PREFACE

The Census of India 1961, Volume V, Gujarat, is divided into ten parts as shown in the list of census publications printed at the commencement of this book. Each part is further subdivided into two or more sub-parts according to the extent of material it contains. Part X appertains to the City of Ahmedabad subdivided into

Part X-A—Special Report on Cities

Part X-B—Special Tables on Cities and Block Directory

Part X-C—Special Migrant Tables for Ahmedabad City.

An increasing trend of migration from rural to urban areas, especially to big industrial centres is the characteristic feature of the movement of population in recent times. This flow is largely motivated by economic factors which induce people to leave their homeland and migrate outside to make a comfortable living. In order to study the various aspects such as place of birth, duration of residence, literacy, religion, occupational and industrial distribution, age, etc., of migrants to cities having a population of 1 million and above, compilation of special tables was advised by the Registrar General, India. As Gujarat has one such city, viz., the City of Ahmedabad, special sorting was undertaken for that unit and Special Migrant Tables thus compiled are included in Part X-C. Census Tables on Cities and Block Directory which form Part X-B have already been published earlier.

Seven tables originally compiled were

1. Migrants classified by sex, broad age-group, educational level and by category of worker/non-worker
2. Migrants classified by sex, place of birth and religion
3. Migrants classified by duration of residence and religion
4. Migrants classified by sex, duration of residence, age-group and educational level
5. Migrants classified by sex, duration of residence, age-group and in case of worker by occupational division and group
6. Migrants classified by sex, duration of residence, age-group, industrial division and major group and class of worker
7. Migrants classified by sex, duration of residence, age-group and marital status

On completion of tabulation, it was found that the number of manuscript pages these tables covered ran into thirteen thousand. Their abridgement in the present form as detailed in the fly-leaves was, therefore, considered necessary. Tables No. 2 and 3 were also combined to reduce the number of tables to 6.

The description of Divisions and Groups of occupations has been reproduced as Annexure from the National Classification of Occupations at the end of Table 4. The description of Divisions and Major Groups of industries has been reproduced as Annexure from the Standard Industrial Classification at the end of Table 5.

The sorting and compilation of these tables proved to be a very laborious task which could be satisfactorily accomplished by the strenuous and conscientious work put in by the Central Tabulation Section of my office under the able guidance of Shri I. N. Patel, Deputy Superintendent of Census Operations assisted by the Tabulation Officers Shri R. M. Vankani and Shri V. M. Vyas and Statistical Assistants Shri B. M. Patel and Shri H. C. Shah. Before I conclude I must express my gratitude to Shri Asok Mitra, Registrar General, India, for the valuable guidance given in the compilation of these intricate tables. My thanks are also due to Shri K. D. Ballal, Central Tabulation Officer and his staff for the great patience and industry they have bestowed on checking the accuracy of the voluminous statistical material printed in this sub-part.

AHMEDABAD,
17th December, 1965.

TABLE 1

**MIGRANTS CLASSIFIED BY SEX, BROAD AGE-GROUP, EDUCATIONAL LEVEL AND
BY CATEGORY OF WORKER/NON-WORKER**

The table relates to migrants to Ahmedabad City classified into workers and non-workers, cross-tabulated by age-groups and educational levels. Classification of working migrants by industrial category gives an indication of industries that attract them. Educational levels show the skilled and unskilled type of workers among migrants. Classification by age-group shows whether adults are more attracted to the city.

The migrants have been classified into the following age-groups:

Age-groups		Age-groups	
(i)	0-14 years	(iv)	60+ years

**MIGRANTS CLASSIFIED BY SEX, RELIGION, PLACE OF BIRTH AND DURATION
OF RESIDENCE**

The table is based on replies recorded against Q. No. 4(c) on migration of the individual enumeration slip. It gives data regarding religion, place of birth and duration of residence of migrants in the place of enumeration, i.e., Ahmedabad City. The table shows the nature of migration. The group 11-15 years yields information on population displaced by partition of the country. The duration of residence is given under five categories, viz.,

Less than 1 year,
1- 5 years,
6-10 years,
11-15 years and
16 years and over.

Period not stated is not separately shown in the table but these figures are included in 'Total migrants' under columns 3 and 4.

The figures of 'Unclassifiable' are not shown separately but are included in the total of each religion. Religions which account for less than 10 per cent each of total migrants are clubbed together under 'Other religions and persuasions'.

Districts whose strength of contribution of migrants is less than 10 per cent of those born in the State of Enumeration are clubbed together under 'Other Districts of the State of Enumeration'. Similarly, other States and Union Territories whose strength of contribution of migrants is less than 10 per cent of those born in States in India beyond the State of Enumeration are clubbed together under 'Other States and Union Territories'.

- (ii) Figures of 'Unclassifiable' are not shown separately but are included in the total of each religion.
- (iii) Religions which account for less than 10 per cent each of total migrants are clubbed together under 'Other religions and persuasions'.
- (iv) Districts whose strength of contribution of migrants is less than 10 per cent of those born in the State of Enumeration are clubbed together under 'Other Districts of the State of Enumeration'. TABLE 3
MIGRANTS CLASSIFIED BY SEX, DURATION OF RESIDENCE, AGE-GROUP AND
EDUCATIONAL LEVEL

The table supplements the information produced by Table 1 inasmuch as it gives in addition place of birth and duration of residence in the place of enumeration. The broad age-groups given in this table, however, differ from those given in Table 1. The following are the broad age-groups given in this table.

Age-groups	Age-groups
0-14 years	30-34 years
15-19 years	35-59 years
20-24 years	60+ years
25-29 years	

The table intends to show extent of literacy and education among migrants. The figures of duration 'Period not stated' are not separately shown in the table but the total of all durations for all birthplaces as well as each birthplace includes the figures of 'Period not stated'.

The figures relating to 'Age not stated' are omitted from the table but included in the total.

The figures of 'Unclassifiable' are not shown separately but the total given at the head of each birthplace includes figures under 'Unclassifiable'.

Districts whose strength of contribution of migrants is less than 10 per cent of those born in the State of Enumeration are clubbed together under 'Other Districts of the State of Enumeration'. Similarly, other States and Union Territories whose strength of contribution of migrants is less than 10 per cent of those born in States in India beyond the State of Enumeration are clubbed together under 'Other States and Union Territories'.

TABLE 4

**MIGRANTS CLASSIFIED BY SEX, DURATION OF RESIDENCE, AGE-GROUP AND IN CASE
OF WORKERS BY OCCUPATIONAL DIVISION AND GROUP**

The table gives classification of non-workers into age-groups by duration and occupational distribution of migrant workers to Ahmedabad City. The occupational distribution has been given with further cross-tabulation by duration of residence and age-group. This table gives an indication of occupations that attract migrants.

Figures of 'Age not stated' and duration of 'Period not stated' are not shown separately in the table but are included in 'Total migrants'.

Figures of 'Unclassifiable' are not shown separately but the total at the head includes these figures.

Districts whose strength of contribution of migrants is less than 10 per cent of those born in the State of Enumeration are clubbed together under 'Other Districts of the State of Enumeration'. Similarly, other States and Union Territories whose strength of contribution of migrants is less than 10 per cent of those born in States in India beyond the State of Enumeration are clubbed together under 'Other States and Union Territories'.

Groups having less than 5 per cent of workers of the respective divisions (less than 2.5 per cent in case of Division 7-8) have not been shown in the table. The divisions thus affected are marked with an asterisk(*). Such groups are shown run on in Appendix to this table.

Lines with nil entries have been omitted from the table.

TABLE 5
MIGRANTS CLASSIFIED BY SEX, DURATION OF RESIDENCE, AGE-GROUP, INDUSTRIAL DIVISION AND MAJOR GROUP AND CLASS OF WORKER

The table gives employment status, viz., (1) Employer, (2) Employee, (3) Single Worker and (4) Family Worker of migrant workers to Ahmedabad City. It is cross-tabulated by age-group, duration of residence and industrial division and major group. The table has been split up in two parts—Part I for Household Industry and Part II for Non-household Industry. Part I gives employment status of employee and others, while Part II gives data regarding all the four types of employment status. The table indicates the industry which attracts the migrants and the capacity in which they find employment.

Figures of 'Age not stated' are not shown separately in the table but are included in the total of all ages.

Figures of 'Unclassifiable' are not shown separately but the total at the head includes these figures.

Figures of duration of 'Period not stated' are omitted from the table but are included in the total for all durations.

Districts whose strength of contribution of migrants is less than 10 per cent of those born in the State of Enumeration are clubbed together under 'Other Districts of the State of Enumeration'. Similarly, other States and Union Territories whose strength of contribution of migrants is less than 10 per cent of those born in States in India beyond the State of Enumeration are clubbed together under 'Other States and Union Territories'.

Major groups having less than 5 per cent of workers of the respective divisions (less than 2.5 per cent in the case of Division 2 & 3) have not been shown in this table but are given run on in the appendix to this table. Divisions thus affected are marked with an asterisk(*).

Lines with nil entries are omitted.

TABLE 6

**MIGRANTS CLASSIFIED BY SEX, DURATION OF RESIDENCE, AGE-GROUP AND
MARITAL STATUS**

This table gives marital status of migrants, viz., (1) never married, (2) married, (3) widowed and divorced or separated, cross-tabulated by age-group and duration of residence.

Figures of age-groups 0-9 and 'Age not stated' are not shown separately in the table but are included in the total of all ages.

Figures of 'Unclassifiable' are not shown separately but are included in the total at the head.

Unspecified marital status is not shown separately but its figures are included in 'Total Migrants'.

Duration of 'Period not stated' is omitted and its figures are included in the total of all durations.

Districts whose strength of contribution of migrants is less than 10 per cent of those born in the State of Enumeration are clubbed together under 'Other Districts of the State of Enumeration'. Similarly, other States and Union Territories whose strength of contribution of migrants is less than 10 per cent of those born in States in India beyond the State of Enumeration are clubbed together under 'Other States and Union Territories'.
