PART VA & VB - D Series

MIGRATION TABLES

VOLUME - 1

Tables D-1, D-2, D-3 and D-4

FOREWORD

The migration tables of the 1991 Census are mainly based on the questions on place of birth, place of last residence, duration of residence at the place of enumeration and reason for migration (Question 18-21) included in the individual slip. These tables generated on computer provide the distribution of population by place of birth, distribution of migrants by place of last residence, duration of residence and reason for migration. The data on intra-district, intra-state and inter-state migration streams and in-migration from abroad are presented in these tables. Information on educational level and work participation of migrants are also available in the migration tables.

2. In the 1991 Census 18 tables have been prepared on migration. Of these, 15 tables are based on a 10 percent sample in states with a population of 10 million and above and on full count basis in the remaining states and union territories. The remaining 3 tables dealing with migrants among main workers other than cultivators and agricultural labourers have been prepared on the basis of full count in all states and union territories.

3. The migration tables have already been released to data users on floppy disks usable on personal computers. These are now being brought out in printed form. Some of the tables which are very voluminous have been divided into parts for convenience of reference.

4. The general note on the migration tables of the 1991 Census which gives detailed information regarding presentation of tables, concepts used and the relevant question along with the relevant extracts from the manual of instructions to the enumerator is given in each volume for ready and comprehensive reference of the user.

5. A separate fly-leaf is also given for each table regarding the contents of the table.

6. The 1991 Census Operation were conducted under the overall guidance of my predecessor Shri A. R. Nanda. The work of coding and editing of Individual Slip records were completed in the Directorate of Census Operations and the job of data entry was done in the Direct Data Entry Centre of this organization. Thereafter editing and tabulation on computer was done in the Data Processing Division at the headquarters. The dissemination of data on computer media and preparation of camera ready copy of the publications were also done in the Data Processing Division.

7. The job of scrutiny of the computerised tables, preparation of notes of this publication and arranging the printing of this publication was carried out in the headquarters. The scrutiny of the quality of tables was done by a Task Force of officers of this office specially constituted for this purpose.

8. I hope this publication will prove useful to administrators, planners, demographers, research scholars and other data users.

GENERAL NOTE ON THE MIGRATION TABLES

Migration is an important aspect in the field of population study. A community or a country can gain population either by births or by in-migration and it can lose population by deaths among its residents or by out-migration. In other words, migration is a major factor in changing the size and structure of the population. The migration process affects the areas to which migrants have moved in and areas from which they moved out.

Till 1961, migration data were collected and presented with reference to the place of birth. If a person was born at a place other than the place of enumeration, he was treated as a migrant in census returns. In censuses upto 1951, a question on birth place was asked. The data presented related to the number of migrants by sex. In 1961 census, an effort was made to widen the scope of enquiry and collected information on: (i) Birth-place statistics, (ii) Birth-place (rural and urban), (iii) Duration of residence, if born elsewhere. But these statistics did not account for the more recent movement of a person. Thus a person who had migrated elsewhere for all practical purposes and happened to be at the place of birth during the period of enumeration, was treated as a non-migrant at the census.

In 1971 census migration data were collected for the first time on the basis of place of last residence in addition to the question of birth place. The questions were:- I. Birth-place, (a) place of birth, (b) rural/urban, (c) district, (d) state/country; II. last residence, (i) (a) place of last residence, (b) rural/urban, (c) district, (d) state/country, (ii) duration of residence at the village or town of enumeration.

In 1981 census, the scope of enquiry on migration was further widened by collecting information on 'reasons for migration from place of last residence'. The reasons for migration from place of last residence included in 1981 census were (a) Employment, (b) Education, (c) Family moved, (d) Marriage and (e) others. In 1991 census, two more reasons namely 'business' and 'natural calamities like drought, floods, etc.' were added.

The data on migration in 1991 census have been collected through the Individual Slip. The specimen of Individual Slip is given in Appendix-I. The following questions relating to migration were put to the respondents through the Individual Slip.

Q. 18 Birth Place

- (a) Place of birth
- (b) Rural/Urban
- (c) District
- (d) State/Country

Q. 19 Last residence

- (a) Place of last residence
- (b) Rural/Urban
- (c) District
- (d) State/Country

Q. 20 Reasons for migration from place of last residence

- (a) Employment (b) business (c) education (d) family moved (e) marriage (f) natural calamities like drought, floods, etc. and (g) others

Q. 21 Duration of residence at the village or town of enumeration

On the basis of data collected through the above mentioned questions as per the instructions given to the enumerators reproduced in Appendix-II, a series of tables on migration have been generated in two stages. In the first Stage, the tables are based on 100 percent data for smaller states & union territories and a 10 percent sample for major states. A note on sampling and estimation procedure used for

generating these tables is given in Appendix III. Second Stage tables are based on 100 percent data for all states & union territories. The tables covered under each stage are listed below

Stage I

D-1	Population classified by place of birth.
D-2	Migrants classified by place of last residence and duration of residence in place of enumeration.
D-3	Migrant by place of last residence, duration of residence and reasons for migration.
D-4	Main-workers, marginal workers, non-workers, those non-workers seeking work and literacy from among migrants reporting 'employment' as reason for migration by age, sex and duration of residence.
D-5	Migrants from rural areas within the state of enumeration reporting 'employment' as reason for migration by age, sex, educational level and duration of residence-Urban.
D-6	Migrants from urban areas within the state of enumeration reporting 'employment' as reason for migration by age, sex, educational level and duration of residence - Urban.
D-7	Migrants from rural areas outside the state of enumeration reporting 'employment' as reason for migration by age, sex and educational level and duration of residence - Urban.
D-8	Migrants from urban areas outside the state of enumeration reporting 'employment' as reason for migration by age, sex, educational level and duration of residence - Urban.
D-9	Migrants reporting 'employment' as reason for migration, now seeking work by age, sex, educational level and duration of residence - Urban.
D-10	Migrants by place of last residence to cities by reason for migration
D-11(S)	Migrant workers by place of last residence by industrial category.
D-13	Migrants from place of last residence by age, sex, educational level and duration of residence.
D-15	Persons born in other districts of the state and enumerated in this district
D-16 Part A	Migrants by place of last residence with duration of residence of 0-9 years by age and sex -Urban.
D-16 Part B	Migrants by place of last residence with duration of residence of 0-9 years by age and sex -Rural.
D-17	Migrants by literacy, main workers, marginal workers and non-workers among them.

Stage II

D-11(F)	Migrant workers (other than cultivators and agricultural labourers) by place of last residence and industrial category.
D-12	Migrant workers (other than cultivators and agricultural labourers) from place of last residence by occupational Division.
D-14	Migrant workers (other than cultivators and agricultural labourers) reporting 'employment' as reason for migration by duration of residence, educational level, occupational division and sex.

APPENDIX-II

INSTRUCTIONS TO ENUMERATORS FOR RECORDING THE ANSWERS TO THE QUESTIONS IN INDIVIDUAL SLIP RELATING TO MIGRATION TABLES

Q. 3: Male (1)/Female (2)

For male, write '1' and for female write '2' in the box provided against this question. For eunuchs and hermaphrodites, write '1' in the box. Verify with reference to the name and relationship to head recorded under columns 2 and 3 respectively of the Household Schedule that you have noted the sex correctly.

Q. 4: Age

Record the age of the person in total years completed last birthday in the rectangle provided against this question. The age should be recorded in international numerals. Very often, there is a tendency on the part of individuals to return 'years running' rather than 'years completed'. Make sure that only the actual number of years completed is recorded. In respect of infants who might not have completed one year by the day of enumeration, their age in completed years must be shown as '0' as they have not yet completed one year of age. Make sure that infants even if one day old are invariably enumerated. You should not enter the age in months. The age of an infant who has not yet completed one year should invariably be noted as '0' only.

Q. 5: Marital Status

In answering this question use the following abbreviations:

For never married, write 'NM'

For currently married, write 'M'

For widowed, write 'W'

For separated or divorced, write 'S'

The entry is to be made in the manner indicated below:

- For a person who has never been married at any time before, write 'NM'
- For a person currently married, whether for the first or another time and whose marriage is subsisting at the time of enumeration with the spouse living, write 'M'. Write 'M' also for persons who are recognised by custom or society as married and for the persons in stable de facto union. Even if a marriage is disputed in the locality, write 'M' if the person concerned says he or she is married or is in stable de facto union.
- For a widowed person whose husband or wife is dead, and who has not been married again, write 'W'
- For a person who has been separated from wife or husband and is living apart with no apparent intention of living together again or who has been divorced either by decree of a law court or by an accepted social or religious custom but who has not re-married, write 'S'.
- For an independent woman return her marital status as declared by her.

This question must be answered for all persons irrespective of age. For very young children, though we may know that they are not married, the appropriate abbreviation must be entered. 'M' is the

abbreviation for 'currently married'. The word 'currently' does not mean 'recently'. It only means 'at present'. For example, a man may be 80 years old and may have been married 50 years ago, if his wife is still alive and the marriage subsists, they are 'currently married'.

The only conditions for the marital status to be reckoned as 'currently married' are that the man and woman are both alive and that their marriage subsists i.e., they are not divorced or separated. Please note that we are not concerned with the legality of a union.

The entry as above will have to be made on the line and not in the dotted box.

Q. 11: Literate (1)/Illiterate (2)

Definition of a literate: A person who can both read and write with understanding in any language is to be taken as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

For a person who is literate, i.e., who can both read and write with understanding in any language write '1' in the box provided against this question. If there is any doubt about a person's ability to read or write, the test that may be applied for reading is his/her ability to read any portion of the printed matter in the Enumerator's Instruction booklet (provided the person is familiar with the Language used in the booklet) and similarly, for writing, he/she should be able to write a simple letter. Ability merely to sign one's name is not adequate to qualify a person as being able to write with understanding. If a person claims to be literate in some other language with which the enumerator is not acquainted, the respondent's word has to be taken as correct. Other members of the household may also be able to testify to the literacy of the person enumerated.

For a person who is illiterate, i.e., who can neither read nor write or can merely read but cannot write in any language, write '2' in the box against this question. All children of the age of 6 years or less should be treated as illiterate even if the child is going to a school and may have picked up reading and writing a few odd words.

Q. 12: Educational Attainment

This question will be asked of only those who are literate and for whom '1' has been recorded against Question 11. For a person who is illiterate and for whom '2' has been recorded in the answer to Question 11, there is no question of ascertaining the educational attainment even if he/she had at some stage attended school and passed a standard and had relapsed into illiteracy. In such a case, you should put a dash (—). We are insisting that a dash (—) should be put if there is no educational attainment and not a cross (X), because we want to avoid confusion with 10th standard which a cross may signify. You will have to ascertain and record the highest educational level attained by a person for literate, i.e., for whom '1' is recorded in answer to Question 11.

For a person who is still studying in a particular class, the highest educational level attained by him/her will be one that he/she has actually passed and not the one in which he/she is studying. For example, a person studying in 1st year B.A. should be recorded as only 'PUC' or 'Higher Secondary or Senior Secondary (10+2)' as the case may be. Similarly, for a person studying say, in the 4th year of M.B.B.S., his/her educational attainment should be 3rd year of M.B.B.S., which is the highest level he/she has actually attained. You must record the actual standard passed such as, III standard, VIII standard, 1st year B.Com. etc., However, if a person merely says that he/she has passed primary, middle, matriculation, school final, higher secondary or senior secondary (10+2) or other definite levels, record him/her as such.

The highest educational level attained by the person enumerated should be recorded. When a person holds both general and technical qualifications, both of which are of equivalent level or of varying levels such as B.Sc.(Zoology) and M.B.B.S. or B.A.(Maths) and B.E.(Bachelor of Engineering), both the

technical and general qualifications should be recorded against this question. In the case of pass courses, indicate the degree only.

In recording the educational level of a graduate or a post-graduate, the major subject such as B. Sc. (Maths), M.A. (Economics), M.Sc. (Botany), B.Sc. (Agriculture), etc. should be noted. You should not use abbreviations which are not in common use. In such cases, the degree or diploma should be spelt out fully. For example, M.A. (Hindi) and Diploma in Library Science or M.A. (Sociology) and Diploma in Labour Relations. Adequate space has been provided in the slip and you are urged to record the qualification accurately and in sufficient detail. This information is vital for manpower planning and should receive your careful attention.

The Post-graduates and also those with a technical degree or technical diploma and those with certificates from the Industrial Training Institute (ITI) were asked during the census to fill Post-graduate degree holders and technical personnel schedule and filled in schedules were collected during revisional round between March 1 to 5, 1991. This information was readily available to ascertain information regarding educational attainment against question 12 of the Individual Slip. While issuing the Post graduate degree holder and technical personnel schedule for each eligible person in the household, the location code was noted on the schedule and tick (✓) was put against question 12 of the person concerned for whom a post graduate degree holder and technical personnel schedule had been issued. A statement was prepared giving the number of blank schedules received, number of schedules issued to eligible persons, number of filled in schedules collected and number of blank schedules returned by enumerator to his/her supervisor. The persons have been identified with the help of tick (✓) against question 12 of the Individual slip of person concerned for whom a schedule had been issued. The account of schedules issued to eligible persons was maintained. During the revisional round between March 1 and 5, 1991 all the post graduate degree holder and technical personnel schedules issued to the member of the households, in the jurisdiction of enumerator were collected by him/her and handed over to the supervisor, while collecting these schedules a reverse stroke (l) was put on the tick (✓) against question 12 of the Individual concerned. The marking appeared as (X) to signify that the filled in schedule in respect of that individual had been collected. The Individual had been told that if he/she was unable to return it to the enumerator when he had to fold the form, paste and post it and no postage was required as this was paid by the addressee.

Q. 13: Attending School/College, Yes(1)/No(2)

After you have recorded the answer to Question 12, you have further to ask whether the person whom you are enumerating is attending any school or college. If the answer is 'Yes' you have to record '1' in the box provided against this question. If the answer is 'No', you should record '2' in the box. Please note that illiterates (code 2 against Question 11) can be found attending school. Therefore, this question should be asked of all persons, including elderly men and women.

In recording answers to this question you are not required to ascertain whether the school/college being attended by the person enumerated is a recognised or unrecognised institution. The choice should be left to the respondent as to whether the person is attending school/college. Thus, if a person is receiving education through a correspondence course or attending some vocational course or attending the Adult Education Programme and returns himself as attending school/college, he/she will be entered as such and code '1' will be recorded in the box against this question.

ECONOMIC QUESTIONS

In the 1991 Census we intended collecting information regarding the economic activity of the people in great detail so that those who use these data have the type of information they want. The economic questions consist of the following

- | | |
|---|---------------------------|
| I. Q. 14A Did you work any time at all last year ?
(Including unpaid work on farm or in family enterprise) | Yes
No(H/ST/D/R/B/I/O) |
|---|---------------------------|

Q. 14B If 'Yes' in 14A, did you work for major part of last year? Yes(1)/No(2)

- | | |
|--------------------------------------|---|
| II. Q. 15A Main activity last year ? | 'Yes' in 14B (C/AL/HH/OW)
'No' in 14B (H/ST/D/R/B/I/O) |
| Q. 15B | 'Yes' in 14B—Any other work any time last year? Yes (C/AL/HH/OW)/No
'No' in 14B—Work done any time last year? (C/AL/HH/OW) |

- | | |
|---|------------------|
| III. Q. 16A If 'No' in 14A, seeking / available for work? | Yes (1) / No (2) |
|---|------------------|

Q. 16B If 'Yes' in 16A, have you ever worked before? Yes(1)/ No(2)

These questions must be canvassed for every person, irrespective of age or sex. Every person must be asked Question 14A, including the very young or very old and the answer to this question must be filled in. The other questions will have to be filled in the case of those to whom they are applicable. The instructions for filling these questions follow.

These questions are meant to get details of the work done by the people with reference to last year. We may, therefore, first consider what is meant by 'work' and what the 'reference period' is.

Definition of work

Work may be defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. It also includes unpaid work on farm or in family enterprise.

Reference Period

In all the questions except Question 16B, the reference period is the one year preceding the date of enumeration. Certain types of work such as agriculture, household industry like, *Gur* making, etc., are carried on either throughout the year or only during certain seasons or parts of the year, depending on the local circumstances. In such cases what we are concerned with is the broad time-span of the agricultural seasons preceding the enumeration. For Question 16B, the reference period is any time before one year preceding the date of enumeration.

Explanation

There should be no confusion regarding these questions. What we are trying to find out is the number of workers and non-workers and among the workers those who had worked for the major part of the year and those who did not worked for the major part of the year. Details of their activity are also collected. The number of non-workers seeking for work and those among them who had not worked before are also collected.

Question 14A seeks to find out if a person has done any work at all (including unpaid work on farm or in family enterprise) during the last year or whether he or she did not work at all and if it is the latter, how the person spend his/her time as a non-worker. Then Question 14B seeks to find out who among the persons returning 'Yes' in Question 14A had worked for the major part of the year. By major part of the year is meant 6 months (183 days) or more. Those who had worked for the major part of the year are termed as 'Main workers'. Those who had not worked for the major part of the year i.e., those who had worked for less than six months (183 days) in the year are termed as 'Marginal workers'. Those who had worked for 6 months or more, will answer 'Yes' for Question 14B. For them code '1' has to be recorded in the box. But those who have worked for less than six months or 183 days will say 'No', and for them code '2' is to be recorded in the box for this question. Question 15A seeks to elicit information on the activity of the main workers in Question 14B i.e., those for whom code '1' has been recorded in the box. It will also

elicit information about the main activity of the 'marginal workers' covered in Question 14B, i.e., those who have returned 'No' and for whom code '2' has been recorded in the box against Question 14B.

A person may have worked for six months or 183 days or more in one or more than one activity. If he/she has worked for 3 months in cultivation, one month in *Gur* making and 3 months as an agricultural labourer in Question 15A, he/she is required to indicate which of these three activities according to him/her was his/her main activity, i.e. in which capacity he/she spent more time. In the instant case since the person has spent three months each in cultivation and as agricultural labourer the choice as to which of these two would be his/her activity should be left to him/her. The other work or the secondary work he/she was engaged which has not been entered in Question 15A would be entered in Question 15B. Those who have returned 'No' for Question 14B, i.e. those who have worked for less than six months or 183 days during the last year and for whom code '2' has been recorded in the box, will have to state whether according to them, they were engaged mainly in household duties, or a student, or dependent or as retired person, rentier, or beggar or inmates of institutions, and if not in any of these categories, the person(s) should be put under 'Others' in Question 15A.

In Question 15B, details of secondary work or marginal work are sought to be obtained. Those who have worked for the major part of the year i.e., those for whom code '1' has been recorded in the box against Question 14B, may have had secondary work and this should be entered in Question 15B. The secondary work will be cultivation if agricultural labour has been returned as main activity in Question 15A and vice-versa. Those who have not worked for the major part of the year and for whom code '2' has been recorded in the box against Question 14B, must have done some marginal work and these details will be entered in Question 15B. It is important that probing questions are asked to elicit correct information.

In Question 16A, it is proposed to ask all persons returning 'No' in question 14A, i.e., H/ST/D/R/B/I/O in question 14A, whether he or she has been seeking work or is available for work. Question 16B seeks to find out who among the Non-workers returning 'Yes' in question 16A had ever worked or not before. Those who had worked any time before will answer 'Yes' for question 16B and for them code '1' has to be recorded in the box. But those who had not worked any time before will say 'No' and for them code '2' is to be recorded. The main purpose of this question is to elicit information regarding the fresh entrants in the labour market. Those returning code '2' for this question will be the fresh entrants in the labour market.

It will thus be seen that these questions on economic aspects have been so designed as to identify all the workers, main or marginal and non-workers with reference to the activities during the last one year prior to the date of enumeration. It is very important to remember that the period referred to in Question 14A, 14B, 15A and 15B is one year preceding the enumeration. Thus, if in some areas, a person has been a cultivator or an agricultural labourer, or has worked in an industry, etc., only in one season, i.e., less than 6 months/183 days, he/she is not to be treated as a worker for Question 14B. His/her economic activity will be reflected in Question 15B. Thus, all those returning 'Yes' in Question 14A must be netted as 'Yes' in Question 14B or in Question 15B or both.

Certain important points that need special emphasis are the following and these should be kept in mind

- i) A person who normally works but has been absent from work during the reference period on account of illness, holiday, temporary closure, strike, etc., must be treated as engaged in the work he/she would otherwise have been doing but for his/her temporary absence.
- ii) Persons under training such as apprentices, with or without stipends or wages, should be treated as workers.
- iii) A person who has merely been offered work but has not actually joined yet, should not be treated as engaged in this work.

- iv) If a person is engaged in some economic activity but at the same time does also attend to some household chores or attends a school, etc., he or she would be treated basically as a worker.
- v) A person, who merely receives an income, such as a rent receiver or a pensioner who does not have to work for receiving the income, will not be treated as economically active unless the person is also engaged for some part of the year in some economic activity. Similarly, beggars, pensioners, receivers of agricultural or non-agricultural royalty or of rents or dividends who may be earning an income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade, profession, business or commerce.
- vi) A person who engages himself/herself in work such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle for wages or selling firewood or making and selling cow dung cakes or selling grass, etc., or any other work like cultivation, etc., he/she should be treated as working under Question 14A. However, any person who is engaged only in household duties but doing no other productive work to augments the family's resources should not be considered as working for the purpose of this question.

Important

Women are often classified as Non-workers because of non-reporting of their work. It also happens that women who work for the major part of the year are reported as working for less than six months. Special efforts were made for capturing women's work by asking probing Questions.

- (vii) A man or a woman may be producing or making something only for the domestic consumption of the household and not for sale. Such a person is not a worker, even though from his or her point of view the activity is productive.
- (viii) For an under trial prisoner enumerated in a jail, he/she should be recorded for the work he/she was doing before he/she was apprehended. Similarly, for a person temporarily in a hospital or similar institution he/she should be recorded for the kind of work he/she was doing before he/she was admitted into hospital or institution. But for convicts in a prison or for long-term inmates of penal or charitable or mental institutions, the persons' previous work should not be recorded, but '1' should be recorded. For census purposes, inmates of penal or charitable or mental institutions if detained for 6 months or more should be treated as long term and '1' should be recorded for them.
- (ix) A public or social service worker who is engaged in public service activity or a political worker who is also engaged in furthering the political activity of his/her party will be recorded as a worker and entered accordingly. Such persons will include members of Parliament, State Legislatures, Local authorities, etc.

Q 18: Birth Place

Certain details regarding the place in which the person enumerated was born are to be collected and entered in the sub-parts of this question. For defence and similar personnel as may be indicated to you, this question and its sub-parts are not applicable. The explanation and instructions as to how the four sub-parts are to be filled are as follows:

Q 18(a): Place of Birth

Write 'PL' for person born in the village or town where he/she is being enumerated. Where 'PL' is noted against this question, cross (X) is to be put in the box against sub-part (b) and on the lines against sub-parts (c) & (d).

For those born outside the village or town of enumeration write the actual name of the place against sub-part (a) and fill the other details against sub-parts (b), (c) and (d). For a person born on the high sea, put cross (X) on the lines against sub-parts (a) and (c) and in the box against sub-part (b) and record 'born at sea' against sub-part (d).

In indicating the birth place, only the full name of town or village would have to be indicated and not hamlet or mohalla/ward names. The name of ward/hamlet should not be entered but the name of the town/village to which it belongs should be entered.

Q 18(b): Rural (1)/ Urban (2)

For those born outside the village or town of enumeration ascertain if the place of birth is a village or town at present. To enable a person to determine whether the place is a town or a village, he/she may be required to indicate the status of the place of birth in comparison with a known town in the neighborhood of the place of enumeration. You may mention some important urban characteristics to enable the person to make out if the place of his/her birth is rural or urban, e.g., existence of a local administrative body, industrial townships declared as towns, etc.

For a person born in a village, write '1' in the box.

For a person born in a town/city, write '2' in the box.

For a person born in a foreign country, put 'X' in the box against this sub-part and also against sub-part (c) on the line. If all efforts to classify the place of birth as rural/urban fail, write 'not known' on the line.

Q 18(c): District

For a person who was born outside the village or town of enumeration i.e., for whom (PL) is not written against sub-part (a), you have to fill in this sub-part after enquiry.

For a person born outside the village or town of enumeration but within the district of enumeration, write 'D' on the line.

For a person born in another district of the State of enumeration or in a district in some other State/Union Territory in the country, write the name of the district. If the person cannot name the district, write 'not known'.

For a person born outside India, put cross (X) against this sub-part.

Q 18(d): State/Country

For persons born within the State of enumeration, write 'X' against this sub-part on the line. Make sure that the earlier entries made in sub-parts (a), (b) and (c) are consistent with such an answer; for example, 'PL' might have already been written against sub-part (a) or 'D' is written against sub-part (c) or any other district of the State of enumeration is mentioned against sub-part (c).

For persons born outside the State of enumeration but within the country, write the name of the State/Union Territory where born.

For those born outside India, note merely the name of the country and there is no need to enter the name of the constituent state of the foreign country. Where a person cannot name the country, the name of the continent may be noted.

For a person born on the high seas, record 'born at sea' against this sub-part and put 'X' against sub-parts (a), (b) and (c).

If a person was born in a train, boat or bus or aircraft, etc., within the country, write the particulars in sub-parts (a), (b) and (c) with reference to the administrative territory where the event occurred or was registered.

Question 19: Last residence

The answer to this question will have to be filled in respect of every person if he/she had another place of normal residence irrespective of his/her place of birth, before he/she came to present place where he/she is enumerated. Even if a person was born at the place of enumeration but because of his/her work or for studies, etc., he/she had shifted subsequently to another village or town and had come back again to the place of enumeration, he/she should be deemed to have had another place of residence prior to his/her enumeration here. For defence and similar personnel, this question is not applicable.

The immediate previous village or town of residence is relevant only if he/she had been outside the village or town of enumeration and not simply in another house or locality in the same place. For example, if a person born in one part of Bombay City is found residing in another part of Bombay at the time of enumeration, the change of residence should not be treated as change of place of residence because both the areas are within the same city of Bombay. Similarly, a person born in hamlet 1 of village Rampur and found in hamlet 2 of the same village at the time of enumeration, should not be deemed to have had another place of residence than the village where he/she is enumerated. Where a person had merely gone out to another place or had been shifting from place to place purely on tour or pilgrimage or for temporary business purposes, he/she should not be deemed to have had another residence different from the place where he/she or his/her family normally resides.

In the case of a person who is enumerated elsewhere than in his normal place of residence the place of his immediate previous normal residence will be recorded as the place of last residence. Similarly, if a person is enumerated at a place other than his place of birth and if he had no other place of normal residence before coming to the place of enumeration, the place of birth would be the place of last residence.

It would not be possible to specify the duration of stay which will qualify for reckoning last residence. The circumstances of each case would have to be taken into consideration in deciding whether a person has had a last residence or not. For example, an officer who has been transferred for a short period, must be considered as moving from his/her place of previous posting which would become his/her place of last residence, irrespective of his/her stay in the new posting. However, temporary movement like women moving into a hospital for delivery, a person moving into a hospital for treatment, etc., at a place other than their usual residence, will be ignored and these places will not be treated as the last residence. In the case of a child born in a hospital into which the mother has moved temporarily for delivery which is different from the usual place of residence of the mother, the place where the hospital is, will be treated as the place of last residence for the child, though the place where the hospital will not be the place of the last residence of the mother.

Q 19(a): Place of Last Residence

For a person who has been in the village or town of enumeration continuously since birth (except for shifting to other place outside the village or town of enumeration for a purely temporary stay), write 'PL' against sub-part (a) and put (X) against sub-parts (b) and on the lines against sub-parts (c) and (d). But for a person who had his last previous residence at any place outside the village or town of enumeration

(irrespective of his place of birth), write the actual name of village or town or his actual previous residence against this sub-part (a) and fill the other details against sub-parts (b), (c) and (d).

Q 19(b): Rural (1)/ Urban (2)

For a person who had previously resided outside the place of enumeration, ascertain if the place of last previous residence is rural or urban and record the answer. For a person whose last previous residence is a town/city, write '2' in the box, and for 'Rural', write '1'. For a person who last resided in a foreign country, put cross (X) in the box.

For a person whose immediate previous residence cannot be classified, write 'not known'.

Rural or Urban status has to be determined with reference to the status existing at the time of enumeration.

Q 19(c): District

For a person who had previously resided in another place, i.e., for whom 'PL' is not written against sub-part (a), you have to fill in this sub-part after enquiry.

For a person who previously resided in another village or town within the district of enumeration, write 'D'.

For a person who previously resided in another district of the State/Union Territory of enumeration in a district in any other State/Union Territory in the country, write the name of the district. If he/she cannot name the district, write 'not known'.

For a person whose last previous residence was outside India, write 'X' against this sub-part.

Q 19(d): State/Country

For a person whose last previous residence was outside the village or town of enumeration but within the State or Union Territory of enumeration, put cross (X) against this sub-part but if it was outside the State or Union Territory of enumeration but within the country, write the name of the State/Union Territory. Make sure that the earlier entries made in sub-parts (a), (b) and (c) are consistent with such an answer, for example, 'PL' might have already been written against sub-part (a) or 'D' is written against sub-part (c) or any other district of the state of enumeration is mentioned against sub-part (c).

For a person whose last previous residence was outside the country, write the name of the country and if name of the country is not forthcoming, write the name of the continent.

Q 20: Reasons for migration from place of last residence

The question will be asked in the case of a person for whom information has been recorded in Question 19 i.e., last residence. However, please note that this question will not be canvassed in the case of those for whom you may have written 'PL' against place of last residence. This is because they have had no place of last residence. In all the other cases you must find out the reasons for migration from the place of last residence and note the reason by entering the appropriate code. The codes which must be entered for the various reasons for migration are as follows:

- | | |
|----------------|---|
| (a) Employment | 1 |
| (b) Business | 2 |

- | | |
|---|---|
| (c) Education | 3 |
| (d) Family moved | 4 |
| (e) Marriage | 5 |
| (f) Natural calamities like drought, floods, etc. | 6 |
| (g) Others | 7 |

These codes have been printed at the bottom of the slip. You must enter a code depending on the reasons for migration in the box against this question. For defence and similar personnel this question will also not apply, since you will not have canvassed the Questions 18 and 19 of the Slip. Cross (X) may be put in the box in case the Question is not applicable, i.e., 'PL' or cross (X) has been noted in Question 19(a).

A person will have moved for employment in the following cases:

- If he/she has moved in search of a job or hoping to get a job.
- Because he/she has got a job and has moved to take up the job.
- Having already got a job he/she has moved because of a transfer, even if this is on promotion.

If a person has moved for any of these reasons, note code '1' in the box.

A person can be said to have moved for 'business' if he or she has moved to the place of enumeration from his/her place of last residence for joining a business or setting up/running a business. The word 'business' refers to an economic activity involving risk-taking either on own account or in partnership with others. Please note 'business' is different from job or employment for which wages/salary is received in cash or kind. For 'business' you have to enter code '2' in the box.

A person can be said to have moved for educational purposes if he or she has moved to the place of enumeration from his/her place of last residence, for joining a school/college or any other type of educational institution either for the first time or for continuing his/her studies. For such a person, code '3' has to be given. However, please note that if this particular person has moved along with his/her family because the entire family has moved, due to any reason, you must note that this person has not moved for educational purposes. In such a case the right code to be entered will be code '4' namely 'Family moved'.

The reason 'Family moved' code '4' will refer to cases where the entire family moves. Such cases will come up if the head of the household or the person on whom the family is dependent has moved due to any reason such as transfer, etc. There are cases where one or more members of the family move along with the person who has moved in search of employment or education or for other reasons. While the person who has moved for particular reason will be assigned the appropriate code, the other members who moved along with that person will be assigned code '4' i.e., 'Family moved'.

If a person has moved consequent on getting married assign code '5' for that person.

If a person has moved because of natural calamities like drought, floods, etc., assign code '6' for that person.

Code '7' 'Others' will include all other reasons for migration not covered by employment, business, education, family moved, marriage and natural calamities like drought, floods, etc. This may include cases like movement due to retirement, displacement, etc.

8. The Sampler would have to identify each sampled Individual Slip. The checker after thorough checking will have to affix the Stamp (I) on each such slip at the place indicated in these instructions later. You should ensure that sufficient number of such stamps are available. Since, in the first stage only the sampled slips would have to be edited, coded and keyed in, on the cover page of each pad against the entry Stage-I, the total number of sample slips in that pad should be recorded by the Checker. You should ensure that this is done without fail so that data entry proceeds without any difficulty.

Instructions to Statistical Assistant

Since a number of tables based on Individual Slips of the 1991 Census will be prepared on a 10 per cent sample, it is necessary that the sample is selected correctly. As the head of a team which is doing the sample selection you are having a great responsibility. It is necessary for you to ensure that the sample is selected as per the instructions and all the checks as mentioned have been carried out before the records leave your section for further processing.

2. You will be heading a team of 3 Supervisors and 9 Checkers/Samplers. Each Supervisor will normally have 3 Checkers/Samplers under him. This team will be responsible for selecting the sample, stamping the sampled slips for easy identification at data entry stage and filling up the Control Sheets.

3. You should read these instructions very carefully and understand them thoroughly. You should also be familiar with the instructions to the Supervisors, Checkers/Samplers before you start your work. If at any stage you have any doubt or if your Supervisors, Checkers/Samplers consult you on any point which you are unable to solve then you should immediately consult your Investigator/Assistant Director/Deputy Director for instructions. Your basic duties will be the following:-

- (i) Receiving records from the record room of the charge assigned to you;
- (ii) Distributing these records in the manner prescribed to the units under you for sampling and checking;
- (iii) Assigning the Random Start for each Enumeration Block;
- (iv) Carrying out test checks for sampling; and
- (v) Returning the records to the record room after the sampling is over in the same manner in which you got them.

4. Before you start your work you should have sufficient number of blank Control Sheet Forms, rubber stamps, ink pads and some blank forms of the Index Slips for Enumeration Blocks as well as bundles to be used in case the original Index Slip has been mutilated. You will be handling the following records:

- (i) The bundles of Individual Slip pads of the charge assigned to you.
- (ii) The list of Enumeration Blocks which will be given along with the charge records.
- (iii) The Control Sheets for Sampling Charge Level for assigning the Random Start to each block.

5. You should ensure that you have received the records of all relevant Enumeration Blocks for the charge. You may check this with the list of Enumeration Blocks provided to you.

6. You should issue a few bundles at a time to one Supervisor. The inventory should be kept with you. One bundle may contain the records of one or more Enumeration Blocks. You should ensure that the Supervisor issues only one bundle at a time to a Sampler. You should also make sure that the Supervisor

fills up the location particulars and the Random Start in the Control Sheet for Sampling-Enumeration Block level for each of the Enumeration Blocks contained in the bundle before issuing the bundle to the Sampler.

7. You will also maintain Control Sheets for Sampling-Charge Level. The format of this Control Sheet is given in the Annexure 1. After you receive the records for a charge, fill up the first and second columns of this Control Sheet. The second column of the Control Sheet contains the Random Start for each Enumeration Block to be allotted by you. This may be filled up as described in the next paragraph. While handing over the records of the bundle to the Sampler you should also give him the Random Start for the Enumeration Blocks contained in that bundle.

8. From the random number table you should select a Random Start between 0 and 9 for sample selection for each block. For this purpose you may select any particular row or column of the table. Select a single digit random number for the first Enumeration Block of the charge. This number will be a number between 0 and 9 (both inclusive). The number zero will stand for Random Start 10. Write the number in column 2. Whenever you get a random number zero, write 10 in column 2. Thereafter you may allot random starts for the next and subsequent Enumeration Blocks sequentially from the first random number selected in the random number table.

9. You should supply adequate number of Control Sheets for Sampling- Enumeration Block Level to the Samplers and ensure that the identification particulars of the Enumeration Blocks are properly filled in the Control Sheet.

10. While sampling is in progress you should supervise the work closely and ensure that the instructions are carried out properly by the Supervisors, Checkers/Samplers working under you.

11. If a Supervisor informs you about any pad of Individual Slip not having pad number then you have to assign a pad number to that pad. For this purpose you may assign the pad number as 99001 as the pad number for the first such pad in that charge. Pad numbers may be assigned sequentially within the charge to any other pad which does not have pad number.

12. When you get back the records after the sampling operations are over, you should carry out arithmetical checks and satisfy yourself that the sample has been drawn properly. You should also fill up the relevant columns of the Control Sheet for Sampling- Charge level.

13. After you have received all the records pertaining to all Enumeration Blocks of the charge and carried out the necessary checks you should return the records to the record room. You should also complete the Control Sheet for Sampling- Charge level at this point.

14. You should inform the record keeper well in advance as to when you are likely to complete the charge so that records of fresh charge may be issued to you. This will ensure regular flow of work and no time will be unnecessarily lost in getting the records. You should take care to see that the records of one charge do not get mixed up with those of another.

15. It is possible that during the handling, the Index Slip pasted or kept on the first pad of the Enumeration Block may get mutilated. In such a case you should ensure that a fresh Index Slip is written up and pasted at proper place.

Instructions to Supervisor

One Supervisor will be in charge of the work of 3 Checkers/Samplers. Initially all the persons working under a Supervisor may be assigned the work of sampling. After the work of sampling has been completed for a sufficient number of Enumeration Blocks one or two of the Checkers may be assigned the job of checking the sample selection. In this way it may be ensured that the Checker does not remain idle for want of work.

It is important to note that the reasons for migration are being noted for each person separately. Therefore, in the same household, there may be cases where the reasons for migration are different for different members of the household. For example, if the head of the household is promoted and transferred, in his/her slip against Question 20 you will have to assign code '1' because his/her movement is consequent on employment, while the spouse and other dependents should be assigned code '4' because the family moves. There are also cases, particularly from the rural areas to urban areas, where a boy or girl moves to a town or city for higher studies and in order to look after him or her an elderly person also moves. In such a case, in the case of the person who moves for higher studies the reason for migration will be 'Education' code '3' while in the case of the elderly person, the reason will be 'others' code '7'. If in case the entire family has moved along with the student, for all the other members of the family you will have to assign code '4' 'Family moved'. It is, therefore, necessary for you to make careful enquiries and not to get confused with the different reasons which may be applicable to different persons of the same household.

In particular, please note that you must make detailed enquiries in the case of any unrelated members of the households, such as cook, servant, etc. In their cases, their movement from the place of last residence may have been due to employment. Similarly, in the case of those members of the household who are rather distantly related to the head of the household you must also make such detailed enquiries.

It must be remembered that the reason 'Family moved' code '4' can only come up in cases where some other member of the family has moved for any of the other reasons mentioned in the Slip. The members of the family moved because either the head of the household or the person on whom the family depends has moved because of employment or for any other reason.

Please note that in the case of every person who has come into India from any other country as a result of partition or has been repatriated, the reason for migration will be noted as 'Others', code '7' and not any other code.

Q 21: Duration of residence at the village or town of enumeration

Note here the period in completed years of the continuous residence in the village or town where the person is being enumerated. This will apply even to a person born at the place of enumeration. But this question does not apply to defence and similar personnel.

If he/she had left this village or town and had lived elsewhere for sometime, i.e., in Question 19 another place of last residence is reported and has come back to this village or town, then the duration of residence to be noted against this question is the period of the **latest continuous residence**. But if a person had been away on a temporary visit or tour, etc., that should not be taken as break in the period of his/her continuous residence here.

If the person was born at the place of enumeration and also had no other place of last residence i.e., 'PL' has been noted in Question 19(a), then 'X' may be put against Question 21 in the box.

For a person whose duration of continuous residence at the place of enumeration is less than 1 year, write 'O' in the box.

APPENDIX-III

A NOTE ON SAMPLING AND ESTIMATION PROCEDURE ADOPTED IN 1991 CENSUS

In the 1991 Census sampling was adopted for preparing certain tables based on Individual Slips. A 10 per cent sample of Individual Slips was used in all states with a population of 10 million and above i.e., Andhra Pradesh, Assam, Bihar, Gujarat, Haryana, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal. In all other states and union territories, the tabulation has been done without resorting to sampling. The sample slips were selected linear systematically in each enumeration block with a random start. The detailed instructions issued for sampling are reproduced below:

INSTRUCTIONS FOR SELECTION OF A 10 PER CENT SAMPLE OF INDIVIDUAL SLIPS

General Instructions to Deputy Directors/ Assistant Directors/Officers in charge of the Edit and Coding Cells where sample is to be drawn.

A 10 per cent sample of Individual Slips is to be drawn for the purpose of tabulation. The sampling fraction will be same for both rural and urban areas. The sample would be drawn separately from each Enumeration Block. For this purpose separate random numbers for each Enumeration Block to be used as random start for sample selection would be assigned.

2. The process of sample selection would be carried out by one or more teams constituting of Statistical Assistants, Supervisors and Samplers/ Checkers. A team will consist of one Statistical Assistant, 3 Supervisors and 9 Samplers/Checkers. Each team will have to perform two essential tasks. The first will be the physical checking of the number of filled in slips in each Enumeration Block, pad wise and filling up the identification particulars and the relevant columns of the Control Sheet (Annexure II). The second would be the assigning of the random number for each block and selection of the sample. It would be essential to assign the work relating to these items to specific Supervisors/Checkers/Samplers.

3. The records should be handled charge by charge. It should be noted that the procedure for sample selection will not involve handling of Household Schedules and other records. Only Individual Slip pads will be used for sample selection.

4. The instructions for the Statistical Assistant, Supervisor and Checker/Sampler should be explained to these levels in training classes. Normally one day training would be enough. Please ensure that the training is intensive. You should also make sure that the persons have understood the instructions thoroughly. A close supervision during the first few days is essential to ensure that the team understands the procedure well.

5. Before the sampling starts, you should ensure that sufficient number of Control Sheets for Sampling - Enumeration Block level (Annexure II) are available with the Supervisors, Checkers/Samplers. You will also have to provide sufficient number of rubber stamps to mark (1). Once the sample is picked, the selected sample slips have to be edited, coded and sent for data processing, with suitable identifications.

6. You will notice that every Enumeration Block has to be assigned a Random Start for the purpose of sample selection and this Random Start has to be incorporated in the Control Sheet for Sampling-Charge level before the records go to the concerned Sampler. Please note that the Random Start will be a number between 1 and 10.

7. When records are issued to the Statistical Assistant they should be checked with the inventory for their completeness. If any bundle is by chance not issued the Sampling may not be undertaken in the Enumeration Block(s) in that bundle.

2. You will be receiving a few bundles of Individual Slip pads at a time. One bundle will sometimes contain the records for more than one Enumeration Block. You should issue only one bundle at a time to a Sampler. You should fill up the location particulars on the top of the Control Sheets for Sampling - Enumeration Block level for each of the Enumeration Blocks in the bundle and copy of the Random Start from the Control Sheet-Charge level available with the Statistical Assistant. These sheets should be issued along with the bundle to the sampler.

3. You should go through the instructions to the Samplers and Checkers and ensure that the work is being done according to instructions. You should take care to see that a Checker or a Sampler is dealing with only one Enumeration Block at a time. You should also assist the Statistical Assistant in the record management. During sampling operations if the Sampler reports that the pad does not have a pad number then you will have to consult the Statistical Assistant to assign a pad number. The work of the Checkers and Samplers should be thoroughly checked at every stage. This involves the following steps.

- (a) Before starting the sampling, check
 - (i) Whether the location code particulars given at the top of the Control Sheet for Sampling Enumeration Block Level tally with those in Index Slip of the concerned Enumeration Block;
 - (ii) Whether all the Individual Slip pads as per the Index Slip are available in the bundle; &
 - (iii) Whether the pad number has been entered in the pads properly
- (b) After the sample selection has been completed in an Enumeration Block you must check the following
 - (i) The entries in columns 4, 5 and 6 of each line of the Control Sheet for Sampling - Enumeration Block level;
 - (ii) Whether the total number of sample slips in the pad and the serial number of the selected sample slips have been entered on the cover page of each pad against the entry(1).
 - (iii) The total number of sample slips in an Enumeration Block as given in the total of column 4 should be equal to either (total of column 3)/10 or the (total of column 3/10)+1 ignoring the remainder in both the cases. This checking should be done for each of the Enumeration Block and wherever there are errors the sampling should be got re-done. In such cases the stamps put on the wrongly sampled slips should be crossed out in red ink;
 - (iv) The column 4 of each line of the Control Sheet for Sampling--Enumeration Block level must be checked in a similar way; and
 - (v) You should check whether all the sample slips have been stamped and check the number of sampled slip by actual counting of the stamped slips

4. After carrying out all the checks and ensuring that every thing is in order you should hand-over the records and Control Sheets to the Statistical Assistant.

Instructions to Checker

Your duties are to check the sampling done by the Sampler and to stamp on the sampled slips for identification. You should read and understand the instructions to the Sampler. When the sampling is over

the Sampler will hand over to you the bundle of Individual Slip pads with its Index Slip and Control Sheets for each enumeration block listed in the list of enumeration blocks.

2. You should check the following in the order given below:

- (i) You should check whether all the pads as per the Index Slip have been entered in the Control Sheet for Sampling-Enumeration Block level and whether the total number of valid slips entered in the cover page of each pad tallies with what is entered in the Control Sheet for Sampling -- Enumeration Block level. In case of discrepancies corrections must be made after counting the slips again.
- (ii) Take the first pad of the block. Count the number of valid slips from the beginning to the first slip (including it) that has been selected by the Sampler. This slip would have been folded now. This number should be equal to the random start assigned to the block. If the Sampler has counted properly affix Stamp(1) on the right hand bottom corner of the Individual Slip. Then count the number of valid slips between the first sampled slip and the second sampled slip (excluding both the folded slips). The number should be equal to 9. If the sample slip has been identified properly affix Stamp (1) on the right hand bottom corner of each sampled slip. Similarly check the number of valid slips between the second sampled slip and the third sampled slip and so on till you reach the last sampled slip of the pad. While doing this you should also ensure that the sampled slips are also valid filled in slips. When you have reached the last sampled slip of the pad count the number of valid filled in slips left after the last sampled slip. This number should be equal to the number entered in column 5 of the "Control Sheet for Sampling - Enumeration Block Level" against this pad. This number should never be above 10. Repeat these checks for each pad of that block.
- (iii) The procedure for sample selection suggested is simple and straight forward. Normally there should be no mistakes. However, if you find that Sampler has not counted the slips properly, either at the starting point or subsequently, you should correct it. The "Control Sheet for Sampling-Enumeration Block Level" must also be corrected. The rubber stamp (1)Should be affixed only after ensuring the accuracy of sample selection.
- (iv) Count the number of folded slips in each pad and ensure that the entries made in the "Control Sheet for Sampling-Enumeration Block Level" are correct. You should also enter the number of sampled slips in each pad on the cover page of the pad against the item "(1)_____". In case this is not printed on the cover page then you should write at the left hand bottom corner of the cover page the following:

Number of slips stamped

Stage 1: _____

Stage 2: _____

Stage 3: _____

Then enter the number of sampled slips in that pad against the entry (1).

- (v) After entering the number of selected slips write the serial numbers of the selected slips of that pad in brackets on the same line.

3. If at any stage you find that some mistakes have occurred then do not fail to make necessary corrections in the Control Sheet for Sampling-Enumeration Block level. After all

the Enumeration Blocks in one bundle are checked you should hand over the records to your Supervisor.

Instructions to Sampler

Selection of 10 per cent systematic sample of Individual Slips within each Enumeration Block will be done by the Sampler. Unfilled or cancelled slips should be ignored while selecting sample. Only valid filled in Individual Slips will be taken into consideration.

2. Before starting sample selection, you must be in possession of the following documents.
 - (i) Bundle containing pads of filled in Individual Slips. This bundle may contain the records for one or more Enumeration Blocks depending on the size of the Enumeration Block. The bundle will have an Index Slip which will tell you about the Enumeration Blocks, the records of which are present in that bundle.
 - (ii) A control sheet for Sampling-Enumeration Block level form for each Enumeration Block of that bundle with the location particulars and the Random Start already filled in.
3. After receiving the above documents you must do the following:
 - (a) Check whether all the pads in the Enumeration Block have a pad number. If a pad does not have a pad number, bring it to the notice of your Supervisor who will give a number to it after consulting the Statistical Assistant. This pad number must be written by you on the pad cover and all the slips in that pad.
 - (b) If, by any chance, a pad does not have a cover page, you must stick a piece of paper to the first slip of that pad at the top edge and write the location particulars and pad number.
 - (c) Check whether the Individual Slip pads for all the Enumeration Blocks included in this bundle are available by comparing Index Slip for the Enumeration Block kept with the records for each block. Take care that the pads of Individual Slips of one Enumeration Block do not mix with those of another.
4. If some discrepancies are observed while checking the above points, you must bring these to the notice of the Supervisor and get them corrected before proceeding further.

Procedure for sample selection and filling up Control Sheet for Sampling- Enumeration Block Level

5. The Control Sheet for Sampling - Enumeration Block Level plays a vital role in accurate sample selection. This should, therefore, be filled in with great care. Separate Control Sheet for Sampling - Enumeration Block level should be used for each Enumeration Block.

Step 1: (Columns 1, 2 and 3 of the Control Sheet for Sampling- Enumeration Block level) Open the bundle of the filled in Individual Slip pads and with the help of location code make sure that all the pads belong to same Enumeration Block. Arrange the pads in ascending order with the help of "Pad No." given on the top right of the cover page. Take pads one by one and make the entries in columns 1, 2 and 3. Before making entries in columns 2 and 3 of Control Sheet please ensure that the entries made on cover page of each pad are correct and Individual Slip have been properly scrutinized and edited. If the Individual Slips in the pad have not been edited while preparing the Primary Census Abstract in Regional Tabulation Office please consult your Supervisor. In edited slips industrial category would have been written in Roman numerals on the left side of Q. 15A and in case of slips relating to Scheduled

Caste/Scheduled Tribe persons Stamp (3) would have been affixed. Make a total of column 3 of Control Sheet and tally it with the corresponding entry in Index Slip. If it is not tallying consult your Supervisor before going ahead.

Step 2: (columns 4, 5 and 6): Take the first pad and select the first sample slip of the Enumeration Block with the help of Random Start given on the top right of the Control Sheet. The Random Start will be in the range 1 and 10 (both inclusive). If Random Start is 7 then the first sample slip will be 7th valid filled in slip of the first pad. If the Random Start is 10, then the first sample slip will be the 10th valid filled in slip of the first pad. Fold this slip upwards so that edges of the slip do not stick out of the pad so that the sample slip selected by you is easily identified by the Checker. Thereafter select every tenth valid filled in slip and fold it. If the Random Start is 7, then the folded slips would be 7th, 17th, 27th, . . . etc. (excluding the cancelled and unfilled slips that may occur in between). The sample selection from this pad will stop when less than 10 valid filled in slips are left. Now count the number of slips that you have folded and enter this number in column 4 of the Control Sheet for Sampling Enumeration Block level against the concerned pad number.

Count the number of filled in slips left over at the end of the pad, after the last folded slip. This should lie between 0 and 9 (both inclusive). Enter this number in column 5.

Entry in column 6 of the Control Sheet for Sampling Enumeration Block Level identifies the starting slip for the next pad. If, for example, two slips are left over in the first pad after the last sample slip folded, you will continue sample selection from the 8th slip (10-2) of the next pad. The number 8, i.e. (10-2) will be entered in column 6 of the block level Control Sheet for Sampling Enumeration Block level as well as on the front cover page of the next pad.

6. Continue sample selection from all the pads of the Enumeration Block in the above manner. Please note that the pads must be taken up by you in the same order in which they have been entered in column 2 of the Control Sheet. The entries in columns 4 to 6 will have to be carefully made on the line against the pad you are dealing with.

7. Even if in a pad there are less than 10 valid filled in slips, you must consider such a pad for sample selection. For example, if in pad No. 1508 of Enumeration Block No. 91, after sample selection, **four slips are left over**, you would have entered 4 in column 5 and 6 in column 6, against pad No. 1508. This indicates that the first slip to be selected in the next pad i.e., pad No. 1509 is 6. If in pad No. 1509 you find 6 or more slips you will obviously select the 6th slip. If, however, in pad No. 1509 you find only two filled in slips you will not be able to select any sample in this pad, but the particulars of pad No. 1509 must be entered against this pad number in the Control Sheet. You will enter in column 3 of the entry corresponding to pad No. 1509 the number 2, the total number of filled in slips in that pad. In column 4, you will enter 0 because no slip has been selected as a sample. In column 5, you will enter 6, which will be the number of slips left over after the last sampled slip. This number actually consists of the four slips left over in pad No. 1508 and the two slips which are the only ones found in pad No. 1509. The starting point for the next pad, i.e., pad No. 1510 of this Enumeration Block would be 4 which is (10-6) in this case. This type of situation would be an extremely rare one as normally only the last pad in an Enumeration Block would have less than 10 valid filled in slips. The procedure in such rare cases must be noted and followed carefully.

8. In some rare cases, in an Enumeration Block there may be only one filled in pad and the number of valid filled in slips in the pad may be less than 10. In this case also you should attempt to select a sample. If the number of filled in Individual Slips in this Enumeration Block is less than the Random Start then no slip will be selected. However, the Control Sheet Sampling- Enumeration Block level has to be filled up in this case also. For example, if the number of individuals in the block is 4 and Random Start is 5 or 6 or 7 or 8 or 9 or 10, no sample slip will be identified. If however, the Random Start is 1 or 2 or 3 or 4 one sample slip will be identified.

9. After you have identified the sample slips in a pad and filled in column 4, 5 and 6 of the Control sheet, you must now bundle these pads in the same order as in column 2 of the Control Sheet. When you

have completed the sampling in all blocks that were given to you, hand them over to the Checker after checking that the Index Slip is at the top of each bundle. If the Index Slip is missing prepare a new Index Slip and paste it. The Control Sheet for Sampling - Enumeration Block level will also be kept along with the first pad of the Enumeration Block.

Important:

One bundle may contain the Individual Slip pads for more than one Enumeration Block. In such cases you should take care to see that each Enumeration Block is dealt with separately and the pads for more than one block are not mixed up.

ESTIMATION PROCEDURE

Tables prepared from the 10 percent sample were inflated to get the final estimates. This estimation was done at rural, non-city urban and city levels of each district keeping the sexwise figures of literates, population in the age group 0-6 years, main workers engaged in either cultivation, agricultural labour, household industry or other work as controls. This was done to ensure that the figures in these tables are consistent with those in Primary Census Abstract.

The figures other than those available in Primary Census Abstract are subject to sampling variations. The levels of standard errors for different cell values are given in the Annexure.

TABLE D-1 POPULATION CLASSIFIED BY PLACE OF BIRTH

FLY-LEAF

This table gives the distribution of population by place of birth and sex. This table shows the pattern of migration based on place of birth at State and District level. The place of birth has been classified as:

A. Born in India

I. Within the State of enumeration

- a) Born in the place of enumeration
- b) Born elsewhere in the district of enumeration
- c) Born in other districts of the State

II. States in India beyond the State of enumeration

B. Born Abroad

- 1. Countries in Asia (including U.S.S.R.) - Afghanistan, Bangladesh, Bhutan, China, Indonesia, Iran, Iraq, Japan, Kuwait, Malaysia, Maldives, Myanmar(Burma), Nepal, Pakistan, Saudi Arabia, Singapore, Sri Lanka, Turkey, United Arab Emirates, U.S.S.R. and Vietnam
- 2. Countries in Europe (excluding U.S.S.R.) - France, F.R.G., Portugal and U.K.
- 3. Countries in Africa - Kenya, Mauritius, Nigeria, Uganda and Zambia
- 4. Countries in the Americas - Canada and U.S.A.
- 5. Countries in Oceania - Australia and Fiji

C. Unclassifiable

In item 'A' and its sub-parts, data for place of birth are given separately for total, rural and urban areas. Persons whose birth place could not be classified as rural or urban have been included in total.

In respect of birth place under 'B' data for the above countries in each continent are given separately. The total of the remaining countries in that continent is given under 'elsewhere'. However, States/ Union Territories and the Countries from where there are no migrants to the state are not given in this table.

The place of enumeration has been classified separately into rural and urban areas.

This table has been compiled on the basis of information collected through question numbers 3 and 18 of Individual Slip. These questions alongwith instructions have been reproduced in the General Note.

This table corresponds to Table D-1 of the 1981 Census.

Annexure III to Appendix - III
Example

The procedure of sample selection can be explained with a suitable example. Suppose there are 897 individuals in a block and you are to select a 10 per cent sample of Individual Slips with random start 7. Total number of pads used are 21. Very first Individual Slips selected in the sample will be 7th filled in Individual Slip of the first pad of the enumeration block and the number of filled in slips left over after the last sample slip of the enumeration block will be nil. The filled in Control Sheet-Enumeration Block level would look as follows.

Page No. 1

TABLE D-2 MIGRANTS CLASSIFIED BY PLACE OF LAST RESIDENCE AND DURATION OF RESIDENCE IN PLACE OF ENUMERATION

FLY-LEAF

This table is the basic table on migration which gives the data on migration by place of last residence showing intra-district, inter-district, intra-state and inter-state migration streams and also migration from abroad by sex and duration of residence at the place of enumeration at State level. The duration of residence of the migrants have been classified into ranges, i.e., 'less than 1 year', 1-4 years, 5-9 years, 10-19 years, 20+ years and 'period not stated'. It takes into account only the last migratory movement of a person even though he might have migrated several times in his life. The place of last residence has been classified as:

A. Last residence elsewhere in India

- I. Within the state of enumeration but outside the place of enumeration
 - (a) Elsewhere in the district of enumeration
 - (b) In other districts of the state of enumeration
- II. States in India beyond the state of enumeration

B. Last residence outside India

1. Countries in Asia (including U.S.S.R.) - Afghanistan, Bangladesh, Bhutan, China, Indonesia, Iran, Iraq, Japan, Kuwait, Malaysia, Maldives, Myanmar(Burma), Nepal, Pakistan, Saudi Arabia, Singapore, Sri Lanka, Turkey, United Arab Emirates, U.S.S.R., Vietnam and elsewhere.
2. Countries in Europe (excluding U.S.S.R.) - France, F.R.G., Portugal, U.K. and elsewhere.
3. Countries in Africa - Kenya, Mauritius, Nigeria, Uganda, Zambia and elsewhere.
4. Countries in the Americas - Canada, U.S.A. and elsewhere.
5. Countries in Oceania - Australia, Fiji and elsewhere.

C. Unclassifiable

The place of last residence under 'A' and its each sub-parts has been classified into total, rural and urban. Migrants for whom the place of last residence could not be classified as rural or urban have been included in total.

In respect of place of last residence under 'B' data for the above countries in each continent are given separately. The total of the remaining countries in that continent is given under 'elsewhere'. However, States/ Union Territories and the Countries from where there are no migrants to the state are not given in this table.

This table has been compiled on the basis of information collected through question numbers 3, 19 and 21 of the Individual Slip. These questions alongwith instructions have been reproduced in the General Note.

An appendix to this table is also presented along with this table for comparison purpose with 1981 census data at district level.

This table corresponds to table D-2 of the 1981 Census.

**TABLE D-3 MIGRANTS BY PLACE OF LAST RESIDENCE, DURATION OF RESIDENCE
AND REASON FOR MIGRATION**

FLY-LEAF

This table presents the data of migrants by place of last residence, sex, duration of residence and reason for migration separately for rural and urban areas for the State/Union territory and Cities with population of one million and above. The duration of residence of the migrants have been classified into ranges, i.e., 'All durations of residence', 'less than 1 year', '1-4 years', '5-9 years' and '10+ years'. The reasons for migration are 'employment', 'business', 'education', 'family moved', 'marriage', 'natural calamities like drought, floods etc.', and 'others'. The place of last residence has been classified as:

A. Last residence elsewhere in India

1. within the state of enumeration
 - (a) elsewhere in the district of enumeration
 - (b) in other districts of the state
2. states in India beyond the state of enumeration

B. Last residence outside India

1. in countries in Asia beyond India
2. in countries outside Asia

C. Unclassifiable

The place of last residence under 'A' and each of its sub-part has been classified into rural and urban. Migrants for whom the place of last residence could not be classified as rural or urban have been included in total.

This table has been compiled on the basis of information collected through question numbers 3, 19, 20 and 21 of the Individual Slip. These questions alongwith instructions have been reproduced in the General Note.

This table corresponds to table D-3 of the 1981 Census.

TABLE D-4 MAIN WORKERS, MARGINAL WORKERS, NON-WORKERS, THOSE NON-WORKERS SEEKING WORK AND LITERACY FROM AMONG MIGRANTS REPORTING 'EMPLOYMENT' AS REASON FOR MIGRATION BY AGE, SEX AND DURATION OF RESIDENCE

FLY-LEAF

This table presents information on age, sex, literacy and economic status of migrants reporting 'employment' as reason for migration by duration of residence at the place enumeration, separately for total, rural and urban areas for the State/Union territory and cities with population of half a million and above. The duration of residence of these migrants have been classified into ranges, i.e., 'All durations of residence', 'less than 1 year', '1-4 years', and '5+ years'. Migrants, whose duration of residence was unclassifiable, have been included in total. The table gives the break-up of migrants into main workers, marginal workers, non-workers and also those among non-workers seeking work by age group. The age groups adopted are 0-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70-74, 75-79, 80+ and 'age not stated'. Migrants, whose ages were unclassifiable have been included in 'All ages'. The migrants are also classified as 'literate' and 'illiterate'.

This table has been compiled on the basis of information collected through question numbers 3, 4, 11, 14A, 14B, 15A, 15B, 16A, 19, 20 and 21 of the Individual Slip. These questions alongwith instructions have been reproduced in the General Note.

This table corresponds to table D-4 of the 1981 Census.
