Statement IV .. Civic and other amenities, 1979	486—491
Statement IV-A .. Civic and other amenities in notified slums, 1979	492—497
Statement V .. Medical, educational, recreational and cultural facilities, 1979	498—507
Statement VI .. Trade, Commerce, Industry and Banking, 1979	508—513
Appendix .. Towns showing their outgrowths with population	514

Responsibility for the correctness of internal details shown in the maps rests with the publisher.

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Government, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural area and wardwise for each city or town. It also provides data on infrastructure and amenities in Villages and Towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of, the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the format of village and town directory have been attempted. At the same time comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect, particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirement of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices, listing the villages where no amenities are available and according to the proportion of Scheduled Caste and Scheduled Tribe population to the total population, has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class I and Class II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Caste and Scheduled Tribe population in statement-IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the Primary Census Abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the Individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series, it has been so designed that Part - A of the volume contains village and town directory and Part - B the PCA of Villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Taluk/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and taluk level maps, depicting the boundaries and other important features have been inserted at appropriate places to further enhance the value of the Publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri A. P. Muthuswami I.A.S., the Director of Census Operations, Tamil Nadu on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this Publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the head quarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi,
the 26th April 1982.

P. PADMANABHA,
Registrar General, India.

PREFACE.

It has been the tradition of the Government of Tamil Nadu to publish immediately after each census, a District Census Handbook separately for each district containing the Census statistics besides other valuable data of local importance, for the use of the State Government, district administration, research scholars and other data users. The first series of District Census Handbooks were brought out immediately after the 1951 Census, and the present publication after the 1981 census is the fourth in the series.

The Census statistics presented in this publication were collected during the census operations in February-March, 1981, as at the sunrise of the 1st March, 1981. The other statistics in this publication have been collected from various departments of the State and Central Governments.

This publication consists of the following two parts:—

Part-A—Village and Town Directory and

Part-B—Village and Townwise Primary Census Abstract.

Taking into account the increasing and varied developmental and other welfare measures undertaken by the Government, the scope and content of the data in this publication have been considerably enlarged and improved to meet the requirements of the planners and the other data users. In particular, certain inset tables based on census and other data have been included in this publication with brief analytical notes thereon.

This publication contains a brief history of the district highlighting the major characteristics of the district in relation to the economic resources like forestry, minerals, etc., besides the social, cultural, religious and historical aspects. The district and taluk maps in this publication give the administrative units up to village level, the rural and urban units, the location of towns and cities, communication facilities and other related details.

The facilities and amenities available in respect of education, medical, drinking water, post and telegraph, markets, communication, etc. in each village and town have been included in this publication, and an important feature is that wherever the above facilities and amenities are not available in any particular village/town, the nearest place where they are available has also been reported.

Another interesting feature in this publication is that villages with none of these amenities have been listed out separately for the pointed attention of the planners and administrators.

Certain tables present data exclusively in respect of the weaker sections of the society belonging to the Scheduled Castes and Scheduled Tribes.

The land use pattern in respect of rural and urban areas have also been reported in this publication which would meet the requirement of micro level planning for rural and urban areas.

The data in respect of urban areas, apart from the medical and other facilities available, relate to the growth of towns, the availability of protected water supply, and what is important, the civic amenities available in the slums of the urban areas.

Part—B of this volume consists of the District and Village/Townwise Primary Census Abstract, followed by Primary Census Abstract of Scheduled Castes and Scheduled Tribes.

The district Primary Census Abstract gives for each territorial unit up to Taluk level in the case of rural areas and up to town level for urban areas, occupied residential houses, households, the total population, the Scheduled Caste and Scheduled Tribe population, workers, etc., there by indicating the basic socio-economic characteristics of the population for the territorial units. The village and townwise Primary Census Abstract gives similar information for villages and wards of town. Besides, there is an appendix which furnishes at urban block level, the total population and Scheduled Caste and Scheduled Tribe population.

I am grateful to the Collectors and other district officers and Departments of the State Government who have extended their unfailing co-operation and help in collecting the voluminous and useful data other than Census, for their presentation at one place in this publication, for the ready reference of the data users.

In bringing out this publication, I have received assistance from Sarvashri M. Thangaraju, and M. Nagappan, Deputy Directors of Census operations and Shri R. Narayanan, Assistant Director of Census operations besides a large number of staff members of this Directorate.

In formulating the scope and content of the data in this publication, and designing the format for presentation of the data, I have received valuable guidance from Shri P. Padmanabha, Registrar General, India. The encouragement I have received from him at every stage of the work has contributed in a great measure to the successful publication of this District Census Handbook.

I hope the data in this volume would be found useful, and the publication well received by the administrators, academicians and other data users.

Madras,
Aug. 1983.

A. P. MUTHUSWAMI,
*Director of census operations,
Tamil Nadu.*

ACKNOWLEDGEMENT

I have pleasure in acknowledging the able assistance given by the following officials of my office in the preparation of this volume.

ANALYTICAL NOTE

CENSUS CONCEPTS

RURAL AND URBAN AREAS

Census figures are generally presented separately for rural and urban areas. In the 1981 Census, the definition of an urban unit is more or less the same as in the 1961 and 1971 Censuses but for some minor variations. The urban areas of 1981 Census are :

(a) All places with a Municipality, Corporation or Cantonment Board or notified town areas:

(b) All other places which satisfied the following criteria:

- A minimum population of 5,000
- At least 75 percent of the male working population engaged in non-agricultural (and allied) activity,
- A population of at least 400 per km² (or one thousand per square mile).

The above definition of urban area varies slightly from that of 1961 and 1971 Censuses in that the males working in activities such as fishing, logging etc., were treated as engaged in non-agricultural activity and therefore contributed to the 75 per cent criterion in the 1961 and 1971 Censuses, whereas in the 1981 Census, these activities are treated as on par with cultivation and agricultural labour for the purpose of this criterion. The rest of the areas not treated as urban are classified as rural areas.

Urban Agglomeration

Urban Agglomeration is a new concept formed during 1971 Census and this replaces the concept of town group adopted in 1961 Census. An Urban Agglomeration may be explained as follows, "It must form a continuous urban spread constituting a town and its adjoining urban outgrowth or two or more physically contiguous towns together with continuous well recognised urban outgrowth, if any, of such towns".

Census House
A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Household
A household is a group of persons, who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented any of them from doing so.

Scheduled Castes/Scheduled Tribes

For the enumeration of Scheduled Castes and Scheduled Tribes in Census, the names of Scheduled Castes and Scheduled Tribes as recognised in Tamil Nadu based on the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act of 1976 (Central Act 108 of 1976) were followed. The enumerators were instructed to record a person as a Scheduled Caste/Scheduled Tribe provided the name given by the person was found in the list supplied to them.

Literates

In 1981 Census, a literate was defined as "a person who can both read and write with understanding in any language". A person who could merely read but cannot write, was not a literate. It was not necessary that a person considered a literate must have received any formal education or have passed any minimum educational standard.

Work

Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

Main Workers and Marginal Workers

A worker was identified with reference to a reference period preceding the census. The reference period prescribed was one year preceding the date of enumeration. Certain types of work such as agriculture, household industries like, gur making etc., were carried on, either throughout the year or only during certain seasons or part of the year, depending on local circumstances. In such cases, what we were concerned with, was the broad time span of the agricultural seasons preceding the enumeration. Workers can be full time workers or seasonal workers or marginal workers. If a person has done any work during the reference period and if he had worked for the major part of the year i.e., if he had worked for 183 days or more, he was considered to be a full time worker (main worker). If a person had done any work during the reference period and if he has not worked for the major part of the year i.e., if he had worked for less than 183 days, he was considered to be a marginal worker.

The main activity of workers has been classified into four categories viz., cultivator, agricultural labourer, household industry and other work.

Cultivator

For purposes of Census, a cultivator is a person who is engaged either as an employer, single worker or family worker in cultivation of land owned, or held from Government, private persons or institutions for payment in money, kind or share. Cultivator includes supervision and direction of cultivation.

Agricultural Labourer

A person who works in another persons land for wages in money, kind or share should be regarded as an agricultural labourers. He or she has no risk in the cultivation has merely works in another persons land for wages and has no right of lease or contract on land on which he or she works.

Household Industry

For a person who returns his/her main activity as engaged in some production, processing, servicing or repair of articles or goods, it has been ascertained whether it is a household industry.

Household Industry is defined as an industry conducted by the head of the household and/or by the members of the household at home or within the village in rural area and within the precincts of the house in urban areas. A larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would or has to be registered under the Indian Factories Act.

Non-Workers

All persons who have not been treated as workers i.e., persons who have not worked any time at all during the reference period of one year preceding the date of enumeration, have been considered as non-workers. These cover all persons who are engaged in unpaid home duties and who do no other work or have not done any work at all during the last one year, full time students and children attending school, all dependent such as infants or children not attending school or a persons permanently from disabled from work because of illness or old age, persons retired from service or rentiers, beggars, vagrants, convicts in jails or inmates of a penal, metal, or charitable, institution, and all non-workers who may not come under any of the above categories.

History of the District Census Handbook

After the Census of 1951, the Government of India offered to hand over to the State Government the Census tables and other data prepared during the Census and suggested that they might be published along with any other useful information relating to each district. The State Government accepted the proposal and the first publication of the District Census Handbook was brought out at the cost of the State Government.

The District Census Handbook of 1951 was found to be very useful and it was therefore decided not only to continue the series for the 1961 Census but also to improve definitely on its content so that each District Census Handbook contained certain basic economic data for the smallest administrative unit in the district and be a useful reference book for scholars and other data users.

After the 1971 Census as well the series of District Census Handbook was continued. The publication of the 1971 Census Handbooks was in three parts viz., Part-A, Part-B, Part-C, Part-A relating to Village and Town Directory Part-B relating to Village and Townwise Primary Census Abstract and Part-C comprising District Census Tables, and certain administrative statistical Tables.

The tradition of bringing the Census Handbook has been continued by the State Government during the 1981 Census also. In this series some individual features besides restructuring the formats of the village directory have been adopted bearing in mind the national requirements of data for the socio-economic programmes of the Government. The comparability of data with the 1971 Census data has also been kept in view.

The present Census Handbook will be published in two parts viz., Part-A—Village and Town Directory and Part-B—Village and Town-wise Primary Census Abstract.

Scope of Village Directory and Town Directory Statements.

The District Census Handbooks are the only publications which incorporate the data down to the level of a village and level of a town which are constantly referred to by the data users.

The Village Directory Statement gives the list of villages by taluk and for each village the area, number of households and population, availability of amenities and land use. The information on amenities available in the village includes educational, medical, drinking water, post and telegraph, market, rail/road or other communication facilities and power supply. Land use is shown as area under forests, irrigation, unirrigated land, culturable waste and area not available for cultivation.

Appendix I gives for each taluk the number of villages having various levels and types of educational institutions, such as middle school, adult literacy centres, etc., various types of medical institutions such as dispensaries, primary health centres, etc., and the number of such institutions various types of drinking water sources such as taps, tubewell, etc., post and telegraph offices, power supply, railway station, bus stops, etc., and also the number of villages not having such amenities.

Appendix-II gives for each non-municipal town (Census towns) the area under forests, irrigated and unirrigated land, culturable waste and area not available for cultivation.

Appendix-III gives the list of villages where educational, medical and public health facilities, etc., are available.

Appendix-IV gives the list of villages with the proportion of Scheduled Caste and Scheduled Tribe population to the total population in various ranges of proportion. Part A of the Appendix gives the village according to the proportion of Scheduled Caste population and Part-B according to proportion of

Scheduled Tribe population. Information is presented by the ranges 0-5 per cent, 6-10 per cent, 11-15 per cent, 16-20 per cent, 21-30 per cent and 31 per cent and above for Scheduled Castes and 0-5 per cent, 6-15 per cent, 16-25 per cent, 26-35 per cent, 36-50 per cent and 51 per cent and above for Scheduled Tribes.

The Town Directory gives important and useful information like civic and other amenities available in all the towns in the district, statutorily notified as well as non-municipal and census towns. The details relating to each of the towns have been presented in seven statements, viz., Statements I to VI and IV-A. In all the statements except IV-A, the towns are arranged in the alphabetical order for the district. The Town Directory do not cover strictly military areas. It may, however, cover cantonment areas but not strictly military areas or military establishments, within the cantonment areas. However, basic statistics of the cantonments as a whole have been provided. In the Town Directory codes have been given for the data on amenities and civic administration for want of space. The relevant explanations for the codes adopted have been given in the beginning of the Town Directory statements.

An urban agglomeration includes two or more independent census towns. The names of the towns/urban agglomerations have been arranged in the alphabetical order.

The particulars of the individual town which constitutes one of the units of agglomeration have not been furnished separately because the particulars have been furnished, where they occur together under the name of agglomeration. The following remarks have been given against such town in brackets.

“(see the name of the main town of the agglomeration)”.

By adoption of this method the reader can get an idea of the particulars of the urban agglomeration in total and also severally.

Statement-I—Status and growth History.

This statement provides some basic data based on the Primary Census Abstract. For analysing the Town Directory data at State level and All India level some new columns have been introduced in 1981. The new items are class of town area, number of households, population and growth rate for each Census since 1901. Density and Sex Ratio at 1961, 1971 and 1981 census are also provided in this statement.

For size class of town the following population norms as per 1981 census have been adopted.

Population.	Class.
1,00,000 and above	I
50,000—99,999	II
20,000—49,999	III
10,000—19,999	IV
5,000—9,999	V
below—5,000	VI

110C-3-1A

Location code number of towns:

To distinguish the town from the village, the location code numbers for towns have been given in Roman numerals and these numbers have been assigned in a continuous order for the district as a whole.

Statement-II—Physical aspects and Location of Towns, 1979.

Under physical aspects, annual rainfall and temperature figures are furnished. These particulars were obtained from the Commissioner of Statistics, Madras. If the information is not available for any particular town the nearest town for which it is available is given. For col. (9) the nearest city with population of one lakh and more is furnished according to 1981 census. For the other cols. figures obtained from the Municipal Commissioners and Panchayat Union Commissioners are given. The ‘Zero’ within brackets in cols. 10 & 11 denotes that the referent town itself is enjoying road transport facilities.

Statement-III—Municipal Finance, 1978-79.

The civic administration status of the town, the receipt through tax properties and powers, Government grants loans advances and other sources and the expenditure on general administration, public safety, public health, public work, public institutions and other public services are given in this statement. The sources of receipt and expenditure are furnished in terms of rupees in hundreds.

Statement-IV—Civic and other amenities, 1979.

The civic and other amenities existing in the towns as in 1979 are given. The data were obtained from the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Col. 3—Civic administration status.

It is a new column introduced in this statement to facilitate analysis.

Col. 4—Population.

It is also a new column introduced in this statement to measure the amenities in respect of population.

Col. 5—Scheduled Caste and Scheduled Tribe population.

It is introduced to know the size of population of the weaker sections of the community in the town.

Electrification.

Electricification particulars were obtained from the Tamil Nadu Electricity Board through the Municipal Commissioners and Panchayat Union Commissioners.

(i) Domestic Connections.

This refers to the number of services given to houses for domestic purposes like fans, lighting, etc.

(ii) Industrial Connections

This refers to the number of services effected to L.T. Industries such as workshops, flourmills, oil mills, grinding machines, cotton ginning, engineering industries, etc.

(iii) Commercial Connections

This refers to the services given to shops, business houses, public institutions like offices and schools and commercial establishment.

(iv) Road lighting points

This refers to the number of points of street lights which will be maintained by the Board and for which consumption charges will be paid to the Board by respective local bodies. For some town panchayats the number of services effected alone has been furnished under street lights and not the points.

(v) Other Connections

This refers to the number of services effected for agricultural purposes, huts, public water supply systems, cottage industries, etc.

Statement IV-A—Civic and Other Amenities in Notified Slums—1979

This is a new statement on civic and other amenities in notified or recognised slums of Class I and II towns. Generally, in cities or towns having slums, the local authority such as Municipality or Municipal Corporation or even the development authority notified the recognised slums. Such notification is linked up with the availability of funds from the State Government for Slum clearance.

Name of the slum and the details of the area, population, length of the paved roads, system of sewerage, number of different types of latrines and method of disposal of night soil, etc. are given in this statement.

Statement V—Medical, Educational, Recreational and Cultural Facilities, 1979

In this statement medical, educational, recreational and cultural facilities of the towns as in 1979 are furnished. The data for educational and medical facilities were obtained from the Municipal Commissioners and Panchayat Union Commissioners for the concerned towns, and from the Director of Secondary Education, and Director of Public Health respectively.

Col. 10—Recognised Shorthand Typewriting and other Vocational Training Institutions.

The term "recognised" refers to institutes recognised by some statutory authority like Education Department, Commerce Department, Labour Department, etc. of the Government or by semi Government or autonomous bodies, public sector project, etc.

Cinemas refer only to the permanent cinema theatres and not include touring cinemas.

Col. 16—Number of working womens' hostel with number of seats.

This is a new column introduced in this statement in 1981. Considering the increasing employment of women in urban areas, the housing needs of working women has been an important problem.

Statement VI—Trade, Commerce, Industry and Banking in 1979.

In this statement, trade, commerce, industry and banking facilities in the town as in 1979 are furnished. Banking particulars were obtained from the Reserve Bank of India. The information on number of agricultural and non-agricultural credit societies were collected from the Registrar of Co-operative Societies through the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Scope of Primary Census Abstract

The Primary Census Abstract, as it is called presents basic data for each village or segment of a village (in cases where such village segment form different panchayats) in the "Village-wise Primary Census Abstract" and for each Ward/Division of a Town in the "Urban Primary Census Abstract". The format of the Primary Census Abstract for the villages and towns in 1981 has been slightly modified as compared to the 1971 Primary Census Abstract.

The Primary Census Abstract gives such basic information as area in hectares/square kilometres occupied residential houses, number of house holds, total population, Scheduled Caste and Scheduled Tribe population, literates, main workers, division of main workers into cultivators, agricultural labourers, workers in household industry and other workers, marginal workers and non-workers in respect of each unit. The Urban/Village Primary Census Abstract gives this information for each village and each urban ward. With a view to ensure comparability and to enable data users to derive the figures either for a revenue village or panchayat according to their requirements, the data are presented for segments of villages also. Wherever portions of one village happen to be in two or more panchayats the segmentwise data have to be used separately of added with some other segment data so as to derive panchayat data. For example, if portions of a revenue village bearing Location Code No. 10 forms part of two panchayats, the figures are given separately for each portion of the village against Location Code No. 10 a/b and 10 b/b. The total figures for the entire revenue village by adding the figures given against both the segments viz., 10 a/b and 10 b/b are given in the village Primary Census Abstract. If, instead, the panchayat figures are required, the data for the concerned village segment or segments relating to the panchayats concerned, are to be added up to arrive at the total figures for the respective panchayat.

An appendix presented in the case of the Urban Primary Census Abstract gives 1981 population, Scheduled caste and Scheduled Tribe population for each enumerator block of the town. This is meant for the use of administrative and election authorities.

in urban areas. Such data are also required by urban planners and researchers for conducting other studies in selected blocks.

Mode of presentation

The consolidated figures for the district and each taluk are given in the beginning for Total, Rural and Urban areas followed by each Town/Urban Agglomeration, under the caption 'District Primary Census Abstract'. Then follows the Primary Census Abstracts for Scheduled Castes/Scheduled Tribes. An alphabetical list of revenue villages is then given along with the Census Location Code Numbers of 1981 Census followed by the Village-wise Primary Census Abstract for each taluk. In the foot note given at the end of the Village-wise Primary Census Abstract, the villages included in Municipalities or Census towns are indicated. In an annexe, the names of villages and their constituent panchayats are given. Then, follows the Urban Primary Census Abstract. In an appendix to the Urban Primary Census Abstract, the population and Scheduled Caste/Scheduled Tribe figures for each Enumerator Block of a town are given. This arrangement is followed for each taluk and independent sub-taluk in the district.

Maps

Apart from the District Map given as frontispiece, map for each taluk showing the Village Location Code Numbers along with their boundaries have also been included at the appropriate places. As compared with the maps presented in 1971 District Census Handbook, several improvements have been effected in the maps presented in this volume. All towns are shown in the district and taluk maps with shading screens and also spheres according to the population size of towns.

Area Figures.

In the District Primary Census Abstract the area figures are given in square kilometres for Total, Rural and Urban areas. In the Village-wise Primary Census Abstract, the area figures for each Location Code Unit are given in hectares upto two decimals. The area figures for each town in square kilometres is also given at the end of the urban Primary Census Abstract. In the District Primary Census Abstract, the area figures of the District total represent the "Geographical Area" figures supplied by the Surveyor-General. Figures for urban areas are those supplied by the Local Bodies and revenue authorities. The urban area of a district has been arrived by adding the urban area figures of each taluk within the district. Area figures for the rural areas of District/Taluk are derived by subtracting the urban area figures from the total area of the District/Taluk. The total of the area figures of the taluks will not tally with district figures because the taluk area figures represent the "Land Use" area and are derived from the figures supplied by the Tamil Nadu Directorate of Survey and Land Records, while those of the district

represent "Geographical Area" supplied by the Surveyor-General of India. The total of the village area given in the Village-wise Primary Census Abstract may not tally with the rural area of the taluk given in the District Primary Census Abstract as the taluk area figures take into account hills, forests, rivers, etc., where as the village area may not include the same. For conversion the ratio is 100 hectares = 1 square kilometre.

It is hoped that the pattern of presentation of basic Census particulars for each district as explained above and adopted in this volume would be found convenient by data users.

Brief History of the District.

According to the historical evidence available, the region which comprised the present Chengalpattu district has been under a chain of regimes commencing from the Pallavas during the 7th century ending with the Nawab of Arcot during the early part of the 19th century when it came under the British rule.

The early Pallava regime over this region with its seat of power at Kanchipuram extended over a wide area from river Narmada in the North to river Ponniyar in the South. It is during the reign of this Pallava regime that the famous seven Pagodas of Mamallapuram and a good number of temples of architectural eminence were built which bear ample testimony to the legendary fame of the Pallavas.

With the fall of the Pallavas around 760 A.D., the region successively came under the rule of the Mysore kings and later, the Rashtrakutas. With the region coming under the Chola regime, the land (including 24 forts or kotams) came to be called the Thondaimandalam and Kulothunga's son Adondai was crowned in Kanchipuram. Thirteen of these 24 kotams referred to above are now identified as falling within the present Chengalpattu district.

The region was later overrun by the Kakatiyas of Warangal around the middle of the 13th century followed by the Vijayanagar kingdom by the end of the 14th century. With the fall of Vijayanagar dynasty at the battle of Talikota (near Raichur) in 1565 the region came under the rule of the Sultans of Golkonda entrusting the rule to Naiks who, as vassals, had dealings with the English at Madras.

In 1687, the Golkonda rulers were defeated and the Chengalpattu region with the rest of the Carnatic came under the Moghul emperors of Delhi. Chengalpattu, Kanchipuram and other towns and villages around were the scene of Carnatic wars. Battles are said to have been fought in this region during the struggle for supremacy between the English and French.

In 1781, The Nawab of Arcot assigned the revenues of the Carnatic to the English and in 1801, this region became part of the British dominion in India on the session of the Carnatic regime in full sovereignty to the English East India Company by the Nawab. In addition to the territory thus acquired, Chengalpattu included the town of Pulicat the earliest Dutch possession in India founded in 1609 which was ceded to the British in 1825. With this, this region came under the British rule which ended on the 15th August 1947 with India becoming independent.

Physical Aspects.

Chengalpattu is a coastal district encircling the city of Madras in the northern part of the State. The district lies between 12° 10' and 13° 15' northern latitude and 79° 15' and 80° 20' of eastern longitude. It is bounded on the east by the Bay of Bengal and the city of Madras, on the north by the Nellore district of Andhra Pradesh, on the south by South Arcot district and on the west by North Arcot district and Chittoor district of Andhra Pradesh. The district has a coastline of about 185 kilometres.

Near the coast, the district is mostly flat and dreary near the sea; but in the other parts it is undulating and even hilly in some places. The northern taluks of the district like Ponneri, Uttukkottai, Gummidipundi, Pallipattu, etc., do not have much to offer from the scenic point of view. The southern and south-eastern taluks like Chengalpattu, Kanchipuram and Madurantakam have undulating plants interspersed with redged or conical hills. In the Tiruttani taluk, which was added to the district after the State's reorganisation, a number of hillocks are found scattered. The sandy strip along the coast is replete with casuarina plantations.

Area and population.

There are 12 taluks in the district of which two, viz., Uttukkottai and Pallipattu are the independent sub-taluks. Spread over an area of about 7,863 Sq. Km. (marking eleventh among the sixteen districts of Tamil Nadu), the total population of Chengalpattu district is 3,616,508 as per the 1981 Census with the Scheduled Caste and Scheduled Tribe population of 947,789 and 46,050 respectively.

The jurisdictional changes that have taken place in this district since 1951 are briefly enumerated below. Consequent on the implementation of the Pataskar Award, with effect from 1st April 1960, 283 villages, 2 towns and part of a village were transferred from Chittoor district of Andhra Pradesh to form an additional taluk called Tiruttani. One village from the former Tiruttani taluk was transferred to Tiruvallur Taluk. As against this, 72 villages from Ponneri Taluk and 76 villages from Tiruvallur taluk were transferred to

Andhra Pradesh. The taluks have now been brought under four Revenue Divisions as under—

Name of Revenue Division.	Name of taluks included in the Division.	1981 population.
(1)	(2)	(3)
1. Kanchipuram	Kanchipuram ..	331,598
	Sriperumbudur	440,917
	Uttiramerur ..	121,802
2. Saidapet	Saidapet ..	926,026
	Ponneri ..	230,936
	Gummidipundi	122,613
3. Chengalpattu ..	Chengalpattu ..	398,835
	Madurantakam	380,680
4. Tiruvallur ..	Tiruvallur ..	258,256
	Tiruttani ..	146,677
	Uthukkottai Sub-taluk.	112,887
	Pallipattu Sub-Taluk.	145,281

The district headquarters was originally located within the limit of Madras city and in 1968 it was shifted to Kanchipuram.

An important jurisdictional change that took place in this district during the decade was the transfer of eleven town panchayats and one village panchayat to Madras city in 1978. The area of the district declined by about 40 Sq. Km. by this transfer.

Thanks to the rapid growth of Madras City in the last few decades, a number of towns and big industrial and commercial centres have come into being in Saidapet taluk of this district. As per 1981 Census, sixty six centres including 12 municipalities/Municipal townships, one cantonment and other Panchayats (both town and village panchayats) have been recognised as urban units and this represents the largest number of town for any district of the state. Two of these sixty-six census towns of this district are located in Saidapet Taluk which encircles Madras City on all sides except on the east. Prominent among these towns are Tiruvottiyur, Kathivakkam, Madavaram, Ambattur, Alandur, Pallavaram, Tambaram and Nandambakkam. Sriperumbudur Taluk also has 17 Census towns and this includes Avadi, Poona-mallee, etc., six of these sub-urban census towns have each recorded a population of over 50,000 in 1981 census. Three of them (Avadi, Ambattur and Tiruvottiyur) have registered over a lakh of persons each. The three other big towns are Alandur (97,449), Pallavaram (83,901) and Tambaram (86,923). The

district headquarters town, i.e., Kanchipuram has a population of 130,926. There are 1,856 inhabited and 99 uninhabited villages in this district as per 1981 Census.

Soil.

The soil of the district is mostly sandy, mixed with soda or other alkali or stony. Rocks found in and near the surface are in detached masses. Altogether the soil of the district cannot be considered rich or very fertile as that of some other districts. The regar or the alluvial soil, which is the most fertile type is found on the banks of Palar, Araniar and other major rivers. The 'red ferruginous' type of soil-less fertile than the alluvial is found in the major portion of the district. The soil found nearer the sea coast is of the inferior arenaceous type which is most suited for raising casuarina plants. Black soil is largely prevalent in the southern taluks of Kanchipuram, Uttiramerur, Madurantakam and Chengalpattu. In the northern taluks including Saidapet and Sriperumbudur, red soil is found on a considerable extent. No mineral of any importance is available in the district. The hills surrounding Chengalpattu yield felspar of good variety which is used for glazing pottery. "Epidote" a very scarce variety of granites is found in small quantities among the hills to the north-west of Chengalpattu.

Geologically, the district offers few interesting points. The Archean gneissic and plutonic rocks emerge from beneath the earlier sedimentaries in the southern and South-western, imparts. The region north-east and north-west of Kanchipuram has the quartzite gravel formations known as 'the Canjeevaram gravel'. Cherty sandstones of white colour resembling Cuddalore sandstones also occur in the district. Some of the minerals of this district and their production as in 1978 are listed below:—

Mineral.	Production in tonnes.
(1)	(2)
1. Lime Shell	6,010
2. Sulphur	8,197
3. Fireclay	429
4. Otherclay	488
5. Granitic	15,588
6. Gravel	106,764
7. Limestone (building material).	1,431

Climate and Rainfall:

The climate of the district is temperate; neither extreme heat nor extreme cold but humidity is considerable. Both the monsoons occur here and in summer heat is considerably mitigated in the coastal

areas by the sea breeze. The months between April and June are generally very hot with temperature going up to a maximum of 40°C. During the winter (Dec-Jan.) the minimum temperature does not fall below 18°C. The coastal areas receive more rains than the interior. The annual rainfall in most of the places of the district is around 1,200 milli metres. Generally the north-east monsoon which strike during the months of October, November and December brings heavy rainfall and nearly two thirds of the annual rainfall falls during this season. This district including Madras is affected by Gales and cyclones during the North-East monsoon. The district is mainly dependent on the seasonal rains and distress conditions prevail in the event of the failure of rains. Famines and drought conditions do occur in several parts of the district due to evasive monsoons in certain years. In recent years, the distress caused by such monsoon failures is sought to be mitigated to some extent, by the installation of electric pumps and filter points using the under ground water. During 1980-81 the latest year for which data are available, the rainfall in the district was 991.7 millimetres as against the normal rainfall of 1211.0 milli metres. This represents a deviation of 18.1 per cent less than the normal rainfall.

On the basis of the average rainfall in 15 rain gauge stations in the district for 50 years from 1901—1950, the normal rainfall in the district has been worked out and this together with the rainfall recorded in 1980—81 in Chengalpattu are given below monthwise.

NORMAL RAINFALL AND RAINFALL IN 1980—81 IN CHENGALPATTU DISTRICT.

Month.	Normal rainfall in mm.	Rainfall in 1980—81 in mm.

October	260.5	76.8
November	304.9	369.5
December	125.6	132.7
Annual	1,211.0	991.7

The annual average number of rainy days worked out on the basis of the actuals in 50 years (1901-50) is 54.9 in the district. A rainy day is reckoned as a day with 2.5 millimetres or more of rain.

Rivers

There are no perennial rivers in Chengalpattu district. Palar is the chief river of the district which rises in Karnataka. After flowing through Chittoor district of Andhra Pradesh, and North Arcot district of Tamil Nadu the river enters Chengalpattu district, a few kilometres west of Kanchipuram. It is joined at Thirumukkudal near Kanchipuram by the Cheyyar river, also flowing from North Arcot district. The Vegavathi river also joins with Palar. The river then flows for about 50 kms. in south-easterly directions and enters the sea five kilometres south of Sathurangapattanam (Sadras). Water flow in Palar is uncertain and except during floods, it is mostly dry. Springs are said to lie beneath the river bed of Palar and this can provide copious supply of water, if tapped.

Kortalaiyar, another river of this district has its source from the surplus of Kaveripakkam tank of North Arcot district. The river also receives surplus water from the tanks in Walajapet taluk. It is joined by the jungle streams of Mahendranadi and Tappur and runs across Tiruvallur and Ponneri taluks. In its course in the north-easterly direction, it is joined by Tiruttani and Nagari rivers. Its waters are drawn into the Cholavaram tank and Red Hills, the lake supplying drinking water to Madras city. The river then enters the Ennore backwaters, a few kilometres north of Madras city.

Arani river or Araniyanadi rising in Andhra Pradesh flows along the boundary between Ponneri and Tiruvallur taluks and enters the sea across the Pulicat swamps.

Coovam and Adyar are also well known rivers of this district and these are fed by surplus waters of tanks. They flow through Sriperumbudur and Saidapet taluks and finally enter into the sea in Madras city. The Adyar river gets the surplus waters of Chembarambakkam lake in Sriperumbudur taluk. The Killiar and Kallar are two other rivers in Madurantakam taluk and they are dry during the major part of the year.

Hills

There are not many hills of any considerable height in this district. There are a few small hills in the southern parts of Madurantakam. A few conical hills or ridges of small elevation also exist. The St. Thomas Mount, the Tiruneermalai hills with a temple on top, Pallavarattu quarry hills with the Dargah on it in Saidapet taluk, the Thirukkalukundram hills in the Chengalpattu taluk, certain hillocks in Tiruvallur and Tiruttani taluks are some of the land-marks. Most of the hills and hillocks are rocky and no verdant vegetation is seen in the slopes of these hills.

On flora and fauna, the district does not present any significant variety. Palmyrah and casuarina trees are mostly noticed. Casuarina in particular is found extensively all along the belt of sandy soil fringing the seacoast, Banyan, mango, tamarind, coconut and bamboo are the important trees grown widely in the district. Some variety of trees, useful for timber, are grown in the northern part of the district. Regarding fauna, we find that wild animals are scarce in the district. A few leopards are said to be in the hills. Deer, wild dogs, jackals, foxes, etc., exist. Birds, generally noticed in coastal areas, are found in this district also. An important bird sanctuary in the country has been developed in this district. It is housed at Vedanthangal in Madurantakam Taluk. This sanctuary has been here for over a century and a half and attracts numerous tourists and bird watchers during seasons. During September-January thousands of herons, storks, etc., flock to the trees here for nestling and breeding. They are attracted here because of the big lake which is situated amidst beautiful natural surroundings with trees all around. While reptiles are numerous, fresh water fishes are small in number and size.

Forests

The area under forests in this district is quite meagre. According to the statistics available for the year 1980-81 the forest area in Chengalpattu district is 42,547 hectares and this forms 5.4 per cent of the district's total area of 7.9 lakh hectares the state figure being 15.6%. The forests are scattered all over the district. In the reserve forests, trees of deciduous type, fuel trees of poor height, and other low scrub jungle are generally found. They also serve as grazing grounds. The unreserved forests contain some valuable timber grown under Forest Development Schemes and other plans. Reclamation by afforestation, tree planting for commercial timber, planting of eucalyptus trees and development of lands for grazing, etc., have been carried out to some extent. Of the district's forest area, nearly two-thirds are reserve forests and the rest reserve lands. During the five year plans, some area has been brought under cashew cultivation. Sandalwood, babul, bamboo and other useful trees are also reared in a small area under afforestation schemes. Of the total forest area of the state, which is nearly 20,000 sq. km., the share of Chengalpattu district is just two percent. The growing industrialisation and the increasing use of land for residential, non-agricultural and other uses have resulted in the degraded position of forests in this district. Increasing attention towards afforestation will have to be paid if further decrease in the area under forests is to be averted.

Electricity and power

Thermal power is generated in Ennore, which lies a little north of Madras city in Chengalpattu district. It is one of the important thermal power generating centres in Tamil Nadu, the others being the units at Madras Basin Bridge, Neyveli and Tuticorin. The installed capacity of this unit is 450 MW. with 3 units of 110 MW each and two units of 60 MW each. With

innumerable industrial units located in Saidapet and Sriperumbudur taluks, which need enormous power, generation and distribution of electricity in the district assumes considerable importance. Another significant power project in the district is the Kalpakkam Atomic power plant, located about 75 kilometres south of Madras on the sea coast. This falls under the Central Sector and is the third atomic plant in the country and the first in Tamil Nadu. This project envisages construction of two units with a capacity of 235 MW each. The plant is in an advanced stage of construction and is likely to be commissioned soon. Among the additional projects in Tamil Nadu to meet the future demand which are under consideration or investigation are the expansion of Ennore unit by an additional 210 MW unit and another North Madras Thermal Scheme of 630 MW, to be located in this district.

Chengalpattu is one of the districts where electric power connection has been extended to all the villages and towns. Nearly 69,000 agricultural pump-sets have also been energised in this district as on 31st March 1979 out of the total of about 8.4 lakh such pumpsets in the state. The number of towns, villages and hamlets electrified in Chengalpattu district as on 31st March 1979 was 4,297.

Land use

The total geographical area of the district is about 786,650 hectares. Of this, as per the latest available data (for 1980-81), the area sown is 2.79 lakh hectares, forming 35.5 per cent of the total area. The district area under the different categories of land use along with the percentage under each is given below. Similar percentage at state level is also given for comparison.

Land use.	Land area in Chengalpattu district in hectares 1980-81.	Percentage of area under each use 1980-81.	
		Chengalpattu district.	Tamil Nadu.
(1)	(2)	(3)	(4)
1. Forests	42,547	5.4	15.6
2. Barren and uncultivable land.	30,872	3.9	4.5
3. Land put to non-agricultural uses.	189,600	24.2	13.5
4. Cultivable waste ..	15,944	2.0	2.6
5. Permanent pastures and other grazing lands.	28,731	3.7	1.2
6. Land under miscellaneous tree crops and groves.	31,026	4.0	1.6
7. Current fallows ..	145,523	18.6	16.3
8. Other fallow lands ..	20,898	2.7	3.5
9. Net area sown ..	279,405	35.5	41.2
Total	786,650		

The district particularly the areas adjoining Madras City and other suburban towns, have several industries and mills besides numerous residential colonies and these occupy large chunks of land. A number of towns have also sprung up in Saidapet taluk adjoining the city of Madras and there is considerable building activity in these suburbs of Madras falling in Chengalpattu district. This is reflected in the higher percentage of area under land put to 'non agricultural uses' namely 24.2 percent compared to the state figure of 13.5 percent.

Agriculture

Though industrially well developed, Chengalpattu district continues to be important from the agricultural point of view also. A large majority of the working population are still working as cultivators and agricultural labourers. As per the latest 1981 Census, 55.2 percent of the total main workers (1,276,717) of this district are cultivators and agricultural labourers. The extent of dependency on agriculture appears to be gradually declining in this district as seen from the percentages of workers engaged in agricultural activities in 1961 and 1971 Censuses, which stood at 60.5 per cent and 58.0 percent respectively.

The total area under cultivation in this district (or total cropped area) as in the year 1980-81 was 372,933 hectares, and this forms 47.4 per cent of the total land area of 7.87 lakh hectares. Out of this cropped area 93,528 hectares accounting for 11.3 percent of the district's area represents area sown more than once. In the last two or three decades, extension of electric connection to large areas has enabled the setting up of a wide net work of pumpsets for exploiting subsoil water resources for irrigation and this has considerably augmented agricultural production. Of the different taluks agricultural development can be considered as particularly good and promising in the southern taluks of Madurantakam, Kanchipuram, Uttiramerur and Chengalpattu and also in the taluks of Sriperumbudur in the west and Tiruvallur in north-west.

Irrigation

The district is dependent on seasonal rainfall for agricultural operations. The annual normal rainfall in the district is 1211 mm. The south-west monsoon (June-September) and north east monsoon (Oct-Dec.) bring rainfall. The rainfall during the latter period i.e., October-December is substantial compared to the earlier monsoon nearly two-third of the total annual rainfall occurs in these months. For irrigation purposes, there are a number of big tanks in the district like Chembarambakkam tank, Chengalpattu tank, Madurantakam tank, etc., which get filled up during the rainy days and they form the major source of irrigation in the district. The famous Madurantakam tank is quite big its bund running to a length of 12,960 feet with a maximum depth of 100 ft when full. Its water irrigates an extensive area of land spread over several neighbouring villages. The Chembarambakkam tank irrigates over 5,263.16 hectares in Sriperumbudur Taluk. The rivers and tanks are mainly dependent on the seasonal rains and distress conditions set in, in the event of failure of rains. Spring channels

from Palar river are used to irrigate a portion of the land in Maduranakam taluk. Wells constitute an important supplemental source of irrigation and pumpsets are increasingly popular. Lift irrigation is also used in some areas. Artesian wells are also found in some villages. No major irrigation project exists in the district. A number of minor irrigation schemes have been carried out in the last two decades like renovating tanks, widening of channels, etc. and these have improved the irrigation facilities in the district to a considerable extent.

There are 37 Government canals for a total length of 374 kilometres in the district (as in 1980-81) used for irrigation. Well irrigation is also important and the total number of wells used for irrigation purpose alone is 78,447. There are 3,644 tanks of which 1,356 have each an ayacut of 400 acres and more; they form the most important irrigation source of the district. Besides the above, there are 8,106 tube-wells. There is also a reservoir and some springs and channels which supplement irrigation. Of all the above sources, tanks (which are mostly rain-fed) constitute the major irrigation source and irrigate over 50 percent of the total cropped area.

The net irrigated area in Chengalpattu works to 80.4 percent of the net sown area. Compared to the percentage of 48.0 for the state as a whole, this percentage is very high. The district stands second, following Thanjavur where the net area irrigated is the highest viz., 86.4%. If the total cropped area (i.e. including those sown more than once) and the area irrigated out of this total area are compared, then the percentage of total area irrigated in Chengalpattu district is the highest, 79.4 percent, among the districts. The state average percentage in this regard is only 50.9. Details of area irrigated by various sources as in 1980-81 are given below:—

Source of irrigation.	Area irrigated in hectares, 1980-81.
1. Canals	5,232
2. Tanks	124,160
3. Tube wells	26,968
4. Ordinary wells (sole irrigation)	63,963
5. Wells supplementing other sources of irrigation.	19,267
6. Other sources—springs, channels, etc.	4,390
All sources	243,980

Area irrigated more than once in the same year 71,292 Paddy is the Chief irrigated crop of this district.

Crops

Paddy is the most important crop cultivated in the district. During 1980-81 the area under paddy cultivation in Chengalpattu district was 266,826 hectares and the total rice production was 433,850 tonnes. The average yield is quite low viz., 1,626 kg. per hectare (80-81 crop estimation survey), this is some what below than the state average of 1,861 kg. per hectare. There has of course been a good improvement in the per hectare yield during the last 20-30 years. But there is great scope for further improvement in this regard. There is a rice research station in this district at Tirur. It was started in 1942 with a view to improve the paddy varieties manuring techniques, etc. Besides paddy the following are the other crops produced in the district according to the statistics relating to 1980-81.

- (1) millets like ragi, varagu, cholam, etc.
- (2) pulses,
- (3) groundnut,
- (4) gingelly
- (5) sugarcane and
- (6) chillies.

There are three cultivating seasons here, viz., Sarnavai, Samba and Navarai. Most of cultivation is done during the first two seasons when monsoon rains also occur. Dry and semi-dry cultivation is also resorted to in registered wet lands of this district, whenever the main source of irrigation viz., tanks do, not have adequate water.

Thanks to the Government for having implemented various development schemes in the last 20 years, the use of improved agricultural implements, sprayers, dusters, chemical fertilisers, pesticides etc., and modern cultivation techniques are all very popular now and are catching up among the agriculturist.

Animal Husbandry

Though not known for any popular breed of cow or bull cattle development in Chengalpattu district has taken place through the setting up of artificial insemination centres and key village schemes during the five-year plans. A central cattle farm exists at Alemadi in Ponneri Taluk of this district. The Madavaram milk colony in this district is nearer to Madras and it supplies milk to the city of Madras and its neighbourhood. Milk supply societies on a co-operative basis have also been organised in a number of villages under Madavaram Milk Supply Scheme. Loans have been advanced for purchase of milch cattle and milk is collected and sent to Madavaram dairy from villages. A sheep farm was started in the late fifties at Kattupakkam. Poultry extension centres under TAPCO have also been established in a few places and they supply cockerels for distribution in villages and also exotic eggs for hatching and table purposes.

According to the latest available data of livestock census (1977) the following are the livestock and poultry population in Chengalpattu district.

(1) Cattle and buffaloes	1,174,941
(2) Sheep	290,295
(3) Goats	201,122
(4) Other animals (Horses, Ponies, Pigs, etc.)	31,380
(5) Total poultry (fowls, ducks and others).	1,521,392

According to the earlier livestock census of 1974, the livestock and poultry population was 1,447,654 and 1,101,580 respectively. The district is served by 46 veterinary institutions (1978-79) including two veterinary hospital-cum-Key village centres 25 veterinary dispensaries and 19 veterinary dispensaries-cum-key village centres treating about 5.53 lakh animals.

Fisheries

With a coast line of 185 kilometers Chengalpattu district is quite important in regard to marine fishing. There are 63 fishing villages all along the coast in this district and fishing is an important means of livelihood for nearly 32,000 inhabitants of these villages constitute ten per cent of the total population of the fisherman community in the state. In land fishing is done in a small way in some of the tanks and lakes when there is enough water in them during seasons. Fishermen's primary co-operative societies render help to members in the matter of credit, fishing equipment, sale of fish etc. and to promote modern fishing methods.

There are nearly 200 mechanical fishing boats in the district and these used few fishermen. The number of catamarans (tied wooden logs) in use are 5,596 and the number of canoes is 196. Catamarans are largely used for fishing in the state and the number of catamarans used in Chengalpattu district forms 18.84 per cent of the total in the state. Production of marine fish (as in 1978-79) in Chengalpattu district was 14,148 tonnes out of the total production of 2.10 lakhs tonnes in the state.

Tenancy

'Tenancy' means the conditional occupancy right of lands for cultivation and other purposes and there are different systems in vogue with varying terms, conditions and understanding. The widely prevalent tenancy rights on agricultural land in Chengalpattu district are the 'waram' and 'kuthagai'. The waram represents land held under lease on crop sharing basis in which specified proportion of the produce is paid to the land-holder. 'Kuthagai' refers to lease or transfer of right to enjoy the perpetuity for a certain period or in perpetuity in consideration of rent which may be in the form of money share of crops or any other things of value from the lessee. The ryotwari patta, etc., are the rights under which the occupier deals directly with the Government and enjoys proprietary rights in

lieu of periodical payments as fixed by Government. 'Manyam' or the inam land 'Othi' or mortgage with possession, 'Adamanam' (assignment or grant of land), 'Bogyam' or usufructuary mortgage 'Eedu' or simple mortgage are the other common local rights of tenancy prevailing in Chengalpattu district. Nearly two thirds of the cultivating households of the district cultivate own lands while the rest are under pure as well as mixed tenancies.

With the evolution of the welfare measures of the State and in order to protect the interests of the tiller of the soil, certain tenancy enactments have been made by the State Government to protect the tenants from arbitrary eviction and to ensure their share of the produce. Some of these are the Tamil Nadu Cultivating Tenants Production Act, 1955, Tamil Nadu Cultivating Tenants Fixation of Fair Rent Act, 1956, Tamil Nadu Public Trusts Act, 1961, Tamil Nadu Cultivating Tenants Special Provision Act, 1968, Tamil Nadu Agricultural Land Records of Tenancy Rights Act, 1969, Tamil Nadu Cultivating Tenants Arrears of Rent Relief Act, 1972, etc., etc., with a view to ensure equitable distribution of land, ceiling laws have also been enacted by the Government.

Most of the land holdings in the district are small and as per the agricultural census of 1976-77, 2.32 lakhs of land holding out of the total of 4.41 lakhs or operational holdings in the district are half-a-hectare and less in size. While 88,651 holdings fall under the range of 0.5 to 1.0 hectare, 66,832 holdings are with 1.0 to 2.0 hectares each. Hardly 2,500 holdings are in the size over 10 hectares.

Industries

Thanks to its proximity to Madras City, Chengalpattu district and particularly the areas adjoining Madras lying in Saidapet and Sriperumbudur taluks have made vast strides in industrial development. Due to non-availability of space within Madras City, several entrepreneurs have located their industries on the outskirts of Madras, falling in Chengalpattu district. Places like Tiruvottiyur, Avadi, Ambattur, Madavaram, Manali, Ennore, Villivakkam, Pallavaram, Vandalur have all become industrially important centres and a number of major and minor industries are also coming up in various other places in the district. The areas adjoining the important highways branching from Madras and running through Chengalpattu district like the Grand Southern Trunk Road, the Grand Northern Trunk Road, Poonamallee High Road, Tiruvottiyur High Road, Velacheri Road, Lattice Bridge Road, etc., as also the places along the railway lines branching from Madras on the three sides, viz., south west and north are turning as industrial belts.

Automobiles and automobile component's units producing tyres, valves, lamps, etc. and a number of light engineering industries, besides fertiliser and chemicals, electronics and leather units are located in Chengalpattu district. The Standard Motors Factory at Vandalur, the Ashok Leyland at Ennore and the Enfield India Limited at Tiruvottiyur manufacture cars, trucks motor cycles, etc. and form the back bone of several automobile

ancillary units producing wheels, tyres and tubes, electrical parts, vacuum boosters, engine valves, brake systems, pistons gears, etc., M/s T.V.S. and Sons, have been the pioneers in the setting up of a number of automobile ancillary units and in collaboration with some foreign concerns have set up a chain of industries between Villiyakkam, Padi and Ambattur. The Dunlop Rubber Co. (India) Ltd., at Ambattur, the Madras Rubber Factory Ltd., at Tiruvottiyur, the Southern Tyre Manufacturers (P) Ltd., at Vandalur are all engaged in manufacturing tyres tubes etc., T.I Cycles of India at Ambattur are manufacturing bicycles and a number of other units nearby produce cycle chains, bicycle saddles, bicycle rims, etc. and other cycle parts.

There are industries like English Electric Co., Easun, Southern Switchgears, etc., producing transformers, switchgears and other electrical equipment. A number of engineering units producing steel billets, steel castings, steel pipes, steel tubes forgings and stampings, seamless tubes, aluminium sheets, malleable iron castings, pipe fitting, steel structural, etc., exist in Tiruvottiyur, Avadi and other areas. Agricultural tractors and other allied equipment are manufactured by a unit viz., Tractor and Farm Equipment (P) Ltd., Units like M/s K.C.P. Ltd., Binny Engineering Works Sri Rama Machinery Corporation, etc., are engaged in the manufacture of machineries for the production of sugar, cement, textiles and other chemicals.

There are a number of industrial units engaged in producing chemicals like fertilizers, insecticides, paints etc. In the field of oil refining one of the foremost refineries of the country, the Madras Refineries is located in Manali. The refining capacity of this unit is 2.8 million tonnes per annum and this capacity is proposed to be doubled to 5.6 million tonnes in the next few years. Besides petrol, diesel kerosene and cooking gas, a number of other by products are manufactured in this unit. Madras Fertilizers Shaw Wallace Kothari (Madras) Ltd., are the important units producing chemical fertilizers. The Madurantakam Co-operative Sugar Mills with a crushing capacity of 1250 tonnes of sugarcane per annum is a premier sugar mill. There are also a few textile mills in the district. Leather tanning is important in places like Chromepet, Pallavaram, Madavaram, etc. Madras City is important from the point of view of leather trade and exports and so a number of leather tanning factories are located near about Madras city in Chengalpattu district. There are a number of brick manufacturing units in areas adjoining Madras, where bricks are manufactured on a large scale, to cater to the growing needs of building constructions.

The surgical instrument plant at Nandambakkam public sector unit is an important manufacturing unit set up by the Government of India. A number of other manufacturing units like a printing paper unit (at Ponneri), Cosmetics unit, match factory, pen biscuit, zip, salt making units, etc., exist in the district. A number of small scale and cottage industries have also come up, thanks to the setting up of the industrial estate at Ambattur and industrial training centres in a few places, like the foot wear training centre at Pallavaram.

carpentry and blacksmithy training units at Sriperumbudur, etc. A number of units in the Ambattur industrial estate are engaged in the manufacture of automobile parts and other components.

In regard to handicrafts the centre for sculpture and moulds casting in Mamallapuram and the hand-made paper and printing unit at Mamandur are noteworthy. Handloom is very important as a cottage industry and silk weaving is an important industry in Kancheepuram and its suburbs. Silk sarees of Kancheepuram are famous all over India and even abroad. Cotton weaving is also important in this district as there are several cottage units producing cotton sarees, dhoties, towels and lungies. While Kancheepuram is well known for its silk weaving the other taluks like Pallipattu and Sriperumbudur are also important in the field of cotton handlooms and other household industries.

The following statement gives the number of factories and average number of workers engaged in them as in the year 1980 in Chengalpattu district.

Factories with average number of workers, 1980.

Industry along with its code.	Number of factories.	Number of workers.
(1)	(2)	(3)
20-21 Manufacture of food products.	48	3,111
22 Manufacture of Beverages, Tobacco and Tobacco products.	4	114
23 Manufacture of cotton Textiles.	10	1,370
24 Manufacture of wool silk and synthetic fibres.	1	12
26 Manufacture of Textile products.	15	5,321
27 Manufacture of wood and wood products, furniture and fixtures.	13	663
28 Manufacture of paper, paper products, printing publishing and allied industries.	41	2,069
29 Manufacture of leather and leather products.	4	3,459
30 Manufacture of rubber, plastics, petroleum and coal products.	68	5,791
31 Manufacture of chemicals and chemical products.	85	7,907

Industry along with its code. Number of Factories. Number of workers.

(1)	(2)	(3)
32 Manufacture of non-metallic mineral products.	48	3,769
33 Basic metals and alloy industries.	104	10,811
34 Manufacture of metal products and parts, except machinery and transport equipment.	114	4,217
35 Manufacture of machinery machine tools and parts, except electrical machinery.	136	9,761
36 Manufacture of electrical machinery, apparatus, appliances and parts.	77	8,746
37 Manufacture of transport equipment and parts.	98	31,480
38 Other manufacturing industries.	17	1,838
40 Electricity	7	1,392
41 Gas and steam	4	263
68 Retail trade in others]	1	22
12 Air Transport	2	183
91 Sanitary services	2	54
95 Recreational and cultural services.	13	719
97 Repair services	21	1,692
103 Repair of motor vehicles and motorcycles.	1	33

With a large number of factories and labour employed in them (over one lakh as in 1980) the district becomes one of the first 15 districts in the country with a very high daily employment in factories.

Household industry is also very important in this district and it absorbs nearly five per cent of the total working force as in 1981 Census. There are 68,444 persons in Chengalpattu district under "Household industry" as per 1981 Census, who are engaged in manufacturing, processing, servicing and repair of goods.

The household industry workers in the district and the different taluks along with their percentage to total workers as per 1981 census are given below :-

District/Taluk.	Number of main workers engaged in Household Industry (Manufacturing, processing, servicing, and Repairs 1981.	Percentage of workers to total main workers 1981.
(1)	(2)	(3)
CHENGALPATTU	68,444	5.36
1. Gammidipundi	2,366	5.02
2. Ponneri	2,298	2.81
3. Uttukkottai	1,339	2.74
4. Tiruvallur	3,283	3.35
5. Pallipattu	10,976	18.99
6. Tiruttani	1,917	3.23
7. Sriperumbudur	11,033	7.08
8. Saidapet	6,292	2.33
9. Chengalpattu	5,752	4.26
10. Kanchipuram	18,411	14.91
11. Uttiramerur	1,772	3.70
12. Madurantakam	3,005	1.98

Trade

Apart from the above manufactured goods that are sold outside, the chief articles of trade in the district are cloth and grains. Though a coastal district, Chengalpattu does not have sea-borne trade and the goods are sent to Madras, which is an important Centre for trading activities. Inland trade is restricted to surplus grains, handlooms and silk goods, milk, fish, coconuts, salt, casuarina, leather and leather goods. Kanchipuram the district headquarters is an important centre for rice trade. Some of the larger towns like Tiruvallur, Madurantakam, Chengalpattu etc., are also prominent wholesale and retail trading centres in cloth, grains and other cereals.

Transport

There has been a tremendous increase in the transport facilities in the district in the recent decades and this is the consequence of the increasing industrialisation of the

suburban areas of this district around Madras. Men and materials have to be carried to and from Madras and between different places within the district. A large number of residential areas have also sprung up in these suburbs and hence there is large traffic. Several thousands of people residing in this district are employed in offices/factories or studying in colleges/schools or engaged in the commercial enterprises located in Madras city. They travel to and from the city by buses and trains. Similarly a large number of persons who reside in city move daily to the suburban towns and industrial centres as they work in factories and other enterprises located in these suburbs.

The metre-gauge electric trains which run frequently between Madras beach and Tambaram in the south carry lots passengers to and from Madras and the other suburban centres in between. The northern bound broad-gauge lines from Madras to Delhi and Calcutta run through Saidapet and Ponneri taluks. The north-west and south-west broad-gauge lines from Madras to Ootacamund, Bangalore and to places in the west coast pass through the taluks of Saidapet, Sriperumbudur and Tiruvallur while the Madras-Bombay line passes through Tiruttani taluk also besides the above three taluks. The south bound metre-gauge lines towards Tiruchirappalli, Madurai, Tirunelveli and Kanniyakumari run through the taluks of Saidapet, Chengalpattu and Madurantakam.

The completion of the electric traction between Madras and Tiruvallur in the west and Gummidipundi in the north (both broad gauge) in recent years and the introduction of electric trains between these stations have opened up these areas for further development and industrialisation. Except the headquarters of the sub-taluks of Uttukkottai and Pallipattu in the north and the taluks of Sriperumbudur in the west and Uttiramerur in the south, all the other taluk headquarters in the district are connected by trains.

The district is well served by a network of roads, national highways other district roads and village roads. There is 214 km. of national highways in the district. The highways pass through the north, west and southern directions in the district and traffic in them is very heavy as they connect Madras with other important towns and cities. The length of the other district roads maintained by State Government is 2,645 km. of which 2,599 km., are surfaced, mostly bituminous. Roads maintained by the panchayats and panchayat unions which connect villages and small towns, total 5,100 km. Also, in the district are 657 km., of municipal roads and 11 Km. of other roads. The total road length in the district is 8,627 km. (1977-78).

The total number of registered transport motor vehicles in the district (in 1978-79) was 2,675 and of this 246 are stage carriages and 1,433 are goods vehicles. The non-transport motor vehicles registered are 2,646, of which 1,445 are motorcycles and scooters and 413 motor cars. As per latest available data (1980) there are six metropolitan bus routes in this district, 20 city and town service routes (private) and 133 mofussil routes (private) running within the district. The nationalised transport services run nine long distance routes within the district. There are 63 town

services in operation by the nationalised Pallavan Transport Corporation, besides 64 ordinary mofussil services.

The civil aerodrome and the flying club are located in Minambakkam in this district and this is at a distance of about 15 km., south of Madras on the Grand Southern Trunk Road. Domestic flights connect Madras (Minambakkam) to Delhi, Bombay, Calcutta, Nagpur, Hyderabad, Bangalore, Coimbatore, Cochin, Trivandrum, Tiruchchirappalli and Madurai. It is also an international airport with flights to Sri Lanka, Malaysia, Singapur, Australia etc.,

The passenger and cargo traffic in Madras is quite heavy.

MAJOR SOCIAL, CULTURAL AND OTHER EVENTS DURING THE DECADE, 1970-80.

The panchayat elections took place in 1970 and the Assembly and Lok Sabha elections in 1971, 1977 and 1980. Apart from these and the lifting of prohibition in 1971 and its reimposition in 1974 (which are applicable to the entire State), no major event worthy of note at the district level has taken place. Droughts and floods are recurring events in some parts of the district and on such occasions relief measures are organised by the Government to help the affected population. Cyclones causing heavy damage to houses and other property in the coastal areas have occurred in some years. With a view to mitigate the sufferings of the people prone to such storms, cyclone relief centres have been built in a few places on the coast. From the administrative angle, the upgradation of the two sub-taluks, viz., Gummidipundi (in March 1975) and Uttiramerur (in October 1977) as main taluks may be considered important.

The opening up of a fire service station in Gummidipundi in 1980, Sub-Court at Tiruvallur in 1979, Sub-Treasury in Pallipattu in 1980, formation of the Kativakkam and Madavayam Municipal Townships in Saidapet Taluk in 1971, etc., are also some of the events, important from the administrative view point.

The introduction of electric train service between Madras and Gummidipundi in 1979 is an event of great importance in the district. Similarly, the inauguration of electric train services between Madras and Tiruvallur in 1980 is also a significant event. To facilitate the commuters and residence of several new colonies, a new railway station 'Palavanthangal' was opened in 1977 in the Madras Beach-Tambaram metregauges section. In 1978, ten urban areas and three villages of Saidapet taluk were merged with Madras city and the district lost nearly 40 sq. Km.

Places of Historical/Religious/Archaeological importance

A brief account of some of the places in the district which are famous for their historical, religious, archaeological importance is given below.

1) Kanchipuram

Situated at a distance of about 75 km. south-west of Madras city, Kanchipuram or 'Kanchi' as is popularly known, is the present headquarters of the district and also of Kanchipuram Taluk. A historically famous temple city, it was the Seat of Pallava administration in the 7th Century A.D. and it later passed into the hands of the Cholas and Vijayanagar Kings. It is an important religious centre frequented by pilgrims. The Kamakshi temple which is the largest in the town, contains many inscriptions. Its tower is said to have been built by Krishnadevaraya, the well known Vijayanagar King. The Kailasanatha temple, one of the oldest was built in 700 AD. The Vishnu temple of Lord Varadaraja is also a famous shrine and its annual Garudotsavam in May-June every year attracts huge crowds. The city is a famous centre for artistic silk sarees and printed textiles and is also known for its handlooms and handicrafts.

(2) Mamallapuram

It is a place of architectural interest and lies on the east coast, 55 km., south of Madras. It is an important tourist centre. The shore temple and the monolithic chariots, known as the 'Five Rathas', A-juna's pinnace, the Krishna Mandapam, Mahishasura Mandapam, the elephant etc., are all magnificent pieces of sculpture which attract hundreds of tourists throughout the year. The place is also known as the Seven Pagodas and along with the sea-shore and its temple provide a beautiful picnic spot abounding in natural beauty. There is also a lighthouse here. A training centre for sculpture has been set up by the Government here and students are imparted training.

(3) Madurantakam

It is about 80 kilometres south of Madras on the Grand-Southern trunk road. There is a very big tank here covering an area of 7.5 sq. Km., and it irrigates nearly 3,000 acres. According to the legend, the tank used to breach every year and it was protected by Sri Rama once in 1798. The doubts about the efficacy of the powers of the local deity, entertained by then British Collector (Mr. Lionel Place) in 1798 were dispelled and the Collector built a sanctum for the Goddess in the temple. The Kothandaramaswamy temple here came to be known as 'Eri Katha Perumal' (the God who protected the tankbund). There are some Chola inscriptions in Grantha and Nagari script in the temples here.

(4) Tirukkalkundram

Also known as 'Pakshitheertham' lies 12 km. south-east of Chengalpattu town on the southern trunk road. There is a rock-cut temple here, atop a hill of about 500 feet high, and it is dedicated to Lord Siva (Known as Vedagiriswarar here). Every day two white vultures come here regularly around noon (between 11 a.m. - 12 noon) and consume the holy prasadam offered by the priest. The belief is that the birds come from Banaras. The hill is considered a sacred one and there is a flight of steps in cut stone to reach the temple atop. The place is also an important weaving centre.

(5) Vedanthangal

This place lies about 10 km. west of Madurantakam. It has become famous on account of its bird sanctuary. After the rainy season a variety of birds belonging to different species flock to this place from far and near. They breed on the huge trees here near the lake. Bird-lovers assemble here in large numbers and watch the bird varieties. The place has acquired a name and has become a centre of tourist attraction.

(6) Tiruttani

The place was transferred to Madras from Andhra Pradesh in 1960 as per the Pataskar Award. Tiruttani is one of the six famous hill abodes of Lord Subramania. The festival during Adi-Krithigai (July-August) attracts huge crowds from all parts of the State and neighbouring State also. The temple is over a small hillock and one can reach it by steps or by road. It is an important town in the broad-gauge line in the north-west and most of the pilgrims to the famous Tirupathi in Andhra Pradesh invariably visit this place also en-route. Tiruttani is the headquarter town of Tiruttani Taluk.

(7) Pulicat

Pulicat is also a beautiful spot on the east coast, lying north of Madras. There are facilities for swimming and fishing here. It was a site of old Dutch settlement. The Dutch founded a factory at this site in 1600 A.D. A fort by name "Geldria" was built by them here now, it is in shambles. There is an old lighthouse here in an island.

(8) Sriperumbudur

This is the headquarter town of Sriperumbudur Taluk and is about 40 km. to the west of Madras on the Madras-Bangalore National Highway. It is an important religious centre. The great Vaishnavite philosopher, Ramanuja was born here. There is a famous shrine here, the Adikesavaperumal Temple. The annual festival in the temple attracts a big con-course of people.

There are a number of other towns and villages in Chengalpattu district which are also important from the cultural or religious background though to a lesser degree, and these are not mentioned here in detail.

A brief analysis relating to certain population characteristics is made utilising the information collected in the Village and Town Directory. A number of tables have been designed for this purpose. The tables are generated at the district and taluk level for the rural areas and in regard to urban areas, town wise particulars are presented.

TABLE 1
DISTRIBUTION OF VILLAGES ACCORDING TO THE AVAILABILITY OF DIFFERENT AMENITIES
CHENGALPATTU DISTRICT.

				78.50	15.25	100.00	35.61	0.59	55.60	68.80	98.81

TABLE—1

This table furnishes the taluk-wise distribution of inhabited villages according to the availability of different amenities. Among the total of 1856 inhabited villages in the district, the amenity of drinking water alone is available to all the villages marking cent percent. Next in the order to avail the amenities is the facility of power supply which is available to 1834 villages which works out to 98.81 percent. The amenity of education occupies the third place, the percentage being 78.50. Tiruttani taluk occupies the first place viz., 100 per cent. The proximity of distance to

Madras city for many taluks of Chengalpattu district, the market/hat facility does not arise. However, for certain taluks, such amenity exists to a very low percentage as seen in the table. The important amenity of medical to the rural population is comparatively low which has recorded only 15.25 per cent in the district. The villages located in Ponneri and Madurantakam taluks avail the lowest viz. 8.47 percent and 9.49 percent respectively. The other amenities of post and telegraph, communication and pucca road facility are availed by 35.61 percent, 55.60 percent and 68.80 per cent of villages respectively in the district out of the total of 1,856 villages.

TABLE 2.

Table-2:

This table furnishes the proportion of rural population of inhabited villages served by different amenities. The total population of the inhabited villages in the district is 2,208,722 and all of them avail the amenity of drinking water viz., 100 per cent. The amenities of education and power supply are availed by 93.51 percent and 99.78 per cent of the rural population in the

district. The proportion of population served by the amenities of pucca road, communication and post and telegraph works out to 79.15 percent, 62.27 per cent and 59.99 per cent respectively. Only 32.69 per cent of the rural population are served with the important amenity of medical in the district. Market/hat facility is available to only 2.02 percent of the total rural population which is the lowest of all the amenities available in the district.

TABLE 3

Distribution of Villages not having certain amenities arranged by distance range from the places where these are available.

CHENGALPATTU DISTRICT.

Table-3.

This table furnishes the distribution of villages not having certain amenities, arranged by distance ranges from the places, where such facilities are available. Out of a total 399 villages which enjoy the amenity of education, 395 villages avail the facility at a distance of —5 kms. and the remaining 4 villages avail the same at a distance of 5—10 kms. Similarly the amenity of medical is availed by 914 villages at a distance of —5 kms. 425 at 5—10 kms. and 235 villages avail at 10+ kms. It is not able that drinking water facility is available in all the inhabited villages in this district. The

amenity of post and telegraph which is not available in 1,195 villages avail the same at different distances viz., 1060 villages avail this amenity at a distance of —5 kms. 105 villages at 5—10 kms. and 30 villages at 10+ kms. Out of the total 1856 villages in this district, 1845 villages are not possessing the facility of market/hat and among these villages, 1,171 avail the same amenity at a distance of —5 kms., 383 at 5—10 kms. and 291 at 10+ kms. from their respective villages. Regarding the amenity of communication, 725 villages avail the facility at a distance of —5 kms. 63 villages avail at 5—10 kms. and 36 villages avail the same at 10+ kms. from their respective villages.

Table-4

This table furnishes the distribution of inhabited villages according to the distance from the nearest town and availability of different amenities. Among the total inhabited villages of 1,856 in the district, 237 villages which are located in the distance range of 0 - 5 kms. from the nearest town avail the amenities of drinking water to 100.00 per cent, power supply to 99.16 per cent, education to 77.22 per cent, pucca road to 71.31 per cent, communication to 63.71 per cent, post and telegraph to 35.86 per cent and medical to 15.61 per cent of the villages. Similarly 1,022 villages which are located in the distance range of 6-15 kms. from the nearest town avail the amenity of drinking water to

100.00 per cent, education to 78.77 per cent, power supply to 98.73 per cent, pucca road to 70.25 per cent, communication to 53.72 per cent, post and telegraph to 37.28 per cent, medical to 15.66 per cent and market/hat by 0.78 per cent of the villages. The inhabited villages which are situated in the distance range of 16 - 50 kms. from the nearest town in the district number about 597 in which the amenity of drinking water is availed by all the villages viz., 100.00 per cent, power supply by 98.83 per cent of the villages, education by 78.56 per cent, pucca road facility by 65.33 per cent communication by 55.61 per cent, post and telegraph, by 32.66 per cent medical by 14.41 per cent and market/hat, by 0.50 per cent of the villages. No village is occurring in the distance range of 51 + in the district.

Table-5

This table shows the distribution of inhabited villages according to different population ranges and amenities available. Among the four categories of population ranges, 560 villages come under the population range of 499 and below kms. and among these villages 540 avail amenity of drinking water, 543 avail the power supply, 262 avail the amenity of education, 315 avail the pucca road, 219 the communication, 58 post and telegraph, 10 villages the medical facility and only one village avail the amenity of market/hat. In the population range of 500 - 1,999 kms. there are 1,007 villages out of the total 1,856 inhabited villages. While the amenity of drinking water is availed by all the villages, the amenity of power supply is availed by 99.50 per cent of the villages, education by 90.17 per cent, pucca road by 71.40 per cent, communication by 57.70 per cent, post and telegraph by 35.95 per cent, medical by 13.01

per cent and market/hat by 0.20 per cent of the villages. 251 villages occur in the population range of 2,000 - 4,999 and all these villages are provided with the amenities of drinking water and power supply marking 100.00 per cent. The amenity of education is availed by 99.20 per cent, pucca road by 83.27 per cent, post and telegraph by 81.67 per cent, communication by 78.88 per cent, medical by 46.22 per cent and market/hat by 1.99 per cent of the villages. In the population range of 5,000+, there are 38 villages and all these villages avail the amenities of education, drinking water and power supply, the percentage being 100.00 percent to all. Regarding the amenities of communication and pucca road, 89.47 per cent of the villages viz., 34 villages out of the total 38 in this range avail them. While the amenity of medical is availed by 68.42 per cent of the villages, post and telegraph facilities are availed by 94.74 per cent and market/hat by 7.89 per cent of the villages.

TABLE—6.

Main Staple Food in the Majority of Villages in each Taluk.

CHENGALPATTU DISTRICT.					
Serial Number.	Name of Taluk.				Main Staple Food.
(1)	(2)				(3)
1	Gummidipundi ..	..	..	..	Rice, Ragi.

TOTAL					1,856	693,715.06	69.26	49.79

Table - 7

This table gives the distribution of inhabited villages according to land use. The total area of 1,856 villages is 693,715.06 hectares of which the percentage of the cultivable area to the total area works out to 69.26. The percentage of the irrigated area to the total cultivable area works out to 49.79. Saidapet, Gummidipundi

and Tiruttani taluks possess the maximum cultivable area to total area in the district viz., 99.00 per cent, 76.68 per cent and 76.19 per cent respectively. Chengalpattu taluk has recorded the lowest percentage of the cultivable area in the district viz. 57.89. While Ponneri taluk has got the highest percentage of 61.76 of irrigated area to total cultivable area Pallipattu taluk records the lowest percentage of 20.83.
