Responsibility for the correctness of internal details shown in the maps rests with the publisher.

FOREWORD

The District Census Handbook (DCH), compiled by the census organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census, the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States, it was confined to district census tables and in a few cases, altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series, some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village, the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect, particularly in relation to amenities and land-use pattern, is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households", has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices, listing the villages where no amenities are available and according to the proportion of Scheduled Caste and Scheduled Tribe population to the total population, has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums.

The columns of Scheduled Caste and Scheduled Tribe population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the Primary Census Abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the Individual Slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series, it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH, a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and taluk level maps, depicting the boundaries and other important features, have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri A. P. MUTHUSWAMI I.A.S., the Director of Census Operations, Tamil Nadu on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi,
The 26th April 1982.

P. PADMANABHA,
Registrar General, India.

PREFACE

It has been the tradition of the Government of Tamil Nadu to publish immediately after each census, a District Census Handbook separately for each district containing the Census statistics, besides other valuable data of local importance, for the use of the State Government, district administration, research scholars and other data users. The first series of District Census Handbooks were brought out immediately after the 1951 Census and the present publication after the 1981 Census is the fourth in the series.

The Census statistics presented in this publication were collected during the census operations in February-March 1981, as at the sun rise of the 1st March 1981. The other statistics in this publication have been collected from various departments of the State and Central Governments.

This publication consists of the following two parts :—

Part-A : Village and Town Directory ; and

Part-B : Village and Townwise Primary Census Abstract.

Taking into account the increasing and varied developmental and other welfare measures undertaken by the Government, the scope and content of the data in this publication have been considerably enlarged and improved to meet the requirements of the planners and the other data users. In particular, certain inset tables based on census and other data have been included in this publication with brief analytical notes thereon.

This publication contains a brief history of the district highlighting the major characteristics of the district in relation to the economic resources like forestry, minerals, etc., besides the social, cultural, religious and historical aspects. The district and taluk maps in this publication give the administrative units up to village level, the rural and urban units, the location of towns and cities, communication facilities and other related details.

The facilities and amenities available in respect of education, medical, drinking water, post and telegraph, markets, communication, etc., in each village and town have been included in this publication and an important feature is that wherever the above facilities and amenities are not available in any particular village/town, the nearest place where they are available, has also been reported.

Another interesting feature in this publication is that villages with none of these amenities have been listed out separately for the pointed attention of the planners and administrators.

Certain tables present data exclusively in respect of the weaker sections of the society belonging to the Scheduled Castes and Scheduled Tribes.

The land use pattern in respect of rural and urban areas have also been reported in this publication which would meet the requirement of micro level planning for rural and urban areas.

The data in respect of urban areas, apart from the medical and other facilities available, relate to the growth of towns, the availability of protected water-supply, and what is important, the civic amenities available in the slums of the urban areas.

x

Part B of this volume consists of the District and Village/Townwise Primary Census Abstract, followed by Primary Census Abstract of Scheduled Castes and Scheduled Tribes.

The district Primary Census Abstract gives for each territorial unit upto taluk level in the case of rural areas and upto town level for urban areas, occupied residential houses, households, the total population, the Scheduled Caste and Scheduled Tribe population, workers, etc., thereby indicating the basic socio-economic characteristics of the population for the territorial units. The village and townwise Primary Census Abstract gives similar information for villages and wards of towns. Besides, there is an appendix which furnishes at urban block level, the total population and Scheduled Caste and Scheduled Tribe population.

I am grateful to the Collectors and other district officers and Departments of the State Government who have extended their unfailing co-operation and help in collecting the voluminous and useful data other than Census, for their presentation at one place in this publication, for the ready reference of the data users.

In bringing out this publication, I have received assistance from Sarvashri M. Thangaraju and M. Nagappan, Deputy Directors of Census Operations besides a large number of staff members of this Directorate.

In formulating the scope and content of the data in this publication and designing the formats for presentation of the data, I have received valuable guidance from Shri P. Padmanabha, Registrar General, India. The encouragement I have received from him at every stage of the work has contributed in a great measure to the successful publication of this District Census Handbook.

I hope the data in this volume would be found useful and the publication well received by the administrators, academicians and other data users.

Madras,
March, 1983.

A. P. MUTHUSWAMI,
*Director of Census Operations,
Tamil Nadu.*

ACKNOWLEDGEMENT.

I have pleasure in acknowledging the able assistance given by the following officials of my office in the preparation of this volume.

Village Directory:

Shri. T. S. Rajaram, Investigator
Shri. C. T. Rajan, Investigator

ANALYTICAL NOTE

ANALYTICAL NOTE.

Census concepts:

Rural and Urban areas.—Census figures are generally presented separately for rural and urban areas. In the 1981 Census, the definition of an urban unit is more or less the same as in the 1961 and 1971 Censuses but for some minor variations. The urban areas of 1981 Census are :—

- (a) All places with a Municipality, Corporation or Cantonment Board or notified town area ;
- (b) All other places which satisfied the following criteria :—
 - (i) A minimum population of 5,000 ;
 - (ii) At least 75 per cent of the male working population engaged in non-agricultural (and allied) activity ;
 - (iii) A population of at least 400 per km² (or one thousand per square mile).

The above definition of urban area varies slightly from that of 1961 and 1971 Censuses in that the males working in activities such as fishing, logging etc., were treated as engaged in non-agricultural activity and therefore contributed to the 75 per cent criterion in the 1961 and 1971 Censuses, whereas in the 1981 Census, these activities are treated as on par with cultivation and agricultural labour for the purpose of this criterion. The rest of the areas not treated as urban are classified as rural areas.

Urban Agglomeration.—Urban Agglomeration is a new concept formed during 1971 Census and this replaces the concept of town group adopted in 1961 Census. An Urban Agglomeration may be explained as follows: "It must form a continuous urban spread constituting a town and its adjoining urban outgrowth or two or more physically contiguous towns together with continuous well recognised urban outgrowth, if any, of such towns." The constituent units of all the Urban Agglomerations in Tamil Nadu are also independent towns.

Census House.—A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Household.—A household is a group of persons, who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented any of them from doing so.

Scheduled Castes/Scheduled Tribes.—For the enumeration of Scheduled Castes and Scheduled Tribes in Census, the names of Scheduled Castes and Scheduled Tribes as recognised in Tamil Nadu based on the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act of 1976 (Central Act 108 of 1976) was followed. The enumerators were instructed to record a person as a Scheduled Caste/Scheduled Tribe provided the name given by the person was found in the list supplied to them.

Literates.—In 1981 Census, a literate was defined as "a person who can both read and write with understanding in any language". A person who could merely read but cannot write, was not a literate. It was not necessary that a person considered a literate must have received any formal education or have passed any minimum educational standard.

Work.—Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

Main Workers and Marginal Workers.—A worker was identified with reference to a reference period preceding the census. The reference period prescribed was one year preceding the date of enumeration. Certain types of work such as agriculture, household industries like gur making, etc., were carried on, either throughout the year or only during certain seasons or part of the year, depending on local circumstances. In such cases, what we were concerned with, was the broad time span of the agricultural seasons preceding the enumeration. Workers can be full time workers or seasonal workers or marginal workers. If a person has done any work during the reference period and if he had worked for the major part of the year i.e., if he had worked for 183 days or more, he was considered to be a full time worker (main worker). If a person had done any work during the reference period and if he had not worked for the major part of the year i.e., if he had worked for less than 183 days, he was considered to be a marginal worker.

The main activity of workers has been classified into four categories viz. cultivators, agricultural labourers, household industry workers and other workers.

Cultivator.—For purpose of Census, a cultivator is a person who is engaged either as an employer, single worker or family worker in cultivation of land owned, or held from Government, private persons or institutions, for payment in money, kind or share. Cultivation includes supervision and direction of cultivation.

Agricultural Labourer.—A person who works in another person's land for wages in money, kind or share should be regarded as an agricultural labourer. He or she has no risk in the cultivation but merely works in another person's land for wages and has no right of lease or contract on land on which he or she works.

Household Industry.—For a person who returns his/her main activity as engaged in some production, processing, servicing or repair of articles or goods, it has been ascertained whether it is a household industry.

Household Industry is defined as an industry conducted by the head of the household and/or by the members of the household at home or within the village in rural areas, and within the precincts of the house in urban areas. A larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would, or has to be registered under the Indian Factories Act.

Non-Workers.—All person who have not been treated as workers i.e. persons who have not worked any time at all during the reference period of one year preceding the date of enumeration, have been considered as non-workers. There cover all persons who are engaged in unpaid home duties and who do no other work or have not done any work at all during the last one year, full time students and children attending school, all dependent such as infants or children not attending school or a person permanently disabled from work because of illness or old age persons retired from service or renters, beggars, vagrants, convicts in jails or inmates of a penal, mental or charitable institution and all non-workers who may not come under any of the above categories.

HISTORY OF THE DISTRICT CENSUS HANDBOOK.

After the Census of 1951, the Government of India offered to hand over to the State Government the Census tables and other data prepared during the Census and suggested that they might be published along with any other useful information relating to each district. The State Government accepted the proposal, and the first publication of the District Census Handbook was brought out at the cost of the State Government.

The District Census Handbook of 1951 was found to be very useful and it was therefore decided not only to continue the series for the 1961 Census but also to improve definitely on its content so that each District Census Handbook contained certain basic economic data for the smallest administrative unit in the district and be a useful reference book for scholars and other data users.

After the 1971 Census as well the series of District Census Handbook was continued. The publication of the 1971 Census Handbooks was in three parts, viz.; Part-A, Part-B, Part-C; Part-A relating to Village and Town Directory, Part-B relating to Village and Townwise Primary Census Abstract and Part-C comprising District Tables and certain administrative statistical tables.

The tradition of bringing out the Census Handbook has been continued by the State Government during the 1981 Census also. In this series, some individual features besides restructuring the formals of the Village Directory have been adopted bearing in mind the national requirements of data for the socio-economic programmes of the Government. The comparability of data with the 1971 Census data has also been kept in view.

The present Census Handbook will be published in two parts, viz.; Part-A—Village and Town Directory and Part-B—Village and Townwise Primary Census Abstract.

SCOPE OF VILLAGE DIRECTORY AND TOWN DIRECTORY STATEMENTS.

The District Census Handbooks are the only publications which incorporate the data down to the level of a village and level of a town which are constantly referred to by the data users.

The Village Directory Statement gives the list of villages by taluk and for each village the area, number of households and population, availability of amenities and land use. The information on amenities available in the village includes educational, medical, drinking water, post and telegraph, market, rail/road or other communication facilities and power supply. Land use is shown as area under forests, irrigation, unirrigated land, cultivable waste and area not available for cultivation.

Appendix I gives for each taluk the number of villages having various levels and types of educational institutions such as middle schools, adult literacy centres, etc., various types of medical institutions such as dispensaries, primary health centres, etc., and the number of such institutions, various types of drinking water sources such as taps, tubewell, etc., post and telegraph offices, power supply, railway stations, bus stops, etc., and also the number of villages not having such amenities.

Appendix II gives for each non-municipal town (census towns) the area under forest, irrigated and unirrigated land, cultivable waste and area not available for cultivation.

Appendix III gives the list of villages where no educational, medical and public health facilities, etc., are available.

Appendix IV gives the list of villages with the proportion of Scheduled Caste and Scheduled Tribe population to the total population in various ranges of proportion. Part-A of the Appendix gives the villages according to the proportion of Scheduled Caste population and Part-B according to proportion of Scheduled Tribe population. Information is presented by the ranges 0-5 per cent, 6-10 per cent, 11-15 per cent, 16-20 per cent, 21-30 per cent and 31 per cent and above for Scheduled castes and 0-5 per cent, 6-15 per cent, 16-25 per cent, 26-35 per cent, 36-50 per cent and 51 per cent and above for Scheduled Tribes.

The Town Directory gives important and useful information like civic and other amenities available in all the towns in the district, statutorily notified as well as non-municipal and census towns. The details relating to each of the towns have been presented in seven statements, viz; statements I to VI and IV-A. In all the statements except IV-A, the towns are arranged in the alphabetical order for the district. The Town Directory does not cover strictly military areas. It may, however, cover cantonment areas but not strictly military areas or military establishments within the cantonment areas. However, basic statistics of the cantonment as a whole have been provided. In the Town Directory, codes have been given for the data on amenities and civic administration for want of space. The relevant explanations for the codes adopted have been given in the beginning of the Town Directory statements.

An Urban Agglomeration includes two or more independent census towns. The names of the Towns/Urban Agglomerations have been arranged in the alphabetical order.

The particulars of the individual town which constitutes one of the units of agglomeration have not been furnished separately because the particulars have been furnished, where they occur together under the name of agglomeration. The following remarks have been given against such town in brackets.

“(See the name of the main town of the agglomeration) ”

By adoption of this method the reader can get an idea of the particulars of the Urban Agglomeration in total and also severally.

Statement I—Status and Growth History.—This statement provides some basic data based on the Primary Census Abstract. For analysing the Town Directory data at State level and all India level, some new columns have been introduced in 1981. The new items are class of town, area, number of households, population and growth rate for each census since 1901, density in 1981 and sex ratio in 1961, 1971 and 1981 Censuses are also provided in this statement.

For size class of town the following population norms as per 1981 Census have been adopted.

Population.	Class.
100,000 and above	I
50,000 — 99,999	II
20,000 — 49,999	III
10,000 — 19,999	IV
5,000 — 9,999	V
below 5,000	VI

Location Code Number of Towns.—To distinguish the town from the village, the location code numbers for towns have been given in Roman numerals and these numbers have been assigned in a continuous order for the entire district.

Statement II—Physical Aspects and Location of Towns, 1979.—Under physical aspects, annual rainfall and temperature figures are furnished. These particulars were obtained from the Commissioner of Statistics, Madras. If the information is not available for any particular town, the nearest town for which it is available is given. For column (9), the nearest city with population of one lakh and more is furnished according to 1981 Census. For the other columns, figures obtained from the Municipal Commissioners and Panchayat Union Commissioners are given. The ‘Zero’ within brackets in columns (10) and (11) denotes that the referent town itself is enjoying rail/road transport facilities.

Statement III—Municipal Finance, 1978-79.—The civic administration status of the town, the receipt through tax, properties and powers, government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services are given in this statement. The sources of receipt and expenditure are furnished in terms of rupees in hundreds.

Statement IV—Civic and Other Amenities, 1979.—The civic and other amenities existing in the towns as in 1979 are given. The data were obtained from the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Col. 3—Civic Administration Status.—It is a new column introduced in this statement to facilitate analysis.

Col. 4—Population.—It is also a new column introduced in this statement to measure the amenities in respect of population.

Col. 5—Scheduled Caste and Scheduled Tribe Population.—It is introduced to know the size of population of the weaker sections of the community in the town.

Electrification.—Electrification particulars were obtained from the Tamil Nadu Electricity Board through the Municipal Commissioners and Panchayat Union Commissioners.

(i) **Domestic connections.**—This refers to the number of services given to houses for domestic purposes like fans, lighting, etc.

(ii) **Industrial connections.**—This refers to the number of services effected to L.T. Industries such as workshops, flour mills, oil mills, grinding machines, cotton ginning, engineering industries, etc.

(iii) **Commercial connections.**—This refers to the services given to shops, business houses public institutions like offices and schools and commercial establishments.

(v) **Road lighting points.**—This refers to the number of points of street lights which will be maintained by the Board and for which consumption charges will be paid to the Board by respective local bodies. For some town panchayats, the number of services effected alone has been furnished under street lights and not the points.

(v) **Other connections.**—This refers to the number of services effected for agricultural purposes, huts, public water supply systems, cottage industries, etc.

Statement IV-A—Civic and Other Amenities in Notified Slums, 1979.—This is a new statement on civic and other amenities in notified or recognised slums of class I and II towns. Generally, in cities or towns having slums, the local authority such as Municipality or Municipal Corporation or even the development authority notified the recognised slums. Such notification is linked up with the availability of funds from the State Government for slum clearance.

Name of the slum and the details of the area, population, length of the paved roads, system of sewerage, number of different types of latrines and method of disposal of night soil, etc., are given in this statement.

Statement V—Medical, Educational, Recreational and Cultural Facilities, 1979.—In this statement, medical, educational, recreational and cultural facilities of the towns as in 1979 are furnished. The data for educational and medical facilities were obtained from the Municipal Commissioners and Panchayat Union Commissioners for the concerned towns, and from the Director of Secondary Education and Director of Public Health respectively.

Col. 10—Recognised shorthand, typewriting and other vocational training institutions.—The term 'recognised' refers to institutes recognised by some statutory authority like Education Department, Commerce Department, Labour Department, etc., of the Government or by semi-Government or autonomous bodies, public sector projects, etc.

Cinemas refer only to the permanent cinema theatres and do not include touring cinemas.

Col. 16—Number of working womens' hostel with number of seats.—This is a new column introduced in this statement in 1981. Considering the increasing employment of women in urban areas, the housing needs of working women has been an important problem.

Statement VI—Trade, Commerce, Industry and Banking, 1979. In this statement, trade, commerce, industry and banking facilities in the town as in 1979 are furnished. Banking particulars were obtained from the Reserve Bank of India. The information on number of agricultural and non-agricultural credit societies were collected from the Registrar of Co-operative Societies through the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

SCOPE OF PRIMARY CENSUS ABSTRACT.

The Primary Census Abstract, as it is called, presents basic data for each village or segment of a village (in cases where such village segments form different panchayats) in the "Villagewise Primary Census Abstract" and for each Ward/Division of a town in the "Urban Primary Census Abstract". The format of the Primary Census Abstract for the villages and towns in 1981 has been slightly modified as compared to the 1971 Primary Census Abstract.

The Primary Census Abstract gives such basic information as area in hectares/sq.km., occupied residential houses, number of households, total population, Scheduled Caste and Scheduled Tribe population, literates, main workers, division of main workers into cultivators, agricultural labourers, workers in household industry and other workers, marginal workers and non-workers in respect of each unit. The Urban/Village Primary Census Abstract gives this information for each village and each urban ward. With a view to ensure comparability and to enable data users to derive the figures either for a revenue village or panchayat according to their requirements, the data are presented for segments of villages also. Wherever portions of one village happen to be in two or more panchayats, the segment-wise data have to be used separately or added with some other segment data so as to derive panchayat data. For example, if portion of a revenue village bearing L.C. No. 10 forms part of two panchayats, the figures are given separately for each portion of the village against L.C. No. 10 a/b and 10 b/b. The total figures for the entire revenue village can be arrived at by adding the figure given against both the segments, viz., 10 a/b and 10 b/b given in the Village Primary Census Abstract. If, instead, the panchayat figures are required, the data for the concerned village segment or segments relating to the panchayats concerned, are to be added up to arrive at the total figures for the respective panchayat.

An appendix presented in the case of the Urban Primary Census Abstract gives 1981 population, Scheduled Caste and Scheduled Tribe population for each enumerator block of the town. This is meant for the use of administrative and election authorities in urban areas. Such data are also required by urban planners and researchers for conducting other studies in selected blocks.

Mode of Presentation.—The consolidated figures for the district and each taluk are given in the beginning for total, rural and urban areas under the caption 'District Primary Census Abstract'. An alphabetical list of revenue villages is then given along with the Census Location Code Numbers of 1981 census followed by the Villagewise Primary Census Abstract. In the footnote given at the end of the Villagewise Primary Census Abstract, the Village included in Municipalities or Census towns are indicated. Then, follows the Urban Blockwise Primary Census Abstract. In an appendix to the urban Blockwise Primary Census Abstract, the population and Scheduled Caste/Scheduled Tribe figures for each Enumerator's Block of a town are given.

Maps.—Apart from the District Map given as frontispiece, map for each taluk showing the Village numbers along with their boundaries have also been included at the appropriate places. As compared with the maps presented in 1971 District Census Handbook, several improvements have been effected in the maps presented in this volume. All towns are shown in the district and taluk maps with shading screens and also spheres according to the population size of towns.

Area Figures.—In the District Primary Census Abstract, the area figures are given in square kilometres for total, rural and urban areas. In the Villagewise Primary Census Abstract, the area figures for each Location Code Unit are given in hectares up to two decimals. The area figures for each town in sq. km. is also given at the end of the Urban Blockwise Primary Census Abstract. In the District Primary Census Abstract, the area figures of the district total represent the "Geographical Area" figures supplied by the Surveyor-General of India. Figures for Urban areas and villages are those supplied by the local bodies and revenue authorities. The urban area of a district has been arrived at by adding the urban area figures of each taluk within the district. Area figures for the rural areas of district/taluk are derived by subtracting the urban area figures from the total area of the district/taluk. The total area figures of the taluks will not tally with the district figures because the taluk area figures represent the 'Land Use' area and are derived from the figures supplied by the Tamil Nadu Directorate of Survey and Land Records, while those of the districts represent "Geographical Area" supplied by the Surveyor-General of India. The total of the village areas given in the Villagewise Primary Census Abstract may not tally with the rural area of the taluk given in the District Primary Census Abstract as the taluk area figures taken into account hills, forests, rivers, etc., whereas the village area may not include the same. For conversion, the ratio is 100 hectares=1 sq. km.

It is hoped that the pattern of presentation of basic Census particulars for each district as explained above and adopted in this volume would be found convenient by data users.

THANJAVUR DISTRICT—AN OUTLINE.

Introduction.—Thanjavur district stands unique from time immemorial for its agricultural activities and rightly acclaimed as 'the Granary of the South India'. Lying in the deltaic region of the famous river Cauvery and criss-crossed by lengthy net work of irrigation canals, this coastal district abounds in green paddy fields, tall coconut groves, vast gardens of mango and plantain trees and other verdant vegetations. Various testimonies available in the ancient Tamil literature referring to the Cauvery as possessing the sanctity of the Ganges in conformity with the legendry and mythological stories attributed to its divine origin, rightly point out why the river is popularly called the 'Mother Cauvery' and its sacredness is evident from 'Kaviri-Thala-Puranam'. The river has also been named 'Ponni' because it is yielding 'Pon'—Gold in the form of paddy. That is why it is said with pride that every iota of the earth of Thanjavur is equal to an iota of gold. The tillers in Tamil literature have been rightly called as 'Kavirippudhalvars'—the sons of the Cauvery, as they alone are worthy of this title for the rich production of grains in this fertile soil.

It is no wonder therefore that at the very threshold of the district itself, one can feel the distinguishing green vegetation and call Thanjavur as 'the green mansion' of the South. With an average annual rice yield touching 22.33 lakhs metric tonnes during 1981-82 or roughly about one-third of the total rice yield of Tamil Nadu, the district tops all the other districts of India in the production of rice and remarked as 'the rice bowl of India'. The economy of the district is, therefore, primarily agrarian in nature with very few industrial units.

Thanjavur is conspicuous among all the eight coastal districts of Tamil Nadu in the production of marine fish which account for about 30 per cent of the total marine fish catch of the State. The district is famous for its exquisite ancient handicrafts—the making of bronze icons, Thanjavur art plates, bell-metal castings, bowls, napkin and powder boxes of metal with beautiful and artistic inlaying and engraving work of motifs well-known as 'Tanjore swami work'. It is equally well-known for pith-work, ornamental fans, mats and making of musical instruments of jack-wood. It is also a flourishing centre of handloom silk and cotton saris. The 'Kattadi' silk saris of Koranad are renowned and in demand throughout the State.

Thanjavur attained prominence under the Chola rulers who were paramount in South India during 9th to 12th centuries. They were not only excellent rulers but also mighty builders, who erected a large number of exquisite temples in their empire, some of which constitute the finest specimens of architecture. Hence, the district stands distinguished in the State even in its large number of temples, whose legends extend deep into early historic times. Many of these temples reflect the power, genius and architectural grandeur of their authors displaying the unique and magnificent proficiency in sculpture, painting and wood carving. Art gallery, the great Saraswathi Mahal library, the 'Sangeetha Mahal' (hall of music), the thriving of classical music and dance known as 'Bharathanatyam' and the celebration of a grand annual music festival at Thiruvaiyaru, in honour of the great Saint Thiagaraja, all bear testimony to the cultural heritage.

The period of Chola Kings was not only considered as epoch-making but also an era of the cultural renaissance. Thanjavur under the Chola rulers was the cradle of Tamil culture. Literature and civilisation and the rare Tamil manuscripts in the Thanjavur library corroborate this fact. Another notable feature is that in spite of several alien invasions, on slaughts and internecine conflicts, the ancient culture and civilisation have not suffered much devastation. The inhabitants have successfully concentrated their histrionic talents in the field of art, literature, drama, music and dancing and are known for their rich cultural and religious fervour. They live in close harmony as a well knit community and the three main religious groups, viz., Hindus, Muslims and Christians, celebrate their fairs and festivals with a sense of mutual respect. The famous 'darga' at Nagore and the Catholic church of 'Our Lady of Health' at Velankanni are said to confer blessings on all irrespective of caste or creed and are held in great veneration by the people of all faiths alike. On festive occasions, the Hindu devotees outnumber all other participants in the shrines belonging to other religions. Similarly in the case of some Hindu festivals the temples are thronged by a substantial number of persons belonging to other religious group as well, who have a staunch faith and come in full reverence to pay homage to the presiding deities.

History of the district, its formation and jurisdictional changes.—According to the known history dating back to Sangam age, the Cholas ruled over Thanjavur for about one thousand years. It was here that plans were formulated to extend the Chola supremacy by spreading their glory from Kanniyakumari in the South to Himalayas in the North. They also under their patronage cultivated fine arts, erected temples, constructed anicuts, built ports and cities.

Among the Chola Kings who found place in the Sangam literature, Karikala and Koccengan were the most prominent. The name 'Karikala' which in Tamil refers to a man with charred leg, was derived by this King from a fire accident. He was assailed, imprisoned and deprived of his birth right by his enemies. He, however, managed to regain the throne and in the great battle at

Venni he defeated Pandya and Chera rulers and secured for himself the hegemony over them. He crushed both the internal and external opposition and became complete master of his country. He renovated the capital of Uraiyur, built up the renowned port of Puhar (Kaverippoompattinam) and patronised liberal arts and letters. Karikala was succeeded by two rival kings—Nalagilli and Nedungilli who ruled from Puhar and Uraiyur respectively. The next Chola King Killivalavan from Uraiyur was a brave and able warrior, besides a patron of letters.

Of the Chola of later Sangam age, Koccengan was more brilliant and illustrious in both war and peace. He showed equal zeal for both Saivism and Vaishnavism, built numerous saivite temples including the famous Jambukeswara Temple at Tirunaraipur.

After a brief set back in the Chola regime between the third century to ninth century A.D., the Cholas became the mighty race of rulers. Once again Vijayalaya (850-870), the founder of the new Chola dynasty, drove away the Muttaraiyar Chieftains from Thanjavur and assisted the Pallava King to stem the tide of the Pandiyan overlordship. His son Aditya I (871-907) soon overthrew the Pallava King, Aparajita and expelled him from his territory. After conquering the Kongu country and Pandyas, he further expanded his kingdom. He was an ardent saivite like his father and built temples along the banks of Cauvery from Sahyadri to the sea. Parantaka I (907-955) was more powerful and under his rule Cholas acquired a dominion which foreshadowed the great empires of Rajaraja and Kulottunga. With the rise of Rajaraja I (985-1014), the days dawned to bring about new and brilliant chapter in the history of Cholas. Both in war and peace Rajaraja and his son Rajendra proved themselves as the most outstanding personalities of their time. Rajaraja conquered Kerala (Chera country), the whole of the Pandya country and Malainadu (Coorg.) and extended his dominion. He also invaded Ceylon and destroyed Anuradhapura, its capital. He was also a great statesman and administrator and endeavoured his best to establish his empire on a firm footing. He built the most magnificent temple of Rajarajeswara at Thanjavur, the finest specimen of Tamil architecture. Rajaraja was succeeded by his son Rajendra I (1014-1044). He had the advantage of possessing an empire which had already been organised on sound lines. He set about at once to improve its organisation and increase its glory. He undertook expedition to north in search of the Ganges and assumed the title of "Gangai-konda Cholan". His most glorious expedition was that to Kadaram which shows the great naval strength of the Cholas. Rajendra I was succeeded by four rulers Rajadhiraja, Rajendra II, Virarajendra and Adirajendra, all of whom amidst much storm and stress did their best to preserve intact their vast empire. Adirajendra's reign was brief and it became weak in his time and later the Kingdom passed on to the Eastern Chalukyan. Rajendra Kulottunga (1070-1120) was a remarkable personality. He was more a statesman than a warrior. From 1120 to 1163, three Chola Kings, viz., Vikrama Chola (1120-1135), Kulottunga II (1136-1150) and Rajaraja II (1151-1163), succeeded Kulottunga I and under all these rulers no wars or invasions distracted the country. During the reigns of Rajaraja III (1216-1246) and Rajendra III (1247-1279), the Pandyas in the south and Hoysalas in the north monopolised all the power. By the beginning of the 13th century, the Chola dynasty became extinct and it gave way to Pandayan supremacy.

The Pandiyan regime was short lived. When the Pandyan Kingdom was in the throes of civil war, the muslim ruler Ala-Ud-Din Khilji, the Sultan of Delhi, took advantage of it and overpowered the Pandiyas. Thanjavur then came under the muslim rulers. Muslim domination continued till the middle of the 14th century when Vijayanagar Kings ended the muslim rule. Thanjavur remained under the suzerainty of the Vijayanagar Kings for a long period. The nayak dynasty was established during this period and Sevappa, the founder of Nayak kingdom of Thanjavur, made his appearance on the scene (1532-1560). In 1560, Sevappa Nayak made over kingdom to his son Achuyutappa Nayak. His rule unlike that of his father was not one of unbroken peace. Shortly after getting old he abdicated the crown in favour of his son Ragunatha (1600-1630). During his reign, a Danish settlement was established at Tranquebar (1620). The Nayaks of Thanjavur were loyal to Vijayanagar after the battle of Talikota and helped Vijayanagar in repulsing the attacks of the Nayak of Madurai and their temporary ally Golconda, but the beginning of the 17th Century saw the end of the Vijayanagar empire.

Attempts were then made by the Nayaks of Madurai and the Sultan of Bijapur to capture Thanjavur. The Marattas also came to Thanjavur in the later half of the 17th century. Ekogi became the first Maratta ruler of Thanjavur (1676-1683). The Marattas ruled Thanjavur for some time but became later vassals of the Mughal Governor of Karnataka. Subsequently there were hostilities between the Arcot Nawab and the Maratta ruler of Thanjavur. The French and English also began interfering in the internal affairs of South India. The supremacy of the English was later established. Saraboji II, the adopted son of Tuljaji, was made King of Thanjavur in 1798, after agreeing with all the conditions laid down by the British Government. A pact was signed between the Maratta ruler and the English, by virtue of which the status of the Raja was reduced to a mere vassal.

The administration of Thanjavur was given over to English fully under the Treaty of 1799. The ruler of the Thanjavur was allowed to retain the fort of Thanjavur only with limited powers of administration. When the ruler died in 1841 without heir, the Thanjavur fort was also annexed by the British and it became part of the then Madras. Thanjavur remained under the British until 1947 when India attained freedom.

Thanjavur district had 11 taluks in 1951 which subsequently increased to 12 and then to 13 during 1961 and 1971 respectively. During 1981 Census, however, the district comprised of 16 taluks. The inter-district jurisdictional changes was effected during the decade 1971-81, transferring the following areas of the Thanjavur district to Pudukkottai district :—

- (i) Arantangi taluk including Avudayarkoil dependent sub-taluk;
- (ii) Gandaravakottai and Kallakottai revenue firkas in Orathanad taluk (to Pudukkottai taluk);
- (iii) Five revenue villages in Vallam firka in Thanjavur taluk (to Gandaravakottai firka in Pudukkottai taluk);
- (iv) Twenty three revenue villages in Keeramangalam firka in Pattukkottai taluk (as a separate revenue firka called Keeramangalam in Alangudi taluk);
- (v) Seven revenue villages in Perumagalur firka in Pattukkottai taluk (to Arasarkulam firka in Arantangi taluk).

The other change was upgrading of independent and dependent sub-taluks into full-fledged main taluks. The dependent sub-taluk of Thiruvavur was upgraded into a main taluk with effect from 20th March 1975. The upgraded taluk consists of Thiruvavur, Kilvelur and Kunniyar firkas with headquarters at Thiruvavur. On the said date, Peravurani, an independent sub-taluk was upgraded into a full-fledged taluk. Besides, the following three dependent sub-taluks had been upgraded as full-fledged main taluks with effect from 4th July 1979 :—

- (a) Tiruvaidaimarudur in Kumbakonam taluk;
- (b) Thiruvaiyaru in Thanjavur taluk; and
- (c) Vedaranniyam in Tirutturaipundi taluk.

The district at present stands divided into the following six revenue divisions and 16 taluks:—

Serial number.	Name of Revenue Division.	Name of Taluk.
1	Thanjavur	(i) Thanjavur (ii) Orattanadu (iii) Thiruvaiyaru
2	Kumbakonam	(i) Kumbakonam (ii) Tiruvaidaimarudur (iii) Papanasam
3	Mannargudi	(i) Mannargudi (ii) Tirutturaipundi (iii) Vedaranniyam
4	Nagappattinam	(i) Nagappattinam (ii) Nannilam (iii) Thiruvavur
5	Mayuram	(i) Mayuram (ii) Sirkazhi
6	Pattukkottai	(i) Pattukkottai (ii) Peravurani

The district represents 20 Assembly constituencies of which five are reserved for Scheduled Castes. There is, however, no reserved constituency for Scheduled Tribes. There are three Parliamentary constituencies consisting of 18 Assembly constituencies of which one Parliamentary constituency is reserved for Scheduled Castes. The remaining two Assembly constituencies are attached to Pudukkottai Parliamentary constituency of Pudukkottai district. During 1981 Census, the district comprised of eight municipalities, twenty four towns and 1,763 villages (1,728 inhabited and 35 uninhabited). Tirubuvanam which was classified as a town during 1981 is one among the twenty four towns.

Physical features.—The Thanjavur district, with vast expanse of rice fields and fruit gardens, is one of the coastal districts of Tamil Nadu lying 185° above mean sea-level inbetween 9° 50' to 11° 50' northern latitude and 78° 45' to 79° 50' eastern longitude. It extends to an area of 8,280.0 sq. kms. bounded on the north by South Arcot and Tiruchchirappalli districts of which the latter surrounds the western border also. It is flanked on the south by the district of Pudukkottai and the Palk Strait while on the east is the Bay of Bengal. It has a coastal line of about 216 kms. divided into two sections—one extending from the mouth of river Coleroon to Point Calimere and the other from Point Calimere bordering the Palk Strait. The erstwhile French Pocket, Karaikkal, is situated in the middle of the coastal line between the Coleroon and Point Calimere. The coastline has a number of harbours of which mention may be made of Nagore, Point Calimere, Nagappattinam and Tranquebar.

The district can be divided into three distinct divisions, viz., the deltaic region, the upland area or non-deltaic region and the salt swamp. The deltaic region covers the whole northern and eastern portions of the district where the Cauvery with its wide network of branches irrigates more than half of the district. It comprises the whole of Kumbakonam, Mayuram, Sirkazhi and Nannilam taluks and parts of Thanjavur, Papanasam, Tiruvavur, Mannargudi, Tirutturaipundi and Nagappattinam taluks. This entire area of vast flat alluvial plain of unending paddy fields, interspersed with rich groves of mango, coconut and other trees, slopes gently towards the sea. Here are to be found neither hills nor hillocks, save the ridges of blown sand which fringe the narrow strip of beach along the sea coast. The rest of the southern and western areas of the district are non-deltaic or upland regions. A good portion of upland regions which was dry has now been brought under irrigation with the help of Grand Anicut Canal, fed by the Cauvery-Mettur Project and by extension of the Vadavir river. Non-deltaic region is also devoid of hills and slopes gradually seawards. Vedaranniyam salt swamp forms the third great natural division of this district. It runs along the coast from Point Calimere for about 48 kms. and is about 7 to 8 kms. wide. This is the longest swamp of its kind in the State. It is filled by two periodical high tides during the fullmoon of months, May and June and retains sea water to a depth of two feet over a considerable area enclosed by low earthen banks, which when closed prevent the water from flowing back into the sea after the tide recedes. It is in this manner the wellknown Vedaranniyam spontaneous salt is produced.

The soil of the district can be classified in four categories—the alluvial, the regar (black series), the red ferruginous and the arenaceous. The soil of the delta is entirely alluvial but varies greatly in quality. The best of it is found in the western part of the district and the quality gradually recedes as we advance towards east. The rich soil is also found in the north and the south of the railway line between Mayuram and Thiruthuraipundi. The worst land in the delta is to be found in the Tirutturaipundi and Nagappattinam taluks where the soil is saline and arenaceous and drainage is very defective. This land is in striking contrast to the rich lands near Thiruvaiyaru which are known as 'the breast of Thanjavur'. Along the banks of rivers in Thanjavur, Kumbakonam and Papanasam taluks, are to be found the strips of very rich padugai lands. The upland tracts of the district consist of red ferruginous soil. The red soils are equally fertile if well irrigated. Towards the sea-coast in the Pattukkottai and Arantangi taluks, the soil is arenaceous.

The most remarkable feature of Thanjavur district is the river Cauvery and its tributaries. The bounteous Cauvery is considered to be the best of the rivers that drain the Southern peninsula of India. It flows through Mysore, Dharmapuri, Salem, Periyar, Tiruchchirappalli and Thanjavur, covering a distance of about 770 kms, draining an area of about 72,800 sq. kms. in all. Springing from a spot lying on Brahmagiri mountain of western ghat at a height of 1,320 metres above sea level, it meanders its way across Karnataka and Tamil Nadu not only showering economic prosperity on millions of people but also has carved a niche for itself in their lives, in the historical, cultural and religious realms.

Emerging as a small rivulet from the Coorg mountains, the river Cauvery expands rapidly increasing in volume as hundreds of streams and rivulets merge with it which are mostly fed on the heavy rainfall of the South-West monsoon. After Sivasamudram Falls in Mysore, the Cauvery meanders its way in between two hills and enters into Tamil Nadu. The river Cauvery again forms beautiful waterfalls at Hogankal in Dharmapuri. Three minor tributaries, the Palar, the Chinnar and the Thoppiar, enter the Cauvery on her course above Mettur, where the famous dam has been constructed. The Mettur Dam joins the Sita and Palu mountains beyond that valley through which the Cauvery flows, upto the Grand Anicut. The Dam in Salem impounds water not only for the improvement of irrigation but also to ensure the regular and sufficient supply of water to the important Hydro-Electric generating station at Mettur. The river further runs through Periyar district where river Bhavani merges with it. While passing through Erode it is joined by two more tributaries, the Noyyal and the Amaravathi, before reaching Tiruchchirappalli district. Here the river becomes wide, with a sandy bed, and flows in an easterly direction till it splits into two at Upper Anicut, about 14 kms. west of Tiruchchirappalli. The northern branch

of the river is called the Coleroon while the southern branch retains the same name, Cauvery and then goes directly eastwards into the Thanjavur district. Some 16 kms. below Tiruchchirappalli the two rivers again join to form the Srirangam Island.

Karika has been immortalised as the King who has constructed the bund for the Cauvery, all the way from Puhar (Kavirippoompattinam) to Srirangam upstream. It was built as far back as 1,600 years ago or even more. On both sides of the river are found walls spreading to a distance of 1,080 feet. The dam which is a superb work of engineering was constructed with the earth and stone and has stood the vagaries of nature for hundreds of years. In 19th Century, it was renovated on a bigger scale. The name of this historical dam has since been changed to 'Grand Anicut' and stands as the head of the great irrigation system in the Thanjavur district. From this point the Coleroon runs north-east and discharges herself into the sea at Devakottai, a little south of Porto-Novo. From river Coleroon, Manniar, Palavar and Uppanai branch off at Lower Anicut and irrigates Sirkazhi taluk. After Grand Anicut, the Cauvery divides into numerous branches and covers the whole of the delta with a vast net work of irrigation channels and gets lost in the wide expanse of paddy fields. The mighty Cauvery river is now reduced to an insignificant channel and falls into the Bay of Bengal at the historical place of Poompuhar (Kavirippoompattinam), about 13 kms. north of Tranquebar. The river Cauvery reaches the entire district in different names through its tributaries and branches viz., Grand Anicut canal, Vennar, Panaiyar, Koraiyar, Vettar, Kudamurittiyar, Thirumalairajanar, Arasalar, Mudikondan, Veerasozhanur and Vikkaramanar and all these branch off into a number of small streams.

Among the various names by which the holy Cauvery is known during this course, the most popular in Tamil Nadu is 'Mother Cauvery' due to the high sanctity attached to it. It is worshipped by the people irrespective of caste, creed or religion during Maha Magam festival celebrated at Kumbakonam. The pilgrims after a bath in the Maha Magam tank proceed for a holy dip in Cauvery which is believed to purge off all sins. In the Tamil Month of Adi (July-August) on the 18th day, the people throng the banks of the river for a holy bath and pray the Mother Cauvery for their prosperity. In the Tamil month of Ayyappasi (October-November), thousands of devotees participate in a festival called 'Kuda Muzhukku' celebrated on the banks of river Cauvery at Mayuram. Many of the islands and islets created by the Cauvery have also earned fame as either sacred religious centres of beautiful scenic spots, providing the much needed respite and mental solace to urbanites.

Climate and Rainfall.—Like most other coastal areas, the climates of Thanjavur can be termed fairly healthy. According to the temperature recorded at the observatories of Vedaranniyam, Atirampattinam and Nagappattinam, the actual mean maximum temperature recorded during the year June 1979 to May 1980 was 38.2°C during the month of June 1979 at Atirampattinam against the normal mean maximum which stood at 33.7°C only. Similarly the actual mean minimum temperature during the same year was recorded by the same observatory, during the month of January 1980 at 20.1°C against the normal mean minimum temperature of 20.9°C. In case of humidity data, the maximum in the said period was recorded during the month of November 1979 at 91 per cent at 8.30 hours. at Vedaranniyam. Another fact noticed from the data is that maximum temperature rarely crosses 38.2°C while the minimum temperature seldom falls below 20.0°C. It would be quite interesting to know the average maximum and minimum temperatures worked out on the basis of the records of the past thirty years in these three observatories.

Name of observatory.	Temperature in 'C'	
	Maximum.	Minimum.
(1)	(2)	(3)
Vedaranniyam	32.4	24.4
Atirampattinam	32.1	24.2
Nagappattinam	31.9	25.2

November, January and February are the months in the year with a pleasant climate full of warm days and cool nights. From March onwards, the climate rather becomes sultry and the mercury records an upward trend reaching its peak by the close of May or June. Summer rains hardly affect the temperature. The north-east monsoon in October does bring some relief.

The south-west monsoon sets in June and continues till September. The rainfall during this period is much lower than the rainfall during the north-east monsoon which sets in October and continues more or less till January. Thanjavur district is benefited more by south-west monsoon than by north-east monsoon because of its heavy rain fall on the western ghats which invariably feeds the Cauvery, helping greatly the vast wet cultivation of the delta area.

A comprehensive statement showing the monthwise rainfall in m.m. in Thanjavur district during the period 1979-80 is given below :—

Name of the month and year.	Normal rainfall.*	Actual rain fall.	Percentage departure from normal.
(1)	(2)	(3)	(4)
June 1979	34.2	24.3	..
July 1979	47.2	70.2	..
August 1979	97.5	100.9	..
September 1979	109.8	204.6	..
Total of the South-West monsoon.	288.7	400.0	+ 38.6
October 1979	203.1	179.4	..
November 1979	309.4	462.1	..
December 1979	168.1	152.8	..
Total of North-East monsoon.	680.6	794.3	+ 16.7
January 1980	65.7	0.7	..
February 1980	19.1	..	..
Total of Winter monsoon ..	84.8	0.7	— 99.2
March 1980	20.2	1.0	..
April 1980	38.9	31.0	..
May 1980	54.9	21.2	..
Total of Summer monsoon ..	114.0	53.2	— 53.3
Annual rainfall in the district.	1,168.1	1,248.2	+ 6.8

* Normal, Average of 50 years rainfall ending 1950.

Flora and Fauna.—There is nothing peculiar in the flora of Thanjavur district which constitute the trees and plants that are usually found on the east coastal areas of the State. The mango, the coconut and the tamarind are found every where in plentiful. The jack fruit trees are found mostly in Thanjavur, Mannargudi and Pattukkottai taluks. The Palmyra and Cashew are seen in abundance in Thanjavur taluk, the Nagai fruit trees mostly appear on the Vallam table land. Neem, Portia, Figs and Banyan continue to be the popular avenue trees. Bamboos are common in the deltaic area. The district has, however, no forest areas of any commercial value.

Due to the absence of hills and forests, the district is devoid of wild animals like tigers, elephants, panthers, etc., In the small belt of Jungle at Kodaikadu near Point Calimere are found spotted deer, antelopes and wild pigs. Jackals and foxes can be found almost in the entire district. Ordinary grey monkeys are also most common. Snakes, poisonous and non-poisonous, exist in large numbers, common among them being the Cobra, the Karait, the Russel's Viper the Carpet snake, etc. All the Indian birds like the crow, the kite, the vulture, the owl, the sparrow, the cuckoo etc. can be found in the district. Duck, quail, partridge etc. are found to exist but not in large numbers. Once, crocodiles were in abundance but have now become relics of the past due to indiscriminate shooting for its skin which fetches good foreign exchange. Few crocodiles are still found near Grand Anicut.

The swamps of Point Calimere are of great interest to ornithologists due to the abundance of variety of avifauna. Special mention may be made of flamingoes visiting these swamps in thousands during winter months. The swarms of these birds with white and pink plumes is a rare sight and offers a spectacular display.

A Wild life sanctuary was formed at Point Calimere in 1967 on an area of 1,729 hectares to preserve wild in the original surroundings. The sanctuary is unique in having a large concentration of black bucks or Indian antelopes. During May 1971, a Census was undertaken by the Vaigal Forestry Training School and the number of Black bucks was estimated as 890.

Forests.—The headquarter of Thanjavur forest division is at Thanjavur and consists of one territorial range, five plantation ranges and one farm forestry range. The forest division comprises of natural forests in scattered patches, some of which are of special ecological value as these form the compact plantations raised on the banks of rivers and canals, etc., over the entire district area. The plantations raised in reserved forests as avenue teak have been handed over to P.W.D. and the compact teak plantations have been retained by the department. The total area under forest in the district during the year, 1980-81 stood at 11,623 hectares or 1.4 per cent of the geographical area. The forest areas is mangrove type and can further be classified into :—

- (i) Littoral forests.
- (ii) Tidal swamp forests.
- (iii) Southern tropical thorn forests.
- (iv) Southern, Carnatic umbrella thorn forests.
- (v) Tropical dry evergreen forests.

Littoral and tidal swamp forests comprise 68 per cent of the entire forest area of the district, while the Southern tropical thorn and Carnatic umbrella thorn forests cover another 25 per cent forest area. The remaining 7 per cent of area has tropical dry evergreen forests. The trees most commonly found in these forests are teak, teak sisso, teak acacia, bamboo, eucalyptus hybrid, sissoo babual, sissoo anacia, cashew, coconut, etc. Under the working plan, 1971-81 formulated by Tamil Nadu Forest Plantation Corporation, the following forest areas have been brought under the working circles:—

Type of forest area.	Area in hectares under working circle.
Teak and hardwood	12,124
Casuarina	411
Cashew	1,374

As per 'Synoptic Statistics on Forestry in Tamil Nadu 1980' issued by planning and Statistical Cell of the office of the Chief Conservator of Forests, during the year 1978-79, 2,836 cu.m. of fuel wood valued at Rs. 2.38 lakhs was extracted from the forests. Besides, the Thanjavur forest yielded 1,202 cu.m. off teak wood valued at Rs. 21.02 lakhs. Raw cashew-nut yield as a forest product was estimated at 11,077 kgs. from cashew bearing area of 118.00 hectares, bearing a yield of 93.87 kgs. of raw nuts per hectare. The report further reveals that during the year total area of forest under the cashew plantation stood at 299.44 hectares. The right to collect the minor forest produce is leased out to the contractors annually in open auction.

Grazing is regulated by issue of permits and the grazing year is from 1st July to 30th June of succeeding year. During the year 1978-79, about 52 sq. km. forest area was under grazing and in all 1,004 cattle were issued grazing permits fetching revenue of Rs. 2,000.

The ecological role of these forests is unique for avoiding the erosions, etc., and lending stability to the soil through which perennial rivers, numerous canals and water channels are flowing. So the forest department has a major role to play for growing more and more of plants near the sensitive areas and equally important is the preservation of existing forests. Land deforested for various purposes upto 1978-79 was of the order of 332.96 hectares, of which 231.89 hectares were brought under agriculture while 101.07 hectares were used for other purposes. There are, however, a number of other factors both natural and human agency which cause further damage to the forests. Of the damage through human beings mention may be made of felling of trees and unrestricted grazing in the reserved forest areas which need to be checked to a great extent. The grazing in such areas results in the absence of natural regeneration of valuable species and thereby hardening the soil leading to erosions.

In all, 13,939 and 2,256 hectares had been declared as reserved forests and reserved lands respectively in Thanjavur district as on 31st March 1979. Out of 13,939 hectares under reserved forests, 2,945 and 240 hectares were under the Wild Life Warden, Madras, and Working Plan and Research Wing of Forest Department respectively. It will not be out of place to mention here that a wild life sanctuary was established during 1967 on an area of 1,729 hectares at Point Calimere, the details of which have been provided elsewhere in the report.

Minerals and Mining.—The major portion of Thanjavur district is covered by Cauvery alluvium and reported to have potential mineral wealth. Vallam stones, laterite, sandstone, kankar and yellow ochre have been reported from this district. Quartz crystals rolled into pebbles occur in the Tertiary formations. In the neighbourhood of Vallam, iron ore is found to exist. Vallam and

Gandarakottai areas in Thanjavur taluk yield laterite of fine quality. Pebbles of transparent quartz occur in the conglomeratic sandstones near Vallam. These are of the amethystine citrine and smoky varieties. Similar pebbles occur west of Techchangurichchi village, about 30 km. south-west of Thanjavur.

Lignite belts have been encountered in between 230 and 370 m. depths during the course of drilling by the Oil and Natural Gas Commission in Tirumangalam area near Mayuram. The fixed carbon ranges from 26.10 to 37.50 per cent and is higher than the lignite of Neyveli. Similar occurrences have also been reported from Vanadirajapuram, Chittakadu and Pandanallur areas.

In Thanjavur district, ilmenite-garnet sands were located between Mimisal and Arirampattinam, Tranquebar, Tirumullaivasal and at the mouth of Coleroon river. In Tranquebar, probable reserves of ilmenite and garnet are estimated at 90,400 and 4,900 tonnes respectively. An occurrence of ilmenite rich beach sands is reported east of Kodiampalayam. It extends over a distance of 2 kms. with an average width of 50 m.

Kankar and tuffaceous limestones occur under red soil/laterite ranging in the thickness from 0.3 to 1.0 m. Kankar layers are also noticed in stream sections. The important occurrences are seen on the Grand Anicut canal cutting between Kuruvadipatti and Pudur and also in the neighbourhood of Tirumalai Samudram. The thickness of Kankar in Tirumalai Samudram area ranges from 2 to 2.5 metres and the total reserves have been estimated to be about 0.5 million tonnes. The Kankar is of good quality, coal ranging from 48.42 to 52.72 per cent are low in magnesia and silica contents.

The Cauvery basin was explored and found to be one of the potential areas for petroleum occurrences both in the inland area around Tiruttrappundi, Pattukkottai, Mannargudi, Karaikal and in the off-shore area north of Palk Strait. Oil and Natural Gas Commission has carried out intensive exploration of geophysical surveys and deep drilling and struck traces of oil in one of the exploratory wells in the basin. Further detailed exploration using the most modern methods of geophysical surveys aided by the latest computer technology data analysis has been taken-up with a view to assess the potential research of petroleum in the Cauvery basin.

Land and Landuse pattern.—During the year 1980-81, the total geographical area of the district stood at 821,246 hectares. The following statement shows the division of the total geographic area by land use and percentage of the area under each land use both for Thanjavur district and the Tamil Nadu State as a whole :—

Land use.	Area in Hectares.	Percentage of area under	
		Thanjavur District.	Tamil Nadu State.
(1)	(2)	(3)	(4)
Total Geographical area	821,246	..	..
1 Forests	11,623	1.4	15.6
2 Barren and uncultivable lands	36,277	4.4	4.5
3 Land put to non-agricultural uses	147,003	17.9	13.5
4 Cultivable waste	18,357	2.2	2.6
5 Permanent pastures and other grazing lands	4,185	0.5	1.2
6 Land under miscellaneous tree crops and groves.	18,373	2.2	1.6
7 Current fallows	16,538	2.0	16.3
8 Other fallow lands	12,783	1.7	3.5
9 Net area sown	556,107	67.7	41.2
10 Area sown more than once	339,911	41.4	8.5

As is evident from the data, 67.7 per cent of the area falls under the net area sown against the corresponding percentage of the State which stands at 41.2 only. Another striking feature is that 41.4 per cent of the geographical area is sown more than twice or in other words gross area sown in all aggregates to 109.1 per cent of the total geographical area against the similar State figure of 49.7 per cent only. In case, 'cultivable waste', 'current fallows' and 'other fallow land' is reclaimed and brought under plough, another 5.9 per cent of the geographical area will be available for cultivation. It is also obvious that land under forests is much below the State average but this ecological imbalance has to some extent been set aside by the 'land under miscellaneous tree crops and groves' of 2.2 per cent which is above the State percentage of 1.6.

Agriculture.—Thanjavur district has occupied a pre-eminent place in agriculture due to its deltaic alluvial soil blessed by the river Cauvery and her numerous branches. Agriculture forms the mainstay of about 71 per cent workers inhabiting the district. The district as such plays a key role in Tamil Nadu by producing about one-third of the total out-put of rice in the State. Thanjavur is the highest rice producing district in the whole of India and is rightly called the 'granary of the South India'.

As is evident from the 'Season and Crop Report' for 1980-81 issued by the Commissioner of Statistics, Tamil Nadu, the total district area under food and non-food crops aggregates to 896,018 hectares, of which 803,078 and 92,940 are under food and non-food crops respectively. As the net cropped area stands at 556,107 hectares only, the area cropped more than once works out to 339,911 hectares. The sub-joined statement will show the break-up of the areas under different food and non-food crops :—

Serial number.	Name of the crop.	Area in hectares.
(1)	(2)	(3)
Cereals.		
1 A.	(i) Paddy	626,269
	(ii) Cumbu	909
	(iii) Ragi	868
	(iv) Maize	2,086
	(v) Korra	7
	(vi) Varagu	2,750
Total under cereals ..		632,889
Pulses.		
1 B.	(i) Redgram	414
	(ii) Greengram	62,147
	(iii) Blackgram	85,515
	(iv) Other pulses	174
Total under pulses ..		148,250
Total foodgrains (cereals + pulses)		781,139
Other food crops.		
1 C.	(i) Condiments and spices	2,102
	(ii) Sugar crops	8,129
	(iii) Fresh fruits	7,400
	(iv) Dry fruits	2,016
	(v) Vegetables	2,265
	(vi) Other miscellaneous food crops	27
Total under other food crops ..		21,939
Non-food crops.		
2	(i) Cotton/fibre	1,580
	(ii) Edible and non-edible oils	71,316
	(iii) Tobacco, drugs and narcotic	1,060
	(iv) Fodder	18,519
	(v) Other non-fodder crops	464
	(vi) Dyes	1
Total under non-food crops ..		92,940

A striking feature of the above data is that, of the total area of 781,139 hectares under food grains, 80 per cent is under the chief crop paddy, while on another 1 per cent other cereals are grown and pulses cover the remaining 19 per cent. Among pulses, most important are green and black grams which constitute more than 99 per cent of all the pulses grown in the district.

So far as other food crops are concerned, out of 21,939 hectares, 37 per cent and 34 per cent have been covered by sugar and fresh fruit crops respectively. The chief sugar crops are sugarcane and palmyrah. In case of fresh fruits, bananas, and mangoes constitute more than 91 per cent of all fruits, the remaining being jack fruits, guava, lime, etc. On the remaining 29 per cent area, condiments and spices, dry fruits (cashew nuts only) and vegetables are grown almost in equal proportional areas.

Of the non-food crops, the chief crop is that of edible and non-edible oils which spreads to 71,316 hectares out of a total area of 92,940 hectares or about 77 per cent. The break-up of the area under edible and non-edible oils by crops is as under—

Edible oils.	Area under each in hectares.
(i) Groundnuts	42,510
(ii) Coconut	20,861
(iii) Gingelly	7,435
(iv) Sunflower	4
(v) Other oilseeds	249
Total edible oils ..	71,059
Non-edible oils.	
(i) Castor	89
(ii) Niger seeds	2
(iii) Other non-edible oils	166
Total non-edible oils ..	257

According to 'Agriculture Progress in Thanjavur' issued by the Joint Director of Agriculture, Thanjavur district, the average annual yield and production of paddy in the district for the past one decade has been as under :—

Serial number.	Year.	Average yield in Kgs. per hectare.			Combined average.
		Kuruvai.	Samba.	Thaladi.	
(1)	(2)	(3)	(4)	(5)	(6)
1	Traditional (1960-61).	2,413	2,250	2,146	2,264
2	1971-72 ..	3,216	2,986	2,789	3,011
3	1972-73 ..	3,470	2,749	2,616	2,937
4	1973-74 ..	3,977	2,949	2,932	3,260
5	1974-75 ..	3,268	2,603	1,855	2,623
6	1975-76 ..	3,594	3,006	2,682	3,106
7	1976-77 ..	3,359	2,299	2,169	2,195
8	1977-78 ..	3,284	2,255	2,188	2,538
9	1978-79 ..	4,150	2,942	2,685	3,192
10	1979-80 ..	3,932	2,717	2,922	3,099
11	1980-81 ..	4,337	2,838	3,438	3,402

Serial number.	Year.	Paddy Production. (LAKH M.T.)			Total.
		Kuruvai.	Samba.	Thaladi.	
1	Traditional (1960-61).	1.90	8.10	2.32	13.32
2	1971-72 ..	6.56	9.32	4.30	20.18
3	1972-73 ..	7.11	8.33	4.26	19.70
4	1973-74 ..	8.27	8.67	5.13	22.07
5	1974-75 ..	6.05	7.44	2.76	16.25
6	1975-76 ..	6.87	8.37	4.14	19.38
7	1976-77 ..	3.93	5.86	1.59	11.38
8	1977-78 ..	5.37	6.86	2.97	15.20
9	1978-79 ..	6.12	9.17	3.35	18.64
10	1979-80 ..	6.54	8.04	4.03	18.61
11	1980-81 ..	7.43	8.28	4.91	20.62

Paddy is raised in the entire district in three crops. The first crop is known as 'Kuruvai' (the short-term crop) with a duration of three and a half to four months from June—July to October—November. The second crop called the 'Thaladi' has a duration of five to six months from October—November to February—March. Third is the 'Samba' (the long-term) crop and has a duration of almost six months from August to January. 'Samba' is grown on a very limited area in the district as a single crop in areas where the water is less and not available for two crops. The sub-joined statement shows the production of rice in the district as well as the State for the year 1980-81 and is based on crop estimation survey :—

District/State.	Production of rice in tonnes.			
	I crop.	II crop.	III crop.	Total.
(1)	(2)	(3)	(4)	(5)
Thanjavur	1,063,690	329,230	50	1,392,970
Tamil Nadu	3,147,630	1,104,270	26,920	4,278,820

It is quite apparent that Thanjavur district produced 32.4 per cent of the total rice production of the State as a whole and no wonder is called with pride as the granary of the State.

Considerable improvement has been made in the cultivation of paddy since the introduction of the Five-Year Plans and especially the package plan. As a consequence, there has been rapid increase in the per hectare yield of paddy in the district which has shot up to 3,402 kgs. in 1980-81 as combined average against the traditional 1960-61 and 1971-72 averages which stood at 2,264 and 3,011 kgs. respectively. This improvement in the output of paddy has been mostly due to the rise in the per hectare yield. The package plan was introduced in 1960 with a view to encourage intensive cultivation of land, thus increasing the output. The Farm Production Plans which formed part of the large scheme were drawn up in consultation with the farmers and based on this assessment, necessary facilities like technical guidance, timely credit and supply of requisites, etc. were provided. As a part of the phased programme, Farm Production Plans were introduced in limited areas and gradually its coverage was extended.

The services rendered by the Agricultural Research Station at Aduthurai and Pattukkottai are specially important for the improvement in cultivation of paddy in the district. The Aduthurai Research Station is primarily concerned with two aspects of the raising of paddy, viz., the selection of pure lines of paddy and the hybridization of it. Consequently, old varieties of seeds which were in wide use in the district have been replaced by new and improved strains. The Aduthurai Research Centre has evolved various strains of paddy suited for various crops. During the year 1980-81, the most popular strains of paddy among the ryots have been ADT.31, IR.20, IET.1722, CO.33, CO.25, CO.40, Ponni, ADT.34, ADT.35, NLR.9672, IET.4786 and TKM.9. These types are found to yield at a higher rate and some of these have the additional advantage of being resistant to blast diseases. It is gratifying to note that over 80 per cent of the total area cultivated with paddy are using the improved strains evolved by the Agricultural Research Stations. While the Aduthurai Station is engaged in evolving improved strains of paddy, the Research Station at Pattukkottai attempts at evolving profitable ways of raising paddy by improved cultural and manurial methods.

The provision of liberal credit facilities has enabled the ryots to take advantage of the various facilities provided to them under this scheme. There has been considerable increase in the total amount disbursed as loans to the ryots.

The cultivators have not only adopted to the latest high yielding varieties but are also utilizing liberally the new fertilizers and pesticides as will be evident from the following statement showing the rapid increase in the consumption of fertilizers and pesticides from year to year during the past one decade in the entire district :—

Year.	Consumption in metric tonnes.			
	Fertilizers.			Pesticides.
	'N'	'P'	'K'	
(1)	(2)	(3)	(4)	In terms of dust equivalent (B.H.C.). (5)
1971-72	27,543	15,692	8,151	12,143
1972-73	30,863	15,872	8,512	13,305
1973-74	32,753	14,945	9,161	10,596
1974-75	27,725	10,049	10,124	5,305
1975-76	41,509	14,236	10,983	17,037
1976-77	38,080	11,102	9,985	14,823
1977-78	44,105	12,290	12,170	16,864
1978-79	46,332	13,914	13,757	16,000
1979-80	47,901	14,167	14,395	17,793
1980-81	48,005	14,882	14,849	19,241

The following statement shows the total out-turn in tonnes of all the foodgrains and other principal crops during the year 1980-81 based on the crop estimation survey :—

Serial number.	Name of the crop.	Production in tonnes.
(1)	(2)	(3)
1	A. Cereals—	
	(i) Rice	1,392,970
	(ii) Cumbu	800
	(iii) Ragi	1,550
	(iv) Maize	2,240
	(v) Korra	10
	(vi) Varagu	2,670
	Total under Cereals ..	1,400,240

B. Pulses—

(i) Redgram	240
(ii) Greengram	18,470
(iii) Blackgram	26,090
(iv) Other pulses	50
Total under Pulses ..	44,850

Total Foodgrains (Cereals and Pulses) .. 1,445,090

2	(i) Sugarcane/Gar	794,330/57,190
	(ii) Chillies	1,170
	(iii) Tamarind	1,400
	(iv) Turmeric	560
	(v) Tapioca	13,340
	(vi) Sweet Potatoes	430
	(vii) Onions	1,100
	(viii) Citrus	2,960
	(ix) Mangoes	22,880
	(x) Bananas	70,970
3	(i) Cotton	2,530 Bales (of 170 kg. each).
	(ii) Groundnut	36,310
	(iii) Gingelly	1,430
	(iv) Castor	40
	(v) Coconut	2,106 (in lakhs)
	(vi) Tobacco	620

Among commercial crops, the most important are the oil seeds which are produced in fairly large quantities in the dry soil tracts of the district. These are raised mostly in Pattukkottai and Thanjavur taluks. Apart from coconut, the important oil seeds produced are groundnut and gingelly. Of these, groundnut is raised as a dry crop mostly in Pattukkottai and Thanjavur taluks. The Agricultural Research Station at Pattukkottai has evolved improved strains of groundnuts and these new strains of seeds are found to yield 10 to 15 per cent above the usual varieties that were in vogue in the region. Among these new strains, noteworthy are AH 25 and AH 32. Though coconut is included among oil seeds, it is largely raised in the deltaic regions and in wet soil tracts. Perhaps next to paddy this is the principal wet crop in Thanjavur.

The farmers in Thanjavur, like all other farmers in South India, have also now started to cultivate the Sunflower, the seeds of which are rich in oil, in non-deltaic regions. In order to improve the yield and quality, new seedlings have been distributed to the farmers, during the third and fourth plans respectively. In order to avoid pests and damage due to pests to this important crop, special plant protection staff and agricultural extension workers are engaged in tackling the pests and other diseases of sunflower crops and coconut trees.

Ten State Seed Farms have been established in the district for research, demonstration and procurement of seed as indicated in the subjoined statement. The following statement shows the various seed centres in Thanjavur district :—

Under the scheme of Intensive Agricultural District Programme which was implemented since 1960, latest scientific advances in the field of agriculture were introduced and accepted by the farmers by intensive contact by the extension workers. The outcome was very promising resulting in the higher production and higher income. During September 1981, a new scheme has been introduced known as Training and Visit System. The scheme has been welcomed by the farmers as it envisages a very good link between the farmers, extension workers and research personnel. The statement displayed hereunder shows the staff deployed under the scheme with their respective headquarters in the district :—

Irrigation and Power.—The presence of the perennial river Cauvery and the numerous irrigation projects that have been carried out even from the days of Chola kings can be considered as the best irrigation system in Tamil Nadu. Especially in arenaceous soil tracts in Pattukkottai, provision of irrigation has proved very useful. The necessity for irrigation was realised much early and irrigation systems in the district date back to days of early Cholas. Thanjavur today has one of the best irrigation systems in the State and ranks foremost in the area irrigated. Over 72.0 per cent of the gross cropped area is under irrigation from one source or the other. The position is all the more attractive when we consider the net area sown and net area irrigated. Over 86.4 per cent of the net area sown enjoys the benefit of irrigation. The total area irrigated in the district stood at 480,667 hectares during 1980-81.

The chief sources of irrigation in the district are the rivers, a few rainfed tanks and wells. These tanks and wells occur mostly in the upland regions. The most important rivers in the district are the Cauvery and the Coleroon. As these rivers have their origin in the western ghats, they are fed by the south-west monsoon. The river Cauvery with its numerous branches has proved a very dependable source of irrigation and most of the irrigated area in the district derive water from the Cauvery only. A birds eyeview of the course of the Cauvery in Thanjavur will show us how and where it has been tapped and rendered most efficient for irrigation. Nearly 80 per cent of the total net area irrigated is served by canals and these canals are fed only by the river Cauvery. Thus, the Cauvery is the primary source of irrigation in the district. The Cauvery Delta System is the most ancient of all irrigation schemes in Thanjavur. This comprises mainly of three important projects. They are the famous Grand Anicut, the Upper Anicut and the Cauvery Vennar Regulator Project.

The Grand Anicut is the oldest and the most significant among these three and is reported to have been constructed during the Sangam Age of Chola period. This is built at the junction of the rivers, the Cauvery and the Coleroon, about sixteen kilometres from Tiruchchirappalli at the lower end of Srirangam Island and is designed to regulate the supply which comes down the Cauvery from the Upper Anicut. When the supply exceeds the requirements of the delta channels, the gates on the Grand Anicut are raised and the surplus is passed down into the Coleroon when it proceeds down to the Lower Anicut. There, it is again regulated and utilised for irrigation by means of other canals. The anicut was first made of roughly dressed granite stones set in mud covered with an outer layer of granite blocks set in lime mortar. Its length is 1,080' and breadth is 40' to 60' with a depth of 15' to 18'. It has later on undergone numerous improvements. In 1806, it was raised further and in 1830, the anicut came to be provided with sand scouring sluices. Some fifty years later, the stones were removed to be replaced by automatic falling shutters. These were replaced by lifting shutters in 1899. The main purpose of this anicut was to check and control the water running to waste into Coleroon. In order to prevent silting up of the bed of the Cauvery in the deltaic regions by providing enough water through the Cauvery, the able engineer, Arthur Cotton built a masonry wall at the head of the Coleroon in 1836. The purpose of this construction was to check the flow down the Coleroon so as to keep enough water in the main river, the Cauvery. After the construction of this Upper Anicut, floods often threatened the Grand Anicut and there occurred serious erosions on the banks of the Cauvery. This danger was however minimised in 1845 by the construction of the Cauvery dam. In order to avoid the danger completely, the Upper Anicut was rebuilt in 1899 so as to provide passage for flood waters down the Coleroon in cases of emergency. Immediately below Grand Anicut are the Cauvery Vennar Regulators which divide the stream between the rivers and control the flow. Just below these imposing structure are built small regulators in order to effect proper distribution of water among various branches of the rivers and other numerous irrigation channels.

The Lower Coleroon Anicut also was the product of the master-mind of Sir Arthur Cotton. It was built in order to irrigate the north eastern concerns of the district, especially the taluks of Mayuram and Sirkazhi which were not adequately covered by the Cauvery system. Even this dam was extended, remodelled and rebuilt on the same lines as the Upper Anicut. A few major repair works for strengthening the dam were undertaken early in this century. Channels of this Anicut alone irrigated an area of over 24,000 acres in the district. The total area irrigated by the system amounts (for the first crop alone) to 109,118 acres, apart from 28,309 acres under the second crop.

To the ind-fatigable engineer, Arthur Cotton, the district owes not a little. The idea to build a reservoir on the Cauvery in order to irrigate the deltaic regions of the district was that of Sir Arthur Cotton. Numerous proposals were put forward and investigations carried on before finally in 1910, Colonel W.M. Ellis worked out a practicable scheme. But there was disagreement between Madras and the then Mysore Governments on the question of sharing the Cauvery waters. In the end, it was due to the efforts of Dr. C.P. Ramaswamy Iyer, then member of the Executive Council, that an agreement was arrived at. According to this agreement, the scheme was to be executed subject to certain conditions, most important of which were that both the States should build their own reservoirs and that the reservoir at Mettur should be limited in capacity. Its capacity should not exceed 93,000 million cubic feet so that it should irrigate over 301,000 acres. Based on these conditions, the Cauvery-Mettur Reservoir or the Stanley Reservoir was constructed.

Mettur Dam is the biggest dam in the state with length measuring over 5,300' and height 214' above the deepest foundations. The project has been designed to ensure steady supply of water for irrigation to over a million acres already supported by the Cauvery Delta System and to irrigate an additional acreage of about 301,000 in Mannargudi, Pattukkottai and Thanjavur taluks. The utility of the scheme is manifold. By the storage of flood waters in the reservoir, the dam has made it possible to provide sufficient supply of water for agricultural purposes during the intermonsoon periods and also to safeguard cultivation against the unforeseen vagaries of nature. Even in times of drought the project ensures an even supply and distribution of available waters, thus preventing avoidable wastage. Moreover, it enables the agriculturists to control and regulate their farm operations taking into account the availability of water. Apart from these, it also acts as a barrier against the onrush of Cauvery in all its fury during the north-east monsoon period and causing serious damages to crops and lands.

An important scheme that influenced the progress of irrigation works in the district was the Grow More Food Campaign. The district was one of the specially chosen areas for the campaign and much emphasis was laid on increasing the irrigational facilities in the region. An important irrigation work that was effected due to this campaign is the extension of Grand Canal beyond Narasinga Cauvery which helped to irrigate about 15,000 acres. The Grow More Food Campaign had brought to light the fact that the Cauvery System did not provide for drainage and steps came to be taken to rectify this. During the First Plan period, Cauvery Delta drainage scheme was carried out and this work relieved over 49,000 acres of drainage submersion.

During the second Five-Year Plan period, no major irrigation work was taken up for the benefit of Thanjavur, except for the Kattalai Highlevel Scheme, which though meant for Tiruchchirappalli, proved beneficial to Thanjavur also to some extent. Under this, 4,481 acres for the first crop and about 4,000 acres for the second crop were irrigated in the district.

Apart from these major sources of irrigation, Thanjavur is benefited from other sources also. Next in importance are tube-wells and wells which together irrigate an area of 6,929 hectares. A few tanks in the upland region prove quite helpful and irrigate 3,126 hectares area. It is followed by other sources like springs, channels, etc. The following statement will reveal the relative importance of various sources of irrigation in Thanjavur district during the year 1980-81.

Serial number.	Source of Irrigation.	Government/ Private.	Number.	Net area irrigated in hectares.	Remarks.
(1)	(2)	(3)	(4)	(5)	(6)
1	Canals	Government	46	467,066	length 1,783 kms.
2	Tube wells	Government Private	2,875 15,735	47 3,286	Total = 18,610 Tube wells
3	Wells	Government Private	12 39,089	— 3,596	4,411 wells are not in use.
4	Tanks	with ayacut of 100 acres or more.	130	3,126	Total tanks 420
		with ayacut of less than 100 acres.	290		
5	Other sources, i.e. springs, channels, etc.	Government Private.		1,731 1,815	
				480,667	

Besides, area irrigated more than once during the year 1980-81 stood at 164,199 hectares. It brings the total gross area of crops irrigated during 1980-81 to 644,866 hectares. The net and gross area sown in the district during the same year was 556, 107 and 896, 018 hectares respectively. So the net area irrigated to net area sown, therefore, works out to 86.4 per cent while the percentage of gross area irrigated to the gross area sown stands at 72.0 per cent.

The following statement shows the break-up of the total irrigated area of 644,866 hectares (by all sources) by crops during the year 1980-81 in Thanjavur district :

Serial number.	Crop.	Area irrigated in hectares.

An important aspect to be noted in Thanjavur district is the absence of any hydro-electrical project or any thermal unit, although the extension of electricity to as much of rural areas as.

possible was one of the main objectives of the State Government during the plan periods. The statement given below shows the annual consumption in million units of Thanjavur district through several electricity systems :—

Consumption of power.
(in Million units)

Animal Husbandry.—The position of livestock in Thanjavur district has considerably improved. Animal husbandry which is an allied activity of agriculture, however, could not keep pace with the developmental works undertaken in the field of latest agricultural techniques and so the district cannot boast of any special breed of cattle and the indigenous cattle still continue to be of poor quality. Farmers, therefore, generally have to depend on cattle imported from other districts, especially Coimbatore, Salem, Madurai and Tiruchchirappalli. In its southern parts are found a type of cattle called Thanjavur polled cattle; they are distinguished by the absence of horns and the possession of clipped ears. This unfortunate position is generally attributed to the absence of pasture land and the scarcity of fodder crops in the district. They are fed almost entirely on paddy straw which is considered to be deficient in protein and phosphorus, necessary for the proper growth of animals.

Of late, cattle development in Thanjavur has taken place through the setting up of an intensive cattle development project with two Regional Artificial Insemination centres and 50 sub-centres. Besides this, 5 key village blocks with 50 sub-centres are also functioning here. Five bull stations supply semen to the veterinary institutions where artificial insemination work is done. A frozen-semen-bank is being established in the Eachenkottai-farm, which will commence to function very soon. The Exotic cattle breeding farm at Eachenkottai maintains Jersey breeds and a fodder seed production unit. In the District Livestock Farm, Korukkai, Umbalacherry, Sindhi Umbalacherry and Jersey Umbalacherry animals are maintained. Another district livestock farm is located at Orattanadu where the breeds of brown Swiss, Sindhi cross breeds and Murrah are maintained. One poultry extension centre is attached to this farm. Another poultry extension centre is located at Pattukkottai. Training in dairy and sheep husbandry is also imparted in the farm to the rural unemployed youths. There are five sheep breeding co-operative societies functioning in this district. The Rinderpest squad, Thanjavur, is also rendering valuable service in the eradication of rinderpest.

The latest live stock and poultry census was undertaken in the year 1977 and the following statements show the number of live stock and poultry as per the statistics collected during the census :—

A. Live-stock—1977 :—

	Number.
(i) Cattle and buffaloes	1,578,519
(ii) Sheep	81,392
(iii) Goats	5,11,004
(iv) Horses and ponies	776
(v) Mules	25
(vi) Donkeys	1,346
(vii) Pigs	13,245
Total live-stock ..	2,186,307

B. Poultry - 1977.—

	number
(i) Fowls	1,244,232
(ii) Ducks	15,334
(iii) Others	418
Total poultry ..	1,259,984

The live stock Census data further reveal that of the 1,578,519 bovine cattle and buffaloes, 797,952 were male and 780,567 female. The number of buffaloes stood at 376,419 comprising of 118,292 male and 258,127 female while the remaining bovine cattle comprise of 679,660 male and 522,440 female. The following statement shows the use to which the bovine cattle and the buffaloes were put to:—

Serial number and used for.	Number of	
	Male cattle.	He-buffaloes.

(a) Castrated	465,320	34,452
(b) Uncastrated	27,759	9,068
(iv) Not used for work or breeding	12,942	4,573
Total ..	527,010	58,717

Serial number and used for.	Number of	
	Female cattle. (cows).	She-buffaloes.
(1)	(2)	(3)
(i) Milk production	174,133	95,384
(ii) Dry	147,676	58,707
(iii) Not calved even once	32,067	17,074
(iv) Used for work	2,032	9,243
(v) Not used for work or breeding	9,113	3,373
Total ..	365,021	183,781

NOTE.—Out of 365,021 female cattle 3,53,876 are breeding cows and in case of 183,781 she-buffaloes 171,165 are in breeding.

In case of poultry, the census statistics also provides information on fowls and ducks in the followig manner :—

Serial number and poultry.	Number of birds.		
	Country.	Improved.	Total.
I (i) Cocks	224,480	18,709	243,189
(ii) Hens	535,172	38,346	573,518
(iii) Chickens	400,449	27,076	427,525
Total Fowls ..	1,160,101	84,131	1,244,232
II (i) Ducks	9,832	148	9,980
(ii) Drakes	2,309	124	2,433
(iii) Ducklings	2,813	108	2,921
Total Ducks ..	14,954	380	15,334

The animal husbandry department looks after the welfare of cattle through a net work of veterinary hospitals and dispensaries. It also has touring Veterinary Assistant Surgeons whose duty is to check the out-break of contagious diseases, castrate animals, treat minor ailments of cattle, organise cattle shows and advise ryots on all livestock matters. As per the latest data available for 1979-80 there are 321 veterinary institutions in Thanjavur district which attend to the live stock. Out of these institutions, 8 are Veterinary hospitals, 63 are Veterinary dispensaries, 3 are Clinical laboratories, 2 are Clinical Centres, 1 Veterinary dispensary cum Key Village Centre and the remaining 244 are Veterinary sub-centres. The following statement shows the total animals treated by these institutions in the district during the year 1979-80.

Bovine	..	..	..	..	..	474,796
Exquines	..	..	..	..	..	313

Besides, the following castrations were performed during the same year.—

Bovine	..	..	..	..	..	13,648
Exquine	..	..	..	..	..	7,965
Others	..	..	..	..	..	1,031
Total	..	..	..	..	..	22,644

Fishery.—Out of the eight districts of Tamil Nadu engaged in marine fishing, Thanjavur is leading in marine fish production accounting for about 30 per cent of the total catch of the State as a whole. The State has a total coast-line running to 1,000 kms. embeded with 402 fishermen villagers of which Thanjavur district occupies 216 kms. strewn with 79 of these villages from the mouth of the Coleroon river in the north to Somanathanpattinam village in the south. As per the Census of Marine fishermen in Tamil Nadu (1977), the State has a population of 337,713 persons of whom 80,035 are active fishermen. The following statement shows the production of marine fish by districts in the State from 1978 to 1981.—

Serial number.	District/State.	Marine fish production (tonnes)		
		1978-79.	1979-80.	1980-81.
(1)	(2)	(3)	(4)	(5)
1	Madras	13,980	14,923	15,633
2	Chengalpattu	14,148	13,859	14,518
3	South Arcot	7,385	10,830	11,345
4	Thanjavur	62,665	59,165	61,980
5	Pudukkottai	4,557	6,602	6,916
6	Ramanathapuram	29,281	35,377	37,060
7	Tirunelveli	23,628	26,853	28,131
8	Kanniyakumari	54,672	49,080	51,417
	Total	210,316	216,689	227,000

As is evident from the data, Thanjavur district has a unique position followed by Kanniyakumari and both these districts together contribute more than 50 per cent of the marine fish catch of the State. While the overall State production of marine fish increased in 1979-80 and 1980-81 by 3 per cent and 4.8 per cent respectively over the preceding year's output, the production of fish of Thanjavur, however, showed a little downward trend, especially during 1979-80. The production of marine fish during 1978-79 in the district was about 29.8 per cent of the State production which declined to 27.3 per cent during 1979-80 and continued at par, in 1980-81 also. The marine fish catch mainly comprises of leognathics, shrikes, flying fish, chank, cat-fish, prawns, silver bellies, crabs, rays and other miscellaneous varieties.

The 1977 Census of marine fishermen further reveal that there are in all 12,806 families engaged in marine fishing with a population of 58,489 persons in the district. Out of 58,489 persons enumerated, 14,394 were engaged in full time marine fishing, 1,027 were engaged in allied fishing activities and 573 persons were engaged in other occupations while the remaining 42,495 were their dependent members. Of the 14,394 full time marine fishermen—1,422 fish in mechanised boats, 8,004 are engaged in catamaran fishing, 3,878 undertake shoreside fishing and the remaining 1,090 use country canoes for fishing. It points out that catamarans are still the most commonly used craft off the shore. These have replaced to a great extent the Atirampattinam drifter, the flat, 'V' bottom boats in the Palk Strait. Of late, mechanised boats are also becoming popular year after year as will be evident from the increase in their numbers. There were in all 232 mechanised and 5,456 non-mechanised boats during 1977 but the Census of 1982 reveals a different picture. The number of mechanised boats according to 1982 Census has increased to 1,071 while non-mechanised boats figure rose only to 5,864. The Census data further reveals that the following gears were used in 1977 in the district:—

Serial number.	Name of gear.	Number in use.
(1)	(2)	(3)
1	Thirukaivalai	207
2	Velavalai	1,493
3	Chippivalai	13,194
4	Iralvalai	33,728
5	Trawl-net	78
6	Thoorivalai	564
7	Kavalavalai	419
8	Vellavalai	1,051
9	Nanduvalai	1,111
10	Peria and Karaivalai	160
11	Pinthavalai	171
12	Koivalai	3,675
13	Others	120,340

There are 51 marine fishermen co-operative societies and one district co-operative federation. Besides, each one of the following societies are functioning in the district, co-operative marketing union, boat operator's co-operative society and prawn farming and marketing co-operative society. Financial assistance by the Government to the fishermen is extended through these societies to uplift the socio-economic status of the fishermen. Mechanised boats are made available under hire-purchase scheme through the societies. Government have also sanctioned a Fishermen-housing scheme, under which the Tamil Nadu Adi-Dravidar Housing and Development Corporation has been constructing houses in coastal fishing villages for the fishermen from year 1975-76 onwards. The fishermen are provided relief for the loss of nets, implements due to fire, flood, etc. For the loss of the life while fishing an ex-gratia amount of Rs. 5,000 is sanctioned to the legal heirs of the deceased. Initial payment of Rs. 2,000 is made immediately and the balance of Rs. 3,000 is being paid in 30 monthly instalments of Rs. 100 each. An expenditure of Rs. 76,000 was sanctioned for the installation of guide lights at fishing villages to facilitate the fishermen to locate their villages during night hours while returning ashore. Five of the guide lights stand completed. The guide lights were also to be provided to the departmental staff wherever stationed and to the local fishermen co-operative societies of the area concerned or, if there was no society, to the prominent fishermen in the area for maintenance. Electrification to Mallipattinam tower and Vanamadevi has since been completed by the State Port Office, Madras.

At Mallipattinam, a fish landing jetty with a capacity of 100 boats at a cost of Rs. 14.4 lakhs has since been completed. The Government have also sanctioned Rs. 28 lakhs for the development of the infrastructural facilities at Pazhayar. Another fish landing jetty is under completion at Kodikarai which will have a berth capacity of 100 boats and will cost Rs. 10.6 lakhs.

The service centre run by the Assistant Director of Fisheries, Mallipattinam, caters to the needs of marine fishermen and is the only workshop in this coastal area. The Government rates for servicing the mechanised boats are comparatively less than the rates charged by the private workshops.

Thanjavur district has also the richest inland fishing resources in the State, thanks to the river Cauvery delta. There are more than 420 irrigation tanks in the district, most of which are also fed by the perennial river Cauvery. The river Cauvery's irrigation canals, channels and

Irrigation tanks abound in rich variety of fish. The inland fishery consists mostly of carps, catla, rohu, mrigal and other varieties of labeo, cirtuner, cat-fish, murrels and notopterus in main river Cauvery and its tributaries. With about 10,000 inland fishermen engaged in fishery, the production of fish from inland water sources has been estimated to be more than 30,000 tonnes annually.

Economic varieties of major carp fingerlings are collected in the regulators of the Cauvery river system and supplied throughout the State for stocking in the major reservoirs, departmental fish farms, provincialised tanks and fish farm development agency tanks. The fingerlings collected from various regulators are conditioned and distributed to the stocking centres. There are more than twenty collection centres like Karaiyur Head, Rajagiri, etc., in the district for this purpose, and these quality seeds are distributed not only to various tanks in the district but also to the other districts in the State. Annually about 2.00 lakh fingerlings are collected and distributed throughout the State.

Fishing rights in provincialised rivers, channels and tanks, Municipal and Panchayat tanks, tanks belonging to temples, forest department, etc., have to be leased out to the inland fishermen co-operative societies. The fishermen co-operative societies in turn lease the fishing rights to it, members equally on marginal profits. The Department assists these fishermen co-operative societies in getting the lease of inland water sources as well as fish markets in the area. To regulate fishing and to settle disputes among fishermen of the area, the Government have introduced the licencing system of fishing in the Vadavar river at the lower anicut which enables the fishermen to have regular earning all round the year. Fishing in the Vadavar river and its channels towards north and the south is regulated by license issued by the Inspector of Fisheries, lower anicut. The permits to erect saars in the channels to catch fish are also issued to the member fishermen on the recommendation of the fishermen co-operative societies at Rs. 25 per permit as licence fee. The Revenue and Public Works Department has to certify in all such cases that the erection of a saar in the channel shall not effect the irrigation system.

Twenty Fishery Overseers have been attached to the district for effective implementation of the Intensive Fish Culture Scheme in Panchayat tanks. In Thanjavur division, 5 Overseers work under one Inspector of Fisheries for the effective supervision of the scheme. The scheme is implemented on 75 per cent Government and 25 per cent Panchayat grants with Rs. 2.9 lakhs sanctioned towards establishment, repairing of tanks and the cost of transportation of fingerlings, etc. Recently, 100 hectares of waterspreads have been taken over by the Fisheries Department for stocking fingerlings.

Fish seed through natural resources is not in abundance, so induced carp spawning has been introduced and one such centre has been established since 1966 at Karnathai. Seeds of Catla, rohu, mrigal and common carp hatchlings are produced, reared and supplied to the department units for stocking in their farm tanks and also to private entrepreneurs for fish culture on commercial lines. Fish Farmers Development Agency in Thanjavur district has also been stressing for the increase in quality of fish seeds. Hence, one more Induced Carp Spawning Scheme centre has been established at Agarapettai village near Tirukkattupalli. This centre is expected to commence production of hatchlings during the season of 1983-84.

There are ten inland fishermen co-operative societies in Thanjavur district with specified areas of operation. The fishery rights of provincialised rivers and tanks in Thanjavur district are leased out to the inland fishermen co-operative societies by the District Collector based on the recommendations made by the Assistant Director of Fisheries (R), Thanjavur mainly with regard to the financial soundness of the society concerned. In respect of tanks, etc., in forest areas, the District Forest Officer is the leasing authority. Similarly the fishing in Panchayat tanks is leased to the fishermen co-operative societies by the Panchayat Union.

Chank Fishery is now a State monopoly, and its trade without a valid permit from the department has been prohibited since 23rd September 1977. The Director of Fisheries, Madras, has detailed the regional Assistant Directors to prevent illicit possession, procurement and transport of chanks by private merchants. Declaration of stock of chanks held by chank merchants and the verification of stock by the department staff has been made mandatory. In the coastal areas of Nagapattinam region, therefore, the Assistant Directors have had to purchase netted chanks from the fishermen. The Assistant Director of Fisheries (Regional), Thanjavur, has been asked to submit proposals for the sanction of special staff to be deployed to purchase the netted chanks in different areas and to conserve the chank fishery effectively.

Industries.—Thanjavur continues to be predominantly an agricultural district and no wonder therefore that it has been identified as industrially a backward district on the basis of the annual survey of industries undertaken by the Department of Statistics during the year 1977-78. The survey covered all factories registered under sections 2m(i) and 2m(ii) of the Factories Act, 1947

and certain factories engaged in the production and distribution of electric power, gas and water. The factories had been covered under two main classifications, viz., Census and Non-Census sectors; Non-Census sector was covered on a 50 per cent sample. The results analysed and presented in this report, however, relate to the entire factory sector after certain adjustments made in arriving at the final estimates. According to the distribution of factories and average number of workers and employees per factory, Thanjavur district stands tenth in the State with 346 factories employing on an average 30 workers and 44 employees per factory. The survey shows that in all 10,247 workers and 15,164 employees were deployed in all these manufacturing industries in the district and they formed 1.82 per cent and 2.16 per cent of the total workers and employees respectively of the State as a whole.

The data collected during the survey further reveals that the output of all the factories in the district works out to 1.21 per cent of the total output of the State. Output per factory, worker and employees stands at Rs. 14.39, 0.49 and 0.33 lakhs respectively. Judging the classification of districts by their share to the total value added of the State, Thanjavur stands XIIIth in rank by contributing a share of Rs. 689 lakhs which comes to 0.84 per cent of the State total. The following statement shows the important industries by industry groups, their output and percentage to the total output of the district :—

Serial number and industry group.	Total output of all industries group.	Out put of industry group shown in col. (2).	Percentage share.
(1)	(2)	(3)	(4)
(RUPEES IN LAKHS.)			
1 Manufacture of food products	4,980	2,000	40.16
2 Manufacture of chemicals and chemical products (except products of petroleum and coal).	..	898	18.03
3 Manufacture of cotton textiles	..	625	12.55
4 Manufacture of beverages, tobacco and tobacco products.	..	521	10.46
5 Repair services	..	239	4.80
6 Basic metal and alloy industries	..	215	4.32
7 Others	..	482	9.68
			100.00

As is evident, the manufacturing of food products stands the most important industry due to a large number of rice mills operating in the district. The details of the survey show that manufacturing of cotton textiles has moved from fourth position (in 1976-77) to third during 1977-78, the survey year. Manufacture of beverages, tobacco and tobacco products, is another important industrial group worthy of mention as in output Thanjavur occupies third place next to Madras and North Arcot districts respectively. The output of the district in this group is Rs. 521 lakhs and its State share accounts to 11.20 per cent. According to industrial profile of Tamil Nadu 1981, the distribution of factories according to major industry group (as per the NIC-1970) during the year 1977-78 is mentioned below :—

Industry group.	Description.	Number of factories.
(1)	(2)	(3)
20—21	Manufacture of food products	189
22	Manufacture of beverages, tobacco and tobacco products ..	20
23	Manufacture of cotton textiles	3
24	Manufacture of wool, silk and synthetic fibre textiles	6
25	Manufacture of jute, hemp and mesta textiles	..
26	Manufacture of textile products (including weaving apparel other than foot-wear).	14
27	Manufacture of wood and wood products, furniture and fixtures ..	"

Industry group.	Description.	Number of factories.
(1)	(2)	(3)
28	Manufacture of paper and paper products and printing, publishing and allied industries.	30
29	Manufacture of leather and leather and fur products (except repair) ..	..
30	Manufacture of rubber, plastic, petroleum and coal products ..	6
31	Manufacture of chemicals and chemical products (except products of petroleum and coal).	16
32	Manufacture of non-metallic mineral products	2
33	Basic metal and alloy industries	18
34	Manufacture of metal products and parts except machinery and transport equipments.	8
35	Manufacture of machinery, machine tools and parts except electrical machinery.	5
37	Manufacture of transport equipments and parts	3
38	Other manufacturing industries	4
39	Repair services	20
40	Electricity	1
		346

The principal characteristics of all the industries in Thanjavur district, with their percentage contribution to the overall industrial sector of Tamil Nadu during the year 1977-78, are reproduced hereunder :—

Serial number.	Principal characteristics.	Number.	Rupees in lakhs.	Percentage of State's share.
(1)	(2)	(3)	(4)	(5)
1	Factories	346		4.08
2	Fixed capital	..	1,557	1.08
3	Productive capital	..	2,230	1.10
4	Employees	15,164	..	2.16
5	Emoluments	..	407	1.97
6	Output	..	4,980	1.21
7	Value added	..	689	0.84

Thanjavur has been from early days a flourishing centre of cottage industries and handicrafts alike. Handloom silk and cotton saris of the district are renowned and still cherished. Next to handloom comes mat industry. Mats made of korai, srew pine, palm and coconut leaves are much in demand. The mat weaving is spread over a number of places, but the superior varieties of mats are made in Chakkarapalli, Pakkirthaikkal and Mudukkur. Ornamental fans are made out of palmyra leaves; they are artistically painted and decorated with gold foils and silk threads. The district is also famous for a wide range of utility and decorative articles like Thanjavur bell metal plates, bronze images, bowls, napkin and powder boxes, etc., made of copper and brass with inlaying and engraving work of motifs drawn from Hindu mythology done in silver, etc., known as Tanjore swami work. Chief centres of metal work are Kumbakonam, Nachiarkoil, Kivalur and Kariamangalam. The district is equally well known for its pith articles consisting of beautiful models of Hindu idols, temples, mosques, flower garlands, bouquets, parrots and peacocks. The flower garlands and bouquets are much in demand during Christmas days. Pith is grown on the beds of tanks in the Sirkazhi, Mannargudi, Mayuram and Thanjavur taluks. The making of musical instruments of jack wood like the veena, the tambura, the violin the mridangam, the table and the Kanjara exhibit excellent taste, knowledge and workmanship. The jack wood has special quality for producing musical sounds.

Thanjavur, Kumbakonam and Thiruvavur are known places for the manufacture of musical instruments.

Handloom industry occupies an important place in the economy of Thanjavur district as it provides livelihood to more than 72,000 people in the district. The number of handlooms has increased substantially during the recent years and in 1981, it is reported that the number of looms in Thanjavur district stood at 12,110. Of these, about 54 per cent are in the Co-operative fold and the rest are in the private sector. Handloom goods, worth more than four crores are marketed through Co-optex units annually.

The district even today stands foremost in the varieties of the handloom fabrics woven in silk, cotton and lace in the designs of the patterns and the artistic workmanship exhibited. Silk weaving is mainly carried on in Thanjavur, Kumbakonam and Koranad. The well known pure silk saris of Koranad known as 'Kattadi' saris with decorative lace borders and squares in the body are now gradually being replaced by cheap pattern of saris manufactured out of a mixture of cotton and silk fabrics. The indigenous dyes well-known for fast, sober and pleasing colours have also given place to cheap, gaudy foreign dyes.

The Government of Tamil Nadu extends liberal financial and technical support to promote the industry under various schemes. Special efforts have also been taken to introduce new designs of cloth and for this purpose a design centre has been opened. With a view to improve the conditions of the weavers, various welfare measures have also been initiated by the State Government like housing schemes, introduction of group insurance, etc.

The Government has also established two industrial training institutes one at Nagappattinam and the other at Thanjavur to foster and promote small scale industries in this district. Further, the State Industries Promotion Corporation of Tamil Nadu Limited (SIPCOT) was set up in 1971 as a public limited company wholly owned by the Government of Tamil Nadu with the object of developing medium and major industries in the backward and under developed districts of the state. The District Industries Centre (D.I.C.) also known as Vigorous Extension Agencies were started in 1978 under the National Policy of directing concerted efforts to promote the development of cottage, rural and small scale industries by ensuring the supply of inputs besides arranging for marketing the finished products. Resuscitating traditional arts and crafts through offering timely financial support is also an important object of the District Industries Centres.

Trade and Commerce.—The trade of the district mainly consists of the export of rice, fish, handloom cloth, silk and cotton saris, metal work and handicraft goods already mentioned in the preceding paragraphs. The import items chiefly consist of silk and cotton yarn, brass sheets, copper, timber and other consumer goods. The trade is carried on both by rail and road. The figures of the export and import are however not available.

So far as the sea-borne trade is concerned, most of the exports and imports pass through the port of Nagappattinam and only a very small amount of the trade is carried on at the other ports. The trade of Nagappattinam is not exclusively the trade of Thanjavur alone but includes nearby districts also which are connected by rail and road. As per the Annual Statistical Abstract of Tamil Nadu year 1979-80 issued by Commissioner of Statistics, the quantum of foreign trade through the port of Nagappattinam during the year 1978-79 was of the order of Rs. 1,078 lakhs of which Rs. 304 and 774 lakhs were imports and exports respectively. The following statement shows the number of steamers and sailing vessels entered and cleared during the year 1979-80 at Nagappattinam port:—

In ballast from foreign countries.		In ballast to foreign countries.	
Number of vessels handled.	Discharged in tonnes.	Number of vessels handled.	Loaded in tonnes.
(1)	(2)	(3)	(4)
65	25,850.8	15	29,909.9

To help the trade and commercial establishments, there were in all 227 banks functioning in various parts of the district during 1980-81. Five Private Joint Stock registered companies were also operating in the district during 1981.

Transport and Communications.—There is neither any national highways passing through the district nor it is directly linked with the State capital by air. The nearest airport is at Tiruchirappalli at a distance of 65 km. Thanjavur town is however an important metre-gauge railway junction and is not linked with any broad gauge railway line so far. The metre-gauge rail links it direct with Madras and other neighbouring towns in the State served by the metre-gauge line. As per the District Statistical Handbook of Thanjavur for the year 1980-81 issued by the Department of Statistics, Tamil Nadu, there are in all 96 railway stations with a net-work of 375 kms. of railway line in the district.

The district has a good net-work of roads extending to 22,486 kms. The following statement from the Annual Statistical Abstract of Tamil Nadu for the year 1979-80 issued by Commissioner of Statistics shows the length of roads in kms. in the district managed by various agencies :—

Serial number and managed by. (1)	Length of roads in Kms.		
	Surfaced. (2)	Unsurfaced. (3)	Total. (4)
1 Central Government	46	9	55
2 State Government	3,378	1,378	4,756
3 Corporation and Municipalities	414	99	513
4 Panchayat and Panchayat Unions	1,675	4,244	5,919
5 Other authorities	5,513	5,730	11,243
Total	11,026	11,460	22,486

There are about 194 registered motor transport undertakings in the district. The Cholan Roadways Corporation service with headquarters at Kumbakonam with a fleet strength of 785 buses during 1981-82 was, however, operating throughout the district. It has been estimated that there were in all 118 city and town services against 398 mullassil ordinary services. 'Operational and performance Statistics for December 1980, issued by Managing Director of Thiruvalluvar Transport Corporation Ltd., Madras, also shows that the Corporation is operating a fleet of 23 buses in the district with 20 buses scheduled to cover seven routes and a total route length of 2,313 km. on an average doing 40 single trips per day. Besides, the Corporation is also plying four schedule buses on two inter-State routes covering a route length of 734 kms. with 8 single trips per day.

The Annual Statistical Abstract of Tamil Nadu (1979-80) further shows that during the year the following 3,365 registered transport and 7,206 non-transport vehicles were operating in the district :—

Transport vehicles.		Non-transport vehicles.	
Type. (1)	Number. (2)	Type. (3)	Number. (4)
State carriages	744	Motor cycles, scooters and mopeds	4,752
Auto-rickshaws	27	Carts	1,690
Taxi	174	Station wagons and jeeps	139
Luxury coaches, Omni buses, etc.	12	Goods vehicles (L.M.V.)	103
Goods vehicles	642	Tractors	467
Tractors	882	Others	55
Others	884		

Through the port of Nagappattinam, however, passengers either to Malaysia or from Malaysia have been reported. During the year 1979-80, the passengers disembarked were of the order of 3,884 against 2,959 passengers embarked.

The district has fairly a good number of post and telegraph offices functioning in its entire length and breadth. The District Statistical Handbook of Thanjavur for the year 1980-81 provides a list of the Communicational facilities available in the district as on 31st March 1981. According to the details provided, there are in all 359 departmental post and telegraph offices against 722 extra-departmental post offices. In addition, there are 266 telegraph offices. The total number of post boxes and letter boxes in the district stand at 351 and 6,266 respectively. The total number of telephones operating in the district stand at 8,714. There are 446 telephone booths available for public calls.

Major Social, Cultural and Political events.—All important social, cultural and political events which occurred in the district during the decade 1972-81 have been briefly mentioned in the sub-joined paragraphs :—

1973—On 17th and 18th April 'Indira Vizha' was celebrated at Poombuhar.

1975—20th March witnessed the bifurcation of Nagappattinam taluk into two independent taluks namely Nagappattinam and Thiruvaur; the latter was a sub-taluk of the undivided taluk. On the same date, Peravurani an independent sub-taluk was upgraded into full fledged taluk.

1976—State Assembly was dissolved on 31st January and President's rule was imposed.

1977—General elections to the State Assembly were held on 19th June.

During 3rd and 4th week of October and 3rd week of November, the district was lashed with heavy rains and floods submerging Kuruvai paddy lands (about 83,000 hectares), banana plantations, etc., and rendering thousands of people homeless. A cyclonic storm with a wind velocity exceeding 100 kms. per hour accompanied by heavy rains raged the district from 9th to 12th November damaging railway property, collapsing thousands of houses and killing a number of persons, poultry and animals. The damage done by the cyclone was estimated to be more than Rs. 100 crores.

1978—An agricultural census was conducted in the district. The year was remarkable for opening of a women's college at Nagappattinam. During November, the district faced floods and heavy rains.

1979—10th July marked the bifurcation of Thanjavur taluk into Thanjavur and Thiruvaiyaru (a former sub-taluk of the same taluk) taluks. On the same date, Tiruthuraiipundi taluk was bifurcated into Tiruthuraiipundi and Vedaranniyam taluks; the latter was an independent sub-taluk till date. Tiruvaidaimarudur sub-taluk was also upgraded into a full fledged taluk on 15th July.

1980—On 16th February there was a total Solar eclipse. 17th February witnessed the dissolution of State Assembly and declaration of President's rule. Mahamaham at Kumbakonam was held on 1st March followed by Kumbabishegam of Big temple at Thanjavur on 3rd April. The year can also be singled out for the revival of Theppam festival in Kodavasal after a period of 21 years. Elections to State Assembly were held on 28th and 31st of May.

Places of Religious and Historical importance and Tourist interest.—The Cholas of Thanjavur (9th to 12th century) were not only great conquerors but also mighty builders, who erected a large number of temples in their empire, some of which constitute the finest historical monuments and specimens of South Indian architecture. Although they inherited the traditional architectural skills of the Pallavas, yet the edifices erected during their time reflect the unique glory and genius of their authors. Koccengen, Aditya I, Rajaraja I, Rajendra are some of the well known Chola rulers who showed a keen zeal in the religious sphere and have left lasting monuments of their greatness to posterity. They encouraged fine arts in the service of these temples like the sculpture, painting, wood carving, music and dance. The sculptures, the paintings and the inscriptions in the passages of the sanctums in elegant Chola Grantha and Tamil letters portray to what extent the great arts had flourished especially under Rajaraja I (985-1014). 'With a colossal effort, paralleled only by the ancient Egyptian kings, he built the most magnificent temple of Rajarajeswara at Thanjavur, the finest specimen of Tamil architecture'. The temple is remarkable for its stupendous proportions and bold simplicity of design and continues to remain a historical monument of glory and a spiritual solace.

It has been estimated that during 1981, there were in all 5,939 temples in the district, out of which 4,670 are under the management of Hindu Religious and Charitable Endowments Board. The following statement shows the classification of the temples by presiding deities :—

Serial number. (1)	Name of deities. (2)	Number of temples. (3)
1	Vinayagar	957
2	Murugan	149
3	Siva	1,125
4	Vishnu	1,051
5	Village goddesses	2,332
6	Others	325
	Total	5,939

There are numerous shrines of religious and historical importance in the district. Among these, some selected ancient temples are briefly described in the sub-joined paragraphs.

Sri Adikumbeswaraswamy temple is an ancient shrine of all India importance at Kumbakonam. Kumbakonam was the capital of Chola kings in 7th century A.D. and is a well known pilgrim centre for both Saivites and Vaishnavites. The presiding deity of this temple is Lord Adi Kumbeswara and his consort is Sri Mangalambigai. The temple was in existence even in

the 7th century A.D. It was built by a Chola King and the temple building itself would seem to have been extended and improved by the Nayak rulers. The temple, covers an area of more than 4 acres and bears stone inscriptions. Lord Kumbeswara is a Swayambu lingam; Sri Mangalambigai is in standing pose. On a single block of stone in the Navarathri Mandapam all the twenty-seven stars and twelve 'Rasis' have been carved out. Of the festivals celebrated almost every month, the Makham festival in the month of Masi (February—March) is the most important. Once in 12 years the Mahamakham festival is celebrated when lakhs of pilgrims from far and wide worship in full reverence and take a bath in the holy Theertham, the Mahamakham tank. The temple is managed by a Board of three honorary trustees and a paid Executive Officer appointed under the provisions of a scheme of administration settled by the Hindu Religious and Charitable Endowments Board.

The ancient shrine of *Sri Sarangapaniswamy* at Kumbakonam is dedicated to Lord Vishnu and was built more than a thousand years ago. Sri Sarangapaniswamy, Aravamudhan and Sri Komalavalli Thayar are the presiding deities of the temple. The shrine of the Lord has been designed to look like a chariot with wheels and horses. The temple covers an area of over three acres and has a pagoda and two prakaras. The Chithirai and Thai Brahmothsavams, Vasantha Uthsavam, Pavithra Uthsavam, Navarathri, Margazhi Adhyayana Uthsavam and the floating festival in the month of Panguni are the regular festivals, observed every year, of which the Chithirai and Thai Brahmothsavam are the most important; these attract thousands of devotees from the neighbouring villages and towns. The temple is managed by a Board of five trustees and an Executive Officer, appointed by the Hindu Religious and Charitable Endowments Board.

The *Brihadiswarar temple* at Thanjavur known as the Big temple is the most ambitious of the architectural enterprises of the Cholas and is a fitting symbol of the magnificent achievements of Rajaraja. True to his surname 'Sivapadasekhara' Rajaraja spared nothing for embellishing and endowing the great temple. The temple has been constructed of granite, mostly of large blocks. It was a colossal task, the plinth of the central shrine is 45.72 sq. m. and the shrine proper 30.48 sq. m. The most striking feature of this shrine is its imposing Vimanam, which rises perpendicularly from a square base to a height of 60.96m. The stone constituting the huge 'Sikhara' is said to weigh 81.28 tonnes and was raised to its present height by being dragged on an inclined plane of 6.44 km. length. The big Nandhi made of a single stone is about 2m. high, 6m in length and 2.5m in width and weighs roughly 20 tonnes. The presiding deity is 7m. high. The priests have to mount up a ladder for archana and abhishekam. The Rajaraja being a great warrior and conqueror, glorified the theme of Tripuvartaka, the mighty warrior god. In the sanctum by the side of the mighty lingam is the copper idol of His consort. There is a separate sanctum for the consort Sri Brihannayaki. The Subramanya temple in the outer prakaram, built by the Nayak rulers is an example of delicate but brilliant carvings. The sculptural decoration of the tower is very pleasing to look at. To the south of the shrine of Sri Brihannayaki is the sanctum of Sri Natarajar and Sri Sivakamasundari; both the idols are made of copper. The highest achievement in plastic art in the Chola period is revealed in the fine series of the one hundred and eight dance poses carved all around the inner walls of the first floor of the temple. These form an invaluable document in the history of Indian art. The important festivals that are celebrated in the temple are the Brahmothsavam in Chithirai, Sivarathri, Arudhara Darshanam, Thai Poosam, Masi Magham, Skanda Shasti, Panguni Uthiram and Vinayaga Chathurthi. The temple is under the administration of the Tanjore palace Devasthanam. The hereditary Trustee is assisted in the administration by the Treasurer and Manager appointed by the Hindu Religious and Charitable Endowments Department, Government of Madras.

The ancient temple of *Sri Mayuranathaswamy* is situated at Mayuram, a town deriving its name from this renowned temple. The presiding deity is a Swayambu Lingam with consort known as Abhayapradhambikai, Adhayambikai, Anjalanayaki, Anjalai, etc. meaning one who gave refuge to the pea-hen... The inspiring temple measures 719' x 52' and has a nine-storeyed imposing gopuram, 164 ft. high on the eastern entrance. The ancient temple is said to have been built during the period of the famous Chola kings. Some renovations were done to the temple about 400 years ago. There are many small shrines here of which three are dedicated to Sri Vinayagar, one for Lord Natarajar and the rest to other deities. Navarathri, Adi Pooram, Avani Moolam, Karthigai, Skandha Sashti, Thula Uthsavam in Ayyappasi and the Vaikasi Brahmothsavam are the regular annual festivals celebrated attracting thousands and thousands of pilgrims. The affairs of the temple are managed by the head of the Thiruvaduthurai Adheenam who is the hereditary Trustee of the temple.

Sri Swaminathaswamy temple is built on an artificial hillock about sixty feet high in Swaminalai, the renowned place of pilgrimage in South India. This ancient shrine is said to have been built by the famous king Kartha Veerarijuna. The main shrine is a specimen of old architecture while the rest are by recent renovations. The hill temple is provided with a flight of sixty steps. The presiding deities are the life-style images of Muruga and Siva, the former imparting the divine message to the latter. Sri Swaminathaswamy is represented by a six feet high granite icon in a standing posture offering a spectacular view to devotees. In the ground floor of the temple, there are separate shrines dedicated to Sri Sundareswarar and goddess Meenakshi. Of

the major festivals, mention may be made of the six day Skandha Sashti, Valli Kalyanam and the ten day Thirukkarthigai which attract thousands of devotees. The affairs of the temple are managed by an Executive Officer and a Board of Trustees consisting of five members, all appointed by the Hindu Religious and Charitable Endowments Department.

Sri Thyagarajaswamy temple in Thiruvavur dedicated to Lord Siva, dates back to pre-historic days. Of all the temples in Thanjavur district, it is the second biggest shrine after the Brihadiswarar shrine at Thanjavur. As Sri Sambandar and Appar have sung about the deity, this temple can be presumed to be in existence even in the 7th century A.D. This is one of the 'Pancha Bootha' (five elements) 'Sthalams' and is famous as the seat of the 'Prithvi' (earth) Lingam. The three giants of carnatic music namely Sri Thyagaraja, Sri Syama Sastry and Sri Muthuswami Deekshitar were all born at Thiruvavur where they spent their early life. This is one of the well known shrines of South India and covers an area of 30 acres. The main structure consists of a pagoda, three prakarams, 1,008 stone pillars, four sanctums and six mandapas. Sri Thyagarajaswamy and His consort Sri Kamalambal, Sri Varmiganathar with His consort Nilothpalambal are the principal deities of the temple. The Moolavar, Sri Vanmikanathar is a Swayambu Lingam. The Brahmothsavam in Panguni and the Adi Pooram are the two important festivals celebrated annually which attract more than 50,000 devotees from far and near. This is one of the temples attached to the Dharmapuri Adheenam. The Head of this mutt is the hereditary trustee of the temple. The day-to-day affairs are managed by an Executive Officer appointed by the Hindu Religious and Charitable Endowments Board.

Sri Navaneetheswarar temple is in Sikkil, a railway station on the Thanjavur-Nagore line and on the bus route from Thiruvavur to Nagappattinam. As Sambandar has sung in praise of Sri Navaneetheswarar, the temple can be presumed to be in existence since the 7th Century A.D. The temple was in a state of ruin towards the close of the last century and Sri Alagappa Chettiar of Thekkur of Ramnad district renovated it. There are eight stone inscriptions in the temple. Though the presiding deity is Navaneetheswarar, the temple is more widely known as one of the seats of Lord Subrahmanya who is known as Singaravelavar; He is the processional deity. There are numerous other deities including a Perumal who is installed in a separate sanctum. His name is Kola Vamanar. The temple covers an area of about 2 acres and maintains an orphanage where poor orphans are fed, clothed and educated free of cost. A small hospital is also maintained for the benefit of those in the orphanage. Apart from Skanda Sashti, the other main festival is Brahmothsavam in Chithirai, which attracts thousands of devotees. The temple is managed by an Executive Officer and three trustees.

Sri Rajagopalaswamy temple was constructed in the 12th century but the sanctum is believed to have been in existence earlier. The place is known as South Dwarka and Lord Krishna gave dharsan to two devotees, Gopalarayar and Gopilar. Lord Krishna is said to have enacted before them all His 32 exploits from his birth to his becoming a charioteer of Arjuna. A Naik King of Thanjavur made extensive additions. It is one of the important Thengalai Vaishnavite shrines in South India, adopting Pancharatragama. There are two sub-temples attached to the main temple, viz. Sri Gopralaya and Sri Lakshminarayana Perumal temple. The temple celebrates a number of festivals annually, of which the most important ones are Adipooram for 10 days, Ahayana Uthsavam for 20 days in Margazhi, Brahmothsavam for a period of 25 days during the months of Panguni and Chithirai and the floating festival in the month of Ani. These festivals attract a large number of devotees from the adjoining villages, towns and districts. An Executive Officer and a Board of trustees appointed by the Hindu Religious and Charitable Endowments Board manage the affairs of the temple.

Sri Vedaranyaswamy temple dedicated the Lord Siva in Vedaranniyam was renovated by the Chola Rulers. Since both Appar and Sambandar have worshipped the Lord here, the temple should have been in existence prior to 7th century A.D. Sri Vedaranyaeswarar and His consort Sri Vedanayaki Amman are the presiding deities of the temple. It covers an area of 6 acres and has some 90 stone inscriptions. The temple is fashioned like the Thiruvavur temple and has two prakaras and a tower. There are three mandapas in the temple precincts. The regular annual festivals observed in the temple are Brahmothsavam, 18 days theerthavari festival during Masi-makham, Mahasivarathri, Panguni Uthiram, Wedding of the Lord and His consort on the Sukla Saptami day, Skandasashti (Surasamharum), Karthigai Deepam, Dhanur Pooja (Thiruvathirai), Poosam and Pongal. Of these, the 'Thirukalyana Utsavam' during the month of Chithirai is the most important one, which attracts a large congregation of devotees from the neighbouring villages, taluks and districts. An Executive Officer and a single hereditary trustee appointed by the Hindu Religious and Charitable Endowments Board are managing the affairs of the temple.

The district is also famous for a few Muslim shrines which are thronged by thousands of devotees who come in full faith to evoke the blessings of the saints entombed there. One such shrine where Saint Sheikh Alauddin Sahib is entombed is located at Airampattinam, a small port lying about 13 kms. south-east of Pattukkottai. The annual Kandoori festival is held at the

tomb and is largely attended to. Two famous 'dargas' situated in the village of Sambavanodai attract annually thousands of Muslims from all over the State. The most renowned of all these is the 'darga' at Nagore of Saint Shah-Ul-Hamid popularly known as Miran Sahib who was also honoured by the rulers of Thanjavur. The Saint was born about 500 years ago at a place known as Manikapore. He is said to have possessed miraculous spiritual powers. In Autumn every year, the annual Kandoori festival is celebrated to Commemorate the 10th day of his death anniversary. On the occasion, thousands of devotees visit the 'darga' in full reverence and evoke the blessings of the Saint for getting their vows and wishes fulfilled. The devotees include a good number of persons following other faiths.

A famous Roman Catholic pilgrim centre is located at Velankanni, six miles south of Nagapattinam. The church here dedicated to 'Our Lady of Health' draws thousands of pilgrims including people of other faiths also. The annual festival is held in the first week of September and continues till 8th September, the day of Saint Mary's birthday. Pilgrims mostly catholic christians from all over India throng the place to complete their vows and seek holy blessing. Among other things, the church maintains a museum which is worth visiting due to a number of rare gift articles mostly in silver and other presentations offered to the Lady of Health by the devotees in lieu of getting cured of their diseases or having got the fulfilment of their cherished wishes and desires. Other famous churches in the district are at Tranquebar town known as the Jesurulam church, the Zion church and the church of Our Lady of Rosery.

Apart from the selected religious places of historical importance out-lined in the preceding paragraphs, other places of interest for the tourists are Saraswathy Mahal library and Art gallery, Sangeetha Mahal, Bird and wild life Sanctuary at Point Calimere, Manora fort and a visit to Thiruvaiyaru, Kaveripattinam, Thiruvavur and Mayuram. In the following paragraphs, an attempt is made to briefly describe the attraction of each of these places hold for the tourist.

The Sarabhoji Maharaja palace in Thanjavur is a vast building of architectural grandeur built partly by the Nayaks around 1,550 A.D. and partly by the Marathas. It is a grand pile of buildings with huge corridors and spacious halls. The palace houses the Saraswathi Mahal library, which has rare collection of ancient books and manuscripts on a variety of subjects in Sanskrit, Tamil, Telugu, Marathi and other European languages. Among other books, library is famous for 10,000 priceless rare collection of palm leaf and paper manuscripts. In all there are more than 30,000 manuscripts in the library. The two Durbar halls and their surrounding portions of the Mahal now house the Thanjavur Arts Gallery which was inaugurated in 1951. The arts gallery contains a good collection of granite and bronze images and stone sculptures which provide an insight into the rich cultural and historical heritage of Thanjavur especially of Chola period. In the palace, another place worth seeing is the Sangeetha Mahal, an acoustically perfect music hall. It is a striking example of the engineering skill of its ancient builders.

Point Calimere, an important tourist place and a heaven for bird-watchers, is situated in Tirutturaippundi taluk about 120 kms. from Thanjavur and is the northern point of the Palks bay. The sanctuary here is noted for its incredible congregation of black bucks, spotted deer, wild pig, wild ponies and heavy concentration of migratory waterfowl. Twenty to thirty thousands of flamingoes can be seen here at one time during the winter months. During spring when the trees and shrubs are laden with wild fruits, thousands of birds like the green pigeons, mynas, barbets etc. can be seen. A bath in the sea at Kodikkarai, a sacred place nearby, is considered holy especially on the new moon day of Thai, Adi and Purattasi.

Manora fort is located in the village of Sethubaba Chettiram on the eastern coast 16 kms. off Peravurani. The fort facing the Bay of Bengal is an eight storeyed victory tower built by the Maharaja Serfoji, the then ruler of Thanjavur, in 1814 to commemorate the victory of the British over Napoleon Bonaparte in the war of Waterloo. The tower has steps in a circular way which look enchanting and one can have a panoramic view of the green surroundings and the sea from this 30 metres high tower. This place is presently under the care of the Central Archaeological Department as a protected monument. Of late, it has become a picnic spot and people do come to enjoy their week-ends here.

Thiruvaiyaru in Tamil means five holy rivers and this town derives its name by virtue of the five branches of the holy Cauvery which flow within a distance of 8 kms. of the town. The name of the five branches are Vadararu, Vennaru, Vettaru, Kudamurutti and Cauvery. The town is considered to be as holy as Banaras and it is a common belief that to die here is an eternal blessing leading to salvation. The temple of Panchandiswara in the town is considered as the Chief among the seven shrines called Sapthasthalam. The place is also known after several well known musicians and composers. The great saint and singer Thyagaraja lived and died here and the annual festival at his 'samadhi' on the bank of the river is well known and is attended to by all the celebrated musicians of the State.

Kaveripoompattinam, known in classics as Poompuhar, was one of the chief cities and an important sea-ports of the Chola Kingdom. The original city port was submerged in the sea and at present there is only a small village. It is a sacred bathing place, being the confluence of the Mother Cauvery with the sea. The place is also the birth place of Saint Pattinathar, the poet and Kovalan and Kannagi. The temple of Pallavaneeswara immortalised by the saint Sambandar is situated here. It is a sight for such tourists who would like to wander amidst history. The ancient glory of the place has been reviewed to some extent by the Government of Tamil Nadu and it has been made a place of tourist importance. An art gallery depicting scenes from the Tamil Epic, Silapathigaram of Kannagi and Kovalan, was opened in 1972. Monuments on the Nedungal Mandram, the Pavai Mandram, the Elango Mandram and the Kotrappandal are also at display.

Thiruvavur is a place for the musical Trinity and most of the South Indian musicians are connected with it in one way or the other. The place is famous for the manufacturing of musical instruments and wood-work. The wooden car of Thiruvavur is the biggest of all the temple cars in the State. Historic importance of Thiruvavur lies in the legend of Manu Chola's just judgement of death on his only son, for killing a calf by driving his chariot over the calf. The whole legend has been immortalised by sculpturing it on the south-east portion of the Siva temple and is an interesting sight for the visitors. This is now treated as one of the protected monuments.

Mayuram is an important pilgrim centre. Mayuram means a pea-hen and the legend say that Lord Siva turned His consort Parvati into a pea-hen because of her disobedience. She was blessed with her original form only after repentance, when she worshipped and bathed in the Mayilamman tank. Pilgrims from all parts of the State congregate at the annual Thula festival in October-November. On the occasion, the holy Ganges is believed to mingle here with Mother Cauvery and a dip in these waters is believed to purge off the sins of devotees. The festival is popularly known as 'Kudamuzhukku Vizha'.

TABLE 2.—PROPORTION OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES.

Serial number and name of taluk.	Total population of inhabited villages, in the taluk.	Proportion of rural population served by the amenity of							
		Education.	Medical.	Drinking water.	Post and Telegraph.	Market hat.	Communi- cations.	Approach by pucca road.	Power supply.

District Total	3,126,588	3,045,555 (97.40)	1,119,754 (35.81)	3,126,588 (100.00)	2,461,480 (78.72)	225,549 (7.21)	2,532,990 (81.01)	2,652,067 (84.82)	3,044,981 (97.38)

Table 2.—This table furnishes the proportion of rural population of inhabited villages served by different amenities. The total population of the inhabited villages in the district is 3,126,588. It is noteworthy that the entire population of the district avail the amenity of drinking water to cent per cent. The amenities of education and power supply are available to 97.40 per cent and 97.38 per cent of the total population, respectively, viz., educational facilities are available to 3,045,555 persons and power supply is available to 3,044,981 persons. The amenity of pucca road is available to 84.82 per cent of the total population of the district or 2,652,067 persons. Communication facilities are available to 81.01 per cent of the people in the district and Post and Telegraph to 78.72 per cent of the population or 2,461,480 persons. Medical facilities in the district are available only to 35.81 per cent of the people, viz., 1,119,754 persons. The market/hat facilities are available to 7.21 per cent of a total rural population which is the lowest of all the amenities available to the people in the district.

TABLE 3.—DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE.

Table 3.—This table furnishes the distribution of villages not having certain amenities, arranged by distance ranges from the places where such facilities are available. There are 1,728 inhabited villages in the district of which the facility of education is not available for 141 villages in the respective village itself. But it is available at a distance of less than 5 kms for 123 villages, at 5-10 kms. for 17 villages and for one village at 10+kms. Similarly 1,323 villages avail the medical facility at different distances, viz. 869 villages at a distance of less than 5 kms., 412 at 5-10 kms. and 42 villages at 10+kms. Only the remaining 405 villages avail the amenity of medical in the respective villages itself. It is noteworthy that all the inhabited villages in this district avail the facility of drinking water in their villages itself. Regarding the post and telegraph facilities, for 539 villages the amenity is available at a distance of less than 5 kms. at 5-10 kms. for 84 villages and at 10+kms. for 6 villages. The market/hat facility, which is lacking in 1,662 villages in this district out of the total 1,728 villages, is available at a distance of less than 5 kms. for 643 villages, at 5-10 kms. for 534 villages and at 10+kms. for 485 villages. The amenity of communication is available for 425 villages at a distance of less than 5 kms., for 58 villages at 5-10 kms. and for one village at a distance of 10+kms. All the remaining villages avail this amenity in their respective villages itself.

TABLE 4.—DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST TOWN AND AVAILABILITY OF DIFFERENT AMENITIES.

Distance range from the nearest town (in kms.).	Number of inhabited villages in each range.	Number (with percentage) of villages having the amenity of							Power supply.
		Education.	Medical.	Drinking water.	Post and Telegraph.	Market/hat.	Communications.	Approach by pucca road.

Table 4.—This table furnishes the distribution of inhabited villages according to the distance from the nearest town and availability of different amenities. Among the total inhabited villages of 1,728 in the district, 338 villages which are located in the distance range of 0-5 kms. from the nearest town, avail the amenity of drinking water to 100.00 per cent; power supply 98.52 per cent; education 88.79 per cent; pucca road facility 80.47 per cent; communications 71.89 per cent; post and telegraph facility 67.46 per cent. The amenities of medical and market/hat are availed by a low percentage of 17.46 and 1.78 respectively. In the distance range of 6-15 kms., out of 920 inhabited villages, the amenities of education and power supply are availed by 865 and 880 villages respectively. It is noteworthy that all the villages in this range have got the amenity of drinking water. Communication and pucca road facilities are availed by 72.39 per cent and 77.83 per cent of the villages; 63.91 per cent of villages avail post and telegraph facilities; the lowest of all the amenities in this range are only medical and market/hat which are recorded as 25.11 per cent and 4.78 per cent of the villages respectively. There are 470 inhabited villages in the distance range of 16-50 kms. in this district. The amenities of education, drinking water, power supply, communications and pucca road are availed by 89.79 per cent, 100.00 per cent, 71.28 per cent and 77.45 per cent of the villages respectively. The lowest percentage is found only in the amenities of medical and market/hat facility as found in the other two ranges.

43

TABLE 5.—DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE.

Population range.	Number of inhabited villages in each range.	Number (with percentage) of villages having the amenity of							
		Education.	Medical.	Drinking water.	Post and telegraph.	Market/ hat.	Communi- cations.	Approach by pucca road.	Power supply.
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
—499	153	69 (45.10)	7 (4.58)	153 (100.00)	22 (14.38)	4 (2.61)	78 (50.98)	92 (60.13)	139 (90.85)
500—1,999	1,043	986 (94.53)	174 (16.68)	1,043 (100.00)	582 (55.80)	11 (1.05)	694 (66.54)	763 (73.15)	1,019 (97.70)
2,000—4,999	469	469 (100.00)	177 (3,774)	469 (100.00)	432 (92.11)	37 (7.89)	411 (87.63)	434 (92.54)	456 (97.23)
5,000+	63	63 (100.00)	47 (74.60)	63 (100.00)	63 (100.00)	14 (22.22)	61 (96.83)	63 (100.00)	62 (98.41)
Total	1,728	1,587 (91.84)	405 (23.44)	1,728 (100.00)	1,099 (63.60)	66 (3.82)	1,244 (71.99)	1,352 (78.24)	1,676 (96.99)

Table 5.—This table shows the distribution of inhabited villages according to different population ranges and amenities available. Among the four categories of population ranges, 153 inhabited villages come under population range of—499 and among these, 69 villages avail the amenity of education, 78 villages avail the communication facility and 92 villages avail the pucca road facility. All the 153 villages in this range avail the drinking water facility as also power supply is available to 139 villages. The amenities of medical, post and telegraph and market/hat in this range are availed by only 7, 22 and 4 villages respectively. There are 1,043 villages come under the population range of 500—1,999 out of the total inhabited villages of 1,728 in the district. Only the amenities of power supply, drinking water and education are availed by a maximum number of villages in this category viz., 97.70 per cent, 100.00 per cent, and 94.53 per cent of villages respectively. In the population range of 2,000—4,999, there are 469 villages and all these villages avail the amenities of education and drinking water to cent per cent. Power supply, post and telegraph and pucca road are availed by 97.23 per cent, 92.11 per cent and 92.54 per cent of the villages respectively. The amenities of medical, market/hat and communication in this range are availed by 47 villages, 14 villages and 61 villages respectively. 63 inhabited villages, out of the total 1,728 villages, fall under the population range of 5,000. It is noteworthy that all the 63 villages in this range avail the amenities of education, drinking water, post and telegraph and pucca road facility to cent per cent. Among the other amenities, medical is availed by 74.60 per cent, market/hat by 22.22 per cent, communications by 96.83 per cent and power supply by 98.41 per cent of the villages.

TABLE 6.—MAIN STAPLE FOOD IN THE MAJORITY OF VILLAGES IN EACH TALUK.

Serial number.	Name of Taluk.	Main Staple food.
(1)	(2)	(3)
1	Sirkazhi	Rice.
2	Mayuram	Rice.
3	Tiruvidaimarudur	Rice and Millets.
4	Kumbakonam	Rice.
5	Nannilam	Rice.
6	Papanasam	Rice.
7	Thiruvaiyaru	Rice.
8	Thanjavur	Rice.
9	Orattanadu	Rice and Millets.
10	Mannargudi	Rice.
11	Thiruvavur	Rice.
12	Nagappattinam	Rice and Millets.
13	Tirutturaippundi	Rice.
14	Vedaranniyam	Rice.
15	Pattukkottai	Rice.
16	Peravurani	Rice and Millets.

Table 6.—This table furnishes the main staple food in terms of grains consumed by the majority of the population of the villages in each taluk. There are 16 taluks in the district and only rice is used as the main staple food in 12 taluks. In the remaining 4 taluks, rice is used along with the millets as the main staple food, viz., Thiruvidaimarudur, Orattanadu, Nagappattinam and Peravurani taluks.

TABLE 7—DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE.

Serial number.	Name of Taluk.	Number of inhabited villages.	Total area.	Percentage of cultivable area to total area.	Percentage of irrigated area to total cultivable area.
(1)	(2)	(3)	(4)	(5)	(6)
1	Sirkazhi	77	40,636.71	68.89	95.29
2	Mayuram	177	69,551.77	86.04	85.73
3	Tiruvidaimarudur	83	25,167.57	81.81	79.41
4	Kumbakonam	86	25,329.41	85.81	77.51
5	Nannilam	230	76,208.65	83.91	91.79
6	Papanasam	148	56,567.15	81.40	89.07
7	Thiruvaiyaru	80	26,093.47	80.72	84.78
8	Thanjavur	85	57,596.68	75.69	72.02
9	Orattanadu	94	58,752.05	72.72	72.71
10	Mannargudi	144	75,243.56	85.13	85.70
11	Thiruvarur	88	29,676.06	82.21	91.45
12	Nagappattinam	59	29,195.15	73.70	80.23
13	Tirutturaippundi	84	54,056.25	66.71	84.46
14	Vedaranniyam	59	49,382.99	70.95	32.58
15	Pattukkottai	155	68,549.43	76.44	73.38
16	Peravurani	79	28,337.23	70.44	72.75
	Total	1,728	770,344.13	78.01	79.96

Table 7.—This table gives the distribution of inhabited villages according to land use. The total area of 1,728 inhabited villages is 770,344.13 hectares of which the percentage of the cultivable area to the total area works out to 78.01. The percentage of the irrigated area to the total cultivable area works out to 79.96. The taluks of Mayuram, Kumbakonam, Nannilam, Papanasam, Thiruvudaimarudur, Thiruvaiyaru, Mannargudi and Thiruvarur possess the maximum cultivable area to total area in the district viz., 86.04 per cent, 85.81 per cent, 83.91 per cent, 81.40 per cent, 81.81 per cent, 80.72 per cent, 85.13 per cent and 82.21 per cent respectively. Thirutturaippundi taluk has recorded the lowest percentage of the cultivable area in the district viz. 66.71. Regarding the irrigated area in the district, Sirkazhi taluk has got the highest percentage of 95.29 of irrigated area to total cultivable area. Vedaranniyam taluk records the lowest percentage of 32.58 in the district.

TABLE 8—GROWTH, DENSITY AND SEX-RATIO OF URBAN POPULATION IN THE DISTRICT IN RELATION TO THE STATE.

Census Year.	Thanjavur district.						Tamil Nadu.					
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)
	Total Population.	Urban Population.	Percentage of Urban Population.	Decadal percentage variation in Urban Population.	Density (population per sq. km.).	Sex Ratio (Number of females per 1,000 males).	Total Population.	Urban Population.	Percentage of Urban Population.	Decadal percentage variation in Urban Population.	Density (population per sq. km.).	Sex Ratio (Number of females per 1,000 males).
1951	2,774,426	569,677	20.53	..	1,986	1,026	30,119,047	7,333,525	24.35	..	..	986

	ALL TOWNS	2.84

Table 12.—This table gives the number of beds in medical institutions per 1,000 urban population in each town. The district average is 2.84 beds per 1,000 urban population. There are 25 towns in Thanjavur district, where bed facilities are available in the hospital. Out of 25 towns, three towns have higher number of beds than the district average of 2.84, the highest being 6.77 in Thanjavur Municipality.

TABLE 13.—PROPORTION OF SLUM POPULATION IN TOWNS.

Class, Name and Civic Status of the Town.*	Proportion of the slum population to total population of the town.	Density in slums (per sq. km.).
(1)	(2)	(3)
I Kumbakonam (M)	..	..
II Mannargudi (M)	10.01	28,561
II Mayuram (M)	..	..
II Nagappattinam (M)	..	..
I Thanjavur (M)	..	..

*For Class I and II towns only.

Table 13.—It can be observed from the Table 13 which furnishes the proportion of slum population in class I and II towns, that only Mannargudi Municipal Town has slums. The proportion of the slum population to the total population of the town is 10.01.

TABLE 14.—MOST IMPORTANT COMMODITY MANUFACTURED, IMPORTED AND EXPORTED IN TOWNS.

Serial number	Class	Name and Civic Status of the Town.	Most important commodity.		
			Manufactured.	Exported.	Imported.

TOWN DIRECTORY

NOTE EXPLAINING THE CODES USED IN THE TOWN DIRECTORY.

STATEMENT I & III.

Class of towns by population :

Population.	Class.
100,000 and above	I
50,000—99,999	II
20,000—49,999	III
10,000—19,999	IV
5,000—9,999	V
Below 5,000	VI

Civic administration status of the town:

M. Corp.		Municipal Corporation/Corporation.
M		Municipality.
NP		Nagar Panchayat/Town Panchayat.
GP		Gram Panchayat/Village Panchayat.
TC		Town Committee/Town Arca.
CB		Cantonment Board/Cantonment.

STATEMENT IV & IV-A.

SC		Scheduled Castes.
ST		Scheduled Tribes.

Type of road :

PR		Pucca Road.
KR		Kutchia Road.

System of sewerage :

S		Sewer.
OSD		Open surface drains.
BSD		Box surface drains.
SD		Sylik drains.
CD		Cesspool method.
Pt		Pit system.

Method of disposal of night soil :

HL		Head loads.
B		Baskets.
WB		Wheel barrows.
ST		Septic tank latrines.
S		Sewerage.

System of storage of water :

OHT		Overhead tank.
SR		Service reservoir.
IG		River infiltration gallery.
BWP		Borewell Pumping System.
PT		Pressure tank.

Source of drinking water :

TW		Tube well water/Hand pump.
T		Tap water.
W		Well water.
TK		Tank water.

STATEMENT V.

Medical facilities :

H		Hospital.
D		Dispensary.
HC		Health Centre.
FC		Family Planning Centre.
TB		T. B. Clinic.
NH		Nursing Home.
O		Others.
A		Ayurvedic.
U		Unani.
Hom		Homeopathic.

Educational facilities :

A		Arts only.
S		Science only.
AS		Arts and Science only.
C		Commerce only.
AC		Arts and Commerce only.
ASC		Combined for all categories Arts, Science and Commerce.
L		Law.

Recognised shorthand, typewriting and other vocational institutions :

SH		Shorthand.
Type		Typewriting.
SH. Type		Shorthand and Typewriting.
O		Others.

Public libraries and reading rooms :

PL		Public Libraries.
RR		Reading Rooms.
