FOREWORD.

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Government, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District Administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census, the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states, it was confined to district census tables and in a few cases, altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series, some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities are except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village, the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern, expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices, listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information in a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Caste and Scheduled Tribe population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the Primary Census Abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series, it has been so designed that part-A of the volume contains village and town directory and part-B, the PCA of village and towns, including the Scheduled Castes and Scheduled Tribes PCA upto Taluk/Town level. At the beginning of the DCH, a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to

In bringing out this publication, I have received assistance from Sarvashri M. Thangaraju, and M. Nagappan, Deputy Directors and Shri Sukumar Nandagopal investigator, besides a large number of staff members of this Directorate.

In formulating the scope and content of the data in this publication and designing the formats for presentation of the data, I have received valuable guidance from Shri P. Padmanabha, Registrar General, India. The encouragement I have received from him at every stage of the work has contributed in a great measure to the successful publication of this District Census Handbook.

I hope the data in this volume would be found useful and the publication well received by the administrators, academicians and other data users.

Madras,

July 1983.

A. P. MUTHUSWAMI,

Director of Census Operations, Tamil Nadu.

ACKNOWLEDGEMENT

It is my pleasant duty to acknowledge the able assistance given by the following office of my office in the preparation of this volume.

Village Directory

Shri T. S. Rajaram, Investigator

Shri C. T. Rajan, Investigator

Smt. R. Rani Bai, Statistical Assistant

Smt. N. Muniammal, Statistical Assistant

Shri R. Balasubramanian, Statistical Assistant

Director of Census operations, Tamil Nadu

enhance its value. The district and taluk level maps depicting the boundaries and other important features have been inserted at appropriate places to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri A. P. Muthuswami, I.A.S., the Director of Census Operations, Tamil Nadu on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

NEW DELHI,
the 26th April, 1982.

P. PADMANABHA,
Registrar General, India.

PREFACE

It has been the tradition of the Government of Tamil Nadu to publish immediately after each census, District Census Handbook separately for each district containing the Census statistics besides other valuable data of local importance, for the use of the State Government, district administration, research scholars and other data users. The first series of District Census Handbooks were brought out immediately after the 1951 Census, and the present publication after the 1981 census is the fourth in the series.

The Census statistics presented in this publication were collected during the census operations in February-March, 1981, the reference date being 1st March, 1981. The other statistics in this publication have been collected from various departments of the State and Central Governments.

This publication consists of the following two parts.

Part-A: Village and Town Directory and

Part-B: Village and Townwise Primary Census Abstract.

Taking into account the increasing and varied developmental and other welfare measures undertaken by the Government, the scope and content of the data in this publication have been considerably enlarged and improved to meet the requirements of the planners and the other data users. In particular, certain inset tables based on census and other data have been included in this publication with brief analytical notes thereon.

This publication contains a brief history of the district, highlighting the major characteristics of the district in relation to the economic resources like forestry, minerals, etc., besides the social, cultural, religious and historical aspects. The district and taluk maps in this publication give the administrative units upto village level, the rural and urban units, the location of towns and cities, communication facilities and other related details.

The facilities and amenities available in respect of education, medical, drinking water, post and telegraph, markets, communication, etc. in each village and town have been included in this publication, and an important feature is that wherever the above facilities and amenities are not available in any particular village/town, the nearest place where they are available has also been reported.

Another interesting feature in this publication is that villages with none of these amenities have been listed out separately for the pointed attention of the planners and administrators.

Certain tables present data exclusively in respect of the weaker sections of the society belonging to the Scheduled Castes and Scheduled Tribes.

The land use pattern in respect of rural and urban areas have also been reported in this publication which would meet the requirement of micro level planning for rural and urban areas.

The data in respect of urban areas, apart from the medical and other facilities available, relate to the growth of towns, the availability of protected water supply, and what is important, the civic amenities available in the slums of the urban areas.

Part-B of this volume consists of the District and Village/Town wise Primary Census Abstract followed by Primary Census Abstract of Scheduled Castes and Scheduled Tribes.

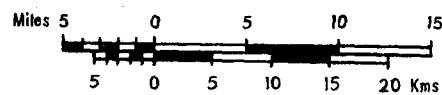

The District Primary Census Abstract gives for each territorial unit upto Taluk level in the case of rural areas and upto town level for urban areas, occupied residential houses, households, the total population, the Scheduled Caste and Scheduled Tribe population, workers, etc., there by indicating the basic socio-economic characteristics of the population for the territorial units. The village and townwise Primary Census Abstract gives similar information for villages and wards of towns. Besides, there is an appendix which furnishes at urban block level, the total population and Scheduled Caste and Scheduled Tribe population.

I am grateful to the Collectors and other district officers and Departments of the State Government who have extended their unfailing co-operation and help in collecting the voluminous and useful data other than Census, for their presentation at one place in this publication, for the ready reference of the data users.

ANALYTICAL NOTE

CENSUS CONCEPTS

(i) RURAL AND URBAN AREAS

At a census, it is customary to divide the population into two broad categories, viz. Rural and Urban. Part of the preliminary work for census enumeration is the demarcation and identification of areas which are to be treated as "urban". The rest of the areas, not treated as urban are classified as rural areas. These rural areas consist of villages, reserve forests, etc.

A uniform definition of an "urban area", which could be applied universally to all the countries has not been evolved so far. It was for the first time at the 1961 census that a standard definition of what constituted an urban area was evolved. Under this definition, adopted for both the 1971 and 1981 census, the following were recognised as urban areas:—

(i) All places with a Municipality, Municipal Corporation or Cantonment or notified area by committee/council or similar local authority irrespective of their population, size or other characteristics.

(ii) All other places which satisfied the following criteria (based on the 1971 census):—

- (a) a minimum population of 5,000.
- (b) at least 75 per cent of the male working population is non-agricultural; and
- (c) a density of population of at least 400 persons per square kilometre.

(iii) Places which though not satisfying the above criteria had urban characteristics as judged by the Director of Census Operations after consultation with the State Government authorities.

Urban Agglomerations.—Urban Agglomeration is a new concept formed during 1971 Census and this replaces the concept of town-group adopted in 1961 Census. Well recognised suburban towns and other adjoining areas like Railway Colonies, industrial areas, University Campuses, etc. which may be outside the statutory limits of a core town deserve to be reckoned along with the main town. All such urban spread which are contiguous to the core town are taken together as an Urban Agglomeration. There are 34 such urban agglomerations in Tamil Nadu, of which 12 are city agglomerations (i.e. having a city as their core town).

Census House.—A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc. used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Household.—A household is a group of persons, who commonly live together and would take their meals from a common kitchen, unless the exigencies of work presented any of them from doing so.

Scheduled Castes/Scheduled Tribes.—No general or standard definition for Scheduled Caste and Scheduled Tribe can be found in any literature including in the Constitution of India. For certain privileges and benefits for social and economic uplift, the President of India has notified certain castes and tribes as Scheduled Castes and Scheduled Tribes.

Literates.—In 1981 Census, a literate was defined as "a person who can both read and write with understanding in any language". A person who could merely read but cannot write, was not a literate. It was not necessary that a person considered a literate must have received formal education or have passed any minimum educational standard.

Work.—The population is divided into the following three broad categories:—

- (i) Workers;
- (ii) Marginal Workers; and
- (iii) Non-Workers.

Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

A worker was identified with reference to the reference period preceding the census. The reference period prescribed was one year preceding the date of enumeration. Certain types of work such as agriculture, household industry like, gur making, etc., were carried on, either throughout the year or only during certain seasons or part of the year, depending on local circumstances. In such cases, what we were concerned with, was the broad time span of the agricultural seasons preceding the enumeration. Workers can be full time workers or seasonal workers or marginal workers. If a person has done any work during the reference period and if he had worked for the major part of the year i.e. if he had worked for 183 days or more, he was considered to be a full time worker (main worker). If a person had done any work during the reference period and if he has not worked for the major part of the year i.e., he had worked for less than 183 days, he was considered to be a marginal worker.

The main activity of workers has been classified into four categories viz., cultivator, agricultural labourer, household industry and other work.

Cultivator—For census purposes, a cultivator is a person who is engaged either as an employer, single worker or family worker in cultivation of land owned, or held from Government, private persons or institutions for payment in money, kind or share. Cultivation includes supervision and direction of cultivation.

Agricultural labourer—A person who works in another person's land for wages in money, kind or share should be regarded as an agricultural labourer. He or she has no risk in the cultivation but merely works in another person's land for wages and has no right of lease or contract on land on which he or she works.

Household Industry—For a person who returns his/her main activity as engaged in some production, processing, servicing or repair of articles or goods, it has to be ascertained whether it is a household industry.

Household Industry is defined as an industry conducted by the head of the household and/or by the members of the household at home or within the village in rural areas and within the precincts of the house in urban areas. A larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would or has to be registered under the Indian Factories Act.

Class of Workers: (i) An *Employer* is a person who hires one or more persons in his work.

(ii) An *Employee* is a person who does his work for wages or salary in cash or kind.

(iii) A *Single Worker* is a person who does his work without employing others except casually and without the help of other members of the family except casually and a participant in work as member of a co-operative.

(iv) A *Family Worker* is a person who is doing his work in a family enterprise along with other members of the family with out wages or salary in cash or kind.

Non-Workers—All persons who have not been treated as workers i.e., persons who have not worked any time at all during the reference period of one year preceding the date of enumeration, have been considered as non-workers. Thus, if a person is a non-worker throughout the category to which he belongs has been classified as follows:—

(i) **Household duties-H**—The category covers all persons who are engaged in unpaid home duties and who do not have other work or have not done any work at all during the last one year.

(ii) **Students-ST**—This will cover full time students and children attending school.

(iii) **Dependents-D**—This category includes all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age.

(iv) **Retired persons or Rentiers-R**—A person who has retired from service and is doing no other work i.e., not employed again in some full time work or not engaged in some other work such as cultivation, business, trade, etc., or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend, or any other person or independent means for securing which he/she does not have to work will come under this category.

(v) **Beggars etc.—B**—This will cover beggars, vagrants or cases such as persons without indication of source of income and those with unspecified sources of subsistence who are not engaged in any economically productive work.

(vi) **Inmates of institutions-I**—This will cover convicts in jails or inmates of a penal, mental or charitable institution, even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing, etc., in such institutions.

(vii) **Other non-workers-O**—This category will include all non-workers who may not come under any of the above six categories.

HISTORY OF THE DISTRICT CENSUS HANDBOOK.

After the Census of 1951, the Government of India offered to hand over to the State Government the Census tables and other data prepared during the Census and suggested that they might be published along with any other useful information relating to each district. The State Government accepted the proposal, and the first publication of the District Census Handbook was brought out at the cost of the State Government.

The District Census Handbook of 1951 was found to be very useful and it was therefore decided not only to continue the series for the 1961 Census, but also to improve definitely on its content so that each District Census Handbook contained certain basic economic data for the smallest administrative unit in the district and be a useful reference book for scholars and other data users.

After the 1971 Census as well, the series of District Census Handbook was continued. The Publication of the 1971 Census Handbooks was in three parts, viz. part-A, part-B, part-C; part-A relating to Village and Town Directory, part-B, relating to Village and Townwise Primary Census Abstract and part-C comprising District Census Tables and certain administrative statistical tables.

The tradition of bringing out the Census Handbook has been continued by the State Government during the 1981 Census also. In this series, some individual features, besides restructuring the format of the village directory, have been adopted bearing in mind the national requirements of data for the socio-economic programmes of the Government. The comparability of data with the 1971 Census data has also been kept in view.

The present Census Handbook will be published in two Parts, viz. Part-A, Village and Town Directory and Part-B, Village and Townwise Primary Census Abstract.

SCOPE OF VILLAGE DIRECTORY AND TOWN DIRECTORY STATEMENTS AND PRIMARY CENSUS ABSTRACT.

The District Census Handbooks are the only publications which incorporate the data down to the level of a village and level of a town which are constantly referred to by the data users.

The Village Directory Statement gives the list of villages by taluk and for each village, the area, number of households and population, availability of amenities and land use. The information on amenities available in the village includes educational, medical, drinking water, post and telegraph, market, rail/road or other communication facilities and power supply. Land use is shown as area under forests, irrigation, unirrigated land, culturable waste and area not available for cultivation.

Appendix I gives for each taluk the number of villages having various levels and types of educational institutions, such as middle schools, adult literacy centres, etc., various types of medical institutions such as dispensaries, primary health centres, etc. and the number of such institutions, various types of drinking water sources such as, taps, tube well, etc., post and telegraph offices, power supply, railway stations, bus stops, etc. and also the number of villages not having such amenities.

Appendix II gives for each non-municipal town (census towns) the area under forest, irrigated and unirrigated land, culturable waste and area not available for cultivation.

Appendix III gives the list of villages where no educational, medical and public health facilities, etc., are available.

Appendix IV gives the list of villages with the proportion of Scheduled Caste and Scheduled Tribe population to the total population in various districts of proportion. Part A of the Appendix gives the villages according to the proportion of Scheduled Caste population and Part B according to the proportion of Scheduled Tribe population.

to proportion of Scheduled Tribe population. Information is presented by the ranges 0-5 per cent, 6-10 per cent, 11-15 per cent, 16-20 per cent, 21-30 per cent and 31 per cent and above for Scheduled Caste and 0-5 per cent, 6-15 per cent, 16-25 per cent, 26-35 per cent, 36-50 per cent and 51 per cent and above for Scheduled Tribes.

The Town Directory gives important and useful information like civic and other amenities available in all the towns in the district, statutorily notified, as well as non-municipal and census towns. The details relating to each of the towns have been presented in seven statements, viz statements I to VI and IV-A. In all the statements except IV-A, the towns are arranged in the alphabetical orders for the district. The Town Directory does not cover strictly military areas. It may however, cover cantonment areas but not strictly military areas or military establishments with in the cantonment areas. However, basic statistics of the cantonment as a whole have been provided. In the Town Directory, codes have been given for the data on amenities and civic administration for want of space. The relevant explanations for the codes adopted have been given in the beginning of the Town Directory statements.

An urban agglomeration includes two or more independent census towns. The names of the towns/urban agglomerations have been arranged in the alphabetical order.

The particulars of the individual town which constitutes one of the units of agglomeration have not been furnished separately because the particulars have been furnished where they occur together under the name of agglomeration. The following remarks have been given against such town in brackets.

“(see the name of the main town of the agglomeration).”

By adoption of this method, the reader can get an idea of the particulars of the urban agglomeration in total and also severally.

Statement I—Status and Growth History—This statement provides some basic data based on the Primary Census Abstract. For analysing the Town Directory data at State level and All India level, some new cols. have been introduced in 1981. The new items are class of town, area, number of households, population and growth rate for each census since 1901. Density and sex ratio at 1961, 1971 and 1981 censuses are also provided in this statement.

For size class of town the following population norms as per 1981 census have been adopted.

Population.	Class.
100,000 and above	I
50,000—99,999	II
20,000—49,999	III
10,000—19,999	IV
5,000—9,999	V
below 5,000	VI

Location Code Number of Towns—To distinguish the town from the village, the location code numbers for towns have been given in Roman numerals and these numbers have been assigned in a continuous order for the district as a whole.

Statement II—Physical Aspects and Location of Towns, 1979.—Under physical aspects, annual rainfall and temperature figures are furnished. These particulars were obtained from the Commissioner of Statistics, Madras. If the information is not available for any particular town, the nearest town for which it is available is given. For col. (9) the nearest city with population of one lakh and more is furnished according to 1981 census. For the other cols., figures obtained from the Municipal Commissioners and Panchayat Union Commissioners are given. The ‘Zero’ within brackets in cols. 10 and 11 denotes that the referent town itself is enjoying road transport facilities.

Statement III—Municipal Finance, 1978-79.—The civic administration status of the town, the receipt through tax, properties and powers, government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services are given in this statement. The sources of receipt and expenditure are furnished in terms of rupees in hundreds.

Statement IV—Civic and other amenities, 1979.—The civic and other amenities existing in the towns as in 1979 are given. The data were obtained from the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Col. 3—Civic Administration status.—It is a new column introduced in this statement to facilitate analysis.

Col. 4.—Population.—It is also a new column introduced in this statement to measure the amenities in respect of population.

Col. 5.—Scheduled Caste and Scheduled Tribe population.—It is introduced to know the size of population of the weaker sections of the Community in the towns.

Electrifications.—Electrification particulars were obtained from the Tamil Nadu Electricity Board through the Municipal Commissioners and Panchayat Union Commissioners.

(i) **Domestic Connections.**—This refers to the number of services given to houses for domestic purposes like fans, lighting, etc.

(ii) **Industrial Connections.**—This refers to the number of services effected to L.T. Industries such as workshops, flourmills, oil mills, grinding machines, cotton ginning and engineering industries, etc.

(iii) **Commercial Connections.**—This refers to the services given to shops, business houses, public institutions like offices and schools and commercial establishment.

(iv) **Road lighting points.**—This refers to the number of points of street lights which will be maintained by the Board and for which consumption charges will be paid to the Board by respective local bodies. For some town panchayats the number of services effected alone has been furnished under street lights and not the points.

(v) **Other Connections.**—This refers to the number of services effected for agricultural purposes, huts, public water supply systems, cottage industries, etc.

Statement IV-A—Civic and other amenities in Notified Slums, 1979.—This is a new statement on civic and other amenities in notified or recognised slums of class I and II towns. Generally, in cities or towns having slums, the local authority such as municipality notified the recognised slums. Such notifications linked up with the availability of funds from the State Government for Slum clearance.

Name of the slum and the details of the area, population, length of the paved roads, system of sewerage, number of different types of latrines and method of disposal of night soil, etc. are given in this statement.

Statement V—Medical, Educational, Recreational and Cultural Facilities, 1979.—In this statement, medical, educational, recreational and cultural facilities of the towns as in 1979 are furnished. The data for educational and medical facilities were obtained from the Municipal Commissioners and Panchayat Union Commissioners for the concerned towns, and from the Director of Secondary Education and Director of Public Health respectively.

Col. 10.—Recognised shorthand, type writing and other vocational training institutions.—The term ‘recognised’ refers to institutes recognised by some statutory authority like Education Department, Commerce Department, Labour Department, etc., of the Government or by Semi-Government or autonomous bodies, public sector project, etc.,

Cinemas refer only to the permanent cinema theatres and do not include touring cinemas.

Col. 16.—Number of working women's houses with number of seats.—This is a new column introduced in this statement in 1981. Consequent the increase in the employment of women in urban areas, the housing needs of working women has been considered as an important subject for study.

Statement VI.—Trade, Commerce, Industry and Banking in 1979.—In this statement, trade, commerce, industry and banking facilities in the towns as in 1979 are furnished. The particulars were obtained from the Reserve Bank of India. The information on number of agricultural and non-agricultural credit societies were collected from the Registrar of Co-operative Societies through the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Scope of Primary Census Abstract.—The Primary Census Abstract, as it is called, presents basic data for each village or segment of village (in case where such village segments form different panchayats) in the "Villagewise Primary Census Abstract" and for each "Ward/Division/House numbering Block" of a town in the "Urban Primary Census Abstract". The format of the Primary Census Abstract for the villages and towns in 1981 has been slightly modified as compared to the 1971 Primary Census Abstract.

The Primary Census Abstract gives such basic information as area in hectares/sq.km., occupied residential houses, number of households, total population scheduled Caste and Scheduled Tribe population, literates, main workers, division of main workers into cultivators, agricultural labourers workers in household industry and other workers, marginal workers and non-workers in respect of each unit. The Urban/Village Primary Census Abstract gives this information for each village and each urban ward. With a view to ensure comparability and to enable data users to derive the figures either for a revenue village or panchayat according to the requirements, the data are presented for segments of villages, also. Wherever portions of one village happen to be in two or more panchayats, the segmentwise data have to be used separately or added with some other segments data so as to derive panchayat data. For example, a portion of a revenue village bearing L.C. No. 10 forms part of two panchayats the figures are given separately for each portion of the village against L.C. No. 10 a/b and 10 b/b. The total figures for the entire revenue village by adding the figures given against both the segments viz., 10 a/b and 10 b/b are indicated in the village Primary Census Abstract. If, instead, the panchayat figures are required, the data for the concerned village segment or segments relating to the panchayats concerned, are to be added up to arrive at the total figures for the respective panchayats.

An appendix presented in the case of the Urban Primary Census Abstract gives 1981, population, scheduled castes and scheduled tribes population for each enumerator block of the town. This is meant for the use of administrative and election authorities in urban areas. Such data are also required by urban planners and researchers for conducting other studies in selected blocks.

Mode of Presentations.—The consolidated figures for the district and each taluk are given in the beginning for Total, Rural and Urban areas under the caption 'District Primary Census Abstract'. An alphabetical list of revenue villages is then given along with the Census Location Code Numbers of 1981 Census followed by the Villagewise Primary Census Abstract. In the foot note given at the end of the Villagewise Primary Census Abstract, the Villages included in Municipalities or Census towns, are indicated. Then, follows the Urban Blockwise Primary Census Abstract. In an appendix to the Urban Blockwise Primary Census Abstract, the population and Scheduled Caste/Scheduled Tribe figures for each Enumerator's Block of a town are given.

Maps.—Apart from the District Map given as frontispiece, map for each taluk showing the village numbers along with their boundaries have also been included at the appropriate places. As compared with the maps presented in 1971 District Census Handbook, several improvements have been effected in the maps presented in this volume. All towns are shown in the District and taluk maps with shading screens and also spheres according to the population size of towns.

Area Figures.—In the District Primary Census Abstract the area figures are given in square kilometres for Total, Rural and Urban areas. In the Villagewise Primary Census Abstract, the area figures for each Location Code unit are given in hectares upto two decimals. The area figures for each town in sq. Km., is also given at the end of the Urban Blockwise Primary Census Abstract in square kilometres. In the District Primary Census Abstract, the area figures of the District total represent the "Geographical area" figures supplied by the Surveyor-General. Figures for urban areas are those supplied by the Local Bodies, revenue authorities. The urban area of a district has been arrived by adding the urban area figures of each taluk within the district. Area figures for the rural areas of District/ Taluk are derived by subtracting the urban area figures from the total area of the District/Taluk. The total of the area figures of the taluks will not tally with the district figures because the taluk area figures represent the doubt and are derived from the figures supplied by the Tamil Nadu Directorate of Survey and Land Records, while those of the district represent "Geographical Area" supplied by the Surveyor-General of India. The total of the village areas given in the Villagewise Primary Census Abstract may not tally with the rural area of the taluk given in the District Primary Census Abstract as the taluk area figures taken into account hills, forests, rivers, etc., whereas the village area may not include the same. For conversion, the ratio is 100 hectares = 1 sq. km.

It is hoped that the pattern of presentation of basic Census particulars for each district is explained above and adopted in this volume would be found convenient by data users.

SOUTH ARCOT DISTRICT—AN OUT LINE.

Introduction—South Arcot is one among the important tourist places in Tamil Nadu thanks to the historical monuments, edifices, sacred and ancient temples. The famous saivite temple of Chidambaram is one of the ancient temples of south India renowned for its sculptures of dancers in various Nitya poses. The fort at Gingee is a rare monument of historic beauty.

The district can be proud of housing a modern residential university, the Annamalai University at Chidambaram. This University having variety of courses of study is a centre of Tamil language and culture. The surroundings in which the university is located and the impressive buildings and the library are well worth a visit.

South Arcot has remained all these years a comparatively backward tract both in Agriculture and Industry. With the setting up of the Neyveli Lignite Corporation, the district has acquired an important place in the economy of the State. This huge industrial complex is the major industry in the district. The project provides us lignite, electricity, fertiliser, leco and washed clay. Sugar industry is the next major industry in the district.

The district had a chequered history, studded with several interesting episodes of English and French rivalry.

Since the district formed the southern portion of the area under the Nawab of Arcot during the first decade of the 18th century, this division has come to be called South Arcot to distinguish it from the northern division of Arcot.

History of the district, its formation and jurisdictional changes.—South Arcot formed part of Tondaimandalam, an area lying between Pennar river of Nellore and the Pennar river of South Arcot. Cholas were the early rulers of this region right from the period of Sangam Age. Among the early Chola rulers, Karikala Chola (50—95 A.D.) was the most powerful. The Cholas were overthrown by Simha Vishnu Pallava and South Arcot regions were under Pallava rule for a short period. Chola rule was once again revived by Vijayalaya. This was the beginning of great Chola empire and with the succession of powerful rulers, South Arcot remained under Chola supremacy. The later Chola rulers of the 10th and 12th century A.D. were weak and finally South Arcot passed into the hands of a new dynasty called the Eastern Chalukyas. Cholas regained their lost position but with the rise of Jatavarman Sundara Pandya-1 (1251 A.D.), Chola supremacy came to an end. Sundara Pandya defeated the Cholas and established Pandya Power over South Arcot regions. The sway of the Pandyas lasted little over 50 years followed by Muslim domination from 1334 to 1378 A.D. By 1378, South Arcot region came under the rule of Vijayanagar Kingdom and Nayaks were appointed rulers of the region. By about 1601 Gingee which comprised of almost the whole of South Arcot district fell to Muslims for a while. The forces of Bijapur took Gingee from the Golkonda Army and from 1648 to 1677 A.D. South Arcot was under the control of Bijapur Generals. It was in 1677 that Shivaji took Gingee area with assistance of Golkonda forces. In 1680, Hari, the Maratha Chief of Gingee area, asserted his individual position. After his death Gingee fell into the hands of the Mughals in 1698. Subsequent history was group rivalries of the Nawab of Arcot, the Nizam and two foreign powers—the British and the French. Sadat Ullah Khan held sway over Gingee from 1714.

During the Moghal regime, both the English and French acquired settlements in South Arcot for their trading purposes. During the Anglo-French rivalry, South Arcot was turned into a cockpit of war. Gingee fell into the hands of the British in 1790.

During the years 1748–95, when Mohammed Ali was the Carnatic Nawab, South Arcot region was administrated by Managers appointed by him. In 1774, the Nawab leased out the whole of the district for a fabulous rent. During 1781–85, the district was under assignment to the East India Company for payment of Nawab debts. By 2nd half of the 18th century, the Nawab had become completely dependent on the Company for financial as well as military aid. After the death of Md. Ali, the company insisted on the surrender of the districts of the Carnatic region in lieu of money payments due from the Nawab towards the maintenance expenses of the Company troops in the Carnatic. The English entered into an agreement with Azemud-Daulat, son of Asaf-ud-Daulat in 1801. According to the agreement of 1801, Azemud-Daulat was recognised as the Nawab of Carnatic and he gave up his claims to the Carnatic regions. Thus, by virtue of that agreement of 1801, South Arcot and other regions of the Carnatic passed into the hands of the British East India Company from that date onwards. South Arcot had remained under British authority till 1947 when India became independent.

The district comprised of 20 taluks namely, Chetput, Wandiwash, Gingee, Tiruvannamallur, Villupuram, Tindivanam, Tiruvannamalai, Vriddhachalam, Tittagudi, Elavanasur, Tirukoilur, Kallakurichi, Anniyur, Arcot, Vellore, Tiruvettar and Polur, besides the territories lying around Cuddalore and Pondicherry and the Arni Jaghir. In April 1805, the then taluk of Mannargudi was added from Tiruchirappalli district. In the year 1808, Arcot, Vellore, Tiruvattar and Polur taluks and Arni Jagir were transferred to the then Chittoor district and the Wandiwash taluk to Chengalpattu. Fort St. David and Pondicherry were incorporated with the district. By some further combinations, the number of taluks was reduced to 13 in 1809-1810. Pondicherry was restored to the French in 1816. The number of taluks remained at 13 till 1860 when they were combined into 8. In 1911, Tiruvannamalai was added to the North Arcot district. In 1921, Gingee taluk was formed out of the Tindivanam taluk and a few villages of the Villupuram and Tirukkoyilur taluks. Since the 1951 Census, there has been no change in the area of the district. Vriddhachalam Revenue Division was newly formed with effect from April 1, 1959.

Between 1961-71, Velankulam village was transferred from Vriddhachalam taluk to Cuddalore taluk. Three Municipalities, Vriddhachalam, Nellikuppam and Panruti were newly formed.

PHYSICAL FEATURES.

The coastal district of South Arcot has an area of 10,855.0 sq. km. It lies on the east coast and to the South of Madras City. It is bounded on the north by the Chergalpattu and North Arcot districts and on the south by the Thanjavur and Tiruchirappalli districts, on the west by North Arcot and Salem districts and on the east by Bay of Bengal. South Arcot is spread out between 11° 5' and 12° 30' of the northern latitude and 78° 37' and 80° of the eastern longitude. Vellar, an important river of the district along with its tributaries, Vasishtanadi and Swetanadi, forms the boundary between Tiruchirappalli and South Arcot districts for approximately 36 miles. The river Coleroon forms boundary for 36 miles between South Arcot and Thanjavur districts. Besides the sea barrier on the east, yet another natural border for the district is the Kalrayan hill range which divides South Arcot from Salem and stands on the extreme west of Kallakurichi taluk. Stretching out from Marakkanam in the north to the mouth of Coleroon in the South, the coast line of the district has a total length of 89 kms. The northern and the western limits of the district are not defined by any well marked natural divisions.

The district is for the most part a flat plain sloping gently from the west to the sea or the east and also from the north to the south except for a strip of high ground running across the district from Pondicherry to Vriddhachalam. The region can be distinguished into the following natural divisions. On the west, the Kallakurichchi taluk and the neighbouring regions with the Kalrayan Hills and their undulating valleys are noted for dense woods and green jungles, thus reflecting the unfading charms of nature. The eastern region consists of red soil tracts and wide spread paddy fields and green groves of fruit bearing trees marked here and there by broad open tanks—a special characteristics of these parts. The most inviting part of all regions in the district lies to the north of Tirukkoyilur taluk, possessing mostly arenaceous and virtually barren soil. On the contrary, the lands in the south, especially those around gingee hills, are the most fascinating. The presence of numerous hills and hillocks of fantastic shapes, the thick jungles that go with them, the wide expanse of green fields with fine palmyra trees rising all along their borders and fine patches of blue water in open tanks here and there make up the best scenery of the district. The southern region of the district, particularly Chidambaram taluk and a few parts of Vriddhachalam taluk, is comparatively green and fertile and is made up of even expanse of irrigated land which resembles to a great extent, the deltaic part of Thanjavur district. This is in contrast to the rest of the South Arcot district. The seashore is fringed with a belt of blown sand of varying width.

Among the hills of the district, the Kalrayans is an important range which run north to south in the western part of Kallakurichchi taluk and spreads out into the Salem district. The boundary between these two districts runs through the top of the mountain range. The portion of the Kalrayan hill-range lying in South Arcot is roughly 25 miles in length and 8 to 12 miles in breadth. The Kalrayans are 2,000 to 3,000 feet high and rise abruptly like a wall, shutting off the Kallakurichchi taluk from the west. At the foot of the hills, the elevation of the taluk is some 500 to 650 feet above mean sea level and the fall eastwards to the level of the land is more rapid. The level of Kalrayans range is generally uniform and at either end of the hills are two historic passes—the Attur pass in the south and the Chengam pass in the north. The Gingee Hills in the Gingee taluk run South-westwards from near Gingee for about 14 miles. Much of it is covered by reserved forest and the largest block is about 5 miles wide. While the Kalrayans are comparatively smooth and are covered with soil for plant growth, the Gingee hills have a jagged skyline and consist of masses of bare rock and big boulders in irregular shapes and angles. Mount Capperplateau

situated west of Cuddalore is the 3rd range of hills in the district, runs from a point about 10 miles north of Pondicherry, South-westwards to near S. J. Masnam. The plateau forms part of a belt of red laterite ground running from north of Pondicherry, southwards across Villupuram, Cuddalore and Chidambaram taluks. The Red Hills which rise just west of Pondicherry can be called a prominent feature of this landscape. There are, besides the above continuous hill ranges, several isolated elevations in the district. Such elevations are common in Gingee and Kallakurichchi taluks. Some of them have become famous as a result of the fort built upon their summits such as Tiyyaga Durg and Perumukkal.

Soils of the district are of three varieties, namely red, black and arenaceous. Red ferruginous soil is the predominant variety and it covers over 60 per cent of the area of the district. The comparatively fertile black soil is found mostly in Chidambaram, Vriddhachalam and Cuddalore taluks. The first two taluks contain over 50 per cent of the black soil area of the district. Red soil covers large extents of Gingee, Tirukkoyilur and Kallakurichchi taluks. The arenaceous soil is found along the coast in the taluks of Chidambaram, Cuddalore and Tindivanam and such area is used for casuarina plantations. Except Gingee, the black fertile soil is found in all the taluks of the district. Due to the imperviousness and the moisture retaining capacity of the black soil, it is best situated for wet and garden cultivation. The red soils are suit for dry crops like ground nut and pulses as they are very easily ploughed and require a smaller quantity of rain for sowing.

The Tindivanam area is sandy with 75 per cent of coarse fractions, sandy and fine sand. The soil depth varies from 6 to 24 inches. The soils are alkaline, with moderate soluble salts with a trace of Calcium oxide and Magnesium oxide. The soils contain a fair amount of total lime. They are poor in organic matter, nitrogen and phosphoric acid and potash. The district cannot be said fertile with the exception of black soil tracts. In spite of low fertility, the district is renowned for sugarcane and groundnut cultivations. Paddy is raised largely in Chidambaram taluk.

The principal river of the district is the Pennar or the Ponnaiyar. Rising in the Cherna Kesava Hill, east of Nandidurg in Mysore state and crossing the Salem district and the southern tip of the North Arcot district the river enters South Arcot district through Tirukoilur taluk where it receives the waters of Tirunjellar flowing from Tiruvannamalai. Later, the river flows across Tirukkoyilur taluk and along the boundary between Cuddalore and Villupuram taluks and empties itself into the Bay of Bengal about 3 miles north of Cuddalore.

The Gingee river rises in the extreme north-west corner of Gingee taluk. This river is also called Sankarabharani or Varahanadi or Sergi river. Flowing past Gingee taluk in a southerly course into the Villupuram taluk, the river receives on the left Toraiyar and on the right the Kallar and the Pambayar and empties itself in the Bay of Bengal with two mouths near Pondicherry. The Northern outlet is called the Ariyankuppam river and the Southern outlet, Kiliyar or Chunambar. The Gadilam river rising in eastern part of Tirukkoyilur taluk flows through Tirukkoyilur and Cuddalore taluks. In Cuddalore taluk, it is joined by Malattar on the right and then it flows into the Bay of Bengal at a point, just north of Cuddalore.

The Ponnaiyar and the Gadilam are connected by a river course called the Malattar which serves to carry the surplus water of the former into the latter.

The Ongur and Kodamur are two small streams formed by the surplus waters of two chains of tanks in the Tindivanam taluk. Both of them fall into the Kaliveli swamp in the same taluk.

The Paravanar, also called Uppanar, rises in Vriddhachalam taluk. This river flows between Cuddalore and Chidambaram taluks, strikes northwards and falls into the Bay by the mouth of Gadilam.

The Coleroon which splits off from Cauvery river in Tiruchirappalli district is more a river of the Thanjavur district. It flows on the Southern boundary of Chidambaram taluk for 36 miles and joins the Bay of Bengal 6 miles south of Portonovo.

The Vellar river is formed by the junction of the rivers Vasishtanadi and Swetanadi which rise in Salem district. The Vasishtanadi enters the South Arcot district through Attur, pass just south of the Kalrayans and forms the boundary between South Arcot and Tiruchirappalli for 16 miles. After it joins the Swetanadi, the united streams still follow the boundary and the river flows for another 20 miles, gathering the waters of Manimuktanadi, Gomukhanadi and Myuranadi which drain the eastern slopes of the Kalrayans. The river then passes through Chidambaram taluk and joins the Bay of Bengal near Portonovo.

There are backwaters on the sea coast caused by the sea water breaking into the water courses of streams and rivers. These backwaters are found near Cuddalore and on the east coast of Tindivanam taluk. A typical backwater is the Kaliveli swamp in Tindivanam taluk which is 31 sq. miles.

In Kunnam near Tindivanam, world famous Black Granites are available in plenty. These rocks capable of taking high polish, are used for wall facings, floor tiles and as monumental stones. A greater part of Black Granites are exported to foreign countries.

In Marakkanam near Tindivanam, plenty of lime shell deposits all along the coast which is of high chemical grade are found. Besides this, Silica sands of high purity, containing 99.9 per cent of Silicon dioxide, occur as natural sands near Marakkanam in South Arcot district. These sands find extensive use in foundries and also in glass manufacture. Following are the important minerals in the district.

Output of minerals 1979-80.

Name of the mineral.	Quantity.	Value
(1)	(2)	(3) (RS.)
Lignite	50,50,000	2,50,095
Granite	15,070	17,56,000
Gravel	42,680	7,61,200
Brick earth	14,410	4,75,200
Ordinary sand	2,450	25,000
Road metal	49,920	17,76,500
Laterite	12,300	2,13,500
Lime shell	667	1,89,184

Important mineral based industries in the district are Lignite and refractories. The Neyveli Lignite Corporation a Government of India enterprise is the agency engaged in working in the mine. Neyveli Thermal Power Station is the major establishment mainly consuming Lignite.

Land and Land use pattern.—The land use break up for the district as on 1980-81 is shown below:—

Head of classification.	Area in Hectares. (000)	Percentage to total area.	Area in Hectares. (000)	Percentage to total area.
(1)	(2)	(3)	(4)	(5)
Total Geographical area as per village papers.	1,090	100	13,003	100
Forests	50	4.6	2,022	15.6
Barren and uncultivable land	106	9.7	577	4.5
Land put to non-agricultural uses	134	12.4	1,747	13.5
Cultivable waste	50	4.7	343	2.6
Permanent pastures and other grazing	8	0.8	159	1.2
Land under tree crops and groves	55	5.1	212	1.6
Current fallows	140	12.9	2,120	16.3
Other fallow lands	34	3.2	459	3.5
Net area sown	509	46.6	5,360	41.2

More than 46 per cent of the geographical area of the district comes under cultivation as compared to 41 per cent for the State, followed by land under fallows, current fallows, cultivable waste and other fallow lands which account for nearly 21 per cent of the total area. Area under non-agricultural uses such as urban land and settlements cover 12 per cent of the total area while forests occupy as little as four per cent.

AGRICULTURE.

South Arcot district occupies an important place in the field of agriculture, since agriculture is the main stay of the people of this district. A sizable portion of the working class still remain as cultivators and agricultural labourers. As per 1981 Census, 77.40 per cent (12,50,535) of the total main workers of this district are cultivators and agricultural labourers. The extent of dependency on agriculture is rather slightly declining in this district as may be seen from the percentages of workers engaged in agricultural activities in 1971 and 1981 censuses which stood at 78.72 per cent and 77.40 per cent respectively.

The total area under cultivation (or total cropped area) in this district as in the year 1980-81 was 647,938 hectares and this forms 59.3 per cent of the total land area. Out of this cropped area, 138,681 hectares accounting for 12.7 per cent of the district's area represents area sown more than once. The percentage of net sown area, to the total area is 46.6. In the recent decades, extension of electrical connection to large areas has enabled the setting up of a wide net work of pumpsets for exploiting sub-soil water resources for irrigation and this has considerably augmented agricultural production of the different taluks. Agricultural development can be considered particularly good and promising in the taluks of Chidambaram, Vriddhachalam, Tindivanam, Kallakurichchi, Cuddalore and Villupuram.

The crops grown in the district can be conveniently grouped into two, viz. the cereals and pulses which come under food crops, and others and cash crops or commercial crops. 72.4 per cent of the total sown area in the district represents food crops. The principal cereal crops of this district are paddy, varagu, cholam, cumbu, ragi, etc. Important varieties of pulses are red gram, green gram and black gram. Chief commercial crops of the district are groundnut, sugarcane, gingelly, etc.

Paddy is the important food crop cultivated over an extent of 228,990 hectares of which 217,953 hectares are irrigated. Paddy is cultivated in all the taluks of the district and more extensively in Chidambaram, Villupuram and Tindivanam taluks. Chidambaram taluk in particular may be distinguished from others in that, it resembles more the deltaic area of the neighbouring Thanjavur district with its alluvial soil and good irrigational facilities. Other cereals raised in the district are Varagu, Cumbu, Cholam, Ragi, etc. Cumbu is the most important dry grain raised over an area of 70,729 hectares, followed by Varagu and Cholam which occupy an area of 21,528 and 17,995 hectares respectively. 40,560 hectares are being utilised for the production of pulses. Among pulses, black and green grams are the most important varieties grown in the district over an extent of 25,060 and 8,625 hectares respectively. Other varieties of pulses raised in the district, viz., bengal gram, red gram and horse gram are predominantly cultivated as rainfed crops.

Oil seeds are grown throughout the district as a summer crop. Among oil seeds, groundnut, gingelly and castor occupy important places. Groundnut is an important cash crop of the district grown extensively in all areas of the district except Chidambaram taluk. The area under groundnut was 136,325 hectares. Gingelly is another oil crop raised in all taluks of the district, the largest extent being in Vriddhachalam, Cuddalore and Villupuram. Gingelly occupies an area of 29,157 hectares.

Sugarcane is the major commercial crop cultivated over an extent of 28,681 hectares. This crop is raised on wet lands in rotation with paddy or some other wet crops in Nellikuppam in Cuddalore taluk, neighbourhoods of Chidambaram and scattered regions in Kallakurichchi, Gingee, Vriddhachalam and Tirukkoyilur taluks. The services rendered by the Agriculture Research Station at Palur and the encouragement given by the three sugar factories located in the district have made improvements in the cultivation of sugarcane in the district.

Other crops grown in the district are cashew, tobacco, and cotton. Cashew is also an important crop grown extensively in the district. Tobacco is grown in Vriddhachalam, Chidambaram and Kallakurichchi taluks while cotton is cultivated in Vriddhachalam, Villupuram and Cuddalore taluks.

Bananas, Mangoes and Jack fruits are the important fruits cultivated in the district. With 3.29 hectares under Jack fruit, the district occupies the second biggest place in the State in the area under Jack fruit.

Climate and Rainfall.—The climate of South Arcot is fairly dry. The temperature is moderate near the sea but rises slightly further inland. The district depends on monsoon rain and enjoys, except during hot months, a fairly pleasant weather.

The annual rainfall recorded in the district during 1980-81 is 826 mm. which is below the normal rainfall of 1,189 mm. Rainfall is the heaviest along the coast and varies with the distance from the coast. Portonovo has normally the heaviest rainfall in the district followed by Chidambaram and Kallakurichchi. The Gingee taluk and portions of the Vriddhachalam, Kallakurichchi and Tirukkayilur taluks are the driest parts of the district.

The following statement shows the monthwise normal and actual rainfall in mm. during the period 1980-81.

Month and Year.	Normal rainfall.	Actual rainfall.	Percentage departure from the normal rainfall.
(1)	(2)	(3)	(4)
June 1980	43.9	17.2	..
July	73.6	98.3	..
August	132.5	101.8	..
September	141.8	71.3	..
Total of South-West Monsoon period	391.8	288.6	-26.3
October	215.9	125.4	..
November	277.8	203.0	..
December	134.6	66.6	..
Total of North East Monsoon period	627.8	395.0	-37.1
January 1981	53.7	33.4	..
February	14.6	0.0	..
Total of winter period	68.3	33.4	-51.1
March	15.3	6.8	..
April	29.3	0.7	..
May	56.4	101.0	..
Total of hot weather period	101.0	108.5	+8.3
South Arcot District	1,188.9	826.4	-30.5

Normal—Average of 50 years rainfall ending 1950.

Flora and Fauna.—There is nothing significant in the flora and fauna of the district. Most of the trees found along the south-east regions of the Peninsula are found in this region also. Of all the regions, the hilly tracts have the maximum attraction for the botanist. The flora of the hills is almost of the drier deciduous type characterised by the abundance of sandal wood linyplis and terminalia and more rarely teak and blackwood. In the plain between the hills and the sea occurs the mixture of deciduous and evergreen flora usual in the southern districts. Trees commonly found in the district are margosa, banyan, mango, palmyra, coconut, tamarind, etc.

Prominent among the sea side flora is the thorny grass "spinifex squarrosus" one of the most interesting plants of the State. Salt marshes, coromandel weeds, climbers of spare jungles, interesting forest shrubs and trees and hill masses of botanical interest are all found here.

In the absence of dense forests, large varieties of game animals are very rare. Bears and spotted deer are seen in Kalrayans. Hyenas and antelopes are found in Kallakurichchi, rabbits are seen in many localities and crocodiles are found in the canals taking off from Coleroon. Small game birds like partridges and quail are common in the foreshore regions of Villupuram and Tirukkoyilur taluks. Florican teal, duck, peafowl are also seen in the district. Fish is in plenty and the oysters of Cuddalore backwater enjoy more than a local fame.

Forests.—The forest resources of the district are meagre as compared to the State as a whole. While 15.6 per cent of the total geographical area of the State is under forests, the district has only 4.5 per cent. The area under forests in the district during 1978-79 estimated at 1.44 lakh hectares made up of 0.62 lakh hectares of reserved forests and 0.82 lakh hectares of reserved lands marked a marginal increase of 0.01 lakh hectares over the previous year's level of 1.43 lakh hectares.

The chief forest products are firewood, bamboo, cashew, casuarina and to a lesser extent sandalwood and timber such as teak, rosewood, etc.

Sandalwood occurs naturally in Thagarai, Parigamam Rangappanur Reserved Forest of Kallakurichchi range and also in Varanjaram Reserved Forest of Ulundurpet range.

The total annual revenue from forest for the year 1980-81 was Rs. 6,00,724.04 as against Rs. 8,97,712.25 during the previous year. The decrease in revenue was due to withholding of sums of the farm forestry plantations from public auction and transfer of Kalrayan areas to newly formed Kallakurichchi division with effect from 1st December 1980.

Itemwise value of minor forest produce during 1980-81 are as follows :—

	Rs.
1 Grazing and fodder grass	27,095
2 Cashew	6,136
3 Black granite	46,824
4 Other minor forest produce	52,171
5 Forest plantation	97,565

Special steps are taken to conserve the forest areas and to ensure among other things, adequate pasturage for livestock, supply of firewood for domestic consumption and raw materials for industries.

With the social forestry programme in Government lands, the forest department has enlarged its activities and interest, even outside the reserve forest. So far, an extent of 625 hectares had been planted with useful species such as pulpwood, red sanders, sandal wood, cashew and casuarina at a cost of Rs. 7.38 lakhs.

Minerals and Mining.—The district has a fairly rich mineral deposits. The gneissic formations are mostly in evidence in the west of the district, from Tyaga Durg in the south to the Gingee hills in the north. The fossiliferous cretaceous lime-stones are found in Parur, north-west of Vriddhachalam and in Thiruvakkarai near Tindivanam. The Cuddalore sandstone formation which is a more recent sedimentary deposit in this part forms the Red Hills near Pondicherry and the mount Capper Hills, south-west of Cuddalore. The alluvial beds are found in Vellalar and that of the combined Ponnaiyar, Gadilam and Gingee rivers.

Lignite is found to occur mainly in the Neyveli tracts. Lignite, which lies under an overburden of about 180 to 200 feet covers an area of about 100 sq. miles. Associated with the Lignite, there is a vast reserve of white refractory clay.

Iron ore is found to occur in limited quantities along the banks of river Pennar in Kallakurichchi taluk and laterite is found over a wide belt of the country between Pondicherry and Vriddhachalam.

Details of area under important crops in the district in 1980-81 are as follows :

Crop.	Area. (in hectares).	Out turn of crops. (in tonnes).	Area irrigated. (in hectares).
(1)	(2)	(3)	(4)
Paddy	228,990	426,980	217,953
Cholam	17,995	12,280	907
Cumbu	70,729	71,900	10,307
Ragi	16,688	86,450	11,818
Varagu	21,528	30,170	204
Redgram	3,393	1,480	50
Greengram	8,625	3,340	218
Blackgram	25,060	10,880	1,067
Sugarcane	28,681	2,950,760	28,553
Cashewnut	18,414	..	NA
Groundnut	136,325	122,400	48,351
Gingelly	29,157	12,030	6,634
Cotton	8,266	9,260	4,848

The district has an Agricultural College in Annamalai University at Chidambaram and an Agriculture school run by the Government at Kakuppam. There are two Agricultural Research Stations at Tindivanam and Palur.

The district has seven State Seed Farms at Miralur, Vandarayanpet, Vellapakkam, Truvelpattu, Kakuppam, Vanur, and Vadakkanandal. The main object of the Farm is production and distribution of quality seeds of paddy, millets, pulses, oil seeds and vegetables. These farms serve as Model Farms in nearby farming community on farm maintenance and scientific method of cultivation.

An efficient Marketing system which ensures reasonable prices for the agricultural produce and avoids physical destruction of stocks through elimination of long distance transport and storage, is an incentive for the farmer. The Madras agricultural produce Act of 1959 provided for better regulation of buying and selling of all agricultural produce and for the establishment and administrations of markets. Market committees are functioning in the district at Cuddalore, Murinjipadi, Panruti, Chidambaram, Kattumannarkoil, Vriddhachalam, Tittagudi, Kallakurichchi, Sankarapuram, Thiagadurgam, Chinnasalem, Tirukkoyilur Ulundurpet, Villupuram, Kandanangalam, Tindivanam, Gingee, Avalurpet and Ananthapuram.

The Agricultural extension set up has been reorganised in the State, following the training and visit system with financial assistance from the World Bank. This system, introduced in the district with effect from 1st July 1982 aims to build a professional agricultural extension service capable of assisting the raising of farmers, production and income and of providing appropriate support for agricultural development.

Three Agricultural Experimental stations, (viz.) Oil seed Experiment Station at Tindivanam, Sugarcane Experiment Station at Cuddalore and Paddy Experiment Sub-station at Palur are functioning in the district for testing and evolving high yielding varieties of different crops and working out crop production techniques suitable for different agro-climatic regions for pre-release varieties.

There is a soil testing laboratory at Cuddalore, and parasites breeding stations for coconut at Cuddalore and for sugarcane at Vriddhachalam, Villupuram and Kallakurichchi.

These developmental and other agricultural research projects have enabled the district to make rapid strides in the agricultural sector.

Irrigation and power. — The prominent role South Arcot is now playing in the Agricultural sector in the State is due mostly to its irrigation facilities. More than 56 per cent of net area sown in the district is under irrigation. The chief source of irrigation in the district is the rivers supplemented by a large number of rainfed tanks, wells and spring channels. The spring channels constituting an unique feature of this district are dug in the sandy river beds in order to exploit the under flow when the freshes in these rivers have ceased.

The principal rivers that serve the region are the Coleroon, Vellar, Manimukthanadhi and Ponnaiyar. All these rivers run in valleys and have been harnessed for irrigation purposes by anicuts built across them at various stages of their course.

The important irrigation projects of this district are the Lower Anicut, Sethiathope, Palandurai, Mehamathur Anicut, Vriddhachalam Anicut, Tirukkoyilur Anicut, Ellis Choultry Anicut, Sranivur Anicut and Wellington Reservoir. The Lower Anicut project on the Coleroon irrigates an area of 91,071 acres. Veeranam tank, one of the biggest irrigation tanks in the State, forms part of the lower Coleroon Anicut system. The Sethiathope Anicut across Vellar river irrigates considerable extent of land through its major supply source, the Vellar Rajan Channel and the surplus water is let into the Wallajah tank and later into the perennial tank. This project irrigates annually 44,455 acres of land. The Palandurai Anicut on Vellar river is situated South of Vriddhachalam. Lands lying south of Vellar are benefited by this project to the extent of 11,282 acres. The Mehamathur Anicut on Manimukthanadhi and Vriddhachalam Anicut across Manimukthanadhi irrigates an area of 4,818 and 8,378 acres respectively. The Wellington reservoir on Vellar is situated a few miles off Tittagudi helps to irrigate a considerable area of 24,059 acres of land in the district. The Tirukkoyilur Anicut across Ponnaiyar irrigates 22,341 acres while Ellis Choultry Anicut on Ponnaiyar helps to irrigate 14,939 acres.

Tanks play a significant role in the irrigation set up of the district. Tanks are fed by river channels and rain water. There are 2,677 tanks in the district irrigating an area of 32,045 hectares.

Most important among major tanks of the district are the Veeranam tank, Wallajah tank and Ponneri tank in Chidambaram taluk. Veeranam tank, the biggest tank in the district irrigates about 44,856 acres. The Wallajah tank near Sethiathope Anicut, a small reservoir receives its supply from the Sethiathope Anicut. This tank irrigates 11,392 acres in Cuddalore and Chidambaram taluks. Details of important tanks in the district are presented below :—

Area irrigated under minor irrigation sources, 1979-80.

Taluk.	Tank.	Area irrigated in acres.
(1)	(2)	(3)
Chidambaram	Veeranam	44,856
	Wallajah Eri	11,392
	Ponneri	4,798
	Satapadi	1,270
Kattumannarkoil	Kunnamangalam	1,446
	Nedunjeri Eri	1,536
Cuddalore	Perumal Eri	1,536
Vriddhachalam	Rajendra Patnam Eri	1,133
	Sathirakudal Eri	1,161
	Lakshminarayanapuram Eri	1,859
	Vayalurpudu Eri	1,172
Villupuram	Anangur Eri	1,298
	Valavanur Eri	2,579
	Poovarasankuppam Eri	1,061
	Panamalai Eri	1,064
Tindivanam	Alagramam Eri	1,219

mutton and stabilising the export of hides and skins are the main objectives with which sheep units are promoted. Towards ensuring healthy stock of sheep, a mass deworming programme was implemented during the year. A Fodder Seed Production unit is also functioning in the sheep farm.

Poultry development has been phenomenal in the district. Two poultry extension centres are functioning in the district at Bhuvanagiri in Chidambaram taluk and at Chinnasalem in Kallakurichchi taluk.

Co-operatives play a leading role in the procurement and distribution of milk. During 1979-80, there were 430 Co-operatives in the district. The value of milk and milk products purchased and sold by these societies was Rs. 175 lakhs and Rs. 194 lakhs, respectively.

Fishery.—South Arcot with a coast line of 89 kms. is one of the major fishing centres in Tamil Nadu. There are 57 fishing centres in the district. 3,639 craft and 6,129 gears conduct fishing operations in the district. Out of 3,639 crafts used for fishing, 425 are mechanised fishing boats, 2,535 are catamarans and 679 are canoes.

Fishing also has been conducted in inland waters. The two important fishing centres in the district are the Veeranam Eri at Lalpet and the Vellaru at Parangipet. To develop inland fishery, fingerlings are stocked at the ponds owned by the Government and distributed to other parts of the district at reasonable prices. Under this scheme, 55 lakh fingerlings were produced at the inductive method fingerlings production unit at Lalpet.

During the year 1981, 188,525 fingerlings were collected by natural method and stocked in the Veeranam Eri at Lalpet and Vellaru at Parangipet. Killai brackish water fishery development is an important scheme in the district. Killai has an area of 1,383 hectares of brackish water. The Fisheries Department has setup a prawns farm. Many varieties of rate fish are being cultured here which are exported to foreign countries. A little over 1,200 families earn their livelihood by fishing in the brackish water at Killai.

There are 62 fishermen co-operative societies functioning in the district of which 26 are that of marine fishermen, 34 pertain to inland fishermen and one each belong to marketing fishermen and fishermen co-operative federation respectively. These societies obtain long term, medium and short term loans and disburse the loans to their members for the purchase of fishing implements and to discharge prior debts. These societies also take lease of fishing rights of inland waters and distribute the lease to its members.

Killai fishermen society has obtained loan of Rs. 266 lakhs from the National Co-operative Development Union to purchase two fishing motor boats.

Under social security scheme, these societies have provided free housing facilities to its members. 798 houses have been constructed upto 1981 and during 1981, the Government of Tamil Nadu has given permission to construct 232 houses.

Production of marine fishing during 1979-80 was 10,830 metric tonnes.

To ensure safe anchorage for mechanised boats when seasonal conditions are adverse, a minor landing jetty and wharf walls were constructed at Cuddalore.

Industry.—The district was one of the backward areas in the matter of industrial development. Establishment of the Lignite Corporation at Neyveli, the East India Distilleries Ltd., managed by Messrs. Parry and Co., Sugar Industries, Chemicals and Fertilisers Factories and Ceramics and Refractories Industries, in addition to the establishment of a number of industries in the medium and small-scale sectors, accelerated the rate of industrialisation in the district.

According to the industrial profile of Tamil Nadu published by the Department of Statistics, manufacture of food products in the most important industrial group in the district account for 57.28 per cent of the industries in the district. Manufacture of refining of sugar which occupies prominent place in the manufacture of food products, account for 46.10 per cent under this group. Manufacture of fertilisers covered under chemical and chemical products occupies the second

rank in industrial output in this district. The other important industries together with their percentage constitution are shown in the table below:

Industry Group.	Output of Industry groups.	Percentage Share.
(1)	(2)	(3)
1. Manufacture of food products	5,324	57.28
2. Manufacture of chemicals and chemical products (except products of petroleum and coal)	1,820	19.58
3. Manufacture of non-metallic mineral products	658	7.08
4. Manufacture of cotton textiles	586	6.30
5. Manufacture of rubber, plastic, petroleum and coal products	377	4.06
6. Manufacture of machinery, machine tools and parts except electrical machinery	208	2.24
7. Others	319	3.46
Total	9,292	100.00

The productive capital per factory is more than the State average in the district, indicating the concentration of large scale industries.

The most heavy industry in the district is the Lignite Corporation, located at Neyveli. It is a Government of India Undertaking in technical collaboration with United States of America and West Germany.

This project set up at a capital outlay of Rs. 250 crores is designed to manufacture 6.5 million tonnes of Lignite per annum. The Corporation achieved an out turn of 33.00 lakh tonnes of Lignite in 1978-79 and 28.79 lakh tonnes in 1979-80. To enhance the production of Lignite additional mining equipment costing Rs. 129 crores had been recently acquired. The proposed 2nd mine cut will have a capacity of 4.7 million tonnes of Lignite per annum. Exploratory works are underway for the 3rd mine cut.

Production of urea at the Corporation's Fertiliser plant with a capacity of 1.52 lakh tonnes per annum amounted to 0.83 lakh tonnes in 1978-79 and 1.05 lakh tonnes in 1979-80. Sale of urea during the year of review at 0.85 lakh tonnes was valued at Rs. 12.34 crores.

Production of 25,748 tonnes of Leco, 1,605 tonnes of Nekolin and 225 tonnes of Pulvarised Clay had also been reported for 1979-80. Sale of these products, quantified at 42,325 tonnes 1979-80, was valued at Rs. 150.24 lakhs. The Corporation had earned a profit of Rs. 334.18 lakhs for 1979-80.

Sugar industry is the next important major industry in the district. There are four sugar factories in the district of which the East India Distilleries and Sugar Factories Ltd., managed by Messrs. Parry & Co., is the most important. It produces sugar to the tune of 30,000 tonnes in a season. The other sugar factories are the Aruna Sugars Ltd. at Pennadam, the South India Steel and Sugars Ltd., at Mundiambakkam and Kallakurichchi Co-operative Sugar Mills Ltd., at Moongithurai pattu in Kallakurichchi.

The East India Distilleries Ltd., managed by Messrs. Parry and Co., can be regarded as the pioneer of industrial enterprise in the district. The firm specialises in the manufacture of heavy chemicals, industrial gases, distilleries and fertilisers. The other factories engaged in the manufacture of chemicals are the Premier Fertilisers Ltd., and the Consolidated Chemicals India Ltd.

Manufacture of ceramics and refractories is another important industry in the district. The Neyveli Ceramics and Refractories Ltd., located at Vadalur engaged in the manufacture of sanitaryware and the Tamil Nadu Ceramics Limited at Virddhachalam engaged in the production of sanitaryware and crockery are some of the important industries in the field.

Vanavil Dyes and Chemicals Ltd.—This project for the manufacture of 250 tonnes per annum of naphthols and 200 tonnes per annum of fast colour bases required for the textile processing industry is being set up at Cuddalore. The project cost is estimated to be Rs. 600 lakhs. But consequent on the withdrawal of Messrs. Arul Products Ltd., from the project, the company has taken up only the naphthol plant construction in the first stage with a project cost of Rs. 183.4 lakhs and TIDCO's contribution for the naphthol plant is Rs. 41 lakhs. The project is expected to go into production by the end of 1981 or early 1982 which will provide employment to 180 persons.

Gangappa Paper Mills Limited—This was a project originally promoted in the private sector and later on accepted by TIDCO in the joint sector, in order to encourage production of printing and writing paper in the State using agricultural residues like straw. This project with a capacity of 10,000 tonnes per annum is being set up in Vadakuthu village in the district. The project cost is Rs. 544 lakhs and TIDCO's commitment is Rs. 43 lakhs. The project is expected to go into production by October 1981. It will provide employment to about 300 persons.

Southern Agrifurane Industries Limited—This project for the manufacture of 3,000 tonnes per annum of furfural, a solvent used in refineries and resin manufacture, produced from sugarcane bagasse, is located at Mundiambakkam near Villupuram. The project cost is Rs. 939 lakhs and TIDCO's contribution is Rs. 63.75 lakhs. Trial production is expected to commence during December 1981, providing employment to about 180 persons.

The Corporation set up by the Tamil Nadu Government for the promotion of industries have rendered technical as well as financial assistance for starting new industries in the district. The following are some of the medium/large scale industries in the district, aided by SIPCOT and TIIC.

TABLE-A.

List of medium/large scale units aided by SIPCOT

Name.	Produce.	Investment catalysed (RUPEES IN LAKHS.)
(1)	(2)	(3)
1. Aurotood (Private) Limited	Maida, Sooji and Biscuits	200.00
2. Aruna Sugars	Sugar	290.00
3. Gangappa Paper Mills Limited	Paper	350.00
4. Southern Agrifurane Industries Limited	Furfural	732.00
5. Neyveli Ceramics and Refractories Limited	Sanitary ware	28.17
6. Aravind Distillery and Chemicals Limited	Industrial Alcohol	78.35
7. Madras Vanaspathi Limited	Cotton Seed Oil	73.50
8. Madras Arcot Mills Limited	Cotton Yarn	62.04

TABLE-B.

List of units aided by TIIC.

Name.	Product.	Sanction (RUPEES IN LAKHS.)
(1)	(2)	(3)
1. Seshasayee Industries Limited	Paper	10.00
2. Aruna Sugars Limited	Sugar	10.00
3. Seshasayee Industries	Electrical Machinery	15.00
4. Neyveli Ceramics and Refractories Limited	Non-metallic mineral product	12.00
5. Tamil Nadu Ceramics Limited	Miscellaneous	30.00
6. Arcot Mills Limited	Textiles	6.40
7. Madras Vanaspathi Limited	Food	20.00

Under the scheme of the State Investment subsidy eight notified backward taluks in the district viz. Gingee, Tirukkoyilur, Ulundurpettai, Kallakurichchi, Tittakudi, Chidambaram, Kattumannarkoil and Tindivanam and also the new Industrial complex to be set up in Cuddalore are eligible for State Subsidy equivalent to 15 per cent of the fixed capital investment or Rs. 15 lakhs whichever is less. This scheme covers small, medium and large scale industries.

Industrial Estate and Training Institutes have been set up by the State Government with the primary purpose of rendering service to industries and to serve as part of the infrastructure. The workshops, most of which are located in the Industrial Estates, are of different types such as general purpose engineering workshop, toolrooms, forge shops, etc. The Government Industrial Training Institutes at Cuddalore and Ulundurpettai and Industrial school at Cuddalore and Tindivanam deserve mention.

SIPCOT's Cuddalore Industrial complex has been specially developed for large chemical and other process industries, which are basically water and power intensive. SIPCOT is acquiring and developing about 600 acres for this purpose.

Small-scale industries form the seed-beds of large scale industries. The establishment of Industrial Estate and Industrial Training School will go along way in the advancement of industries in general and small-scale industries in particular. According to the Directory of small scale industrial units issued by the Director of Industries and Commerce, there were in all 1,356 small scale industrial units in the district upto 31st December 1980. They fall under the industrial groups, as detailed below:

Industry group.	Number of Units.
(1)	(2)
20-21 Manufacture of food products	381
22 Beverages, tobacco and tobacco products	18
23 Cotton textiles	14
26 Textile products	3
27 Wood and wood products	108
28 Paper and paper products, printing publicity	109
30 Rubber, plastic petroleum and coal products	42
31 Chemical products	76
32 Non-metallic mineral products	125
33 Ferrous and non-ferrous metals	15
34 Metal products and parts except machinery and transport equipments	165
35 Machinery, machine tools and parts except electrical machinery	235
36 Electrical machinery and apparatus and supplies and parts	14
37 Transport equipments	45
38 Other manufacturing industries	6
	1,356

The district has a variety of cottage and village industries dispersed throughout rural areas in the district. Mat weaving and handloom weaving are the oldest industries in the district.

Ceramic industry is thriving in Panruti, Palayavandipalayam, Valavanur, Nellikuppam, Nambalapattu, Ayyuragaram and Buvaagiri. Panruti is famous for clay work. Things like toys, dolls and imitations of fruits, vegetables, birds, animals and deities are made. These articles are made out of clay by professional potters called pathers. Brick manufacturing in the district which is another important industry in the district is found mainly in Panruti, Vallam, Badugai and Sethiathope.

Black smithing, wood carving, oil pressing, hand pounding of rice, bee-keeping and honey extraction are some of the common cottage industries found in the district.

Handloom industry has been a traditional occupation of this district. This industry flourishes mainly in Cuddalore, Naduveerapattu, C. N. Palayam and Melbhuvanagiri.

There were 18,245 looms in the district as on 31st December 1981, of which 10,849 looms constituting 59 per cent of the total looms were within co-operative fold. Type of cloth produced by the weavers of the Co-operative Societies consist of cotton lungies and cotton shirtings.

An Export Production Project is functioning at Kurinjipadi with a loom strength of 1,373 set up at a cost of Rs. 32.12 lakhs. Comparative performance of this project for the years from 1979 to 1981 is furnished below:—

Name of the Project— Export Production Project—Kurinjipadi.

Year.	Number of looms.	Production.		Sales.	
		Metres.	Value.	Metres.	Value.
		(FIGURES IN	LAKHS.)	(FIGURES IN	LAKHS.)
(1)	(2)	(3)	(4)	(5)	(6)
1979	1,222	4.46	33.64	4.44	34.87
1980	1,301	6.50	56.13	6.48	60.20
1981	1,373	7.55	80.25	5.16	57.54

Trade and Commerce. — Though South Arcot has an intermediary port at Cuddalore, there is not much of seaborne trade in the district. Main commodity imported from foreign country through the port was urea. During the year 1978-79, Rs. 311 lakhs worth of urea was imported from foreign countries. No export was reported during the year.

The Buckingham canal which establishes communication to the district is the only water way engaged in trade and commercial activities and a reference to which has already been made in the succeeding paragraphs.

South Arcot is linked with all major cities and towns by well laid roads. Trucks, tempos, hand carts and bullock carts move in and out of the district every day bringing in and taking out commodities of all kinds. Precise statistics could not be presented for want of details. There are 947 registered good vehicles and 1,533 tractors actively engaged for transport of goods from the district to various places. Some of the important commodities that move out of the district are foodgrains, sugar, fertilisers, papers, chemicals, etc.

Commercial banks play a vital role in promoting trade and commerce by providing loan facilities and export advice. There were 115 commercial bank branches functioning in the district as on 30th June 1977. Total deposits of these banks were Rs. 3,178 lakhs.

There are 22 consumer co-operative stores in the district for supplying necessities of life at fair price. Talu-wise details of these stores are presented below :

Consumer Co-operative Stores in 1979-80.

Talu.	VALUE OF SALES. (IN RUPEES)				
	Number of Stores.	Working capital.	Food grains.	Sugar.	Others.
(1)	(2)	(3)	(4)	(5)	(6)
Cuddalore	6	1,091,577	93,601	793,145	7,390,224
Tittakudi	2	69,825	48,170	115,170	230,463

Tindivanam	5	36,000	1,44,000	66,000	64,000
Villupuram	5	361,297	11,100	651,272	2,881,111
	22				

Transport and Communication :- The district can be proud of a net work of well laid out and built road system running in all directions, connecting various centres of the district. The district has a well knit road system of more than 7,326 kms., connecting various centres of importance in the region. Being adequately served by roads and railways, South Arcot district can be said to have a good communication net work. The following statement shows the length of roads in the district by maintenance as on 31st March 1980.

Length of roads in the district in Kms. as on 31st March 1980.

Maintained by	
National Highways	7,700
State Highways	146,800
Major District Roads	1,147,260
Other District Roads	1,303,529
Municipalities	327,838
Panchayat Union including Town Panchayats	4,393,870
Total	7,326,997

The National Highway—The old southern trunk road from Madras to Tiruchirappalli passes through the towns of Tindivanam, Villupuram and Ulundurpettai. Important among the State Highways are the Cuddalore—Chittoor road passing through Panruti and Tirukkoyilur and the Ulundurpettai—Anur road passing through Kallakurichchi and Chinnasalem.

There are 368 Kms. of railways in the district. The main line from Madras to Dhanushkodi runs via Tindivanam, Villupuram, Cuddalore and Chidambaram. The chord line from Villupuram to Tiruchirappalli runs via Ulundurpettai and Vriddhachalam. A branch line connects Villupuram and Karaikal and another branch line connects Villupuram with Pondicherry. Vriddhachalam is connected by branch lines with Cuddalore and Salem. There are 57 railway stations in the district.

Command Areas of the district, 1979-80.

Name of Project.	Taluk.	Area irrigated.
(1)	(2)	(3)
1. Perumal Tank	Cuddalore	2,158
2. Tirukkoyilur Anicut	Ulundurpet	2,580
3. Ellis Choultry	Ulundurpet	75
4. Thiruvathigai	Panruti	2,096
5. Ellis Choultry	Panruti	320
6. Sathanur	Tirukkoyilur	2,169
7. Tirukkoyilur Anicut	Tirukkoyilur	2,142
8. Wellington Reservoir	Vriddhachalam	416
9. Palandurai Anicut	Vriddhachalam	694
10. Vriddhachalam	Vriddhachalam	1,506
11. Mehamathur Tank	Vriddhachalam	2,486
12. Vidur Reservoir	Tindivanam	739
13. Wellington Reservoir	Tittakudi	8,103
14. Manimuktha Nadhi	Kallakurichchi	1,627
15. Gomuki Nadhi	Kallakurichchi	2,444
16. Lower Coleroon	Kattumannarkoil	15,122
17. Palandurai Anicut	Kattumannarkoil	4,213

Wells which provided an unfailing supply of water remained an important source of irrigation in the district. There are 1,85,395 wells including tube wells in the district used exclusively for irrigation. During the year 1980-81, these wells irrigated an area of about 187,735 hectares. Electric as well as oil engine pumps are being used widely for pumping water from these wells. During 1980-81, 526 electrical and 174 diesel pumps were in use in the district.

Other sources of irrigation in the district are springs, ponds, etc.

The thermal Power Station of Neyveli Lignite Corporation is the only power plant located in the district. It is the largest pit head station in the country. It has six units of 50 M.W. each and three units of 100 M.W. each. Generation of power during 1979-80 at 2,096 million K.W. accounting for 54 per cent of the state thermal generation and 23 per cent of total power generated in the State was lower than the previous years 2,212 million K.W. For the year of review, the Corporation earned a revenue of Rs. 5,249 lakhs from power sales. Besides the second thermal power station (630 MW) associated with the second mine cut, a super thermal station (1,500 MW) is being proposed.

Consumption of electricity for different purposes in the district during 1979-80 is as follows:—

Power consumption in 1979-80.	(In Million units.)
Domestic light and fans	30,037
Power	0.139
Commercial light and fans	L.T. 14,382
Power	H.T. 1,109
Public lighting	4,938
Industrial	L.T. 30,230
.. .. .	H.T. 32,053
Water works	3,179
Agricultural	241,155
Traction	3,963
Railways	2,015
Others	125,314

All the towns and villages of the district except 102 villages in Kalrayan Hills of Kallakurichchi taluk were electrified as on 1979-80.

Animal Husbandry.—According to the Livestock Census of 1977, the district has a livestock population of 7,798,843, which includes 1,829,456 cattle and buffaloes, 364,346 sheep, 459,881 goats and 141,243 pigs and 1,236,271 poultry.

The activities of the department in the district are controlled by four Assistant Directors, whose headquarters are located at Tirukkoyilur, Tindivanam, Chidambaram and Vriddhachalam. The following veterinary institutions in the district are engaged in rendering veterinary aid to the livestock:—

1. Veterinary Hospitals	3
2. Veterinary Dispensaries	51
3. Veterinary Dispensary-cum-Key Village Centre	1
4. Clinical Centre	1
5. Clinical Laboratory	1
6. Veterinary sub-centres	219
7. Animal Disease Intelligence unit	1

To improve the quality of cattle, one Intensive Cattle Development Project is functioning at Panruti which covers twelve Panchayat Unions and three Municipalities, two Regional Artificial Insemination Centres and 50 sub-centres. The object of the scheme is to upgrade the cattle by cross breeding with exotic breed and to step up the milk yield in the project area within a period of five years. There are four bull stations in the district engaged in the supply of semen to the veterinary institutions for carrying out the artificial insemination work. A rinderpest district squad is functioning at Cuddalore for successful eradication of rinderpest disease among cattle.

There is a sheep farm at Chinnasalem for development of sheep in the district. As on 1979-80, there were seven sheep breeding co-operative societies in the district. Augmenting the production of

Posts and Telegraphs form an important component of 'communications' and there are now 1,244 post offices in the district of which 172 have telegraphic facilities. The head post and telegraph office is at Cuddalore. There are 881 extra departmental branch offices in the district and the balance of 363 represent the head office, extra departmental sub-offices and lower selection grade sub-offices.

An overall picture of roads, railways and the post and telegraph services shows that the district is well served by modern means of communication.

Due to the limitations and locational characteristics of the railway lines in the district, buses play a dominant role in the transport system. About 500 stage carriages run both by the Thanjai Periyar transport corporation and private bus operators inter connect all important place in and around the district. Supplementing the route buses, 64 auto-rickshaws and 30 ordinary taxis are in operation in the district.

Goods transport by lorries is better organised in the district. There are 947 goods carriages in the district for moving cargo to various places. The Buckingham Canal linking the Krishna river in Andhra Pradesh with Markaram back waters in the district is a navigation canal. It runs almost parallel to the coromandel coast within the limit of 5 Kms. from the coast.

Buckingham canal establishes communication from Krishna and Coovari deltas to the district through the city of Madras. The traffic in the canal is mainly of country boats. During 1979-80, 255 boats were used for movement of cargo. Cargo carried consists mainly of salt, paddy, firewood, etc.

The district has an intermediary port at Cuddalore. During the year 1979-80, 12 steamers and sailing vessels entered the harbour and the volume of foreign trade at the port was 28.70 thousand tonnes.

Important Social, Cultural and Political events.—Most important social, cultural and political events which took place in the district during the decade 1971-1980 are briefly mentioned in the following paragraphs in a chronological order :

- 1972 During the month of September, a modern rice mill was opened at Manalur village in Chidambaram taluk by the Food Corporation of India. Heavy floods in Pennar river during November caused heavy damage to property. A new industry viz., Arvind Distillery was set up at Kadampuliur village in Panruti taluk. Heavy rains and cyclonic storms in Vriddhachalam taluk caused breaches in Toludur bridge.
- 1973 Kumbabishegam in Padaleswarar temple in Cuddalore taluk was performed during the month of February. A Primary Health Centre at Vikravandi village and veterinary dispensary at Chinnapabusamudram village in Villupuram taluk was opened during the year.
- 1974 A Government High School at Kanai village during July and another High School at Pillur village during August were opened. Another important event of the year was the opening of a new bridge across Gadilam river. This year also witnessed an acute drought and scarcity of drinking water in Tindivanam taluk.
- 1975 During the month of January, Nepal queen visited Chidambaram. Cuddalore taluk was bifurcated into Cuddalore and Panruti taluks during March and another event took place during the month was upgrading of Panruti taluk into a full fledged taluk. Another important event during the year was bifurcation of Tirukkoyilur taluk into Tirukkoyilur and Ulundurpettai taluks.
- 1976 An overbridge across railway line between Ayyankoilpattu and Ayyuragaram villages in Villupuram taluk was opened during April. During the month of July, two events worth mentioning were the opening of new bus stand in Tindivanam town and inauguration of Government Hospital at Chidambaram.

- 1977 This year can be singled out for the heavy rains brought by North East monsoon. Most of the rivers in the district, viz., Pennar, Gadilam and Manimuthar were in floods.
- 1978 Most important event of the year was the bifurcation of Chidambaram taluk into Chidambaram and Kattumannarkoil taluks during the month of August. Kattumannarkoil taluk was upgraded as a full fledged taluk during the same month. New court building at Ulundurpettai and a sub-court at Tindivanam were inaugurated during the year.
- 1979 During August, Vriddhachalam taluk was bifurcated into Vriddhachalam and Tittakudi taluks and Tittakudi sub-taluk was upgraded as a full fledged taluk. A super market was inaugurated at Ulundurpettai. Prime Minister Shri Indira Gandhi visited Vriddhachalam during December. Another important event during December was the Golden Jubilee celebrations of Annamalai University and visit of the President of India, Shri N. Sanjeeva Reddi to preside over the function.
- 1980 Vriddhachalam town panchayat was upgraded as Municipality during the month of January. The most important event during February was the performance of Maha Kumbabishegam in Sri Nataraja temple, the pride of Chidambaram taluk.

Place of Historical, Religious and Archaeological importance.—Chidambaram is a temple town and the headquarters of Chidambaram taluk. It is famous for the ancient temple of Lord Nataraja. It is one of the largest temples in South India, covering an area of not less than 39 acres. Lord Siva is worshipped here in the form of Akasa lingam and is therefore invisible. The temple is noted for its five sabhas and or halls known as Raja Sabha, Deva Sabha, Chit Sabha, Kanaka Sabha and Nritta Sabha. Of these, the Raja Sabha is a thousand-pillared mantapam, 340 feet by 180 feet. This temple which is differently known in religious literature as Chit Ambalam, Pornambalam and Tillai Ambalam, is associated with Saint Manikka Vasagar who had the triumph of his life in defeating the Ceylonese Buddhists who attempted to overthrow the worship of Siva. The anniversary of the event is still celebrated. The saint is also said to have attained Nirvana at this place. Saints Tirugnanasambandar, Appar and Sundarar also worshipped at this shrine and immortalised it in their sacred songs. The Arudra Darsanam in this temple in December-January and Ani Tirumanjanam in June-July are attended by a large number of people all over the State.

2. Cuddalore is the headquarters of Cuddalore taluk and the South Arcot district. It is a first class Municipality. It can be divided into four parts, viz., Cuddalore Old Town, the commercial quarter on the shore, Cuddalore New Town or Tirupapuliyur on the south bank of the Gadilam river, Manjakuppam, the official centre where the public offices are situated, and Fort St. David on the north of the river Gadilam. Cuddalore Old Town is an important river port and a commercial centre. In Tirupapuliyur, there is an old Siva temple dedicated to Lord Pataleswarar which is referred to in the Thevarams. The Brahmotsavam festival in this temple is largest attended by people in this taluk as well as other taluks.

3. Gingee (Senji) is the head quarters of the Gingee taluk. It is famous for the historical fort, which stretches about 2 kms. and stands on three hills. The place has great historic importance. The fort is a very interesting monument for students of history and tourists. The citadel on the north is called Krishnagiri, that on the south Chandrayendurg and that on the west Rajagiri. A weekly fair is held on all Fridays to which people come from the neighbouring villages.

4. Malaiyanur is a village in Gingee taluk, thirteen kilometres north-west of Gingee. There is an Angalamman temple in this village. The annual festival in February-March in which the Sembadavars mainly participate is famous.

5. Mannargudi is a small town in Chidambaram taluk. It is called Kattu Mannargudi to distinguish it from Raja Mannargudi in Thanjavur district. The village is reputed as the birth place of the Vaishnavite saints, Nodamunigal and Alavandar. The local Vaishnavite temple is famous for its sanctity.

6. Mailam is a village in Tindivanam taluk, 13 kilometres by south of Tindivanam. This place is chiefly known for its temple of Lord Subramanya. It is believed that the place was named after the peacock which is the Lord's Vahanam. The three festivals in the temple in the

months of January, March and July are attended by huge crowds from various parts of the State. Cattle fairs are held in connection with each of these festivals and special trains are run for the benefit of pilgrims on these occasions.

7. Neyveli is a well known place in Vriddhachalam taluk, situated 18 kilometres to the east of Vriddhachalam and 43 kilometres to the south-west of Cuddalore. Due to the mining of Lignite by the Neyveli Lignite Corporation, this place has now achieved international recognition. Lignite deposits are spread over more than 100 square miles in and around the place. A new township has been established at considerable cost. A thermal station and other allied factories have also been established.

8. Porto-Novo in Chidambaram taluk, otherwise known as Parangipettai, is situated on the north bank of the mouth of Vellar. The Portuguese were the earliest European settlers of the place from whom it passed into the possession of the Dutch. The Dutch finally handed it over to the English in 1824. This town has a large Muslim population engaged mostly in sea-trade. Tombs of several Muslim saints were situated in this place, most important among them being the dargahs of Saint Malumiyar, Araikasu Nachiyar, Hafiz Mir Sahib and Saiyed Sahib.

9. Singavaram is a village in Gingee taluk, three kilometres north of Gingee. There is a shrine of Lord Ranganatha which is supposed to have been the tutelary deity of Raja Desing. A few Jain monuments are also seen here.

10. Tirukkoyilur lies on the bank of the Pennaiyar and has a fine view of the Kalrayan and Tenmala hills on the one side, Thiruvannamalai peak on the other and the Gingee Hills on another side. The ancient Vishnu temple built by the Pallavas here is dedicated to Trivikarma Perumal. There is also a famous Siva temple here.

11. Tiruvannainallur is a village in Tirukkoyilur taluk about 22 kilometres south-west of Tirukkoyilur. Kambar is stated to have lived in this place. Saint Sundarar is supposed to have married here. The Siva temple in this village dedicated to Kripatiswara is a very sacred shrine.

12. Vriddhachalam, the headquarters of Vriddhachalam taluk, is noted for its ancient Siva temple dedicated to Vriddhagiriswarar, celebrated in the Thevarams. There are several legends connected with this temple. Masi Magam is the important festival in this place when a large number of pilgrims flock to this place to have a bath in the sacred Manimukthar river. There is a ceramic factory near the railway junction.

A brief analysis relating to certain population characteristics is made, utilising the information collected in the Village and Town Directory. A number of tables have been designed for this purpose. The tables are generated at the district and taluk levels for the rural areas, and in regard to urban areas, townwise particulars are presented.

TABLE 1.—DISTRIBUTION OF VILLAGES ACCORDING TO THE AVAILABILITY OF DIFFERENT AMENITIES.

Serial Number of Taluk	Number of Villages	Number (with percentage) of villages having one or more of the following amenities							
		Education	Medical	Drinking water	Post and Telegraph	Market/hat	Communications	Approach by pucca road	Power supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
1. Gingee	247	222 (89.88)	44 (17.81)	247 (100.00)	97 (39.27)	6 (2.43)	91 (36.84)	58 (23.48)	243 (98.38)
2. Tiruvannam	299	281 (93.98)	73 (24.41)	299 (100.00)	166 (55.52)	54 (18.06)	194 (64.88)	174 (58.19)	299 (100.00)
3. Vriddhachalam	225	211 (93.78)	31 (13.78)	225 (100.00)	128 (56.89)	6 (2.67)	127 (56.44)	153 (68.00)	225 (100.00)

Total	2,280	2,106 (92.37)	345 (15.13)	2,280 (100.00)	1,126 (49.39)	112 (4.91)	1,324 (58.07)	1,186 (52.02)	2,221 (97.41)

Table 1.—This table furnishes the distribution of villages according to the availability of different amenities. There are 2,280 inhabited villages in the district of which 92.37 per cent are provided with the amenity of education. The important amenity of medical is existing only in 345 villages which works out to a low percentage of 15.13. The provision of drinking water is available to a little less than 2,280 villages in the district. Post and Telegraph facilities are available in 49.39 per cent of the villages. But the amenity of market/hat is existing only in 112 villages out of 2,280, viz., only 4.91 per cent of the villages. A well market facility is available in 58.07 per cent of the villages in the district. The amenity of communication, the pucca road facility is available by 52.02 per cent of the villages. It is notable that power supply is available to 97.41 per cent of the total villages, viz. 2,221.

TABLE 2.—PROPORTION OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES.

Serial Number and Name of the Village	Total Population of inhabited Villages	Proportion of rural population served by the amenity of							
		Education.	Medical.	Drinking water.	Post and Telegraph.	Market/hat.	Communications.	Approach by pucca road.	Power supply.
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
1. Gingee	331,496	321,183 (96.89)	109,446 (33.02)	331,496 (100.00)	205,095 (61.87)	23,566 (7.11)	174,480 (52.63)	117,815 (35.54)	331,249 (99.93)

11. Chidambaram	250,487	249,064 (99.43)	66,685 (26.62)	250,487 (100.00)	181,196 (72.34)	21,960 (8.77)	181,883 (72.61)	246,218 (98.30)	250,487 (100.00)
12. Kattumannarkoil	203,179	197,842 (97.37)	46,442 (22.86)	203,179 (100.00)	137,736 (67.79)	39,957 (19.67)	133,477 (65.69)	110,047 (54.16)	203,145 (99.98)
Total	3,542,046	3,458,068 (97.63)	1,068,920 (30.18)	3,542,046 (100.00)	2,464,509 (69.58)	318,434 (8.99)	2,455,822 (69.33)	2,229,016 (62.93)	3,513,997 (99.21)

Table 2.—This table shows the proportion of rural population served by different amenities in the district. The rural population of the district is 3,542,046 and all of them are served by the amenity of drinking water, the percentage being 100.00. The amenities of power supply and education are provided to 99.21 and 97.63 percent of the total rural population of the district respectively. Post and Telegraph, communication and approach by pucca road facilities are available to the rural people of the district to the extent of 69.58, 69.33 and 62.93 per cents respectively. Only 30.18 percent of the total rural population are served with the important amenity of medical in the district. The amenity of market/hat recorded the lowest percentage of all the amenities in the district as such facility is available to only 8.99 per cent of the total rural population.

TABLE 3.—DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE.

Villages not having the amenity of:	Number of villages where the amenity is not available and available at a distance of:			
	—5 kms.	5—10 kms.	10+kms.	Total (Cols. 2-4)
(1)	(2)	(3)	(4)	(5)
Education	120	21	33	174
Medical	768	681	486	1,935
Drinking water	..	..	..	..
Post and Telegraph	801	195	158	1,154
Market/Hat	827	693	648	2,168
Communication	573	181	202	956

Table 3.—This table deals with the distribution of villages not having certain amenities in themselves but available at a distance which have been given in the table. Out of 174 villages which have no educational facilities in the respective villages itself, 120 villages avail this amenity at a distance of less than 5 kms., 21 villages avail at 5—10 kms. and the remaining 33 villages avail at a distance of 10+kms. Similarly, out of 1,935 which have no medical facilities in the respective villages itself, 768 villages avail this amenity at a distance of less than 5 kms., 681 villages at 5—10 kms. and 486 villages avail at a distance range of over 10 kms. It is notable that all the inhabited villages have got the amenity of drinking water in their respective villages itself.

Regarding post and telegraph, 801 villages avail the facilities at a distance of less than 5 kms., 195 villages at a distance of 5—10 kms and 158 villages avail at a distance range of more than 10 kms. The amenity of market/hat is not available in the villages itself for 2,168 villages out of the total of 2,280 villages in the district and that 827 villages avail at a distance range of less than 5 kms., 693 at 5-10 kms. and 648 villages avail at a distance of 10+kms. Regarding communication, 956 villages are not having this amenity in the respective villages itself and that 573 villages have this amenity at a distance of less than 5 kms., 181 villages at 5-10 kms. and the remaining 202 villages avail at a distance range of 10+kms.

TABLE 4.—DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST TOWN AND AVAILABILITY OF DIFFERENT AMENITIES.

Distance range from the nearest Town (in kms.)	Number of Inhabited Villages in each range.	Number (with percentage) of villages having the amenity of							
		Educa-tion.	Medi-cal.	Drin-king water.	Post & Telegraph.	Market/hat	Communi-cations.	Pucca road.	Power supply

	..	4,201,869	659,623	15.70	+ 28.58							

Table 8 gives the details of growth rate, density and sex ratio of urban population in South Arcot district for the decades, 1951 to 1981. The percentage of urban population to total population in this district has gone up from 11.79 in 1951 to 15.70 in 1981. During this period, corresponding percentage of State's urban population has also increased from 24.35 in 1951 to 32.95 in 1981. The density of urban population per sq. km. in South Arcot district which was 1,407 persons in 1961 has steadily increased to 2,152 in 1971 and to 2,325 in 1981. The sex ratio for the district is 963 while for the State it is 956.

TABLE 9—NEW TOWNS/TOWNS DECLASSIFIED IN 1981 CENSUS.

Name of Towns.	Population in 1981 Census.
(1)	(2)
(a) Added	
(i) Gengaikondan	7,338
(ii) Melpathi	3,528
(iii) Thorapadi	6,513
(b) Declassified	NIL.

Table 9 indicates the recognition of the new towns and the declassification of towns made in the 1981 Census. Three towns have been recognised as new towns in this district while no town has been declassified as rural during 1981 Census.

Table 4.—This table furnishes the distribution of inhabited villages according to the distance from the nearest town and availability of different amenities. Among the total inhabited villages of 2,280 in the district, 273 villages are located in the distance range of 0—5 kms., from the nearest town and all the 273 villages have the amenities of drinking water and power supply, the amenity of education is availed by 91.94 per cent of the villages, pucca road by 65.20 per cent, post and telegraph by 54.58 per cent, communication by 58.24 per cent, medical by 13.55 per cent and market/hat is availed by 4.76 per cent of the villages in this range. In the distance range of 6-15 kms., there are 870 inhabited villages. Among these villages, the amenity of education is availed by 94.71 per cent of the villages, medical by 17.59 per cent, drinking water is availed by all the 870 villages, post and telegraph by 52.18 per cent, market/hat by 5.98 per cent, communication by 64.83 per cent, pucca road by 62.18 per cent and power supply is availed by 99.54 per cent of the villages in this range. There are 1,124 inhabited villages in the distance range of 16-50 kms. from the nearest town concerned. 90.75 per cent of these villages avail the amenity of education, the amenity of medical by 13.79 per cent, drinking water by cent per cent, post and telegraph by 46.17 per cent, market/hat by 4.18 per cent, communication by 52.94 per cent, pucca road by 41.37 per cent and power supply by 5.74 per cent of the inhabited villages in this range. In the distance range of 51+kms., 13 villages occur and all these villages enjoy the amenity of drinking water. The educational facilities are in 11 villages (84.62 per cent), power supply and communications are availed by 6 villages (46.15 per cent), post and telegraphs by 4 villages (30.77 per cent) and pucca road facilities are availed by 2 villages (15.38 per cent) of them.

TABLE 5.—DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE.

Population range.	Number of Inhabited Villages in each range.	Number (with percentage) of villages having the amenity of							
		Educa- tion.	Medi- cal.	Drin- king water.	Post and Tele- graph.	Market/ hat.	Commu- nica- tion.	App- roach by pucca road.	Power supply.
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
-499	300	184 (61.33)	14 (4.67)	300 (100.00)	51 (17.00)	16 (5.33)	114 (38.00)	106 (35.33)	265 (88.33)
500—1,999	1,417	1362 (96.12)	130 (9.17)	1,417 (100.00)	575 (40.58)	43 (3.03)	765 (53.99)	880 (47.99)	1,394 (98.38)
2,000—4,999	506	503 (99.41)	165 (32.61)	506 (100.00)	444 (87.75)	34 (6.72)	392 (77.47)	352 (69.57)	505 (99.80)
5,000+	57	57 (100.00)	38 (63.16)	57 (100.00)	56 (98.25)	19 (33.33)	53 (92.98)	48 (84.21)	57 (100.00)
Total	2,280	2,106 (92.37)	345 (15.13)	2,280 (100.00)	1,126 (49.39)	112 (4.91)	1,324 (58.07)	1,186 (52.02)	2,221 (97.41)

Table 5.—This table shows the distribution of inhabited villages according to different population ranges and amenities available. Among the four categories of population ranges, 300 inhabited villages come under the population range of—499 in which the amenity of drinking water is availed by all the villages, education by 61.33 per cent of the villages, medical by a poor percentage of 4.67 per cent, post and telegraph by 17.00 per cent, market/hat by 5.33 per cent, communication by 38.00 per cent, approach by pucca road by 35.33 per cent and power supply by 88.33 per cent of the villages. Similarly, there are 1,417 inhabited villages in the population range of 500—1,999 and all these villages avail the amenity of drinking water. Power supply is availed by 98.38 per cent of these villages, education by 96.12 per cent, communication by 53.99 per cent, pucca road by 47.99 per cent, post and telegraph by 40.58 per cent, medical by 9.17 per cent and market/hat by 3.03 per cent. Under the population range of 2,000—4,999, there are 506 inhabited villages and all these villages avail the amenity of drinking water. Power supply is availed by 99.80 per cent of the villages, education by 99.41 per cent, post and telegraph by 87.75 per cent, communication by 77.47 per cent, approach by pucca road by 69.57 per cent, medical by 32.61 per cent and market/hat by 6.72 per cent.

In the fourth category of population range of 5,000+ there are 57 inhabited villages and all the amenities of education, drinking water and power supply are availed by all the 57 villages. The amenities of post and telegraph, communication and pucca road in this range are availed by 98.25 per cent, 92.98 per cent and 84.21 per cent of the villages respectively. Medical and market/hat amenities are availed by 63.16 per cent and 33.33 per cent of the villages in this population range.

Table 6.—MAIN STAPLE FOOD IN THE MAJORITY OF VILLAGES IN EACH TALUK.

Serial Number and Name of Taluk. (1)	Main staple food. (2)
1. Gingee	Rice and Ragi.
2. Tindivanam	Rice and Millets.
3. Villupuram	Rice.
4. Tirukkoyilur	Rice and Millets.
5. Kallakurichchi	Rice and Millets.
6. Ulundurpettai	Rice and Millets.
7. Panruti	Rice and Ragi.
8. Cuddalore	Rice and Millets.
9. Vriddhachalam	Rice and Ragi.
10. Tittakudi	Rice and Millets.
11. Chidambaram	Rice.
12. Kattumannarkoil	Rice.

Table 6.—This table furnishes the main staple food in terms of grains consumed by the majority of the population of the villages in each taluk. In all the 12 taluks of the district, rice is being consumed as the main staple food. It is either taken alone or taken along with millets locally grown in most of the taluks of the district. In the taluks of Gingee, Panruti and Vriddhachalam, ragi is being used with rice.

Table 7.—DISTRIBUTION OF VILLAGES ACCORDING LAND USE

Serial Number and Name of Taluk.	Number of Inhabited Villages.	Total area (in hectares).	Percentage of cultivable area to total area.	Percentage of irrigated area to total cultivable area.
(1)	(2)	(3)	(4)	(5)
1. Gingee	247	96,689.67	69.47	21.89
2. Tindivanam	299	141,916.39	73.67	25.24
3. Villupuram	225	87,486.34	70.64	51.85
4. Tirukkoyilur	173	68,867.88	55.94	33.35
5. Kallakurichchi	329	202,866.55	53.95	14.28
6. Ulundurpettai	176	71,178.15	70.85	27.49
7. Panruti	94	52,056.48	90.03	38.40
8. Cuddalore	115	48,986.47	77.65	38.84
9. Vriddhachalam	156	77,501.99	79.40	22.19
10. Tittakudi	132	59,527.57	77.65	22.60

12. Kattumannarkoil	158	44,962.56	77.71	46.45
Total	2,280	1,006,544.57	70.08	29.68

Table 7.—This table gives the distribution of inhabited villages according to land use. The total area of all the inhabited villages in the district is 1,006,544.57 hectares of which the percentage of the cultivable area to total area works out to 70.08. The taluks of Panruti, Chidambaram, Vriddhachalam, Kattumannarkoil, Tittakudi and Cuddalore have got more than 75 per cent of the total area as cultivable area. Kallakurichchi and Tirukkoyilur taluks have recorded the lowest percentages of 53.95 and 55.94 of the cultivable area to total area respectively. The percentage of irrigated area to total cultivable area in the district is 29.68. Among the 12 taluks in the district, Chidambaram and Villupuram taluks have got the highest percentages of 64.95 and 51.85 of the irrigated area to total cultivable area.

The taluks which possess the lowest percentages of irrigated area to total cultivable area in the district are Kallakurichchi, Gingee, Vriddhachalam and Tittakudi.

TABLE 11—SCHOOLS PER TEN THOUSAND POPULATION IN TOWNS.

Serial Number, Class, Name and Civic Status of Town.			Number per ten thousand population.			
			Higher Secondary/ Inter/P.U.C./ Junior College.	Secondary/ Matriculation.	Junior Secondary/ Middle.	Primary.
			(2)	(3)	(4)	(5)

Table 14 furnishes the items of most important commodities manufactured, exported and imported in the towns of South Arcot district.

SECTION 1.
VILLAGE DIRECTORY.

NOTE EXPLAINING THE CODES USED IN VILLAGE DIRECTORY

NA—Information not available.

Educational :

P—Primary or Elementary School.
M—Junior Secondary or Middle School.
H—Matriculation or Secondary School.
PUC—Higher Secondary/Intermediate/Pre-University/Junior College.
C—College, Any College, (Graduate level and above) like Arts, Science, Commerce, etc.
I—Industrial School.
Tr.—Training School.
AC—Adult Literacy Class/Centre.
O—Other educational institutions. These include Sanskrit, Pathshala, Senior Basic School, Makhtab, etc.

Medical :

H—Hospital.
MCW—Maternity and Child Welfare Centre.
MH—Maternity Home.
CWC—Child Welfare Centre.
HC—Health Centre.
PHC—Primary Health Centre.
PHS—Primary Health Sub-Centre.
D—Dispensary.
FPC—Family Planning Centre.
TB—T. B. Clinic.
NH—Nursing Home.
RP—Registered Private Practitioner.
SMP—Subsidised Medical Practitioner.
CHW—Community Health Worker.
O—Others.

Drinking water :

T—Tap Water.
W—Well water
TK—Tank water.
TW—Tube Well Water.
HP—Hand Pump.
R—River Water.
F—Fountain Water
C—Canal.
L—Lake.
S—Spring.
N—Nallah.
O—Others.

Post and Telegraph :

PO—Post Office.
 TO—Telegraph Office.
 PTO—Post and Telegraph Office.
 Phone—Telephone connection.
Communications :
 BS—Bus.
 RS—Railway Station.
 NW—Navigable Waterways (including river, canal backwaters etc.).

Approach to village :

PR—Pucca Road.
 KR—Kaccha Road.
 NR—Navigable River.
 NC—Navigable Canal.
 NW—Navigable Waterway (other than river or canal).

Power Supply :

ED—Electricity for domestic purpose.
 EAG—Electricity for Agriculture.
 EO—Electricity for other purposes like Industrial, Commercial, etc.
 EA—Electricity for all purposes listed above.

Irrigated by source :

G.C.—Government Canal.
 PC—Private Canal.
 W—Well (without electricity).
 WE—Well (with electricity).
 TW—Tube well (without electricity).
 TWE—Tube well (with electricity).
 TK—Tank.
 R—River.
 L—Lake.
 Wf—Water fall.
 O—Others.
 T—Total.

Other aspects :

N—Copies of the newspapers coming in the village.
 M—Motor Cycles/Scooters available in the village.
 C—Cars/Jeeps available in the village.
 T—Tractors available in the village.
 —No facility available.
 .. Nil particulars.

NOTE EXPLAINING THE CODES USED IN THE TOWN DIRECTORY.

STATEMENTS I AND III.

Class of towns by population:

Population.	Class.
100,000 and above	I
50,000—99,999	II
20,000—49,999	III
10,000—19,999	IV
5,000—9,999	V
Below 5,000	VI

Civic administration status of the town:

M. Corp	—	Municipal Corporation/Corporation.
M	—	Municipality.
NP	—	Nagar Panchayat/Town Panchayat.
GP	—	Gram Panchayat/Village Panchayat.
TC	—	Town Committee/Town Area.
CB	—	Contonment Board/Contonment.

STATEMENTS IV AND IV-A.

SC	—	Scheduled Castes.
ST	—	Scheduled Tribes.

Type of Road:—

PR	—	Pucca Road.
KR	—	Kutchia Road.

System of sewerage:—

S	—	Sewer.
OSD	—	Open surface drains.
BSD	—	Box surface drains.
SD	—	Sylk drains.
CD	—	Cesspool method.
Pt	—	Pit system.

Method of disposal of night soil:—

HL	—	Head loads.
B	—	Baskets.
WB	—	Wheel Barrows.
ST	—	Septic Tank latrines.
S	—	Sewerage.

System of storage of water:—

OHT	—	Overhead Tank.
SR	—	Service Reservoir.
IG	—	River Infiltration gallery.
BWP	—	Borewell Pumping System.
PT	—	Pressure Tank.

Source of drinking water:—

TW	—	Tube well water/Hand pump.
T	—	Tap water.
W	—	Well water.
TK	—	Tank water.

STATEMENT V

Medical facilities:—

H	—	Hospital.
D	—	Dispensary.
HC	—	Health Centre.
FC	—	Family Planning Centre.
TB	—	T.B. Clinic.
NH	—	Nursing Home.
O	—	Others.
A	—	Ayurvedic.
U	—	Unani.
Hom	—	Homeopathic.

Educational facilities:—

A	—	Arts only.
S	—	Science only.
AS	—	Arts and Science only.
C	—	Commerce only.
AC	—	Arts and Commerce only.
ASC	—	Combined for all categories Arts, Science and Commerce.
L	—	Law.

Recognised shorthand, typewriting and other vocational institutions:—

SH	—	Shorthand.
Type	—	Typewriting.
SH. Type	—	Shorthand and Typewriting.
O	—	Others.

Public libraries and reading rooms:—

PL	—	Public Libraries.
RR	—	Reading Rooms.
