Responsibility for the Correctness of internal details shown in the maps rests with the Publisher.

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Government, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census, the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part A related to village and town directory, Part B to village and town PCA and Part C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series, some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village, the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect, particularly in relation to amenities and land-use pattern, is expected to further meet the need of microlevel planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of Scheduled Caste and Scheduled Tribe population to the total population, has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Caste and Scheduled Tribe population in

statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population, in a few statements also serves this purpose.

The format of the Primary Census Abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series, it has been so designed that Part A of the volume contains village and town directory and Part B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Taluk/Town level. At the beginning of the DCH, a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and taluk level maps depicting the boundaries and other important features have been inserted at appropriate places to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri A. P. Muthuswami, I.A.S., the Director of Census Operations, Tamil Nadu on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N.G. Nag, Deputy Registrar-General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar-General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi,
the 26th April 1982.

P. PADMANABHA,
Registrar General, India.

PREFACE

It has been the tradition of the Government of Tamil Nadu to publish immediately after each Census, a District Census Handbook separately for each District containing the census statistics, besides other valuable data of local importance for the use of the State Government, district administration, research scholars and other data users. The first series of District Census Handbooks were brought out immediately after the 1951 Census and the present publication after the 1981 Census is the fourth in the series.

The data presented in this publication were collected during the census operations in February-March 1981, the reference date being 1st March 1981.

The District Census Handbook consists of the following two parts.

Part — A - Village and Town Directory ; and

Part - B — Village and Townwise Primary Census Abstract

In Part - A, apart from certain major characteristics of the district in relation to economic resources like forestry, agriculture, industries, etc., information are also available regarding certain basic amenities like education, medical, drinking water, etc., in each village.

This volume relates to Part-B of the District Census Handbook. It contains the district and village/townwise Primary Census Abstract and the Primary Census Abstract for Scheduled Castes and Scheduled Tribes.

The district Primary Census Abstract gives for each territorial unit upto taluk level in the case of rural areas, and upto the town level for urban areas, occupied residential houses, households, the total population, the Scheduled Caste and Scheduled Tribe population, literates and main workers. The main workers are further categorised into four broad groups, viz. Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers. Information is also furnished regarding marginal workers and non-workers. The village and townwise Primary Census Abstract gives similar information for villages and wards of towns. With a view to help users to compile data relating to panchayats, break-up details are also given, wherever necessary, in the village Primary Census Abstract. Besides, there is an Appendix which furnishes at urban block level the total population and the Scheduled Caste and Scheduled Tribe population.

In bringing out this publication, I have received assistance from Shri M. Thangaraju and Shri M. Nagappan, Deputy Directors of Census Operations and Shri R. Narayanan, Assistant Director of Census Operations besides a large number of staff members of this directorate.

In formulating the scope and content of the data in this publication and designing the formats for presentation of the data, I have received valuable guidance from Shri P. Padmanabha, Registrar General, India. The encouragement I have received from him at every stage of the work has contributed in a great measure to the successful publication of this District Census Handbook.

I hope the data in this volume would be found useful by the planners and other data users.

A.P. MUTHUSWAMI,
Director of Census Operations, Tamil Nadu.

Madras,
July, 1983.

ACKNOWLEDGEMENT

I have pleasure in acknowledging the able assistance given by the following officials of my office in the preparation of this volume.

Primary Census Abstract :

Smt. M.V. Rajalakshmi, Tabulation Officer
Shri S. Ranganathan, Statistical Assistant
Shri S. Sreedharan, Statistical Assistant
Shri K. Sundaram, Statistical Assistant
Kum. K. Uma, Computer

Inset tables :

Shri T.S. Rajaram, Investigator
Shri S. Packiaraj, Investigator
Shri C.T. Rajan, Investigator
Shri A.M. Mangayarkarasi, Tabulation Officer
Smt. R. Rani Bai, Statistical Assistant
Shri M.A. Sridharan, Statistical Assistant
Smt. K. M. Maheswari, Statistical Assistant
Smt. S.P. Kanchanamala, Statistical Assistant
Smt. V.E. Kalyani, Computer
Shri M. Elumalai, Upper Division Clerk

Maps :

Shri Jogesh Dass, Senior Geographer
Shri A. Rajamani, Senior Artist
Shri N. Chandran, Artist
Shri M. Kothandaraman, Hand Press Machine Operator

Number of Towns		434	33

ANALYTICAL NOTE

(i) CENSUS CONCEPTS

Rural and Urban areas :

Census figures are generally presented separately for rural and urban areas. In the 1981 Census, the definition of an urban unit is more or less the same as in the 1961 and 1971 Censuses but for some minor variations. The urban areas of 1981 Census are :—

(a) All places with a Municipality, Corporation or Cantonment Board or Notified Town area

(b) all other places which satisfied the following criteria

(i) A minimum population of 5,000

(ii) At least 75 per cent of the male working population engaged in non-agricultural (and allied) activity

(iii) A population of atleast 400 per km² (or one thousand per square mile).

The above definition of urban area varies slightly from that of 1961 and 1971 Censuses in that the males working in activities such as fishing, logging, etc., were treated as engaged in non-agricultural activity and therefore contributed to the 75 per cent criterion in the 1961 and 1971 censuses, whereas in the 1981 Census, these activities are treated as on par with cultivation and agricultural labour for the purpose of this criterion. The rest of the areas not treated as urban are classified as rural areas.

Urban Agglomeration :

Urban Agglomeration is a new concept formed during 1971 Census and this replaces the concept of town group adopted in 1961 Census. An Urban Agglomeration may be explained as follows : "It must form a continuous urban spread constituting a town and its adjoining urban outgrowth or two or more physically contiguous towns together with continuous well recognised urban outgrowth, if any, of such towns."

Census Houses.

A Census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Household :

A household is a group of persons, who commonly live together and would take their meals from a common kitchen, unless the exigencies of work presented any of them from doing so.

Scheduled Castes/Scheduled Tribes :

For the enumeration of Scheduled Castes and Scheduled Tribes in Census, the names of Scheduled Castes and Scheduled Tribes as recognised in Tamil Nadu based on the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act of 1976 (Central Act 108 of 1976) were followed. The enumerators were instructed to record a person as a Scheduled Caste/Scheduled Tribe provided the name given by the person was found in the list supplied to them.

Literates :

In 1981 Census, a literate was defined as "a person who can both read and write with understanding in any languages". A person who could merely read but cannot write, was not a literate. It was not necessary that a person considered a literate must have received any formal education or have passed any minimum educational standard.

Work :

Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

Main workers and Marginal workers :

A worker was identified with reference to a reference period preceding the census. The reference period prescribed was one year preceding the date of enumeration. Certain types of work such as agriculture, household industries like, gur making, etc., were carried on, either throughout the year or only during certain seasons or part of the year, depending on local circumstances. In such cases, what we were concerned with, was the broad time span of the agricultural seasons preceding the enumeration. Workers can be full time workers or seasonal workers or marginal workers. If a person has done any work during the reference period and if he had worked for the major part of the year i.e. if he had worked for 183 days or more, he was considered to be a full time worker (main worker). If a person had done any work during the reference period and if he has not worked the major part of the year i.e. if he had worked for less than 183 days, he was considered to be a marginal worker.

The main activity of workers has been classified into four categories, viz., cultivator, agricultural labourer, household industry and other work.

Cultivator :

For purposes of Census, a cultivator is a person who is engaged either as an employer, single worker or family worker in cultivation of land owned, or held from Government, private persons or institutions, for payment in money, kind or share. Cultivation includes supervision and direction of cultivation.

Agricultural labourer :

A person who works in another person's land for wages in money, kind or share should be regarded as an agricultural labourer. He or she has no risk in the cultivation but merely works in another person's land for wages and has no right of lease or contraction land on which he or she works.

Household Industry :

For a person who returns his/her main activity as engaged in some production, processing, servicing or repair of articles of goods, it has been ascertained whether it is a household industry.

Household Industry is defined as an industry conducted by the head of the household and/or by the members of the household at home or within the village in rural areas, and within the precincts of the house in urban areas. A larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would, or has to be registered under the Indian Factories Act.

Non-workers :

All persons who have not been treated as workers i.e. persons who have not worked any time at all during the reference period of one year preceding the date of enumeration, have been considered as non-workers. These cover all persons who are engaged in unpaid home duties and who do no other work or have not done any work at all during last one year. Full time students and children attending school, all dependent such as infants or children not attending school or a person permanently disabled from work because of illness or old age, persons retired from service, or rentiers, beggars, vagrants, convicts in jails or inmates of a penal, mental or charitable institution and all non-workers who may not come under any of the above categories.

(ii) HISTORY OF THE DISTRICT CENSUS HANDBOOK.

After the Census of 1951, the Government of India offered to hand over to the State Government the Census tables and other data prepared during the Census and suggested that they might be published along with any other useful information relating to each district. The State Government accepted the proposal, and the first publication of the District Census Handbook was brought out at the cost of the State Government.

The District Census Handbook of 1951 was found to be very useful and it was therefore decided not only to continue the series for the 1961 Census but also to improve definitely on its content so that each District Census Handbook contained certain basic economic data for the smallest administrative unit in the district and be an useful reference book for scholars and other data users.

After the 1971 Census as well the series of District Census Handbook was continued. The Publication of the 1971 Census Handbooks was in three parts, viz. Part-A, Part B, Part-C. Part-A relating to Village and Town Directory, Part-B relating to Village and Town-wise Primary Census Abstract and Part-C comprising District Census Tables, and certain administrative statistical tables.

The tradition of bringing out the Census Handbook has been continued by the State Government during the 1981 Census also. In this series some individual features besides restructuring the formats of the village directory have been adopted bearing in mind the national requirements of data for the socio-economic programmes of the Government. The comparability of data with the 1971 Census data has also been kept in view.

The present Census Handbook will be published in two parts, viz. Part-A Village and Town Directory and Part-B Village and Town-wise Primary Census Abstract.

(iii) SCOPE OF PRIMARY CENSUS ABSTRACT

The Primary Census Abstract, as it is called presents basic data for each village or segment of a village (in cases where such village segment form different panchayats) in the "Village-wise Primary Census Abstract" and for each Ward/Division of a Town in the "Urban Primary Census Abstract". The format of the Primary Census Abstract for the villages and towns in 1981 has been slightly modified as compared to the 1971 Primary Census Abstract.

The Primary Census Abstract gives such basic information as area in hectares/square kilometres occupied residential houses, number of households, total population, Scheduled Castes and Scheduled Tribes population, literates, main workers, division of main workers into cultivators, agricultural labourers, workers in household industry and other workers, marginal workers and non-workers in respect of each unit. The Urban/Village Primary Census Abstract gives this information for each village and each urban ward. With a view to ensure comparability and to enable data users to derive the figures either for a revenue village or panchayat according to their requirements, the data are presented for segments of villages also. Wherever portions of one village happen to be in two or more panchayats the segment-wise data have to be used separately or added with some other segment data so as to derive panchayat data. For example, if portions of a revenue village bearing Location Code No. 10 forms part of two panchayats, the figures are given separately for each portion of the village against Location Code No. 10 a/b and 10b/b. The total figures for the entire revenue village by adding the figures given against both the segments viz. 10 a/b and 10b/b are given in the Village Primary Census Abstract. If, instead, the panchayat figures are required, the data for the concerned village segment or segments relating to the panchayats concerned, are to be added upto arrive at the total figures for the respective panchayat.

An appendix presented in the case of the Urban Primary Census Abstract gives 1981 population, scheduled castes and scheduled tribes population for each enumerator block of the town. This is meant for the use of administrative and election authorities in urban areas. Such data are also required by urban planners and researchers for conducting other studies in selected blocks.

Mode of Presentation :

The consolidated figures for the district and each taluk, are given, in the beginning for Total, Rural and Urban areas followed by each town/Urban Agglomerations under the caption 'District Primary Census Abstract'. Then follows the Primary Census Abstracts for Scheduled Castes/Scheduled Tribes. An alphabetical list of revenue villages is then given along with the Census Location Code Numbers of 1981 Census followed by the Village-wise Primary Census Abstract for each taluk. In the footnote given at the end of the Village-wise Primary Census Abstract, the villages included in Municipalities or Census towns are indicated. In an annexe, the names of villages and their constituent panchayats are given. Then, follows the Urban Primary Census Abstract. In an appendix to the Urban Primary Census Abstract, the population and Scheduled Caste/Scheduled Tribe figures for each Enumerator Block of a town are given. This arrangement is followed for each taluk and independent sub-taluk in the district.

Maps :

Apart from the District Map given as frontispiece, map for each taluk showing the Village Location Code Numbers along with their boundaries have also been included at the appropriate places. As compared with the maps presented in 1971 District Census Handbook, several improvements have been effected in the maps presented in this volume. All towns are shown in the District and taluk maps with shading screens and also spheres according to the population size of towns.

Area Figures:

In the District Primary Census Abstract the area figures are given in Square Kilometers for Total, Rural and Urban areas. In the Village-wise Primary Census Abstract the area figures for each Location Code Unit are given in hectares upto two decimals. The area figures for each town in square kilometres is also given at the end of the Urban Primary Census

Abstract. In the District Primary Census Abstract, the area figures of the District total represent the "Geographical Area" figures supplied by the Surveyor-General. Figures for urban areas are those supplied by the Local Bodies and revenue authorities. The urban area of a district has been arrived by adding the urban area figures of each taluk within the district. Area figures for the rural areas of District/Taluk are derived by subtracting the urban area figures from the total area of the District/Taluk. The total of the area figures of the taluks will not tally with district figures because the taluk area figures represent the 'Land Use' area and are derived from the figures supplied by the Tamil Nadu Directorate of Survey and Land Records, while those of the district represent "Geographical Area" supplied by the Surveyor-General of India. The total of the village area given in the Village-wise Primary Census Abstract may not tally with the rural area of the taluk given in the District Primary Census Abstract as the taluk area figures take into account hills, forests, rivers, etc., where as the village area may not include the same. For conversion the ratio is 100 hectares=1 square kilometre.

It is hoped that the pattern of presentation of basic Census particulars for each district as explained above and adopted in this volume would be found convenient by data users.

A brief analysis relating to certain population characteristics is made utilising the Census data in the PCA. A number of tables have been designed for this purpose. The tables are generated at the district and taluk level for the rural areas and in regard to urban areas, town wise particulars are presented.

TABLE 1—POPULATION, NUMBER OF VILLAGES AND TOWNS, 1981

Serial number	Name of Taluk	Population					
		Total		Rural			
		Persons	Males	Females	Persons	Males	Females

	RAMANATHAPURAM DISTRICT	940,954	472,956	467,998	1,526	1,411	38

Table 1 furnishes talukwise and sexwise population of rural and urban areas and total number of villages (inclusive of inhabited villages) and towns of Ramanathapuram district.

It is seen that Ramanathapuram is the thickly populated taluk of the district, while Rameswaram has the lowest population. It is noted that Tiruppattur has the minimum of both rural and urban population. Aruppukkottai taluk has the maximum number of villages, viz. 189, while Karaikkudi has the minimum number of towns, viz. 7.

TABLE 2—DECADAL CHANGE IN DISTRIBUTION OF POPULATION

Name of Taluk	Population						Percentage decadal (1971-81) variation

Rameswaram	29,776	13,021	16,755	48,188	20,260	27,928	+ 61.84	+ 55.59	+ 66.68	
RAMANATHAPURAM DISTRICT	2,860,207	2,113,545	746,662	3,335,437	2,374,483	940,954	+ 16.62	+ 13.29	+ 26.02	

Table 2 records the decadal changes in the distribution of population for the different taluks of Ramanathapuram district.

The increase in population in the district during the decade is 16.62% as against the State average of 17.50%. Rameswaram taluk has recorded the highest percentage of decadal variation of population with 61.84%, while the lowest decadal variation of only 8.03% is found in Tiruppattur taluk.

TABLE 3—DISTRIBUTION OF VILLAGES BY POPULATION RANGES

Range of population	No. of villages in each range	Percentage of villages in each range
(1)	(2)	(3)
Less than 200	88	6.24
200 - 499	154	10.91
500 - 1,999	758	53.72
2,000 - 4,999	348	24.66
5,000 - 9,999	57	4.04
10,000+	6	0.43
Total	1,411	100.00

Table 3 provides useful data on the distribution of villages by population ranges in the district. It is seen that the maximum number of inhabited villages, viz. 758 are in the population range of 500—1,999 i.e. 53.72%. There are only 66.43 villages which have a population of above 10,000.

TABLE 4—DISTRIBUTION OF VILLAGES BY DENSITY

Range of density (Per Sq. km)	Total No. of villages in each density range	Percentage of villages in each density range
(1)	(2)	(3)
0 - 10	13	0.92
11 - 20	5	0.35
21 - 50	40	2.84
51 - 100	161	11.41
101 - 200	558	39.55
201 - 300	323	22.89
301 - 500	219	15.52
501 +	90	6.38
Not Known	2	0.14
Total	1,411	100.00

Table 4 gives the distribution of villages in Ramanathapuram district by different ranges of density.

TABLE 5—PROPORTION OF SCHEDULED CASTE POPULATION TO TOTAL POPULATION IN THE VILLAGES

<i>Percentage range of Scheduled Castes population to total population</i>	<i>Number of villages in each range</i>	<i>Percentage of villages in each range</i>
(1)	(2)	(3)
Nil	76	5.39
5 or less	148	10.49
6 — 10	186	13.18
11 — 15	204	14.46
16 — 20	187	13.25
21 — 30	271	19.21
31 and above	339	24.02
Total	1,411	100.00

Table 5 shows the proportion of Scheduled Caste population to total population in the villages of Ramanathapuram District. It is seen that in the percentage range of 31 and above, there are 339 villages followed by 271 villages in the range of 21 to 30 and 204 villages in the range of 11 to 15, 187 and 186 more Villages respectively in the ranges of 16 to 20 and 6 to 10 and 148 villages in the range of 5 or less.

TABLE 6—PROPORTION OF SCHEDULED TRIBE POPULATION TO TOTAL POPULATION IN THE VILLAGES

<i>Percentage range of Scheduled Tribe population to total population</i>	<i>Number of Villages in each range</i>	<i>Percentage of Villages in each range</i>
(1)	(2)	(3)
Nil	1,363	96.60
5 or less	38	2.70
6 — 15	2	0.14

'N' Denotes Negligible.

This table gives the proportion of Scheduled Caste and Scheduled Tribe population in the various towns of Ramanathapuram district. It is seen that Rosalpatti town has recorded the highest percentage of Scheduled Caste population with 17.99 while Paramakkudi town has recorded the highest Scheduled Tribe population of 0.86%. In Sattur town, the percentage of Scheduled Caste population is the lowest with only 2.65 and in Ilaiyankudi town the percentage of Scheduled Tribe population is only 0.01, while in Anaiyur, Chatrapatti, Chettiarpatti, Devakottai, Dhalavoipuram, Kilakkarai, Mudukulattur, Pallipatti, Tiruppattur and Viswanattam towns, there are no Scheduled Tribes at all reported during the 1981 Census.

TABLE 8—LITERACY RATES BY POPULATION RANGES OF VILLAGES

<i>Range of population</i>	<i>Number of villages in each range</i>	<i>Literacy rate</i>
(1)	(2)	(3)
Less than 200	88	28.87
200 — 499	154	34.47
500 — 1,999	758	36.47
2,000 — 4,999	348	39.49
5,000 — 9,999	57	42.79
10,000 +	6	45.14
Total	1,411	38.90

This table shows the literacy rate of, different population ranges of villages in Ramanathapuram district. The literacy rate of the rural population of Ramanathapuram district is 38.90. The highest literacy rate of 45.14% is seen in the population range of 10,000 and above, while the lowest rate of 28.87% is found in the smallest population range of below 200.
