FOREWORD

The District Census Handbook (DCH), compiled by the census organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census, the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states, it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series, some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village, the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect, particularly in relation to amenities and land use pattern, is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices, listing the villages where no amenities are available and according to the proportion of Scheduled Caste and Scheduled Tribe population to the total population, has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums.

The columns on Scheduled Caste and Scheduled Tribe population in statement IV relating to civic and other amenities and adult literacy classes/centres, under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the Primary Census Abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the Individual Slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series, it has been so designed that Part-A of the volume contains village and town directory and Part-B the PCA of villages and towns, including the Scheduled Castes and Scheduled Tribes PCA upto Taluk/Town level. At the beginning of the DCH, a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and taluk level maps, depicting the boundaries and other important features, have been inserted at appropriate places to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri A. P. Muthuswami, I. A. S., the Director of Census Operations, Tamil Nadu on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi,
the 26th April, 1982.

P. PADMANABHA,
Registrar General, India.

PREFACE

It has been the tradition of the Government of Tamil Nadu to publish immediately after each census, a District Census Handbook separately for each district containing the census statistics, besides other valuable data of local importance for the use of the State Government, district administration, research scholars and other data users. The first series of District Census Handbooks were brought out immediately after the 1951 Census and the present publication after the 1981 Census is the fourth in the series.

The Census statistics presented in this publication were collected during the census operations in February—March 1981, the reference date being 1st March 1981. The other statistics included in this publication have been collected from various departments of the State and Central Governments.

This publication consists of the following two parts:—

Part—A : Village and Town Directory and ;

Part—B : Village and Townwise Primary Census Abstract

Since the entire Madras district is coterminus with Madras City Corporation area and there is only one town, viz., Madras, Part-A of this volume is confined only to the Town Directory and Part-B to the Town Primary Census Abstract. Certain other particulars in respect of Madras city are included in the State level Town Directory which will contain the details of all the towns in the State.

Taking into account the increasing and varied development and other welfare measures undertaken by the Government, the scope and content of the data in this publication have been considerably enlarged and improved to meet the requirements of the planners and the other data users. In particular, certain inset tables based on census and other data have been included in this publication with brief analytical notes thereon.

This publication contains a brief history of the district, highlighting the major characteristics of the district in relation to the economic resources like forestry, minerals, etc., besides the social, cultural, religious and historical aspects. The district map furnishes the administrative units, that is, the various division numbers of Madras City, their boundaries and population details.

Part-B of the volume consists of the District Primary Census Abstract followed by Primary Census Abstract for Scheduled Castes and Scheduled Tribes. An alphabetical list of various divisions of Madras City has also been presented, followed by the Primary Census Abstract for each of the 150 divisions of Madras Corporation into which the city has been divided. Besides, there is an appendix at the end, which furnishes at urban block level (Enumerator block), the total population and Scheduled Caste and Scheduled Tribe population.

I am grateful to the Collector, Special Officer, Commissioner and other officials of the Madras Corporation as also other officers of the State Government Departments, who have extended their cooperation in collecting the voluminous and useful data, other than Census, for presentation at one place in this publication for the ready reference of the data users.

In bringing out this publication, I have received assistance from Sarvaswari M. Thangaraju and M. Nagappan, Deputy Directors, Shri R. Narayanan, Assistant Director and Shri N. Sukumar Nandagopal, Investigator, besides a large number of staff members of this Directorate.

In formulating the scope and content of the data given in this publication and in designing the formats for presentation of the data, I have received valuable guidance from Shri P. Padmanabha, Registrar General, India. The encouragement I have received from him at every stage of the work has contributed in a great measure to the successful publication of this District Census Handbook.

I hope this volume would be found useful and the publication well received by the administrators, academicians and other data users.

Madras,
June, 1983.

A. P. MUTHUSWAMI,
*Director of Census Operations,
Tamil Nadu.*

ACKNOWLEDGEMENT

It is my pleasant duty to acknowledge the able assistance given by the following officials in preparation of this volume.

ANALYTICAL NOTE

CENSUS CONCEPTS

Rural and Urban Areas

Census figures are generally presented separately for rural and urban areas. In the 1981 Census, the definition of an urban unit is more or less the same as in the 1961 and 1971 Censuses but for some minor variations. The urban areas of 1981 Census are :

(a) All places with a Municipality, Corporation or Cantonment Board or notified town area

(b) All other places which satisfied the following criteria

(i) A minimum population of 5,000

(ii) At least 75 per cent of the male working population engaged in non-agricultural (and allied) activity

(iii) A population of atleast 400 per km² (or one thousand per square mile).

The above definition of urban area varies slightly from that of 1961 and 1971 Censuses in that the males working in activities such as fishing, logging, etc., were treated as engaged in non-agricultural activity and therefore contributed to the 75 per cent criterion in the 1961 and 1971 Censuses, whereas in the 1981 Census, these activities are treated as on par with cultivation and agricultural labour for the purpose of this criterion. The rest of the areas not treated as urban are classified as rural areas.

Urban Agglomeration

Urban Agglomeration is a new concept formed during 1971 Census and this replaces the concept of town group adopted in 1961 Census. An Urban Agglomeration may be explained as follows : "It must form a continuous urban spread constituting a town and its adjoining urban outgrowth or two or more physically contiguous towns together with continuous well recognised urban outgrowth, if any, of such towns".

Census House

A Census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Household

A household is a group of persons, who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented any of them from doing so.

Scheduled Castes/Scheduled Tribes

For the enumeration of Scheduled Castes and Scheduled Tribes in Census, the names of Scheduled Castes and Scheduled Tribes as recognised in Tamil Nadu based on the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act of 1976 (Central Act 108 of 1976) were followed. The enumerators were instructed to record a person as a Scheduled Caste/Scheduled Tribe provided the name given by the person was found in the list supplied to them.

Literates

In 1981 Census, a literate was defined as "a person who can both read and write with understanding in any language". A person who could merely read but cannot write, was not a literate. It was not necessary that a person considered a literate must have received any formal education or have passed any minimum educational standard.

Work

Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

Main Workers and Marginal Workers

A worker was identified with reference to a reference period preceding the census. The reference period prescribed was one year preceding the date of enumeration. Certain types of work such as agriculture, household industries like gur making, etc., were carried on, either throughout the year or only during certain seasons or part of the year, depending on local circumstances. In such cases, what we were concerned with, was the broad time span of the agricultural seasons preceding the enumeration. Workers can be full time workers or seasonal workers or marginal workers. If a person has done any work during the reference period and if he had worked for the major part of the year i.e., if he had worked for 183 days or more, he was considered to be a full time worker (main worker). If a person had done any work during the reference period and if he has not worked for the major part of the year i.e. if he had worked for less than 183 days, he was considered to be marginal worker.

The main activity of workers has been classified into four categories viz., cultivators, agricultural labourers, household industry workers and other workers.

Cultivator

For purposes of Census, a cultivator is a person who is engaged either as an employer, single worker or family worker in cultivation of land owned, or held from Government, private persons or institutions, for payment in money, kind or share. Cultivation includes supervision and direction of cultivation.

Agricultural Labourer

A person who works in another person's land for wages in money, kind or share should be regarded as an agricultural labourer. He or she has no risk in the cultivation but merely works in another person's land for wages and has no right of lease or contract on land on which he or she works.

Household Industry

For a person who returns his/her main activity as engaged in some production, processing, servicing or repair of articles or goods, it has been ascertained whether it is a household industry.

Household Industry is defined as an industry conducted by the head of the household and/or by the members of the household at home or within the village in rural areas, and within the precincts of the house in urban areas. A larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would, or has to be registered under the Indian Factories Act.

Non-Workers

All persons who have not been treated as workers, i.e., persons who have not worked any time at all during the reference period of one year preceding the date of enumeration, have been considered as non-workers. These cover all persons who are engaged in unpaid home duties and who do no other work or have not done any work at all during the last one year, full time students and children attending school, all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age, persons retired from service, or retirees, beggars, vagrants, convicts in jails or inmates of a penal, mental or charitable institution and all non-workers who may not come under any of the above categories.

HISTORY OF THE DISTRICT CENSUS HANDBOOK :

After the Census of 1951, the Government of India offered to hand over to the State Government the Census tables and other data prepared during the Census and suggested that they might be published along with any other useful information relating to each district. The State Government accepted the proposal, and the first publication of the District Census Handbook was brought out at the cost of the State Government.

The District Census Handbook of 1951 was found to be very useful and it was therefore decided not only to continue the series for the 1961 Census but also to improve definitely on its content so that each District Census Handbook contained certain basic economic data for the smallest administrative unit in the district and be a useful reference book for scholars and other data users.

After the 1971 Census as well the series of District Census Handbook was continued. The publication of the 1971 Census Handbooks was in three parts, viz., Part-A, Part-B and Part-C. Part-A relating to Village and Town Directory, Part-B relating to Village and Townwise Primary Census Abstract and Part-C comprising District Census Tables and certain administrative statistical tables.

The tradition of bringing out the Census Handbook has been continued by the State Government during the 1981 Census also. In this series, some individual features besides restructuring the formats of the Village Directory have been adopted bearing in mind the national requirements of data for the socio-economic programmes of the Government. The comparability of data with the 1971 Census data has also been kept in view.

The 1981 Census Handbooks will be published in two parts viz., Part-A—Village and Town Directory and Part-B—Village and Townwise Primary Census Abstract.

SCOPE OF TOWN DIRECTORY :

The Town Directory gives important and useful information like civic and other amenities available in all the towns in the district, statutorily notified as well as non-municipal and census towns. The details relating to each of the towns have been presented in seven statements, viz., statements I to VI and IV-A. In all the statements except IV-A, the towns are arranged in the alphabetical order for the district. The Town Directory does not cover strictly military areas. It may, however, cover cantonment areas but not strictly military areas or military establishments within the cantonment areas. However, basic statistics of the cantonment as a whole have been provided. In the Town Directory, codes have been given for the data of amenities and civic administration for want of space. The relevant explanations for the codes adopted have been given in the beginning of the Town Directory statements.

An urban agglomeration includes two or more independent census towns. The names of the towns/urban agglomerations have been arranged in the alphabetical order.

The particulars of the individual town which constitutes one of the units of agglomeration have not been furnished separately because the particulars have been furnished where they occur together under the name of agglomeration. The following remarks have been given against such town in brackets.

“(See the name of the main town of the agglomeration)”.

By adoption of this method, the reader can get an idea of the particulars of the urban agglomeration in total and also severally.

Statement I.—Status and Growth History.

This statement provides some basic data on the Primary Census Abstract. For analysing the Town Directory data at state level and All India level, some new columns have been introduced in 1981. The new items are class of town, area, number of households, population and growth rate for each census since 1901. Density in 1981 and sex ratio in 1961, 1971 and 1981 censuses are also provided in this statement.

For size class of town, the following population norms as per 1981 census have been adopted.

Population.	Class
(1)	(2)
100,000 and above	I
50,000 — 99,999	II
20,000 — 49,999	III
10,000 — 19,999	IV
5,000 — 9,999	V
Below 5,000	VI

To distinguish the town from the village, the location code numbers for towns have been given in Roman numerals and these numbers have been assigned in a continuous order for the district as a whole.

Statement II.—Physical Aspects and Location of Towns, 1979.

Under physical aspects, annual rainfall and temperature figures are furnished. These particulars were obtained from the Commissioner of Statistics, Madras. If the information is not available for any particular town, the nearest town for which it is available is given. For col. (9), the nearest city with population of one lakh and more is furnished according to 1981 census. For the other columns, figures obtained from the Municipal Commissioner and Panchayat Union Commissioners are given. The zero within brackets in cols. 10 and 11 denotes that the referent town itself is enjoying rail/road transport facilities.

Statement III.—Municipal Finance, 1978-79.

The civic administration status of the town, the receipt through tax, properties and powers, Government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public service are given in this statement. The sources of receipt and expenditure are furnished in terms of rupees in hundreds.

Statement IV.—Civic and Other Amenities, 1979.

The civic and other amenities existing in the towns as in 1979 are given. The data were obtained from the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Col. 3.—Civic Administration Status.

It is a new column introduced in this statement to facilitate analysis.

Col. 4.—Population.

It is also a new column introduced in this statement to measure the amenities in respect of population.

Col. 5.—Scheduled Caste and Scheduled Tribe Population.

It is introduced to know the size of population of the weaker sections of the community in the town.

Electrification.

Electrification particulars were obtained from the Tamil Nadu Electricity Board through the Municipal Commissioners and Panchayat Union Commissioners.

(i) Domestic Connections.

This refers to the number of services given to houses for domestic purposes like fans, lighting, etc.

(ii) Industrial connections.

This refers to the number of services effected to L. T. industries such as workshops, flour mills, oil mills, grinding machines, cotton ginning, engineering industries, etc.

(iii) Commercial connections.

This refers to the services given to shops, business houses, public institutions like offices and schools and commercial establishments.

(iv) Road lighting points.

This refers to the number of points of street lights which will be maintained by the Board and for which consumption charges will be paid to the Board by respective local bodies. For some town panchayats the number of services effected alone has been furnished under street lights and not the points.

(v) Other connections

This refers to the number of services effected for agricultural purposes, cottage industries, huts, public water supply systems, etc.

Statement IV-A.—Civic and Other Amenities in Notified Slums, 1979.

This is a new statement on civic and other amenities in notified or recognised slums of class I and II towns. Generally, in cities or towns having slums, the local authority such as municipality or municipal corporation or even the development authority notified the recognised slums. Such notification is linked up with the availability of funds from the State Government for slum clearance.

Name of the slum and the details of the area, population, length of the paved roads, system of sewerage, number of different types of latrines and method of disposal of night soil, etc., are given in this statement.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1979.

In this statement, medical, educational, recreational and cultural facilities of the towns as in 1979 are furnished. The data for educational and medical facilities were obtained from the Municipal Commissioners and Panchayat Union Commissioners for the concerned towns, and from the Director of Secondary Education and Director of Public Health respectively.

Column 10—Recognised Shorthand, Typewriting and other Vocational Training Institutions.

The term 'recognised' refers to institutions recognised by some statutory authority like Education Department, Commerce Department, Labour Department, etc., of the Government or by Semi-Government or autonomous bodies, public sector projects, etc.

Cinema refer only to the permanent cinema theatres and do not include touring cinemas.

Column 16.—Number of Working Women's Hostel with Number of Seats. This is a new column introduced in this statement in 1981. Considering the increasing employment of women in urban areas, the housing needs of working women has been an important problem.

Statement VI.—Trade, Commerce, Industry and Banking, 1979.

In this statement, trade, commerce, industry and banking facilities in the town as in 1979 are furnished. Banking particulars were obtained from the Reserve Bank of India. The information on number of agricultural and non-agricultural credit societies were collected from the Registrar of Co-operative Societies through the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

SCOPE OF PRIMARY CENSUS ABSTRACT.

The Primary Census Abstract, as it is called, presents basic data for each village or segment of a village (in cases where such village segments form different panchayats) in the "Villagewise Primary Census Abstract" and for each "Ward/Division" of a Town in the "Urban Primary Census Abstract". The format of the Primary Census Abstract for the villages and towns in 1981 has been slightly modified as compared to the 1971 Primary Census Abstract. In the case of Madras District, there is no Village Primary Census Abstract.

The Primary Census Abstract gives such basic information as area in hectares/sq. kms, occupied residential houses, number of households, total population, Scheduled Caste and Scheduled Tribe population, literates, main workers, division of main workers into cultivators, agricultural labourers, workers in household industry and other workers, marginal workers and non-workers in respect of each unit. The Village/Urban Primary Census Abstract gives this information for each village and urban ward. With a view to ensure comparability and to enable data users to derive the figures either for a revenue village or panchayat according to the requirements, the data are presented for segments of villages also in the Village Primary Census abstracts, given in the District census Hand Books other than Madras district. Wherever portions of one village happen to be in two or more panchayats, the segmentwise data have to be used separately or added with some other segment data so as to derive panchayat data. For example, if portions of a revenue village bearing L.C. No. 10 forms part of two panchayats, the figures are given separately for each portion of the village against L.C. No. 10 *a/b* and 10 *b/b*. The total figures for the entire revenue village by adding the figures given against both the segments, viz., 10 *a/b* and 10 *b/b* are given in the village Primary Census Abstract. If, instead, the panchayat figures are required, the data for the concerned village segment or segments, relating to the panchayats concerned are to be added up to arrive at the total figures for the respective panchayat.

An appendix presented in the case of the Urban Primary Census Abstract gives 1981 population and Scheduled Caste and Scheduled Tribe population for each enumerator block of the town. This is meant for the use of administrative and election authorities in urban areas. Such data are also required by urban planners and researchers for conducting other studies in selected blocks.

Mode of Presentation

In view of the fact that the boundaries of Madras district (fully urban) and Madras city are coterminous, the presentation of Primary Census Abstract for this volume is done in a slightly different manner when compared to the rest of the districts, for which talukwise rural-urban break-up and townwise data are presented. In this volume, the Primary Census Abstract for the district/city as a whole is presented in the first line and this is followed by similar data for each of the 150 Divisions into which the corporation area is divided. To meet the requirements of some of the data users, data are also given for the Madras Urban Agglomeration which consists of 48 constituent towns located in the adjoining Chengalpattu district also, besides the city of Madras.

In an appendix to the urban Primary Census Abstract, the total population and Scheduled Caste and Scheduled Tribe population are given for each Enumerator Block in each Division.

Maps.

The Map of Madras city given as frontispiece shows the division numbers along with their boundaries.

Area figures.

Under column 3 of the Primary Census Abstract, the area of Madras city and its 150 Divisions are presented in square kilometres.

MADRAS DISTRICT-AN OUTLINE

Introduction

Tamil Nadu constitutes the south-eastern extremity of the Indian peninsula. Madras is the capital city of the State, besides being an important district. The district city is one of the metropolis of India and serves as the gateway to the culture of South India. In spite of being the capital of a Tamil speaking State, it has emerged as a cosmopolitan city playing an important role in the historical, cultural and intellectual development of India, representing still the distinct components of the highest form of Dravidian civilisation. In addition, it holds out an interesting fare of South Indian architecture, music, dance, drama, sculpture and other arts and crafts.

The city of Madras came into being due to a strategic necessity and historical accident. It symbolises the rise of British power in South India by setting up and consolidation of the East India Company in the seventeenth century with its headquarters at Fort St. George in Madras as a trading centre. Within 350 years, a few scattered villages (important being Mylapore, Triplicane and Madras Patnam) have developed into a modern metropolitan city without shedding its traditional customs, religious outlook and other traditions. It can be proudly remarked that the greatness of ancient Madras is mostly religious due to the preservation of the old famous Saivaite and Vaishnavite shrines signifying the antiquity of the place. The growth of the city is significant and closely linked with the development of British Institutions and administration. In short, Madras City was the chief centre from which the British rule expanded in sub-continent and it remains a standing monument of British contribution to India.

Madras city has acted as an important centre of culture and education in South India and has been the growth of many movements which have played an important role in the history of the sub-continent. A large number of institutions which are known in India and abroad are found located in the city, of which mention may be made of the Theosophical Society, the Kalashetra and colleges of Arts and Crafts. The establishment of professional colleges for Medical, Veterinary, Law and Teaching, the location of the Indian Institute of Technology and the establishment of Central Leather Research Institute have added to the development of the city.

Madras is one of the leading cities in India today from trade and commercial point of view, with the fourth largest port in the country and the first to have developed a full-fledged container terminal to international standards. The port is providing trade links with Japan, Singapore, Malassia, Burma, Bangla Desh, Ceylone and other far Eastern Countries. Madras is also one of the most important industrial city of the sub-continent. As a district of the State it ranks third after Coimbatore and Salem so far as number of factories is concerned but stands at the top in case of employment and productive capital. It, however, ranks second in terms of Industrial out-put next to Chengalpattu. Madras city enjoys an eminent position in the country in film industry and Kodambakkam, known as the Hollywood of Madras, has a number of studios engaged in the production of Tamil, Telugu, Kannada, Malayalam, and Hindi movies which are quite popular.

No wonder, therefore, that the district city has come up during 1981 as the fourth highly populated city in India with a population of 3,276,622 persons (1,694,107 males and 1,582,515 females) and ranks next to Calcutta so far as density is concerned. It tops the list of all the districts of Tamil Nadu so far as density of population (15,172 persons per /sq.km.) and literacy percentage (68.40) are concerned. In case of percentage increase of population during the decade 1971-81 (27.04), however, it stands third when compared with other districts.

Brief History of the District.

Madras, originally known as Madras Patnam, was located in the province of Tondaimandalam, an area lying between Pennar river of Nellore and the Pennar river of South Arcot. The capital of the province was Kancheepuram.

Tondaimandalam was ruled in the 2nd century A.D. by Tondaiman Ilam Tiraiyan, who was a representative of the Chola family at Kancheepuram. It is believed that Ilam Tiraiyan must have subdued Kurumbas, the original inhabitants of the region and established his rule over Tondaimandalam. Subsequent to Ilam Tiraiyan, the region seemed to have been ruled by the Chola Prince Ilam Killi. The Chola occupation of Tondaimandalam was put an end to by the Andhra Satavahana incursions from the north under their King Pulumayi II. They appointed chieftains to look after the Kancheepuram region. Bappaswami, who is considered as the first Pallava to rule from Kancheepuram, was himself a chieftain of the tract round Kancheepuram under the Satavahanas. After the collapse of the Satavahana empire in the beginning of the 3rd century A.D., the Pallavas who had so far been merely viceroys, became independent rulers of Kancheepuram and its surrounding areas. Pallavas held sway over this region from the beginning of the 3rd century A.D. to the closing years of 9th century except for the interval of some decades when the region was under Kalabharas.

Pallavas were defeated by the Chola under Aditya-I by about 879 A.D. and the region was brought under Chola rule.

Pandya under Jatavarman Sundara Pandya rose to power and the region was brought under Pandya rule by putting an end to Chola supremacy in 1264 A.D. Pandya rule over this region lasted a little over half a century followed by muslim domination till 1334-35.

During 1361, Kumara Kampana II, the son of Vijayanagar King, Bukka I conquered and established Vijayanagar rule in Tondaimandalam. The Vijayanagar rulers appointed chieftain known as Nayaks who ruled over the different regions of the province almost independently.

Damarla Venkatapathy Nayak, an influential chieftain under Venkata-III, who was in charge of the area of present Madras City, gave the grant of a piece of land lying between the river Cooum almost at the point it enters the sea and another river known as Egmore river to the English in 1639. On this piece of waste land was founded the Fort St. George exactly for business considerations. In honour of Chennappa Nayak, father of Venkatapathy Nayak, who controlled the entire coastal country from Pulicat in the north to the Portuguese settlement of Santhome, the settlement which had grown up around Fort St. George was named Chennapatnam. The older area called the Madraspatnam lay to the north of it. Later on the intervening space between the older northern site of Madraspatnam and the new southern area of Chennapatnam came to be quickly built over with houses of the new settlers as the two expanded and that the two village became virtually one town. While the official centre of the settlement was designated Fort St. George, the British applied the name Madras Patnam to the combined town.

Golconda forces under General Mir. Jumla conquered Madras in 1646 and brought Madras and its immediate surroundings under his control. On the fall of Golconda in 1687, the region came under the rule of the Mughal Emperors of Delhi. Firmans were issued by the Mughal Emperor granting the rights of English company in Madras.

In the later part of the seventeenth century, Madras steadily progressed during the period of Agency and under many Governors. During the regime of Governor Elihi Yale (1687-92), the most important event was the formation of the institution of a mayor and Corporation for the city of Madras.

In 1693, a perwanna was received from the local Nawab granting the towns Tondiarpet, Purasawalkam and Egmore to the company. Thomas Pitt became the Governor of Madras in 1698 and governed for eleven years. This period witnessed remarkable development of trade and increase in wealth. The important events during this period were the blockade of Madras by Daud Khan and its repulsion and the acquisition of additional suburban villages by the English. Tiruvottiyur, Vysarpadi, Kathivakkam, Nungambakkam and Satangadu were made as a free gift to the English in 1708. In 1735, Chintadripet was taken over and in 1742 Vepery, Perambur and Periamet were presented to the British. Nicholas Morse was the Governor from 1744 to 1746. The most important event during his time was the outbreak of war between England and France and the consequent struggle for supremacy between the French and the English in South India. Madras was captured by the French in 1744 but consequent on the treaty of peace of Aix-La-Chapelle, Madras was restored to the English in 1749.

George Pigot was the Governor for the period from 1755 to 1763. The period is remarkable for the fact that the Company form a trading corporation, owning isolated towns, forts and factories, became a ruling power controlling vast territories.

Charles Bouchier became Governor in 1767. During his period Hyder Ali who usurped the Sovereignty of Mysore joined hands with the Nizam and began an offensive on Madras. In 1761, a treaty was signed between Hyder Ali and the Company for an alliance and mutual restitution of the conquests. The Governance of the Carnatic became the responsibility of the Madras Government which could not maintain a large army without the revenue of Nawabs. In 1763, the English got the district of Chengalpattu known as Madras Jagir for the maintenance of the army.

Lord Macartney took charge of the Madras Government in 1781. During his period, Madras was turned into an important Naval base. Major General Meadows became Governor in 1790. The position of the English was made secure in South India. The elimination of other Foreign Power and settlement of the limits of native territory gave stability and paved the way for an era of commercial development. In 1792, in a new treaty Mohammed Ali handed over the entire management of the Carnatic to the English and accepted in return a pension. Another important event of this period was the outbreak of Mysore war. Tippu was killed in 1799 and the whole of Carnatic present day territorial limits of the English in South India was established. The before the advent of the British. In the process of growth, many villages got agglomerated into a single unit. The shape and extent of the city which existed during 1939-40 was reached even during the opening years of 19th century.

The period in between 1803 to 1827 represents consolidation and development of institutions. Sir Edward Elliot was the important Governor of Madras during this period. He appointed a Judicial Commission with Munro as its President in 1814. Several reforms in the administrative system were made by the Commission. Sir Thomas Munro became the Governor in 1820 and continued till 1827. He tried his best to improve literacy. He initiated English education in Madras and established a body called Board of Public Instructions to improve and direct public education.

Important improvement made to Madras city during the first half of the 19th century was the progress made in the establishment of institutions for professional and technical education. School of Industrial Art was started in 1850, Civil Engineering College in 1834 and Madras Medical College in 1835, etc. The Madras University was started in September 1857. The Madras High Court was created in June 1862. The Railway Company in Madras was formed in July 1845. The first construction work began on 9th June 1853 and in 1858, South Indian Railway was formed having Madras as the Railway Headquarters.

Lord Hobart who was the Governor from 1872 to 1875 initiated Madras Harbour project. The Congress party came to life during the period 1881-90. The Indian National Congress held its session in 1887 at Madras.

First Governor of Madras in the 20th Century was Lord Amptill (1901-1906). Sir Arthur Lawby was the Governor from 1906-1911 and Lord Pentland from 1912-1919. The important landmarks during this period were the establishment of Madras Electric Supply Corporation in 1906 and opening of Indian Bank in 1907. During 1934 and 1936 for a short period, two Indians Sir M. D. Usman Sahib and Sir K. Venkatarreddy Naidu acted as Governors of Madras. In 1937, the Ministry of Shri C. Rajagopalacharia came into power for two years. The influence of the Governors on the administration considerably diminished. The British departed on 15th August 1947 but Madras remained as a standing monument of what the British have done to India.

The area of Madras city continued to be 68.17 square kms. from 1871 to 1931 and it rose to 77.21 sq. kms. in 1941 by the addition of Mambalam. The city was further extended in 1946 by adding some surrounding villages of Chengalpattu having an area of 51.62 sq. kms. No change occurred during 1951 to 1961. In 1978, the following 12 panchayats on the out skirts of Madras were added in the city limits raising its area to 170.0 sq. kms. which continues to be so till date :

1. Thiruvannamiyur
2. Virugambakkam
3. Kanagam and Taramani
4. Velachery
5. Saligramam
6. Kodambakkam Town Panchayat
7. Koyambedu
8. Kodungaiyur
9. Thirumangalam
10. Kolathur
11. Villivakkam
12. Erukkancheri

The city is now sub-divided into 150 divisions for administrative purposes, whereas the number of divisions stood at 120 during 1971. The district city comprises of 14 Assembly constituencies of which two are reserved for scheduled castes. It also represents three parliamentary constituencies.

The area of the district city specified in a preceding paragraph does not include the area of the other 48 contiguous neighbouring urban units around the city which have been declared in 1981 Census as a part of the Greater Madras or Madras Urban Agglomeration.

Urban Agglomeration, a new concept adopted in 1971, represents the continuous urban spread of some intense urban areas where the process of urbanisation has actually extended to contiguous units also making the entire area form an integrated urban unit with necessary economic, commercial and transport links. Such areas like railway colonies, university campus, port areas, military campus, etc., which come up outside the statutory limits of the city, constitute out-growths and deserve to be treated as one urban unit called Urban Agglomeration.

Madras Urban Agglomeration as such extends to an area of 571.93 sq.kms. with an aggregate population of 4,289,347 persons. It includes Madras city, all the 32 urban areas of Saidapet and 16 out of 17 units of Sriperumbudur taluks of Chengalpattu district. The following statement shows the areas and the population covered by each :—

Unit.	Area in Km ² .	Population.		
		Persons	Males	Females
(1)	(2)	(3)	(4)	(5)
Madras (M.C.)	170.00	3,276,622	1,694,107	1,582,515
32 Urban areas of Saidapet taluk	290.07	782,531	408,044	374,487
16 Urban areas of Sriperumbudur taluk	111.86	230,194	120,156	110,038
Madras Urban Agglomeration	571.93	4,289,347	2,222,307	2,067,040

The boundary of the Madras district is, however, contiguous with that of Madras Municipal Corporation and as such the scope of this book is confined to the facts and figures pertaining to Madras city alone.

Physiography

Madras is situated on the north-east end of Tamil Nadu on the coast of Bay of Bengal. It lies between 12°9' and 13°9' of the northern latitude and 80°12' and 80°19' of the southern longitude on a 'sandy shelving breaker swept beach'. It stretches nearly 25.60 kms along the Bay coast from Thiruvanniyur in the south to Thiruvottiur in the north and runs inland in a rugged semi circular fashion. It is bounded on the east by the Bay of Bengal and on the remaining three sides by Chengalpattu district.

It is low-lying and the land surface is almost flat like a pancake. The even topography of the land throughout the district renders sub-divisions into natural regions rather difficult. It rises slightly as the distance from the sea-shore increases but the average elevation of the city is not more than 22' above mean sea-level, while most of the localities are just at sea-level, and drainage in such areas remains a serious problem.

The city is intersected by two langiud streams, the Cooum and the Adyar. Cooum runs through the heart of the city and enters the sea in between the university buildings and the Fort. St. George, while the latter winds its way through the southern part of the city and enters the sea near Adyar. These two rivers are almost stagnant and do not carry enough water except during rainy seasons.

Cooum river starts from Kesavaram Anicut in Kesavaram village built across Kortaliyar river. The surplus from Cooum tank joins this course at about 8 kms. lower down and this point is actually the head of Cooum river which is located at 48 kms. west of Madras. The river receives a sizeable quantity of sewage from its neighbourhood for disposal.

Though the river Adyar can be traced to a point near Guduvancheri village, it assumes the appearance of a stream only after it receives the surplus water from the Chembarambakkam tank as well as the drainage of the areas in the south-west of Madras. The river has no commercial importance, but the fishermen in the neighbourhood make their living by fishing in the river.

The Buckingham canal which runs through the states of Tamil Nadu and Andhra Pradesh is a navigation canal. This canal runs almost parallel to the Coromandal coast within the limits of districts from Guntur to South Arcot. Entering the city at Tondiarpet in the north and running along the western outskirts of George Town, it joins the new canal, south-west of General Hospital.

The other canal worth mentioning in the city is the Otteri Nullah which commences from the village Mullam, runs eastwards upto Purasawalkam and then passes through Buckingham and Carnatic Mills and finally joins the Buckingham Canal, north of Basin Bridge Railway Station.

The predominant soil in the district is alluvial with scattered pockets of gravelly soil. The soil found in coastal areas and tanks of the Cooum and Adyar are saline and sandy. The sub-proximity of sea, hydrological conditions are no different and water is generally not good and is rather saline.

Madras has 25.60 kms. of sea coast which is flat and sandy for about a km. from the shore. The bed of the sea is about 42' deep and slopes further in gradual stages for a distance of about 5 kms. from the coast attaining a depth of about 63'. The two principal currents, first from the north and second from the south flow parallel to the coast. The former sets in about the middle of October and continue till February while the latter starts by about August and continues till the burst of the north-east monsoon in the middle of October. These two principal currents must be caused by the winds.

Climate and Rainfall.

Madras has a hot climate which can be termed as tropical maritime monsoon type. As Madras is in the tropic, the temperature is naturally bound to be high but it is counter balanced to a considerable degree due to the city's proximity to the sea and the landward sea breeze. The following are the four seasons of the year—

(i) The cold weather	January and February.
(ii) The hot weather	March to July
(iii) The south-west monsoon season	June to September.
(iv) The post-monsoon season (north-east monsoon or rainy season).	October to December.

The mean minimum temperature rarely falls down 20°C while the mean maximum temperature seldom crosses 37°C, showing a healthy feature. The season from the start of October to the end of February is usually warm and pleasant except for spells of rains when the temperature falls a little. From March onwards the temperature starts rising gradually and this period of hot sun lasts till October. With the onset of south-west monsoons during June to September, rains do bring some relief.

The chief climatic feature of the city is the regular sea breeze which provide a welcome relief, in otherwise uniformly hot and moist climate. There are no sudden variations in temperature. The proximity to the sea is a conspicuous feature which distinguishes Madras from other cities in the interior regions of the country. The heat of the summer months neither touch that high temperature nor the cold of winter months is so severe as in north India.

Madras city like other coastal places also experiences severe cyclones and storms especially during the currents of monsoon winds in the months from May to November. A few of the cyclonic thunder storms are accompanied by heavy squalls of rain with winds which may have a speed of 50 to 85 miles per hour. The danger of cyclonic storms is mainly from the Bay of Bengal which move west or north-west towards the east coast. On an average, one cyclonic storm or depression may effect the city in a year and the after-effect of such a storm depends upon its intensity, havoc and the spell of rains and floods etc. it brings along.

Mean relative humidity is high throughout the year, and varies from 65 per cent in May-July to about 80 per cent in October-December. June is, however, the month of lowest relative humidity. Another interesting and peculiar feature is that relative humidity generally increases by 20 to 30 per cent with the onset of the sea breeze.

The following statement shows the month-wise normal and actual rainfall in m.ms. during the period 1980-81.

Name of the month and year	*Normal rainfall	Actual rainfall	Percentage departure from the normal rainfall
(1)	(2)	(3)	(4)
June 1980	44.7	40.9	
July 1980	86.6	166.1	
August 1980	113.0	174.2	
September 1980	119.4	11.4	
Total of South-West monsoon period	363.7	392.6	+8.0

12			
Name of the month and year	*Normal rainfall	Actual rainfall	Percentage departure from the normal rainfall.
(1)	(2)	(3)	(4)
October 1980	305.8	185.7	
November 1980	350.3	641.5	
December 1980	139.2	266.8	
Total of North-East monsoon period	795.3	1,094.0	+37.6
January 1981	45.5	61.9	
February 1981	12.5	0.0	
Total of Winter period	58.0	61.9	+ 6.7
March 1981	13.2	2.7	
April 1981	17.5	0.0	
May 1981	37.9	39.6	
Total of Hot weather period	68.6	42.3	-38.3
Madras city	1,285.6	1,590.8	+23.7

*Normal—Average of 50 years rainfall ending 1950.

Flora and Fauna.

From very early times, Madras was known for its pleasant scenery and was said to be a town open to sky and full of garden of mangoes, coconuts, guavaes, oranges, etc. In earlier days when the city was not so congested, gardens and groves were a common feature and most of the roads were flanked by frequent groves of palm and other trees. Even a number of houses too had gardens displaying fine trees canopied by green bough and creepers, Madras City today is devoid of any forest areas but can still be proud of some of the well maintained green belts found in the Peoples park, the Napier park, the Horticulture—gardens, My Lady's Childrens, park Guindy, Snake park, Nehru park, Nageswara Rao park, Independance park, Anna square park, the Rajbhavan, the Theosophical Society Campus, and a number of bungalows and newly developed colonies where provisions of public parks, etc., have been provided. The indigenous trees found include among others neem, mango, tamarind, rain-tree, vagai, banyan, coconut, palm and pipal. Stretches of casuarina plantations are available on the sea-coast beyond the mouth of the Adyar in the South and Tondiarpet in the North, supplying fire wood to the city. House gardening is not very common these days due to shortage of water and lack of space.

The city areas is not rich in fauna. The common varieties of domesticated animals found are cows, oxen, buffaloes, sheep, goats, pigs, donkeys, dogs and cats. In the Guindy Raj Bhavan garden are found hards of bucks and spotted deer. The avifauna include fowls, ducks, crows, parrots, pigeons, mynah, koel, sparrows, kites, vultures and water birds like snipes and storks.

The marine fauna of the city is interesting which can be classified as the fauna of the sandy beach and fauna of the sea. The crab, *Ocypodacera lophthalma*, running with lightning rapidity, *philyra scabriuscula*, a tiny crab seen diving into the mud when waves recede and *cunice tentaculata* are most noticeable on the sandy beach.

Mulletts, Silver Bellies, Ribbonfish, White bait, Jew fish, Horse mackerel, Scor, Pomfrot, Lec-tarius, Flying fish, Sardines, Sabre fish, Hilsa, Indian Sakmon, Cookup, Catfish, Synagris, Soles, Sharks, Rays, Skates, Dussumeria, Rockcod, Grabs, Pellona, Perches, Lethrius Engraylis Lobster, Barracuda, Tunny, Leather Jackets, Breems, Snappers, Borito, Polynemus, Crabs and Prawns are the varieties of fish commonly found in the sea.

Mineral resources, Forests, Agriculture.

Economic activities in respect of mining, forestry and cultivation are conspicuous by their absence in the city of Madras.

Land and Land use.

The land utilised under various purpose of the city district during 1974 is as follows :

Category.	In hectares.	Percentage.
Residential	7,471.00	44.90
Commercial	971.74	5.84
Industrial	1,107.19	6.66
Institutional	2,797.09	16.81
Recreation and open space..	3,254.11	19.55
Agricultural	..	..
Others	1,038.29	6.24

Larger area about 45 per cent of the land is used for residential purposes.

Animal Husbandry.

With the implementation of a number of livestock developmental schemes by the Government, not only the rearing of live stock has become lucrative activity but has gone a long way to improve the qualitative production of various species. Unlike the past, now a net-work of Service centres with insemination facilities and the latest technology and improved variety of breeding cattle are available to render all possible assistance. It may, however, mentioned that the live stock activities are very limited within city limits due to the high density of population and scarcity of open space. So the requirements of city population hotels and catering places in respect of milk, meat, poultry and eggs is mostly met by the surrounding areas of Chengalpattu district.

According to the livestock census of 1977, the city district had a livestock population of 47,727, comprising of 20,776 cattle and 18,639 buffaloes. The cattle figures of 20,776 include among others, 1,084 sheep, 5,949 goats, 331 horses and ponies, 878 pigs, etc. The poultry population stood at 86,243, comprising of 84,701 fowls, 1,498 ducks and 44 other birds.

Madras City gets the supply of milk from the two liquid milk plants located at Madhavaram and Ambattur, with a capacity of 1.25 and 2.00 lakh litres respectively. Milk is procured from the adjoining districts in addition to local supply and chilled in the chilling centres located at various places in the State. The chilled milk is transported through road tankers to the dairies at Madhavaram and Ambattur where it is standardised by adding the required quantity of skimmed milk powder and butter fat. The standardised milk (i.e. with 4.5 per cent fat) is distributed through various booths and milk parlours located at Madras. Milk is also distributed through bulk rendering units. During 1979-80, about 920 lakh litres of milk with a daily average of 2.52 lakh litres were marketed through 452 milk depots and 105 milk bars located in Madras City.

In addition to liquid milk, milk products are also being produced and sold through these booths and parlours. The details of sales of milk products for the year 1979-80 are as follows :—

Products.	Sales for 1979-80. (Rupees in lakhs.)
Butter (in kgs.)	6.31
Ghee (in kgs.)	5.47
Milk powder (in kgs.)	2.56
Flavoured milk (in litres.)	8.11

Fishery.

Madras with a coast line of 25.60 kms. is one of the major fishing centres in Tamil Nadu. There are 37 fishermen co-operative societies in the city of which 29 are that of Marine fishermen, five pertain to Inland fishermen, two belong to marketing fishermen and the remaining one is that of Madras Fishermen Co-operative Federation.

The Madras Fishermen Co-operative Federation, functioning with one Assistant Director of Fisheries/Special Officer and one Co-operative Sub-Registrar, was set up with a share capital of Rs. 7,80,250 which includes Government investment to the tune of Rs. 7,50,000.

The main objects of this federation are to arrange for disposal of fish and fish products of its members, to receive and sell fish products in Madras city as agents of the department, to run workshop for boat building and repair of fishing gears and to arrange for the demonstration of improved methods of fishing, processing and marketing with the help of fisheries department. This society operates eight mechanised boats.

An inshore fishing station with a water spread of about 500 sq. miles lying in between 12° 30' to 13° 30' north latitude and 80° 10' to 80° 25' east longitude is functioning since 1965 for the survey-cum-inshore fishing. The total catch for the year 1979-80 was 42,800 kgs. yielding a revenue of Rs. 55,042. The corresponding figure for 1980-81 is 21,256 kgs. valued at Rs. 39,650. During 1980-81, three boats were engaged for survey and exploratory survey with trawl nets. The details are shown below :—

Name of Boat.	Number of days on fishing.	Actual fishing time. (in hours.)	Number of hauls.
(1)	(2)	(3)	(4)
1. F. G. (G) 1	55	335	158
2. F.C. 32/1	149	758	398
3. ZB (g) 5	62	249	161

Fishing also has been conducted in inland waters. The three important inland fishing and training centres in the city are at Chetput, Adyar and Santhome.

During the year 1981, fish seeds worth Rs. 11.79 lakhs were collected from natural resources against the target of Rs. 5.00 lakhs. The Chetput fish farm with a water spread of about 2.5 hectares contributed 4,163 kgs. of fish valued at Rs. 29,808. About 65,000 fish seeds were stocked in this farm during 1979-80.

In Chetput fish farm, 9 nurseries covering an area of 0.0078 hectares have been established for the production and stocking of fingerlings. During the year 1979-80, 3.85 lakhs common carp were produced by induced breeding method and the number of fingerlings raised were 0.48 lakh. About 0.20 lakh fingerlings, fetching a revenue of Rs. 1,064.50, were sold to private parties. In this farm, in a pond area of 0.05 hectare, fresh water prawn culture was done on an experimental basis. About 500 prawn seeds were stocked and 14 kgs. of prawns were produced.

Prawn seeds in large numbers are required for the successful prawn culture operations. The tiger prawn and the white prawn are most suitable for culture in brackish waters. Tiger prawn seeds are scarce. Though white prawn seeds are available, their occurrence is seasonal and undependable. Collection of prawn seeds from natural sources is uncertain, therefore, it is proposed to establish an experimental prawn hatchery at Santhome to produce prawn seeds in large numbers.

The Central Gear wing unit at Adyar was set up to study the relative efficiency of various materials used for fishing, in relating to environmental condition and economy to introduce new types of fishing gears with proper implements for regular and experimental operation in both inland and marine water. The main object of this unit is to achieve international standard in fishing. The trifold programme of this unit are research, production and technical service.

Under research programme various design of fishing gear are being collected from the F.A.C., CIFNET, IPS and from advanced fishing traders and trading fishermen in the state to suit

the needs of coastal and inland water. Under Technical service, training has been given for use of various tackles. Production programme includes production and supply of various types of fishing nets required for the special schemes.

There is a fishermen training centre at Adyar where fishermen are given training in modern methods of fishing with the help of mechanised boats. This centre is functioning since 1961. Since its inception it has been giving full modernised training programmes to the fishermen of Madras and Chengalpattu. Practical training has been given to the trainees to operate trawl nets and winches, maintenance of marine diesel engines, elementary navigation, etc. The course is of 10 months duration and during training period a stipend of Rs. 75 is given. This centre is managed by an Asst. Director of Fisheries assisted by two Inspectors of Fisheries, two Sub-Inspectors, one Foreman, one Machine Instructor, two Drivers and two seamen. This centre has given training to 693 members. Under self employment scheme, 115 graduates were given training in prawn culture and fish culture.

Production of marine fish during 1978-79 was 13,900 metric tonnes. On the marketing side, the Tamil Nadu Fisheries Development Corporation runs 36 retail fish stalls in Madras.

Under the Centrally sponsored scheme, a major fishing harbour at Madras at an estimated cost of 11 crores to provide landing and berthing facilities to 500 mechanised boats and 50 trawlers is under construction.

Industries.

The history of industrial development of Madras City is quite interesting. British Government followed a policy of non-interference for more than a century and did not consider it beneficial to organize and regulate industrial growth in an under-developed economy. The commercial instincts of the East India Company, however, led it to make limited attempts to encourage and improve those traditional industries from which its export trade was largely drawn. Some of the other major bottle-necks in the growth of industries were lack of raw-material, inadequate supply of power, non-availability of machinery, paucity of capital, etc. The need for industrial expansion, research and training was realised by the British administration only towards the beginning of the second world war.

The first factory on record, a tannery in Santhome, was established in 1805 by Mr. Thomas Parry. In 1939, out of 1871 industrial units in the State, 120 were located within Madras City. Indigenous small industrial units started thriving during the 19th century and early parts of 20th century and with it the industrial revolution began. By 1939, there were 141 factories in Madras City with average daily number of 20,946 workers employed. The increase in the number of factories during 1939-43 was more than 14 per cent and the number of workers increased by 50 per cent, registering total number of factories and workers in 1943 as 350 and 47,657 respectively.

The second world war gave a great fillip to industrial development, with the result a number of industrial units had to work to full capacity and in more than one shifts to meet the growing demand. New plants were added to many industrial units but the deficiency of industrial fuels, metallic minerals, supply of water, power and inadequate capital retarded the industrial development. A number of foreign firms, mostly European, came to be established in Madras during the latter half of the 19th century, important among them were Spencer and Company, Addison and Company, Simpson and Company, Best and Company and the Burmah Shell Oil Storage and Distributing Company of India Ltd.

With the establishment of the Reserve Bank in 1935 and the setting up of a chain of Foreign and Indian banks from 1843 to 1937, the industrial growth of the city was boosted to a great extent. But the industrialist wanted the medium and long term financing, so these banks could not even fully satisfy the needs of the industries.

With the independence of the country and declaration of the comprehensive industrial policy during 1948, the Government of India demarcated definite spheres for Government undertaking and private owned industries. During the first five year plan, emphasis was more on food production than on industry. The second five year plan provided for more industries and emphasis was laid on the expansion and development of heavy industries and machine tool enterprise. The period can be marked for entrepreneur becoming industrial conscious and by the end of 1961, 1,297 factories were registered with 65,955 workers.

Under the annual survey of industries relating to the year 1977-78, all factories registered under sections 2m (i) and 2m (ii) of the Factories Act, 1948 have been covered under two main classifications, (i) Census and (ii) Non-Census sectors, the Non-census sector being covered by a 50 per cent sample. The industrial profile of Tamil Nadu, 1981, published by the department of Statistics, presents the analysed results relating to the entire factory sector after certain adjustments for factories in both the Census and Non-census sectors in arriving at the final estimates. According to this survey, Madras district ranks third in Tamil Nadu following Coimbatore and Salem in order so far as number of factories is concerned. In all, there are 1,002 factories in Madras with an average number of workers and employees as 128 and 165 per factory respectively. On the other hand, however, the district city stands at the top so far as the distribution of workers (127,948) and employees (165,048) in all manufacturing industries is concerned and contributes an overall percentage of 22.66 and 23.46 respectively in the State as a whole.

Judging from the productive capital per factory, per worker and per employee by districts, Madras ranks first with 38.6 per cent share in the total productive capital of the State. The productive capital figures per factory, per worker and per employee work out to Rs. 79.80, 0.63 and 0.48 lakhs respectively. In case of percentage share in the total output of the State, Madras city ranks second next to Chengalpattu with a contribution of 17.13, giving average output per factory, per worker and per employee as Rs. 70.14, 0.55 and 0.43 lakhs respectively. A classification by percentage share of value added to identify industrially developed districts, reveals that Madras district tops the list with a maximum share of 24.7 per cent contributing value added at Rs. 20,182 lakhs.

The following statement shows share of important industries in the total value of output during 1977-78 in Madras district :

Serial Number	Industry Group.	Total out put of all Industry Group.	Out put of Industry Group shown in column (2).	Percentage.
(1)	(2)	(3)	(4)	(5)
		(Rupees in lakhs.)		
1	Generation, Transmission and Distribution of electric energy.	70,276	22,314	31.75
2	Manufacture of machinery, machine tools and parts except electrical machinery.		0,915	9.84
3	Manufacture of rubber, plastic, petroleum and coal products.		6,277	8.53
4	Manufacture of transport equipments and parts.		6,098	8.68
5	Manufacture of food products		5,602	7.97
6	Manufacture of cotton textiles		3,469	4.94
7	Others		19,601	27.89
				100.00

The industrial importance of Madras grew considerably also as a distributing centre for the manufacture conducted on a large scale by a number of miscellaneous industries which began to flourish in the city and its suburbs and hinterland. Mention may be made of one of the important medium and large scale industrial unit in the city which was set up by Binny and Company who were the pioneers of textile trade and became the managing agents of Buckingham and Carnatic Mills. The mill is located at Perambur in the city at a distance of 5 kms. from the Madras Port. The Buckingham Mill was established in 1878 with 50,000 spindles and the Carnatic Mill in 1883 with 6,500 spindles and 129 looms. Both were amalgamated in 1920.

The Mill has its own bichromate plant for the production of chemicals for use in the mill's dye house. The raw materials used in the mill are cotton, staple fibre, polyester fibre, etc. This mill is one of the biggest and most modern weaving mills in India.

The Parry and Company founded in 1788 and specialised in the manufacture of sugar, heavy chemicals, fertilisers, timber, etc. can be regarded as the leading industrial enterprise in this part of the country. The manufacturing units of this industry are, however, located outside the city limits.

The second important unit in the city is the Integral Coach Factory at Perambur, set up in the year 1955 with Swiss technical collaboration, with production capacity of 350 unfurnished broad gauge coach shells per year. The Integral Coach Factory is today the biggest coach building factory in Asia with annual production capacity of 750 coaches of various types, designs and gauges. A fully established furnishing factory was annexed to the main shell factory in 1962. The total cost of the entire project was Rs. 12.85 crores. It has provided employment to 14,485 persons. During 1981-82, 720 coaches are planned to be turned out. The total value of production for the year is Rs. 53.71 crores. It has entered the export market in 1967 and the total value of export orders already executed is Rs. 22.28 crores and the order planned for 1981-82 is Rs. 2.94 crores.

Another unit, the Hindustan Teleprinters Limited, was set up in the city during December, 1960 in collaboration with Messrs. Ing. C. Olivetti of Italy for the manufacture of Teleprinters and Electronic exchange equipments. The factory was established at a cost of Rs. 2.65 crores and commenced production in the year 1961-62 and during the first ten years it assembled 26,675 teleprinters, valued at Rs. 19.4 crores. At present, the Company has a capacity to manufacture about 8,000 units per annum. The paid up capital of the company is Rs. 123 lakhs, out of which 82 lakhs were subscribed by the Government of India. The total capital employed on the project is Rs. 827 lakhs. The company achieved a record production of 8,318 units during the year 1980-81. As part of its diversification programmes the company propose to manufacture electric typewriters, electronic teleprinters and computer peripherals.

The Dynavision Limited at Adyar with an annual capacity of 20,000 television sets is a Tamil Nadu Industrial Development Corporation's joint sector project. This unit commenced production in June, 1975. During the year 1980, it manufactured 20,922 television sets. The total cost of the project was Rs. 75 lakhs, out of which Rs. 10 lakhs were subscribed by the Tamil Nadu Industrial Development Corporation. The plant has now got 362 employees.

The Tamil Nadu Minerals Limited set up in April, 1978 for commercial exploitation of some of the important industrial minerals in the state has proposed to establish a cutting and polishing units at Madras at a cost of Rs. 152 lakhs.

The following statement indicates some of the important medium and major industries by production having their administrative set ups in Madras but all their productive industrial units are located outside the city limits :—

Name of the Unit.	Product.	Annual production for 1979.
(1)	(2)	(3)
1. India Cements Ltd.	Malleable Iron castings	867 M.T.
2. K. C. P. Ltd.	Steel castings	1,284 M.T.
3. Best and Crompton Engineering Ltd.	(i) Cast Iron castings	1,264 M.T.
	(ii) Carbon Brushes	14 lakhs Nos.
	(iii) Electric Motors	76,794 H.P.
4. Tube Products of India	Pipes and Tubes	21,224 M.T.
5. India Pistons Ltd.	(i) Pistons	11.39 lakhs Nos.
	(ii) Piston Pumps	78.41 lakhs Nos.
	(iii) Cylinder Liners	3.01 lakhs Nos.
	(iv) Gudgeon Pins	10.77 lakhs Nos.

Name of the Unit.	Product.	Annual production for 1979.
(1)	(2)	(3)
6. Carburators Ltd.	Carburator for 4 wheels	71,586 Nos.
7. Brakes India Ltd.	Foundation brake equipment for automotive and non-automotive units.	64,543 vehicle sets.
8. Wheels India Ltd.	Automobile wheels	728,503 Nos.
9. Ashok Leyland Ltd.	Heavy duty vehicles	10,000 Nos.
10. Enfield India Ltd.	Motor cycles	22,000 Nos.
11. T.I. Cycles of India	Bicycles	394,166 Nos.
12. Gordon Woodroffe	(i) Accessories, Machine tools	20,568 Nos.
	(ii) Chrome tanning of hides	122,000 pairs.
	(iii) Vegetable tanning of hides	151,000 pairs.
	(iv) Shoe upper	78,000 pairs.
13. Sundaram Fastners Ltd.	H.T. Fastners of bolts & nuts	2,358 Nos.
14. Parry Confectionery Ltd.	Confectionery	4,244 Tons.
15. The Dunlop Rubber Co. (India) Ltd.	(i) Giant tyres	331,000 Nos.
	(ii) Car tyres	102,000 Nos.
	(iii) Motor cycle tyres	101,000 Nos.
	(iv) Giant tubes	277,000 Nos.
16. The K. C. P. Lt.	(i) Mill plant, boiling plant, etc.	167.08 lakhs of Rupees.
	(ii) Metallurgical machinery	38.19 lakhs of Rupees.
	(iii) Cement mill machinery	204.53 lakhs of Rupees.

Small-scale industries, as ancillary industries, form the pillars of industrial growth and contribute significantly to the national economy. Compared with other districts, Madras has the largest number of small-scale industrial units. According to the Directory of small-scale industrial units in Madras upto 31st December, 1980, there were in all 6,174 industrial groups as detailed below :

Industry group.	Number of units.
20-21 Manufacture of Food products	284
22 Manufacture of Beverages, Tobacco and Tobacco products	31
23 Manufacture of Cotton Textiles	1
24 Manufactures of Wool, Silk and Synthetic fibre Textiles	116
25 Manufacture of Jute Hemp and Mesta Textiles	2
26 Manufacture of Textile products	265
27 Manufacture of Wood and Wood products, Furniture and Fixtures	157
28 Manufacture of Paper and Paper products, Printing, Publishing and allied industries.	803
29 Manufacture of Leather and Foot wear products	138
30 Manufacture of Rubber, Plastic, Petroleum and Coal products	561
31 Manufacture of Chemical and Chemical products	437
32 Manufacture of Non-Metalic Mineral Products	174

33	Manufacture of Basic Metals	262
34	Manufacture of Metal products	1,653
35	Manufacture of Machinery and Machine tools except Electrical Machinery.	476
36	Manufacture of Electrical Machinery and parts	304
37	Manufacture of Transport equipment and parts	238
38	Other manufacturing industries	272

To promote the planned growth of small-scale industries, Government has established Industrial Estates which provide incentive to see factory space at comparatively cheap rents, common service and other facilities. One of the most important and the largest Industrial Estate is the one at Guindy in Madras City, built in 100 acres of land where several schemes and facilities have been integrated and the factory sheds of eight different sizes have been built for various kinds of industries. The Estate was established in January, 1958 and provides to the units with numerous technical services such as mechanical, metallurgical and chemical testing laboratory, tool-room, a forging and heat treatment shop, a finishing shop, a wire drawing enamelling and cotton cover unit. Besides, it offers a pressure die casting unit, a foundry, a wood working and sports goods unit, a scientific glass product unit, a raw material depot, a technical information section with a library, blue printing equipment and common lease shop. With the rapid growth of industrial units for the provision of additional space, an additional area of 120 acres has been acquired. To meet the requirement of working capital of small-scale units, an Industrial Co-operative Bank is functioning in the Estate.

The Industrial Estate at Guindy is at present spread over 163.52 hectares and houses 269 factory sheds for medium and large scale industrial units while 110 sheds are meant for small scale units. The total investment on the Guindy Estate by the Government up to 1981 stands at Rs. 2.25 crores.

Of the Industrial Estates which have come up recently in Madras City, mention may be made of the Industrial Estate in Arumbakkam spread over an area of 4.22 acres which houses 42 industrial units. Second is Villivakkam extending over an area of 8.92 acres, accommodating 60 industrial units. Third in Kodungaiyur, spread over an area of 8.53 acres, houses 48 industrial units.

The Industrial Estate at Madhavaram and Perambur on an area of 30 acres in Madras is meant exclusively for the leather industry. It has been established with the primary aim to promote finished leather goods for export through Madras. In the field of research and training, the Central Leather Research Institute is a remarkable achievement and boon for leather based industrial units.

The object of the Vikram Sarabhai Instronic Estate, Adyar, is to encourage manufacture of electronic and allied items like industrial process controls, special appliances, etc. So far, 78 factory sheds have been constructed and allotted. During 1982-83, it is proposed to construct 12 more industrial sheds.

Madras city also plays an important role in the development of cottage industries. Handicrafts and cottage industries link us with the rich past heritage and are good foreign exchange earners too. A Handicrafts Emporium and Dye Research Laboratory at Kalakshetra, Adyar, have been established with financial aid given by the Handicrafts Board and the Government of India. The three craftsmen training centres located at North Madras, Guindy and Stree Seva Mandir and the State sponsored Handicrafts Emporium, Khadi Gramodhyog Bhavan, and the Victoria Technical Institute are contributing a lot to promote and specialise in South Indian Handicrafts. Cottage industries, besides meeting a part of consumers needs, not only provide employment to many but are a source of subsidiary income to a lot of poor craftsmen. As per 1981 Census, there are 16,068 persons engaged in the household industries within the city, comprising of 11,130 males and 4,938 females.

Last but not least, the Film Industry had an early beginning in Madras City but the motion picture industry recorded rapid growth with the establishment of the Gemini Studios in 1941 followed by the Neptune Studios in 1946. At present, Madras has a number of studios vigorously engaged in the production of black and white and coloured pictures in Hindi, Tamil, Telugu and Kannada languages. Of these studios, mention may be made of A.V.M., Vijaya, Vahini, Satya, Gemini, Neptune and Bhaani which are most popularly engaged by the various film producing units. Some of the most expensive film equipment in Asia can be found in Kodambakkam, the Hollywood of Madras.

Development of Industries in and around the city, the existence of a first class port together with the facilities of good railway system and road transport and the ever-increasing demand of commodities enabled Madras to emerge as an important commercial centre in India. The trade of Madras can broadly be classified under the following heads:—

- (i) Rail and river borne trade,
- (ii) Coastal trade,
- (iii) Foreign trade,
- (iv) Air borne trade,
- (v) Road trade.

The main commodities moving on railway are cement, food grains, fertilisers and petroleum products and these constitute nearly 75.5 per cent of the originating traffic on the broadgauge and 67.4 per cent on the metre gauge of the total operating traffic. The earnings of some of the important stations in Madras during the years 1978-79 and 1979-80 are as under :

			1978-79.	1979-80.
			RS.	RS.
Indian Oil Corporation, Tondiarpet	..	..	65,906,299	78,252,621
Salt Cotaurs	..	..	52,815,770	67,113,287
Madras Harbour	..	..	32,100,098	65,054,578
Madras Refineries, Tondiarpet	..	..	11,368,534	9,942,684

Super Express goods trains, mostly hauled by diesel engines, have been introduced in between the following Southern Railway Stations for quicker movement of long distance goods traffic.

- (i) Madras—Shalimar
- (ii) Madras—Wadi Bunder
- (iii) Madras—New Delhi
- (iv) Madras—Bangalore

Five Star services namely, container freight service, freight forwarder scheme, mobile booking service, quick transit service, collecting and forwarding service have been introduced to improve trade carried by rail.

The Buckingham canal which establishes communication to the city of Madras from Krishna and Godavari deltas in the north and Marakkanam in the south is the only water-way engaged in trade and commercial activities and a reference to which has already been made in the preceding paragraphs.

The extent of trade carried on by Madras with other states and particularly foreign countries is considerable mainly due to the existence of a first class port. Annually over 1,200 steamers and sailing vessels enter the harbour with a total net tonnage of more than 50 lakhs. By and large the incoming goods to Madras port exceed the out-going goods in net weight, as will be evident from the volume of cargo handled at Madras port during the years from 1971 to 1980, shown in the following statement.

Years.	Imports (in '000' tonnes).			Exports (in '000' tonnes).		
	Coastal.	Foreign.	Total.	Coastal.	Foreign.	Total.
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1971-72	156	3,949	4,105	274	2,413	2,687
1972-73	147	3,922	4,069	330	2,417	2,747
1973-74	286	4,402	4,688	404	2,658	3,062
1974-75	309	4,452	4,761	396	2,760	3,156
1975-76	288	4,799	5,087	184	2,612	2,796
1976-77	166	4,600	4,766	210	2,860	3,070
1977-78	213	4,341	4,554	408	3,106	3,514
1978-79	282	4,995	5,277	343	3,953	4,296
1979-80	258	5,447	5,705	360	3,920	4,280

The main items of exports are hides and skins, ores, tobacco, food grains, cotton goods, bone and bone meal, sugar, etc. U.K. buys most of the hides and skins exported from Madras. Mica is chiefly exported to West Germany and USA. A statement showing principal articles exported in tonnes from the port of Madras during 1971 to 1980 is given below :—

Year.	Hides and skins.	Ores.	Tobacco.	Food Grains.	Cotton piece Goods.	Bone and Bone meal.	Sugar.	Others.	Total (Tonnes).
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
1971-72	32,290	2,111,956	45,311	3,034	11,172	6,430	1,435	475,447	2,686,715
1972-73	39,375	2,153,022	62,738	4,086	11,336	9,326	1,655	465,796	2,747,334
1973-74	28,686	2,363,947	50,247	2,894	13,558	16,577	12,456	573,199	3,061,564
1974-75	21,500	2,327,267	53,061	11,531	10,585	17,514	125,275	588,746	3,155,479
1975-76	25,163	2,106,368	42,317	3,737	11,706	13,146	197,195	396,181	2,795,813
1976-77	17,652	2,329,654	36,350	5,792	15,639	24,188	35,040	605,637	3,069,952
1977-78	12,160	2,589,333	34,797	174,416	16,337	19,976	6,516	660,706	3,514,241
1978-79	11,397	3,273,031	32,909	216,640	11,833	17,627	139,483	592,644	4,295,664
1979-80	11,366	3,252,527	23,641	185,054	9,766	11,669	100,598	685,145	4,279,766

The volume of trade passing through the port, however, has been steadily increasing. During the year 1979-80, foreign trade forms more than 91 per cent of the total volume of trade. The main items of import are foodgrains, iron and steel (manufactured) fertilizers, machinery, paper and stationery, oils, chemicals, etc. The chief supplier of capital goods continue to be U.K., USA, West Germany and Japan. The following statement shows the principal articles imported in tonnes into the port of Madras during 1971-80 :—

Year.	Food grains.	Iron and Steel (Manufactured).	Fertilisers.	Machinery.	Paper and Stationery.	Oils.	Chemicals.	Others.	Total (in Tonnes.)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
1971-72	559,026	204,787	474,087	17,320	54,239	28,147	57,952	2,709,829	4,105,387

21

The following figures show the value of foreign imports and exports through the port of Madras during 1971-1980:

Year	Imports (in lakhs of Rupees)	Exports (in lakhs of Rupees)
1971-72	27,357	16,064
1972-73	22,058	22,709
1973-74	36,900	27,163
1974-75	41,297	25,212
1975-76	30,109	37,953
1976-77	40,400	40,471
1977-78	37,269	40,190
1978-79	70,481	38,375
1979-80	99,475	36,539

Madras City has a fine international airport at Meenambakkam. The internal passenger and cargo traffic are handled by Indian Airlines Corporation while Air India looks after the traffic outside India. Though Air transport has the advantage of quickness, it still suffers from limitations of high cost of service. Value of foreign imports and exports through the Airport of Madras during 1971-1980 is shown in the Table below :—

Year	Imports (in lakhs of Rupees)	Exports (in lakhs of Rupees)
1971-72	1,199	908
1972-73	1,416	1,664
1973-74	1,813	2,002
1974-75	2,320	3,029
1975-76	1,966	5,833
1976-77	10,925	10,069
1977-78	7,594	11,473
1978-79	11,188	20,518
1979-80	11,475	31,518

Madras City is linked with all major cities and towns by well laid roads. It retains its strategic importance as the chief commercial centre of the state. Trucks, tempos, hand carts and bullock carts move in and out of the city every day and night bringing in and taking out commodities of all kinds. Though the city gets a sizable portion of its daily requirements like vegetables, rice, fuel, etc., through roads, no precise statistics could be presented for want of details. There are 5,366 registered goods vehicles and 140 tractors actively engaged in transport of goods from the city to various places. Besides, a number of trucks from other districts of the State as also from various States of India (having All-India permits) can be seen operating in the city for the import and export of commercial goods. Some of the important commodities that move out of the city are machinery, chemical products, iron materials, electrical goods, rubber and leather goods, cycles, etc., while rice, firewood, chillies, sugar, salt, vegetables, fruits, flowers, paper, oil, etc., are some of the important commodities coming into the city.

A number of chambers of commerce and trade associations are functioning in the city for the benefit of the mercantile community. The most representative is the Southern India Chamber of Commerce started in October, 1909 and it is the oldest Indian Chamber in Tamil Nadu and the second oldest in the Country. The membership of the chamber is open to all members of the Business and Industrial community, as well as Banks and Insurance

companies. The chamber is also represented on various public bodies. This chamber is a founder-member of the Federation of Indian Chambers of Commerce and Industry, a member of the Indian National Committee of the International Chamber of Commerce and is a sustaining member of the Indian Standards Institution. The activities of the chamber have been increasing from year to year. It issues certificates of weight, origin, quality and measurement for collection of freight. Its service to the cause of Indians abroad is particularly important.

Besides, there are a number of Trade Associations playing an important part to promote trade and commercial activities in their own spheres.

Commercial Banks also play a vital role in promoting trade and commerce by providing loan facilities and expert advice. There are 496 Commercial Bank branches functioning in the City.

George Town is the central area of Madras City characterised by the concentration of financial and banking institutions and commercial establishments. Most of the commercial activities of the city are concentrated in the areas adjoining Rajaji Salai and N.S.C. Bose Road. Wholesale business is centred around the China Bazaar and the Kothawal Bazaar. Retail trade is spread along N.S.C. Bose Road, Evening Bazaar, Broadway, Mint Street, Walltax Road, etc. Service Industries are spread all over, particularly along the Walltax Road.

There are several markets in Madras City for the sale of vegetables, meat, fish, eggs and condiments. The biggest of them is Kothawal Bazaar which supplies vegetables, fruits and condiments to the entire city. The vegetables, fruits and flowers are brought to this market from various places like Bangalore, Ootacamund, Bellary, etc., and sold to other parts of the city through hawkers who take them by means of carts and send them all over the city.

Of the markets maintained by the Corporation of Madras, Moore Market is the biggest and the most famous. There are about 700 stalls in the market. The main building accommodate stalls for various commodities such as books, shoes, toys, textiles, watches, etc., There are shops for mutton, fowl, prawns, beef and pork. There are also rows of shops for second-hand goods of all varieties. The fruit-cum-flower market is another important market in the city which trade in flowers and fruits. There are about 150 stalls in this market. The other markets are small one catering to the needs of the local population.

Shopping centres have come up in most of the areas where concentration of residential houses is on the increase. Mention may be made of the important centres like Mint Street, Walltax Road, Purasawalkam High Road, Triplicane High Road, Luz Corner, Pondy Bazaar, T. Nagar, etc. Anna Salai, one of the arteries of the Madras City has grown into a fashionable shopping centre, housing a variety of shops for textiles, sports and photographic goods, automobile and spare parts, electrical and electronic goods, eating houses, etc. A number of Cinema theatres, shopping arcades and a variety of handicrafts emporia like the Victoria Technical Institute, Kashmir, Kerala, and Karnataka Government emporiums. Khadi Gramodyog Bhavan, etc., are located on this road. Among the shopping arcades, mention may be made of the Spencers department stores, Vummidiar shopping centre and Kamadhenu Super Market.

The Triplicane Urban Co-operative Society (Popularly known as TUCS) is one of the leading retail agency, serving a large section of the city. This society started in 1904, with the main aim of supplying necessities of life to its members, extends its service through a number of branches situated in different parts of the city. Besides, there are fair price shops run by the Civil Supplies Corporation in various localities of the Madras City.

Transport and Communication—

Madras is well connected to all major cities in India by rail and road. It is a major sea port, as also an international airport served by leading international airlines.

The double line metre-gauge sub-urban electric train service between Tambaram and Madras Beach, a route length of 29 kms., is a landmark in the railway transportation in the city. This section of the transport service plays a vital role in handling the progressive sub-urban traffic. Presently a total of 256 trips are being run daily on Beach—Tambaram section with 43 numbers of four coaches electric multiple unit stock handling about 129 million passengers during 1979-80. The passenger carrying capacity of the sub-urban train is 1,600.

The Madras Central station is the starting point and the terminus of the broad-gauge lines for passenger and parcel traffic. The Madras Beach station is the terminus for the metre-gauge section. The combined north-west, south-west and west coast lines from Arakkonam and the north-east line from Calcutta converge at Basin Bridge before reaching the Madras Central station. The

broad-gauge lines connect Madras with such important cities like Calcutta, Delhi, Bombay, Bangalore, Hyderabad and the major towns of the west coast viz; Mangalore and Cochin, via. Coimbatore. Another broad-gauge line from Basin Bridge connects the Madras Central station with the Beach station, the terminus of the metre-gauge section of the Southern Railway. Although the Beach station is the terminus of the metre-gauge section of the Southern Railway, all the important passenger trains start from and arrive at the Egmore railway station. It is only at the Beach station that the two gauges meet.

The Port Trust has its own railway lines which are connected to the Southern railways and are operated by the Port Trust.

Surveys, undertaken both by the State and Central Governments, indicate the utter inadequacy of the present transport system in Madras City. It has been established that the increased volume of commuter traffic in the coming years can only be handled by a Rapid Transit System run by the Railways. The project team has prepared an exhaustive project report for the function of such a transit system between Tiruvottiyur and Kasturba Nagar. This is a technically and financially viable scheme and the State Government would like to press for its inclusion in the 6th plan. If, however, the Government of India decides to implement the scheme in stages, then work on the first stage between Madras Beach and Luz (a distance of 8.4 kms. costing about Rs. 56 crores) may be started immediately and between Luz to Kasturba Nagar (4.3 kms.) and Tiruvottiyur to Madras Beach (9.3 kms.) in the second and third stages.

With the completion of railway electrification of Madras—Tiruvelllore—Arakkonam and Madras—Gummidipoondi lines and linking of the broad-gauge system at Madras Beach, commuters from different directions could be served.

Due to the limitations and locational characteristics of the railway lines in the district, the urban transport in Madras is predominantly dependent on bus transport operated by the Pallavan Transport Corporation. The operative fleet strength of the Corporation was 1,683 as on April 1980. About 26 lakh passengers per day make use of these metropolitan transport services. To cater to the needs of the public in low density new habitations and to reduce overloading in the buses during peak hours, this corporation is running 34 converted short wheel base buses, 319 women-cum-children specials and 160 express services.

The fleet strength of 1,683 buses is not adequate to meet the needs of the public especially during the peak hours. Considering both passenger traffic and to reduce overloading in the buses, additional buses will be required to meet the needs of passengers. The assistance of the World Bank was sought for improvement of the Madras urban transport system. The World Bank has accepted an integrated programme of improvements to the Madras urban transport systems. Under the first phase of the Madras Urban Development project, purchase of 285 buses, construction of terminals, shelters and depots were taken up.

In addition to the Madras Urban transport system, there is the district services operated by the district wing of Pallavan Transport Corporation. The area of operation of this Corporation is Chengalpattu district. The fleet strength of this Corporation is 527 buses with a labour force of 4,058. This wing is carrying on an average 2.2 lakh passengers per day.

The long distance express services connecting all the district headquarters and important cities and towns in the State with Madras City are operated by the Tiruvalluvar Transport Corporation. Its area of operation is the entire state, with a fleet strength of 495 and carries on an average 44,000 passengers per day.

Supplementing the state carriers, 2,036 autorickshaws, 2,604 ordinary taxis, 3,182 touris taxis, 15 luxury coaches and mini buses and 114 private transport vehicles are in operation in the district. There are 5,366 goods vehicles in the city for moving cargo to various places.

Madras City is one of the major bicycle using centres in the state. There are about six lakhs of bicycles on city roads. People prefer bicycle because of over crowding in the buses during peak hours.

Traffic survey reveals that the people of Madras rely heavily on walking, bicycling and buses for transport. Pedestrian and bicycle trips each account for about 21 per cent of all trips, buses for 42 per cent, trains for 11 per cent and cars and motor cycles for 5 per cent. Low income households make 60 per cent or more of trips on foot, 80 per cent do not even own a bicycle, and bus is their main mode of vehicular transport. Motor vehicle congestion is not serious even during the peak hours and ownership of cars is scarcely increasing. However, on several major roads where bicycles form 50 per cent of traffic, motorized vehicles are a hazard to bicyclists.

The city has a well knit road system of more than 1,370 kms. connecting various centres of importance. The main arterials of the city are the three great trunk roads which have their origin in the city and radiate to the north, west and south and are locally known as (i) The Wall-tax road and the Erukancheri High Road, leading to the National Highway, G. N. T. Road, (ii) The Poenamallee High Road joining the National Highway and (iii) The Anna Salai leading to the G. S. T. Road. The other radials of the city are the Arcot Road, the New Avadi Road, and the Tiruvottiyur High Road.

Buckingham canal is used for navigation which establishes communication from Krishna and Godhavari deltas in the north and from Markanam in the south to the city of Madras. It thus enables the produce of these two great delta systems to be brought to Madras. It has provided Madras with cheap and easy communication between not less than five districts and with the important towns of Kakinada, Vijayawada, Masulipatnam, Ongole and Nellore besides numerous small trade centres. The traffic in the canal is mainly of country boats. During the year 1978-79, 243 boats carried 4,860 metric tonnes of cargo valued at Rs. 1.86 lakhs. Cargo carried consists mainly of salt, paddy, fire wood, etc.

The development of this waterway to provide for passenger movement would greatly reduce the present congestion of traffic on roadways and railways. It would also be cheaper. Although the waterway exists, many stretches would require widening and deepening to make transportation possible.

Madras city has a harbour. It is a major port consisting of a basin of 200 acres for ships of 30 feet draft, a basin of 9 acres for lighter craft, tugs, launches, etc. There are eleven quay berths and 10 mooring berths.

The port maintains its own railway system. It is a mixed gauge railway and is connected with the Southern Railway broad-gauge at Royapuram station on the northern side and metre gauge at Madras Beach station on the southern side. Direct loading of cargo from ship to railway wagons and *vice versa* is arranged at all quay berths.

During the year 1979-80, over 1,000 steamers and sailing vessels entered the harbour. Number of passengers embarked and disembarked were 39,228 and 35,521 respectively and the volume of trade at the port was 99.85 lakh tonnes out of which foreign trade was 93.67 lakh tonnes and the coastal trade was 6.18 lakh tonnes.

The proposal of the Madras Port Trust to set up a dry dock at Madras port is under consideration of the Government of India. The present ship way is 70 years old and is not able to meet the needs of even the ports' dredging vessels which are now sent to Bombay or Calcutta for repairs. More than 600 ships call at Madras port every year and a dry dock will be a boon to them. There is a good base of heavy engineering workshop in Madras with a large number of trained marine engineers. A dry dock apart from facilitating quick repair of ships and better functioning of the port will also earn valuable foreign exchange. A scheme for providing coastal ferry services between Madras and Tuticorin ports may be taken up in the central sector during the 6th plan period. The passenger and cargo traffic between these two ports is expected to increase considerably and in order to cater to this increased traffic, the normal rail and road links between Madras and Tuticorin would not be adequate. Coastal shipping and ferry service between Madras and Tuticorin would be a helpful addition to transport facilities and may make the journey shorter and convenient.

Madras has an air port at Meenambakkam. It is an international airport served by leading international airlines. The internal passenger and cargo traffic are handled by the Indian Airlines while Air India looks after the traffic outside India. Value of foreign exports and imports by air during the year 1979-80 was Rs. 31,518 lakhs and Rs. 11,475 lakhs respectively. Apart from linking the city with the big cities of the north like Delhi, Bombay and Calcutta, important tourist and business centres in the country are also connected with Madras by air.

The first regular postal system on a limited scale is said to have been initiated even before 1736 by the East India Company. During 1774, a Postmaster-General was appointed and the postage was charged for the first time on private letters on a mileage basis and copper tickets were used for post purposes. No further improvements were noted for next half a century in the postal communication. With the coming into operation of the first railway during 1856, a Railway Mail Service began to operate in Madras. Postage stamps came to be introduced in 1854. By 1874, there were nine Post Offices in Madras. In 1876, a fortnightly Mail Service was started from Madras to Calcutta and Bombay. The decade 1870-80 was remarkable for not only introducing special postage-rates for official letters, V. P. Postage and Money Orders but also for making available telegraph facilities. In Madras City, telephone service was set up in 1881

by the Oriental Telephone Co. Ltd., under a licence by the Government and by 1910 number of subscribers was 350. In 1930, the Madras Flying Club was founded and it handled the first Total Air Mail Plane in 1932.

After Independence, the Administrative set up became unwieldy and the Postal Services were reorganised and all Town Sub-offices were constituted into a separate division under a city Superintendent with effect from 20th July, 1948. With the works of the division also becoming unwieldy, another division was created in Madras city from 2nd January, 1953, naming the existing division as Madras City South and the new division as Madras City North. Mount Road telegraph division was upgraded into a Head Office on 3rd October, 1961. To provide the facility of late posting, two mobile post offices were introduced. They are stationed at important centres in the evenings and nights. At present, there are three postal divisions, with the same number of Head post offices functioning in the City. The newly set up division is called the Central City. Apart from this, out of 239 post offices in the district, 19 are sub-post offices, 57 are lower selection grade post offices, 98 are time scale, 6 are extra departmental sub-offices, one extra departmental branch office and 58 combined telegraph offices.

Madras City is having the biggest Central Telegraph Office in the State accommodated in General Post Office building. All the important stations in the south and north of Madras are connected to this office. Telegraph services are being rendered both by Morse and Teleprinter since some of the stations are connected by Morse and some by Teleprinter. Madras is also connected to major cities like Bombay, Calcutta, New Delhi, etc. by a number of V.F.T. systems. There is a good number of teleprinter circuits rented to private bodies and other administrations such as Press Information Bureau, Civil Aviation Dept., Daily Thanthi, Andhra Patrika, etc. In addition to the above office, another 57 units in the City provide telegraph facilities.

There were twenty telephone exchanges catering to the needs of the inhabitants of the city district during 1978-79. In addition, private branch exchanges (PBX) and private automatic branch exchanges (PABX) aggregated to 1,432. These exchanges in all had 70,758, 4,945 and 75,703 direct, junction and working lines respectively. Extensions from direct exchange lines and PBX and PABX were of the order of 36,768. The telephones in use stood at 112,471. Besides, there were 509 public call offices, of which 8 were exclusively meant for long distance calls.

Electricity:

The Ennore thermal power station and the Basin Bridge thermal power station are the two power plants located in and around Madras. The Ennore thermal power house has a total capacity of 450 mw. (2 units of 60 mw. and 3 units of 110 mw.) The Basin Bridge thermal power station is located in the heart of Madras City with nucleus of 33 kv. systems feeding the various parts of the metropolitan area and is a vital installation to ensure adequate power supply to essential services. This power plant was installed with a capacity of 90 mw of (2 units of 15 mw and 2 units of 30 mw). This project covers modifications to the existing system such as coral, water and ash disposal systems. As the existing units of the Basin Bridge power station have already served for over 25 years, it has been proposed to raise a new power house with an installed capacity of 110 mw. This scheme envisage replacing the existing low pressure old units by a high pressure turbo generated set of 110 mw. capacity with associated boiler.

The following statement shows the consumption of electricity in million units in the city during the year 1979-80.

(1)		Madras Electric Supply Corporation (South). (2)	Madras Electric Supply Corporation. (North). (3)	Madras Electric Supply Corporation. (South). (4)

Madras is at present the biggest load centre due to industrial complex with a potential for further growth. In view of the need for augmenting generation capacity at this major load centre, it is proposed to establish a new thermal station at North Madras of capacity 630 mw. with energy benefits of 3,370 mw. to ensure satisfactory supply condition in this part of the grid.

Important social, cultural and political events.

Most important social, cultural and political events, which took place in Madras district during the past decade, are briefly mentioned in the subjoined paragraphs in a chronological order:—

1972—Madras Metropolitan Development Authority (MMDA) was set up for formulating long term planning and development of the Madras Metropolitan area. Pallavan Transport Corporation (PTC), a Government of Tamil Nadu undertaking, was incorporated as a Public Limited Corporation during the year and its Metropolitan Wing was made responsible for transport service within the MMA. During December, the first Governor-General of India Shri O. Rajagopalachari passed away and to commemorate the memory of the great veteran statesman, prominent freedom fighter and political leader, the State Government have raised a life size statue of Rajaji near Parry's corner and later on a memorial was erected at Guindy where he buried his mortal remains.

1973—The year marked the opening of the Anna fly-over in Mount Road to traffic on 1st July. The fly-over has been named after the former Chief Minister of Tamil Nadu Dr. C.N. Annadurai, an outstanding statesman and one of the most popular leaders of his time. The people used to call him 'Anna' meaning elder brother. During the year, Shri E.V. Ramaswamy, a social reformer, popularly known as 'Thanthai Periyar' by the masses, passed away. He was the founder of the Dravida Kazhagam (DK) party.

1974—Prohibition lifted in July, 1971 was re-imposed in Tamil Nadu on 31st July. Taj Coromondal, a five star hotel, was inaugurated.

1975—A Pedestrian sub-way near Moore Market was thrown open to public. The year can be singled out for the acute scarcity of drinking water. In November, however, the city had heavy rains followed by floods which completely paralysed the city life, rendering thousands of slum dwellers homeless. Chola Sheraton, a five star hotel, was inaugurated in September. During October, the great leader and politician Shri K. Kamaraj passed away, a memorial adjoining Raj Bhavan stands as a monument in his memory.

1976—On 31st January, State Assembly was dissolved and President's rule was declared. During the year, three new trains.—Tamil Nadu Express between Madras and New Delhi, Coromandal Express between Madras and Howrah and Ganga Cauvery Express between Madras and

Varanasi were introduced. Heavy rains and cyclonic storms lashed the city during October-November, causing heavy damage to property and lives. The year is memorable due to the fact that Anna University came into being and the four Engineering Institutes were brought under its management and control.

1977—On 10th January, Light house on Marina beach was inaugurated by Dr. G S. Dillon, Union Minister for Shipping and Transport. General elections to the State Assembly were held on 19th June. During the year, three pedestrian sub-ways one each near Presidency College, Thousand Lights market and Shanthi Theatre in Anna Salai were opened to public. The year is also remarkable for the introduction of two super-fast trains, the Vaigai Express between Madras and Madurai and the Kovai Express between Madras and Coimbatore. Besides, MMDA prepared and implemented the Madras Urban Development Project (MUDP) at a cost of Rs. 468.2 million, out of which the World Bank had provided loan assistance to an extent of Rs. 216 million.

1978—The year marked the merger of twelve panchayats (eleven town panchayats and one village panchayats) of Saidapet taluk with Madras Corporation. Besides, Madras Metropolitan Water Supply and Sewerage System Board (MMWSSB) was established as a corporate body to bear responsibility for water supply and sewerage services in MMDA.

1979—During the year, six pedestrian sub-ways at the following places were opened to public to ensure safety.

- Near Hindu Office
- Near Safire theatre
- In Walltax road
- Near Teacher's College, Saidapet
- Near Kilpauk Medical College
- Near Beach Railway Station

1980—State Assembly was dissolved on 17th February and elections to the State Assembly were held afresh on 28th and 31st of May. The year also witnessed the electrification of railway line between Madras, Thiruvattiyur and Ponneri and the inauguration of the electric train service between Madras and Tiruvellore.

Important Places of Religious, Historical and Tourist interest.

The following paragraphs give an account of most of the important religious, historical and other places of interest for the tourist and others in the legendary city of Madras.

South Indian temples with their marvellous and unique architectural glory have a rich cultural heritage and greatness of their own which attracts not only large number of tourists from other parts of the country but from abroad also. Moreover, South-India was least affected by the series of invasions which North-India witnessed throughout its history as such the real Hindu culture, which was very closely associated with temples, has been preserved in its most pristine form in Tamil Nadu. It is no wonder, therefore, that the ancient religious outlook is still reflected in 300 odd temples of the city which are thronged with thousands of devotees daily who come in all reverence to pay homage to the presiding deities. These temples are either under the control of the Hindu Religious and Charitable Endowments Board or other organisations. Besides, a large number of temples of Lord Ganesa which are in the form of tiny structures can be seen in most of the streets of the city, run by contributions made by the local residents. Similarly, one comes across many shrines for Goddesses installed within or outside structures which too play an important role in the religious life of a section of the residents in the city.

The following extract from the 1961 Census publication 'Temples of Madras State' is quite informative:—

"Among the many attractions of Madras City to tourists are the two ancient shrines of Sri Kapaleswarar, Mylapore and Sri Parthasarathy, Triplicane. Though less known, Sri Gangadhara Eswarar in Purasawalkam and Sri Thiruvatteswarar in Thiruvatteswaranpet are two other temples of antiquity. A few temples have some special features. Muslims also worship the presiding deity in Sri Thandu Mariamman temple, Muthialpet. The Goddesses in the Sri Elanthai Muthu Mariamman temple, Kondithope and Sri Adhi Thirisdai Ammas in Pudupet are known to possess the power to cure blindness. The Sivalingam which has been installed in the Komaleeswarar temple, Komaleeswaranpet was found under a bush on which a

cow milked herself. In the Pachaiamman temple, Komaleeswaranpet, where there is a separate sanotum for Sri Mannar Eswarar, the deity is represented by a stone idol instead of a Lingam. As the Srinivasa Perumal temple in Korukkupet was built by an Adi Dravida family, Mahatma Gandhi paid a visit to it."

In all probability, the ancient Mylapore temple referred to in the *Thevaram hymns* was located on the sea shore and was destroyed by the Portuguese about the beginning of the 16th Century as corroborated by legends and historical ruins of carved stones pillars and broken stones of mandapam revealed by a land slip due to an erosion of the sea about the close of last century in the Santhome beach. The present temple, however, was built about 300 years ago. The presiding deity, Sri Kapaleeswarar, is Pradishta lingam. His consort, Sri Karpagambigai in a standing pose is installed in a separate sanotum facing south. There is a separate shrine for Shri Singaravelar. The other deities are Sri Palani Andavar, dancing Vinayagar, Saneeswarar, Navagrahas, etc., who are installed in separate sanotums. A hoary antiquity is claimed for the dancing Vinayagar which has been carved on a granite. The principal deity is facing west and the tank too is located in the west of the temple, unlike most of the shrines. All important festivals are celebrated with pomp and show around the year. The most important is the Brahmothsavam in Panguni which is observed for ten days. On each day a huge congregation is observed who throng the shrine with full devotion to worship the deity. On eighth day, however, the devotees outnumber and about two lakhs are said to offer their prayers.

Sri Parthasarathy temple in Triplicane is one of the 108 sacred centres of Sri Vaishnavites. The presiding deity of the temple (i.e. the Moolavar) is Sri Venkata Krishnaswamy while the Uthsavamurthy is known as Sri Parthasarathy. The other deities for whom there are separate shrines, are Sri Mannadhaswamy (Sri Ranganathar), Sri Thellia Singa Perumal (Sri Narasimhaswamy), Vedavalli Thayar and Sri Andal. All Alwars and all Acharyas are installed in this temple with their respective Uthsava images. From the stone inscriptions, it is seen that the present temple was built by a Pallava king about 779-830 A.D. Each year the shrine attracts thousands of devotees on all important festivals. The most important is the Vaikunta Ekadesi observed for 20 days in Margazhi month. About 40,000 to 50,000 devotees visit the temple each day. The floating festival in Masi for 7 days also attracts a large crowd. The Brahmothsavam in Chithirai month is celebrated for 10 days. The car festival falls on the seventh day and it is attended by about 50,000 devotees.

Sri Vadapalani Andavar temple in Kodambakkam has become a famous pilgrim centre for Hindus. Sri Vadapalani Andavar, the presiding deity in a standing pose is four feet high. Sri Meenakshi Ambigai is the other principal deity in the temple. The other deities are Vinayagar, Anjaneyar, Chokkanathar, Shanmugar or Muthukumaraswamy. The Karthigai Asterism day, every month, is considered auspicious and more than 20,000 devotees visit the shrine. The annual festivals are Skandasashti in the month of Ayppasi and Uthiram falling in Panguni month. During the Panguni Uthiram, "Theppa Vizha", (the floating festival) is also observed and about 10,000 devotees attend these festivals.

Sri Mundakanni Amman Temple in Mylapore is an ancient temple. The Moolavar is a small stone pillar without any shape. A height of 9" of the pillar is visible above the ground level. This pillar is adorned and worshipped by the devotees. It is believed that the deity in this shrine has the powers of Sri Mariamman. Annual festivals are observed on Fridays in the month of Adi and Thai and are attended to by a large number of devotees.

Sri Muthukumaraswamy temple, also known as Sri Kandaswamy temple or Kandakottam, is located in Rasappachetti street, Park Town. The Moolavar, Sri Muthukumara Swamy which was brought from Thirupporur, is 2' high. Sri Valli and Sri Devasena are on either side of the deity. The temple has a car and four Vahanas, the latter are gold plated. The Brahmothsavam in the month of Thai and Vasantha Uthsavam in Vaikasi are the important festivals celebrated in this temple. During Brahmothsavam the deity is taken round the streets in procession on the various Vahanas.

Fort St. George, built in 1653 as a trading centre by the British East India Company, in due course became a strong hold of British power in India and stands today as an important monument for the visitors to commemorate the British era. Within the Fort are the old barracks, the original officers quarters and two houses of historical interest, one was occupied by Robert Clive and the other by Col. Wellesly. Today a part of the Fort is used to accommodate both houses of the legislature and the secretariat of the Government of Tamil Nadu and is as much a hive of political activity as it was centuries ago. The flag staff near the eastern gate is the tallest in India.

St. Mary's Church, built around 1680 within the Fort, is historically one of the most important buildings and the first protestant church built in India and oldest Anglican Church in Asia. The large painting of the last supper above the altar, supposed to have been done

by a pupil of Raphael, is the most beautiful and inspiring piece of art. According to the legend, the painting was brought to Madras from Pondicherry after the British captured that place in 1761. Robert Clive was married to Margaret Maskelyne in this church in 1753.

The Fort Museum within the Fort is a treasure house of history, housing fascinating exhibits that narrate much of the story of the East India Company's activities in the South. The sections devoted to armour, costumes, coins, medals and chinaware are of special interest. Old parchments letters and manuscripts connected with the Fort have been kept there for exhibition.

Santhome Cathedral Basilica is situated at the south end of the Marina, close to the sea-shore. It was built on the site of the original chapel dedicated to St. Thomas, where the remains of the Apostle to India are believed to lie buried. This church, consecrated in 1896, reflects the Gothic style of architecture. A painting of the Madonna, supposed to have been done by St. Luke, one of the twelve Apostles and brought to India by St. Thomas, can be seen here.

The National Art Gallery is located in an imposing building on Pantheon Road, Egmore. The building itself is a fine specimen of the Indo-Saracenic style of Architecture. It contains an impressive collection of old paintings and modern art. There are also some rare paintings in the Rajput, Moghul and South Indian styles.

Next to the National Art Gallery is the Government Museum established in 1851. This Museum boasts of an interesting collection of objects, has the natural history, comparative anatomy and antiquities. Among its notable collections is a section containing rare 2nd century sculptures recovered from the site of the Buddhist stupa at Amaravati. There are also fine specimens of sculptures belonging to the periods of early rulers such as the Pallavas, the Cholas and the Pandyas. The Bronze collection at the Museum is perhaps the best found anywhere in the country.

The Valluvar kottam in Nungambakkam is a memorial to Thiruvalluvar, the author of Tirukkural. The Kottam comprises a shrine, with a statue of Thiruvalluvar installed there in and a large auditorium. The shrine partly built in stone and partly in concrete has been fashioned after the temple car of Tiruvavur and rises to a height of 29 metres. The auditorium has been built with grid type roofing to eliminate pillar support for its 64 metres length and 30 metres width. The auditorium is said to be one of the biggest in Asia, capable of seating 4,000 persons. Valluvar Kottam combines the latest in Engineering techniques with the traditional skill of the sculpturers.

The world's headquarters of the Theosophical Society, located on the bank of river Adyar was established in the year 1891 by Dr. Annie Besant, Madam Blavatsky and Colonel Olcott. This society was formed to establish universal brotherhood of humanity without distinction of race, creed, sex, caste or colour and to encourage the study of comparative religions, philosophy and science. The society has an impressive library containing ancient manuscripts. The banyan tree in the society's garden is said to be one of the largest and oldest trees in India covering an area of 12,153 sq. metres.

Kalakshetra, a cultural institution of international repute is located close to Thiruvannmiyur in rural settings. The institution was founded by Smt. Rukmani Devi for reviving and rejuvenating Bharata Natyam and other Indian arts. During the last three decades, this institution has done great service in reviving the dance forms and music of South India.

Marina Beach, the pride of Madras City, is the second longest beach in the world. The beach has a wide and fine sandy foreshore running for more than 3 kms. from Fort St. George to Santhome. The beauty of the beach is further enhanced by spacious promenades, interspersed with colourful flower beds and two beautiful swimming pools. Along Marina's garden fringed promenades is a row of significant statues, most of them commemorating outstanding contributors to the Tamil language and literature. The beach not only captivates a large crowd to enjoy the sea breeze but continues to be the most sought after rendezvous for the lovers.

On the beach, opposite to the Presidency College is a small building in which many varieties of attractive living fish are exhibited in lighted glass tanks. In this aquarium, there are many species of rare fish preserved in glass jars.

At the southern end of Marina Beach, opposite to All India Radio Station, a new modern light house 150, feet high, has been built. Visitors are allowed inside for sight seeing on payment of entrance fees.

Anna Salai is one of the arteries of Madras City and its longest thoroughfare. This busy commercial centre is the hub of trading activities and is also a shoppers paradise. The curio and antique shops and the posh textile showrooms lining up both sides display an impressive variety of handicrafts made of rosewood, sandal wood, ivory, bronze and silver, leather goods, silk and hand woven fabrics. The Vanavil of Co-optex, Victoria Technical Institute, Poompuhar Emporium, Kashmir, Kerala and Karnataka Government Emporiums, Khadi Gramodyog Bhavan and Central handicrafts emporium are among the Government sponsored emporia displaying good collection of handicrafts and handloom fabrics. The area has a number of cinema theatres which also add to the gaiety and congestion of this busy market place.

The Victoria Technical Institute on Anna Salai is an important place of tourist interest, housing a permanent exhibition of the best specimens of arts and crafts in the presidency. It is a Government sponsored non profit organisation. It was founded by public subscription in the year 1887. Apart from the sale of goods to tourists visiting Madras, it exports goods to other countries. This place is a paradise for curio and art lovers. In all its three floors are housed a fabulous collection of articles representing South Indian Craftsmanship at its best. These articles are manufactured in several centres and consist of metal ware, wood and ivory carvings, toys and dolls, carpets, leather cane and basketry, silverware, textiles, embroidered linen and numerous other items.

The National Deer Park at Guindy is the only of its kind in the country. Botanically this park is representative of the national thorny scrub jungle of the southern dry zone interspersed with more than 30 species of trees which add to its attraction. Here sanctuary has been afforded to the largest number of that fast dwindling species, the Indian antelope or black buck. The park has also spotted deer, white buck and bonnet monkeys in their natural surroundings. The children's park adjacent to the Deer Park has a small collection of birds and animals. Films on wild life and forestry are also screened.

Snake Park is a show case for reptilian wild life. Here can be seen the varied reptile life for which India is famous, king cobras, branded, kriats, russel's viper, striped ked backs, water snakes and pythons-all in one place with some of them let loose in their natural surroundings. The venom extraction demonstration is worth watching.

Gandhi Mandpam, adjoining Raj Bhavan estate, Guindy, is a memorial to the Father of the nation, Mahatma Gandhi. There are also memorials to the great leaders, Shri C. Rajagopalachari and Shri K. Kamaraj who in the Vanguard of India's freedom movement were outstanding patriots and nation builders.

Anna square lies at the northern end of the Marina just opposite to University buildings, where Dr. C. N. Annadurai, former Chief Minister of Tamil Nadu and an outstanding statesman was laid to rest. It is located in the centre of a beautiful park, the entrance to which is a spectacular arch in the shape of twin converging tusks and the Samadhi is flanked by an imposing memorial pillar. The place has been developed into an attractive show-piece with fountains, spacious lawns and colourful lights.

A. brief analysis of the Town Directory and Primary Census Abstract data—A brief analysis relating to certain population characteristics is made utilising the information collected in the Town Directory and the Census data in the Primary Census Abstract. A number of tables have been designed for this purpose, which are given below along with their analysis.

TABLE I.

GROWTH, DENSITY AND SEX RATIO OF URBAN POPULATION IN THE DISTRICT IN RELATION TO THE STATE.

Census Year	Madras District.						Tamil Nadu.					
	Total population.	Urban population.	% Urban population.	D. ead. per variation in urban population.	Density (population per sq. km.)	Sex Ratio (Number of females per 1,000 males.)	Total population.	Urban population.	% Urban population.	D. ead. per variation in urban population.	Density (population per sq. km.)	Sex Ratio (Number of females per 1,000 males.)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)
1951	1,454,896	1,427,420	98.11	..	N.A.*	922	30,119,047	7,333,525	24.35	..	..	986
1961	1,776,329	1,749,600	98.50	+ 22.57	12,990	901	33,686,953	8,990,528	26.69	+ 22.59	1,722	903
1971	2,579,276	2,572,967	99.76	+ 47.06	15,462	904	41,199,168	12,464,834	30.26	+ 38.64	2,115	951
1981	3,276,622	3,276,622	100.00	+ 27.35	19,274	934	48,408,077	15,951,875	32.95	+ 27.98	2,722	956

* Area figures are not available and hence density has not been worked out.

Table 1.—In the above table, some basic demographic data are presented for 1951, 1961, 1971 and 1981 Censuses with a view to show the variations and trends of growth since 1951, when planned economic development began in our country. The table gives decadal growth rate, density of population per sq. km. and sex ratio of the urban population for Madras district and Tamil Nadu. A comparative picture of the percentage of urban population to total population is also indicated for the district and the state. Since Madras district and Madras City are coterminous, it is natural to expect the percentage of urban population of Madras to be 100 per cent in every census. But in the above table, percentages slightly below 100 have been indicated as urban population percentage in Madras for the census years 1951, 1961 and 1971. The reason for this is that 10 towns and 3 villages (as in 1971) got merged with Madras during 1978, when the jurisdiction under the Corporation of Madras was extended to cover these places also. While in 1961, only 3 of these extended areas were towns, only one of them was a town in 1951 and the rest were all rural areas. Thus, parts of these extended areas were rural in the concerned censuses of 1951, 1961 and 1971 and hence the percentage of urban population is not 100 in these censuses.

Against the total state population of 48,408,077 in 1981, Madras district has a population of 3,276,622 (which is fully urban population). The density of population of Madras district per sq. km. is higher when compared with the state density of population. Madras district has 19,274 persons per sq. km. while in the state as a whole, the density is only 372 persons per sq. km. In urban areas of Tamil Nadu, the density is 2,722 persons per sq. km. Madras City is the state headquarters of Tamil Nadu and it is also a highly developed metropolitan centre, both from the commercial and industrial points of view. There is, therefore, no wonder that the density is abnormally high in this City district.

In terms of sex ratio (Number of females per 1,000 males), there is not much of a difference between Madras City and the State. In the state urban, the sex ratio is 956 while in Madras it is 934.

NOTE.— All the 49 towns mentioned above other than Madras (Madras district) are constituent units of Madras Urban Agglomeration located in Chengalpattu district.

Table 2.—Table 2 furnishes the per capita receipt and expenditure in terms of Rupees for Madras City and the other 48 constituent towns of Madras Urban Agglomeration during the year 1979. The per capita receipt in Madras City is less than the per capita expenditure. The higher per capita expenditure over and above the receipt is only to be expected in a big and dense urban centre like Madras where there is a constant increase in the provision of several amenities both to the local inhabitants and the large floating population. Such extra expenditure is generally reflected in the Municipal Corporation's annual budget and is generally met by loans, grants, aid, etc. from different agencies including the Government. Scrutinizing the classifications of per capita receipt and expenditure, we see that the largest per capita receipt is accounted for by 'taxes' and this is closely followed by other sources of receipt. As observed from the classification of per capita expenses, the largest quantum (Rs. 35.99) representing over half of the total per capita expense goes towards 'other aspects'. The per capita expenditure on public health and conveniences is in the second place with Rs. 16.80 per head. Discussion in regard to the per capita receipt and expenditure in regard to towns of Madras Urban Agglomeration falling in Chengalpattu district is made in the volume relating to that district.

NOTE:—All the 49 towns mentioned above other than Madras (Madras district) are constituent units of Madras Urban Agglomeration located in Chengalpattu district.

Table 4.—The above table gives the number of beds in medical institutions per 1,000 of urban population in Madras City. The average number of beds per 1,000 population of Madras is 3.38.

TABLE 5

PROPORTION OF SLUMS POPULATION IN TOWNS

<i>Class, Name and Civic Status of the Town.</i>	<i>Proportion of the slums population to total population of the town</i>	<i>Density in slums (per sq. km)</i>
(1)	(2)	(3)
I Madras (Municipal Corporation)	19.34	107,360

Table 5.—Table 5 gives data about the share of slums in the city's population. Due to migration from other parts of the State as also natural growth of population, the number of slums in Madras has been increasing over the years. As may be seen from the table, nearly a fifth of the city's inhabitants are now put in the slums. The conditions of living and hygiene are poorer in slums due to high density. The population density in the slum areas alone is very high, viz., 107,360 per sq. km.

1	Madras City	3,276,622	1,694,107	1,582,515	..	..	..	3,276,622	1,694,107	1,582,515	..	..	1	
	Madras District	3,276,622	1,694,107	1,582,515	..	..	..	3,276,622	1,694,107	1,582,515	..	..	1	

This table furnishes sex-wise population of rural and urban areas and number of towns of Madras district.

It may be seen that since the entire Madras district is coterminous with Madras Corporation area, Madras is the only town of the district, and it has a male population of 1,694,107 as against a female population of 1,582,515.

TABLE 8.

NOTE—All the 49 towns mentioned above other than Madras (Madras district) are constituent units of Madras Urban Agglomeration located in Chengalpattu district.

This table gives the proportion of Scheduled Caste and Scheduled Tribe population in all the 48 towns (Chengalpattu district), besides Madras (Madras district), which are the constituent units of Madras Urban Agglomeration. Among the constituent units, it is seen that Mudichchur town has recorded the highest percentage of Scheduled Caste population with 58.37 while Nemilicheri town has recorded the highest Scheduled Tribe population of 4.86 per cent. Madras district has recorded a Scheduled Caste population of 13.36 per cent while its Scheduled Tribe population is only 0.16 per cent. In Kattivakkam town, the percentage of Scheduled Caste population is the lowest with only 10.33 and in Tirusulam town the percentage of Scheduled Tribe population is only 0.04 while in Kannapalaiyam, Kathirvedu, Kottivakkam, Madippakkam, Mudichchur, Nazarethpettai, Nerkunram, Pulal, Tirumahishai, Varadharajapuram, Vellanur and Vengavasal towns there are no Scheduled Tribes at all reported during the 1981 Census.

TABLE 10
LITERACY RATES FOR TOWNS

Serial Number and Name of the Town.	Literacy Rate
(1)	(2)
1. Madras (Madras District)	See under Madras Urban Agglomeration
Madras Urban Agglomeration (Madras & Chengalpattu District)	67.43
1 Alandur	73.87

43	Tirunirmalai	61.17
44	Tirusulam	32.07
45	Tiruverkadu	44.59
46	Tiruvottiyur	63.86
47	Vellaur	33.43
48	Varadharajapuram	49.56
49	Vengavasal	59.02

NOTE.—All the 49 towns mentioned above other than Madras (Madras district) are constituent units of Madras Urban Agglomeration located in Chengalpattu District.

This table furnishes the literacy rates of all the 48 towns besides Madras, which are constituent units of Madras Urban Agglomeration, located in Chengalpattu district. Among the constituent units of Madras Urban Agglomeration, the literacy rate is, however, seen to be highest with 75.64 per cent at Peerkankaranai (Chengalpattu district) and at the lowest with 32.07 per cent at Tirusulam, while that of Madras city (Madras district) is 68.40 per cent.

TABLE II

LITERATES, WORKERS, NON-WORKERS, SCHEDULED CASTE/TRIBE POPULATION IN THE DISTRICT.

	T	..	..	..	..	..	..	..	..	..	..	..	..
	F	27.90	47.92	6.47	0.41	0.50	0.33	28.31	48.42	6.80	71.69	51.58	93.20
Madras District	(2)	27.90	47.92	6.47	0.41	0.50	0.33	28.31	48.42	6.80	71.69	51.58	93.20
	T	..	..	..	..	..	..	..	..	..	..	..	..
	R	27.90	47.92	6.47	0.41	0.50	0.33	28.31	48.42	6.80	71.69	51.58	93.20

This table gives sex-wise distribution of literates, workers, non-workers and Scheduled Caste/Scheduled Tribe population for Madras district. It is seen that the percentage of Scheduled Caste population to total population of Madras district is 13.36 as against 18.35 for the State. The percentage of Scheduled Tribe population of Tamil Nadu is 1.07, whereas that of Madras District is only 0.16.

The literacy rate of Madras district works out to 68.40 per cent as against the literacy rate of 46.76 per cent of Tamil Nadu. The literacy rate of male population of Madras district is 75.60 per cent as against the literacy rate of 58.26 per cent of Tamil Nadu. It is significant to note that while the literacy rate of female population of Tamil Nadu works out to only 34.99 per cent, the literacy rate of female population of Madras district is 60.69 per cent.

The percentage of main workers to total population of Madras district works out to 27.90, as against 39.71 of Tamil Nadu. The percentage of total workers to total population of the district is 28.31. The percentage of non-workers to total population of the district is 71.69, while that of Tamil Nadu is 58.27. The percentage of female non-workers of Madras district, viz. 93.20 is rather high when compared with the percentage of female non-workers of Tamil Nadu, which is 73.48.
