PREFACE

The release of our first publication of 1991 Census containing provisional figures, which was made on the 26th March 1991, in just 3 weeks after the completion of census field work was received with wider appreciation by all the user agencies like the Govt. departments, research scholars and institutions and other data users. It may be recalled that in that booklet, Paper 1 of 1991—'Provisional Population Totals', we had furnished some basic tables containing population and literates by sex for state, districts and cities/urban agglomerations with population of one lakh and above. Several demographic indices of common knowledge like decadal growth rate of population, density of population, sex ratio and literacy rate were all included therein. As already indicated, these provisional population tables were compiled on the basis of the abstracts prepared by nearly 85,000 part-time Census enumerators, appointed for this purpose in Tamil Nadu and compilations made at district level very quickly.

In this supplementary booklet, we have pleasure in presenting a few additional population particulars which are also provisional in nature and which again are based on the quick summation of data from the abstracts prepared by the enumerators and charge officers. The statistics that are presented in this booklet relate to the rural/urban characteristics, extent of population residing in cities and towns of six size classes, workers and their ratio to population as also main workers divided into four prominent categories.

The following are the six provisional population tables that are presented in this volume.

- | | |
|--------------------------------|---|
| Provisional Population Table 1 | : Population and literates by residence and sex, 1991. |
| Provisional Population Table 2 | : Percentage of urban population to total population and decennial growth rate and sex ratio by residence. |
| Provisional Population Table 3 | : Population of urban agglomerations, cities and towns, 1991. |
| Provisional Population Table 4 | : Growth of urban population. |
| Provisional Population Table 5 | : Population, total workers, main workers, marginal workers and their percentage to total population in districts and urban agglomerations/cities by residence and sex, 1991. |
| Provisional Population Table 6 | : Distribution of main workers as cultivators, agricultural labourers, workers in household industry and other workers in districts and urban agglomerations/cities by residence and sex, 1991. |

In the first table, the basic data on population and literates are presented for every city, town and urban agglomeration in Tamil Nadu as also for every taluk and district. I have no doubt that the information in this table will be useful for taluk and town level planning purposes until the final census population figures are released after a year. The population of each and every city and town in Tamil Nadu (469) including those of the 34 urban agglomerations to which many of the towns are constituent units, are furnished in provisional population table 3 along with the growth rates for the last two decades and this should be helpful to the local bodies for immediate urban developmental plans.

The extent of total workers, main workers, marginal workers and their ratios and the distribution of workers by the four main categories alongwith comparative figures as at the 1981 Census are presented in the last two tables and this should be of much value for purposes of employment planning.

For making the compilation and release of this booklet with the basic population data and a few important demographic characteristics possible, particularly so soon after the Census, we must convey our grateful thanks to Shri A. R. Nanda, IAS, Registrar General, India, who had closely monitored, guided and helped us at every stage both before and after the Census operations. I also wish to record our sincere thanks for the excellent help and co-operation extended in this task by Shri N. Rama Rao, Dy. Registrar General (C & T) besides other officers of Registrar General's office involved in this work for the compilation of these tables in a correct manner.

In the preparation of these provisional population tables, the ten Regional Deputy Directors of Census Operations alongwith the technical staff deputed by me from the Directorate have rendered valuable help in the proper and timely compilation of the basic data. At the Directorate, we had to calculate a variety of ratios and other indices and also make arithmetical checks and cross-checks which involved laborious work. In this process, I have received unstinted co-operation and help from the technical staff belonging to different cadres working in the office and I wish to record my profound appreciation of the hard work put in by the officers and staff who assisted me in this project. I must acknowledge also the excellent work done by the staff of cartography section of my office for the eye-catching maps and charts included in this volume. With the release of this booklet, the release of the provisional population tables of 1991 Census based on quick abstracts made after census, is over. The data users are well aware that the final population data of 1991 Census will be released in batches through a variety of publications probably commencing from next year, after the primary processing and compilation of what is called PCA or 'Primary Census Abstract' is completed in the Regional Offices.

I am sure the provisional population particulars released so far by us in this supplement and the earlier booklet will be very useful to all data using agencies until the final figures are brought out.

CHAPTER 1

INTRODUCTION

Soon after the completion of the 1991 Census enumeration all over India, in the first week of March, 1991, the total population and literate population with sex break-up as revealed in the census in each district and city/UA having more than one lakh of population have been provisionally compiled from the records and released as 'Paper 1 of 1991—Provisional Population Totals' on 25th March, 1991 for India and States/Union Territories at New Delhi by the Registrar General, India and on 26th for the State and the districts at Madras by the Director of Census Operations. The present volume, which is entitled "Supplement to Paper 1 of 1991—Provisional Population Totals" contains the following additional tables.

1. Provisional Population Table 1—Population and literates by residence and sex, 1991—State, district, taluk, urban agglomeration, city/town level for total, rural and urban areas separately.
2. Provisional Population Table 2—Percentage of urban population to total population and decennial growth rate and sex ratio by residence.
3. Provisional Population Table 3—Population of urban agglomerations, cities and towns, 1991.
4. Provisional Population Table 4—Growth of urban population.
5. Provisional Population Table 5—Population, total workers, main workers, marginal workers and their percentage to total population in districts and urban agglomerations/cities by residence and sex, 1991.
6. Provisional Population Table 6—Distribution of main workers as cultivators, agricultural labourers, workers in household industry and other workers in districts and urban agglomeration/cities by residence and sex, 1991.

It should be remembered that all these tables are provisional and are based on the abstracts prepared by the enumerators in the field during enumeration. The compilation of final population is now on and the schedules and forms are in the process of

detailed scrutiny and manual tabulation at ten Regional Tabulation Offices, located at different places throughout the State. At these regional offices, the final population at village level in the case of rural areas and at division or ward or housenum-bering block level for each town in the case of urban areas will be arrived at. The basic data which are being generated at these offices are called Primary Census Abstract or PCA. The Primary Census Abstract will give the details on area, number of occupied residential houses, number of households, total population, population in the age-group 0-6, number of SC/ST population, literates, total main workers, distribution of main workers by ten industrial categories, marginal workers and non-workers. In 1981, the main workers were classified into four categories whereas in this census, they will be classified into 10 industrial categories as in 1961 and 1971 Censuses. For the first time in this census, the population in the age-group 0-6 with sex break up will be presented in PCA in order to arrive at the realistic literacy rate as all the persons below seven years are treated as illiterates in this census. Till 1981 Census, the Primary Census Abstract was presented for each taluk and for each town in a district. But, in 1991 Census, the Primary Census Abstract for each C.D. Block will be presented for the first time in the Indian Census. In addition to the Primary Census Abstract, a special table on Ex-Servicemen indicating the total number of Ex-Servicemen with their status as pensioner or non-pensioner will also be presented at district level. Besides these, separate Primary Census Abstract for Scheduled Castes and Scheduled Tribes is being compiled and the Primary Census Abstract for Scheduled Castes and Scheduled Tribes which will contain similar details as those in the PCA for general population is presented for State/district/taluk/community development block/UA/city/town. The compilation of Primary Census Abstract will be followed by the compilation of mother-tongue and religion data at these regional offices at taluk and town level. All these tables are based on 100 per cent processing of data from the household schedules. All other tables, namely General Economic Tables (B-Series), Social and Cultural Tables (C-Series), Migration Tables (D-Series), Fertility Tables (F-Series) and Special Tables for Scheduled Castes and Scheduled Tribes will be generated on sample basis from the individual slips on the computer.

The process of individual slips on the computer will be in three stages. In the first stage, 10 per cent sample of individual slips will be processed to generate all the Fertility Tables (F-Series) and most of the General Economic, Social and Cultural and Migration Tables (B, C and D-Series). In the second stage of processing, all the slips relating to main workers other than cultivators and agricultural labourers, marginal workers and those non-workers seeking/available for work would be taken up on a 100 per cent basis for providing detailed tables on economic activity. In the third stage, all slips relating to scheduled castes and scheduled tribes will be processed for generating special tables on scheduled castes and scheduled tribes.

As mentioned earlier, the General Economic Tables will be generated in two stages. In the first stage, the broad details of workers and non-workers will be presented in condensed forms. In this stage (Stage 1), the industrial classification of workers will be four-fold as cultivators, agricultural labourers, workers engaged in household industry and other workers. On completion of second stage, detailed Economic tables will be available. In a few cases, the detailed tables will be available at State level from the first stage and tables at district/taluk/C.D. Block level will be available from the second stage.

In the case of Social and Cultural tables (C-Series tables) most of them will be generated in the first stage itself. Similarly, all the Migration tables (D-Series tables) except those relating to migrant workers other than cultivators and agricultural labourers and all the Fertility tables (F-Series tables) will also be generated in the first stage.

Besides these, District Census Handbook for each district containing Village and Town Directories, the Village Primary Census Abstract and Urban Primary Census Abstract will be published. The Village Directory will contain list of villages, their areas, population as per 1991 Census, amenities available in each village such as schools, drinking water and land use. Town Directory will contain the data for each town such as the area, population in 1991 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities, etc.

All these tables relating to all India and each State/UT will be published in various volumes according to the following publication programme:

Publication Programme

Part No. & Subject covered	Sub-Part No., if any, and the topics covered
Part I—Administration Report (for official use only)	Part IA—Administration Report—Enumeration. Part IB—Administration Report—Tabulation.
Part II—General Population Tables	Part IIA—General Population Tables, A-Series. Part IIB—Primary Census Abstract.
Part III—General Economic Tables	Part IIIA—B-Series tables of first stage which will be brought out on 10% sample in respect of major states and on full count in respect of smaller states and union territories. Part IIIB—B-Series tables of second stage which will be brought out on full count. The data relating to HHII, OW, Marginal workers and Non-workers seeking/available for work will be entered on full count basis.
Part IV—Social and Cultural Tables	Part IVA—C-Series tables of first stage covering age, sex and marital status, composition of population, single year age returns, educational levels, school attendance and bilingualism. Part IVB—C-Series tables covering mother-tongue, religion of population and household composition.
Part V—Migration Tables	Part VA—D-Series tables of first stage covering tables based on 10% sample in respect of major states and on full count in respect of smaller states and union territories. Part VB—D-Series tables of second stage covering occupational classification of migrant workers. These tables are based on full count.

Part No. & Subject covered	Sub-Part No., if any, and the topics covered
Part VI—Fertility Tables	F-Series tables of first stage which will be brought out on 10% samples in respect of major states and on full count in respect of smaller states and union territories.
Part VII—Tables on houses and household amenities	H-Series tables covering census houses and the uses to which these are put, construction material of wall, roof and floor of the census houses occupied by households, tenure status of the house occupied and number of living rooms, household size, housing facilities like drinking water, electricity and toilet available to households and the fuel used by the household for cooking. These tables will also cover tables on scheduled castes and scheduled tribes. This volume will contain analytical notes also.
Part VIII—Special tables on Scheduled Castes and Scheduled Tribes	This part will contain SC and ST series of tables for scheduled castes and scheduled tribes respectively. The data relating to scheduled castes and scheduled tribes will be entered on full count basis in the third stage and SC/ST tables will be processed on the computer on full count. These will cover population of each scheduled caste/tribe, industrial categories of main and marginal workers, non-workers seeking/available for work and those who never worked before, educational level, school attendance, age, sex and marital status, composition of scheduled castes and scheduled tribes. In addition to these, the fertility tables relating to SC/ST are also covered. These tables also cover for scheduled tribes, their composition by religion, mother-tongue and bilingualism.

Part No. & Subject covered	Sub-Part No., if any, and the topics covered
Part IX—Town Directory, Survey Report on Towns and Villages	Part IXA—State Level Town Directory. Part IXB—Survey Report on selected towns and Part IXC—Survey Report on selected villages will be discontinued and studies on socio-demographic profiles on aged, women and children will be prepared. Accordingly the title under Part IX will also undergo a change.
Part X	Ethnographic notes and special studies on scheduled castes and scheduled tribes.
Part XI—Census Atlas	Union and State/Union Territory Census Atlases.
Part XII—District Census Handbook	Part XIIA—Village and Town Directory. Part XIIIB—Village and Town-wise Primary Census Abstract.

In addition to these printed volumes, the dissemination of the basic census data will be on machine-readable forms such as magnetic tapes, diskettes and CD-ROM etc. which will be available for data users on demand.

In order to evaluate and analyse the data, presented in this volume, it is desirable to understand the definitions of the various concepts used in the field operations. They have been explained with brief analysis of the provisional results in the forthcoming chapters.

CHAPTER 2

RURAL-URBAN POPULATION

It is customary to classify a place as rural or urban in every census and present data separately for rural and urban areas. Urban areas which are specifically defined for census purposes are determined on the basis of certain demographic and economic criteria. The rest are treated as rural areas. In 1991 Census, the same criteria adopted for determining the urban areas in 1981 Census have been continued. The urban areas of 1991 Census are:

- (a) All places with a municipality, corporation or cantonment board or notified town area;
- (b) All other areas which satisfied the following criteria:
 - (i) A minimum population of 5,000;
 - (ii) At least 75 per cent of male main workers engaged in non-agricultural and allied activities;
 - (iii) A population density of atleast 400 per Km² (or one thousand per square mile).

The above definition adopted for both 1981 and 1991 Censuses varies slightly from those of 1961 and 1971 Censuses. In 1961 and 1971, the males engaged in the activities of fishing or logging etc. were treated as engaged in non-agricultural pursuits and hence have been taken into account with those engaged in non-agricultural pursuits for applying the test of the 75 per cent non-agricultural workers criterion. But in 1981 Census as well as in 1991 Census, they have been treated on par with agricultural activities for the purpose of the test of this criterion. Prior to 1981 Census, certain places with less than 5,000 population were treated as urban areas on the basis of certain consideration like density, social and historical importance at the discretion of the Director of Census Operations in consultation with the State Government. On the other hand, the tests were strictly applied in demographic and economic criteria in 1981 and 1991 Censuses and no area was classified as urban area on other considerations.

Number of Towns

On the basis of these criteria, 469 towns have been classified as urban areas in 1991 Census as against 434 in 1981 Census, thus showing an increase of 35 towns in 1991 Census. Of the 434 towns in 1981 Census, 431

towns are continued to be treated as urban in 1991 Census also, three towns having been declassified. In 1991 Census, 31 areas have been newly classified as towns, while five towns of previous decades have been split into twelve towns, resulting in a net addition of 38 towns to the total number of towns. Splitting/amalgamation of any revenue unit is done by the State Government for administrative reasons. The following statement shows the number of urban units in Tamil Nadu in each census since 1901:

STATEMENT 1

NUMBER OF URBAN UNITS IN TAMIL NADU

Year	No. of towns in Tamil Nadu
1	2
1901	133
1911	162
1921	189
1931	222
1941	257
1951	297
1961	339
1971	439
1981	434
1991	469

It may be observed from the statement that the number of urban units has been steadily increasing in all the censuses except in 1981, when the number of urban units came down to 434 from 439 in 1971.

According to the provisional results of 1991 Census, there are 19,027,033 urban dwellers in the State out of the total population of 55,638,318 which accounts for 34.20 per cent of the total population. At All India level, the percentage of urban population is 25.72. A statement showing the population along with certain characteristics for rural/urban areas for India and States/Union Territories is given at the end of this chapter (as statement 6). The corresponding urban inhabitants in 1981 Census were 15,951,875 out of the total population of 48,408,077. It accounted for 32.95

per cent of the total population of 1981 Census. The percentage of urban population in 1991 Census has registered an increase of 1.25 points over that of 1981 Census. The growth of urban population during the decade 1981—91 is 19.28 per cent whereas the corresponding growth of total population during the same period is 14.94 per cent.

The rural population of the State is 36,611,285 as per the provisional results in 1991 Census and it accounts for 65.80 per cent of the total population. The growth rate of rural population during the decade 1981—91 is 12.80 per cent over the 1981 rural population.

Statement 2 containing State level urban population along with certain indices, gives an idea on the trends of urbanisation in Tamil Nadu, as revealed by the last ten decennial censuses. The urban population of the State has increased gradually from 2.72 million at the beginning of the century (that is, in 1901) to 19.03 million now. The percentage of urban

population has risen from 14.15 per cent in 1901 to 24.35 per cent in 1951 and further to 34.20 per cent in 1991. If we look at the decennial growth rate of urban population during the last three decades i.e. from 1961 to 1991, the recent declining trend, viz., from 38.64 per cent in 1961—71, to 27.98 per cent during 1971—81 and further to 19.28 per cent during 1981—91 would be apparent. The annual exponential growth rate in respect of urban population of the State reflects this fall and it works out to 1.76 per cent during 1981—91 as against 2.47 per cent for the period 1971—81 and 3.27 per cent during 1961—71. The annual rate of growth of urban population at All India Level is 3.09 per cent during 1981—91 and this is much higher when compared with the rate for Tamil Nadu. The urban population ratio in Tamil Nadu during 1981—91 has risen by just 1.25 percentage points (from 32.95 per cent in 1981 to 34.20 per cent in 1991). As a consequence, the annual rate of gain in the percentage of urban population of Tamil Nadu has fallen from 0.89 in 1981 to 0.38 in 1991.

STATEMENT 2

TRENDS OF URBANISATION IN TAMIL NADU

Census year	No. of Towns	Total population	Urban population	Percentage of urban population to total population	Decennial growth rate of urban population	Tempo of urbanisation (Per cent per year)		
						Annual exponential growth rate	Annual gain in percentage of urban population	Annual rate of gain in percentage of urban population
1	2	3	4	5	6	7	8	9
1901	133	19,252,630	2,724,781	14.15	..	..	..	..
1911	162	20,902,616	3,149,137	15.07	+15.57	1.45	0.09	0.65
1921	189	21,628,518	3,428,079	15.85	+ 8.86	0.85	0.08	0.52
1931	222	23,472,099	4,230,382	18.02	+23.40	2.10	0.22	1.37
1941	257	26,267,507	5,173,682	19.70	+22.30	2.01	0.17	0.93
1951	297	30,119,047	7,333,525	24.35	+41.75	3.49	0.47	2.36
1961	339	33,686,953	8,990,528	26.69	+22.59	2.04	0.23	0.96
1971	439	41,199,168	12,464,834	30.26	+38.64	3.27	0.36	1.34
1981	434	48,408,077	15,951,875	32.95	+27.98	2.47	0.27	0.89
1991	469	55,638,318	19,027,033	34.20	+19.28	1.76	0.13	0.38

Provisional population table, 3 gives the percentage of urban population to total population, decennial growth rate of total, rural and urban population and sex ratio for total, rural and urban areas separately for each district in the State.

Among the districts, barring Madras district which is entirely urban and co-terminous with Madras City, Coimbatore district (53.20 per cent) has recorded the highest proportion of urban dwellers in the State. In Nilgiri district, nearly half of the district population

are urban population. Madurai district which includes Madurai Corporation and Chengai-Anna District within which all the constituent units of Madras Urban Agglomeration are located, have almost the same proportion of urban population. Besides these districts, there are two other districts in the State which have recorded higher proportion of urban population than the State average of 34.20 per cent. They are Chidambaranar (41.39) and Kamarajar (37.55). Dharmapuri district has recorded the lowest percentage of urban population (9.41).

STATEMENT 3

URBAN UNITS AND URBAN POPULATION AND RURAL UNITS AND RURAL POPULATION IN DISTRICTS, 1991

District	No. of urban units, 1991	Urban population, 1991	Percentage to State's urban population	No. of Rural units, 1991	Rural population, 1991	Percentage to State's rural population
1	2	3	4	5	6	7
TAMIL NADU	469	19,027,033	100.00	16,780	36,611,285	100.00
1. Madras	1	3,795,028	19.95	..	..	..
2. Chengai-Anna	78	2,071,566	10.89	1,783	2,549,401	6.96

14. Pudukkottai	9	188,702	0.99	760	1,133,792	3.10
15. Pasumpon Thevar Thirumagan	15	287,878	1.51	492	787,111	2.15
16. Madurai	24	1,551,149	8.15	718	1,896,446	5.18
17. Kamarajar	18	583,723	3.07	609	970,627	2.65
18. Ramanathapuram	9	249,692	1.31	419	886,195	2.42
19. Chidambaranar	28	602,538	3.17	434	853,258	2.33
20. Tirunelveli-Kattabomman	24	790,721	4.16	553	1,702,468	4.65
21. Kanniyakumari	5	269,183	1.41	94	1,321,991	3.61

It may be observed from the statement that out of 469 towns in the State in 1991, Chengai-Anna district accounts for the largest number of units viz. 78 towns. Salem district with 50 urban units has the second largest number of urban units in the State, followed by Coimbatore district with 40 urban units. Barring Madras City which is a district by itself, the number of urban units in other districts varies from five each in Tiruvannamalai-Samburavayar district and Kanniyakumari district to 32 each in North Arcot-Ambedkar district and Thanjavur district. Madras City accounts for nearly one fifth of the urban population of the State and is followed by Chengai-Anna district where the urban dwellers form about one tenth of urban dwellers of the State. Pudukkottai district has the least proportion of urban dwellers in the State.

There are 16,780 rural units in the State. South Arcot district has the largest number of rural units and Nilgiri district has the least number of rural units. Both these districts obviously account for the highest and the least proportion respectively of rural dwellers.

While Madras accounts for 3.80 million of urban population, Chengai-Anna district has 2.07 million of urban dwellers. Coimbatore district (1.88 million), Madurai district (1.55 million), Salem district (1.13 million), Tiruchchirappalli district (1.10 million) and Thanjavur district (1.04 million) are the other districts where more than one million population live in urban areas.

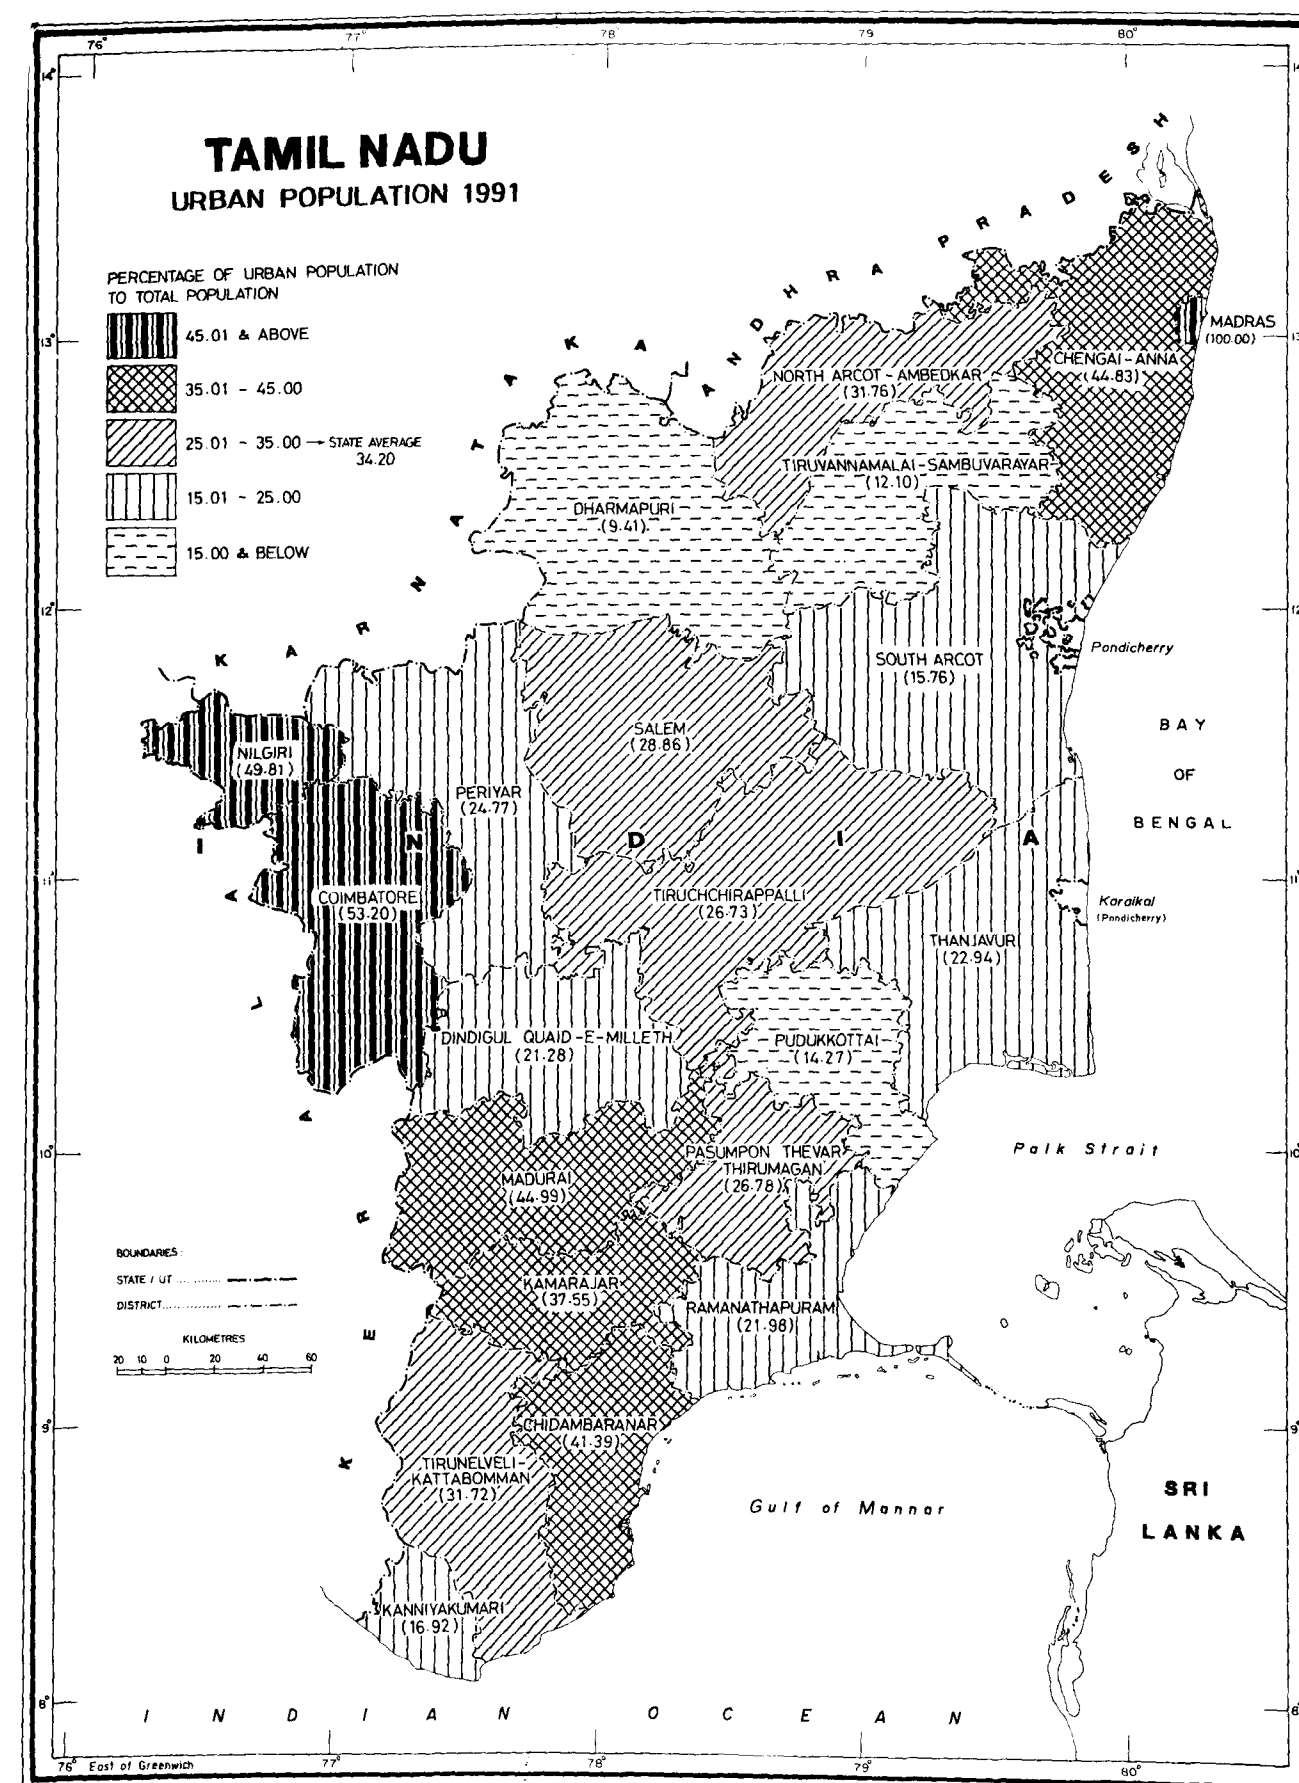

In the case of rural inhabitants, South Arcot district ranks first with 4.10 million, Thanjavur district and Tiruchchirappalli district take the second and third place with 3.49 million and 3.01 million respectively. There are four other districts in the State with more than 2 million but less than 3 million rural population. They are Salem (2.78 million), Chengai-Anna (2.55 million), Dharmapuri (2.17 million) and North Arcot-Ambedkar district (2.05 million).

Statement 4 provides information on the rural-urban composition of population as per the 1991 Census, and the percentage of urban population to total population for India, States and Union Territories.

* The 1991 Census has not been held in Jammu & Kashmir. The total, rural and urban populations for 1991 are as projected by the Committee of Experts on Population Projections (October, 1989).

† The 1981 Census has not been held in Assam. The decennial growth rates of population for 1981—91 have been worked out on the basis of rural and urban population for 1981 obtained by interpolation.

It may be observed that among the major States (i.e. 15 big States, each with a population of ten million and above) Maharashtra continues to be the most urbanised State in the country in 1991 Census with 38.73 per cent of its population living in urban areas. Gujarat which ranked third in 1981 Census in urbanisation has now assumed the second position with 34.40 per cent of urban population, pushing down Tamil Nadu to third position (34.20 per cent). Karnataka (30.91 per cent), Punjab (29.72 per cent), West Bengal (27.30 per cent), Andhra Pradesh (26.84 per cent) and Kerala (26.44 per cent) are the other States which account for higher proportion of urban population than the national average of 25.72 per cent. In the States of Haryana (24.79 per cent), Madhya Pradesh (23.21 per cent), Rajasthan (22.88 per cent), Uttar Pradesh (19.89 per cent), Orissa (13.43 per cent), Bihar (13.17 per cent) and Assam (11.08 per cent), the proportion of urban population is below the national average. The proportion of urban population is the lowest (8.47) in the Union Territory of Dadra and Nagar Haveli. Though Delhi UT and Chandigarh UT account for 89.93 per cent and 89.69 per cent of their population as urban population they are almost fully urban and possess fewer rural areas. It may also be observed that there are some variations in the total population of some States as compared to the provisional figures earlier published in Paper 1 of 1991.

Urban Agglomeration

This concept was adopted only in 1971 Census and continued in 1981 and 1991 Censuses also. The concept of Urban Agglomeration which is similar to that of earlier censuses is as under:

An Urban Agglomeration is a continuous urban spread constituting a city or town and its adjoining urban outgrowths (OG) or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such towns. In certain cases, a large housing colonies, university campuses, port areas, military camps, etc. would have come up around a city or town but falling outside the statutory limits of the city or town. They may be lying inside the boundaries of a village or villages which are contiguous to the city/town. These villages could not be treated as urban as they do not satisfy the urban criteria. But, at the same time, the colonies etc. mentioned above deserve to be treated as an integrated urban area. Therefore, all such towns together with their urban outgrowth will have to be treated as one urban unit and called Urban Agglomeration. Thus, an Urban Agglomeration may constitute:

- a city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages), or
- one town with similar outgrowth or two or more adjoining towns with or without their outgrowths as in (a) above, or
- a city and one or more adjoining towns with or without their outgrowths, all of which form a continuous urban spread.

In Tamil Nadu, no new urban agglomeration has been formed in 1991 Census and therefore the total number of urban agglomerations which was 34 in 1981 has remained the same. However, there are inclusions of new towns in a few urban agglomerations and exclusion of constituent units due to declassification of certain 1981 towns as rural. In Madras Urban Agglomeration, six towns which are classified as a town for the first time in 1991 Census have been included and one town has been split into three towns. The jurisdiction of Coimbatore Urban Agglomeration and Madurai Urban Agglomeration has expanded due to inclusion of two newly classified towns in each in 1991 and one town in Coimbatore Urban Agglomeration has been split into two. In Erode Urban Agglomeration one newly classified town has been added. The number of constituent units of Vellore Urban Agglomeration has gone up by four due to the inclusion of three new towns and one old town. In Tiruchchirappalli Urban Agglomeration, one town has been split into two towns, whereas in Salem Urban Agglomeration one town has been split into three and another town into two. One of the constituent units in each of Madurai Urban Agglomeration and Neyveli Urban Agglomeration has been declassified as rural in 1991 Census and hence excluded from the concerned urban agglomerations. In this census, the Coimbatore Urban Agglomeration and Madurai Urban Agglomeration have crossed the one million mark of population for the first time.

Provisional population table 3 gives the population of 469 urban units of Tamil Nadu as revealed in the provisional results including urban agglomerations along with their constituent units. It also gives the population by sex, growth rates during the decade 1971-81 and 1981-91 with sex ratio of each urban agglomeration/town. The urban agglomerations/towns have been grouped under six different size classes based on their population and presented in this table. The size classes are as follows:

Size class	Population
Class I	100,000 and above
Class II	50,000 to 99,999
Class III	20,000 to 49,999
Class IV	10,000 to 19,999
Class V	5,000 to 9,999
Class VI	Less than 5,000

While determining the size class of the urban agglomerations/towns, each urban agglomeration has been considered as a single unit and classified on the basis of the population of the urban agglomeration as a whole and the constituent units of the urban agglomerations are listed below each urban agglomeration under the relevant class. The population of the constituent towns of the urban agglomerations have, therefore, not been considered separately for determining the class. There are 34 urban agglomerations which include 243 urban units while 226 towns do not form part of any urban agglomeration in the State.

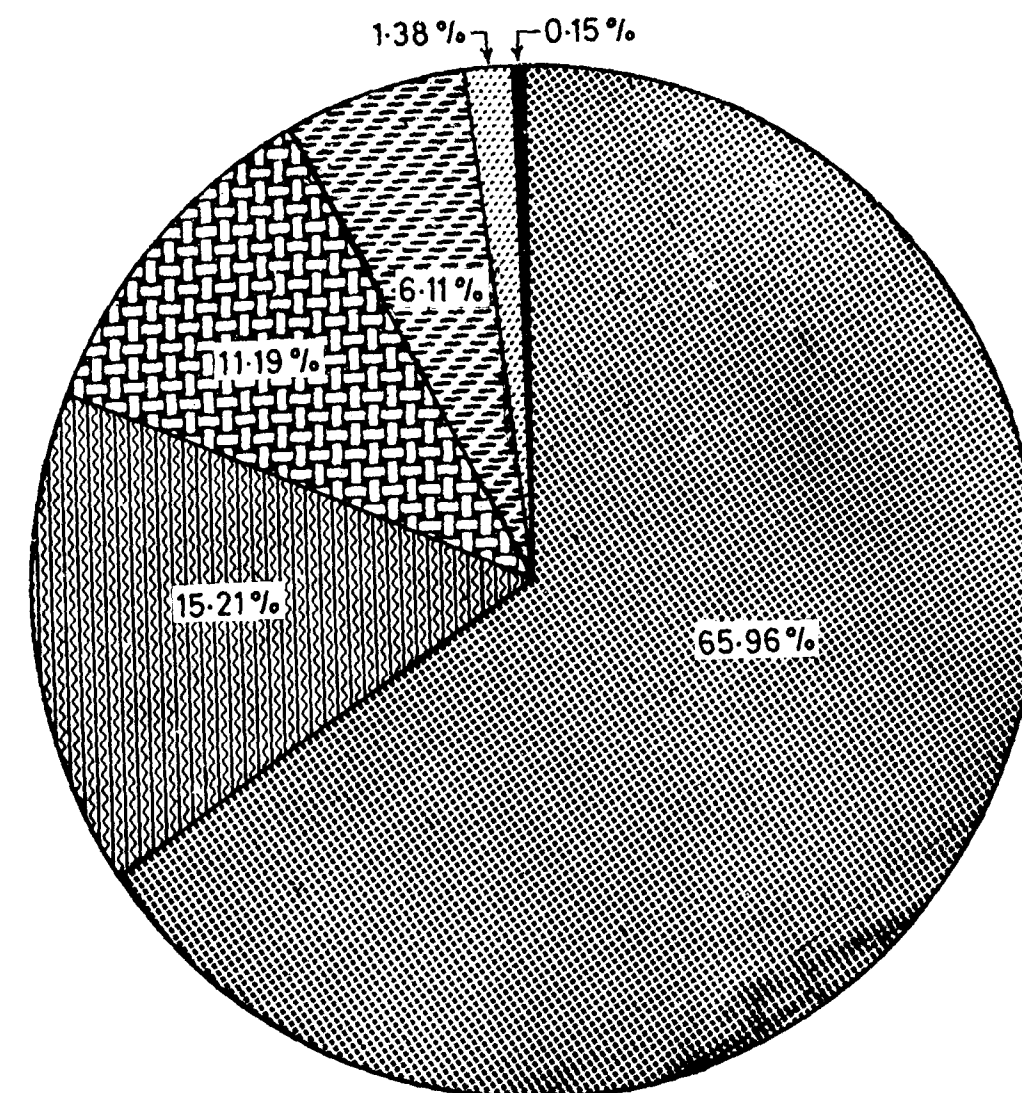

It may be observed from the table, that the Madras Urban Agglomeration has 56 constituent units besides the core city of Madras. It has the largest number of constituent units and is the most populous urban agglomeration/town in the State. It accounts for 5.36 million of population. It has recorded a growth of 24.99 per cent during the decade 1981-91 as against 33.31 in the decade 1971-81. Two urban agglomerations which have crossed one million population mark in this census occupy second and third positions. Coimbatore Urban Agglomeration (with 20 constituent units) comes second with a population of 1.14 million while Madurai Urban Agglomeration with 11 constituent units occupies the third place with a population of 1.09 million.

Besides these, there are 15 urban agglomerations and 7 cities under Class I in 1991 as against 11 urban agglomerations and 6 cities in 1981. In 1991 Census, four urban agglomerations and one city have crossed one lakh population mark for the first time. They are Neyveli Urban Agglomeration, Arcot Urban Agglomeration, Karur Urban Agglomeration, Karaikudi Urban Agglomeration and Tiruvannamalai City. In the provisional population table 3, the urban agglomerations/towns falling under each class have been arranged in the descending order of the 1991 population and presented.

In the Appendix to provisional population table 3, the list of towns declassified in 1991, the list of towns which have been merged with other towns and the list of towns which have been split have been given.

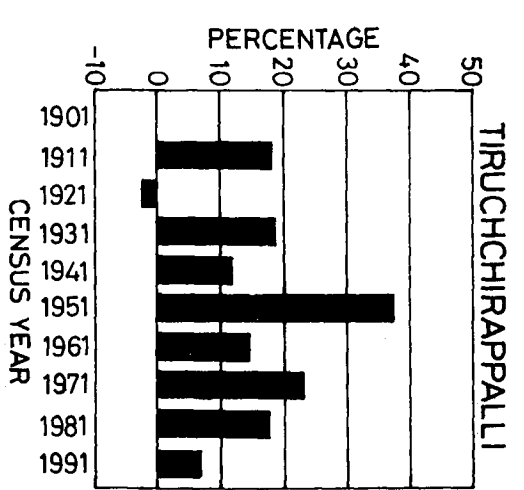

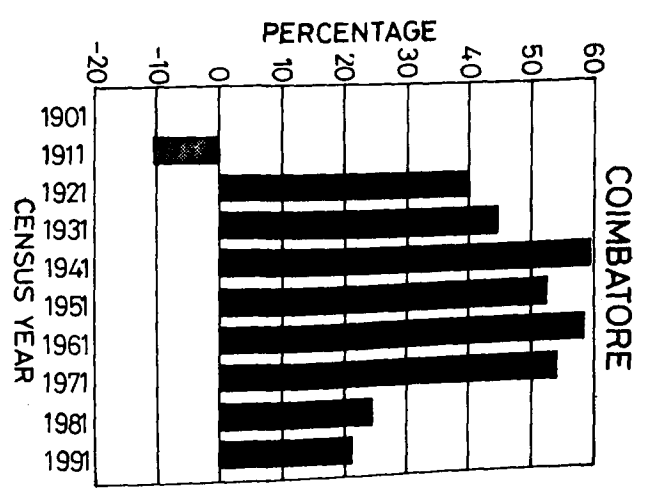

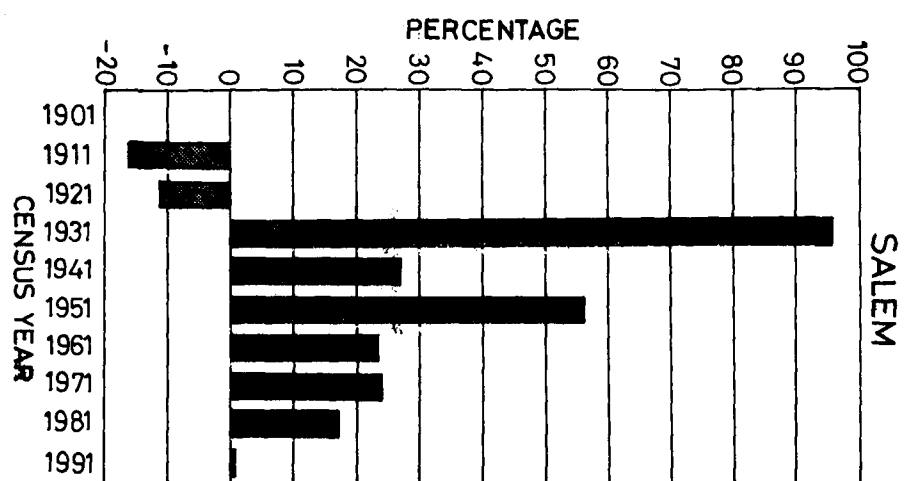

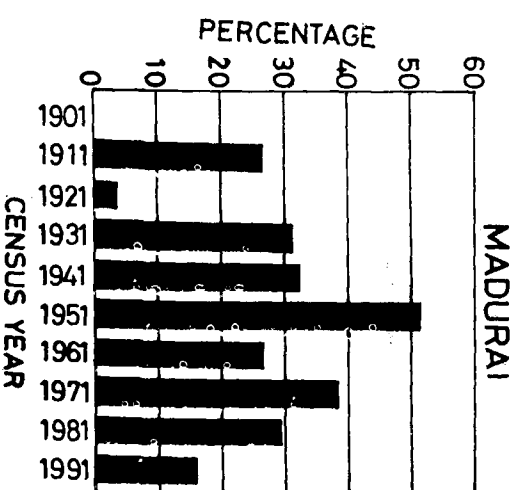

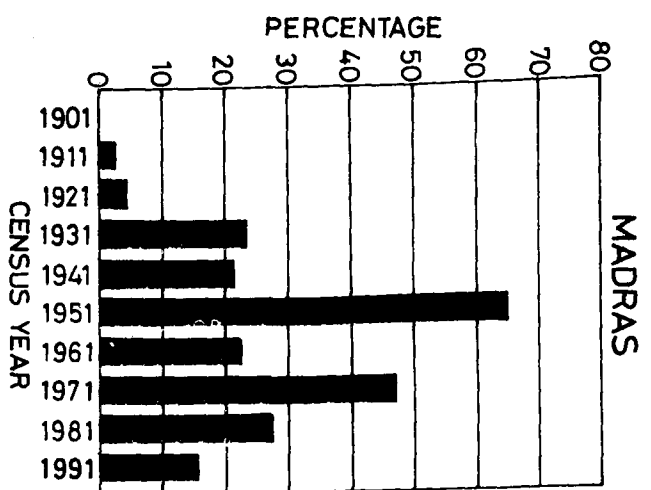

The following statement shows the number of urban agglomerations/towns, in each size class, the population of each class and distribution of urban population in each size class:

POPULATION OF TOWNS* IN SIX SIZE CLASSES 1991 TAMIL NADU

* Includes Urban Agglomerations and other Towns

DECADAL PERCENTAGE VARIATION OF POPULATION IN BIG CITIES 1901-91

STATEMENT 5

NUMBER OF URBAN AGGLOMERATIONS/
TOWNS, POPULATION AND DISTRIBUTION OF
URBAN POPULATION IN EACH SIZE CLASS,
1991

Class	No. of UAs/ Towns	Population	Percentage of population of each class to total urban population
1	2	3	4
I	18/7	12,549,812	65.96
II	10/32	2,893,174	15.21
III	2/69	2,129,615	11.19
IV	3/77	1,163,198	6.11
V	1/34	262,133	1.38
VI	-/7	29,101	0.15
TOTAL	34/226	19,027,033	100.00

It can be seen from the statement that Class I accounts for nearly two third of urban population. Class II which ranks second accounts for 15.21 per cent of urban population while 11.19 per cent of urban population reside in Class III

towns. The percentage of urban population in each class is directly proportional to the class size.

Provisional population table 3 gives the sex ratio of each size class, each urban agglomeration/town as revealed in the provisional results. In Class I, the sex ratio is the least and increases in the subsequent classes, except in Class III where the sex ratio is almost the same as that of Class II. The sex ratio is more than 1,000 in Class V and Class VI towns leaving to infer that there are comparatively lesser number of females in the bigger urban areas.

Provisional population table 4 shows the growth of urban population in each size class over the decades 1971—81 and 1981—91 along with the number of urban agglomerations/towns and population in each size class in 1971, 1981 and 1991 Censuses. The growth rate given in the table has been worked out in two different ways. In the first procedure, the growth of urban population in each size class has been calculated on the basis of the population in the size class according to each census. These rates have been shown under mark 'a' in columns 11 and 13 of the table. In the other procedure, the growth of population of each size class has been worked out according to the size class of the town in the 1971 Census in respect of the decade 1971—81 and the size class of the town in the 1981 Census in respect of the decade 1981—91. The growth rate thus worked out have been shown under mark 'b' in columns 12 and 14 of the table.

Notes :

- (1) *Major States (Population 50 lakhs+) are marked with an asterisk.
 (2) The 1991 Census has not been held in Jammu & Kashmir. Total, rural and urban population include projections for Jammu & Kashmir as on 1-3-1991, made by the Standing Committee of Experts on population projections (October, 1989). The projected population figures exclude population of area under unlawful occupation of Pakistan and China where census could not be taken.
 (3) Literates do not include figures for Jammu & Kashmir where the 1991 Census has not been held.

(4) The 1981 Census could not be held in Assam. The decennial growth rates of population for 1981-91 have been worked out on the basis of the total, rural and urban population for 1981 obtained by interpolation.

(5) While working out the populations for India from columns 8 to 13 the projected figures as on March 1, 1991 for Jammu & Kashmir State as projected by the Standing Committee of Experts on population projections (October, 1989) and interpolated figures for 1981 for Assam have been included.

* Density has been worked out on comparable data.

CHAPTER 3

WORKING POPULATION

Similar to the data on social and demographic characteristics of population, particulars about the economic aspects that are gathered in the decennial censuses in our country are of vital significance. Data on employment are being gathered in every census right from 1881 onwards and the economic activity of every individual is systematically ascertained through the census questionnaire. But, the concept of workers and the questions on employment have undergone changes over the years, rendering comparison of data somewhat difficult. It is, however, significant to note that the concept of 'work' itself has not undergone any major change since 1961 Census.

Work has been defined in 1991 Census as "participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. It also includes unpaid work on farm or in family enterprise". The economic questions upto 1951 Census were based on income concept while the 1961 and 1971 Censuses followed the concept of work measured in terms of time or the labour force concept. In 1961 and 1971 Censuses, a dual reference period was adopted. In 1961, a person was considered as a worker if he was engaged regularly during the last season in the case of seasonal work or if he had worked at least for a day during the fortnight preceding the day of enumeration in the case of non-seasonal work. In 1971 Census, there was no change in the concept for classifying a person engaged in seasonal work but in the case of persons engaged in non-seasonal work, one should have worked at least for a day during the week preceding the day of enumeration instead of a fortnight in 1961. Thus, in both the censuses, usual status and current status were adopted for classification of a person as worker depending upon the nature of activity.

But in 1981 as well as 1991 Censuses, the concept of usual status was adopted uniformly in both the cases of seasonal and non-seasonal work and the reference period was one year prior to the date of census enumeration.

The dichotomy of worker and non-worker of 1961 and of 1971 Censuses has been dropped and trichotomy of main worker, marginal worker and non-worker was introduced in 1981 Census and has been continued in 1991 Census also. A person is

considered as main worker if he had worked for major part of the year (i.e.) six months (183 days) or more and if he had not worked for the major part of the year i.e., he had worked for less than six months or less than 183 days, he was treated as marginal worker. Persons who had not participated in any economic activity even for a day during the last one year preceding the day of enumeration, were considered as non-workers.

All the main workers and the marginal workers have been classified under one of the four main categories both in 1981 and 1991 Censuses. They are cultivators (C), agricultural labourers (AL), workers in household industry (HHI), and other workers (OW).

The definition of these four categories of workers are as given below:

Cultivators (C)

For the purpose of census, a person is considered as cultivator if he or she is engaged in cultivation of land, owned or taken on lease from Government or from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation. Cultivation involves ploughing, sowing and harvesting and production of cereals and millets such as wheat, paddy, jowar, bajra, ragi etc., and other crops such as sugarcane, groundnuts, tapioca etc. and pulses, raw jute and kindred fibre crop, cotton etc. It does not include fruit growing, vegetable growing or keeping orchards or groves or working in plantations like tea, coffee, rubber, cinchona and other medicinal plantation.

Agricultural Labourer (AL)

A person who works on another person's land for wages in money, kind or share was regarded as an agricultural labourer. He or she has no risk in the cultivation, but he/she merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which he/she works.

Workers in Household Industry (HHI)

Household Industry is defined as an industry conducted by the head of the household himself/herself and or by the members of the household at home or

within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act. Household Industry should relate to production, processing, servicing or repairing or making and selling of articles or goods. But mere selling of goods or articles should not be regarded as household industry.

Other Workers (OW)

All workers (i.e.) those who have been engaged in some economic activity during the last one year, who are not cultivators or agricultural labourers or engaged in household industry are other workers. They include the workers engaged in the following broad industrial categories:

- (i) Livestock, forestry, fishing, hunting and plantations, orchards and allied activities;
- (ii) Mining and quarrying;
- (iii) Manufacturing, processing, servicing and repairs other than household industry;
- (iv) Constructions;
- (v) Trade and commerce;
- (vi) Transport, storage and communication; and
- (vii) Other services.

In this booklet, the classification of main workers is restricted to these four-fold classification and the data are presented accordingly. As such, the analysis of data in this booklet is also confined to the

distribution of workers into these four-fold classification. However, in the Primary Census Abstract, which is expected to be brought out after the compilation of manual processing of the schedules after a year, the classification of main workers will be ten-fold as earlier explained in the introduction.

In this booklet, there are two tables giving provisional data on the economic activities of the people and these are provisional population tables 5 and 6. Provisional population table 5 presents data on the total population, total workers, main workers and marginal workers along with the percentages of such workers to total population in 1981 and 1991. The data are presented for the State and districts by sex for total, rural and urban areas. Besides these, data are also given for each city/UA in the State, having more than one lakh of population.

The provisional results of 1991 Census reveal that 24,555,559 persons out of the total population of 55,638,318 are workers in the State. They account for 44.13 per cent of the total population. In 1981, the corresponding proportion was 41.73 per cent. Of these, 22,971,697 persons are main workers and the rest of 1,583,862 persons are marginal workers in the State. The proportion of main workers to the total population has gone up from 39.31 per cent in 1981 to 41.29 per cent in 1991. Similarly the proportion of marginal workers has risen to 2.84 per cent in 1991 from 2.42 per cent in 1981. The provisional figure of workers for India (excluding Jammu & Kashmir) is 314,903,642 of which the main workers are 285,422,913 and the rest, viz. 29,480,729 are marginal workers. The total workers at All India Level constitute 37.64 per cent of the total population of 836,605,522. The ratios of main workers and marginal workers in India to total population are 34.12 per cent and 3.52 per cent respectively. In Statement 1, data on total population, total workers, main workers, marginal workers and their percentages for India and States/Union Territories are given.

11.23	10.71	0.52	Females			

Considering males and females in the State, we find that the proportion of total workers to the respective total male and female population has gone up to 57.01 per cent in 1991 (from 56.58 per cent in 1981) for males and to 30.88 per cent in 1991 (from 26.52 per cent in 1981) in the case of females. It is observed that there has been an increase in the ratios in 1991 in all the cases, i.e., of total workers, main workers and marginal workers to total population as also among males and females, as compared to the ratios of 1981 Census, the sole exception being the male main workers whose ratio has marginally dropped from 55.85 per cent in 1981 to 55.84 per cent in 1991.

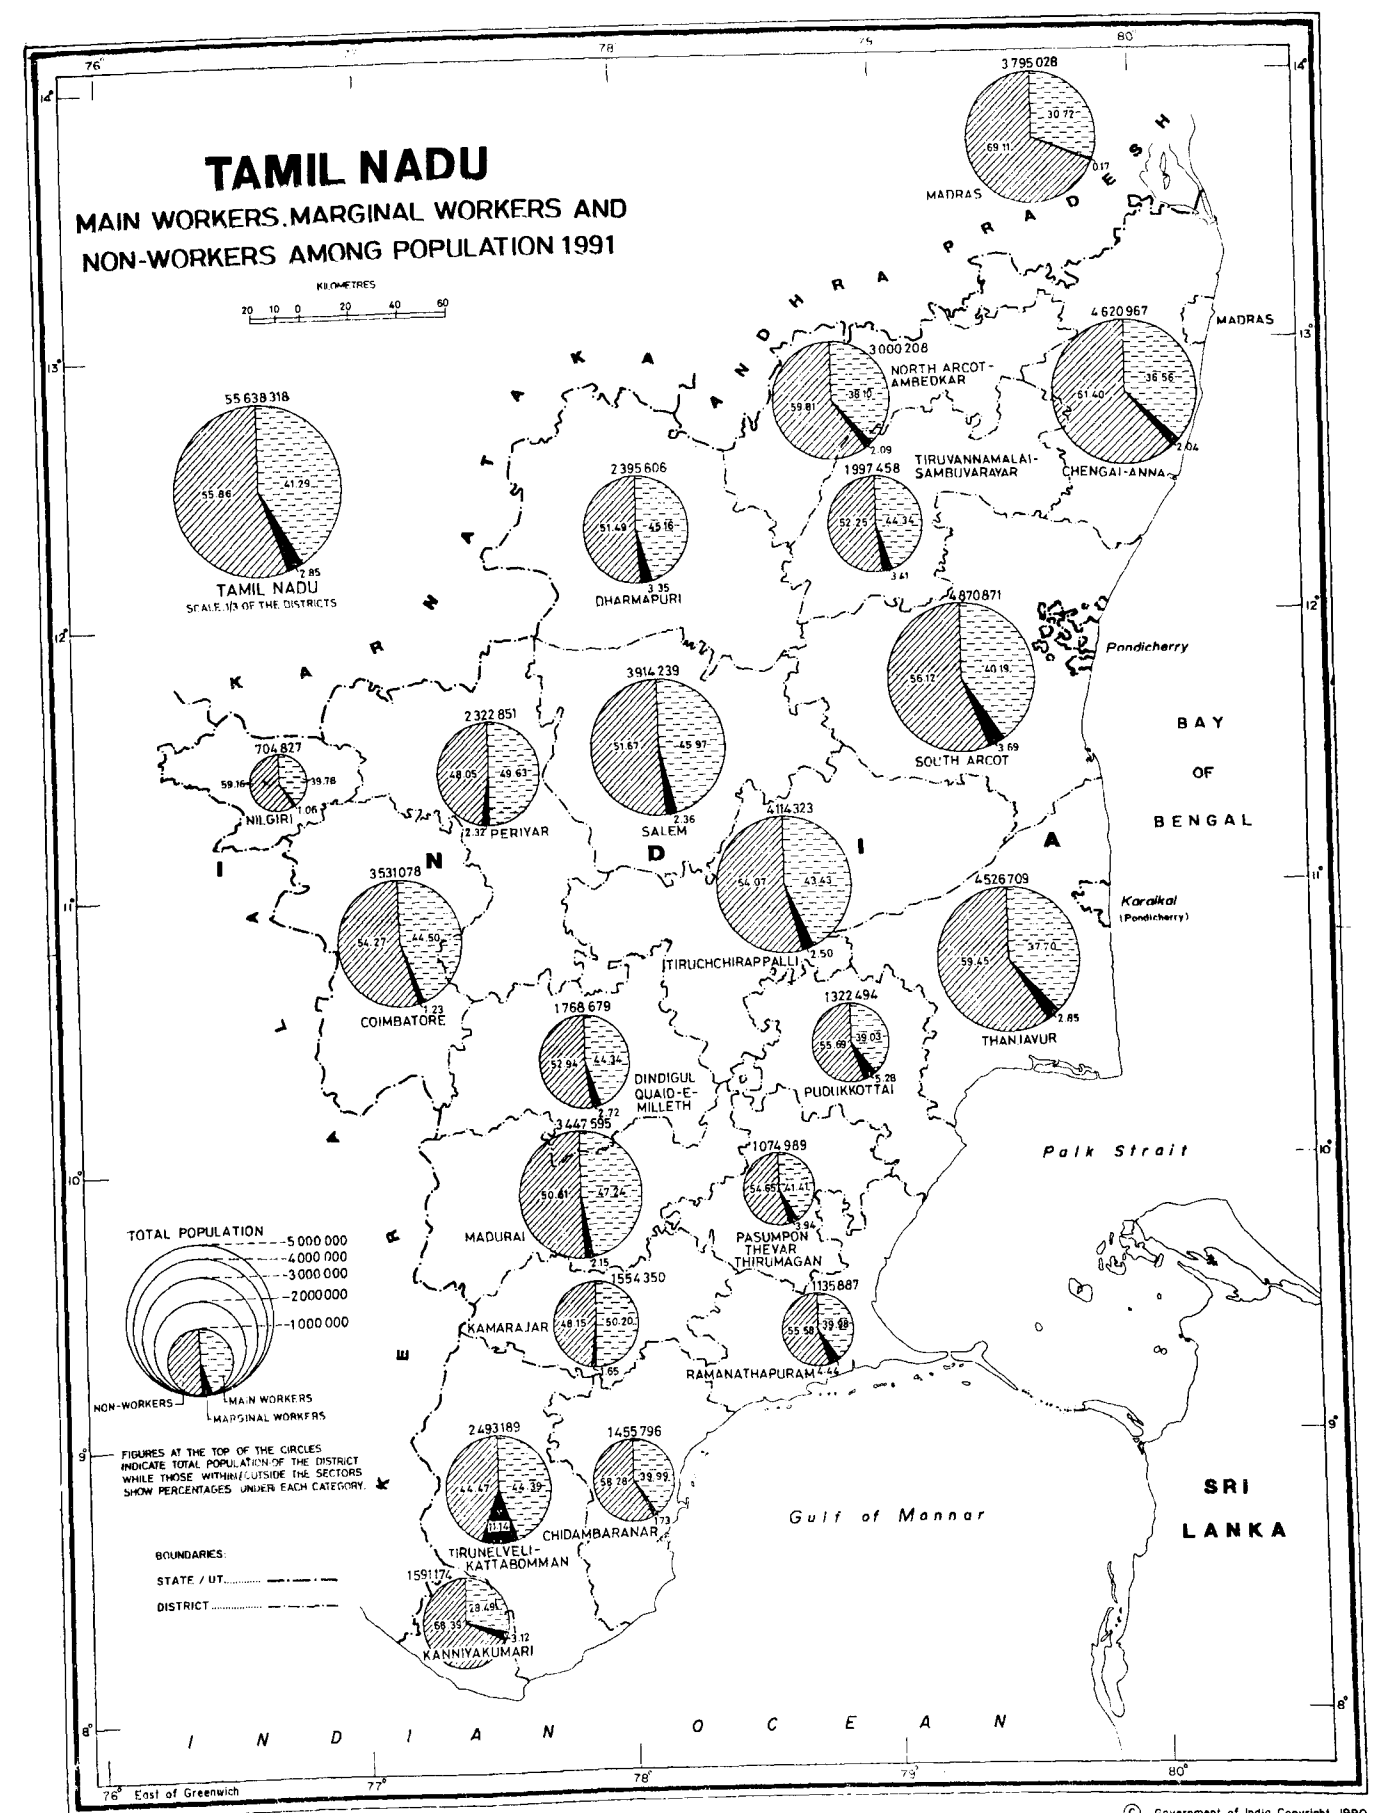

The proportion of total workers in rural areas has increased from 46.48 in 1981 to 49.06 in 1991, whereas in urban areas the rate has gone up from 32.05 per cent in 1981 to 34.66 per cent in 1991. The percentage of male workers in rural areas has gone down in 1991 Census from 59.24 in 1981 to 58.71 per cent. But, in urban areas, the corresponding proportion has increased in 1991. In the case of female workers, both rural and urban areas have recorded increased proportion in 1991 Census.

The percentage of main workers to total population in rural as well as urban areas have increased from 43.20 per cent in 1981 to 45.13 per cent in 1991 and from 31.37 per cent in 1981 to 33.89 per cent in 1991 respectively. The corresponding ratios for rural females and for both urban males and females have gone up while the ratio has dropped in the case of male main workers in the rural areas. In the case of marginal workers, the proportion to the respective population for persons, males and females in all the areas has registered increase in 1991 Census as compared to 1981 (vide Provisional Population Table 5). It is observed that the increase in the proportion of main workers among the females is significantly higher in 1991 in the rural areas when compared to males. In the urban areas, the increase in the ratio of main workers is markedly higher among males than among females in 1991.

Statement 2 given below shows the percentages of main workers to total population as at 1991 Census and the corresponding proportion in 1981 Census for total, rural and urban areas of each district.

Name of District	Total		Rural		Urban	
	1981	1991	1981	1991	1981	1991
1	2	3	4	5	6	7
9. Nilgiri	38.14	39.78	40.81	43.08	35.35	36.46
10. Coimbatore	44.01	44.50	52.09	51.76	36.08	38.12
11. Dindigul-Quaid-e-Milleth	45.25	44.34	49.24	47.33	30.77	33.29
12. Tiruchchirappalli	41.19	43.43	44.95	47.73	30.54	31.64
13. Thanjavur	36.39	37.70	38.76	40.18	28.51	29.37
14. Pudukkottai	36.26	39.03	37.69	40.76	26.92	28.63
15. Pasumpon Thevar Thirumagan	35.05	41.41	38.05	45.87	26.54	29.22
16. Madurai	40.62	47.24	47.70	49.47	31.57	44.51
17. Kamarajar	47.82	50.20	51.26	52.69	41.46	46.07
18. Ramanathapuram	36.23	39.98	38.52	43.33	27.68	28.09
19. Chidambaranar	38.53	39.99	42.90	45.07	31.87	32.79
20. Tirunelveli-Kattabomman	41.64	44.39	45.15	48.58	34.05	35.38
21. Kanniyakumari	27.62	28.49	27.35	28.48	28.88	28.55

Among the districts, the highest proportion of main workers (50.20 per cent) has been recorded in Kamarajar district in 1991 followed by Periyar district (49.63 per cent) which recorded the highest ratio in 1981. In both the censuses, Kanniyakumari district recorded the lowest proportion (28.49 in 1991 and 27.62 in 1981). The ratio of main workers to total population has increased in 1991 Census in almost all the districts, the two exceptions being Dindigul-Quaid-e-Milleth and Periyar districts. In Madurai district, the ratio of main workers has increased by 6.62 percentage points in 1991 over that of 1981, which incidentally, is the highest increase among the districts. Pasumpon Thevar Thirumagan district also shows a substantial increase in the worker ratio in 1991 (41.41 per cent) as compared to 1981 (35.05 per cent). While in eleven districts, the ratio of main workers in 1991 is higher than that of the State average (41.29), in the remaining ten districts it is lower. Considering the main workers in the rural areas of districts, we observe that Periyar

district occupies the first place as in 1981 with a proportion of 53.37 and Kamarajar district holds the second place with a ratio of 52.69. In rural areas also, Kanniyakumari district has recorded the lowest proportion in both the censuses (28.48 per cent in 1991 and 27.35 per cent in 1981).

In 1991 Census, the ratio in rural areas has gone up in all the districts over that of 1981 except in two districts viz. Coimbatore and Dindigul-Quaid-e-Milleth districts. In Pasumpon Thevar Thirumagan district, the increase in the ratio of main workers during the decade 1981-91 in rural areas is the highest viz., 7.82 percentage points. In 1991, eleven districts have recorded higher proportion of main workers in rural areas than the State average of 45.13 and nine have lower ratios.

In the case of urban areas, the highest proportion of main workers in 1991 (46.07 per cent) has again been

recorded by Kamarajar district followed by Madurai district with a ratio of 44.51 per cent. But in 1981 Census, though Kamarajar district topped the list, the second place was occupied by Periyar district. The lowest ratio has been recorded by Ramanathapuram district (28.09) in 1991 whereas the lowest proportion of main workers to total population was reported in Pasumpon Thevar Thirumagan district in 1981. When compared with 1981, the ratios in the urban areas in 1991 Census have increased in most of the districts, the exceptions being the three districts viz.

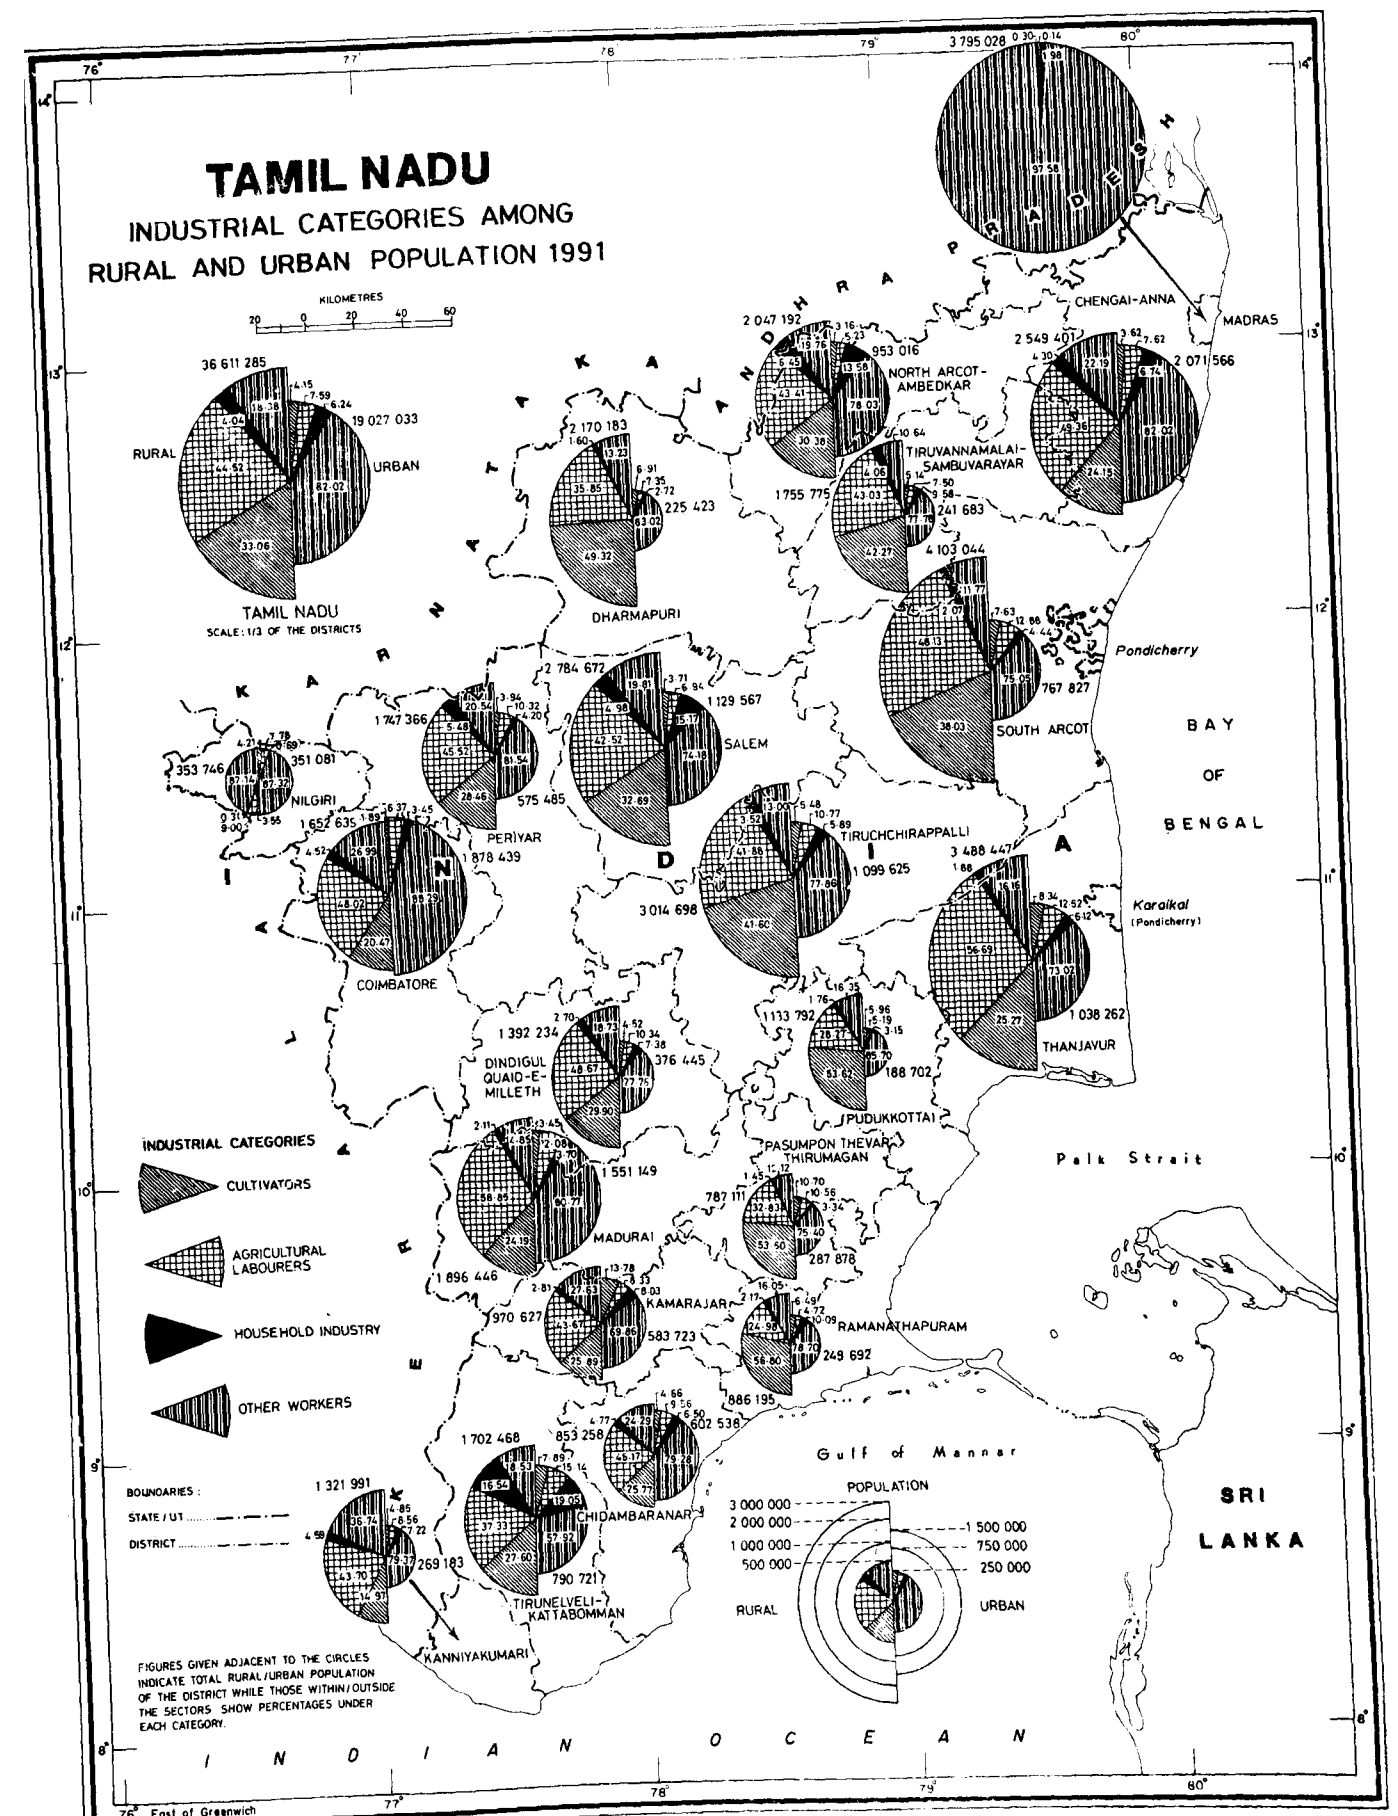

Thiruvannamalai-Sambuvarayar, Periyar and Kanniyakumari districts. The net increase is the highest (12.94 percentage points) in Madurai district. In 1991 Census, only one third of the 21 districts have recorded higher ratios in urban areas than the State average of 33.89 per cent.

Statement 3 which is given below shows the percentage of main workers to total population for males and females separately for each district for 1981 and 1991 Censuses.

As stated earlier, the proportion of main workers for males has declined marginally from 55.85 per cent in 1981 to 55.84 per cent in 1991 for the entire State. But, among the districts the ratio in ten districts has shown increase in 1991 over that of 1981 Census and most of these districts are in the southern and western regions of the State, the only exception being Madras. In the case of females, all the districts with the lone exception of Coimbatore district have registered increase in the ratio during the decade 1981—91. Only seven out of the 21 districts in the State have reported higher male proportion than the State average, while twelve districts have recorded higher female proportion than the State average. Periyar district has recorded in 1991 the higher ratio of main workers of 64.78 for males whereas Kamarajar district (43.06 per cent) ranks first in the case of females. The female proportion is the lowest (9.28 per cent) in the districts of Madras and Kanniyakumari.

Among the 25 Cities/UAs having more than one lakh of population, Valparai City where a little more than half of the population are main workers has the highest proportion of main workers to total population (50.81 per cent) while Cuddalore City accounts for the lowest proportion (23.97 per cent). In Madurai Urban Agglomeration, 71.15 per cent of male population are main workers. In the case of females, Valparai City, which has a number of tea estates, has the highest proportion of main workers (48.51 per cent).

Provisional Population Table 6 gives the distribution of main workers as cultivators, agricultural labourers, workers in household industry and other workers for total, rural and urban areas of each district by sex. It further gives the percentage distribution of workers in each of these four categories to total main workers for both the 1981 and 1991 Censuses. At the end of the table, similar data are presented for each of the 25 Cities/UAs, having population of one lakh and above in the State.

It can be observed from the table that nearly one-fourth of the total main workers of the State are cultivators now as against 29.22 per cent in 1981. Similarly, the proportion of the workers in household industry has come down slightly from

4.72 in 1981 to 4.66 in 1991. However, the proportions of agricultural labourers and other workers have increased from 31.73 and 34.33 in 1981 to 34.16 and 36.24 in 1991 respectively.

Statement 4 contains the distribution of main workers by four categories along with percentages for India and States/UTs.

It may be seen from the statement that nearly three fifths of the main workers in the State depend on agriculture for their livelihood, although the ratio of cultivators and agricultural labourers put together (59.10 per cent) show a marginal decline in 1991 as compared to 1981. (60.95 per cent). The picture at all India level is slightly different wherein the dependence on agriculture is observed to be little more than in Tamil Nadu. Of the total main workers in India, 38.75 per cent are cultivators and 26.15 per cent are agricultural labourers. The ratio of workers in household industry to total main workers is 3.63 per cent and that of other workers is 31.47 per cent.

It may be seen from the Table 6 that among the male workers in the State 26.59 per cent are cultivators and 25.98 per cent are agricultural labourers as per the provisional results. Other workers and workers in household industry constitute 43.59 per cent and 3.84 per cent of the main workers respectively.

Considering the female workers, we find that more than half of them are engaged as agricultural labourers while more than one-fifth of them are engaged each in cultivation and other works. The proportion of female workers in household industry is 6.44 in 1991 as against 6.30 in 1981.

In rural areas, a little over three-fourths of main workers are engaged in cultivation and allied activities (77.58 per cent). Male cultivators and agricultural labourers constitute 73.71 per cent of rural male workers while similar ratio among females is higher among the rural female workers, viz., 84.43 per cent.

In urban areas of the State, 82.02 per cent of workers are other workers. Among urban male workers, other workers constitute 85.63 per cent while other workers among urban females form 66.96 per cent of female workers.

Comparing the different districts, we notice that cultivators form the highest proportion of the main workers in Ramanathapuram district (49.03). Agricultural labourers constitute the highest proportion of main workers in Thanjavur district (48.80). The lowest proportion of cultivators and agricultural labourers is naturally seen in Madras district, which is a fully urban district. Tirunelveli-Kattabomman district where beedi rolling is the source of income for a large number of households, accounts for the highest proportion of workers in household industry to the main workers of the district (17.18). Workers in household industry form the lowest proportion (0.48) of main workers in Nilgiri district. Madras district has nearly 98 per cent of its main workers as other workers which is incidentally, the highest among the districts. Nilgiri district closely follows Madras with 87.22 per cent of its main workers falling in this industrial category. This is due to the classification of plantation workers, vegetable/fruit growers, etc. as other workers.

Cultivators constitute more than half of the male main workers in both Pudukkottai district (51.59 per cent) and Dharmapuri district (51.54 per cent) and the rest of the districts have lower ratios of cultivators among males. In the case of Thanjavur district as also Kanniyakumari district, nearly 40 per cent of their respective male main workers are agricultural labourers. The proportion of male workers in household industry is the highest in North Arcot-Ambedkar district. As in the case of persons, male other workers form the highest proportion in Madras district and Nilgiri district.

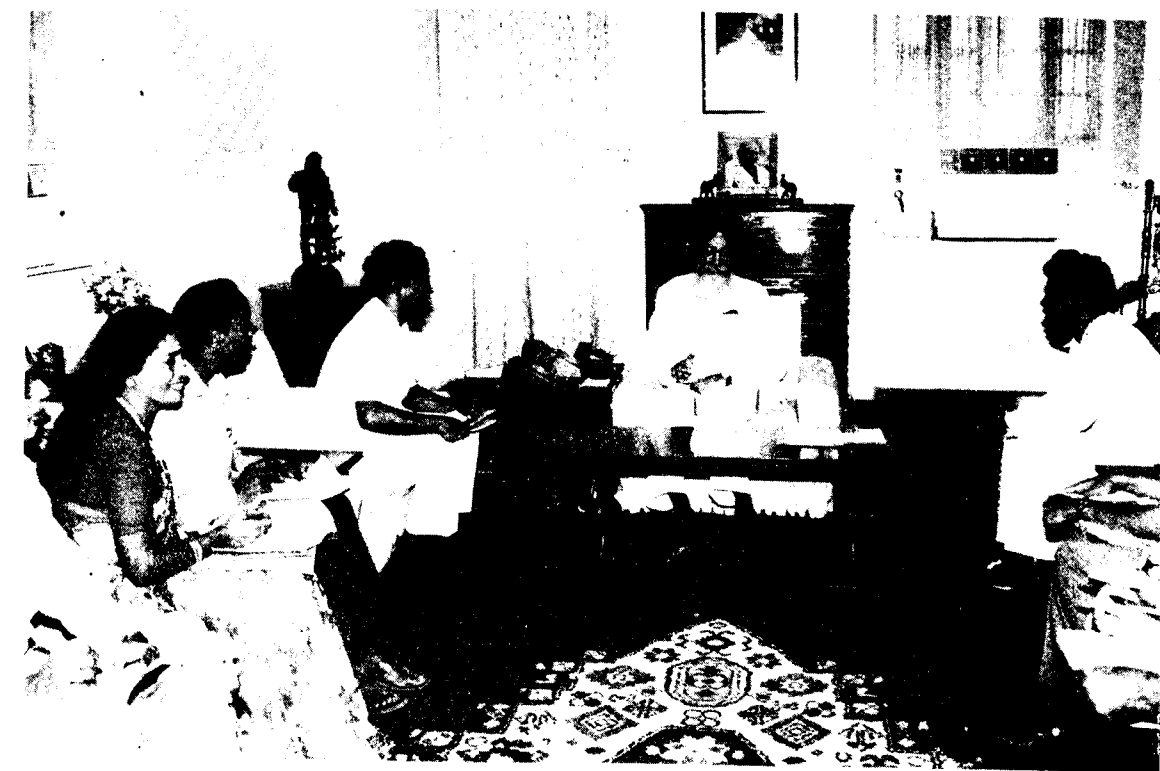

Among the female main workers, cultivators constitute the highest ratio in Ramanathapuram district (48.49) when compared with the rest of the districts. Agricultural labourers form the highest proportion among female main workers in Thanjavur district where nearly three-fourths of them are

engaged as agricultural coolies. Besides Thanjavur district, there are ten other districts where more than half of the female main workers are agricultural labourers.

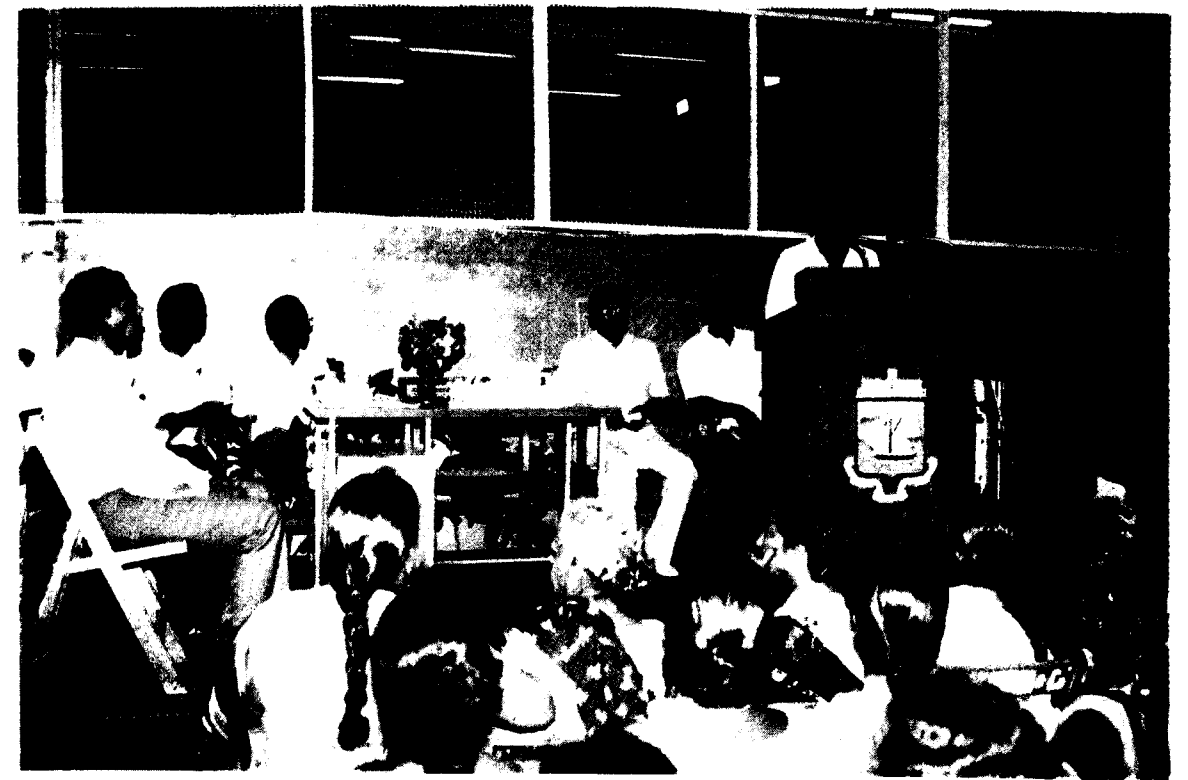

More than one third of the female main workers of Tirunelveli-Kattabomman district are found to be engaged in household industry and this is the highest ratio among the different districts for such category of workers for females.

It may be observed from the data presented in Provisional Population Table 6 that in the rural areas of all the districts, workers engaged in cultivation and those working as agricultural labourers form the highest proportion of main workers while in urban areas, other workers constitute the majority of the main workers. Sizable percentages of female workers in household industry are noticed in both rural and urban areas of Tirunelveli-Kattabomman district (31.80 per cent for rural and 46.73 per cent for urban) and Kanniyakumari district (15.31 for rural and 23.89 for urban) and this is similar to the trend noticed in the previous 1981 Census. In the urban areas of North Arcot-Ambedkar (25.83); Salem (22.84) and Ramanathapuram (24.00) districts also, female workers engaged in household industry form sizable proportion of female main workers in 1991, similar to the trend noticed in the earlier 1981 Census. Provisional Population Table 6 also furnishes the distribution of main workers into four industrial categories of workers for each of the 25 Cities/urban agglomerations (with population of one lakh and above) in Tamil Nadu. In all the Cities/urban agglomerations other workers account for more than three-fourths of the main workers except in Tirunelveli Urban Agglomeration (71.19), Kanchipuram Urban Agglomeration (69.58) and Rajapalayam City (68.63). The highest proportion of other workers is observed in Valparai City (98.64).

A PICTORIAL VIEW OF 1991 CENSUS ENUMERATION IN THE STATE

His Excellency The Governor of Tamil Nadu, Shri Surjith Singh Barnala,
being enumerated for Census.

Inauguration of a Census training session at a Circle Office of the Madras Corporation by the Director of Census Operations.

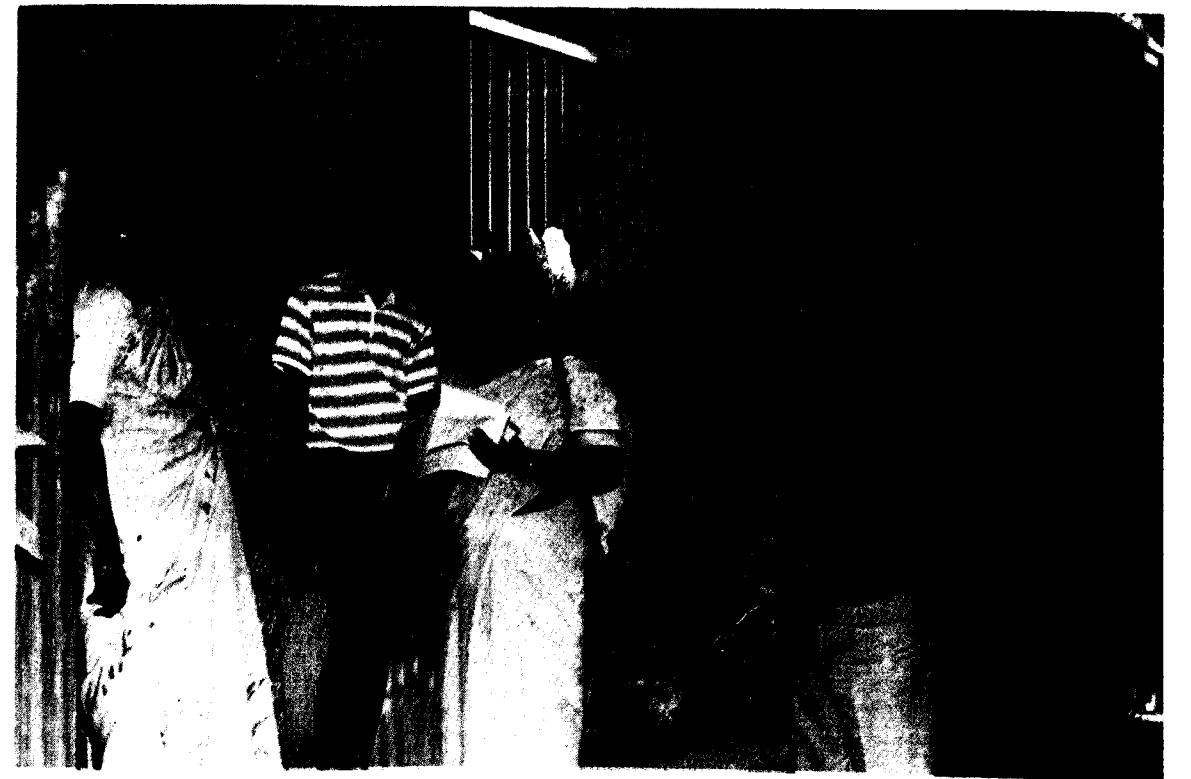

A view of the Census Officials' Conference.

The training officials going through the instructions with rapt attention.

A women vegetable vendor patiently answering census questions.

Enumeration of a middle class family.

A view of the participants in a training programme.

A hut dweller being enumerated.

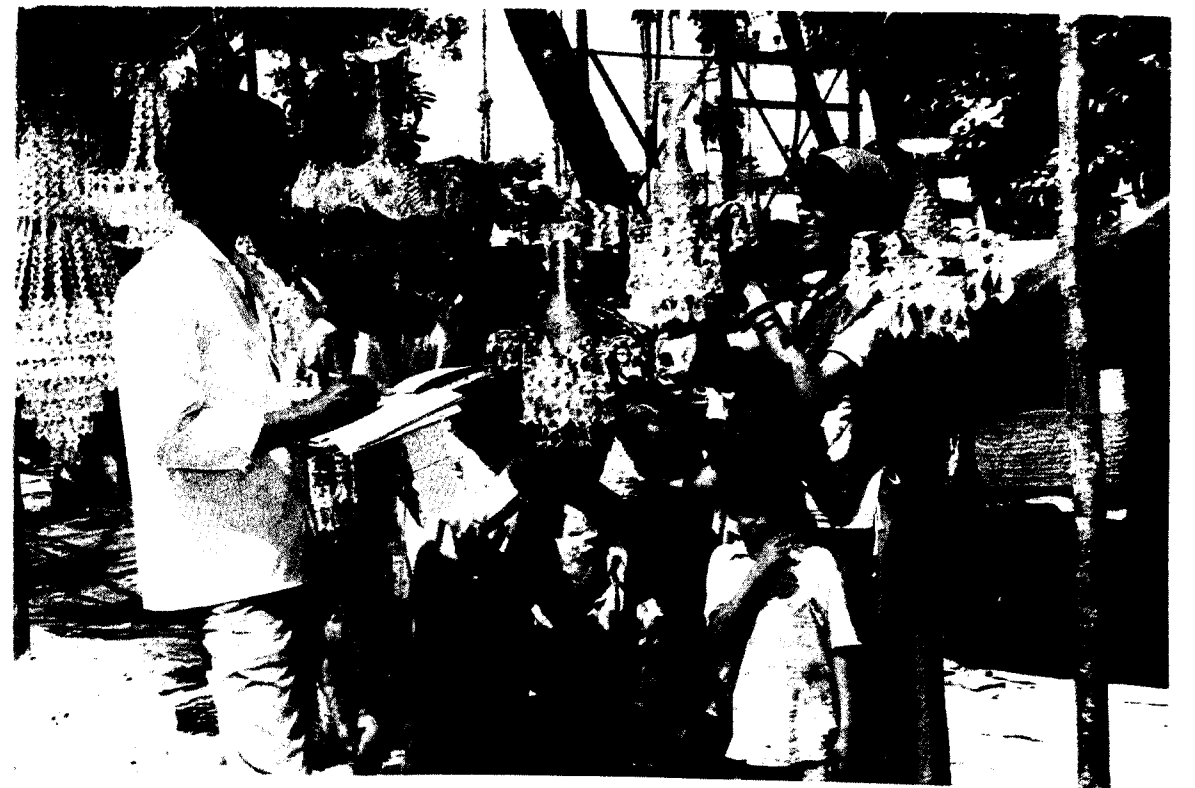

A view of the participants in a training programme.

A hut dweller being enumerated.

No transaction, but an enumerator in action.

No place to dwell; But not so in census as well.

No place to dwell; But not so in census as well.

An enumerator records information from an elite house-wife,
unmindful of the bark of a fiery dog.

A Section of the trainees in a training session.

A training session for the training officials themselves.

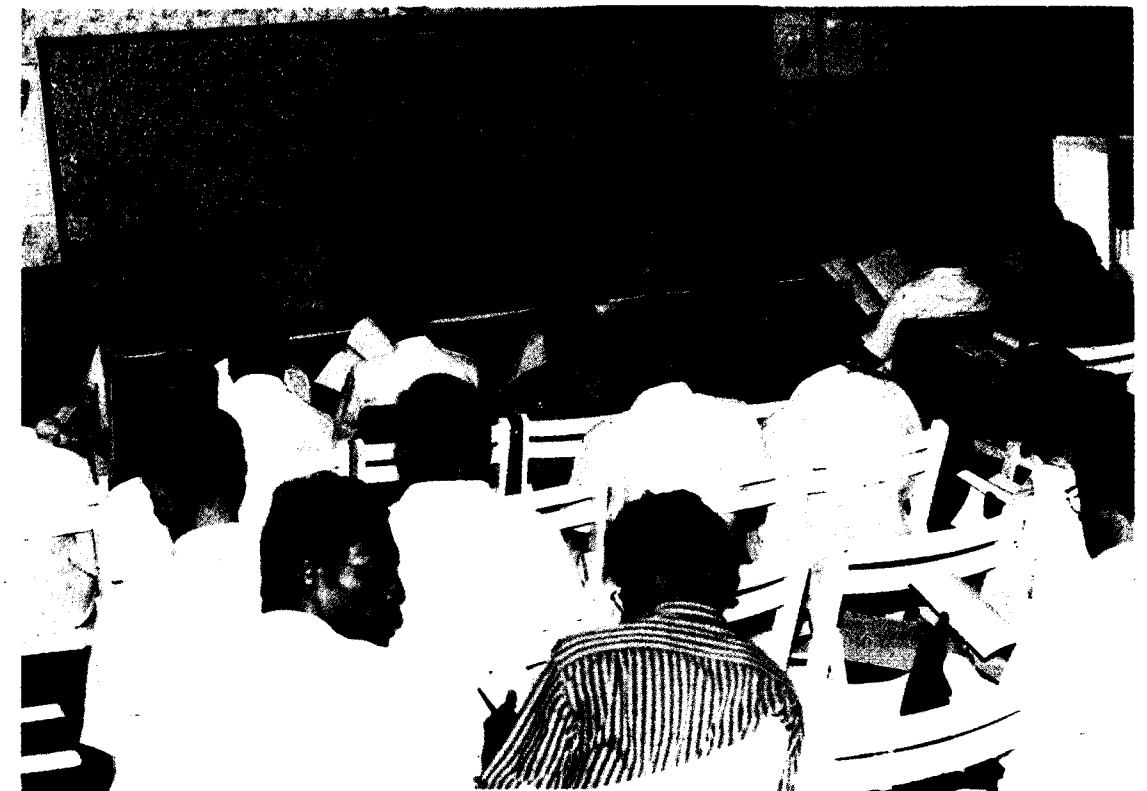

Pavement dwellers are also covered without exception.

An enumerator at his work eliciting answers from a self employed women
at her work.

The Director releases the Provisional Population Totals at a Press Conference on 26th March, 1991.

Director explaining a point at the Press Meet.

NOTES

1. The following abbreviations have been used to denote the civic status of urban units:

M. Corpn.	— Municipal Corporation	V. P.	— Village Panchayat
M.	— Municipality	T. P.	— Town Panchayat
M. T. S.	— Municipal Township	Cantt.	— Cantonment
P. T. S.	— Panchayat Township	S. Rly. Admn.	— Southern Railway Administration
T. S.	— Township	N.M.A.	— Non Municipal Administration

2. Towns treated as such for the first time in 1991 are shown in italics.

3. The old names in respect of the following towns which have undergone name changes since last census are as indicated in brackets:

1. Udhagamandalam (Ootacamund)
2. Parangipettai (Portonovo)
3. Tharangampadi (Tranquebar)
4. Mayiladuthurai (Mayuram)

NOTES

1. The following abbreviations have been used to denote the status of a town:

M. Corp.	—	Municipal Corporation
M.	—	Municipality
M.T.S.	—	Municipal Township
P.T.S.	—	Panchayat Township
V.P.	—	Village Panchayat
T.P.	—	Town Panchayat
Cantt.	—	Cantonment
S. Rly. Admn.	—	Southern Railway Administration
N.M.A.	—	Non Municipal Area.

2. Towns treated as such for the first time in 1991 are shown in italics and towns treated as such for the first time in 1981 and continued in 1991 are shown with an asterisk on the right.

3. The old names, in respect of the following towns which have undergone name changes since last census are as indicated in brackets:

1. Udhagamandalam (Ootacamund)
2. Parangipettai (Portonovo)
3. Tharangampadi (Tranquebar)
4. Mayiladuthurai (Mayuram)

PROVISIONAL POPULATION TABLE 3
POPULATION OF URBAN AGGLOMERATIONS, CITIES AND TOWNS, 1991

APPENDIX

List of census towns of 1981 declassified in 1991, census towns of 1981 merged with other towns in 1991 and census towns of 1981 split in 1991

Declassified towns			Merged towns			Split towns				
Name of town	District	Population in 1981	Name of town	Population in 1981	Name of the town with which merged	District	Name of town which was split	Name of the resultant towns due to split	District	Population in 1981
1	2	3	4	5	6	7	8	9	10	11

ANNEXURE I

JURISDICTIONAL CHANGES DURING 1981-91

Sl. No.	Name of District/Taluk as per 1981 Census	Jurisdictional changes	G.O. No.
1.	Chengalpattu	Existing name of Chengalpattu district was changed as Chengai-Anna. Uttukkottai sub taluk and Pallipattu sub taluk were upgraded into full-fledged taluks. 122 villages and one town of Madurantakam taluk were transferred to newly formed Cheyur taluk.	G.O. Ms. No. 447 dated 27-3-89 G.O. Ms. No. 1571 dated 13-7-81 G.O. Ms. No. 387 dated 27-3-86
2.	North Arcot	North Arcot district was bifurcated into North Arcot-Ambedkar and Tiruvannamalai-Sambuvarayar districts. Cheyyar, Vandavasi, Arani, Polur, Tiruvannamalai and Chengam taluks of North Arcot District were transferred to newly formed Tiruvannamalai-Sambuvarayar district.	G.O. Ms. No. 1619 dated 27-9-89
3.	South Arcot	81 villages were transferred from Tindivanam taluk to newly formed Vanur taluk.	G.O. Ms. No. 3248 dated 23-12-81
4.	Dharmapuri	Seven villages (Punjapalli, Periyannur, Bodihut-tapalli, Nammandahalli, Chinnagoundanahalli, Chudanur and Gummanur) from Denkanikotta taluk and twelve villages (Jitandahalli, Giddanahalli, Mahendramangalam, Maravadi, Timmarayanahalli, Jakkasamudram, Velakalahalli, Karakkarahalli, Bikkannahalli, Murukkalanatham, Kumbasahalli and Pechikanapalli) from Krishnagiri taluk were transferred to Palakkodu taluk.	Additional Collector's Proceedings ROC 1321299/82 dated 23-11-82
5.	Salem	60 villages were transferred from Namakkal taluk to newly formed Paramathi-Velur taluk.	G.O. Ms. No. 2159 dated 7-12-89
6.	Periyar	31 villages and one town of Dharapuram taluk were transferred to newly formed Kangayam taluk.	G.O. Ms. No. 1571 dated 13-7-81
7.	Coimbatore	Coimbatore taluk was bifurcated into Coimbatore North (22 villages and 10 towns) and Coimbatore South (39 villages and 7 towns) taluks. 3 villages and one town were transferred from Pollachi taluk to newly formed Valparai taluk. 36 villages and 4 towns were transferred from Palladam taluk to newly formed Tiruppur taluk.	G.O. Ms. No. 1783 dated 25-11-87 G.O. Ms. No. 3248 dated 23-12-81 G.O. Ms. No. 2158 dated 7-12-89
8.	Madurai	Madurai district was bifurcated into Madurai and Anna districts. Palani, Vedsandur, Nattam, Dindigul, Kodaikanal and Nilakkottai taluks of Madurai district were transferred to newly formed Anna district. Name of Anna district was changed as Dindigul-Quaid-E-Mileth. 84 villages from Nilakkottai taluk were transferred to newly formed Vadipatti taluk. 24 villages and one town from Periyakulam taluk were transferred to newly formed Andipatti taluk.	G.O. Ms. No. 1255 dated 2-9-85 G.O. Ms. No. 448 dated 27-3-89 G.O. Ms. No. 1253 dated 2-9-85 G.O. Ms. No. 240 dated 20-2-87

ANNEXURE 1

JURISDICTIONAL CHANGES DURING 1981-91

Sl. No.	Name of District/Taluk as per 1981 Census	Jurisdictional changes	G. O. No.
9.	Tiruchchirappalli	Certain portions (uninhabited area) of Sivanthipatti village in Manapparai taluk were transferred to Dharmapuri village of Tirupattur taluk in Pasumpon Thevar Thirumagan district.	G.O. Ms. No. 1834 dated 4-12-87
10.	Thanjavur	72 villages and one town were transferred from Mayiladuthurai taluk to newly formed Tharangampadi taluk (Porayar taluk). 64 villages and two towns were transferred from Mannargudi taluk to newly formed Nidamangalam taluk. 77 villages and two towns were transferred from Papanasam taluk to newly formed Valangimam taluk. 106 villages from Nannilam taluk were transferred to newly formed Kodavasal taluk. Subsequently, 21 more villages were transferred from Nannilam taluk to Kodavasal taluk.	G.O. Ms. No. 3248 dated 23-12-81 Do. G.O. Ms. No. 1571 dated 13-7-81 Do. G.O. Ms. No. 413 dated 13-3-87
11.	Pudukkottai	37 villages were transferred from Pudukkottai taluk to newly formed Gandarvakottai taluk. Subsequently, two more villages from Pudukkottai taluk were transferred to Gandarvakottai taluk.	G.O. Ms. No. 1571 dated 13-7-81 G.O. Ms. No. 742 dated 2-6-86
12.	Ramanathapuram	Trifurcated as Pasumpon Muthuramalingam (Tirupattur, Karaikkudi, Devakottai, Sivaganga, Manamadurai and Baiyankudi taluks), Kamarajar (Srivilliputtur, Virudunagar, Tiruchchuli, Arupukkottai, Sattur and Rajapalayam taluks) and Ramanathapuram districts (Tiruvadanai, Paramakkudi, Kamudi, Mudukulattur, Ramanathapuram and Rameswaram taluks). Name of Pasumpon Muthuramalingam district changed as Pasumpon Thevar Thirumagan. Manamadurai sub taluk and Baiyankudi Sub taluk were upgraded into full-fledged taluks. One village (Einaneswaram) of Baiyankudi taluk of Pasumpon Thevar Thirumagan district was transferred to Paramakkudi taluk of Ramanathapuram district. Rameswaram sub taluk was upgraded into full-fledged taluk.	G.O. Ms. No. 347 dated 8-3-85 G.O. Ms. No. 488 dated 5-4-89 G.O. Ms. No. 1571 dated 13-7-81 G.O. Ms. No. 393 Rev. dated 15-3-85 G.O. Ms. No. 3248 dated 23-12-81
13.	Tirunelveli	Tirunelveli district was bifurcated into Chidambaranar and Tirunelveli-Kattabomman districts. Kovilpatti, Vilattikulam, Ottappidaram, Tuticorin, Srivaikuntam, Tiruchchendur and Sattankulam taluks of Tirunelveli district were transferred to newly formed Chidambaranar district. 41 villages and one town were transferred from Nanguneri taluk to newly formed Radhapuram taluk. 51 villages and four towns were transferred from Tirunelveli taluk to newly formed Palayan-kottai taluk. Sivagiri sub taluk was upgraded into full-fledged taluk.	G.O. Ms. No. 1314 dated 27-9-86 G.O. Ms. No. 1571 dated 13-7-81 G.O. Ms. No. 3248 dated 23-12-81 Do.
