CHAPTER - I

INTRODUCTION

The present publication, Provisional Population Totals - Distribution of Workers and Non-Workers (Paper-3 of 2001) is the third one in the series of publications brought out on Provisional Population Totals, pertaining to Census of India 2001.

The first publication, Provisional Population Totals - Census of India 2001 (Paper-1 of 2001) contained nine basic parameters namely, Total Population by Sex, Number of children aged 0-6 by Sex and Number of literates by Sex for State and Districts as on 1st March, 2001. Besides these, Paper 1 contained certain basic indices such as growth rate, sex ratio, density, literacy rate etc. for State and Districts.

The second publication, Provisional Population Totals - Rural and Urban Distribution (Paper 2), gave the rural-urban breakup for the same nine parameters. In the case of rural areas, the Tables were presented for State, District and Taluk. In the case of urban areas, Data was presented for State, District, Taluk, UA and City/Town. Certain basic indices such as growth rate, sex ratio, literacy rate were also furnished in Paper 2 along with the concepts and definitions of rural and urban areas, urban agglomerations, etc.

In this publication, the distribution of population as main workers, marginal workers and non-workers has been presented by sex for rural and urban areas. The distribution of workers into four industrial categories- Cultivators, Agricultural Labourers, Workers in Household Industries and Other Workers (sex wise as well as rural urban wise) has also been presented.

In the case of rural areas, the Tables are presented for State, District and Taluk. In the case of urban areas, Data is presented for State, District, Taluk, UA and City/Town.

The following four major Tables have been presented in this publication:

- 1) Table-1: Total population, workers and non-workers in State, Districts, Taluks, Urban Agglomerations, Cities and Towns by residence and sex: 2001.
- 2) Table-2: Percentage of workers and non-workers to total population in State, Districts, Taluks, Urban Agglomerations, Cities and Towns by residence and sex: 2001.
- 3) Table-3: Distribution of total workers (main and marginal) as cultivators, agricultural labourers,

workers in household industry and other workers in State, Districts, Taluks, Urban Agglomerations, Cities and Towns by residence and sex: 2001.

- 4) Table-4: Percentage distribution of total workers (main and marginal) as cultivators, agricultural labourers, workers in household industry and other workers in State, Districts, Taluks, Urban Agglomerations, Cities and Towns by residence and sex: 2001.

Data has also been separately presented for Municipal Corporations, Municipalities, Town Panchayats, Census Towns, Urban Agglomerations and Slum population in the case of urban areas in various chapters along with various statements.

A specimen of the household schedule is given in annexure.

Concepts and Definitions

The major concepts and definitions used in the Census of India 2001 are given below:

Urban Areas

The definition of an urban area in Census of India 2001 is as follows:

- 1) All places with a Municipal Corporation, Municipality, Cantonment Board or notified town area committee etc.
- 2) All other places that satisfied the following criteria:
 - a) A minimum population of 5000;
 - b) At least 75% of male working population should be engaged in non-agricultural pursuits and
 - c) A density of population of at least 400 per sq.km.(1000 per sq. mile)

In regard to male working population, male main workers only were considered. Also, workers engaged in agricultural activities viz., 1) Cultivation; 2) Agricultural labour; 3) Livestock, Forestry, Fishing and Plantation, Orchards etc. were excluded for computing the percentage of workers engaged in non-agricultural activities.

All places notified under law such as Municipal Corporations, Municipalities, Town Panchayats and Cantonment Boards have been treated as urban units irrespective of satisfaction of the demographic criteria. Further, in the case of other local bodies, viz., Village Panchayats, the demographic criteria were strictly applied and those Village Panchayats, which satisfied the demographic criteria, were declared as urban units. In Tamil Nadu, there are 721 statutory towns and 111 Census towns in 2001.

Rural Areas

All other places, which do not form part of any urban unit, have been treated as rural areas. In Tamil Nadu, there are 16,317 villages in 2001.

Urban Agglomeration

Urban agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowth (OGs), or two or more physical contiguous towns together and any adjoining urban outgrowths of such towns. Examples of outgrowth are railway colonies, university campuses, port area, military camps etc. that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city.

For Census of India 2001, it was decided that the core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town and the total population of all the constituents should not be less than 20,000 (as per 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which urban agglomerations could be constituted.

- a city or town with one or more contiguous outgrowths;
- two or more adjoining towns with or without their outgrowths;
- a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

City

In census, all urban units having more than one lakh population are known as cities.

Town

All urban units having less than one lakh population are termed as towns.

Economic Activity

Since 1881, particulars about the economic activity of every individual are being gathered in the decennial

censuses in our country and systematically ascertained through the census questionnaire. Data on employment are also gathered in every census from 1881 onwards.

In Census of India 2001, a set of five questions was included in the census questionnaire (Household Schedule). These questions viz., Questions 16 to 20 with their sub-parts enable one to complete the enquiry on workers and non-workers in the Household. These questions canvassed in Census of India 2001 are similar to that canvassed in 1991 Census. However, the wordings were simplified to make these questions easy to understand. A new question on the distance travelled and mode of travel to work spot for specified category of workers was introduced for the first time and the question on seeking/available for work, earlier restricted to non-workers, was now canvassed among the marginal workers also.

Questions regarding Economic Activity in the Census of India 2001

The questions 16 to 20 in the Household Schedule deal with economic activity of individuals. They are as follows:

- Q.16. Did the person work any time last year? (Includes even part time help or unpaid work on farm, family enterprise or in any other economic activity)
- Yes: If worked for 6 months or more (Main Worker), write '1' and proceed to Q.17. If worked for less than 6 months (Marginal Worker), write '2' and proceed to Q.17 or
- No: If not worked at all (Non-Worker), write '3' and proceed to Q. 18 & 19.
- Q.17: Economic activity of the Main or Marginal Worker.
- Q.17(i): Category of the economic activity of the Main or Marginal Worker: C - 1/AL - 2/HHI - 3/OW - 4
- If code '3' (HHI) or code '4' (OW) in column 20 or 21:
- Q.17(ii) Occupation of the person (describe the actual work of the person)
- Q.17(iii) Describe in detail the nature of industry, trade or service where the person works/worked or of self-employment
- Q.17(iv) Class of Worker: Employer - 1/Employee - 2/Single Worker - 3/ Family Worker - 4.
- Q.18: If code '2' (Marginal Worker) or code '3' (Non-Worker) in column 18 or 19, record code of non-economic activity from: Student-1/ Household duties -2/ Dependent-3/ Pensioner-4/Beggar-5/ Other-6.

Q.19: If Marginal Worker or Non-Worker, is the person seeking/available for work? Yes-1/No -2.

Q.20: Travel to place of work. If code '4' (OW) in column 20 or 21

Q.20 (i): Distance from residence to place of work in kilometres.

Q.20 (ii) Mode of travel to place of work.

Economic Activity in the Census: Concept

In Census of India 2001, work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. The concept of 'workers' and the questions on employment have undergone changes over the years, but the concept of 'work' has not undergone any major changes since 1961 Census. Some of these changes are discussed below:

- Until the 1991 Census, production for domestic consumption was not defined as work except in the case of cultivation. However, in Census of India 2001, the production of milk for domestic consumption has also been included in the scope of the definition of work.
- Upto 1951, the economic questions were based on the concept of income. In the 1961 & 1971 Censuses, the concept of work was measured in terms of time or the labour force concept.
- In 1961 and 1971 Censuses, a dual reference period was adopted. In 1961, for seasonal work it was defined that a person should have engaged, regularly in any economically productive work during the last season and for non-seasonal work, he/she should have worked for at least a day during the fortnight preceding the day of enumeration. In 1971, in the case of seasonal work, there was no change in the definition, but for non-seasonal work, he/she should have worked at least for a day during the week preceding the day of enumeration instead of a fortnight in 1961.
- Since 1981 Census, the concept of usual status was adopted uniformly in both the cases of seasonal and non-seasonal work and the reference period was one year prior to the date of census enumeration. In Census of India 2001 also, the same reference period of one year was adopted as in the case of 1981 and 1991 Censuses.

5. In the year 1961 and 1971, a person was categorized as worker or non-worker, based on the economic activities pursued by him/her during the reference period. During the year 1981 and 1991, the worker category was bifurcated into main worker and marginal worker and the same system has been continued in Census of India 2001 also. A person is termed as main worker if he had worked for a major part of the year preceding the date of enumeration i.e. one who was engaged in any economically productive activity for six months or more in the previous year. A person who had done same work in the year preceding the date of enumeration but not worked for the major part of the year (i.e. worked less than six months) was treated as marginal worker. A person who had not participated in any economic activity even for a day during the last one year preceding the day of enumeration was considered as non-worker.

6. In the 1991 Census, the question on seeking/available for work was canvassed for non-workers only. In the Census of India 2001 this question was asked to the marginal workers also.

7. A question to elicit information on secondary work canvassed at the 1991 Census was dropped.

8. From among the categories of non-workers adopted at the 1991 Census, the category 'Inmates of institutions' has been dropped and 'Retired persons and rentiers' has been replaced by the category 'Pensioners'.

9. All the main workers and the marginal workers have been classified under one of the four main categories of economic activity during 1981 and 1991 Censuses as well as Census of India 2001. They are cultivators (C) agricultural labourers (AL), workers in Household Industry (HHI) and other workers (OW).

The definition of these four categories of workers are as given below:

Cultivators (C)

For the purpose of Census, a person is classified as cultivator if he or she is engaged in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction of cultivation. Cultivation includes ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jawar, bajra, ragi etc and other crops such as sugarcane, tobacco, groundnut, tapioca etc. and pulses, raw jute and kindred fibre crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards

or groves etc. It does not include plantation crops like tea, coffee, rubber, coconut and betel nuts. In 1991 Census, fruit growing, vegetable growing and keeping orchards were classified under the category of other workers (OW).

Agricultural Labourers (AL)

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. Such a person has no risk in cultivation but merely works on another person's land for wages and has no right of lease or contract on the land on which he works.

Workers in Household Industry (HHI)

Household Industry is defined as an industry conducted by one or more members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. A majority of workers in the household industry should consist of members of the household. It should be smaller in scale than a registered factory and should be engaged in manufacturing, processing, servicing or repairing or making and selling of articles or goods. Mere selling of goods or articles is not considered as household industry.

Other Workers (OW)

All workers who have been engaged in some economic activity during the last one-year, but are not cultivators or agricultural labourers or in household industry are other workers. All government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists etc. will come under the category of other workers.

As already indicated, the data presented in this volume are purely provisional and based on some quick compilation and tabulation from the Enumerators' Abstract. On completion of the final tabulation of household schedules, a basic statement, known as Primary Census Abstract (PCA), containing the final figures on important characteristics of population including workers, their distribution among the nine industrial categories, non-workers etc. upto village level in the case of rural areas and ward of a town in the case of urban areas will be published.

Distribution of Workers by Four Industrial Categories

In Census of India 2001, like in the previous censuses, the details of the main activity of the main workers as well as marginal workers are collected along with the status of workers. Each enumerator has compiled the number of main workers, marginal workers and non-workers and the distribution of main and marginal workers by four industrial categories viz., cultivators, agricultural labourers, workers engaged in household industry and other workers for each enumerator block in the enumerator's abstract. On the basis of the returns in the Enumerator's abstract, the number of workers and their distribution into industrial categories have been generated. These provisional data are the base for the following analysis. In 1991, the distribution of four industrial categories viz., cultivators, agricultural labourers, household industries and other workers under main workers and marginal workers was made separately whereas in 2001, the distribution is made jointly and thus making comparison of 1991 and 2001, difficult. Moreover, in the 1991 Census, the Primary Census Abstract contained the breakup of workers under different industrial categories (nine) in respect of main workers only and for Census 2001, the data under four categories of workers is available in respect of total workers (main plus marginal). Therefore, making comparison of 1991 and 2001 Censuses is not possible.

In Tamil Nadu, among the 27,811,647 workers in 2001, 5,114,384 have been returned as cultivators forming 18.39% of the workers. The number of workers who returned agricultural labour as their main activity are 8,665,020 and this constitutes 31.16% of the workers. CHAPTER 5

CHAPTER-5

URBAN AGGLOMERATIONS

A brief analysis of total population by workers/non-workers and distribution of workers by industrial categories in the Urban Agglomerations of Tamil Nadu is attempted below.

There are 27 Urban Agglomerations in Tamil Nadu in Census of India, 2001

Work Participation Rate in Urban Agglomerations

The statement 5.1 gives the work participation rate (ie.) the percentage of total workers to total population by sex for each Urban Agglomeration in the State.

It may be observed from the statement that the work participation rate is the highest in Mallasamudram Urban Agglomeration with 54.62%. It is followed by Bhavani Urban Agglomeration with a work participation rate of 49.38 % and Tiruppur Urban Agglomeration with a work participation rate of 47.34 %. Vanniyambadi Urban Agglomeration accounts for the lowest work participation rate of 29.72%, while Neyveli Urban Agglomeration with a work participation rate of 30.01% and Chidambaram Urban Agglomeration with a work participation rate of 31.01 % precede.

In the case of males, Tiruppur Urban Agglomeration has recorded the highest male work participation rate of 68.95%. CHAPTER 6

CHAPTER-6

WORKERS AND NON-WORKERS IN SLUMS

In Census of India 2001, the data on slums are compiled and presented for the first time. The definition of slum, adopted in the Census of India 2001 is as follows:

- i) All areas notified as 'Slums' by State/Local Government and UT administration under any Act;
- ii) All areas recognized as 'Slums' by State/Local Government and UT administration which have not been formally notified as 'Slum' under any Act;
- iii) A compact area of at least 300 population or about 60-70 households of poorly built congested tenements, in unhygienic environment usually with inadequate infrastructure and lacking in proper sanitary and drinking water facilities.

Though separate questionnaire was not used to collect data on Slums, the details collected through the general questionnaire in the areas identified as 'Slums' with reference to the definition of the Slum are used for generating the slum demographic profile. Further, all municipal towns having a population of 50,000 or more as per the 1991 Census were selected for study of slums. Among the 67 towns having more than 50,000 population in 1991 Census, four towns, viz., Neyveli, Udumalaipettai, Pollachi and Kovilpatti have reported that there are no slum areas. Hence, the analysis of slum is restricted to 63 towns only.
