N. 11.15

FOREWORD

The migration tables of the 1991 Census are mainly based on the questions on place of birth, place of last residence, duration of residence at the place of enumeration and reason for migration (Question 18-21) included in the individual slip. These tables generated on computer provide the distribution of population by place of birth, distribution of migrants by place of last residence, duration of residence and reason for migration. The data on intra-district, intra-state and inter-state migration streams and in-migration from abroad are presented in these tables. Information on educational level and work participation of migrants are also available in the migration tables.

2. In the 1991 Census 18 tables have been prepared on migration. Of these, 15 tables are based on a 10 percent sample in states with a population of 10 million and above and on full count basis in the remaining states and union territories. The remaining 3 tables dealing with migrants among main workers other than cultivators and agricultural labourers have been prepared on the basis of full count in all states and union territories.

3. The migration tables have already been released to data users on floppy disks usable on personal computers. These are now being brought out in printed form. Some of the tables which are very voluminous have been divided into parts for convenience of reference.

4. The general note on the migration tables of the 1991 Census which gives detailed information regarding presentation of tables, concepts used and the relevant question along with the relevant extracts from the manual of instructions to the enumerator is given in each volume for ready and comprehensive reference of the user.

5. A separate fly-leaf is also given for each table regarding the contents of the table.

6. The 1991 Census Operation were conducted under the overall guidance of my predecessor Shri A. R. Nanda. The work of coding and editing of Individual Slip records were completed in the Directorate of Census Operations and the job of data entry was done in the Direct Data Entry Centre of this organization. Thereafter editing and tabulation on computer was done in the Data Processing Division at the headquarters. The dissemination of data on computer media and preparation of camera ready copy of the publications were also done in the Data Processing Division.

7. The job of scrutiny of the computerised tables, preparation of notes of this publication and arranging the printing of this publication was carried out in the headquarters. The scrutiny of the quality of tables was done by a Task Force of officers of this office specially constituted for this purpose.

8. I hope this publication will prove useful to administrators, planners, demographers, research scholars and other data users.

New Delhi
June 1998

Dr. M. Vijayanunni
Registrar General and Census Commissioner, India
