FOREWORD

Publication of the District Census Handbooks (DCHs) was initiated after the 1951 Census and is continuing since then with some innovations / modifications after each decennial census. This is the most valuable district level publication brought out by the Census Organisation on behalf of each State Government / Union Territory administration. It *inter - alia* provides data / information on some of the basic demographic and socio-economic characteristics and on availability of certain important civic amenities / facilities in each village and town of the respective districts. This publication has thus proved to be of immense utility to the planners, administrators, academicians and researchers.

The scope of the DCH was initially confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town (wardwise) of the district. The DCHs published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories, including PCA. After the 1971 Census, two parts of the District Census Handbooks (Part-A comprising Village and Town Directories and Part - B comprising Village and Town PCA) were released in all the States and Union Territories. The third Part (C) of the District Census Handbooks comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to considerable delay in compilation of relevant material. In 1981, some new features alongwith the restructuring of the formats of Village and Town Directory were introduced in the DCHs. These were published in two parts for each district after the 1981 Census. While Part - A comprised Village and Town Directories, the PCA of villages and towns (wardwise) including Scheduled Caste and Scheduled Tribe PCA upto tehsil /town level were provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the Village Directory and if an amenity was not available in the referent village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time during 1981

Census in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement IV-A on slums was provided so as to enable the planners to chalk out the programmes for providing better civic and other amenities in the slums. In this statement, details on civic and other amenities were reported for the slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes / centres were added in Statement IV and V respectively.

The manner of presentation of the DCHs for the 1991 Census is by and large the same as followed in 1981. However, the format of PCA has been restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers has been given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group has also been included in PCA for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age have been treated as illiterates at the time of the 1991 Census. It is expected that the above mentioned modifications will help the planners in chalking out more effective developmental programmes.

One of the most important innovations in the 1991 Census is the Community Development Blocklevel presentation of data in the Village Directory and PCA instead of the traditional Tehsil/Taluk/PS level presentation. It is expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro-level developmental plans, as the C.D. Block is the lowest administrative unit for developmental planning.

In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each village have been provided for the 1991 Census along-with the corresponding codes of 1981.

This publication is a joint venture of the State Government / UT administration and the Census Organisation. The data have been collected and completed under the direction of Shri. K. Sampath Kumar, Director of Census Operations, Tamil Nadu, on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of the publication was initiated by Dr. K.P. Ittaman, former Deputy Registrar General (Social Studies) and Shri. M.M. Dua, Joint Director, for the sake of uniformity in presentation of

information / data and for preparation of analytical note depicting the salient features emerging from a micro-level analysis of census / non-census data, a model District Census Handbook from each State and Union Territory was thoroughly scrutinised in the Social Studies Division under the guidance of Shri. M.K. Jain, the present Deputy Registrar General (S.S.). This task was carried out by Shri. A.K. Singh, Deputy Director who was assisted by Shri. N.S. Soam, Assistant Director and his staff. Technical guidance in the preparation of the maps was initially provided by Dr. B.K. Roy, former Deputy Registrar General (Map) and later by Mrs. Minati Ghosh, the present Deputy Registrar General (Map).

I am thankful to all those who have contributed to this project.

A.R. NANDA
Registrar General, India

PREFACE

The District Census Handbook is the most useful publication for the public, social workers, researchers, academicians, administrators, local bodies and the government officials for various official and non-official purposes. It gives data for the village / panchayat at the lowest level to the district level including panchayat union / taluk covering demographic, social, economic and cultural aspects. There had been an endeavour to make it as comprehensive as possible, to provide data on various aspects since its inception and by 1961, it reached the dimensions of a compendium for the district. The Registrar General, India, in his foreword has kindly traced out the improvements brought out from time to time since 1961 to the latest 1991 Census while the history of the District Census Handbook in this State is narrated in the Introductory Chapter to this volume.

The District Census Handbook is a joint venture of the Census Organisation and the Government of Tamil Nadu. The scope of District Census Handbook has been widely increased and restructured in 1981 to meet the Minimum Needs and Revised Minimum Needs Programmes of the Planning Commission. Broadly keeping up the 1981 main structure, the formats of the Primary Census Abstract have been restructured slightly for the benefit of data users. The nine-fold industrial classification of main workers as done at the 1961 and 1971 Censuses has been revived instead of the four-fold classification of the 1981 Census. Population in the age-group 0-6 by sex has been given in order to enable computation of realistic literacy rate as all children below 7 years are treated as illiterates. One of the most important innovations of the 1991 Census is the presentation of data at the community Development Block / Panchayat Union level to help planners in the formulation of micro-level developmental plans at the lowest administrative unit level. In this State, for development planning, the lowest administrative unit is the 'Panchayat Union'. This time, for the benefit of data users of Village Directory and PCA data from the magnetic tapes / floppies or from the published records, the computer code as well as the manual code as of 1991 Census and the corresponding location code of 1981 Census are given.

The District Census Handbooks are now being published in two parts - Part - A - Village and Town Directory and Part - B - Village and Townwise Primary Census Abstract. The two parts are being published in one volume as part A & B for smaller districts.

Part - A deals with a brief description of the district - its major characteristics in relation to the economic resources like forestry, agriculture, industries, social, cultural, religious and historical aspects apart from certain basic amenities like drinking water, education, medical, post and telegraphs, market day(s), communications, etc., and if any of these facilities are not

available to any village, distance range of the nearest place from where available; power supply, approach to the village, nearest town to the village, health and family planning centres, primary health sub-centres and community health workers in the village. Information on approach to village is also provided to identify inaccessible villages in the district. These exhaustive data on infra-structure in relation to amenities available to the villages and land-use pattern are meant to meet the requirements of 'Micro - level' local area development planning at the lowest administrative unit viz., C.D.Block/Panchayat Union level. This is the reason why this time data are being published at C.D. Block / Panchayat Union level instead of the traditional taluk level.

In the Town Directory, information on class of town, area of the town, number of households, population and growth rate of the population of the town at each of the censuses from 1901 to 1991, sex-ratio at the 1971, 1981 and 1991 Censuses, physical aspects of rainfall and minimum and maximum temperatures recorded, distance from State and District Headquarters, nearest city, communication facilities like railway station, bus-route, inland navigation, Municipal finance, civic and other amenities like protected water supply, electric connections by type, fire fighting service, road length by type, system of sewerage, number of latrines by type, total population and SC & ST population, medical, educational facilities by type, recreational and cultural facilities like stadia, cinema, drama, community hall, public libraries and reading rooms, adult literacy classes / centres, working women's hostels, three important commodities manufactured, exported and imported; a special table on civic and other amenities available in all notified slums in Class - I and Class - II towns have been included with a view to ascertain the availability of basic amenities and to meet the Minimum Needs and Revised Minimum Needs Programme.

Part - B deals with the Primary Census Abstract for all the villages in the rural areas and wardwise for urban areas. This time the PCA data like Village and Town Directory data are arranged C.D.Block / Panchayat Unionwise giving area of the village (in hectares), area of town (in Sq.Km), number of occupied residential houses, households, population by sex, Scheduled Caste and Schedule Tribe population, literates, main workers and their distribution into nine industrial categories (as against the four industrial categories published in 1981), marginal workers, non-workers, and the population in the age group 0 - 6 by sex.

Further, if a village is covering more than one Panchayat, break up figures for each segment of the village forming different Panchayat also are given.

It is hoped that with the modifications now brought out in the Village Directory, Town Directory and PCA and Publication of data at C.D. Block / Panchayat Unionwise would go a long way in helping the planners to chalk out more effective developmental programmes at micro-level for local area developmental plans as the C.D. Block / Panchayat Union is the lowest administrative unit for developmental planning.

In the process of collection of data of this volume, various State and Central Government Departments have extended their kind co-operation particularly with regard to infra-structural amenities for Part - A - Village and Town Directory, history and general features of the district, etc., I convey my grateful thanks to all of them. The PCA data presented in Part-B of this volume were collected during the Census Operations in February - March, 1991, the reference date being sunrise of 1st March, 1991.

I remain grateful to the Director of Census Operations, Shri. K. Sampath Kumar, who closely guided us in every aspect of this work. He had been a source of strength and inspiration for us. We owe a deep sense of gratitude to him for his kindness in dealing with our practical difficulties, his patient advice and formula of solutions for even small problems, which we brought to his attention.

I wish to record my deep sense of gratitude to (late) Shri. M. Thangaraju, Joint Director of Census Operations and Shri. Ch. Purnachandra Rao, Deputy Director of Census Operations for overall direction and guidance to bring out this publication. I use this opportunity to mention my special thanks to Shri. G. Bapuji, Assistant Director of Census Operations for scrutinising the draft report and presenting the data with meticulous care and accuracy. I am also thankful to Shri. S.P. Grover, Joint Director of Census Operations and Shri. Phool Singh, Joint Director of Census Operations who have also provided overall guidance and supervision during their tenure in this regard.

Apart from that, Shri. Gummodi Bapuji in-charge of DCH Section took a meticulous care to arrange this volume in a systematic manner with the help of his colleagues S/Shri. A.V. Raman, K. Sambamoorthy, Investigators, P.G.Sankaran, and M. Thangavelu, Statistical Assistants and other section officials. The preparation of maps included in this volume were done under the supervision of Shri. Jogesh Das, Senior Geographer.

In the compilation and processing of Village Directory and Town Directory data, was ably assisted by Smt. R. Rani Bai and Smt. A.M. Mangayarkarasi, Investigators and their assistants respectively while Shri. K. Sambamoorthy, Investigator is chiefly responsible for preparing the analytical notes, inset tables, draft write - ups and arrangements of the matter in order.

The PCA data for the district were processed at the Regional Tabulation Office, Madras City under the supervision of Shri. N. Thangaratinavelu, Regional Deputy Director of Census Operations, assisted by Smt. B. Jayalakshmi, Investigator and S / Shri. S. Sreedharan, P.C. Jayaraman, Smt. V.E. Kalyani, Statistical Assistants who were deputed from this Directorate to the Regional Tabulation Office, Madras City.

Finalisation of PCA data (Panchayat Unionwise) and providing computer codes for villages were attended to by Shri. R. Lakshminarayanan and Smt. M.V. Rajalakshmi, Investigators and staff of the Census Section. The district and taluk maps in this publication give the administrative units upto village level, the location of towns and cities, communication facilities, etc. This time in the taluk map, the boundary of each of the C.D. Block units, namely, 'Panchayat Unions' have been shown separately to synchronise with the presentation of data Panchayat Unionwise.

I convey my grateful thanks to Shri. A.R. Nanda, IAS., Registrar General and Census Commissioner, India for the valuable guidance and advice I received from him throughout. I am thankful to Shri. N. Rama Rao, Deputy Registrar General (C & T) who has been a source of strength and constant help and guidance on all technical matters like a "Ready-Reckoner". I also thank Dr. K.P. Ittaman, Ex-Deputy Registrar General (S.S) and Shri M.M. Dua, Joint Director, for planning, designing and co-ordinating the formats. I thank Shri. M.K. Jain, Deputy Registrar General (S.S) and Shri. A.K. Singh, Deputy Director, Shri N.S. Soam, Assistant Director and his staff for scrutinising and approving the first volume so that it could fit in, in the all India pattern from uniformity point of view in the presentation of data and other items. My thanks are also due to Dr. B.K. Roy, Ex-Deputy Registrar General (Map) and Mrs. Minati Ghosh, Deputy Registrar General (Map) for providing technical guidance in the preparation of maps.

The data entry of the Village Directory and Primary Census Abstract in the computer had been done at the National Informatics Centre (NIC) at Madras, in the shortest possible time. My sincere thanks in this regard are to Shri. M. Mohan, Technical Director and Shri. A.N. Sridhar, Scientific Officer of the NIC, Madras.

I have great pleasure in acknowledging the able assistance rendered by the following officials of my office in the preparation of this volume.

Analytical Note

Census concepts

Rural and Urban areas

It is customary to classify a place as rural or urban in every census and present data separately for rural and urban areas. Urban areas which are specifically defined for census purposes are determined on the basis of certain demographic and economic criteria. The rest are treated as rural areas. At the 1991 Census, the same criteria adopted for determining the urban areas at the 1981 Census have been continued. The urban areas of 1991 Census are :

- All places with a Municipality, Corporation or Cantonment Board or Notified Town area :
- All other areas which satisfied the following criteria :
 - A minimum population of 5,000;
 - At least 75 per cent of male main workers engaged in non-agricultural and allied activities; and
 - A population density of at least 400 per sq.km. (or one thousand per square mile)

The above definition adopted for both the 1981 and 1991 Censuses varies slightly from those of 1961 and 1971 Censuses. As of the 1961 and 1971 Censuses, the males engaged in the activities of fishing, logging etc., were treated as engaged in non-agricultural pursuits and hence have been taken into account with those engaged in non-agricultural pursuits for applying the test of the 75 per cent non-agricultural workers criterion. But in 1981 Census as well as in 1991 Census, they have been treated on par with agricultural activities for the purpose of the test for this criterion. Prior to 1981 Census, certain places with less than 5,000 population were treated as urban areas on the basis of certain consideration like density, social and historical importance etc., at the discretion of the Director of Census Operations in consultation with the State Government. On the other hand, the tests on demographic and economic criteria were strictly applied at the 1981 and 1991 Censuses and no area was classified as urban area on other considerations.

Urban Agglomeration

This concept was adopted for the first time in 1971 Census and continued in 1981 and 1991 Censuses also.

An urban agglomeration is a continuous urban spread constituting a city or town and its adjoining urban outgrowths (OG) or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such towns. In certain cases, large housing colonies, university campuses, port areas, military camps, etc., would have come up around a city or town but falling outside the statutory limits of the city or town. They may be lying inside the boundaries of a village or villages which are contiguous to the city / town. These villages could not be treated as urban as they do not satisfy the urban criteria. But at the same time the colonies etc., mentioned above deserve to be treated as an integrated urban area. Therefore, all such towns together with their urban outgrowth will have to be treated as one urban unit and called urban agglomeration. All the constituent units of urban agglomerations are also independent urban units or towns.

Census House

A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant and may be used for residential or non-residential purposes or both.

Household

A household is a group of persons, who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams etc. These are called Institutional Households.

Scheduled Castes / Scheduled Tribes

For the enumeration of Scheduled Castes and Scheduled Tribes in census, the names of Scheduled Castes and Scheduled Tribes as recognised in Tamil Nadu based on the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act of 1976 (Central Act 108 of 1976) was followed. The enumerators were instructed to record a person as belonging to Scheduled Caste or Scheduled Tribe provided the name given by the person was found in the list supplied to them.

Literates

In the 1981 Census, a literate was defined as a person who can both read and write with understanding in any language. A person who could merely read but cannot write was not a literate. It was not necessary that for a person to be considered as a literate must have received any formal education or have passed any minimum educational standard. In the 1991 Census, all the children of the age of 6 years or less are treated as illiterates where as in the 1981 Census all children of the age of four years or less were treated as illiterates.

Definition of work

Work may be defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. It also includes unpaid work on farm or in family enterprise.

Main and Marginal workers

The dichotomy of workers and non-workers of 1961 and 1971 Censuses had been dropped and the trichotomy of main workers, marginal workers and non-workers were introduced in the 1981 Census and has been continued in the 1991 Census also. A worker was identified with reference to a reference period preceding the census. The reference period prescribed was one year preceding the date of enumeration. Certain types of work such as agriculture, household industries like gur making etc., were carried on, either throughout the year or only during certain seasons or part of the year, depending on the local circumstances. In such cases what we were concerned with was the broad time spent during the agricultural season preceding the enumeration. Workers can be full-time workers or seasonal workers or marginal workers. If a person had done any work during the reference period and if he had worked for the major part of the year, i.e. if he had worked for 183 days or more, he was considered to be a full-time worker (Main worker). If a person had done any work during the reference period and if he had not worked for the major part of the year, i.e., if he had worked for less than 183 days, he was considered to be a marginal worker. Persons who had not participated in any economic activity even for a day during the last one year preceding the day of enumeration were considered as non-workers.

All the main workers and the marginal workers have been classified under one of the four main categories in the 1981 Census. While in 1991 Census, they have been classified under one of the nine industrial categories as was done in 1971 Census. They are : I) Cultivators (C), II) Agricultural Labourers (AL) III) Livestock, Forestry, Fishing,

Hunting and Plantations, Orchards and allied activities, IV) Mining and Quarrying, V) (a) Manufacturing, Processing, Servicing and Repairs in Household Industry, V) (b) Manufacturing, Processing, Servicing and Repairs in other than Household Industry, VI) Construction, VII) Trade and Commerce, VIII) Transport, Storage and Communication and IX) Other Services.

The definitions of these nine industrial categories of workers are given below :

I. Cultivators (C)

For the purpose of census, a person is considered as cultivator if he/she is engaged in cultivation of land, owned or taken on lease from Government or from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation.

II. Agricultural Labourer (AL)

A person who works on another person's land for wages in money, kind or share should be regarded as agricultural labourer. He/ she has no risk in the cultivation, but he/she merely works in another person's land for wages. An agricultural labourer has no right of lease or contract on land on which he/she works.

III. Livestock, forestry, fishing, hunting and plantations, orchards and allied activities

Persons who were reported as engaged in livestock, forestry, fishing, hunting and plantations, orchards and allied activities are treated as workers under this category.

IV. Mining and Quarrying

Persons who were reported as workers in mining and quarrying are classified under this category.

V. a) Manufacturing, processing, servicing and repairs in household industry

Household industry is defined as an industry conducted by the head of the household himself/herself and/or by the members of the household at home or within the village in case of rural areas and within the precincts of the house only in case of urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The household industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act. Merely selling of food items or other edibles should not be regarded as household industry.

b) Manufacturing, processing, servicing and repairs in other than household industry

Persons reported as workers in manufacturing, processing, servicing and repairs other than those mentioned in V-(a) are treated as workers in this category.

VI. Construction

Persons working as plumbers, mason, electricians, painters and others engaged in construction work were treated under this category.

VII. Trade and Commerce

Persons engaged in work such as wholesale or retail business or trade are treated as workers in this category.

VIII. Transport, storage and communication

Persons who were reported as drivers, conductors, technicians, fitters, welders and other communication workers were treated under this category.

IX. Other Services

Persons engaged in services other than those mentioned in I to VIII categories are treated under this category. Workers who could not be classified in any of the above I to VIII categories are treated as those engaged in other services.

Non-workers

All persons who have not been treated as workers i.e., persons who have not worked any time at all during the reference period of one year preceding the date of enumeration have been considered as non-workers.

Thus, non-workers cover all persons who are engaged in his / her household duties and who do no other work or have not done any work at all during the last one year, full time students and children attending school, all dependants such as infants or children not attending school or a person, permanently disabled from work because of illness or old age, persons retired from service or rentiers, beggars, vagrants, convicts in jails or inmates of a penal, mental or charitable institution and all non-workers who may not come under any of the above categories.

HISTORY OF THE DISTRICT CENSUS HANDBOOK

After the census of 1951, Government of India offered to hand over to the State Government the Census tables and other data prepared during

the Census and suggested that they might be published along with any other useful information relating to each district. The State Government accepted the proposal and the first publication of the District Census Handbook was brought out at the cost of the State Government.

The District Census Handbook of 1951 was found to be very useful and it was therefore decided not only to continue the series for the 1961 Census but also to improve definitely on its content so that each District Census Handbook contained certain basic economic data for the smallest administrative unit in the district and be an useful reference book for scholars and other data users.

The publication of 1971 District Census Handbook was in three parts, viz., Part-A, Part-B, and Part-C; Part-A relating to Village and Town Directory, Part-B relating to Village and Townwise Primary Census Abstract and Part-C comprising District Census tables and certain administrative statistical tables.

The tradition of bringing out the District Census Handbook has been continued by the State Government during the 1981 Census also. In this series, some individual features besides restructuring the formats of the Village Directory have been adopted bearing in mind the national requirements of data for the socio-economic programmes of the Government. The comparability of data with the 1971 Census data has also been kept in view.

The present District Census Handbook will be published in two parts, viz., Part A - Village and Town Directory and Part B - Village and Townwise Primary Census Abstract.

SCOPE OF VILLAGE AND TOWN DIRECTORY STATEMENTS AND PRIMARY CENSUS ABSTRACT

The District Census Handbooks are the only publications which incorporate the data down to the level of a village and level of ward or division of a town which are constantly referred to by the data users.

The Village Directory statement gives the list of villages by C.D. Block and for each village the area, number of households and population, availability of amenities and land use. The information on amenities available in the village includes educational, medical, drinking water, post and telegraph, market, rail / road or other communication facilities and power supply. Land use is shown as area under forests, irrigation, unirrigated land, culturable waste and area not available for cultivation.

Appendix - I gives C.D. Blockwise abstract of educational, medical and other amenities available viz., the number of villages having various levels and types of educational institutions such as middle schools, adult literacy centres, etc., various types of medical institutions such as dispensaries, primary health centres, maternity and child welfare centres, family planning centres, community health workers etc., and the number of such institutions, various types of sources of drinking water such as tap, well, tank, tube-well, river, fountain, canal, etc., post and telegraph offices, bus stops, railway station, power supply, etc., and also the number of villages not having such amenities.

Appendix - II gives for each non - municipal town (Census Towns) the area under forest, irrigated and unirrigated land, culturable waste (including gauchar and groves) and area not available for cultivation.

Appendix- III records list of villages where no amenities relating to education, medical, drinking water, post and telegraph, communication, power supply and market/hat and public health facilities etc., are available.

Appendix - IV gives list of villages according to the proportion of SCs/STs to the total population by ranges. Part-A of the Appendix lists out villages according to the proportion of SC population. The information is presented by the ranges in per cent, viz., 0-5, 6-10, 11-15, 16-20, 21-30 and 31 and above. Part-B provides similar data for ST population ranges in per cent, viz., 0-5, 6-15, 16-25, 26-35, 36-50 and 51 and above.

The Town Directory gives important and very useful information like civic and other amenities available in all the towns in the district, statutorily notified as well as non-municipal or census towns. The details relating to each of the towns have been presented in seven statements, viz., Statements I to VI and IV-A.

In all the statements, except IV-A, the towns are arranged in alphabetical order for the district. The Town Directory does not cover strictly military areas. It may, however, cover cantonment areas but not strictly military areas or military establishments within the cantonment which are required to be left out. However, basic statistics of the cantonment as a whole have been provided. In the Town Directory, codes have been given for the data on amenities and civic administration for want of space. The relevant explanations for the codes adopted have been given in the beginning of the Town Directory statements.

The concept of "urban agglomeration" was introduced for the first time in 1971 replacing the concept of "town group" of 1961. The concept of

urban agglomeration has been continued in 1981 and 1991 Censuses also. An urban agglomeration may be explained as "it must form a continuous urban spread constituting a town and its adjoining urban outgrowth or two or more physically contiguous towns together with continuous well recognised urban outgrowth, if any, of such towns".

An urban agglomeration includes two or more independent census towns. The names of the towns/urban agglomerations have been arranged in the alphabetical order. The particulars of the individual town which constitutes one of the units of agglomeration have not been furnished separately because the particulars have already been furnished, where they occur together under the name of agglomeration. The following remarks have been given against such town within brackets :

"(See the name of the main town of the agglomeration)"

By adoption of this method, the reader can get an idea of the particulars of the urban agglomeration in total and also separately.

Statement I - Status and Growth History

Statement - I provides some basic data based on the Primary Census Abstract for the towns and urban agglomerations of 1991 Census. For analysing the town directory data at the State level and all India level, some new columns, have been introduced in the 1981 Census. The new items are :- class of town, area, number of households, population and growth rate at each census since 1901, density and sex ratio at the 1971, 1981 and 1991 Censuses are also provided in this statement. In 1991 Census, a new item, the name of C.D. Block is also provided in the statement.

Classes of the towns are presented according to 1991 Census population of the towns as follows :

Population			Class
100,000	and	above	I
50,000	to	99,999	II
20,000	to	49,999	III
10,000	to	19,999	IV
5,000	to	9,999	V
Below		5,000	VI

Location Code Number of Towns

To distinguish the town from the village, the location code numbers for towns have been given in Roman numerals and these numbers have been assigned in a continuous order for the district as a whole. In 1991 Census, name of C.D. Block has been included with a view to locate the town in the appropriate C.D. Block.

Statement II - Physical aspects and location of towns, 1989

Under physical aspects, annual rainfall and temperature particulars are furnished. These particulars were obtained from the Commissioner of Statistics, Tamil nadu, Madras. If the information is not available for any particular town, the nearest town for which it is available is given. For Col.(9), nearest city with population of one lakh and more is furnished according to 1991 Census. For the other columns, figures obtained from the Municipal Commissioners and Panchayat Union Commissioners are given. The zero within brackets in columns 10 and 11 denotes that the referent town itself is enjoying road transport facilities. In column 12, name of the navigable river/canal and its distance is indicated as follows : "Cauvery (R)-5". In this case, 5 is the distance in Kms of the navigable river Cauvery from the referent town. In brackets, "R" for river and "C" for canal have been given.

Statement III - Municipal Finance, 1988 - 89

The civic administration status of the town, the receipt through tax, properties and powers, Government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services are given in this statement. The receipts and expenditure are furnished in terms of rupees in hundreds.

Statement IV - Civic and other amenities, 1989

The civic and other amenities existing in the towns as in 1989 are given. The data were obtained from the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Column 3 - Civic administrative status : It is a new column introduced in this statement in 1981 to facilitate analysis.

Column 4 - Population : It is also a new column introduced in this statement in 1981 to measure the amenities in respect of population.

Column 5 - Scheduled Caste and Scheduled Tribe population :

This column is also introduced in 1981 to know the size of the population of the weaker sections of the society in the towns based on Census.

In this statement, information on road length, system of sewerage, number of latrines, method of disposal of night soil, protected water supply (source

of supply, system of storage with capacity) and fire fighting service are also collected from the Municipal Commissioners and Panchayat Union Commissioners and furnished.

Electrification

Electrification particulars obtained from the Tamil Nadu Electricity Board through the Municipal Commissioners and Panchayat Union Commissioners have been furnished as given below :

i) Domestic Connections

This refers to the number of services given to houses for domestic purposes like fans, lighting, etc.

ii) Industrial connections

This refers to the number of services effected to L.T. (Low Tension) Industries such as workshop, flour mills, oil mills, grinding machines, cotton ginning and engineering industries etc.

iii) Commercial connections

This refers to the services given to shops, business houses, public institutions like offices, schools and commercial establishments.

iv) Road lighting points

This refers to the number of points of street lights which are maintained by the board and for which consumption charges are paid to the board by respective local bodies. For some panchayats, the number of services effected alone has been furnished under street lights and not the points.

v) Other connections

This refers to the number of services effected for agricultural purposes, huts, public water supply systems, cottage industries, etc.

Statement IV-A - Civic and other amenities in notified slums, 1989

This is a new statement on civic and other amenities in the notified or recognised slums of Class I and II towns introduced during 1981 Census. Generally, in cities or towns having slums, the local authority such as Municipality or Municipal Corporation or even the Development Authority have notified the recognised slums. Sub-notifications are linked up with the availability of funds from the State Government for slum clearance.

Name of the slum and the details of the area, population, length of the paved roads, system of sewerage, number of different types of latrines and method of disposal of night soil etc., are given in this statement.

Statement V - Medical, educational, recreational and cultural facilities, 1989

In this statement, medical, educational, recreational and cultural facilities of the towns as in 1989 are furnished. The data for educational and medical facilities were obtained from the Municipal Commissioners and Panchayat Union Commissioners for the concerned towns, and from the Director of Secondary Education and Director of Public Health respectively. Under medical facilities, number of hospitals/dispensaries/T.B. clinics etc, and number of beds in medical institutions etc., are furnished.

Under educational facilities, the number of Arts / Science / Commerce colleges, Medical Colleges, Engineering Colleges and Polytechnics obtained from the State Education Department are furnished.

Column 10 - Recognised shorthand, typewriting and other vocational training institutions :

Particulars were obtained from the District Industries Officers and from the Directorate of Employment and Training. The term recognised refers to institute recognised by some statutory authority like Education Department, Commerce Department, Labour Department etc., of the Government or by Semi-Government or autonomous bodies, public sector projects etc.

Column 16 - Number of working women's hostel with number of seats :

This is a new column introduced during the 1981 Census. Considering the increase in the employment of women in urban areas, the housing need of working women has been considered as an important subject for study.

Data presented under column 18 - refer only to the permanent cinema theatres and do not include the touring cinemas.

Statement VI - Trade, commerce, industry and banking in 1989

In this statement, trade, commerce, industry and banking facilities in the town as in 1989 are furnished. Banking particulars were obtained from the Reserve Bank of India. The information on

number of agricultural and non-agricultural credit societies were collected from the Registrar of Co-operative Societies through the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Scope of Primary Census Abstract

The Primary Census Abstract, as it is called, presents basic data for each village or segment of a village (in cases where such village segments form different Panchayats) in the "Villagewise Primary Census Abstract" and for each ward/division of a town in the "Urban Primary Census Abstract". The format of the Primary Census Abstract for the villages and towns in 1991 has been slightly modified as compared to the 1981 Primary Census Abstract.

The Primary Census Abstract will give the details on area, number of occupied residential houses, number of households, total population, population in the age-group 0-6, number of SC/ST population, literates, total main workers, distribution of main workers by nine industrial categories, marginal workers and non-workers in respect of each unit. In 1981, the main workers were classified into four categories whereas in the 1991 Census they are classified into nine industrial categories as in 1961 and 1971 Censuses. For the first time in this census, the population in the age group 0-6 with sex break up is presented in PCA in order to arrive at the realistic literacy rate as all the children below seven years are treated as illiterates in this census. The Urban/Village Primary Census Abstract gives this information for each village and each urban ward. Till 1981 Census, the Primary Census Abstract was presented for each taluk and for each town in a district. But, in the 1991 census, the Primary Census Abstract for each CD Block is presented for the first time in the Indian Census. Besides these, separate Primary Census Abstract for scheduled castes and scheduled tribes which contain similar details as those in the PCA for general population is presented for State/District/Taluk/Community Development Block/UA/City/Town.

With a view to ensure comparability and to enable data users to derive the figures either for a revenue village or panchayat according to their requirements, the data are presented for segments of villages also, wherever portions of one village happen to be in two or more panchayats. The segment-wise data have to be used separately or added with the data of concerned segments so as to derive panchayat data. For example, if portion of a revenue village bearing L.C.No.9, Thingalur, forms part of two panchayats, the figures are given separately for each portion of the village against L.C. No.9 a/b and 9 b/b. The total figures for the entire revenue village can be arrived at by adding the

figures given against both the segments viz., 9 a/b and 9 b/b given in the Village Primary Census Abstract. If, instead, the panchayat figures are required, the data for the concerned village segment or segments relating to the panchayats concerned are to be added up to arrive at the total figures for the respective panchayats. An appendix is presented in the case of the Urban Primary Census Abstract and it gives 1991 population, Scheduled Caste and Scheduled Tribe population for each enumerator block of the town. This may be useful for administrative and election purposes in the urban areas. Such data are also required by urban planners and researchers for conducting other studies in selected blocks.

Mode of presentation

At the beginning, the District Primary Census Abstract containing data for District and C.D.Blocks (for Total, Rural, Urban areas) as also towns under each C.D. Block and at the end, all the towns/UAs in the district are presented. In 1991 Census, the C.D.Blocks is the main unit of presentation of data instead of taluk which was the main unit till 1981 Census. The District PCA is followed by alphabetical list of villages for each C.D. Block in the district. This is followed by Village / Urban PCA. In the Village / Urban PCA, data for the first C.D.Block for total, rural and urban areas separately, followed by data for villages and census towns falling under each C.D. Block are presented. Thereafter, similar data for second, third and subsequent C.D.Blocks in the district are presented. At the end of the last C.D.Block, the Urban PCA containing data at ward level for all the towns and cities besides the data for UAs are presented. In an appendix to the Urban PCA, total population and population of Scheduled Castes/Scheduled Tribes for each Enumerator Block of every town/city in the district are given. After the appendix to Urban PCA, the Talukwise PCA containing data for the District and each taluk in the district with Total, Rural and Urban breakup is presented, as such data are also sought after. This is followed by two annexures. Annexe - I contains details of Community Development Blocks falling under each taluk and Annexe - II contains names of the villages/segment of villages constituting each town in the district.

Maps

Apart from the District Map given as frontispiece, maps for each taluk showing the villages, Location Code numbers and their boundaries are presented. The boundaries of the C.D.Block falling in the taluks are also shown. As compared with the maps presented in 1971 and 1981 District Census Handbooks, some improvements have been effected in the maps presented in this volume. All towns are shown with shading screens and also spheres according to the population size of towns in the district and taluk maps.

Area Figures

In the District Primary Census Abstract, the area figures are given in Sq.Km for total, rural and urban areas. In the Village Primary Census Abstract, the area figures for each revenue village are given in hectares upto two decimals. The area figures for each town is given in Sq.Km. In the Urban Primary Census Abstract, the area figures of the district total represent the "Geographical Area" figures supplied by the Surveyor General of India. Figures for urban areas and villages are those supplied by the local bodies and revenue authorities respectively. The total urban of the area of a district has been arrived at by adding the urban area figures of each town within the district. Area figures for the rural areas of the district are derived by subtracting the urban area figures from the total area of the district. The area figures of each C.D.Block represent the area figures that are published in the concerned departmental publication of the State Government. The area figures of the C.D.Blocks will not add up to the district area figures because, the C.D.Block area figures represent the "Land use" area, while those of the district represent "Geographical Area", supplied by the Surveyor General of India. The total of the village areas given in the Villages/Urban Primary Census Abstract may not tally with the rural area of the C.D. Block given, as the C.D. Block area figures include hills, forests, rivers etc, whereas the village area may not include the same. One Sq.Km is equal to 100 hectares.

It is hoped that the pattern of presentation of basic census particulars for each district as explained above and adopted in this volume would be found convenient by data users.

MADRAS - AN OUTLINE

HISTORY

Madras city has emerged as a cosmopolitan city, playing an important role for historical, cultural and intellectual development of South India. The Madras Presidency then was third in population among the cities of the British Empire during 1871. For fifty years, the population growth in Madras have been very low until 1921. There had been a rapid population growth from 1921 to 1971. Apart from natural increase of population in the city, immigration from time to time has been listed a chief contributing factor.

The Madras city came into being due to strategic necessity and historical events. It symbolises the rise of British power in South India by setting up and consolidation of the East India Company in the 17th Century with its headquarters at Fort St. George as a trading centre. Within 350 years a few scattered villages (important being Mylapore, Triplicane and Madras Patnam) were developed into a modern metropolitan city without shedding its tradition, customs and religion.

Madras city had been an important centre historically for various purposes, specifically on strategic point of view, trade and commerce. Madras was originally known as Madras Patnam which was a part of Thondaimandalam. The formation of the institution of a Mayor and Corporation of Madras city was begun during 1687-1692. This status was given to this city after the Madras Patnam was brought under different rulers like Golkondas, Mughal and Europeans. The status of Government of Madras in 1698 continued for 11 years in whose period was granted with the towns of Tondiarpet, Purasawalkam and Egmore from the local Nawab. This period also gained remarkable development in trade and commerce as Madras was an important and historical centre. The war between French and English resulted with a significant change in which England lost its authority in 1744 over Madras to French rulers.

Between 1755 and 1763, Madras city was developed with trading corporation, incorporated isolated towns, established ports and factories. In 1781, Madras city was added with a naval base which made South India secure in all respects. The supremacy of English over South India was further strengthened without break. From 1799 onwards, the villages and other places scattered around Madras got agglomerated gradually with Madras city.

Consolidation and development of institutions in Madras were held between 1803 and 1827. A

Judicial Commission with Lord Munro as chief in 1814 took place for administrative reform in Madras. To improve the literacy, various steps were taken place between 1820 and 1827, specifically by creation of board of public instructions for imparting English education in Madras, various institutions of professional and technical education have been established in the beginning of 19th century in Madras. The educational institution of higher learning like school of Industrial Arts was begun in 1850, Civil Engineering College in 1834, Madras Medical College in 1835 and Madras Medical University in 1857. While considering the growth of population and development, the Madras High Court was established in 1862 to cater the needs of the public. Though the Railway Company was formed in 1845, the actual construction work in Madras began from 1853. With the moderate development of railway facilities and requirements in South India, Madras city was facilitated with headquarter for South Indian Railway in 1858.

Several important events took place between 1850 and 1900 in Madras. The Madras harbour work was initiated between 1872 and 1875, while the Session of Indian National Congress held in 1887 at Madras. From 1900 onwards several establishments of different nature started functioning in Madras which helped for socio-economic development of the city. From time to time, the area under Madras city kept extending due to population growth and expansion of industrial development.

JURISDICTIONAL CHANGES

Revenue Divisions

With the inclusion of 12 Panchayats around Madras in 1978, the area was extended from 128.83 sq.kms to 170 sq.kms. However, the present area, as is reported by the revenue authorities of Madras district is 174 sq.kms. From time to time, the Madras district have been divided into number of divisions for administrative purpose. The total number of divisions have been increased from 150 in 1981 to 155 in 1991 by including five areas such as Cherian Nagar, Dr. Radhakrishnan Nagar (South), Villivakkam (South), Virugambakkam (South) and Aminjikarai (Central). The Madras district is represented with 14 Members of Legislative Assembly and 3 Members of Parliament.

Urban Agglomeration

Continuous urban spread of a few intense urban areas wherein the urban characteristic features has actually been extended could be considered under Urban Agglomeration. The urban area which extended to the neighbouring districts reported in

the 1991 Census is 612.11 sq.kms. Excluding Madras Corporation's area (174 sq.kms), the remaining area of 438.11 sq.kms belong to the Chengalpattu - MGR District. The total population of 57 urban agglomeration areas including Madras Corporation in 1991 Census returned as 5,421,985 ;2,805,566 males and 2,616,419 females of the total population Madras Corporation shared major portion (70.85%) and the rest of the population have spread over in 56 urban areas belong to Chengalpattu-MGR Districts. Number of households in the urban agglomerated areas are 1,139,438 while Madras Corporation constitute 70.06% (798,279). This indicates that majority of the households belong to Madras Corporation areas.

LOCATION AND PHYSIOGRAPHY

Madras city, one of the metropolis in India is the capital of Tamil Nadu, serves a Gateway to the South Indian culture. Madras is situated on the Northeast corner of Tamil Nadu on the coast of Bay of Bengal. It lies between 12°9' and 13°9' Eastern longitude. Madras district or otherwise Madras city has a stretch of sea coast of about 25 kms along the Bay of Bengal from Thiruvannmiyur in the South to Tiruvottiyur in the North. The district is surrounded on the East by Bay of Bengal and other three sides by Chengalpattu - MGR Districts. The average elevation of the city is not more than 22 above the mean sea level while most of the localities are just at the sea level.

The city is intersected by two streams, the Cooum and Adyar. The Cooum runs through the heart of the city and enters into sea. While the Adyar river

passes through the Southern part of the city Buckingham canal runs through the city, almost parallel to Coromandel coast, within the limit of 5 kms from the coast.

CLIMATE RAIN FALL AND TEMPERATURE

Madras experience hot climate which could be classified as tropical maritime monsoon type. As the district is in the tropic, the temperature is naturally high but it is counter-balanced to a considerable extent due to the proximity of sea. Monsoon period is between June and December while cold weather prevails between December and February. From March to May, Madras city experience the warmest weather.

The mean minimum temperature rarely falls down to 20° C while the mean maximum temperature above 37° C. The actual mean minimum temperature recorded in Nungambakkam and Meenambakkam for the period between July and December in 1990 indicate that the temperature ranges from 22.8° C to 25.9° C and 21.9° C to 25.8° C respectively. Similarly, the actual mean maximum temperature for the same period recorded as between 28.9° C to 35.1° C respectively in the two stations. However, the average actual mean minimum temperature per month for the period was 24.68° C in Nungambakkam while it was 24.45° C at Meenambakkam. The humidity in the city is reported to be high when compared to other areas in the State due to the geographical location. The average humidity recorded per month at Nungambakkam and Meenambakkam for the period between July and December, 1990 were 76.83% and 76.33% respectively. It is reported that the humidity rate during morning was higher than the evening

Madras is in the tropics. It has a warm climate which is tropical maritime monsoon type. It is just about the sea level temperature of the region and is naturally bound to be high, but these factors are counterbalanced to a certain extent by the city's proximity to the sea.

A perusal of these tables will reveal the Temperature at various stations. The maximum temperature is only during the month of June (35.1) and the minimum is during the month of December (21.5).

Madras city is getting the maximum rainfall during the month of November being the North East Monsoon period (466.9).

May always happen to be the hottest month in the year. Madras City has recorded 50.3 degree Celsius during May 1992.

January and February are the usual months of wintry period during which temperatures will be freezing and frosty.

AREA AND POPULATION

The population, according to 1991 Census, of Madras District was 3,841,396; 1,986,278 males and 1,855,118 females, which constitute 6.88% of the total

population of Tamil Nadu. Of the total urban population in the State, Madras share 20.14%. In 1981 Census, the population in Madras District was 3,276,622 (1,694,107 males and 1,582,515 females) and the population growth rate for the decade returned higher (17.24%) than the State (15.39%). The sex ratio in Madras District has been returned as 934 females per 1000 males against 974 females at State level. The population density in Madras District numbered 22,077 persons per sq.km. Being a cosmopolitan centre and urban agglomeration, educational development among different sections of the population stated to be remarkable. The literacy rate, according to 1991 Census, in Madras District returned as 81.60% males 87.86% and females 74.87% against the literacy rate of 62.66% in the State. The Scheduled Caste population in Madras District has been returned as 13.79% to the total population. The Scheduled Tribe population in the District reported very less (0.21% to the State population). Number of households in Madras reported in 1991 Census were an average of 4.8 persons in a household. The work percentage rate among the main and marginal workers to the total population in the district returned as 30.5%. There has been a wide differentiation between men and women main and marginal workers. Men participate at 51.14% while women participation

reported to be only 8.4%. In primary sectors (cultivation agricultural labour, livestock, forestry, fishing, hunting and mining and quarrying), the main worker reported negligible. Main workers in secondary sectors (manufacturing, processing, servicing and repairs in household industries and in other than household industries and construction) were relatively high compared to tertiary and primary sectors. The secondary sector workers constitute 30.59% to the total main workers; 31.98% males and 21.53% females. A significant proportion of main workers are reported from tertiary sectors (trade and commerce, transport, storage and communication and in other services). The major proportion (68.36%; 66.83% males and 78.32% females) of workers were engaged in tertiary sectors.

Madras city with its area of 174.0 has a population of 3,841,396 expressing the highest degree of

urbanisation and density mainly due to immigration and sporadic development of industries on the outskirts.

FLORA AND FAUNA

Variety of fauna from Madras district reported to be negligible. However, number of domestic animals like cow, oxen, buffaloes, sheep and goat, pig, donkey, dog and cat are found common. Various types of wild animals are also found in the Children's Park at Guindy. Spotted deer and herds of bucks are reared in Raj Bhavan Garden. Some people domesticate fowls and ducks. Besides, birds like crow, parrot, pigeon, mynah, koel, sparrows, kite, vulture and water birds like snips and storks are abundant.

Madras is popular for various types of marine fauna which are found abundantly on the sand and sea. Plenty of tiny crabs running on sand is noticeable by people who pass through sandy beach.

Variety of fish available in sea include mullets, silver hellies, ribbon fish, white bait, jew fish, seer, pomfrot, sardines, sabre, cat fish, tunny, synargis, soles, sharks, skates, rays, rockcod, pella, lethrus, engrailis lobster, barracuda, snappers, breams, borito, polynemus etc. There are variety of crabs and prawns found in sea.

EDUCATION

The foundation for educational development of any society is basically depends on the facilities available for school education. School education in Madras District have been brought under Directorate of school Education and Directorate of college Education. There are Government, Aided and Unaided schools functioning in various parts of the district which teaches in both English Vernacular languages. It may be stated that a number of private recognised schools are performing better than other schools. It is also understood that children's admission in these private schools is becoming difficult nowadays.

The higher education in Arts and Science, Medical, Engineering and Law had been given much importance as these courses have direct implication on socio-economic development of the people. In this district, various disciplines have been listed in Arts and Science courses for which a number of colleges and the University fulfils the need of the pupil. Both bachelor and master degrees are awarded in colleges and universities. The colleges offering various Arts and Science courses and Medical and Law situated in Madras city are affiliated to the Universities. Previously, the Engineering colleges were affiliated to Madras University.

In addition to Government colleges (6), self-financed (3) and private and autonomous (14) colleges offer different Arts and Science courses in Madras city. The number of students enrolled in all these categories of colleges numbers to 38,484; 17,580 boys and 20,904 girls. Number of teachers in these colleges stated to be 2,563 which works out to about 15 students per teacher. In addition, the Madras University which offers different Art and Science courses within the campus has enrolled 2,348 students; 1,256 boys and 1,092 girls. Number of teachers within the University numbers to 389 which works out to about 6 students per teacher. The variation between the University and the affiliated colleges is due to the availability of various research courses in the University.

Besides the general courses offered in the higher education, there are professional courses offered by some educational institutions like Teachers Training Colleges (6), Oriental Colleges (2), and Physical Education College (1). The Teacher Training Colleges are run by both Government (2) and private (4)

institutions in Madras. There are 501 students; 294 boys and 207 girls in Government Colleges and 601 students; 118 boys and 483 girls, in private and aided colleges. There are 88 teachers; 40 in Government colleges and 48 in private colleges in the Teachers Training Colleges.

Medical Education is very important for sound socio-economic development of the people. Madras city plays a crucial role for imparting various medical and paramedical courses through various medical institutions. Professional medical colleges such as Madras Medical College, Stanley Medical College and Kilpauk Medical College are offering Medical Education. These colleges are controlled by Tamil Nadu Dr.M.G.R. Medical University, situated in Madras. In addition, there is a Dental College and a Nursing College located within the city. A number of Post-Graduate Diploma Courses in Medical and Para Medical courses are also being taught in these colleges.

The number of students enrolled in these colleges and other medical institutions varies. The total students in the Bachelor Medical Courses in all colleges numbers to 430, while the Dental Course students are 60 the Post-Graduate level students in the different courses in all colleges numbers to 329. There are 335 Post-Graduate diploma students of different courses enrolled in these colleges. In the field of Nursing, majority of the students enrolled are women. It is reported that 75 students have enrolled for Nursing course both degree and diploma courses. Besides, the colleges are also teaching Technical Medical courses in various subjects like Blood Transfusion, Cardio Vascular Thoracic Surgical, CRA, DRA, ECG etc. According to the Directorate of Medical Education, there are 350 teachers in these colleges who teach different courses being offered in these colleges.

The Education Department of the State Government is running both aided and unaided Technical Institutions in the district. Various technological institutions are imparting different courses. It may be stated that the development of expansion of technological institutions would create more employment opportunities which, in turn, improve the socio-economic condition of the people. According to Department of Technical Education, there are eight Government Engineering and Technological Institutions in Madras District in 1990-91. In addition, there are five Polytechnic Diploma Institutions functioning with aid (2) of Government and three unaided in the district. The major technological courses offered are Civil, Electrical and Mechanical Engineering and Printing, Chemical, Leather and Textile Technology, Commerce Education and Arts and Crafts courses etc.

The number of students enrolled in various Polytechnic Diploma in the district accounts to 1450. There are 313 teachers in these Institutions which works out to 4.63 students per teacher. Besides, 415 students have enrolled in other technological courses in various institutions. To teach the students of various technological courses, 119 teachers are being utilised in the institutions. A survey during 1989 reveals that there are 584 technical centres which offer shorthand (489), typewriting (60) and other vocational (35) courses in the district.

To improve literacy in the district, various steps are being taken up. Adult Literacy Centres (105), and non-formal education centres Balwadis and Anganwadis are functioning at different places in the district. Part of educational development, about 155 public libraries are created in the district. To enable the working women in the district to live comfortably, 15 Working Women Hostels (with 540 Women) have been created.

British first gave little importance on educational development of Indian population. However, they established several educational institutions which later on became national importance.

LIBRARIES

Name and address

- 1 Devaneya Pavanar Library, Madras.
- 2 Government Oriental Manuscript Library, Madras-5.
- 3 Connemara Public Library, Madras-8.
- 4 Madras University Library, Madras-5.
- 5 United States Information Service, Madras-6.
- 6 British Council Library, Madras-2.

There are six Libraries in Madras City. Of this the Devaneya Pavanar Library has number of branches spread throughout the city.

Connemara Library at Egmore is the leading one named after Lord Connemara, the then Governor of Madras. It has a large collection of books and journals.

(ii) Indoor	3,65,739

TOPOGRAPHY

Mr. Love, in his book "Vestiges of old Madras" referred to the selection of the site for the Fort by Day.

"Two streams flowing from the west and north respectively had a common outlet to the sea about a mile south of the village of Madraspatnam. The first, which was then known as the Triplicane River, and now as the Cooum, followed a winding course through the villages of Chetput, Nungambakkam and Triplicane. The other a smaller stream called the North or Elambore River flowed parallel to and about a mile distant from the east along the west side of Madraspatnam, till it reached the site of the present General Hospital. It then bent sharply to the east, and, when near the sea, turned southwards again for about three quarters of a mile and met the Triplicane River at its outlet. The first bend, by the existing General Hospital, was within 300 yards of the Triplicane River and at that point a cut was made, at some unknown period before the end of the seventeenth century, between the two streams, with the object probably of equalizing flood levels. The low-lying, marshy tract of land lying between the rivers was consequently surrounded by water, and it was known as early as 1643 as the Island. The two streams formed a wide backwater, and communication with the sea was open only during the rains. The site chosen for the fort was a point on the surfbank of sand which lay between the Elambore River and the sea, three quarters of a mile north of the outlet."

Mylapore has been from time immemorial famous for Hindu Religious lore. It is the place where goddess Parvathi Consort of Lord Siva is said to have performed penance having taken the form of a peacock called "Mayil" in Tamil. From this, Mylapore is said to have derived its name. The place is noted for the famous Shrine of Sri Kapalesswarar, one of the ancient temples of South India.

Mylapore is equally important for Vaishnavites as Peyalwar, one of the earlier Vaishnavite saints, was born in Mylapore.

It is also said that the great saint Thiruvalluvar who gave the world "Thirukkural" the universal code of human conduct was either born or lived in Mylapore.

Mylapore was also considered as a great centre of commerce and was the seaport of the Pallavas (575-582 A.D.). This was as important as Mamallapuram port (Mahabalipuram). The Pallava ruler Nandi Varman III, bore the title of "Mylai Kavalan" or the protector of Mylapore.

MADRAS DURING 1803-1827

This period represents a period of consolidation by the British in South India. Lord William Bentinck, who later became the Governor General of India was the Governor of Madras, for four years. His rule saw the 'Sepoys' Mutiny at Vellore and a quarrel between the government and a Judge of the Supreme Court of Judicature. Towards the end of his rule at Madras, Army Officers gave him trouble. Lord Bentinck was recalled by the Court of Directors of the company because of his inability to deal with the situation effectively.

Sir George Hilario Barlow was Madras Governor for six years from 1807 to 1813. In the beginning of the 19th century there was faction among several groups, the administration was not good, the authority was not powerful enough, army was in chaos and merchants were eager to make money.

Sir Edward Elliot was the next important Governor of Madras. He gave his name to Elliot's Beach Adyar, and to Edward Elliot's Road, Mylapore. He appointed a judicial commission with Munro, as its President in 1814. Several reforms in the administrative system were made by the commission.

Sir Thomas Munro who became the Madras Governor in 1820 and continued till 1827 was both a great soldier and an administrator. He was the father of the Ryotwari system. He contributed substantially to the system of administration. His stature was raised by the people of Madras City which can still be seen in the city. Munro tried his best to improve literacy. He initiated English education in Madras.

St. Andrew's Kirk on the Poonamallee High Road was built during 1813-1821, with government support it was built by Scotchmen. It was followed by the Wesleyan Chapel in Broadway and St. Mathias

Church at Vepery. Thus rapid construction of buildings, churches etc and educational reforms were significant during the early part of the 19th century.

A private school of Industrial Art was started in 1850 by Dr. Hunter, which was taken by government in 1855 and it is the present College of Arts and Crafts. In 1834 the Civil Engineering College was started which became a college in 1862. Madras Medical College was started in 1835 in the name of Madras Medical School. A Hindu institution was also started during the period by the Hindu Trustees who administered the charitable endowments left by Pachaiyappa a Madras merchant of the 18th Century. It grew into Pachaiyappa's College which is now located in Chetput. The foundations of good educational institutions were thus laid during the first half of the 19th century.

The medium of education was English in higher classes and local language in the lower classes. The Department of Public Instruction was created. The University was reorganised as the Presidency College with an attached Law Department. A training school for teachers was established in 1855-56. The Madras University was started in September 1857 on the model of London University.

The use of hookas slowly declined and the number of palanquins also gradually decreased. Such was the picture of Madras City in the middle of the 19th century.

Charles Trevelyan became the Governor of Madras in 1859. His administration was successful in all respects. The Madras High Court was created in June 1862. There were a number of journalists during this period. Mr. M.V. Sadagopacharlu a talented Madras lawyer was nominated to the newly formed Madras legislative council. Another prominent personality of the period was Mr. C.V. Ranganatha Sastri, a great scholar in Sanskrit and law. Press was revitalized by Mr. G. Subramanya Ayyar and 'The Hindu' the prominent newspaper was started by Mr. Vijayaraghavacharya and this was guided and controlled by late Mr. S. Kasturi Srinivasa Ayyangar. 'The Hindu' became powerful instrument of public opinion. Sir T. Muthuswami Iyer became the first Indian Judge of the Madras High Court.

The Railway company in Madras was formed in July 1845. Madras was the Railway headquarters. Lord Hobart who was the Governor from 1872 to 1875 initiated the Madras Harbour Project. He was also responsible for the drainage system in the city. The first regular Census also was conducted in 1871.

Sir Mount Stuart Elphinstone Grant Duff constructed the Marina from Cooum River to Santhome.

In the early years, Madras was the centre of English activity, and the approach to Madras always impressed European arrivals. It was not just the views of palm fringed beaches, rolling surf, tropical blue skies and fresh land breezes. The travellers had already broken their journey in Cape Town and some were bound even further east, for Batavia, Singapore or Canton, but none of these were destined to leave the strongest impression on them. The buildings in Cape Town were nearly all in the Dutch style and would be scarcely a surprise to travellers coming direct from Europe. There is no reason to suppose that Batavia at that time would have anymore imposing effect than Singapore, where the European influence was considerably less. The impression of Canton approached via, Bocca Tigris, and of the lines of factories along the harbour, has been preserved in a number of paintings which record the presence of European architecture in a distant land, but give no hint of army passionate involvement.

But the European arrivals on the Coromandal coast saw Madras in a totally different light. To be precise, they were dazzled by what they saw and what they thought they saw. What first met their eyes was not characteristically oriental milieu but a familiar classical world, an architecture which had its roots in Greece and Rome.

Eliza Fay's (E.M. Forster reproduced her portrait in his "Introduction to original letters from India") described the Holdings that turned the waterfront as follows:-

"Many of the houses and public buildings are very extensive and elegant. They are covered with a sort of shell lime which takes a polish like marble and produces a wonderful effect. I could have fancied myself transported to Italy, so magnificently are they decorated, yet with the utmost taste".

The same sentiments are to be found in Maria Graham's notes at the beginning of the 19th Century.

"I do not know anything more striking than the first approach to Madras. The low, flat sandy shore extending for miles to the north and south the public offices and the houses which line the beach are fine buildings with colonades to the upper storeys supported by rustic bases arched, all of the fine Madras chunam, smooth, hard and polished as marble".

It may seem paradoxical that travellers of the near classical period should find their dream of Greece realised so many miles east of the Bozphorus. But there was justification for such an experience. The buildings had long colonades with open porticos and flat roofs and the architectural impact of a city. Thus arranged offset by strong tropical sunlight and deep blue skies, mesmerised even the most philistine visitor.

The description of Eliza Fay and Maria Graham are in fact the subject matter of the Gantz watercolours in the early 19th century in which the buildings form a magnificent seafront. The wind blows over the wide promenade. The sky is light blue and the colonades dazzling white.

It is understandable that the sight surprised the artists who were also accustomed to the fogs and dark brick facades of London. John Gantz, was in fact an Austrian who worked for the East India Company as a draughtsman, architect, lithographer and topographical artist.

He worked for some years with Lieutenant Thomas Fraser of the Madras Engineers and it was through him that he acquired a working knowledge of architecture and building.

At some time or other John Gantz appears to have setup a lithographic press in Vyasarpadi a suburb of Madras. There still exists Gantz Road, named after him. Justinian Gantz helped his father to run the lithographic press and appears to have specialised in making drawings of European houses in Madras.

With the increase in the availability of power and the possibility of cheap labour more and more industries were started in and around Madras City. The most important one is the group of Buckingham and Carnatic Mills. Tanneries have played an important role in the development of Madras. Integral Coach Factory was also located in Madras City. Establishment of several manufacturing units engaged in car making, Automobile workshops, Industrial Estate both in Guindy and Ambattur, the Surgical Tool Factory have given a new look to Madras city and its suburbs. A number of Arts Colleges, Medical Institutions, Engineering Technological Institutions, Veterinary, Law and Teaching have been established.

Indian Institute of Technology and Central Leather Research Institute have also come up. These have added to the development of the Madras city. Its growth has played an important role in the

development of neighbouring states of Kerala, Mysore and Andhra Pradesh.

During the period of Lord Connemara a public library and museum were built at Egmore and named after him. Madras city was also assured of good drinking water from Red Hills reservoir and Kilpauk pumping station.

ANIMAL HUSBANDRY

According to the 14th Livestock and Poultry Census as on 25.10.1989, the Madras District has :

Cattle	24,446
Buffaloes	28,713
Sheep	4,832
Goats	9,233
Pigs	2,767
Dogs	14,643
Others (Donkeys, Horses, Ponies, Mules, Camels)	186
Total Livestock	84,820
Total Poultry	100,338

Veterinary Dispensary at Royapuram :

i) No. of Veterinary Asst. Surgeon	2
ii) Veterinary Livestock Inspector	2
iii) Cases treated excluding Livestock	
a) Indoor	Nil
b) Outdoor	31,391

1,740	3,818	14,203	19,761

There are 11 Artificial Insemination Centres in Madras. 3 Slaughter houses at Perambur, Saidapet and Villivakkam.

No. of animals slaughtered and meat produced :

Cattle	22,615	2,050,123	Kgs
Buffaloes	27,255	2,552,967	Kgs
Sheep	40,819	4,908,522	Kgs
Goats	242,868	3,198,333	Kgs
Total	334,557	12,709,945	Kgs

Other schemes are :

1) Piggery Unit	1
2) Dog Breeding Unit	1
3) Central Laboratory	1
4) Propaganda Unit	1
5) Press	1
6) Poly Clinic	1
7) Poultry Extension Centre	1
8) Rinderpest Squard	1

Progress of Implementation of Plan Schemes :

Name of Plan : Forzen Semon Technology.

Physical Target - 15,000 Achievement - 64,247

This scheme was introduced in all the sub-centres from 1.4.1988.

Semon is distributed to Veterinary Dispensaries at Ayanavaram, Villivakkam, Tiruvottiyur, Royapuram and Korukkupet.

There is Veterinary Hospital at Saidapet and Veterinary Dispensary at Royapuram. Apart from these, there are 9 sub-centres. They are Adyar, Mylapore, Kodambakkam, Pudupet, Ayanavaram, T.P.Chatram, Basin Bridge, Perambur and Korrukupet.

During the year 1989-90 number of Cattles and Buffaloes vaccinated are 5,312 and 7,677 respectively.

Propaganda about Animal Husbandry is being carried out through Television and All India Radio.

FISHERY

There are 40 marine fishing colonies in Madras District. Out of this 24 are in Fort-Tondiarpet taluk and the remaining 16 in Mylapore - Triplicane taluk. During the year 1989-90, the marine fish catch is to the tune of 15,096 tonnes and its value is Rs.754.8 lakhs. Inland fish catch is very meagre with only 37 tonnes and its value is Rs.1.77 lakh.

Marine fishermen population of this district is 49,510 and the break-up figures of their activities are as under :

i) Fishing	30,210	61%
ii) Marketing of fish	2,475	5%
iii) Repairing of nets	5,940	12%
iv) Process of fish	990	2%
v) Others	9,905	20%

Fishing equipment :
Mechanised

i) Wooden boat	380
ii) F.R. P. boat	2
iii) Country crafts with engine	2
iv) Catamarans with OBM	15
Total	399

Country craft :

i) Masula boat	20
ii) Vallam	5
iii) Dug out canoe	20
iv) Catamarans	2,640
Total	2,685

Fishing Gears :

i) Trawl net	185
ii) Gill net	1,002
iii) Long line	11
iv) Traps	9
v) Shore-seine	50
vi) Others	1,575
Total	2,832

Number of Fisherman Co-operative societies in Madras 61 with 33,810 members. The role played by the Fisherman Co-operative Societies.

- Ration shops are being run for the distribution of essential commodities for the benefit of members.
- Members enjoy the benefits of various welfare schemes such as Savings-cum-Relief Schemes.
- Group Accident Relief Scheme.
- Distribution of loans and subsidies towards the purchase of fishing craft and tackles etc.

A Fishermen Training Centre is functioning at Adyar for importing training to the fishermen in modern method of fishing and also about the maintenance of the engine.

INDUSTRIAL GROWTH

Madras is one of the leading city in India today from the industrial point of view. European business firm which were established in the latter half of the 18th century and Indian business firms established in the latter half of the 19th century have contributed indirectly to the industrial growth of the city.

There has always been a movement of population towards the city. Another fact which can govern industrial growth is the attitude of administration towards industry.

British Government did not consider it to their advantage to organise and regulate industries in an under developed economy. The Government followed a policy of non-interference. The activities of the British were confined to running a few commercial concerns of their own while lack of raw materials near the city, inadequate supply of power, non-availability of machinery, paucity of capital etc., were severe impediments for the growth of the industries.

The pre-independent Government also did not take any substantial steps for the industrial development of the city. Attempts were made.

The importance of Madras city from the point of view of trade and commerce had a great influence in attracting industry. Availability of skilled labour and proximity to port and railway stations are the other factors which have helped concentration of industries in Madras city. Ever since the roles of public and private sectors have been conceived as supplementary and complementary to each other, it was accepted that the establishment of large scale industries is paramount responsibility of the Government. With its sound political administration, comparative freedom for labour trouble and enthusiastic entrepreneurship, Madras has forged ahead during the second plan period towards the establishment of major industrial undertakings to tap even the meagre resources available, to assess the industrial potentialities, to increase the power supply and to provide assistance in money.

Poverty of the region, primitive indigenous industries managed by illiterate artisans, limited demand for manufactured goods, lack of adequate transport facilities, inadequate supply of cheap fuel, non-availability of technical personnel, machinery, lack of finance, and superstitious citizens are the chief factors which had impeded the growth of industrialization.

The history of Industrial development of Madras city is quite interesting. British Government followed a policy of non-interference for more than a century

and did not consider it beneficial to organise and regulate industrial growth in an under developed economy. There were so many bottlenecks in the growth of industries such as lack of raw material, inadequate supply of water, power, non-availability of machinery and paucity of capital etc.

The first factory on record a tannery in Santhome was established during 1855 by Mr. Thomas Parry. In 1939 out of 1871 industrial units in the state 120 were located within Madras City. During early parts of 20th Century the Industrial Revolution began. By 1939, there were 141 factories in Madras city, with average daily number of 20946 workers employed. With the increase in number of factories the number of workers also went up steeply by 50%.

The Second world war proved to be a great fillip with the result of number of industrial units had to work to full capacity and in more than one shifts to meet the growing demand. A number of foreign firms, mostly European came to be established in Madras during the latter half of the 19th Century. Chief of which are Simpson, Spencers, Addison, Best & Co., Burmah Shell oil etc.

During 1935 Reserve Bank of India came into existence followed by a chain of foreign and Indian Banks. Thus the Industrial growth of the city was boosted to a great extent.

India attained Independence in 1947. The Government of India demarcated definite sphere for Government undertaking and private named industries. Five Year plans came into being for boosting growth of small scale and large scale industries. Great emphasis were laid on the expansion and development of heavy industries, factories and machine tool enterprises.

In all, there are more than 14,604 factories in Madras. The Madras district stands at the top with 876,512 employees distributed in all manufacturing industries concerned and which

NUMBER OF REGISTERED FACTORIES AND WORKERS EMPLOYED

District	Number of factories	No. of Workers employed
Madras	14,604	876,512

contributes an overall percentage in the states as a whole.

The industrial importance of Madras City grew considerably as distributing centre for the goods manufactured.

BINNY & CO., PERAMBUR

They were the pioneers of textile trade and they were the agents of Buckingham and Carnatic Mills. It is only 5 kms from the heart of the city. The Buckingham Mill sprang up in 1878 and Carnatic Mill in 1883 and both were amalgamated in 1920.

The Mill is one of the biggest and most modern wearing Mills in India. Due to labour unrest this mill had to face many a lockout during the past decade.

PARRY & CO.

Founded in 1788 it is reported for its manufacture of Sugar, Chocolates, heavy chemicals, fertilizers etc. Its manufacturing units are located outside the city limits.

INTEGRAL COACH FACTORY

After Independence the contribution of science technology and education to the economic growth of various stages of development of the country has been abundantly recognised.

Set up in 1955 with Swiss technical collaboration the production capacity of 350 unfurnished. broadgauge coach shells per year. The ICF today is the biggest coach building factory in Asia with more than 15,000 employees on its role.

The factory also exports number of bogeys to far east countries including our neighbour Pakistan.

FILM INDUSTRY

The film industry had an early start in Madras City. But the Motion Picture industry recorded rapid growth with the establishment of Gemini and Neptune studios followed by AVM, Vijaya, Vauhini, Bharani and Satya. Kodambakkam is known as Hollywood of Madras as it is engaged in producing films in Hindi, Tamil, Telugu and Kannada languages.

HINDUSTAN TELEPRINTERS, GUINDY

Set up in the City during 1960 in collaboration with Messrs. Ing. C. Olivetti of Italy for the manufacture of Teleprinters and other Electronic Exchange equipments.

Small Scale Industries

District	Year	NIC Code	Industry Group	Number and units	Number of workers
1	2	3	4	5	6
Madras	1989-90	20	Food products	59	220
		21	Food products	11	59
		22	Beverages	14	32
		23	Cotton textiles	1	3
		26	Readymade garments	183	2893
		27	Wood products	44	253
		28	Paper products printing	48	1022
		29	Leather products	91	1684
		30	Rubber and plastic products	137	790
		31	Chemical products	66	386
		32	Non-metallic mineral products	30	157
		33	Basic metal industries	32	202
		34	Metal products	143	985
		35	Machinery and ports	114	634
		36	Electrical machinery apparatus	163	1297
		37	Transport and parts	42	333
		38	Miscellaneous industries	41	317
		93	Biological/Biological testing	—	3
		96	Personal service	6	16
		97	Repair service	25	157
		99	Service elsewhere classified	—	—

Small scale industries form the seed beds of large scale industries. As ancillary industries, they form the pillars of industrial growth and contribute significantly to the national economy. Small scale industries are a little bigger concerns working usually on a small factory basis and catering to comparatively wider market. The small industries are of varied types; but then common features are their urban or semi-urban location, and use of machines, power and modern techniques.

There are about 20 small scale industry groups in Madras city. The leading one is Readymade garments having 2893 workers under its unit. Coming close on this is the leather unit producing

leather products with 1684 employees on its role. Cotton textiles and Biological testing also come under the category of small scale industries employing negligible workers, i.e. 3 each.

Another important factor which determined the growth of industry is finance. Various organisations such as International Bank for Reconstruction, Industrial Credit Investment Corporation have been set up in the past few years to meet the ever increasing demand for finance.

Trade and commerce have existed in Madras ever since the first weaver or potter bartered his wares for the surplus catch of a long shore fisherman.

Madras has maintained its importance throughout the last three centuries as a commercial and trading centre. This role has no doubt helped Madras in its industrial growth, without let or hindrance.

TRADE AND COMMERCE

Being a Metropolitan city, Madras plays a crucial role in several activities related to trade and commerce. Madras city is inhabited with various trading communities who have been engaged in commercial transactions. There are different trading companies established by public and private sectors. Trading activities not only within the city and State, but also extended and maintained with other States, particularly with the neighbouring States. Trading activities mainly involved in imports and exports of agricultural products and industrial machineries.

Trading is also maintained with other countries for economic development of the State. As Madras situated on the coast which has well connected harbour, import and export of various trade items are being easily maintained within the country as well as with other countries.

In Madras city, there were 588 scheduled commercial banks which serves the needs of people and other establishments. Of the total number of banks, Indian Bank has 77 branches followed by State Bank of India (69), Indian Overseas Bank (58) and Canara Bank (51).

Besides there are several non-scheduled commercial firms which meet the requirement of the people. Financial companies in the city are also involved in investments and credits to a large extent.

TOTAL VALUE OF FOREIGN EXPORTS AND IMPORTS 1989 - 1990

Sl.No.	Name of the Port	Export		Import	
		Quantity (in tonnes)	Value (Rs. in lakhs)	Quantity (in tonnes)	Value (Rs. in lakhs)
SEA PORT					
1	Madras	82,48,829	2,36,279	1,14,66,951	4,10,397
AIR PORT					
1	Madras	82,68,857	3,17,303	1,14,73,953	4,62,854

Source: Administration Reports of Madras Port Trust, Tuticorin Port Trust and Tamil Nadu Port Department.

Total value of Foreign Exports and Imports during 1989 - 1990 can be seen in this table. The total quantity of Exports handed by the Sea Port remains larger when compared to Imports (82,48,829 tonnes) and (1,14,66,951 tonnes) respectively.

COMMUNICATION

POST AND TELEGRAPH OFFICES 1991 - 1992

1	Post office (Departmental) Extra Departmental	169
2	Post & Telegraph office	67
3	Telegraph office (Demental/CTO)	24
4	Telephone exchange/sub exchange	27
5	Number of Letter Boxes	1,793
6	Number of Telephone Sets	1,82,582
7	Number of PCOS	2,456
8	Number of TV sets licences issued	Not available
9	Number of Radio Licences issued	Not available

Communication is the basic of life inter-dependent on trade and commerce. There are about 169 post offices (Departmental and Extra departmental) in Madras City with 67 Post & Telegraph offices. The number of Telephone sets is 1,82,582, number of PCO 2,456. Number of letter boxes 1793.

TRANSPORT

Madras City is well connected to all major cities in India by rail and road. Madras Central Railway Station where all Broad gauge trains meet from North while that of Metre gauge trains from all over south meet at Madras Egmore Railway Station.

It is also a major Sea Port as well as an International Airport Connecting all airlines.

Madras Port Trust has its own railway lines connected to the Southern Railways and are being operated by the Port Trust.

Increased volume of traffic is also handled by Mass Rapid Transit System run by the Railways.

Madras to Villupuram in the south and Madras to Vijayawada in the north have been electrified as it is the cheapest long distance movement of passengers.

ROAD TRANSPORT

Due to limitations and locational characteristics of the Railway lines the road transport operated by

Pallavan is predominant.

The present strength of state transport buses is far from adequate to meet the needs of the commuters especially during the peak hours. Population growth is the main reason for this state of affairs.

Apart from this long distance express services connecting all district head quarters and important cities in the state are operated by Periyar, Thiruvalluvar and MGR Transport corporations.

Small Scale Industries as ancillary industries form the pillars of industrial growth and contribute substantially to the national economy.

Madras City has the largest number of Small Scale Industrial units, when compared to other districts.

To promote the planned growth of Small Scale Industries Government has established various Industrial Estates such as Guindy, Arumbakkam, Villivakkam, Kodungaiyur, Madavaram and Perambur.

Length of Roads 1990 - 91

All Type of Roads (in Kms)						
District/ State	Surfaced Roads				Unsurfaced Roads	Grand Total
	Cement Concrete	Bitu- minous	Water Bound Macadam	Total		
1	2	3	4	5	6	7
Madras	34.0	1,553.0	125.2	1,712.2	32.3	1,744.5

Availability of certain basic amenities such as pucca roads, tarred roads etc., play a crucial role in the development of towns and cities.

The length of roads in the city of Madras is 1712 kms long comprising Cement concrete, Bituminous and water bound Macadam. Another 32 kms road remains unsurfaced.

There exist 9 and 10 Railway stations in respect of Broad Gauge and Metre Gauge. The Broad Gauge Railway stations connect the North whereas the Metre Gauge stations connect the south such as Rameswaram and Dhanushkodi.

Route length of Broad gauge is 23.46 kms. and Metre Gauge is 17.12 kms. and the track lengths are 72.58 and 47.07 kms respectively.

The higher economic growth depends largely both on exports and imports of food stock for which infrastructural imperatives such as railways are indispensable.

Railway Stations Year 1989-1990

Madras	Name of Railway Station	
	Broad Gauge	Metre Gauge
	1. Madras Beach	1. Madras Beach
	2. Madras Central	2. Madras Fort
	3. Basin Bridge	3. Madras Park

PLACES OF TOURIST ATTRACTIONS FORT ST. GEORGE

It is an historical Fort built by the British who held sway the entire country during the 16th century. The most dazzling and fascinating kirk (St. Mary's Church) in the Fort is that the marriage of Lord Robert Clive believed to have been solemnised. There is also a museum inside the Fort. The museum here is a classical one which bears the fossils of British arms and canons deployed during the First World War.

Castles, palaces, churches, museums are fascinating because they are the symbols of gracious living by British people. Fort St. George, St. Mary's Church and museum are, no doubt, an attraction for tourists and travellers.

Dignified pillars, containing wonderous images flecks of colour - they all add much to the eloquence of sculptors and other artisans. Defence establishments such as Embaration and Garrison are located here. After the departure of Brititshers the Fort St. George and its outskirts are utilised by the state Government for its head quarters and assembly houses.

ANNA SQUARE (MARINA)

It is an immortal memorial on the marina where the great Tamil leader Dr. C.N. Annadurai was laid to rest. So domineering was his personality and contributions to Tamil literature. It is very difficult to separate 20th century Tamil literature from him. Lakhs of people visit this mausoleum regularly, most of them are international.

HIGH COURT: PARRYS CORNER

The building of High Court on Netaji Subash Chandra Bose road looks enchanting, built under the Indo-Saracenic style. Mostly the judicial

departments are located here such as small causes court and a law college. The High Court buildings is a landmark in Madras. Though built during the regime of Britishers it resembles sythesis of Indo-Musliem culture with stone domes atop.

LIGHT HOUSE

This is a beacon of hope for the groping sailors on the ocean. It also provides a panoramic view of the entire city. Besides an attraction for tourists it also serves as an amusement centre for travellers. There are many storeys inside the light house connected by flight of steps. Children will be dilated with happiness when they visit the tallest Skyscraper i.e. Light House.

SANTHOME

Santhome Basilica, the Cathedral with its healing powers was built during the British regime where the mortal remains of Saint Thomas was believed to have been buried. Beautifully carved stone screens throw a filigree of shadows in the encircling dome. That's why it is known as Santhome.

The serenity of the Basilica is lashed by tidal waves of Bay of Bengal. It is also an attraction for tourists irrespective of religion. People from all walks of life come and pay homage to the departed soul of St. Thomas.

The exquisite grace of mein and limb of the statues of Saint Thomas inside the Basilica is very dazzling for human eyes. The plethora of images are very brilliant. It is so difficult to concentrate on the perfection of the images.

GANDHI, KAMARAJ AND RAJAJI MANDAPAMS

These three mantapams have been built as memorials to the three titanic figures of India.

Gandhi mantap on the Guindy highways was the first to be built in memory of our Father of Nation. Line of trees and vegetation on both sides add much to its glamour. Its chief aim is to build bridges of respect, tolerance and friendship through prarthanas and bhajans.

KAMARAJ MANTAP

This also was built in memory of great figure Kamaraj who was instrumental for introducing midday meal scheme for children and free education for all, upto school final.

Among the Chief Ministers who ruled Tamil Nadu, Kamaraj was very famous for his schemes and policies which aimed for the emancipation of women and downtrodden. He was a great optimist and a man of quiet wisdom and integrity; not after pelf and position.

RAJAJI MANTAP

The first and last Governor General of India was Chakravarti Rajagopalachari. He was known endearingly as Rajaji. This is a mantap raised in memory of this great leader and intellectual giant. Even Britishers were flummoxed at his intellectual sharpness. He was a marvel of physical and mental health, quite brisk even at the age of 96.

Though a great attraction for travellers from far and wide these three mantapams on Guindy road near Raj Bhavan serve as shelter for the homeless whenever Madras city is battered by intermittent, rains and cyclonic storms.

SNAKE PARK

It is also situated near about the children's park. It has numerous poisonous snakes, such as cobra and python. Most of them are from African deserts. There are some snakes at the sight of which we will lose our vision, it is believed. So venomous, they are kept in a separate environment inaccessible for children.

CROCODILE BANK

It is also situated on the way to Mamallapuram. It has rare species of about 1,500 crocodiles. They always live in water. It is a great attraction for tourists when they are fed by flesh of bovines. Some of these crocodiles are believed to have been brought from far off African countries.

CHILDREN'S PARK

This is situated very near to Gandhi Mantap on Guindy Road. It is dotted with small lawns and clump of trees. It is also a play field for tiny tots who find great pleasure at the sight of deers and rare birds. There is also a deer sanctuary inside the children's park. This also is an attraction for tourists as it generates substantial revenue.

This sanctuary is mainly intended for conservation of natural habitats, flora and fauna.

Even elders come here for amusement, recreation and relaxation.

VALLUVARKOTTAM: NUNGAMBAKKAM

With a magnificent history to its credit this was built in memory of greatest Tamil Philosopher Saint Thiruvalluvar who gave immortal Thirukkural to the entire world. Of course this memorial serves as an auditorium. The stone car here is the greatest attraction for tourists from abroad as well as far flung places.

MAHABALIPURAM

As is wellknown, Pallava's Mahabalipuram is a destination for tourists from all over the world.

Though it is in Chengalpattu MGR District, [44 kms from Madras city], its rock cut caves and Arjuna's penance are great attraction for foreigners who evince much interest in our hoary tradition and antiquity.

Sun, sand and sea make Mahabalipuram an ideal holiday resort for people escaping from cold Northern winters. Visitors to this place stay longer for its Semblance of cleanliness, serenity and a healthy atmosphere. The beauty of Mahabalipuram as is otherwise known as Mamallapuram cannot be picturised in words. Tourists from abroad overcome by its exceptional beauty and architecture. It has the natural touch.

It is still one of the most significant in the world. Its existing rivers, streams, swamps and other water bodies add lustre to its attraction. Wattles and piles found on the top of hills are no doubt, a great boon for our natural conservation of rare medicinal herbs. Actually these are protected areas and under the care of Forest Department.

Status of gods, goddesses, beautiful female buxom figures sculpted in a variety of poses are definitely symbols of fertility and abundance.

V G P SQUARE

It is a great tribute for V.G.Panneerdoss for it is named after him, and is located on the shores of Bay of Bengal between Neelankarai and Injambakkam. Serene atmosphere, cool breeze perfumed air are added attraction for its majestic and gorgeous scenery.

Smell, aroma, touch and sound of beauty music of the air-add much to its piquant charm. With its orchard groves of mango, gilded crowns, gold bands statuettes of Virgin Mary and Lord Jesus Christ and ornamented pediments hang like precious jewels dangling in the sky.

With its superb sight bustling with coffee shops and open air cafes it is the most lovable square.

On the sands amorous ladies with swirl of skirts dance to the music in the air. It is mellow and romantic. No doubt, it is an holiday resort for travellers and vacationers.

There are umpteen swings and seesaws for the amusement and recreation of tiny tots. The eye is dazzling by a plethora of images sunshine yellow deep purple and statues higher and thicker.

Extra-ordinary luxuries such as the gleaming pots, chandeliers and the furniture from European countries, the real glass panes in the windows-they all attest to the wealth of V.G.P.

It has become legendary as New York to United States of America. A visit to V G P Square will, no doubt, prove to be unforgettable.

VANDALUR ZOO

Situated on a sprawling expanse of land in Chengalpattu MGR District, the zoo named after late Chief Minister of Tamil Nadu "Anna Zoological gardens" has a number of animals, birds and reptiles.

Crane necked giraffes, camels, biosons, bears, camels and iguanas are in large numbers. Feline tigers, porcupines, leopards and ferocious lions are also found here. Some of rogue elephants are reported to have been received as gift from other countries as a token of goodwill and friendship. Common sight, it is that cubs are fed by large bottles of milk.

Ostrich, cranes, storks, swans, geese, mynas, peacocks, cuckoos, parrots, sharp beaked felons roost here. According to ornithologists some of the exotic birds visit this famous zoo as and when they fly to Vedanthangal, the bird sanctuary, in search of cool breeze and tranquillity.

Snakes, cobras and pythons languish under the shade of trees for days together devouring goats and calves as their prey.

Children will be squealing in delight when they see antelopes, spotted deer, and horned stags hop inside the bush green.

Apes, monkeys, chimpanzees are added attraction to this menagerie. Peculiar sight it will be that chimpanzees smoking cigarettes and bidis offered by visitors.

The present zoo was hitherto behind the Moore market. Most of the habitats were in a state of bad

health inhaling gaseous coal emitted by diesel locomotive from adjoining Madras Central Station. Their normal health was spoilt to a great extent by the deafening noise of zooming trains. Most of the animals were also caged. This has prompted immediate shift of this zoo to a vast expanse of land at Vandalur where serene atmosphere prevails amidst groves and vegetation.

A great surprise it will be that striped Zebras and hyenas basking in the early morning sun, forgetting their inborn enmity.

Horned rhinoceres are very few. Hippopotamus and crocodiles are also found swimming in large ponds.

Mini trains are operational inside the zoo so as to have an overall view of the animals inhabiting in the large zoo and chirping birds of various hues.

According to herpetologists the present zoo is one of the largest zoos in our country. Needless to say that it is an attraction for travellers with bags bugging on their shoulders visiting Madras city.

Brief analysis of Village and Town Directory and Primary Census Abstract

A brief analysis relating to certain population characteristics is made utilising the information collected in the Village and Town directory and the census data in PCA. A number of tables have been designed for this purpose. The tables are generated at the district, taluk and CD block level for the rural areas and in regard to urban areas, townwise particulars are presented.

TABLE-1

Population and number of towns 1991

Sl. No.	Name and civic administration status of town	Persons	Population	
			Males	Females
1	2	3	4	5
1	Madras (Municipal Corporation)	3,841,396	1,986,278	1,855,118

This table furnishes sex-wise population and number of towns of Madras district.

It may be seen that since the entire Madras district is coterminous with Madras Corporation area, Madras is the only town of the district, and it has a male population of 1,986,278 as against a female population of 1,855,118.

TABLE - 2

New Towns/Towns declassified, merged
in 1991 Census

Name of Town	Population
1	2
a) Added	Nil
b) Declassified	Nil
c) Wholly merged with other	Nil

This table indicates the New Towns/Towns declassified, merged in 1991 Census. 'Nil' figure is recorded for this table in 1991 Census.

Table-3

Decadal change in distribution of population

Taluk	Population			Percentage decadal (1981-91) variation			Percentage of Urban population		
	1981			1991					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
	3,276,622	—	3,276,622	3,841,396	—	3,841,396	17.24	—	17.24
							100.00		100.00

This table records the changes in the distribution of population for Madras district. The increase in population in the district during the decade is 17.24 percent as against the state average of 15.39 percent.

TABLE-4

Sex Ratio for Towns, 1991

Sl. No	Name and Civic administration status of Town	Number of females per 1000 males
1	2	3
1	Madras Municipal Corporation	934

This table brings out the sex-ratio of females 934 per 1000 males in Madras City as against the state Ratio of 974.

TABLE-5

Percentage of Scheduled Caste / Scheduled Tribe Population in Towns, 1991

Town	Total Population	Total Scheduled Caste population	Total Scheduled Tribe population	Percentage of Scheduled Caste poulation to total population	Percentage of Scheduled Tribe poulation to total population
1	2	3	4	5	6
Madras	3,841,396	592,712	7,930	15.43	0.21

The Table brings out the position of the table Scheduled Caste and Scheduled Tribe population, during 1991 Census and their percentage. The percentage of Scheduled Tribe is very bleak.

TABLE-6

Literacy Rates for Towns, 1991 (Excluding children in the age-group 0 - 6)

Sl. No.	Name and Civic administration status of Town	Percentage of Literates		
		Persons	Males	Females
1	2	3	4	5
1	Madras Municipal Corporation	81.60	87.86	74.87

A perusal of this table reveals that the degree of literacy level among Males and females in Madras city.

TABLE-7

Percentage of Main Workers, Marginal Workers and Non-Workers for Towns, 1991

Sl. No.	Name and Civic administration status of Town	Percentage of											
		Main workers to total population			Marginal workers to total population			Total workers to total poulation			Non-workers to total population		
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Madras (Municipal Corporation)	30.50	51.14	8.41	0.04	0.04	0.03	30.54	51.18	8.44	69.46	48.82	91.56

A glance at this table reveals the percentage of Main workers, Marginal workers and Non-workers to total population of 1991 Census.

TABLE-8

Per Capita Receipt and Expenditure in Towns

Sl. No.	Class, Name & Civic Status of the Town	Per capita								
		Receipt			Expenditure					
		Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General adminta-tration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	other aspects
1	2	3	4	5	6	7	8	9	10	11
1	Madras (Municipal Corporation)	131.88	48.50	83.38	174.44	13.99	17.01	5.93	3.86	133.65

This table brings about the position regarding Receipt and Expenditure. The Per capita expenditure exceeds the Total Receipt.

TABLE-9

Schools per 10,000 population in towns

Sl.No.	Class, Name & Civic Status of town	No per 10,000 Population			
		Higher Secondary/ Inter/PUC/Junior/College	Secondary/ Matriculation	Junior Secondary	Primary
1	Madras (Municipal Corporation)	0.34	0.40	0.77	1.01

The figures in table No. 9 would reveal number of schools per 10,000 population in towns.

TABLE-10

Number of Beds in medical institutions in towns

Sl.No.	Class, Name & Civic status of town	Number of beds in medical institutions per 1000 population
1	2	3
1	Madras (Municipal Corporation)	3.24

A glance at the Table No. 10 reveals the availability of beds in medical institutions per 1,000 population in Madras City.

TABLE-11

Proportion of Slum population in towns

Sl. No.	Class, Name and civic status of the town	Proportion of the slum population to total population of the town	Density in slums (per sq.km.)
1	2	3	4
1	Madras (Municipal Corporation)	6.23	3354

As is evident from this table that the density in slums is 3354 per sq.km. due to rapid growth of population and over crowding in cities.

TABLE-12

Most important commodity manufactured, imported and exported in towns

Sl.No.	Class, Name and civic status of the town	Most important commodity		
		Manufactured	Exported	Imported
1	2	3	4	5
1	Madras (Municipal Corporation)	Railway Coaches	Sea foods, Tobacco	Petroleum

This table will reveal the most important commodity manufactured, exported and imported in Madras City during 1991.

Part A

TOWN DIRECTORY

Note explaining the codes used in the Town Directory

Class of towns by population

Population	Class
1,00,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Civic administration status of the town
