FOREWORD.

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Government, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census, the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PVA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised of analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states, it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series, some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village, the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect, particularly in relation to amenities and land-use pattern, is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "Total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of household they serve. Addition of two more appendices, listing the villages where no amenities are available and according to the proportion of Scheduled Caste and Scheduled Tribe population to the total population, has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Caste and Scheduled Tribe population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serve this purpose.

(iv)

The format of the Primary Census Abstract for the villages and town has been formulated in the light of changes in the economic and other questions canvassed through the Individual Slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series, it has been so designed that Part-A of the volume contains village and town directly and Part-B the PCA of villages and towns including the Scheduled Caste and Scheduled Tribe PCA upto Taluk/Town levels. At the beginning of the DCH, a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and taluk level maps, depicting the boundaries and other important features, have been inserted at appropriate places to further enhance the value of the publication.

This publication is a joint ventures of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri A.P. Muthuswami, I.A.S., the Director of Census Operations, Tamil Nadu on behalf of the State Government which has borne the cost of printing. The task of planning, designing co-ordination of this publication was carried out by Shri N.G. Nag, Deputy Registrar-General (Social Studies) of may office. Dr. B.K. Roy, Deputy Registrar-General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M.M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New DELHI,
26th April, 1982.

P. PADMANABHA,
REGISTRAR-GENERAL, INDIA.

PREFACE

It has been the tradition of the Government of Tamil Nadu to publish immediately after each census, a District Census Handbook separately for each district containing the Census statistics, besides other valuable data of local importance for the use of the State Government, district administration, research scholars and other data users. The first series of District Census Handbooks were brought out immediately after the 1951 Census, and the present publication after the 1981 Census is the fourth in the series. ●

The Census statistics presented in this publication were collected during the census operations in February—March, 1981, the reference date being 1st March, 1981. The other statistics in this publication have been collected from various departments of the State and Central Governments.

This publication consists of the following two parts.

Part A—Village and Town Directory; and

Part B—Village and Townwise Primary Census Abstract

Taking into account the increasing and varied developmental and other welfare measures undertaken by the Government, the scope and content of the data in this publication have been considerably enlarged and improved to meet the requirements of the planners and other data users. In particular, certain inset tables based on census and other data have been included in this publication with brief analytical notes thereon.

This publication contains a brief history of the district, highlighting the major characteristics of the district in relation to the economic resources like forestry, minerals, etc., besides the social, cultural, religious and historical aspects. The district and taluk maps in this publication give the administrative units up to village level, the rural and urban units, the location of towns and cities, communication facilities and other related details.

The facilities and amenities available in respect of education, medical, drinking water, post and telegraph, markets, communication, etc., in each village and town have been included in this Publication, and an important feature is that wherever the above facilities and amenities are not available in any particular village/town, the nearest place where they are available has also been reported.

Another interesting feature in this publication is that villages with none of these amenities have been listed out separately for the pointed attention of the planners and administrators.

Certain tables present data exclusively in respect of the weaker sections of the society belonging to the Scheduled Caste and Scheduled Tribe.

The land-use pattern in respect of rural and urban areas have also been reported in this publication which would meet the requirements of micro level planning for rural and urban areas.

The data in respect of urban areas, apart from the medical and other facilities available, relate to the growth of towns, the availability of protected water supply and what is important, the civic amenities available in the slums of the urban areas.

Part B of this volume consists of the District and Village/Townwise Primary Census Abstract followed by Primary Census Abstract of Scheduled Castes and Scheduled Tribes.

The district Primary Census Abstract gives for each territorial unit upto taluk level in the case of rural areas and upto town level for urban areas, occupied residential houses, households, the total population, the Scheduled Caste and Scheduled Tribe population, workers, etc., thereby indicating the basic socio-economic characteristics of the population for the territorial units.

PR 12-2 *B

(vi)

The village and townwise Primary Census Abstract gives similar information for villages and wards of towns. Besides, there is an appendix which furnishes at urban block level, the total population and Scheduled Caste and Scheduled Tribe population.

I am grateful to the Collectors and other district officers and Departments of the State Government who have extended their unfailing co-operation and help in collecting the voluminous and useful data other than Census, for their presentation at the place in this publication for the ready reference of the data users.

In bringing out this publication, I have received assistance from Shri M. Thangaraju, Shri M. Niguppan, Deputy Directors and Shri A. V. Vallinathan, Assistant Director, besides a large number of staff members of this Directorate.

In formulating the scope and content of the data in this publication and designing the formats for presentation of the data, I have received valuable guidance from Shri P. Padmanabha, Registrar General, India. The encouragement I have received from him at every stage of the work has contributed in a great measure to the successful publication of this District Census Handbook.

I hope the data in this volume would be found useful and the publication well received by the administrators, academicians and other data users.

MADRAS,
July, 1982.

A. P. MUTHUSWAMI,
DIRECTOR OF CENSUS OPERATIONS,
TAMIL NADU.

ACKNOWLEDGEMENT

It is my pleasant duty to acknowledge the able assistance given by the following officials of my office in the preparation of this volume.

ANALYTICAL NOTE

CENSUS CONCEPTS

Rural and Urban areas.—Census figures are generally presented separately for rural and urban areas. In the 1981 Census, the definition of an urban unit is more or less the same as in the 1961 and 1971 Censuses but for some minor variations. The urban areas of 1981 Census are :—

(a) All places with a Municipality, Corporation or Cantonment Board or notified town areas ;

(b) All other places which satisfied the following criteria ;

(i) A minimum population of 5,000;

(ii) Atleast 75 per cent of the male working population engaged in non-agricultural (and allied) activity ;

(iii) A population of atleast 400 per km² (or one thousand per square mile).

The above definition of urban area varies slightly from that of 1961 and 1971 Censuses in that the males working in activities such as fishing, logging etc., were treated as engaged in non-agricultural activity and therefore contributed to the 75 per cent criterion in the 1961 and 1971 Censuses, whereas in the 1981 Census, these activities are treated as on par with cultivation and agricultural labour for the purpose of this criterion. The rest of the areas not treated as urban are classified as rural areas.

Urban Agglomeration.—Urban Agglomeration is a new concept formed during 1971 Census and this replaces the concept of town group adopted in 1961 Census. An Urban Agglomeration may be explained as follows : “ It must form a continuous urban spread constituting a town and its adjoining urban outgrowth or two or more physically contiguous towns together with continuous well recognised urban outgrowth, if any, of such towns ”.

Census House.—A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Household.—A household is a group of persons, who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented any of them from doing so.

Scheduled Castes/Scheduled Tribes.—For the enumeration of Scheduled Castes and Scheduled Tribes in census, the names of Scheduled Castes and Scheduled Tribes as recognised in Tamil Nadu based on the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act of 1976 (Central Act 108 of 1976) were followed. The enumerators were instructed to record a person as a Scheduled Caste/Scheduled Tribe provided the name given by the person was found in the list supplied to them.

Literates.—In 1981 Census, a literate was defined as “ a person who can both read and write with understanding in any language ”. A person who could merely read but cannot write, was not a literate. It was not necessary that a person considered a literate must have received any formal education or have passed any minimum educational standard.

Work.—Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

Main Workers and Marginal Workers.—A worker was identified with reference to a reference period preceding the census. The reference period prescribed was one year preceding the date of enumeration. Certain types of work such as agriculture, household industries like, gur making etc., were carried on, either throughout the year or only during certain seasons or part of the year, depending on local circumstances. In such cases, what we were concerned with, was the broad time span of the agricultural seasons preceding the enumeration. Workers can be full time workers or seasonal workers or marginal workers. If a person has done any work during the reference period and if he had worked for the major part of the year i.e., if he had worked for 183 days or more, he was considered to be a full time worker (main worker). If a person had done any work during the reference period and if he had not worked for the major part of the year i.e., if he had worked for less than 183 days, he was considered to be a marginal worker.

The main activity of workers has been classified into four categories, viz., cultivator, agricultural labourer, household industry and other work.

Cultivator.—For purposes of Census, a cultivator is a person who is engaged either as an employer, single worker or family worker in cultivation of land owned, or held from Government, private persons or institutions, for payment in money, kind or share. Cultivation includes supervision and direction of cultivation.

Agricultural Labourer.—A person who works in another person's land for wages in money, kind or share should be regarded as an agricultural labourer. He or she has no risk in the cultivation but merely works in another person's land for wages and has no right of lease or contract on land on which he or she works.

Household Industry.—For a person who returns his/her main activity as engaged in some production, processing, servicing or repair of articles or goods, it has been ascertained whether it is a household industry.

Household Industry is defined as an industry conducted by the head of the household and/or by the members of the household at home or within the village in rural areas, and within the precincts of the house in urban areas. A larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would, or has to, be registered under the Indian Factories Act.

Non-workers.—All persons who have not been treated as workers, i.e., persons who have not worked any time at all during the reference period of one year preceding the date of enumeration, have been considered as non-workers. These cover all persons who are engaged in unpaid home duties and who do no other work or have not done any work at all during the last one year, full time students and children attending school, all dependent such as infants or children not attending school or a person permanently disabled from work because of illness or old age, persons retired from service, or rentiers, beggars, vagrants, convicts in jails or inmates of a penal, mental or charitable institution and all non-workers who may not come under any of the above categories.

HISTORY OF THE DISTRICT CENSUS HANDBOOK.

After the Census of 1951, the Government of India offered to hand over to the State Government the Census tables and other data prepared during the Census and suggested that they might be published along with any other useful information relating to each district. The State Government accepted the proposal, and the first publication of the District Census Handbook was brought out at State Government cost.

The District Census Handbook of 1951 was found to be very useful and it was therefore decided not only to continue the series for the 1961 Census but also to improve definitely on its content so that each District Census Handbook contained certain basic economic data for the smallest administrative unit in the district and be an useful reference book for scholars and other data users.

After the 1971 Census as well the series of District Census Handbook was continued. The publication of the 1971 Census Handbooks was in three parts, viz., Part A, Part B, and Part C; Part A relating to Village and Town Directory, Part B relating to Village and Townwise Primary Census Abstract and Part C comprising District Census Tables and certain administrative statistical tables.

The tradition of bringing out the Census Handbook has been continued by the State Government during the 1981 Census also. In this series, some individual features besides restructuring the formats of the Village Directory have been adopted bearing in mind the national requirements of data for the socio-economic programmes of the Government. The comparability of data with the 1971 Census data has also been kept in view.

The present Census Handbook will be published in two parts, viz. Part A—Village and Town Directory and Part B—Village and Townwise Primary Census Abstract.

SCOPE OF VILLAGE DIRECTORY, AND TOWN DIRECTORY STATEMENTS.

The District Census Handbooks are the only publications which incorporate the data down to the level of a village and level of a town which are constantly referred to by the data users.

The Village Directory Statement gives the list of villages by taluk, and for each village, the area, number of households and population, availability of amenities and land use. The information on amenities available in the village includes educational, medical, drinking water, post and telegraph, market, rail/road or other communication facilities and power supply. Land use is shown as area under forests, irrigation, unirrigated land, culturable waste and area not available for cultivation.

Appendix I gives for each taluk the number of villages having various levels and types of educational institutions, such as middle schools, adult literacy centres, etc., various types of medical institutions such as dispensaries, primary health centres, etc., and the number of such institutions, various types of drinking water sources, such as taps, tubewells, etc., post and telegraph offices, power supply, railway stations, bus stops, etc., and also the number of villages not having such amenities.

Appendix II gives for each non-municipal town (Census towns) the area under forest, irrigated and unirrigated land, culturable waste and area not available for cultivation.

Appendix III gives the list of villages where no educational, medical and public health facilities etc., are available.

Appendix IV gives the list of villages with the proportion of Scheduled Caste and Scheduled Tribe population to the total population in various ranges of proportion. Part A of the Appendix gives the villages according to the proportion of Scheduled Castes population and Part B according to the proportion of Scheduled Tribe population. Information is presented by the ranges 0-5 per cent, 6-10 per cent, 11-15 per cent, 16-20 per cent, 21-30 per cent and 31 per cent and above for Scheduled Castes and 0-5 per cent, 6-15 per cent, 16-25 per cent, 26-35 per cent, 36-50 per cent and 51 per cent and above for Scheduled Tribes.

The Town Directory gives important and useful information like civic and other amenities available in all the towns in the district, statutorily notified as well as non-municipal and census towns. The details relating to each of the towns have been presented in seven statements, viz., statements I to VI and IV-A. In all the statements except IV-A, the towns are arranged in the alphabetical order for the district. The Town Directory does not cover strictly military areas. It may, however, cover cantonment areas but not strictly military areas or military establishment, within the cantonment areas. However, basic statistics of the cantonment as a whole have been provided. In the Town Directory, codes have been given for the data on amenities and civic administration for want of space. The relevant explanations for the codes adopted have been given in the beginning of the Town Directory Statements.

An urban agglomeration includes two or more independent census towns. The names of the towns/urban agglomerations have been arranged in the alphabetical order. The particulars of the individual town which constitutes one of the units of agglomeration have not been furnished separately because the particulars have already been furnished, where they occur together under the name of agglomeration. The following remarks have been given against such town in brackets.

“(See the name of the main town of the agglomeration)”.

By adoption of this method the reader can get an idea of the particulars of the urban agglomeration in total and also separately.

STATEMENT I.

Status and Growth History.—This statement provides some basic data based on the Primary Census Abstract. For analysing the Town Directory data at State level and All India level, some new columns have been introduced in 1981. The new items are class of town, area, number of households, population and growth rate for each census since 1901, density and sex ratio at 1961, 1971 and 1981 censuses are also provided in this statement.

For size class of towns the following population norms as per 1981 census have been adopted

Population.	Class.
100,000 and above	I
50,000—99,999	II
20,000—49,999	III
10,000—19,999	IV
5,000—9,999	V
Below 5,000	VI

Location Code Number of towns:—To distinguish the town from the village, the location code numbers for towns have been given in Roman numerals and these numbers have been assigned in a continuous order for the district as a whole.

STATEMENT II.

Physical Aspects and Location of Towns, 1979.—Under physical aspects, annual rainfall and temperature figures are furnished. These particulars were obtained from the Commissioner of Statistics, Madras. If the information is not available for any particular towns, the nearest town for which it is available is given. For col. (9) nearest city with population of one lakh and more is furnished according to 1981 census. For the other columns figures obtained from the Municipal Commissioners and Panchayat Union Commissioners are given. The 'Zero' within brackets in cols. 10 and 11 denotes that the referent town itself is enjoying road transport facilities.

STATEMENT III.

Municipal Finance, 1978-79.—The civic administration status of the town, the receipt through tax, properties and powers, Government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services are given in this statement. The sources of receipt and expenditure are furnished in terms of rupees in hundreds.

STATEMENT IV.

Civic and Other Amenities, 1979.—The civic and other amenities existing in the towns as in 1979 are given. The data were obtained from the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Column 3.—Civic administration status.—It is a new column introduced in this statement to facilitate analysis.

Column 4.—Population.—It is also a new column introduced in this statement to measure the amenities in respect of population.

Column 5.—Scheduled Caste and Scheduled Tribe population.—It is introduced to know the size of population of the weaker sections of the community in the town.

Electrification.—Electrification particulars were obtained from the Tamil Nadu Electricity Board through the Municipal Commissioners and Panchayat Union Commissioners.

(i) **Domestic Connections.**—This refers to the number of services given to houses for domestic purposes like fans, lighting, etc.

(ii) **Industrial Connections.**—This refers to the number of services effected to L.T. Industries such as workshops, flourmills, oil mills, grinding machines, cotton ginning and engineering industries, etc.

(iii) **Commercial Connections.**—This refers to the services given to shops, business houses, public institutions like offices and schools and commercial establishments.

(iv) **Road lighting points.**—This refers to the number of points of street lights which will be maintained by the Board and for which consumption charges will be paid to the Board by respective local bodies. For some town Panchayats the number of services effected alone has been furnished under street lights and not the points.

(v) **Other Connections.**—This refers to the number of services effected for agricultural purposes, huts, public water supply systems, cottage industries, etc.

STATEMENT IV—A

Civic and other amenities in Notified Slums, 1979.—This is a new statement on civic and other amenities in notified or recognised slums of class I and II towns. Generally in cities or towns having slums, the local authority such as municipality or municipal corporation or even the development authority notified the recognised slums. Such notifications are linked up with the availability of funds from the State Government for Slum clearance.

Name of the slum and the details of the area, population, length of the paved roads, system of sewerage, number of different types of latrines and method of disposal of night soil, etc., are given in this statement.

STATEMENT V.

Medical, Educational, Recreational and Cultural facilities, 1979.—In this statement medical, educational, recreational and cultural facilities of the towns as in 1979 are furnished. The data for educational and medical facilities were obtained from the Municipal Commissioners and Panchayat Union Commissioners for the concerned towns, and from the Director of Secondary Education and Director of Public Health respectively.

Column 10.—Recognised Shorthand, typewriting and other vocational training institutions.—The term, 'recognised' refers to institutes recognised by some statutory authority like Education Department, Commerce Department, Labour Department, etc., of the Government or by Semi Government or autonomous bodies, public sector project, etc.

Cinemas refer only to the permanent cinema theatres and do not include touring cinemas.

Column 16.—Number of working women's hostel with number of seats.—This is a new column introduced in this statement in 1981. Consequent on the increase in the employment of women in urban areas, the housing need of working women has been considered as an important subject for study.

STATEMENT VI.

Trade, Commerce, Industry and Banking in 1979.—In this statement, trade, commerce, industry and banking facilities in the town as in 1979 are furnished. Banking particulars were obtained from the Reserve Bank of India. The information on number of agricultural and non-agricultural credit societies were collected from the Registrar of Co-operative Societies through the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

SCOPE OF PRIMARY CENSUS ABSTRACT.

The Primary Census Abstract, as it is called presents basic data for each village or segment of a village (in cases where such village segment form different panchayats) in the "Villagewise Primary Census Abstract" and for each Ward/Division of a Town in the "Urban Primary Census Abstract". The format of the Primary Census Abstract for the villages and towns in 1981 has been slightly modified as compared to the 1971 Primary Census Abstract.

The Primary Census Abstract gives such basic information as area in hectares/square kilometres, occupied residential houses, number of households, total population, Scheduled Caste and Scheduled Tribe population, literates, main workers, division of main workers into cultivators agricultural labourers, workers in household industry and other workers marginal workers and non-workers in respect of each unit. The Urban/Village Primary Census Abstract give this information for each village and each urban ward. With a view to ensure comparability and to enable data users to derive the figures either for a revenue village or Panchayat according to their requirements, the data are presented for segments of villages also. Wherever portions of one village happen to be in two or more panchayats, the segmentwise data have to be used separately or added with some other segment's data so as to derive panchayat data. For example, if portions of a revenue village bearing Location Code No. 10 forms part of two panchayats, the figures are given separately for each portion of the village against Location Code No. 10 a/b and 10 b/b. The total figure for the entire revenue villages by adding the figures given against both the segments viz., 10 a/b and 10 b/b is given in the village Primary Census Abstract. If instead the Panchayat figures are required, the data for the concerned village segment or segments relating to the panchayat concerned, are to be added up to arrive at the total figures for the respective panchayat.

An appendix presented in the case of Urban Primary Census Abstract gives the 1981 population and Scheduled Caste and Scheduled tribe population for each enumerator block of the town. This is meant for the use of administrative and election authorities in urban areas. Such data are also required by urban planners and researchers for conducting other studies in selected blocks.

Mode of Presentation.—The consolidated figures for the district and each taluk are given in the beginning for total, rural and urban areas followed by each Town/Urban Agglomeration under the caption, 'District Primary Census Abstract'. Then follows the Primary Census Abstracts for Scheduled Castes, Scheduled Tribes. An alphabetical list of revenue villages is then given along with the location Code Numbers of 1981 Census followed by the Village wise Primary Census Abstract for each taluk. In the foot note given at the end of the Village wise Primary Census Abstract, the villages included in Municipalities or Census towns are indicated. In an annexe, the names of villages and their constituent panchayats are given. Then follows the Urban Primary Census Abstract. In an appendix to the Urban Primary Census Abstract

total population and Scheduled Caste/Scheduled Tribe populations for each Enumerator Block of a town are given. This arrangement is followed for each taluk and independent sub-taluk in the district.

Maps.—Apart from the District Map, map for each taluk showing the village Location Code Numbers along with their boundaries have also been included at the appropriate places. As compared with the maps presented in 1971 District Census Handbook, several improvements have been effected in the maps presented in this volume. All towns are shown in the District and taluk maps with shading screens and also spheres according to the population size of towns.

Area Figures.—In the District Primary Census Abstract, the area figures are given in square kilometres for total, rural and urban areas. In the Village-wise Primary Census Abstract, the area figure for each Location Code Unit is given in hectares upto two decimals. The area figures for each town in square kilometre is also given at the end of the Urban Primary Census Abstract. In the District Primary Census Abstract, the area figures of the district total represent the "Geographical Area" figures supplied by the Surveyor-General. Figures for urban areas are those supplied by the Local Bodies and revenue authorities. The urban area of a district has been arrived by adding the urban area figures of each taluk within the district. Area figures for the rural area of District/Taluk are derived by subtracting the urban area figures from the total area of the District/Taluk. The total of the area figures of the taluks will not tally with district figures, because the taluk area figures represent the 'Land Use' area and are derived from the figures supplied by the Tamil Nadu Directorate of Survey and Land Records, while those of the district represent "Geographical Area" supplied by the Surveyor-General of India. The total of the village area given in the Village-wise Primary Census Abstract may not tally with the rural area of the taluk given in the District Primary Census Abstract as the taluk area figures take into account hills, forests and rivers, etc., where as the village area may not include the same. For conversion, the ratio is 100 hectares=1 square kilometre.

It is hoped that the pattern of presentation of basic Census particulars for each district as explained above and adopted in this volume would be found convenient by data users.

PERIYAR DISTRICT—AN OUTLINE.

Periyar which had its origin as an independent district recently, lies in the extreme north of Tamil Nadu. In the north, it is bounded mostly by the State of Karnataka. River Palar also constitutes its northern boundary for quite some distance. To the east lie Salem and Tiruchchirappalli districts. Madurai district is its immediate neighbour to the south and on the west it has Coimbatore and Nilgiri districts as its boundaries. Thus, Periyar is essentially a land locked area having no sea coast of its own.

By and large the region comprised in the district could be described as a long undulating plain gently sloping towards the river Cauvery in the south-east. The long stretch of mountains in the north which slopes gradually is drained by the three major tributaries of river Cauvery, viz. Bhavani, Noyyal and Amaravathy. Cauvery which enters the district from Salem runs in a southerly direction forming part of the eastern boundary of the district.

The district in general has a dry climate with scanty rainfall. Maximum rainfall is recorded in Gopichettipalaiyam and Bhavani taluks. The Palghat gap in the western Ghats, which has a soothing effect in climate in Coimbatore district does not render much help in alluviating the dry climate here. The cool wind that gushes out of the west coast through Palghat gap loses its coolness and become dry by the time it crosses Coimbatore district and reaches Periyar region.

Unlike Coimbatore which is blessed with a salubrious climate, Periyar district has dry weather throughout except during the monsoon season. Generally speaking the first two months of the year are pleasant. During March the sky is clear and the mercury gains an upward trend which persists till the end of May. Highest temperature is normally recorded during May. The scanty summer showers that occur during this period do not provide any relief to the oppressive heat. Slight improvement is provided during June–August period. During this pre-monsoon period the mercury reverses its trend and by September the sky gets overcast. In spite of the heavy overcast sky the rains are meagre during September. North-east monsoon sets in vigorously only during October–November and by December the rains disappear rendering the climate clear but pleasant.

Soils.—The soils of the district are mostly red sand and gravel with moderate amounts of red loam and occasional black loam tracts. Vast stretches of the upland regions are mostly stony and gravelly. Red loam occurs mostly in lands under Kalingaroyan Channel and in beds of tanks in Erode taluk and to some lesser extent in valleys in Perundurai and Dharapuram taluks. It also occurs in the hilly tracts of Bhavani taluk.

Soils of Bhavani, Erode, Dharapuram and Perundurai taluks are chiefly gravelly, stony and sandy of the red variety. Soils of Gopichettipalaiyam and Satyamangalam taluks are mostly of the red sandy variety. Red loam is prevalent mostly in Gopichettipalaiyam and Perundurai taluks.

Minerals.—The district cannot boast of great mineral wealth. However, it has a few varied items of significance. Feldspar of fine quality is found in abundance in Erode taluk. Both opaque and translucent varieties are found in large quantities. Mica also occurs in Vairavamangalam near Bhavani and prospecting in recent times have revealed the presence of Muscovite near Punjai Puliamatti. In a few places in Bhavani and in a few tracts in Perundurai, asbestos is found to occur.

Most significant of all deposits in the availability of rich iron are in Doddan Combai forest in Gopichettipalaiyam. Iron ore from here is found to be very fine quality being particularly rich in metal. Traces of gold also have been found in a few auriferous veins in Gopichettipalaiyam.

Rivers.—Main rivers in the district are Bhavani, Cauvery, Amaravathy and Noyyal. River Palar in the north and Vattamadaai and Upper rivers in the south are also significant. Palar river constitutes the boundary between Periyar district and Karnataka State in the north. These rivers together with Bhavanisagar main canal provide proper drainage and assure fairly sufficient facilities for irrigation in the district.

Of the major rivers Bhavani rises in the silent valley in Palghat ranges in the neighbouring State of Kerala after receiving Siruvani, a perennial stream flows into Coimbatore district where it gets reinforced by the Kundah river before entering Periyar district in Gopichettipalaiyam. Bhavani is more or less a perennial river fed mostly by the South-West monsoon. North-east monsoon also supplements its water resources. This river runs for over hundred miles through Periyar traversing through Bhavani and Gopichettipalaiyam taluks. It feeds the Bhavanisagar reservoir which takes an easterly course flowing through Gopichettipalaiyam, Satyamangalam and Bhavani taluks before it ultimately joins river Cauvery on the Salem borders.

Cauvery, rises in the Coorg, is joined by many small tributaries. It runs through Karnataka and at Hogenakal falls takes a sharp turn, east to south. Before reaching this point, its main tributary, viz, river Kabini joins it. From here it takes a south easterly direction forming the boundary between Bhavani taluk of Periyar and Tiruchengode taluk of the neighbouring Salem district. After river Bhavani flows into it, the south-easterly course is continued forming the boundary between Erode taluk of Periyar and Tiruchengode taluk of Salem district.

Noyyal river is noted for its capricious nature. This is fed mostly by the South-West monsoon but the North-East monsoon brings freshes and this very often results in floods. In spite of its unpredictable character, the river helps to irrigate considerable areas in Palladam taluk of Coimbatore district and Dharapuram taluk of Periyar.

River Amaravathy which rises in the Travancore region of Kerala enters Periyar from Udumalaipettai taluk in Coimbatore district. This river flows through Dharapuram before it joins Cauvery in Tiruchirappalli district.

Forests.—With more than 232,764 hectares of land under dense forest, Periyar is one of the few fortunate districts in the State which can boast of extensive forest area. 28 per cent of the total district area is under forests. These forests are rich in commercially significant items such as teak, sandalwood, rosewood, vogai, pillai maruthu, etc. Sandalwood is abundant in Moyar valley and in slips facing Dodda Combai in Talamalai ranges. Tamarind trees are plenty in Bhavani ranges. In high land forests of elevation 2,000 feet to 5,000 feet, diversified flora are prevalent. Here we find semi evergreen type, teak type, sandal type, bamboo type and shola type of vegetation.

Teak is available mostly in ranges of 3,200 feet to 3,600 feet. Main places where bamboo is available are in the outer slopes of north Coimbatore plateau between 1,500 feet to 3,000 feet elevation. Main centres of availability are Vadaparai, and Hussanur basin in Satyamangalam ranges. Dodda Combai in Bhavani ranges is also significant for the availability of bamboo.

The southern forest ranger's college at Coimbatore has given a fillip to the forest conservation in this district also.

The district is rich in fauna. It is varied and all the common species normally found in ranges and plains in the south are found to occur in this district. Significant is the presence of wild elephants and tigers especially on the hills in the northern or north-eastern parts of the district. Cheetahs are not altogether absent. They are sparsely distributed. Panthers are found in the scrub jungles and rocky hills of the district. Spotted deer, barking deers, jungle sheep, etc., are normally present in the northern ranges. The presence of Kangayan breed cattle noted for their milk yield and draught is significant. The Bargur cattle found in Bhavani ranges, are though small in size, well built and sturdy.

Brief History.—Periyar district which till recently formed part of Coimbatore has its history intertwined with that of Coimbatore and because of its close linkage with the erstwhile Coimbatore district is very difficult to separately deal with the history of Periyar region. Together with the area comprised in the Coimbatore district it formed part of the ancient Kongu country known as Kongunadu, history of which dates back to the Sangam era. It is found that in the early days this area was occupied by tribes, most prominent among them being the "Kosars" reportedly having their headquarters at "Kosampulur" which is believed to have in due course become Coimbatore. These tribes were overpowered by the Roshtrakutas from whom the region fell into the hands of the Cholas who ruled supreme during the time of Raja Raja Chola. On the decline of Cholas, the Kongunadu came to be occupied by the Chalukyas and later by the Pandyas and Hoysalas. Due to internal dissension in the Pandian Kingdom, the muslim rulers from Delhi interfered and thus the area fell into the hands of Madurai Sultanate. This region was later wrested by Vijaya nagar rulers after overthrowing the Madurai Sultanate. For a few years the area remained under Vijayanagar rule and later under the independent control of Madurai Nayaks.

The rule of Muthuveerappa Nayak and later that of Tirumalai Nayak were marked by internal strife and intermittent wars which ruined the kingdom. As a result of this the Kongu region in which the present Periyar district is situated, fell into the hands of the Mysore rulers from whom Hyder Ali took over the area. Later consequent on the fall of Tipu Sultan of Mysore in 1799 the Kongu region came to be ceded to the East India Company by the Maharaja of Mysore who was restored to power by the company after defeating Tipu Sultan. From then, till 1947 when India attained independence, the area remained under British control who initiated systematic revenue administration in the area.

Formation of the district.—The entire area now constituting Periyar district formed part of Coimbatore till recently. The new district came into being as a result of the bifurcation of the Coimbatore district, consequent in the G.O. Ms. No.1917, Revenue, dated 31st August 1979.

Bhavani, Dharapuram, Erode and Satyamangalam taluks were included in Coimbatore district which had a composite character, at the beginning of the century. Of these, Sathya-mangalam taluk was renamed as Gopichettipalaiyam taluk retaining Satyamangalam as a sub-taluk. In 1975, Satyamangalam sub-taluk was upgraded into a full fledged taluk. Later in 1979 Perundurai sub-taluk of Erode was also upgraded into a taluk. Soon these six taluks were grouped together to constitute the new district of Periyar.

Land use.—As per revenue land records the total geographical area of the district is 824,059 hectares. Of these, 341,820 hectares have been brought under cultivation as net area sown. This accounts for 41.5 per cent of the total area of the district. Forests account for 232,764 hectares i.e., 28.2 per cent of the total area. Cultivable waste has been reduced to a mere 0.5 per cent or 4,035 hectares in the district. Less than 8 per cent of the total area is put to non-agricultural use. However, 17.7 per cent is accounted for by fallow lands. Trees, crops, groves, orchards, etc., together account for about 0.6 per cent of the total area in the district.

Of 341,820 hectares that have been brought under cultivation, 90,064 hectares are sown more than once, thus enhancing the total area cropped to 431,884 hectares. If this is taken into account the percentage of total cropped area to total area of the district will work out to 82.4 per cent, thus publishing better utilisation of available land resources in the district.

Agriculture.—Though noted for trade and industry the district is by no means backward in the field of agriculture. Close association and link with Coimbatore district which has the advantage of two premier agricultural institutions viz., the Agricultural college and the Research Institute have helped the ryots to keep abreast of developments in agricultural method and also improved strains of seeds. The publicity and developmental activities launched by the agricultural institutions in Coimbatore penetrated far and wide in areas comprized in Periyar district. Added to this was the propaganda and demonstration organised by the Agricultural Department. Availability of irrigation facilities coupled with the awareness of improved methods of farming helped the agriculturists, to forge ahead. Though the soil is not the best, utilisation of improved methods of cultivation and improved strains of seeds together has helped the agriculturists in the district to maximise their output.

Food crops account for 67.5 per cent of the total cropped area in the district. Cereals account for 74.76 per cent of area under food crops. Paddy is the main crop raised under cereals. Paddy accounts for 66.95 per cent of the total area under cereals. Paddy accounts for 86,939 hectares. Next to paddy is cholam which is raised in more than 19,666 hectares. Ragi is also popular among the agriculturists. It has 13,694 hectares under it.

Pulses are not much in cultivation in the district. Only 1,451 hectares are used for raising pulses. Among condiments and spices, turmeric and chillies are significant. Cultivation of turmeric extends over 9,722 hectares while chillies is cultivated in more than 2,499 hectares.

Among non-food crops, oilseeds constitute the major item. 74.61 per cent of the total area under non-food crops is accounted for by oilseeds. A total of 62,305 hectares is under oilseeds cultivation and of these groundnuts account to 39,426 hectares while gingelly accounts for 20,268 hectares. Groundnut is the most popular oilseed raised here.

Among other non-food crops raised here, the important items are cotton, sugarcane and tobacco. Sugarcane is raised in 22,118 hectares. Cotton is grown in 13,852 hectares while tobacco is raised in 6,167 hectares in the district. In respect of all these commercial crops also improved varieties have been adopted by the agriculturists and this has helped them to maintain high yields.

Irrigation.—The sub-soil in most parts of the district being sandy and surface soil thin and of poor quality. The agriculturists have to depend heavily on irrigational facilities. The uncertain aspect of north-eastern monsoon and not too favourable contribution from the south-west monsoon make the plight of local agriculturists miserable. The chief sources of irrigation in the district are the canals and wells, and these constitute the mainstay of the farmers.

Rivers rising in the western ghats and fed mostly by the south-west monsoon are the chief sources of irrigation in the district. These rivers are Cauvery, Amaravathy and Noyyal. Apart from these main rivers there are a few uncertain jungle streams which also contribute towards better irrigation and drainage in a small way.

The main irrigation projects of consequence in the district are the Amaravathy reservoir project and the lower Bhavani project. Amaravathy river with a number of small anaicut across it contributes in no small measure to the irrigation potential. The numerous small canals from Amaravathy have been reconditioned under the Grow More Food Campaign. These together with Amaravathy reservoir project prove to be a boon to the farmers in the district especially Dharapuram area. The completion of lower Bhavani Project under First Five-Year Plan has boosted the irrigation resources considerably.

As noted earlier, the main resources of irrigation are the canals and wells. Canals under various irrigation projects together help to irrigate about 91,750 hectares of land while the wells irrigate 79,844 hectares. Area irrigated by tanks and spring channels is negligible. The net area irrigated under various sources together constitute 15.6 per cent of the net area sown in the district. The net area irrigated in the district totals to 173,125 hectares.

Fisheries.—Inland fisheries is the only resource for fishermen in Periyar district. Being a landlocked district there are no chances for marine fishing and as such opportunities are restricted. However, with the help and encouragement of the Fisheries Department rapid studies have been made in the development of fisheries in the district. Special emphasis is laid on the formation of fishermen's co-operatives and familiarising the local fishermen in the improved methods with the help of the co-operative organisation which assured deep involvement of the fishermen. A number of co-operatives have been formed. The activities of the Fisheries Department in the district is being guided and controlled by the Assistant Director of Fisheries stationed at Bhavanisagar.

Animal Husbandry.—The district is rich in its natural cattle wealth and concerted efforts of the animal husbandry department has further augmented the cattle wealth in the district.

There are four major breeds of the cattle in the district. They are the Kangayam breed, the Borgur breed, the Kollegal variety and the Alanbedis. Kangayam cows are reared in large numbers, due to their rich milk yield. Kangayam bulls are also noted for their draught capacity. Borgur breed though smaller in size are well built and sturdy. Kollegal variety is noted for their road draught and is normally reared for transport purposes.

With varieties of breeds available, the district has made rapid progress in the field of animal husbandry. Erode has carved out an enviable position for itself in the field of dairy industry in the State. The Tamil Nadu Milk Producers Federation has a milk collection centre and processing plant at Erode from where pasturised milk is transported in cranes to different parts of the State every day.

To support the growing cattle wealth in the district, Animal Husbandry Department has taken various measures including opening and maintenance of five bull stations for the collection and supply of serum to various veterinary hospitals and artificial insemination centres. Apart from these bull stations, the department maintains the following:

1. Veterinary hospitals	3
2. Veterinary hospitals cum key village centres	15

Rinderpest Squad stationed at Erode, Rinderpest Vigilance unit Gopichettipalayam and Rinderpest check-post at Dibum are all engaged in the eradication of rinderpest disease in the district. The district can also boast of a sheep breeding co-operative society.

As regards poultry development is concerned there are three Poultry Extension Centres in the district. They are at Chengampalli, Palavakulipalayam and Bhavanisagar. The poultry diagnostic laboratory in the district facilitates early diagnosis of various diseases affecting the poultry and thus helps to prevent heavy losses due to poultry diseases.

The activities of the Animal Husbandry Department are controlled by three Assistant Directors of Animal Husbandry functioning from Erode, Dharapuram and Gopichettipalayam.

Industries and Trade.—Periyar has a place of unique importance in the industrial map of Tamil Nadu with over per cent of the population depending on non-agricultural sector. Industries and trade naturally occupy a place of prominence in the economy of the district. Industries that flourished in early days in the area were handloom weaving, carpet manufacturing, cart manufacturing, oil pressing, brass vessel manufacturing, etc. Though these industries flourished well in early days, the advent of modern times changed the fate of some of these well-established ancient industries. Dharapuram which was noted for the manufacture of load carrying and passenger carts lost its importance due to the advent of modern means of transport. However, the industry still survives here and load carrying carts are still manufactured. Similarly, Bhavani which was noted the world over for its beautiful carpets, has shrunk into insignificance and the industry is almost non-existent now. Bhavani, Erode and Gopichettipalayam contribute to occupy important place in the field of oil pressing.

The industry which has been able to totally with stand the onslaught of modernisation has been the handloom weaving. Erode, Chennimalai, etc., still hold their sway and the district is noted for its handloom products, which include cotton sarees, bed spreads, towels, furnishing fabrics, etc. Two other important production centre are Bhavani and Jambai.

It is reported that more than 60,000 looms are functioning in Periyar district. There are 132 co-operatives covering 33,485 looms. This accounts for 55 per cent of the total looms in the district.

The cotton textile industry in Coimbatore and handloom industry in Periyar have encouraged the growth of various ancillary industries to meet the needs of the textile mills. Chennimalai, Erode, Gopichettipalayam, are etc., important centres where cotton ginning is carried on large scale. There are also important dye work in Erode, Chennimalai and Bhavani. A number of factories engaged in cotton fabric printing are functioning in Erode.

Rice milling is yet another industry which has been able to hold its own. Erode, Bhavani and Dharapuram are centres where a number of rice mills flourish. These mills carry on lucrative trade in the west coast. A number of lorries carrying boiled rice ply between the centres and delivery point in Kerala.

There are a number of leather tanneries in Erode-Dharapuram area. Large quantities of leather are brought here for tanning and later are exported to foreign countries.

The Government has also come forward to provide incentives to small entrepreneurs. Industrial estates have been set up at Erode and other places where full facilities are offered to small industrialists. Small units have been set up here for the manufacture of steel furniture nuller screen, etc. There is also a unit at Erode for the manufacture of bolts and nuts and screws.

Both manufactured items as well as agricultural commodities are included in the traded item. Major item of export from the district are handloom products, dairy products, raw cotton, rice, etc. while the items brought are mostly oilseeds, coal, etc. A large number of lorries, carrying various items into and from the district ply day in and out and no detailed statistic is available regarding the flow of trade from and to the district.

Transport and communication.—Periyar district has a well developed net work of transport and communication system. Erode being one of the prominent trading centres in the State is well connected with all modern means of transport and communication except for air service. Direct access by roads and rail from State capital and other district headquarters is available. Erode is an important railway junction on the west coast line. All passenger trains from Madras to the west coast halt here. The nearest airport is at Coimbatore which is only a few hours by road.

Road transport has developed by leaps and bounds. There are a number inter of district bus routes being operated by the nationalised transport corporations linking Erode and other prominent towns in Periyar in the place of significance outside the district. The role of Cholan Transport Corporation in the headquarters at Coimbatore and Tiruvalluvar Transport Corporation which operated inter district and inter state services is commendable.

The district is also served by a good net work of Post and Telegraph offices. There are four postal divisions serving the district with their headquarters at Erode, Tiruppur, Pollachi and Dharapuram. Under the control of these postal divisions, there are four head post offices one each at Erode, Bhavani, Gopichettipalayam and Dharapuram. Of these the first two come under HSG category while the other two belong to HSG II category. Apart from the above there are 104 sub-post offices of various description including extra departmental sub-post office, and 64 sub-telegraph offices. In addition to these, there are numerous brant post offices.

combined post and telegraph offices, etc., spread out in various parts of the district. The large networks of post and telegraph offices ensure definite means of communication at a nominal rate for the benefit of the common man.

Periyar has also a good system of Telephone connections. Erode is connected with State capital by subscriber trunk dialling system. Telephone connections between various centres in district has been ensured and within Erode city itself the number of telephone subscribers has been at the increase.

Education and Health.—In the field of education also, the district has recorded remarkable achievement. There are a number of well established schools and colleges preparing students for the usual degree and post-graduate degree courses in various branches of science and humanities. The Mahajana college of Erode was the pioneer in the field of higher education in the district. Apart from these institutions, there are a number of polytechnic and other institutions which provide technical education.

Medical facilities are provided by the District Headquarters hospital at Erode and taluk hospitals at each taluk headquarters. In addition to these, there are 20 Primary health centres and about 144 Maternal and child welfare centres under them. Together, these institutions provide succour to the suffering. Public health activities are guided and supervised by the District Health Office at Erode.

Brief Analysis of the Villages and Town Directory Data.

A brief analysis relating to certain population characteristics is made utilising the information collected in the Village and Town Directory. A number of tables have been designed for this purpose. The tables are generated at the district and taluk level for the rural areas, and in regard to urban areas, townwise particulars are presented.

TABLE 1.—DISTRIBUTION OF VILLAGES ACCORDING TO THE AVAILABILITY OF DIFFERENT AMENITIES

Serial number	Name of Taluk	Number of inhabited villages	No. (With percentage) of villages having one or more of the following amenities							
			Education	Medical	Drinking Water	Post and Telegraph	Market/hat	Communications	Approach by pucca road	Power supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1	Satyamangalam	73	69 94.52	24 32.88	73 100.00	52 71.23	5 6.85	65 89.04	60 82.19	73 100.00
2	Gopichettipalayam	68	63 92.65	29 42.65	68 100.00	60 88.24	29 42.65	54 79.41	61 89.71	68 100.00
3	Bhavani	58	55 94.83	27 46.55	58 100.00	54 93.10	17 29.31	55 94.83	55 94.83	58 100.00
4	Erode	78	70 89.74	23 29.49	78 100.00	52 66.67	19 24.36	74 94.87	78 100.00	78 100.00
5	Perundurai	119	110 92.44	23 19.33	119 100.00	72 60.50	48 40.34	84 70.59	118 99.16	119 100.00
6	Dharapuram	85	85 100.00	39 45.88	85 100.00	83 97.65	22 25.88	76 89.41	72 84.71	83 97.65
Total		481	452 93.97	165 34.30	481 100.00	373 77.55	140 29.11	408 84.82	444 92.31	479 99.58

Table 1.—The talukwise distribution of inhabited villages according to the availability of different amenities are seen in this table. The primary school facilities are available in 452 inhabited villages out of the total 481 villages in the district which works out to 93.97 per cent. It is notable that all the villages in the district are provided with the amenity of drinking water, the percentage being 100.00. Similarly the amenity of power supply is available to almost all the villages except 2 villages viz., 99.58 per cent of the total villages. The amenity of pucca road is available to 92.31 per cent of the villages. While the facilities of communications are available to 84.82 per cent or 408 villages, the post and telegraph amenities are provided to 77.55 per cent of villages. This district is lacking behind in medical amenities, as only 34.30 per cent of the total inhabited villages possess the amenity of medical. Similarly, 29.11 per cent of the villages are provided with the market/hat facilities.

TABLE 2.—PROPORTION OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES

Serial number	Name of Taluk	Total Population of Inhabited Villages in the Taluk	Proportion of Rural Population served by the amenity of								
			Education	Medical	Drinking Water	Post and Telegraph	Market/hat	Communi- cations	Approach by pucca road	Power supply	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	
1	Satyamangalam	183,906	180,158 97.96	84,831 46.13	183,906 100.00	148,649 80.83	10,305 5.60	159,097 86.51	161,843 88.00	183,906 100.00

6	Dharapuram	354,682	354,682 100.00	215,611 60.79	354,682 100.00	351,453 99.09	119,204 33.61	332,090 93.63	328,027 92.48	351,892 99.21	
Total ..		1,613,259	1,590,633 98.60	902,411 55.94	1,613,259 100.00	1,475,251 91.45	675,982 41.90	1,495,150 92.68	1,557,319 96.53	1,610,469 99.83	

Table 2.—This table furnishes the proportion of rural population of inhabited villages served by different amenities. About 90 to 100 per cent of the total population of the inhabited villages in the district are served with the amenities of education, drinking water, post and telegraph, communication, approach by pucca road and power supply. The medical facilities are available to only 55.94 per cent of the total rural population. 41.90 per cent of the rural population are served with the amenity of market/hat which is the only facility available to less than 50 per cent of the population in the district.

TABLE 3.—DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE

Villages not having the amenity of	Number of villages where the amenity is not available and available at distance of.			
	—5 kms.	5—10 kms.	10+ kms.	Total [Col. (2)—(4).]
(1)	(2)	(3)	(4)	(5)
1 Education	20	4	5	29
2 Medical	208	60	48	316
3 Drinking Water	..	..	..	..
4 Post and Telegraph	83	14	11	108
5 Market/hat.	209	30	52	341
6 Communication	54	11	8	73

Table 3.—This table furnishes the distribution of villages not having certain amenities arranged by distance ranges from the places where such facilities are available. Out of 481 inhabited villages in the district, educational facilities are not available in 29 villages in the respective villages itself. Among these villages, 20 villages avail the amenity of education at a distance of —5 kms., 4 at a distance of 5—10 kms. and 5 villages avail at 10+ kms. Similarly, 316 inhabited villages which do not avail the medical amenity in their villages itself, avail at different distances. 208 villages avail this amenity at —5 kms., 60 at 5—10 kms. and 48 at 10+ kms. It is noteworthy that all the inhabited villages possess drinking water facility. 108 villages in the district are not served with the post and telegraph facilities within their villages itself but 83 villages avail this amenity at a distance of —5 kms, 14 villages at 5—10 kms and 11 villages at 10+ kms. 341 inhabited villages out of 481 villages are not having the market facility and that 209 villages avail the same at a distance of —5 kms, 30 villages at 5—10 kms. and 52 villages at 10+ kms. The amenity of communication which is not present in 73 villages avail the same at different distances. 54 of these avail the same at a distance of —5 kms, 10 villages at 5—10 kms. and 8 villages avail at a distance of 10+ kms.

TABLE 4.—DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST TOWN AND AVAILABILITY OF DIFFERENT AMENITIES.

Distance Range from the nearest town (in kms.)	No. of inhabited villages in each range.	No. (with percentage) of villages having the amenity of							
		Education	Medical	Drinking Water	Post and Telegraph	Market/hat	Communication	Approach by Pucca Road	Power Supply

16

Table 4.— This table furnishes the distribution of inhabited villages according to the distance from the nearest town and availability of different amenities. Among the four categories of distance ranges, 97 inhabited villages are located in the distance range of 0-5 kms. from the nearest town and that the amenities of drinking water and power supply are available to all the 97 villages. The amenity of education, pucca road, communication and post and telegraph are available to 93.81 per cent, 96.91 per cent, 79.38 per cent and 74.23 per cent of the villages respectively. In the distance range of 6-15 kms., there are 206 inhabited villages that are located from the nearest town. While all these 206 villages avail the drinking water facility, the amenities of education and power supply are available to 93.69 per cent and 99.03 per cent of the villages. The medical and market/hat amenities are availed by 34.95 per cent and 89.81 per cent of the villages in this range. In the distance range of 16-50 kms. from the nearest town, there are 160 inhabited villages which avail the amenities of drinking water and power supply to cent per cent. The other amenities which are available to the majority of the villages in this range are education, post and telegraph, communication and pucca road, the percentages being 94.38, 74.38, 84.38 and 95.00 of the villages respectively. A low percentage has been found in medical and market/hat amenities, viz., 37.50 and 32.50 respectively. In the fourth category of 51+kms., there are 18 inhabited villages that are located in this distance range from the nearest town. All the 18 villages avail the facilities of drinking water and power supply, viz., 100.00 per cent. The amenities of education, post and telegraph, communication and pucca road are availed by 94.44 per cent, 77.78 per cent, 88.89 per cent and 72.22 per cent of the villages respectively. The lowest percentages recorded in this range are on the amenities of medical and market/hat, viz., 5.56, 27.78 and 5.56, respectively.

TABLE 5.—DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE

Population range	No. of inhabited villages in each range	Number (with Percentage) of villages having the amenity of							
		Education	Medical	Drinking Water	Post and Telegraph	Market/hat	Communication	Approach by Pucca Road	Power Supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
—499	29	15	..	29	11	4	16	20	29
		51.72	..	100.00	37.93	13.79	55.17	68.97	100.00

Total	481	452	165	481	373	140	408	444	479
		93.97	34.30	100.00	77.55	29.11	84.82	92.31	99.58

Table 5.— This table shows the distribution of inhabited villages according to different population ranges and amenities available. 29 villages occur in the population range of 499. Drinking water and power supply facilities are available to all these villages. Education, communication and pucca road are available to 51.72 per cent, 55.17 per cent, and 68.97 per cent of the villages respectively in this population range. Post and telegraph facilities are present only in 11 villages and market/hat amenity has recorded a very low percentage of 13.79. In other words, such facility is available only in 4 villages. There are 182 inhabited villages in the population range of 500-1,999 in which the amenity of drinking water is available to all the villages. Education, power supply, pucca road, communication and post and telegraph facilities are availed by 93.96 per cent, 89.56 per cent, 77.47 per cent and 60.44 per cent of the villages respectively. The amenities of medical and market/hat have been availed by 15.38 per cent and 17.58 per cent of the villages respectively in this range. In the third category of the population range of 2,000-4,999, 159 villages are recorded in which 155 villages avail the amenity of education, medical by 57 villages. Drinking water by all 159 villages, post and telegraph by 143, market/hat by 50, communication by 144, pucca road by 151 and power supply is by 159 villages. There are 111 inhabited villages in the population range of 5,000+ and all these villages avail the amenities of education, drinking water and power supply recording cent per cent. The amenities of post and telegraph, communication and pucca road are availed by 98.20 per cent, 96.40 per cent and 99.10 per cent of the villages respectively. While medical facilities are available to 72.07 per cent of the villages, the amenity of market/hat is available only to 48.65 per cent of the villages in this population range.

TABLE 6—MAIN STAPLE FOOD IN THE MAJORITY OF VILLAGES IN EACH TALUK

Sl. No	Name of taluk	Main Staple Food.
(1)	(2)	(3)
1	Satyamangalam	Rice and Millets.
2	Gopichettipalaiyam	Rice and Millets.
3	Bhavani	Rice and Ragi.
4	Erode	Rice and Millets.
5	Perundurai	Rice and Millets.
6	Dharapuum	Rice and Millets.

Table-6.—This table furnishes the main staple food in terms of grains consumed by the majority of population of the villages in each taluk of the district. Rice is found to be the common main staple food in the majority of villages of all the six taluks of this district, while it is being used along with millets in five taluks, in Bhavani taluk, it is consumed with Ragi.

TABLE 7—DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE

Sl. No	Name of taluk	No. of inhabited Villages	Total area	Percentage of Cultivable area to total area	Percentage of irrigated area to total cultivable area
(1)	(2)	(3)	(4)	(5)	(6)
1	Satyamangalam	73	75,655.08*	79.49	18.51
2	Gopichettipalaiyam	68	63,086.07	90.32	48.26
3	Bhavani	58	119,766.16	51.14	49.04
4	Erode	78	68,321.59	87.19	71.81
5	Perundurai	119	79,030.76	86.52	46.74
6	Dharapuum	85	216,906.43	88.45	26.58
Total		481	622,766.09	79.99	39.02

Table-7.—This table gives the distribution of inhabited villages of Periyar district according to land use. It is seen that out of a total area of 622,766.09 hectares of this district, the percentage of cultivable area to total area is 79.99 percent of which the irrigated area is only 39.02 percent. While Gopichettipalaiyam taluk possess the maximum cultivable area of 90.32 percent, Bhavani taluk ranks the lowest with a percentage figure of 51.14. Regarding irrigated areas, Erode taluk tops the other taluks where as Satyamangalam taluk has got only 18.51 per cent of the total cultivable area as irrigated area.

TABLE 8—GROWTH, DENSITY AND SEX RATIO OF URBAN POPULATION IN THE DISTRICT IN RELATION TO THE STATE

Year	PERIYAR DISTRICT						TAMIL NADU					
	Total Population			Urban Population			Total Population			Urban Population		
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)
1951	1,392,385	138,244	9.93	..	..	976	30,119,047	7,333,525	24.35	..	..	986
1961	1,492,579	205,582	13.77	+48.71	1,429	965	33,686,953	8,990,528	26.69	+22.59	1,722	963
1971	1,797,016	327,170	18.21	+59.14	1,571	944	41,199,168	12,464,834	30.26	+38.64	2,115	951
1981	2,068,462	455,203	22.01	+39.13	2,615	942	48,408,077	15,951,875	32.95	+27.98	2,722	956

Table 8 gives the details of growth, density and sex ratio of urban population in Periyar district for the decades 1951 to 1981. The percentage of urban population to total population in this district has gone up from 9.93 in 1951 to 22.01 in 1981. During this period the corresponding percentage of state urban population has also increased from 24.35 in 1951 to 32.95 in 1981. The density of urban population per sq. kilometer in Periyar district which was 1,429 persons in 1961 has increased to 1571 in 1971 which again has gone up to 2,615 in 1981. The Sex ratio for the district is 942 while for the State it is 956.

Table 2 indicates the recognition of the new towns and the declassification of old towns made in the 1981 Census. It could be seen from this table that five towns have been recognised as new towns in Periyar district during 1981, while three towns viz. Morattupalaiyam, Punjai Uthukuli and Vellakudi listed as towns in 1971 have since been declassified as rural from the list of Census towns of 1981 because these towns ceased to satisfy the urban criteria.

All Towns*		52.17	15.22	36.95	43.74	7.29	9.20	8.31	2.85	16.09

This excludes the towns relating to Salem district.

Table 10 furnishes the per capita receipts and expenditure in each town. On receipt side receipt through taxes and from other sources are furnished, while on the expenditure, the expenditure incurred in general administration (Public health and conveniences, public works, public institutions and on other aspects are furnished. Out of 18 towns in Periyar district, expenditure is less than the receipt for 14 census towns.

18	Veerappanchattiram	See Erode Urban Agglomeration.			
	All Towns*	0.44	0.77	0.99	1.85

* This excludes the towns relating to Salem district.

It is seen from Table 11 that for every 10,000 urban population in Periyar district, the ratio of Higher Secondary Schools is 0.44, Secondary Schools 0.77, Middle Schools 0.99 and Primary Schools 1.85.

Bhavanisagar Town ship Committee has higher ratio of Higher Secondary Schools and Secondary Schools and Urachchikkottai Village Panchayat has higher proportion of Middle Schools per 10,000 urban population. But in the case of Primary Schools, higher proportion of 3.88 per 10,000 urban population is found in Kunuattur Town Panchayat.

TABLE 12—NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS

Table 14 furnishes the most important commodity manufactured, exported and imported in each town. It can be seen that several products are manufactured and exported to other places from some of the towns in this district. Of these, textile is an important item of the district.

SECTION I

VILLAGE DIRECTORY

NOTE EXPLAINING THE CODES USED IN VILLAGE DIRECTORY

NA .. Information not available

EDUCATIONAL:

P .. Primary or Secondary School
M .. Junior Secondary or Middle School
H .. Matriculation or Secondary School
PUC .. Higher Secondary/Intermediate/Pre-University/Junior College
C .. College, Any College (Graduate level and above) like Arts, Science, Commerce, etc
I .. Industrial School
Tr. .. Training School
AC .. Adult Literacy Class/Centre
O .. Other educational institutions. These include Sanskrit Pathshala, Senior Basic School, Makhtab, etc

MEDICAL:

H .. Hospital
MCW .. Maternity and Child Welfare Centre
MH .. Maternity Home
CWC .. Child Welfare Centre
HC .. Health Centre
PHC .. Primary Health Centre
PHS .. Primary Health Sub-Centre
O .. Others
D .. Dispensary
FPC .. Family Planning Centre
TB .. T.B. Clinic
NH .. Nursing Home
RP .. Registered Private Practitioner
SMP .. Subsidised Medical Practitioner
CHW .. Community Health Worker

DRINKING WATER :

T .. Tap Water
W .. Well Water
TK .. Tank Water
TW .. Tube Well Water
HP .. Hand Pump
R .. River Water
F .. Fountain
C .. Canal
L .. Lake
S .. Spring
N .. Nallah
O .. Others

POST AND TELEGRAPH :

PO .. Post Office
 TO .. Telegraph Office
 PTO .. Post and Telegraph Office
 Phone .. Telephone Connection

COMMUNICATIONS :

BS .. Bus.
 RS .. Railway Station
 NW .. Navigable Waterways (including river, Canal, back-waters, etc.)

APPROACH TO VILLAGE :

PR .. Pucca Road
 KR .. Kaccha Road
 NR .. Navigable River
 NC .. Navigable Canal
 NW .. Navigable Water Way (Other than river or Canal.)

POWER SUPPLY :

ED .. Electricity for Domestic purpose
 EA_g .. Electricity for Agriculture
 EO .. Electricity for other purposes like industrial, commercial etc
 EA .. Electricity for all purposes listed above

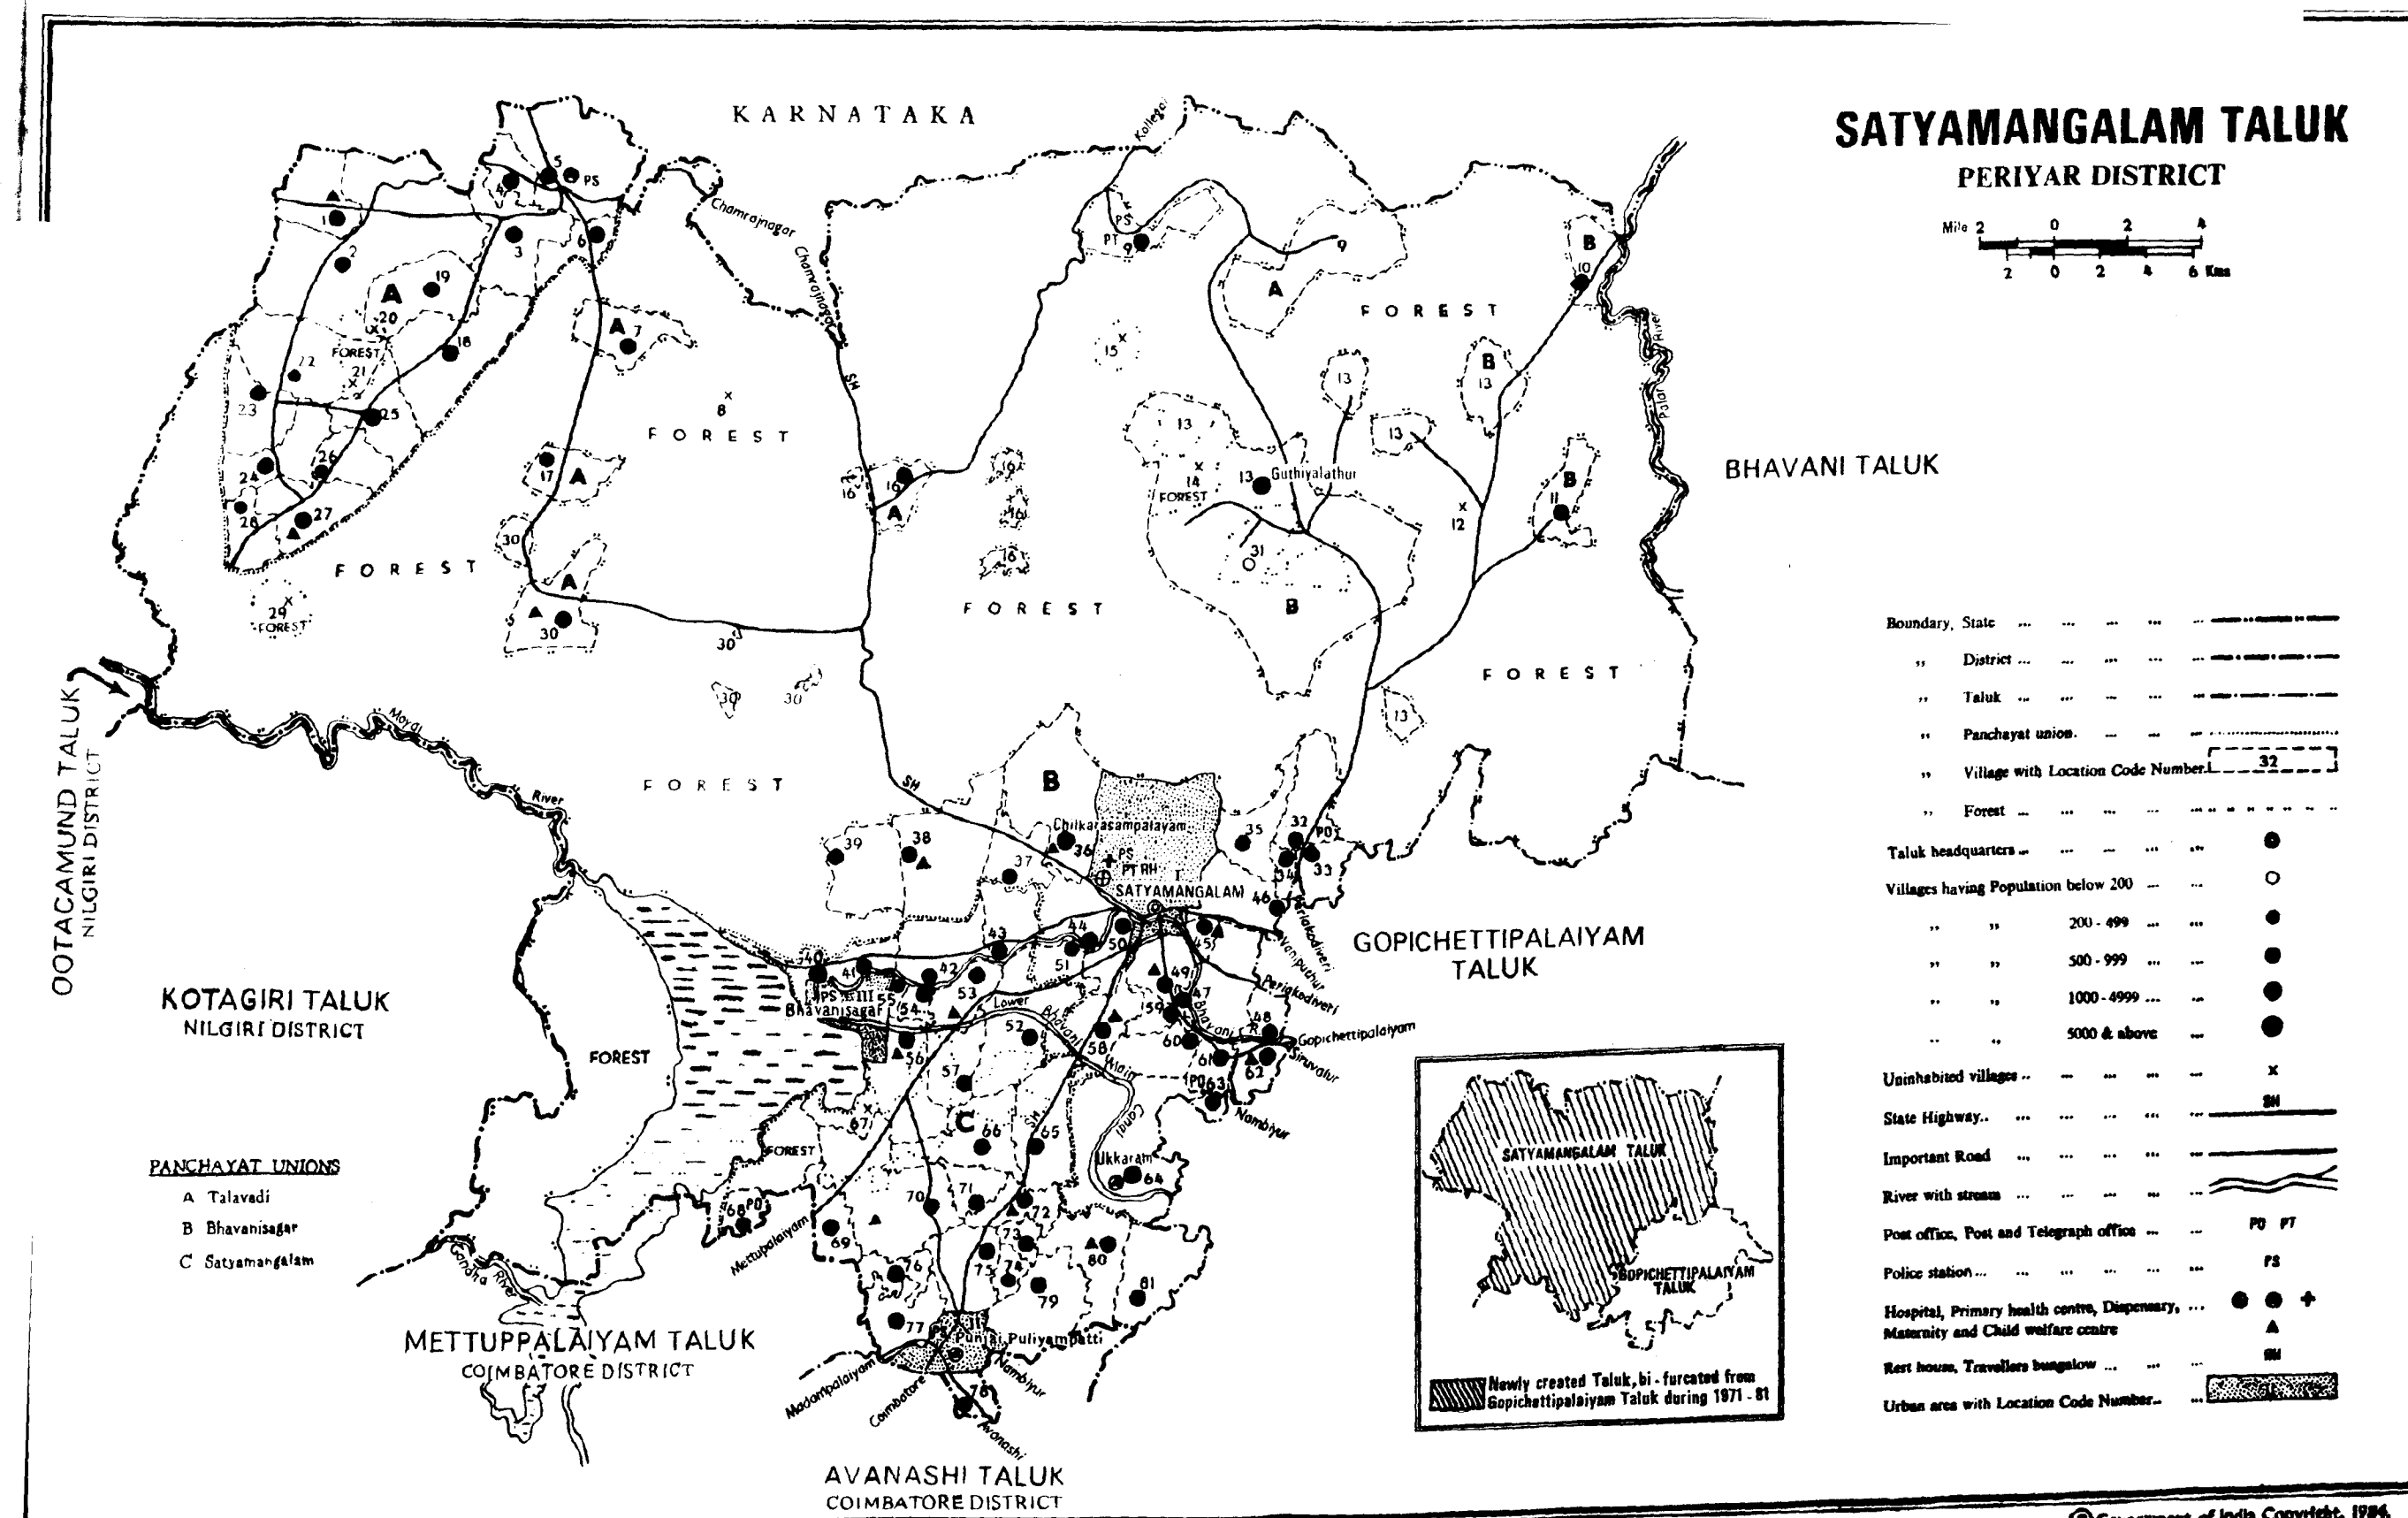

IRRIGATED BY SOURCE :

GC .. Government Canal
 PC .. Private Canal
 W .. Well (without electricity)
 WE .. Well (with electricity)
 TW .. Tube well (without Electricity)
 TWE .. Tube Well (with electricity)
 TK .. Tank
 R .. River
 L .. Lake
 WF .. Water fall
 O .. Others
 T .. Total

OTHER ASPECTS :

W .. Copies of the newspapers coming in the Village
 M .. Motor Cycle/Scooters available in the Village
 C .. Cars/Jeeps available in the Village
 T .. Tractors available in the Village
 Nil particulars

SECTION II.
TOWN DIRECTORY.

NOTE EXPLAINING THE CODES USED IN THE TOWN DIRECTOR Y

STATEMENT I & III.

Class of towns by population :

Population.	Class.
1,00,000 and above	I
50,000—99,999	II
20,000—49,999	III
10,000—19,999	IV
5,000—9,999	V
Below 5,000	VI

Civic administration status of the town :

M. Corp.		Municipal Corporation/Corporation.
M		Municipality
NP		Nagar Panchayat/Town Panchayat
GP		Gram Panchayat/Village Panchayat
TC		Town Committee/Town Area.
CB		Cantonment Board/Cantonment.

STATEMENT IV & IV A

SC	—	Scheduled Castes
ST	—	Scheduled Tribes.

Type of Road :

PR	—	Pucca Road
KR	—	Kutcha Road

System of sewerage :

S	—	Sewer
OSD	—	Open surface drains
BSD	—	Box surface drains
SD	—	Silk dryins
CP	—	Cesspool method
Pi	—	Pit system
PR 12-2—23A		

Method of disposal of night soil.

HL	—	Head loads
B	—	Baskets
WB	—	Wheel barrows
ST	—	Septic tank latrines.
S	—	Sewerage

System of storage of water :

OHT	—	Overhead tank
SR	—	Service reservoir.
IG	—	River infiltration gallery
BWP	—	Borewell pumping system
PT	—	Pressure tank

Source of drinking water :

TW	—	Tube well water/Hand pump
T	—	Tap water.
W	—	Well water
TK	—	Tank water

STATEMENT V.

Medical facilities :

H	—	Hospital
D	—	Dispensary
HC	—	Health Centre.
FC	—	Family Planning Centre
TB	—	T. B. Clinic
NH	—	Nursing Home
O	—	Others.
A	—	Ayurveddic
U	—	Unani
HOM	—	Homeopathic

Educational facilities :

A	—	Arts only
S	—	Science only
AS	—	Arts and Science only
C	—	Commerce only
AC	—	Arts and Commerce only
ASC	—	Combined for all categories Arts, Science and Commerce.
L	—	Law

Recognised, shorthand, typewriting & other vocational Institutions :

SH	—	Shorthand
Type	—	Typewriting
SH. Type	—	Shorthand & Typewriting
O	—	Others

Public libraries and reading rooms :

PL	—	Public Libraries
RR	—	Reading Rooms
