural Labourer, at a Household Industry or may be doing any other work. You have to record the answer in Questions 8, 9, 10 and 11 according as the person is working as a Cultivator or as an Agricultural Labourer or at Household Industry or doing any other work. He may be engaged in only one of the above four categories or in more than one. Thus a person can be working both as a Cultivator and an Agricultural Labourer, in which case he should be entered both in Q. 8 and Q. 9 or, he may be working both as Cultivator and at Household Industry in which case he will be entered in Q. 8 and Q. 10 or, he may be working in any possible combination of 8, 9, 10 and 11, in which case he will be entered in the appropriate places. Or, he may be doing just one kind of work in which case he will be entered in only one of the four Questions 8 to 11."

Detailed instructions as to how the answers should be recorded in the individual questions are given against those questions below. You should carefully study them before recording the answers. For an undertrial prisoner enumerated in a Jail he should be recorded for the work or kinds of work he was doing before he was apprehended. Similarly, for a person temporarily in a hospital or similar institution he should be recorded for the kind of work he was doing before he was admitted into hospital or institution. But for a convict in a prison or for long term inmates of penal or charitable or mental institution, the person's previous work should not be recorded but 'I' should be recorded in Q. 12 below.

The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry, etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you visited the household. If on the check or revisional round such a person is found to be unemployed no change in the original entry should be made. A person who is working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes should be treated as *worker*. A person who has been offered work but has not actually joined should be treated as *non-worker*. *Work includes not only actual work but effective supervision and direction of work.*

Persons under training as apprentices with or without stipend or wages will be regarded as working.

An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working for purposes of this question. If, however, in addition to her household work she engages herself in work such as rice pounding for sale or wages, or in domestic services for wages for others or milking cattle or selling firewood or making and selling cowdung cakes or grass, etc., or any such work she should be treated as a worker.

Persons like beggars, pensioners, agricultural or non-agricultural, royalty, rent or dividend receivers, who may be earning an income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade, profession, business or commerce.

A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in furthering the political activity of his party will be regarded as a worker and entered fully in Question 11.

After you have filled up the answers to questions 8 to 11, if you find that in the case of any person more than one productive activity has been recorded, i.e., more than one of the Questions 8, 9, 10 or 11 has been filled up by some work you should ask him which one of the activities that has been recorded for him is his principal work. The principal work is the one on which the person spends most time. Put a ring round the number of the Question 8, 9, 10 or 11 according to the work on which the person says he spends most time. You should invariably ask for the principal work where more than one work is recorded and put a ring round the question relating to the principal work.

It may be that in a few cases you find that you have recorded more than two productive activities in Questions 8 to 11, i.e., more than two of the Questions 8 to 11, would have been filled up by some work. In such cases you should first ascertain the principal work, i.e., the one on which the person spends most time and put a ring round the number of the question. You should then ascertain the work which is the next to importance to his principal work, i.e., the work after his principal work which occupies most time. You

should put a tick against the question number of that work on the left hand side of the question number. The ring and the tick should be put clearly so that any difficulty will not be felt to recognise them clearly.

Question 8—Working as Cultivator—For a person working as cultivator write C. For a person not working as cultivator and for a person not working at all put X.

For purposes of the census a person is working as cultivator if he or she is engaged either as employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned or held from Government and (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

Cultivation involves ploughing, sowing and harvesting and does not include fruit growing or keeping orchards or groves or working for plantations like tea, coffee, rubber, cinchona and other medicinal plantations. Persons engaged in fruit growing or orchardry or plantations like tea, coffee, rubber, cinchona and other medicinal plantations should be entered in Q. 10, or Q. 11 as the case may be.

A person who has given out his land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as working as cultivator. Similarly, a person working in another person's land only as a labourer and has no right or lease or contract on land on which he works, nor is responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation and is paid wages in cash, kind or share such as share of produce (Agricultural Labourer) will not be treated as cultivator in this question.

Question 9—Working as Agricultural Labourer—Write AL for a person working as agricultural labourer, i.e., a person who works in another person's land only as a labourer without exercising any supervision or direction in cultivation, for wages in cash, kind or share such as share of produce. For others put X. The labourer should have no right or lease or contract on land on which he works, nor should he be responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation. A share of the produce goes to him only as wages. He should have been working as Agricultural Labourer in the last or current cultivating season.

Questions 10 (a) and 10 (b)—Household Industry—If a person is working in a Household Industry write (1) the nature of work done by him in the Household Industry against question 10 (a) and (2) the nature of the Household Industry against question 10 (b). Otherwise put X in both questions 10 (a) and 10 (b). A Household Industry is defined as an industry conducted by the Head of the Household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the urban areas the industry should be confined to the house. You should carefully keep in mind the definition of Household Industry in the rural area if you are enumerating a rural area and the definition in the urban area if you are enumerating an urban area.

A Household Industry should relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader or doctor or barber or waterman or astrologer.

A person though he may not be working in his own Household Industry may be working as a paid employee in another Household Industry. You should, therefore, enquire whether the person who is not working in his own Household Industry is working in any other Household Industry and if so, write the nature of the work done by him against Question 10(a) and the nature of the Household Industry against 10(b).

* * * *

Question 11—*Doing work other than 8, 9 or 10*—If a worker is not working as a cultivator or as an agricultural labourer or at any Household Industry write the actual work he is doing. If a person is working as a cultivator or as an agricultural labourer or at Household Industry and also does some other work (including dairying or livestock raising, orchard or plantation, etc., as distinct from cultivation of crops) which does not relate to any of the above categories, write the other work he does in this question. If he is engaged in more than one work and neither of them relates to any of the three categories mentioned above write here the work on which he devotes more time.

* * * *

“Women or children who help with work, such as rice pounding or doing domestic service for wages or milking cattle or selling firewood or making and selling cowdung cakes, grass, etc., should be described fully even if they work part-time. In the case of married or grown up women who do any of the work mentioned above in addition to the usual household duties such work should be fully described and HW written in brackets after the full description”.

Explanation—

(i) An *Employer* is a person who has to employ other persons in order to perform the work entered in Q. 11(a). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business mentioned in Q. 11(a). But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

(ii) An *Employee* is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

(iii) A *Single Worker* for the purpose of Q. 11(c) is a person who works by himself but not as Head of Household in a Household Industry. He is not employed by any one else and in his turn does not employ

anybody else not even members of his household except casually. This definition of a *Single Worker* will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' co-operatives should be recorded as 'Single Workers'.

(iv) A *Family Worker* is a member who works, without receiving wages in cash or kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season. For the purpose of the entire Q. 11, such an industry should be on a scale larger than what has been covered in 'Household Industry' in Q. 10 whether run at home or away from home in town or village and even away from village in rural areas and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or Head of the Household or other relative.

“Members of the household who help solely in household duties should not be treated as family workers.”

A person, who was not working, was treated as a 'non-worker'. The following is a list of non-workers of different kinds—

- (1) Full-time students or children doing no other work, such as make articles at home for sale nor even help part-time in their own family cultivation, industry, trade or business;
- (2) Housewives or such other persons engaged in unpaid home duties, doing no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business;
- (3) Dependents such as infants or children not attending school, persons permanently disabled from work because of illness or old age;
- (4) Retired persons (not employed again), rentiers, persons living on agricultural or non-agricultural royalty, rent or dividend or any other persons of independent means for securing which they do not have to work and who do no other work;
- (5) Beggars, vagrants or independent women without indication of source of income and others of unspecified source of existence;
- (6) Convicts in jail (undertrial prisoners were treated as workers if they used to work before being apprehended), inmates of a penal, mental or charitable institution;
- (7) Persons not employed before but now seeking employment for the first time; and
- (8) Persons employed before but now out of employment.

The following table gives the description of 1,000 persons, males and females, of rural and urban areas severally of each district and in cities and town-groups of population 100,000 and over among the workers and non-workers, and for each category of worker.

DISTRIBUTION OF 1,000 PERSONS, MALES AND FEMALES OF RURAL AND URBAN AREAS SEVERALLY OF EACH AND NON-WORKERS AND FOR

State/District/City and Town-Group		Total Population	WORKERS

* Figures less than 0.50 have been omitted

The percentage of workers to the population of the State as a whole comes to 41.4. Among the male population, the percentage is somewhat higher—55.6 as against 27.1 among females. It may be of some interest to note that the percentage of workers is higher in rural areas (42.2 per cent) than urban areas (33.2 per cent). This picture holds good for both the sexes. The percentage of male and female workers in rural areas is 56 and 28.5 as against 51.7 and 10.4 respectively in urban areas.

Categories I and II (cultivators and agricultural labourers) constitute the most predominant section among workers. Out of every 1,000 males 556 are workers and of them as many as 408 are engaged either as cultivators or agricultural labourers. The corresponding figures for female population are 271 workers for every 1,000 females; and of them 228 engaged either as cultivators or agricultural labourers.

The percentage of workers is the highest in the district of Ranchi (56.3 per cent) followed by Santal Parganas (52.5 per cent) and Singhbhum (51.7 per cent). The percentage is the lowest in the district of Muzaffarpur (33.5 per cent). A mere glance through the above table would reveal that the total percentage of workers is generally higher in Chotanagpur Division and Santal Parganas mainly because of higher percentage of workers in female population.

Among the cities and town-groups the percentage is the highest in Dhanbad-Jharia-Sindri town-group (41.9 per cent) followed by Jamshedpur (32.8 per cent) and Patna (32.2 per cent).

The table below gives the distribution of 1,000 persons of rural and urban areas separately of each district among workers of each category and non-workers.

*Figures less than 0.50 have been omitted

Category I—Cultivators—The three districts having the largest percentage of cultivators are Ranchi (44.3), Santal Parganas (38.6) and Hazaribagh (32.8); and the three having the lowest are Darbhanga (14.9), Patna (15.3) and Muzaffarpur (16.8).

Category II—Agricultural labourers—Champaran, Saharsa and Darbhanga districts head the list of workers of this category with percentage of 15.2, 13.3 and 12.3 respectively while Dhanbad, Ranchi and Hazaribagh districts are at the bottom with 2.1, 3.2 and 4.6 per cent respectively.

Category III—Mining, Quarrying, Livestock, etc. The percentage of this category of workers is generally low in every district except Dhanbad (14.4) which is at the top. Saran is at the bottom (0.2 per cent).

Category IV—Household Industry—In most districts (except Saran, Muzaffarpur and Darbhanga), this category comes only after Cultivators, Agricultural Labourers and other Services. The percentage of workers in it is, however, considerably higher than in the remaining five categories. Darbhanga has returned the highest percentage (3.4) followed by Bhagalpur (2.9) and Monghyr (2.8). Dhanbad has the least percentage (1.2) followed by Palamau (1.5) and Champaran (1.7).

Category V—Manufacturing other than Household Industry—Singhbhum is at the top (4.3), followed by Dhanbad (2.9) and Patna (1.4). In all other districts, except Hazaribagh (1.3), Bhagalpur (1.1), and Monghyr (1.0), the percentage of workers in this category is below one per cent. Muzaffarpur district is at the bottom with only 0.3 per cent of the population engaged in manufacturing other than Household Industry. Darbhanga, Saran, Saharsa and Palamau have very low percentage (0.4).

Category VI—Construction—The percentage is very low everywhere. In fact, this category accounts for the smallest percentage of all categories in all the districts. The pride of place, however, goes to Singhbhum district with 0.7 per cent of the population engaged in this category of work.

Category VII—Trade and Commerce—Patna district has returned the highest (1.9) and Hazaribagh and Ranchi the lowest (each 0.7) percentages in this category.

Category VIII—Transport, Storage and Communications—In this category, Dhanbad occupies the highest position (1.6 per cent) followed by Patna and Singhbhum each having (1.0 per cent). Both Champaran and Saharsa have the lowest percentage (0.2).

Category IX—Other Services—Patna district has the highest percentage (5.0) followed by Dhanbad (4.7) and Bhagalpur (4.6). The three districts from the bottom above are Champaran (1.9), Saran (2.0) and Muzaffarpur (2.3).

Category X—Non-workers—Muzaffarpur has the highest percentage (66.5) of non-workers followed by Saran (65.2) and Darbhanga (64.4). The three districts with lowest percentages are Ranchi (43.7), Santal Parganas (47.5) and Singhbhum (48.3).

The following statement gives the sex-ratio (females per 1,000 males) among total population, total workers, each category of workers and among non-workers in rural and urban areas of each district and in cities and town-groups of population 100,000 and over.

STATEMENT OF SEX-RATIO AMONG TOTAL POPULATION, TOTAL WORKERS, EACH CATEGORY OF WORKERS AND AMONG NON-WORKERS IN RURAL AND URBAN AREAS OF EACH DISTRICT AND IN CITIES AND TOWN-GROUPS OF POPULATION 100,000 AND OVER

*Figures less than 0.50 have been omitted

The sex-ratio (number of females per 1,000 males) in the State as a whole is 994 as against 990 in 1951. Males outnumber females by 147,288. The following figures give comparative idea of the sex-ratio in certain other parts of India and selected foreign countries—

	Sex-ratio
1. France (1954)	1,085
2. United Kingdom (1961)	1,068
3. Japan (1960)	1,036
4. U. S. A. (1960)	1,030
5. Kerala	1,022
6. Orissa	1,001
7. Bihar	994
8. Madras	992

		Sex-ratio
9. All India	..	941
10. Maharashtra	..	936

It is significant to observe that the three districts having most favourable sex-ratios, i.e., larger number of females per thousand males, are those having also the highest densities of population per square mile. These, along with the district of Gaya, are known to send out a large number of male labourers to other districts of the State as well as outside the State. A good portion of such migration is of seasonal nature, but it coincides with the time of census count and has, therefore, a more

pronounced effect in the census results than is, perhaps, actually true. There can, however, be no doubt that one of the important factors influencing the varying pattern of sex-ratio in the State is the emigration of male labourers.

Another significant point to be noticed is the decline since 1921 in the sex-ratio in some districts, e.g., Hazaribagh, Shahabad (except the last decade), Monghyr, Ranchi. Does it indicate that the size of male labour emigration from these districts has decreased within the last forty years? A possible explanation may be the growth of industries and developments of other kinds resulting in greater opportunities of employment within the districts themselves.

1. Total area figure given in column 3 against State, Division and District has been obtained from the State Survey Office. The urban areas are based on the area of individual town furnished by the local authorities. The rural area for a District is obtained by subtracting from the State Survey Area, the urban area.

2. Towns treated as such for the first time in 1951 Census which continue as towns in 1961 Census are shown with asterisk (*) on their left.

3. Towns treated as such for the first time in 1961 are printed in italics.

4. The following abbreviations have been used for the status of town, e. g.—

M. C.— Municipal Corporation

N— Notified area.

M— Municipality.

Cantt.— Cantonment.

5. The rural areas of units smaller than the District do not add up to the total rural area of the District, because the rural areas of units smaller than the District have been computed from Thana Jurisdiction Lists, while the total rural area of the District has been arrived at by subtracting the total urban area of the District as supplied by the District Officer, from the total area of the District as supplied by the State Survey Office.

6. (S) Muzaffarpur (M) and Darbhanga (M) have become cities only at the 1961 Census, i.e., after the formation of Anchal-cum-Development Blocks and so they have been shown as included within their respective anchals.

*Surveyor General's figures. State survey figures not available

**These figures relate to area where all-India Schedule was canvassed (i.e. for 38,705 population)

The figures for N.E.F.A. are provisional

1. Under column 3, (a) represents the area figures furnished by Surveyor General of India, (b) represents the area figures furnished by the State Survey Department. The urban areas are based on the area of individual towns furnished by the local authorities. The rural area for State is obtained by subtracting the urban area from the State Survey Area.

2. The density figures of urban areas of State/Zone/India are worked out using the area figures corrected up to 2 places of decimal obtained by adding the areas of individual towns in the respective units. For total and rural the density figures are worked out on area figures corrected up to 1 place of decimal.

3. Population per sq. mile has been calculated on area figures supplied by State Survey Department, except in the case of Jammu & Kashmir, Andaman & Nicobar Islands and N.E.F.A. for 'total' and 'rural' where these have been calculated on the figures supplied by Surveyor General of India.

4. Area figures of some suburban units and Port Areas included as urban in Gujarat are not separately available. Population of these units is ignored for working out urban density. Rural density is based on the rural population only but the area figures also include the area of the urban units of which separate area is not available. The same procedure has been followed in the case of eight towns of Goa, Daman & Diu for which area is not available.

ANNEXURE-A

Instructions for Filling up the Houselist

Column 1—Line Number—Only one digit of the line number has been printed in this column. The line numbers should be continuous for your block. Where the line numbers exceed 9 write the earlier digit(s) yourself.

Column 2—Building Number (Municipal or Local Authority or Census Number, if any)—This refers to the entire structure on the ground. Each building should have a separate number. If there are more than one structure within an enclosed or open compound belonging to the same person, e.g., the main house, the servants' quarters, the garage, etc., only one building number should be given.

Column 3—Building Number (Column 2) with sub-numbers for each Census House—A census house is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-cum-dwelling or a place of business, workshop, school, etc., with a separate entrance.

If a building has a number of flats or blocks which have separate entrances of their own and are independent of each other giving on the road or a common staircase or a common courtyard leading to a main gate, they will be considered as separate census houses. If within an enclosed or open compound there are separate buildings then each such building will also be a separate census house. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance should be treated as a separate census house.

The order in which census houses within a building should be numbered should be continuous, preferably clockwise, or in any convenient manner if it is at all difficult to do it clockwise. If a building itself is a census house, then it will have only one number, namely, that of the building. If within a building there are a number of census houses, then each census house will have two sets of numbers, e.g., the number of the building and the sub-number of the census house. The census house number should be written after the building number in arabic numerals in brackets such as 2 (2), 3 (2), etc. A census house may contain more than one household, in which case, each household will have to be denoted by a separate alphabetical sub-number (see instructions for column 11 below).

Column 4—Purpose for which census house used, e.g., dwelling, shop, shop cum-dwelling, business, factory, workshop, school or other institutions, jail, hostel, hotel, etc.—The actual use to which a census house is put should be written here.

In the case of a factory or workshop 'Factory' should be written for a large factory if registered under the Indian Factories Act and 'Workshop' for a small unregistered workshop. A workshop is a place where some kind of production, repair or servicing goes on or where goods or articles are made and sold. Similarly, a shop is a place where articles are sold for cash or for credit. Business houses are those where transactions in money or other articles are taking place, e.g., bank, etc. But rooms or apartments where professional consultations are held such as by doctors, *Hakims*, pleaders, etc., should be described as 'professional consultation rooms' and not workshops. In the case, however, of a dispensary where, in addition to consultation by a doctor, medicines are prepared and sold, the house should be described as a dispensary. Write also if used for worship or congregation or if unoccupied, 'vacant'. If the census house is a shop, business house, bank, etc., but is not a factory or workshop as defined above, the name of the proprietor, manager or director should be entered in column 18.

Columns 5 to 8—“If this census house is used as an establishment, workshop or factory”—These columns apply only in cases where the census house is a factory or a workshop, i.e., where some kind of production, processing, repair or servicing is undertaken or where goods or articles are made and sold. If the census house is not used for purposes of a factory or workshop write 'X' in each of the columns 5 to 8.

Column 5—Name of establishment or proprietor—Write the name of the establishment in the case of factories or large manufacturing concerns and write the name of the proprietor in the case of small workshops and establishment like confectionaries where no distinct name has been given to them like *Halwai* shop, etc. If the census house is not used for the purpose of a factory or workshop put 'X' in each of the columns 5 to 8.

Column 6—Name of product(s), repair or servicing undertaken—In this column enter the actual work that is being done in the establishment, factory or workshop, like paper-making, shoe-making, cycle-repairing, motor-servicing, etc.

Column 7—Average number of persons employed daily last week (including proprietor or household members, if any)—The total number of workers including apprentices, either paid or unpaid, employed in the factory or workshop, including the owner or proprietor and any of his family members (if working), should be entered. The average number of persons working per day during the week preceding the date of your visit should be entered.

In case more than one product is produced it is not necessary to enquire the number of persons employed in the production of each product. It may not be possible to get this information in cases where the operations may be composite.

Column 8—Kind of fuel or power, if machinery is used—If the factory or workshop uses steam or diesel engine or fuel, e.g., kerosene, soft coke, electricity, water-mill, etc., for running the machinery used for production, servicing or repairs, write what fuel or power is actually used.

Columns 9 and 10—Description of Census House.

Column 9—Material of wall—Under this column the material out of which most of the walls of the house are made, i.e., grass, leaves, reeds, bamboo, unburnt bricks, mud, burnt bricks, stone, cement concrete or timber should be written. Where a house consists of separate structures each of different materials, the material out of which the walls of the main bedrooms are made are to be recorded.

Column 10—Material of roof—The material out of which most of the outer roof exposed to the weather and not the ceiling is made, i.e., tiles, thatch, corrugated iron, zinc or asbestos cement sheets or concrete, etc., should be written. In the case of a multi-storied building the intermediate floor or floors will be the roof of the lower floor.

Column 11—Sub-number of each Census Household with Census House-number (Column 3)—A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.

There may be one or more households in a census house. Each household should be separately numbered. This can be done by using the alphabets as (A), (B), (C), etc. For example, if building no. 2 is also a census house and has three households,

the household numbers will be 2 (A), 2 (B) and 2 (C). If building no. 4 has two census houses, the houses will be numbered as 4 (1) and 4 (2). If within each house there are respectively 3 and 2 households, then they will be numbered as 4 (1A), 4 (1B), 4 (1C) and 4 (2A) and 4 (2B).

Column 12—Name of Head of household—The name of the Head of each household given in column 11 should be written here. The Head of a household, for census purposes, is the person on whom falls the chief responsibility for the maintenance of the household. The name of the person who is actually acknowledged as Head of the household should be recorded. In the case of places like messes, boarding houses, chummeries, etc., where people live together with no ties of relationship, the manager or superintendent or the person who by common consent is regarded as the Head should be recorded as Head of the household.

If the census house is used as a sitting place, cattle shed, etc., write the use to which it is put (and add the name of the owner).

Column 13—Number of rooms in Census Household—If a census house is occupied by one household the enumeration of rooms should be simple.

If a census house consists of a number of households the number of rooms occupied by each household should be entered on each line against the name of the Head of the household. In cases where more than one household occupy a single room or share more than one room in such a way that it is not possible to say the number of rooms occupied by each household, the number of rooms should be given together within brackets as common to both the households.

A room should usually have four walls with a doorway with a roof overhead and should be wide and long enough for a person to sleep in, i.e., it should be at least 6 feet long. Unenclosed verandah, kitchen, store, garage, cattle shed and latrine which are not ordinarily used for living and sleeping should not be treated as rooms. An enclosed room, however, which is used for living, dining, storing and cooking should be regarded as a room.

Column 14—Does the household live in own or rented house—If the household lives in own house write 'O'. If the household lives in a rented house write 'R'.

* In the case of public buildings like schools, hospitals, etc., or places of worship, put 'X' in this column.

Columns 15 to 17—Number of persons residing in census household on day of visit—Write the number of males residing in the household in column 15, the number of females residing in the household in column 16 and the total number of persons in column 17.

Column 18—Remarks In this column should be entered any useful or significant information about the building or the census house or the census household that has not been entered in any other column. For example, if the census house is a shop, the name of the proprietor or owner should be recorded in this column. If a census house is vacant at the time of houselisting but there is reason to believe that the house will be occupied in the course of the next few days and almost certainly before the census enumeration period, then the word 'Vacant' should be entered in column 4 and a remark should be entered in column 18 to the effect 'likely to be occupied shortly'. If a census house is occupied by household(s) belonging to a scheduled caste or scheduled tribe, the words S.C. or S.T., as the case may be, should be written in the Remarks column. Thus, the Remarks column should be utilised for recording all significant information relating to the building or census house or census household.

CONFIDENTIAL

ANNEXURE-B

CENSUS OF INDIA, 1961

(To be filled up during Enumeration)

Is this an institution ?

PART I—HOUSEHOLD SCHEDULE

LOCATION CODE

Full Name of Head of household

NOTE—Part II—Census Population Record overleaf should be filled up during the first round of enumeration (10th February to 23rd February) from the enumeration slips relating to the household and brought up-to-date with corrections, if any, after the second visit during check period 1st March to 5th March, 1961.

(To be compiled from Individual Census Slips)

Dated Signature of Supervisor

Dated Signature of Enumerator

Instructions for filling up the Household Schedule

When you are visiting each household for enumeration you should write the code number of the household also on the Household Schedule. For purposes of the census a Census House has been defined as a structure or part of a structure, a dwelling, a shop, workshop, factory or place of business, or shop-cum-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. A *household* means the entire group of persons who commonly live together in the same census house and take their meals from a common mess unless the exigencies of work prevent them from doing so. In some census houses there may be more than one group of persons, each group with a common mess. In such cases, each group should be regarded as a separate household for purposes of the census and a separate household schedule should be prepared. You should write the household number from the extracts of the Houselist given to you by your supervisor. If, in any case, you find a census house or a household satisfying the definitions given above has not been numbered you should bring it to the notice of your supervisor and have a separate number given to the house or household and enumerate the household.

At the right hand corner of the Location Code you will find a question "Is this an institution?" with a rectangle below it. If you are enumerating any penal, charitable or mental institution, hostel, hotel, hospital, boarding house, etc., you should write the nature of the institution within the rectangle like jail, hospital, etc.

Below the Location Code you will find a column for recording the full name of the Head of the household. The Head of the household for census purposes is a person on whom falls the chief responsibility for the maintenance of the household. Thus the Head of the household need not necessarily be the eldest male member but may even be a female or younger member of either sex. You need not, however, make any elaborate enquiry about this and should record as Head of household the name of the person who is actually acknowledged as such.

Institutions like boarding houses, messes and chummeries should also be regarded as census households but of 'un-related persons living together'. In such a Household the manager or superintendent or the person who has administrative responsibilities or who by common consent is regarded as the Head, should be recorded as Head of the household. If in an Institution separate families are also living, each such family should be treated as a census household and a separate household schedule should be filled. In such cases the full name of the recognised Head of the household should be written.

If the Head of the household is a person who spends the week days in town and spends the week-ends at home, he should be recorded as Head of household and entered for enumeration at his home. If he should be away for a fairly long time which covers the entire enumeration period then the person who is incharge in his absence should be recorded as the Head of the household.

You will find a parallelogram at the right hand side against the Full Name of the Head of the household marked "S.C./S.T.". If the Head of the household is

a member of the Scheduled Caste or Scheduled Tribe obtaining in your State or in your District, you should write the name of the particular Scheduled Caste or Scheduled Tribe to which the Head of the household belongs within the parallelogram.

You should then fill up the part of the household schedule relating to Cultivation and Household Industry. Sub-part 'A' relates to Cultivation; sub-part 'B' to Household Industry and sub-part 'C' to Workers at Cultivation or Household Industry.

Sub-part 'A' relating to Cultivation will have to be filled in only where the household cultivates land. (Land includes all land normally used for cultivation purposes including temporary fallows.) Three categories of land are given in items 1(i), 1(ii) and 2. Items 1(i) and 1(ii) relate to land actually cultivated by the household. Item 2 relates to land which is not cultivated by the household but has been given by it to private persons for cultivation for payment in money, kind or share. In each of the three cases the total of separate plots or parcels of land in different places, owned or held or taken or given should be made and entered. A number of lines has been provided for this purpose in 1(i) and 1(ii) to account for separate plots or parcels of land held or owned or taken under different recognised local rights. If the household (a) cultivates land owned or held from Government or taken from private persons or institutions or (b) has given land to private persons for cultivation purposes you should ascertain the local name of the right on such land and record in the column relating to 'local name of right on land'. Category 1(i) land owned or held from Government, will include the total of all pieces of land owned or held in owner-like possession, e.g., land held directly from Government under a grant, lease or assignment, (i) with rights of permanent, heritable and transferable possession, (ii) with rights of permanent and heritable possession, but without the right of transfer and (iii) temporary or conditional leases of any kind with the Government. Category 1(ii) land taken from private persons or institutions for payment in money, kind or share, will include land (i) with rights of permanent, heritable and transferable possession; (ii) with rights of permanent and heritable possession but without right of transfer; (iii) held in a variety of tenancies or tenures which may be broadly classified as follows—

- (a) tenants holding land with permanent and heritable rights whose land cannot be resumed by the owner on grounds of personal cultivation (such tenants may in some cases have the right of transfer also);
- (b) tenants who have been given permanent rights subject to the right of resumption by the owner (in some cases the tenant has the right to acquire ownership of the non-resumable area. In other cases he does not possess the right);
- (c) tenants holding land in areas where interim measures have been enacted for stay of ejectment or for continuing the leases for a specified period ;
- (d) tenants holding land on temporary leases who are liable to ejectment; and
- (e) areas held on condition of rendering service either to a village community or to Government (This also includes cases where labourers on plantations are given some land for cultivation with permanent rights); and
- (iv) the following—
 - (a) land taken for a fixed amount of money,
 - (b) land taken for a fixed amount of produce,
 - (c) land taken for a share of the produce,
 - (d) land for which money is paid partly in one and partly in any other form mentioned above, and
 - (e) land held free of consideration.

Category 2—Land given to private persons for cultivation for payment in money, kind or share will include the classifications mentioned in category 1(ii).

Categories 1(i) and (ii) will include only those plots or parcels of land which are cultivated by the household itself, that is, lands which lie within the village, or in adjacent villages, or within such a distance as enables the household to work on the land or actively supervise the cultivation. They will not include land owned or held in distant places where distance itself is a bar to active cultivation, constant supervision or direction. But Category 2 will include land in any part of the country whatsoever. You should ascertain the extent of land in each category of local right in acres and record in the column relating to 'Area in acres'. You should write the total of separate plots or parcels of land under the same right if they are situated in different places. The area figures should be recorded in acres up to the first place of decimal, and not rounded up to the nearest acre. For example, if a household has $3\frac{1}{2}$ standard bighas of land, it will be entered as 2.2 acres (1 acre=1 bigha 12 kathas, where 1 katha=1,361 square feet and 1 acre=4,840 square yards. The local bigha may, however, vary from place to place). Even if this is not possible write the area in local measure giving invariably the name of the measure adopted.

This sub-part will not apply to households which do not possess any land. Thus, it will not apply to households which consist of only agricultural labourers without any land. In such cases put an 'X' in all the spaces provided in the right hand side and put a bold cross on this sub-part.

Land under any of the items in sub-part 'A' includes rent free land, lands enjoyed in permissive possession or gifts without encumbrance or consideration. A household which is a member of a co-operative farm will record only that amount of land in the co-operative farm which had belonged to it before and under right enter 'co-operative farm'. Labour hired by such a co-operative farm should not be entered for this household.

Sub-part 'B' relates to Household Industry. This part will be filled up only where there is a Household Industry conducted by the Head of the household himself and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be on the scale of a registered factory. The participation of the Head of the household and/or members of the household is an essential feature of the Household Industry. In a rural area the Household Industry can be located either at home or within the village. But in an urban area the Household Industry or at least the major part of its work must be located only at home. A Household Industry should relate to production, processing, servicing or repairing and includes makers and sellers of goods.

The test for a Household Industry is mainly threefold—

- (a) Household Industry should embrace manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.
- (b) Household Industry should be on the household scale where the workers mainly will be the Head of the household himself and members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they

find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

- (c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, for Household Industry in urban areas we should consider only those industries which are located at home. Where, however, part of the work is done outside the house, e.g., preparing and dyeing the yarn for weaving or winding into warp and wool or cleaning metal surfaces before electroplating in baths, it should still be considered a Household Industry, even in urban areas, as the main operation of weaving or electroplating is conducted within the house and only one or two operations are conducted outside.

The following activities should also be regarded as illustrative of Household Industry. Biri-makers who either alone or with the help of members of the family roll biris at home, for wages at piece rates, while the contractor supplies the materials. Certain processes like buttoning and handsewing of tailored clothes, dyeing and printing of cloth, are carried out at home by members of the household both at residence and at 'place of work' or where womenfolk of the household fill in at home with lac gold ornaments prepared at the shop by male members of the household.

Ascertain from the Head of the household whether there are any Household Industries and write the nature of the industry(s) in the column provided, if there are any. Then ascertain for how many months in a year roughly they are conducted and put down the number of months in the appropriate column. If the industry is conducted throughout the year write '12'. If there is no Household Industry of any sort put an 'X' in each of the places in the right hand corner where the answers will be written and put a bold cross on this sub-part.

Sub-part 'C' relates to Workers in Cultivation or Household Industry.

In the case of households which are engaged only in Cultivation, if the Head of the household is working write 1 under the column 'Head' and ascertain how many other male and female members of the family are working. Write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total'. Then ascertain whether any hired workers are employed and, if so, write the number of such workers in the column allotted for it. The hired workers should have been in wholetime employment during last working season or should be in wholetime employment during current working season.

Similarly in the case of households engaged in Household Industry only, if the Head of the household is working write 1 in the column relating to the 'Head', and also ascertain how many male members and female members of the family are working and write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total' and then ascertain the number of hired workers, if any, and then write the number of hired workers in the appropriate column.

If a household is engaged both in Cultivation and Household Industry ascertain whether the Head is working and write 1 under the column relating to the Head

and also ascertain how many male and female members of the family are working both at Cultivation and the Household Industry and write the numbers in the respective columns. Write the total number of family workers in the column relating to Total. Ascertain the number of hired workers engaged by the family both for Cultivation and Household Industry and write the number in the appropriate column. In a household engaged both in Household Cultivation and Household Industry, you need not ascertain how many are engaged in Household Cultivation and Household Industry separately.

Even if any of the members of the family working or hired labourers are absent during the period of the census count they should be counted for the purposes of the Household Schedule.

In the case of households engaged in Cultivation only, put 'X' in the columns relating to 'Household Industry only' and 'Both in Household Cultivation and Household Industry'. Similarly, in the case of households engaged in Household Industry only, put 'X' in the columns relating to Household Cultivation only and 'Both in Household Cultivation and Household Industry'. If a household is engaged both in Household Cultivation and Household Industry put 'X' in the columns relating to 'Household Cultivation only' and 'Household Industry only'. If a household is not engaged in either Household Cultivation or Household Industry or both put 'X' in all the columns and a bold 'X' on this sub-part.

The test for a worker is whether a person is actually working in Cultivation or Household Industry or supervising or directing work thereon.

CONFIDENTIAL

ANNEXURE-C
INDIVIDUAL SLIP

CENSUS 1961

Location Code _____

1. (a) Name _____

1. (b) Relationship to Head _____ 2. Age last birthday

3. Marital Status _____ 4. (a) Birth place _____

11. Doing Work other than 8, 9 or 10 { (a) Nature of Work _____ (c) Class of Worker ☐
(b) Nature of Industry, Profession, Trade or Service _____
(d) Name of Establishment _____

12. Activity if Not Working 13. Sex ☐**ANNEXURE-C****Instructions for filling up the Slips**

In each household you should first enumerate the Head of the household followed by other members of the household in the most convenient order and see that none of the persons in the household are left out. Please make repeated enquiries about infants and very young children for they are liable to be left out of count. Count near relatives first, such as wife, son, daughter-in-law, daughter, son-in-law, grandchildren, then distant relations and then domestic servants or other employees living in the household, boarders, visitors, etc.

Location Code

Write the Location Code of the household in each slip.

Q. 1 (a) Name

Write the name of the person enumerated. If a woman's name is not given out describe her as 'so-and-so's mother, wife or daughter'. If a woman does not take the name of a person's husband and that husband's particulars have to be recorded write 'so-and-so's husband'.

For newly-born infants who have not yet been given a name write 'Baby' and write 'father's or mother's name'.

Q. 1 (b) Relationship to the Head of the household

In the case of the Head of the household write 'Head'. The person who should be treated as the 'Head of the household' has been fully explained in Part A. All relationships in this question should be recorded in respect of that person. In the case of relations write the relationship in full. Do not use words like nephew, niece or uncle, but state whether brother's or sister's son or daughter (for nephew or niece) or father's or mother's brother (uncle). 'Son' will include 'adopted son' or 'step son'; similarly for a daughter. In the case of visitors, boarders or employees write 'visitor', 'boarder', or 'employee' as the case may be.

If on the check or revisional round between the 1st and 3rd March the Head of the household as recorded previously is found to have died, the person in the household who succeeds him by common consent as Head should be recorded as Head and the relationships in all other slips will have to be suitably corrected. The slip of the dead Head of household will, of course, be cancelled.

In the case of places like messes, boarding houses, chummeries, etc., where people live together with no ties of relationship, the manager or superintendent or the person who by common consent is regarded as the Head should be recorded as Head of the household. Other members should be recorded as 'unrelated' in this question.

Q. 2 Age in completed years last birthday

Write age in years completed last birthday. For infants below one year of age, write 'O'. You will find many persons who cannot state their age correctly. You should assist them to state the correct age. If you are not able to elicit correct age directly, you should stimulate their memory by referring to historical incidents or

religious events, etc. You may use any local calendar of such events that may have been prepared for the purpose.

Q. 3. Marital Status

For never married	..	..	write	NM
Married	..	..	write	M
Widowed	..	..	write	W
Separated or divorced	..	..	write	S

For a person who has never been married write 'NM'. For a person married, whether for the first or another time write 'M'. Write 'M' also for persons who are recognised by custom or society as married and for persons in stable *de facto* union. Even if a marriage is disputed in the locality write 'M' if the person concerned says he or she is married or in stable *de facto* union. For a widowed person whose husband or wife is dead, and who has not been married again, write 'W'. For a person who has been divorced in a lawful manner, either by decree of a law court or by a regular social or religious custom but who has not remarried or a person who has been separated from wife or husband and is living apart with no apparent intention of living together again, write 'S'. For a prostitute return her marital status as declared by her.

Q. 4 (a) Birth place

- 1. If born in village or town in which enumerated write PL
- 2. If born in another village or town of district in which enumerated. write D
- 3. If born in another district in the State of enumeration. write name of district
- 4. If born in another State in India .. write name of district and State if name of district is known ; otherwise write name of State.
- 5. If born in a country outside India, e.g., Pakistan or any other country. write name of country
- 6. Persons born at sea or in air or in railway carriages or on road transport, e.g., buses, etc., should be entered as such.

Q. 4 (b) Whether born in village or town

- 1. If born in a village .. write R
- 2. If born in a town which is considered a town at the present time even if it was not so considered at the time of birth. write U
- 3. If the person enumerated is not in a position to say whether the place of birth is a village or town. write the name of the place of birth as returned by him.

Q. 4(c) Duration of Residence

- 1. For a person born in village or town or city in which enumerated. write X
- 2. For a person born in another village or town or city of district of enumeration or who was not born in the district of enumeration. write the number of completed years this person has been in the village/town/city of enumeration. (Do not take into account periods of temporary absence on leave or holiday or tour or business.)
- 3. If the duration of residence is less than one year.. write O
- 4. If the duration of residence is one year or over.. write the actual number of completed years of residence.

Q. 5 (a) Nationality

- 1. For Indian nationals write I
- 2. For other nationals write the nationality in full

Q. 5 (b) Religion

For Hindu	..	..	write	H
Muslim	..	..	write	M
Christian	..	..	write	C
Jain	..	..	write	J
Buddhist	..	..	write	B
Sikh	..	..	write	S

For others write the answers actually returned

Q. 5 (c) Scheduled Castes and Scheduled Tribes

The answer to this question will be recorded only if a person belongs to a Scheduled Caste or Scheduled Tribe. If the person belongs to a Scheduled Caste or Scheduled Tribe obtaining in your State, or in your district write the name of the caste or tribe to which he belongs. For all others, write 'X' in this column. A list of Scheduled Castes and Scheduled Tribes obtaining in your State or in your district is given elsewhere in these instructions.

If the person belonging to a Scheduled Caste or Scheduled Tribe returns his caste or tribe by a synonym or a generic name of a caste or tribe as given in your list, write the name as returned and the name of the relevant caste or tribe, as per printed list, within brackets.

Do not write the names of Scheduled Castes in general terms as 'Harijan', 'Achhut'. You should ascertain the name of the caste when it is returned and write it. If a person is negligent and insists on calling himself merely 'Harijan' tell him that this description will not earn the person any benefits under the Constitution permissible to Scheduled Castes and Scheduled Tribes. This may persuade him to give out the correct name.

Scheduled Castes can belong only to the Hindu or Sikh religions. If a person belongs to a Scheduled Caste, there will be either 'H' or 'S' in the answer to question 5 (b). Scheduled Tribes may belong to any religion.

Q. 6 Literacy and Education

I. Illiterate or Literate—

For a person—

- (1) Who can neither read nor write or can merely write O
read but cannot write in any language.
(2) Who can both read and write .. write L

The test for reading is ability to read any simple letter either in print or in manuscript, i.e., if the person can read one of the examples in the Enumerator's Handbook with felicity he may be taken to have passed the test for reading. The test for writing is ability to write a simple letter. The test for literacy is satisfied if the person can with understanding both read and write.

II. Standard of Education—

If the person can both read and write and has also passed a written examination or examinations as proof of an educational standard attained, write the highest examination passed instead of L.

Q. 7 (a) Mother tongue

Write the mother-tongue in full including dialect as returned by the person enumerated. Mother-tongue is a language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy write the language mostly spoken in the person's home in childhood. In the case of infants and deaf mutes give the language usually spoken by the mother.

Q. 7 (b) Any other Language(s)

After recording the mother-tongue enquire whether the person knows any other language(s), Indian or foreign, and write the language(s) reported by him against this question. In case he does not know any other language put 'X'.

The number of languages recorded against this question should not be more than two. These languages should be other than his mother tongue which he speaks and understands best and can use with felicity in communicating with others. Such language or languages will exclude dialects of the same language.

Qs. 8 to 11 Working

These questions apply only to workers. A person who is working may be working as a Cultivator, as an Agricultural Labourer, at a Household Industry or may be doing any other work. You have to record the answers in questions 8, 9, 10 and 11 according as the person is working as a Cultivator or as an Agricultural Labourer or at Household Industry or doing any other work. He may be engaged in only one of the above four categories or in more than one. Thus a person can be working both as a Cultivator and an Agricultural Labourer, in which case he should be entered both in Q. 8 and Q. 9. Or, he may be working both as Cultivator and at Household Industry in which case he will be entered in Q. 8 and Q. 10. Or, he may be working

in any possible combination of 8, 9, 10 and 11, in which case he will be entered in the appropriate places. Or, he may be doing just one kind of work in which case he will be entered in only one of the four Questions 8 to 11.

Detailed instructions as to how the answers should be recorded in the individual questions are given against those questions below. You should carefully study them before recording the answers. For an undertrial prisoner enumerated in a Jail he should be recorded for the work or kinds of work he was doing before he was apprehended. Similarly, for a person temporarily in a hospital or similar institution he should be recorded for the kind of work he was doing before he was admitted into hospital or institution. But for a convict in a prison or for long-term inmates of penal or charitable or mental institutions, the person's previous work should not be recorded but 'I' should be recorded in Q. 12 below.

The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry, etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you visited the household. If on the check or revisional round such a person is found to be unemployed no change in the original entry should be made. A person who is working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes should be treated as *worker*. A person who has been offered work but has not actually joined should be treated as *non-worker*. *Work includes not only actual work but effective supervision and direction of work.*

Persons under training as apprentices with or without stipend or wages will be regarded as working.

An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working for purposes of this question. If, however, in addition to her household work she engages herself in work such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle or selling firewood or making and selling cowdung cakes or grass, etc., or any such work she should be treated as a worker.

Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who may be earning an income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade, profession, business or commerce.

A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in furthering the political activity of his party will be regarded as a worker and entered fully in Q. 11.

After you have filled up the answers to questions 8 to 11, if you find that in the case of any person more than one productive activity has been recorded, i.e., more than one of the questions 8, 9, 10 or 11, has been filled up by some work you should ask him which one of the activities that has been recorded for him is his principal work. The principal work is the one on which the person spends most time. Put a ring round the number of the question 8, 9, 10 or 11, according to the work on which the person says he spends most time. You should invariably ask for the principal work where more than one work is recorded and put a ring round the question relating to the principal work.

It may be that in a few cases you find that you have recorded more than two productive activities in questions 8 to 11, i.e., more than two of the questions, 8 to 11, would have been filled up by some work. In such cases you should first ascertain the principal work, i.e., the one on which the person spends most time and put a ring round the number of the question. You should then ascertain the work which is the next in importance to his principal work, i.e., the work after his principal work which occupies most time. You should put a tick against the question number of that work on the left hand side of the question number. The ring and the tick should be put clearly so that any difficulty will not be felt to recognise them clearly.

Q. 8 Working as Cultivator

For a person working as cultivator write C. For a person not working as cultivator and for a person not working at all put 'X'.

For purposes of the census a person is working as cultivator if he or she is engaged either as employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned or held from Government and (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

Cultivation involves ploughing, sowing and harvesting and does not include fruit-growing or keeping orchards or groves or working for plantations like tea, coffee, rubber, cinchona and other medicinal plantations. Persons engaged in fruit growing or orchardry or plantations like tea, coffee, rubber, cinchona and other medicinal plantations should be entered in Q. 10 or Q. 11 as the case may be.

A person who has given out his land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as working as cultivator. Similarly, a person working in another person's land only as a labourer and has no right or lease or contract on land on which he works, nor is responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation and is paid wages in cash, kind or share such as share of the produce (Agricultural Labourer) will not be treated as Cultivator in this question.

Q. 9 Working as Agricultural Labourer

Write AL for a person working as agricultural labourer, i.e., a person who works in another person's land only as a labourer without exercising any supervision or direction in cultivation, for wages in cash, kind or share such as share of produce. For others put X. The labourer should have no right or lease or contract on land on which he works, nor should he be responsible for taking decisions as to which crops to sow and when, or taking the risks of cultivation. A share of the produce goes to him only as wages. He should have been working as Agricultural Labourer in the last or current cultivating season.

Qs. 10 (a) and 10 (b) Household Industry

If a person is working in a Household Industry write (1) the nature of work done by him in the Household Industry against question 10 (a) and (2) the nature of the Household Industry against question 10 (b). Otherwise put X in both questions 10 (a) and 10 (b). A Household Industry is defined as an industry conducted by the Head of the household himself and/or mainly members of the household at home or within the

village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the urban areas the industry should be confined to the house. You should carefully keep in mind the definition of Household Industry in the rural area if you are enumerating a rural area and the definition in the urban area if you are enumerating an urban area.

A Household Industry should relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader or doctor or barber or waterman or astrologer.

A person though he may not be working in his own Household Industry may be working as a paid employee in another Household Industry. You should, therefore, enquire whether the person who is not working in his own Household Industry is working in any other Household Industry and if so, write the nature of the work done by him against question 10 (a) and the nature of the Household Industry against 10 (b).

Q. 10 (c) If Employee in Household Industry

This question will be filled up only for a person who is working as a paid employee in another person's Household Industry. In his or her case write E.E. For all others put X.

The following examples will illustrate how questions 10 (a) to 10 (c) should be filled up for persons working at Household Industry :

Q. 10 Working at Household Industry

(a) Nature of work	(b) Nature of Household Industry	(c) If employee
1 Spinning yarn	.. Spinning yarn in Ambar Charkha	.. X
2 Dyeing and pining yarn	.. Handloom weaving	.. X
3 Threshing and cleaning grain	.. Flour making <i>chakki</i>	.. X
4 Labourer employed for crushing oil	.. Oil ghani	.. E.E.
5 Tempering and polishing implements	.. Blacksmithy making agricultural implements.	.. X
6 Labourer employed for making and firing kiln.	.. Earthenware pottery	.. E.E.
7 Throwing and turning pottery	.. Earthenware pottery	.. X
8 Making wooden doors and windows	.. Carpentry	.. X
9 Filling gold ornaments with lac	.. Goldsmithy	.. X
10 Labourer working hosiery machine	.. Hosiery	.. E.E.
11 Keeping accounts	.. Hosiery	.. X
12 Polishing and scraping metal	.. Electroplating	.. X
13 Labourer employed for putting iron hoop or cartwheels.	.. Cartwheel wright	.. E.E.
14 Repairing of guns	.. Gunsmithy	.. X
15 Bee-keeping	.. Production of honey	.. X
16 Tending cattle	.. Livestock raising	.. X

Q. 11 *Doing work other than 8, 9 or 10*

If a worker is not working as a cultivator or as an agricultural labourer or at any Household Industry write the actual work he is doing. If a person is working as a cultivator or as an agricultural labourer or at Household Industry and also does some other work (including dairying or livestock raising, orchard or plantation, etc., as distinct from cultivation of crops) which does not relate to any of the above categories, write the other work he does in this question. If he is engaged in more than one work and neither of them relates to any of the three categories mentioned above write here the work on which he devotes more time.

Q. 11 (a) *Nature of Work*

In the case of persons not working or who work *only* as cultivator or as agricultural labourer or at Household Industry, put 'X'.

Describe fully the nature of the work done by the person himself. Full and precise information as to the nature of work done by the person should be given either in the vernacular or in English or in vernacular transliteration of English. At previous censuses much trouble has been caused by inadequate answers, and if you do not succeed in obtaining satisfactory information on the individual slips, you will be required to make a further visit for that purpose.

Q. 11 (b) *Industry, Business, Trade, Profession or Service*

In the case of a person who is working and the nature of whose own work has been recorded in Question 11(a), you should write here the nature of industry, business, trade, profession or service in which the person works.

| As in the case of Question 11(a), you should describe in detail the nature of industry, business, trade, profession or service in which the person works. Vague answers should be avoided. In the case of industries, the articles which are produced or serviced or repaired should be given. If more than one article is produced the chief article produced or serviced or repaired should be given. In the case of business or trade the principal article of trade should be described. In the case of service describe the nature of the service to which the person's work belongs. The description should be such that it would be possible to classify the establishment in which the person is working for purposes of industrial classification of the population. The description should be either in the vernacular or in English or in vernacular transliteration of English.

In the case of a person for whom an 'X' is put in Question 11 (a), put an 'X' in this question also.

Important points to remember in Questions 11 (a) and 11 (b)

1. Women or children who help with work, such as rice-pounding or doing domestic service for wages or minding cattle or selling firewood or making and selling cowdung cakes, grass, etc., should be described fully even if they work part-time. *In the case of married or grown-up women who do any of the work mentioned above in addition to the usual household duties such work should be fully described and HW written in brackets after the full description.*

2. If a person makes the articles he sells, he should be entered as maker and seller of them.

3. Wherever convenient, for complete description, the work should be expressed by the vernacular name by which it is known.

4. The following are too vague and must not be used by themselves—

Scientist, technician, civil servant, clerk, engineer, inspector, checker, foreman, overseer, supervisor, labourer, machinist, assistant, contractor, polisher.

5. *Labourers*—For an unskilled labourer usually employed on one sort of work alone, give also the sort of work done, e.g., railway porter, market or bazar porter, labourer employed on road digging, brick-layer's labourer. If accustomed to work on various jobs, write general labourer.

6. *Machine Operators*—Always state the kind of machine giving its recognized name, if any.

7. *Shop-keepers, Retail Dealers, Shop Assistants*—If wholly or mainly engaged in selling, write 'Dealer' (if principal) or 'Shop Assistant' or 'Salesman' (if assisting) and state whether the business is wholesale or retail or both. For shop assistants and salesmen in stores with several departments, state the particular department in which engaged (e.g., Ship and Railway Parts, Fans and Sewing Machines, Grocers and Confectioners).

8. *Transport Workers*—Describe fully the nature of the transport, e.g., air transport, rail transport, transport by motor car or motor cycle, or vehicles drawn by horse, etc.

9. *Services*—For a person engaged in the Defence Services write 'Service of Central Government'.

10. If the job is known in the trade or industry by a special name use that name. Managers, Foreman, etc., should be given the department/branch wherever applicable, e.g., Sales Manager or a Manager of Hardware Department, Machine Shop Foreman or Boiler Room Foreman, etc. The following terms are insufficient by themselves—

Manufacturer, merchant, agent, broker, refractor, dealer, engineer and iron works, etc.

11. *Domestic services*—In the case of any private servant, e.g., a cook or domestic servant, write only 'private cook or domestic servant'. There is no industry in his case but in the case of persons employed in hostels, restaurants, boarding houses, institutions, etc., the words hotel, restaurant, etc., should be added.

For persons in the employ of Firms carrying on two or more businesses, if the businesses are carried on in separate premises then the business carried on at the premises in which the person is employed should be given. If the businesses are carried on in the same premises but each has a separate organisation (i.e., they have separate records of employment, production, etc.) then the appropriate business should be quoted. If, however, the two activities are carried on side by side then the major activity of the firm or establishment should be given.

12. *Commerce*—Special care should be taken to see that the distinction between retail and wholesale business is clear. As in industries, the goods handled should be clearly indicated.

Q. 11 (c) *Class of Worker*

For a person who is—

- | | | |
|--|-------|----|
| 1 An <i>Employer</i> , that is, who hires one or more persons in his work described in Q.11 (a). | write | MR |
| 2 An <i>Employee</i> , that is, who does his work described in Q. 11 (a) under others for wages or salary in cash or kind. | write | EE |
| 3 A <i>Single Worker</i> , that is, who is doing his work described in Q. 11 (a) without employing others except casually, and without the help of other members of the family except casually. This will include workers working as members of co-operatives. | write | SW |
| 4 A <i>Family Worker</i> , that is, who is doing his work described in Q. 11(a) in own family without wages or salary in cash or kind. | write | FW |

For a person for whom an 'X' is put in Qs. 11(a) and 11(b) put an X in this question also.

Explanation—

(i) An *Employer* is a person who has to employ other persons in order to perform the work entered in Q. 11(a). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business mentioned in Q. 11(a). But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

(ii) An *Employee* is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

(iii) A *Single Worker* for the purpose of Q. 11 (c) is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else not even members of his household except casually. This definition of a *Single Worker* will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' co-operatives should be recorded as 'Single Worker'.

(iv) A *Family Worker* is a member who works, without receiving wages in cash or kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season. For the purpose of the entire Q.11, such an industry should be on a scale larger than what has been covered in 'Household Industry' in Q. 10 whether run at home or away from home in town or village and even away from village in rural area and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or Head of the household or other relative.

Members of the household who help solely in household duties should not be treated as family workers.

Q. 11 (d) *Name of Establishment*

Describe in detail the name of the factory, workshop, business house, company, shop, etc. If a person has no fixed place of work, write 'No fixed place of work'.

For a person for whom an X is put in Qs. 11(a), 11(b) and 11(c) put an X in his question also.

The following examples will illustrate how Qs. 11(a) to 11(d) should be filled up for person doing work other than 8, 9 or 10 :

Q. 11 Doing Work other than 8, 9 or 10			
Q.11(a)	Q.11(b)	Q. 11(c)	Q.11(d)
Nature of Work	Nature of Industry, Profession, Trade or Service	Class of Workers	Name of Establishment

57 Free lance Journalist	.. Writing for newspapers and periodicals	SW	No fixed journal
58 Political worker	.. Political work ..	SW	Name of party

This question will apply to a person NOT working

Q. 12 *Activity, if Not Working*

Write 'X' in this question for a person who is working, that is, for whom you have recorded the work in any of the questions 8 to 11 above.

The following activities should be recorded in the case of persons NOT Working :

- 1 For a full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business. write ST
- 2 For a person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business. write HW
- 3 For any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness of old age. write D
- 4 For a retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who

- 5 For beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence. write B
- 6 For a convict in jail (an undertrial prisoner will be shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution. write I
- 7 For a person who has not been employed before but is seeking employment for the first time. write NE
- 8 For a person employed before but now out of employment and seeking employment. write UN

Explanation—If a person, who does not work, cannot be readily classified in any of the above categories, put him in category 5 and write B in this question. A retired person who has taken up regular work again should not be entered in this question as he would have been entered for his new work in Questions 8 to 11.

A person who is not working but has been offered work which he has not joined should be included in item 3 and 'D' should be written. He should not be included in item 7 or 8.

Q. 13 Sex

Write 'M' for Males; 'F' for Females

For eunuchs and hermaphrodites, write 'M'
