PREFACE

Under the Programme of the Decennial World Agricultural Census sponsored by the Food and Agricultural Organisation of the United Nations, and as an integral part of the National Agricultural Census taken all over the country, the Directorate of Agricultural Census carried out the first ever Agricultural Census in Tamil Nadu with 1970-71 (Fasli 1380) as the reference year. The Directorate has already brought out a report (in 2 volumes) incorporating information regarding number, size class-wise operational holdings, operated area, tenure and tenancy, irrigation source-wise, land utilisation cropping pattern, etc. This handbook presents similar data in the form of tables at district, taluk and block levels for a meaningful study of the agricultural economy of Tamil Nadu at micro level. With a view to enhancing the value of the data a few charts have been added.

It is hoped that Administrators, Planners and Research Scholars will find these tables very useful in the formulation of policies, planning processes and implementation of schemes pertaining to agriculture at micro level. Besides, the data will be of immense value in respect of matters relating to land tenancy reforms, procurement, distribution of inputs, identification of viable units and building up of econometric models for agricultural production system.

MADRAS,
7th September 1975.

R. PADMAVALLI,
Director of Agricultural census.

Wholly Unirrigated:

If the entire "net shown area" of a holding is unirrigated that holding would be considered as wholly unirrigated.

Partly Irrigated:

If a part of the "net sown area" of a holding is irrigated that holding would be considered as partly irrigated.

TABLE 3

Form of Tenure—Wholly Owned And Self-Operated:

This denotes those holdings which are wholly owned less land leased out and self-operated.

Form of Tenure—Rented From Others;

This denotes those holdings which are wholly rented for fixed money, for fixed produce, for share of produce and others.

More Than One Form of Tenure :

This denotes those holdings which are partly owned and partly rented.

TABLE 4

Land Uses:

For the purpose of consolidation of holdingwise data, utilisation of land classified under nine categories in the "Adangal" has been regrouped into six categories (as explained below):—

Net Sown Area:

This represent the total area sown with crops and orchards, counting area sown more than once in the same year only once (i.e., area under first crop only).

Current Fallows:

This represents the cropped areas which are kept fallow during the current year.

Other Uncultivated Land Excluding Fallow Land:

This represents the area under permanent pastures and other grazing lands and land under miscellaneous tree crops as explained below:—

(*a*) Permanent pastures and other grazing lands :—These include all grazing lands, whether they are permament pastures and meadows or not. Village common grazing land have been excluded for the purposes of Agricultural census.

(*b*) Land under miscellaneous tree crops etc.:—This includes all cultivable land which is not included in the net area sown but put to some agricultural use. Lands under casuarina trees, thatching grasses, bamboo bushes and other groves for fuel, etc., which are not included under "Orchards" have been included under this category.

Fallow land other than current Fallow :

This represents all lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years.

Culturable waste :

This represents all lands available for cultivation whether or not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and previous five years or more in succession.

Not available for cultivation—

This represents the area under private forests, barren and unculturable land and land put to non-agricultural uses.

Net cultivated area—

This represents the total of "net area sown" and "current fallows".

TABLE 5.

Sourcewise area irrigated—

This represents the area irrigated under first crop only.

Other sources of irrigation—

These include private canals, springs, thangals, etc.

TABLE 6.

Gross cropped area—

This represent the total of all areas cultivated once and more than once in the same year.

Gross cropped area irrigatee—

This represents the total of all irrigated areas cultivated once and more than once in the same year.

Gross cropped area unirrigated—

This represents the total of all unirrigated areas cultivated once and more than once in the same year.

Ragi and other cereals—

These include Ragi, Korra, Varagu, Samai, Wheat, Barley, Maize, Kudiravalli and other cereals.

Other Non-Food Crops—

These include palmyrah, other sugar crops, Mesta, sun-hemp, other fibres, dyes and tanning materials, rubber, indian hemp, cinchona, betelvines, tobacco, green manure crops, etc.

1. Marginal Farmers Agricultural Labour Development Agency	295
2. Tribal Areas	302

EXPLANATORY NOTE ON BASIC CONCEPTS AND TERMINOLOGIES

Operational Holdings

An operational Holding for the purpose of Agricultural Census is defined as all land which is used wholly or partly for agricultural production and operated as one technical unit by one person alone or with others without regard to title, legal form, site or location. A holding may consist of one or more parcels of land provided they are located within the same taluk and form part of the same technical unit. A technical unit has been defined as that unit which is under the same management and has the same means of production such as labour force, machinery and animals. It is seen from this definition that the actual cultivator and not the owner is the unit for collection of data for the census.

Agricultural production—

For the purpose of census, agricultural production includes growing of field crops, fruits, grapes, nuts, seeds, tree nurseries (except those of forest trees), bulbs, vegitables, and flowers, production of coffee, tea, cocoa, rubber, jute, oilseeds, fodder, grasses, etc.,

Size classes of operational holdings—

The operational holdings have been grouped under twelve size classes (viz.), 0—0·5, 0·5—1, 1—2, 2—3, 3—4, 4—5, 5—10, 10—20, 20—30, 30—40, 40—50 and above 50 hectares. The value of the upper limit of each size class belongs to the next higher class.

Irrigation—

For the purpose of Agricultural Census, irrigation is considered to denote the practice of purposively providing land with water other than rain by artificial means for crop production.

Area Owned :

Land owned or held in owner like possession will include :—

(a) Lands held directly from Government under a grant, lease of assignment (i) with right of permanent and heritable and transferable possession and (ii) with right of permanent end heritable possession but without the right of transfer ;

(b) Land held from persons other than Government (i) with right of permanent, heritable and transferable possession and (ii) with right of permanent, heritable possession but without the right of transfer.

Area rented or Leased in :

Area rented in by a tenant (other than those who are treated as owners by virtue of owner like possession) who has possession of land without the right of ownership constitutes area rented in by the tenant.

TABLE 1

Individual Holding :

If the holdings is operated either by one person alone or by a group of persons, being members of the same house-hold, the holding is said to be "individual".

Joint Holding :

When two or more persons share jointly (as partners) in the economic and technical responsibility for the operation of an holding, each is to be considered as the holder if they belong to different house-holds and the holdings is said to be a joint holding.

TABLE 2

Wholly irrigated :

Wholly irrigated holdings are those in which the total "net sown area" is irrigated.
