Responsibility for the correctness of internal details shown in the maps rests with the publisher.

FOREWORD.

The District Census Handbook(DCH),compiled by the Census Organisation on behalf of the State Government, is one of the most valuable products of the census. The DCH is constantly referred to by planners, administrators academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data up to village level for the rural areas ward wise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 census. It contained important census tables and PCA for each village and town of the district. During 1961 census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, Primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of household they serve. Addition of two more appendices listing the villages where no

The data in respect of urban areas, apart from the medical and other facilities available, relate to the growth of towns, the availability of protected water supply, and what is important, the civic amenities available in the slums of the urban areas.

Part B of this volume consists of the District and Village/Townwise Primary Census Abstract, followed by Primary Census Abstract of Scheduled Castes and Scheduled Tribes.

The District Primary Census Abstract gives for each territorial unit upto Taluk level in the case of rural areas and upto town level for urban areas, occupied residential houses, households, the total population, the Scheduled Caste and Scheduled Tribe population, workers, etc., thereby indicating the basic socio-economic characteristics of the population for the territorial units. The village and townwise Primary Census Abstract gives similar information for villages and wards of towns. Besides, there is an appendix which furnished at urban block level, the total population and Scheduled Caste and Scheduled Tribe Population.

I am grateful to the Collectors and other District officers and Departments of the State Government who have extended their unfailing co-operation and help, in collecting the voluminous and useful data other than Census, for their presentation at one place in this publication, for the ready reference of the data users.

In bringing out this publication, I have received assistance from S/Shri M. Thangaraju and M. Nagappan, Deputy Directors of Census Operations and Shri R. Narayanan, Assistant Director of Census Operations besides a large number of staff members of this Directorate.

In formulating the scope and content of the data in this publication, and designing the formats for presentation of the data, I have received valuable guidance from Shri P. Padmanabha, Registrar-General, India. The encouragement I have received from him at every stage of the work has contributed in a great measure to the successful publication of this District Census Handbook.

I hope the data in this volume would be found useful, and the publication well received by the administrators, academicians and other data users.

MADRAS,
July 1983

A. P. MUTHUSWAMI,
Director of Census Operations,
Tamil Nadu

ACKNOWLEDGEMENT.

It is my pleasant duty to acknowledge the able assistance given by the following officials of my office in the preparation of this volume.

amenities are available and according to the proportion of Scheduled Caste and Scheduled Tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The column on Scheduled Caste and Scheduled Tribe population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA up to Taluk/Town level. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and taluk level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri A. P. MUTHUSWAMI, I.A.S., the Director of Census Operations, Tamil Nadu on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar-General (Social Studies) of my office. Dr. H. K. Roy, Deputy Registrar-General (Map), provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

NEW DELHI,
the 26th April, 1982.

P. PADMANABHA,
Registrar-General, India.

PREFACE.

It has been the tradition of the Government of Tamil Nadu to publish immediately after each census, a District Census Handbook separately for each district containing the Census statistics besides other valuable data of local importance, for the use of the State Government, district administration, research scholars and other data users. The first series of District Census Handbooks were brought out immediately after the 1951 Census, and the present publication after the 1981 census is the fourth in the series.

The Census statistics presented in this publication were collected during the census operations in February—March, 1981, as at the sixth rise of the first March, 1981. The other statistics in this publication have been collected from various departments of the State and Central Governments.

This publication consists of the following two parts:—

Part A: Village and Town Directory and

Part B: Village and Town wise Primary Census Abstract.

Taking into account the increasing and varied developmental and other welfare measures undertaken by the Government, the scope and content of the data in this publication have been considerably enlarged and improved to meet the requirements of the planners and the other data users. In particular, certain inset tables based on census and other data have been included in this publication with brief analytical notes thereon.

This publication contains a brief history of the district highlighting the major characteristics of the district in relation to the economic resources like forestry, minerals, etc., besides the social, cultural, religious and historical aspects. The district and taluk maps in this publication give the administrative units up to village level, the rural and urban units, the location of towns and cities, communication facilities and other related details.

The facilities and amenities available in respect of education, medical, drinking water, post and telegraph, markets, communication, etc., in each village and town have been included in this publication, and an important feature is that wherever the above facilities and amenities are not available in any particular village/town, the nearest place where they are available has also been reported.

Another interesting feature in this publication is that villages with none of these amenities have been listed out separately for the pointed attention of the planners and administrators.

Certain tables present data exclusively in respect of the weaker sections of the society belonging to the Scheduled Caste and Scheduled Tribe.

The land use pattern in respect of rural and urban areas have also been reported in this publication which would meet the requirement of micro level planning for rural and urban areas.

ANALYTICAL NOTE.

CENSUS CONCEPTS.

Rural and Urban Areas.—Census figures are generally presented separately for rural and urban areas. In the 1981 census, the definition of an urban unit is more or less the same as in the 1961 and 1971 censuses but for some minor variations. The urban areas of 1981 census are:

(a) All places with a Municipality, Corporation or Cantonment Board or notified town areas:

(b) All other places which satisfied the following criteria:

- (i) a minimum population of 5,000.
- (ii) At least 75 per cent of the male working population engaged in non-agricultural (and allied) activity.
- (iii) A population of atleast 400 per km² (or one thousand per square mile).

The above definition of urban area varies slightly from that of 1961 and 1971 censuses in that the males working in activities such as fishing, logging, etc. were treated as engaged in agricultural activity and therefore contributed to the 75 per cent criterion in the 1961 and 1971 censuses, whereas in the 1981 census, these activities are treated as on par with cultivation and agricultural labour for the purposes on this criterion. The rest of the areas not treated as urban are classified as rural areas.

Urban Agglomeration.—Urban Agglomeration is a new concept formed during 1971 Census and this replaces the concept of town group adopted in 1961 census. An Urban Agglomeration may be explained as follows. "It must form a continuous urban spread constituting a town and its adjoining urban outgrowth or two or more physically contiguous towns together with continuous well recognised urban outgrowth, if any, of such towns".

Census House.—A Census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Household.—A household is a group of persons, who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented any of them from doing so.

Scheduled Castes/Scheduled Tribes.—For the enumeration of Scheduled Castes and Scheduled Tribes in Census, the names of Scheduled Castes and Scheduled Tribes as recognised in Tamil Nadu based on the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act of 1976 (Central Act 108 of 1976) were followed. The enumerators were instructed to record a person as a Scheduled Caste/Scheduled Tribe provided the name given by the person was found in the list supplied to them.

Literates.—In 1981 Census, a literate was defined as "a person who can both read and write with understanding in any language". A person who could merely read but cannot write, was not a literate. It was not necessary that a person considered a literate must have received any formal education or have passed any minimum educational standard.

Work.—Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

Main workers and marginal workers.—A worker was identified with reference to a reference period preceding the census. The reference period prescribed was one year preceding the date of enumeration. Certain types of work such as agriculture, household industries like, gur making, etc., were carried on, either throughout the year or only during certain seasons or part of the year, depending on local circumstances. In such cases, what we were concerned with, was the broad time span of the agricultural seasons preceding the enumeration. Workers can be full-time workers or seasonal workers or marginal workers. If a person has done any work during the reference period and if he had worked for the major part of the year i.e. if he had worked for 183 days or more, he was considered to be a full-time worker (main worker). If a person had done any work during the reference period and if he has not worked for the major part of the year, i.e. if he had worked for less than 183 days, he was considered to be a marginal worker.

The main activity of workers has been classified into four categories, viz. cultivators, agricultural labourer, household industry workers and other workers.

Cultivator.—For purposes of Census, a cultivator is a person who is engaged either as an employer, single worker or family worker in cultivation of land owned, or held from Government, private persons or institutions, for payment in money, kind or share; Cultivation includes supervision and direction of cultivation.

Agricultural labourer.—A person who works in another person's and for wages in money, kind or share should be regarded as an agricultural labourer. He or she has no risk in the cultivation but merely works in another person's land for wages and has no right of lease or contract on land on which he or she works.

Household industry.—For a person who returns his/her main activity as engaged in some production, processing, servicing or repair of articles or goods, it has been ascertained whether it is a household industry.

Household industry is defined as an industry conducted by the head of the household and/or by the members of the household at home or within the village in rural areas, and within the precincts of the house in urban areas. A larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would or has to be registered under the Indian Factories Act.

Non-workers.—All persons who have not been treated as workers, i.e., persons who have not worked any time at all during the reference period of one year preceding the date of enumeration, have been considered as non-workers. These cover all persons who are engaged in unpaid home duties and who do no other work or have not done any work at all during the last one year. Full-time students and children attending school, all dependent such as infants or children not attending school or a person permanently disabled from work because of illness or old age, persons retired from service or rentiers, beggars, vagrants, convicts in jails or inmates of a penal, mental or charitable institution and all non-workers who may not come under any of the above categories.

History of the District Census Handbook.—After the Census of 1951, the Government of India offered to hand over to the State Government the Census tables and other data prepared during the Census and suggested that they might be published along with any other useful information relating to each district. The State Government accepted the proposal, and the first publication of the District Census Handbook was brought out at the cost of the State Government.

The District Census Handbook of 1951 was found to be very useful and it was therefore decided not only to continue the series for the 1961 Census but also to improve definitely on its content so that each District Census Handbook contained certain basic economic data for the smallest administrative unit in the district and be a useful reference book for scholars and other data users.

After the 1971 Census as well the series of District Census Handbook was continued. The publication of the 1971 Census Handbooks was in three parts, viz. Part A, Part B, Part C. Part A relating to Village and Town Directory, Part B relating to Village and Townwise Primary Census Abstract and Part C comprising District Census Tables, and certain administrative statistical tables.

The tradition of bringing out the Census Handbook has been continued by the State Government during the 1981 Census also. In this series some individual features besides restructuring the formats of the village directory have been adopted bearing in mind the national requirements of data for the socio-economic programmes of the Government. The comparability of data with the 1971 Census data has also been kept in view.

The present Census Handbook will be published in two parts, viz., Part A—Village and Town Directory and Part B—Village and Townwise Primary Census Abstract.

Scope of Village Directory and Town Directory Statements.—The District Census Handbooks are the only publications which incorporate the data down to the level of a village and level of a town which are constantly referred to by the data users.

The Village Directory Statement gives the list of villages by taluk and for each village the area, number of households and population, availability of amenities and land use. The information on amenities available in the village includes educational, medical, drinking water, post and telegraph, market, rail/road or other communication facilities and power supply. Land use is shown as area under forests, irrigation, unirrigated land, cultivable waste and area not available for cultivation.

Appendix I gives for each taluk the number of villages having various levels and types of educational institutions, such as middle schools, adult literacy centres, etc., various types of medical institutions such as dispensaries, primary health centres, etc., and the number of such institutions, various types of drinking water sources such as taps, tubewells, etc., post and telegraph offices, power supply, railway stations, bus stops, etc., and also the number of villages not having such amenities.

Appendix II gives for each non-municipal town (census towns) the area under forest, irrigated and unirrigated land, culturable waste and area not available for cultivation.

Appendix III gives the list of villages where no educational, medical and public health facilities, etc., are available.

Appendix IV gives the list of villages with the proportion of Scheduled Caste and Scheduled Tribe population to the total population in various ranges of proportion. Part A of the Appendix gives the villages according to the proportion of Scheduled Caste population and Part B according to proportion of Scheduled Tribe population. Information is presented by the ranges 0-5 per cent, 6-10 per cent, 11-15 per cent, 16-20 per cent, 21-30 per cent and 31 per cent and above for Scheduled Castes and 0-5 per cent, 6-15 per cent, 16-25 per cent, 26-35 per cent, 36-50 per cent and 51 per cent and above for Scheduled Tribes.

The Town Directory gives important and useful information like civic and other amenities available in all the towns in the district, statutorily notified as well as non-municipal and census towns. The details relating to each of the towns have been presented in seven statements, viz., Statements I to VI and IV-A. In all the statements except IV-A, the towns are arranged in the alphabetical order for the district. The Town Directory does not cover strictly military areas. It may, however, cover cantonment areas but not strictly military areas or military establishments within the cantonment areas. However, basic statistics of the cantonment as a whole have been provided. In the Town Directory codes have been given for the data on amenities and civic administration for want of space. The relevant explanations for the codes adopted have been given in the beginning of the Town Directory statements.

An urban agglomeration includes two or more independent census towns. The names of the towns/urban agglomerations have been arranged in the alphabetical order.

The particulars of the individual town which constitutes one of the units of agglomeration have not been furnished separately because the particulars have been furnished, where they occur together under the name of agglomeration. The following remarks have been given against such town in brackets.

“(see the name of the main town of the agglomeration)”.

By adoption of this method the reader can get an idea of the particulars of the urban agglomeration in total and also, severally.

Statement-I—Status and Growth History.—This statement provides some basic data based on the Primary Census Abstract. For analysing the Town Directory data at State level and all India level some new columns have been introduced in 1981. The new items are class of town area, number of households, population and growth rate for each census since 1901. Density in 1981 and Sex Ratio in 1961, 1971 and 1981 censuses are also provided in this statement.

Mode of Presentation.—The consolidated figures for the district and each taluk are given in the beginning for Total, Rural and Urban areas followed by each town/Urban Agglomeration, under the caption 'District Primary Census Abstract'. Then follows the Primary Census Abstracts for Scheduled Castes/Scheduled Tribes. An alphabetical list of revenue villages is then given along with the Census Location Code Numbers of 1981 Census followed by the Village-wise Primary Census Abstract for each taluk. In the foot note given at the end of the Village-wise Primary Census Abstract, the villages included in Municipalities or Census towns are indicated. In an annexe, the names of villages and their constituent panchayats are given. Then follow the Urban Primary Census Abstract. In an appendix to the Urban Primary Census Abstract, the population and Scheduled Caste/Scheduled Tribe figures for each Enumerator Block of a town are given. This arrangement is followed for each taluk in the district.

Maps.—Apart from the District Map given as frontispiece, map for each taluk showing the Village Location Code Numbers along with their boundaries have also been included at the appropriate places. As compared with the maps presented in 1971 District Census Handbook, several improvements have been effected in the maps presented in this volume. All towns are shown in the District and taluk maps with shading screens and also spheres according to the population size of towns.

Area Figures.—In the District Primary Census Abstract the area figures are given in Square kilometres for Total, Rural and Urban areas. In the village-wise Primary Census Abstract, the area figures for each Location Code Unit are given in hectares upto two decimals. The area figures for each town in square kilometres is also given at the end of the Urban Primary Census Abstract. In the District Primary Census Abstract, the area figures of the District total represent the 'Geographical Area' figures supplied by the Surveyor-General. Figures for urban areas are those supplied by the Local Bodies and revenue authorities. The urban area of a district has been arrived by adding the urban area figures of each taluk within the district. Area figures for the rural areas of District/Taluk are derived by subtracting the urban area figures from the total area of the District/Taluk. The total of the area figures of the taluks will not tally with district figures because the taluk area figures represent the 'Land Use' area and are derived from the figures supplied by the Tamil Nadu directorate of Survey and Land Records, while those of the district represent "Geographical Area" supplied by the Surveyor-General of India. The total of the village area given in the Village-wise Primary Census Abstract may not tally with the rural area of the taluk given in the District Primary Census Abstract as the taluk area figures take into account hills, forests and rivers, etc. whereas the village area may not include the same. For conversion the ratio is 100 hectares=1 square kilometre.

It is hoped that the pattern of presentation of basic Census particulars for each district as explained above and adopted in this volume would be found convenient by data users.

General.—The area constituting the present North Arcot District is said to have formed part of the 'Tondaimandalam region', known in early South Indian history. The district has been carved out of the northern part of the Subah of Arcot, lying north of the Palar river, and hence derived the name 'North Arcot'. The region has witnessed many thrilling fights for supremacy between the local chieftains and rulers on the one hand and the French and English invaders on the other. Places of historical importance in this district like Arcot, Vellore, Arani, Wandiwash (Vandavasi), Wallajah, etc., have been several small and big battles, many of which were decisive ones. The monumental fort at Vellore with its surrounding moat provides an excellent specimen of the military architecture, then in vogue. The famous temple of Tiruvannamalai where one of the 'Panchalingams' representing 'fire' (one of the five elements) is worshipped, the silk weaving centres of Arani and Walajapet, the industrial centre around Ranipettai, the hill temple at Sholinghur, tourist places of repute like Sathanur and Yelagiri Hills are all located in this district. It is the second most populous of Tamil Nadu's 16 districts and has a population of 4.41 million as per the 1981 Census. In area, it is the third biggest district of the State and extends over 12,268 sq.kms

History.—From the earliest times for which evidence is available the district formed part of the Pallava kingdom during the close of the ninth century AD. Kanchipuram in Chengalpattu district was then the capital of the Pallavas. In the succeeding periods, the district came under the rule of Cholas, the Rashtrakutas, the Thanjavur ruler, Raja Raja and the Hindu rulers of Vijayanagar. The last ruling kings of the Vijayanagar dynasty were overthrown by the Muslim rulers of Deccan. The decisive battle of Talikotta in 1565 brought the region under the sway of the Sultans of Bijapur and Golkonda. The Mughal king Aurangzeb sent his general, Zulfiqar Khan to bring the extreme south under Mughal rule. The district then fell under the rule of the Mohamedan Nawabs of the Carnatic, whose headquarters was Arcot.

During the 18th century, several battles have taken place in the district. In the year 1749 Nawab Anwaruddin was defeated and killed at Ambur by his rival Chanda Sahib, assisted by the French. Soon thereafter in the war on the coromandal coast, the English (with Robert Clive

as chief) captured Arcot, the capital of the new Nawab, Chanda Sahib, on behalf of Md. Ali, son of Anwaruddin. The brilliant defence of Clive's forces in the subsequent war and the capture of the capital is considered as a memorable event in Anglo-Indian history. The war was later renewed and in 1757, Arcot fell to the French. The English General, Sir Eyre Coote, defeated the French General, Lally at Wandiwash or Vandavasi in 1760 and soon after took back every fortress earlier lost to the French. Haider Ali, the Mysore ruler invaded the Carnatic in 1767 and laid siege to Ambur; but later retired to Kaveripakkam. Again, in 1780, Hyder Ali invaded the region, pounding Vellore and neighbouring places and besieged Arcot. He later abandoned the attempt on learning of the advancement of British army under Sir Hector Munro. He however inflicted heavy losses to a detachment under colonel Baillie near Polur. Subsequently, he took Arcot and Ambur and besieged Vellore and Vandavasi in another invasion. At a fight with English, later in Sholinghur, Haider Ali sustained heavy losses. The war ended in 1783 and the district ceased from witnessing further battles for supremacy.

In 1781, the Nawab had assigned the revenues of the Carnatic to the East India Company and North Arcot then came under their management. In 1801, the region with the rest of the Carnatic was ceded in full sovereignty by the Nawab Azim-ud-daula. The local chieftains initially opposed the English rulers but the latter subdued all of them by 1805. There was peace in the district after this, but for the disturbance in 1806 due to the mutiny of the sepoys stationed at Vellore. This mutiny was however quelled successfully by the English rulers. The British rule which later lasted nearly 150 years ended in 1947 when India attained Independence. The British had introduced many socio-economic changes here in the 19th century and the first half of the 20th century when they reigned. The Vellore jail has become famous in view of its importance in the history of the freedom struggle since many great leaders were interned in this jail. The district has been making great strides in all spheres since then, thanks to the implementation of several planned schemes.

How the district was formed.—That part of the territory lying north of the Palar river and forming part of the Subah of Arcot was given over to the English East India Company in 1801 along with other areas of the Carnatic and this was known as North Arcot. The portion lying south of the river formed the southern division of Arcot. The district underwent a number of alterations in the last century. During 1901-11, North Arcot was bifurcated and the new Chittoor district was formed. In the subsequent changes, Tiruvannamalai and Tiruppattur taluks of the neighbouring district were included in North Arcot. After the Pataskar Award of 1959, when boundaries were altered between Andhra Pradesh and Tamil Nadu, 32 villages were added to North Arcot district (in Arakkonam, Walajapet and Gudiyattam taluks). There were three Revenue Divisions in the district and 11 taluks in 1951. A new Revenue Division was formed in 1959 and thus there were four Revenue Divisions in 1961. Two additional taluks were formed during 1961-71 viz., Vaniyambadi and Arcot. While Vaniyambadi was constituted from the three taluks of Tiruppattur, Gudiyattam and Vellore, Arcot was formed by bifurcating Walajapet taluk. There were 13 taluks during 1971 Census. The number of taluks continue to be 13 as per 1981 Census also, and there have been no jurisdictional change in the district during 1971-81. The Revenue Divisions and taluks along with area and population as per 1981 census are given below:

Revenue divisions.	Taluk.	Area in Sq. km.	Number of inhabited		Population 1981.
			Villages.	Towns.	
(1)	(2)	(3)	(4)	(5)	(6)
North Arcot District		12,268.0	1,873	34	4,414,324
1. Ranipettai ..	1. Vellore ..	938.5	121	7	503,893
	2. Arcot ..	515.6	100	1	195,898
	3. Walajapet ..	603.3	100	4	295,418
	4. Arakkonam ..	841.9	142	3	370,847
2. Cheyyar ..	5. Cheyyar ..	847.6	218	1	268,055
	6. Vandavasi ..	879.1	205	1	275,998
	7. Arani ..	420.3	52	1	215,573
3. Tiruvannamalai ..	8. Tiruvannamalai ..	970.2	215	1	383,377
	9. Polur ..	1,354.8	184	1	332,463
	10. Chengam ..	1,689.5	185	..	310,332
4. Tiruppattur ..	11. Tiruppattur ..	870.6	86	2	369,846
	12. Vaniyambadi ..	1,018.7	107	5	403,342
	13. Gudiyattam ..	1,048.8	158	7	489,262

For size class of town the following population norms as per 1981 census have been adopted :—

Population.	Class.
1,00,000 and above	I
50,000—99,999	II
20,000—49,999	III
10,000—19,999	IV
5,000—9,999	V
Below 5,000	VI

Location code number of towns.—To distinguish the town from the village, the location code numbers for towns have been given in Roman numerals and these numbers have been assigned in a continuous order for the district as a whole.

Statement II—Physical aspects and Location of Towns, 1979.—Under physical aspects, annual rainfall and temperature figures are furnished. These particulars were obtained from the Commissioner of Statistics, Madras. If the information is not available for any particular town the nearest town for which it is available is given. For Column (9) the nearest city with population of one lakh and more is furnished according to 1981 census. For the other columns figures obtained from the Municipal Commissioners and Panchayat Union Commissioners are given. The "Zero" within brackets in columns 10 and 11 denotes that the referent town itself is enjoying rail/road transport facilities.

Statement III—Municipal Finance, 1978-79.—The civil administration status of the town, the receipt through tax, properties and powers, government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services are given in this statement. The sources of receipt and expenditure are furnished in terms of rupees in hundreds.

Statement IV—Civic and other amenities, 1979.—The civic and other amenities existing in the towns as in 1979 are given. The data were obtained from the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Column 3—Civic administration status.—It is a new column introduced in this statement to facilitate analysis.

Column 4—Population.—It is also a new column introduced in this statement to measure the amenities in respect of population.

Column 5—Scheduled Caste and Scheduled Tribe population.—It is introduced to know the size of population of the weaker sections of the community in the town.

Electrification.—Electrification particulars were obtained from the Tamil Nadu Electricity Board through the Municipal Commissioners and Panchayat Union Commissioners.

(i) **Domestic connections.**—This refers to the number of services given to houses for domestic purposes like fans, lighting, etc.

(ii) **Industrial connections.**—This refers to the number of services effected to L. T. Industries such as workshops, flour mills, oil mills, grinding machines, cotton ginning, engineering and industries etc.

(iii) **Commercial connections.**—This refers to the services given to shops, business houses, public institutions like offices and schools and commercial establishments.

(iv) **Road lighting points.**—This refers to the number of points of street lights which will be maintained by the Board and for which consumption charges will be paid to the Board by respective local bodies. For some town panchayats the number of services effected alone has been furnished under street lights and not the points.

(v) **Other connections.**—This refers to the number of services effected for agricultural purposes, huts, public water supply systems, cottage industries, etc.

Statement IV-A:—Civic and other amenities in notified slums, 1979.—This is a new statement on civic and other amenities in notified or recognised slums of class I and II towns. Generally, in cities or towns having slums, the local authority such as Municipality or Municipal Corporation or even the development authority notified the recognised slums. Such notification is linked up with the availability of funds from the State Government for slum clearance.

Name of the slum and the details of the area, population, length of the paved roads, system of sewerage, number of different types of latrines and method of disposal of night soil, etc., are given in this statement.

Statement V—Medical, Educational, Recreational and Cultural Facilities, 1979.—In this statement medical, educational, recreational and cultural facilities of the towns as in 1979 are furnished. The data for educational and medical facilities were obtained from the Municipal Commissioners and Panchayat Union Commissioners for the concerned towns, and from the Director of Secondary Education and Director of Public Health respectively.

Col. 10—Recognised shorthand, type writing and other vocational training institutions.—The term 'recognised' refers to institutes recognised by some statutory authority like Education Department, Commerce Department, Labour Department, etc., of the Government or by semi Government or autonomous bodies, public sector projects, etc.

Cinemas refer only to the permanent cinema theatres and do not include touring cinemas.

Col. 16.—Number of working women's hostels with number of seats. This is a new column introduced in this statement in 1981. Considering the increasing employment of women in urban areas, the housing needs of working women has been an important problem.

Statement VI—Trade, Commerce, Industry and Banking, 1979.—In this statement, trade, commerce, industry and banking facilities in the town as in 1979 are furnished. Banking particulars were obtained from the Reserve Bank of India. The information on number of agricultural, and non-agricultural credit societies were collected from the Registrar of Co-operative Societies through the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Scope of Primary Census Abstracts.—The Primary Census Abstract, as it is called presents basic data for each village or segment of a village (in cases where such village segment from different panchayats) in the "Village-wise Primary Census Abstract" and for each ward/Division of a Town in the "Urban Primary Census Abstract". The format of the Primary Census Abstract for the villages and towns in 1981 has been slightly modified as compared to the 1971 Primary Census Abstract.

The Primary Census Abstract gives such basic information as area in hectares/square kilometres occupied residential houses, number of households, total population, Scheduled Caste and Scheduled Tribe population, literates, main workers, division of main workers into cultivators, agricultural labourers, workers in Household industry and other workers, marginal workers and non-workers in respect of each unit. The Urban/Village Primary Census Abstract gives this information for each village and each urban ward. With a view to ensure comparability and to enable data users to derive the figures either for a revenue village or panchayat according to their requirements, the data are presented for segments of villages also. Wherever portions of one village happen to be in two or more panchayats the segmentwise data have been used separately or added with some other segment data so as to derive panchayat data. For example, if portions of a revenue village bearing Location Code No. 10 forms part of two panchayats, the figures are given separately for each portion of the village against Location Code No. 10 a/b and 10 b/b. The total figures for the entire revenue village by adding the figures given against both the segments viz. 10 a/b and 10 b/b are given in the Village Primary Census Abstract. If, instead, the panchayat figures are required, the data for the concerned village segment or segments relating to the panchayats concerned, are to be added upto arrive at the total figures for the respective panchayat.

An appendix presented in the case of the Urban Primary Census Abstract gives 1981 population, scheduled caste and scheduled tribe population for each enumerator block of the town. This is meant for the use of administrative and election authorities in urban areas. Such data are also required by urban planners and researchers for conducting other studies in selected blocks.

Location and Physical features.—The district lies between 12° and 13° 15' of the northern latitude and 78° 20' and 79° 50' of the eastern longitude. It is bounded on the north by the Chittoor district of Andhra Pradesh and on the south by the South Arcot district. On the west are the districts of Dharmapuri and Chittoor (Andhra Pradesh) while Chengalpattu district is the eastern boundary. The district is in the inland region and is of an irregular shape.

The district has within its boundary sizable hilly and mountainous regions. The mountains of the Eastern Ghats and their spurs extend over the north-western region of the district and they add to the scenic beauty of the district. The slope is from west to east and the land in the eastern part is flat and level. The soil is fertile and mostly well utilised for cultivation. There are a number of tanks/lakes and the rocky hills enable the formation of such tanks and lakes through streams in view of their poor retentivity and free flow of rain waters. A number of big tanks, thus formed, exist in the district. The tanks at Kaveripakkam and Mamandur for example extend to about 20 square kilometres of area.

Next to Madurai (12,624 sq. kms.) and Ramanathapuram (12,590 sq. kms.) districts, North Arcot district extending over 12,268 sq. kilo metres is the third biggest district out of the 16 districts of the State. With a population of 4.4 million as per 1981 Census, this district is second only to Madurai (4.5 million) in population. There are 877,804 Scheduled Castes and 93,690 Scheduled Tribes in the district. There are 12 municipal towns and 22 other smaller towns in North Arcot as per 1981 Census. The biggest is Vellore (population 174,247) which is the district headquarters. The other big towns of the district are Tiruvannamalai (89,462) Gudiyattam (75,044) Ambur (66,042), Arakkonam (59,405), Vaniyambadi (59,107) and Tiruppattur (52,441). Twenty-three per cent of the district's population live in urban areas and the rest are spread out in the rural areas, i.e., villages. Two new towns have been recognised in 1981 census, for the first time in this district and these are Shembakkam and Allapuram. There are 1873 inhabited villages and the average village population in the district is 1,815 persons. Taluks which have over 200 inhabited villages are Cheyyar, Vandavasi and Tiruvannamalai. Four taluks viz., Arcot, Walajapet, Arani and Tiruppattur have each 100 or less than 100 inhabited villages.

Hills.—The Javadi represent the important mountain range in this district and they are the loftiest mountains. The Javadi cover the eastern parts of Tiruppattur and Vaniyambadi taluks the north-western portion of Chengam taluk, western part of Polur taluk, with spurs extending into Vellore taluk, upto about 10 kilometres from the city of Vellore. The general height of the Javadi hills is 2,500 feet with peaks raising up to 4,200 feet. The Elagiri hills lie in the north-eastern part of Tiruppattur taluk. There are a few small hills here and there in the southern part of Chengam taluk and these belong to the Kalrayan hill range of South Arcot district. Besides the above, there are many hills (of low elevation) which lie scattered in Vellore, Vaniyambadi, Polur, Gudiyattam, Chengam, Arcot and Walajapet taluks.

Rivers.—The district has the following important rivers : Palar, South Pennar, the Cheyyar and Pennai. Barring a few days in the rainy season, these rivers are mostly dry and are sandy wastes.

'Palar' is the most important river of the district. Raising near Nandidurg in Karnataka State, Palar enters the district in the western part through Vaniyambadi taluk. It flows then in an east-north-easterly direction in the taluk and is joined by some jungle streams like Malattar flowing in Gudiyattam taluk. The river forms the boundary between Vaniyambadi and Gudiyattam taluks for some distance, then strikes as eastern course and runs along the boundary between Gudiyattam and Vellore taluks. After cutting across Walajapet taluk, it runs along the boundary between Walajapet and Arcot taluks as also Arakkonam and Cheyyar taluks before entering Chengalpattu district on the east.

Cheyyar is the next important river of the district. It rises in Javadi Hills, flows in a southerly direction at first and turns south-east wards near Chengam. After flowing in that direction for some distance the river takes a north-easterly course and passes through Polur, Arani, Vandavasi and Cheyyar taluks. Within Cheyyar taluk, the river flows almost from west to east and enters Chengalpattu district it joins the Palar river, a few kilometres ahead of Chengalpattu town. Pennai river which is a tributary of Palar river rises in Chittoor district of Andhra Pradesh. It flows on the western part of Walajapet taluk and joins Palar near Ranipettai. The rivers, Goddar and Kavundinya Nadi which flow from north to south in Gudiyattam taluk are also tributaries of the Palar river. They join the Palar near Ambur and Gudiyattam respectively. Pennai or South Pennar which starts from Nandidurg in Karnataka enters North Arcot district after passing through Dharmapuri district. After flowing through the southern parts of Chengam taluk, this river enters South Arcot district. It is a perennial river. At Sathanur, about 20 km. west of Tiruvannamalai, a dam has been built across this river and this place is also well known as a picnic spot during seasons.

Soil.—While the central and southern parts of the district are mostly, hilly, the eastern portion is almost a stretch of unbroken plain. In the western sector, the land rises gradually towards the Mysore plateau along the Kangundi Zamindari of Chittoor district. The soils are mostly of the red ferruginous variety, both sandy and loamy, with black area accounting for about 16 per cent. The black soil is found mostly in the neighbourhood of the rivers of Palar, Pennai and Cheyyar and in the ayacuts of few big tanks. The black series clay occurs in Gudiyattam, Walajapet, Arcot, Arakkonam, Cheyyar and Vellore taluks. The black series loam is found mostly in Vandavasi, Cheyyar, Arakkonam, Walajapet and Gudiyattam taluks. The black series sand occurs in Arakkonam and Gudiyattam taluks in larger areas than in other taluks. Red series loam is found in all the taluks and mostly in Polur taluk. Red series sand is also found in all the taluks, but predominantly in Tiruvannamalai, Chengam, and Vandavasi taluks.

Flora and Fauna.—On flora, no distinguishing variety is observed in North Arcot district. The hilly areas belong to the 'dry, deciduous' type, generally observed in the projections of the Eastern Ghat ranges. In the low country, the ordinary plants of the coromandel region are found. Tamarind trees, teak wood, some sandal wood, Ven teak, casuarina, bamboo, etc. form the chief trees of the district. As regards fauna, although no special and distinguishing variety is available in the district the western region and in particular the mountainous tracts possess some wild animals. Bison is seen in small numbers on the Javadi ranges and tiger is seen occasionally. Leopards are found all through the rocky hills. Black bears, hyenas, sambur, spotted deer, jungle sheep, barking deer, antelope, varieties of snakes including the king cobras are spread over different regions of the district. Elephant were previously seen and captured near Chengam forests. Monkeys exist in several places in the district. The skeleton of gigantic elephant caught in the Chengam forest region is kept for the view of visitors in the Madras Museum. Elephants are however not seen in the forests of the district in recent times. About birds most of the common birds of the South Indian species are seen in the district. In the forests, peafowls and jungle fowls exist in sizable numbers.

Climate and Rainfall.—The climate of the district can be generally termed as "moderate". The taluks lying in the eastern region with little or no forest area and mountains experience a comparatively more equable climate than the remaining areas. The taluks falling in this group are Arakkonam, parts of Walajapet, Arcot, Cheyyar, Vandavasi and Polur. Vellore, Arni, Walajapet and Gudiyattam taluks which are interspread by hills and mountains are exposed to extreme climatic conditions—very hot during the summer months and very cold during the winter seasons. In Tiruvannamalai, Chengam, Tiruppattur and Vaniyambadi taluks, climate is rather cold during winter, but moderate in the other seasons.

The district receives rainfall due to South-West and North-East monsoon winds. The first rainy season occurs during June to September (the approaching monsoon period) and the second one occurs during the retreating monsoon period of October to December. The region gets heavy rainfall in the south-west monsoon period of June-September. Cyclonic storms also hit the region during the period of changing seasons like May and October; but, generally they do not cause much damage. They cause sometimes heavy rains. The seasonal winds are generally weak when they reach this district. During the summer season, i.e., from April to June it is generally very hot in most parts of the district and temperature rises to a maximum of about 40°C in Vellore and other places. Some parts like Tiruppattur (overlooking the western ghats) and also the Yelagiri hill region have, however, moderate temperature in summer. Due to rocky mountains and the sandy Palar, heat during summer seasons is quite intensive in many parts.

The district has anormal annual rainfall of 971.1 millimetres and this quantum is slightly more than the State average figure of 945.7 mm. This normal rainfall is based on the average rainfall in the rain-gauge stations of the district during the fifty years ending 1950. Six of the 16 districts in Tamil Nadu have higher annual average rainfall than that of North Arcot district. Tanks and wells are important sources of irrigation in North Arcot district and most of them depend on rains for their supply. Non-availability of adequate rainfall in some years is a great drawback of the district. Floods are very rare and occur occasionally. Rains are comparatively more in the eastern taluks of Arakkonam, Cheyyar and Vandavasi than in other taluks. Due to unreliability of rains, a number of electric pump sets have been installed in the last 20–25 years to fully use the ground water potential and this augment irrigation facilities in the district. During the years of poor rainfall or its failure altogether, drought conditions prevail in many parts of the district and this is mitigated to some extent by utilising the ground water resources.

Vellore, Cheyyar, Polur and Vandavasi are known for their substantial contribution to the agricultural production of the district. Tanks and wells are the chief sources of irrigation and there are enough supplies in them when monsoons occur normally. During years of monsoon failure, drought conditions prevail and productivity is also at a low level. Thanks to the extension of electricity to practically every village in the district, in the last two decades, there has been a spurt in the installation of electric pumpsets for irrigation and this has given a boost to agricultural production. The farmers too have been responsive in adopting modern agricultural techniques, in the use of fertilizers and pesticides, improved seed varieties, modern agricultural implements, etc., and this had made increased production possible.

According to the recent 1981 Census, the cultivators and agricultural labourers in the district number 11.6 lakhs, out of the total main workers of 17.1 lakhs. Thus, agricultural workers form a large majority, viz., 67.83 per cent of the main workers of the district. In 1971, this percentage was slightly higher at 69.49 per cent. The total area under different crops in the district during 1980-81 was 5.0 lakh hectares, out of the total districts' area of 12.3 lakh hectares. Of this, the area sown more than once accounted for 75,883 hectares. The area sown (including area sown more than once) forms 41.0 per cent of the geographical area of the district.

While paddy is the main food-grain produced in the district, groundnut is the important commercial crop. Paddy is cultivated now in 1.36 lakh hectares and groundnut in two lakhs hectares. Of the total area sown, 27.0 per cent is under paddy and 39.8 per cent under groundnut. Further improvement in agricultural production in North Arcot is dependent on the use of improved and high-yielding varieties of seeds, extension of irrigation facilities for larger areas of land as also deployment of improved mechanical devices, besides bringing in fallow and culturable waste areas into the agricultural fold.

Irrigation.—The district is heavily dependent on the seasonal rainfall for its agricultural operations. Tanks and wells besides river channels and spring channels are the chief sources of irrigation. The rivers Palar, Ponnai, Cheyyar and the Pennaiyar do meet a good part of the irrigational needs and 'Anicuts' have been built across them. Channels have been dug in the sandy belts of rivers to tap the subterranean water. Spring channels are also dug and these are mostly found in Gudiyattam taluk.

The rivers are not perennial and when they are in flood, waters are diverted into the channels through the anicuts. The three important anicuts are the Palar, Cheyyar and Ponnai anicuts. The Sathanur Reservoir project across the Pennaiyar is the only reservoir dam in the district and it was completed in 1958. The Palar anicut benefits the taluks of Walajapet, Arakkonam and Cheyyar. Lands in Cheyyar and Vandavasi taluks are benefited by the Cheyyar anicut. The anicut over Ponnai river benefits some lands in Arakkonam and Walajapet taluks. The Sathanur dam across Pennaiyar has been built during the First Five-Year Plan. The dam is 770 metres long and its height is 36.27 metres. The storage capacity of this reservoir is 4,600 m.cft. The taluks of Chengam and Tiruvannamalai are the beneficiaries of this dam. The dam irrigates about 8,500 hectares in parts of North Arcot and South Arcot districts.

Towards meeting the irrigation needs, the district has a reservoir, 748 Government canals, 238 tube-wells and 290,506 wells (for irrigation only) besides 80,947 wells used for domestic purposes, as per latest available data (1980-81). The number of tanks in the district is 3,189 and out of this 927 have ayacuts of 40 hectares or more (100 acres or more) while the remaining tanks have ayacuts of less than 40 hectares. Kaveripakkam lake, Mamandur lake and the Polur lake are the major lakes in the district, which irrigate large hectares of land.

The Kaveripakkam lake is quite a big one and is 6 km. in length. It benefits 33 near by villages, and in some places cultivation takes places 2 or 3 times a year. Dusi-Mamandur lake extends over 64 sq. km. The lake irrigates lands in 36 villages. Polur lake is on the foot of the Javadi hills and it gets water from the forest streams nearby.

Data on area irrigated in North Arcot district in 1980-81 by the different sources are given below :—

Source of irrigation.	Area irrigated in 1980-81 in hectares.	Percentage.
(1)	(2)	(3)
1 Canals	6,435	3.72
2 Tanks	31,762	18.36
3 Tube wells	428	0.25
4 Ordinary wells (irrigation only)	132,832	76.78
5 Other sources (spring channels, etc.)	1,536	0.89
Total area irrigated	172,993	100.00

It may be observed from the above that wells in the district form a very important source of irrigation covering over three-fourths of the total area under irrigation.

The number of wells supplementing recognised sources of irrigation is 102,622. Wells supplementing other sources of irrigation cover 13,668 hectares. The area of land irrigated more than once in the district was 68,092 hectares in 1980-81. Of the net area sown in 1980-81, the irrigated area formed 40.5 per cent. If the area sown more than once and irrigated is also considered, then, the percentage of gross area irrigated to total area sown works to 48.0 per cent. The number of wells having independent ayacuts in the district is 188,122.

The district has a very large number of electric pumpsets, used in private wells for irrigation purposes. Their number in 1980-81 was 1.26 lakhs. There were, in addition, 11,227 diesel pumpsets in the district. North Arcot district tops among the districts of India, in having the largest number of irrigation pumpsets and tube-wells energised as at the end of 31st March 1981. A very large extent of the area irrigated in the district under the various sources above relate to paddy cultivation. In view of the limited sources of irrigation in the district digging of new wells repairing and desilting of tanks, besides deepening of wells and utilisation of the ground water potential appear as the only avenues for further increasing irrigation facilities.

Crops.—Paddy is the chief food grain produced in the district. The three agricultural seasons are "Swarnavari" (May to September) "Samba" (August to February) and "Navarai" (December to May) and all of them are suited for paddy cultivation. Short duration varieties (i.e. three to four months crops) are grown during "Swarnavari" and "Navarai" seasons. In "Samba" long duration varieties are cultivated. Wet, dry and semi-dry cultivation is made in the district. Dry and Semi-dry type of cultivation is resorted to during times of poor water supply. Adoption of modern techniques of cultivation and the use of fertilizers, insecticides/pesticides, etc., has come to stay. Improved varieties of seeds are also widely used to augment grain production and increase profitability. With an area of 1.4 lakh hectares in 1980-81 under paddy, North Arcot ranks as the eighth district in the state, after Thanjavur, Chengalpattu, Ramanathapuram, South Arcot, Tirunelveli, Madurai and Tiruchchirappalli districts in area under paddy cultivation. Other cereals like Chola, Cumbu, Maize and Ragi are also grown in the district in small areas. Food-crops are raised in about 58 per cent of the total area sown in the district.

The following statement gives some of the important crops of the district and their production in 1980-81 :—

Crops.	Production in tonnes in 1980-81.
1. Rice	250,450
2. Chola	25,280
3. Cumbu	13,420
4. Ragi	30,650
5. Pulses	12,950
6. Sugarcane	2,522,960
7. Groundnut	130,100

The standard yield of food grain production per hectare though good in North Arcot District, has much scope for further increase. In the case of rice, the chief crop, it is 1,844 kg. per hectare (in 1980-81). The state average is 1,861 kg. per hectare.

The land holdings in North Arcot district are mostly very small. This is probably the result of sub-division and fragmentation of holdings that have taken place over the years. As per the Agricultural Census of 1976-77, the total number of agricultural holdings in North Arcot district was 5.35 lakhs and of this 2.05 lakhs holdings, i.e., 38.4 per cent are less than 50 acres (i.e. half a hectare). Holding of half-a-hectare and more but below one hectare are 1.30 lakhs (24.3 per cent) and the number under 1-2 hectares is 1.18 lakhs (22.1 per cent). Thus, nearly 85 per cent of the agricultural holdings are below two hectares in the district. The number of big holdings of ten hectares and above in North Arcot is 1,518. Out of about 8,500 tractors in use in the state (Year 1977), the number in use in North Arcot is only 865.

North Arcot is one of the top-ranking districts in the country in rice production. It ranks among the few important districts of the country, known for Paddy Cultivation. When the average annual production of five year ending 1979-80 was considered, annual rice production amounted to 6.74 lakhs tonnes in this district.

Among the commercial crops, groundnut is a popular crop in North Arcot. Its importance can be seen from the fact that it ranks seventh among the districts of India with a average annual production of 2.2 lakhs tonnes (average of five years ending 1979-80) after four districts in Gujarat and two in Andhra Pradesh. It stands first among the districts of Tamil Nadu in groundnut production. In 1980-81 the groundnut production in the district was only 130,100 tonnes. With an average annual production of 27.5 lakh tonnes of sugarcane, it ranks as 11th district in India and third in Tamil Nadu. Banana production is also important and with an average annual production of 57,900 tonnes, it ranks as the 13th district in India (and sixth in Tamil Nadu) to have such a high production of bananas.

The agriculturists in North Arcot are very receptive in adopting latest agricultural devices and exploring new avenues towards improving agricultural productivity. One can therefore hope for further increase in agricultural output in the years to come subject, however to improvement in irrigational facilities.

Electricity and Power.—No power-plant generating electricity is located in North Arcot district. The needs of the district are met by the Mettur Hydro-Electric power and the Madras thermal power stations. The distribution of power is made to the district through the electricity systems of Chengalpattu, Vellore and Thiruvannamalai. There is a very good network of power, transmission lines in the district and as on 31st March 1980 all the census towns, 1,865 villages, 2,219 hamlets and 1,722 Harijan colonies of the district have been extended power connection. Barring very few places which are either interior areas or inaccessible regions, where there is little or no demand for power, the district practically enjoys power connection in all areas. Nearly 99 per cent of the inhabited places have been covered by electrical connection. Tremendous progress in this regard has been achieved in the last 20-30 years, through plan schemes. The extension of power to every nook and corner of the district has opened up new vistas of development and has given philip to both industrial and agricultural production. Tamil Nadu has been a pioneer in the field of power extension to energise agricultural pumpsets, having nearly 24 per cent of the total number of electrically operated pumpsets throughout India. In Tamil Nadu, the total pumpsets energised as on 31st March 1980 is 881,712 and North Arcot district has the largest number of pumpsets, viz, 154,086. The total energy supply was 426,984 K.W. in North Arcot district (1979-80) as against a total of 2,197,798 K.W. for the state. During 1979-80, 6,247 pumpsets were energised in North Arcot District. Nearly 17.5 per cent of the total pumpsets in Tamil Nadu are located in North Arcot district. The per capita consumption of electricity has increased from 12 units in 1st April 1951 to 183 units in 31st March 1980 at the state level.

Details of consumption of electricity in North Arcot district during the year 1979-80 along with the percentages in each category are presented below :—

Category.	Consumption during 1979-80.	Percentage.
(1)	(2)	(3)
	(IN MILLION UNITS)	
1 Domestic	47.999	8.92
2 Commercial	19.615	3.65
3 Public lighting	5.514	1.03
4 Industrial	112.708	20.95
5 Water works	4.384	0.81
6 Agricultural	344.250	63.99
7 Railways	1.986	0.37
8 Others	1.510	0.28
Total	537.963	100.00

It may be seen from the above that the consumption of power is the highest in the case of agriculture (about 64 per cent) in North Arcot district and industries (with about 21 per cent) is the next important category.

Due to the inadequacy of other irrigation sources the district is increasingly dependent on well irrigation, and the use of electrical pumpsets, for this purpose. Use of large quantum of power for agricultural purposes will therefore continue to be an important feature in the power consumption pattern of this district. The use of electricity for industries is also increasing and with further industrialisation, the consumption under this category can also be expected to rise, substantially.

Animal Husbandry.—Though no recognised superior breed to cattle is found in the district a number of schemes for the improvement of the cattle and poultry wealth have been implemented during the plan periods, and as a consequence, the quality of livestock has vastly improved. The Institute of Preventive Medicine at Ranipettai investigates on the diseases afflicting cattle, goats and poultry and prepares serums to cure those diseases.

According to the latest available figure, there are six veterinary hospitals, one veterinary hospital-cum-clinical centre, 56 veterinary dispensaries and two veterinary dispensary-cum-Key village centres in the district. The veterinary institution attended to about 5.5 lakhs of animals during 1978-79. There is also a clinical laboratory, an Animal Disease Intelligence Unit and 183 veterinary sub-centres in this district. In 1960-61, there were only 11 veterinary dispensaries (including minor dispensaries) in the district. Artificial Insemination Centres are also functioning in some centres, like Vellore and Ranipettai. Some of the institutions which attend to the work of better breeding, also perform work like castration of bulls, prevention of contagious diseases and propaganda about livestock improvement. Mobile veterinary units are also functioning since 1958-59. District cattle shows are organised periodically and prizes given to owners of best breed. Poultry breeding was taken up during the second plan and demonstration centres have also been opened with a view to improve the quality of sheep. Good quality sheep were also distributed under the plan schemes. A centre for manufacturing medicines for the prevention of cattle diseases was opened in the district.

As per the latest available data of livestock census (1982), the following are the numbers of livestock and poultry in North Arcot district :—

1 Cattle	1,018,305
2 Buffaloes	217,113
3 Sheep	557,376
4 Goat	354,746
5 Pigs	49,301
6 Other animals (Horses, ponies, etc.)	4,133
7 Dogs	56,554
8 Total poultry (fowls, duck and others)	816,030

The total livestock in the district including white cattle, buffaloes, (inclusive of young stock) as also horses, ponies, mules, donkeys, pigs, camels and dogs is 2,257,528. Compared to the total state's livestock population of 25.8 million, the livestock in North Arcot district form 8.8 per cent. South Arcot, Salem, Tiruchchirappalli and Thanjavur are the districts in Tamil Nadu having higher livestock population than North Arcot.

The Rinderpest District Squad at Vellore and the vigilance units at Tiruppattur and Arakonam and the check-posts at Sholinghur and Tiruvallam are all engaged in the eradication of 'rinderpest' disease among cattle. In connection with 'Artificial Insemination' programmes three Bull Stations supply semen to the veterinary institutions.

There is a Poultry Extension Centre at S.V. Nagaram. Some of the schemes that are being implemented are the Sheep Production Programme, Poultry Production Programme, Calf Rearing Scheme and Piggery Production Programmes, all under the Special Animal Husbandry Schemes. There are 94 Sheep Breeding Co-operative Societies, 2 Societies under integrated rural development programme and 3 societies under Agricultural Refinance Development Corporation.

The Institute of Veterinary and Preventive Medicine, Ranipettai, manufactures 31 kinds of vaccines, diluents and solutions and meets the demands of the State. The Offices of the Animal Husbandry in the district are located at Ranipettai, Tiruppattur, Arani and Tiruvannamalai.

Fisheries.—The importance of 'Fisheries' in the district is restricted to inland waters. Rearing/Catching of fish is done in big tanks and ponds. Fisheries Improvement Schemes implemented during the development plans included fish rearing, distribution of fingerlings, development of reservoir fisheries, improvements in the marketing of fish and fish products, establishment

The normal monthly average rainfall in the district and the rainfall as recorded during 1980-81 the latest year for which data are available, are given below :—

AVERAGE RAINFALL AND RAINFALL DURING 1980-81 IN NORTH ARCOT DISTRICT

Month	Normal Rainfall in millimetres.	Actual Rainfall in millimetres, 1980-81.
(1)	(2)	(3)
June 1980	59.1	10.9
July	87.6	76.2
August	132.9	126.4
September	160.5	41.5
October	166.2	66.2
November	158.4	128.7
December	60.9	44.7
January 1981	30.0	3.8
February	8.9	0.0
March	11.5	20.4
April	24.3	12.8
May	70.8	76.8
Whole year ..	971.1	608.4

For temperature, the two stations for which data are recorded in the district are Vellore and Tiruppattur. In Vellore, the normal mean maximum temperature is 38.4°C (in May) while the mean and minimum is 18.2°C (in January) Tiruppattur is somewhat cooler and its mean maximum and minimum temperature are somewhat lower. This is due to its location near the mountain ranges.

Forests.—With 318,887 hectares under 'forests', North Arcot is one of the few districts of Tamil Nadu with a sizable forest area. Nearly 26 per cent of the geographical area of this district is covered by forests. The four districts of the State which have a higher percentage of area under 'forests' than North Arcot are Nilgiri (56.0 per cent), Dharmapuri (33.9 per cent), Kanniyakumari (32.7 per cent) and Periar (28.3 per cent). The proportion of forest area at the State level is only 15.6 per cent, which is quite low when compared to the ratio of 33-1/3 per cent recommended by experts for maintaining ecological balance. Large areas under forests exist in the taluks of Chengam, Vellore, Polur, Tiruppattur, Vaniyambadi and Gudiyattam. The Arani. The other taluks have small extent of forests.

The forests in Gudiyattam taluk are of fuel and scrub type. The reserved forests in the other taluks consist of hill forests, plain forests, scrub growth and Palar river plantations. The hill forests contain sandalwood and bamboo. The estate forests taken over in Arani and Tiruppattur taluks contain scrub jungle. Forest improvement schemes have been undertaken during the five year plans and as a consequence of the efforts in this regard, the area under forests has also been gradually increasing in this district. During the plans, the acreage under fuel and fodder species in forests has improved. Soil conservation schemes, development of matchwood plantations and schemes for improvement of timber plantation such as teak, rosewood, bamboo, etc. were implemented under the plans. The forest regions of Vellore and Tiruppattur fall under the Vellore circle and the area of reserve forests and reserve lands here (as in 1980-81) are 305,624 hectares and 9,938 hectares respectively. The chief forest produce here are sandalwood, other fuelwood and bamboo.

Of the total area of about 2,022,874 hectares of forests in Tamil Nadu, about 16 per cent are in North Arcot District. However, there has been no substantial increase in the forest area in the last few decades. Though schemes for reclamation, afforestation and development of reserve lands, planting of timber trees and development of grazing lands have been implemented, yet, there is much scope for further development in this sphere. Forest produce could also be further increased through forest improvement schemes.

Land use.—According to latest available data, the total geographical area of the district is 12.3 lakhs hectares or about 12,300 Sq. km. of this area, the extent that is used for Agricultural purposes (i.e., net area sown) is 4.27 lakh hectares. The net area sown forms 34.8 per cent of the total geographical area of North Arcot. The second important use is 'forests' which occupy 3.19 lakh hectares, i.e. 25.9 per cent. Land put to non-agricultural uses amounts to 1.45 lakh hectares (11.8 per cent of the total area of the district). The non-agricultural use represents lands occupied by buildings, roads and railways or under water, e.g. rivers and canals and lands put to uses other than agriculture. About 1.0 per cent of the area is under 'miscellaneous tree crops and groves not included in the net area sown.' These are also essentially agricultural uses, though different from the net area sown which relate to sowing of crops alone. The rest of the district's area of about 26.5 per cent represents barren and uncultivable land including mountains, cultivable waste, pastures, grazing lands and fallow lands. The land-use under the different categories, as reported during 1980-81, is detailed in the following statement :—

Land use.	Land area in hectares under each category in North Arcot.	Percentage of area of each category to total area.	
		North Arcot district.	Tamil Nadu.
(1)	(2)	(3)	(4)
1 Total geographical area	1,230,223	100.0	100.0
2 Forests	318,887	25.9	15.6
3 Barren and uncultivable land	65,079	5.3	4.5
4 Land put to non-agricultural uses	145,168	11.8	13.5
5 Cultivable waste	26,194	2.1	2.6
6 Permanent pastures and other grazing lands	10,305	0.8	1.2
7 Land under miscellaneous tree crops and groves not included in the net area sown.	12,678	1.0	1.6
8 Current fallows	187,542	15.2	16.3
9 Other fallow lands	37,603	3.1	3.5
10 Net area sown	426,767	34.8	41.2

It may be observed from the above that the extent of net area sown is only 34.8 per cent in the district as against the state average of 41.2 per cent. Barring forests and barren land (rock mountains, etc.), which occupy a higher proportion of the total geographical area in North Arcot district in the other seven land-use categories, the percentages at State level are higher than those in North Arcot district. It is significant that the extent of fallow lands, cultivable waste lands, etc. are lower in the district than at State level. Nearly 76,000 hectares of land were cultivated more than once during the year 1980-81, in North Arcot district, representing 6.2 per cent of the total districts' area. Similar percentage for the State as a whole is 8.5 per cent. The total cropped area including the area sown more than once is 502,650 hectares or 41.0 per cent of the total area. This is also slightly lower to similar ratio as State level, which is 49.7 per cent.

Minerals.—No mineral of importance is mined in the district. Quartz is said to be available in small quantities in the region bordering South Arcot district. A mineral, 'pyrrhotite' is said to be available near Polur. 'Vermiculite' is mined in the district and its production in 1978 was 981 tonnes. The other minor minerals in the district and their production during 1978 are given below :—

	TONNES.
Granite (Building stone)	32,964
Gravel	40,909
Limestone	49
Limeshell	71
Murram	730
Road metal (Quartzite, other granite metal, etc.)	25,442

It may be seen that most of the items mined in the district belong to 'minor' varieties.

Agriculture.—Although North Arcot district cannot be equated with some of the agriculturally prominent districts like Thanjavur, Tiruchirappalli and South Arcot, it is yet important in the field of agriculture. Cultivation is the mainstay of the people of the district and the rural economy centres round agriculture. The district is dependent on seasonal rains for successful agricultural operations. Some of the taluks, in particular which enjoy irrigation facilities like Tiruvannamalai,

of fishermen's co-operative societies and the grant of loans to the fishermen through these societies. With the construction of the reservoir over Sathanur in 1958, a new fish seed collection centre was established. A good stock of fish seeds are stocked here. During the first two plans, the intensive seed collection and distribution scheme was implemented under which quick-growing and economical varieties of fish-seeds were collected. Vellore, Arani, Tiruvannamalai, Ranipettai are all important marketing centres.

With a view to augment the supply of fishes and increase their numbers, fish seeds are collected from river beds and lakes and preserved in village fish ponds/tanks. Under the rural fishery development scheme, fishes are reared in model centres and sold to public at cheap rates. Under another scheme, fishes are reared in the waters in the most encircling Vellore and rights of fish catching are given to certain fishermen. There are 24 co-operative societies for fishermen in the district. These societies give loans in purchasing nylon nets, etc., necessary for fishing.

Industries.—North Arcot is not considered very important from the industrial point of view and it is well known only for agriculture, weaving and leather tanning. A large majority of the workers in the district are engaged in these occupations only. But, during the last two decades it has made some progress in regard to industries also. Under the factory sector, the district now has over 600 factories (registered under the provisions of the Factories Act, 1948) and ranks sixth among the districts of the State, following Coimbatore, Salem, Madras, Chengalpattu and Tirunelveli. Nearly 30,000 workers and other employees are engaged in these factories as per the results of the Annual Survey of Industries of 1977-78.

A number of small industrial units have come up in the district in the last decade. As on 31st December 1980, the total number of registered small-scale industries in North Arcot district is 1,841. There are about 34,000 small industrial units in the State that are registered with the State Directorate of Industries and Commerce.

The industries under the factory sector include, those units using power and employing 10 or more workers and units not using power but employing 20 or more workers and other units included within the scope of the Factories Act, 1948. Such units number 603 in North Arcot out of the total of 8,473 units in the State, according to the Annual Survey of Industries of 1977-78. In 1958, there were 282 such units in the district. The number of registered factories in the district increased to over 500 in 1970 as per data collected on Establishments in the 1971 Census.

The district has textile mills, sugar mills, fertilizer and insecticide factories, etc. It is noted for its bidi manufacture and silk weaving. A continuous steel casting plant in the public sector has come up in Arakkonam. The State Government has promoted an industrial complex in Ranipettai and a variety of products are manufactured in the units established in this industrial centre. Manufacture of bidi is done both in the factory sector as also as household industry and many people, particularly Muslims are engaged in this work in and around Ambur, Arcot, Gudiyattam and Vellore towns besides some other centres.

The number of factories in the district and the persons employed in them, according to the Annual Survey of Industries, 1977-78, are given category-wise:—

Nature of Industry.	(1)	Number of factories.	Number of employees.
1. Grain Mill Products	(2)	(3)	
2. Manufacture and refining of sugar	30	338	
3. Manufacture of other edible oils and fats	3	2,710	
4. Manufacture of bidi	10	264	
5. Cotton spinning, weaving, etc. and finishing of cotton textiles in mills	185	4,218	
6. Wool cleaning, baling and processing	6	1,561	
7. Spinning, weaving and finishing of silk textiles	5	28	
8. Printing and publishing of periodicals, books, etc.	32	557	
9. Printing not elsewhere classified (envelope printing, picture post-card printing, composing, etc.)	3	221	
10. Tanning, curing, finishing, embossing and japanning of leather	12	146	
11. Tyre and tube industries	206	9,073	
12. Manufacture of basic industrial organic and inorganic chemicals and gases	3	50	
13. Manufacture of Fertilizers and pesticides	6	684	
14. Manufacture of matches	3	1,170	
	18	854	

Nature of Industry.	Number of factories.	Number of employees.
(1)	(2)	(3)
15. Iron and steel industries	5	868
16. Foundries for casting and forging iron and steel	5	733
17. Industrial machinery (other than food and textile industries)	3	81
18. Manufacture, alteration and repair of non-electrical machinery, etc.	4	233
19. Repair of motor vehicles and motor cycles	12	361
20. Repair of enterprises not elsewhere classified	3	38
21. Others	49	4,827
District Total	603	28,995

It may be observed that the largest number of factories in the district belong to the category 'leather tanning and curing'. Nearly a third of the factories belong to this group. Leather tanning is done on a big scale from olden times and it has developed around the centres of Ranipettai, Vaniyambadi, Ambur, Peranambattu, Melvisharam, Gudiyattam, etc. There are 203 factories engaged in this manufacture and nearly 10,000 families thrive on this. Footwear like shoes, chappels and leather bags and fancy goods are manufactured in large quantities in this district. The Government is running a footwear unit and 'tanning service-cum-training' centre in Ambur. Of the total industrial output of Rs. 186.60 crores in this district in 1977-78, about Rs. 112 crores or nearly 60 per cent is contributed by leather manufactures and this shows the dominance of leather industries in the district. Nearly one-third of the total labour engaged in factories in the district are also engaged in the leather factories.

'Beedi' is produced on a large scale in this district and this is the second important industry from the point of view of engagement of workers. In the factory sector, there are 185 units which produce bidi and these engage 4,218 employees.

There are three sugar mills one each at Vellore, Tiruppattur and Ambur of which the first two have a capacity to crush 1,250 tonnes a day and the one at Ambur has a capacity of 2,250 tonnes a day. The sugar factories employ nearly 3,000 persons. There are 10 units producing edible oils and facts. This includes groundnut oil, gingelly oil etc. There are six cotton spinning and weaving mills. Production of woollen druggets and carpets is done in and around Walajapet town and the Central Jail at Vellore. A wool processing unit is also functioning at Vinnamangalam.

Silk weaving is also popular and there are 32 factories engaging over 500 persons in this category. Arani and Walajapet are the important silk weaving centres in the district. Silk weaving is done as a household industry also. Weaving castes like Vanniars, Naidus, Yadhavas, Gounders, etc., are said to be mostly engaged in these jobs. Manufacture of fertilizers, insecticides, matches and other chemicals is also done in the district. Messrs. Parry and Company established their factory in Ranipettai as early as 1897. They as well as the East India Distilleries and Sugar Factories Limited, produce insecticides, pesticides and a number of other chemical products. Two small units at Katpadi and Polur are producing acids. From the data on output of factories in 1977-78, we find that manufacture of chemical and chemical products amounted to Rs. 17.55 crores and this accounts for 9.41 percent of industrial output in the district, second only to leather products. Ceramic products, like acid jars and sanitary wares besides jars for domestic uses are manufactured by the unit of Parry and Company. The factory of Messrs Indian Hume pipe Limited at Arakkonam manufactures Cement concrete pipes of varying sizes, useful for domestic and industrial purposes. There is a big railway workshop at Arakkonam engaging over 3,000 persons. The railway yard at Jolarpettai is used for small repairs of engines, etc. The General purpose workshop in the Central Jail, Vellore assembles bicycles, and besides cycle parts, medical instruments, etc., are also produced here.

Small industries have sprung up all over the district in the last 20-25 years and the following table will give an idea about the same.

Nature of industry/manufacture.	Number of registered Small Scale Industrial units in North Arcot District as on 31st December 1980.
(1)	(2)
1. Food products	197
2. Beverages, tobacco and tobacco products	46
3. Cotton textiles	22

Nature of Industry/Manufacture.

*Number of registered
Small Scale Industrial
units in North Arcot
District as on
31st December 1980.*

(1)	(2)
4. Wool, Silk and Synthetic fibre textiles	16
5. Textile products (including weaving apparel other than footwear) ..	42
6. Wood and Wood products, furniture and fixtures	84

15. Electrical machinery apparatus, supplies and parts	15
16. Transport equipment and parts	33
17. Other manufacturing industries	12
Total	1,841

A number of model industrial units, industrial training centres and blacksmithy and carpentry units have been started in the district by the State Government as part of plan schemes. An industrial colony was started in Katpadi. An industrial estate has come in Ranippettai and recently the Government has also set up District Industries Centre to resuscitate small industries as also rural arts and crafts.

Cottage and Village industries have grown up in recent times. According to the 1981 Census data, 103,446 persons, constituting 6.04 per cent of the total main workers of 1,712,621 in the district, are engaged in the manufacturing processing, servicing and repairing of goods on a household industry basis. The percentage of such workers is more in certain taluks, viz., Arani (11.17 per cent), Gudiyattam (10.88 per cent), Vellore (8.47 per cent), Tiruppattur (7.29 per cent), and Walajapet (7.16 per cent). The district ranks third in the state in having the largest number of household industry workers and falls within the first 10 districts in India in this regard.

Handlooms are important in Arani, Gudiyattam and certain other areas. There are over 35,000 looms in the district and nearly half of them are in the co-operative field. There are 93 weavers co-operative societies in the district.

Cottage and Village industries have also been encouraged with a view to increase the employment potential in the district. Handicrafts like manufacture of glazed pottery, cane and bamboo articles and bell metal products, etc., are well known in the district. The glazed pottery items manufactured at Karigiri in Gudiyattam taluk are famous and they include attractive jars, pots, flower-vases, etc., Art metal is a well known industry in Arcot, while stone carving is done in Polur taluk by some traditional workers. Horn and bone works are carried on in some places in Cheyyar taluk. A number of Muslim families in Walajapet taluk are engaged in making cane and bamboo articles. Under the plan schemes, village industries programme and Khadi improvement schemes, rural industries in the field of soap making, bee keeping, hand made paper, palm-leaf making, handloom, cotton and silk, etc., have been developed with the objective of supplementing the income of the rural inhabitants.

The district has practically no important mineral and hence resources for big industrial thrust in the near future appear limited. It is, however, said that the district has vast scope for further industrial development in the field of leather goods, chemicals, electrical and electronic goods, forest products, etc.

Trade.—Vellore and Tiruppattur are important centres of trade in the district. Vellore being the district headquarter town is an important city and it lies midway in the Madras—Bangalore National Highway and is well served by road and rail network. The various taluk headquarters and other towns are also well connected by good roads. The towns, Tiruppattur, Thiruvannamalai, Arani, Ambur, Vaniyambadi, Gudiyattam, Arcot and Ranippettai are all prominent trade centres where many wholesale dealers and retailers dealing in cloth, grains, and other articles are found.

Paddy, groundnut and tanned leather are the chief goods of trade. Apart from agricultural products and other primary goods like foodgrain, leather, mangoes, vegetables, sandalwood, etc., manufactured goods like groundnut oil, sugarcane, jaggery, silk sarees and textile goods, beedi, woolen draggots, earthen jars, ceramic goods including sanitary ware, leather articles, fertilizers and chemicals, bamboo and cane articles, koral mats, etc., are marketed within as well as outside the district. Some of the raw materials for industries like the silk yarn, leaves for beedi rolling, etc. are imported into the district. Being an inland district, for exports to foreign countries, the district depends on Madras. In the 1960s, there was very little banking business in the district and branches of Scheduled Banks were available only in important towns like Vellore, Tiruppattur, Tiruvannamalai, Vaniyambadi, Arani, Ambur, etc., There were 12 branches of the State Bank of India in 1961 in the district. As at the end of 1978, the district had 165 branches of Scheduled Commercial banks, 25 of which are in big urban centres, 67 in semi-urban areas and 73 in rural centres. There has been an enormous increase in commercial activity in recent years and the banking sector has also widened its network of branches in the district. According to a recent computation, the number of bank offices per lakh of population as in March 1981 is 4.8 in North Arcot district as against 5.1 at all India level and 6.2 in Tamil Nadu.

Workers in Trade and Commerce in North Arcot district formed 6.10 per cent of all workers as per 1971 Census figures. There were 81,321 workers in 1971 under this category in the district. The percentage was comparatively more in the taluks of Vellore (12.28 per cent), Vaniyambadi (9.40 per cent), Arani (7.23 per cent), Arcot (6.98 per cent) and Tiruppattur (6.78 per cent) than in other taluks. The 1981 figures (which will be available later). It is believed will reveal further increase in the tempo of commercial activity in this district.

Transport and Communications.—The district is well connected by rail and road network. The first train in South India was laid between Madras and Walaja Road in the last century. Both broad and metro-gauge rail tracks exist in North Arcot. The broad gauge line extending over a route-length of 211 km. connects the district with Madras on the east and also the west coast region. The rail line runs across the northern part of the district with lines branching off from Arakkonam junction to Bombay and from Jolarpettai to Bangalore. A metre gauge branch line connects Arakkonam with Chengalpattu via Kanchipuram. Another metre gauge railway line from Villupuram in South Arcot district passes through Tiruvannamalai, Polur, Vellore and Gudiyattam taluks into the Chittoor district of Andhra Pradesh cutting the main broad gauge line at Katpadi Junction. The metro-gauge line runs for length of 139 km. in the district. Cheyyar, Vandavasi, Chengam and Arcot taluks do not have any railway line. The electrification of the broad gauge rail line from Madras to Arakkonam has been done and plans are afoot to electricity and the track between Arakkonam and Katpadi and later from Katpadi and Jolarpettai. The entire broad gauge track has double lines and this enables free and faster movement of passenger and goods trains alike.

The district enjoys good road connections to all important places, within the district as also in the neighbouring districts. The Madras—Bangalore road (National Highway) passing through the district is the most important of all the roads and it bears very heavy traffic. The other important road is the trunk road between Chittoor and Cuddalore which passes through Vellore, Polur and Tiruvannamalai. All the taluk headquarters and other important centres are connected by roads and regular road transport services are available.

According to latest available data (1977-78), the national highways run to a length of 169 km. in North Arcot district. The 'State' roads in the district total 2,900 km. the length of roads maintained by the Panchayats and Panchayat Unions is 5,294 km. and that by Municipalities, 436 km. Taking into account the roads maintained by agencies other than the above also, (404 km.) the total length of various roads in the district is 9,212 km. Considering the other districts of Tamil Nadu, North Arcot district has the second highest figure in regard to road length, the first being the undivided Coimbatore district. (present Coimbatore and Periyar districts).

Bus services have been expanded in the district and the various routes are operated both by the State owned transport corporation, as also private operators. Transport services are now available for many of the bigger villages too. There are 58 city/town services and 417 other mofussil routes in the district (as on 31st March 1978). According to a more recent list, there are 524 routes in the district and 133 of these are under 'nationalised' transport services.

The registered transport motor vehicles in the district (1978-79) is 3,674. Of this, 1,716 are goods vehicles, 645 are stage carriages and 478 are tractors. The number of registered non-transport motor vehicles is 7,691 and bulk of this viz., 5,698 are motor-cycles/scooters. As the national highway in the district connects Madras and Bangalore and other towns in the western part of South India for which it is the main road link, traffic is quite heavy in this sector. Compared to other districts, the number of private cars in the district is not high and fewer people own cars.

The district is well served by posts and telegraph offices. There are 7 head post offices, 335 sub post offices and 756 extra departmental branch offices. There are also 263 combined telegraph offices in the district. Telephone connections exist in taluk headquarters and most of the other towns.

Major Social, Cultural and other Events during 1970-80:

The conduct of elections to the State Assembly and the Lok Sabha in the years 1971, 1977 and 1980 and the local municipal/Panchayat elections in 1970 were important events of the decade. There are 21 Assembly constituencies (including four reserve constituencies) and four Lok Sabha constituencies in the district. The lifting of the prohibition in 1971 and its reimposition in 1974 which is applicable to the entire States was also an important event. Parts of the district are frequently prone to drought and it is rather intense when there is scanty or no rainfall in two continuous seasons. The drought of 1974-75 was felt in several parts of the district and it brought in its wake acute shortage of potable water. The drought witnessed in the latter half of 1980 was marked by widespread failure of paddy and cash crops like groundnut and sugarcane beside scarcity of drinking water. A severe cyclonic storm hit some region of the district in July 1975 and in all these natural calamities, relief measures were organised by the Government so as to mitigate the hardship to the people of the affected area. Occasionally, floods also do occur. The floods in Ponnaiyar in December 1972, affected Chengam taluk and the floods in Palar in September 1978 affected Vaniyambadi taluk.

From the administrative angle, the bifurcation of Walajapet taluk into Walajapet and Arcot taluks and the formation of Vaniyambadi taluk out of Gudiyattam and Tiruppattur taluks in 1970 can be considered important events. The opening of the modern rice mill at Puliyambakkam village in Cheyyar taluk (1970) and that of the Tiruppattur Co-operative Sugar mill at Kethandapatti in Vaniyambadi taluk (in 1977) are also important local events. From the religious point of view, the Kumbabishegam of the most famous temple in the district, viz., Arunachaleswarar temple of Tiruvannamalai, in April 1976 was a notable event.

Entertainment.—The district has a total of 143 theatres as at the end of 1981. Out of this 72 are permanent ones and 13 are semi-permanent. The rest, viz., 58 are touring cinemas. While open air auditoria exist in Vellore and other big centres, there are a number of libraries even in small panchayats, run by the local panchayats. There is a big district central library at Vellore. Community halls are available in some of the panchayats for social gatherings.

Places of Historical Religious, Archaeological importance.—Some of the important places in the district which have become famous due to their religious, historical and archaeological importance are detailed below.

1. *Vellore.*—It is historically famous and is the headquarters of the district as well as Vellore Taluk. The Vellore fort, believed to have been built in the 13th century has withstood many wars and is appreciated for its military architecture. The Christian Medical College here was started in 1918 and the attached Medical College Hospital has become famous for its specialised medical services. It is the only city with over a lakh of population in North Arcot (174,247) as per 1981 Census. The Central Jail, which is the largest of its kinds, Jatakanteswarar temple (inside the Vellore fort), etc. are the other places of importance in the city.

2. *Tiruvannamalai.*—It is the second populous town of North Arcot district, and has a population of 89,462 as per 1981 Census. It is a well-known religious centre and the famous Arunachaleswarar temple, a holy place of pilgrimage for the devout Hindus, is here. The deity worshipped here is one of the 'Panchalingams' representing the 'fire' element among the five elements. The Holy Beacon lit during "Karthigai" day in November-December every year, over the hill here, is said to be the symbolic representation of this phenomenon. It is the taluk and Divisional headquarters and lies about 80 km. south of Vellore city. A great saint 'Ramana Maharishi' established his 'Ashram' here.

3. *Arcot.*—It is on the banks of Palar river and several battles have been fought in and near this town during the 18th and 19th centuries. The place has changed hands and was in the possession of the British, French and Haider Ali in turns. It has turned into a good trade and commercial centre and is the headquarters of Arcot taluk. There are a few tombs and other historical monuments here which are centres of attraction.

4. *Arakkonam.*—It is an important railway junction on the railway line running from Madras towards the west and is 68 km. away from Madras. There is a big railway workshop in which a few thousands of workers are employed. There is also a loco shed nearby. Handloom and beedi are important household industries in this town.

5. *Ambur.*—It is an important town in Vaniyambadi taluk noted for its leather tanneries. The place was a chief military centre during the Carnatic wars. Being an important Muslim centre, there is an Arabic school which offers courses in Arabic and Persian. Fruits and food grains are the chief items of trade here.

6. *Chetpet.*—This is also a historic place and a centre of operation during the Carnatic wars. It is a pilgrim centre for the Roman Catholics. A festival for the Lady of Lourdes is conducted here in March and a large number of pilgrims from all parts of the State attend the festival.

7. *Gudiyattam.*—It is the headquarters of Gudiyattam taluk and a centre of trade and industry. Handloom weaving is an important occupation here and there are over 10,000 looms here besides cotton mills. Next to Arani, this is an important centre for handlooms in the district. According to 1981 census, 9,607 workers are engaged in household industry in this town and quite a large number of them should be in handlooms. A Sugarcane Research institute is also located here.

8. *Karigiri.*—It is a small village, 10-12 km. off Vellore, known for its production of glazed pottery. A variety of articles are produced here and these find ready market. Goods produced here are marketed in industrial museums and the Victoria Technical Institute, Madras. A leprosy centre exists near Karigiri.

9. *Ranipettai.*—This is an important industrial town, 114 km. west of Madras and the headquarters of the Revenue Division. M/s. Parry & Co., was the first to start industrial units for the manufacture of Chemicals and ceramic wares. It has now become an industrial area with the formation of an estate and the setting up of a number of small industrial units. Dr. Ida Scudder first established a hospital here. This town is noted for its hides and skins as also beedi industry.

10. *Sathanur.*—The place has assumed fame after the building of the irrigation dam over the Pennaiyar river. The dam is at a distance of about 30 km. west of Tiruvannamalai town. Built at a cost of about Rs.3 crores during Second Five Year Plan period, it has a storage capacity of 8,100 m.c.ft. of water. It provides irrigation facilities to lands in Tiruvannamalai and Chengam taluks of North Arcot district and also Tirukkoyilur taluk of South Arcot district. With a well-laid park, beautiful trees, rest houses, etc., it is an ideal picnic centre and draws huge crowds on Sundays and holidays, particularly during seasons.

11. *Tiruppattur.*—It is an important trade centre and its at the foot of the eastern ghat mountains. Commodities traded here include dhal, jaggery, chillies, etc. A sandal wood factory is located here. The Sacred Hearts College here, run by the Christian missionaries is a prominent educational institution. This place is also the headquarters of the taluk and the Revenue Division.

12. *Vaniyambadi.*—It is a noted trade centre and the name of the town is said to have been derived from the term, Vanniya, meaning trader. It is well known for leather tanning. Production of jaggery, oil, beedi, etc., takes place here. There is a famous mosque here built on the model of Taj Mahal in the north.

13. *Walajapet.*—It is the headquarters of the Walajapet taluk. It is on the national highway connecting Madras and Bangalore and is also served by Walaja Road Railway station (junction). Silk weaving, carpet and cane (rattan) works are important industries here.

14. *Sholinghur.*—It is a small town in Walajapet taluk which is known for its hill temple, held sacred by Hindus. There are two small lion-shaped hillocks here, the highest of which is only 400 feet. Patients suffering from certain diseases including those with mental disabilities are said to be cured by staying and worshipping at the temple here. There is also a spring here, the mineral water of which is believed to contain health properties.

15. *Elagiri.*—It is an ideal tourist spot and is on a hill of 970 metre elevation. The hill is at a distance of 16 km. from Vaniyambadi town and 5 km. from Jolarpet railway junction. The hill road has 13 bends and is 15 km. long. There is a beautiful park at the foot of the hill. The area over the hill is 13 sq. km. A few tribes reside on the hill and cultivate tomato, cardamom, fruits, coffee, etc. on the slopes. The place is developing as a picnic resort and is frequented by people from far and near during summer.

16. *Arani.*—It is a taluk headquarter town, famous for its handloom silk sarrees. The place was once under the rule of the Maharashtrians and an old Fort exists here. Silk weaving is carried on in and around this town from ancient times and the silk sarrees produced here are famous and are in great demand throughout the country.

Brief Analysis of the Village and Town Directory Data—

A brief analysis relating to certain population characteristics is made utilising the information collected in the Village and Town Directory. A number of tables have been designed for this purpose. The tables are generated at the district and taluk level for the rural areas and in regard to urban areas, townwise particulars are presented.

TABLE 3.

DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE.

Village not having the amenity of	Number of villages where the amenity is not available and available at the distance of				Total.
	—5 kms.	5-10 kms.	10+ kms.		
(1)	(2)	(3)	(4)	(5)	
Education	120	4	3	127	
Medical	795	514	152	1,461	
Drinking water	..	..	..	..	
Post and Telegraph	782	78	26	886	
Market/hat	787	625	246	1,658	
Communications	517	125	47	689	

Table 3.—This table deals with the distribution of villages not having certain amenities in themselves but available at a distance which have been given in this table. Out of 127 villages where no educational facilities are available, 120 villages have this amenity at a distance of this then —5 kms. 4 villages have at a distance of 5—10 kms. and 3 villages avail at a distance of 10+ kms. Out of 1,461 villages which have no medical facilities; 795 villages avail this amenity at a distance of less than 5 kms; 514 villages at 5—10 kms. and 152 villages avail at a distance over 10 kms.

Out of 886 villages which have no post and telegraph facilities, the rural folk from 782 villages avail this amenity at a distance range of —5 kms., 78 villages at a distance range of 5—10 kms. and 26 villages at a distance range of 10+ kms. 1,658 inhabited villages in the district have no market/hat facilities in the respective villages itself. Of these, 787 villages have this amenity within a distance of —5 kms, 125 villages have the facility at a distance range of 5—10 kms. and 47 villages at a distance range of 10+ kms.

Out of 1,873 inhabited villages in the district as many as 689 villages have no communication facilities. Out of these villages, 517 villages have this facility at a distance of —5 kms., 125 villages at 5—10 kms. and 47 villages at a distance range of 10+ kms.

TABLE 4.

DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST TOWN AND AVAILABILITY OF DIFFERENT AMENITIES.

Distance range from the nearest town (in kms.)	Number of inhabited villages	Number (with percentage) of villages having amenity of							
		Educa- tion	Medi- cal	Drink- ing water.	Post and Telegraph	Market/ hat	Com- muni- cation	Approach by pucca road	Power supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
0—5	297	271 (91.25)	82 (27.61)	297 (100.00)	162 (54.55)	27 (9.09)	195 (65.66)	217 (73.06)	291 (97.98)
6—15	958	904 (94.36)	211 (22.03)	958 (100.00)	515 (53.76)	93 (9.71)	623 (65.03)	664 (69.31)	951 (99.27)
16—50	618	571 (92.39)	119 (19.26)	618 (100.00)	310 (50.16)	95 (15.37)	366 (59.22)	450 (72.82)	603 (97.57)
51+	..	..	..	..	..	..	..	..	..
Total	1,873	1,746 (93.22)	412 (22.00)	1,873 (100.00)	987 (52.70)	215 (11.48)	1,184 (63.21)	1,331 (71.06)	1,845 (98.51)

Table 4.—This table furnishes the distribution of inhabited villages according to the distance from the nearest town and availability of different amenities. Among the total inhabited villages of 1,873 in the district, 297 villages are located in the distance range of 0—5 kms. from the nearest town. All these villages avail the amenity of drinking water, power supply by 97.98 per cent of the villages, education by 91.25 per cent, pucca road by 73.06 per cent, communication by 65.66 per cent, post and telegraph by 54.55 per cent, medical by 27.61 per cent and market/hat by 9.09 per cent of the villages. In the distance range of 6-15 kms. there are 958 villages in which the amenity of drinking water is enjoyed by all the villages, the facility of power supply by 99.27 per cent of the villages, education by 94.36 per cent, pucca road by 69.31 per cent, communication by 65.03 per cent and post and telegraph by 53.76 per cent of the villages. The amenities of medical and market/hat are availed by a low percentage of 22.03 and 9.71 respectively. There are 618 inhabited villages in the distance range of 16-50 kms. and all these villages are having the amenity of drinking water. Regarding other amenities, power supply and education are available to 97.57 per cent and 92.39 per cent of the villages. Pucca road is available to 72.82 per cent, communication to 59.22 per cent and post and telegraph is available to 50.16 per cent of the villages. The medical and market/hat facilities are available to only 19.26 per cent and 15.37 per cent of the villages respectively.

TABLE 5.

DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE.

Population range.	Number of inhabited villages in each range.	Number (with percentage) of villages having the amenity of		
		Education.	Medic al.	Drinking water.
(1)	(2)	(3)	(4)	(5)
499 and below	209	128 (61.24)	6 (2.87)	209 (100.00)
500—1,999	1,073	1,029 (95.90)	140 (13.05)	1,073 (100.00)
2000—4,999	507	505 (99.61)	202 (39.84)	507 (100.00)
5,000+	84	84 (100.00)	64 (76.19)	84 (100.00)
Total	1,873	1,746 (93.22)	412 (22.00)	1,873 (100.00)

Number (with percentage) of villages having the amenity

	Post and Telegraph.	Market/ hat.	Communi- cation.	Approach by pucca road.	Power supply.
	(6)	(7)	(8)	(9)	(10)
499 and below	26 (12.44)	12 (5.74)	78 (37.32)	95 (45.45)	187 (89.47)
500—1,999	444 (41.38)	89 (8.29)	613 (57.13)	735 (68.50)	1,068 (99.53)
2,000—4,999	435 (85.80)	81 (15.98)	411 (81.07)	422 (83.23)	506 (99.80)
5,000+	82 (97.62)	33 (39.29)	82 (97.62)	79 (94.05)	84 (100.00)
Total	987 (52.70)	215 (11.48)	1,184 (63.21)	1,331 (71.06)	1,845 (98.51)

Table 5.—This table shows the distribution of inhabited villages according to different population ranges and amenities available. Among the four categories of population ranges, 209 inhabited villages come under the population range of —499 in which the amenity of drinking water is availed all the village, power supply by 89.47 per cent of the villages, education by 61.24 per cent, pucca road by 45.45 per cent, communication by 37.32 per cent, post and telegraph by 12.44 per cent, market/hat by 5.74 per cent and medical by 2.87 per cent of the villages. Similarly there are 1,073 inhabited villages in the population range of 500-1999 and all these villages avail the amenity of drinking water. Power supply is availed by 99.53 per cent of the villages, education by 95.90 percent, pucca road by 68.50 percent communication by 57.13 percent, post and telegraph by 41.38 percent, medical by 13.05 percent and market / hat by 8.29 per cent of the villages under the population range of 2000-4999, there are 507 inhabited villages and among these villages 99.61 per cent of the villages avail the amenity of education, medical by 39.84 per cent, drinking water by 100.00 percent, post and telegraph 85.80 percent, market/hat by 15.98 per cent, communication by 81.07 percent, pucca road by 83.23 percent, and power supply by 99.80 per cent of the villages. In the fourth category of population range of 5000+, there are 84 inhabited villages and the amenities of education, drinking water and power supply are availed by all these 84 villages. The amenities of post and telegraph and communication are availed by 97.62 per cent of the villages, pucca road by 94.05 percent medical by 76.19 percent and market/hat by 39.29 percent of the villages. It is observed that the amenities of medical and market/hat have recorded a very low percentage in this district.

TABLE 6.

MAIN STAPLE FOOD IN THE MAJORITY OF VILLAGES IN EACH TALUK

Serial number.	Name of Taluk.	Main staple food.
(1)	(2)	(3)
1	Arakkonam	Rice and Ragi.
2	Walajapet	Rice and Millets.
3	Gudiyattam	Rice and Ragi.
4	Vaniyambadi	Rice and Millets.
5	Vellore	Rice and Millets.
6	Arani	Rice and Cereals.
7	Arcot	Rice and Ragi.
8	Cheygar	Rice.
9	Vandavasi	Rice and Ragi.
10	Polur	Rice and Millets.
11	Tiruppattur	Rice and Ragi.
12	Chengam	Rice and Millets.
13	Tiruvannamalai	Rice and Ragi.

Table 6:—This table furnishes the main staple food in terms of grains consumed by the majority of the population of the villages in each taluk. Of the 13 taluks in the district, Rice and Ragi are being used by the people of 6 taluks and Rice and Millets are in use in another 5 taluks while Rice and Cereals are being consumed in Arani taluk. Only Rice is in consumption in Cheyyar taluk. The common trend is that Rice is the principal item in all the 13 taluks of the district as their main staple food.

TABLE 7.
DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE.

Serial Number.	Name of taluk	Number of inhabited villages.	Total area (in hectares).	Percentage of cultivable area to total area (in hectares)	Percentage of irrigated area to total cultivable area (in hectares)
(1)	(2)	(3)	(4)	(5)	(6)
1	Arakkonam	142	80,344.18	94.03	35.81
2	Walajapet	100	53,268.10	73.09	44.64
3	Gudiyattam	158	71,799.64	85.32	34.31
4	Vaniyambadi	107	63,459.68	68.02	42.14
5	Vellore	121	50,233.72	74.53	51.27
6	Arani	52	41,055.74	70.65	32.90
7	Arcot	100	50,436.25	61.57	54.71
8	Cheygar	218	81,587.48	71.02	40.01
9	Vandavasi	205	84,317.60	68.75	24.58
10	Polur	184	80,979.50	75.81	38.71
11	Tiruppattur	86	67,152.82	92.97	31.95
12	Chengam	185	98,593.01	67.48	39.79
13	Tiruvannamalai	215	89,259.19	77.24	39.22
Total ..		1,873	9,12,466.91	75.80	38.18

Table 7.—This table gives the distribution of inhabited villages according to land use. The total area of 1873 inhabited villages is 9,12,466.91 hectares of which the percentage of the cultivable area to the total area works out to 75.80. The percentage of the irrigated area to the total cultivable area works out to 38.18. The taluks of Arakkonam, Tiruppattur, Gudiyattam, Tiruvannamalai and Polur possess the maximum cultivable area to total area in the district viz, 94.03 per cent, 92.97 per cent, 85.32 per cent, 77.24 per cent and 75.81 per cent respectively. Arcot taluk has recorded a lowest percentage of 61.57 of cultivable area to total area. Regarding the irrigated area in the district, Arcot taluk has got the highest percentage of 54.71 of the irrigated area to the total cultivable area. Vandavasi taluk records the lowest percentage of 24.58 of the irrigated area to the total cultivable area in the district.

TABLE 8.

GROWTH, DENSITY AND SEX-RATIO OF URBAN POPULATION IN THE DISTRICT IN RELATION TO THE STATE.

North Arcot District.						
Census Year.	Total Population.	Urban population.	Percentage of Urban population.	Decadal percentage variation in urban population.	Density (population per sq. km.).	Sex ratio (number of females per 1,000 males)
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1951	2,899,592	528,212	18.22	..	..	1,019
1961	3,146,326	631,225	20.06	+ 19.50	2,237	986
1971	3,755,797	783,095	20.85	+ 24.06	3,285	969
1981	4,414,324	1,015,529	23.01	+ 29.68	3,968	978

Tamil Nadu.

Total population.	Urban population.	Percentage of urban population.	Decadal percentage variation in urban population.	Density (population per sq. km.).	Sex ratio (number of females per 1,000 males).
(8)	(9)	(10)	(11)	(12)	(13)
30,119,047	7,333,525	24.35	..	..	986
33,686,953	8,990,528	26.69	+ 22.59	1,722	963
41,199,168	12,464,834	30.26	+ 38.64	2,115	951
48,408,077	15,951,875	32.95	+ 27.98	2,722	956

Table 8 gives the details of growth, density and sex ratio of urban population in North Arcot district for the decades 1951 to 1981. Figures for the State as a whole have also been shown in the table with a view to have a comparative picture about these demographic aspects. The percentage of urban population to total population in this district has gone up from 18.22 in 1951 to 23.01 in 1981. The density of urban areas of this district which was 2,237 in 1961 has increased to 3,285 in 1971 which has gone up again to 3,968 in 1981.

TABLE 9
NEW TOWNS/TOWNS DECLASSIFIED IN 1981 CENSUS.

Name of towns.	Population 1981 Census.
(1)	(2)
(a) Added—	
(i) Allapuram	17,028
(ii) Shembakkam	9,500
(b) Declassified	NIL.

Table 9 reveals that only two towns has been recognised as new towns in North Arcot district during 1981, while no town has been declassified as rural.

TABLE 10.
PER CAPITA RECEIPT AND EXPENDITURE IN TOWNS.

Serial number.	Class, name and civic status of the town.	Receipt.		Expenditure.						
		Total.	Receipt through taxes.	Receipt from all other sources.	Total expenditure.	General administration.	Expenditure on public health and conveniences.	Public works.	Expenditure on public institutions.	Other aspects.

Total	..	1,873	1,746 (93.22)	412 (22.00)	1,873 (100.00)	987 (52.70)	215 (11.48)	1,184 (63.21)	1,331 (71.06)	1,845 (98.51)

Table 1.—This table furnishes the distribution of villages according to the availability of different amenities. There are 1,873 inhabited villages in this district of which 1,746 villages are provided with the educational amenity which works out to 93.22 per cent. Out of the total 13 taluks in the district, Arani taluk occupies the first place with 100.00 per cent while Vaniyambadi occupies the last place with 86.92 per cent. The amenity of medical is not satisfactory in this district and that only 412 villages out of the total 1,873 are provided with the medical facility. Regarding the amenity of Drinking water facility in the district, it is notable that all the 1,873 villages are provided with this basic amenity. 52.70 per cent of the total villages are provided with Pucca road facility in the district. Only 11.48 per cent of the villages in the district are having the amenity of Market/hat. Out of 1,331 villages which have the pucca road facility in the district 181 and 175 villages are in Vandavasi and Polur taluks, the percentages being 88.29 per cent and 95.11 per cent respectively. Communication is fairly good in the taluks of Arakonam, Tirupattur and Gudiyattam with 91.89 per cent, 81.40 per cent and 75.95 per cent respectively. 98.51 per cent of the total villages in the district are provided with the amenity of power supply. In Arani, Arcot, Cheyyar, Vandavasi and Tirupattur taluks, power supply is provided for all the villages.

TABLE 2

PROPORTION OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES.

Serial number and name of taluk.	Total population of inhabited villages in the taluk	Education	Medical	Drinking water	Post and Telegraph	Market/hat	Communications	Approach by pucca road	Power supply
1 Arakonam ..	292,375	290,803 (99.46)	112,187 (38.37)	292,375 (100.00)	250,009 (85.51)	23,007 (7.87)	289,339 (98.96)	267,217 (91.40)	252,344 (99.99)

Table 2.—This table shows the proportion of rural population served by different amenities in the district. The rural population of the district is 3,398,795 and all of them are served by the amenity of drinking water, the percentage being 100.00. The amenities of power supply and education are provided to 99.67 per cent and 98.24 per cent of the total population in the district respectively. Nearly three fourth of the district, rural population are served by the amenities of post and telegraph, communication and pucca road, the actual percentage being 73.95, 76.60 and 80.31 respectively. The medical facility available to the rural population is only 37.56 per cent. In respect of market/hat almost all the taluk in the district lack this amenity except Vellore and Vaniyambadi.

SECTION-II
TOWN DIRECTORY

NOTE EXPLAINING THE CODES USED IN THE TOWN DIRECTORY.

STATEMENTS I AND III.

Class of towns by population—

Population.			Class.
(1)			(2)
1,00,000 and above	..	..	I
50,000—99,999	..	..	II
20,000—49,999	..	..	III
10,000—19,999	..	..	IV
5,000—9,999	..	..	V
Below 5,000	..	..	VI

Civic administration status of the town—

M. Corp.	..	..	..	Municipal Corporation/Corporation.
M	..	..	..	Municipality.
NP	..	..	..	Nagar Panchayat/Town Panchayat.
GP	..	..	..	Gram Panchayat/Village Panchayat.
TC	..	..	..	Town Committee/Town Area.
CB	..	..	..	Cantonment Board/Cantonment.

STATEMENTS IV AND IV-A.

SC	..	..	..	Scheduled Castes.
ST	..	..	..	Scheduled Tribes.

Type of Road—

PR	..	..	..	Pucca Road.
KR	..	..	..	Kutcha Road.

System of sewerage—

S	..	..	..	Sewer.
OSD	..	..	..	Open surface drains.
BSD	..	..	..	Box surface drains.
SD	..	..	..	Syck drains.
CD	..	..	..	Cesspool method.
Pt	..	..	..	Pit system.

Method of disposal of night soil—

HL	..	..	..	Head loads.
B	..	..	..	Baskets
WB	..	..	..	Wheel barrows.
ST	..	..	..	Septic tank latrines.
S	..	..	..	Sewerage.

System of storage of water—

OHT	..	..	..	Overhead tank.
SR	..	..	..	Service reservoir.
IG	..	..	..	River infiltration gallery.
BWP	..	..	..	Borewell pumping system.
PT	..	..	..	Pressure tank.

Source of drinking water—

TW	..	..	..	Tubewell water/Hand pump.
T	..	..	..	Tap water.
W	..	..	..	Well water.
TK	..	..	..	Tank water.

STATEMENT V.

Medical facilities—

H	..	..	..	Hospital.
D	..	..	..	Dispensary.
HC	..	..	..	Health Centre
FC	..	..	..	Family Planning Centre.
TB	..	..	..	T.B. Clinic.
NH	..	..	..	Nursing Home.
O	..	..	..	Others.
A	..	..	..	Ayurvedic.
U	..	..	..	Unani.
Hom.	..	..	..	Homeopathic.

Educational facilities—

A	..	..	..	Arts only.
S	..	..	..	Science only.
AS	..	..	..	Arts and Science only.
C	..	..	..	Commerce only.
AC	..	..	..	Arts and Commerce only.
ASC	..	..	..	Combined for all categories Arts, Science and Commerce.
L	..	..	..	Law.

Recreation, shorthand, typewriting and other vocational institutions—

SH	..	..	..	Shorthand.
Type	..	..	..	Typewriting.
SH. Type	..	..	..	Shorthand and Typewriting.
O	..	..	..	Others.

Public libraries and reading rooms—

PL	..	..	..	Public Libraries.
RR	..	..	..	Reading Rooms.
