Appendix Towns showing their out-growths with population	344

Responsibility for the correctness of internal details shown on the maps rests with the publisher.

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Government, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village, the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of Scheduled Caste and Scheduled Tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Caste and Scheduled Tribe population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual silp of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that part-A of the volume contains village and town directory and part-B, the PCA of villages and towns including the Scheduled Caste and Scheduled Tribe PCA upto Taluk/Town level. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value. The district and taluk level maps depicting the boundaries and other important feature have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri A. P. Muthuswami, I.A.S., Director of Census Operations, Tamil Nadu on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorate have been scrutinised in the Social Studies Division at the head quarters under the guidance of Shri. M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi,
the 26th April, 1982.

P. PADMANABHA
Registrar General, India.

PREFACE

It has been the tradition of the Government of Tamil Nadu to publish immediately after each census a District Census Handbook separately for each district containing the Census statistics besides other valuable data of local importance, for the use of the State Government, district administration, research scholars and other data users. The first series of District Census Handbooks were brought out immediately after the 1951 Census, and the present publication after the 1981 census is the fourth in the series.

The Census statistics presented in this publication were collected during the census operations in February - March, 1981, as at the sunrise of the 1st March, 1981. The other statistics in this publication have been collected from various departments of the State and Central Governments.

This publication consists of the following two parts.

Part-A: Village and Town Directory and

Part-B: Village and Townwise Primary Census Abstract.

Taking into account the increasing and varied developmental and other welfare measures undertaken by the Government, the scope and content of the data in this publication have been considerably enlarged and improved to meet the requirements of the planners and other data users. In particular, certain inset tables based on census and other data have been included in this publication with brief analytical notes thereon.

This publication contains a brief history of the district highlighting the major characteristics of the district in relation to the economic resources like forestry, minerals, etc. besides the social, cultural, religious and historical aspects. The district and taluk maps in this publication give the administrative units upto village level, the rural and urban units, the location of towns and cities, communication facilities and other related details.

The facilities and amenities available in respect of education, medical, drinking water, post and telegraph, markets, communication, etc. in each village and town have been included in this publication, and an important feature is that wherever the above facilities and amenities are not available in any particular village/town, the nearest place where they are available has also been reported.

Another interesting feature in this publication is that village with none of this amenities have been listed out separately for the pointed attention of the planners and administrators.

Certain tables present data exclusively in respect of the weaker sections of the society belonging to the Scheduled Caste and Scheduled Tribe.

The land use pattern in respect of rural and urban areas have also been reported in this publication which would meet the requirement of micro level planning for rural and urban areas.

The data in respect of urban areas, apart from the medical and other facilities available, relate to the growth of towns, the availability of protected water supply, and what is important, the civic amenities available in the slums of the urban areas.

Part B of this volume consists of the District and Village / Town wise Primary Census Abstract followed by Primary Census Abstract of Scheduled Castes and Scheduled Tribes.

The district Primary Census Abstract gives for each territorial unit upto Taluk level in the case of rural areas and upto town level for urban areas, occupied residential houses, households, the total population, the Scheduled Caste and Scheduled Tribe population,

workers, etc, thereby indicating the basic socio-economic characteristics of the population for the territorial units. The village and townwise Primary Census Abstract gives similar information for villages and wards of towns. Besides, there is an appendix which furnishes at urban block level the total population and Scheduled Caste and Scheduled Tribe population.

I am grateful to the Collectors and other district officers and Departments of the State Government who have extended their unfailing co-operation and help in collecting the voluminous and useful data other than Census, for their presentation at one place in this publication, for the ready reference of the data users.

In bringing out this publication, I have received assistance from Shri M. Thangaraju, Shri M. Nagappan, Deputy Directors and Shri A. V. Vallinathan, Assistant Director besides a large number of staff members of this Directorate.

In formulating the scope and content of data in this publication, and designing the formats for presentation of the data, I have received valuable guidance from Shri P. Padmanabha, Registrar General, India. The encouragement I have received from him at every stage of the work has contributed in a great measure to the successful publication of this District Census Handbook.

I hope the data in this volume would be found useful, and the publication well received by the administrators, academicians and other data users.

Madras,
July, 1983.

(i) CENSUS CONCEPTS

Rural and Urban Areas

Census figures are generally presented separately for rural and urban areas. In the 1981 Census, the definition of an urban unit is more or less the same as in the 1961 and 1971 Censuses but for some minor variations. The urban areas of 1981 Census are :

a) All places with a Municipality, Corporation or Cantonment Board or notified town area:

b) All other places which satisfied the following criteria:

- i) A minimum population of 5,000
- ii) At least 75 percent of the male working population engaged in non-agricultural (and allied) activity;
- iii) A population of at least 400 per km² (or one thousand per square mile).

The above definition of urban area varies slightly from that of 1961 and 1971 Censuses in that the males working in activities such as fishing, logging etc. were treated as engaged in non-agricultural activity and therefore contributed to the 75 percent criterion in the 1961 and 1971 Censuses, whereas in the 1981 Census, these activities are treated as on par with cultivation and agricultural labour for the purpose of this criterion. The rest of the areas not treated as urban are classified as rural areas.

Urban Agglomeration

Urban Agglomeration is a new concept formed during 1971 Census and this replaces the concept of town group adopted in 1961 Census. An Urban Agglomeration may be explained as follows : "It must form a continuous urban spread constituting a town and its adjoining urban outgrowth or two or more physically contiguous towns together with continuous well recognised urban outgrowth, if any, of such towns."

Census House

A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Household

A household is a group of persons, who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented any of them from doing so.

Scheduled Castes/Scheduled Tribes

For the enumeration of Scheduled Castes and Scheduled Tribes in Census, the names of Scheduled Castes and Scheduled Tribes as recognised in Tamil Nadu based on the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act of 1976 (Central Act 108 of 1976) were followed. The enumerators were instructed to record a person as a Scheduled Caste/Scheduled Tribe provided the name given by the person was found in the list supplied to them.

Literates

In 1981 Census, a literate was defined as "a person who can both read and write with understanding in any language". A person who could merely read but cannot write, was not a literate. It was not necessary that a person considered a literate must have received any formal education or have passed any minimum educational standard.

Work

Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work

Main Workers and Marginal workers

A worker was identified with reference to a reference period preceding the census. The reference period prescribed was one year preceding the date of enumeration. Certain types of work such as agriculture, household industries like, gur making etc., were carried on, either throughout the year or only during certain seasons or part of the year, depending on local circumstances. In such cases, what we were concerned with, was the broad time span of the agricultural seasons preceding the enumeration. Workers can be full time workers or seasonal workers or marginal workers. If a person has done any work during the reference period and if he had worked for the major part of the year i.e. if he had worked for 183 days or more, he was considered to be a full time worker (main worker). If a person had done any work during the reference period and if he has not

worked for the major part of year i.e. if he had worked for less than 183 days, he was considered to be a marginal worker.

The main activity of workers has been classified into four categories viz. cultivator, agricultural labourer, household industry and other work.

Cultivator

For purposes of Census, a cultivator is a person who is engaged either as an employer, single worker or family worker in cultivation of land owned, or held from Government, private persons or institutions, for payment in money, kind or share. Cultivation includes supervision and direction of cultivation.

Agricultural labourer

A person who works in another person's land for wages in money, kind or share should be regarded as an agricultural labourer. He or she has no risk in the cultivation but merely works in another person's land for wages and has no right of lease or contract on land on which he or she works.

Household Industry

For a person who returns his/her main activity as engaged in some production, processing, servicing or repair of articles or goods, it has been ascertained whether it is a household industry.

Household Industry is defined as an industry conducted by the head of the household and/or by the members of the household at home or within the village in rural area, and within the precincts of the house in urban areas. A larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would, or has to, be registered under the Indian Factories Act.

Non-Workers

All persons who have not been treated as workers i.e. persons who have not worked any time at all during the reference period of one year preceding the date of enumeration, have been considered as non-workers.

These cover all persons who are engaged in unpaid home duties and who do no other work or have not done any work at all during the last one year, full time students and children attending school, all dependent such as infants or children not attending school or a person permanently disabled from work because of illness or old age persons

retired from service, or rentiers, beggars, vagrants, convicts in jails or inmates of a penal, mental or charitable institution and all non-workers who may not come under any of the above categories.

(ii) HISTORY OF THE DISTRICT CENSUS HAND-BOOK:

After the Census of 1951, the Government of India offered to hand over to the State Government the Census tables and other data prepared during the Census and suggested that they might be published along with any other useful information relating to each District. The State Government accepted the proposal and the first publication of the District Census Handbook was brought out at the cost of the State Government.

The District Census Handbook of 1951 was found to be very useful and it was therefore decided not only to continue the series for the 1961 Census but also to improve definitely on its content so that each District Census Handbook contained certain basic economic data for the smallest administrative unit in the District and be a useful reference book for scholars and other data users.

After the 1971 Census as well the series of District Census Handbook was continued. The publication of the 1971 Census Handbooks was in three parts, viz. Part-A, Part-B, Part-C; Part-A relating to Village and Town Directory, Part-B relating to Village and Town wise Primary Census Abstract and Part-C comprising District Census Tables, and certain administrative statistical tables.

The tradition of bringing out the Census Handbook has been continued by the State Government during the 1981 Census also. In this series some individual features besides restructuring the formats of the village directory have been adopted bearing in mind the national requirements of data for the socio-economic programmes of the Government. The comparability of data with the 1971 Census data has also been kept in view.

The present Census Handbook will be published in two parts, viz. Part-A - Village and Town Directory and Part-B - Village and Townwise Primary Census Abstract.

(iii) SCOPE OF VILLAGE DIRECTORY TOWN DIRECTORY STATEMENTS AND PRIMARY CENSUS ABSTRACT

The District Census Handbooks are the only publications which incorporate the data down to the level of a village and level of a town which are constantly referred to by the data users.

The Village Directory Statement gives the list of villages by taluk and for each village the area, number of households and population, availability of amenities and land use. The information on amenities available in the village includes educational, medical, drinking water, post and telegraph, market, rail/road or other communication facilities and power supply. Land use is shown as area under forests, irrigation, unirrigated land, culturable waste and area not available for cultivation.

Appendix I gives for each taluk the number of villages having various levels and types of educational institutions, such as middle schools, adult literacy centres, etc., various types of medical institutions such as dispensaries, primary health centres, etc. and the number of such institutions, various types of drinking water sources such as, taps, tube-wells, etc. post and telegraph offices, power supply, railway stations, bus stops, etc. and also the number of villages not having such amenities.

Appendix II gives for each non-municipal town (census towns) the area under forest, irrigated and unirrigated, land, culturable waste and area not available for cultivation.

Appendix III gives the list of villages where no educational, medical and public health facilities, etc. are available.

Appendix IV gives the list of villages with the proportion of Scheduled Castes and Scheduled Tribes population to the total population in various ranges of proportion. Part A of the Appendix gives the villages according to the proportion of Scheduled Caste population and part B according to proportion of Scheduled Tribe population. Information is presented by the ranges 0-5 percent, 6-10 percent, 11-15 percent, 16-20 percent, 21-30 percent and 31 percent and above for Scheduled Castes and 0-5 percent, 6-15 percent, 16-25 percent, 26-35 percent, 36-50 percent and 51 percent and above for Scheduled Tribes.

The Town Directory gives important and useful information like civic and other amenities available in all the towns in the district, statutorily notified as well as non-municipal and census towns. The details relating to each of the towns have been presented in seven statements viz. statements I to VI and IV-A. In all the statements except IV-A, the towns are arranged in the alphabetical order for the district. The Town Directory does not cover strictly military areas. It may, however, cover cantonment areas

but not strictly military areas or military establishments, within the cantonment areas. However, basic statistics of the cantonment as a whole have been provided. In the Town Directory codes have been given for the data on amenities and civic administration for want of space. The relevant explanations for the codes adopted have been given in the beginning of the Town Directory statements.

An urban agglomeration includes two or more independent census towns. The names of the towns/urban agglomerations have been arranged in the alphabetical order.

The particulars of the individual town which constitutes one of the units of agglomeration have not been furnished separately because the particulars have been furnished, where they occur together under the name of agglomeration. The following remarks have been given against such town in brackets.

(" see the name of the main town of the agglomeration ")

By adoption of this method the reader can get an idea of the particulars of the urban agglomeration in total and also severally

Statement-I Status and growth History

This statement provides some basic data based on the Primary Census Abstract. For analysing the Town Directory data at State level and All India level some new columns have been introduced in 1981. The new items are class of town area, number of households, population and growth rate for each census since 1901, density and sex ratio at 1961, 1971 and 1981 censuses are also provided in this statement.

For size class of town the following population norms as per 1981 census have been adopted.

Population	Class
1,00,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
below 5,000	VI

Location Code Number of Towns

To distinguish the towns from the village, the location code numbers for towns have been given in Roman numerals and these numbers have been assigned in a continuous order for the district as a whole.

Statement II : Physical Aspects and Location of Towns, 1979

Under physical aspects, annual rainfall and temperature figures are furnished, these particulars were obtained from the Commissioner of Statistics, Madras. If the information is not available for any particular town the nearest town for which it is available is given. For col. (9) the nearest city with population of one lakh and more is furnished according to 1981 census. For the other cols. figures obtained from the Municipal Commissioners and Panchayat Union Commissioners are given. The 'Zero' within brackets in cols. 10 & 11 denotes that the referent town itself is enjoying road transport facilities.

Statement III : Municipal Finance, 1978-79

The civic administration status of the town, the receipts through tax, properties and powers, government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institution and other public services are given in this statement. The sources of receipt and expenditure are furnished in terms of rupees in hundreds.

Statement IV : Civic and Other Amenities, 1979

The civic and other amenities existing in the towns as in 1979 are given. The data were obtained from the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Col. 3 - Civic administration status :

It is a new column introduced in this statement to facilitate analysis.

Col. 4 - Population

It is also a new column introduced in this statement to measure the amenities in respect of population.

Col. 5 - Scheduled Castes and Scheduled Tribes population.

It is introduced to know the size of population of the weaker sections of the community in the town

Electrification

Electrification particulars were obtained from the Tamil Nadu Electricity Board through the Municipal Commissioners and Panchayat Union Commissioners.

i) Domestic Connections:

This refers to the number of services given to houses for domestic purposes like fans, lighting, etc.

ii) Industrial Connection :

This refers to the number of services effected to L. T. Industries such as workshop, flourmills, oil mills, grinding machines, cotton ginning, engineering industries etc.

iii) Commercial Connection.

This refers to the services given to shops, business houses, public institutions like offices and schools and commercial establishments.

iv) Road lighting points.

This refers to the number of points of street lights which will be maintained by the Board and for which consumption charges will be paid to the Board by respective local bodies. For some town Panchayats the number of services effected alone has been furnished under street lights and not the points.

v) Other Connections.

This refers to the number of services effected for agricultural purposes, huts, public water supply systems, cottage industries, etc.

Statement IV-A : Civic and Other Amenities in Notified Slums-1979

This is a new statement on civic and other amenities in notified or recognised slums of class I and II towns. Generally, in cities or towns having slums, the local authority such as municipality or municipal Corporation or even the development authority notified the recognised slums. Such notification is linked up with the availability of funds from the State Government for slum clearance.

Name of the slum and the details of the area population, length of the paved roads, system of sewerage, number of different types of latrines and method of disposal of night soil, etc, are given in this statement.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1979.

In this statement medical, educational, recreational and cultural facilities of the towns as in 1979 are furnished. The data for educational and medical facilities were obtained from the Municipal Commissioners and Panchayat Union Commissioners for the concerned towns, and from the Director of Secondary Education and Director of Public Health respectively.

Col 10 - Recognised shorthand typewriting and other vocational training institutions.

The term 'recognised' refers to institutes recognised by some statutory authority like Education Department, Commerce Department, Labour Department, etc. of the Government or by semi Government or autonomous bodies, public sector project, etc.,

Cinemas refer only to the permanent cinema theatres and do not include touring cinemas.

Col. 16 - Number of working womens' hostel with number of seats.

This is a new column introduced in this statement in 1981. Considering the increasing employment of women in urban areas, the housing needs of working women has been an important problem.

Statement VI: Trade, Commerce, Industry and Banking in 1979.

In this statement, trade, commerce, industry and banking facilities in the town as in 1979 are furnished. Banking particulars were obtained from the Reserve Bank of India. The information on number of agricultural and non-agricultural credit societies were collected from the Registrar of co-operative societies through the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Scope of Primary Census Abstract

The Primary Census Abstract, as it is called presents basic data for each village or segment of a village (in cases where such village segments form different panchayats) in the "Village-wise Primary Census Abstract" and for each Ward/Division of a Town in the "Urban Primary Census Abstract." The format of the Primary Census Abstract for the villages and towns in 1981 has been slightly modified as compared to the 1971 Primary Census Abstract.

The Primary Census Abstract given such basic information as area in hectares/sq. km., occupied residential houses, number of households, total population, Scheduled Castes and Scheduled Tribes population, literates, main workers, division of main workers into cultivators, agricultural labourers, workers in Household industry and other workers, marginal workers and non-workers in respect of each unit. The Urban/Village Primary Census Abstract gives this information for each village and each urban ward. With a view to ensure comparability and to enable data users to derive figures either for

a revenue village or panchayat according to their requirements, the data are presented for segments of villages also. Wherever portions of one village happen to be in two or more panchayats the segment wise data have to be used separately or added with some other segment data so as to derive panchayat data. For example, if portions of a revenue village bearing L.C. No. 10 forms part of two panchayats, the figures are given separately for each portion of the village against L.C. No. 10 a/b and 10b/b. The total figures for the entire revenue village by adding the figures given against both the segments viz. 10a/b and 10b/b are given in the Village Primary Census Abstract. If, instead, the panchayat figures are required, the data for concerned village segment or segments relating to the panchayats, concerned, are to be added upto arrive at the total figures for the respective panchayat.

An appendix presented in the case of the Urban Primary Census Abstract gives 1981 population, Scheduled Castes and Scheduled Tribes population for each enumerator block of the town. This is meant for the use of administrative and election authorities in urban areas. Such data are also required by urban planners and researchers for conducting other studies in selected blocks.

Mode of Presentation

The consolidated figures for the district and each taluk are given in the beginning for Total, Rural and Urban areas followed by each town/Urban Agglomeration under the caption 'District Primary Census Abstract'. Then follows the Primary Census Abstracts for Scheduled Castes and Scheduled Tribes. An alphabetical list of revenue villages is then given along with the Census Location Code Numbers of 1981 Census followed by the village-wise Primary Census Abstract for each taluk. In the foot note given at the end of the Village-wise Primary Census Abstract, the villages included in Municipalities or Census towns are indicated. In an annexure, the names of villages and their constituent panchayats are given. Then, follows the Urban Primary Census Abstract. In an appendix to the Urban Primary Census Abstract, the population and Scheduled Caste/Scheduled Tribe figures for each Enumerated Block of a town are given. This arrangement is followed for each taluk in the district.

Maps

Apart from the District Map given as frontispiece, map for each taluk showing the village

Location Code numbers along with their boundaries have also been included at the appropriate places. As compared with the maps presented in 1971 District Census Handbook, several improvements have been effected in the maps presented in this volume. All towns are shown in the District and taluk maps with shading screens and also spheres according to the population size of towns.

Area Figures

In the District Primary Census Abstract, the area figures are given in Square Kilometers for Total, Rural and Urban areas. In the Village-wise Primary Census Abstract, the area figures for each Location Code Unit are given in hectares upto two decimals. The area figures for each town in sq. km. is also given at the end of the Urban Primary Census Abstract. In the District Primary Census Abstract, the area figures of the District Total represent the "Geographical Area" figures supplied by the Surveyor-General. Figures for Urban areas are those supplied by the Local Bodies and revenue authorities. The urban area of a district has

been arrived by adding the urban area figures of each taluk within the district. Area figures for the rural areas of District/Taluk are derived by subtracting the urban area figures from the total area of the District/Taluk. The total of the area figures of the taluks will not tally with the district figures because of the taluk area figures represent the 'Land Use' area and are derived from the figures supplied by the Tamil Nadu Directorate of Survey and Land Records, while those of the district represent "Geographical Area" supplied by the Surveyor-General of India. The total of the village area given in the Village-wise Primary Census Abstract may not tally with the rural area of the taluk given in the District Primary Census Abstract as the taluk area figures take into account hills, forests, rivers, etc., where as the village area may not include the same. For conversion, the ratio is 100 hectares = 1 sq. km.

It is hoped that the pattern of presentation of basic Census particulars for each district as explained above and adopted in this volume would be found convenient by data users.

COIMBATORE DISTRICT—AN OUTLINE

Originally Coimbatore district formed part of the Kongu country the history of which dates back to the Sangam age. It is found that in early days the area was inhabited by tribes, the most predominant among them being the KOSARS who are reported to have had their headquarters at KOSAMPATHUR which probably later became the present Coimbatore. However tribal predominance did not last long as they were over run by the RASHTRA KUTAS.

From Rashtrakutas the region fell into the hands of the CHOLAS who were in prominence at the time of Raja Raja Chola. On the decline of Cholas the Kongu territory was occupied by the CHALUKYAS and then by the Pandyas and the HOYSALAS. Due to internal strife in the Pandyan kingdom the muslim rulers from Delhi happened to interfere. Thus the area fell into the hands of Madurai Sultanate from whom the Vijayanagar rulers wrested the region during 1377-78 after overthrowing the Madurai Sultanate. For a few years the area remained under Vijayanagar rule and later came to be under independent control of Madurai Nayaks.

During the period of Muthu Veerappa Nayak and later during the period of Tirumal Nayak internal strife and intermittent wars ruined the kingdom. As a consequence during the period of Tirumal Nayak, the Kongu region fell into the hands of the Mysore rulers from whom Hyder Ali took over the area. However consequent on the fall of Tippu Sultan of Mysore in 1799 the Kongu region came to be ceded to the East India Company by the Maharaja of Mysore who was restored to power by the East India Company after defeating Tippu Sultan. From then till 1947 when India attained Independence, the region remained under British control who initiated systematic revenue administration in the area.

Formation of Coimbatore District and Subsequent Jurisdictional changes

To begin with, Coimbatore was in two parts for purposes of Revenue administration. In 1804, the areas were merged into one and brought under one district Collector. At the opening of the present century there were ten taluks in the district viz. Bhavani, Coimbatore, Dharapuram, Erode, Karur, Kollegal, Palladam, Pollachi, Satyamangalam and Udumalaipettai. The name of Satyamangalam Taluk was subsequently changed as Gopichettipalaiyam. Avinashi taluk was formed in the year 1910 by inclusion of some areas of Palladam and Coimbatore

taluks. In the same year Karur taluk happened to be transferred to Tiruchchirappalli district. In 1927 some villages of Bhavani taluk together with a few villages from Salem District were constituted into Mettur Area but very soon i. e. in 1929 this area was transferred to Salem District. Again in the year 1956 considerable area of the district, viz, the whole of Kollegal taluk was transferred to Mysore state as part of the States Re-organisation scheme.

In 1975 Satyamangalam sub-taluk was upgraded as a full fledged taluk. Again in 1979 Perundurai sub-taluk of Erode and Mettuppalaiyam sub-taluk of Avanashi were also upgraded into independent taluks. Thus the total number of taluks in the district came to twelve.

This however did not last long. In the same year (1979) six taluks were bifurcated from the district to constitute a new district viz. PERIYAR. Under G. O. Ms. No. 1917 Revenue dt. 31-8-79 the following six taluks were bifurcated from the then Coimbatore district to form PERIYAR DISTRICT. Bhavani, Gopichettipalaiyam, Satyamangalam, Erode, Perundurai and Dharapuram. This bifurcation considerably reduced the size of the district. It has only six taluks now viz. Pollachi, Coimbatore, Avanashi, Palladam, Udumalpettai and Mettuppalaiyam. In total area the district has shrunk from 15678 sq.km. to 7469 sq. km. as a result of the recent bifurcation to form the Periyar district.

Location and Physiography

Coimbatore is an inland district in the southern part of the Peninsula. Coimbatore district lies between 10°10' and 11°30' of the northern latitude and 76°40' and 77°30' of eastern longitude in the extreme west of Tamil Nadu. It is bounded in the North and East by Periyar district. In the West and South the mountain ranges viz; the Western Ghats and Anamalais provide its boundry. In the West, to the South-West of its Head-quarters city (Coimbatore) there is a mountain pass in the western Ghats. Due to the presence of the mountain pass major parts of the district benefit from the South-West monsoon. Apart from its influence on the climatic conditions in the district, the pass which is commonly known as PALGHAT GAP has an enduring influence on the trade and commerce that are centered in and around Coimbatore city. This opening in the

The utilisation of land under different categories as per the years 1979-80 is given below:

Land use	Area in hectares	Percentage to the total area of the district
1. Total geographical area.	749,073	100.0
2. Forests	155,770	20.8
3. Barren and uncultivable land	11,734	1.6
4. Land put to non-agricultural uses	72,898	9.7
5. Cultivable waste	2,296	0.3
6. Permanent pastures and other grazing land	2,383	0.3
7. Land under miscellaneous tree crops and groves	7,886	1.1
8. Current fallows	108,594	14.5
9. Other fallow land	13,010	1.7
10. Net area sown	374,502	50.0
11. Area sown more than once	54,921	7.3
12. Total cropped area	429,423	57.3

Agriculture

Though an industrial district, Coimbatore has been able to maintain the pride of position as regards performance in the field of agriculture. The district has been fortunate in having two premier agricultural viz., institutions viz., the Agricultural College and the Agricultural Research Institute. Both these institutions, apart from providing scientific support to agriculture have helped in propagating new varieties and strains of seeds. Publicity and development activities initiated by these institutions have gone a long way in the betterment of agriculture in the district. The intensive propaganda, teaching and research by these two institutions grow more food campaign, made during the Second World War and inputs provided under the Five Year Plans have contributed considerably towards the betterment of agriculture in this district.

The main cereals cultivated in this district are paddy and cholam. In addition to these, commercial crops such as cotton, sugarcane and oil seeds are also cultivated.

The soil by and large is good and is exploited by the ryots to their advantage. Better strains of seeds improved methods of cultivation and intensive use of fertilizers have contributed to the increased agricultural output in the district.

The cereals form the major item among food crops. A total of 323,566 hectares is under food crops and of these cereals alone account for 220,468 hectares. Pulses account for 60,471 hectares.

Paddy is cultivated mostly in Palladam and Udumalaipettai Taluks. Coimbatore Taluk is also known for paddy cultivation which is grown in two crops, the short term crop and long term crop. Improved seeds have been introduced by the Agricultural College and Agricultural Research institute,

A total of 37,354 hectares is under paddy in the district. The most popular of cereal cultivated in the district is Cholam. It has 141,202 hectares under it. Maize and Cumbu are two other cereals cultivated commonly in the district. Maize is cultivated in 13,284 hectares while Cumbu covers 8,817 hectares. The Millet Research Station in the district has given a boost to the cultivation of Cumbu by introducing popular varieties of seeds such as Co1, Co2 and Co3 etc. TKM6 is also popular among ryots. Cumbu is cultivated mostly in Pollachi and Palladam taluks. In addition to this, Samai is also cultivated over 10,978 hectares in the district.

Among oilseeds, groundnut is the most important item followed by cotton. Total oilseeds account for 66,116 hectares in the district of which 48,696 hectares are under groundnut. Cotton which is yet another important cash crop and it covers 20,824 hectares.

Pulses are grown mostly in Palladam and Udumalaipettai taluks. Horsegram and Black Gram are two varieties grown in the district. Cotton is grown in Coimbatore and Palladam taluks and in the garden areas of Avanashi Taluk also. Sugarcane is grown mostly in Coimbatore and Udumalaipettai taluks. Few varieties of better yielding types introduced by the Agricultural Research station are Co.419, Co.421, Co.449 etc.

Irrigation

Scanty rainfall and poor sub-soil reserves necessitate the local agriculturists to depend largely on

irrigation projects or other sources such as wells, rainfed tanks etc. Except in Pollachi and parts of Coimbatore taluks, the contribution of south-west monsoon is also most negligible. Rainfall under north-east monsoon often being indefinite ryots look up to irrigation facilities. Important rivers which contribute considerably towards irrigation are Amaravathi and Noyyal. The Amaravathi river helps to irrigate areas in Udumalaipettai taluk while the Noyyal river irrigates large tracts of land in Palladam and Coimbatore taluks. The contribution made by the Palar and the Aliyar rivers cannot be under-estimated. Upper Bhavani project helps to irrigate large tracts of land in Pollachi, Coimbatore, Palladam and Udumalaipettai taluks. Parambikulam - Aliyar project makes sizeable contribution in irrigating large extent of land in Pollachi and Udumalaipettai taluks.

Few spring channels and rainfed tanks help to augment irrigation in Pollachi, Coimbatore and Udumalaipettai taluks. These channels are fed by both the monsoon. Hence they prove a very useful source to the local ryots.

Wells have been the most dependable source of irrigation in the district even in early days. In spite of the increased facilities provided by river projects, the number of wells has always been on the increase as wells have proved to be the most dependable source of irrigation.

Source of irrigation

The chief sources of irrigation in the district are a number of wells, which play a significant role in the irrigation of the area followed by the rivers, canals and a few rainfed tanks.

The most important rivers in the district are Bhavani river, Noyyal river, Palar, Aliyar river and Amaravathi river. These rivers are fed by south-west monsoon. These rivers have been fully exploited by means of several anicuts across built them for irrigation purposes.

The principal source of irrigation in this district is ordinary wells. There are 78,852 wells and the area irrigated, as per 1979-80, by these wells is 104,680 hectares. Secondly, there are 35 Government canals and one private canal with a length of

577 kms. and 10 kms. respectively in the district used to irrigate an area of 36,134 hectares. There are 73 tanks of which 33 have each an anicuts of less than 100 acres.

The details of area irrigated by various sources during the year 1979-80 are given below:

Source of irrigation	Area irrigated in hectares in 1979-80.
Ordinary wells(sole irrigation)	104,680
Canals	36,134
Wells(supplementing other sources of irrigation)	5,349
Tanks	5,107
Other sources(spring channels etc.)	47
All sources	151,317

The net area irrigated excluding wells supplementing other sources in Coimbatore district is 145,968 hectares which works out to 39.0% of the net area sown (374,502 hectares) as against 47.9% for the State of Tamil Nadu.

Animal Husbandry

Coimbatore has fairly rich cattle wealth when compared to other districts in the State. The special breed of renown here is the Kangayam bull which has helped the district to have superior cattle wealth. According to recent statistics the livestock population in the district totals 2,480,309. This includes 1,406,274 cattle and 614,309 bovines. The rest are sheep and goats. Poultry in the district has 1,083,458 heads.

The activities of Animal Husbandry Department which takes care of the livestock and poultry are controlled and guided by four Assistant Directors stationed at Coimbatore, Avanashi, Pollachi and Udumalaipettai. The setting up of veterinary institutions, key village centres, artificial insemination centres etc, have gone a long way in improving the livestock position in the district. There are now seven veterinary hospitals, 16 veterinary dispensaries, and 15 key village centre - cum - dispensaries in the district. In addition to these there are 106 sub-centres in remote and interior areas.

western ghats provide a direct access to the traders in the west coast to the city of Coimbatore and vice versa, thus establishing a constant and continuous intercourse in trade with the west coast.

Climate and rainfall

Lying as it does at the base of the western ghats and due to the presence of the PALGHAT GAP, the district enjoys a salubrious climate.

First two months of the year are extremely pleasant. During March, the sky is clear, but the mercury shows an upward trend which continues to the end of May. The highest temperature is recorded early in May. The occasional showers present during these periods do not materially alter the trend of the mercury.

During June to August the influence of the Palghat Gap on the climatic conditions is most conspicuous. With the on set of South-West monsoon in the west coast the district comes to benefit considerably through the monsoon winds that cross over to Coimbatore viz. the mountaneous pass. Pollachi taluk which lies opposite to the palghat gap gets considerable rain during these periods and the on rush of the South-West monsoon winds through the gap lessen the oppressive heat and makes the climate tolerable, though not pleasant

During September, which is the inter-monsoon period, the sky is clearly overcast. During October and November, the North-east monsoon sets in and provides most of the rains in this district.

By December, the rain gradually disappears and the climate slowly becomes pleasant by the month end.

Inspite of the contribution of South-west monsoon, the quantum of rainfall in Coimbatore district is neither sufficient nor can it be predicted. Summer rains occur during March to May, and South-west monsoon during June to September; North-east monsoon appears during October-December and winter rains during January-February. Maximum rainfall is recorded in Pollachi taluk due to the strategic position it occupies at the mouth to the Palghat gap.

A comprehensive statement showing the month-wise rainfall in m.m. in Coimbatore district during the period 1979-80 is given below :-

Name of the month and year	* Normal rainfall	Actual rainfall	Percentage departure from Normal rainfall.
(1)	(2)	(3)	(4)
June 1979 ...	33.1	71.5	...
July 1979 ...	42.5	49.7	...
August 1979 ...	47.1	41.7	...
September 1979 ...	56.5	168.1	...
Total of South-west monsoon period.	179.2	311.0	+ 84.7
October 1979 ...	175.7	159.2	...
November 1979 ...	129.7	485.9	...
December 1979 ...	43.3	20.1	...
Total of North-east monsoon period.	348.7	665.2	+ 90.8
January 1980 ...	19.2	Nil	...
February 1980 ...	11.9	Nil	...
Total of winter period	31.1	Nil	- 100
March 1980 ...	18.5	47.2	...
April 1980 ...	55.9	47.0	...
May 1980 ...	77.9	201.7	...
Total of summer rains	152.3	295.9	+ 94.3
Coimbatore district.	711.3	1292.1	+ 81.7

* Normal, Average of 50 year's rainfall ending 1950.

Soil

Soils of the district are mostly of black cotton variety but red loam are also found in Avanashi and Coimbatore taluks. The soil in Coimbatore taluk is found enriched with organic matter from the hill ranges. There are rich tracts of red loam in Palladam and Pollachi taluks. The soils in Pollachi taluk are mostly of sandy loam often mixed with gravel. The red soils around the Anamalais are found to be very rich and fertile.

Rivers

Noyyil is the important river in this district. It rises in the Vellangiri hills to the west of Coimbatore and flows through the centre of the district from west to east passing through Coimbatore and Palladam taluks before entering Periyar district. Two other rivers of consequence are Palar and Aliyar which rise in the Anamalais and flow westward through Pollachi Taluk. Amaravathi river flows through Udumalaipettai Taluk before it crosses into Periyar and Tiruchchirappalli districts.

Yet another river of consequence is the Bhavaei which rises in the Silent Valley ranges in Kerala. Before entering the district it is reinforced by Siruvani which is a perennial stream rising in the Attapadi ranges in Kerala. As Bhavani enters Coimbatore district in Mettupalaiyam Taluk after being reinforced by Siruvani, its freshes are supplemented by river Kundah which rises in the Kundah ranges of the Nilgiris. Bhavani runs through Avanashi Taluk before it enters the Periyar District.

Forestry

Coimbatore is perhaps one of the very few districts in the State which can boast of considerable areas of dense forests. More than 20 per cent of the total districts area is under forest. The district has 146,905 hectares of reserve forests and together with reserve lands etc. the total extent is about 154,974 hectares. The forests here abound in commercially significant items such as Teak, Sandalwood, Rosewood, Vagai, Pillaimaruthu etc. Bamboo is also available in plenty. The Nilgiris slope viz. the Mettupalaiyam range is rich in sandalwood trees and bamboo. The Bolampathy and Todogan Valley are notable for Vagai and Pillaimaruthu. Other Forests in this district are spread over Punachi, Udumalaipettai and Tunacadavu ranges. They vary from rich tropical evergreen forests of Punachi range to jungles of shrubs in Udumalaipettai or Pollachi ranges. The cinchona Department is raising a cinchona plantation here. Apart from this, there are one or two tea plantations and coffee plantations.

There is a Forest College in the District. This was started during the British days as it was found that the College at Dehra Dun was not adequate to meet the needs of the south. However, it was only in 1912 that the Madras Forest College at Coimbatore was started. Soon, the institution was in the red and came to be closed in 1939. Though it was

re-opened in 1945, the mangement was passed on to the Government of India in 1948. Ever since, it is known as the Southern Forest Rangers College and caters to the needs of candidates from the Southern States and a few from other States also.

The fauna too is varied and rich in the district. Most of the common species found in the plains and ranges in the south are available here but mention has to be made about the presence of wild elephants and a few tigers in high ranges. Mention should be made of the wild life Sanctuary in Anamalais. About 95,000 hectares come under the sanctuary where the wild elephants and tigers are treated as protected animals. Among drought animals Kangeyam breed of bulls is a matter of pride for the district. They are in great demand not only in the district and in other districts but also outside the state. Kangeyam cows are not noted for their yield but their availability in large numbers has helped the district to make a mark in the field of dairy development.

Minerals

The District is not endowed with any remarkable mineral wealth. There is nothing conspicuous or significant about the minerals in the district except for the abundant presence of black granite limestones, quartz and feldspar. Plentiful availability of limestone has helped the growth of cement industry in Madukkarai. There are various companies engaged in the quarrying of limestone, gypsum quartz and feldspar. The Tamil Nadu Cement Corporation has also entered the field very recently.

Land and land use pattern

The total geographical area of the district is 749,073 hectares. Of these, the total cropped area is 429,423 hectares. This accounts for 50.0 per cent of the total area in the district. In this district, 20.8 per cent of the total area viz. 155,770 hectares is accounted for by forests. Cultivable waste has been reduced to the level of 0.3 per cent. About 9.7 per cent of the total area is put to non-agricultural use and 16.2 per cent is accounted for by fallow lands. Tree crops, groves, orchards etc. account for 1.06 per cent. Of the total 429,423 hectares under cultivation, 54,921 hectares are sown more than once. These figures show the utilisation of available land in the district.

The four artificial insemination centres in the district are rendering very useful services in maintaining the quality of the livestock. The rinderpest squad at Coimbatore, rinderpest vigilance unit, also at Coimbatore and the rinderpest check-post at Gopalapuram are also rendering good services towards the control and eradication of rinderpest disease which is a serious threat to livestock. Under the special Animal Husbandry Programme, calf rearing scheme is being implemented in the district. There are eight sheep breeding co-operatives functioning here. There is also a poultry extension centre at Theekkupalayam.

Fisheries

Being an inland district there is scope only for the development of inland fisheries and the department of fisheries has been striving towards this end. Emphasis was laid on the formation of Fishermen's Co-operatives and introducing through them better techniques for enhancing their catches. There are now four primary co-operatives working in the district. Of these two are in Coimbatore taluk while one each is in Mettupalaiyam and Pollachi Taluks.

Industries and Trade

Next to Madras, Coimbatore is the most industrialised district in the State. It has 52.57 per cent of its main workers depending on non-agricultural sectors for their livelihood as per the 1981 Census. The textile industry, engineering industry, handlooms etc., have contributed in no small measure towards stabilising the industrial base of the district's economy. Coimbatore city has rightly been called the Manchester of South India and could be compared with Bombay or Ahmedabad in the north as regards textile industry is concerned. The growth of engineering industries and their concentration in Coimbatore have been rather remarkable. The enterprising nature of the people has helped the growth of industries in the district very much.

Hand spinning of cotton, handloom weaving, basket making etc. thrived in ancient times in the region and these products were much in demand everywhere due to their excellent quality. These traditional industries of early days have not only survived the development of modern industries but also prospered alongside. These industries still make significant contribution towards the industrial prosperity of the district.

Coimbatore is noted even today for its handloom fabrics. Coimbatore cotton sarees are much in demand in the market. Important weaving centres are Coimbatore, Ondipudur, Singanallur, Vadavalli, Tiruppur etc. These centres produce quality cotton sarees and art silk sarees, towels and bedspreads. The formation of weavers, co-operatives have helped the industry very much. There are about 93,380 looms in the district of which 19,151 are in the co-operative fold. There are currently about 77 weavers co-operatives in the district and these co-operatives together account for nearly 63 per cent of the total looms in the district. Though some of the co-operatives make independent arrangements, the net-work of sales outlets established by the co-optex has helped to find ready market for the handloom product from the district. The role of All India Handloom Fabric Marketing Co-operative Society in introducing the handloom products of the district in the export market cannot be ignored. Apart from encouraging exports the society has established prestigious sales outlets in a number of cities in the country including the metropolitan cities like Bombay, Delhi, Calcutta, Madras etc. This has also given a boost to the local handloom industry.

Basket making is still carried on as a cottage industry and is practised by certain communities as a specialised industry. There is good demand for basket for packing vegetables, fruits etc. in the Nilgiri hills. Also there is great demand for baskets from the plantation estates and other private agencies who run a flourishing trade in seedlings of flowering plants in the hills. Special baskets which will withstand the weight of fruits and vegetables are made here and these find a ready market not only for local consumption but also for use in the adjoining Kerala State on the west coast.

Among the major industries that have made a mark in the district, cotton textile industry is the most important. Because of large concentration of spinning and weaving textile industry has come to occupy a place of unique importance in the industrial field in the district. The first cotton spinning and weaving mill was set-up in Coimbatore in the year 1888 and ever since the industry has developed. The industry has made rapid strides and is now the large scale industry which employs the maximum number of workers in the district. There are 419 factories in the district employing more than 60,000 workers engaged in the manufacture of cotton

textiles alone. These are in addition to other textiles products, manufacture of wool, silk and synthetic fibre textiles.

The growth and concentration of textile industry in the district has helped the growth of industry engaged in the manufacture of machinery and tools for use in textile industry. The large demand for machines and tools used in textile industry has led to the establishment of a factory for the manufacture of these items in demand. The Textool Company was established in 1944 at Ganapathy. Another unit engaged in the same line is the Ramakrishna Industrials at Peelamedu. This of course is of recent origin. But together, these two factories are making a remarkable contribution in sustaining the supplies of tools and machinery required for the textile industry.

The establishment of SITRA (the South India Textile Research Association) at Coimbatore has helped the growth of textile industry on scientific lines. This organisation, set-up by the textile mills association, has made significant contribution in developing new designs, market surveys etc. and maintaining constant feed back to the industry regarding the changing needs and desires of the public.

The other fields in which the district has made pioneering advances are the manufacture of cement, manufacture of rayon pulp and the manufacture of synthetic gems. The South India Viscose Ltd., set-up the first rayon pulp factory in the state at Coimbatore with Italian collaboration. This factory also produces staple fibre for textile industry. With the availability of rayon and staple fibre for textile industry from this factory the need for import of these items has been reduced.

The first cement factory in the state was set up at Madukkarai in the district. The presence of limestone in plenty has helped the growth of cement industry very much here.

The synthetic gem factory, the only one of its kind in the state was established in the year 1956 with Swiss collaboration. This has reduced the need for import of synthetic gems for various purposes.

Apart from the above, there are other industries which have developed in the district. A few of these are light engineering industries, automobile ancillary, rice mills, card clothing, radio manufacture, manufacture of buttons and blades, plantation industry,

coffee curing etc. Mention should also be made of the Government cinchona factory in the district.

The encouraging steps and developmental measures of the Government have gone a long way in the growth of various industries in the district. The Industries Department has also set up an Industrial and Commercial Museum in the district. Though this was originally set up in 1939 it was subsequently reorganised in 1947. The small industrialists and entrepreneurs have benefitted well from this.

Though a highly industrialised district, the major items of trade are agricultural produce such as rice, oils, oil-seeds, plantation crops etc. Mettupalaiyam in the district is an important centre for coffee trade and regular pool auctions are held here by the Coffee Board itself. Important items of import into the district are oilseeds, coal, petroleum products etc. while major items of export are cotton textile, handloom products, timber, rice, coffee etc. By virtue of its strategic location, Coimbatore City has become the centre for trade with the west coast.

Transport and Communication

The district has a well developed system of communication net work. Coimbatore City is directly linked with the state capital by air, rail and road. The Indian Airlines maintains daily air services between Coimbatore and Madras. Coimbatore is also connected by air with Bangalore and Cochin. The broad-gauge railway line from Madras to the west-coast passes through Coimbatore which has become an important junction on this line. All passenger trains from Madras to the west coast halt here, the only exception being the Mangalore Mail. There is also direct rail link with Madurai and other towns in the state served by the metre-gauge line.

Road transport also is well developed in the district. There is a good motorable road linking Coimbatore with the State capital and all other district headquarters also. There is a good system of motor transport operated by private bus owners and the setting up of Cheran Transport Corporation by the Government has given a fillip to road transport. This nationalised transport corporation has more than 1000 buses. It provides regular service to all district headquarters and other centres of importance. It also provides continuous service between Palghat and Coimbatore, by arrangement with transport authorities in Kerala, thus meeting

the requirements of the innumerable commuters and the trading community.

The state owned Tiruvalluvar Transport Corporation also provides daily express services between Madras and Coimbatore. A daily deluxe express service run by Tiruvalluvar Transport Corporation connects Coimbatore with the two important pilgrim centres viz, Palani in Madurai district and Guruvayoor in Kerala.

The district is also well served by post and telegraph offices. There is a Head Post Office at Coimbatore and the district is served by more than 260 sub-post offices of various descriptions and over 200 extra-departmental branch offices. Of the Post Offices 257 are combine offices having telegraph facilities also. The telephone system is also well developed in the district. Apart from having telephone connections at all important centres, the city is directly linked with the State Capital and most other important centres in the state and a few, even outside the state through the subscribers trunk dialling facility.

As a trading centre, Coimbatore has a strategic position, directly linked with Palghat, one of the most important trading centres in Kerala. By virtue of this unique position, Coimbatore has become the transit centre for west-coast bound trade and vice versa. Hence all important cargo movers have their booking offices in Coimbatore. There is a continuous stream of lorries plying between Coimbatore and Palghat in Kerala providing transport for the flourishing trade in timber, yarn, oil etc.

Major Social and cultural events

There are no major social and cultural events that occurred in the district during the decade. Mention may, however, be made of the bifurcation of Coimbatore district into two, namely Coimbatore and Periyar districts and the opening of a law College at Coimbatore.

Places of Historical/Religious/Archaeological Importance

1. Perur Temple

Built by Karikal Cholan, this temple is situated 7 kms. west of Coimbatore near river Noyyal. It is dedicated to Lord Siva. The presiding deity of the temple is known as Patteeswarar and his consort Pachainayaki. The exquisite sculptures in

the hall 'Kanagasabai' attract one and all. It is also known as Mel Chidambaram.

2. Maruthamalai Temple :

Dedicated to Lord Muruga the presiding deity is known as Dandayathapani. This temple is located on a hillock, 12 kms. from Coimbatore Railway Station and Bus stand.

3. Agricultural University

This is situated at a distance of about 5 kms. from Coimbatore Railway Station. This is the sixteenth Farm University in Independent India. The Agricultural College here has been converted into the present Tamil Nadu Agricultural University.

4. Forest College

One of the oldest institutions of its kind in the country, the forest college is situated 3.5 kms. north of the Railway Station. The College museum is worth visiting.

5. G.D. Naidu Industrial Exhibition

The late Thiru G. D., was a born technocrat. He was a legend in his own life time. He had made invaluable contribution to technical, electronic, mechanical and agricultural sectors. He had also established an industrial exhibition.

6. Anamalai Wild Life Sanctuary

This sanctuary is at an altitude of 1,400 metres in the Western Ghats near Pollachi (about 90 kms. away from Coimbatore). The area of the sanctuary is 899 sq. kms. It has various kinds of fauna like elephant, gaur, tiger, panther, sloth, bear, deer, wild bear, wild dog, porcupine, flying squirrel, jackal, pangolin civet cat and birds namely rocket-tailed drange, red-whiskered bulbul, black head oricle tree pie, spotted dove, green pigeon etc.,. The Amaravathy reservoir in the Anamalais has a large number of crocodiles. There are also many places of scenic beauty such as Karainshola. Anaikunthi Shola, grass hills, water falls, groves, teak forests, estates, dams and reservoirs.

Arrangements are available at Topslip to take tourists round the sanctuary on elephant back or by van.

7. Siruvani Water falls and Dam

This water falls and the dam are located at a distance of 37 kms. west of the city.

The water of Siruvani is known for its taste. The panoramic view of the dam and the falls are of enchanting beauty.

8. Pollachi

This town is about 40 kms. from Coimbatore on the way to Parambikulam, Aliyar Project. Next to Coimbatore, it is the leading town of the district and an important commercial centre. A temple dedicated to Mariamman and another to Subramanya are located here. There are beautiful stone carvings like five-hooded serpent, chain from Yali mouth and zodiac signs in the Subramanya temple.

9. Avanashi

The Avanashi Lingeswarar temple located here is about 40 kms. from Coimbatore. Avanashi is also known as south Benaras. Dating back to the 12th Century A.D. this is the biggest temple in Coimbatore district built by the Cholas. There are some fine stone carvings in this temple. The old name of this place was Pukkoliyur.

10. Tiruppur :

This is an important textile centre in Coimbatore district. and lies at a distance of 50 kms. from Coimbatore. It is famous for hosiery products. Tiruppur is also closely associated with "Tiruppur Kumaran" one of the valiant freedom fighters.

A brief analysis of the Village and Town Directory data

A brief analysis on certain population characteristics is made here utilising the information collected in the Village and Town Directory. A few tables have been prepared for this purpose. The tables are given here at district and taluk level for the rural areas and for urban areas town wise particulars are presented.

INSET TABLES ON PRIMARY CENSUS ABSTRACT DATA

TAB

Proportion of Rural Population

Serial number.	Name of taluk.	Total Population of inhabited village in the Taluk.	Proportion of Rural Population		
			Education.	Medical.	Drinking Water.
(1)	(2)	(3)	(4)	(5)	(6)
1	Mettuppalaiyam	106,278	1,05,720 (99.47)	51,665 (48.61)	1,05,720 (99.47)

1,479,129 (97.57)	403,610 (26.62)	1,163,537 (76.75)	1,464,238 (96.58)	1,513,672 (99.77)

more than 99% of the population are served with the amenities of education Drinking Water and Power Supply. The facilities of Post and Telegraph and Pucca road are available to 97.57% and 96.58% of the rural population respectively. More than three fourth of the rural population avail the amenity of Communication viz. 76.75%. Out of the total rural population 53.05% are served with the medical facility. Only Market/hat facility is availed by a low percentage of population in the district which works out to 26.62%.

79 (87.78)	12 (13.33)	89 (98.89)	89 (98.89)	90 (100.00)
358 (82.30)	75 (17.24)	311 (71.49)	420 (96.55)	434 (99.31)

of education, drinking water and Power Supply are available by all the villages to cent percent. except a few villages in Coimbatore, Pollachi and Udumalaipettai taluks. The amenities of medical and market/hat have registered a low percentages of 37.70 and 17.24 respectively in the district. The Post and Telegraph offices are present in 358 villages out of the total 435 which works out to 82.30%. The amenities of Communications and Pucca road are available to 311 and 420 villages which work out to 71.49% and 96.55% respectively.

TABLE 3

Distribution of villages not having certain amenities arranged by distance ranges from the places where these are available.

Villages not having the amenity of.					Number of villages where the amenity is not available and available at the distance of.			Total
					— 5 kilo meters.	5 – 10 kilo meters.	10 + kilo meters	
(1)					(2)	(3)	(4)	(5)
Education	...	...	...	...	12	...	1	13
Medical	...	...	...	...	110	113	48	271

Market/Hat	...	...	...	...	137	147	76	360
Communication	...	...	...	...	37	46	41	124

This table furnishes the distribution of villages not having certain amenities, arranged by distance ranges from the places, where such facilities are available. Out of the total 435 villages, the amenities of medical and market/hat are not available in the inhabited villages itself in 271 and 360 villages respectively but they are available at certain distance ranges viz. the medical facility is available at a distance range of - 5 kms. for 110 villages, at 5-10 Kms for 113 villages and at 10+kms for 48 villages. Similarly the market/hat facility

is available to 137 villages at a distance range of - 5 kms, 147 villages at 5-10 kms and 76 villages at 10+ kms. Post and Telegraph facility is available for 54 villages at the distance range of - 5 kms, for 12 villages at 5-10 kms and for 11 villages at 10+ kms. It is noteworthy that the amenity of drinking water is available in the villages itself in all the inhabited villages. Regarding the amenity of education only 12 villages avail this facility at a distance range of - 5 kms and one village at 10+ kms.

TAB

Distribution of villages according to the distance from the

Distance range from the nearest towns (in kilo meters).	Number of inhabited villages in each range.	Number (with percentage) of		
		Education.	Medical.	Drinking Water.

90.20 percent and 84.31 percent. In the distance range of 6-15 kms., there are 226 villages of which the amenity of power supply is availed by 225 villages, the amenity of education by 222 villages, the pucca road by 217 villages and communication by 155 villages. It is noteworthy that all the inhabited villages in this range avail the amenity of drinking water, viz. 100.00 percent. Out of the total villages of 435, in the distance range of 16-50 kilometres from the nearest town, 158 villages avail the amenity of drinking water and power supply to cent percent, the facility of pucca road to 96.84 percent, education to 94.30 percent, post and telegraph to 86.71 percent and communication to 71.52 percent. It is observed that the amenities of medical and market/hat are availed by a less number of villages in the three categories of distance ranges.

T A B

Distribution of villages according to population

Total	...	435	422	164
		(97.01)	(37.70)	(100.00)

Note : Since the particulars on different amenities are not available for 12 villages (viz.) Location Code numbers 2, 13, 18, 19, 20 and 21 of Mettuppalaiyam Taluk Location Code numbers 93, 94 and 97 of Udumalaipettai Taluk and Location Code numbers 124, 125, 126 of Pollachi taluk have been excluded from this table.

This table shows the distribution of inhabited villages according to different population ranges and amenities available. There are four categories of population ranges in which 15 inhabited villages come under the population range of—499. All these villages avail the amenities of drinking water, power supply and pucca road to cent percent. The facilities of education and communication are availed by 53.33 percent and 46.67 percent of the villages in this range. In the population range of 500-1999, there are 119 villages.

L E 5

range and amenities available.

villages having amenity of.				
Post and Telegraph.	Market/Hat.	Communi-cation.	Approach by Pucca Road.	Power Supply.
(6)	(7)	(8)	(9)	(10)
6	...	7	15	15
(40.00)	...	(46.67)	(100.00)	(100.00)
67	3	59	117	119
(56.30)	(2.52)	(49.58)	(98.32)	(100.00)
201	38	173	203	213
(94.37)	(17.84)	(81.22)	(95.31)	(100.00)
84	34	71	85	88
(95.45)	(38.64)	(80.68)	(96.59)	(100.00)
358	75	310	420	434
(82.30)	(17.24)	(71.26)	(96.55)	(99.77)

The amenities of drinking water and power supply are availed by all these villages. The other amenities availed by the villages are 98.32 percent in pucca road, 95.80 percent in education, 56.30 percent in post and telegraph and 49.58 percent in communication. Among the villages that come under the population range of 2000-4999, the amenities of drinking water, power supply, education, pucca road and post and telegraph are availed from 94 percent to 100 percent. The amenity of communication is availed by 173 villages out of 213 in this range. In the population range of 5000+ there are 88 villages out of the total 435 villages in the district. The amenities of education, drinking water and power supply are availed by all the 88 villages. 85 villages avail the amenity of pucca road, 84 villages avail post and telegraph, 71 villages avail communication and medical is availed by 62 villages in this population range.

T A B

Growth, Density and Sex-ratio of Urban Popu

COIMBATORE

Census year.	Total Population	Urban population.	Percentage of Urban population.	Decadal percentage variation in urban population.	Density (population per square kilometre).	Sex ratio (number of females per 1,000 males)

48,408,077	15,951,875	32.95	+27.98	...	956

urban population has also increased from 24.35 in 1951 to 32.95 in 1981. The density of urban areas of Coimbatore district which was 1065 in 1961 has steadily increased to 1681 in 1971 which has gone up again to 1710 in 1981.

TABLE 6

Main staple food in the majority of villages in each taluk.

Serial number.	Name of taluk.	Main staple food.
(1)	(2)	(3)
1	Mettuppalaiyam	Rice and Millets.
2	Avanashi	Rice and Millets.
3	Palladam	Rice and Millets,
4	Coimbatore	Rice and Millets,
5	Pollachi	Rice and Millets.
6	Udumalaipettai	Rice and Millets,

This table furnishes the main staple food in terms of grains consumed by the majority of the population of the villages in each taluk. There are six taluks in this district. It is found that Rice and Millets are the main staple food that are being consumed by all the six taluks.

TABLE 7.

Distribution of villages according to land use.

Serial number.	Name of Taluk.	Number of inhabited villages.	Total area.	Total Cultivable Area.	Percentage of cultivable area to total area.	Total irrigated area.	Percentage of irrigated area to total cultivable area
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)

5	Pollachi ...	123	110659.90	98316.10	88.85	43368.50	44.11
6	Udumalaipettai	90	94550.49	80435.9	85.07	34115.04	42.41
	Total ...	435	571030.48	433906.13	75.99	169372.91	39.03

Note : Since the land use particulars are not available for 12 villages Location Code numbers 2, 13, 18, 19, 20 and 21 of Mettuppalaiyam taluk, Location Code numbers 93, 94 and 97 of Udumalaipettai taluk and Location Code numbers 124, 125 and 126 of Pollachi taluk have been excluded from this table.

This table gives the distribution of inhabited villages according to land use. The total area of 435 inhabited villages is 571030.48 hectares of which the percentage of the cultivable area to the total area works out to 75.99. The percentage of the irrigated area to the total cultivable area works out to 39.03. Pollachi, Avanashi and Udumalaipettai taluks possess the maximum cultivable area to total area viz. 88.85 per cent, 88.62 per cent and 85.07 percent respectively. Mettuppalaiyam taluk has recorded the lowest percentage of the cultivable area in this district viz- 37.67. Coimbatore and Pollachi taluks have recorded the highest percentage in the irrigated area to total cultivable area viz. 45.77 percent and 44.11 percent. The lowest percentage is found in Mettuppalaiyam and Avanashi taluks viz. 24.95 and 24.49.

TABLE 9

New Towns/Towns declassified in 1981 Census.

Name of Towns	Population 1981 Census
(1)	(2)
(a) Added	
-----NIL-----	
(b) Declassified	
(i) Sirumugai	14,260

Table 9 reveals that no new town has been recognised in Coimbatore district during 1981 census. Sirumugai, a town recognised in 1971, has been declassified in 1981 census as a rural area since it does not satisfy the urban criteria.

It is seen from Table 11 that for every 10,000 urban population in Coimbatore district, the ratio of Higher Secondary Schools is 0.28, Secondary Schools is 0.54. Middle Schools is 1.41 and Primary Schools is 2.50. It is interesting to note that all the towns except two towns in this district are having Middle Schools and Primary Schools.

Chettipalaiyam town has the highest proportion of Higher Secondary Schools (1.77) Secondary Schools (3.54) followed by Chinnavedampatti per 10,000 urban population.

TABLE 12—*contd.*

NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS.

SECTION II

TOWN DIRECTORY

Note Explaining the codes used in the Town Directory

STATEMENT I & III

Class to towns by population :

Population	Class
1,00,000 and above	I
50,000 — 99,999	II
20,000 — 49,999	III
10,000 — 19,999	IV
5,000 — 9,999	V
Below 5,000	VI

Civic administration status of the town :

M. Corp.	-	Municipal Corporation/Corporation
M	-	Municipality
N P	-	Nagar Panchayat/Town Panchayat
G P	-	Gram Panchayat/Village Panchayat
T C	-	Town Comittee/Town Area
C B	-	Cantonment board/Contonment

STATEMENT IV & IV A

S C	-	Scheduled Castes
S T	-	Scheduled Tribes

Type of Road :

P R	-	Pucca Road
K R	-	Kutchu Road

System of sewerage :

S	-	Sewer
O S D	-	Open Surface Drains
B S D	-	Box Surface Drains
S D	-	Sylk Drains
C D	-	Cesspool method
Pt	-	Pit system

Method of disposal of night soil

H L	-	Head Loads
B	-	Baskets
W B	-	Wheel Barrows
S T	-	Septic Tank latrines
S	-	Sewerage

System of storage of water

O H T	-	Over Head Tank
S R	-	Service Reservoir
R I G	-	River Infiltration Gallery
B W P	-	Borewell Pumping system
P T	-	Pressure tank

Source of drinking Water

T W	-	Tube well Water-Hand pump
T	-	Tap water
W	-	Well water
T K	-	Tadk water

STATEMENT V

Medical Facilities :

H	-	Hospital
D	-	Dispensary
H C	-	Health Centre
F C	-	Family planning Centre
T B	-	T. B. Clinic
N H	-	Nursing Home
O	-	Other
A	-	Ayurvedic
U	-	Unani
Hom	-	Homeopathic

Educational facilities :

A	-	Arts only
S	-	Science only
A S	-	Arts and Science only
C	-	Commerce only
A C	-	Arts and Commerce only
A S C	-	Combined for all categories Arts, Science and Commerce
L	-	

Recognised Shorthand, Typewriting & Other voctional Institutions :

S H	-	Shorthand
Type	-	Typewriting
SH. Type	-	Shorthand & Typewriting
O	-	Others

Public libraries and reading rooms :

P L	-	Public Ljbraries
R R	-	Reading Rooms
