Taluk Map	Facing P. 122
Alphabetical list of villages	123-124
Village Directory Statement	126-145
6. Musiri Taluk	
Taluk Map	Facing P. 148
Alphabetical list of villages	149-150
Village Directory Statement	152-169
7. Karur Taluk	
Taluk Map	Facing P. 172
Alphabetical list of villages	173-174
Village Directory Statement	176-193
8. Kulittalai Taluk	
Taluk Map	Facing P. 196
Alphabetical list of villages	197-198
Village Directory Statement	200-217
9. Tiruchchirappalli Taluk	
Taluk Map	Facing P. 220
Alphabetical list of villages	221-222
Village Directory Statement	224-237
10. Manapparai Taluk	
Taluk Map	Facing P. 240
Alphabetical list of villages	241-242
Village Directory Statement	244-261
Appendix-I Taluk wise Abstract of Educational, Medical and other amenities	262-265
Appendix-II Land utilisation data in respect of non-municipal towns	266-267
Appendix-III Taluk wise list of villages where no amenities are available	268
Appendix-IV List of Villages according to the proportion of Scheduled Castes and Scheduled Tribes to the total population by ranges	270-315
SECTION II—TOWN DIRECTORY	317
Note explaining the codes used in the Town Directory	319-321
Statement I Status and Growth History	322-327
Statement II Physical Aspects and Location of Towns, 1979	328-331
Statement III Municipal Finance, 1978-79	332-337
Statement IV Civic and other amenities, 1979	338-343
Statement IV-A Civic and other amenities in notified slums, 1979	344-351
Statement V Medical, educational, recreational and Cultural facilities, 1979	352-359
Statement VI Trade, Commerce, Industry and Banking, 1979	360-363
Appendix Towns showing their out growths with population	364

Responsibility for the correctness of internal details shown on the maps rests with the Publisher.

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Government, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part—A related to village and town directory, Part—B to village and town PCA and Part—C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of Scheduled Caste and Scheduled Tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class—I and Class—II towns (Statement IV—A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven

statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that part—A of the volume contains village and town directory and part—B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Taluk/Town level. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value. The district and taluk level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri A. P. Muthuswami, I.A.S., Director of Census Operations, Tamil Nadu on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi,
26th April, 1982.

P. PADMANABHA,
Registrar General, India.

PREFACE

It has been the tradition of the Government of Tamil Nadu to publish immediately after each Census, a District Census Handbook separately for each district containing the Census statistics besides other valuable data of local importance, for the use of the State Government, district administration, research scholars and other data users. The first series of District Census Handbooks were brought out immediately after the 1951 Census, and the present publication after the 1981 census is the fourth in the series.

The Census statistics presented in this publication were collected during the census operations in February—March, 1981, as at the sun rise of the 1st March, 1981. The other statistics in this publication have been collected from various departments of the State and Central Governments.

This publication consists of the following two parts

Part—A: Village and Town Directory and

Part B: Village and Town wise Primary Census Abstract

Taking into account the increasing and varied developmental and other welfare measures undertaken by the Government, the scope and content of the data in this publication have been considerably enlarged and improved to meet the requirements of the planners and the other data users. In particular, certain inset tables based on census and other data have been included in this publication with brief analytical notes thereon.

This publication contains a brief history of the district highlighting the major characteristics of the district in relation to the economic resources like forestry, minerals, etc. besides the social, cultural, religious and historical aspects. The district and taluk maps in this publication give the administrative units up to village level, the rural and urban units, the location of towns and cities, communication facilities and other related details.

The facilities and amenities available in respect of education, medical, drinking water, post and telegraph, markets, communication, etc. in each village and town have been included in this publication, and an important feature is that wherever the above facilities and amenities are not available in any particular village/town, the nearest place where they are available has also been reported.

Another interesting feature in this publication is that villages with none of these amenities have been listed out separately for the pointed attention of the planners and administrators.

Certain tables present data exclusively in respect of the weaker sections of the society belonging to the Scheduled Caste and Scheduled Tribe.

The land use pattern in respect of rural and urban areas have also been reported in this publication which would meet the requirement of micro level planning for rural and urban areas.

The data in respect of urban areas, apart from the medical and other facilities available, relate to the growth of towns, the availability of protected water supply, and what is important, the civic amenities available in the slums of the urban areas.

ANALYTICAL NOTE

(I) CENSUS CONCEPTS

Rural and Urban Areas

Census figures are generally presented separately for rural and urban areas. In the 1981 Census, the definition of an urban unit is more or less the same as in the 1961 and 1971 Censuses but for some minor variations. The urban areas of 1981 Census are :

- (a) All places with a Municipality, Corporation or Cantonment Board or notified town area
- (b) All other places which satisfied the following criteria
 - (i) A minimum population of 5,000
 - (ii) At least 75 percent of the male working population engaged in non-agricultural (and allied) activity
 - (iii) A population of atleast 400 per km² (or one thousand per square mile).

The above definition of urban area varies slightly from that of 1961 and 1971 Censuses in that the males working in activities such as fishing, logging etc. were treated as engaged in non-agricultural activity and therefore contributed to the 75 percent criterion in the 1961 and 1971 Censuses, whereas in the 1981 Census, these activities are treated as on par with cultivation and agricultural labour for the purpose of this criterion. The rest of the areas not treated as urban are classified as rural areas.

Urban Agglomeration

Urban Agglomeration is a new concept formed during 1971 Census and this replaces the concept of town group adopted in 1961 Census. An Urban Agglomeration may be explained as follows: "It must form a continuous urban spread constituting a town and its adjoining urban outgrowth or two or more physically contiguous towns together with continuous well recognised urban outgrowth, if any, of such towns".

Census House

A Census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Household

A household is a group of persons, who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented any of them from doing so.

Scheduled Castes/Scheduled Tribes

For the enumeration of Scheduled Castes and Scheduled Tribes in Census, the names of Scheduled Castes and Scheduled Tribes as recognised in Tamil Nadu based on the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act of 1976 (Central Act 108 of 1976) were followed. The enumerators were instructed to record a person as a Scheduled Caste/Scheduled Tribe provided the name given by the person was found in the list supplied to them.

Literates

In 1981 Census, a literate was defined as "a person who can both read and write with understanding in any language". A person who could merely read but cannot write, was not a literate. It was not necessary that a person considered a literate must have received any formal education or have passed any minimum educational standard.

Work

Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

Main Workers and Marginal Workers

A worker was identified with reference to a reference period preceding the census. The reference period was the period immediately preceding the census.

at 1961, 1971 and 1981 censuses are also provided in this statement.

For size class of town the following population norms as per 1981 census have been adopted.

Population	Class
1,00,000 and above	I
50,000 — 99,999	II
20,000 — 49,999	III
10,000 — 19,999	IV
5,000 — 9,999	V
below 5,000	VI

Location Code Number of Towns

To distinguish the town from the village, the location code numbers for towns have been given in Roman numerals and these numbers have been assigned in a continuous order for the district as a whole.

Statement II: Physical Aspects and Location of Towns, 1979.

Under physical aspects, annual rainfall and temperature figures are furnished. These particulars were obtained from the Commissioner of Statistics, Madras. If the information is not available for any particular town the nearest town for which it is available is given. For col. (9) the nearest city with population of one lakh and more is furnished according to 1981 census. For the other cols. figures obtained from the Municipal Commissioners and Panchayat Union Commissioners are given. The 'Zero' within brackets in cols. 10 & 11 denotes that the referent town itself is enjoying road transport facilities.

Statement III: Municipal Finance, 1978-79

The civic administration status of the town, the receipt through tax, properties and powers, Government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services are given in this statement. The sources of receipt and expenditure are furnished in terms of rupees in hundreds.

Statement IV: Civic and Other Amenities, 1979

The civic and other amenities existing in the towns as in 1979 are given. The data were obtained

from the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Col. 3 — Civic administration status

It is a new column introduced in this statement to facilitate analysis.

Col. 4 — Population

It is also a new column introduced in this statement to measure the amenities in respect of population.

Col. 5 - Scheduled Castes and Scheduled Tribes population.

It is introduced to know the size of population of the weaker sections of the community in the town.

Electrification

Electrification particulars were obtained from the Tamil Nadu Electricity Board through the Municipal Commissioners and Panchayat Union Commissioners.

(i) Domestic Connections

This refers to the number of services given to houses for domestic purposes like fans, lighting etc.

(ii) Industrial Connections

This refers to the number of services effected to L. T. Industries such as workshops, flourmills, oil mills, grinding machines, cotton ginning and engineering industries etc.

(iii) Commercial Connections

This refers to the services given to shops, business houses, public institutions like offices and schools and commercial establishments.

(iv) Road lighting points

This refers to the number of points of street lights which will be maintained by the Board and for which consumption charges will be paid to the Board by respective local bodies. For some town panchayats the number of services effected alone has been furnished under street lights and not the points.

(v) Other Connections

This refers to the number of services effected for agricultural purposes, huts, public water supply systems, cottage industries, etc.

Statement IV-A: Civic and Other Amenities in Notified Slums, 1979

This is a new statement on civic and other amenities in notified or recognised slums of class I and II towns. Generally, in cities or towns having slums, the local authority such as Municipality or Municipal Corporation or even the development authority notified the recognised slums. Such notification is linked up with the availability of funds from the State Government for slum clearance.

Name of the slum and the details of the area, population, length of the paved roads, system of sewerage, number of different types of latrines and method of disposal of night soil, etc. are given in this statement.

Statement V: Medical, Educational, Recreational and Cultural Facilities, 1979.

In this statement medical, educational, recreational and cultural facilities of the towns as in 1979 are furnished. The data for educational and medical facilities were obtained from the Municipal Commissioners and Panchayat Union Commissioners for the concerned towns, and from the Director of Secondary Education and Director of Public Health respectively.

Col. 10 - Recognised shorthand typewriting and other vocational training institutions.

The term 'recognised' refers to institutes recognised by some statutory authority like Education Department, Commerce Department, Labour Department, etc. of the Government or by Semi-Government or autonomous bodies, public sector project, etc.

Cinemas refer only to the permanent cinema theatres and do not include touring cinemas.

Col. 16 - Number of working women's hostel with number of seats.

This is a new column introduced in this statement in 1981. Considering the increasing employment of women in urban areas, the housing

needs of working women has been an important problem.

Statement VI: Trade, Commerce, Industry and Banking, 1979

In this statement, trade, commerce, industry and banking facilities in the town as in 1979 are furnished. Banking particulars were obtained from the Reserve Bank of India. The information on number of agricultural and non-agricultural credit societies were collected from the Registrar of co-operative societies through the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Scope of Primary Census Abstract

The Primary Census Abstract, as it is called presents basic data for each village or segment of a village (in cases where such village segments form different panchayats) in the 'Village wise Primary Census Abstract' and for each Ward Division of a Town in the 'Urban Primary Census Abstract'. The format of the Primary Census Abstract for the villages and towns in 1981 has been slightly modified as compared to the 1971 Primary Census Abstract.

The Primary Census Abstract gives such basic information as area in hectares/square kilometres, occupied residential houses, number of households, total population, Scheduled Castes and Scheduled Tribes population, literates, main workers, division of main workers into cultivators, agricultural labourers, workers in household industry and other workers, marginal workers and non-workers in respect of each unit. The Urban/Village Primary Census Abstract gives this information for each village and each urban ward. With a view to ensure comparability and to enable data users to derive the figures either for a revenue village or panchayat according to their requirements, the data are presented for segments of villages also. Wherever portions of one village happen to be in two or more panchayats the segment wise data have to be used separately or added with some other segment data so as to derive panchayat data. For example, if portions of a revenue village bearing Location Code No. 10 forms part of two panchayats, the figures are given separately for each portion of the village against Location Code No. 10 a/b and 10 b.b. The total figures for the entire revenue village by adding the figures given against both the segments viz. 10 a/b and 10 b/b are given in the Village Primary Census Abstract. If, instead, the panchayat figures are required, the data for the

concerned village segment or segments relating to the panchayats concerned, are to be added up to arrive at the total figures for the respective panchayat.

An appendix presented in the case of the Urban Primary Census Abstract gives 1981 population, Scheduled Castes and Scheduled Tribes population for each enumerator block of the town. This is meant for the use of administrative and election authorities in urban areas. Such data are also required by urban planners and researchers for conducting other studies in selected blocks.

Mode of Presentation

The consolidated figures for the district and each taluk are given in the beginning for Total, Rural and Urban areas followed by each Town/Urban Agglomeration, under the caption 'District Primary Census Abstract'. Then follows the Primary Census Abstracts for Scheduled Castes/Scheduled Tribes. An alphabetical list of revenue villages is then given along with the Census Location Code Numbers of 1981 Census followed by the Village wise Primary Census Abstract for each taluk. In the foot note given at the end of the Village wise Primary Census Abstract, the villages included in Municipalities or Census towns are indicated. In an annexure, the names of villages and their constituent panchayats are given. Then, follows the Urban Primary Census Abstract. In an appendix to the Urban Primary Census Abstract, the population and Scheduled Caste/Scheduled Tribe figures for each Enumerator Block of a town are given. This arrangement is followed for each taluk in the district.

Maps

Apart from the District Map given as frontispiece, map for each taluk showing the Village Location Code Numbers along with their boundaries have also been included at the appropriate places. As compared with the maps presented in 1971

District Census Handbook, several improvements have been effected in the maps presented in this volume. All towns are shown in the district and taluk maps with shading screens and also spheres according to the population size of towns.

Area Figures

In the District Primary Census Abstract, the area figures are given in Square Kilometres for Total, Rural and Urban areas. In the Village wise Primary Census Abstract, the area figures for each Location Code Unit are given in hectares upto two decimals. The area figures for each town in square kilometre is also given at the end of the urban Primary Census Abstract. In the District Primary Census Abstract, the area figures of the District total represent the "Geographical Area" figures supplied by the Surveyor-General. Figures for urban areas are those supplied by the Local Bodies and revenue authorities. The urban area of a district has been arrived by adding the urban area figures of each taluk within the district. Area figures for the rural areas of District/Taluk are derived by subtracting the urban area figures from the total area of the District/Taluk. The total of the area figures of the taluks will not tally with the district figures because the taluk area figures represent the 'Land Use' area and are derived from the figures supplied by the Tamil Nadu Directorate of Survey and Land Records, while those of the district represent "Geographical Area" supplied by the Surveyor-General of India. The total of the village area given in the Village wise Primary Census Abstract may not tally with the rural area of the taluk given in the District Primary Census Abstract as the taluk area figures take into account hills, forests and rivers, etc., where as the village area may not include the same. For conversion the ratio is 100 hectares = 1 square kilometre.

It is hoped that the pattern of presentation of basic Census particulars for each district as explained above and adopted in this volume would be found convenient by data users.

TIRUCHCHIRAPPALLI DISTRICT - AN OUTLINE

Introduction

Tiruchchirappalli district is an ancient place of historical importance. The Rock Fort, rising abruptly from the plains to a height of 83 metres in the centre of the city on the southern bank of the river Cauvery is a famous land mark of Tiruchchirappalli. The district has a rich and varied cultural heritage. It is also known for its exquisite handicrafts, castings and South Indian musical instruments. Its economy is essentially agrarian, its agriculture being sustained by a net-work of irrigation sources and improved methods of cultivation.

Brief History of the District

Tiruchchirappalli played a predominant role in the later history of South India. Cholas were the early rulers of this region right from the period of Sangam Age. Among the early Chola rulers, Karikala Chola (50-95 A.D.) was the most powerful and sometime after him the Pandyas followed by the Pallavas held sway over this region for short periods. Chola rule was once again revived by Vijayalaya. This was the beginning of great Chola empire and with the succession of powerful rulers Tiruchchirappalli remained under Chola supremacy.

During the year 1251, Pandyas under Jaya Sundara Pandya rose to power and Tiruchchirappalli was brought under Pandya rule by putting an end to Chola supremacy over Tiruchchirappalli. Pandya rule over this region lasted a little over half a century followed by Muslim domination till 1334-35.

In the middle of the fourteenth century, the Muslims were defeated by the Vijayanagar ruler and Tiruchchirappalli was brought under Nayak rule. Vijayaranga Chockkanatha Nayak was the last among Nayak rulers and after his death in 1731 without heir, a power struggle followed to the throne of the Nayak kingdoms between Meenakshi, the widow of the late king and Bangaru Thirumalai, the father of his adopted son and later between

Meenakshi and Chanda Saheb, the confidential adviser of the Nawab of Arcot. Ultimately, Chanda Saheb, proclaimed himself as the ruler.

In 1741, the Marathas invaded Tiruchchirappalli and took Chanda Saheb as a captive. Chanda Saheb succeeded in securing freedom in 1748 and soon got involved in the famous war for the Nawabs place in the Carnatic against Anwar-ud-din, the Nawab of Arcot and his son Mohammed Ali. What followed was actually a struggle between the European powers for colonial expansion in South India with Tiruchchirappalli as the pivot which ultimately led to the triumph of the English.

When about the year 1750 A.D. Hyder Ali came to power. The history followed was a power struggle between Hyder Ali and later Tippu Sultan with the British. After the death of Tippu Sultan, the English took the Civil and Military administration of the Carnatic in 1801. Tiruchchirappalli thus came into the hands of the English and the district was formed in 1801 under Mr. Wallace, the first English Collector.

Formation of Tiruchchirappalli District and Subsequent Jurisdictional Changes

The evolution of Tiruchchirappalli district in its present form may be appreciated from the following Chronological events :

Until the Puckle scheme for revision of taluk and village establishments was introduced, Tiruchchirappalli consisted of nine taluks which under the new scheme were regrouped into five. Transfer of Karur taluk from Coimbatore district during 1910 and formation of Lalgudi taluk from parts of Musiri and Tiruchchirappalli taluks raised the number of taluks in the district to seven. Subsequently, three new taluks (viz.) Kulattur, Alangudi and Tirumayam were added on by the merger of Pudukkottai with Tiruchchirappalli during 1948. The number of taluks in the district raised to ten remained unchanged till 1961.

Between 1961 and 1971, three new taluks Ariyalur, Turaiyur and Manapparai were formed from parts of Udayarpalayam, Musiri and Kulittalai taluks respectively raising the number of taluks in the district to thirteen.

During the decade 1971-81, a major change in the administrative setup of the district was effected by the formation of Pudukkottai district, in January 1974, by transferring Kulattur, Alangudi and Tirumayam taluks from Tiruchchirappalli district.

There are now ten taluks in the district. List of revenue divisions and taluks in the district is given below :

Name of the Revenue Division	Name of the Taluk
Tiruchchirappalli	Tiruchchirappalli
Musiri	Musiri
	Lalgudi
	Turaiyur
Ariyalur	Ariyalur
	Perambalur
	Udayarpalayam
Karur	Karur
	Manapparai
	Kulittalai

The district is divided into 18 Assembly constituencies of which three are reserved for Scheduled Castes. There are three parliamentary constituencies of which one is reserved for Scheduled Castes.

The district comprises of six Municipalities, 31 Panchayat Unions, 45 Town Panchayats, 882 Village Panchayats and 980 villages of which 894 are inhabited and 86 are uninhabited. There are 29 urban units in the district.

Physical Features

Tiruchchirappalli with a population of 3,612,320 as per the figures of 1981 census ranks sixth in Tamil Nadu. The density of population in the district is 326 per sq. km. as against 372 in the state.

Tiruchchirappalli is the centrally located district in Tamil Nadu state and is 320 kms. from Madras. The district has an area of 11095.0 km² spread between 10° and 11.30° of the Northern

latitude and 77.45° of the Eastern longitude. It is bounded by Salem and South Arcot districts on the North, Thanjavur on the East, Pudukkottai and Madurai on the South and Coimbatore and Periyar on the West.

It is a land locked district with no coastal border. The even topography of the land throughout the district renders subdivision into natural regions rather difficult. The Pachaimalai hills situated north of Perambalur and Turaiyur taluks is the most important hill in the district. The average height of the hill is 610 metres though a few of its peaks rise to about 1036 metres above the sea.

The greater part of the district consists mainly of an undulating plain bisected by the valley of Cauvery. The monotony of the plains is relieved here and there by broken and isolated masses of crystalline rocks, the prominent of which are the Thoppaisamimalai (1028 metres) and the Vellimalai (838 metres) in the south of Kulittalai taluk, Rangamalai rocks (945 metres) in the extreme south of Karur taluk, the Golden Rock and the great Fort.

The important rivers in the district are the Cauvery and its distributaries. Entering the district at its western extremity the Cauvery flows towards east. The head of Cauvery delta is at the upper Anicut, 16 kms. west of Tiruchchirappalli where the river bifurcates into two large branches. The northern branch known as Coleroon is mainly a flood carrier, while the southern branch retains the name Cauvery.

Amaravathi another important river in the district flows from the Anamalai and Travancore hills while Naganji and Kodavanar the tributaries of Amaravathi originate from the hills in the adjoining district.

The Iyar, Karuvattar, Mamundiyar, Nandiyar and Noyyil are the other rivers in the district.

The predominant soil in the district is red sandy with scattered pockets of black soil. The best quality of soil is found in Perambalur taluk while the soil found in the Karur Taluk is the poorest. The soil in the district is best suited for raising drycrops. In the absence of fertile soil, the prominent role Tiruchchirappalli is playing in the agricultural sector in the state is due mostly to its irrigation facilities.

Climate and rainfall

The district has a high mean temperature and a low degree of humidity. Eventhough the region is not subjected to extremes of climate, the summer months are quite hot and the difference between maximum and minimum temperatures are only moderate.

The atmosphere is dry with little moisture during the beginning months of the year. This season being cool is pleasant and enjoyable. By March the mercury acquires an uptrend which is gradual and persistent. This trend of the barometer indicate the ushering in of summer with its hot days. This period of hot sun prevails till June when South West Monsoon sets in which brings scanty rain. This monsoon period lasts till August. The heaviest rainfall occurs during October to December when the North-East Monsoon sets in. In 1979-80 little over half of annual rainfall, about 535 m.m. occurred during North-East Monsoon period.

A statement showing the Month wise rainfall in m.m. in Tiruchchirappalli district during the period 1979-80 is given below

Name of the month and Year	* Normal rain fall	Actual rain fall	Percentage departure from the Normal rainfall
June 1979	30.3	51.9	
July 1979	37.4	71.9	
August 1979	91.6	74.2	
September 1979	114.0	216.5	
Total of South west Monsoon period	273.3	414.5	+51.7

Name of the month and Year	* Normal rainfall	Actual rainfall	Percentage departure from the Normal rainfall
October 1979	183.1	138.3	
November 1979	149.7	368.8	
December 1979	62.0	28.1	
Total of North East Monsoon period	394.8	535.2	+35.6
January 1980	28.1	Nil	
February 1980	12.4	Nil	
Total of winter period	40.5	Nil	- 100
March 1980	14.1	3.0	
April 1980	42.9	30.8	
May 1980	77.0	37.6	
Total of hot weather period	134.0	71.4	-46.7
Tiruchchirappalli District	842.6	1021.1	+21.2

*Normal : Average of 50 Years rainfall ending 1950,

Land & Land use pattern

The land use breakup for the district as per 1979-80 is shown below

Land use	District		State	
	Area in '000 hectares	Percentage to total area	Area in '000 hectares	Percentage to total area
Total geographical area as per village papers	1,112	100	13,002	100
Forest	55	5.0	2,021	15.6
Barren and uncultivable land	36	3.2	603	4.6
Land put to non agricultural use	160	14.4	1,719	13.2
Cultivable waste	44	4.0	336	2.6
Permanent pastures and other grazing lands	28	2.5	157	1.2
Land under tree crops and groves	12	1.1	199	1.5
Current fallows	153	13.8	1,305	10.0
Other fallow lands	25	2.3	427	3.3
Net area sown	597	53.7	6,232	48.0

Fifty four percent of the geographical area of the district comes under cultivation as compared to forty eight percent for the state followed by area under non-agricultural uses such as Urban land and settlements which account for fourteen percent of the total area, land under fallows-current fallows, cultivable waste and other fallow lands cover twenty percent of the total area while forests occupy as little as five percent.

Minerals and Mining

The district has a fairly rich mineral deposits. The upper region contains only a moderate number of valuable minerals of which, the magnetic iron beds in the Musiri are most important. Celestite, Silliminite, Cordierite, Magnesite, Stealite, Kankar and phosphatic nodules occur at various places in the district, but with the exception of building stone none of these are of particular importance nor are they commercially exploited. A good deal of building stone is quarried in Tiruchchirappalli and Kulittalai taluks.

Following are the major minerals obtained in the district.

	Production (in tonnes)
Limestone	852,237
Gypsum	16,564
Fireclay	12,226
Quartz	4,051
Felspar	5,181

The most important mineral based industries in the district are cement and refractories both of which are produced by Dalmia cements and its sister concern Dalmia ceramics at Kallakkudi and Palanganatham in Lalgudi. Other units producing cement in the district are located at Ariyalur and Puliur.

Electricity

There are no electricity generating stations in the district. The electric energy is obtained from the common grid of the Tamil Nadu Electricity Board.

The consumption of electricity for different purposes in the district during 1979-80 is as follows.

	Consumption in million units	
	L. T. Consumption	H. T. Consumption
Domestic	9,070	—
Commercial	3,570	28,823
Public lighting	3,249	—
Industrial	8,178	148,120
Water works	1,434	—
Agricultural	121,768	—
Railways	10,845	—

In the industrial sector, the Textiles and cement industries, the Bharat Heavy Electricals Limited and the Defence production unit, closely followed

by iron and steel and chemical industries are the important bulk consumers of electricity.

The lift irrigation system operating in the district consists in tapping the underground water by means of pumpsets either operated by oil engines or by electric motors, with the extension of the electricity net work, the oil engines are being replaced by electric motors. As on 31st March 1980, 56,596 pumpsets in the district have been energised.

As on 31-3-1980, 872 villages and 4,203 hamlets have been provided with electricity. The rural electrification scheme not only includes street lighting and energising of pumpsets, but also provides power to various small scale and cottage industries in the rural sector.

Forest

The forest resources of the district are meagre as compared to the state as a whole. While 15.6 percent of the total geographical area of the state is under forests, the district has only 5.0 percent. The district forests are poor not only in area but also in quality. Most of the forests in the district are tropical dry deciduous and tropical dry thorn evergreen.

The chief forest products are firewood, casurina, bamboo, eucalyptus hybrid and to a lesser extent sandalwood and timber such as Teak, Rosewood, Pillamarudu, etc.

According to the National Forestry Resolution of 1952, the optimum area under forests is to be one third of the total geographical area. Considering the area devoted to intensive cultivation and the topography of the region the standard recommended is unattainable. Area over which forests could be extended are those presently classified as not available for cultivation, cultivable waste and long fallows. Some uncultivable areas however are unsuitable for forests. Long fallows if they are cultivated once in three years would not be available for afforestation. A good part of cultivable waste could be reclaimed.

Special steps are taken to conserve the forest areas and to ensure among other things, adequate pasture for livestock, supply of firewood for domestic consumption and raw materials for industries.

With the social forestry programme in Government lands, the forest department has enlarged its activities and interest even outside the reserve

forest. Under this programme plantations were raised over 2,332 hectares at a cost of Rs. 18.68 lakhs during 1981-82.

Under the fifth five year plan, large scale development programmes have been carried out for the past ten years. An area of not less than 900 hectares is taken up every year under plan and non-plan schemes for implementing forestry works.

The total annual revenue from forest for the year 1981-82 works to Rs. 12.58 lakhs. About 7,605 cubic metres of fire wood valued at Rs. 3.21 lakhs, 2,934 tonnes of eucalyptus hybrid worth Rs. 2.35 lakhs, 36 tonnes of Heart wood valued at Rs. 6.55 lakhs and 80 tonnes of bamboo valued at Rs. 0.31 lakhs form the bulk of the produce.

Agriculture

The economy of the district is mainly agriculture. Farm output provides not only the food requirements of the district but a sizable portion of it exported to other parts of Tamil Nadu, provides sustenance to seventy percent of the labour force in the district and forms the basis for a vast market of consumer goods and agro-based industries.

In Tiruchchirappalli, which lacks employment oriented large scale industries, agriculture naturally plays a dominant role in the development of the economy. Expansion of the consumer goods industries such as sugar, leather and leather goods, vegetable oils, etc. for which there is good scope in the district are based on the farm produced raw materials and hence the expansion of agriculture both in terms of quality and quantity of produce has become of paramount importance.

Productivity in agriculture is influenced by a number of factors, chief among them being soil, climate, irrigation, marketing, credit facilities and agricultural practises and techniques.

The soils of the district are generally of medium fertility. The alluvial type of soil well supplied with lime potash and magnesium which is conducive to raising of crops throughout the year are found on either side of river Cauvery in Musiri, Lalgudi, Tiruchchirappalli and Kulittalai taluks.

The problems under land holdings have two aspects (viz.) the existing size of the individual production units and the actual pattern of the distribution of the plots under each unit denoted commonly by the terms sub-division and fragmen-

tation. Subdivision has a direct effect on the size of holdings and has been the cause of uneconomic units in agriculture. Both subdivision and fragmentation have hindered the application of efficient methods of cultivation.

There are 5.69 lakh operational holdings in the district as on 1979—80 of which 2.32 lakh holdings are the below 0.5 hectares, 1.24 lakh holdings are between 0.5 to 1.0 hectares and 1.09 lakh holdings are between 1.0 to 2.0 hectares. Thus more than three fourths of the cultivable area is in small parcels and this situation is not conducive for introduction of modern methods of cultivation.

The prominent role Tiruchchirappalli is now playing in the agricultural sector in the state is due mostly to its irrigation facilities. 2.16 lakh hectares or 36 percent of the net sown area in the district is under irrigation. The chief source of irrigation in the district is the rivers supplemented by a large number of rainfed tanks and numerous wells.

Most important of the river channels in the district is the Cauvery system. Other rivers which are tapped for irrigation are the Amaravathi, Noyyal, Ayyan, Naidiar, Marudaiyar, Vellar, Chinnar etc. The river channels together irrigate 0.84 lakh hectares. The Cauvery system is one of the oldest continuously operating irrigation system in India. The Mettur dam with a storage capacity of 93.5 T. M. C. across the Cauvery river regulate flow in the river.

The irrigation facilities are often found inadequate to raise crops throughout the year. Because of inadequate storage and the seasonal variations in river flow, there are serious shortages during the critical months. The release pattern from the reservoir is such that, there is no carry-over storage from one year to the next to meet the requirements for seed beds and land preparation for the first rice crop planting in June, for maturing the second paddy crop after the end of the north-east monsoon as well as for irrigating dry crops during the summer months. The long interval after the closure of Mettur during January to its opening during June is not properly utilised for agricultural production in spite of this period having plenty of sunshine and considered to be very conducive to crop growth. It is during this period, particularly that the need for supplementary ground water is greatest.

Wells which provided an unfailing supply of water remained an important source of irrigation in the district. There are 161,263 wells including

tube wells in the district used exclusively for irrigation during 1979—80. These wells irrigated an area of about 96,967 hectares. During the same year 56,596 electrical and 26,029 diesel pumpsets were in use for pumping water from these wells.

The other sources of irrigation in the district are tanks, springs, ponds etc. 2,382 tanks in the district irrigated an area of about 35,673 hectares.

Nearly 54 percent of the district, namely, 5.97 lakh hectares is under cultivation. Of the total cropped area 5.83 lakh hectares or 85 percent is under food crops. The principal cereal crop of this district are Paddy, Cholam, Ragi and Cumbu. Paddy is the important food crop cultivated over an extent of 1.87 lakh hectares of which 1.69 lakh hectares are irrigated. The cropping pattern adopted in the district is 28 thousand hectares under Kuruva, 125 thousand hectares under samba, 20 thousand hectares under thaladi and 14 thousand hectares under navarai. In the area irrigated by canals where water is available for eight months in a year Kuruva paddy is raised followed by thaladi. But where water is available for only five months, only one long duration crop-samba is raised. In Musiri and Thottiam blocks a long duration paddy is raised followed by short duration paddy. Navarai is raised utilising the spring water from the river Cauvery. In other areas a long duration paddy crop during samba season and irrigated cholam, cumbu or groundnut crop during the summer months is the common pattern of cultivation.

In the taluks of Manapparai, Lalgudi, Kulattur Musiri and Kulittalai, millets are raised in more or less equal proportion along with paddy. Samai, varagu are some of the millets cultivated in this district.

Among pulses, the major crops are redgram, blackgram, greengram, horsegram etc. Pulses are predominantly cultivated as rainfed crops.

Oil seeds are grown throughout the district as a summer crop. Among oil seeds, groundnut, gingelly, castor occupy important places. Groundnut cultivation is undertaken under irrigated as well as rainfed condition.

Sugarcane is the major commercial crop cultivated over an extent of 0.14 lakh hectares, purely as an irrigated crop.

Banana, citrus, mangoes and grapes are popular fruits cultivated in this district.

Korra, Kudiraivalli, Panivaragu etc., are cultivated on a minor scale while wheat, barley and important commercial crops like coffee, tea, cardamom, ginger, pepper, rubber etc. are not cultivated in the district.

Details of area under important crops in the district as on 1979—80 are as follows.

	Area under crops (in hectares)	Area irrigated
Paddy	187,325	169,056
Cholam	130,012	12,750
Cumbu	80,070	13,516
Ragi	4,711	3,077
Varagu	53,434	522
Pulses	36,718	1,201
Sugarcane	13,708	13,708
Gingelly	22,788	2,372
Groundnut	66,825	26,206
Cotton	5,670	2,394

The Intensive Agricultural programme popularly known as the package programme was introduced in the district in 1969 in 29 blocks. The broad objective of the programme is stepping up of food production, especially paddy and to help the farmers to generate more income by increasing the production through an integrated programme of supply of inputs. Under this programme, acreage under oil seeds, pulses, sugarcane and cotton have also registered an appreciable increase in the district.

The district has three state seed farms at Neikuppapudur, Pudurpalayam and Inungur. The main object of the farm is production and distribution of quality seeds of paddy, millets, pulses, oil seeds and vegetables. These farms serve as Model farms in nearby farming community on farm maintenance and scientific method of cultivation.

The agricultural extension set up has been reorganised in the state following the training and visit system with financial assistance from the World Bank. This system introduced in the district with effect from 1.7.1982 aims to build a professional agricultural extension service capable of assisting the raising of farmers production and income and of providing appropriate support for agricultural development.

An efficient marketing system, which ensures reasonable prices for the agricultural produce and avoids physical destruction of stocks through elimination of long distance transport and storage is an incentive for the farmer.

The Madras agricultural produce Act of 1959 provided for better regulation of buying and selling of all agricultural produce and for the establishment and administration of markets. A crop notified under the act is served by a market committee consisting as its members, growers and traders. It is the duty of this committee to enforce the provisions of the act, like buying and selling, enforcement of correct weights and measures, regulation of commissions and brokerage, etc.

Market committees are functioning in the district at Kiranur, Lalgudi, Manapparai and Turaiyur and additional market committees at Tiruchchirappalli, Thottiam, Tattayangarpettai, Kulittalai and Irumpoodhipettai. The commodities notified are paddy, groundnut, gingelly, cotton chillies, etc.

Animal Husbandry

Tiruchchirappalli district being an agricultural and pastoral tract animal husbandry acquires special importance.

According to the livestock census of 1977 the district had a cattle population of 868,247. The figures for sheep and goats were 674,100 and 577,167 respectively.

The activities of the department in the district are controlled by four Assistant Directors of Animal Husbandry with head quarters at Tiruchchirappalli, Musiri, Ariyalur and Karur. The following veterinary institutions in the district are engaged in rendering veterinary facilities to the livestock.

1. Clinician centres	...	1
2. Veterinary Hospitals	...	4
3. Veterinary Dispensaries	...	49
4. Clinical Labs	...	1
5. Animal disease intelligence units	...	1
6. Veterinary sub-centres	...	185

The key village scheme is the major Government programme to improve the quality of cattle under this scheme, one intensive cattle development project with two regional artificial insemination centres and 80 subcentres are functioning in the

district. There are four bull stations in the district to produce and supply good quality seed bulls to the villages. A Rinderpest District squad is functioning at Tiruchchirappalli to eradicate Rinderpest disease among cattle.

Poultry development has been phenomenal in the district. Total number of poultry in the district was 1,265,321 as on 1977. To encourage poultry development, a poultry extension centre is functioning at Veppanthattai.

As a consequence of Animal Husbandry department's schemes like the supply of pedigree bulls, key village schemes, the setting up of artificial insemination centres, etc. the livestock population in the district have improved very much.

Fisheries

Tiruchchirappalli being an inland district without coastal line, fishing has been conducted in inland waters. There are nine fishing centres in the district at Srirangam, Lalgudi, S. Aduthurai, Kodalikaruppur, Thirumalapadi, Karur, Malamayanur, Vaduganagampatti and Turaiyur. Fast growing fish fingerlings of the Gangetic carps like sale, mrigal, Rohu and Gatla are stocked regularly and distributed to these fishing centres.

Fish farms have been established at Ponnar and Chinnar Dams for the production and supply of quality fingerlings. About 1.78 lakh fingerlings were produced and stocked in these fish farms during 1981-82. The volume of fish catch in these reservoirs during the same period was 348 kg.

A Fish Farmers Development Agency is functioning in the district since 16.8.1978 for the promotion of fisheries. 23 tanks with a water spread of about 16 hectares under the maintenance of this Agency contributed 3.43 lakh fingerlings and 0.49 lakh kgs. of fish during 1981-82. This agency, in addition to the production and supply of quality fingerlings, also trains fishermen in the modern methods of fishing. 22 fishermen received training during 1981-82.

Fish being a perishable commodity marketing of fish depends very much on availability of cold storage facilities. An one ton ice plant cum cold storage in Tiruchchirappalli has been setup to provide ice and chilling facilities for the fish catches in and around the city.

Each fishing centre has a fishermen co-operative society. These societies obtain long term, medium

and short term loans from Government and disburse the loans to their members for the purchase of fishing implements and to discharge prior debts. These societies also take lease of fishing rights of inland waters and distribute the lease to its members. The very important welfare measure undertaken by the Government for the upliftment of fishermen has been to build free houses and construction of roads to fishing villages.

Industries

The most important factor influencing the growth of urbanisation and general economic development in a region is industrialisation. Industrialisation induces parallel growth in other non-agricultural sectors of the economy, creates and augments the opportunities for employment and income, attracts migrants especially from the rural side and boosts up the population of the centres and areas where industries are growing.

Till recently, the district was one of the backward areas in the matter of industrial development. The conspicuous absence of economically exploitable mineral resources in the district has been one of the reasons for the absence of large scale industries. The establishment of heavy boiler plant, small arms project, cement and sugar industries and a few textile mills in addition to the establishment of a number of industries in the medium and small scale sectors accelerated the rate of industrialisation in the district.

The most important heavy industry in the district is the high pressure boiler plant of the Bharat Heavy Electricals Limited located at Tiruvarambur. It is a Government of India undertaking in Technical collaboration with Messrs Techno Export of Czechoslovakia.

This plant engaged in the manufacture of heavy boilers required for thermal stations was started in 1965 at a cost of Rs. 24.5 crores. The initial output capacity of 750 M. W. per year has presently been increased to 2,500 M.W. The plant achieved an out turn of 11,450 M.T. of materials for the manufacture of boilers during 1981-82 valued at Rs. 28.4 crores.

The seamless steel tube plant of the Bharat Heavy Electricals Limited is an ancillary unit of the High Pressure Boiler Plant in Technical collaboration with West Germany. This plant setup at a capital outlay of Rs. 58.2 crores is designed to manufacture 40,000 tonnes of boiler [seamless steel tubes per year.

The ordnance factory inaugurated in July 1966 is another public sector unit in the district. This factory set up with the installed capacity for the production of 5,000 numbers of small arms has achieved the production target for the year 1981.

With fairly rich deposits of limestone and gypsum, cement industries have been established in a big way in the district. The Dalmia Cement Limited at Dalmiapuram, the Chettinad Cement Corporation at Puliur and the Tamil Nadu Cements Corporation Limited at Ariyalur are the three cement factories functioning in the district.

The Dalmia Cement Limited set up with the licenced capacity to produce 5.25 lakh tonnes of portland cement and the Chettinad Cement Corporation with 4.00 lakh tonnes have almost achieved the production target during 1980-81.

The cement factory at Ariyalur, a unit of the TIDCO, commenced production in late 1979. This project set up at a cost of Rs. 28.89 crores manufactured 2.47 lakh tonnes of cement during 1980-81.

TANCER is setting up an asbestos pressure pipes project at Ariyalur at an estimated cost of Rs. 700 lakhs. This project expected to commence production by 1983-84 will have an annual production capacity of 36,000 tonnes.

Sugar-cane being grown as a major commercial crop, sugar industry occupies an important place in the rural economy of the district. There are three sugar mills in the district (viz.) Cauvery Sugars and Chemicals Limited at Pettaivaithalai, Kothari Sugars and Chemicals Limited at Kattur and Deccan Sugar and Abkhari Co., Limited at Pugalur. These mills produced 64,785 tonnes of sugar during 1980-81.

There are 19 medium sized industries in the district manufacturing a wide range of electrical equipment and engineering products. The Corporations set up by the Tamil Nadu Government for the promotion of industries have rendered technical as well as financial assistance for starting new industries in the district. The following are some of the medium/large scale industries in the district aided by SIPCOT and TIIC.

1. Engineering Industries	...	7
2. Textile Mills (engaged in manufacture of Yarn)	...	3
3. Distilleries and Chemicals	...	1
4. Leather Tanning	...	1
5. Flour Mills	...	1

There are 1,401 registered Small Scale Industrial units in the district as on 31.12.1980 engaged in the manufacture of a wide range of products. Major groupwise breakup figures of these units are as follows.

Major Group	No. of Units
Manufacture of Food products	124
Manufacture of Beverages, Tobacco and Tobacco products	11
Manufacture of Cotton Textiles	27
Manufacture of Jute Hemp and Mesta Textiles	1
Manufacture of Textile products (Including Weaving Apparel Other than Foot Wear)	33
Manufacture of Wood and Wood products	54
Manufacture of Paper and Paper products	109
Manufacture of Leather and Leather products	12
Manufacture of Rubber, Plastic, Petroleum and Coal products	58
Manufacture of Chemicals and Chemical products (Except products of petroleum and Coal)	91
Manufacture of Non-metallurgical mineral products	131
Manufacture of Basic Metal and Alloys Industries	27
Manufacture of Metal products and parts (Except Machinery and Transport equipments)	220
Manufacture of Machinery and Machine Tools and Parts (Except Electrical Machinery)	178
Manufacture of Electrical Machinery and apparatus (and supplies and parts)	28
Manufacture of Transport Equipments and parts	22
Manufacture of Other Industries	218

To meet the captive demand of the High pressure Boiler plant and to supply Boiler Components, about 320 small and medium scale industries have been started in and around the district. Annually about 50,000 M.T. of Boiler components are being supplied by these industries which provide employment to over 10,000 persons.

Industrial Estates and departmental workshops have been set up by the State Government with the primary purpose of rendering service to industries and to serve as part of the infrastructure. The workshops, most of which are located in the Industrial Estates, are of different types such as general purpose engineering workshop, tool rooms, forgeshops, etc. Industrial Estates at Ariyamangalam and Tiruverambur accommodating a variety of Industrial units and the tool room shop at Tiruchchirappalli and the general purpose engineering work shop at Ariyamangalam deserve special mention.

Tiruchchirappalli holds a pride of place in cottage industries. There are variety of cottage and village industries dispersed throughout the rural areas in the district.

Mat weaving and leather tanning are the oldest industries in the district. Some of the common cottage industries found in the district are blacksmithy, carpentry, beekeeping, hand pounding of rice, oil extraction and basket making.

Cutting and Polishing of synthetic gems is a growing industry in the district. The synthetic gems manufactured at Mettuppalaiyam in Coimbatore district are further processed in Tiruchchirappalli district. There are two co-operative institutions functioning for the development of this industry.

Thottiam and Uppiliapuram blocks are important centres for the manufacture of carpets, druggets and blankets. Training units for training the artisans have been established at Kotakudi, Thottiam and Venkatachalapuram at Uppiliapuram block. There is also an industrial co-operative society for blanket weaving.

Industrial co-operative societies are also functioning in the district for the development of mat weaving, leather tanning and colr industry.

The Tamil Nadu News Print and Papers Limited is setting up an integrated news print cum paper project at Pugalur in the district for the manufacture of 50,000 tonnes of printing and writing paper per annum. This project estimated to cost around Rs. 190 crores (including working capital) is a joint venture of the Government of Tamil Nadu, Indian Financial Institutions and the World Bank. This project will herald new technology in the country.

Handloom Industry

Handloom industry has been a traditional occupation of this district. The Handloom weavers constitute roughly five percent of the total working population in the district. This industry flourishes mainly in Karur, Turaiyur, Uraiur and Tattayyan-garpettai.

There are 32,185 handlooms in the district as on 31.12.1981 of which 31,851 are cotton weaving looms and the rest are silk weaving looms. The total number of weavers co-operative societies in the district is 91 with a total number of 19,263 looms. Number of looms within co-operative fold constitutes 58 percent of the total looms in the district.

The co-operative movement in the field of Handloom weaving has given a fillip to this industry. These societies form the best institutional agencies for providing necessary facilities to enable the member weavers to get continuous employment throughout the year. The apex Handloom weavers co-operative society popularly known as co-optex is providing marketing support to its affiliated primary weavers co-operative societies to the extent of about fifty percent of the production. During 1981-82, the co-optex marketed 82 lakh metres of handloom cloth produced in the district valued at Rs. 620 lakhs.

There are 13 powerloom co-operative societies in the district having 94 powerlooms. The Tamil Nadu Textiles Corporation is implementing a programme to set up a powerloom complex at Jayam-kondacholapuram.

An export production project is functioning at Karur with an installed capacity of 942 looms. This project set up by the Tamil Nadu Government at a cost of Rs. 40.75 lakhs produced during 1981, 5.71 lakh metres of handloom cloth valued at Rs. 53.80 lakhs.

A programme to set up a modern dye house in the district with financial assistance from Government is under implementation.

Major items of production by the weavers of the co-operative societies consist of cotton sarrees and dhothies of 80,100 and 120 counts. Bed sheets woven in Karur area popularly known as 'Karur bedsheets' are known for its dexterity and variety. The total production of handloom cloth during 1981 was 75 lakh metres valued at Rs. 564 lakhs.

Carpets, druggets and blankets which are special varieties of handloom cloth are woven in Thottiam and Uppiliapuram blocks.

Transport and Communication

Tiruchchirappalli is an important rail junction on the Southern Railway. It connects Madras, Madurai, Tuticorin, Tirunelveli, Tenkasi, Quilon, Thanjavur, Nagappattinam and Rameswaram on the metre gauge and Bangalore, Coimbatore, Cochin, Kanniyakumari and Mangalore on the broad gauge. A network of railways interconnect various centres within the district.

Tiruchchirappalli is a road junction on the Madras-Dindigul National Highway (N.H.-45). The district has a well knit road system of more than 9,200 kms. connecting various centres of importance in the region.

Details of the important highways of the district and the important urban centres they connect are given below:

Highway	Important towns
N.H. -45 Madras-Dindigul	— Tiruchchirappalli, Srirangam, Manapparai
S.H. - 6 Salem - Tiruchchirappalli	— Thottiam, Musiri
S.H. - 8 Coimbatore - Nagappattinam	— Kulittalai, Tiruverambur
Tiruchchirappalli - Attur	— Manachchanellur, Turaiyur
Tiruchchirappalli - Ariyalur	— Lalgudi, Puvalur, Kallakkudi

The Madras - Dindigul Road (N.H.—45) traversing the eastern part of the district is the main arterial north-south link to which is connected all the important radial roads of the district.

Due to the limitations and locational characteristics of the railway lines in the district, the buses play a dominant role in the transport system.

Tiruchchirappalli is an important bus terminal and transit point for the State Government buses.

About 650 route buses run both by the Cholan Roadways Corporation and Private bus operators interconnect all important places in and around the district. Supplementing the route buses 690 autorickshaws and 130 ordinary taxis are in operation in the district.

Goods transport by lorries is better organised in the district. In 1979, there were 2,600 goods carriage in the district for moving cargo to various places.

Tiruchchirappalli has an airport. Indian Airlines connects Tiruchchirappalli with Madras, Trivandrum and Colombo.

The district is connected by a network of Post and Telegraph Offices. Six out of 1,064 Post Offices in the district are head post office located at Tiruchchirappalli, Kulittalai, Karur, Turaiyur and Lalgudi, 322 are sub-post offices and 736 are extra departmental branch offices. There are also 183 combined Telegraph Offices to provide Telegraph facilities in the district.

Places of Historical, Archaeological Importance and Tourist Interests

Tiruchchirappalli a blend of history and tradition is one of the important pilgrim centres in Tamil Nadu. Flowing of Cauvery adds to the glory of this land of temples. The district has quite a number of famous temples noted for sculptural beauty and excellent architecture.

Rockfort

Tiruchchirappalli, the head quarters of the district is a famous city in South India and is located on the southern bank of the river Cauvery. The Rockfort in the centre of the city is a prominent land mark on the top of which is located Shri Thayumanaswamy temple. A fine flight of stone steps leads to the temple. The presiding deity is Sri Thayumanaswamy. The main shrine is on the western side of the temple and the Pillayar temple is on the east.

This temple was built by Mahendra Pallava-I between the 10th and 12th centuries. The temple is a master piece of construction built in stone.

Srirangam, another well known town of the district is located on the island formed by the river Cauvery and its tributary Coleroon. Just 10 kms. from Tiruchchirappalli junction, this town has become famous due to the Vaishnavite temple dedicated to Lord Ranganathaswamy.

This temple consists of five long praharams in the form of a rectangle. There are 21 magnificent towers with stone inscriptions and the ayiramkal mandapam which is a masterpiece of architecture. The temple is surrounded by seven walls and within which the town itself is located.

An important pilgrimage centre in the district, this temple attracts thousands of devotees from all over India during festive occasions when the idol is taken out in procession on the vahanas made of wood and covered with gold and silver plates. Vaikunta Ekadasi is the most important festival celebrated here.

Thiruvanaikkaval near Tiruchchirappalli is known for the Jambukeswarar temple dedicated to Lord Siva. It is an ancient temple said to have been in existence from the first century B.C. The temple has five long praharams.

Jambu is the name of the holy tree under which is the Eswar in the form of Lingam submerged in water. Sri Jambukeswarar and His consort Sri Agilandeswari are the presiding deities of this temple.

Pancha praharam is the most important festival celebrated in this temple. This festival celebrated in the month of Panguni attracts about 5,000 to 6,000 devotees. During this festival, the Lord in female dress and the Devi in male dress are taken out in procession.

Kumaravayalur Sri Subramaniaswamy temple in Kumaravayalur is an ancient and well known shrine built by the Chola Rulers. There are a number of stone inscriptions giving the history of the temple.

The three principal sanctums in the temple are Sri Subramaniaswamy with His two consorts Sri Valli and Sri Deivanai, Sri Adinatha (alias) Sri Agniswarar and His consort Sri Poorva Stithi Nayaki. The uthsava idol of Sri Subramania, Sri Valli and Sri Deivanai are of great beauty. Panguni Uthiram is the most important festival celebrated here when

Lord Muruga is taken out in procession in the night mounted on the silver peacock vahanam.

The **Brihadiswara temple** at Gangaikonda Cholapuram is one of the two largest Chola temples in Tamil Nadu situated in Guruvalappar kovil in Udayarpalayam taluk. This temple constructed of stone by Rajendra Chola-I, contains many Chola, Pandya and Vijayanagar inscriptions. The temple marks the last phase of the early Chola architecture and its zenith.

The **Fort Gateway** at Tiruchchirappalli town is one of the few surviving remains of the old fort. It is a narrow arched gateway massively constructed with bastion and cells on either side. This fort and the gate associated with Carnatic wars in the siege of Tiruchchirappalli are called the key of the Carnatic.

Karur an important town of the district is located on the bank of the river Amaravathi. The town is one of the seven sacred sthalams or sivalayams and is well known for the famous Pasupathiswami temple. The group of sculptures representing Pasupathiswara, Lingam as high as five feet bathed by the milk oozing from the udder of a cow and Ranganatha are noted for sculptural beauty.

Pugalur situated north west of Karur is acquiring importance in recent years due to the setting up of an integrated newsprint cum paper project of the Tamil Nadu Government. The temple here dedicated to Lord Subramania on a small hill near Cauvery is noted for excellent sculpture. This village is famous for cultivation of plantains which is exported in large number to other places.

The **Grand Anicut** built across the Cauvery in the second century by Karikala Chola is an engineering marvel. It is a beautiful and calm picnic spot where tourists can relax a day. It is 24 kms. from Tiruchchirappalli on the Tiruchchirappalli-Thanjavur road.

Upper Anicut or Mukkombu is the head of the Srirangam island where the river Kollidam branches off from Cauvery. This is a beautiful picnic spot with lush green trees, meadows and parks.

Samayapuram Sri Mariamman temple at Samayapuram in Lalgudi taluk is one of the most popular shrines in Tamil Nadu. The presiding deity of the temple is known as Sri Mariamman, Sri Seethala Gowri and Sri Mahamayil. She is one of the forms of Kali. The shrine facing east covers an area of one acre.

Poojas are performed four times a day. The main annual festival commences on the last Sunday in Panguni. The car festival is observed on the first Tuesday in Chithirai and the floating festival on the following Friday.

These temples and monuments are not only places of historical and religious importance but also centres of tourist interest.

Brief Analysis of the Village and Town Directory Data

A brief analysis relating to certain population characteristics is made utilising the information collected in the Village and Town Directory. A number of tables have been designed for this purpose. The tables are generated at the district and taluk level for the rural areas and in regard to urban areas, town-wise particulars are presented.

Table

Distribution of Villages according to

Sl. No.	Name of Taluk	No. of Inhabited villages	No. (with percentage) of villages having		
			Education	Medical	Drinking Water
(1)	(2)	(3)	(4)	(5)	(6)
1.	Turaiyur	69	63 (91.30)	16 (23.19)	69 (100.00)
2.	Perambalur	116	115 (99.14)	37 (31.90)	116 (100.00)
3.	Ariyalur	91	91 (100.00)	20 (21.98)	91 (100.00)
4.	Udayarpalayam	79	78 (98.73)	36 (45.57)	79 (100.00)
5.	Lalgudi	119	111 (93.28)	48 (40.34)	119 (100.00)
6.	Musiri	74	74 (100.00)	17 (22.97)	74 (100.00)
7.	Karur	97	95 (97.94)	51 (52.58)	97 (100.00)
8.	Kulittalai	77	77 (100.00)	41 (53.25)	77 (100.00)
9.	Tiruchchirappalli	82	81 (98.78)	18 (21.95)	82 (100.00)
10.	Manapparai	90	84 (93.33)	18 (20.00)	90 (100.00)
Tiruchchirappalli District		894	869 (97.20)	302 (33.78)	894 (100.00)

This table furnishes the taluk-wise distribution of inhabited villages according to the availability of different amenities. Among the total of 894 inhabited villages in the district, the amenity of drinking water alone is available to all the villages marking cent percent. Next in the order to avail the amenities is the facility of power supply which is available in 887 villages out of 894 in the district. The amenity of education records the third place that 97.20% of the total villages avail this amenity. The amenity of medical has

1

the availability of different amenities

one or more of the following amenities

Post & Telegraph	Market/Hat	Communications	Approach by Pucca Road	Power Supply
(7)	(8)	(9)	(10)	(11)
57 (82.61)	5 (7.25)	47 (68.12)	63 (91.30)	67 (97.10)
110 (94.83)	6 (5.17)	89 (76.72)	72 (62.07)	116 (100.00)
85 (93.41)	2 (2.20)	49 (53.85)	52 (57.14)	91 (100.00)
76 (96.20)	3 (3.80)	58 (73.42)	77 (97.47)	79 (100.00)
85 (71.43)	6 (5.04)	93 (78.15)	112 (94.12)	116 (97.48)
59 (79.73)	8 (10.81)	68 (91.89)	60 (81.08)	74 (100.00)
82 (84.54)	31 (31.96)	59 (60.82)	95 (97.94)	97 (100.00)
70 (90.91)	20 (25.97)	54 (70.13)	66 (85.71)	77 (100.00)
44 (53.66)	5 (6.10)	75 (91.46)	80 (97.56)	82 (100.00)
68 (75.56)	12 (13.33)	66 (73.33)	85 (94.44)	88 (97.77)
736 (82.33)	98 (10.96)	658 (73.60)	762 (85.23)	887 (99.22)

recorded a low percentage of 33.78 among the total of 894 villages. It may be seen particularly in Turaiyur, Musiri, Tiruchchirappalli and Manapparai taluks. Kulittalai taluk has registered the maximum of 53.25% in medical facilities in the district. The market/hat facility is too poor almost in all the taluks that it has recorded only 10.96% of the total inhabited villages of 894 in the district.

Table

Proportion of Rural Population

Sl. No.	Name of Taluk	Total population of inhabited villages in the Taluk	Proportion of Rural	
			Education	Medical
(1)	(2)	(3)	(4)	(5)
1	Turaiyur	211,645	211,439 (99.90)	74,017 (34.97)
2	Perambalur	363,806	362,911 (99.75)	157,096 (43.18)
3	Ariyalur	258,511	258,511 (100.00)	74,208 (28.71)
4	Udayarpalayam	293,352	293,090 (99.91)	166,345 (56.70)

district. Only 45.95% of the population are served with the medical amenity. Market/Hat facility is available to 17.93% of the total rural population which is the lowest of all the amenities available to the people in the district.

Table 3

Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available

Villages not having the amenity of	Number of villages where the amenity is not available and available at distance of			
	— 5 kms.	5—10 kms.	10 + kms.	Total (Cols. 2—4)
(1)	(2)	(3)	(4)	(5)
1. Education	20	2	3	25
2. Medical	257	194	141	592
3. Drinking water	---	---	---	---
4. P & T	117	31	10	158
5. Market/Hat	303	252	241	796
6. Communications	168	36	32	236

This table furnishes the distribution of villages not having certain amenities, arranged by distance ranges from the places, where such facilities are available. There are 894 inhabited villages in the district of which the facility of education is not available for 25 villages in the villages itself but it is available at a distance — 5 kms. for 20 villages, at 5—10 kms. for 2 villages and 10+kms. for 3 villages. Similarly 592 villages avail the medical facility at different distances viz., 257 villages at a distance of —5 kms. 194 at 5—10 kms. and 141 villages at 10+kms. It is note-worthy that all the inhabited villages in the district avail the amenity

of drinking water in their villages itself. Regarding the post and telegraph facilities the people dwelling in about 158 villages have to avail this amenity at a distance of — 5 kms. for 117 villages, at 5—10 kms. for 31 villages and 10 villages at 10+kms. The market/hat facility which is lacking in 796 villages out of the total 894 in the district is available at a distance of — 5 kms. for 303 villages at 5—10 kms. for 252 and at 10+kms. for 241 villages. More than one-fourth of the inhabited villages viz., 236 villages are availing their amenity of communication at a distance of — 5 kms. for 168 villages, at 5—10 kms. for 36 villages and at 10+kms. for 32 villages.

Table 4

Distribution of villages according to the distance from the nearest town and availability of different amenities

Distance Range from the nearest town (in kms.)	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of							
		Education	Medical	Drinking water	Post and Telegraph	Market/Hat	Communications	Approach by Pucca Road	Power Supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
0—5	110	107 (97.27)	21 (19.09)	110 (100.00)	78 (70.91)	4 (3.64)	84 (76.36)	92 (83.64)	110 (100.00)

51+	..	..	..	..	..	..	..	..	..
Unspecified	..	..	..	..	..	..	..	..	..
Total	894	869 (97.20)	302 (33.78)	894 (100.00)	736 (82.33)	98 (10.96)	658 (73.60)	762 (85.23)	887 (99.22)

This table furnishes the distribution of inhabited villages according to the distance from the nearest town and availability of different amenities. Among the total inhabited villages of 894 in the district, 110 villages which are situated in the distance range of 0—5 kms. from the nearest town avail the amenities of drinking water and power supply to 100.00% education to 97.27% medical to 19.09%, post and telegraph to 70.91%, communication to 76.36%, pucca road to 83.64% and market/hat to 3.64%. Similarly 318 villages which are located in the distance range of 6—15 kms. from the nearest town avail the amenity of drinking water

to 100.00%, education to 97.80% power supply to 99.37% pucca road facility to 87.42%, post and telegraph to 81.76% communication to 76.42%, medical to 36.16% and market/hat to 12.26%.

Villages which are located in the distance range of 16—50 kms. from the nearest town in the district number about 466 in which the amenity of drinking water is availed by all the villages, power supply by 98.93% of villages, education by 96.78%, post and telegraph by 85.41%, pucca road by 84.12%, communication by 71.03%, medical by 35.62% and market/hat by 11.80%.

Table 5

Distribution of villages according to population range and amenities available

Population range	No. of Inhabited villages in each range	Number (with percentage) of villages having the amenity of							
		Education	Medical	Drinking water	Post and Telegraph	Market/Hat	Communi-cations	Approach by Pucca Road	Power Supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
— 499	31	16 (51.61)	1 (3.23)	31 (100.00)	3 (9.68)	3 (9.68)	10 (32.26)	20 (64.52)	26 (83.87)
500-1,999	260	250 (96.15)	44 (16.92)	260 (100.00)	164 (63.08)	7 (2.69)	167 (64.23)	216 (83.08)	258 (99.23)

5000+	105	105 (100.00)	78 (72.38)	105 (100.00)	101 (96.19)	40 (38.10)	94 (89.52)	102 (97.14)	105 (100.00)
Total	894	869 (97.20)	302 (33.78)	894 (100.00)	736 (82.33)	98 (10.96)	658 (73.60)	762 (85.23)	887 (99.22)

This table shows the distribution of inhabited villages according to different population ranges and amenities available. Among the four categories of population ranges 31 villages come under the population range of—499, and among these 16 villages avail the amenity of education, one village the amenity of medical, all the 31 villages the facility of drinking water, 3 villages the post and telegraph facilities, 3 the market/hat, 10 the communication, 20 the pucca road facility and 26 villages avail the amenity of power supply. Similarly 260 villages out of the total 894 in this district come under the population range of 500-1999. 96.15% of the villages avail the amenity of education, the amenity of medical by 16.92% of villages, the drinking water by all the 260 villages, post and telegraph by 63.08%, market/hat by 2.69%, communication by 64.23%, pucca road by 83.08% and

power supply by 99.23% of villages. There are 498 villages which come under the population range of 2000-4999. The amenities of education, drinking water, and power supply are availed by all the 498 villages in this range. Medical is availed by 36.35% of villages, post and telegraph by 93.98%, market/hat by 9.64%, communication by 77.71% and pucca road facilities are availed by 85.14% of these villages in this range. In the population range of 5000 + there are 105 villages. It is noteworthy that all the 105 villages in this range avail the amenities of drinking water, education and power supply to cent percent. Among other amenities, medical is availed by 72.38%, post and telegraph by 96.19%, market/hat by 38.10%, communication by 89.52% and pucca road by 97.14% of villages.

Table 6

Main Staple Food in the Majority of Villages in each Taluk

Sl. No.	Name of Taluk	Main Staple food
(1)	(2)	(3)
1.	Turaiyur	Rice & Millets
2.	Perambalur	Rice & Millets
3.	Ariyalur	Rice & Millets
4.	Udayarpalayam	Rice & Millets
5.	Lalgudi	Rice & Millets
6.	Musiri	Rice & Millets
7.	Karur	Rice & Millets
8.	Kulittalai	Rice & Millets
9.	Tiruchchirappalli	Rice
10.	Manapparai	Rice & Millets

This table furnishes the main staple food in terms of grains consumed by the majority of the population of the villages in each taluk. There are 10 taluks in the district and in all the taluks rice

and millets are being used as the main staple food except Tiruchchirappalli taluk where rice alone is used as the main staple food.

Table 7

Distribution of Villages According to Land Use

Sl. No.	Name of Taluk	No. of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
(1)	(2)	(3)	(4)	(5)	(6)
1.	Turaiyur	69	79,822.45	79.68	19.82
2.	Perambalur	116	167,140.32	56.28	13.06
3.	Ariyalur	91	98,962.71	73.09	21.77
4.	Udayarpalayam	79	89,224.02	79.68	16.53
5.	Lalgudi	119	92,846.56	68.37	34.30
6.	Musiri	74	69,872.14	77.75	33.41
7.	Karur	97	153,743.36	85.54	17.32
8.	Kulittalai	77	126,518.67	77.65	28.39
9.	Tiruchchirappalli	82	56,020.33	76.65	55.98
10.	Manapparai	90	100,311.74	70.70	22.20
	Tiruchirappalli District	894	1,034,462.30	73.71	23.97

This table gives the distribution of inhabited villages according to land use. The total area of 894 villages is 1,034,462.30 hectares of which the percentage of the cultivable area to the total area works out to 73.71. The percentage of the irrigated area to the total cultivable area works out to 23.97. Karur, Turaiyur, Udayarpalayam, Musiri and Kulittalai taluks possess the maximum cultivable area

to total area in the district, viz. 85.54%, 79.68%, 77.75% and 77.65% respectively. Perambalur taluk has recorded the lowest percentage of the cultivable area in the district viz. 56.28. While Tiruchchirappalli taluk has got the highest percentage of 55.98 of irrigated area to total cultivable area, Perambalur taluk records the lowest percentage of 13.06.

Table 8

Growth, Density and Sex-ratio of Urban Population in the District in relation to the State

Census Year	Tiruchchirappalli District						Tamil Nadu					
	Total population	Urban population	% Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex ratio (No. of females per 1,000 males)	Total population	Urban population	% Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex ratio (No. of females per 1,000 males)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)
1951	2,448,024	508,218	20.76	..	..	973	30,119,047	7,333,525	24.35	..	..	986
1961	2,867,640	593,171	22.24	+16.72	1,683	967	33,686,953	8,990,528	26.89	+22.59	1,722	963
1971	3,192,134	758,379	23.76	+27.85	2,196	959	41,199,168	12,464,834	30.26	+38.64	2,115	951
1981	3,812,320	943,724	26.13	+24.44	2,699	959	48,408,077	15,951,875	32.95	+27.98	2,722	958

Table 8 gives the details of growth, density and sex ratio of urban population in Tiruchchirappalli district for the decades 1951 to 1981. The percentage of urban population to total population in this district has gone up from 20.76 in 1951 to 26.13 in 1981. During this period the corresponding per-

centage of state urban population has also increased from 24.35 in 1951 to 32.95 in 1981. The density of urban population per sq. km. in Tiruchchirappalli district which was 1,683 persons in 1961 has steadily increased to 2,196 in 1971 which has gone up again to 2,699 in 1981.

Table 9

New Towns/Towns declassified in 1981 Census

Name of towns	Population 1981 Census
(1)	(2)
(a) Added :	
(i) Inam Karur	21,118
(ii) Navalpattu	4,715
(iii) Tiruverambur	15,297
(iv) Tuvaugudi	24,720
(b) Declassified :	
(i) Sirugamani	8,624

Table 9 indicates the recognition of the new towns and the declassification made in the 1981 census. Sirugamani a town recognised in 1971 has

been declassified in 1981 census as a rural area since it does not satisfy the urban criteria.

28. Tuvagudi	See Tiruchchirappalli Urban Agglomeration			
29. Ulkadai Ariyamangalam	See Tiruchchirappalli Urban Agglomeration			
ALL TOWNS	0.60	0.86	1.77	3.30

It is seen from Table 11 that for every 10,000 urban population in Tiruchchirappalli district, the ratio of higher secondary schools is 0.60, secondary schools 0.86, middle schools 1.77 and primary schools 3.30. Of the 23 towns where higher secondary educational facilities are available 15 towns have higher ratio of higher secondary schools per 10,000 population than the district ratio.

Pirattiyur census town has higher proportion of higher secondary schools (1.68) and Mettupalaiyam census town has higher proportion of secondary (2.56) and middle schools (5.12) per 10,000 urban population. But in the case of primary schools higher proportion of 8.16 schools per 10,000 urban population is found in Puvalur town panchayat.
