Appendix	Towns showing their out growths with Population	471

Responsibility for the correctness of internal details shown in the maps rests with the publisher.

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Government, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data up to village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census, the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series, some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village, the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect, particularly in relation to amenities and land-use pattern, is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the

amenities with the population and number of households they serve. Addition of two more appendices, listing the villages where no amenities are available and according to the proportion of Scheduled Caste and Scheduled Tribe population to the total population, has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class I and Class II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Caste and Scheduled Tribe population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the Primary Census Abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series, it has been so designed that part-A of the volume contains village and town directory and part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Taluk/Town level. At the beginning of the DCH, a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and taluk level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri A. P. Muthuswami, I.A.S., the Director of Census Operations, Tamil Nadu on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

NEW DELHI,
26th April, 1982.

P. PADMANABHA,
Registrar General, India.

P R E F A C E

It has been the tradition of the Government of Tamil Nadu to publish immediately after each census, a District Census Handbook separately for each district containing the census statistics, besides other valuable data of local importance, for the use of the State Government, district administration, research scholars and other data users. The first series of District Census Handbooks were brought out immediately after the 1951 Census, and the present publication after the 1981 Census is the fourth in the series.

The census statistics presented in this publication were collected during the census operations in February—March, 1981, as at the sun rise of the 1st March, 1981. The other statistics in this publication have been collected from various departments of the State and Central Governments.

This publication consists of the following two parts:—

Part-A : Village and Town Directory and

Part-B : Village and Townwise Primary Census Abstract.

Taking into account the increasing and varied developmental and other welfare measures undertaken by the Government, the scope and content of the data in this publication have been considerably enlarged and improved to meet the requirements of the planners and the other data users. In particular, certain inset tables based on census and other data have been included in this publication with brief analytical notes thereon.

This publication contains a brief history of the district highlighting the major characteristics of the district in relation to the economic resources like forestry, minerals, etc., besides the social, cultural, religious and historical aspects. The district and taluk maps in this publication give the administrative units upto village level, the rural and urban units, the location of towns and cities, communication facilities and other related details.

The facilities and amenities available in respect of education, medical, drinking water, post and telegraph, markets, communication, etc., in each village and town have been included in this publication, and an important feature is that wherever the above facilities and amenities are not available in any particular village/town, the nearest place where they are available has also been reported.

Another interesting feature in this publication is that villages with none of these amenities have been listed out separately for the pointed attention of the planners and administrators.

Certain tables present data exclusively in respect of the weaker sections of the society belonging to the Scheduled Castes and Scheduled Tribes.

The land use pattern in respect of rural and urban areas have also been reported in this publication which would meet the requirement of micro level planning for rural and urban areas.

The data in respect of urban areas, apart from the medical and other facilities available, relate to the growth of towns, the availability of protected water supply, and what is important, the civic amenities available in the slums of the urban areas.

Part B of this volume consists of the District and Village/Townwise Primary Census Abstracts followed by Primary Census Abstract of Scheduled Castes and Scheduled Tribes.

The District Primary Census Abstract gives for each territorial unit up to taluk level in the case of rural areas and upto town level for urban areas, occupied residential houses, households, the total population, the Scheduled Caste and Scheduled Tribe population, workers, etc., thereby indicating the basic socio-economic characteristics of the population for the territorial units. The Village and Townwise Primary Census Abstract gives similar information for villages and wards of towns. Besides, there is an appendix which furnishes at urban block level, the total population and Scheduled Caste and Scheduled Tribe population.

I am grateful to the Collectors and other district officers and Departments of the State Government who have extended their unfailing co-operation and help in collecting the voluminous and useful data other than Census, for their presentation at one place in this publication, for the ready reference of the data users.

In bringing out this publication, I have received assistance from S/Shri M. Thangaraju, M. Panchapakesan and M. Nagappan, Deputy Directors of Census Operations, besides a large number, of staff members of this Directorate.

In formulating the scope and content of the data in this publication and designing the formats for presentation of the data, I have received valuable guidance from Shri P. Padmanabha, Registrar General, India. The encouragement I have received from him at every stage of the work has contributed in a great measure to the successful publication of this District Census Handbook.

I hope the data in this volume would be found useful and the publication well received by the administrators, academicians and other data users.

MADRAS,
July 1983

A. P. MUTHUSWAMI,
Director of Census Operations,
Tamil Nadu.

ACKNOWLEDGEMENT

It is my pleasant duty to acknowledge the able assistance given by the following officials of my office in the preparation of this volume.

ANALYTICAL NOTE

(i) CENSUS CONCEPTS:

Rural and Urban Areas:

Census figures are generally presented separately for rural and urban areas. In the 1981 Census, the definition of an urban unit is more or less the same as in the 1961 and 1971 Censuses but for some minor variations. The urban areas of 1981 Census are :

(a) All places with a Municipality, Corporation or Cantonment Board or notified town areas :

(b) All other places which satisfied the following criteria :

(i) A minimum population of 5,000

(ii) At least 75 per cent of the male working population engaged in non-agricultural (and allied) activity

(iii) A population of at least 400 per km² (or one thousand per square mile)

The above definition of urban area varies slightly from that of 1961 and 1971 Censuses in that the males working in activities such as fishing, logging etc. were treated as engaged in non-agricultural activity and therefore contributed to the 75 per cent criterion in the 1961 and 1971 Censuses, whereas in the 1981 Census, these activities are treated as on par with cultivation and agricultural labour for the purpose of this criterion. The rest of the areas not treated as urban are classified as rural areas.

Urban Agglomeration:

Urban Agglomeration is a new concept formed during 1971 Census and this replaces the concept of town group adopted in 1961 Census. An Urban Agglomeration may be explained as follows, "It must form a continuous urban spread constituting a town and its adjoining urban outgrowth or two or more physically contiguous towns together with continuous well recognised urban outgrowth, if any, of such towns".

Census House:

A Census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Household:

A household is a group of persons, who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented any of them from doing so.

Scheduled Castes/Scheduled Tribes:

For the enumeration of Scheduled Castes and Scheduled Tribes in census, the names of Scheduled Castes and Scheduled Tribes as recognised in Tamil Nadu based on the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act of 1976 (Central Act 108 of 1976) were followed. The enumerators were instructed to record a person as a Scheduled Caste/Scheduled Tribe provided the name given by the person was found in the list supplied to them.

Literates:

In 1981 Census, a literate was defined as "a person who can both read and write with understanding in any language". A person who could merely read but cannot write, was not a literate. It was not necessary that a person considered a literate must have received any formal education or have passed any minimum educational standard.

Work:

Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

Main Workers and Marginal Workers:

A worker was identified with reference to a reference period preceding the census. The reference period prescribed was one year preceding the date of enumeration. Certain types of work such as agriculture, household industries like, gur making, etc., were carried on, either throughout the year or only during certain seasons or part of the year, depending on local circumstances. In such cases, what we were concerned with, was the broad time span of the agricultural seasons preceding the enumeration. Workers can be full time workers or seasonal workers or marginal workers. If a person has done any work during the reference period and if he had worked for the major part of the year i.e. if he had worked for 183 days or more, he was considered to be a full time worker (main worker). If a person had done any work during the reference period and if he has not worked for the major part of the year i.e. if he had worked for less than 183 days, he was considered to be a marginal worker.

The main activity of workers has been classified into four categories viz., cultivators, agricultural labourers, household industry workers and other workers.

Cultivator:

For purposes of census, a cultivator is a person who is engaged either as an employer, single worker or family worker in cultivation of land owned, or held from Government, private persons or institutions, for payment in money, kind or share. Cultivation includes supervision and direction of cultivation.

Agricultural Labourer:

A person who works in another person's land for wages in money, kind or share should be regarded as an agricultural labourer. He or she has no risk in the cultivation but merely works in another person's land for wages and has no right of lease or contract on land on which he or she works.

Household Industry:

For a person who returns his/her main activity as engaged in some production, processing, servicing or repair of articles or goods, it has been ascertained whether it is a household industry.

Household industry is defined as an industry conducted by the head of the household and/or by the members of the household at home or within the village in rural areas and within the precincts of the house in urban areas. A larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would, or has to be registered under the Indian Factories Act.

Non-Workers:

All persons who have not been treated as workers i.e. persons who have not worked any time at all during the reference period of one year preceding the date of enumeration, have been considered as non-workers. These cover all persons who are engaged in unpaid home duties and who do no other work or have not done any work at all during the last one year, full time students and children attending school, all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age, persons retired from service or rentiers, beggars, vagrants, convicts in jails or inmates of a penal, mental or charitable institution and all non-workers who may not come under any of the above categories.

(ii) HISTORY OF THE DISTRICT CENSUS HANDBOOK:

After the census of 1951, the Government of India offered to handover to the State Government the census tables and other data prepared during the census and suggested that they might be published along with any other useful information relating to each district. The State Government accepted the proposal, and the first publication of the District Census Handbook was brought out at the cost of the State Government.

The District Census Handbook of 1951 was found to be very useful and it was therefore decided not only to continue the series for the 1961 Census but also to improve definitely on its content so that each District Census Handbook contained certain basic economic data for the smallest administrative unit in the district and be a useful reference book for scholars and other data users.

After the 1971 Census as well, the series of District Census Handbook was continued. The publication of the 1971 Census Handbooks was in three parts, viz. part-A, part-B, and part-C; Part-A relating to Village and Town Directory, Part-B relating to Village and Townwise Primary Census Abstract and Part-C comprising District Census Tables and certain administrative statistical tables.

The tradition of bringing out the Census Handbook has been continued by the State Government during the 1981 Census also. In this series some individual features besides restructuring the formats of the village directory have been adopted bearing in mind the national requirements of data for the socio-economic programmes of the Government. The comparability of data with the 1971 Census data has also been kept in view.

The present Census Handbook will be published in two parts, viz., Part-A Village and Town Directory and Part-B Village and Townwise Primary Census Abstract.

(iii) SCOPE OF VILLAGE DIRECTORY AND TOWN DIRECTORY STATEMENTS:

The District Census Handbooks are the only publications which incorporate the data down to the level of a village and level of a town which are constantly referred to by the data users.

The Village Directory Statement gives the list of villages by taluk and for each village the area, number of households and population, availability of amenities and land use. The information of amenities available in the village includes educational, medical, drinking water, post and telegraph, market, rail/road or other communication facilities and power supply. Land use is shown as area under forests, irrigated and unirrigated land, culturable waste and area not available for cultivation.

Appendix I gives for each taluk the number of villages having various levels and types of educational institutions, such as middle schools, adult literacy centres, etc., various types of medical institutions such as dispensaries, primary health centres, etc., and the number of such institutions, various types of drinking water sources such as taps, tubewells, etc., post and telegraph offices, power supply, railway stations, bus stops, etc., and also the number of villages not having such amenities.

Appendix II gives for each non-municipal town (census towns) the area under forest, irrigated and unirrigated land, culturable waste and area not available for cultivation.

Appendix III gives the list of villages where no educational, medical and public health facilities, etc., are available.

Appendix IV gives the list of villages with the proportion of Scheduled Caste and Scheduled Tribe population to the total population in various ranges of proportion. Part A of the Appendix gives the villages according to the proportion of Scheduled Caste population and Part B according to proportion of Scheduled Tribe population. Information is presented by the ranges 0—5 per cent, 6—10 per cent, 11—15 per cent, 16—20 per cent, 21—30 per cent and 31 per cent and above, for Scheduled Castes and 0—5 per cent, 6—15 per cent, 16—25 per cent, 26—35 per cent, 36—50 per cent and 51 per cent and above for Scheduled Tribes.

The Town Directory gives important and useful information like civic and other amenities available in all the towns in the district, statutorily notified as well as non-municipal and census towns. The details relating to each of the towns have been presented in seven statements, viz; statements I to VI and IV-A. In all the statements except IV-A, the towns are arranged in the alphabetical order for the district. The Town Directory does not cover strictly military areas. It may, however, cover cantonment areas but not strictly military areas or military establishments, within the cantonment areas. However, basic statistics of the cantonment as a whole have been provided. In the Town Directory, codes have been given for the data on amenities and civic administration for want of space. The relevant explanations for the codes adopted have been given in the beginning of the Town Directory statements.

An urban agglomeration includes two or more independent census towns. The names of the towns/urban agglomerations have been arranged in the alphabetical order.

The particulars of the individual town which constitutes one of the units of agglomeration have not been furnished separately because the particulars have been furnished, where they occur together under the name of agglomeration. The following remarks have been given against such towns in brackets.

“(see the name of the main town of the agglomeration)”

By adoption of this method the reader can get an idea of the particulars of the urban agglomeration in total and also severally.

Statement-I—Status and Growth History.—This statement provides some basic data based on the Primary Census Abstract. For analysing the Town Directory data at State level and all India level, some new cols. have been introduced in 1981. The new items are class of town, area, number of households, population and growth rate for each census since 1901. Density in 1981 and Sex Ratio in 1961, 1971 and 1981 Censuses are also provided in this statement.

For size class of town the following population norms as per 1981 Census have been adopted:—

Population.	Class.
100,000 and above	I
50,000—99,999	II
20,000—49,999	III
10,000—19,999	IV
5,000—9,999	V
Below 5,000	VI

Location Code Number of Towns.—To distinguish the town from the village, the location code numbers for towns have been given in Roman numerals and these numbers have been assigned in a continuous order for the district as a whole.

Statement II—Physical Aspects and Location of Towns, 1979.—Under physical aspects, annual rainfall and temperature figures are furnished. These particulars were obtained from the Commissioner of Statistics, Madras. If the information is not available for any particular town, the nearest town for which it is available is given. For col. (9), the nearest city with population of one lakh and more is furnished according to 1981 Census. For the other cols., figures obtained from the Municipal Commissioners and Panchayat Union Commissioners are given. The 'Zero' within brackets in cols. 10 and 11 denotes that the referent town itself is enjoying rail and road transport facilities.

Statement III—Municipal Finance, 1978–79.—The civic administration status of the town, the receipt through tax, properties and powers, Government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services are given in this statement. The sources of receipt and expenditure are furnished in terms of rupees in hundreds.

Statement IV—Civic and Other Amenities, 1979.—The civic and other amenities existing in the towns as in 1979 are given. The data were obtained from the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Col. 3—Civic Administration Status.—It is a new column introduced in this statement to facilitate analysis.

Col. 4.—Population.—It is also a new column introduced in this statement to measure the amenities in respect of population.

Col. 5.—Scheduled Caste and Scheduled Tribe Population.—It is introduced to know the size of population of the weaker sections of the community in the town.

Electrification:

Electrification particulars were obtained from the Tamil Nadu Electricity Board through the Municipal Commissioners and Panchayat Union Commissioners.

(i) **Domestic Connections.**—This refers to the number of services given to houses for domestic purposes like fans, lighting, etc.

(ii) **Industrial Connections.**—This refers to the number of services effected to L.T. Industries such as workshops, flour mills, oil mills, grinding machines, cotton ginning, engineering industries, etc.

(iii) **Commercial Connections.**—This refers to the services given to shops, business houses, public institutions like offices and schools and commercial establishments.

(iv) **Road lighting points.**—This refers to the number of points of street lights which will be maintained by the Board and for which consumption charges will be paid to the Board by respective local bodies. For some town panchayats, the number of services effected alone has been furnished under street lights and not the points.

(v) **Other Connections.**—This refers to the number of services effected for agricultural purposes, huts, public water supply systems, cottage industries, etc.

Statement IV A: Civic and other Amenities in Notified Slums, 1979.—This is a new statement on civic and other amenities in notified or recognised slums of class I and II towns. Generally, in cities or towns having slums, the local authority such as Municipality or Municipal Corporation or even the development authority notified the recognised slums. Such notification is linked up with the availability of funds from the State Government for slum clearance.

Name of the slum and the details of the area, population, length of the paved roads, system of sewerage, number of different types of latrines and method of disposal of night soil, etc., are given in this statement.

Statement V—Medical, Educational, Recreational and Cultural Facilities, 1979.—In this statement, medical, educational, recreational and cultural facilities of the towns as in 1979 are furnished. The data for educational and medical facilities were obtained from the Municipal Commissioners and Panchayat Union Commissioners for the concerned towns, and from the Director of Secondary Education and Director of Public Health respectively.

Col. 10.—Recognised Shorthand, Typewriting and other Vocational Training Institutions.—The term 'recognised' refers to institutes recognised by some statutory authority like Education Department, Commerce Department, Labour Department, etc., of the Government or by Semi Government or autonomous bodies, public sector projects, etc.

Cinemas refer only to the permanent cinema theatres and do not include touring cinemas.

Col. 16—Number of Working Women's Hostels with Number of Seats.—This is a new column introduced in this statement in 1981. Considering the increasing employment of women in urban areas, the housing needs of working women has been an important problem.

Statement VI: Trade, Commerce, Industry and Banking, 1979.—In this statement, trade, commerce, industry and banking facilities in the town as in 1979 are furnished. Banking particulars were obtained from the Reserve Bank of India. The information on number of agricultural and non-agricultural credit societies were collected from the Registrar of Co-operative Societies through the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

SCOPE OF PRIMARY CENSUS ABSTRACT:

The Primary Census Abstract, as it is called presents basic data for each village or segment of a village (in cases where such village segments form different panchayats) in the "Village-wise Primary Census Abstract" and for each Ward/Division of a town in the "Urban Primary Census Abstract". The format of the Primary Census Abstract for the villages and towns in 1981 has been slightly modified as compared to the 1971 Primary Census Abstract.

The Primary Census Abstract gives such basic information as area in hectares/square kilometres, occupied residential houses, number of households, total population, Scheduled Caste and Scheduled Tribe population, literates, main workers, division of main workers into cultivators, agricultural labourers, workers in household industry and other workers, marginal workers and non-workers in respect of each unit. The Urban/Village Primary Census Abstract gives this information for each village and each urban ward. With a view to ensure comparability and to enable data users to derive the figures either for a revenue village or panchayat according to their requirements, the data are presented for segments of villages also. Wherever portions of one village happen to be in two or more panchayats, the segmentwise data have to be used separately or added with some other segment data so as to derive panchayat data. For example, if portions of a revenue village bearing Location Code No. 10 forms part of two panchayats, the figures are given separately for each portion of the village against Location Code Number 10 a/b and 10 b/b. The total figures for the entire revenue village by adding the figures given

against both the segments viz. 10 a/b and 10 b/b are given in the Village Primary Census Abstract. If, instead, the panchayat figures are required, the data for the concerned village segment or segments relating to the panchayats concerned, are to be added up to arrive at the total figures for the respective panchayat.

An appendix presented in the case of the Urban Primary Census Abstract gives 1981 population, Scheduled Caste and Scheduled Tribe population for each Enumerator Block of the town. This is meant for the use of administrative and election authorities in urban areas. Such data are also required by urban planners and researchers for conducting other studies in selected blocks.

Mode of Presentation:

The consolidated figures for the district and each taluk are given in the beginning for Total, Rural and Urban areas followed by each Town/Urban Agglomeration, under the caption 'District Primary Census Abstract'. Then follows the Primary Census Abstracts for Scheduled Castes/Scheduled Tribes. An alphabetical list of revenue villages is then given along with the Location Code Numbers of 1981 Census followed by the Villagewise Primary Census Abstract for each taluk. In the foot note given at the end of the villagewise Primary Census Abstract, the villages included in Municipalities or Census towns are indicated. In an annexure, the names of villages and their constituent panchayats are given. Then, follows the Urban Primary Census Abstract. In an appendix to the Urban Primary Census Abstract, the population and Scheduled Caste/Scheduled Tribe figures for each Enumerator Block of a town are given. This arrangement is followed for each taluk and independent sub-taluk in the district.

Maps:

Apart from the District Map given as frontispiece, map for each taluk showing the Village Location Code Numbers along with their boundaries have also been included at the appropriate places. As compared with the maps presented in 1971 District Census Handbook, several improvements have been effected in the maps presented in this volume. All towns are shown in the district and taluk maps with shading screens and also spheres, according to the population size of towns.

Area Figures:

In the District Primary Census Abstract, the area figures are given in Square Kilometres for Total, Rural and Urban areas. In the Villagewise Primary Census Abstract, the area figures for each Location Code Unit are given in hectares upto two decimals. The area figure for each town in square kilometres is also given at the end of the Urban Primary Census Abstract. In the District Primary Census Abstract, the area figures of the district total represent the "Geographical Area" figures supplied by the Surveyor-General. Figures for urban areas are those supplied by the Local Bodies and revenue authorities. The urban area of a district has been arrived by adding the urban area figures of each taluk within the district. Area figures for the rural areas of district/taluk are derived by subtracting the urban area figures from the total area of the district/taluk. The total of the area figures of the taluks will not tally with the district figures because the taluk area figures represent the 'Land Use' area and are derived from the figures supplied by the Tamil Nadu Directorate of Survey and Land Records, while those of the district represent "Geographical Area" supplied by the Surveyor General of India. The total of the village area given in the Villagewise Primary Census Abstract may not tally with the rural area of the taluk given in the District Primary Census Abstract as the taluk area figures take into account hills, forests, rivers, etc., where as the village area may not include the same. For conversion, the ratio is 100 hectares=1 square kilometre.

It is hoped that the pattern of presentation of basic census particulars for each district as explained above and adopted in this volume would be found convenient by data users.

RAMANATHAPURAM DISTRICT—AN OUTLINE

History of the District and its Formation :

In the early centuries, Ramanathapuram district formed part of Pandyan Kingdom. Its history is closely linked with the Pandyan Kingdom till the end of the 15th century. The Pandyan Kings ruled over the territories now comprising the districts of Madurai, Ramanathapuram and Tirunelveli. For a brief period, this area also was under the Chola Kings when Rajendra Chola brought it under his authority in 1063 A.D. Ramanathapuram territory was also under muslim rulers as part of the Muslim Empire till 1365 A.D. With the help of the Vijayanagar King, this territory was brought again under the rule of Pandyas by Parakarama Pandya Deva. By about 1520 A.D., the Nayaks of Vijayanagar took over this territory under their control from the Pandyan Dynasty. For about two centuries, Nayak Kings ruled Ramanathapuram territory from Madurai.

During the Nayaks rule, the marava chieftains—Sethupathis who were lords under the Pandyan Kings reigned over this part (17th century) having their principal seat in Ramanathapuram. At the beginning of the 18th century (1710 A.D.), family disputes over succession resulted in the division of Ramanathapuram. In 1730 A.D., with the help of the King of Thanjavur, one of the chieftains deposed the Sethupathi and became the Raja of Sivaganga. The Nayak rulers of Madurai became weak by this time. With the downfall of the Nayak rulers, the local chieftains Palayakarars became independent. Prominent among them were the Sethupathy of Ramanathapuram and the Raja of Sivaganga. The history of Ramanathapuram is thus closely linked with the history of these two palayams in the later years. After this, Ramanathapuram fell into the hands of Chanda Sahib of Carnatic in 1731. In 1741 A.D., the area came under the control of the Mahrattas and then under the Nizam in 1744 A.D. Nawab's rule was not acknowledged by these chieftains. By about the middle of 18th century, they declared the adopted son of Queen Meenakshi, the last Nayak ruler, as the king of Pandya Mandalam against the Nawabs (1752 A.D.). At this time, the throne of Carnatic had two rival claimants—Chanda Sahib and Mohamed Ali and this district was part of the Carnatic. The Europeans—the French and the British supported Chanda Sahib and Mohamed Ali respectively which resulted in a series of conflicts in the southern part of the continent. The two Chieftains supported Chanda Sahib in his conflict with Mohamed Ali. In the year 1773, General Smith subdued them and brought them under the authority of the British. The Sethupathy of Ramanathapuram lost his personal freedom. In 1792 when Muthuramalinga Sethupathy, who was paying a sum of Rs. 220,000 as the tribute to the British to prove his loyalty, showed a disposition to rebel against the company, the British deposed him and took control of the administration of Ramanathapuram in 1795. It was converted into a Zamindari in 1803 and Mangaleswari Nachiyar was made a Zamindar. During these periods, the ruler of Sivaganga, Muthu Vadugunathar, also revolted against the British. In his efforts he was ably assisted by the Marudu Brothers—Periya Marudu and Chinna Marudu. Muthu Vadugunathar lost his life in the revolt. After his death, the queen passed on the sovereignty to Marudu Brothers who ruled Sivaganga peacefully and devotedly on payment of regular revenue to the East India Company. In 1801, the Marudu brothers of Sivaganga revolted against the British in collaboration with Kattabomman of Panchalamkurichi. In 1801 A.D., Colonel Agnew captured the Marudu brothers in Kalayarkoil on 1st October 1801 and hanged them. The company installed Gowri Vallabha Periya Udaya Thevar as Zamindar of Sivaganga.

The British who earlier were supporters of the Nawabs finally annexed the country. The Nawab became powerless and handed over the administration of Ramanathapuram even as early as 1781. With the fall of Tippu Sultan, the British took full control and the Nawab of Carnatic was pensioned. In 1792, a British Collector was appointed to administer the territory. Ramanathapuram and Sivaganga continued to be Zamins till the system of Zamindari was abolished in 1948 after India attained Independence.

This district was carved out in 1910 by the British out of portions from Madurai and Tirunelveli districts. The district was named as Ramanathapuram after the name of the important Zamindari town, Ramanathapuram. According to a legend, Lord Ramanathaswamy, the presiding deity of the temple at Rameswaram is said to have directed his faithful servant, Guha to build a town near the Sethu (Adam's bridge). The town was called "Mugavainagaram". The town then appears to have been very near the sea. This town was later known as Ramanathapuram. Its association with the name of Rama and its proximity to the Sethu would justify the town being considered a very ancient one.

During the British period, this district was called 'Ramnad' and this name continued to for some time even after Independence. Later, the district was renamed as Ramanathapuram to be in conformity with the state language.

The Location of the District :

Ramanathapuram district is located between 9°07' and 10°22' north latitudes and 77°22' and 79°25' east longitudes. It has an area of about 12,590 Sq. Kms. It is bounded on the west by Madurai, on the north by Pudukkottai, on the south by Tirunelveli districts and on the east by the Bay of Bengal. Ramanathapuram is one of the seven coastal districts of Tamil Nadu having a sea coast extending to nearly 260 kms.

The district comprises 15 taluks and 3 independent sub-taluks as per 1981 Census. They are : Tiruppattur, Karaikkudi, Devakottai, Tiruvadanai, Sivaganga, Manamadurai Sub-Taluk, Ilayankudi Sub-taluk, Paramakkudi, Tiruchchuli, Aruppukkottai, Virudunagar, Srivilliputtur, Rajapalaiyam, Sattur, Kamudi, Mudukulattur, Ramanathapuram and Rameswaram Sub-Taluk. The only additional unit that came into being in 1981 Census is Rameswaram Sub-taluk, which was formerly part of Ramanathapuram taluk. Karaikkudi, Devakottai, Tiruchchuli, Kamudi, Rajapalaiyam and Virudunagar which were independent sub-taluks have become full fledged taluks during 1981 Census.

Srivilliputtur, Rajapalaiyam, Virudunagar, Sattur and Aruppukkottai taluks are situated in the projection of the district extending from east to west and are wedged in between Madurai and Tirunelveli districts. Mudukulattur and Ramanathapuram taluks are situated on the south above the Gulf of Mannar. The Ramanathapuram taluk narrows down towards the east and cuts into the sea between the Gulf of Mannar on the south and the Palk Bay on the north, terminating at Mandapam on the eastern side. Rameswaram (sub-taluk) Island is separated from the main land taluk of Ramanathapuram by the Pamban passage. Tiruvadanai is also a coastal taluk of the district. Karaikkudi and Tiruppattur taluks lie on the northern extremity of the district. For the purpose of revenue administration the district is divided into 5 revenue divisions as shown below:—

Revenue Division	Taluks comprised
1. Ramanathapuram	1. Ramanathapuram 2. Rameswaram 3. Mudukulattur 4. Kamudi.
2. Devakottai	1. Devakottai 2. Tiruvadanai 3. Tiruppattur 4. Karaikkudi.
3. Sivaganga	1. Sivaganga 2. Manamadurai 3. Paramakkudi 4. Ilayankudi.
4. Sivakasi	1. Srivilliputtur. 2. Rajapalaiyam. 3. Sattur.
5. Aruppukkottai	1. Aruppukkottai. 2. Virudunagar. 3. Tiruchchuli.

For 1980 General elections to the Legislative Assembly, the district was divided into 16 constituencies of which three were reserved for Scheduled Castes. There are three Parliamentary constituencies for representation in the Lok Sabha.

The district comprises 11 Municipalities, 33 Panchayat Unions, 28 Town Panchayats, 1 Panchayat town-ship and 1,297 Village Panchayats.

Area and Population of the District :

The district covers an area of 12,590 Km², according to the Surveyor-General of India. There are 1,411 inhabited villages and 115 uninhabited villages in the district. The total number of towns in the district is 38. The population of the district according to the 1981 Census is 3,335,437. Of this, 1,648,422 are males and the rest (1,687,015) are females. In the district, 2,394,483 persons live in rural areas and 940,954 persons in urban areas. The density of population of this district is about 265 persons per square kilometre.

The Headquarters of the District :

This is the only district in the State which has its headquarters located outside the district limits. The headquarters of the district is at Madurai. At the time of the formation of the district, Madurai was considered suitable for the reasons that this city with good communication facilities and a sizable amount of trade and banking provided basic amenities for larger administrative offices like collectorate, courts, etc. to function effectively.

Soils :

The western part of the district consisting of Sattur, Srivilliputtur and Aruppukkottai are mainly covered by black loamy soil. This soil is very much suited for the cultivation of cotton and also for chillies and millets. Large portions of Tiruppattur and Sivaganga taluks especially the sedimentary rock area are covered by a capping of hard red laterite. This is a poor soil and the large tracts of thorny jungles found are not suited for cultivation. Coastal areas of Tiruvadanai, Ramanathapuram and Mudukulattur taluks are covered by alluvial soil of grey or pale brown colour and is made up of fine clay or sand suited for paddy cultivation. The sea coast and the Rameswaram island are covered by white sand dunes which is not suitable for cultivation.

Climate and Rainfall :

The climate in Ramanathapuram district is hot and dry except in the coastal areas where sea breeze mitigates the heat to some extent. The maximum temperature is rarely above 94°F and the minimum seldom below 68°F. April to June are the hottest months. Coastal regions enjoy cool sea breeze. The mean temperature is generally not below 70°F. During the period December—January, the lowest temperature is recorded. From the end of February, the temperature starts rising.

Rainfall is low and often capricious. The normal annual rainfall for Ramanathapuram is 839.5 mm. Against this, in 1978-79, the actual rainfall was 748.4 mm. and in 1979-80 the rainfall was 1,036.9 mm.

The district gets a major portion of the rainfall during the north-east monsoon. The normal rainfall of the district during north-east monsoon is 455.5 mm. As against this the rainfall actually recorded was 540.3 mm. in 1978-79. Two-thirds of the rainfall in the district occur during the period October to December. Towards the middle of December, cold season sets in and this continues up to February. The winter rain is far less, with a normal rainfall of 65.7 mm. In 1979, a rainfall of only 36.3 mm was recorded. During the hot weather period i.e., March to May, the normal rainfall is 132.9 mm. However, in 1979, the actual rainfall recorded was a low figure of 38.0 mm. In the south-west monsoon season of June to September, the average rainfall is 185.4 mm. As against this, in 1978, the actual rainfall was 133.8 mm. It may be noticed that during the year 1978-79 the rainfall was higher than the average during the north-east monsoon period and far less during the other seasons.

Topography :

The district has four naturally district regions viz., (i) the eastern slopes of the western Ghats in the Srivilliputtur taluk, (ii) The plains of the Sattur, Aruppukkottai, and Paramakkudi taluks and portions of Sivaganga, Mudukulattur, Ramanathapuram and Tiruvadanai taluks, (iii) the red soil regions of the Tiruppattur taluk and the northern portions of the Sivaganga and Tiruvadanai taluks called Chettinad and (iv) the sandy coastal areas of Mudukulattur, Ramanathapuram and Tiruvadanai taluks.

The eastern slopes of the Western Ghats start from the northern most point along the boundary between Ramanathapuram and Madurai districts and proceed southwards in an unbroken line as far as the Deviar, with an average elevation of 1,500 metres approximately. The highest peak of this mountain range is Pemalai Mottai with a height of 1,700 metres above mean sea level. Tea and coffee estates have sprung up on the slopes of the Ghats, where spices are also grown. Teak is also grown in some parts. Miscellaneous fuel are found. Thorny spices like Acacias occur.

The plains of Sattur, Aruppukkottai and Paramakkudi taluks and portions of Sivaganga, Mudukulattur, Ramanathapuram and Tiruvadanai taluks mostly have black cotton soil or regar locally known as "Karisal". This soil is mostly used for growing cotton and cultivation of dry crops. The familiar landscape is of palms and acacias.

The existence of a large number of tanks (over 5,000) in the district makes it known as the "Lake District" of the State. Vaigai river starting in Gandamanaickanur hills of Madurai district enters this district near Tiruppuvanam and traverses through Sivaganga, Paramakkudi and Ramanathapuram taluks in a south-easterly direction feeding a large number of tanks. It joins the sea near Attangarai.

The red soil region of the Tiruppattur taluk and the northern portion of Sivaganga and Tiruvadanai taluks put together is known as Chettinad.

The soil is broadly red-sevval, veppal and pottal. Virasuli river, Manimutta Nadi and Pambar run through the Chettinad area, flowing from north-west to south-east.

This district has a long coastline of about 260 kilometres. The coastal area is a sandy tract with no natural growth. Coastal taluks of Mudukulattur and Ramanathapuram are on the south, above the Gulf of Mannar. The Rameswaram Sub-taluk is an island separated from the mainland by the Pamban passage. The sub-marine extensions in the east have numerous reefs, shoals and coral islands. Coconut palms and fruit trees make up all the cultivation. Tiruvadanai is another coastal taluk in the north of the district. All along the sea coast we can find thorny acacia and palmyrah trees. The coastal forests serve to control the drifting sands.

There are 16 other islands, besides Rameswaram, the important being Kurusadi, Muyal and Nallathanni Thivu.

Pearl and chank fisheries are carried on, on a large scale on the sea coast.

Hills :

Except the hills on the western part of the district and Piranmalai in Tiruppattur taluk, no significant hills are to be found elsewhere in the district.

Rivers :

There are no perennial rivers in Ramanathapuram district. The only river of importance is the Vaigai.

The Arjunanadi, Vaipar, Mudangiar, Vijayanadi, Mannarkottainadi, Gundar, Kanal odai, Manimuthar and Thenar are all minor streams. The flow of water in them is uncertain. The Arjuna nadi and Sevalaperi river flow across Srivilliputtur and Sattur taluks and join Vaipar in Sattur taluk and then enters the Tirunelveli district, east of Sattur. The Mudangiar is a drainage channel in Srivilliputtur taluk and the Uppodai is a drainage channel in Sattur taluk. The Vijaya nadi and Mannarkottai nadi are to affluents of the Arjuna nadi in Sattur taluk.

The Gundar in the eastern slopes of the Varushanadu and Andipatty ranges above Watrap flows through Aruppukkottai and empties into the Gulf of Mannar. The river assumes the name of "Reghunatha Cauveri" from Kamuthi. The Kanal Odai is a drainage channel in Aruppukkottai taluk. The Manimuthar and the Thenar rivers flow through Tiruppattur and Tiruvadanai taluks. The former is known as Virasuli river in the latter taluk and rises in the highlands near Piranmalai (Tiruppattur taluk).

Geology :

The western taluks of the district and large part of Tiruppattur and Sivaganga taluks comprises of ancient crystalline rocks (Archaean) which are among the oldest formations of the world. Crystalline limestones and graphite are among the valuable minerals found in these rocks.

The eastern portion of the district consists of rocks formed in beds of swallow lakes and coastal backwaters where the salt and mud brought by the rivers are deposited. A line drawn from Chettinad in the north-east through Sivaganga to Tiruchchuli and beyond in the south-west demarcates the boundary between these and the archaean rocks of the west. The sedimentary rocks extend into the whole of Tiruvadanai, Ramanathapuram and Mudukulattur taluks and portions of Sivaganga and Tiruppattur taluks. These sediments, mostly of clay and sandstone, have been deposited for several million years from what is known in geological parlance as Gondwana age to the present day. They contain useful types of clays and limestones.

Limestone of different grades, clays, ochres, gypsum, graphite and ilmenite sands are the minerals of economic value found in the district.

Clay deposits are found in Sivaganga and Manamadurai taluks. Gypsum occurs in a few localities close to the sea coast. Ilmenite also occurs in the coastal areas of Tiruvadanai and Ramanathapuram taluks. Limestone deposits occur in a number of localities on the western part of the district.

Flora and Fauna:

The district is a dry open country singularly denuded of forests. The reserve forest in Srivilliputtur taluk contains scrub jungle and deciduous species. Along the coast few jungles which consist of Odai and Babul trees of a stunted kind are found. Palmyra trees are found everywhere especially in Sattur, Aruppukkottai and Srivilliputtur taluks. Coconut trees are found in Ramanathapuram taluk especially near the sea coast and along the banks of river Vaigai with other fruit bearing trees. The mountains in Sattur and Srivilliputtur contain valuable timber of several kinds. Cardamom plantation is also found in Srivilliputtur hills.

Domestic animals are precisely the same as in the adjoining districts of the State. There are no wild animals of any importance. Deer and antelope are in great numbers in Sikal, Kadugusanthai and Sayelgudy jungles in the southern part. Jackal, fox, muscat, mangoose, hare and rabbits are to be found in the jungles along the sea coast. Serfish, pomphret, white and black prawns and shark are a few common varieties of fish found along the coastal region. Whales are said to be present in the neighbourhood of Pamban. Turtles are procurable on the numerous islets in the Gulf of Mannar. Oysters and Chank are also found in these parts of sea. The Cattle found here are generally of the mongrel type. There are neither good breeds nor good breeders. The Ramanathapuram breed of sheep, otherwise known as "Karuvai" flourish better on the black cotton soil.

Forests:

Ramanathapuram district has lesser area covered by forests. The forests worthy of name are to be found in Srivilliputtur and Rajapalaiyam taluks. The area coming under forests, reserved lands, etc., comes to 49,331 hectares. This forms about 4 per cent of the total area of the district.

Cashew, fuel, eucalyptus, sandal, casuarina and odai trees are the chief forest products. The forests in the district mainly fall under the Tropical dry deciduous (21,393 hectares) and Tropical dry thorn ever green (19,288 hectares) types. Some portions also come under Tropical semi evergreen (4,105 hectares) and Tropical dry ever green (2,566 hectares) types.

Agriculture:

Ramanathapuram district is deficient in rainfall. There are no major rivers providing perennial water-supply for cultivation. There is not enough mineral resources worthy of commercial exploitation. Till the advent of independence, most of the areas were Zamindari areas and as such there was not enough enthusiasm for the ryots to develop agriculture. With the implementation of the schemes under the successive five year plans and with the introduction of ryotwari settlement on the abolition of Zamindari system, fillip has been given to agriculture in the district. Though a dry district, agriculture is extensively undertaken by irrigating the land from tanks and wells. The rainfall during the South-west monsoon is rather poor. The rains from North-east monsoon season is the major one but is not steady and is dependent on the vagaries of the monsoon. Whatever rainfall occurs, it is utilised to the best advantage through a large number of tanks and wells in the district.

The land utilisation data of the district in 1979-80 reveals that out of 1,250,305 hectares of geographical area, the net area sown accounts for 621,283 hectares or 49.7 per cent of the total area. Another 33,913 hectares or 2.7 per cent of the total area is sown more than once. Thus about 52 per cent of the area is utilised for agricultural purposes. Current fallows and other fallow land account for about 21 per cent of the total area. Only about 3 per cent of the area is coming under culturable waste, which can be reclaimed for agricultural production.

Paddy is the most important food crop of the district. About 46 per cent of the total area sown is under this food crop. Paddy crop is grown on wet lands irrigated by rivers, channels, tanks and wells.

The area under paddy is larger in the taluks of Paramakkudi, Tiruvadanai, Mudukulattur and Srivilliputtur. Dry farming in cultivation of paddy is also adopted in Tiruvadanai and Paramakkudi taluks. Nearly 42 per cent of the area under cultivation is irrigated and the remaining area is rainfed.

About 57 per cent of the area is under principal food crops. Paddy, the chief cereal of the district, is cultivated on 45.9 per cent of the total area sown. Cumbu, Cholam, Ragi, Varagu, Samai and Kudiravali are the millets produced in the district. Cumbu is grown in about 5.7 per cent of the total area sown. Large areas in the taluks of Sattur and Aruppukkottai come under Cumbu. Ragi is grown in a wide range of varying soil fertility during the periods, May-

June and November-January. About 3.3 per cent of the total area sown is under this crop. Choram is grown as a rainfed crop and occupies about 2.1 per cent of total area sown in 1979-80. Large areas in the taluks of Aruppukkottai and Mudukulattur are under this crop. Fodder choram is grown in Sattur, Srivilliputtur and Aruppukkottai taluks. Varagu is grown in Aruppukkottai, Tiruvadanai and Mudukulattur taluks. Samai is grown largely in Aruppukkottai and Srivilliputtur taluks.

Of the commercial crops of the district, the most important is cotton. Cotton is the staple crop in the black cotton soils of Sattur, Srivilliputtur and Aruppukkottai taluks. In East Ramanathapuram district, cotton has been introduced as an irrigated crop in summer. Large areas have been brought under improved varieties of cotton. Ramanathapuram district is one of the chief cotton producing areas in the State, besides Coimbatore and Tirunelveli. About 60,000 hectares are under this crop.

Another commercial crop of importance in the district is chillies (28,117 hectares). "Sattur Chillies" is famous in the market. The Agricultural Research Station at Kovilpatti is engaged in the evolution of a suitable variety of chillies for the tract.

Groundnut and gingili are the two prominent oil seeds grown in the district. Groundnut is raised in Sattur and Aruppukkottai taluks. The crop is mainly raised under rainfed conditions from June-July to December-January, depending on the south-west monsoon rains. It is also cultivated as a summer crop under irrigated conditions from February-March to June-July. Next to groundnut, gingili is an important oilseed grown. This crop is extensively raised in Paramakkudi taluk. With the summer showers of February, March and April the Masipattam crop of gingili is grown and harvested in June-August.

Water resources and Power :

In the western portion of the district, water is found in depths of 9 to 15 metres and water table is 7.5 to 9 metres below surface during rainy season. In the Archaean terrians, Kilasevalpatti, Tiruppattur and Kunnakudi, ground water table is at a depth of not less than 9 metres from ground level. At some places it is at depths of 12 to 15 metres.

The district is very poor in ground water resources. Therefore, the main crops are cotton, chillies, millets, groundnut, etc., which require less water for production. In the areas covered by sedimentary rocks and alluvium, it may be possible to tap considerable quantity of water from boreholes at about 100 to 200 feet. The areas on the beds of Vaigai and Vaippar yield fairly good supply of water.

Ramanathapuram district has no system for generation of electric power, either hydro-electric or thermal.

34 towns, 1,411 villages and 5,034 hamlets were electrified as on 31st March 1980. The district had 92 sub-stations distributing electric power as on 31st March 1980 as against 38 sub-stations as on 31st December 1963. During 1979-80, 1,397 pumpsets energised. As on 31st March 1980, the total number of pumpsets energised in the district was 40,479. The consumption of electric power during the period April 1979 to March 1980 was 331,622 million units. Out of this, the consumption for agricultural purposes was 69,631 million units while those for industrial purposes was 195,621 million units.

Animal Husbandry :

The livestock population as on 15th July 1982 is 1,778,793. This comprises mainly of 734,916 cattle and buffaloes, 575,290 sheeps, 357,591 goats, 31,513 pigs and 1,265,324 poultry. There are 2 veterinary hospitals and 51 veterinary dispensaries, including four attached to Key Village centres. There are 252 veterinary sub-centres in the district. One district livestock farm is located at Chettinad where life breeds of Tharparkar, Jersey crosses and Murrah are maintained. Units for fodderseed production, sheep and piggery are also attached to this farm. There is a sheep farm at Sattur with a poultry extension centre attached. 19 Key Village Blocks with 190 sub-centres are functioning in this district. Under Drought Pron. Area Programme, Milch cattle are distributed and the heep units have been established. A scheme for upgrading of local goats in Rameswaram area is implemented.

Cattle fairs and shows are held at Sivakasi, Rajapalaiyam, Aruppukkottai, Kanniseri, Palayampatti and Vembakottai in the western region and at Sivaganga, Paramakkudi, Ilaiyangudi and Kalaiyarkoil in the eastern region. The annual cattle fairs and shandies are generally held for a period of 15 to 20 days continuously and attract a large number of persons for buying and selling cattle.

Fisheries:

A Coastal district with a lengthy coastline of about 260 kms. will naturally have sea fishing. Besides, the district has a very large number of tanks which are conducive for inland fishing. Further, the district has been famous for chank and pearl fishing from very early times. Fishing has, therefore, a significant role to play in the economy of the district.

There are about 50 villages in which a large population of fishermen live. The important fishing centres in the district are Tondi, Pamban, Devipatnam, Rameswaram, Kilakkarai and Alangulam. The practice, however, followed in fishing is very old. According to the census of marine fishermen, about 11,500 persons are engaged in fishing. The population including their dependents is about 40,000.

To give encouragement to fishing community and for improving the yield under sea fishing, schemes under the Five year plans have been implemented. One of the schemes relates to the supply of motorboats to fishermen co-operative societies. Another scheme provides for the supply of nylon nets to the fishermen. For getting a good market and price for the fish caught, ice and refrigeration units are established in Tondi, Kilakkarai, Mandapam and Motarm. Fish curing centres are functioning at Tondi under the private sector and at Athangarai and Mukkaiyur in the public sector. An ice plant and cold storage unit is under construction at Kilakkarai. Subsidised salt is being supplied to fishermen for curing fish at two fish curing yards. Improvements in fish markets maintained by local bodies have been made so as to enable the sale of fresh and cured fish under hygienic conditions. Rameswaram Island is an important area from where mechanised boats are used for marine fishing by owners hailing from different parts of Tamil Nadu.

The Indo-Norwegian Fishing Project has been established at Mandapam for implementing various schemes for fisheries development.

The Union Government has also established a Central Marine Fisheries Research Institute at Mandapam for the development of sea fishing in which investigations in various fields of fishery, biology, fishery survey, marine biology and general physiology is carried out.

Schemes to provide quick growing, indigenous and exotic varieties of inland fish are implemented in a number of centres in the district. The fish seeds are stocked, reared and distributed to demonstration tanks, revenue tanks and to private persons.

Industries.

The district is considered as an industrially backward area and the Government is giving incentives like cheap sites, adequate power supply and loans on low rates of interest to entrepreneurs for setting up industries. The Government on their part also has set up few establishments in the public/co-operative sectors for providing employment to local population. The chief industries found in the district are handloom weaving of textiles, spinning and weaving of textiles in factories, salt and chemical industries, cement, matches, crackers and fireworks and printing and allied industries.

Handloom weaving of cotton textiles is an ancient occupation followed in this district. The important handloom centres are situated in Paramakkudi, Aruppukkottai, Srivilliputtur and Rajapalaiyam taluks. About 50,000 handlooms are found in this district as per the handloom census. Out of this, about 81 per cent are covered in the co-operative sector. Silk weaving, using China Silk as raw material, is practised in Ramanathapuram and Paramakkudi.

Textile mill are functioning in the district which produce a variety of yarns. Rajapalaiyam is the chief centre for textile mills, and has seven mills providing employment to about 2,800 persons. The total number of spindles in these seven textile mills comes to 85,362. Virudunagar has a textile mill which produces 'Gada' cloth and provides employment to about 150 persons. In Chettinad also, a textile mill with a capacity of 12,480 spindles, giving employment to about 200 persons, is functioning. In Silaiman, a spinning mill with 21,840 spindles is located. This mill gives work to 420 persons. Six textile mills in addition have also been started in the district, few years back, at Somanathapuram, Rajakambiram, Kanuthakudi, Ramanathapuram, Kalaiyarkoil and Tiruvadanai. Six more textile mills are proposed to be established in the district at Aruppukkottai, Sivakasi, Manamadurai, Paramakkudi, Ramanathapuram and Tiruvadanai.

Cotton which is the chief raw material for the spinning mills is available in the taluks Srivilliputtur, Sattur and Kovilpatti. There is no difficulty in marketing the yarn, as handloom is a main cottage industry in Aruppukkottai, Srivilliputtur, Rajapalaiyam, Dhalavoipuram and Paramakkudi.

One surgical Cotton Mill started in 1943 is located at Rajapalaiyam, providing job to about 100 persons. The availability of cotton in the district has made possible the functioning of ginning factories in the district. About 40 such factories are found in this district, providing employment to about 2,300 persons.

Two factories, manufacturing cement, are located in this district. One of them is in the private sector and was started in 1957 at Thulukkapatti. Its capacity is 600 tons of portland cement per day. The other one is in the public sector and is located at Alangulam.

Limestone is available nearer the factory sites. Laterite and clay are available within the district. Coal is the raw material which has to be obtained from outside the State.

Chemical lime and by products of bittern liquid left after the removal of crystalline Sodium Chloride are also being produced by two establishments.

Crackers and Fireworks Industry:

This is one of the flourishing industry in the district. The starting of this industry goes back to the 19th century. The availability of cheap labour, abundance of salt petre and ready market in the state encouraged some pioneers to give more attention to this industry. This industry has been established mainly in and around Sivakasi. Roughly, 20,000 persons are employed. Some of the factories manufacture explosives for blasting also. Crackers which are widely used in our country are manufactured by some of the factories. A good quantity of them are also sent abroad as export items.

Match Industry:

Till 1920, this common domestically useful item was imported from foreign countries like Sweden, Japan and Czechoslovakia. In 1923, a semi-mechanised factory was started at Sivakasi. Side by side several factories began making hand-made matches in and around Sivakasi, providing work to several thousands of men and women. This industry has now come up very well and the Government have stopped imports of this item and has also provided excise relief to encourage small scale units and to prevent unhealthy competition. More than 100 units in and around Sivakasi manufacture matches and it is a premier industry in the district.

Printing and allied Industries:

Printing industry is one of the important industries in this district. This industry was started in 1922, essentially to supply labels for the fire works manufactured at Sivakasi. The trade mark labels, earlier got from Bombay, are now printed by Litho process since 1930 in Sivakasi. This industry soon developed well and automatic litho printing presses were started in 1949. The industry at Sivakasi has earned good reputation and supplies pictures, picture calendars, posters, show cards, colour labels, etc.

Mat weaving is followed in the vicinity of Ilaiyankudi. Boxes and other articles from palmyra leaves are being manufactured in a number of places in Ramanathapuram, Sivaganga and Srivilliputtur taluks. Metal articles from copper, brass and aluminium for domestic use are made in Karaikkudi and Srivilliputtur taluks. Coconut coir fibre making are followed in the district, the important centres being Periyapattinam (Ramanathapuram taluk), Singampunari (Tirupattur taluk) and Devakottai.

Trade and Commerce:

In the early centuries, pearl obtained from the sea was an important article of trade. Now it is a thing of the past. However, chank got from sea is being exported to Calcutta for making bangles. Cotton which is grown in a large area is a main item for trade. The ports of this district are now engaged in coastal trade, exporting mostly firewood and salt.

Internal trade of the district is carried in an increased scale. Fire works and matches of Sivakasi are sent to different parts of the country. Cement produced from the two cement factories is also marketed outside the district. Polythene articles, litho printed calendars, posters, dairies, etc., manufactured in the industrial estates and factories in the district enter the markets in the state. Market committees are functioning in the district for the purchase and sale of cotton, groundnut, jaggery, chillies, etc. A number of shandies are held in the district at different places for the help of rural folk for purchase and sale of their produce and cattle. Foodgrains, vegetables, groceries, tea, textiles, and cattle are traded in the shandies.

Two warehouses, one at Virudunagar and another at Rajapalaiyam are functioning in which foodgrains, spices, pulses, cotton, chillies and jaggery are stored and traded.

The chief wholesale trading centres in the district are Virudunagar (pulses, cotton, groundnut and coffee), Rajapalaiyam (cotton and groundnut) and Karaikkudi (pulses and foodgrains). At Sattur and Ramanathapuram, wholesale business is done in chillies. Paramakkudi is a centre for trade in dried fish. Watrap, Aruppukkottai, Kamudi, Tirupattur, Paramakkudi and Ramanathapuram are the main marketing centres.

The banking aspect of commerce and trade which was previously dealt with by Nattukottai Chettians and other indigenous bankers has now given place to commercial banks, agricultural and other credit societies, functioning in different centres in the district. However, Nattukottai chettians do significant volume of banking activities as they provide credit on personal and immovable properties without much delay and elaborate documentation.

Transport and Communication :

The district is served by the metre gauge section of the Southern Railway. The important railway junctions in the district are Karaikkudi, Virudunagar and Manamadurai. The main line from Madras Egmore to Rameswaram runs through the district linking Karaikkudi and Manamadurai. Madurai which is the headquarters of the district and a prominent commercial and industrial town of the State is connected by a metre gauge line from Manamadurai junction. So also Virudunagar, another important commercial centre of this district is connected to Manamadurai by a metre gauge line via Aruppukkottai in recent years. The western centres of Sattur, Sivakasi, Rajapalaiyam and Srivilliputtur have already been linked with Madurai via Virudunagar. A fairly good rail link is thus available in the district between different centres for the movement of population as well for commercial and trading activities.

Road transport is another important aspect in communication facilities. The district is connected by two National Highways with outlying areas. NH 7, Benaras—Cape Comerin road, connects Virudunagar and Sattur on the West. NH 49, Madurai—Dhanushkodi road, connects Manamadurai, Paramakkudi, and Ramanathapuram. Manamadurai—Pudukkottai State Highway links Manamadurai, Sivaganga and Tirupattur. Another State Highway, Madurai—Tenkasi road connects Rajapalaiyam and Srivilliputtur.

The total length of roads in this district in 1979-80 was 9,223 Kms. Of this, 4,832 Kms. are surfaced roads and rest(4,391) are unsurfaced. As on 31st March 1978, the district had 45 city and town service routes and 287 intra service routes in operation for passenger movement by road.

There is no major shipping transport in this district. A small port at Rameswaram is having a ferry service to Talaimannar, situated in the north of Sri Lanka. This service is not operated round the year, but stopped with the onset of north-east monsoon. Kilakkarai port lost its importance in sea transport with the development of railway line to Tuticorin and the opening of the Pamban—Madurai line. However, a little foreign trade is done with Jaffna, Kaits, Talaimannar and Colombo. Chanks are imported from Kaits and exported to Calcutta and Dacca for making bangles. Coastal trade is mainly carried on with Tuticorin, the imports being rice, paddy, cotton seed and grain. The export items are firewood, chank, palmyrah fibres, soap-sand (Fuller's earth) and coconut.

There are 10 Head post offices, 22 Lower selection grade sub-offices, 205 Time scale sub-offices and 146 Extra Departmental sub-offices and 339 stationery and 202 mobile Extra Departmental branch offices functioning in the district. In addition, 260 post and telegraph offices and 339 Extra Departmental post offices are functioning. The district has three postal divisions located at Ramanathapuram, Virudunagar and Manamadurai.

Places of Tourist Importance :

Ramanathapuram district has a number of places having temples, famous for antiquity and sculpture. This region, having been known from early times and mentioned in Ramayana and later in Tamil Puranas, naturally has a good number of places of worship associated with Hindu gods. Of these, two places deserve mention which even now attract large number of persons from within the district and outside. They are Rameswaram and Srivilliputtur.

Rameswaram is an island, but very close to the main land. It is the Pamban canal which separates it from the main land. Rameswaram can be reached by train and lies on the Madras—Rameswaram main line of the Southern Railway. Rameswaram is a sacred place for Hindus and is as famous as Varanasi in the northern India. It is 12 miles from Mandapam, the nearest place on the main land, and it is from here that Rameswaram is linked by rail.

The town is built on an island in the Palk Straits at the extreme south-eastern tip of the Indian Peninsula. It contains one of India's most venerated temples, a fine example of south Indian architecture. The presiding deity of the temple is Ramanathaswamy, said to have been installed in Linga form by Sri Rama of the Ramayana epic on his return from Sri Lanka defeating Ravana. The Ramalingam at Rameswaram is one of the twelve Jyothi Lingams in India. The most impressive feature is the many pillared corridors, covering a length of 1,220 metres. Besides, there are art works depicting puranic stories.

Gandhamadhana Parvatham is a hillock to the north of the temple and is the highest point around from where one gets an excellent view of the island. There is a two storeyed mandapam and Rama's foot placed on a chakra for worship attracts pilgrims.

Dhanushkodi, another holy place is situated at a distance of 8 kms. from Rameswaram and has a temple for Kothandaramaswamy. The temple remains intact on the island, even though Dhanushkodi was washed away by the cyclone in 1964. It is believed that Vibhishana, brother of Ravana, surrendered before Sri Rama at this spot. The three main festivals celebrated at Rameswaram temple are Sivarathri for 10 days (February-March) Brahmotsavam for 3 days (June-July) and Tirukalyanam for 17 days (July-August).

Srivilliputtur is the headquarters of the taluk of that name. It is at 47 miles south-west of Madurai, 6 miles east of Rajapalaiyam and 12 miles west of Sivakasi. It is situated on the road leading to Tenkasi and is an important station on Madras-Quilon railway line. Buses ply to different centres from this town. Andal was born here. This is one of the 108 sacred Vaishnavite places. This place is famous for its ancient temples of Vadabodrasai koil and the Nachiar-koil. Vadabodrasai koil tower is about 192 feet high and is an important land mark said to have been built in the 8th century. This temple, dedicated to Lord Vishnu, is in two floors. In the ground floor is Narasimha. The steps lead to Vadabodrasayanar — Lord in a lying posture. The temple has many beautiful wooden sculptures. The Andal temple is said to have been built in the 8th century. The Vaishnavite saint Periyalwar had his residence here. The pillars of the mandapam contain a number of images, life-like and highly elaborate in design. Viswakarma, Venugopalan, Dancing girl Mohini, Agora Veerabadra, Rathi, Manmadan, etc; are some of the best sculptures on the pillars. The walls of the inner prakaram contains paintings of the shrine of the 108 Vaishnava temples. The sanctum sanctorum enshrines Andal, Rajamannar and Gurudalwar. Between the Vadabodrasayanar temple and Andal temple there is a flower garden said to have been laid out by Andal's father, Periyalwar. A number of inscriptions are found in the temple, dating back to 11th century. The chief festival is celebrated during the Tamil month of Adi. The temple has a massive car (Ther) with a decorated height of 75 feet. The temple car is the second largest in Tamil Nadu next only to the car at Tiruvarur. A tank known as Mukkulam is also there where it is said that Andal performed Margali festival during her life. In Madavur Vilagam, suburb of Srivilliputtur (½ mile from Srivilliputtur), there is a temple dedicated to Vaidyanathaswamy. This temple has also stone inscriptions.

An old palace of Tirumalai Nayak of Madurai is in Srivilliputtur. In this palace also, three are massive pillars with huge vaulted domes.

A large number of temples are found in this district, most of which have been constructed during the Chera, Chola and Pandya periods. 1,564 temples are in the list of the H.R. and C.E (Administration) Department, out of which 1,325 are under the control of that department.

A brief analysis relating to certain population characteristics is made, utilising the information collected in the Village and Town Directory. A number of tables have been designed for this purpose. These tables are generated at the district and taluk level for the rural areas, and in regard to urban areas, townwise particulars are presented.

18	Rameswaranm ..	1	1 (100.00)	..	1 (100.00)	1 (100.00)	..	..	1 (100.00)	1 (100.00)
	Total	1,411	1,291 (91.50)	336 (23.81)	1,411 (100.00)	666 (47.20)	103 (7.30)	846 (59.96)	779 (55.21)	1,387 (98.30)

Table 1 :—This table furnishes the taluk wise distribution of inhabited villages according to the availability of different amenities. Among the total of 1,411 inhabited villages in the district, the amenity of drinking water alone is available to all the villages marking cent per cent. The amenities of power supply and education are available in 1,387 and 1,291 villages respectively which works out to 98.30 per cent and 91.50 per cent. Communication and approach by pucca road amenities are available to 59.96 per cent and 55.21 per cent of the total villages in the district respectively. Market/hat facility in the district is not satisfactory and it has recorded only 7.30 per cent i.e; 103 inhabited villages have this amenity. Similarly, the important medical amenity is not available in more than 75 per cent of the total inhabited villages in the district. Only 23.81 per cent or 336 villages have this amenity.

TABLE 2

PROPORTION OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES

Serial Number	Name of Taluk	Total Population of Inhabited Villages in the Taluk	Proportion of rural population served by the amenity of							
			Education	Medical	Drinking Water	Post and Telegraph	Market/ Hat	Communi- cations	Approach by Pucca Road	Power supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1	Tiruppattur ..	180,552	179,692 (99.52)	132,923 (73.62)	180,552 (100.00)	151,053 (83.66)	39,587 (21.93)	148,847 (82.44)	155,167 (85.94)	180,552 (100.00)
2	Karaikkudi ..	88,935	85,658 (96.32)	37,432 (42.09)	88,935 (100.00)	65,928 (74.13)	17,260 (19.41)	61,663 (69.33)	74,293 (83.54)	88,935 (100.00)
3	Devakottai ..	69,708	65,260 (93.62)	17,052 (24.46)	69,708 (100.00)	31,397 (45.04)	4,558 (6.54)	21,300 (30.56)	43,822 (62.87)	67,590 (96.96)
4	Tiruvadanai ..	175,615	172,305 (98.12)	48,649 (27.70)	175,615 (100.00)	114,811 (65.38)	23,693 (13.49)	100,240 (57.08)	65,297 (37.18)	172,582 (98.27)
5	Sivaganga ..	179,180	172,328 (96.18)	59,956 (33.46)	179,180 (100.00)	153,558 (85.70)	16,430 (9.17)	111,897 (62.45)	117,767 (65.73)	179,180 (100.00)

Table 2.—This table furnishes the proportion of rural population of inhabited villages served by different amenities. The total population of the inhabited villages in the district is 2,394,483 and all of them have the amenity of drinking water. The amenities of education and power supply are available respectively to 98.24 per cent and 99.62 per cent of the rural population in the district. The proportion of population served by the pucca road, communication and post and telegraph works out to 69.81 per cent, 71.64 per cent and 69.52 per cent respectively. Only 41.11 per cent of the districts rural population are served with the important medical facility Market/hat facility is available only to 11.72 per cent of the rural population and this is the lowest ratio considering all amenities available in the district.

TABLE 3

DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE

Village not having the amenity of	Number of Villages where the amenity is not available and available at distance of			
	—5 kms	5—10 kms	10+ kms	Total (cols. 2—4)
(1)	(2)	(3)	(4)	(5)
Education	111	6	3	120
Medical	567	370	138	1,075
Drinking Water	..	..	..	..
Post and Telegraph	566	129	50	745
Market/Hat	438	440	430	1,308
Communications	454	72	39	565

Table 3.—This table furnishes the distribution of villages not having certain amenities arranged by distance ranges from the places where such facilities are available. Out of a total of 120 villages which do not enjoy the amenity of education within the villages 111 villages, avail the facility at a distance of less than 5 kms., 6 villages avail at a distance of 5-10 kms and the remaining 3 villages avail the same at 10+ kms. The medical facility, though not available within the village, is available to 567 villages within a distance of five kms., to 370 villages at 5-10 kms. distance and to 138 villages at over 10 kms. distance. It is noteworthy that drinking water facility is available in all the inhabited villages in the district. The amenity of post and telegraph which is not available in the respective village itself for 745 villages, have the same at different distances viz., 566 villages have this amenity at a distance of less than 5 kms., 129 villages at 5-10 kms. and 50 villages at 10+ kms. Out of the total 1,411 villages in the district, 1,308 villages do not possess the facility of market/hat at the villages itself and among these villages, 438 villages have this amenity at a distance of less than 5 kms, 440 villages at 5-10 kms. and 430 villages have at a distance of 10+ kms. from the respective villages. Regarding communication, 454 villages have the facility at a distance of less than 5 kms. 72 villages have them at 5-10 kms. and 39 villages at over ten kms. from the respective villages.

TABLE 4
DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST TOWN AND AVAILABILITY OF DIFFERENT AMENITIES

Distance range from the nearest Town (in kms)	Number of Inhabited Villages in each range	No. (with percentage) of Villages having the amenity of							
		Education	Medical	Drinking Water	Post and Telegraph	Market/ Hat	Communi- cation	Pucca Road	Power Supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
0-5	186	161 (86.56)	39 (20.97)	186 (100.00)	90 (48.39)	14 (7.53)	119 (63.98)	138 (74.19)	180 (96.77)
6-15	728	688 (94.51)	188 (25.82)	728 (100.00)	367 (50.41)	64 (8.79)	465 (63.87)	434 (59.62)	719 (98.76)
16-50	497	442 (88.93)	109 (21.93)	497 (100.00)	209 (42.05)	25 (5.03)	262 (52.72)	207 (41.65)	488 (98.19)
51+	..	..	..	..	..	..	..	..	..
Total	1,411	1,291 (91.50)	336 (23.81)	1,411 (100.00)	666 (47.20)	103 (7.30)	846 (59.96)	779 (55.21)	1,387 (98.30)

Table 4.—This table furnishes the distribution of inhabited villages according to the distance from the nearest town and availability of different amenities. Among the total inhabited villages of 1,411 in the district, 186 villages which are located in the distance range of 0—5 kms. from the nearest town have the amenity of drinking water in 100.00 per cent, power supply in 96.77 per cent, education in 86.56 per cent, pucca road in 74.19 per cent, communication in 63.98 per cent, post and telegraph in 48.39 per cent, medical in 20.97 per cent and market/hat in 7.53 per cent of the villages. Similarly, 728 villages which are located in the distance range of 6—15 kms. from the nearest town have the amenity of drinking water in 100.00 per cent, education in 94.51 per cent, power supply in 98.76 per cent, pucca road in 59.62 per cent, communication in 63.87 per cent, post and telegraph by 50.41 per cent, medical by 25.82 per cent and market/hat in 8.79 per cent of the villages. The inhabited villages which are situated in the distance range of 16—50 kms. from the nearest town in the district, number to 497 in which the amenity of drinking water is available in all the villages viz. 100.00 per cent, power supply is available in 98.19 per cent of the villages, education in 88.93 per cent, communication in 52.72 per cent, pucca road facility in 41.65 per cent, post and telegraph in 42.05 per cent, medical in 21.93 per cent and market/hat facility in 5.03 per cent of the village. No village is occurring in the distance range of 51+ kms. in the district.

TABLE 5

DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE

Population range	Number of Inhabited Villages in each range	Number (with percentage) of Villages having the amenity of							
		Education	Medical	Drinking Water	Post and Telegraph	Market/ Hat	Communi- cation	Approach by Pucca Road	Power Supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
Less than—499	242	149 (61.57)	5 (2.07)	242 (100.00)	19 (7.85)	6 (2.48)	87 (35.95)	80 (33.06)	221 (91.32)
500—1,999	758	734 (96.83)	126 (16.62)	758 (100.00)	316 (41.69)	36 (4.75)	437 (57.65)	395 (52.11)	756 (99.74)
2,000—4,999	348	345 (99.14)	155 (44.54)	348 (100.00)	271 (77.87)	49 (14.08)	265 (76.15)	243 (69.83)	347 (99.71)
5,000+	63	63 (100.00)	50 (79.37)	63 (100.00)	60 (95.24)	12 (19.05)	57 (90.48)	61 (96.83)	63 (100.00)
Total	1,411	1,291 (91.50)	336 (23.81)	1,411 (100.00)	666 (47.20)	103 (7.30)	846 (59.96)	779 (55.21)	1,387 (98.30)

Table 5—This table shows the distribution of inhabited villages according to different population ranges and amenities available. Among the four categories of population ranges, 242 inhabited villages come under the population range of less than 499 and to these villages, the amenity of drinking water is available to 100.00 per cent viz., all the villages are possessing this facility of drinking water. 221 villages in this range avail the amenity of power supply, 149 villages avail education, 87 avail communication, 80 avail pucca road facility and remaining amenities of post and telegraph, market/hat and medical are availed by 19, 6 and 5 inhabited villages respectively. In the population range of 500—1,999, there are 758 villages out of the total 1,411 inhabited villages. While the amenity of drinking water is availed by all villages, the amenity of power supply is availed by 99.74 per cent of the villages, education by 96.83 per cent, communication by 57.65 per cent, pucca road by 52.11 per cent, post and telegraph by 41.69 per cent, medical by 16.62 per cent and market/hat by 4.75 per cent of the inhabited villages. 348 inhabited villages occur in the population range of 2,000—4,999 and all these villages are provided with the amenities of drinking water. Power supply is available in 99.71 per cent of the villages. The amenity of education is availed by 99.14 per cent of the inhabited villages in this range, communication by 76.15 per cent, pucca road by 66.83 per cent, medical by 44.54 per cent and market/hat by 14.08 per cent of the inhabited villages. In the population range of 5,000+, there are 63 inhabited villages and all these villages avail the amenities of education, drinking water and power supply to cent per cent viz., the percentages are 100.00 per cent to all in this population range. Regarding the amenities of pucca road, post and telegraph and communication, 96.83 per cent, 95.24 per cent and 90.48 per cent of the villages avail them respectively. While the medical amenity is availed by 79.37 per cent of the villages, market/hat facility is availed by 19.05 per cent of the inhabited villages, which is the lowest percentage in this range.

TABLE 6

MAIN STAPLE FOOD IN THE MAJORITY OF VILLAGES IN EACH TALUK

Serial Number	Name of Taluk	Main Staple Food
(1)	(2)	(3)
1	Tiruppattur	Rice and Millets
2	Karaikkudi	Rice and Millets
3	Devakottai	Rice and Ragi
4	Tiruvadanai	Rice and Ragi
5	Sivaganga	Rice and Ragi
6	Manamadurai	Rice.
7	Ilaiyankudi	Rice and Ragi
8	Paramakkudi	Rice and Millets
9	Tiruchchuli	Rice and Millets
10	Aruppukkottai	Rice and Millets
11	Virudunagar	Rice and Millets
12	Srivilliputtur	Rice and Millets
13	Rajapalaiyam	Rice and Millets
14	Sattur	Rice and Millets
15	Kamudi	Rice and Millets
16	Mudukulattur	Rice and Millets
17	Ramanathapuram	Rice and Ragi
18	Rameswaram	Rice and Millets

This table furnishes the main staple food in terms of grains consumed by the majority of the population of the villages in each taluk. There are 18 taluks in the district and in all the taluks except the five taluks of Devakottai, Tiruvadanai, Sivaganga, Ilaiyankudi and Ramanathapuram, Rice and Millets are being used as the main staple food. In the above five taluks, Rice is in use along with Ragi. Only Rice is consumed as the main staple food by the people of Manamadurai taluk.

TABLE 7

DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE

Serial Number	Name of Taluk	Number of Inhabited Villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
(1)	(2)	(3)	(4)	(5)	(6)
1	Tiruppattur	99	6,349.02	65.80	63.45
2	Karaikkudi	58	49,506.40	50.72	39.39
3	Devakottai	68	45,277.47	59.67	34.95
4	Tiruvadanai	119	38,308.07	60.81	46.01
5	Sivaganga	126	112,022.68	66.69	36.04
6	Manamadurai	81	62,392.01	67.11	53.36
7	Ilaiyankudi	52	38,642.85	75.08	32.70
8	Paramakkudi	92	72,694.54	80.99	29.16
9	Tiruchchuli	111	51,046.63	74.24	28.73
10	Aruppukkottai	150	95,752.65	85.68	12.12
11	Virudunagar	70	57,873.00	84.48	14.47
12	Srivilliputtur	50	78,605.88	49.94	51.03
13	Rajapalaiyam	44	53,819.77	57.47	49.69
14	Sattur	93	85,270.98	82.48	12.29
15	Kamudi	49	54,611.87	82.45	12.21
16	Mudukulattur	83	106,500.38	76.97	21.39
17	Ramanathapuram	65	73,864.15	87.45	17.76
18	Rameswaram	1	3,584.49	64.56	..
Total		1,411	1,086,122.84	72.49	27.32

This table gives the distribution of inhabited villages according to land use. The total area of the 1,411 inhabited villages in the district is 1,086,122.84 hectares of which the percentage of the cultivable area to the total area works out to 72.49 per cent. The percentage of the irrigated area to the total cultivable area works out to 27.32 per cent. Ramanathapuram, Aruppukkottai, Virudunagar, Sattur and Kamudi taluks possess the maximum cultivable area to the total area in the district viz., 87.45 per cent, 85.68 per cent, 84.48 per cent, 82.48 per cent and 82.45 per cent respectively. Srivilliputtur and Karaikkudi taluks have recorded the lowest percentages of 49.94 and 50.72 of cultivable area to total area respectively in the district, the highest being 87.45 per cent in Ramanathapuram taluk. While Tiruppattur taluk has got the highest percentage of 63.45 of irrigated area to total cultivable area in the district, the taluks of Aruppukkottai, Sattur and Kamudi have recorded the lowest percentages of 12.12, 12.29 and 12.21 respectively.

TABLE 8.

GROWTH, DENSITY AND SEX-RATIO OF URBAN POPULATION IN THE DISTRICT IN RELATION TO THE STATE

30

Table 8 gives the details of growth, density and sex ratio of urban population in Ramanathapuram district for the decades, 1951 to 1981. Figures for the State as a whole have also been shown in the table with a view to have a comparative picture about these demographic aspects. The percentage of urban population to total population in this district has gone up from 25.87 in 1951 to 28.21 in 1981. The density of urban areas of this district, which was 1,702 persons per sq. km. in 1961 has also increased to 1,862 persons in 1971 and it has gone up again to 2,110 persons in 1981.

31

TABLE—9
NEW TOWNS/TOWNS DECLASSIFIED IN 1981 CENSUS

Name of Town	Population, 1981 Census
(1)	(2)
(a) Added :	
(i) Anaiyur	11,016
(ii) Chatrapatti	4,188
(iii) Pallapatti	10,725
(iv) Rosalpatti	8,362
(v) Viswanattam	8,825
(b) Declassified :	
(i) Samsikapuram	7,226

Table 9 reveals that five towns has been recognised as new towns in Ramanathapuram district during 1981, while Samsikapuram, treated as a town in 1971 has, since been declassified as rural from the list of Census towns of 1981 Census because this town ceased to satisfy the urban criteria.

NOTE : The following villages form part of the towns noted against each and are hence not shown in the Village Directory.

Villages Treated as Census Towns

- 1 Tiruppuvanam Pudur
- 2 Tiruppuvanam Nel mudukarai
- 3 Manamadurai

Name of Town in which included

- Tiruppuvanam Panchayat
Tiruppuvanam Panchayat
Manamadurai Panchayat

7 ILAIYANKUDI TALUK

A number line diagram illustrating the conversion of miles to kilometers. The top scale is labeled 'Mile' and has markings at 0, 1, and 2. The bottom scale is labeled 'Km' and has markings at 0, 1, 2, and 3. The scales are aligned such that 1 mile corresponds to 1.6 kilometers. For example, the 1-mile mark is aligned with the 1.6-km mark, and the 2-mile mark is aligned with the 3.2-km mark.

TOWN DIRECTORY

NOTE EXPLAINING THE CODES USED IN THE TOWN DIRECTORY**STATEMENT I AND III****Class of towns by population :**

<i>Population</i>	<i>Class</i>
100,000 and above	I
50,000—99,999	II
20,000—49,999	III
10,000—19,999	IV
5,000—9,999	V
Below 5,000	VI

Civic administration Status of the town :

M. Corp.	Municipal Corporation/Corporation
M	Municipality
NP	Nagar Panchayat/Town Panchayat
GP	Gram Panchayat/Village Panchayat
TC	Town Committee/Town area
CB	Cantonment Board/Cantonment

Statement IV—IVA.

SC	Scheduled Castes
ST	Scheduled Tribes

Type of Road :

PR	Pucca Road
KR	Kutcha Road

System of sewerage :

S	Sewer
OSD	Open surface drains
BSD	Box surface drains
SD	Sylk drains
CD	Cesspool method
Pt	Pit system

Method of disposal of night soil :

HL	Head loads
B	Baskets
WB	Wheel barrows
ST	Septic tank latrines
S	Sewerage

System of storage of water :

OHT	Overhead tank
SR	Service reservoir
IG	River infiltration gallery
BWP	Borewell Pumping System
PT	Pressure tank

Source of drinking water :

TW	Tube well water/Hand pump
T	Tap water
W	Well water
TK	Tank water

Medical facilities :

	<i>Statement V</i>
H	Hospital
D	Dispensary
HC	Health Centre
FC	Family Planning Centre
TB	T. B. Clinic
NH	Nursing Home
O	Others
A	Ayurvedic
U	Unani
Hom.	Homeopathic

Educational facilities :

A	Arts only
S	Science only
AS	Arts and Science only
C	Commerce only
AC	Arts and Commerce only
ASC	Combined for all categories Arts, Science and Commerce
L	Law

Recognised shorthand, typewriting and other vocational institutions

SH	Shorthand
Type	Typewriting
SH. Type	Shorthand and Typewriting
O	Others

Public libraries and reading rooms :

PL	Public Libraries
RR	Reading Rooms
