WORLD AGRICULTURAL CENSUS

1979-80

FASLI - 1389

TAMIL NADU

PERIYAR DISTRICT

DISTRICT TABLES

PREFACE

The Agricultural Census conducted in Tamil Nadu with 1979-80 (Fasli 1389) as the reference period is the third comprehensive Agricultural Census in the country and it corresponds to 1980 world Agricultural Census sponsored by the Food and Agricultural Organisation of the United Nations.

In Tamil Nadu, the comprehensive system for collecting and recording agricultural statistics through village accounts maintained by the Revenue Agencies, has formed the base for the Agricultural Census. These Land Records contain detailed particulars covering individual fields—Survey numbers, Sub-division numbers, Boundaries, etc. The census envisaged collection of data in respect of each operational holding by retabulating the data already available in the village Land Records. The retabulation approach involved recompiling the recorded data, survey numberwise/sub-division numberwise into figures set down operational holdingwise.

The present report on Periyar District seeks to provide information social groupwise on the following items: Size of operational holding according to the status of the cultivator (Individual, Joint and Institutional), land tenure, land utilisation, sources of irrigation and cropping pattern.

The Administrators, Planners and Research Scholars will find these tables useful in the formulation of policies, planning processes and implementation of schemes pertaining to agriculture at district level.

The co-operation and assistance rendered by the District Collector, Officers of Revenue and Statistics Departments and all the staff engaged in Agricultural Census operations in Periyar District is gratefully acknowledged.

Madras-600 006.

21st November 86.

S. JAYARAMAN,
Commissioner of Statistics.

EXPLANATORY NOTE ON BASIC CONCEPTS AND TERMINOLOGIES.

Operational Holding.—An operational holding for the purpose of Agricultural Census is defined as all land which is used wholly or partly for agricultural production and operated as one technical unit by one person alone or with others without regard to title, legal form, size or location. A holding may consist of one or more parcels of land provided they are located within the same taluk and form part of the same technical unit. A technical unit has been defined as that unit which is under the same management and has the same means of production such as labour force, machinery and animals. It is seen from this definition that the actual cultivator and not the owner is the unit for collection of data for the Census.

Agricultural Production.—For the purpose of Census, Agricultural production includes growing of field crops, fruits, grapes, nuts, seeds, tree nurseries (except those of forest trees), pulps, vegetables and flowers, production of coffee, tea, cocoa, rubber, jute, oil seeds, fodder, grasses, etc.

Size Classes of Operational Holdings.—The operational holdings have been grouped under thirteen size classes (Viz) 00.5, 0.5—1, 1—2, 2—3, 3—4, 4—5, 5—7.5, 7.5—10, 10—20, 20—30, 30—40, 40—50 and above 50 hectares. The value of the upper limit of each size class belongs to the next higher class.

Irrigation.—For the purpose of Agricultural Census, irrigation is considered to denote the practice of purposively providing land with water other than rain by artificial means for crop production.

Area Owned.—Land for which the cultivator has the right to permanent heritable possession would be considered as owned. This will include—

(i) Land held from Government or others under grant or lease or assignment with right of permanent heritable possession with or without right of transfer.

(ii) Land operated under perpetual lease.

Area leased in.—Area leased in is defined as land taken on lease from others without any permanent right of possession for the lessee. Land may be leased in for:—

(i) Fixed Money.

(ii) Fixed Produce.

(iii) Share of Produce.

(iv) Usufructuary mortgage.

(v) Other terms.

TABLE 1.

Individual Holdings.—If the holding is being operated either by one person alone or by group of persons who are the members of the same household, it will be considered as an individual holding.

Joint Holdings.—If two or more persons belonging to different households, share jointly as partners the economic and technical responsibility for the operation of an agricultural holding, such holding will be considered as joint holding.

Institutional Holdings.—Holdings such as government farms, sugarcane factories, co-operative farms, lands managed by trust will be treated as institutional holding.

(ii)

TABLE 2A and 2B.

Wholly owned and self-operated holdings.—This denotes those holdings which are wholly owned less land leased out and self operated.

Wholly leased in holdings.—This denotes those holdings which are wholly rented for fixed money, for fixed produce, for share of produce, for usufructuary mortgage and for other terms.

Wholly otherwise operated.—This will include encroachment, land forcibly occupied, unauthorised or land in dispute, etc. which cannot be treated as owned or leased in, as per the definitions given above.

Other forms of tenure.—Other forms of tenure (viz) partly owned and partly leased in, partly owned and partly otherwise operated, partly leased in and partly otherwise operated and partly owned, partly leased in and partly otherwise operated are self explanatory.

TABLE 3.

For the purpose of consolidation of holdingwise data, utilisation of land classified under nine categories in the "Adangal" has been regrouped into six categories, as explained below:—

1. *Net area sown.*—Total area sown with crops and orchards counting area sown more than once in the same year only once (i.e. area under first crop only).

2. *Current fallow.*—Cropped areas which are kept fallow during the current year.

3. *Other uncultivated land excluding fallow land.*—This will include—(a) *Permanent pastures and other grazing lands.*—All grazing lands, whether they are permanent pastures and meadows or not. Village common grazing lands will however be excluded.

(b) *Land under miscellaneous tree crops.*—Cultivable land which is not included in the net area sown but is put to some agricultural use. Lands under Casuarina trees, thatching, grasses, bamboo bushes and other groves for fuel which are not included under "Orchards" will be covered under this category.

4. *Fallow land other than current fallows.*—All lands which are taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years.

5. *Culturable waste land.*—All lands available for cultivation, whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and the last five years or more in succession for one reason or the other. Such lands may be either wholly or partly covered with shrubs and jungles which are not put to any use. Land once cultivated but not cultivated for five years in succession will also be included.

6. *Land not available for cultivation.*—This will include forest, area under non-agricultural use, barren and uncultivable land.

(a) *Forest.*—All lands classified as 'forests' under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land.

The area of crops raised in the forest and grazing lands or areas open for grazing within the forests will be included under the forest area. Only private forest will be covered under this category.

(b) *Area under non-agricultural use.*—All lands occupied by buildings and other lands put to uses other than agriculture within the holding.

(c) *Barren and Uncultivable land.*—All barren and uncultivable land within the cultivated holding.

7. *Net cultivated area.*—This represents the total of "Net area sown" and "Current fallows".

44

TABLE 4.

Wholly Irrigated holdings.—Wholly irrigated holdings are those in which the total "Net area sown" is irrigated.

Wholly unirrigated holdings.—If the entire "net area sown" of a holding is unirrigated that holding will be considered as wholly unirrigated.

Partly irrigated.—If a part of the "net area sown" of a holding, is irrigated that holding will be considered as partly irrigated

TABLE 5.

Sourcewise area irrigated.—This represents the area irrigated under first crop only.

Other sources of irrigation.—These include springs, thangals, etc.

TABLE 6.

Gross cropped area.—This represents total of all areas cultivated once and more than once in the same Fasli year.

Gross cropped area irrigated.—This represents the total of all irrigated areas cultivated once and more than once in the same year.

Gross cropped area unirrigated.—This represents the total of all unirrigated areas cultivated once and more than once in the same year.
