Statement VI Trade, Commerce, Industry and Banking 1979	498—507
Appendix Towns showing their outgrowths with population	508

Responsibility for the correctness of internal details shown in the maps rests with the publisher.

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Government, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and ward wise for each city or town. It also provides data on infrastructure and amenities in villages and towns etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices, listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that part-A of the volume contains village and town directory and part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA up to Taluk/Town level. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and Taluk level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri A.P. Muthuswami, I.A.S., Director of Census Operations, Tamil Nadu on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N.G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B.K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the head quarters under the guidance of Shri M.M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi
the 26th April, 1982.

P. PADMANABHA
REGISTRAR GENERAL, INDIA

PREFACE

It has been the tradition of the Government of Tamil Nadu to publish immediately after each Census, a District Census Handbook separately for each district containing the Census statistics besides other valuable data of local importance, for the use of the State Government, district administration, research scholars and other data users. The first series of District Census Handbooks were brought out immediately after the 1951 Census, and the present publication after the 1981 Census is the fourth in the series.

The Census statistics presented in this publication were collected during the census operations in February-March, 1981, as at the sun rise of the 1st March, 1981. The other statistics in this publication have been collected from various departments of the State and Central Governments.

The publication consists of the following two parts.

Part-A : Village and Town Directory and

Part-B: Village and Townwise Primary Census Abstract

Taking into account the increasing and varied developmental and other welfare measures undertaken by the Government, the scope and content of the data in this publication have been considerably enlarged and improved to meet the requirements of the planners and the other data users. In particular, certain inset tables based on census and other data have been included in this publication with brief analytical notes thereon.

This publication contains a brief history of the district highlighting the major characteristics of the district in relation to the economic resources like forestry, minerals, etc. besides the social, cultural, religious and historical aspects. The district and taluk maps in this publication give the administrative units up to village level, the rural and urban units, the location of towns and cities, communication facilities and other related details.

The facilities and amenities available in respect of education, medical drinking water, post and telegraph, markets, communication, etc. in each village and town have been included in this publication, and an important feature is that wherever the above facilities and amenities are not available in any particular village/town, the nearest place where they are available has also been reported.

Another interesting feature in this publication is that villages with none of these amenities have been listed out separately for the pointed attention of the planners and administrators.

Certain tables present data exclusively in respect of the weaker sections of the society belonging to the Scheduled Caste and Scheduled Tribe.

The land use pattern in respect of rural and urban areas have also been reported in this publication which would meet the requirement of micro level planning for rural and urban areas.

The data in respect of urban areas, apart from the medical and other facilities available relate to the growth of towns, the availability of protected water supply, and what is important the civic amenities available in the slums of the urban areas.

Part B of this volume consists of the District and Village/Town wise Primary Census Abstract followed by Primary Census Abstract of Scheduled Castes and Scheduled Tribes.

The District Primary Census Abstract gives for each territorial unit upto Taluk level in the case of rural areas and upto town level for urban areas, occupied residential houses, households, the total population, the Scheduled Caste and Scheduled Tribe Population, workers etc. thereby indicating the basic socio-economic characteristics of the population for the territorial units. The village and townwise Primary Census Abstract gives similar information for villages and wards of towns. Besides, there is an appendix which furnishes at urban block level, the total population and the Scheduled Castes and Scheduled Tribes population.

I am grateful to the Collectors and other district officers and Department of the State Government who have extended their unfailing co-operation and help in collecting the voluminous and useful data other than Census, for their presentation at one place in this publication, for the ready reference of the data users.

In bringing out this publication, I have received assistance from Shri M. Thangaraju and Shri M. Nagappan, Deputy Directors of Census Operations, and Shri N. Sukumar Nandagopal, Investigator besides a large number of staff members of this Directorate.

In formulating the scope and content of the data in this publication and designing the formats for presentation of the data, I have received valuable guidance from Shri P. Padmanabha, Registrar General, India. The encouragement I have received from him at every stage of the work has contributed in a great measure to the successful publication of this District Census Handbook.

I hope the data in this volume would be found useful, and the publication well received by the administrator, academicians and other data users.

Madras
June, 1983.

A.P. MUTHUSWAMI,
Director Of Census Operations,
Tamil Nadu.

ACKNOWLEDGEMENT

I have pleasure in acknowledging the able assistance given by the following officials of my office in the preparation of this volume.

CENSUS CONCEPTS

Rural and Urban areas

Census figures are generally presented separately for rural and urban areas. In the 1981 Census, the definition of an urban unit is more or less the same as in the 1961 and 1971 Censuses but for some minor variations. The urban areas of 1981 Censuses are :

- a) All places with a Municipality, Corporation or Cantonment Board or notified town areas :
- b) All other places which satisfied the following criteria :
 - i) A minimum population of 5,000.
 - ii) At least 75 per cent of the male working population engaged in non-agricultural (and allied) activity :
 - iii) A population of at least 400 per km² (or one thousand per square mile).

The above definition of urban area varies slightly from that of 1961 and 1971 Censuses in that the males working in activities such as fishing, logging etc. were treated as engaged in non-agricultural activity and therefore contributed to the 75 per cent criterion in the 1961 and 1971 Censuses, whereas in the 1981 Census, these activities are treated as on par with cultivation and agricultural labour for the purpose of this criterion. The rest of the areas not treated as urban are classified as rural areas.

Urban Agglomeration

Urban Agglomeration is a new concept formed during 1971 Census and this replaces the concept of town group adopted in 1961 Census. An Urban Agglomeration may be explained as follows. "It must form a continuous urban spread constituting a town and its adjoining urban outgrowth or two or more physically contiguous towns together with continuous well recognised urban outgrowth, if any, of such towns."

Census House

A Census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used

or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Household

A household is a group of persons, who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented any of them from doing so.

Scheduled Castes/Scheduled Tribes

For the enumeration of Scheduled Castes and Scheduled Tribes in Census, the names of Scheduled Castes and Scheduled Tribes as recognised in Tamil Nadu based on the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act of 1976 (Central Act 108 of 1976) were followed. The enumerators were instructed to record a person as a Scheduled Caste/Scheduled Tribe provided the name given by the person was found in the list supplied to them.

Literates

In 1981 Census, a literate was defined as "a person who can both read and write with understanding in any language." A person who could merely read but cannot write, was not a literate. It was not necessary that a person considered a literate must have received any formal education or have passed any minimum educational standard.

Work

Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

Main workers and Marginal workers

A worker was identified with reference to a reference period preceding the census. The reference period prescribed was one year preceding the date of enumeration. Certain types of work such as agriculture, household industries like, gur making etc., were carried on, either throughout the year or only during certain seasons or part of the year, depending on local circumstances. In such cases, what we were concerned with, was the broad time span of the agricultural seasons preceding the enumeration. Workers can be full time workers or seasonal workers or marginal workers. If a person has done any work during the reference period and

if he had worked for the major part of the year i.e. if he had worked for 183 days or more, he was considered to be a full time worker (main worker). If a person had done any work during the reference period and if he has not worked for the major part of the year i.e. if he had worked for less than 183 days, he was considered to be a marginal worker.

The main activity of workers has been classified into four categories viz. cultivator, agricultural labourer, household industry and other work.

Cultivator

For purposes of Census a cultivator, is a person who is engaged either as an employer, single worker or family worker in cultivation of land owned, or held from Government, private persons or institutions, for payment in money, kind or share; cultivation includes supervision and directing of cultivation.

Agricultural Labourer

A person who works in another person's land for wages in money, kind or share should be regarded as an agricultural labourer. He or she has no risk in the cultivation but merely works in another person's land for wages and has no right of lease or contract on land on which he or she works.

Household Industry

For a person who returns his/her main activity as engaged in some production, processing, servicing or repair of articles or goods, it has been ascertained whether it is a household industry.

Household Industry is defined as an industry conducted by the head of the household and/or by the members of the household at home or within the village in rural area, and within the precincts of the house in urban areas. A larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would, or has to be registered under the Indian Factories Act.

Non-Workers

All persons who have not been treated as workers i.e. persons who have not worked any time at all during the reference period of one year preceding the date of enumeration, have been considered as non-workers. These cover all persons who are engaged in unpaid home duties and who do no other work or have not done any work at all during the last one year, full time students and children attending school, all dependent such as infants or children not attending school or a person perma-

nently disabled from work because of illness or old age, persons retired from service or rentiers, beggars, vagrants, convicts in jails or inmates of a penal, mental or charitable institution and all non-workers who may not come under any of the above categories.

(ii) HISTORY OF THE DISTRICT CENSUS HANDBOOK

After the Census of 1951, the Government of India offered to hand over to the State Government the Census tables and other data prepared during the Census and suggested that they might be published along with any other useful information relating to each district. The State Government accepted the proposal and the first publication of the District Census Handbook was brought out at the cost of the State Government.

The District Census Handbook of 1951 was found to be very useful and it was therefore decided not only to continue the series for the 1961 Census but also to improve definitely on its content so that each district Census Handbook contained certain basic economic data for the smallest administrative unit in the district and be an useful reference book for scholars and other data users.

After the 1971 Census as well the series of District Census Handbook was continued. The publication of the 1971 Census Handbooks was in three parts, viz. part-A, part-B, part-C; part-A relating to Village and Town Directory, Part-B relating to Village and Townwise Primary Census Abstract and Part-C comprising District Census Tables and certain administrative statistical tables.

The tradition of bringing out the Census Handbook has been continued by the State Government during the 1981 Census also. In this series some individual features besides restructuring the formats of the village directory have been adopted bearing in mind the national requirements of data for the socioeconomic programmes of the Government. The comparability of data with the 1971 Census data has also been kept in view.

The present Census Handbook will be published in two parts, viz. Part-A—Village and Town Directory and Part-B—Village and Townwise Primary Census Abstract.

(iii) SCOPE OF VILLAGE DIRECTORY AND TOWN DIRECTORY STATEMENT AND PRIMARY CENSUS ABSTRACT

The District Census Handbooks are the only publications which incorporate the data down to the level of a village and level of a town which are constantly referred to by the data users.

The Village Directory Statement gives the list of villages by taluk and for each village the area, number of households and population, availability of amenities and land use. The information on amenities available in the village includes educational, medical, drinking water, post and telegraph, market, rail/road or other communication facilities and power supply. Land use is shown as area under forests, irrigation, unirrigated land, culturable waste and area not available for cultivation.

Appendix I gives for each taluk the number of villages having various levels and types of educational institutions, such as middle schools, adult literacy centres, etc., various types of medical institutions such as dispensaries, primary health centres, etc. and the number of such institutions, various types of drinking water sources such as, taps, tubewell, etc. post and telegraph offices, power supply, railway stations, bus stops, etc. and also the number of villages not having such amenities.

Appendix II gives for each non-municipal town (census towns) the area under forest, irrigated and unirrigated land, culturable waste and area not available for cultivation.

Appendix III gives the list of villages where no educational, medical and public health facilities, etc. are available,

Appendix IV gives the list of villages with the proportion of Scheduled Castes and Scheduled Tribes population to the total population in various ranges of proportion. Part A of the Appendix gives the village according to the proportion of Scheduled Castes population and part B according to proportion of Scheduled Tribes population. Information is presented by the ranges 0-5 per cent, 6-10 per cent, 11-15 per cent, 16-20 per cent, 21-30 per cent and 31 per cent and above for Scheduled castes and 0-5 per cent, 6-15 per cent, 16-25 per cent, 26-35 per cent, 36-50 per cent and 51 per cent and above for Scheduled Tribes.

The Town Directory gives important and useful information like civic and other amenities available in all the towns in the district, statutorily notified as well as non-municipal and census towns. The details relating to each of the towns have been presented in seven statements, viz. statements I to VI and IV-A. In all the statements except IV-A, the towns are arranged in the alphabetical order for the district. The Town Directory does not cover strictly military areas. It may, however, cover cantonment areas but not strictly military areas or military establishments, within the cantonment areas. However, basic statistics of the cantonment

as a whole have been provided. In the Town Directory codes have been given for the data on amenities and civic administration for want of space. The relevant explanations for the codes adopted have been given in the beginning of the Town Directory statements.

An urban agglomeration includes two or more independent census towns. The names of the towns-urban agglomerations have been arranged in the alphabetical order.

The particulars of the individual town which constitutes one of the units of agglomeration have not been furnished separately because the particulars have been furnished, where they occur together under the name of agglomeration. The following remarks have been given against such town in brackets.

“(see the name of the main town of the agglomeration)”

By adoption of this method the reader can get an idea of the particulars of the urban agglomeration in total and also severally.

Statement-I Status and Growth History

This statement provides some basic data based on the Primary Census Abstract. For analysing the Town Directory data at State level and All India level some new columns have been introduced in 1981. The new items are class of town, area, number of households, population and growth rate for each census since 1901, Density and Sex Ratio at 1961, 1971 and 1981 censuses.

For size class of town the following population norms as per 1981 census have been adopted.

Population	Class
1,00,000 and above	I
50,000—99,999	II
20,000—49,999	III
10,000—19,999	IV
5,000—9,999	V
below 5,000	VI

Location Code Number of Towns

To distinguish the town from the village, the location code numbers for towns have been given in Roman numerals and these numbers have been assigned in a continuous order for the district as a whole.

Statement II: Physical Aspects and Location of Towns, 1979

Under physical aspects, annual rainfall and temperature figures are furnished. These particulars were obtained from the Commissioner of Statistics, Madras. If the information is not available for any particular town the nearest town for which it is available is given. For col. (9) the nearest city with population of one lakh and more is furnished according to 1981 census. For the other cols. figures obtained from the Municipal Commissioners and panchayat Union Commissioners are given. The 'Zero' within brackets in cols. 10 & 11 denotes that the referent town itself is enjoying Rail/road transport facilities.

Statement III Municipal Finance, 1978-79

The civic administration status of the town, the receipt through tax, properties and powers, government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services are given in this statement. The sources of receipt and expenditure are furnished in terms of rupees in hundreds.

Statement IV: Civic and Other Amenities, 1979

The civic and other amenities existing in the towns as in 1979 are given. The data were obtained from the Municipal Commissioners and panchayat Union Commissioners of the concerned towns.

Col. 3—Civic administration status:

It is a new column introduced in this statement to facilitate analysis.

Col. 4—Population

It is also a new column introduced in this statement to measure the amenities in respect of population.

Col. 5—Scheduled Castes and Scheduled Tribes Population

It is introduced to know the size of population of the weaker sections of the community in the town.

Electrification

Electrification particulars were obtained from the Tamil Nadu Electricity Board through the Municipal Commissioners and panchayat Union Commissioners.

i) Domestic Connections

This refers to the number of services given to houses for domestic purposes like fans, lighting, etc.

ii) Industrial Connections

This refers to the number of services effected to L.T. Industries such as workshops, flour mills, oil mills, grinding machines, cotton ginning, engineering Industries etc.

iii) Commercial Connections

This refers to the services given to shops, business houses, public institutions like offices and schools and commercial establishments.

iv) Road lighting points

This refers to the number of points of street lights which will be maintained by the Board and for which consumption charges will be paid to the Board by respective local bodies. For some town panchayats the number of services effected alone has been furnished under street lights and not the points.

v) Other Connections

This refers to the number of services effected for agricultural purposes, huts, public water supply systems, cottage industries, etc.

Statement IV-A: Civic and other amenities in notified slums-1979

This is a new statement on civic and other amenities in notified or recognised slums of class I and II towns. Generally, in cities or towns having slums, the local authority such as municipality or municipal Corporation or even the development authority notified the recognised slums. Such notification is linked up with the availability of funds from the State Government for slum clearance.

Name of the slum and the details of the area, population, length of the paved roads, system of sewerage, number of different types of latrines and method of disposal of night soil, etc. are given in this statement.

Statement V: Medical, Educational, Recreational and Cultural Facilities, 1979.

In this statement medical, educational, recreational and cultural facilities of the towns as in 1979 are furnished. The data for educational and medical facilities were obtained from the Municipal Commissioners and Panchayat Union Commissioners

for the concerned towns, and from the Director of Secondary Education and Director of Public Health respectively.

Col. 10— Recognised shorthand typewriting and other vocational training institutions.

The term 'recognised' refers to institutes recognised by some statutory authority like Education Department, Commerce Department, Labour Department, etc. of the Government or by semi Government or autonomous bodies, public sector project, etc.

Cinemas refer only to the permanent cinema theatres and do not include touring cinemas.

Col. 16 – Number of working women's hostel with number of seats.

This is a new column introduced in this statement in 1981. Considering the increasing employment of women in urban areas, the housing needs of working women has been an important problem.

Statement VI: Trade, Commerce, Industry and Banking, 1979

In this statement, trade, commerce, industry and banking facilities in the town as in 1979 are furnished. Banking particulars were obtained from the Reserve Bank of India. The information on number of agricultural and non-agricultural credit societies were collected from the Registrar of co-operative societies through the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Scope of Primary Census Abstract

The primary Census Abstract, as it is called presents basic data for each village or segment of a village (in cases where such village segments from different panchayats) in the "Village-wise Primary Census Abstract" and for each Ward/Division of a Town in the "Urban Primary Census Abstract". The format of the Primary Census Abstract for the villages and towns in 1981 has been slightly modified as compared to the 1971 Primary Census Abstract.

The Primary Census Abstract gives such basic information as area in hectares/sq. km., occupied

residential houses, number of households, total population, Scheduled Castes and Scheduled Tribes population, literates, main workers, division of main workers into cultivators, agricultural labourers, workers in Household industry and other workers, marginal workers and non-workers in respect of each unit. The Urban/Village Primary Census Abstract gives this information for each village and each urban ward. With a view to ensure comparability and to enable data users to derive the figures either for a revenue village or panchayat according to their requirements, the data are presented for segments of villages also. Wherever portions of one village happen to be in two or more panchayats the segment wise data have to be used separately or added with some other segment data so as to derive panchayat data. For example, if portions of a revenue village bearing L. C. No. 10 forms part of two panchayats, the figures are given separately for each portion of the village against L. C. No. 10 a/b and b/b. The total figures for the entire revenue village by adding the figures given against both the segments viz. 10 a/b and 10 b/b are given in the Village Primary Census Abstract. If, instead, the panchayat figures are required, the data for the concerned village segment or segments relating to the panchayats concerned, are to be added up to arrive at the total figures for the respective panchayat.

An appendix presented in the case of the Urban Primary Census Abstract gives 1981 population, Scheduled Castes and Scheduled Tribes population for each enumerator block of the town. This is meant for the use of administrative and election authorities in urban areas. Such data are also required by urban planners and researchers for conducting other studies in selected blocks.

Mode of presentation

The consolidated figures for the district and each taluk are given in the beginning for Total, Rural and Urban areas followed by each Town/Urban Agglomeration, under the caption 'District Primary Census Abstract'. Then follows the Primary Census Abstracts for Scheduled Castes and Scheduled Tribes. An alphabetical list of revenue villages is then given along with the Census Location

Code Numbers of 1981 Census followed by the Village-wise Primary Census Abstract for each Taluk. In the foot note given at the end of the Village-wise Primary Census Abstract, the villages included in municipalities or Census towns are indicated. In an annexe, the names of villages and their constituent panchayats are given. Then, follows the Urban Primary Census Abstract. In an appendix to the Urban Primary Census Abstract, the population and Scheduled Castes / Scheduled Tribes figures for each Enumerator Block of a town are given. This arrangement is followed for each taluk in the district.

Maps

Apart from the District Map given as frontis piece, map for each taluk showing the Village Location Code numbers along with their boundaries have also been included at the appropriate places. As compared with the maps presented in 1971 District Census Handbook several improvements have been effected in the maps presented in this volume. All towns are shown in the District and taluk maps with shading screens and also spheres according to the population size of towns.

Area Figures

In the District Primary Census Abstract the area figures are given in Square Kilometres for Total, Rural and Urban areas. In the Village-wise Primary Census Abstract, the area figures for each Location Code Unit are given in hectares upto two

decimals. The area figures for each town in Square kilometres is also given at the end of the Urban Primary Census Abstract. In the District Primary Census Abstract, the area figures of the District total represent the "Geographical Area" figures supplied by the Surveyor-General. Figures for urban areas are those supplied by the Local Bodies and revenue authorities. The urban area of a district has been arrived by adding the urban area figures of each taluk within the district. Area figures for the rural areas of District/Taluk are derived by subtracting the urban area figures from the total area of the District/Taluk. The total of the area figures of the taluks will not tally with the district figures because the taluk area figures represent the 'Land Use' area and are derived from the figures supplied by the Tamil Nadu Directorate of survey and Land Records, while those of the district represent "Geographical Area" supplied by the Surveyor-General of India. The total of the village area given in the Village-wise Primary Census Abstract may not tally with the rural area of the taluk given in the District Primary Census Abstract as the taluk area figures take into account hills, forests, and rivers, etc., whereas the village area may not include the same. For conversion, the ratio is 100 hectares = 1 square kilometre.

It is hoped that the pattern of presentation of basic Census particulars for each district as explained above and adopted in this volume would be found convenient by data users.

Tirunelveli District - An outline

Introduction :

Tirunelveli, the name has been composed from the three tamil words i.e. "Thiru-Nel-Veli" i.e. "Scared paddy hedge". This district is fertile on account of the River Tambaraparni. In most parts of Tirunelveli District, paddy is being cultivated in two crops. Paddy is the main cultivation crop in this district. In some areas sugar cane and plantain are being raised. On the whole the district looks green always. Though the main occupation of the people is cultivation in recent years industries and services are also competing with this ancient occupation. The Tuticorin port, M/s. India Cements of Talaiyutthu, Co-operative Spinning Mills situated at Pettai near Tirunelveli and other spinning mills in Ambasamudram and Tuticorin, Sun Paper Mill of Cheranmahadevi are a few large scale industrial units functioning.

The district has many interesting places like Kutalam famous for its water falls and health resort, Krishnapuram for its beautiful temple sculptures, large ancient temples of Tirunelveli, Tiruchchendur, Srivaikuntam, Tirukkurungudi etc. besides the historical places of Palayankottai, Panchalankurichchi, Ottappidaram and Maniyachichi.

This is the only district which is having all the land types described by scholars in ancient Tamil Literature. In the following two stanzas the scholar has divided the land surface in five varieties.

“குறிஞ்சி, பாலை, முல்லை, மருதம், நெய்தல்
ஐந்திணைக் கெய்திய பெயரே”
— நம்பி அகப்பொருள்.

- | | | |
|-------------|---|--|
| 1. குறிஞ்சி | — | Hills—Some parts of Tenkasi and Ambasamudram Taluks |
| 2. பாலை | — | Desert—Some parts of Nanguneri and Tiruchchendur Taluks |
| 3. முல்லை | — | Forest—Sengottai Taluk |
| 4. மருதம் | — | Fields—Ambasamudram, Tirunelveli and Srivaikuntam Taluks |
| 5. நெய்தல் | — | Sea Shore—Tiruchchendur, Tuticorin and Nanguneri Taluks |

In Silappathigaram, one of the five epics of Tamil Literature, the desert has been described as :

“முல்லைமயம் குறிஞ்சியு முறைமையிற்
நிலிந்து
நல்லியல் பிழந்து நடுங்குதுய
குறுத்துப்
பாலை யென்பதோர் படிவங்
கொள்ளும்”
(சிலப்பதிகாரம்-காடு காண் காதை)

History of the District :

The history of this district is bound up with that of the Pandyas just like Madurai and Ramanathapuram areas. Even earlier, a pre-historic race is said to have occupied this land.

No authentic data about the areas of this district is available upto 500 AD except that some notes of foreign writers indicate the life of the people in those times. From the writings of Megasthenes, the Greek Ambassador and other foreign travellers, it is seen that Pandyan Kingdom was in a prosperous condition during that period. Korkai, a port town was the capital of the Pandyan rulers. This town was later engulfed by the sea. Korkai was a centre for seafaring trade especially in pearls and horses. The Pandya King Nedunchezian who ruled about AD 210 was a famous ruler. The Pandyan rule continued till the end of the 15th century with short spells under Chola and Mohamedan rulers. In 1063 AD, the Tirunelveli territory was conquered by Rajendra Chola who held it under his power for a short period and after the Chola rule, the area passed on to the Mohamedans who kept it under their authority till 1365 AD. The territory once again came under the Pandya rule at the time of Parakrama Pandya Deva who was helped by the Vijayanagar Kings. By 1520 AD, the Pandyan dynasty was ousted by the Nayaks of Vijayanagar. The Nayaks ruled Tirunelveli areas from Madurai as their capital during the 16th, 17th and early part of the 18th centuries. The irrigation system found in the district owes its allegiance to the admirable Nayak rulers. Nagama Nayak and his son Viswanatha Nayak were important rulers. Rani Mangammal ruled over this area from 1689 to 1704 AD as repre-

sentative of Vijayanagar Kings. The last ruler of the Nayaks died in 1731 AD and after that the area fell into the hands of the Mohamedans whose power lasted till 1805 AD. During the Nayaks rule, Poligars or feudal chiefs were well established and had firm foundation of their power.

With the fall of the Nayaks, the territory passed to the hands of Carnatic Nawabs in 1736 AD. Mohamed Ali and Chanda Sahib were the claimants to the throne of Carnatic in which were included the territories of Madurai and Tirunelveli. The British supported Mohamed Ali while the French allied with Chanda Sahib giving rise to a series of conflicts in this part of the country. The British having been preoccupied with Tippu Sultan of Mysore, the Poligars in the south rose in rebellion against the Nawab of Carnatic and caused lot of disturbances.

The Poligars at that time numbered thirty two in Tirunelveli area. Each had a strong Fort and a body of armed retainers. They were chiefs under the Vijayanagar rulers. After the fall of Vijayanagar Kings they quareled. Though the authority of the Nawab was acknowledged they evaded payment of tribute and rebelled. Kattabomma Nayakan of Panchalamkurichchi was the foremost among the rebel Poligars. He stood up against foreign domination. The Poligars of Nagalapuram, Gollarpatti, Elayerampanni, Kadalgudi, Kulathur and Puli Devar of Avudayapuram joined hands with Kattabomma Nayakan. The English had the support of the poligars of Ettayapuram, Uttumalai, Chokkampatti, Thalavan Kotteri, Maniyachi and Melmandi. Major Bannerman attacked the Fort at Panchalamkurichchi in 1799, against the stiff resistance of Kattabomman. He escaped but was later caught by Tondaiman, Raja of Pudukkottai and handed over to the British who hanged him in Kayatar. The property of the rebel poligars were distributed among the poligars who supported the British. Two brothers of the poligar of Panchalamkurichchi who were kept in jail started a second revolt and fought the British along with Marudhu brothers of Sivaganga at Kalayarkoil in 1801. The revolt failed and they were caught and hanged.

During the latter half of the 18th century, the East India Company was frequently at war with the

Poligars on behalf of the Carnatic Nawab in Tirunelveli and Madurai. With the fall of Tippu in 1799, British concentrated their force in the south and suppressed the Poligars. At about this time, the Nawab of Carnatic became powerless and left the management of the territory to the British. The Nawab was pensioned off and the management of the revenues of Tirunelveli was made over to the British in 1801 under a treaty. Thus the British rule started which lasted till 1947. Before the establishment of British rule, the portuguse and Dutch had occupied Tuticorin and other port areas. After the British rule began in 1801, Swaraj movement was started and a number of prominent persons of this district fought against the British and clamoured for independence of the country.

The district lies in the southern part of the Indian Sub-continent. The district for revenue administration is divided into 4 revenue divisions as indicated below :-

Revenue Division	Taluks comprised in the revenue division
1. Tirunelveli	i) Tirunelveli ii) Tenkasi iii) Shengottah
2. Kovilpatti	i) Kovilpatti ii) Ottappidaram iii) Vilathikulam iv) Sankarankoil v) Sivagiri S.T.
3. Cheranmahadevi	i) Ambasamudram ii) Nanguneri
4. Tuticorin	i) Tuticorin ii) Srivaikuntam iii) Tiruchchendur iv) Sattankulam

For the purposes of elections, the district is divided into 18 Assembly constituencies of which 3 are reserved for Scheduled Castes. There are 3 Parliamentary constituencies which include one Assembly constituency of Kanniyakumari for representation in the Lok Sabha.

The district comprises 10 municipalities, one municipal township, two panchayat townships, 31 panchayat unions, 58 town panchayats and 828 village panchayats.

Tirunelveli district has geographical area of 11,429 km². The population of the district as per 1981 census is 3,573,751 comprising of 1,748,321 males and 1,825,430 females. Out of this population 2,335,952 live in rural areas and 1,237,799 persons live in urban areas. There are 52 towns, 947 inhabited villages and 44 uninhabited villages. The density of population as per 1981 census is 313.

There were not many changes in the jurisdiction of the district between 1971 and 1981. Ottappidaram which was an independent sub-taluk in 1971 was upgraded as a full fledged taluk in 1975 and Sattankulam which was a dependent sub-taluk in the previous census became a full fledged taluk in 1979.

Physical features

The district is roughly triangular in shape and is a coastal district in the south of the country. The district is bounded on the north by Ramana-thapuram district and the Travancore areas of Kerala State and Kanniyakumari district on the west. The Southern and eastern sides are bounded by the Gulf of Mannar.

In the west, hills of the western ghats ranging from 1000 to 2000 metres form the dominant boundary.

On the eastern side of the Ghats, the country is plain and is sloping towards the sea. The plain area is having some detached hills. Tambaraparni river has its origin in the western ghats and traversing through this district enters the sea at Punnakayal. Best irrigated lands are found on both sides of the Tambraparni river. In the north and north-east, the land is black and bare and this area is best suited for raising cotton, cholam and cumbu. The eastern part is sandy with palmyra palms. In the coastal taluks of Tiruchchendur, Srivaikuntam and Nanguneri, there are sandy belts created by winds which look like hillocks known as "Theris". There are grand inland lakes close to "Theris". The vast expanses of water known as "Tharuvais" are found which are used for cultivation and is peculiar to this district.

Tirunelveli is one of the coastal districts of Tamil Nadu. Its coastline extends to about 140km. from Vembar in the north to a point about 6km. east of Cape comerin. In the eastern coast, Tuticorin Port which is the second major port in the State is situated. Tirunelveli coast line is also famous for pearls and chank fishing from early centuries. Upto Tiruchchendur, the slope of the coast is low. The first prominent break is the sand stone cliff at the sea shore in Tiruchchendur. The coastline drops then to a shallow bend till it reaches Manapad. The coastline takes an abrupt south-west turn near Kulasekarapattinam in Tiruchchendur Taluk.

Hills

The prominent hills are part of the western ghats and form the boundary between Kerala State and this district on the western side. The western ghats run to length of about 160 km. in the district starting from the north-western part in Sankarankoil Taluk and ending at about 15 km. from Kanniyakumari. Valuable trees are found in the western ghats. The western ghats lie on the western part of Sankarankoil, Tenkasi and Ambasamudram taluks. Nearer the border of Tenkasi and Ambasamudram taluks, the ghats widen forming undulating hills, broad valleys and extensive plateaus. The height of the hills diminishes considerably near Sengottai and permits communication by road and rail to places in Kerala through the Sengottai pass. Besides this, a portion of the ranges lie on the southern part of Ambasamudram taluk and in the western and southern portion of Nanguneri taluk, it diminishes in height at Aramboly permitting road communication with Kanniyakumari. The hills of the western ghats have valuable trees which are being exploited for commercial purposes. The conspicuous among the hills are Kallakadai Mottai (5,721 feet) above Sivagiri; Kottaimalai (6,335 feet) over Puliyangudi and Kuliratti (5,876 feet) near Kadayanallur Krishnapuram. Tambraparni river rises in the Agasthiya Malai (Pothigai hills) of the western ghats and descends to the plains at Papanasam in Ambasamudram taluk. The height of the Agasthiya Malai is 6,132 feet and is considered as the seat of Saint Agasthiyar who is conducting research in Tamil language.

In the plains, Vallanadu hill in Srivaikuntam taluk is prominent.

Rivers

Tambraparani rises in Agasthiya Malai of the western ghats. It joins the plains near Papanasam in Ambasamudram taluk. It flows through Ambasamudram, Tirunelveli, Srivaikuntam and Tiruchchendur taluks and joins the sea at Punnakayal in Srivaikuntam taluk. It runs for a distance of 120 km. in the district before it reaches the sea. The river gets water from both south-west and north-east monsoons and is never dry. The river drains a considerable extent of mountain country before entering the plains. At Banathirtham, the river forms the water fall which is a magnificent sight. Tambraparni is joined by Pambar at the foot of the hills and by Koriyar further down. The Papanasam, it has another fall known as Kalyanathirtham fall. At Papanasam, the river has been dammed for regulating the supply of water for irrigation and for generation of electric power. The river Tambraparni has its origin and end in the district itself.

Pambayar, Peyyar, Ultar, Pambar, Koriyar and Servaiyar are the chief tributaries of Tambraparni. Pambar rises in Naga Pothigai near Pothigaimalai and joins the river Tambraparni after running for about 10 km. in a north-east direction. Pambar and Servaiyar were well fed tributaries of Tambraparni. In the plains, Manimuthar is the first tributary to join Tambraparni. It joins about 3 kms. west of Kalidaikurichchi above the Kannadian anicut, Manimuthar gets the water from Varattar and Kusanmathi river. A dam has been constructed on Manimuthar for irrigation purposes. River Koraiyar flows in the southern part of Ambasamudram taluk and flows into Kannadian channel branching off from Tambraparni.

The other important rivers in the district are Chittar, Jambunadi, Gatananadi and Pachaiyar.

Chittar rising in the Courtallam hills flows through Tenkasi and Tirunelveli and joins the Tambraparni at Sivalaperi in Tirunelveli Taluk after running a distance of about 60 km.

Jambunadi rises in Kuliratti hills on the borders of Tenkasi and Ambasamudram taluks. It

joins the Ramanadhi and becomes known as Varahanadhi. Small anicuts are found in these rivers.

Gatananadhi originates in Sivasailam hills in Ambasamudram taluk, joins Varahanadi at Pappankulam and finally joins Tambraparni at Tirupputai-marudhur.

The Pachaiyar rises in the eastern slope of Vellimalai of the western ghats and joins the Palaiyam channel and flows in Nanguneri Taluk.

Besides Pachaiyar, Karumaniar, Kilamani-muthar, Nambiyar and Hanumanadi are flowing in Nanguneri Taluk. The Nambiyar rises in Mahendragiri slopes of the western ghats and falls into the sea. Tamarayar, Kombayar and Kodamadiyar are the tributaries. The Hanumanadi rises in Kerala limits, flows through Nanguneri Taluk and joins the sea outside the district boundary.

In Sankarankoil Taluk small rivers—Vadamalayar, kotamalayar, Nikshepanadi, Kakanadi and the Palayar are found. They join Vaippar flowing through Kovilpatti taluk.

The Malattar and Uppodai flowing in Kovilpatti taluk are drainage courses.

Flora and Fauna

The western ghat regions of the district have a fairly rich variety of flora and fauna. The varieties of Kerala and the eastern coast are found mixed. The ghat regions which receive good south-west monsoon rains have thick forests. In the lower parts, the forests are light deciduous type. Above 1000 feet elevation dense masses of short trees with bare grass hills are found. In the higher elevations, trees grow very tall. Timber trees of fine quality and commercial value are found at the base of these hills. Teakwood, blackwood, rosewood etc. are the most important.

The flora changes as one goes towards the east coast. In the dry tracts, vegetations of shrub nature and stunted growth are to be seen. Udai trees (*Acacia planiformis*) are commonly seen along with palmyrah trees in the coastal parts. In the southern part of Nanguneri and in a large portion of Tiruchchendur Taluk, there is immense growth of palmyrah palms. Tamarind, Puvarasu and Neem

are the important avenue trees. Kuttalam area has a large number of orchards, herbal trees etc. Shencottah region contain valuable timber trees and fruit gardens. In the fertile and irrigated parts, fruit bearing trees like mango, plaintain and coconut are seen,

Fauna like flora is rich in this district. The western part having the hills of the western ghats with thick woods are the abode of wild animals. Tigers are commonly found in these forests. Bisons are to be seen in Ambasamudram, Tenkasi and in a few areas of Sankarankoil taluk. Bears are found in the thick woods in the extreme west. Ibex are numerous in Kuttalam region and Sambhurs are also common. The black buck or the Indian antelope may be seen in vallanad and Gangaikondan forests. In the jungles and forests, jackals, langurs etc. are the other wild life found.

There is no special breed of cattle in the district. They are similar to the ones found in the other districts of the State. Crows, green parrots, grey pelicans and other birds of ordinary variety are commonly found. The imperial green birds and great horn bulls are the two special types seen in the forest areas of the western ghats. In the plains same species migrating from Sri Lanka can be noticed. In the black soil regions and hilly tracts, poisonous snakes are commonly found.

The district with a long coast line is famous for pearl chippies. Fishes and sea weeds fossils etc. are of interest to naturalists.

Mineral resources and development

The district is covered by gentle topography except in the western part which is occupied by the ghats locally known as the Papanasam and Singampatti ranges. The major rivers which drain the area towards east and southeastwards are the Tambraparni, Chittar, Gatananadhi, Vaipar and Nambiar. The coastal areas are covered by a narrow stretch of red ferruginous sand known as 'Theri'.

The district comprises of two major group of rocks viz. the Khondalities and the charnockites with pyroxene granulites and the associated migmatitic rocks. Bands of quartzites and crystalline limestones occur within the gneiss and are found around Tirunelveli, Kovilpatti and Ambasamudram.

Pink coloured granites, pegmatites and quartz veins are also found to occur within the above mentioned rocks. Tertiary formations consisting of calcareous sandstone and limestones are also exposed all along the coastal area overlying the charnockites and gneissic rocks particularly around Kudankulam, Idindakarai and Tisaiyanvilai. Rocks of basaltic composition probably connected with the Deccan Trap activity occur as thin veins and dykes within the gneissic rocks around Kudankulam. Quarternary formations consisting of 'theri' sands, dunes and beach washings containing heavy minerals also occur along the entire coast.

Limestone is a major industrial mineral found in the district and the requirements of M/s. India Cement, Talaiyuthu with a capacity of 2550 Tonnes per day are met from the crystalline limestone deposit located around Tirunelveli. There are large reserves of limestone of the crystalline, sedimentary, coralline and tufaceous types amounting to 59 million tonnes in the Nanguneri, Ambasamudram, Sankarankoil, Tenkasi and Tiruchchendur taluks. M/s. Industrial Chemical manufacture about 10,000 tonnes per year of calcium carbide utilising the coral limestone collected from the islands off the Tuticorin coast. The Dharangadhara Chemicals at Sahupuram near Tiruchchendur is also engaged in the production of the caustic soda from the coral limestone.

Dolomite which finds use in the manufacture of refractory products, magnesia etc. occurs near Vallinayakapuram in Kovilpatti taluk with an estimated reserve of 2 million tonnes.

Alliuvial gypsum occurs in the Sankarankoil and the Kovilpatti taluks where a total reserve of 99,460 tonnes have been estimated. The mineral is being utilised chiefly of cement manufacture.

White and buff coloured siliceous clay occur with lithomarge around Tisaiyanvilai in Nanguneri Taluk. Although a reserve of 5 million tonnes has been estimated in these area the clays have been found unsuitable for use in the ceramic, paper and other industries due to the nonplastic and highly ferruginous and siliceous nature.

Heavy mineral placer sands consisting of ilmenite and associated minerals occur in the

district in the Nanguneri and Tuticorin taluks along the coast. Garnet sands occur widely in the Ovari Navaladi area where a reserve of 23,000 tonnes has been estimated. Other occurrences containing ilmenite, magnetite, rutile, sillimanite, monazite and garnet occur near the mouths of Vaippar and Vembar where a total reserve of 35,000 tonnes of ilmenite has been estimated. Since the reserves are limited, there is no scope for the establishment of a mineral separation plant in the area. The garnet sands are being mined and utilised for polishing optical glasses.

A deposit of graphite containing about 1,350 tonnes occurs near Kurinjakulam near Sankarankoil, but is not of economic significance. Other minor occurrences have also been recorded near Panagudi, Therku Kallikulam and Vijayanarayanam in the Nanguneri taluk.

The occurrence of cat's eye chrysoberyl used as a gemstone has also been located by the State Geology Branch in Mudavankulam and Kanakkankulam in Nanguneri taluk (now Radhapuram Taluk).

Climate and Rainfall

The district has an equable climate. The maximum temperature does not exceed 40°C and the minimum temperature seldom goes below 19°C. The months of April and May are the hottest months. The coastal areas, due to proximity to the sea, enjoy cool breeze. Lowest temperature is recorded in the month of January. From the beginning of February, the temperature starts rising and continues to rise in the months of March, April and May. Towards the end of June, the South-west monsoon sets in. Winds travel west to east with light rain and sweep the hilly areas and places at the foot of the ghats. These winds bring rain to the eastern side of the range and the ghat regions experience heavy rainfall. The climate in these places is cool and attractive. By July-August, winds with greater velocity and carrying sand start blowing and cause damage in the red sand soil tracts. With the onset of the north-east monsoon by October-November, the temperature takes a downward trend and the region experiences a fair climate accompanied by showers.

The normal annual rainfall in this district is 814.8 mm. The rainfall is not much and varies from year to year depending on the monsoons. The rainfall in the hilly tracts on the west and southwest is above 1000 mm. This covers the taluk of Shencottah and parts of Tenkasi, Ambasamudram and Nanguneri Taluks.

The district is benefitted by both the monsoons—south-west and north-east. During the year 1978-79, the actual rainfall in the district was 742.6 mm. as against the normal rainfall 814.8 mm. In the south-west monsoon period of June to September 1978, the actual rainfall was 54.3 mm. comparatively much less than the average rainfall of 109.5 mm. for this season. During the north-east monsoon period of October to December 1978, the rainfall recorded was 548.9 mm. which was higher than the normal rainfall of 485.8 mm. for the corresponding period. In the winter period of January and February 1979, however, the actual rainfall figure of 75.1 mm. showed a downward trend against the normal rainfall of 80.4 mm. The rainfall recorded for the hot weather period of March to May 1979 was as low as 64.3 mm. when compared with the corresponding normal rainfall figure of 139.1 mm. It may be seen that excepting the north-east monsoon period, in all other seasons, the actual rainfall for 78-79 was comparatively less than the normal rainfall for the respective seasons.

The rainfall during the years 1977-78 and 1979-80 was 962.8 mm and 1109.8 mm respectively while during the years 1978-79 and 1980-81 was 742.6 mm. and 615.5 mm. only indicating the vagaries of rainfall in the district.

Notable meteorological features during the decade 1971-81 indicate that there was severe drought condition in 1976 due to failure of south-west monsoon and storage in Papanasam and Manimuthar reservoirs was very low and Tambraparni river dried up in June. During November 1977, cyclonic storm and heavy rains lasted for about 4 days causing much damage to cattle, poultry and property.

Forests

The area under Forests and reserved lands during 1980-81 in this district is 138,057 hectares or

12.1 per cent of the total geographical area of 1,142,482 hectares, which is less than the National average of over 20 per cent. The forest areas are mostly in the ghat regions in the west of the district. The ghat regions are under the influence of the south-west monsoon and have thick forests. The forests are of light deciduous growth in the lower slopes and dense masses of short trees from an elevation of 1000' to 3000'. Above 3000', ever green forest with very tall trees are found. Teak wood, black wood, rosewood etc. are the most important among them. The important forest products of Tirunelveli division are honey, wax, mango, cashew, palmyrah, cane, pepper, tamarind, bamboo etc.

During 1978-79 about 14,438 hectares were deforested. About 48,000 animals grazed in the forest areas of this district during the same period. There are two wild life sanctuaries in this district located at Mundanthurai and Kalakad. Both the sanctuaries have among other species 150 elephants and 10 tigers as wild life.

Land and Land use

The district has got fertile soils in scattered areas only. Less fertile red soil variety is however found in most of the regions. With a fairly good net work of irrigation system making full use of the water resources, this natural deficiency in soil has been overcome to a large extent. In the north and north-eastern parts, black soil which is very much suited for growing cotton is found (i.e.) in parts of Sankarankoil, Kovilpatti, Vilattikulam and Srivaikuntam taluks. In the coastal areas of Tiruchchendur and Nanguneri sandy soil is found.

The land utilised under various purposes of this district during 1980-81 is as follows:—

Category	In hectares	%
Geographical area	1,142,482	100.00
Forests	138,057	12.1
Barren and uncultivable land	32,346	2.8
Non-Agricultural use	162,509	14.2
Cultivable waste	59,134	5.2
Permanent pastures and other grazing	21,758	1.9

Misc. trees	18,147	1.6
Current fallows	171,614	15.0
Other fallow land	105,291	9.2
Net area sown	433,626	38.0

Net area sown is 38.0 per cent which indicates the predominance of agriculture in the district. Area under forests as already referred to in a preceding paragraph is 12.1 per cent only. The area under cultivable waste is 5.2 per cent which can be reclaimed for cultivation. Barren and uncultivable land is 2.8 per cent of the total area which indicates that the available land in the district is being fully utilised for productive purposes.

Agriculture

Paddy is cultivated mainly in Sankarankoil, Srivaikuntam, Tirunelveli, Tenkasi, Shencottah, Ambasamudram, Nanguneri, Sattankulam and Tiruchchendur taluks. Cumbu, Cholan and Kudiraivali are being cultivated in the dry tracts of this districts namely Sivagiri Sub-Taluk, part of Sankarankoil, Kovilpatti, Vilattikulam, Ottappidaram and Tuticorin taluks.

Cotton is being cultivated mainly in Kovilpatti, Sankarankoil and Srivaikuntam Taluks. Ground nut cultivation is mainly followed in Kovilpatti and Tiruchchendur taluks. The ground nut cakes of Kovilpatti is famous.

Among the sugar producing trees, palmyrah takes the first place and then sugarcane. Palmyrah is grown mostly in Tiruchchendur, Srivaikuntam and Nanguneri taluks. Banana and vegetables are cultivated in river belt areas of Ambasamudram, Tenkasi, Tirunelveli, Srivaikuntam and Tiruchchendur taluks.

Animal Husbandry

The following veterinary institutions are available in the district during 1981:—

1. Clinic centres	...	2
2. Veterinary hospitals	...	6
3. Veterinary dispensaries	...	48
4. Veterinary dispensary cumkey village centre	...	1
5. Clinical laboratories	...	3
6. Animal disease Intelligence unit	...	153

six bull stations are engaged in supplying semen to the veterinary institutions and sub-centres. Two units are engaged in the eradication of Rinderpest diseases.

One district livestock farm is located at Abishekapatti where the breeds of Gir, Jersey and Murrah species are maintained for cross breed purposes. This farm is equipped with a number of other units looking after fodder seed production, sheep and piggery development and poultry extension. In addition, 2 Poultry Extension Centres are located one each at Kovilpatti and Kondanagaram. An Intensive Cattle Development Project with 2 artificial Insemination Centres each covering 50 and 80 sub centres are functioning in this district.

Under the Special Animal Husbandry Project, a sheep production programme is implemented. 129 Sheep breeding co-operative societies have been covered under this project besides 8 societies functioning under the Agricultural Refinance Development Corporation. A mass deworming programme for augmenting mutton production is being implemented. Besides, a liquid Nitrogen plant and freezing centre is being set up at Abishekapatti in the District livestock farm.

Fisheries

Marine fishing pearl chank fishing are famous in this district from time immemorial. Tuticorin is the main centre for the deep sea fishing in the district which has a lengthy coastline of about 140 km. Prawn is an export variety of fish which is largely available in these coastal areas. These varieties are found mostly in the deep sea where the water is less salty.

The State Govt. have two fishing divisions in this district to develop fisheries with headquarters at Tirunelveli and Tuticorin. There are 20 and 16 co-operative societies with 3,554 and 6,017 registered members in the said two fishing divisions respectively. The members have been provided with 2,134 and 1,718 non-mechanical boats. In Tuticorin division alone the societies are supplied with 280 mechanical boats. Out of this, 200 mechanical boats are working in Tuticorin itself. The other centres engaging mechanical boats are Vembar, Tharuvaikulam and Veerapandianpattinam. About

11,000 persons are engaged directly in fishing and allied activities. The dependants number a little more than twenty six thousand. Catamaran which is the common fishing equipment is used by 6,241 while the mechanical boats are engaged by 342 persons. The common fishing gears are Eralvalai and Thirukkaivalai in this district. Out of the total persons engaged in fishing and allied activities about 23% are engaged in fishing.

The industries prevalent in the district may be classified under (i) household industries (ii) small scale and (iii) medium and large scale industries. The following paragraphs will depict a broad picture of these industries.

Beedi rolling, safety-matches making, mat weaving and processing and manufacture of palm fibre and articles from palm trees and handloom weaving of textiles are the main household industries. Workers in household industries are concentrated mostly in Kovilpatti, Tenkasi, Ambasamudram and Tirunelveli taluks. Safety matches are manufactured mainly in Kovilpatti, Sankarankoil and Sivagiri taluks. Handloom weaving is prominent in Ambasamudram and Tenkasi taluk. Beedi rolling and mat weaving are chiefly found in Tenkasi, Ambasamudram and Tirunelveli taluks. Manufacture of articles from palm trees is mainly found in Nanguneri, Tiruchchendur, Srivaikuntam and Sattankulam taluks where large areas are covered by Palmyrah trees.

There are about 2,300 small scale industries registered at the end of 1980. Annual value of production of these industries amounts to more than Rs. 124 crores. Of all the 18 major groups, units manufacturing chemical products alone account for nearly one third. Next comes the manufacture of food products. Under food products salt industry form about one third of the total number of registered units under food products. The sources show that there are about 29,000 persons engaged in the small scale industry.

The chief items produced by large scale industries in the district are cement, cotton yarn/textiles, chemicals and chemical products.

M/s. India Cements Limited are having two plants, one in Sankarnagar and another in Thalayuthu for producing cement. The production of

"Portland Cement" in 1979 was more than 13 lakhs of tons.

There are more than 20 textile mills situated in this district for the production of yarn. The first spinning mill under the co-operative moment was established in this district during 1958 at Pettai near Tirunelveli. Most of them are situated in Ambasamudram, Tirunelveli, Tuticorin and Nanguneri taluks.

M/s. Dharangadhara Chemical Works Limited situated in Sahupuram of Tiruchchendur taluk manufacture hydrochloric acid, hexachloroethane, caustic soda, ammonium bicarbonate, trichlorethylene, perchlorethylene, beneficiated ilmenite, steel drums, liquid chlorine/calcium carbide and tetrachloroethylene. M/s. Tuticorin Alkali Chemicals Limited, Mullakadu manufacture soda ash and ammonium chloride. Industrial chemicals, Sankarnagar manufacture tin containers, calcium carbide and Vinyl acetate monomer. M/s. Kothari Fertiliser and Chemicals Limited, Tuticorin manufacture ammonia, Sulphuric acid, phosphoric acid and ammonium phosphate, P.V.C. Potassium Chlorate, paints and varnishes. Fire works are also manufactured by some industrial units in this district.

Tamil Nadu Sugar Corporation Limited has established a factory at Tirunelveli which has a capacity to crush 1,250 tonnes of cane a day.

M/s. Sun Paper Mills Limited of Ariyanayagipuram manufacture paper, paper pulp, printing and writing paper, news print quality paper and craft paper. M/s. Dalmia Ceramic industries of Dalmiapuram have a branch at Tirunelveli for manufacturing fire bricks. Kovilpatti Lakshmi Roller Flour Mills (P) Limited, Kovilpatti produces rice flour. There are over 100 major rice mills for production of rice from paddy. In addition to this, there are some industries which manufacture automobile parts and the parts for textile industries.

Trade and Commerce

Even before independence the people of this district were very much interested in trade and commerce. The starting of a swadeshi steam ship company by the late. Shri V.O. Chidambaram Pillai would show their anxiety in maritime trade.

History says that pearls and chanks available in coastal parts were sent abroad from Tuticorin. Chillies, ground nut, cotton and safety matches from the northern parts of the district and fruits, beedi, mats, handloom clothes, toys and yarn from central areas are transported to other parts of the State for sale. While the eastern coastal belt especially Tuticorin area provides a good market for the export of salt and fish. Cattle are exported to Kerala from the western regions of the district. Tuticorin, Tirunelveli, Sankarankoil and Kovilpatti are the main business centres of the district. Fire mats of Pathamadai, toys of Ambasamudram and palm leaf products of the coastal parts of this district are fine hand works of the people liked by the foreigners are also items much in demand from this district. Safety matches of Kovilpatti and neighbouring areas are also exported to northern states. The palm jaggery, palm leaf products, some varieties of mat, fish and lungies are also exported to foreign countries. Cement produced at the India Cements Company is sent to other districts of the State. Bank of Tamil Nadu (Tirunelveli) and Tamil Nadu Mercantile Bank (Tuticorin) which originated in this district are leading Banks to serve trade and commerce. In addition, some co-operative Banks are also helping to improve the trade. M/s. Pandian Grama Bank a unit of Indian Overseas Bank with 52 branches has taken much effort to improve the district's trade and commerce. There are 26 commercial banks with a net work of 271 branches in the district. More than a dozen chambers of commerce and merchant associations are functioning in this district which co-ordinate the activities of merchants and manufacturers.

Transport and Communication

The district has adequate communication facilities by road, rail and sea. The road transport is mainly operated by the state owned Kattabomman Transport Corporation. The statistics of the Regional Transport Authority reveal that during 1980, 356 and 168 routes were being operated by Private Transporters and Kattabomman Transport Corporation respectively. These figures include the city/town bus routes also. The total length of roads in the district is 8,611 kms. of which 2,805 kms. are unsurfaced.

Out of the 14, 12 taluks in this district are linked by rail. Of the 67 railway stations in this district three namely Tirunelveli, Tenkasi and Maniyachi are junctions. The district is fed by the following rail routes:—

- i) Tirunelveli — Nagercoil/Kanniyakumari
- ii) Madras — Tuticorin/Tirunelveli
- iii) Tirunelveli — Shencottah
- iv) Virudhunagar — Quilon
- v) Tirunelveli — Tiruchchendur

Tirunelveli — Nagercoil — Kanniyakumari is the new broadgauge line operating from January '81. Other four lines are in metregauge. In addition to passenger services, the goods trains are also under operation.

The transport facilities provided by the Tuticorin seaport have already been described in a preceding paragraph.

Tirunelveli, Tuticorin and Kovilpatti are the postal divisions functioning in the district. The subjoined statement shows the various postal and telegraphic facilities available:—

i) Post Offices with telegraph facilities	...	239
ii) Higher selection grade head post offices...	...	9
iii) Higher selection grade sub-office	...	1
iv) Lower selection grade sub-offices	...	41
v) Timescale sub-offices	...	199
vi) Extra departmental sub-offices	...	146
vii) Extra departmental branch offices		
i) stationery offices	...	379
ii) mobile offices	...	209

Total		1,223

STD call facilities are available from almost all the urban areas to other parts of the country.

Electricity

In this district both Hydro and Thermal power stations are functioning. The hydro systems are 1. Papanasam, 2. Kodayar I & II, 3. Servalar and others. Thermal Power Station was commissioned in this district at Tuticorin from July 1979.

More than 47,000 villages/hamlets and 1,300 Harijan colonies have been electrified. About 55,000 power connections were given to agricultural pump sets. Papanasam hydro project is the old one in this district. There are 105 High Tension and 348,386 Low Tension connections which consumed 506,943 K.W. in March 80, out of which nearly 50% was consumed by the Industrial units. More than 5,000 huts were electrified in this district.

Education

In this district more than 50% of the population are educated and the literacy rate is more than the state average.

The following statement shows that the total number of schools, colleges, number of pupils and teaching staff from kinder garden to college level during 1980.

Nature of institution	No. of institutions	No. of pupils	No. of teaching staff
1. Kinder garden school	2	84	2
2. Primary school	2,431	357,257	9,872
3. Middle school	675	284,666	7,932
4. High School	122	31,531	1,682
5. Higher secondary school	134	109,644	4,748
6. Training school	9	269	37
7. Arts college	21	13,371	1,097
8. Training college	4	430	25

Three polytechnics, one Engineering college and one Medical college are functioning in this district.

In addition to the scholarships sanctioned to the Scheduled Caste and Backward community students, the Central and the State Govt. are sanctioning scholarships for educational pursuits on merit basis. For students from rural areas, scholarships are given for meritorious students to study in high schools based on their performance in VIII standard. During 1981-82, 371 pupils were benefited which involved a sum of Rs. 2.25 lakhs.

For college education, both Central and State Govt. are sanctioning scholarships and loans—Merit scholarship scheme.

Important temples of this district are :

1. Tirunelveli ... Sri Nellayappar and Gandhimathy temple
2. Tiruchchendur ... Sri Subramaniaswamy temple
3. Kuttalam ... Sri Kutralanathaswamy temple
4. Panpozhi ... Sri Thirumalaikumaraswamy temple
5. Sankarankoil ... Sri Sankaranarayana-swamy temple
6. Kazhugumalai ... Sri Subramaniaswamy temple
7. Tenkasi ... Sri Kasiviswanathaswamy temple
8. Veerakeralam-pudur } ... Sri Navaneethakrishnan temple

Tiruchchendur is said to be one of the six sacred abodes of Lord Muruga. The annual income of this temple is more than 50 lakhs.

Sri Nellayappar and Gandhimathy temple of Tirunelveli is one of the biggest and famous temples in the State. The name of the district is said to be called after the name of the presiding deity of this temple.

The remaining six temples are also famous and the annual income of these temples is more than a lakh. There are nine Vaishnavite temples in and around Srivaikuntam town situated within a radius of about 30kms. These temples are called "Navathiruppathi". Worshipping the deity of these nine temples on the day of Vaikunta Ekadasi day (December—January) is considered as a sacred one.

There are many ancient mounments and places of importance in the district. Among them the temple in Krishnapuram is famous for its sculptures.

Kuttalam is the main place of tourist importance of this district. Water falls in Kuttalam is a famous health resort. The water falls from a height of 91 metres. The season for the falls are from June to September every year, where there will be drizzles and a bath at the falls is said to be very good for the body.

During 1980-81 about a sum of Rs. 6½ lakhs has been sanctioned by the Central and State Govts. for the talented students under the following schemes. They are :

Type of scholarship	No. of students	Amount
1. National scholarship scheme	214	202,335
2. Teacher's children's scholarship scheme	14	8,225
3. National loan scheme	407	410,435
4. State scholarship	52	9,540
5. State adhoc merit scheme	80	14,100

Public Health

The district headquarters hospital is put up at Tuticorin, as a medical college hospital is situated in Tirunelveli. 22 hospitals, 7 voluntary organisations, 66 dispensaries and 31 primary health centres are the main medical institutions having bed facilities.

Miscellaneous facilities

Tirunelveli is having an All India Radio broadcasting station. There are 60 permanent, 8 semi-permanent and 29 touring cinemas which are permitted to exhibit movies upto end of December 81. The people of this district likes music and other musical instruments very much. Next to Thanjavur, this district is having many number of artists. The Nellai Sangeetha Sabha is one of the oldest Sabhas for promoting fine arts in this district. There are many libraries run by local bodies and private institutions. The people of this district are very much interested in improving the Tamil Literature and have formed associations for this purpose.

Temples and places of tourist importance

2,400 temples are listed by the Hindu Religious and Charitable Endowments (A) Department, of which about 1,500 are assessed by the department. More than 50% of these temples are located in the taluks of Tirunelveli, Ambasamudram and Tenkasi. Out of the total of 2,400 temples, village deities account for 1,300; Vinayakar 500 and the rest by Murugan, Siva, Vishnu and others.

The places of tourist importance are :

1. Tirunelveli ... Sri Ganthimathy and Nellai-yappar temple history and sculptures
2. Krishnapuram ... Vishnu temple history and sculptures
3. Tiruchchendur ... Murugan temple and sea-shore
4. Panchalanku-richchi ... { Memorial of the freedom fighters and
5. Ettaiyapuram ... { Manimandapam for the
6. Ottapidaram ... { National poet Subramania Bharathi
7. Mundanthurai ... Tiger sanctuary
8. Kalakad ... Wild life sanctuary
9. Kalugumalai ... Jain cave temple
10. Tuticorin ... Port, industries, salt fields

"Kodai vizha" popularly known as "Kodal" is the famous festival of this district. The festival is intended for the propitiation of village deities. It usually commences from the month of "Thai" i.e. after the 15th January and is celebrated, throughout the district. There is no particular day for this festival.

'Car' festival of the Tirunelveli Nellayappar-Ganthimathy temple, Sankarankoil 'Adi Thabasu' festival, Tiruchchendur 'Visakam' and Skanda Shasthi-Surasamhara' festivals attract large number of people.

Sankarankoil cattle shandy is unique feature of this district.

Brief analysis of the village and town directory data based on inset tables

A brief analysis relating to certain population characteristics is made utilising the information collected in the Village and Town Directory. A number of tables have been designed for this purpose. The tables are generated at the district and taluk level for the rural areas and in regard to urban areas, townwise particulars are presented.

by 100.00%, education by 93.01%, power supply 98.70%, pucca road by 71.76%, communication by 58.55%, post and telegraph by 53.89% medical by 25.39% and market/hat by 3.63% of the villages. The inhabited villages which are located in the distance range of 16-50kms from the nearest town in the district number about 356 and all these villages avail the drinking water facility viz-100.00%, power supply is availed by 98.88% of the village, education by 97.47%, pucca road amenity by 62.08%, communication by 51.12%, post and telegraph 58.99%, medical by 26.69% and market/hat by a poor percentage of 4.21 of the total inhabited villages in this range. All the villages which are located in the distance range of 51+ avail all the amenities by cent percent except the amenity of market/hat which has a percentage of 50.00.

DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION

Population range	Number of inhabited villages in each range	Number (with percentage) of		
		Education	Medical	Drinking Water
(1)	(2)	(3)	(4)	(5)
-499	116	78 (67.24)	3 (2.59)	116 (100.00)
500-1999	421	407 (96.67)	48 (11.40)	421 (100.00)
2000-4999	297	296 (99.66)	118 (39.73)	297 (100.00)
5000+	113	113 (100.00)	92 (81.42)	113 (100.00)
Total	947	894 (94.40)	261 (27.56)	947 (100.00)

This table shows the distribution of inhabited villages according to different population ranges and amenities available. Among the four categories of population ranges, 116 inhabited villages come under the population range of -499 and to these villages, the amenity of drinking water is available to 100.00%. 109 villages in this range avail the amenity of power supply, 78 avail the amenity of education, 47 villages possess the pucca road facility and communication by 30 villages. Only 3 villages in this range avail the important amenity of medical. In the population range of 500-1999, there are about 421 inhabited villages and all the villages avail the amenity of drinking water to cent percent. Among the other amenities availed by the villages are education by 407 villages, drinking water by all 421 villages, power supply by 419 villages, pucca road facility by 256 villages, communication by 204 villages, post and Telegraph by 190 and medical by 48 villages. The amenity of market/hat is availed by only 7 villages in this range. 297 inhabited villages

RANGE AND AMENITIES AVAILABLE.

villages having the amenity of				
Post and Telegraph	Market Hat	Communi-cation	Approach by Pucca Road	Power Supply
(6)	(7)	(8)	(9)	(10)

546 (57.66)	41 (4.33)	547 (57.76)	661 (69.80)	937 (98.94)

occur in the population range of 2000-4999 and all these villages are provided with the amenity of drinking water. The amenities of education and power supply are availed by 296 villages or 99.66% of the villages in this range. The other amenities of approach by pucca road, communication, post and telegraph and medical are availed by 249, 207, 240 and 118 villages respectively. Only market/hat facilities are enjoyed by 15 villages out of the total 297.

In the population range of 5000+, there are 113 villages and all these villages avail the amenities of education, drinking water and power supply to cent percent. 109 villages avail the facility or pucca road and both the amenities of post and telegraph and communication are availed by 106 inhabited villages. The important amenity of medical is availed by 92 villages whereas market/hat facilities are available to only 19 villages in this range.

TABLE 6

MAIN STAPLE FOOD IN THE MAJORITY OF VILLAGES AND TALUK.

Sl. No.	Name of Taluk	Main staple food
(1)	(2)	(3)
1	Sivagiri	Rice & Cholam
2	Sankarankovil	Rice & Millets
3	Kovilpatti	Rice & Millets
4	Vilattikulam	Rice & Cumbu
5	Ottappidaram	Rice & Cumbu
6	Tuticorin	Rice & Cumbu
7	Srivaikuntam	Rice
8	Tirunelveli	Rice & Millets
9	Tenkasi	Rice & Cholam
10	Shencottah	Rice
11	Ambasamudram	Rice & Millets
12	Nanguneri	Rice
13	Sattankulam	Rice
14	Tiruchendur	Rice

This table furnishes the main staple food in terms of grains consumed by the majority of the population of the villages in each taluk. In all the 14 taluks of the district, rice is being used as the main staple food. In some taluks, Millets or other grains like cholam or cumbu are being consumed along with rice.

TABLE 7

DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE

Sl. No.	Name of Taluk	Number of inhabited Villages	Total area	Percentage of Cultivable area to total area	Percentage of irrigated area to total cultivable area
(1)	(2)	(3)	(4)	(5)	(6)
1	Sivagiri	21	49,575.89	44.88	61.58
2	Sankarankovil	95	107,803.05	84.73	24.66
3	Kovilpatti	98	92,252.61	83.76	6.13
4	Vilattikulam	112	109,141.71	87.78	2.15
5	Ottappidaram	62	73,252.10	74.51	8.31
6	Tuticorin	23	22,089.79	83.68	12.34
7	Srivaikuntam	63	53,771.80	79.94	29.17
8	Tirunelveli	112	75,837.99	64.56	34.05
9	Tenkasi	78	78,633.66	79.41	41.83
10	Shencottah	12	16,293.77	62.63	35.28
11	Ambasamudram	88	96,253.13	32.77	55.20
12	Nanguneri	112	186,608.78	45.57	31.90
13	Sattankulam	23	33,742.97	71.69	19.51
14	Tiruchendur	48	33,444.56	63.61	35.70
Total		947	1,028,701.81	66.72	24.13

This table gives the distribution of inhabited village is according to land use. The total area of the 947 inhabited villages in the district is 1,028,701.81 hectares, of which the percentage of the cultivable area to the total area works out to 66.72. The percentage of the irrigated area to the total cultivable area works out to 24.13. Vilattikulam, Sankarankovil, Kovilpatti and Tuticorin taluks possess the maximum cultivable area to the total area in the district viz. 87.78%, 84.73%, 83.76% and 83.68% respectively. Ambasamudram, Sivagiri and Nanguneri taluks have recorded the lowest percentage of 32.77%, 44.88% and 45.57% cultivable area to the total area respectively in the district; the highest being 87.78% in Vilattikulam taluk. While Sivagiri and Ambasamudram taluks have got the highest percentage of 61.58 and 55.20 of irrigated area to total cultivable area in the district, Vilattikulam, Kovilpatti, Ottappidaram and Tuticorin taluks have recorded the lowest percentage of 2.15, 6.13, 8.31 and 12.34 respectively.

GROWTH, DENSITY AND SEX-RATIO OF URBAN POPULATION

TIRUNELVELI DISTRICT						
Census year	Total Population	Urban population	Percentage of Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex ratio (number of females per 1,000 males)
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1951	2,505,003	806,650	32.20	...	...	1,049
1961	2,730,279	847,882	31.05	+5.11	1,125	1,041
1971	3,200,515	1,029,496	32.17	+21.42	1,356	1,023
1981	3,573,751	1,237,799	34.64	+20.23	1,738	1,016

Table 8 gives the details of growth, density and sex ratio of urban population in Tirunelveli district for the decades 1951 to 1981. Figures for the State as a whole have also been shown in the table with a view to have a comparative picture about these demographic aspects. The percentage of urban population to total

IN THE DISTRICT IN RELATION TO THE STATE

TAMIL NADU					
Total population	Urban population	Percentage of Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex ratio (number of females per 1,000 males).
(8)	(9)	(10)	(11)	(12)	(13)
30,119,047	7,333,525	24.35	...	...	986
33,686,953	8,990,528	26.69	+22.59	1,722	963
41,199,168	12,464,834	30.26	+38.64	2,115	951
48,408,077	15,951,875	32.95	+27.98	2,722	956

population in this district has gone up from 32.20 in 1951 to 34.64 in 1981. The density of urban areas of this district which was 1,125 persons per sq. km. in 1961 has increased to 1,356 persons per sq. km. in 1971 and 1,738 persons per sq. km. in 1981.

TABLE 9

NEW TOWNS/TOWNS DECLASSIFIED IN 1981 CENSUS

Name of the towns	Population 1981 Census
(1)	(2)
(a) Added	
i. Sivanthipuram	9,616
(b) Declassified	
i. Manimuthar	13,144

Table 9 reveals that one town has been recognised as new town in Tirunelveli district during 1981, while Manimuthar listed as a town in 1971 has since been declassified as rural from the list of Census towns of 1981 Census because this town ceased to satisfy the urban criteria.
