FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Government, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part A related to village and town directory, Part B to village and town PCA and Part C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA, and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of Scheduled Caste and Scheduled Tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information in a few new items. A new statement on civic and other amenities in slums in Class I and Class II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Caste and Scheduled Tribe population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town on all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statement also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part A of the volume contains village and town directory and Part B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto taluk/town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and taluk level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri A.P. Muthuswami, I.A.S., the Director of Census Operations, Tamil Nadu on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B.K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

NEW DELHI,
26th April 1982.

P. PADMANABHA,
Registrar General, India.

PREFACE.

It has been the tradition of the Government of Tamil Nadu to publish immediately after each Census, a District Census Handbook separately for each district containing the census statistics besides other valuable data of local importance for the use of the State Government, district administration, research scholars and other data users. The first series of District Census Handbooks were brought out immediately after the 1951 Census and the present publication after the 1981 Census is the fourth in the series.

The data presented in this publication were collected during the census operations in February-March 1981, the reference date being 1st March 1981.

The District Census Handbook consists of the following two parts.—

Part-A Village and Town Directory ; and

Part-B Village and Townwise Primary Census Abstract.

In Part-A, apart from certain major characteristics of the district in relation to economic resources like forestry, agriculture, industries, etc., information are also available regarding certain basic amenities like education, medical, drinking water, etc. in each village.

This volume relates to Part-B of the District Census Handbook. It contains the district and village/townwise Primary Census Abstract and the Primary Census Abstract for Scheduled Castes and Scheduled Tribes.

The district Primary Census Abstract gives for each territorial unit upto taluk level in the case of rural areas and upto the town level for urban areas, occupied residential houses, households, the total population, the Scheduled Caste and Scheduled Tribe population, literates, and main workers. The main workers are further categorised into four broad groups, viz., Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers. Information is also furnished regarding marginal workers and non-workers. The village and townwise Primary Census Abstract gives similar information for villages and wards of towns. With a view to help users to compile data relating to panchayats, break-up details are also given, wherever necessary, in the village Primary Census Abstract. Besides, there is an Appendix which furnishes at urban block level the total population and the Scheduled Caste and Scheduled Tribe population.

In bringing out this publication, I have received assistance from Sri M. Thangaraju and Sri M. Nagappan, Deputy Directors of Census Operations, Sri R. Narayanan, Assistant Director of Census Operations besides a large number of staff members of this directorate.

In formulating the scope and content of the data in this publication and designing the formats for presentation of the data, I have received valuable guidance from Sri P. Padmanabha, Registrar-General, India. The encouragement I have received from him at every stage of the work has contributed in a great measure to the successful publication of this District Census Handbook.

I hope the data in this volume would be found useful by the planners and other data users.

MADRAS,
June 1983.

A. P. MUTHUSWAMI,
Director of Census operations, Tamil Nadu.

ACKNOWLEDGEMENT.

It is my pleasant duty to acknowledge the able assistance given by the following officials in preparation of this volume.

ANALYTICAL NOTE.

CENSUS CONCEPTS.

Rural and Urban Areas :

Census figures are generally presented separately for rural and urban areas. In the 1981 Census, the definition of an urban unit is more or less the same as in the 1961 and 1971 Censuses but for some minor variations. The urban areas of 1981 Census are :

(a) All places with a Municipality, Corporation or Cantonment Board or notified town area.

(b) All other places which satisfied the following criteria :-

(i) A minimum population of 5,000;

(ii) At least 75 per cent of the male working population engaged in non-agricultural (and allied) activity ;

(iii) A population of atleast 400 per km² (or one thousand per square mile).

The above definition of urban area varies slightly from that of 1961 and 1971 Censuses in that the males working in activities such as fishing, logging, etc., were treated as engaged in non-agricultural activity and therefore contributed to the 75 per cent criterion in the 1961 and 1971 Censuses whereas in the 1981 Census, these activities are treated as on par with cultivation and agricultural labour for the purpose of this criterion. The rest of the areas not treated as urban are classified as rural areas.

Urban Agglomeration :

Urban Agglomeration is a new concept formed during 1971 Census and this replaces the concept of town group adopted in 1961 Census. An Urban Agglomeration may be explained as follows : "It must form a continuous urban spread constituting a town and its adjoining urban outgrowth or two or more physically contiguous towns together with continuous well recognised urban outgrowth, if any, of such towns".

Census House :

A Census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Household :

A household is a group of persons, who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented any of them from doing so.

Scheduled Castes/Scheduled Tribes :

For the enumeration of Scheduled Castes and Scheduled Tribes in Census, the names of Scheduled Castes and Scheduled Tribes as recognised in Tamil Nadu based on the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act of 1976 (Central Act 108 of 1976) were followed. The enumerators were instructed to record a person as a Scheduled Caste/Scheduled Tribe provided the name given by the person was found in the list supplied to them.

Literates :

In 1981 Census, a literate was defined as "a person who can both read and write with understanding in any language". A person who could merely read but cannot write, was not a literate. It was not necessary that a person considered a literate must have received any formal education or have passed any minimum educational standard.

Work :

Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

Area figures.

In the District Primary Census Abstract, the area figures are given in square kilometers for Total, Rural and Urban areas. In the Village-wise Primary Census Abstract, the area figures for each location code unit are given in hectares upto two decimals. The area figures for each town in sq. km. is also given at the end of the Urban Primary Census Abstract. In the District Primary Census Abstract, the area figures of the district total represent the "Geographical Area" figures supplied by the Surveyor General, India. The urban area of district has been arrived at by adding the urban area figures of each taluk (supplied by the local bodies and revenue authorities) within the district. Area figures for the rural areas of District/Taluk are derived by subtracting the urban area figures from the total area of the District/Taluk. The total of the area figures of the taluks will not tally with the district figures because the taluk area figures represent the 'Land Use' area and are derived from the figures supplied by the Tamil Nadu Directorate of Survey and Land Records, while those of the district represent "Geographical Area" supplied by the Surveyor General of India. The total of the villages are given in the Village-wise Primary Census Abstract may not tally with the rural area of the taluk given in the District Primary Census Abstract as the taluk area figures take into account hills, forests, rivers, etc., where as the village area may not include the same. For convention, the ratio is 100 hectares=1 sq. km.

It is hoped that the pattern of presentation of basic Census particulars for each district as explained above and adopted in this volume would be found convenient by data users.

A brief analysis to certain population characteristics is made utilising the information of the Census data in Primary Census Abstract. A number of tables have been designed for this purpose. The tables are generated at the district and taluk level for the rural areas and in regard to urban areas, townwise particulars are presented.

THANJAVUR DISTRICT	4,063,545	2,043,724	2,019,821	3,126,588	1,572,571	1,554,017	936,957	471,153	465,804	1,763	1,728	1,728	32

Table 1 furnishes taluk-wise and sex-wise population of rural and urban areas and total number of villages (inclusive of inhabited villages) and towns of Thanjavur district.

It is seen that Mayuram is the thickly populated taluk of the district, while Peravurani has the lowest population. It is noted that Mayuram closely followed by Nannilam has the maximum of rural population, while Thanjavur has the highest urban population. Nannilam taluk has the maximum number of villages, viz., 231 while Papanasam has the maximum number of towns viz., 4.

TABLE 2—DECADAL CHANGE IN DISTRIBUTION OF POPULATION.

This table records the decadal changes in the distribution of population for the different taluks of Thanjavur district.

The increase in population in the district during the decade is 14.46 per cent, as against the State average of 17.50 per cent. The Orattanadu taluk has recorded the highest percentage of decadal variation of population with 22.72 per cent followed by Peravurani 20.53 per cent, while the lowest decadal variation of only 9.37 per cent is found in Mayuram taluk.

TABLE 3.

DISTRIBUTION OF VILLAGES BY POPULATION RANGES.

Range of population.	Number of villages in each range.	Percentage of villages in each range.
(1)	(2)	(3)
less than 200 ..	49	2.83
200—499 ..	104	6.02
500—1,999 ..	1,043	60.36
2,000—4,999 ..	469	27.14
5,000—9,999 ..	61	3.53
10,000 + ..	2	0.12
TOTAL ..	1,728	100.00

Table 3 provides useful data on the distribution of villages by population ranges in the district. It is seen that the maximum number of inhabited villages viz., 1,043 is in the population range of 500—1,999, i.e., 60.36 per cent. There are only two (0.12 per cent) villages, which have a population of above 10,000.

TABLE 4.

DISTRIBUTION OF VILLAGES BY DENSITY.

Range of density (per sq. km.)	Total number of villages in each density range.	Percentage of villages in each density range.
(1)	(2)	(3)
upto 10 ..	6	0.35
11—20 ..	1	0.06
21—50 ..	17	0.98
51—100 ..	14	0.81
101—200 ..	133	0.70
201—300 ..	317	18.34
301—500 ..	770	44.56
501 and above ..	470	27.20
Not known ..	..	..
TOTAL ..	1,728	100.00

Table 4 gives the distribution of villages by different density ranges.

TABLE 5.
PROPORTION OF SCHEDULED CASTE POPULATION TO TOTAL POPULATION IN THE VILLAGES.

Percentage range of Scheduled Caste population to total population.	Number of villages in each range.	Percentage of villages in each range.
(1)	(2)	(3)
Nil	52	3.01
5 or less	86	4.98
6—10	120	6.94
11—15	157	9.09
16—20	154	8.91
21—30	289	16.72
31 and above	870	50.35
TOTAL	1,728	100.00

Table 5 furnishes similar data on Scheduled Caste population in the villages of Thanjavur district. It is noted that in the percentage range of 31 and above there are as many as 870 villages (50.35 per cent), while there are only 86 villages in the range of 5 or less.

TABLE 6.
