PREFACE

This is a companion volume of our earlier publication, Part II-B(i) which contains 'Primary Census Abstract' (PCA) for general population. The distinctive feature of the present publication, Part II-B(ii), is that it relates exclusively to the 'scheduled castes', as against the entire population for which the Primary Census Abstract was presented in the earlier volume. The PCA for scheduled castes is presented in this volume for the State, District and Community Development Block, (for total, rural and urban areas for each level, separately) and for each City/Town or Urban Agglomeration in respect of urban areas.

The 'PCA' for scheduled castes given in this volume include the number of households with scheduled caste members, total scheduled caste population, the population of 0-6 age-group, literates, total main workers, the distribution of the main workers in each of the nine broad industrial categories, marginal workers and non-workers with male-female break-up for each of the above items among the scheduled castes.

The compilation and presentation of separate 'PCA' data for the scheduled castes and scheduled tribes as for the total population, are being done since the 1981 Census and separate volumes for the SCs/STs, just as the present one, are brought out. A change has been made in the presentation of data in this volume for 1991, viz. data at Community Development Block level are given instead of for the Taluks, given in the earlier 1981 Census publication. Since the focus on developmental work and planning has now shifted to the Community Development Block, it is presumed that this change in the presentation level would be useful both for Government institutions and other agencies engaged in developmental planning effort. To help those who are not familiar with the 'PCA' and the various census concepts, a descriptive note on the contents of PCA along with the conceptual definitions involved, is given at the beginning. Data on the population of 0-6 ages are also a new addition in the present 1991 PCA. As children below 7 years of age are automatically treated as 'illiterates' in 1991 Census (and the question on literacy is

therefore not applicable to them), data about them will be required by those who desire to work out the effective literacy rates for districts, C.D. Blocks, towns etc. after excluding the figures for 0-6 age-group.

In view of the complexities involved in the enumeration of this category of people, the census enumeration staff were fully trained and the enumeration procedures clearly laid down. The census part-time enumerating staff were provided with a list showing the scheduled castes and scheduled tribes in Tamil Nadu (spelt in both English and Tamil), as per the Presidential scheduled castes and scheduled tribes (Modification) Order, 1956, as amended from time to time. The name of scheduled caste or scheduled tribe as returned by the individual was asked to be verified with this list and the person reckoned as scheduled caste or scheduled tribe, only if the name was found in the list. People who merely returned their Caste/Tribe in general terms as 'Harijan', 'Achhut', 'Adivasi' or 'Girijan' were asked by the enumerating staff to give their actual names so as to check with the list furnished. The names of castes/tribes not included in the notified list were not regarded as scheduled castes or scheduled tribes.

The data presented in this volume have been carefully compiled by proper editing of the census schedules in the various Regional Tabulation Offices and finally consolidated at the Census Directorate at Madras. Individual scheduled caste-wise data are not given here and these are expected to be brought out later, after separate tabulation is done.

The then Registrar General, India, Shri A.R. Nanda, who was instrumental in the organisation and conduct of the 1991 Census operations successfully, had closely guided and monitored the compilation and preparation of the 'PCA' besides other tables. We are immensely grateful to him for his inspiring guidance at every stage culminating in the finalisation of the PCA and other basic tables and in the release of the present volume. We are much obliged to the present Registrar General, India, Dr. M. Vijayanunni, who, with his wide experience and knowledge on Census and Demography guided us and evinced keen interest in the early release of these basic publications containing PCA, General Population

Tables, etc., which are eagerly sought after by the Government Departments and other data users. We are also grateful to Shri M.M. Jha, the former Joint Registrar General, Shri N.Rama Rao, the former Deputy Registrar General, (Census & Tabulation), Shri K.S. Natarajan, Deputy Registrar General (Demography) and Shri S.P. Sharma, Deputy Registrar General, (Census and Tabulation) and other officers of the Registrar General's Office who had rendered much help and guided us in our work both during the census enumeration and the subsequent tabulation.

Shri K. Sampath Kumar, who was at the helm of our organisation at Madras till the middle of 1993 as the Director of Census Operations for Tamil Nadu, and whose services are now with the State Government, had played a dynamic role in the conduct of 1991 Census in the State, the processing of the schedules and the compilation of tables at the Regional Tabulation Offices. The organisation owes a deep debt of gratitude to him. The credit for the close supervision of the 1991 Census work, processing and tabulation of schedules, State-level consolidation, preparation of analytical notes, etc. for the volume belongs to our esteemed former head of office, Shri M. Thangaraju, Joint Director of Census Operations, who much to our misfortune, expired in March 1994. This and the other census volumes containing the manual tables, which are released by the Directorate, would stand testimony to the sincere effort and interest exhibited by him in the various items of work connected with 1991 Census.

The successful completion of the 1991 Census enumeration in the State and the finalisation and release of basic population data in the form of PCA, have indeed been great achievements, considering the numerous problems and challenges that this organisation had to face in the implementation of Census count. In this formidable task, the entire hierarchy of the Tamil Nadu Government, right from the senior-level functionaries at the Secretariat, heads of departments and district level officials down to the village-level personnel was closely involved and participated in the task assigned for each. On behalf of the Government of Tamil Nadu, Shri M. Raghupathy, the Chief Electoral Officer, who was overseeing the census work in the State, had been of

(V)

(IV)

tremendous help in ensuring strict compliance of the instructions issued by the Directorate, in all the districts and by every charge officer, i.e. Tahsildar, Municipal Commissioner, etc. I wish to record the excellent help rendered by him and his officials in steering us through our work and in tackling a variety of problems that arose in the implementation of different stages. I must also thank the Secretaries of the various Departments, and also heads of Departments, in particular, the Departments of Revenue, Education, Rural Development and Municipal Administration for their prompt help and co-operation, whenever sought. The District Collectors who are the District Census Officers under the Census Act, and Commissioners of Municipal Corporations, who are the charge officers, have borne the brunt of census work in their areas and they along with the Taluk/Municipal Charge Officers and Assistant Charge Officers, have done their job very well, contributing to the success of the operation. The Chief Educational Officers and the District Educational Officers, who were designated as Additional and Deputy District Census Officers respectively under the Census Act, for the first time during 1991 Census, also played a notable role, particularly in enlisting the fullest co-operation of teachers as enumerators and supervisors. I also wish to acknowledge the services of the huge army of enumerators and supervisors, numbering a little over one lakh, most of whom are teachers, who did the door-to-door census enumeration, and also the general public in the State, whose response was found, by and large, to be quite good and encouraging.

The basic work, after the field operations, like scrutiny, editing and matching of schedules and the compilation of the PCA was done by the Deputy Directors of Census Operations in the Regional Tabulation Offices. The Deputy Directors who had monitored this work are: S/Shri N. Thangaratnavelu, M. Sanjeevi, N. Shanmugam, S.J. Gunaseelan, A. Kumarasamy, K. Govindarajan, V. Jepamony, K. Thiagarajan, D. Arul Thiagarajan and P. Ramaswamy. The Deputy Directors had been very meticulous in planning and executing the tasks and performed the basic compilation work in accordance with the instructions issued by us. I wish to record our grateful thanks for their sincere and speedy work in regard to the

(VI)

generation of PCA and a few other important manual tables, entrusted to them. Due to the exit of some of the Deputy Directors of the Regional Tabulation Offices, consequent on retirement, reversion to State cadre, etc., some of our own officers had to take charge of the regional offices and attend to the finalisation of PCA and tabulation work. They have done the job neatly and fulfilled their tasks in the Regional Tabulation Offices. These officers are: S/Shri M. Nagappan, A.V. Vallinathan, A.G. Bhaskaran, V. Gangarajan, J. Thomas Machado, R. Narayanan, L. J. Christopher and late T.S. Rajaram. I acknowledge the good work done by them at the Regional Tabulation Offices. I also thank the staff of the ten Regional Tabulation Offices who were associated with this work including the Compilers, Checkers and Supervisors, numbering a few hundreds in each office, who had done their task quite well. The supervisory officials, of the rank of Investigators, Statistical Assistants, etc., deputed by the Directorate, had also performed their job ably and to our satisfaction. The officers of the National Informatics Centre at Madras headed by Shri A. Mohan, Technical Director and ably assisted by S/Shri T.P.S.S. Murthy, Principal System Analyst and A. N. Sridhar, Scientific Officer and a host of other staff of the National Informatic Centre had rendered good help in the computerisation of the data and getting the laser prints. We offer our sincere thanks to them.

The consolidation of the figures for State, district and lower levels, after thorough scrutiny of the abstracts sent by the Regional Tabulation Offices, was done with great care and an eye on accuracy, by several of our officials in the census section. I must acknowledge the role played by Shri R. Lakshminarayanan and Smt. M.V. Rajalakshmi, who as Investigators, had steered the work and had closely supervised the scrutiny and final consolidation. The drafting of the General Note with brief analysis of data was done by Shri R. Lakshminarayanan, Investigator under the supervision of Shri R. Narayanan, Assistant Director. The preparation of maps and charts included in this volume was done under the supervision of Shri Jogesh Das, Research Officer (Map). I am also enclosing a separate list of other staff members of the

(VII)

Directorate, who were involved in different stages of finalisation of PCA and preparation of maps and charts included in this volume and I thank them all for their excellent help.

I thank the Manager, Government of India Press, Coimbatore for the interest evinced and the speedy execution in the printing of this volume.

General Note

This volume Part II-B(ii) is a companion volume of Part II-B(i) - Primary Census Abstract for General Population. It contains Primary Census Abstract which is known as 'PCA', for scheduled castes in Tamil Nadu. Yet another volume under this part, viz. Part II-B(iii) - Primary Census Abstract for scheduled tribes is being brought out separately. The present volume relates to scheduled caste population alone and contains certain basic characteristics of the scheduled caste population such as literates, 0-6 population, main workers (including workers under the nine broad industrial categories), marginal workers and non-workers by sex for total, rural and urban areas at State/ District/CD Block level, and also for each UA, city and town.

Primary Census Abstract for scheduled castes contains data on the following parameters in the sequence indicated. Separate figures of persons, males and females are furnished for each of the items under Sl.Nos.2 to 17 below.

1. No. of households with scheduled caste members;
2. Total scheduled caste population;
3. Total scheduled caste population in the age-group 0-6;
4. Literates;
5. Total main workers (I to IX);
6. Cultivators (I);
7. Agricultural Labourers(II)

8. Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities (III);
9. Mining and Quarrying (IV);
10. Manufacturing, Processing, Servicing and Repairs in Household Industry [V(a)];
11. Manufacturing, Processing, Servicing and Repairs in other than Household Industry [V(b)];
12. Constructions (VI);
13. Trade and Commerce (VII);
14. Transport, Storage and Communications (VIII);
15. Other Services (IX);
16. Marginal Workers and
17. Non-Workers

The various parameters for which data are presented are similar to those published in 1981 Census, but for the inclusion of data on population of age-group 0-6 and the nine-fold industrial classification of main workers, instead of the four-fold classification of main workers in 1981.

Further, the data are now presented C.D.Blockwise instead of for taluks given in the earlier censuses. The compilation of data for Primary Census Abstract for scheduled castes was done from household schedule as in the case of general population. The household schedule, it may be recalled, is one of the two basic census schedules canvassed during 1991 Census by the enumerators in the field,

the other one being the 'Individual Slip'. The last line of the household schedule provides the data for each household. On the basis of entries in columns 10 and 11 of the household schedule, the scheduled caste households were identified and data were compiled from the total figures for each such household, given in the last line of the household schedule. In the case of households having all the members as scheduled castes, the totals in the concerned household schedule have been taken while in the case of households having members belonging to both non-scheduled castes as well as scheduled castes, computation of data had been done for

scheduled castes separately.

According to the Constitution of India, only certain specified castes are to be treated as scheduled castes. There are 76 such recognised scheduled castes in Tamil Nadu and only these castes are treated as scheduled castes in this State. Further, scheduled castes can belong to either of the three religions, Hinduism, Sikhism or Buddhism. Till 1981 Census, the scheduled castes could belong only to either Hinduism or Sikhism. For the first time in 1991 Census, Buddhism has also been added to the list through an amendment made in the Parliament in 1990. The list of scheduled castes in the State is given below.

List of Scheduled Castes

- | | |
|---|---|
| 1. Adi Andhra | 14. Chamar, Muchi |

72. Vathiriyan

73. Velan

74. Vetan (In Kanniyakumari Dt. and Shenkottah Taluk of Tirunelveli-Kattabomman Dt)

The definitions and concepts contained in the various columns of the PCA given in this volume, have vividly been explained in the other volume Part II-B(i) - Primary Census Abstract for general population. For easy reference, a brief account of the same is given in the following paragraphs.

Number of households with Scheduled Caste Members:

This gives the total number of such households which either have all the members of the family as scheduled castes or at least one of the members as scheduled caste. Thus, households which do not have even a single scheduled caste member are excluded from this figure.

Literate:

A person who can both read and write with understanding in any language is considered as a literate. All children aged 6 years and below are treated as illiterates in 1991 Census, even if such a child is going to a school and may have picked up reading and writing a few odd words. Till 1981 Census, all the children aged 4 years and below were treated as illiterates and for the first time, this age limit has been raised to 6 years in this Census.

Definition of Work:

Work may be defined as participation in any economically productive

75. Vettiyan

76. Vettuvan (In Kanniyakumari Dt. and Shenkottah Taluk of Tirunelveli-Kattabomman Dt)

activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. It also includes unpaid work on farm or in family enterprise. The economic questions till 1951 Census were based on income concept while the concept of work, measured in terms of time or the labour force concept was adopted since 1961 Census and this is being continued in 1991 Census also. But in 1961 Census as well as in 1971 Census, a dual reference period was adopted - one for seasonal and another for non-seasonal work. However, there was no change in classifying a person as worker in the case of seasonal work between 1961 and 1971 Censuses; but, in the case of non-seasonal work, one should have worked at least for a day during the week preceding enumeration in 1971 Census instead of a fortnight in 1961. But in 1981 and 1991 Censuses, a single reference period of one year prior to enumeration was adopted both for seasonal and non-seasonal work.

In 1961 and 1971 Censuses, the population was divided into workers and non-workers. But in 1981 Census, workers were further sub-divided into main workers and marginal workers, depending upon the period of participation in economic activity. If a person had worked for the major part of the year, i.e. six months (183 days) or more, during the year preceding the day of

enumeration, he was considered as main worker and if he had worked for less than six months or less than 183 days he was considered as a marginal worker. Persons who had not worked even for a day during the year preceding the day of enumeration were treated as non-workers. The above definition of main worker/marginal worker was continued in 1991 Census also. While in 1981, main workers were divided into four industrial categories for presentation of data in the Primary Census Abstract, now they are shown under nine industrial categories.

The definition in respect of each of these industrial categories are given in the Volume Part II-B(i) - Primary Census Abstract for general population.

Out of the total population of 55,858,946 in the State, 10,712,266 belong to scheduled castes. In 1981, the scheduled caste population was 8,881,295. They now constitute 19.18% of the State's population. It was 18.35% during 1981. The scheduled caste population has increased by 20.62% during the decade. Of the total scheduled castes given above, 8,428,040 are found in the rural areas and the rest viz. 2,284,226 are in the urban areas. The scheduled castes in the rural areas constitute 22.91% of the State's rural population, while in the scheduled castes living in urban areas (cities and towns) of the State constitute 11.97% of State's urban population.

Statement - 1 given below indicates the percentage of scheduled castes in the State and districts, separately for total, rural and urban areas.

It may be observed from the statement that Nilgiri district has the highest proportion of scheduled castes, where the proportion is 30.22%. It is followed by South Arcot district with a ratio of 27.13%. The lowest ratio of 4.80% is recorded in Kanniyakumari district. While comparing the proportion of scheduled castes to total population of all the districts with that of the State, it may be observed that only seven districts have higher ratio than the State average of 19.18%. They are Nilgiri (30.22%), South Arcot (27.13%), Chengalpattu - M.G.R. (25.97%), Thanjavur (24.17%), Tiruvannamalai - Sambuvarayar (21.46%), North Arcot - Ambedkar (20.73%) and Dindigul - Anna (19.41%).

The highest proportion of scheduled castes among rural population is recorded in Chengalpattu - M.G.R. district where a little over one-third of its population belong to scheduled castes (34.94%). South Arcot district with a proportion of 29.68% comes second. In rural areas also, Kanniyakumari district has revealed the least proportion of 4.95% of scheduled castes in its rural areas. On a comparison of the ratios of scheduled castes in rural areas in the districts with the State's rural average ratio (22.91%), we find that the following 7 districts have recorded higher ratio than the State average. Chengalpattu - M.G.R. (34.94%), South Arcot (29.68%), Thanjavur (28.86%), Nilgiri (28.25%), Kamarajar (24.08%), North Arcot - Ambedkar (23.23%) and Tiruvannamalai - Sambuvarayar (22.99%) districts.

STATEMENT-1

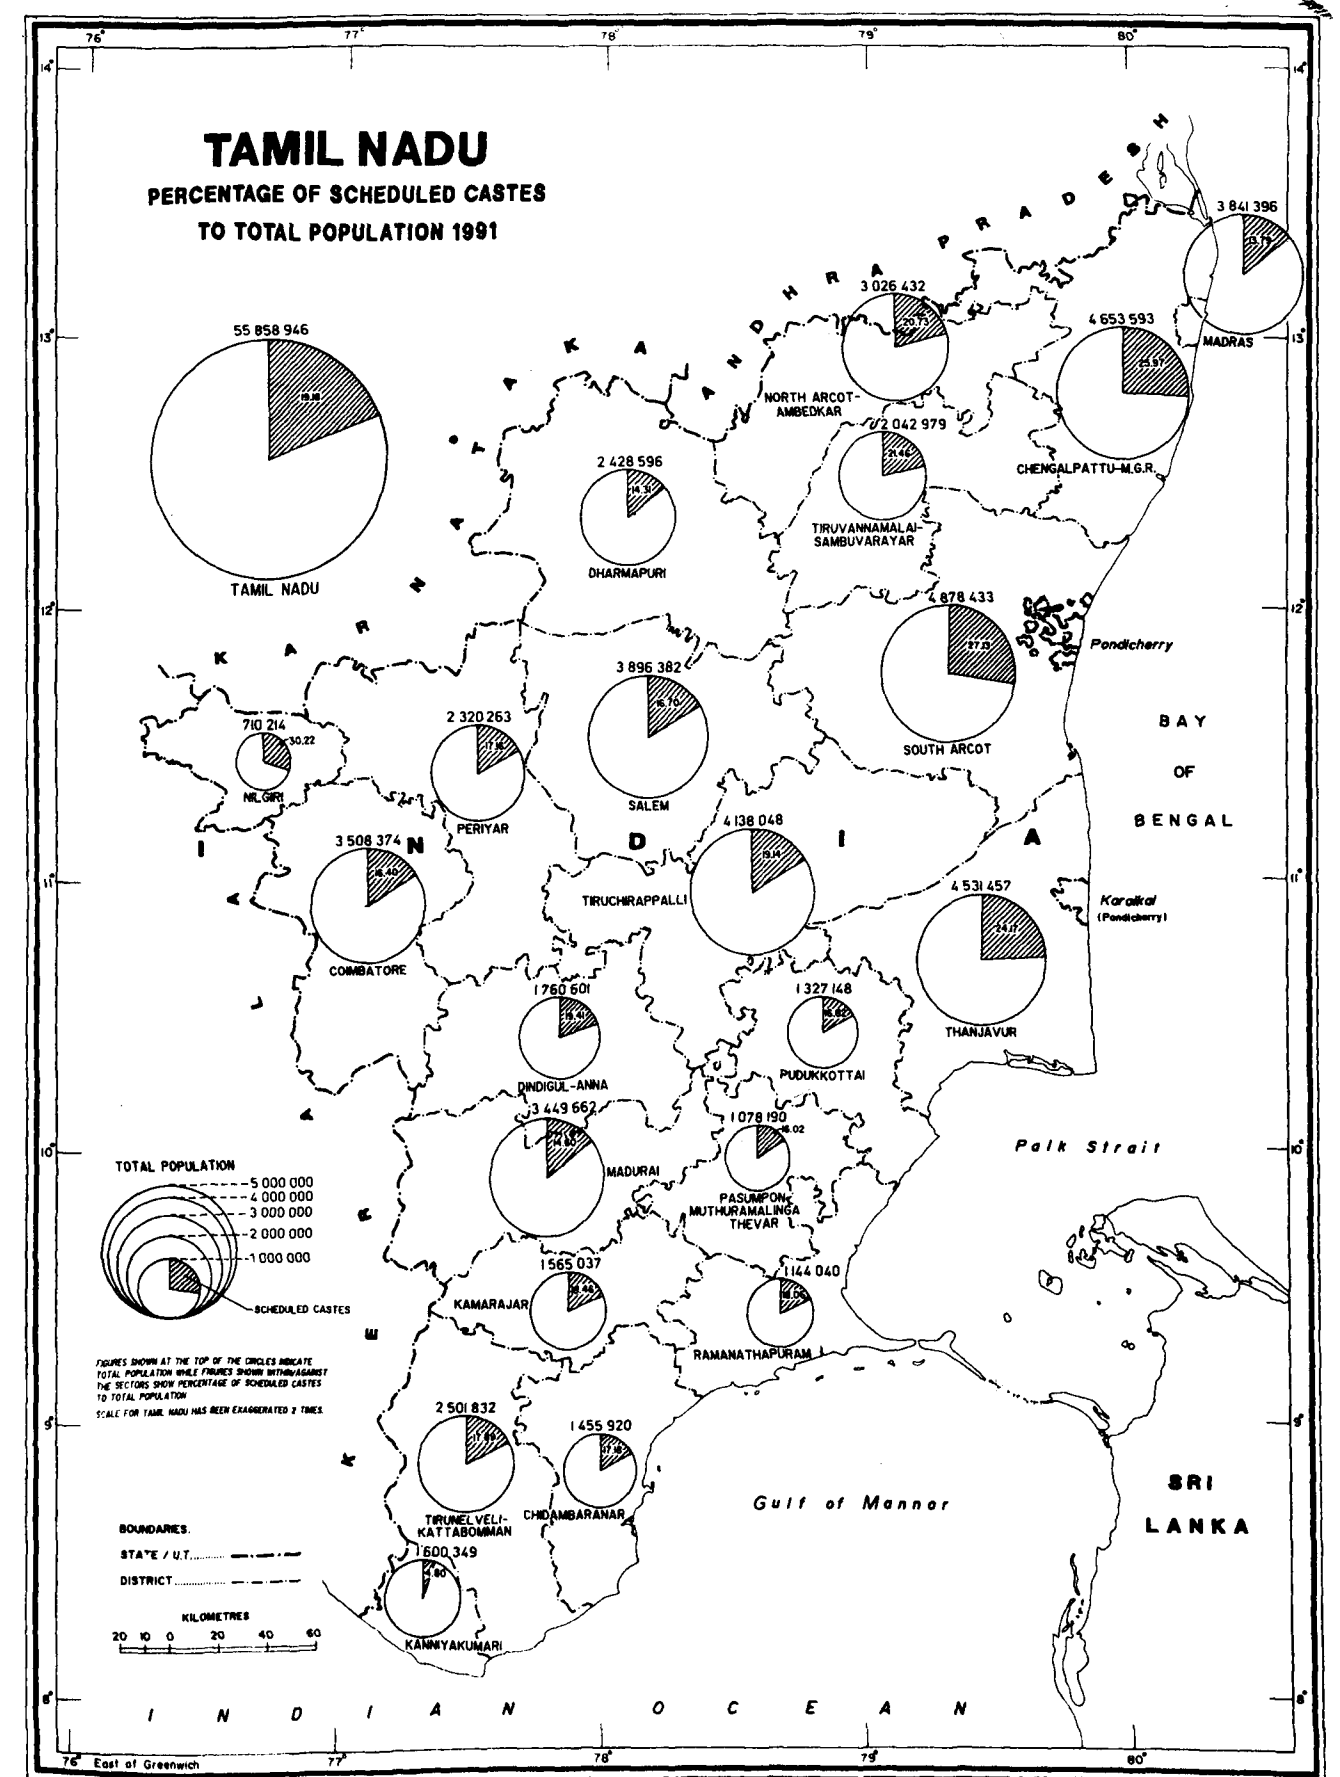

Scheduled Caste population as percentage of total population in rural and urban areas, 1991

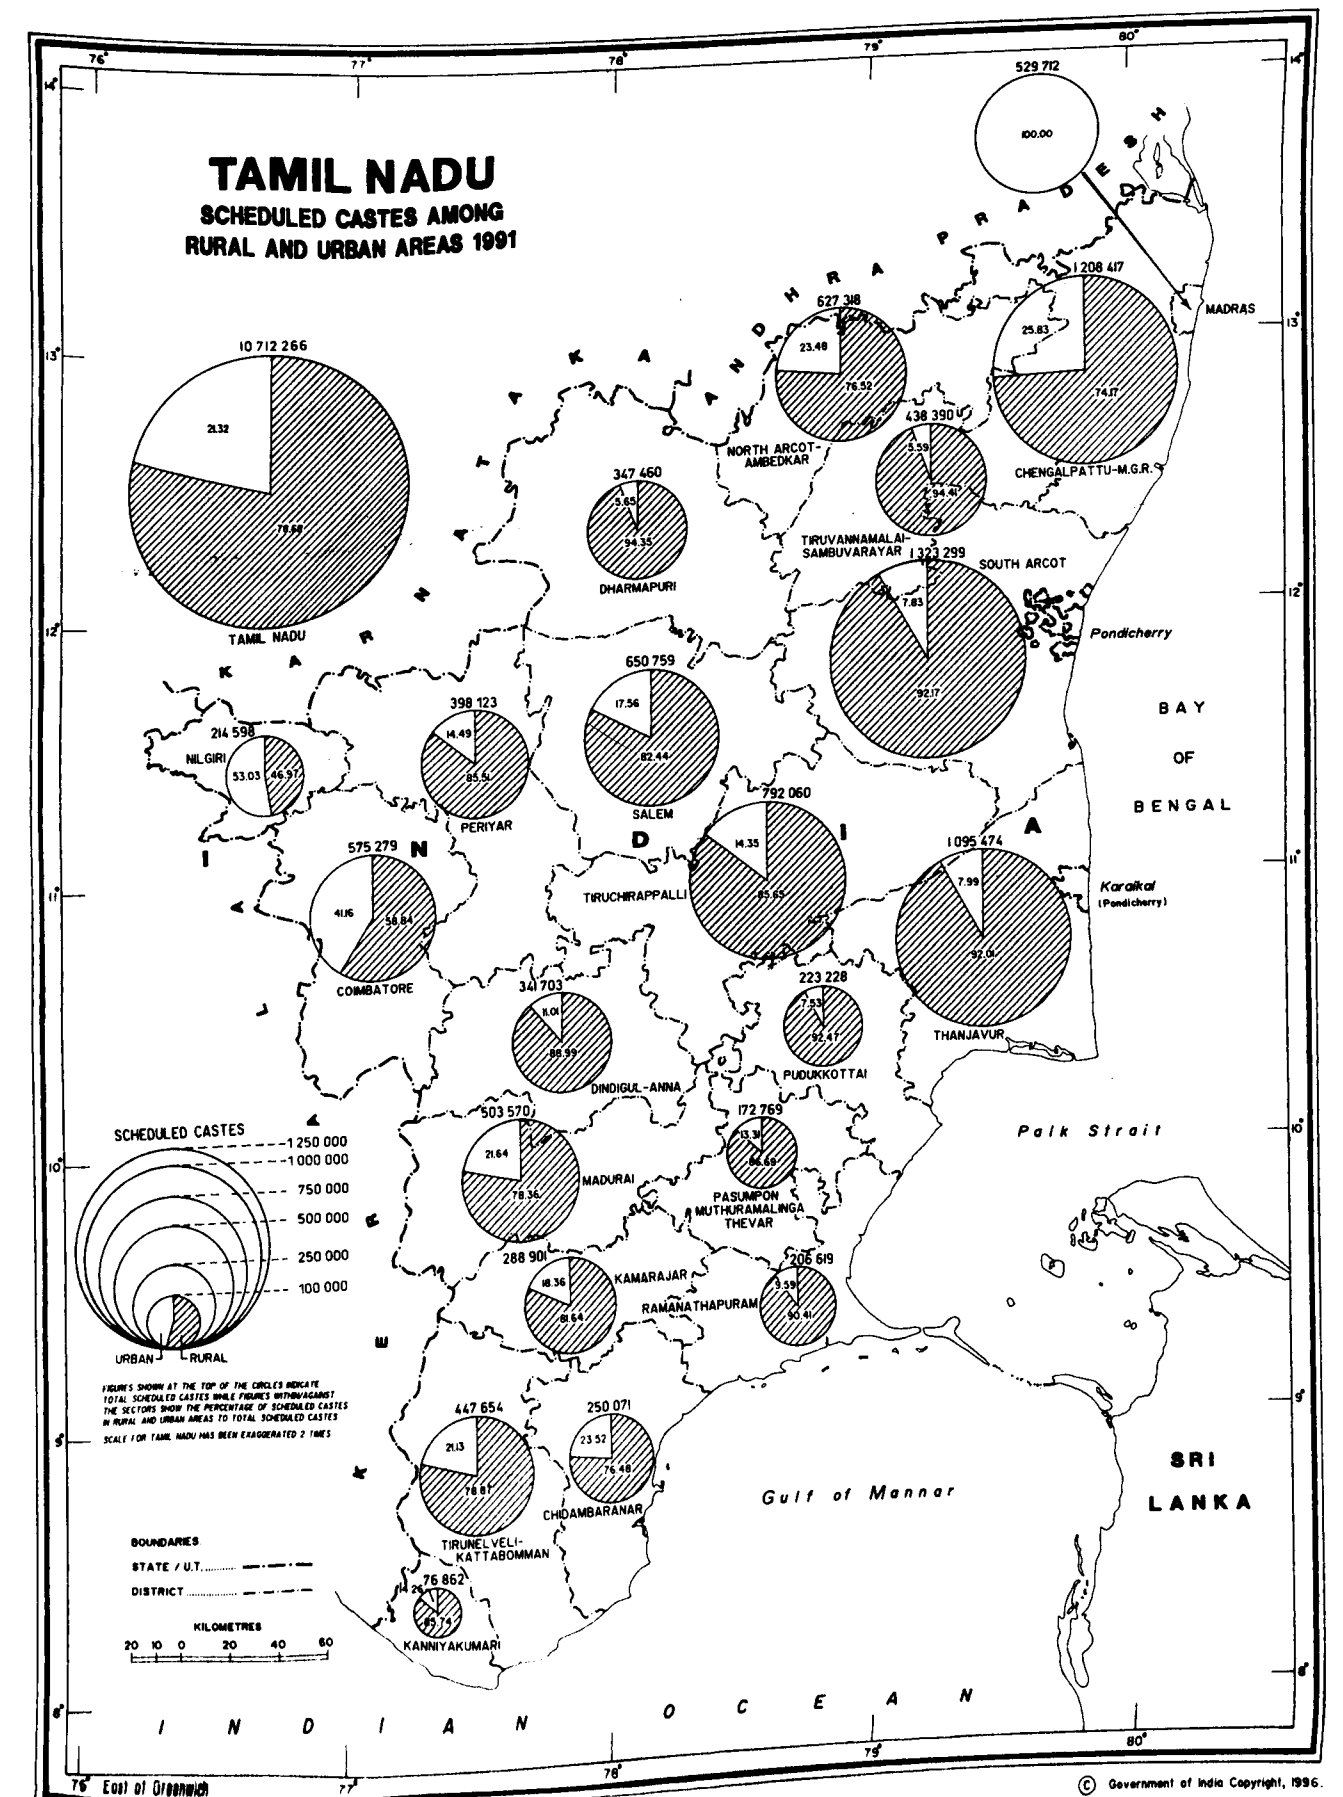

STATE/DISTRICT	Percentage of Scheduled Castes								
	Total			Rural			Urban

Nilgiri district with a proportion of 32.20 per cent has the highest ratio of scheduled castes among urban population. It is followed by North Arcot - Ambedkar district with a ratio of 15.35%. The least of the corresponding proportion in urban areas is recorded in Kanniyakumari district (4.06%). Among the districts, the proportion of scheduled castes in urban areas is higher in seven districts than the State urban average.

They are: Nilgiri (32.20%), North Arcot - Ambedkar (15.35%), Chengalpattu - M.G.R. (14.95%), South Arcot (13.49%), Madras (13.79%); South Arcot (13.49%) and Coimbatore (12.83%) districts.

Statement - 2 given below shows the percentage distribution of scheduled castes between the rural and urban areas of State and districts by sex.

Based upon Survey of India map with the permission of the Surveyor General of India.
 The territorial waters of India extend into the sea to a distance of twelve nautical miles measured from the appropriate base line.

Of the total scheduled caste population in the State, 78.68% are found in the rural areas of the State, while the rest (21.32%) are in the urban areas. When we compare the corresponding rural-urban distribution of scheduled castes in the districts, we find that the proportion of scheduled castes in rural areas is the highest, (viz. 94.35%) in Dharmapuri district and lowest (viz. 46.97%) in Nilgiri district. It may be further seen from the statement that there is greater concentration of scheduled castes in the rural areas than in urban areas in practically all the districts of Tamil Nadu, the only exception being Nilgiri, while Madras is entirely urban. The

concentration of scheduled caste population in rural areas in higher proportions than in the case of general population, can be taken to point out that the various developmental programmes implemented so far had not made much impact in making them move in larger numbers from the rural areas towards cities and towns of the State.

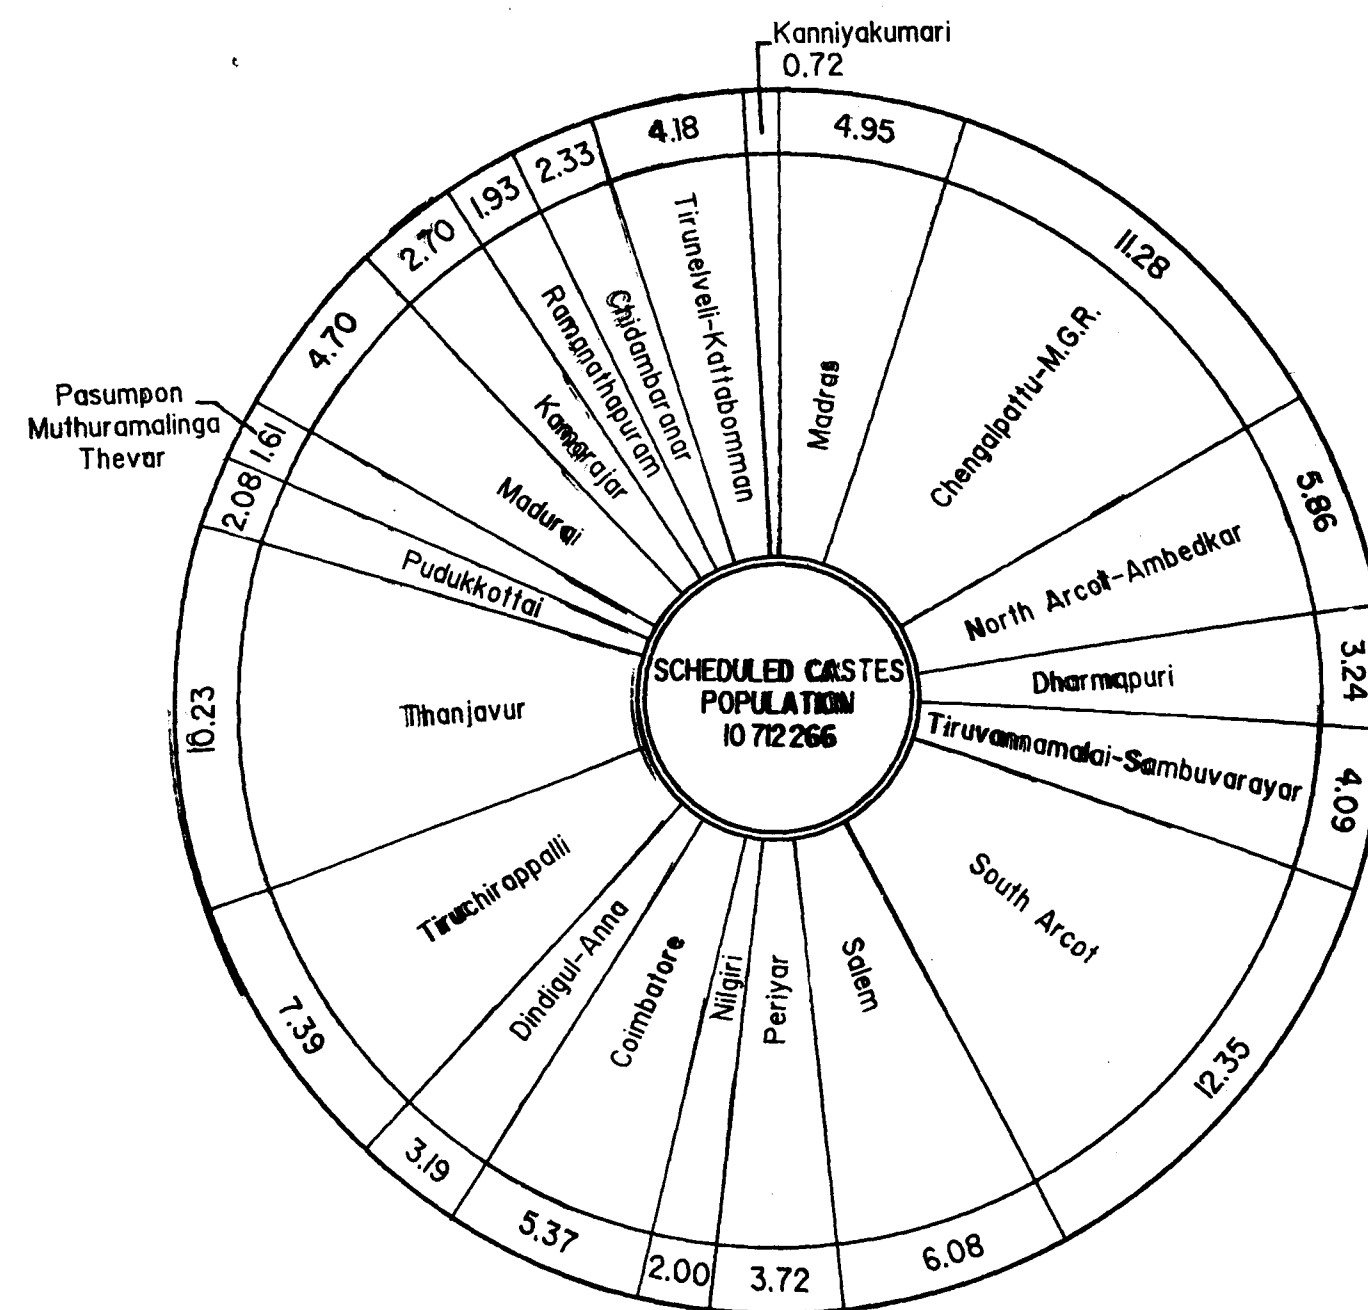

Statement - 3 furnishes the percentage of both the scheduled castes and scheduled tribes put together to the total population in State and districts and the percentage distribution of the State's scheduled caste/scheduled tribe population among the various districts.

TAMIL NADU PERCENTAGE DISTRIBUTION OF SCHEDULED CASTES IN TAMIL NADU AMONG THE DISTRICTS 1991

Based upon Survey of India map with the permission of the Surveyor General, India.

The territorial waters of India extend into the sea to a distance of twelve nautical miles measured from the outermost limit of the territorial sea.

© Government of India Copyright, 1991.

As stated earlier, the scheduled castes constitute 19.18% of the total population of the State in 1991 while the scheduled tribes form 1.03 per cent. Thus, the scheduled castes and scheduled tribes put together constitute 20.21 per cent of total State population. Among the districts, Nilgiri district has the highest percentage of both scheduled castes and scheduled tribes, where just over one third of the population (33.75%) belong to scheduled castes and scheduled tribes. Kanniyakumari district has revealed the least proportion of scheduled castes plus scheduled tribes (5.13%). Besides Nilgiri district, only five other districts in the State have recorded comparatively higher proportion of the combined scheduled caste and scheduled tribe population to total population. They are South Arcot (28.31); Chengalpattu - M.G.R. (27.21); Tiruvannamalai - Sambuvarayar

(24.50); Thanjavur (24.39) and North Arcot - Ambedkar (22.38).

Comparing the percentage distribution of the scheduled caste population of each district to total scheduled caste population of the State, we notice that South Arcot district accounts for the highest proportion of scheduled caste population, where nearly one-eighth of scheduled caste population of the State are found to live. Besides South Arcot district, Chengalpattu - M.G.R. (11.28) and Thanjavur (10.23) are the other districts having more than 10% of the State's scheduled caste population. Kanniyakumari district has revealed the least share of the State's scheduled caste population, the ratio being 0.72 per cent. Statement -4 furnishes the percentage of scheduled castes to total population for Tamil Nadu and its districts as per 1981 as well as 1991 Censuses.

Statement-4

21.Kanniyakumari	4.23	4.80	0.45	0.33

As earlier observed, the percentage of scheduled caste to total population in Tamil Nadu has registered increase from 18.35 in 1981 to 19.18 in 1991. During the decade, it may be observed that the proportion has increased in practically all the districts, Chengalpattu - M.G.R. district being the only exception. The ratio of scheduled caste to total population which was 26.21 in 1981 in this district has declined to 25.97 in 1991. The highest increase during the decade 1981-91 in the proportion of scheduled caste to population is noticed in Nilgiri district where the proportion has increased by 7.18 percentage points during the decade (i.e. from 23.04% in 1981 to 30.22% in 1991). In the other districts the

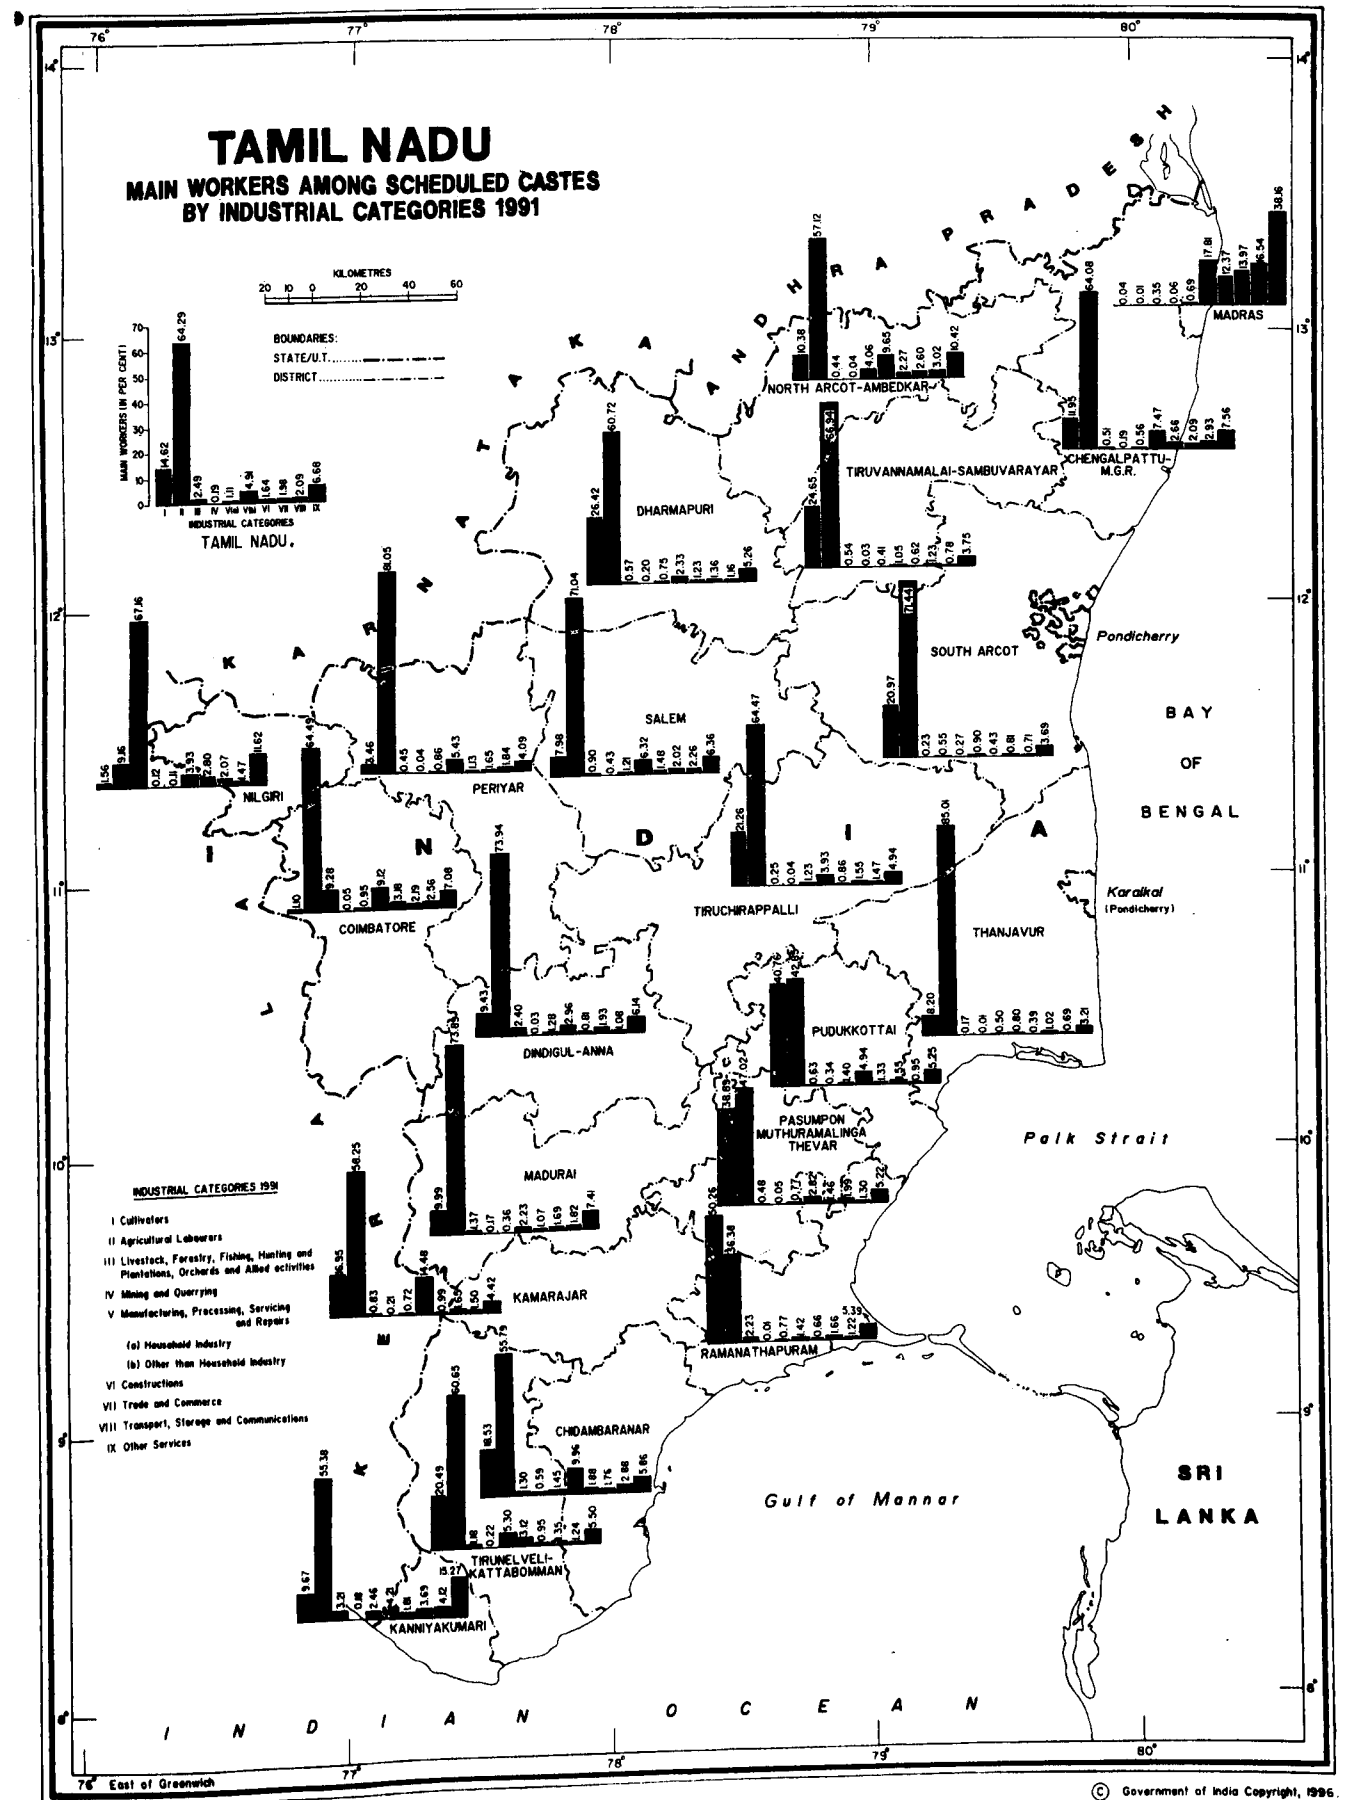

increase varies from 0.16 percentage points in Coimbatore district to 1.47 percentage points in Chidambaranar district. The actual number of scheduled castes in Nilgiri district which was 145,174 in 1981 increased to 214,598 in 1991, registering a growth of 47.82% during the decade as against the decadal growth of 12.70% in the district's total population. The reasons for the steep increase in the scheduled caste population in Nilgiri district in the last decade could perhaps be unravelled only through an in-depth study.

Another important index for measuring the general social development of a group of people is the literacy rate. Literacy rate represents the

Based upon Survey of India map with the permission of the Surveyor General of India.

Based upon Survey of India map with the permission of the Surveyor General of India.
The territorial waters of India extend into the sea to a distance of twelve nautical miles measured from the appropriate base line.

percentage of literates to total population, excluding those in the age-group 0-6. As explained earlier, children in the age-group 0-6 were treated as illiterates in the 1991 Census. Hence the literacy rate has been worked out as the ratio of literates to the

population aged 7 years and above. The following statement (Statement-5) gives the literacy rates among the scheduled caste population, separately for persons, males and females in total, rural and urban areas of state and district.

Statement-5

Literacy Rates, 1991

(The percentages have been calculated on the total Scheduled Caste population exclusive of the population in age-group 0 - 6)

20. Tirunelveli-Kattabomman	48.91	61.08	37.45	47.07	59.20	35.68	55.75	68.01	44.06
21. Kanniyakumari	77.33	83.02	71.69	76.74	82.48	71.04	80.93	86.27	75.61

The literacy rate among the scheduled caste population in the State is 46.74 per cent as against 62.66% for general population. The literacy rate among scheduled caste males is 58.36 per cent while it is 34.89 per cent among scheduled caste females. The corresponding rates for general population are 73.75% for males and 51.33% for females. Comparing the literacy rates among the scheduled castes in the districts, it may be observed that Kanniyakumari district has registered the highest rate (77.33%) as in the case of general population. The next highest literacy rate among scheduled castes is observed in Madras district, where 67.57 per cent among the scheduled castes are literates. One more district where the literacy rate among scheduled castes exceeds 60% is Nilgiri, where it stands at 63.97%. The lowest literacy rate among the scheduled caste is recorded in Periyar District (31.28%). Of the 21 districts, 11 districts have recorded higher literacy rate than the State average of 46.74%.

Both among the scheduled caste males as well as females, the highest literacy rate is recorded in Kanniyakumari district the rates being 83.02% for males and 71.69% for females. The lowest literacy rate for scheduled caste males as well as scheduled caste females is recorded in Periyar district - 39.92% for scheduled caste males and 22.28% for scheduled caste females.

Comparing the rates in each district with the State average

rate, we find that twelve districts have recorded higher rates in the case of scheduled caste males. In the case of females, the rates are more than the State average only in 9 districts.

The literacy rate is 42.50% among the scheduled Caste population living in the rural areas. Among rural male scheduled castes 54.47 per cent are literates while only 30.30 per cent of rural female scheduled castes are literates. Kanniyakumari District accounts for the highest literacy rate among rural scheduled castes for persons (76.74%), males (82.48) as well as females (71.04), while the lowest rates are recorded in Coimbatore district, the rates being 26.95% for persons; 34.98% for males and 18.67% for females. The literacy rates for scheduled castes in the rural areas are higher in 11 districts than the State average of 42.50 per cent for persons, while it is so in 13 districts in the case of males and in 11 districts as regards females.

Based on economic activity, the population is divided into main workers, marginal workers and non-workers with reference to their activity during the one year preceding census enumeration. Statement - 6, given below presents the percentage distribution of scheduled caste population as main workers, marginal workers and non-workers for State and districts, separately for persons, males and females.

Statement-6

Percentage Distribution of Scheduled Caste population of each Sex into Total workers, Main workers, Marginal workers and Non-workers in Districts, 1991

It can be seen from the statement that a large majority of the main workers among scheduled castes (64.29%) are engaged as agricultural labourers in 1991. The corresponding proportion of main workers under the category in 1981 was 62.93 per cent.

The proportion of main workers returned as cultivators is 14.62 per cent. 'Mining and quarrying' category has the least proportion of scheduled caste main workers (0.19%). The proportion of main workers with 'agricultural labour' as main activity is 76.88 per cent in the case of females as against 56.27 per cent for males. 'Agricultural labour' is observed to be the main source of livelihood among workers belonging to scheduled caste in most of the districts of the State. In the city district of Madras, the highest proportion of main workers among scheduled castes (38.16%) is found to be engaged in 'Other Services'. In the hilly Nilgiri district, the highest proportion of the main workers belonging to scheduled caste (67.16%) is in the industrial category, 'Livestock, Forestry, Fishing, Hunting and Plantations, Orchards & allied activities'.

It is well known that there are subtle variations in the engagement of male and female workers as between different industrial categories and this is reflected in the census figures also. Female scheduled caste main workers are also accordingly found in much lower ratios, in categories like non-household industries or factory sector of manufacturing industries, trade and commerce, construction, transport and other services, etc. when compared with the percentage distribution of male workers in such categories, as seen from Statement - 7.

A comparison of the sex ratio (number of females per 1000 males) in each industrial category will throw further light on the industrial category in which the participation of females is comparatively much more and which are perhaps more conducive for women's participation. Statement - 8 furnishes the sex ratio among total scheduled caste population, total workers, main workers, marginal workers and each of the nine broad industrial categories of main workers.

STATEMENT - 8

Sex Ratio (females per 1000 Males) among Total Scheduled Caste Population, Total (MAIN WORKERS + MARGINAL WORKERS), Main Workers, each category of workers, Marginal Workers and Non-Workers in Total, Rural and urban Areas of each District

As against the sex ratio of 978 for total scheduled caste population in the State, the ratio among the total scheduled caste workers is 718. The very high sex ratio recorded for scheduled caste marginal workers reveals the high participation of scheduled caste women in marginal work than men. The extent of non-workers is known generally to be much higher among females than males and this is reflected by a high sex ratio of 1307 among scheduled caste non-workers. Of the nine industrial categories of workers, the highest sex ratio is recorded in Household Industry (929) and the lowest is in the category 'Transport, Storage and Communication' (30).

In the case of rural areas of the State, the sex ratio among the scheduled caste main workers is 700 as against 365 in urban areas. This shows that fewer numbers among the scheduled caste females are working in cities and towns of the State. 'Household Industry' has the highest sex ratio in rural areas (1038)

representing comparatively more female participation in this category of work and Livestock, Forestry, Fishing etc. has recorded the highest (919) in urban areas. Both in rural and urban areas, the least participation of females is observed in the category 'Transport, Storage and Communications'.

On a comparison of the sex ratio among scheduled caste workers in the districts, we notice that the participation of scheduled caste females is less than the scheduled caste males in all the districts, the only exception being the rural areas of Tirunelveli - Kattabomman district where the sex ratio is 1024. It implies that the scheduled caste female participation in economic activities in the rural areas of this district is more than the scheduled caste males. Of all the districts, Madras district has recorded the lowest ratio of 165 female scheduled caste workers for every 1000 scheduled caste male workers, signifying a very low participation of women among the workers in this city district.

FOR SCHEDULED CASTES**

**STATE/DISTRICT PRIMARY CENSUS ABSTRACT
FOR SCHEDULED CASTES**

FLY LEAF

The PCA for scheduled castes contains certain basic census particulars pertaining to scheduled caste population like number of households with SC members, total scheduled caste population, total scheduled caste population in the age-group of 0-6, literates, number of main workers, marginal workers and non-workers among scheduled caste population. The main workers have been further classified into nine broad industrial categories, viz. I - Cultivators, II - Agricultural Labourers, III - Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities, IV - Mining and Quarrying, V(a) - Manufacturing, Processing, Servicing and Repairs in Household Industry, V(b) - Manufacturing, Processing, Servicing and Repairs in other than Household Industry, VI - Construction, VII - Trade and Commerce, VIII - Transport, Storage and Communications, and IX - Other Services. Data for each of the above characteristics are given by sex as also for total, rural and urban areas. The figures are presented for the State as a whole, its 21 districts and 385 CD blocks (Panchayat Unions). Under each district, data for the CD blocks falling under it are presented along with the towns falling under the CD block. After the data for all the CD blocks in a district are presented, figures for each Town/Urban Agglomeration in the district are furnished. In the case of Urban Agglomerations extending to more than one district, data

for the Urban Agglomeration and their constituent units are given at the end in an Annexure.

The population in the age-group of 0-6 is presented in the Primary Census Abstract for the first time in 1991 Census in order to facilitate the data users to arrive at the literacy rates at CD block/town level also.

The following abbreviations have been used to indicate the civic status of the towns.

- | | |
|-----------------|---------------------------------|
| 1. M.Corpn. | - Municipal Corporation |
| 2. M | - Municipality |
| 3. M.T.S. | - Municipal Township |
| 4. T.S. | - Township |
| 5. P.T.S. | - Panchayat Township |
| 6. T.P. | - Town Panchayat |
| 7. V.P. | - Village Panchayat |
| 8. Cantt. | - Cantonment |
| 9. S.Rly.Admn.- | Southern Railway Administration |
| 10. N.M.A. | - Non-Municipal Area |

Towns classified as urban in 1981 and continued as such in 1991 also are marked with two asterisks. Towns classified as urban for the first time in 1991 are marked with one asterisk.
