1961 CENSUS
HOUSING AND ESTABLISHMENT TABLES

NOTE

An essential preliminary to the population census held every ten years in India is the physical numbering with paint and brush of every house and every household followed by a listing of the inmates found in each. This is undertaken with two objects in view. First, as a locating and identifying device of all places containing or likely to contain human beings on the census day. Secondly, to obtain a reliable estimate of the population on which to base the supply of census forms, stationery etc. to each census block. The first object is served by housenumbering, the second by house-listing.

Up to 1951 each State was at liberty to design its own houselist form, because of the difficulty of adopting a set of uniform definitions which would apply to the whole of India. Differences in definitions and consequently methods led to non-comparability, so that although some information was always collected on the eve of each population census it was not considered worthwhile to analyse and print it. This left a void in our knowledge of housing. Even cursory information was unavailable. At the preparatory stages of the 1961 Census, therefore, the *ad hoc* advisory groups fully endorsed the Registrar General's proposal to take a housing census on the basis of the standard schedule despite obvious problems of coverage, definitions, methods and comparability between area and area. The Census Commission set itself two modest aims through the adoption of a uniform set of broad definitions and of a single form for the whole country. First to obtain a count of buildings, census houses and households, in order to tabulate information on (i) the use to which a census house is put, (ii) its tenure status, (iii) the predominant material of its wall and roof, (iv) the size of a household in a residential census house, and (v) the number of rooms occupied by a household. Secondly, to obtain a count of all workshops and factories which are engaged in production, processing, repair or servicing in order to tabulate information on (i) the industrial classification of its activity, (ii) the kind of fuel or power if machinery is used, (iii) the average number of persons employed daily on the week before the count, including proprietor or household members, if working. It was appreciated that both types of information might serve as frames for further inquiries or censuses.

The first draft houselist, designed in September 1958, was pretested on the field and modified. The second draft was again pretested extensively and modified into its final form in the first meeting of State Census Superintendents in October 1959.

A facsimile of the Houselist form used in 1960 and the instructions to enumerators on the mode of filling it are reproduced in Appendix I. Detailed comments on concepts and definitions, departures made from standard instructions or where the data are suspected

to be deficient or non-comparable will be found in the Housing Report for India as well as for each State.

The houselist was not canvassed in strictly military areas of certain States. Neither was it canvassed in (a) that portion of North East Frontier Agency where it was replaced by a special schedule, and (b) Goa, Daman and Diu where a census had been taken by the Portuguese in 1960. Two tables for Goa, Daman and Diu on (i) predominant material of wall, and (ii) number of rooms occupied have, however, been prepared and presented in the fly-leaves of Tables E-IV and E-V respectively.

It will be useful to reproduce here the definitions adopted for (i) Census House and (ii) Census Household, which occur in the Tables of this book.

CENSUS HOUSE : A Census house is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-cum-dwelling or a place of business, workshop, school etc. with a separate entrance.

If a building has a number of flats or blocks which have separate entrances of their own and are independent of each other giving on the road or a common staircase or a common courtyard leading to a main gate, they will be considered as separate census houses. If within an enclosed or open compound there are separate buildings then each such building will also be a separate census house. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance should be treated as a separate census house.

CENSUS HOUSEHOLD : A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.

The following five housing tables are presented in this book :

- E-I Census houses and the uses to which they are put ;
- E-II Tenure status of sample census households living in census houses used *wholly or partly* as dwellings ;
- E-III Census houses used as factories and workshops classified by industry, power and no power used and size of employment ;
- E-IV Distribution of sample households living in census houses used wholly or partly as dwellings by predominant material of wall and predominant material of roof; and
- E-V Sample households classified by number of members and by number of rooms occupied.

Of these, Tables E-I and E-III were prepared on full count and the other three on the basis of a 20% sample.

Marking the sample households

The samples were marked separately for (i) the rural areas of a Tehsil/Taluk/Police Station/Anchal, (ii) every town with a population of 50,000 and over and (iii) for the rest of the urban area of a district excluding towns with population of 50,000 and over wherever they occur.

The houselists were first arranged in ascending order of location code number separately for (i) rural areas of each Tehsil/Taluk/Police Station/Anchal and (ii) for urban areas of a district all together other than towns with a population of 50,000 and over. For each town with a population of 50,000 and over the houselists were arranged in ascending order of enumerators' blocks. The first sample household was chosen randomly from among the first five households in the first houselist. Thereafter every fifth household from the first random start was systematically and continuously marked. The sample was marked continuously for all houselists pertaining to (i) a Tehsil/Taluk/etc. (ii) urban areas of a district other than towns of 50,000 and over and (iii) towns and cities of population 50,000 and over until all the books relating to each of the three categories were exhausted. Thus, if in a particular book of houselist two households were left over at the end, then these two households were carried over to the next book of houselist pertaining to the same census tract and the third household in the new book was marked as the next sample household.

Vol. I Part IV which is devoted to Housing and Establishments includes the Report on Housing and Establishments, the Tables and Subsidiary Tables. This part is published in two sub-parts. Sub-part (A) contains Report on Housing and Establishments. This book, which is sub-part (B) contains Tables E-I, E-II, E-III, E-IV and E-V along with their Subsidiary Tables.

It should be borne in mind that housenumbering and houselisting were non-synchronous and therefore spread over a period of six to nine months in 1960, except in the case of Dadra and Nagar Haveli where it was accomplished in January, 1962. So, the housing statistics presented in these Tables do not afford a picture of the country at any particular point of time but over half a year. Data regarding the residential census houses or dwellings are also presented in Vol. I Part II-A in Table A-I and in Primary Census Abstracts based on the enumerators' abstracts prepared after enumeration which was a synchronous operation and represented the statistics in them as on 1st March 1961 (except in the case of Dadra and Nagar Haveli where the reference date was 1st March 1962). It will be observed that there is a difference in the number of dwellings appearing in E-Series Tables and Part II-A. The reasons for the variation have been discussed in sub-part (A) of this volume viz., Report on Housing and Establishments. It will suffice for the purpose of this sub-part to give the two sets of figures of dwellings appearing in Table A-I and Primary Census Abstracts in Part II-A and E-Series Tables.

The following statement gives a comparison of the number of dwelling recorded in the Primary Census Abstracts, Table A-I in Part II-A and that in the E-Series Tables :—

NOTE:—(1) 'N' indicates that the figures are negligible.
(2) '0' indicates that there are no figures at all.

The literal application of the definition of a census house adopted for the 1961 Census led in West Bengal, where it is usual for a house in possession of a single household to have several independent structures around a courtyard each giving on the inner courtyard, to the treatment of every such structure as a separate census house. Similarly the definition tended to equate a census house in most cases with a room and often with less than one room in urban areas. In the result, therefore, census houses both in rural and urban areas turned out to be in appreciable excess of the number of households. In the face of the extreme congestion and scarcity of housing in West Bengal, this may well seem a statistical fallacy. The figures of E-II Table, were therefore magnified by the reciprocal of the sample fraction to arrive at suitable figures for the relevant columns in Table E-I. The figures thus recast appear in columns 5, 6, 7 and 11 of Table E-I, the remaining columns being retained intact. Similarly, figures were recast in Table E-IV on the basis of column 4 of Table E-II. The methods by which these figures were derived have

been explained in the fly-leaves of Tables E-I and E-IV. These tables in the State volume XVI Part IV of West Bengal will, however, give the figures as compiled from the houselists.

It is also important to note that there are minor discrepancies between the housing tables and the population tables in respect of rural-urban classification of certain localities. There were border line cases where their status could not be determined on the basis of the data of the 1951 Census. They were therefore tentatively classified as either rural or urban on empiric considerations at the time of housenumbering and houselisting and consequently in the housing statistics. Decision on their final classification was taken with reference to the total population, density and the proportion of non-agricultural population at the 1961 Census.

The following statement gives the places which were treated as villages in housing tables but as towns in the population tables and vice versa:

Places treated as rural in housing statistics but urban in Table A-I and PCAs and vice versa

Sr. No.	State	District	Tehsil/Taluk/Police Station	Places treated as rural in Housing Tables but as urban in Table A-I and PCAs	Places treated as urban in Housing Tables but as rural in Table A-I and PCAs	Remarks

Each Table in this volume is preceded by a fly-leaf giving the nature of statistics presented in it and is followed by subsidiary Tables, which have reduced the absolute figures to proportions for greater facility of use and comparison.

The following abbreviations have been used to denote the civic status of towns appearing in Tables E-I, E-II, E-III, E-IV & E-V and subsidiary Tables.

(i) C., MC., M. Corp.	Municipal Corporation.
(ii) M., M.B., M.C.	Municipality, Municipal Board, Municipal Committee, (M.C. for Municipal Committee is used in the States of Jammu and Kashmir, Punjab and Delhi only and in other states, it is used for Municipal Corporation).
(iii) C. M.	City Municipality
(iv) P.	Panchayat
(v) S. B.	Sanitary Board
(vi) C. B.	Cantonment Board

For convenience of regional study States and Union Territories have been constituted into five Zones which differ from those politically constituted under the States Reorganisation Act, 1956 and the Bombay Reorganisation Act, 1960. The States and Union Territories constituting each of the five Zones are given in Appendix II.

[illegible]

APPENDIX I—*contd.***Instructions to Enumerators for filling up the Houselist****Column 1—Line number.**

Only one digit of the line number has been printed in this column. The line numbers should be continuous for your block. Where the line numbers exceed 9 write the earlier digit(s) yourself.

Column 2—Building number (municipal or local authority or census number, if any).

This refers to the entire structure on the ground. There are, however, high, large or long buildings along a street or lane which have been partitioned or portions of which have been sold, which have distinct, separate main exit on the road and which belong to separate owners or occupiers or alternatively there are a series of different houses joined each to each by common walls on either side to make the whole look like one building but parts of which have been built at different times and belong to separate owners. Such distinguishable structures, although not separate from each other, should be regarded as separate buildings and given separate numbers. Each building should have a separate number. If in big cities a large mansion or building containing several census houses has a well known name by which it is generally known then the name of the building should also be recorded for convenient reference. If there are more than one structure within an enclosed or open compound belonging to the same person *e.g.*, the main house, the servants' quarters, the garage etc., only one building number should be given. If the locality consists of a number of streets in a village, the buildings in the various streets should be numbered continuously and the streets should be taken in uniform order, from North-West to South-East. Experience suggests that the best way of numbering is to continue with one consecutive serial on one side of the street and complete the numbering on that side before crossing over to the end of the other side of the street and continuing with the serial, stopping finally opposite to where the first numbering began. In a city enumeration block, the numbering will have to respect the axis of the street and not any preconceived geographical direction like North-West. A building under construction should also be given a number in the serial. If a new hut or building is constructed between the time when the housenumbering and houselisting have been completed and the census count it should be given a new number beyond the last number of the serial for the village. Arabic numerals should be used for building numbers.

This will facilitate verification by supervisors. In areas *e.g.*, urban, where the buildings are already numbered by the municipal or other authorities, the enumerator may adopt the existing numbers in the houselist. In such cases, column 2 will carry the established municipal or local authority number which will facilitate identification. Where there are municipal or local authority numbers but there are reasons to believe that the number is incomplete or unsatisfactory, the municipal or local authority number may still be entered in column 2, but at the same time it will be

necessary to serially number the buildings afresh for the purposes of census houselist. In that case, the new census serial for buildings will be entered in column 3 and the new census numbers for the buildings will have to be painted on the buildings themselves. In those cases where there are no municipal or local authority numbers in existence, all buildings will have to be serially numbered for the census and column 2 will contain entries of this census serial. This number will have to be repeated in column 3 with sub-numbers for census houses, if any.

Column 3—Building number (Column 2) with sub-numbers for each census house.

A census house is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-cum-dwelling or a place of business, workshop, school etc., with a separate entrance.

If a building has a number of flats or blocks which have separate entrances of their own and are independent of each other giving on the road or a common staircase or a common courtyard leading to main gate, they will be considered as separate census houses. If within an enclosed or open compound there are separate buildings then each such building will also be a separate census house. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance should be treated as a separate census house.

The order in which census houses within a building should be numbered should be continuous, preferably clockwise, or in any convenient manner if it is at all difficult to do it clockwise. If a building itself is a census house, then it will have only one number, namely, that of the building. If within a building there are a number of census houses, then each census house will have two sets of numbers *e.g.*, the number of the building and the sub-number of the census house. The census house number should be written after the building number in arabic numerals in brackets such as 2(2), 3(2), etc. A census house may contain more than one household, in which case, each household will have to be denoted by a separate alphabetical sub-number (see instructions for column 11 below).

Column 4—Purpose for which census house used *e.g.*, dwelling, shop, shop-cum-dwelling, business, factory, workshop, school or other institution, jail, hostel, hotel, etc.

The actual use to which a census house is put should be written here.

In the case of a factory or workshop 'Factory' should be written for a large factory if registered under the Indian Factories Act and 'Workshop' for a small unregistered workshop. A workshop is a place where some kind of production, repair or servicing goes

on or where goods or articles are made and sold. Similarly, a shop is a place where articles are sold for cash or for credit. Business houses are those where transactions in money or other articles are taking place *e.g.*, bank, etc., But rooms or apartments where professional consultations are held such as by doctors, *hakims*, pleaders, etc., should be described as 'professional consultation rooms' and not workshops. In the case, however, of a dispensary where, in addition to consultation by a doctor, medicines are prepared and sold, the house should be described as a dispensary. Write also if used for place of worship or congregation or if unoccupied, 'Vacant'. If the census house is a shop, business house, bank, etc., but is not a factory or workshop as defined above, the name of the proprietor, manager or director should be entered in column 18.

Columns 5 to 8.—“If this census house is used as an establishment, workshop or factory”.

These columns apply only in cases where the census house is a factory or workshop *i.e.*, where some kind of production, processing, repair or servicing is undertaken or where goods or articles are made and sold. If the census house is not used for purposes of a factory or workshop write 'X' in each of the columns 5 to 8.

Column 5—Name of establishment or proprietor.

Write the name of the establishment in the case of factories or large manufacturing concerns and write the name of the proprietor in the case of small workshops and establishments like confectioneries where no distinct name has been given to them like *Halwai* shop, etc. If the census house is not used for the purpose of a factory or workshop put 'X' in each of the columns 5 to 8.

Column 6—Name of product(s), repair or servicing undertaken.

In this column enter the actual work that is being done in the establishment, factory or workshop, like paper making, shoe making, cycle repairing, motor servicing, etc.

Column 7—Average number of persons employed daily last week (including proprietor or household members, if any).

The total number of workers including apprentices, either paid or unpaid, employed in the factory or workshop, including the owner or proprietor and any of his family members (if working), should be entered. The average number of persons working per day during the week preceding the date of your visit should be entered.

In case more than one product is produced it is not necessary to enquire the number of persons employed in the production of each product. It may not be possible to get this information in cases where the operations may be composite.

Column 8—Kind of fuel or power, if machinery is used.

If the factory or workshop uses steam or diesel engine or fuel, *e.g.*, kerosene, soft coke, electricity, water-mill, etc., for running the machinery used for production, servicing or repairs, write what fuel or power is actually used.

Column 9 & 10—Description of Census House.**Column 9—Material of wall.**

Under this column the material out of which most of the walls of the house are made *i.e.*, grass, leaves reeds, bamboo, unburnt bricks, mud, burnt bricks stone, cement concrete or timber should be written. Where a house consists of separate structures each of different materials, the material out of which the walls of the main bedrooms are made are to be recorded.

Column 10—Material of roof.

The material out of which most of the outer roof exposed to the weather and not the ceiling is made, *i.e.*, tiles, thatch, corrugated iron, zinc or asbestos cement sheets or concrete etc., should be written. In the case of a multi-storeyed building the intermediate floor or floors will be the roof of the lower floor.

Column 11—Sub-number of each Census Household with Census House number (Column 3).

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.

There may be one or more households in a census house. Each household should be separately numbered. This can be done by using the alphabets as (A), (B) (C), etc. For example, if building No. 2 is also a census house and has three households, the household numbers will be 2(A), 2(B) and 2(C). If building No. 4 has two census houses, the house will be numbered as 4(1) and 4(2). If within each house there are respectively 3 and 2 households, then they will be numbered as 4(1A), 4(1B), 4(1C) and 4(2A) and 4(2B).

Column 12—Name of Head of Household.

The name of the Head of each household given in column 11 should be written here. The Head of a household, for census purposes, is the person on whom falls the chief responsibility for the maintenance of the household. The name of the person who is actually acknowledged as Head of the household should be recorded. In the case of places like messes, boarding houses, chummeries, etc., where people live together with no ties of relationship, the manager or superintendent or the person who by common consent is regarded as the Head should be recorded as Head of the household.

If the census house is used as a sitting place, cattle shed, etc., write the use to which it is put (and add the name of the owner).

Column 13—Number of rooms in Census Household.

If a census house is occupied by one household the enumeration of rooms should be simple.

If a census house consists of a number of households the number of rooms occupied by each household should be entered on each line against the name of the Head of the household. In cases where more than one household occupy a single room or share more than one room in such a way that it is not possible to say the number of rooms occupied by each household, the number of rooms should be given together within brackets as common to both the households.

A room should usually have four walls with a doorway with a roof overhead and should be wide and long enough for a person to sleep in, i.e., it should be at least 6 feet long. Unenclosed verandah, kitchen store, garage, cattle shed and latrine which are not ordinarily used for living and sleeping should not be treated as rooms. An enclosed room, however, which is used for living, dining, storing and cooking should be regarded as a room.

Column 14—Does the household live in own or rented house?

If the household lives in own house write 'O'.
If the household lives in a rented house write 'R'.

In the case of public buildings like schools, hospitals, etc., or places of worship, put 'X' in this column.

Columns 15 to 17—Number of persons residing in Census Household on day of visit.

Write the number of males residing in the household in column 15, the number of females residing in the household in column 16 and the total number of persons in column 17.

Column 18—Remarks.

In this column should be entered any useful or significant information about the building or the census house or the census household that has not been entered in any other column. For example, if the census house is a shop, the name of the proprietor or owner should be recorded in this column. If a census house is vacant at the time of houselisting but there is a reason to believe that the house will be occupied in the course of the next few days and almost certainly before the census enumeration period, then the word 'Vacant' should be entered in column 4 and a remark should be entered in column 18 to the effect 'likely to be occupied shortly'. Thus, the Remarks column should be utilised for recording all significant information relating to the building or census house or census household.

Each person engaged in housenumbering of one block will have to make out an abstract at the conclusion of houselisting and housenumbering. This abstract will be in the form shown below:

Houselist Abstract

Name and number of District.....
Name and number of Tehsil, etc.
Name and number of Village/Ward/.....
Enumerator's Block, etc.
Total number of sheets used.....
Census Household Numbers From.....To.....
Total number of Census Households.....

Number of establishments, workshops or factories	Total number of rooms in all households	Number of persons residing in households :		
		Males	Females	Total

Dated Signature of Supervisor

Dated Signature of Enumerator

APPENDIX II**Census Zones constituting States, Union Territories and Other Areas**

The following Zones differ from those politically constituted under the States Re-organisation Act of 1956 and the Bombay Re-organisation Act of 1960 in as much as North East Frontier Agency, Nagaland, Sikkim, Dadra and Nagar Haveli, Pondicherry, Laccadive, Minicoy and Amindivi Islands, Andaman and Nicobar Islands and Goa, Daman and Diu have not yet been notified under any of them. For convenience of regional study, these territories have been informally included in the various Zones as indicated below except Andaman and Nicobar Islands and Goa, Daman and Diu which have not been included in any of the Zones :

India /Zones	States/Union Territories and Other Areas
INDIA	
I Northern Zone	Jammu and Kashmir Punjab Rajasthan Delhi Himachal Pradesh
II Central Zone	Uttar Pradesh Madhya Pradesh
III Eastern Zone	Bihar Orissa West Bengal Assam Manipur Tripura North East Frontier Agency Nagaland Sikkim
IV Western Zone	Gujarat Maharashtra Dadra and Nagar Haveli
V Southern Zone	Andhra Pradesh Mysore Kerala Madras Pondicherry Laccadive, Minicoy and Amindivi Islands
VI Areas which have not been included in any Zone	Andaman and Nicobar Islands Goa, Daman and Diu

E-I CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

E-I CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

FLY-LEAF

This Table prepared on full count gives figures of census houses according to the uses to which they are put for Total, Rural and Urban areas separately for India, each Zone, each State/Union Territory/Other Area, districts and for each town or city with population of 50,000 or more. Corresponding statistics for Taluk/Tehsil/Police Station/Anchal will be found in Part IV of the respective State/Union Territory volume.

The data of this Table were collected through column 4 of the houselist, *viz.*, Purpose for which census house is used, *e.g.*, dwelling shop, shop-cum-dwelling, business, factory, workshop, school or other institution, jail, hostel, hotel etc. Instruction to enumerator on the mode of recording entries in this column was:

“The actual use to which a census house is put should be written here.

In the case of a factory or workshop ‘Factory’ should be written for a large factory if registered under the Indian Factories Act and ‘Workshop’ for a small unregistered workshop. A workshop is a place where some kind of production, repair or servicing goes on or where goods or articles are made and sold. Similarly a shop is a place where articles are sold for cash or for credit. Business houses are those where transactions in money or other articles are taking place *e.g.*, bank etc. But rooms or apartments where professional consultations are held such as by doctors, *hakims*, pleaders etc., should be described as ‘professional consultation rooms’ and not workshops. In the case, however, of a dispensary where, in addition to consultation by a doctor, medicines are prepared and sold, the house should be described as a dispensary. Write also if used for place of worship or congregation or if unoccupied, ‘Vacant’. If the census house is a shop, business house, bank, etc., but is not a factory or workshop as defined above, the name of the proprietor, manager or director should be entered in column 18.”

Census houses which were found vacant at the time of houselisting have also been shown separately. It will be seen from Subsidiary Table E-I.1 that the proportion of vacant houses is large in certain States. It is difficult to list all categories that may have been returned as vacant but it seems unlikely that the majority of vacant houses should have been dwellings. Experience in the course of checking at the time of houselisting operation indicated that these vacant houses consisted mostly of warehouses or godowns, places of worship, many of them dilapidated, tumbledown shacks, *baitmaks*, ruined or broken or deserted houses. In some areas kitchens and privies were listed as ‘Vacant’. Full discussion will be available in the Report on Housing and Establishments.

The data regarding the use of census houses are classified in the following categories :—

- (i) Dwellings
- (ii) Shop-cum-dwellings
- (iii) Workshop-cum-dwellings
- (iv) Hotels, sarais, dharamshalas, tourist homes and inspection houses
- (v) Shops excluding eating houses
- (vi) Business houses and offices
- (vii) Factories, workshops and workshops
- (viii) Schools and other educational institutions including training classes, coaching shop classes
- (ix) Restaurants, sweatmeat shops and eating places
- (x) Places of entertainment and community gathering (Panchayat Ghar)
- (xi) Public health and medical institutions, hospitals, health centres, doctor's clinics, dispensaries etc.

In addition to the above specific heads, a column is provided for residual uses under “Others” which *inter alia* includes cattle-shed, cattle-pound, garage, godown, Bus-passenger shelter, barber's shop, laundry-cum-dwelling, gatekeeper's shed, water-pump shed, petrol bunk, storehouse, temple, church, mosque, lavatory, kitchen, *baithak* etc.

The term ‘Census House’ has already been defined in the introductory note of this book. Other terms signifying the uses in the eleven categories mentioned above have the same meaning as they possess in common parlance except in the case of a ‘workshop’ which term has already been explained earlier in the instruction to enumerator for recording entries in column 4 of the Houselist.

As already mentioned in the introductory note, the figures of columns 5,6,7 and 11 of Table E-I of West Bengal in the West Bengal State Tables have been recast for the purposes of all India compilation. The derived figures are given in these columns pertaining to state/district/town and have also entered the total of India and Eastern Zone in the respective columns. Figures were derived on the following basis:—

Column 5 (E-I) = Column 5 (E-II) x 5

Column 6 (E-I) = Column 6 (E-II) x 5

Column 7 (E-I) = Column 7 (E-II) x 5

Column 11 (E-I) = Column 3 of E-III Minus column 7 of E-I.

After recasting figures of columns 5,6,7 and 11 of E-I in the above manner, column 3 gives the figures of the total of columns 4 to 16

Table E-I is followed by its two subsidiary tables :

- (i) E-I.1 gives distribution of 1,000 census houses by vacant and different types of occupied census houses;
- (ii) E-I.2 gives distribution of 1,000 census houses in each type of use among rural and urban areas.

E-I CENSUS HOUSES AND THE

**E-II TENURE STATUS OF SAMPLE CENSUS HOUSEHOLDS LIVING IN
CENSUS HOUSES USED WHOLLY OR PARTLY AS DWELLINGS**

(Based on 20% Sample)

**E-II TENURE STATUS OF SAMPLE HOUSEHOLDS LIVING IN CENSUS
HOUSES USED WHOLLY OR PARTLY AS DWELLINGS**

(Based on 20% Sample)

FLY-LEAF

This Table prepared on 20% sample gives the tenure status of households in census houses used as dwelling, shop-cum-dwelling, work-shop-cum-dwelling and dwelling -cum -other uses, for Total, Rural and Urban separately, for India, each Zone, each State, Union Territory and Other Area and their Districts. Additionally it covers each town and city with a population of 50,000 and over.

The relevant census question and instruction were as follows:—

Column 14 of Houselist

Question : Does the household live in own or rented house?

Instruction : If the household lives in own house write 'O'. If the household lives in a rented house write 'R'.

In the case of public buildings like schools, hospitals, etc., or places of worship, put 'X' in this column.

In the supplementary instructions issued to States and Union Territories 'rent free' accommodation provided by employers was included in 'rented' for the purpose of filling in the houselists. Thus it will be clear that only two types of tenure status *viz.*, 'owned' or 'rented' were recognised in census. There was, however, an insignificant departure in Madras State where the tenure status of 6,227 sample households (4,725 Rural 1,502 Urban) was not recorded in the houselists. As a result one more type had to be inserted in column 3 'Tenure Status' as 'Not stated' for Madras State and consequently to the same extent figures have been shown under 'Not stated' in Southern Zone and India.

As this Table is prepared on 20% sample (the mode of sampling has already been explained in the introductory note), the total number of households appearing in this table for each territorial unit should normally be a little more than 1/5th of the total of dwellings, shop-cum-dwellings and workshop-cum-dwellings appearing in Table E-I. But the statistics relating to Rajasthan, Madras and Maharashtra reveal a reverse trend in that the number of dwellings (total of 1/5th of dwellings, shop-cum-dwellings and workshop-cum-dwellings of E-I) exceeds the number of households in Table E-II. The reason for this reverse trend in Madras and Rajasthan seems to be that certain households occupied more than one dwelling. In Maharashtra in addition to the above reason, it was also due to the fact that some occupied houses which were found locked at the time of houselisting were treated as dwellings in column 4 on the basis of the information elicited from the neighbours but further details for column 12 onward of the houselists could not be obtained and the columns remained blank. In fact although these houses were treated as dwellings, no householders were found in them by the enumerators.

Table E-II is followed by two subsidiary tables :

- (i) E-II.1 Distribution of 1,000 census households living in census houses used wholly or partly as dwellings by types of census houses in rural areas (Based on 20% Sample);
- (ii) E-II.2 Distribution of 1,000 census households living in census houses used wholly or partly as dwellings by types of census houses and tenure status in urban areas (Based on 20% Sample).

E-II TENURE STATUS OF SAMPLE CENSUS HOUSEHOLDS LIVING IN CENSUS HOUSES USED WHOLLY OR PARTLY AS DWELLINGS

(Based on 20% Sample)

NOTE—(1) 'N' indicates that the figures are negligible.
(2) '0' indicates that there are no figures at all.

**E-III CENSUS HOUSES USED AS FACTORIES AND WORKSHOPS CLASSIFIED BY INDUSTRY,
POWER AND NO POWER USED AND SIZE OF EMPLOYMENT IN RURAL AND URBAN
AREAS OF EACH STATE, UNION TERRITORY, OTHER AREA AND CITY WITH
POPULATION OF ONE MILLION AND ABOVE**

**E-III CENSUS HOUSES USED AS FACTORIES AND WORKSHOPS CLASSIFIED BY INDUSTRY,
POWER AND NO POWER USED AND SIZE OF EMPLOYMENT**

FLY-LEAF

This Table based on full count was compiled from the entries recorded in columns 5 to 8 of the houselist.

The column headings and instructions for filling in the relevant information in them were as follows:—

Columns 5 to 8 (Main heading)—‘*If this census house is used as an establishment, workshop or factory.*’

Instruction :

These columns apply only in cases where the census house is a factory or workshop *i.e.*, where some kind of production, processing, repair or servicing is undertaken or where goods or articles are made and sold. If the census house is not used for purpose of a factory or workshop write ‘X’ in each of the columns 5 to 8.

Column 5—*Name of establishment or proprietor.*

Instruction :

Write the name of the establishment in the case of factories or large manufacturing concerns and write the name of the proprietor in the case of small workshops and establishments like confectioneries where no distinct name has been given to them like *Halwai* shop etc. If the census house is used for the purpose of a factory or workshop put ‘X’ in each of the columns 5 to 8.

Column 6—*Name of product (s) repair or servicing undertaken.*

Instruction :

In this column enter the actual work that is being done in the establishment, factory or workshop, like paper making, shoe making, cycle repairing, motor servicing, etc.

Column 7—*Average number of persons employed daily last week (including proprietor or household members, if any).*

Instruction :

The total number of workers including apprentices either paid or unpaid employed in the factory or workshop, including the owner or proprietor and any of his family members (if working), should be entered. The average number of persons working per day during the week preceding the day of your visit should be entered.

In case more than one product is produced it is not necessary to enquire the number of persons employed in the production of each product. It may not be possible to get this information in cases where the operations may be composite.

Column 8—*Kind of fuel or power, if machinery is used.*

Instruction :

If the factory or workshop uses steam, diesel engine or fuel, *e.g.*, kerosene, soft coke, electricity, water-mill, etc. for running the machinery used for production, servicing or repairs, write what fuel or power is actually used.

Data are presented for India, each State, Union Territory and Other Area separately for rural and urban areas, and each City with population of one million and above. Corresponding data for lower units like a district and a town or city with population of 50,000 and above will be found in part IV of the respective State and Union Territory. This Table gives statistics for workshops, factories and establishments characterizing their activity in terms of ‘Standard Industrial Classification’, the kind of fuel or power used and the size of employment.

As this Table relates to industrial establishments, workshops and factories, their industrial classification depending on the product manufactured, repair or servicing undertaken in each of them is confined to Division 2 & 3 (Manufacturing) and Major Group 04 (Live-stock and hunting) excepting minor group 047 (trapping of animals or games propagation). Major Group 10 and Minor Group 102 (Mining of gold ore) occurs in Mysore State to cover the special process of gold mining in the super structures which are listed as census houses. Though the ore is actually removed underground structures numbered as census houses are used for housing the machinery for lifting the ore to the surface for further processing. This process of recovery of gold from the ore is a part of mining operation and therefore has been classified in the Minor Group 102 (mining of gold).

Industrial classification of the establishments is expressed in column 1 of the Table in code numbers of the ‘Standard Industrial Classification’. The single digit code represents a ‘Division’, the two digit code a ‘Major Group’ and the three digit code a ‘Minor Group’. Details of each code number used in the Table are given in Annexure I to this fly leaf. The industrial classification of establishments has been spelt out in terms of the three digit Minor Group code for urban areas but restricted to the two digit Major Group code for rural areas.

The establishments, factories and workshops have been further classified according to the kind of fuel or power used, *viz.*, (a) electricity (b) liquid fuel (c) coal, wood & bagasse (d) other power and those run without power. ‘Other Power’ refers to forms of power other than those listed in (a), (b) & (c) above, which are for the most part used for running machinery, as for example, *oil ghanis* driven by bullocks or flour and saw mills driven by water power or wind mills.

There have been a few cases where, this particular characteristic of the establishment was not recorded in the houselist; these have been shown under the category 'Not Stated' in the Table.

The size of employment in the establishments has been classified in the following ranges :

- (i) 1 person
- (ii) 2—5 persons
- (iii) 6—9 persons
- (iv) 10—19 persons
- (v) 20—49 persons
- (vi) 50—99 persons
- (vii) 100 persons and above
- (viii) Persons not stated

The figures of census houses used as factories and workshops appearing in column 3 of Table E-III correspond with the figures of (columns 7+11) of Table E-I, but in the case of Maharashtra there is an excess of 382 census houses in Table E-I (columns 7+11) over the figures of census houses in column 3 of Table E-III. The reason for the difference is that despite the location of a factory/workshop in more than one census house, it was treated as one census house for the purpose of Table E-III, whereas in Table E-I (columns 7 & 11) these census houses were taken note of severally. The difference in the number of census houses is given below:

Census houses used as factories and workshops in Maharashtra		
Rural/Urban	Number of census houses used as factories and workshops	
	According to Table E-I (Cols. 7+11)	According to Table E-III Col. 3
1	2	3
Rural	202,600	202,508
Urban	118,242	117,952

In Assam, information in regard to size of employment and use of fuel was found wanting in the houselists in respect of 4,328 (2,890 rural and 1,438 urban) census houses used as factories and workshops. In Table E-III appearing in Assam State Part IV, such factories and workshops have been separately shown in a column entitled 'Unclassifiable'. In this Table, the same factories/workshops have been shown under 'No power' in column 11 under heading 'Persons not stated'.

Table E-III is followed by three subsidiary tables:

E-III. 1—Proportion of factories and workshops according to Divisions, Major Groups and selected Minor Groups to 1,000 factories and workshops in each State, Union Territory and Other Area.

E-III. 2—Distribution of 1,000 factories and workshops in each kind of fuel by size of employment in each State, Union Territory, Other Area and City with population of one million and above.

E-III. 3—Distribution of 1,000 factories and workshops in each Division, Major Group and selected Minor Group by kind of fuel or power used in each State, Union Territory, Other Area and City with a population of one million and above.

As subsidiary Table E-III. 3 given in this book has an additional column 'All Fuels' over its counterparts published in Part IV of the respective State and Union Territory there is a slight difference in the last digit of the figures in the case of some units appearing in this Table and those in the same Table in Part IV of the respective State and Union Territory. This has been due to slight differences in the method of rounding off of the last digit.

In Subsidiary Table E-III 3 Divisions, Major Groups and Minor Groups relating to factories/workshops run entirely on 'No power' i.e. where the figure is 1,000 under 'No power', have been excluded from the table and given in annexure II to this fly leaf.

ANNEXURE I

Standard Industrial Classification

Division 0-Agriculture, Livestock, Forestry, Fishing and hunting

Major Group (Code)	Description	Minor Group (Code)
04	Livestock and Hunting—	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Production of other animal husbandry products such as skin, bone, ivory and teeth	048

Division 2 & 3—Manufacturing

20	Foodstuffs—	
	Production of rice, atta, flour, etc. by milling dehusking and processing of crops and foodgrains	200
	Production of sugar and syrup from sugarcane in mills	201
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, and lozenge	209
21	Beverages—	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, plam juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	Tobacco Products—	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacco	225
	Manufacture of other tobacco products	226

ANNEXURE I—contd.

Standard Industrial Classification

Division 2 & 3—Manufacturing

Major Group (Code)	Description	Minor Group (Code)
23	<i>Textile-Cotton—</i>	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton cordage, rope and twine	239
24	<i>Textile-Jute—</i>	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	<i>Textile-Wool—</i>	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool Spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Woolweaving in power loom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256
26	<i>Textile-Silk—</i>	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	<i>Textile-Miscellaneous—</i>	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of Hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of water proof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279

ANNEXURE I—contd.

Standard Industrial Classification

Division 2 & 3—Manufacturing

Major Group (Code)	Description	Minor Group (Code)
28	<i>Manufacture of Wood and Wooden Products—</i>	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys, artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	<i>Paper and Paper Products—</i>	
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	<i>Printing and Publishing—</i>	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stitching, sizing and other allied work connected with binding industry	303
31	<i>Leather and Leather Products—</i>	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather foot wear	314
	Repair of all other leather products except footwear	315
32	<i>Rubber, Petroleum and Coal Products—</i>	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Productions of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other Coal and Coaltor products not covered elsewhere	326
33	<i>Chemicals and Chemical products—</i>	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works	333

ANNEXURE I—contd.

Standard Industrial Classification

Division 2 & 3—Manufacturing

Major Group (Code)	Description	Minor Group (Code)
33	<i>Chemicals and Chemical Products—contd.</i>	
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats)	339
34	<i>Non-metallic Mineral Products other than Petroleum and Coal—</i>	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	<i>Manufacture of Earthenware and Earthen Pottery—</i>	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357
	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	<i>Basic Metals and their Products except Machinery and Transport Equipment—</i>	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating (including electroplating) polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G.I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39)	369
37	<i>Machinery (All kinds other than Transport) and Electrical Equipment—</i>	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374

ANNEXURE I—concl'd.

Standard Industrial Classification

Division 2 & 3—Manufacturing

Major Group (Code)	Description	Minor Group (Code)
37	<i>Machinery (All kinds other than Transport) and Electrical Equipment—concl'd.</i>	
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379
38	<i>Transport Equipment—</i>	
	Manufacture, assembling and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles, engines parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and handdrawn vehicles	389
39	<i>Miscellaneous Manufacturing Industries—</i>	
	Manufacture of optical instruments and lenses, ophthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399

E-III CENSUS HOUSES USED AS FACTORIES AND WORKSHOPS CLASSIFIED BY INDUSTRY, POWER AND NO POWER USED AND SIZE OF EMPLOYMENT

[Wherever, there is a single entry for any fuel against the Minor Group, Major Group or Division, the figures for total being the same have not been repeated].

No. of factories and workshops by size of employment

Sl. No.	State/Union/Territory/Other Area/City with population of 1,000,000 and above	Rural Urban	Code number of Division, Major Group and Minor Group

Table E-IV is followed by two subsidiary tables viz., E-IV.1 and E-IV.2 .

S.T.E-IV.1 : gives the distribution of 1,000 census households living in census houses used wholly or partly as dwellings by predominant material of wall (Based on 20% Sample).

S.T.E.-IV-2 : gives the distribution of 1,000 census households living in census houses used wholly or partly as dwellings by predominant material of roof (Based on 20% Sample).

E-IV DISTRIBUTION OF SAMPLE HOUSEHOLDS LIVING IN CENSUS HOUSES USED WHOLLY OR PARTLY AS DWELLINGS BY PREDOMINANT MATERIAL OF WALL AND PREDOMINANT MATERIAL OF ROOF

(Based on 20% Sample)

FLY-LEAF

This table based on a 20% sample gives statistics of the predominant material of wall and roof of census houses used wholly or partly as dwellings by sample households. It presents data of Total, Rural and Urban separately for India, each Zone, each State, Union Territory and Other Area and their Districts. Additionally, it covers each town and city with a population of 50,000 and above. Similar data for administrative units lower than a district such as Taluk/Tehsil/Anchal/Police Station will be found in Table E-IV of the respective State/Union Territory Volume in Part IV.

The procedure for drawing the sample for this table is the same as explained in the introductory note.

This Table is constructed from the material recorded in columns 9 and 10 of the Houselist. The headings of the columns and the instructions for filling them in were as follows :

Columns 9 and 10—Description of Census House

Column 9—Material of Wall

Instruction : Under this column the material out of which most of the walls of the house are made i.e. grass, leaves, reeds, bamboo, unburnt bricks, mud, burnt bricks, stone, cement concrete, or timber should be written. Where a house consists of separate structures each of different materials, the material out of which the walls of the main bedrooms are made are to be recorded.

Column 10—Material of Roof

Instruction : The material out of which most of the outer roof exposed to the weather and not the ceiling is made, i.e. tiles, thatch, corrugated iron, zinc or asbestos sheets or concrete etc. should be written. In the case of a multi-storyed building the intermediate floor or floors will be the roof of the lower floor.

The predominant material of wall is clarified in the following types in the Table :

- (i) Grass, leaves, reeds or bamboo
- (ii) Timber
- (iii) Mud
- (iv) Unburnt bricks
- (v) Burnt bricks
- (vi) Corrugated iron sheets or other metal sheets
- (vii) Stone
- (viii) Cement Concrete
- (ix) All other material

The predominant material of roof is classified in the following types :

- (i) Grass, leaves, reeds, thatch, wood or bamboo
- (ii) Tiles, slate, shingle
- (iii) Corrugated iron, zinc or other metal sheets
- (iv) Asbestos cement sheets
- (v) Brick and lime
- (vi) Concrete and stone
- (vii) All other material

Columns 9 and 10 of the Houselists in Madras State did not contain any information regarding the material of wall for 5,905 census houses (4,767 Rural, 1,138 Urban) and the material of roof for 3,608 census houses (2,689 Rural; 919 Urban) occupied by the sample households. These were classified under 'material not stated'. For the purpose of effecting economy and of avoiding large blanks the relevant statistics of material not stated for wall and roof have been added, against an appropriate notation in column 1, to those districts and towns of Madras Sate in which they appear, and correspondingly to those of Madras State, the Southern Zone and India. Details of these figures for each administrative unit by Total, Rural and Urban is given in the footnote on the Table where entries relating to Madras State appear.

It has already been indicated in the introductory note, that figures as compiled from the Houselists of West Bengal and appearing in the West Bengal State Tables were recast for the purpose of this Table. The method of recasting the figures was as follows :

Figures in column 3 of E-IV have been substituted by those appearing in column 4 (number of households) of Table E-II. Figures in columns 4 to 19 have been worked out for Police Stations, Rural and Urban by applying the same proportion as it obtained in columns 4 to 19 of the West Bengal State Table. Figures of State/District by Total, Rural and Urban have been derived by building up the recast figures of the lower units.

As pointed out in the introductory note, a housing census was not taken in Goa, Daman and Diu. Housing data have been abstracted from the census schedule canvassed by the Portuguese authorities in 1960 but these were not found adequate for the construction of Table E-IV in its entirety, no information being available in the schedules regarding the material of roof. It was not therefore possible to present the

TABLE IV DISTRIBUTION OF SAMPLE HOUSEHOLDS LIVING IN CENSUS HOUSES USED WALL AND PREDOMINANT

*Includes the figures of Jabalpur Cantonment and Khamaria Ordnance Factory.

**Includes the figures of Sagar Cantonment.

†Figures in this table for Madras, its districts and towns and those appearing in the corresponding state table are slightly different (not exceeding 1) owing to rounding off, consequent in the merging of figures of 'Material not stated' in column 11 of all other material.

E-IV.1 DISTRIBUTION OF 1,000 CENSUS HOUSEHOLDS LIVING IN CENSUS HOUSES USED WHOLLY OR PARTLY AS DWELLINGS BY PREDOMINANT MATERIAL OF WALL—contd.

(2) '0' indicates that there are no figures at all.

E-V SAMPLE HOUSEHOLDS CLASSIFIED BY NUMBER OF MEMBERS AND BY NUMBER OF ROOMS OCCUPIED

(Based on 20% Sample)

E-V SAMPLE HOUSEHOLDS CLASSIFIED BY NUMBER OF MEMBERS AND BY NUMBER OF ROOMS OCCUPIED

(Based on 20% Sample)

FLY-LEAF

This Table prepared on a 20 % sample gives statistics of the number of inmates (males and females separately) and the number of rooms occupied by sample households. It presents the data for rural and urban areas separately, for India, each Zone, each State, Union Territory and Other Area and their Districts. Additionally, it covers each town or city with a population of 50,000 or more. Similar data for Tehsil/Taluk/Police Station/Anchal will be found in Table E-V in the respective State/Union Territory Volume in Part IV.

The procedure for drawing the sample for this Table is the same as explained in the introductory note.

This Table is constructed from the details recorded in columns 13, 15, 16 and 17 of the Houselists.

Column headings and the instructions for filling in those columns were as follows :

Column 13—Number of rooms in census household.

Instruction : If a census house is occupied by one household the enumeration of rooms should be simple.

If a census house consists of a number of households the number of rooms occupied by each household should be entered on each line against the name of the Head of the household. In cases where more than one household occupy a single room or share more than one room in such a way that it is not possible to say the number of rooms occupied by each household, the number of rooms should be given together within brackets as common to both the households.

A room should usually have four walls with a doorway with a roof overhead and should be wide and long enough for a person to sleep in, i. e., it should be at least 6 feet long. Unenclosed verandah, kitchen, store, garage, cattleshed and latrine which are not ordinarily used for living and sleeping should not be treated as rooms. An enclosed room, however, which is used for living, dining, storing and cooking should be regarded as a room.

Columns 15 to 17—Number of persons residing in census household on day of visit.

Instruction : Write the number of males residing in the household in column 15, the number of females residing in the household in column 16 and the total number of persons in column 17.

The number of rooms occupied by the sample households is given in the following ranges :

- (i) No regular room
- (ii) One room
- (iii) Two rooms
- (iv) Three rooms
- (v) Four rooms
- (vi) Five rooms and more

In the case of Madras State and Union Territory of Pondicherry, entries in column 13 of the houselist were found wanting in respect of 20,467 sample households. Consequently, these could not be classified in the ranges of number of rooms occupied and are excluded from columns 6 to 24 of the Table, for India, the Southern Zone, Madras State (its districts and towns) and the Union Territory of Pondicherry. These sample households along with the number of their members have been included in columns 3 to 5 against the above mentioned territorial units.

The details of these households have been given in the footnotes at appropriate places in the Table. Below are given the figures appearing in India, Southern Zone, Madras State and Pondicherry :

Households with rooms not stated included in columns 3 to 5 but excluded from columns 6 to 24 of Table E-1 :

	Total Rural Urban	Households with rooms not stated

From the census schedules canvassed by the Portuguese authorities in 1960, in Goa, Daman and Diu, Table E-V has been constructed to the extent possible from the data in the schedules. But as the statistics are deficient in the sex distribution of the members of the households, these could not be consolidated in the All India Table E-V. Table E-V for Goa, Daman and Diu compiled on full count is given here.

Household classified by number of members and by number of rooms occupied in Goa, Daman and Diu

Table E-V is followed by its two subsidiary tables, viz., E-V.1 which gives the distribution of 1,000 census households according to number of rooms occupied and E-V.2, which gives the number of persons, males and females per room and persons per household in each category of household (in two places of decimals).
