Statement—VI	.. Trade, Commerce, Industry and Banking, 1979.	.. 306-31
Appendix	.. Towns showing their out growths with population.	..

Responsibility for the correctness of internal details shown in the maps rests with the Publisher.

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census, the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables, and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states, it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series, some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village, the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect, particularly in relation to amenities and land-use pattern, is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition

of two more appendices, listing the villages where no amenities are available and according to the proportion of Scheduled Caste and Scheduled Tribe population to the total population, has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Caste and Scheduled Tribe population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the Primary Census Abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series, it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA up to Taluk/Town level. At the beginning of the DCH, a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and taluk level maps, depicting the boundaries and other important features, have been inserted at appropriate places to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri A. P. Muthuswami, I.A.S., the Director of Census Operations, Tamil Nadu on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this Publication was carried out by Shri N.G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

NEW DELHI,
26th April, 1982.

P. PADMANABHA,
Registrar General, India.

PREFACE.

It has been the tradition of the Government of Tamil Nadu to publish immediately after each census, a District Census Handbook separately for each district containing the census statistics, besides other valuable data of local importance for the use of the State Government, district administration, research scholars and other data users. The first series of District Census Handbooks were brought out immediately after the 1951 Census, and the present publication after the 1981 Census is the fourth in the series.

The Census statistics presented in this publication were collected during the census operations in February—March, 1981, as at the sun rise of the 1st March, 1981. The other statistics in this publication have been collected from various departments of the State and Central Governments.

This publication consists of the following two parts.—

Part-A : Village and Town Directory and

Part-B : Village and Townwise Primary Census Abstract.

Taking into account the increasing and varied developmental and other welfare measures undertaken by the Government, the scope and content of the data in this publication have been considerably enlarged and improved to meet the requirements of the planners and the other data users. In particular, certain inset tables based on census and other data have been included in this publication with brief analytical notes thereon.

This publication contains a brief history of the district highlighting the major characteristics of the district in relation to the economic resources like forestry, minerals, etc., besides the social, cultural, religious and historical aspects. The district and taluk maps in this publication give the administrative units upto village level, the rural and urban units, the location of towns and cities, communication facilities and other related details.

The facilities and amenities available in respect of education, medical, drinking water, post and telegraph, markets, communication, etc., in each village and town have been included in this publication and an important feature is that wherever the above facilities and amenities are not available in any particular village/town, the nearest place where they are available has also been reported.

Another interesting feature in this publication is that villages with none of these amenities have been listed out separately for the pointed attention of the planners and administrators.

Certain tables present data exclusively in respect of the weaker sections of the society belonging to the Scheduled Castes and Scheduled Tribes.

The land use pattern in respect of rural and urban areas have also been reported in this publication which would meet the requirement of micro level planning for rural and urban areas.

The data in respect of urban areas, apart from the medical and other facilities available, relate to the growth of towns, the availability of protected water supply and what is important, the civic amenities available in the slums of the urban areas.

Part B of this volume consists of the District and Village/Town wise Primary Census Abstract followed by Primary Census Abstract of Scheduled Castes and Scheduled Tribes.

The district Primary Census Abstract gives for each territorial unit upto taluk level in the case of rural areas and upto town level for urban areas, occupied residential houses, households, the total population, the Scheduled Caste and Scheduled Tribe population, workers, etc., thereby indicating the basic socio-economic characteristics of the population for the territorial units. The village and townwise Primary Census Abstract gives similar information for villages and wards of towns. Besides, there is an appendix which furnishes at urban block level, the total population and Scheduled Caste and Scheduled Tribe population.

I am grateful to the Collectors and other District Officers and Departments of the State Government who have extended their unfailing co-operation and help in collecting the voluminous and useful data, other than Census, for their presentation at one place in this publication for the ready reference of the data users.

In bringing out this publication, I have received assistance from Shri T. V. Srinivasan, Joint Director of Census Operations, Sarvashri M. Thangaraju and M. Nagappan, Deputy Directors of Census Operations and Shri C.T. Rajan, Investigator, besides a large number of staff members of this Directorate.

In formulating the scope and content of the data in this publication and designing the formats for presentation of the data, I have received valuable guidance from Shri P. Padmanabha, Registrar General, India. The encouragement I have received from him at every stage of the work has contributed in a great measure to the successful publication of this District Census Handbook.

I hope the data in this volume would be found useful, and the publication well received by the administrators, academicians and other data users.

MADRAS,
March, 1983.

A. P. MUTHUSWAMI,
Director of Census Operations,
Tamil Nadu.

ACKNOWLEDGEMENT

I have pleasure in acknowledging the able assistance given by the following Officials of my office in the preparation of this volume.

Village Directory :

Shri T. S. Rajaram, Investigator
Smt. N. Muniammal, Statistical Assistant
Shri R. Balasubramanian, Statistical Assistant
Shri S. Thirunavukkarasu, Statistical Assistant
Smt. S. Shawnta, Computer

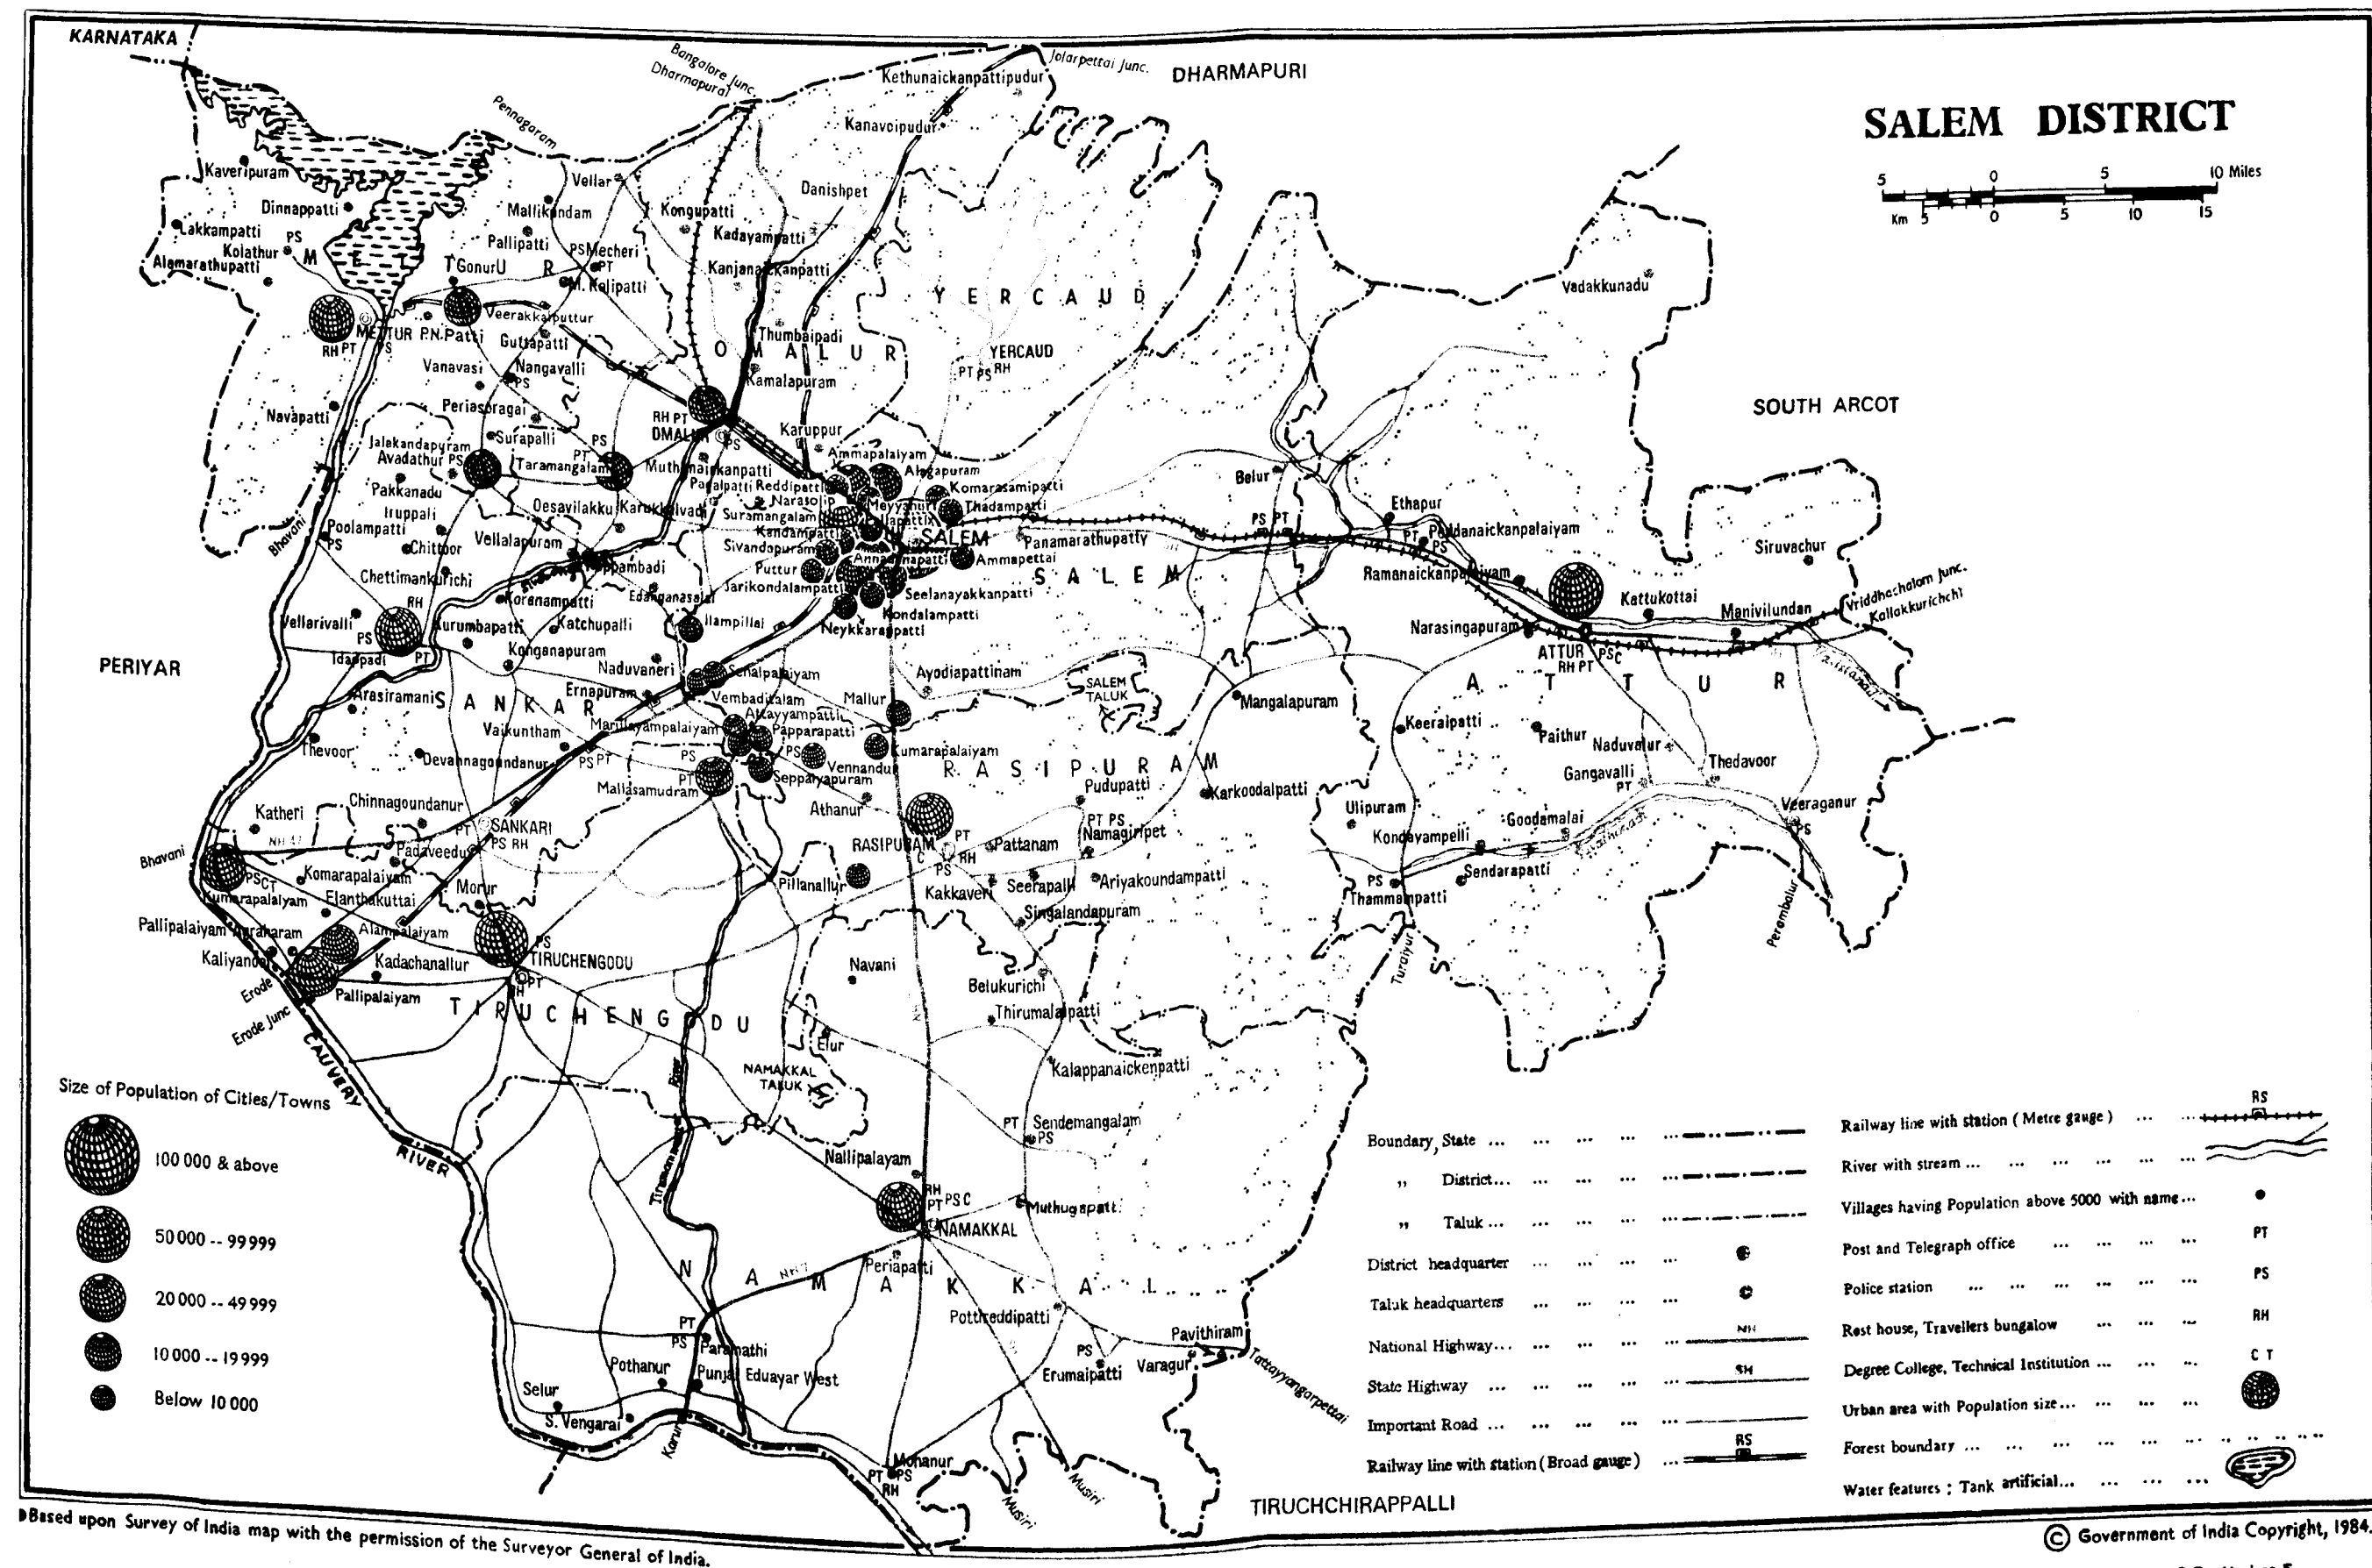

Town Directory :

Shri S. Packiaraj, Investigator
Smt. A. M. Mangayarkarasi, Tabulation Officer
Smt. Alice Sugirtharani, Statistical Assistant
Shri S. Natarajan, Computer
Shri M. Elumalai, Upper Division Clerk

Maps :

Shri Jogesh Dass, Senior Geographer
Shri A. Rajamani, Senior Artist
Shri N. Chandran, Artist
Shri M. Kothandaraman, Hand Press Machine Operator.

A. P. MUTHUSWAMI,
Director of Census Operations,
Tamil Nadu.

ANALYTICAL NOTE.

(i) *Census concepts — Rural and Urban areas.*—Census figures are generally presented separately for rural and urban areas. In the 1981 Census, the definition of an urban unit is more or less the same as in the 1961 and 1971 Censuses but for some minor variations. The urban areas of 1981 Census are :

(a) All places with a Municipality, Corporation or Cantonment Board or notified town areas.

(b) All other places which satisfied the following criteria ;

(i) A minimum population of 5,000

(ii) At least 75 per cent of the male working population engaged in non-agricultural (and allied) activity.

(iii) A population of at least 400 per km² (or one thousand per square mile).

The above definition of urban area varies slightly from that of 1961 and 1971 Censuses in that the males working in activities such as fishing, logging, etc., were treated as engaged in non-agricultural activity and therefore contributed to the 75 per cent criterion in the 1961 and 1971 Censuses where as in the 1981 Census, these activities are treated as on par with cultivation and agricultural labour for the purpose of this criterion. The rest of the areas not treated as urban are classified as rural areas.

Urban Agglomeration.—Urban Agglomeration is a new concept formed during 1971 Census and this replaces the concept of town group adopted in 1961 Census. An Urban Agglomeration may be explained as follows, “ It must form a continuous urban spread constituting a town and its adjoining urban outgrowth or two or more physically contiguous towns together with continuous well recognised urban outgrowth, if any, of such towns ”.

Census House.—A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Household.—A household is a group of persons, who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented any of them from doing so.

Scheduled Castes/Scheduled Tribes.—For the enumeration of Scheduled Castes and Scheduled Tribes in Census, the names of Scheduled Castes and Scheduled Tribes as recognised in Tamil Nadu based on the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act of 1976 (Central Act 108 of 1976) were followed. The enumerators were instructed to record a person as a Scheduled Caste/Scheduled Tribe provided the name given by the person was found in the list supplied to them.

Literates.—In 1981 Census, a literate was defined as “ a person who can both read and write with understanding in any language ”. A person who could merely read but cannot write, was not a literate. It was not necessary that a person considered a literate must have received any formal education or have passed any minimum educational standard.

Work.—Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

Main workers and Marginal workers.—A worker was identified with reference to a reference period preceding the census. The reference period prescribed was one year preceding the date of enumeration. Certain types of work such as agriculture, household industries like, gur making, etc., were carried on, either throughout the year or only during certain seasons or part of the year, depending on local circumstances. In such cases, what we were concerned with, was the broad time span of the agricultural seasons preceding the enumeration. Workers can be full-time workers or seasonal workers or marginal workers. If a person has done any work during the reference period and if he had worked for the major part of the year, i.e., if he had worked for 183 days or more, he was considered to be full-time worker (main worker). If a person had done any work during the reference period and if he has not worked for the major part of the year, i.e., if he had worked for less than 183 days, he was considered to be a marginal worker.

The main activity of workers has been classified into four categories, viz., cultivator, agricultural labourer, household industry and other work.

Cultivator.—For purposes of Census, a cultivator is a person who is engaged either as an employer, single worker or family worker in cultivation of land owned, or held from Government, private persons or institutions, for payment in money, kind or share. Cultivation includes supervision and direction of cultivation.

Agricultural labourer.—A person who works in another person's land for wages in money, kind or share should be regarded as an agricultural labourer. He or she has no risk in the cultivation but merely works in another person's land for wages and has no right of lease or contract on land on which he or she works.

Household Industry.—For a person who returns his/her main activity as engaged in some production, processing, servicing or repair of articles or goods, it has been ascertained whether it is a household industry.

Household Industry is defined as an industry conducted by the head of the household and/or by the members of the household at home or within the village in rural area, and within the precincts of the house in urban areas. A larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would, or has to, be registered under the Indian Factories Act.

Non-workers.—All persons who have not been treated as workers, i.e., persons who have not worked any time at all during the reference period of one year preceding the date of enumeration, have been considered as non-workers. These cover all persons who are engaged in unpaid home duties and who do no other work or have not done any work at all during the last one year, full time students and children attending school, all dependent such as infants or children not attending school or a person permanently disabled from work because of illness or old age, persons retired from service or rentiers, beggars, vagrants, convicts in jails or inmates of a penal, mental or charitable institution and all non-workers who may not come under any of the above categories.

(ii) **History of the District Census Handbook.**—After the Census of 1951, the Government of India offered to hand over to the State Government the Census tables and other data prepared during the Census and suggested that they might be published along with any other useful information relating to each district. The State Government accepted the proposal, and the first publication of the District Census Handbook was brought out at the cost of the State Government.

The District Census Handbook of 1951 was found to be very useful and it was therefore decided not only to continue the series for the 1961 Census but also improve definitely on its content so that each district Census Handbook contained certain basic economic data for the smallest administrative unit in the district and be an useful reference book for scholars and other data users.

After the 1971 Census as well the series of District Census Handbooks was continued. The publication of the 1971 Census Handbook was in three Parts, viz. Part-A, Part-B, Part-C. Part-A relating to Village and Town Directory, Part-B relating to Village and Townwise Primary Census Abstract and Part-C comprising District Census Tables, and certain administrative statistical tables.

The tradition of bringing out the Census Handbook has been continued by the State Government during the 1981 Census also. In this series, some individual features besides restructuring the formars of the Village Directory have been adopted bearing in mind the national requirements of data for the socio-economic programmes of the Government. The comparability of data with the 1971 Census data has also been kept in view.

The present Census Handbook will be published in two parts, viz. Part-A Village and Town Directory and Part-B Village and Townwise Primary Census Abstract.

(iii) **Scope of village Directory and Town Directory Statements.**—The District Census Handbooks are the only publications which incorporate the data down to the level of a village and level of a town which are constantly referred to, by the data users.

The Village Directory Statement gives the list of villages by taluk, and for each village, the area, number of households and population, availability of amenities and land use. The information on amenities available in the village includes educational, medical, drinking water, post and telegraph, market, rail/road or other communication facilities and power supply. Land use is shown as area under forests, irrigation, unirrigated land, culturable waste and area not available for cultivation.

Appendix I gives for each taluk the number of villages having various levels and types of educational institutions such as middle school, adult literacy centres, etc., various types of medical institutions, such as dispensaries, primary health centres etc., and the number of such institutions, various types of drinking water sources such as, taps, tubewell, etc., post and telegraph offices, power supply, railway stations, bus stops, etc., and also the number of villages not having such amenities.

Appendix II gives for each non-municipal town (i.e., census towns) the area under forest irrigated and unirrigated land, culturable waste and area not available for cultivation.

Appendix III gives the list of villages where no educational, medical and public health facilities etc., are available.

Appendix IV gives the list of villages with proportion of Scheduled Caste and Scheduled Tribe population to the total population in various ranges of proportion. Part A of the Appendix gives the villages according to the proportion of Scheduled Caste population and Part-B according to proportion of Scheduled Tribe population. Information is presented by the ranges 0-5 per cent, 6-10 per cent, 11-15 per cent, 16-20 per cent, 21-30 per cent and 31 per cent and above for Scheduled Castes and 0-5 per cent, 6-15 per cent, 16-25 per cent, 26-35 per cent, 36-50 per cent and 51 per cent and above for Scheduled Tribes.

The Town Directory gives important and useful information like civic and other amenities available in all the towns in the district, statutorily notified as well as non-municipal and census towns. The details relating to each of the town have been presented in seven statements, viz., statements I to VI and IV-A. In all the statements except IV-A, the towns are arranged in the alphabetical order for the district. The Town Directory do not cover strictly military areas. It may, however, cover cantonment areas but not strictly military areas or military establishments, within the cantonment areas. However, basic statistics of the cantonment as a whole have been provided. In the Town Directory, codes have been given for the data on amenities and civic administration for want of space. The relevant explanations for the codes adopted have been given in the beginning of the Town Directory Statements.

An urban agglomeration includes two or more independent Census towns. The names of the towns/Urban Agglomerations have been arranged in the alphabetical order. The particulars of the individual town which constitutes one of the units of agglomeration have not been furnished separately because the particulars have been furnished, where they occur together under the name of agglomeration. The following remarks have been given against such town in brackets.

“(see the name of the main town of the agglomeration)”

By adoption of this method the reader can get an idea of the particulars of the urban agglomeration in total and also severally.

Statement-I Status and growth History.—This statement provides some basic data based on the Primary Census Abstract. For analysing the Town Directory data at State level and All India level some new columns have been introduced in 1981. The new items are class of town, area, number of households, population and growth rate for each census since 1901, Density and sex ratio at 1961, 1971 and 1981 censuses, are also provided in this statement.

For size class of towns, the following population norms as per 1981 census have been adopted

Population.	Class.
1,00,000 and above ..	I
50,000—99,999 ..	II
20,000—49,999 ..	III
10,000—19,999 ..	IV
5,000—9,999 ..	V
below 5,000 ..	VI

Location Code number of towns.—To distinguish the town from the village, the location code numbers for towns have been given in Roman numerals and these numbers have been assigned in a continuous order for the district as a whole.

Statement II—Physical Aspects and Location of Towns, 1979.—Under physical aspects, annual rainfall and temperature figures are furnished. These particulars were obtained from the Commissioner of Statistics, Madras. If the information is not available for any particular town, the nearest town for which it is available is given. For column (9) the nearest city with population of one lakh and more is furnished according to 1981 census. For the other column figures obtained from the Municipal Commissioners and Panchayat Union Commissioners are given. The ‘Zero’ within brackets in columns 10 and 11 denotes that the town itself is enjoying road transport facilities.

Statement III Municipal Finance 1978-79.—The civic administration status of the town, the receipt through tax, properties and powers, government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services are given in this statement. The sources of receipt and expenditure are furnished in terms of rupees in hundreds.

Statement IV Civic and other amenities, 1979.—The civic and other amenities existing in the towns as in 1979 are given. The data were obtained from the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Column 3—Civic administration status.—It is a new column introduced in this statement to facilitate analysis.

Column 4—Population.—It is also a new column introduced in this statement to measure the amenities in respect of population.

Column 5—Scheduled Caste and Scheduled Tribe population.—It is introduced to know the size of population of the weaker sections of the community in the town.

Electrification.—Electrification particulars were obtained from the Tamil Nadu Electricity Board through the Municipal Commissioners and Panchayat Union Commissioners.

(i) **Domestic connections.**—This refers to the number of services given to houses for domestic purposes like fans, lighting etc.

(ii) **Industrial Connections.**—This refers to the number of services effected to L.T. Industries such as Workshops, flour mills, oil mill, grinding machines, cotton ginning, engineering industries, etc.

(iii) **Commercial Connections.**—This refers to the services given to shops, business houses, public institutions like offices and schools and commercial establishment.

(iv) **Road lighting points.**—This refers to the number of points of street lights which will be maintained by the Board and for which consumption charges will be paid to the Board by respective local bodies. For some town panchayats the number of services effected alone has been furnished under street lights and not the points.

(v) **Other connections.**—This refers to the number of services effected for agricultural purposes, huts, public water supply systems, cottage industries, etc.

Statement IV-A—Civic and other amenities in notified slums, 1979.—This is a new statement on civic and other amenities in notified or recognised slums of class I and II towns. Generally, in cities or towns having slums, the local authority such as municipality or municipal corporation or even the development authority notify recognised slums. Such notification is linked up with the availability of funds from the State Government for slum clearance.

Name of the slum and details of the area, population, length of the paved roads, system of sewerage, numbers of different type of latrines and method of disposal of night soil, etc., are given in this Statement.

Statement V—Medical, Educational, Recreational and Cultural facilities, 1979.—In this statement, medical, educational, recreational and cultural facilities of the towns as in 1979 are furnished. The data for educational and medical facilities were obtained from the Municipal Commissioners and Panchayat Union Commissioners for the concerned towns, and from the Director of Secondary Education, and Director of Public Health respectively.

Column 10—Recognised shorthand typewriting and other vocational training institutions.—The term 'recognised' refers to institutes recognised by some statutory authority like Education Department, Commerce Department, Labour Department, etc., of the Government or by semi Government or autonomous bodies, public sector project, etc.

Cinemas refer only to the permanent cinema theatres and do not include touring cinemas.

Column 16—Number of Working Women's hostel with number of seats.—This is a new column introduced in this statement in 1981. Considering the increasing employment of women in urban areas, the housing need of working women has been an important problem.

Statement VI—Trade, Commerce, Industry and Banking in 1979.—In this statement, trade commerce, industry and banking facilities in the towns as in 1979 are furnished. Banking particulars were obtained from the Reserve Bank of India. The information on number of agricultural and non-agricultural credit societies were collected from the Registrar of Co-operative Societies through the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

(iv) **Scope of Primary Census Abstract.**—The Primary Census Abstract, as it is called presents basic data for each village or segment of a village (in cases where such village segments form different panchayats) in the "Village-wise Primary Census Abstract" and for each Ward/Division of a Town in the "Urban Primary Census Abstract". The format of the Primary Census Abstract for the villages and towns in 1981 has been slightly modified as compared to the 1971 Primary Census Abstract.

The Primary Census Abstract gives such basic information as area in hectares/sq. km., occupied residential houses, number of households, total population, scheduled caste and scheduled Tribe population, literates, main workers, division of main workers into cultivators, agricultural labourers, workers in Household industry and other workers, marginal workers and non-workers in respect of each unit. The urban/Village Primary Census Abstract gives this information for each village and each urban ward. With a view to ensure comparability and to enable data users to derive the figures either for a revenue village or panchayat according to their requirements, the data are presented for segments of villages also. Wherever portions of one village happen to be in two or more panchayats the segment wise data have to be used separately or added with some other segment data so as to derive panchayat data. For example, if portions of a revenue village bearing L.C. No. 10 forms part of two panchayats, the figures are given separately for each portion of the village against L.C. No. 10 a/b and b/b. The total figures for the entire revenue village by adding the figures given against both the segments viz., 10a/b and 10b/b are given in the village Primary Census Abstract. If, instead, the panchayat figures are required, the data for the concerned village segment or segments relating to the panchayats concerned, are to be added up to arrive at the total figures for the respective panchayat.

An appendix presented in the case of the Urban Primary Census Abstract gives 1981 population, scheduled castes and scheduled tribes population for each enumerator block of the town. This is meant for the use of administrative and election authorities in urban areas. Such data are also required by urban planners and researchers for conducting other studies in selected blocks.

Mode of presentation.—The consolidated figures for the district and each taluk are given in the beginning for Total, Rural and Urban areas followed by each town/urban agglomeration under the caption, 'District Primary Census Abstract'. Then follows the Primary Census Abstracts for Scheduled Castes and Scheduled Tribes. An alphabetical list of revenue villages is then given along with the Census Location Code Numbers of 1981 Census followed by the Village-wise Primary Census Abstract. In the foot note given at the end of the Village-wise Primary Census Abstract, the villages included in Municipalities or Census towns are indicated. In an annexe the names of villages and their constituent panchayats are given. Then, follows the Urban Primary Census Abstract. In an appendix to the Urban Primary Census Abstract the population and Scheduled Castes and Scheduled Tribes figures for each Enumerator Block of a town are given. This arrangement is followed for each taluk and independent sub-taluk in the district.

Maps.—Apart from the District Map given as frontispiece, map for each taluk showing the Village Location Code numbers along with their boundaries have also been included at the appropriate places. As compared with the maps presented in 1971 District Census Handbook several improvements have been effected in the maps presented in this volume. All towns are shown in the district and taluk maps with shading screens and also spheres according to the population size of towns.

Area figures.—In the District Primary Census Abstract the area figures are given in Square Kilometres for Total, Rural and Urban areas. In the Village-wise Primary Census Abstract, the area figures for each Location Code Unit are given in hectares upto two decimals. The area figures for each town in square kilometres is also given at the end of the Urban Primary Census Abstract. In the District Primary Census Abstract, the area figures of the District total represent the "Geographical Area" figures supplied by the Surveyor-General. Figures for urban areas are those supplied by the Local Bodies and revenue authorities. The urban area of a district has been arrived by adding the urban area figures of each taluk within the district. Area figures for the rural areas of District/Taluk are derived by subtracting the urban area figures from the total area of the District/Taluk. The total of the area figures of the taluks will not tally with the district figures because the taluk area figures represent the 'Land Use' area and are derived from the figures supplied by the Tamil Nadu Directorate of Survey and Land Records, while those of the district represent "Geographical Area" supplied by the Surveyor-General of India. The total of the village area given in the village-wise Primary Census Abstract may not tally with the rural area of the taluk given in the District Primary Census Abstract as the taluk area figures take into account hills, forests, rivers, etc., where as the village area may not include the same. For conversion, the ratio is 100 hectares=1 square kilometre.

It is hoped that the pattern of presentation of basic Census particulars for each district as explained above and adopted in this volume would be found convenient by data users.

SALEM DISTRICT—AN OUTLINE

Brief history of the district.—The ancient part of Salem district is steeped in complete darkness. Subsequent history was a record of struggle between the Cheras, Cholas and Pandiyas in Kongunadu of which Salem district formed a part. With the decline of the Chola empire in the 12th century, the Hoysalas rose to power and were having control over this area till the 14th century, followed by the Vijayanagar kings till 1565 AD. It was then a spell of princeling ruling this area when the Madurai Nayakas came to power in 1623 AD. Two of the Poligars of Tirumalai Nayak, namely, Ramachandra Nayaka and Gatti Mudaliars ruled the Salem area. The Namakkal fort is reported to have been built by Ramachandra Nayaka while the Gatti Mudaliars are said to have built the Taramangalam temple in Salem district noted for its sculptural excellence.

After about 1635 AD., the area came successively under the rule of Muslim Sultans of Bijapur and Golkonda, Mysore kings and then the Marattas, when about the year 1150 AD., Hyder Ali came to power. During this period, it was a history of power struggle between Hyder Ali and later Tipu, with the British. With the surrender of Tipu to the British in 1792 AD, the whole of Salem district came into the hands of the British Collector hand his head-quarters at Krishnagiri, previously included in Salem district.

The evolution of Salem district in its present form may be appreciated from the following chronological events:—

- 1891 Some areas totalling about 124 square miles were transferred from Salem to North Arcot and South Arcot districts in 1885.
- 1901 There were only the following 9 taluks in the district : Attur, Dharmapuri, Hosur, Krishnagiri, Namakkal, Salem, Tiruchengodu, Tiruppattur and Uttangarai.
- 1911 The number of taluks got reduced to 8, consequent on the transfer of Tiruppattur to North Arcot district and Namakkal to Tiruchirappalli district. Omalur taluk was created from parts of Salem and Tiruchengodu taluks.
- 1921 The number of taluks increased to 10 consequent on the retransfer of Namakkal taluk from Tiruchirappalli district and formation of a new taluk of Rasipuram which was formed from parts of Salem and Attur taluks.
- 1931 The number of taluks increased to 11 consequent on the transfer of an area of about 137 sq. miles from Coimbatore district to Salem district. The transferred area was formed into a separate taluk of Mettur. Consequent on the transfer of Kuppam area from Chittoor district to Salem, the boundaries of Krishnagiri and Hosur taluks got slightly modified.
- 1941 The new taluk of Yercaud was formed from Salem taluk. Slight changes in Krishnagiri and Hosur taluks also took place during the decade 1931-41 Mettur taluk was abolished and portions of it were added to Dharmapuri and Omalur taluks. Some portions of Rasipuram taluk were taken away from it and added to Namakkal taluk.
- 1951 Exchange of a few villages between Mysore and Madras State took place under the Provinces and States (Absorption of Enclaves) Order, 1950.
- 1961 Sankari taluk was formed from Tiruchengodu taluk. Transfer of a few village from Krishnagiri taluk to Andhra Pradesh also took place during the decade.
- 1965 Salem district was bifurcated into Salem and Dharmapuri districts comprising [2 October] the following taluks :
 Salem district : Salem, Attur, Yercaud, Omalur, Sankari, Tiruchengodu, Rasipuram and Namakkal.
 Dharmapuri district : Hosur, Krishnagiri, Harur and Dharmapuri.
- 1966 Mettur taluk was formed out of Omalur taluk, with 49 villages and 2 towns, dividing Salem district into nine taluks.

During the decade 1971-81, the only jurisdictional change in this district was the transfer of Irugalur Pudupalayam village from Tiruchengodu taluk to Sankari taluk.

Salem district lies between 11° and 12° north latitude, and between 77, 46 and 78, 50 east longitude. The district is divided into four revenue divisions and nine taluks as below :—

Revenue Division	Taluk.
Salem	Salem Attur Yercaud
Mettur	Mettur Omalur
Sankari	Sankari Tiruchengodu Rasipuram
Namakkal	Namakkal

This district is divided into 17 Assembly Constituencies of which three are reserved for S. C., and two for S. T. There are three Parliamentary Constituencies of which one is reserved for S. C.

The district comprises 8 Municipalities, one Municipal Township of Mettur, one Panchayat Township at Yercaud, 35 Panchayat Unions, 55 Town Panchayats, 718 Village Panchayats, the total number of Villages in the district being 1076.

Salem district with an area of 8650 sq.km. is extensively covered with hilly ranges and rocks with undulating plains ranging between 152 and 366 metres. The Shervaroy hills covering an area of 256 sq.km. for a length of above 45 km. With a width of about 30 km. occupies the entire Yercaud taluk which is the hills resort of Salem district at a height of about 1523 metres. The Kalrayan range with peaks upto 1493 metres occupies the northern part of Attur taluk. A part of Pachaimalai whose peaks rise upto 1067 meters runs along the southern portion of Attur taluk and the Kollimalai range with peaks upto 1219 metres runs along the east of Namakkal and Rasipuram taluks. Bodamalai is a lofty ridge running east west, 14.4 km. south of Salem, to a length of about 20 km. The sidmalai range lies in the west of Omalur taluk. The Kanjamalai range which is rich in Iron Ore to (be exploited for the Salem Steel Plant) is a rough ridge of about 7 km. in length and about 8km. south west of Salem. Besides the above hilly ranges there are number of hillocks like Perumalmalai, Chemmanbukaradu, Koodamalai, etc.

The important rivers in this district are the Cauveri, the Vasishta Nadhi and the Sweda Nadhi. The Cauveri enters the district and the north-western corner of Omalur taluk into the Mettur reservoir, one of the biggest reservoirs formed between the Palamalai and Siddamalai ranges. Leaving the reservoir at the southern tip, the Cauveri runs along the border between Salem and Coimbatore districts in the southern direction, and between Salem and Tiruchirappalli districts in the eastern direction. Irrigation in Salem district from Mettur reservoir is marginal. The Mettur Hydro Electric Project is the major source of power in this district.

The Vasishta Nadhi and Sweda Nadhi flow across Attur taluk into South Arcot district, draining the country between the Kalrayan hills, and the Pachaimalai and Kollimalai ranges.

The climate of the district varies according to the altitude. The hottest months in the district are March, April and May. The heat declines to some extent on the out break of the south-west monsoon. The winter is from the middle of November to the middle of February when the climate would be chill but enjoyable.

Most of the rainfall falls between August and October. The south-west monsoon also brings some showers in the months June and July. The Shervaroy hills in Yercaud taluk enjoy a salubrious climate. Yercaud receives the maximum rain of about 1500 mm per annum while in the rest of the district the rainfall varies between 500 to 1150 mm.

Forestry.—Salem district has fairly extensive forest area of considerable value particularly in the hill ranges. The forest area over an extent of 1609.38 sq. km. constitutes 18.60 per cent of the district.

The main products from the forests of the district are sandalwood, bamboo, timber (silver oak and similar varieties) and fuel. Sandalwood and bamboo are consumed within the district for extraction of sandal wood oil and manufacture of paper respectively. The timber is partly used by saw mills and carpentry shops and for building bodies of trucks and lorries.

The other minor forest products includes gonnuts, avarambark, Konnaibark (tanning materials), tamarind, etc., The barks needed for tanning purposes are sent to out station tanning centres.

Special steps are taken to conserve the forest areas and to ensure, among other things, adequate pasture for livestock, supply of small timber for agricultural implements, supply of firewood for domestic consumption and raw materials for industries. The natural growth of forests in the kolli hills and in Yercaud are protected under the Tamil Nadu Hill Station Preservation of Trees Act, 1955.

Under the Five Year Plans, large scale development programmes have been carried out. An area of not less than 1,300 hectares is taken up every year under plan and non-plan schemes for implementing forestry works.

Most of the sandalwood extraction and raising plantation inside the reserve forests are carried out by the hill tribes of Kolli hills and Yercaud.

With the social forestry programme in Government lands, the forest department has enlarged its activities and interest even outside the Reserve Forest.

The main source of revenue from the forests is from sandalwood trees which occur naturally in abundance in the plateau and hilly ranges of the Reserved and Unreserved forests. Only dead sandalwood trees are extracted from the areas prescribed for such extraction.

Minerals and mining:—Salem district has all along been lagging behind in industrial advancement. But taking advantage of the rich mineral deposits in this district, the tempo industrial development is picking up. The recently established salem steel Plant by the steel Authority of India, is a significant industrial land mark in the district.

The following are the major minerals available in this district and used in various industries:-

- (1) Bauxite.
- (2) Magnesite.
- (3) Limestone.
- (4) Quartz.
- (5) Feldspar.
- (6) Soapstone.
- (7) Iron Ore.

(1) **Bauxite.**—It is a hydroxide of Aluminium. It occurs mainly in Shervaroy and Kolli hills (in Salem district). The total reserves of Bauxite in Shervaroys have been estimated to be around 5.3 million tonnes, and in Kolli hills around 2.75 million tonnes. The Alumina percentage in this deposit varies from 30 to 45 per cent. At present, these deposits are being used for the extraction of Alumina by M/s. Madras Aluminium company located at Mettur. Besides, artificial abrasives are also manufactured by "ALIROX ABRASIVE INDUSTRY" at Yercaud.

(2) **Magnesite.**—It is a carbonate of Magnesium containing 47.6 % magnesia and 52.4% Co₂. The deposit occurs about 4 miles North west of Salem and this area is called Chalk hills. The reserves in this area have been estimated to be around 44 million tonnes which have been exploited for the past 50 years by four firms viz., (1) M/s. Burn Standard Limited (2) M/s. Dalmia Magnesite Corporation (3) Tamilnadu magnesite Limited, and (4) Sri Ponkumar Magnesite Mines. Every year about 3.5 lakh tonnes of Magnesite is being mined in this area and used for the manufacture of refractory bricks.

(3) **Limestone.**—It is Carbonate of Calcium containing 56 per cent of CaO and 44 per cent of Co₂. The major portions of the limestone deposits occur around Shankaridurg in Sankari taluk and in certain areas in Tiruchengode taluk. The reserves have been estimated to be around 50 to 55 million tonnes of which major portions have been leased out to M/s. India Cements for the manufacture of cement. Besides, small occurrence are also available in certain parts of Namakkal taluk. M/s Mettur Chemical and Industrial Corporation is manufacturing lime in their Fluo Solid Plant at Sankari and the lime is used as base in the manufacture of bleaching powder.

(4) **Quartz.**—It is an oxide of Silica and occurs mainly in certain parts of Mettur, Tiruchengodu and Namakkal taluks. The reserves have been estimated to be around 3 to 3.5 million tonnes and most of the deposits have been leased out to private firms. The quartz in this area is mainly used for ceramic and glass industry.

(5) **Feldspar.**—It is an Alumino Silicate of Pottash and Soda. It is mainly used for Ceramic industry. Feldspar also occurs along with Quartz in the form of Pegmatites in parts of Mettur and Namakkal taluks. Reserves have been estimated to be around 1 to 1.5 million tonnes,

(6) **Soapstone.**—It is composed of Talc and Steatite which is a hydrated silicate of Magnesium. The occurrence in Salem district is of low grade in quality which is mainly used in pesticide industry. Steatite occurs mainly in parts of Omalur and Rasipuram taluks.

(7) **Iron ore.**—It occurs in the form of Magnetite Quartzite in Kanjamalai, Kodumalai and Nainarmalai hills. Reserves have been estimated to be around 250 million tonnes in all these areas. It can find use in steel industry after magnetite concentration.

Industries—Salem Steel Plant.—The designing of the Salem Steel Plant visualises an integrated special steel plant to produce 220,000 tonnes of finished sheets and coils, 70,000 tonnes of stainless steel, 75,000 tonnes of electrical steel sheets and 75,000 tonnes of special and mild sheets.

The first stage of this project, namely, the cold rolling mills (CRM) with an investment of Rs. 167 crores, was inaugurated in September 1981 on an extent of 62000 sq. mtrs. It is located at the foot of Kanjamalai hills near Salem. The CRM has an annual capacity of 32,000 tonnes of wide cold rolled stainless steel coils and sheets using sophisticated technology in cold rolling.

The following are some of the other major industries in this districts:—

(1) Textile Mills (including one in the Co-operative Sector)		12
(2) Magnesite industries		4
(3) The Madras Aluminium Company		1
(4) The India Cements		1
(5) Seshasayee Paper and Boards Limited		1
(6) Salem Co-operative Sugar Mills		1

Rice Milling and Sago industries are some of the small-scale industries in this districts.

With about 37,400 hectares of tapioca, sago factories have been established in a big way in this district. There are more than 700 sago factories. In order to ensure the production of high grade quality starch, the State Government have recently established a Sago Research Institute at Salem.

In order to develop sericulture in this region, the Intensive Sericulture Development Programme is being implemented with the Director of sericulture Stationed at Salem. The well trained extension personnel of the department of sericulture offer financial and technical assistance to popularise silk worm rearing. The area under Mulberry cultivation has increased in the last few years providing additional employment to the people.

Among the cottage industries, handloom weaving plays a significant role in Salem district about which special mention has been made elsewhere in this report.

Coir making, manufacturing of bamboo baskets and mats, palmyrah leaf umbrella are some of the other items of cottage industries.

Agriculture.—The main occupation in Salem district is agriculture. According to the 1981 Census figures, 61.20 % of the workers of Salem district are engaged in agriculture, either as cultivators or as agricultural labourers.

Roughly, half the extent of the district, namely, 4.30 lakh hectares is under cultivation of which 1.52 lakh hectares are irrigated; the remaining extent is rainfed. The cultivation depends mainly on the monsoon rains. The area under irrigation generally depends upon wells and tanks. Though one of the biggest reservoirs, at Mettur, is located in Salem district, irrigation from this reservoir in this district is marginal, hardly 0.15 lakh hectares receive irrigation from this reservoir through the west bank canal of the Cauvery.

The predominant soil in this district is red sandy with scattered pockets of black soil. Alkaline soil is found throughout the district.

Nearly 90 % of the cultivated area is under food crops. The principal cereal crops of this district are Paddy, Cholam, Cumbu and Ragi. Millets like Panivaragu, Kuthiravally, Samai, Varagu and Thinai are some of the millets cultivated in this district.

Among pulses, the major crops are redgram, blackgram, greengram, horsegram, etc. Pulses are predominantly cultivated as rainfed, either as mixed crop or as pure crop.

Among oil seeds groundnut, castor and gingelly occupy important places. Groundnut cultivation is generally undertaken as a rainfed crop, though in recent years it is also undertaken as an irrigated crop after the harvest of Paddy.

Among the commercial crops, sugarcane, cotton and tapioca are some of the important crops.

Tapioca is one of the major commercial crops cultivated over the extent of 0.37 lakh hectares under irrigated as well as rainfed conditions. Tapioca is used for manufacture of Sago for which there are more than 700 factories in this district.

The following table gives the cultivated area of the most important of the crops, irrigated and unirrigated :—

Serial number.	Name of crop.	Area in hectares.	Irrigated/Unirrigated.
(1)	(2)	(3)	(4)
1	Paddy	67,240	Irrigated.
2	Cholam	18,600	Irrigated.
3	Cumbu	44,800	Unirrigated.
4	Ragi	12,080	Irrigated
5	Pulses	38,520	Unirrigated
6	Groundnut	14,240	Irrigated
7	Sugarcane	21,600	Unirrigated
8	Cotton	2,530	Irrigated
9	Tapioca	81,670	Unirrigated
		13,200	Irrigated
		101,400	Unirrigated
		13,670	Irrigated
		12,880	Irrigated
		12,000	Unirrigated
		15,040	Irrigated
		22,360	Unirrigated

There are three State Seed Farms at Mettur, Danishpet and Mulluvadi for distribution of high yielding and hybrid variety seeds to the farmers. Since the State Seed Farms do not have the capacity to meet the full requirement of the high quality seeds, the Agriculture Department runs quality seed farms in private holdings under its direct supervision and the good quality seeds are certified.

Animal husbandry.—Salem district being essentially an agricultural and pastoral tract, animal husbandry acquires special importance. The stock of livestock wealth in this district according to the cattle census of 1974 is as follows :—

(1) Cattle and Buffaloes	950,341
(2) Sheep	467,573
(3) Goats	348,218
(4) Horses and Ponies	989
(5) Donkeys	359
(6) Pigs	71,380

Sheep rearing is an important occupation in this district. Mechery rams (Machery in Omalur taluk) are noted for their breeding characteristics besides the quality of the wool. The Wool and Sheep Extension Centre at Taramangalam takes steps for propagating the Mechery rams. There are about 29 sheep breeding societies in this district. IRDP, SFDI schemes operating in 19 blocks and the special Animal Husbandry Programme which is in operation throughout the district give a fillip to sheep breeding.

Poultry development has been rather phenomenal in and around Namakkal. According to the Cattle Census of 1974, the population of poultry was 19,23,650. There are about 2,000 poultry units in this district and Tamil Nadu Poultry Development Corporation encourages small poultry units at subsidised cost to small and marginal farmers.

Salem is a land locked district with no coastal borders and has therefore inland fishery sources alone. The Mettur reservoir across the Cauvery (which is one of the biggest reservoirs with a water spread of about 15,540 hectares) has been developed by the State Fisheries Department during the past four decades. Fast growing fish fingerlings of the Gangetic Carps like Catla, Rohu and Mrigal are stocked regularly and fishing is regulated by issue of licences.

Mettur reservoir and the other inland water sources in the district contribute a total fish production of 19,000 metric tonnes annually. The Yercaud lake in the Shervaroy hills provides the cold water fishery resource. Fishes like Mirror Carp, Common Carp, etc. are cultured here.

A fish farm with an induced Carp Spawning Centre has been established at Mettur Dam by the State Fisheries Department for the production and supply of quality fingerlings.

The Mettur Dam Fishermen Co-operative Marketing Society procures about 600 metric tonnes of fish annually and provide means of marketing. Besides retail marketing at Mettur Dam and Salem, the Society sends the fish to Howrah and other markets.

Handloom Industry.—Handloom Industry occupies a pivotal place in the economy of Salem district. Next to agriculture, it provides livelihood for 4.15 lakhs people in the district. The number of handlooms which stood at 10,841 in 1921 has increased substantially during the past sixty years. In 1981, it is reported that the number of looms in Salem district is 1.73 lakhs., accounting nearly 31 per cent of the total looms in the State. Of these, about 34 per cent are in the co-operative fold and the rest in the private sector in the district.

The industry flourishes mainly in the taluks of Salem, Rasipuram, Namakkal and Tiruchengodu and in a few villages of the other taluks. Hand spinning is also found in some of the villages of Tiruchengodu taluk.

The major items of production in the district are cotton sarees and dhoties of 40, 60, 80 and 100 counts, besides towels and spun sarees woven with silk and cotton bed sheets.

The earliest co-operative venture among the handloom weavers was started as early as 1938 and it was Salem Ammaet Co-operative Weavers' Society. Since then much headway has been made in the Co-operative coverage and at present the number of weavers' co-operative societies are 165. Around Rs. 15 crores of handloom clothes are produced annually under the co-operative sector.

Marketing of handloom goods is done through the various outlets of Co-optex. About 16 crores worth of goods are marketed through the Co-optex.

The State Government extends liberal financial and technical support to promote the industry under various schemes. Special steps have also been taken to introduce new designs of cloth and for this purpose a design centre has been opened.

With a view to ameliorate the conditions of the weavers, various welfare measures have been initiated by the State Government. Special mention may be made of the construction of houses for them, the introduction of group insurance scheme, etc.

Rail and Road Transport.—Salem, the headquarters of the district is served by the Southern Railway on the broad gauge as well as metre gauge sections. Salem is connected straight to Mangalore, Trivandrum, Bangalore, Madras, Bombay and New Delhi by broad gauge.

By metre gauge, Salem is connected to Mettur Dam, and to Vridhachalam, a junction in the Chord line between Madras Egmore and Tiruchirappalli, Salem and Bangalore are connected by metre gauge also.

The district has a well-knit road system of more than 8,500 kms. Salem is on two National Highways, NH. 7—Bangalore—Kanniyakumari, and NH. 47—Salem—Cochin. All the taluk headquarters, other towns and most of the villages are connected by motorable roads. The State-owned Anna Transport Corporation with headquarters at Salem, runs about 660 buses and private operators about 400 buses, on both long distance and local routes.

Places of Tourist importance.—Salem district has a good number of picturesque hill ranges and rocks, some of them with famous temples atop. The Shervaroy Hill range is in Yercaud taluk whose headquarters Yercaud is the hill resort of this district, 30 kms. north of Salem and can be reached by a good motorable road. The altitude of Yercaud is about 5,000' above MSL and the temperature ranges between 13° C and 29° C. The climate therefore is pleasant throughout the year. The places of interest in Yercaud, are the lakes, parks, orchards, horticultural research station and a few picturesque peaks with a telescope at the Lady's Seat, besides a temple and a convent. The Tamil Nadu Tourism Development Corporation runs a well established tourist bungalow named "Hotel Tamil Nadu". There is also a youth hotel with dormitory accommodation established by the Tourism Development Corporation. Besides the above, there is a Highways Travelers Bungalow, Township Rest House and a standard hotel by name "Hotel Shervaroy".

Salem town is also increasingly providing improved hotel facilities.

Salem district is dotted with more than 750 temples, big and small, some of them dating back to the Chera, Chola and Pandya days. Quite a few of these temples are more than 1000 years old and one of them over 5000 years old. Many of these temples are located in the hill ranges and rocks. Saivite saints like Appar, Manickavachagar, Tirugnanasambandar and Arunagiri-nathar have sung in praise of some of these temples.

Kailasanathar temple at Taramangalam, about 24 kms. north-west of Salem on the way to Mettur Dam is famous for its excellent stone carvings on the pillars. This temple is said to have been built during the Nayak regime through the origin of the temple dates back to the Chera, Chola and Pandya days.

The Mettur Dam across the river Cauvery as it enters Salem district is one of the biggest reservoirs with a waterspread of 15,540 hectares. This reservoir is not only a source of irrigation essentially in Trichy and Thanjavur districts but also a hydro-electric project besides being a big fish producing water source.

The Namakkal Fort said to have been built during the Madurai Nayak regime is famous for the Sri Narasimhamurthy temple. The mythology of this temple is that after destroying Hiranya Kasipu, the demon ruler, Sri Narasimhaswamy (in the form of man and lion) was in a ferocious mood. After he cooled down, he was brought to this place by Sri Anjaneya so as to stay with his consort Mahalakshmi who was doing penance there. A colossal idol of Sri Anjaneya, 18 feet in height has been installed here facing east with folded hands worshipping Sri Lakshmi Narasimha.

Another place of attraction is the Arthanareeswarar temple at Tiruchengodu about 45 kms. South-west of Salem. The temple is at the top of a hillock at a height of 900' above MSL and can be reached by a flight of steps. The mythological story behind the temple is that Lord Siva gave His consort Uma His left half so as to be inseparable. The deity is known by the name Ardhanari (half female).

Kolli Hills in Namakkal taluk is being developed into a district excursion centre.

A brief analysis relating to certain population characteristics is made utilising the information collected in the Village and Town Directory and the census data in the PCA. A number of tables have been designed for this purpose. The tables are generated at the district and taluk level for the rural areas and in regard to urban areas, townwise particulars are presented.

TABLE 1—DISTRIBUTION OF VILLAGES ACCORDING TO THE AVAILABILITY OF DIFFERENT AMENITIES.

Serial number.	Name of Talu.	Number (with percentage) of villages having one or more of the following amenities								
		Number of inhabited villages.	Education.	Medical.	Drinking water.	Post and Telegraph.	Market/ Hat	Communi- cations.	Approach by pucca road.	Power supply.
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1	Mettur	..	44	13	45	40	12	30	32	45
2	Omair	..	97.78	28.89	100.00	88.89	26.67	66.67	71.11	100.0
3	Yercaud	..	76	38	89	57	32	74	67	83
4	Salem	..	84.44	42.22	98.89	60.33	35.56	82.22	74.44	92.2
5	Attur	..	42	2	67	16	2	34	34	33
6	Rasipuram	..	62.69	2.99	100.00	23.88	2.99	50.75	50.75	49.25
7	Sankari	..	158	59	178	91	29	128	138	174
8	Tiruchengodu	..	87.78	32.78	98.89	50.56	16.11	71.11	76.67	96.67
9	Namakkal	..	130	44	140	98	26	135	83	132
		..	92.20	31.21	99.29	69.50	18.44	95.74	58.87	93.62
		..	81.82	17.17	96.97	68.69	18	54	87	86
		..	62	25	68	50	18.18	54.55	87.88	86.87
		..	89.86	36.23	98.55	72.46	28	46	58	69
		..	92	18	104	75	40.58	66.67	84.06	100.00
		..	88.46	17.31	100.00	72.12	25	100	98	104
		..	169	63	170	140	24.04	96.15	94.23	100.00
		..	95.48	35.59	96.05	79.10	24	142	122	160
		..					13.56	80.23	68.93	90.40
	Total	..	972	279	957	635	196	743	719	886
		..	854	28.70	98.46	65.33	20.16	76.44	73.97	91.15
			87.86							

Table 1 shows the talukwise distribution of inhabited villages according to the availability of different amenities. It is seen that Primary School facilities are available in 87.86 per cent villages of the district. In Mettur taluk, almost all the villages except one, have Primary School facilities, while in Yercaud, out of 67 villages as many as 25 villages have no Primary School facilities. Only 28.70 per cent villages of the district have medical facilities, of which Omalur taluk with 42.22 per cent ranks first. In Yercaud, only 2 out of 67 villages have medical facilities.

It is noted that 98.46 per cent of the villages of the district have drinking water facilities. Mettur, Yercaud and Tiruchengodu taluks have the distinction of having drinking water facilities in all the villages. Out of 972 inhabited villages of Salem, as many as 635 have Post and Telegraph offices. It may be seen that in Yercaud, out of 67 villages, 51 villages have no Post and Telegraph offices. Only in 20.16 per cent of the villages, some sort of markets/hats are being held, except in two villages in Yercaud taluk, no markets/hats are held in the other villages.

It is observed that 76.44 per cent of villages are served by some mode of public transport (viz., Bus, Railway Station, Navigable water way) and Tiruchengodu with 96.15 per cent tops the list, with Yercaud (50.75 per cent) at the bottom. Out of 972 villages in Salem district, only 719 villages (i.e. 73.97 per cent) are approachable in fair and foul weather. In Sankari taluk, as many as 58 out of 69 villages are accessible only for some time in the year, 87.88 per cent of the villages in Rasipuram taluk are approachable by pucca road. It is seen that 91.15 per cent of the villages in Salem district are connected with electric power supply. All the villages in the taluks of Mettur, Sankari and Tiruchengodu are connected with electricity and more than 90 per cent of the villages in the taluks of Omalur, Salem, Attur and Namakkal have got electrical power supply, whereas only 33 out of 67 villages of Yercaud taluk are connected with electricity.

TABLE 2.—PROPORTION OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES.

Serial number.	Name of Taluk.	Proportion of Rural Population served by the amenity of								
		Total population of inhabited villages in the taluk. (3)	Education. (4)	Medical. (5)	Drinking water. (6)	Post and Telegraph. (7)	Market/Hat. (8)	Communi- cations. (9)	Approach by pucca road. (10)	Power supply. (11)

									92.24	100.00
									221,951	228,330
									97.21	100.00
									380,944	474,298
									76.67	95.46
	Total	..	2,446,054	2,403,938	1,250,295	2,434,504	880,158	2,181,466	2,060,814	2,384,630
				98.28	51.11	99.53	35.98	89.18	84.25	97.49

Table 2 gives the proportion of the rural population served by different amenities. It is seen that in the taluk of Mettur (92.73 per cent), Atur (92.75 per cent), Sankari (99.01 per cent) and Namakkal (92.41 per cent) the proportion of rural population served by the educational amenity is slightly higher than the district which is 93.28 per cent. More than 50 per cent of the rural population of the district have medical facilities of which Omalur with 65.07 per cent gets the highest while only 26.44 per cent of the rural population of Yercaud taluk gets such facilities. It is noteworthy that 92.53 per cent of rural population have drinking water facilities of which the coverage in the taluks of Mettur, Yercaud and Tiruchengodu is 100 per cent. It is seen that 87.43 per cent of the rural population of the district are served by post and Telegraph offices. Only 35.98 per cent of the rural population of the district have got Market/Hat facilities in their villages. More than 89 per cent of the rural population of the district are served by some mode of public transport, of which the highest is Tiruchengodu with 98.84 per cent. It is seen that only 84.25 per cent of the rural population of the district are served by pucca road facilities and are approachable in fair and foul weather, of which Tiruchengodu taluk has the maximum facility, while such a facility is poor in Yercaud taluk.

TABLE 3—DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE.

Villages not having the amenity of	Number of villages where the amenity is not available but available at distance of			
	—5 Kms.	5—10 Kms.	10 + Kms.	Total
(1)	(2)	(3)	(4)	(5)
1. Education	77	25	16	118
2. Medical	325	205	163	693
3. Drinking water	14	..	1	15
4. Post and Telegraphs	216	62	59	337
5. Market/Hat	451	188	137	776
6. Communication	108	49	72	229

Table 3 furnishes the distribution of villages not having certain amenities, arranged by distance ranges from the places, where such facilities are available. Barring 118 villages of this district, all others have educational facilities in the villages themselves but these 118 villages are served by the educational facilities available in neighbouring villages, 77 villages five kms. away, 25 villages between five and ten kms. away and 16 more than ten kms. away.

In 693 villages, where medical facilities are not available they are available within 5 kms. only in 325 villages, 5-10 kms. in 205 villages and in 163 villages in more than 10 kms. only. It is significant to note that out of 972 villages of Salem district, in as many as 957 villages, drinking water facilities are available within the villages themselves. Only in one village, this amenity is available at a distance of more than 10 kms. and in 14 other villages, they are available within a distance of 5 kms.

Out of 972 villages of Salem district, 743 villages are served by some mode of public transport. Of the remaining villages, they are available within a distance of 5 kms. in 108 villages, in 49 villages between 5-10 kms. and in 72 villages they are available at a distance of more than 10 kms.

TABLE 4—DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST TOWN AND AVAILABILITY OF DIFFERENT AMENITIES.

Distance range from the nearest town (in kms.).	Number of inhabited villages in each range.	Number (With percentage) of villages having the amenity of							
		Educational.	Medical.	Drinking water.	Post and Telegraph.	Market/Hat.	Communications.	Approach by pucca road.	Power supply.

		50.00	50.00	100.00	50.00	25.00	50.00	25.00	50.00
Total	972	854	279	957	635	196	743	719	886
		87.86	28.70	98.46	65.33	20.16	76.44	73.97	91.15

Table 4 furnishes the distribution of inhabited villages of Salem district according to the distance from the nearest town and availability of different amenities.

It is noted that out of 172 villages, in the range of 0-5 kms., 53 villages (i.e. 30.81 per cent) have medical facilities, 139 villages (i.e. 81 per cent) out of 425 in the range of 6-15 kms. and 85 villages (i.e. 22.91 per cent) out of 371 in the range of 16-50 kms., of distance and 2 villages (50 per cent) out of 4 in the range of 51 kms. and above also have such facilities. As many as 171 villages, out of 172 in the range of 0-5 kms. have drinking water facilities and 416 out of 425 villages in the range of 6-15 kms. and 366 out of 371 villages in the range of 16-50 kms. and all the 4 villages in the ranges of 51 kms. and above also have drinking water facilities. Out of 172 villages in the range of 0-5 kms., 121 have post and Telegraph Offices and 298 out of 425 villages in the range of 6-15 kms. have also Post and Telegraph Offices, whereas only 214 out of 371 villages in the range of 16-50 kms. have such facilities. It has to be noted that only 31 out of 172 villages in the range of 0-5 kms., 109 out of 425 villages in the range of 6-15 kms. and 55 out of 371 villages in the range of 16-50 kms. some sort of Markets/hats are being held.

132 villages out of 172 in the distance range of 0-5 kms. are served by some mode of public transport, 351 out of 425 in the range of 6-15 kms. and 258 out of 371 in the range of 16-50 kms. and 2 out of 4 villages in the range of 51 kms. and above are also having such facilities. 154 villages out of 172 in the distance range of 0-5 kms., 327 out of 425 in the range of 6-15 kms., and 237 out of 371 villages in the distance range of 16-50 kms. and 1 out of 4 villages in the distance range of 51 kms. and above are approachable by pucca roads, in both fair and foul weather. Out of 172 villages, 168 in the distance range of 0-5 kms. and 405 out of 425 in the range of 6-15 kms. are connected with electricity, while 311 out of 371 villages in the distance range of 16-50 kms. and 2 out of 4 villages in the distance range of 51 kms. and above alone have electrical power supply.

TABLE 5—DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE.

Population range.	Number of inhabited villages in each range.	Number (with percentage) of villages having the amenity of							
		Educa- tion.	Medical.	Drinking water.	Post and Tele- graph.	Market/ Hat.	Communi- cation.	Approach by pucca road.	Power supply.
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
—499	164	76 (46.34)	2 (1.22)	157 (95.73)	26 (15.85)	4 (2.44)	77 (46.95)	83 (50.61)	103 (62.80)
500—1,999	348	319 (91.67)	45 (12.93)	341 (97.99)	182 (52.30)	37 (10.63)	244 (70.11)	249 (71.55)	329 (94.54)
2,000—4,999	336	335 (99.70)	145 (43.15)	335 (99.70)	305 (90.77)	903 (26.79)	303 (90.18)	272 (80.95)	331 (98.51)
5,000+	124	124 (100.00)	87 (70.16)	124 (100.00)	122 (98.39)	65 (52.42)	119 (95.97)	115 (92.74)	123 (99.19)
Total	972	854 (87.86)	279 (28.70)	957 (98.46)	635 (65.33)	196 (20.16)	743 (76.44)	719 (73.97)	886 (91.15)

Table 5.—This table gives the availability of the various amenities in the villages in relation to the size of their population. The villages have been classified with reference to their population as below:

- (i) Villages with a population of 499 and below, each.
- (ii) Villages with a population between 500 and 1,999, each.
- (iii) Villages with a population between 2,000 and 4,999, each.
- and (iv) Villages with a population of 5,000 and above, each.

A scrutiny of the table would reveal that bigger villages have received better amenities. The villages with a population of 5,000 and above have mostly been well provided with all the amenities closely followed by villages in the range of 2,000—4,999 population.

TABLE 6—MAIN STAPLE FOOD IN MAJORITY OF VILLAGES IN EACH TALUK.

Serial number.	Name of taluk.	Main staple food.
(1)	(2)	(3)
1.	Mettur	 Rice and Millets.
2.	Omalur	 Rice, Millets and Ragi.
3.	Yercaud	 Rice, Ragi and Millets
4.	Salem	 Rice and Millets.
5.	Attur	 Rice and Millets.
6.	Rasipuram	 Rice and Millets.
7.	Sankari	 Rice, Cholan and Millets.
8.	Tiruchengodu	 Rice, Ragi and Millets.
9.	Namakkal	 Rice, Millets, Cholan, Ragi and Cambu.

Table 6.—Furnishes the main staple food in terms of grains consumed by a majority of the rural population in each taluk of the district. The main staple food in a majority of villages consists of Rice and Millets, while the major population in the taluks of Omalur, Yercaud and Tiruchengodu are also taking Ragi besides rice and millets.

TABLE 7—DISTRIBUTION OF VILLAGES ACCORDING TO LAND-USE

Serial number.	Name of Taluk.	Number of inhabited villages.	Total area.	Percentage cultivable area to total area.	Percentage of irrigated area to total cultivable area.
(1)	(2)	(3)	(4)	(5)	(6)
1.	Mettur	45	59,136.86	71.37	13.07
2.	Omalur	90	56,855.71	72.04	30.33
3.	Yercaud	67	15,404.51	98.41	0.11
4.	Salem	180	70,502.58	68.32	23.47
5.	Attur	141	128,947.60	63.61	32.46
6.	Rasipuram	99	57,132.75	68.38	32.08
7.	Sankari	69	71,837.66	92.13	32.43
8.	Tiruchengodu	104	76,940.72	88.31	22.99
9.	Namakkal	177	165,905.44	84.47	22.01
	Total	972	702,663.83	77.11	25.16

Table 7.—Gives the distribution of inhabited villages of Salem district according to land use. It is noted that out of a total area of 702,663.83 hectares of Salem district, the percentage of cultivable area to total area is 77.11 of which the irrigated area is only 25.16. Yercaud, Sankari and Namakkal taluks have 98.41 per cent, 92.13 per cent and 84.47 per cent of cultivable area to total area respectively of which the irrigated area is more in Sankari taluk, viz., 32.43 per cent. The percentage of cultivable area to total area is the lowest in Attur taluk 63.61.

The percentage of irrigated area to total cultivable area in the district is only 25.16. It is very low in Yercaud taluk with 0.11 per cent. Sankari taluk has the maximum percentage of irrigated area with 32.43.

TABLE 8—GROWTH, DENSITY, AND SEX RATIO OF URBAN POPULATION IN THE DISTRICT IN RELATION TO THE STATE.

Salem district.						
Census year.	Total population.	Urban population.	Percentage urban population.	Decadal percentage variation in urban population.	Density (population per Sq. Km.)	Sex ratio (Number of females per 1,000 males.)
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1951 ..	2,279,383	395,307	17.34	..	..	984
1961 ..	2,471,857	524,101	21.20	32.58	2,146	961
1971 ..	2,992,616	795,382	26.58	51.76	2,265	953
1981 ..	3,441,717	995,663	28.93	25.18	3,247	949

TABLE 8—GROWTH, DENSITY AND SEX RATIO OF URBAN POPULATION IN THE DISTRICT IN RELATION TO THE STATE.

Tamil Nadu.						
Census year.	Total population.	Urban population.	Percentage urban population.	Decadal percentage variation in urban population.	Density (population per Sq. Km.)	Sex ratio (Number of females per 1,000 males.)
	(8)	(9)	(10)	(11)	(12)	(13)
1951 ..	30,119,047	7,333,525	24.35	..	..	986
1961 ..	33,686,953	8,990,528	26.69	22.59	1,722	963
1971 ..	41,199,168	12,464,834	30.26	38.64	2,115	951
1981 ..	48,408,077	15,951,875	32.95	27.98	2,722	956

It may be observed from Table 8, that the percentage of urban population to total population in Salem district has gone up from 17.34 in 1951 to 28.93 in 1981. During this period, the corresponding figure for the state has gone up from 24.35 per cent to 32.95 per cent. The density of urban areas of Salem district which was 2,146 in 1961 has increased to 2,265 in 1971 and 3,247 in 1981.

The sex ratio (number of females per 1,000 males) in the urban areas of Salem district is adverse to the female population. It has gone down from 984 in 1951 to 949 in 1981. The corresponding sex ratio of the state is 986 in 1951 and 956 in 1981. It may be observed from the table 8 that in all the censuses, the sex ratio in the urban areas of the Salem district is less than that of the State except during 1971.

TABLE 9—NEW TOWNS/TOWNS DECLASSIFIED IN 1981 CENSUS.

Name of towns.	Population 1981 census.
(1)	(2)
(a) Added—	
(i) Alampalaiyam	11,337
(ii) Seelanayakkanpatti	16,337
(iii) Veerakkalputtur	11,742
(b) Declassified—	
(i) Sankari	17,863
(ii) Velur]	8,507

Table 9 indicates the recognition of the new towns and the declassification made in the 1981 census. Despite the comparatively larger population, Sankari and Velur, Census towns since 1971 have been declassified from the list of census towns of 1981 census because 75 per cent of the male working population in these towns are not engaged in non-Agricultural activities.

		All Towns		1.11

Table 12 gives the number of beds in medical institutions per 1,000 of urban population in each town. The district average is 1.11 beds per one thousand of urban population. There are 22 towns in Salem district where bed facilities are available in the hospital. Of the 22 towns, 10 towns have higher number of beds than the district average of 1.11 the highest being 2.31 in Mettur Township.

TABLE 13—PROPORTION OF SLUM POPULATION IN TOWNS.

Serial number, Class, name and Civic Status of the town*				Proportion of the Slum population to total population of the town.	Density in Slums (per sq. Km.).
(1)				(2)	(3)
1	II	Attur (M)		15.51	2,090
2	I	Salem (M)		2.93	40,076
3	II	Tiruchengodu (M)			

*For class I and II towns only.

It is seen from the Table 13 which furnishes the proportion of Slum population in Class I and II towns, that only Attur and Salem have slums. Though the proportions of Slum dwellers to total population is higher in Attur (M) than that of Salem Municipality, the density in slums per Sq. Km. is higher in Salem Municipality than that of Attur (M).
