<sup>1</sup> Figures for 'international' include data for orders payable in outlying possessions and foreign countries with which money orders are exchanged on a domestic basis; that is, Canada, Cuba, and numerous islands and minor countries neighbouring the United States. Data for these 'domestic basis' countries are, therefore, excluded from the figures for 'domestic.'

<sup>2</sup> Not including surcharges amounting to 3,375,147 dollars for 1942; 4,129,910 dollars for 1943, and 5,834,209 dollars for 1944.

For the year ending June 30, 1944, mails were transported by rail on a length of 173,482 miles. The total number of employees in the railway mail service was 20,796 (excluding acting clerks). During the year there were 22,076,714,546 distributions and redistributions of pieces of mail, exclusive of registered mail, by railway postal clerks; registered pieces, 129,227,088. Air mail was carried on 49,482 miles of domestic routes; miles flown, 106,954,804.

On June 30, 1944, the postal savings deposits amounted to 2,034,136,507 dollars; in 1943, to 1,577,525,610 dollars.

### Banking.

On June 30, 1944, there were 14,553 banks doing a general deposit business with the public and having aggregate deposits of 128,603,000,000 dollars. Of these, 5,036 with deposits of 65,585,000,000 dollars were national banks operating under charters granted by the Federal Government. The remaining banks, including trust companies and savings banks, were organized under the laws of the various States. Of the 14,553 banks doing a general deposit business, 6,773 were members of the Federal Reserve System.

The Federal Reserve System, established under the Act of December 23, 1913, comprises the Board of seven Governors of the Federal Reserve System, the 12 regional Federal Reserve Banks, 6,773 member banks, the Federal Open Market Committee and the Federal Advisory Council. The Board of Governors, with headquarters in Washington, is appointed by the President with the consent of the Senate. It determines monetary, credit and operating policies and formulates the rules for the System. Each Governor holds office for 14 years, one Governor's term expiring every two years. No two may come from the same Federal Reserve District. The Board's control over credit conditions derives in part from its power to change, within limits, the volume of reserves which member banks are required to maintain with the Reserve Banks, to regulate the margins required by banks, brokers and others on loans to finance transactions in securities, and to regulate the discount rates established by the 12 regional Reserve Banks. The Board, with five representatives of the Reserve Banks, constitutes the Federal Open Market Committee, which directs the purchase and sale of Government obligations made by the Reserve Banks to influence the general credit conditions of the country. The Board supervises the 12 Reserve Banks and the issue and retirement of Federal Reserve notes; it appoints three of the nine directors of each Reserve Bank; it passes on the admission of banks to the System and has power to remove the officers of member banks for continued unsound banking practices. It also governs consumer credit by regulating the terms of private charge accounts, of instalment purchases (hire-purchases) of a comprehensive list of consumers' durable and semi-durable goods, and of certain kinds of loans.

The 12 Reserve Banks (one for each district) implement Federal Reserve policies, chiefly through their dealings with member banks. Although non-member banks outnumber member banks (7,780 non-member banks compared with 6,773 member banks on June 30, 1944), member banks hold about 87 per cent. of the country's total commercial banking resources. The Reserve Banks hold bank reserves, advance funds to member banks, provide currency for circulation, act as fiscal agent for the Government, and afford nation-wide cheque-clearing and fund-transfer arrangements. They may issue notes, fully secured; discount paper for member banks; increase or reduce the country's supply of reserve funds by buying or selling Government securities and other obligations at the direction of the Open Market Committee. In addition, they may advance working capital to established industrial or commercial enterprises for periods not exceeding five years, and finance war production through loans guaranteed in part by the War and Navy Departments and the Maritime Commission. Their capital is owned by the member banks.

Member banks include all national banks in the continental United States, and such State banks and trust companies as have voluntarily applied to the Board of Governors for membership and been admitted. On June 30, 1944,

5,036 national banks and 1,737 State banks were members. Every member bank is required to subscribe to stock in the Reserve Bank of its district in an amount equal to 6 per cent. of its paid-up capital and surplus. Only one-half of the par value of the stock is paid, the other half remaining subject to call by the Board of Governors. The reserve balances which member banks must carry with Reserve Banks are based on the volume of their net demand and time deposits. The Board of Governors has the power to alter these requirements within limits; the following requirements have been in operation since October 3, 1942: All member banks must have reserve balances equal to 6 per cent. of their time deposits; member banks located in central reserve and reserve cities must carry reserves of 20 per cent. of net demand deposits; banks located elsewhere, 14 per cent.

The Federal Open Market Committee controls the purchase and sale by the Federal Reserve banks of Government and other securities. The Federal Advisory Council consists of 12 members (one from each district) which meets in Washington four times a year (or oftener) to advise the Board of Governors on general business and financial conditions.

On September 30, 1944, the capital funds and total assets of the 12 Federal Reserve Banks were as follows:—

| District | Federal Reserve Bank | Capital paid in and Surplus (in thousands of dollars) | Total Assets (in thousands of dollars) | District | Federal Reserve Bank | Capital paid in and Surplus (in thousands of dollars) | Total Assets (in thousands of dollars) |
|----------|----------------------|-------------------------------------------------------|----------------------------------------|----------|----------------------|-------------------------------------------------------|----------------------------------------|
| 1        | Boston               | 26,060                                                | 2,194,079                              | 8        | St. Louis            | 12,012                                                | 1,486,817                              |

The Comptroller of the Currency has supervisory authority over national banks and the banking commissioners of the 48 States have similar authority over banks and financial institutions organized under State laws. National banks operate under the provisions of various Federal statutes, including the National Bank Act and the Federal Reserve Act, while the laws of the 48 States prescribe analogous provisions for State banks. State banks which become members of the Federal Reserve System must meet many of the requirements to which national banks are subjected by law, for example, the requirements as to minimum capitalization.

Banks which participate in a Federal insurance fund have their deposits insured against loss in the amount of 5,000 dollars for each depositor. The fund is administered by the Federal Deposit Insurance Corporation established by the Banking Act of 1933. The resources of this organization derive from an original subscription for capital stock of 150,000,000 dollars by the Secretary of the Treasury and of 139,000,000 dollars by the Federal Reserve banks and from annual assessments levied on participating banks equal to one-twelfth of 1 per cent. of their deposit liabilities as defined in the law.

All members of the Federal Reserve System are required to insure their deposits through the Corporation and non-member banks may apply and qualify for insurance. On June 30, 1944, 13,269 commercial banks with deposits of 114,179,597,000 dollars were members of the insurance fund, including 5 banks in the possessions (3 in Alaska and 1 each in Hawaii and the Virgin Islands) with aggregate deposits of 35,065,000 dollars. The condensed statement of condition of insured commercial banks is given in the following table:—

### CONDITION OF INSURED COMMERCIAL BANKS (In thousands of dollars) June 30, 1944.

|                                                                                                                 | All banks   | National member banks | State member banks | Non-member banks |

| Other liabilities . . . . .                                                                                     | 757,250     | 456,731               | 255,629            | 44,890           |
| Capital accounts . . . . .                                                                                      | 7,710,587   | 4,100,864             | 2,598,667          | 1,016,056        |
| Total liabilities, including capital account . . . . .                                                          | 122,647,434 | 76,142,844            | 38,528,471         | 13,976,119       |

Besides the banks covered by this condition report, there were in operation in the United States 192 insured mutual savings banks with deposits of 8,284,962,000 dollars and 1,265 uninsured banks comprising 913 commercial banks and trust companies with deposits of 2,474,537,000 dollars and 352 mutual savings banks with deposits of 4,238,312,000 dollars.

There are also banks which operate solely in the field of agricultural credits under the Farm Credit Administration. These include among others the twelve Federal Land banks and the twelve Federal Intermediate Credit banks. The loans of these banks outstanding on September 30, 1944, were 1,194,000,000 dollars and 299,000,000 dollars, respectively. There are also Federal Home Loan Banks organized under the Federal Home Loan Bank Act of July 22, 1932, to make advances to financial associations and institutions upon the security of home mortgages.

### Currency, Money, Weights and Measures.

Prior to the banking crisis that occurred early in 1933, the monetary system had been on the gold standard for more than 50 years. An Act of March 14, 1900, required the Secretary of the Treasury to maintain at a parity with gold all forms of money issued by the United States. For a description of these see THE STATESMAN'S YEAR-BOOK, 1934, p. 491.

The old gold dollar had a par value of 49.32d., or 4.8666 dollars of the pound sterling; it contained 25.8 grains (or 1.6718 gramme) of .900 fine. Under existing statutes, the Government is still under obligation to maintain parity between gold and all forms of currency. By the Act of

May 12, 1933, the President of the United States was given authority to reduce the gold content of the dollar by not more than 50 per cent. and by the Gold Reserve Act of January 30, 1934, the minimum reduction which he could make was fixed at 40 per cent.; on January 31, 1934, he fixed its value at 59.06 per cent., or 15.4 grains of gold .900 fine. This was equal to a price for gold of 35 dollars a fine ounce. The President's power to alter the gold content of the dollar to 50 per cent. of its value, which was extended by Congress in 1937, 1939 and 1941, was not again extended in 1943.

At the time of the banking crisis in March 1933, gold payments by banks and the Treasury were suspended by the Government, and the export of gold was placed under the control of the Secretary of the Treasury, who in April placed an embargo on gold exports. Steps were taken to withdraw from circulation all gold coin and gold certificates; legislation in June, 1933, prohibited the inclusion of gold clauses in all future obligations, including obligations of the United States except currency, and abrogated such clauses in obligations already outstanding. The Gold Reserve Act of 1934, approved January 30, vested the title to all gold in the country in the United States Government, and the Federal Reserve Banks were given credits in equivalent amounts in dollars in the Treasury payable in gold certificates.

The Silver Purchase Act of 1934, approved by the President on June 19, declared it to be the policy of the United States to increase the amount of silver in its monetary stocks with the aim of having and maintaining one-fourth of their monetary value in silver and three-fourths in gold, and the Treasury was directed to purchase silver at home or abroad to achieve this end. The President was also authorized to require the delivery to the United States Government of all silver within the country in exchange for coin or currency; this he did on August 9, 1934, authorizing payment of 50 cents a fine troy ounce for silver delivered pursuant to the executive order.

Currency in the United States for many years has comprised several varieties. Prior to May, 1933, the legal tender qualities of these classes varied, but in that month all types of currency were made equally legal tender. On July 7, 1942, all United States currency in Hawaii was withdrawn and a special issue made of 'United States Currency, Hawaiian Series,' on which 'Hawaii' has been overprinted in bold-face type. This was discontinued on October 21, 1944.

The following statement shows by kinds the amount of United States money in circulation—i.e. outside the Treasury and the Federal Reserve banks—on October 31, 1943 and 1944:—

| Kind of money                           | 1943          | 1944          |
|-----------------------------------------|---------------|---------------|
| Gold certificates <sup>1</sup>          | 1,000 dollars | 1,000 dollars |
| Standard silver dollars                 | 55,927        | 55,146        |
| Silver certificates                     | 50,296        | 110,694       |
| Treasury notes of 1890 <sup>2</sup>     | 1,578,801     | 1,592,105     |
| Subsidiary silver                       | 1,154         | 1,153         |
| Minor coin                              | 649,210       | 759,863       |
| United States notes                     | 247,891       | 276,848       |
| Federal Reserve notes                   | 821,052       | 834,233       |
| Federal Reserve bank notes <sup>3</sup> | 15,549,710    | 20,681,418    |
| National bank notes <sup>3</sup>        | 626,377       | 574,874       |
|                                         | 129,900       | 128,989       |
| Total                                   | 19,250,318    | 24,435,293    |

<sup>1</sup> Not yet returned in compliance with the law and regulations of 1933.

<sup>2</sup> In process of redemption.

Only four of the seven kinds of notes are important, (1) Federal Reserve notes in denominations of 5, 10, 20, 50, 100, 500, 1,000, 5,000 and 10,000

dollars; (2) silver certificates in denominations of 1, 5 and 10 dollars; (3) United States notes, in denominations of 2 and 5 dollars, and (4) Federal Reserve Bank notes, in denominations of 5, 10, 20, 50 and 100 dollars. Other kinds outstanding but not in general circulation are (1) National Bank notes; (2) gold certificates; (3) Treasury notes of 1890.

Federal Reserve notes are redeemable in lawful money (but not in gold) on demand at any Federal Reserve Bank or the United States Treasury. They are obligations of the United States and a first lien on the assets of the Federal Reserve Banks through which they are issued. Each of the 12 banks issues them against the security of an equal volume of collateral consisting of (1) short-term commercial and agricultural paper, (2) gold certificates and (3) Government obligations. In addition each issuing bank must set aside a reserve in gold certificates, equal to not less than 40 per cent. of its notes in actual circulation.

On September 5, 1939, the British Government fixed the official pound-dollar selling rate at 4.02 dollars and buying rate at 4.06 dollars (changed to 4.04 dollars on September 21). These rates were modified to 4.02½ and 4.03½, respectively, on January 8, 1940, and have remained at these levels. Average value, 1939, of the free rate, 4.4354 dollars; 1940, 3.8300 dollars; 1941, 4.0318 dollars; 1942 and 1943 (until the free rate ceased), 4.0350 dollars.

Gold coins (of the old weight and fineness) were 20, 10, 5 and 2½-dollar pieces called *double eagles*, *eagles*, *half-eagles*, and *quarter-eagles*. The old eagle weighed 258 grains or 16.7181 grammes .900 fine, and therefore contained 232.2 grains or 15.0463 grammes of fine gold. Except for collectors' holdings, these are no longer legally in circulation. The stock of gold bullion, including coin, held by the Treasury on October 31, 1944, was valued at 20,726,703,469 dollars; stock of silver bullion was 2,074,080,817 fine ounces. Estimated stock of domestic coin was 1,541,909,115 dollars, of which 494,337,185 dollars was standard silver dollars and the remainder silver and other subsidiary coin.

The silver dollar weighs 412.5 grains or 26.7296 grammes .900 fine, and therefore contains 371.25 grains or 24.0566 grammes of fine silver. Subsidiary silver coins contain 347.228 grains of fine silver per dollar. These are the half-dollar, quarter-dollar and dime (one-tenth). Minting of a new 5-cent piece of silver and copper alloy was begun on October 1, 1942, the minting of the 5-cent piece of nickel having been discontinued in May, 1942. Production of the copper 1-cent piece was discontinued in December, 1942, and replaced by the minting of a zinc-coated steel coin during the period from February 23, 1943, to December 31, 1943; minting of the copper coin was resumed on January 1, 1944.

British weights and measures are usually employed, but the old Winchester bushel and wine gallon are used instead of the new or imperial standards. They are:—

Wine Gallon = 0.83268 imperial gallon.  
Bushel = 0.9690 imperial bushel.

Instead of the British cwt. of 112 lb., one of 100 lb. is used; the short ton contains 2,000 lb.; the long ton, 2,240 lb.

### Diplomatic Representatives.

#### 1. OF THE UNITED STATES IN GREAT BRITAIN.

*Ambassador*.—John Gilbert Winant (appointed February 6, 1941).  
*Ministers*.—Thomas C. Blaisdell, Jr., and Hamilton Fish Armstrong.  
*Counsellor of Embassy*.—Waldemar J. Gallman.  
*Economic Counsellor*.—Harry C. Hawkins.

**Secretaries.**—Carlos J. Warner, Edward T. Wailes, S. H. Browne, W. H. Scott, L. Satterthwaite, J. F. Stone, R. P. Chalker, J. M. Allison, A. F. Peterson, Dorsey G. Fisher, Robert D. Coe, Henry E. Stebbins, M. A. Colebrook, John Ordway, F. K. Salter, C. S. Brown, D. B. Calder, Richard A. Johnson and J. D. Beam.

**Military Attaché.**—Brigadier-General Paul E. Peabody.

**Naval Attaché.**—Rear-Admiral George B. Wilson, U.S.N.

**Military Air Attaché.**—Colonel Milton M. Turner.

**Commercial Attaché.**—Don C. Bliss.

**Agricultural Attaché.**—Lloyd V. Steere.

**Attaches for the Treasury.**—L. W. Casaday, N. D. Borum, La Rue Brown, S. D. Turner, D. L. Wright, B. Archambault, Dr. H. Southworth, S. G. Welles and Clarence Meyer.

There are Consular representatives in Belfast, Birmingham, Bradford, Bristol, Cardiff, Edinburgh, Glasgow, Hull, Liverpool, Manchester, Newcastle, Plymouth, Southampton.

## 2. OF GREAT BRITAIN IN THE UNITED STATES.

**Ambassador.**—Right Honourable Viscount Halifax, K.G., G.C.S.J., G.C.I.E. (appointed December 22, 1940).

**Ministers.**—John Balfour, Sir George B. Sansom, Sir Gerald Campbell, G.C.M.G., and Harold Butler, C.B.

**Secretaries.**—M. R. Wright, D. D. Maclean, W. G. Hayter, P. H. Gore-Booth and J. W. Russell.

**Naval Attaché.**—Rear-Admiral H. Pott, M.V.O., R.N.

**Military Attaché.**—Col. Kenneth Mackessack.

**Air Attaché.**—Air Commodore D. L. Blackford.

**Minister (Commercial).**—J. H. Magowan, C.M.G., O.B.E.

**Consul-General at New York.**—Francis Edward Evans, C.M.G.

There are Consular representatives at all the important centres, including Atlanta, Baltimore, Boston, Chicago, Cincinnati, Denver, Detroit, Houston, Kansas City, Los Angeles, New Orleans, New York, Norfolk (Va.), Philadelphia, Portland (Oregon), St. Louis, San Francisco, Seattle, Washington, D.C.

## Statistical and other Books of Reference concerning the United States.

### 1. OFFICIAL PUBLICATIONS.

**Statistical Abstract of the United States.** Washington. Annual.

**A Handbook on the United States of America.** (U.S. Office of War Information.) London, 1944.

**United States Government Manual.** Washington, 1944. (Irregularly issued.)

**The United States in the World Economy. The International Transactions of the United States during the Inter-war Period.** (U.S. Department of Commerce.) Washington, 1943.

The official publications of the United States are issued by the U.S. Government Printing Office and are distributed by the Superintendent of Documents, who issues every two years the *Catalog of the Public Documents of the . . . Congress and of All the Departments of the Government of the United States*. This *Catalog* is kept up to date by *United States Government Publications, Monthly Catalog*, and supplemented by *Price Lists*. Each *Price List* is devoted to a special subject or type of material, e.g., *American History or Census*. Anne M. Boyd's *United States Government Publications* (New York, 1941) furnishes an excellent descriptive list of the important publications, together with histories of each department, agency and commission. Analytical description of publications also appears in Laurence F. Schmeckel's *Government Publications and Their Use* (Washington, 1939). Out-of-date, but still useful for earlier statistical sources, is *Schmeckel's The Statistical Work of the National Government* (Baltimore, 1935).

**Bemis (S. F.) and Griffin (G. S.), Guide to the Diplomatic History of the United States, 1776-1931.** Washington, 1936.

**Thorpe (F. H.) (comp.), The Federal and State Constitutions, Colonial Charters and other Organic Laws of the States, Territories and Colonies now or heretofore forming the United States of America.** 7 vols. Washington, 1909.

**The Constitution of the United States of America (annotated).** Washington, 1938.  
**The Constitution and other International Acts of the United States of America.** (Edited by Hunter Miller.) Washington, 1931 to date. Treaty series. Washington, 1939 to date.  
**A Bibliography of Books and Articles on United States and Canadian History.** (Issued by the American Historical Association.) Washington. Annual.

### 2. NON-OFFICIAL PUBLICATIONS.

**American Year Book.** New York. Annual.

**Who's Who in America.** Chicago. Biennial, with monthly supplement.  
**Overseas Reference Book of the United States of America.** Brooks (Ocell) (editor). London, 1944.

**The United States in World Affairs.** Lippmann (W.), Scroggs (W. O.) and Mers (O.), editors. Council on Foreign Relations, New York. Annual.

**American Statesmen Series.** About 38 vols. Boston, 1889-1907.

**American Statesmen Series.** About 38 vols. Boston, 1889-1907.

**Area and Population.**—Area, 118,909 square miles, including 399 square miles of water. According to the 1940 census, population was 499,261, an increase of 63,688, or 14.6 per cent., over that of 1930. Estimated population on July 1, 1943, was 702,309, an increase of 40.7 per cent. over 1940. The Indian reservations have an area of 26,950 square miles, with a census population of 51,730.

Population in four census years (with distribution by sex, 1940):—

| Years  | White   | Negro  | Indian | Chinese | Japanese | Total   | Per Sq. Mile |
|--------|---------|--------|--------|---------|----------|---------|--------------|
| 1910   | 171,468 | 2,009  | 29,201 | 1,805   | 371      | 204,854 | 1.6          |
| 1920   | 291,449 | 8,006  | 32,989 | 1,187   | 550      | 334,182 | 2.9          |
| 1930   | 378,551 | 10,749 | 43,728 | 1,110   | 879      | 435,978 | 3.6          |
| 1940   | 426,792 | 14,998 | 55,076 | 1,449   | 622      | 499,261 | 4.4          |
| Male   | 219,958 | 8,423  | 23,218 | 945     | 354      | 253,170 | —            |
| Female | 206,834 | 6,575  | 26,858 | 454     | 278      | 246,091 | —            |

In 1940, 36,837, or 7.3 per cent. of the total population were foreign-born whites, of whom 24,902 (67.8 per cent.) were Mexicans, 1,687 were English, 1,600 Canadians, 1,117 Germans, 715 Italian and 621 Irish. Of the total population in 1940, 33.3 per cent. were urban, 2.6 per cent. Negro; 30.0 per cent. (117,427 males and 32,746 females, not including those on public emergency projects) were gainfully employed. In 1940 census, 4,146 men and 4,098 women were reported divorced; the number of private families was 131,897 (of 3.68 persons).

**Religion and Education.**—The leading religious bodies are: Roman Catholics (94,043 adherents in 1936), Mormons (22,062), Presbyterians (6,163), Methodists (10,571); total membership, all denominations, 165,020. School attendance is compulsory between the ages of 8 and 16 years, and instruction is free for pupils from 6 to 21 years of age. In 1940, of the persons 25 years of age or over, 19.4 per cent. had completed less than five years of schooling. Persons between the age of 5 and 20 years attending school in 1940 numbered 157,863, or 68.7 per cent. of the total. The enrolled pupils in 1942-43 in the 440 district elementary schools were 92,259, with 2,548 teachers; 66 public high schools had 22,969 pupils and 1,042 teachers. There are teachers' colleges at Tempe and Flagstaff. The total expenditure for public schools (1942-43) was 9,390,240 dollars, exclusive of capital outlay amounting to 287,000 dollars. The State maintains a University and a State Agricultural School, both at Tucson, and two Junior Colleges, at Phoenix and Thatcher.

**Welfare.**—Old Age Assistance (maximum 40 dollars a month) is given, with Federal aid, to needy citizens 65 years of age or older who have resided in the State at least 5 years within the nine years immediately preceding application. On June 30, 1944, 9,527 persons were drawing an average of 38.48 dollars per month.

The Arizona State prison in June, 1944, held 619 men and 7 women; lethal gas is used for the execution of the death sentence on murderers.

**Finance.**—Revenue and expenditure in the year ending June 30, 1944, were:—

|                              | Dollars    |
|------------------------------|------------|
| Balance in hand July 1, 1943 | 9,950,785  |
| Receipts, 1943-44            | 40,725,424 |
| Total                        | 50,676,209 |
| Disbursements, 1943-44       | 38,939,356 |
| Balance, June 30, 1944       | 11,736,853 |

Bonded debt June 30, 1944, was 1,525,275 dollars; net value of taxable real and personal property was 499,665,139 dollars.

**Production and Industry.**—Arizona, despite its dry climate, is well suited for agriculture along the watercourses and where irrigation is practiced on a large scale from great reservoirs constructed by the United States as well as by the State government and private interests. Irrigated area, 1943, 792,256 acres. On July 1, 1943, the State had vacant public lands amounting to 12,106,464 acres. The wide pasture-lands are favourable for the rearing of cattle and sheep.

In 1940 census Arizona contained 18,468 farms, with 569,657 acres of cropland, out of a total farm area of 992,631 acres; value of farm lands and buildings was 153,676,675 dollars. Cash income, 1943, from crops, 37,500,000 dollars; from livestock, 36,000,000 dollars; from Government payments, 1,700,000 dollars. Most important cereals were (1943), wheat, 462,000 bushels; grain sorghums, 1,440,000 bushels. Other crops, 1943, were: oranges, 900,000 boxes; grape fruit, 3,900,000 boxes. Area under cotton (1943), 302,000 acres, from which 95,000 bales of short staple and 37,500 bales of Egyptian cotton were harvested. On January 1, 1944, there were 68,000 horses, 6,000 mules, 987,000 all cattle, 52,000 milch cows, 658,000 sheep and 63,000 swine. The wool clip in 1943 amounted to 4,331,000 pounds from 654,000 sheep; mohair production was 650,000 lb. The national forests in the State have an area (June 30, 1942) of 12,159,018 acres. The mining industries of the State are important. The production of gold in 1943 was 173,000 ozs.; silver, 5,769,000 ozs.; copper, 38,000,000 pounds; lead, 24,400,000 pounds; zinc, 38,000,000 pounds; mercury, 541 flasks (of 76 pounds); molybdenum (1939), 752,539 pounds. Arizona shipped 302 short tons of high grade tungsten concentrates in 1940. The total value of principal minerals mined in 1943 was 120,582,640 dollars. The leading industry is the smelting and refining of copper. Smelter output 1943, 397,434 short tons.

In 1939 the State had 332 manufacturing establishments with 8,255 wage-earners, earning 9,121,911 dollars, using materials, containers, fuel and power costing 65,055,091 dollars, and turning out products valued at 97,529,481 dollars.

In 1943 there were 2,234 miles of steam railroad and 37 miles of electric railroad. The State maintains 27,547 miles of road, of which 5,057 miles were surfaced in 1939.

On June 30, 1944, Arizona had 5 licensed national banks with deposits of 197,967,000 dollars, loans of 37,165,000 dollars and investments of 110,399,000 dollars, and 7 licensed State banks and trust companies with deposits of 64,500,000 dollars, loans of 8,869,000 dollars, and investments of 35,211,000 dollars.

### States and Territories.

Official publications of the various states and insular possessions are listed in the *Monthly Check-List of State Publications*, issued by the Library of Congress since 1910. Their character and contents are discussed in *J. K. Wilson's Manual on the Use of State Publications* (1940). Of great importance bibliographically are the publications of the *Historical Records Survey* and the *American Imprints Inventory*, which record local archives, official publications and the American Imprints. These publications supplement those of state historical societies which usually state imprints. These publications on state and local history. An outstanding source of published journals and monographs on the various state planning boards and commissions, statistical data is the material issued by the *Financial Statistics of State and Local Governments* issued by the U.S. Bureau of the Census.

### Publications covering more than one State.

## STATES AND TERRITORIES.

For information as to State and Local Government, see under UNITED STATES, p. 492.

Against the names of the Governors and the Secretaries of State, (D.) stands for Democrat and (R.) for Republican.

### ALABAMA.

**Constitution and Government.**—Alabama settled in 1699 as part of the French Province of Louisiana, and ceded to the British in 1768, was organized as a Territory, 1817, and admitted into the Union on December 14, 1819. The legislature consists of a Senate of 35 members and a House of Representatives of 106 members, all elected for four years. The State is divided into 67 counties. The capital is Montgomery. The State is represented in Congress by two Senators and nine Representatives. Alabama is one of 7 Southern States which disfranchise those who have not paid a poll tax. Voters in the presidential elections of 1944 numbered 244,743; Franklin D. Roosevelt polled 81.3 per cent. of the total.

**Governor.**—Chauncey M. Sparks (D.), 1943-47 (6,000 dollars).

**Secretary of State.**—Miss Sybil Pool (D.).

**Area and Population.**—Area, 51,609 square miles, including 531 square miles of inland water. Census population, April 1, 1940, 2,382,961, an

## ARKANSAS

**Government.**—Arkansas was settled in 1686, made a Territory in 1819 and admitted into the Union on June 15, 1836. The name is Indian and means 'the people down stream.' The General Assembly consists of a Senate of 35 members, elected for four years, partially renewed every two years, and a House of Representatives of 100 members elected for two years. The Sessions are biennial and usually limited to 60 days. The State is divided into 75 counties; the capital is Little Rock. The State is represented in Congress by two Senators and seven Representatives. Arkansas is one of 7 Southern States which disfranchise those who have not paid their poll tax. Voters in the presidential elections of 1944 were 214,954; Franklin D. Roosevelt polled 69.3 per cent. of the total.

**Governor.**—Ben Lancy (D.). 1945-47 (6,000 dollars).  
**Secretary of State.**—C. G. Hall (D.).

**Area and Population.**—Area, 53,103 square miles (377 square miles being inland water). Census population on April 1, 1940, 1,949,387, an increase of 94,905 or 5.1 per cent. over that of 1930. Estimated population on July 1, 1943, was 1,869,509, a decrease of 4.1 per cent. from that of 1940.

Population in four census years (with distribution by sex, 1940) was:—

| Years          | White     | Negro   | Indian | Asiatic | Total     | Per Sq. Mile |
|----------------|-----------|---------|--------|---------|-----------|--------------|
| 1910           | 1,151,026 | 442,691 | 460    | 72      | 1,574,449 | 30.0         |
| 1920           | 1,279,767 | 472,220 | 106    | 121     | 1,752,204 | 33.4         |
| 1930           | 1,375,315 | 478,463 | 408    | 296     | 1,854,482 | 35.2         |
| 1940           | 1,466,084 | 482,578 | 278    | 447     | 1,949,387 | 37.0         |
| Male . . . .   | 744,238   | 239,236 | 148    | 294     | 982,916   | —            |
| Female . . . . | 721,846   | 244,342 | 130    | 153     | 966,471   | —            |

Of the foreign-born white population (7,692) which, in 1940, represented 0.4 per cent. of the total population, 2,023 (26.2 per cent.) were German, 791 Italian, 560 Canadians, and 513 (8.8 per cent.) English. Of the total population in 1940, 22.2 per cent. were urban, 24.7 per cent. Negro, and 80 per cent. (485,846 males and 98,098 females) were gainfully employed. Divorced persons in 1940 numbered 8,054 men and 10,956 women; the number of private families was 497,820 (of 3.9 persons).

Little Rock (capital) had a population of 88,039 in 1940; Fort Smith, 36,584; Hot Springs, 21,310; Pine Bluff, 21,290.

**Education and Welfare.**—The State provides separate schools for white and coloured children. Illiterates 10 years of age and over in 1930 numbered 96,318, or 6.8 per cent. of that age group; Negroes furnished 60,102. In 1940, of 783,599 persons between 5 and 24 years of age, 425,224, or 54.3 per cent., were attending school.

In 1940, the elementary and secondary schools had 12,852 teachers and

465,339 pupils. Total expenditure on schools was 13,734,000 dollars. Higher education is provided at the University of Arkansas, at Fayetteville, and the State Teachers' College at Conway. The Agricultural, Mechanical and Normal College at Pine Bluff is for coloured students.

College at Pine Bluff is for coloured students. In June, 1943, 26,043 persons were drawing Old Age Assistance at an average amount of 14.59 dollars per month.

The most numerous religious bodies in the State are Baptist (Negro Baptists with 150,654 members in 1936), Southern Baptists (78,825), Methodist (114,924), Roman Catholic and Disciples of Christ. Total membership, all denominations, 570,219.

**Finance.**—The State's revenue and expenditure for the fiscal year ending June 30, 1944, was:—

|                                 | Dollars    |
|---------------------------------|------------|
| Balance, July 1, 1943 . . . . . | 28,080,033 |
| Revenue, 1943-44 . . . . .      | 61,182,797 |
| Total . . . . .                 | 89,262,830 |
| Expenditure, 1943-44 . . . . .  | 56,743,310 |
| Balance, July 1, 1944 . . . . . | 32,519,520 |

Net long-term debt on June 30, 1944, was 139,131,000 dollars.

**Production and Industry.**—Arkansas is an agricultural State. In 1940, 216,674 farms had a total farm area of 18,044,542 acres; value of farm lands and buildings, 456,848,156 dollars. Cash income, 1943, from crops, 212,073,000 dollars; from live-stock, 116,099,000 dollars; from government payments, 14,111,000 dollars. In the north the chief crops (1943) were:—maize (25,262,000 bushels), wheat (198,000 bushels), oats (6,850,000 bushels), sweet potatoes (1,620,000 bushels), hay and potatoes (4,661,000 bushels), cotton and tobacco are grown. For 1943 the forage crops; in the south, cotton and tobacco are grown. The cultivation of roses (for perfumes) is pursued locally. Live stock on January 1, 1944, comprised 194,000 horses, 245,000 mules, 1,315,000 all cattle, 525,000 milch cows, 103,000 sheep and 1,460,000 swine.

Arkansas produces 20 per cent. of the country's supply of bauxite for aluminium; shipments, 1940, 423,283 long tons dried bauxite equivalent. The State has a large coal area; 1,500,000 short tons were mined in 1942. The State also produced manganese ores (6,079 long tons in 1940). In 1942, crude petroleum amounted to 26,628,000 barrels, natural gasoline (1942) 33,523,000 gallons, and natural gas (1941) 19,148 million cubic feet; mercury (1943) 1,532 flasks. Total mineral output in 1941 was valued at 47,081,000 dollars.

Of the industries the cutting and working of timber is one of the most important. Arkansas, according to the census of manufactures of 1939, had 1,178 manufacturing establishments employing 36,256 wage-earners earning 24,677,234 dollars, using materials, containers, fuel and power costing 92,776,835 dollars, and with an output valued at 160,166,984 dollars.

In 1941, there were in the State 4,415 miles of steam railway and 122 miles of electric railway; 1,298 communities (41.7 per cent. of the total) are not served by railroads. Two commercial air lines serve the State. State-maintained highways (1940) total 9,483 miles, of which 7,770 miles are surfaced.

On June 30, 1943, Arkansas had 51 licensed national banks with deposits

Before marriage licences are granted, both applicants must pass a Wasserman or similar laboratory blood test.

Old Age Assistance (up to 50 dollars per month) has been established for those 65 years or older who have been citizens and residents of the State for 15 years, and have real property assets not exceeding 3,000 dollars or personal property not exceeding 500 dollars. On September 30, 1944, 157,840 aged persons were receiving an average of 47.24 dollars per month; 5,554 blind persons were receiving an average of 47.50 dollars per month, and 16,049 needy children in families were receiving 77.68 dollars per month per family, and county indigent aid was being given to 18,421 persons (with an average of 21.35 dollars per person).

**Finance.**—For the year ending June 30, 1944, receipts and disbursements were as follows:—

|                                   | Dollars       |
|-----------------------------------|---------------|
| Cash in hand, July 1, 1943 . . .  | 115,586,005   |
| Receipts, 1943-44 . . .           | 1,211,587,582 |
| Total . . .                       | 1,327,173,587 |
| Disbursements, 1943-44 . . .      | 1,164,132,910 |
| Cash in hand, June 30, 1944 . . . | 163,040,677   |

The assessed value of taxable property on September 30, 1944, was 8,267,099,366 dollars; net bonded State debt was 102,734,264 dollars on July 3, 1944.

**Agriculture and Forestry.**—Extending seven hundred miles from north to south, and intersected by several ranges of mountains, California has almost every variety of climate, from the very wet to the very dry, and from the temperate to the semi-tropical. In 1935, there were 150,860 farms, comprising 80,437,995 acres; the value of all farm lands and buildings was 2,825,446,364 dollars. Cash income, 1943, from crops, 1,044,820,000 dollars; from live-stock, 458,097,000 dollars, and from Government payments, 17,202,000 dollars.

The cereal crops in 1944 were: maize, 2,211,000 bushels; wheat, 10,146,000 bushels; oats, 5,310,000 bushels; barley, 39,284,000 bushels; rice, 10,146,000 bushels. Principal tree crops: wine grapes, 535,000 tons; table grapes, 452,000 tons; raisin grapes, 1,397,000 tons; figs, 59,700 tons; peaches, 716,000 tons; apricots, 302,000 tons; plums, 86,000 tons; prunes, 167,000 tons; pears, 214,000 tons; olives, 50,000 tons; almonds, 21,000 tons; walnuts, 64,000 tons; apples, 6,300,000 bushels; cherries, 32,500 tons. Citrus fruit crops were: oranges, 51,871,000 boxes; lemons, 14,940,000 boxes; grape fruit, 3,071,000 boxes; avocados, 19,600 tons. Beans, 4,830,000 bags; potatoes, 32,325,000 bushels; sugar beets, 1,120,000 short tons. Output of honey, 1941, was 22,910,000 lb.

The hay crop is the most valuable of all crops grown in the State; output, 1944, 5,368,000 tons; alfalfa, 4,068,000 tons; grain sorghum, 3,663,000 bushels; hops, 13,440,000 pounds, and cotton, 850,000 bales.

On January 1, 1944, the farm animals were: 157,000 horses, 21,000 mules, 786,000 milch cows, 2,613,000 all cattle, 2,822,000 sheep, and 1,060,000 swine. The wool-clip in 1944 was 21,093,000 lb. from 3,185,000 sheep. Mohair production was 106,000 pounds from 28,000 goats.

There were (1944) in the State 13 national forests covering a total net area of 18,956,676 acres; 4 national parks with a total net area of 1,698,285 acres; 7 national monuments with a total area of 2,688,220 acres; 57 State

parks and 19 State historical monuments with a total area of 519,677 acres; private timber land had an estimated area of 83,039,000 acres.

**Mining, Manufactures, etc.**—The discovery of gold in 1848 led to the 'gold rush of '49' and subsequent mining on a large scale. In 1944 the gold output was 48,000 oza.; silver, 610,000 oza.; copper, 17,950,000 pounds; lead, 11,650,000 pounds, and zinc, 3,750,000 pounds. California is one of three most important petroleum-producing States of the Union (Oklahoma and Texas being the other two); in 1943 the output was 284,145,702 barrels. Natural gas (1943) amounted to 443,219 million cubic feet; production of natural gasoline was 92,449,000 barrels; portland cement, 18,460,000 barrels. From California comes the whole of the borate materials produced in the United States, 216,687 tons in 1943. Mercury output (1943), 33,812 flasks. The estimated value of all the minerals produced in 1943 was 419,536,000 dollars.

In California in 1939 there were 12,329 manufacturing establishments, employing 275,477 wage-earners earning 365,110,474 dollars, using materials, employing 275,477 wage-earners earning 1,654,318,758 dollars, and giving an output worth 2,796,221,903 dollars. In 1939 there were also 51,223 service establishments, employing 94,602 persons, and having a volume of business amounting to 328,141,000 dollars. Sales of wholesale establishments amounted to 3,840,129,000 dollars, and retail sales totalled 3,187,809,000 dollars, in 1939. California ranks first in the motion picture industry, owing to a climate permitting outdoor pictures 350 days in the year.

**Commerce and Communications.**—The chief ports are San Francisco and Los Angeles.

Total mileage of steam railroads (1943) (main lines and branches) was 7,789 miles; electric railways, 1,389 miles. In 1939, 59.2 per cent. of the communities were served by railway. In 1943, 365 automobile stage lines carried 171,470,205 passengers. During 1943 the foregoing carriers transported (1) freight: steam roads, 95,968,496 tons, electric roads, 9,589,141 tons; auto truck lines, 10,648,279 tons; and (2) passengers: steam roads, 25,158,509; electric roads, 783,765,169. In 1945 the State maintained 13,705 miles of improved highway.

On June 30, 1944, 91 national banks had deposits of 6,932,076,000 dollars, loans of 1,351,928,000 dollars and investments of 4,411,549,000 dollars; 115 State banks had deposits of 2,526,897,000 dollars; loans of 566,216,000 dollars and investments of 1,576,959,000 dollars. The combined assets of all California building and loan associations as at June 30, 1944, was 205,792,040 dollars.

## COLORADO.

**Government.**—Colorado was first settled in 1858, made a Territory in 1861 and admitted into the Union on August 1, 1876. The General Assembly consists of a Senate of 35 members elected for four years, one-half retiring every two years, and of a House of Representatives of 65 members elected for two years. Sessions are biennial. Qualified as electors are all citizens, male and female (except criminals and insane), 21 years of age, who have resided in the State for 12 months immediately preceding the election. The State is divided into 68 counties. The capital is Denver. The State sends to Congress two Senators and 4 Representatives. Voters in the presidential elections of 1944 were 505,039; Franklin D. Roosevelt polled 46.4 per cent. of the total.

**Governor.**—John C. Vician (R.), 1945–47 (10,000 dollars).

**Secretary of State.**—Leslie J. Bennett (R.).

**Area and Population.**—Area, 104,207 square miles (280 square miles being inland water). Public lands unappropriated and unreserved totalled on June 30, 1942, 8,176,043 acres. Indian lands, 1942, covered 722,328 acres, of which 681,902 were under tribal control.

Census population April 1, 1940, 1,123,296, an increase of 87,505 or 8.4 per cent. over that of 1930. Estimated population, July 1, 1943, was 1,162,853, an increase of 3.5 per cent.

Population in four census years (with distribution by sex, 1940) was:—

| Years  | White     | Negro  | Indian | Asiatic | Total     | Per Sq. Mile |
|--------|-----------|--------|--------|---------|-----------|--------------|
| 1910   | 788,415   | 11,453 | 1,482  | 2,674   | 799,924   | 7.7          |
| 1920   | 924,103   | 11,818 | 1,388  | 2,825   | 939,939   | 9.1          |
| 1930   | 1,018,793 | 11,828 | 1,395  | 3,775   | 1,035,791 | 10.0         |
| 1940   | 1,106,503 | 12,176 | 1,360  | 3,258   | 1,123,296 | 10.3         |
| Male   | 560,322   | 5,832  | 714    | 1,910   | 568,778   | —            |
| Female | 546,180   | 6,344  | 646    | 1,348   | 554,518   | —            |

In 1940, the foreign-born white population numbered 70,471 (6.2 per cent. of the total State population), of whom 11,185 were Russian, 8,352 Italian, 7,017 German and 6,860 Mexican. Of the total population in 1940, 52.6 per cent. were urban; 1.1 per cent. Negro, and 37.5 per cent. (329,499 men and 91,994 women) were in the labour market. Denver, the capital, had a population in 1940 of 322,412; Pueblo, 52,162; Colorado Springs, 36,789; Greeley, 15,995; Trinidad, 13,223; Boulder, 12,958; Fort Collins, 12,251. Divorced persons, 1940, numbered 8,547 men and 9,765 women; there were 316,000 occupied dwelling units (3.55 persons).

**Religion, Education and Welfare.**—Roman Catholics, with 140,797 members in 1936, lead, with Methodists (86,932) and Northern Baptists (20,496) ranking next. Total membership, all denominations, 355,272.

In 1930 illiterates 10 years of age and older numbered 23,141 or 2.8 per cent. of that age group; in 1940, 234,607 persons between the ages of 5 and 24 were attending school; this was 80.4 per cent. of that age group. On June 30, 1942, the 2,236 public elementary and rural schools, had 143,039 pupils and 5,528 teachers; the 391 senior and junior high schools, had 3,141 teachers with 52,139 enrolled pupils. There are two colleges for training teachers. Public school expenditure, year ending June 30, 1942, 24,631,705 dollars. Colorado College, at Colorado Springs, had (1943) 67 professors and 679

students; University of Colorado, at Boulder, 819 professors and 4,326 students; University of Denver, founded by Territorial Charter in 1864, had 360 teachers and 2,685 students; Agricultural College, at Fort Collins, had 145 professors and 1,946 students, and a School of Mines, 68 professors and 673 students.

Old Age Assistance (maximum forty-five dollars per month) was reorganized in 1937 for those citizens 60 years of age or older who have been residents of the State for stated periods, with assets not exceeding 250 dollars in value. In March, 1944, 41,818 persons were drawing pensions which cost the State 1,701,040 dollars. The State prison system on December 31, 1940, had 1,556 inmates.

Both applicants for a marriage licence must have passed a Wasserman or similar laboratory blood test.

**Finance.**—The revenue and expenditure for the year ending June 30, 1942, were as follows:—

|                                               | Dollars    |
|-----------------------------------------------|------------|
| On hand July 1, 1940                          | 29,243,954 |
| Receipts and transfers, to June 30, 1942      | 69,192,628 |
| Total Receipts                                | 98,436,582 |
| Disbursements and transfers, to June 30, 1942 | 65,741,698 |
| Balance June 30, 1942                         | 32,694,884 |

The net long-term debt on June 30, 1943, was 21,640,000 dollars.

**Production and Industry.**—Farms in 1940 numbered 51,436, with a total area of 31,527,240 acres; value of land and buildings, 388,343,847 dollars. Cash income, 1943, from crops, 127,274,000 dollars; from live-stock, 177,178,000 dollars; and from Government payments, 10,659,000 dollars. The chief crops in 1943 were wheat (29,381,000 bushels), maize (14,430,000 bushels), barley (17,616,000 bushels), alfalfa (1,327,000 tons), and oats (5,355,000 bushels). Colorado comes second in output of sugar beets; output in 1943, 1,628,000 short tons. Fruit and vegetables are widely cultivated: in 1943, 1,628,000 short tons. The wool-clip in 1943 yielded 15,458,000 pounds of sheep, 774,000 swine. The wool-clip in 1943 covered 13,684,907 acres. National forests (1943) cover 1,805,000 acres. Colorado has great mining and smelting industries, coal (8,372,183 tons in 1943) and the ores of the precious metals being extensively worked. World's largest molybdenum mine is at Climax; output (1941) 27,751,273 pounds. In 1943, the gold output was 136,128 ozs.; silver, 2,602,624 ozs.; copper, 1,990,000 pounds; lead, 36,388,000 pounds; zinc, 84,190,000 pounds, and fluorspar and feldspar. In 1942, 2,199,000 barrels of petroleum and some natural gasoline and natural gas were produced. Total mineral output in 1941 was valued at 73,960,602 dollars.

The manufacturing industries, 1939, engaged 1,298 establishments with 23,716 wage-earners, who earned 28,391,933 dollars, consuming materials, containers, fuel and power valued at 130,386,505 dollars and with an output valued at 221,642,666 dollars.

In 1943, there were in the State 4,450 miles of main-track steam railway, and 308 miles of electric railways; 74 per cent. of the communities are served by railway. The State maintained, 1942, 12,389 miles of highway, of which 5,546 miles are surfaced.

of 206,296,000 dollars, loans of 32,470,000 dollars and investments of 180,839,000 dollars; 161 licensed State banks and trust companies had deposits of 179,081,000 dollars, loans of 30,834,000 dollars and investments of 83,734,000 dollars.

## CALIFORNIA.

**Constitution and Government.**—California, first settled in 1769, was from its discovery down to 1846 politically associated with Mexico. On July 7, 1846, the American flag was hoisted at Monterey, and a proclamation was issued declaring California to be a portion of the United States, and on February 2, 1848, by the treaty of Guadalupe-Hidalgo, the territory was formally ceded by Mexico to the United States, and was admitted to the Union September 9, 1850.

The Senate is composed of 40 members elected for four years—half being elected each two years—and the Assembly, of 80 members, elected for two years. Regular sessions are held biennially. The State capital is Sacramento.

California is represented in Congress by 2 Senators and 23 Representatives. California is divided into fifty-eight counties, one of which—San Francisco—is governed by a board of 11 supervisors elected from the city and county at-large. Each of the other counties has a board of 5 supervisors. Voters in the presidential elections of 1944 numbered 3,513,814; Franklin D. Roosevelt polled 58.3 per cent. of the total.

**Governor.**—Karl Warren (R.), 1943-47 (10,000 dollars).  
**Secretary of State.**—Frank M. Jordan (R.).

**Area and Population.**—Area, 158,693 square miles (1,890 square miles being inland water). Public lands, unappropriated on June 30, 1942, totalled 16,164,071 acres, practically all either mountains or deserts.

Census population, April 1, 1940, 6,907,387, an increase of 1,230,136, or 21.7 per cent. over 1930. Estimated population, July 1, 1943, 8,473,000, an increase of 22.3 per cent. over 1940. In 1943 the birth-rate was 21.9 per thousand and the death-rate 11.3 per thousand.

Population in 4 census years (with distribution by sex, 1940) was:—

| Years            | White     | Negro   | Japanese | Chinese | Total (incl. all others) | Per Sq. Mile |
|------------------|-----------|---------|----------|---------|--------------------------|--------------|
| 1910             | 2,259,872 | 21,645  | 41,356   | 96,348  | 2,377,545                | 16.3         |
| 1920             | 3,364,711 | 38,768  | 71,952   | 16,812  | 3,429,561                | 22.0         |
| 1930             | 5,408,960 | 81,048  | 97,436   | 87,861  | 5,577,251                | 36.2         |
| 1940             | 6,596,763 | 124,806 | 98,717   | 39,536  | 6,907,387                | 44.1         |
| Male . . . . .   | 3,384,507 | 61,210  | 52,550   | 27,221  | 3,515,790                | —            |
| Female . . . . . | 3,262,256 | 63,596  | 41,167   | 12,225  | 3,391,697                | —            |

Of the 1940 population 86.8 per cent. are of American birth; even of the Japanese, 60,148 were born in the United States, as were also 22,880 of the Chinese. In 1940, 870,893 persons were of white foreign birth (11.1 per cent. of the total), including 134,813 Mexicans, 100,911 Italians, 96,741

Canadians, 73,345 English, 71,727 Germans and 51,758 Russians. Of the total population in 1940, 71.0 per cent. were urban, 2.2 per cent. Negro, 42.7 per cent. (2,218,459 males and 729,968 females) were gainfully employed; 8.8 per cent. (294,414) were 65 years of age or older. The 1940 census showed 86,512 men and 109,078 women divorced. The number of private families in 1940 was 2,146,809.

There are about 27 Indian reservations in the State, with a total area (1942) of 685,279 acres, of which 469,980 acres are under tribal control.

The census population of the larger cities on April 1, 1940, was: Los Angeles, 1,604,277; San Francisco, 634,536; Oakland, 302,168; San Diego, 203,341; Long Beach, 164,271; Sacramento, 105,958; Berkeley, 86,547; Glendale, 82,582; Pasadena, 81,864; San José, 68,457, and Fresno, 60,685. In 1944, 79 per cent. of the population was concentrated in 7 metropolitan areas, 68 per cent. of them in 3 metropolitan areas—Los Angeles County, San Diego County and San Francisco Bay area.

**Religion and Education.**—The Roman Catholic Church, with 978,902 adherents in 1936, is much stronger than any other single church; next are the Jewish congregations with 151,596 members, Methodists (113,241), Presbyterians and Baptists. Total membership, all denominations, 1,928,439.

In 1930, illiterates 10 years of age or older numbered 124,810 (2.6 per cent. of that age group), of whom 45,600 were foreign-born whites; in 1940, of persons between the ages of 5 and 24, 1,263,913 (67.2 per cent.) were attending school (the national average is 57.7 per cent.). Full-time attendance at school is compulsory for children from 8-16 years of age for a minimum of 170 days per annum, and part-time attendance is required from 16 to 18 years. In 1941-42, kindergartens had 75,887 pupils; elementary schools had 797,743 pupils; high schools (including junior high schools), 1,262,895 pupils. In 1939-40, junior colleges had 108,448 pupils; 7 State teachers' colleges had 16,651 students and 636 teachers.

There are in California three great universities—the University of California (State), Stanford University, and the University of Southern California. The University of California has colleges for resident instruction and research at Berkeley, Davis, San Francisco, Los Angeles, Mount Hamilton (the Lick Astronomical Department), Riverside and at La Jolla (the Scripps Institution of Oceanography); during the college year of 1943-44, there were at all centres 2,152 officers of instruction and 18,724 resident students. The total income of the university, not including gifts for endowments, was about 16,000,000 dollars. Stanford University, near Palo Alto, chartered in 1885 and opened in 1891, was founded by Mr. and Mrs. Leland Stanford in memory of their son; in 1943-44 it had 725 professors and teachers and 7,054 students. The University of Southern California at Los Angeles (Methodist) had (1943) 707 instructors and 12,489 students. California (State) Polytechnic School is located at San Luis Obispo.

California has a comprehensive public library system, headed by the State library; 47 county libraries in 1943-44 had a total income of 2,048,153 dollars, 5,916,181 volumes and a yearly circulation of 10,923,741 volumes; 62 of the larger city libraries had 8,319,998 volumes, with a yearly circulation of 22,557,716 volumes.

**Welfare.**—On September 30, 1944, there were in the State: 81 children's institutions, 9 rescue homes, 27 day nurseries, 69 institutions for the aged, 7 State hospitals for the insane, with a resident population of 25,170, 2 State homes for the feeble minded with 4,911 inmates, 3 State correctional schools with 1,233 inmates, 58 county jails and 5 State prisons.

The State on June 30, 1943, had 78 licensed national banks with deposits of 430,373,000 dollars, loans of 64,380,000 dollars and investments of 259,609,000 dollars; 63 licensed State banks and trust companies had deposits of 107,620,000 dollars, loans of 20,850,000 dollars and investments of 45,808,000 dollars.

## CONNECTICUT.

**Government.**—Connecticut was first settled in 1635 and has been an organised commonwealth since 1637. In 1639 a written constitution was adopted which, it is claimed, was the first in the history of the world formed by a social compact. This Constitution was confirmed by a charter from Charles II in 1662, and replaced in 1818 by a State Constitution, framed that year by a constitutional convention. Connecticut was one of the original thirteen States of the Union.

The General Assembly consists of a Senate of 36 members and a House of Representatives of 267 members. Members of each House are elected for the term of two years; salary, 300 dollars and mileage. Legislative sessions are biennial. All citizens (with necessary exceptions) 21 years of age, resident in the State for a year and in the town for six months preceding the election, have the right of suffrage provided that they can read the Constitution in English. Voters in the presidential elections of 1944 numbered 831,998; Franklin D. Roosevelt polled 52·3 per cent. of the total. The State capital is Hartford.

**Governor.**—Raymond E. Baldwin (R.), 1945-47 (12,000 dollars).  
**Secretary of State.**—Charles J. Prestia (D.).

The State is represented in the Federal Congress by two Senators and six Representatives. The State has eight counties which are subdivided into townships within which are cities and boroughs.

**Area and Population.**—Area, 5,009 square miles (110 square miles being inland water). Census population on April 1, 1940, 1,709,242, an increase of 102,339 or 6·4 per cent. over that of 1930. Estimated population, July 1, 1943, was 1,779,854, an increase of 4·1 per cent. over that of 1940. Population in four census years (with distribution by sex in 1940) was:—

| Years            | White     | Negro  | Indian | Asiatic | Total     | Per Sq. Mile |
|------------------|-----------|--------|--------|---------|-----------|--------------|
| 1910             | 1,098,897 | 15,174 | 152    | 533     | 1,114,756 | 231·3        |
| 1920             | 1,358,732 | 21,046 | 159    | 894     | 1,380,831 | 286·4        |
| 1930             | 1,576,700 | 29,354 | 162    | 647     | 1,606,903 | 328·0        |
| 1940             | 1,675,407 | 32,992 | 201    | 642     | 1,709,242 | 348·9        |
| Male . . . . .   | 835,310   | 16,004 | 109    | 500     | 849,923   | —            |
| Female . . . . . | 842,097   | 16,988 | 92     | 142     | 859,319   | —            |

In 1940, the foreign-born white population, representing 19·6 per cent. of the total State population, numbered 327,941, of whom 81,373 (24·8 per cent.) were Italian; 37,765 Polish; 31,025 Canadian; 23,787 Russian; 19,625 German; 17,866 English and 7,554 Irish. Of the total population (in 1940) 67·8 per cent. were urban; 1·9 per cent. Negro; 45·0 per cent. (544,737 males and 225,266 females) were in the labour market; 4,750 men and 6,729 women were reported divorced. The number of occupied dwelling units in 1940 was 445,887 (of 3·8 persons).

The chief towns are: Hartford, with population (census, 1940), 166,267; New Haven, 160,605; Bridgeport, 147,121; Waterbury, 99,314; New Britain, 68,685; Stamford, 47,938; Norwalk, 39,849; Meriden, 39,494. Torrington (population, 26,988) is the only American community which is permitted to 'farm out' to a private individual the collection of its taxes.

**Religion, Education and Welfare.**—Of the 65 religious denominations in the State, the leading ones are the Roman Catholic (635,750 members in 1936), Jewish Congregations (90,615), Congregationalist (87,790), and Protestant Episcopal (83,317). Total, all denominations, 1,050,927.

In 1940, illiterates 25 years of age and older numbered 48,161 (4·7 per cent. of the age group); 336,784 persons between the ages of 5 and 24 (59·2 per cent. of the age group) were attending school. Elementary instruction is free for all children between the ages of 4 and 16 years, and compulsory for all children between the ages of 7 and 16 years. In 1943-44, the 803 public elementary schools had 5,104 teachers with 182,251 enrolled pupils; the 33 junior high schools had 688 teachers and 20,212 pupils; the 93 public high schools, 2,381 teachers and 65,391 pupils; 123 parochial and ecclesiastical schools had 1,295 teachers and 44,130 pupils; 101 private and nursery schools had 1,139 teachers and 11,756 pupils; 16 business schools had 76 teachers and 2,017 pupils; 12 State trade schools had 187 teachers and 3,005 pupils; 2 State-aided trade schools had 26 teachers and 469 pupils; 4 teachers' colleges had 215 teachers and 865 pupils; 10 other ecclesiastical schools had 87 teachers and 970 pupils; 9 state or state-aided schools had 121 teachers and 1,756 pupils. Expenditure of the State Board of Education for the year ending June 30, 1944, was 2,056,456 dollars; local expenditure, 30,911,527 dollars. The University of Connecticut at Storrs, founded 1881, had 261 professors and 1,888 students in 1944-45. Yale University, New Haven, founded in 1701, had 994 professors and 3,947 students. Wesleyan University, Middle-town, founded 1831, had 84 professors and 429 students. Trinity College, Hartford, founded 1823, had 34 professors and 330 students; and Connecticut College for Women, New London, founded 1915, had 100 professors and 750 students. There are also 10 junior colleges.

Including private and ecclesiastical institutions there were in the State on June 30, 1944, 126 benevolent establishments (exclusive of almshouses); State paupers numbered 2,855, and inmates in State Hospitals 9,699. Disbursements for charities, hospitals and corrections during year ending June 30, 1944, amounted to 13,960,832 dollars, excluding Old Age Assistance. For the year ending June 30, 1944, State disbursements for Old Age Assistance amounted to 5,735,533 dollars for 14,389 recipients.

Marriage licences are granted only after both applicants have passed the Wasserman or similar laboratory blood test.

**Finance.**—The total receipts and expenditures for the fiscal year ending June 30, 1944, were:—

|                                      | Dollars     |
|--------------------------------------|-------------|
| Cash balance, July 1, 1943 . . . . . | 34,445,419  |
| Receipts, 1943-44 . . . . .          | 114,727,148 |
| Total . . . . .                      | 149,172,567 |
| Disbursements, 1943-44 . . . . .     | 116,231,937 |
| Balance, July 1, 1944 . . . . .      | 32,940,630  |

The net long-term debt on June 30, 1944, was 10,574,789 dollars; assessed value of real property in 1943 was 3,480,680,802 dollars.

**Production and Industry.**—In 1940, the State had 21,163 farms with a total area of 1,512,151 acres; total value of farm lands and buildings, 204,761,302 dollars. Cash income, 1943, from crops, 37,566,000 dollars; from live-stock, 65,459,000 dollars; from Government payments, 766,000 dollars. In 1943 the output of tobacco was 23,036,000 pounds.

The State has some mineral resources: sheet mica, sand, gravel and stone; total production in 1941 was valued at 5,284,955 dollars.

The census of manufactures of 1939 showed 2,936 manufacturing establishments employing 266,312 wage-earners, who earned 853,964,300 dollars, used materials, containers, fuel and power worth 537,399,081 dollars and produced output valued at 1,229,585,773 dollars. In the year ending July 31, 1943, 490,062 active spindles in the State consumed 77,936 bales of cotton.

On July 1, 1944, there were 876 miles of steam railroad track, 1 street railway, 49 bus companies, 110 taxi companies in operation. In 1939, 56.9 per cent. of the communities were served by railways. The State (1944) maintains 2,932 miles of highway, all surfaced.

Connecticut on June 30, 1944, had 51 national banks with deposits of 732,101,000 dollars, loans of 78,056,000 dollars and investments of 516,254,000 dollars; 147 licensed State banks and trust companies had deposits of 1,558,416,000 dollars, loans of 393,379,000 dollars and investments of 1,117,371,000 dollars.

## DELAWARE.

**Government.**—Delaware, first settled in 1631 is one of the original thirteen States of the Union. The General Assembly consists of a Senate of 17 members elected for four years and a House of Representatives of 35 members elected for two years. The State capital is Dover. Delaware is divided into three counties.

With necessary exceptions all citizens, registered as voters, who have resided in the State one year, and complied with local residential require-

## AREA, POPULATION—EDUCATION, WELFARE—FINANCE 557

ments, have the right to vote, except that those who have attained the age of 21 since the year 1900 must be able to read English and to write their names. Voters in the presidential elections of 1944 numbered 125,361; Franklin D. Roosevelt polled 54.4 per cent. of the total.

Delaware is represented in Congress by two Senators and one Representative.

**Governor.**—Walter W. Bacon (R.), 1945-49 (7,500 dollars).

**Secretary of State.**—William F. Storey (R.).

**Area and Population.**—Area, 2,057 square miles (79 square miles being inland water). Census population on April 1, 1940, 266,505, an increase of 28,125, or 11.7 per cent., over that of 1930. Estimated population, July 1, 1948, was 281,163, an increase of 5.5 per cent. over that of 1940. Population in four census years (with distribution by sex, 1940)

| Years            | White   | Negro  | Indian | Asiatic | Total   | Per Sq. Mile |
|------------------|---------|--------|--------|---------|---------|--------------|
| 1910             | 171,102 | 31,181 | 5      | 34      | 202,322 | 108.0        |
| 1920             | 192,615 | 30,335 | 2      | 51      | 223,003 | 118.5        |
| 1930             | 205,718 | 32,602 | 5      | 55      | 238,380 | 120.6        |
| 1940             | 220,528 | 35,876 | 14     | 87      | 256,505 | 124.7        |
| Male . . . . .   | 115,806 | 18,449 | 7      | 71      | 134,333 | —            |

The foreign-born whites, 1940 (5.6 per cent. of the total State population), numbered 14,833, of whom 3,464 (20.9 per cent.) were Italian, 2,515 (13.3 per cent.) Polish, 1,646 Irish, 1,281 Russian, 1,209 German and 1,134 English. Of the total population in 1940, 52.3 per cent. were urban; 13.4 per cent. Negro; 38.2 per cent. (76,200 males and 26,427 females) were gainfully employed. Occupied dwelling units in 1940 numbered 70,541 (of 3.78 persons). In 1940, 900 men and 1,152 women were reported divorced.

The 1940 census figures show Wilmington with population of 112,504; Dover, 5,517; Newark, 4,502; New Castle, 4,414; Milford, 4,214.

**Education and Welfare.**—The State has free public schools and compulsory school attendance, with separate schools for white and coloured children. In 1930, illiterates 10 years of age or older numbered 7,805 (4 per cent. of the age group); in 1940, 40,280 persons (or 55.6 per cent.) between the ages of 5 and 24, were attending school. In 1939-40, the 210 elementary schools had 874 teachers and 26,111 enrolled pupils; 33 high schools, 789 teachers and 18,261 pupils. Total expenditure for elementary and high schools, 5,520,959 dollars. The State has two normal schools (one for coloured students), and Delaware University (1834), Newark, has 90 professors and 273 students; State college, for coloured students, Dover, has 23 professors and 150 students.

Old Age Assistance (maximum 25 dollars per month) was established in 1931 for citizens 65 years of age or older who have been residents of the State for 5 years during the last nine and who have no relatives able to care for them without undue sacrifice. On June 30, 1943, 1,893 persons were drawing an average of 13.20 dollars per month.

The most numerous denominations of the State are: Roman Catholic with 39,399 adherents (1936), Methodists (25,542), and Presbyterian with 6,387. Total membership, all denominations, 112,785.

**Finance.**—For the year ending June 30, 1943, ordinary revenues were 16,107,000 dollars and ordinary expenditures 16,478,000 dollars.

Largest single source of revenue was the tax on corporations, yielding 3,166,000 dollars; tax on motor fuels furnished 2,474,000 dollars.

On June 30, 1943, the net long-term debt was 5,038,000 dollars. Assessed valuation of real property in 1940 was 325,684,203 dollars.

**Production and Industry.**—Delaware is mainly an agricultural State, 73 per cent. of the land being in farms, which in 1940 numbered 6,994, and had a total area of 895,507 acres; value of farm lands and buildings, 54,898,828 dollars. Cash income, 1943, from crops, 11,975,000 dollars; from live-stock, 84,762,000 dollars; from Government payments, 1,119,000 dollars. The chief crops (1943) are maize, 3,225,000 bushels, and wheat, 1,008,000 bushels.

The mineral resources of Delaware are not extensive, consisting chiefly of clay products, stone, sand and gravel, valued in 1941 at 493,000 dollars.

The number of manufacturing establishments in 1939 was 429 with 20,892 wage-earners, earning 21,959,627 dollars; the cost of materials, containers, fuel and power used was 59,570,473 dollars, and the output was valued at 114,753,652 dollars.

In 1941 the State had 295 miles of steam railway and 104 miles of electric railway; only 55.9 per cent. of the communities are served by railways. The State maintains 1,838 miles of surfaced highways, and 2,080 miles of dirt roads.

On June 30, 1943, Delaware had 13 licensed national banks with deposits of 23,379,000 dollars, loans of 5,837,000 dollars and investments of 14,844,000 dollars; 30 licensed State banks and trust companies had deposits of 334,601,000 dollars, loans of 59,156,000 dollars and investments of 246,485,000 dollars.

## DISTRICT OF COLUMBIA.

**Government.**—The District of Columbia, first settled in 1790, is the seat of Government of the United States, for which the land was ceded by the State of Maryland to the United States as a site for the National Capital. It was established under Acts of Congress in 1790 and 1791. Congress first met in it in 1800 and Federal authority over it became vested in 1801.

Local government since July 1, 1878, has been that of a municipal corporation administered by a board of three Commissioners, of whom two are appointed from civil life by the President, and confirmed by the Senate, for a term of three years each. The other Commissioner is detailed by the President from the Engineer Corps of the Army. Congress alone enacts legislation and appropriates money for the municipal expenses.

Secretary to the Board of Commissioners.—G. M. Thornett.

**Area and Population.**—The area of the District of Columbia is 69,245 square miles, 8 square miles being inland water.

Population in 1940 was 663,091, of which 474,826 were white, 187,266 (28.2 per cent. of the total) were Negro; 190 Indian and 724 Asiatics.

Increase over 1930 was 36.1 per cent. Japanese numbered 68, of whom 35 were citizens. Estimated population, July 1, 1943, was 889,993, an increase —largely due to the war—of 228,902, or 34.2 per cent. over that of 1940. Population in four census years (with distribution by sex, 1940) was:—

| Years            | White   | Negro   | Indian | Asiatic | Total   | Per sq. Mile |
|------------------|---------|---------|--------|---------|---------|--------------|
| 1910             | 136,128 | 94,446  | 68     | 427     | 331,069 | 5,517.8      |
| 1920             | 229,660 | 109,966 | 37     | 708     | 427,571 | 7,292.9      |
| 1930             | 353,981 | 132,068 | 40     | 780     | 486,869 | 7,981.5      |
| 1940             | 474,826 | 187,266 | 190    | 1,309   | 663,091 | 10,870.3     |
| Male . . . . .   | 237,748 | 88,672  | 102    | 1,000   | 317,532 | —            |
| Female . . . . . | 246,578 | 98,594  | 88     | 309     | 345,569 | —            |

In 1940, 62.2 per cent. of the population (212,118 men and 181,916 women) were gainfully employed; 4,037 men and 7,276 women were reported divorced; families numbered 170,640 (of 3.9 persons). Of the foreign-born white population, 17.8 per cent. were Russian, 14.4 per cent. Italian, and 10.0 per cent. Irish.

A portion of the District of Columbia embracing 6,654 acres is known in law as the City of Washington, 'The Federal Capital.' But that name is a geographical distinction only, as the territory it includes is not a municipal government separate from the rest of the District of Columbia, but is subject to the same national and municipal control in every respect.

**Religion, Education and Welfare.**—The most numerous religious bodies were (1936): Roman Catholic with 80,690 adherents, Negro Baptists (43,825), Protestant-Episcopal (25,444). Total membership, all denominations, 271,724.

In 1930, illiterates 10 years of age or older numbered 6,611 (4,591 Negroes), which was 1.6 per cent. of the total in that age group. In 1940, of the persons between the ages of 5 and 24 (192,497), 110,040, or 57.2 per cent. were attending school. The 111 white and 62 coloured public schools in 1942-43 had 2,007 white and 1,213 coloured teachers and 57,236 white pupils and 39,183 coloured pupils. There were 20 white high schools with 1,012 teachers and 23,643 pupils, and 10 coloured high schools with 459 teachers and 11,778 pupils. There is 1 normal school for whites and 1 for coloured, with 26 and 31 teachers respectively, and 347 and 381 students. About 17,259 students attend private elementary and secondary schools. Total expenditure on public education (1942-43), 12,923,777 dollars.

Superior education is given in Georgetown University, founded in 1795 by the Jesuit Order, with (1943) 530 professors and 2,250 students; George Washington University, non-sectarian, founded in 1821, with 500 instructors and 8,000 students; Howard University, founded in 1867 for the higher education of coloured students, with 267 professors and 2,038 students; Catholic University of America, a post-graduate institution founded in 1864, with 164 professors and assistants and 2,000 students; American University with 70 professors and 1,298 students; and National University with 50 professors and 176 students.

On July 1, 1943, Old Age Assistance was being paid to 3,145 persons, receiving an average of 27.81 dollars per month.

**Finance.**—The District's revenues are derived from a tax on real and personal property, taxes on corporations and companies, licenses for conducting various businesses, and from Federal appropriations.

On July 1 1944, the funds of the District of Columbia stood as follows :—

|                                        | Dollars                 |
|----------------------------------------|-------------------------|
| Balance, July 1, 1943 . . . .          | 25,447,700              |
| Receipts to July 1, 1944 . . . .       | 68,812,165 <sup>1</sup> |
| <b>Total</b> . . . .                   | <b>94,259,865</b>       |
| Disbursements in 1943-44 . . . .       | 66,896,939              |
| <b>Balance on July 1, 1944</b> . . . . | <b>27,362,926</b>       |

<sup>1</sup> The receipts include 6,000,000 dollars appropriated by the Government of the United States as its contribution to the support of the municipal expenses of its Capital.

The District of Columbia has no bonded debt not covered by its accumulated sinking fund. On July 1, 1944, the assessed valuation of the taxable real estate was 1,854,348,720 dollars.

**Productions and Industry.**—The District has few industries, with products mainly for local consumption. The census of manufactures in 1939 showed 497 establishments (not including railroad repair shops, nor the manufacture or distribution of illuminating and heating gas) with 7,879 wage-earners, earning 11,772,280 dollars; the materials, containers, fuel and power used cost 35,558,454 dollars, and the output was valued at 79,875,299 dollars. There were as of April 1, 1940, 65 farms, with lands and buildings valued at 5,942,900 dollars. Total mineral output, 1941, was valued at 700,000 dollars.

Within the District are 131.86 miles of electric street railway track and 34 miles of steam railway track, as of December 31, 1942.

On June 30, 1944, the District had 9 active national banks with deposits (excluding deposits of banks) of 424,897,000 dollars, loans of 56,607,000 dollars and investments of 300,703,000 dollars; 12 licensed trust companies and other banks had deposits (excluding deposits of banks) of 294,399,000 dollars, loans of 55,617,000 dollars and investments of 178,889,000 dollars.

## FLORIDA.

**Government.**—The first recorded discovery of Florida was on March 28, 1513, by Juan Ponce de Leon, a Spanish soldier and adventurer, who, landing on Easter Sunday (Pasqua Florida or Feast of Flowers), called the country Florida. The first permanent settlement in the entire United States was made at St. Augustine, September 8, 1565. It was claimed by Spain until 1763, then ceded to England; back to Spain in 1781, and to the United States in 1819. Florida became a Territory in 1822 and was admitted into the Union on March 3, 1845. The present constitution dates from 1885. The State Legislature consists of a Senate of 38 members, elected for four years, and House of Representatives with 95 members elected for two years. Sessions are held biennially, and are limited to 60 days. Voters in the

## AREA, POPULATION—RELIGION, EDUCATION, WELFARE 561

presidential elections of 1944 numbered 492,803; Franklin D. Roosevelt polled 70.3 per cent. of the total. Two Senators and six Representatives are elected to Congress.

The State capital is Tallahassee (population 16,097 in 1940). The State is divided into 67 counties.

Governor.—Bert L. Acker (D.), 1945-49 (9,000 dollars).

Secretary of State.—R. A. Gray (D.).

**Area and Population.**—Area, 58,560 square miles, including 4,298 square miles of inland water.

Census population April 1, 1940, 1,897,414, an increase of 429,208 'or 29.2 per cent. over that of 1930. Estimated population, July 1, 1943, 2,369,196, an increase—due to the war—of 24.9 per cent. over 1940. Population in Federal census years (with distribution by sex in 1940) was :—

| Years          | White     | Negro   | Indian | Asiatic | Total     | Per sq. Mile |
|----------------|-----------|---------|--------|---------|-----------|--------------|
| 1910           | 443,634   | 308,069 | 74     | 242     | 752,619   | 12.7         |
| 1920           | 632,158   | 329,487 | 518    | 312     | 962,470   | 17.7         |
| 1930           | 1,035,590 | 431,828 | 587    | 406     | 1,468,211 | 27.1         |
| 1940           | 1,881,966 | 514,198 | 690    | 540     | 1,897,414 | 35.0         |
| Male . . . .   | 689,570   | 252,799 | 341    | 412     | 943,123   | —            |
| Female . . . . | 692,416   | 261,399 | 349    | 127     | 954,591   | —            |

Of the total, the foreign-born white (1940) numbered 69,851, of whom 6,496 (8.5 per cent.) were from Cuba and other West Indies, 7,985 (11.4 per cent.) from England, 2,237 from Ireland, 2,202 from Scotland, 7,080 from Germany, 5,524 from Russia and 9,368 from Canada. Of the total population in 1940, 55.1 per cent. were urban; 27.0 per cent. Negro; 36.0 per cent. (484,811 men and 198,522 women) were gainfully employed; 11,244 men and 16,895 women were reported divorced.

The largest cities in the State are: Jacksonville with a population of 173,065 in 1940; Miami, 172,172; Tampa, 108,391; St. Petersburg, 60,812; Pensacola, 37,449; Orlando, 36,736; West Palm Beach, 33,693.

**Religion, Education and Welfare.**—Of the 555,317 church members of the State (1936), Negro Baptists led with 122,189 adherents, followed by Southern Baptists (87,006) and Roman Catholics (62,445).

In 1930, illiterates 10 years of age and older numbered 83,242 (7.1 per cent. of that age group), of whom 65,167 were Negroes; in 1940, of persons between the ages of 5 and 24 years (663,547), 363,006, or 54.7 per cent., were attending school. Attendance at school is compulsory. All public schools are required to have readings from the Bible without sectarian comment once every school day. Separate schools are provided for white and coloured children.

In 1941-42, the 1,881 public elementary schools had 8,215 teachers and 248,617 enrolled pupils. In 708 public high schools there were 5,606 teachers and 153,392 pupils. Total expenditure on public schools, 21,628,189 dollars; on higher education (1939-40), 3,135,245 dollars. The State provides higher education in a University of the State of Florida at Gainesville (founded 1905) with (1943) 180 professors and 2,710 students, a State College for Women (founded at Tallahassee in 1905), with 158 teachers and 1,931 students, and a college for Negroes at Tallahassee with 875 students.

Florida in 1935 established a system of Old Age Assistance (maximum \$5 dollars per month) for those citizens who are infirm or 65 years of age and

have lived in the county ten years. In June, 1943, 41,046 persons were drawing an average of 14.61 dollars per month.

**Finance.**—For the year 1941-42, the receipts and disbursements amounted to the following sums:—

|                                 | Dollars    |
|---------------------------------|------------|
| Balance July 1, 1941 . . . . .  | 6,762,192  |
| Receipts 1941-42 . . . . .      | 83,019,584 |
| Total . . . . .                 | 89,781,776 |
| Disbursements 1941-42 . . . . . | 81,970,669 |
| Balance July 1, 1942 . . . . .  | 7,811,107  |

The State has no bonded debt. The assessed value of all property in 1941 was 2,126,360,863 dollars.

**Production and Industry.**—Agriculture is pursued generally in all parts of the State. In 1940, 62,248 farms had a total acreage of 8,337,708; total value of all farm property, 324,377,874 dollars. Cash income, 1943, from crops, 254,301,000 dollars; from live-stock, 53,265,000 dollars; and from Government payments, 4,791,000 dollars. Production of grape fruit, 31,000,000 boxes in 1943, and oranges 46,000,000 boxes. Other crops (1943) are tobacco (14,910,000 lb.), sugar cane, 1,125,000 tons (output of 64,000 tons of sugar), rice, maize, oats and peanuts (75,240,000 lb.). In 1943 the cotton area was 43,000 acres, and the yield 16,000 bales. On January 1, 1944, the State had 20,000 horses, 35,000 mules, 23,000 sheep, 669,000 swine, 128,000 milch cows, and 1,136,000 all cattle. The national forest area in June, 1942, was 1,241,955 acres.

Chief mineral product is phosphate rock (2,845,012 long tons in 1940, ranking next to Tunisia as the world's largest source). Mineral output, 1941, was valued at 19,269,000 dollars.

Florida, has extensive fisheries for oysters, shad, red snappers, mullet, turtles and sponges, of which Florida has almost a monopoly.

Manufacturing industries in 1939 had 2,083 establishments with 52,732 wage-earners, earning 37,823,204 dollars, using materials, containers, fuel and power valued at 123,522,671 dollars; output was valued at 241,533,534 dollars. The tobacco industries are important.

In 1944 there were 5,184 miles of steam and 200 miles of electric railway; 74.8 per cent. of the communities are served by railways. The State (1941) maintains 8,121 miles of highways, of which 6,679 miles are surfaced. Florida has 80 commercial and municipal airports.

On June 30, 1943, Florida had 54 national banks with deposits of 585,644,000 dollars, loans of 80,954,000 dollars and investments of 412,821,000 dollars; 119 licensed State banks and trust companies had deposits of 250,676,000 dollars, loans of 27,153,000 dollars and investments of 119,911,000 dollars.

## GEORGIA.

**Government.**—The colony of Georgia (so named from George II) was founded in 1733 and was one of the original thirteen States. The General Assembly consists of a Senate of 52 members and a House of Representatives of 205 members, both elected for two years. Legislative sessions are biennial. Georgia is divided into 159 counties. The State capital is Atlanta. Georgia is the first State to extend the franchise to all persons above the age of 18 years. Voters in the presidential elections of 1940 numbered 328,111; Franklin D. Roosevelt polled 81.7 per cent. of the total. The State is represented in Congress by two Senators and 10 Representatives.

**Governor.**—Ellis Gibbs Arnall (D.), 1945-47 (7,500 dollars).  
**Secretary of State.**—John B. Wilson (D.).

**Area and Population.**—Area, 58,876 square miles, of which 358 square miles are inland water. Census population April 1, 1940, 3,123,723, an increase of 215,217 or 7.3 per cent. over that of 1930. Estimated population, July 1, 1943, was 3,225,431, an increase of 3.3 per cent. over that of 1940. Population in four census years (with distribution by sex in 1940) was:—

| Years            | White     | Negro     | Indian | Asiatic | Total     | Per sq. Mile |
|------------------|-----------|-----------|--------|---------|-----------|--------------|
| 1910             | 1,431,602 | 1,176,987 | 95     | 237     | 2,608,921 | 44.4         |
| 1920             | 1,689,114 | 1,306,365 | 105    | 228     | 2,995,812 | 49.3         |
| 1930             | 1,837,021 | 1,071,135 | 115    | 217     | 2,908,506 | 49.7         |
| 1940             | 2,083,276 | 1,084,927 | 106    | 412     | 3,123,723 | 53.4         |
| Male . . . . .   | 1,016,688 | 517,747   | 58     | 265     | 1,554,758 | —            |
| Female . . . . . | 1,021,590 | 567,180   | 48     | 147     | 1,588,965 | —            |

Of the total population (1940) 11,916 (0.3 per cent. of the total) were foreign-born white, of whom 2,016 (16.9 per cent.) were from Russia, 1,424 from Germany, 1,073 from England and 981 from Greece. Of the total population in 1940, 34.4 per cent. were urban; 34.7 per cent. negro; 35.4 per cent. (806,694 males and 300,718 females) were gainfully employed; per cent. of occupied dwelling units was 752,241 (of 3.72 persons). In the number of occupied dwelling units was 752,241 (of 3.72 persons). In 1940 census, 8,176 men and 14,363 women were reported divorced.

The largest cities are: Atlanta (capital), with population (1940) of 302,288; Savannah, 95,996; Augusta, 65,919; Macon, 57,865; Columbus, 53,280.

**Religion, Education and Welfare.**—Baptists predominate, having more than half of the religious membership of the State. Negro Baptists had 597,000 adherents in 1943, and Southern Baptists 568,000. White Methodists had 305,000 and Negro Methodists (3 groups) 280,000. Total membership, all denominations, 2,654,000. Under a Local Option Act, the sale of alcoholic beverages (not including malt beverages and light wines) is prohibited in more than half of the counties.

Illiterates, 25 years of age or over in 1940 numbered 99,917, which was 6.5 per cent. of the total in that age group; of persons between the ages of 5 and 24, 664,607 (52.0 per cent.) were attending school; the national average for this age group is 57.7 per cent. Since 1916 education has been compulsory. There are separate schools for whites and negroes, and tuition

79,841 or 17.9 per cent. since 1930. Estimated population, July 1, 1943, 498,115, a decrease of 5.1 per cent. since 1940. Population in 4 census years (with distribution by sex, 1940) was:—

| Years            | White   | Negro | Indian | Ahtatic | Total   | Per Sq. Mile |
|------------------|---------|-------|--------|---------|---------|--------------|
| 1910             | 319,221 | 651   | 3,488  | 2,234   | 325,594 | 3.9          |
| 1920             | 425,668 | 920   | 3,098  | 2,180   | 431,866 | 5.2          |
| 1930             | 438,840 | 668   | 3,638  | 1,886   | 445,032 | 5.4          |
| 1940             | 619,292 | 595   | 3,337  | 1,449   | 524,673 | 6.3          |
| Male . . . . .   | 278,512 | 342   | 1,773  | 947     | 279,579 | —            |
| Female . . . . . | 245,780 | 253   | 1,759  | 502     | 248,294 | —            |

Of the total 1940 population, 24,116 (4.5 per cent. of the total) were foreign-born white, 4,098 being Canadian, 2,974 Swedish, 2,533 German and 2,252 English; Japanese numbered 1,191, of whom 765 were citizens; 33.7 per cent. were urban, 0.1 per cent. Negro; 30.2 per cent. (132,748 men and 25,858 women) were gainfully employed; the number of occupied dwelling units was 141,727 (of 3.70 persons); 3,984 men and 3,044 women were reported divorced.

The largest cities are (1940) Boise, capital, with population 26,130; Pocatello, 18,133, and Idaho Falls, 15,024.

**Religion, Education and Welfare.**—The leading religious denomination is the Mormon Church, with 100,392 adherents in 1936; Roman Catholics had 19,506, and Methodists, 11,005. Total, all denominations, 178,316.

In 1940, illiterates 10 years of age or older numbered 2,729 or 0.64 per cent. of the total in that age group; of the persons between the ages of 5 and 24, 120,471 (60.9 per cent.) were attending school. In 1942-43 the 1,698 public elementary schools had 3,197 teachers, and 86,157 enrolled pupils, the 172 high schools, 1,311 teachers and 33,872 pupils, and the two public normal schools, 568 pupils and 56 teachers. Total expenditure on education (1942-43) was 10,931,961 dollars. The State University of Idaho, founded at Moscow in 1892, has 192 professors and 2,860 students; its southern branch has 75 teachers and 820 students.

Old Age Assistance (maximum 40 dollars per month) is granted American citizens 65 years of age, or older, who satisfy certain residential qualifications and are without resources. In August, 1943, 9,760 persons were drawing an average of 27.06 dollars per month. In August, 1940, it was estimated that one-third of the population was receiving organized health services.

**Finance.**—For the fiscal biennium ending June 30, 1944, the receipts and disbursements were as follows:—

|                                          | Dollars    |
|------------------------------------------|------------|
| Cash on hand, June 30, 1942 . . . . .    | 7,120,592  |
| Receipts to June 30, 1944 . . . . .      | 68,887,303 |
| Total . . . . .                          | 75,507,895 |
| Disbursements to June 30, 1944 . . . . . | 66,178,583 |
| Balance, June 30, 1944 . . . . .         | 9,329,312  |

On June 30, 1944, the net long-term debt was 997,600 dollars, and the assessed value of real and personal property (1944), 411,893,675 dollars.

**Production and Industry.**—A great part of the State is naturally arid, but extensive irrigation works, involving, up to 1940, capital investments of 102,586,000 dollars, have been carried out. In 1940 43,663 farms had a total area of 10,297,745 acres; total value of farm lands and buildings, 339,194,391 dollars. Cash income, 1943, from crops, 107,542,000 dollars; from live-stock, 110,870,000 dollars; and from Government payments, 9,631,000 dollars. The most important crop is wheat; in 1943, the yield amounted to 23,307,000 bushels, of which winter wheat was 12,192,000 bushels. Other crops in 1943 were alfalfa; hay, 1,853,000 tons; sugar beet, 651,000 short tons; potatoes, 43,470,000 bushels; besides oats, barley, field peas, apples and prunes. There is an active live-stock industry, the number of horses on January 1, 1944, being 171,000; mules, 4,000; sheep, 1,601,000; of milch cows, 269,000; all cattle, 952,000; swine, 602,000. Total value live-stock (1943), 98,131,000 dollars. The wool clip (1943) was 14,814,000 pounds, from 1,593,000 sheep. The State contains (1942) 20,011,165 acres of national forest.

The State has rich mineral deposits. Output of gold in 1942, 95,020 fine ounces; silver, 14,644,890 fine ounces; lead, 227,818,000 pounds; copper, 6,860,000 pounds; zinc, 174,512,000 pounds, and some arsenous oxide and antimony. Production of mercury in 1943 was 4,261 flasks. Total mineral output in 1941 reached value of 45,674,000 dollars.

In 1939 there were 549 industrial establishments, employing 10,877 wage-earners, who earned 12,754,127 dollars; cost of materials, containers, fuel and power was 58,704,943 dollars and value of output, 90,475,147 dollars.

The State had (1940) 2,748 miles of steam railway, besides 121 miles of electric railway track; 73.3 per cent. of the communities are served by railways. Since 1915 the Celilo Canal, on the Oregon side of the Columbia River, has connected Idaho with the Pacific ocean. Vessels can pass from the Pacific to Lewiston, a distance of 480 miles. The State maintains 4,812 miles of roads, of which 3,245 miles have been surfaced.

On June 30, 1943, Idaho had 16 licensed national banks with deposits of 155,075,000 dollars, loans of 24,376,000 dollars and investments of 97,165,000 dollars; 30 State banks and trust companies had deposits of 41,228,000 dollars, loans of 7,421,000 dollars and investments of 20,101,000 dollars.

### ILLINOIS.

**Government.**—Illinois was first discovered by Joliet and Marquette, two French explorers, in 1673; and settled in 1720. In 1763, the country was ceded by the French to the British. In 1783, Great Britain recognised the title of the United States to Illinois, which was organised as a territory in 1809 and admitted into the Union on December 3, 1818. The Legislature consists of a Senate of 51 members elected for four years

is free for pupils between the ages of 6 and 18 years. In 1942 the 5,221 public elementary schools had 769,835 pupils and 22,781 teachers, the 531 accredited public high schools (1940), 101,656 pupils and 4,897 teachers. Total expenditure for common schools (1948), 31,766,000 dollars, of which the State contributed 18,904,785 dollars, or 62 per cent.

The publicly supported university system of Georgia comprises 13 institutions for white students and 3 for Negroes. The University of Georgia (Athens) was founded in 1785 and was the first chartered State University in the United States. Enrolment, 1944-45, 9,756 white students and 926 in the separate branches for Negroes. The university system also administers two agricultural experiment stations at Griffin and Tifton, respectively.

Other institutions of higher learning include Emory University (Atlanta), with 2,065 students, and Mercer University (Macon), for white students, and Atlanta University, Clark University, Morehouse College and Morris-Brown College, all in Atlanta, with advanced training for Negroes.

In September, 1944, 69,091 persons were receiving Old Age Assistance to an average amount of 11.00 dollars per month; 9,822 were receiving Aid to Dependent Children an average of 10.16 dollars per family; Aid to the Blind went to 2,150 persons (averaging 13.99 dollars monthly).

**Finance.**—For the fiscal year ending June 30, 1943, revenue receipts were 88,157,000 dollars and actual Government cost payments, 79,631,000 dollars. Education received 31,766,000 dollars; public roads, 22,203,000 dollars; welfare, 16,095,000 dollars; public debt retirement, 8,777,000 dollars. Taxes furnished 57,010,000 dollars, of which 19,982,000 dollars came from motor and fuel oil and 5,795,000 dollars from the tax on alcoholic beverages.

On July 1, 1944, the net long-term debt amounted to 7,470,406 dollars, due to be redeemed in full by December 1, 1949. The net assessed value of real, personal and public utility property in 1943 amounted to 771,305 dollars.

An unusual feature of the State's financial structure is that its assets include a State-constructed railroad (begun in 1938) valued at 22,000,000 dollars and extending from Atlanta, Georgia, to Chattanooga, Tennessee, a distance of 137 miles.

**Agriculture and Industry.**—In 1940 216,033 farms had an area of 1,000,000 acres; value of farm lands and buildings, 460,344,531 dollars; 87 per cent. of the farms are operated by Negroes, and 87 per cent. of the farms are rented. The Negro farmers raise little but cotton, in the production of which Georgia ranks fifth among the States, but it is the largest producer of sea-island cotton. Cash income, 1943, from crops, 234,182,000 dollars; live-stock, 98,265,000 dollars; from Government payments, 1,000,000 dollars. For 1943 the cotton yield was 544,326 bales from 1,000,000 acres; peaches, 4,860,000 bushels; pecans, 25,620,000 pounds; 9,000 pounds. In the northern part of the State maize is produced in 1943 was 45,288,000 bushels. Rice is a product of the production of sweet potatoes, 9,375,000 bushels. The State's output (1943), 97,850,000 pounds. Georgia ranks first in the production of water melons, peanuts, pecans, sweet potatoes, velvet peppers. National forests in 1943 covered 619,000 acres. The farm animals were 88,000 horses, 316,000 mules, 708,000 all cattle, 16,000 sheep, 1,875,000 swine. The State to establish State-owned farmers' markets;

in the two years ending July 1, 1944, they handled approximately 40 million dollars' worth of farm products. The largest State-owned farmers' market in the world is located at Atlanta; there are 8 such markets in the State.

The State has modest mineral resources but furnishes 80 per cent. of the country's output of kaolin (512,214 short tons in 1939) and substantial supplies of fuller's earth. Mineral products, 1948, had a value of 19,285,000 dollars.

In 1939, Georgia had 3,150 manufacturing establishments employing 157,800 wage-earners, earning 108,083,478 dollars, using materials, containers, fuel and power costing 394,076,490 dollars, and giving an output worth 677,402,657 dollars. About 98 per cent. of the plants (furnishing 90 per cent. of the total output) employed less than 500 persons each. In the year ending September 30, 1944, 8,048,887 active spindles in the State consumed 2,035,592 bales of cotton.

On June 30, 1943, Georgia had 47 licensed national banks with deposits of 581,954,000 dollars, loans of 122,331,000 dollars and investments of 352,488,000 dollars; 245 State banks and trust companies had deposits of 340,120,000 dollars, loans of 97,728,000 dollars and investments of 160,622,000 dollars.

The principal port is Savannah; there are (1942) 6,217 miles of steam railways beside 157 miles of electric railway; 78.0 per cent. of the communities are served by railways. The State system of roads (1944) covers 13,999 miles, of which 7,812 miles are hard surfaced; the county network, in addition, embraces 85,080 miles, of which 1,700 miles are hard surfaced.

### IDAHO.

**Government.**—Idaho was first permanently settled in 1860, although there was a mission for Indians in 1842 and a Mormon settlement in 1855. It was organized as a Territory in 1863 and admitted into the Union as a State on July 3, 1890. The Legislature consists of a Senate of 44 members, elected for two years. Sessions are held biennially in odd-number years and last for 60 days. Voters are citizens, both male and female, over the age of 21 years, who have resided in the State over six months. Voters in the presidential elections of 1944 numbered 208,321; Franklin D. Roosevelt polled 51.5 per cent. of the total. The State is represented in Congress by two Senators and two Representatives.

The State is divided into 44 counties. The capital is Boise.

**Governor.**—Charles C. Gosselt (D.), 1945-47 (7,500 dollars).  
**Secretary of State.**—George H. Curtis (D.).

**Area and Population.**—Area, 83,567 square miles, of which 749 square miles are inland water. Public lands unappropriated on June 30, 1943, totalled 12,535,387 acres. Census population April 1, 1940, 524,873, an increase of

1939, 74,229,000 pounds of creamery butter and 122,545,000 pounds of evaporated milk were produced. The wool clip in 1943 was 6,621,000 pounds from 854,000 sheep. National forest area is 812,654 acres.

In 1939, Illinois had 12,980 manufacturing establishments, employing 596,560 wage-earners, earning 750,239,085 dollars, using materials, containers, fuel and power costing 2,593,215,812 dollars, and giving an output worth 4,795,201,154 dollars. Value of products of chief industries, 1939: meat packing, 479,501,224 dollars; petroleum refining, 122,933,528 dollars; steel works and rolling mill products, 207,301,815 dollars; agricultural implements, 204,599,729 dollars.

The chief mineral product of Illinois is coal, the productive coal-fields having an area of 37,486 square miles with output, 1942, of 63,750,000 tons. Mineral production for 1942 included petroleum, 106,391,000 barrels; natural gasoline, 66,616,000 gallons; small amount of natural gas, 10,053 million cubic feet; cement, 9,717,000 barrels; pig iron, 16,690,000 long tons; coke, 3,690,000 tons. Illinois produced 11,521 short tons of abrasive stones (tripoli) in 1940. Total value of mineral products, 1941, was 320,510,000 dollars.

On June 30, 1943, Illinois had 340 national banks with deposits of 4,908,422,000 dollars, loans of 893,241,000 dollars and investments of 3,847,286,000 dollars; 484 State banks and trust companies had deposits of 1,785,413,000 dollars, loans of 272,256,000 dollars and investments of 1,244,246,000 dollars.

There were (1936) 12,967 miles of steam railway and 1,253 miles of electric railway; 80·6 per cent. of the communities are served by railways.

There is a British Consul-General in Chicago.

## INDIANA.

**Government.**—Indiana, first settled in 1732-33, was made a territory in 1800 and admitted into the Union on December 11, 1816. The General Assembly consists of a Senate of 50 members elected for four years, and a House of Representatives of 100 members elected for two years. Sessions are held biennially. The State is divided into 92 counties and 1,018 townships. The State capital is Indianapolis. The State is represented in Congress by two Senators and 11 Representatives. Voters in the presidential elections of 1944 numbered 1,672,091; Franklin D. Roosevelt polled 46·7 per cent. of the total.

**Governor.**—Ralph F. Gates (R.), 1945-49 (8,000 dollars).

**Secretary of State.**—Rue J. Alexander (R.).

**Area and Population.**—Area, 36,291 square miles, of which 86 square miles are inland water. Census population, April 1, 1940, 3,427,796, an increase of 189,293 or 5·8 per cent. since 1940. Estimated population, July 1, 1943, was 3,397,918, a decrease of 0·9 per cent. since 1940. Population in four census years (with distribution by sex in 1940) was:—

| Years            | White     | Negro   | Indian | Asiatic | Total     | Per Sq. Mile |
|------------------|-----------|---------|--------|---------|-----------|--------------|
| 1910             | 2,639,961 | 60,320  | 279    | 316     | 2,700,876 | 74·9         |
| 1920             | 2,849,071 | 80,810  | 125    | 284     | 2,930,290 | 81·3         |
| 1930             | 3,125,778 | 111,982 | 285    | 458     | 3,238,503 | 89·4         |
| 1940             | 3,305,328 | 121,916 | 223    | 334     | 3,427,796 | 94·7         |
| Male . . . . .   | 1,644,706 | 60,105  | 124    | 266     | 1,725,201 | —            |
| Female . . . . . | 1,640,617 | 61,811  | 99     | 68      | 1,702,595 | —            |

Of the total in 1940, 110,631 (3·2 per cent.) were foreign-born whites, 18,784 (16·2 per cent.) being from Germany, 14,257 from Poland, 7,733 from Hungary, 6,309 from Italy, 5,562 from England, 4,126 from Russia, 3,566 from Sweden, and 3,063 from Scotland. Urban population formed 55·1 per cent. of the whole, the Negro population 3·5 per cent., and those gainfully employed (901,555 males and 250,148 females) 33·6 per cent.; the number of occupied dwelling units was 961,498 (of 3·57 persons). In 1940, 21,241 men and 26,128 women were reported divorced.

The largest cities in the State are Indianapolis (capital), with a population, according to the census of 1940, of 386,972; Fort Wayne with 118,410; Gary, 111,719; South Bend, 101,268; Evansville, 97,062; Hammond, 70,184; Terre Haute, 62,693; East Chicago, 54,637; Muncie, 49,720.

**Religion, Education and Welfare.**—Religious denominations are, in order of numbers, Roman Catholic, with 315,185 adherents in 1936, Methodists (252,803), Disciples of Christ (130,004). Total membership, all denominations, 1,350,288.

In 1930, illiterates 10 years of age or older numbered 43,721 (1·7 per cent. of that age group) of whom 22,510 were native whites, 13,536 were foreign-born whites and 5,605 were Negroes. In 1940, of persons between the ages of 5 and 24, 681,167 (59·0 per cent.) were attending school. School attendance is compulsory from 7 to 16 years of age. In 1940 the elementary and public high schools had 21,459 teachers with 671,364 pupils. Total expenditure for public schools, 1940, 59,845,000 dollars.

The principal institutions for higher education, 1943, were:—

| Began | Institution                     | Control | Professors and Instructors | Students |
|-------|---------------------------------|---------|----------------------------|----------|
| 1824  | Indiana University, Bloomington | State   | 418                        | 6,411    |
| 1837  | De Pauw University, Greencastle | M.E.    | 105                        | 1,503    |
| 1842  | University of Notre Dame        | R.C.    | 221                        | 2,634    |
| 1874  | Purdue University, Lafayette    | State   | 538                        | 7,885    |

Marriage licences are granted only after both parties have passed the Wasserman or similar blood test.

Old Age Assistance (maximum 30 dollars per month) is available for those American citizens 65 years of age or older who have resided in the State for 5 years during the preceding 9 years. In June, 1943, 65,008 persons were drawing an average of 22·15 dollars per month.

(about half of whom retire every two years), and a House of Representatives of 168 members elected for two years. Sessions are biennial. Electors are citizens 21 years of age, having the usual residential qualifications. Voters in the presidential elections of 1944 numbered 4,036,061; Franklin D. Roosevelt polled 51.6 per cent. of the total.

The State is divided into districts, in each of which one Senator and three Representatives are chosen; for the election of the latter each elector has three votes, of which he may cast one for each of three candidates, or one and a half for each of two, or all three for one candidate. The State has 103 counties; Springfield is the capital. Illinois is represented in Congress by two Senators and twenty-six Representatives.

*Governor.*—Dwight H. Green (R.), 1945–49 (12,000 dollars).

*Secretary of State.*—Edward J. Barrett (D.)

**Area and Population.**—Area, 56,400 square miles, of which 458 square miles are inland water. Census population on April 1, 1940, 7,897,241, an increase of 266,587, or 3.4 per cent. over 1930. Estimated population, July 1, 1943, 7,694,066, a decrease of 2.6 per cent. since 1940. Population in four census years (with distribution by sex, 1940) was:—

| Years            | White     | Negro   | Indian | Asiatic | Total     | Per Sq. Mile |
|------------------|-----------|---------|--------|---------|-----------|--------------|
| 1910             | 5,526,962 | 109,049 | 188    | 2,392   | 5,638,591 | 100.6        |
| 1920             | 6,292,888 | 182,274 | 194    | 3,479   | 6,488,860 | 115.7        |
| 1930             | 7,295,267 | 328,973 | 469    | 5,946   | 7,630,654 | 136.4        |
| 1940             | 7,504,202 | 387,446 | 624    | 4,969   | 7,897,241 | 141.3        |
| Male . . . . .   | 3,766,708 | 186,067 | 335    | 4,044   | 3,957,149 | —            |
| Female . . . . . | 3,737,499 | 201,379 | 289    | 925     | 3,940,092 | —            |

Of the total population in 1940, 969,373 (12.2 per cent. of the total) were foreign-born white, of whom 138,700 were from Poland, 138,023 (14.3 per cent.) from Germany, 98,244 from Italy, 79,906 from Sweden, 74,454 from Russia, 54,814 from Czechoslovakia, 48,506 from Ireland, and 36,966 from England. The urban population was 73.6 per cent. of the whole, and the Negro population 4.9 per cent.; 37.2 per cent. (2,197,498 males and 746,933 females) were gainfully employed; occupied dwelling units numbered 2,192,730 (of 3.60 persons). In 1940, 43,516 men and 57,008 women were reported divorced.

The largest city in the State, and after New York, the largest in the United States, is Chicago. On April 1, 1940, it had a population of 3,396,808. Other cities with populations in 1940 are: Peoria, 105,087; Rockford, 84,637; East St. Louis, 75,609; Springfield (State capital), 75,503; Oak Park Village, 66,018; Evanston, 65,389; Cicero, 64,712; Decatur, 59,305; Berwyn, 48,451; Aurora, 47,170; and Joliet, 42,365.

**Religion, Education and Welfare.**—The churches are, in order of strength:—Roman Catholic (with 1,448,650 adherents in 1936), Jewish Congregations (377,809), Methodist (288,736). Total membership, all denominations, 3,556,852.

In 1930, illiterates 10 years of age or older numbered 153,507 (2.4 per cent. of that age group) of whom 108,984 were foreign-born whites. In 1940, of persons between the ages of 5 and 24, 1,468,310 (58.0 per cent.) were attending school. In Illinois education is free and compulsory for children between 7 and 16 years of age. For the year ending June 30, 1943,

the 11,977 public elementary school districts had 83,853 teachers, and 1,160,956 pupils; and the 929 high schools had 10,441 teachers and 343,332 pupils. Five State teachers' colleges (normal schools) had 546 teachers and 5,061 students. Total current expenditure on public schools, from the Educational Fund, 204,754,288 dollars. There are 59 colleges and universities (including the teachers' colleges); the principal ones, with teachers and students for 1943, are:—

| Founded | Colleges, etc.                        | Location     | Professors, etc. | Students |
|---------|---------------------------------------|--------------|------------------|----------|
| 1867    | University of Illinois (State)        | Urbana       | 1,895            | 13,971   |
| 1892    | University of Chicago (Non-sect.)     | Chicago      | 711              | 10,938   |
| 1851    | North-Western University (M. E.)      | Evanston     | 1,400            | 6,306    |
| 1860    | Illinois Wesleyan University (M. E.)  | Bloomington  | 45               | 731      |
| 1909    | Loyola University (Cath.)             | Chicago      | 800              | 4,429    |
| 1901    | James Milliken University (C. Presb.) | Decatur      | 60               | 518      |
| 1837    | Knox College (Non-sect.)              | Galesburg    | 35               | 546      |
| 1861    | North-Central College (Ev. Assn.)     | Naperville   | 42               | 561      |
| 1896    | De Paul University (Cath.)            | Chicago      | 185              | 5,158    |
| 1829    | Illinois College (Presbyterian)       | Jacksonville | 26               | 322      |
| 1848    | Mackinac College (M. E.)              | Jacksonville | 68               | 713      |
| 1847    | Rockford College (Non-sect.)          | Rockford     | 33               | 368      |
| 1867    | Bradley Polytechnic Institute         | Peoria       | 62               | 728      |
| 1860    | Augustana College (Ev. Luth.)         | Rock Island  | 85               | 674      |

In 1944 11 endowed and 305 tax-supported public libraries had 6,830,496 volumes, serving 6,059,820 people; they circulated 22,895,157 volumes.

Marriage licenses are granted only after both parties have passed the Wasserman or similar laboratory blood test.

In 1935 the State established a system of Old Age Assistance (maximum, since 1940, 480 dollars per year) for those 65 or more years of age who are citizens of the United States, who have lived in the State five of the last nine years preceding application. In September, 1944, 125,165 persons were drawing an average of \$1.02 dollars per month.

There are approximately 479 benevolent institutions, hospitals, orphanages, homes and schools for the deaf and blind. In 1941 the State's penal and reformatory system held 11,374 men and women.

**Finance.**—For the year ending June 30, 1944, the revenue of the State Government was 370,125,553 dollars and expenditures 255,915,921 dollars. Taxes furnished 308,782,000 dollars, with general sales taxes bringing in 84,211,000 dollars, and taxes on motor fuels, 34,111,000 dollars. Public welfare took 52,388,000 dollars and schools 16,243,000 dollars.

Net long-term indebtedness, July 1, 1944, was 119,094,000 dollars; in 1942 the assessed value of all property was 5,278,815,549 dollars.

**Production and Industry.**—Illinois is largely agricultural. In 1940, 213,439 farms had an area of 31,032,572 acres; total value of land and buildings, 2,537,117,306 dollars. Cash income, 1943, from crops, 398,911,000 dollars; from live-stock and live-stock products, 747,715,000 dollars; and from Government payments, 58,062,000 dollars. The chief cereal crops were in 1944, maize, 403,695,000 bushels; wheat, 24,632,000 bushels; oats, 101,984,000 bushels; barley, rye and buckwheat are also grown. The potato crop in 1944 amounted to 3,468,000 bushels; and hay to 3,327,000 tons. Output of soy beans, 70,602,000 bushels in 1943, is nearly one-third of the country's entire output. The State has an active live-stock industry. On January 1, 1944, there were 453,000 horses, 62,000 mules, 1,180,000 milch cows, 3,244,000 all cattle, 807,000 sheep and 7,750,000 swine. During

**Finance.**—In the fiscal year ending June 30, 1943, general revenues were 153,654,000 dollars and general expenditures, 140,003,000 dollars. Sales taxes furnished 34,117,000 dollars; tax on motor fuels, 22,420,000 dollars; Federal grants were 22,184,000 dollars.

On June 30, 1943, the State had a net long-term debt of 6,742,000 dollars; the assessed value of real and personal property, 1942, was 2,540,378,000 dollars.

**Production and Industry.**—Indiana is largely agricultural, about 89 per cent. of its total area being in farms. In 1940, 184,549 farms had 19,800,778 acres; value of land and buildings, 1,251,491,614 dollars. Cash income, 1943, from crops, 144,759,000 dollars; from live-stock, 482,598,000 dollars; and from Government payments, 28,929,000 dollars. The chief crops are maize (210,406,000 bushels in 1943), wheat (15,184,000 bushels), oats (33,212,000 bushels), rye (1,416,000 bushels), hay (2,774,000 tons) and soya beans (27,084,000 bushels). Tobacco output in 1943 was 10,138,000 pounds. The live-stock on January 1, 1944, consisted of 251,000 horses, 1,932,000 all cattle, 816,000 milch cows, 783,000 sheep, 5,322,000 swine, and 88,000 mules. In 1943 the wool clip yielded 4,979,000 pounds of wool from 682,000 sheep.

The coal-fields of the State have an area of 6,500 square miles. In 1942 the output of coal was 25,470,000 short tons; petroleum, 6,748,000 barrels; a small amount of natural gas; pig-iron, 5,000,000 tons; coke, 7,338,000 short tons and cement, 6,359,000 barrels. The total mineral output was valued at 80,572,000 dollars in 1942.

The manufacturing establishments (1939) numbered 4,338, employing 277,468 wage-earners, earning 345,474,473 dollars, using materials, containers, fuel and power worth 1,267,438,203 dollars, and turning out products valued at 2,227,667,018 dollars.

In 1941 there were 6,888 miles of main steam railway; 61 per cent. of the communities are served by railways. There were 8,932 miles of State roads, and 66,825 county roads; total (including others), 77,806 miles.

On June 30, 1943, 124 national banks had deposits of 882,947,000 dollars, loans of 128,648,000 dollars and investments of 597,086,000 dollars; 376 State banks and trust companies had deposits of 789,705,000 dollars, loans of 161,220,000 dollars and investments of 451,181,000 dollars.

## IOWA.

**Government.**—Iowa, first settled in 1788, was made a territory in 1838 and admitted into the Union on December 28, 1846. The General Assembly comprises a Senate of 50 and a House of Representatives of 108

## AREA, POPULATION—RELIGION, EDUCATION, WELFARE 573.

members, meeting biennially for an unlimited session. Senators are elected for 4 years, half retiring every second year; Representatives for 2 years. The State is represented in Congress by 2 Senators and 8 Representatives. Voters in the presidential elections of 1944 numbered 1,052,601; Franklin D. Roosevelt polled 47.5 per cent. of the total. Iowa is divided into 99 counties; the capital is Des Moines.

**Governor.**—Robert D. Blue (R.), 1945–47 (7,500 dollars).  
**Secretary of State.**—Wayne M. Ropes (R.).

**Area and Population.**—Area, 56,280 square miles, including 294 square miles of inland water. Census population, April 30, 1940, 2,538,268, an increase of 67,839, or 2.7 per cent., over that of 1930. Estimated population, July 1, 1943, 2,318,390, a decrease of 8.7 per cent. since 1940. Population in four census years (with distribution by sex in 1940) was:—

| Years  | White     | Negro  | Indian | Asiatic | Total     | Per Sq. Mile |
|--------|-----------|--------|--------|---------|-----------|--------------|
| 1870   | 1,188,807 | 5,762  | 48     | 3       | 1,194,620 | 21.5         |
| 1920   | 2,384,181 | 19,605 | 523    | 306     | 2,404,621 | 43.2         |
| 1930   | 2,452,677 | 17,880 | 660    | 222     | 2,470,939 | 44.1         |
| 1940   | 2,530,691 | 16,694 | 733    | 150     | 2,538,268 | 45.3         |
| Male   | 1,271,508 | 8,467  | 398    | 126     | 1,280,494 | —            |
| Female | 1,249,183 | 8,227  | 335    | 24      | 1,257,774 | —            |

At the census of 1940, there were 117,245 foreign-born whites (4.7 per cent. of the total); of whom 35,540 (30.3 per cent.) came from Germany; 11,406 (9.7 per cent.) from Sweden; 10,977 (9.4 per cent.) from Denmark; 8,642 (7.4 per cent.) from Norway; 5,961 (5.1 per cent.) from England; 4,962 from Canada; 3,461 from Italy and 3,418 from Ireland. Of the total population in 1940, 42 per cent. were urban, 0.7 per cent. Negro, and 48.9 per cent. (770,949 males and 186,920 females) were gainfully employed; number of occupied dwelling units was 701,824 (of 3.62 persons); 13,872 men and 16,002 women were reported divorced.

The largest cities in the State, with their census population in 1940, are Des Moines (capital), 159,819; Sioux City, 82,364; Davenport, 66,039; Cedar Rapids, 62,120; Waterloo, 61,743; Dubuque, 43,892; Council Bluffs, 41,439; Ottumwa, 31,570; Mason City, 27,080; Clinton, 26,270; Burlington, 25,832; Fort Dodge, 23,904; Marshalltown, 19,240.

**Religion, Education and Welfare.**—Chief religious bodies (1936) are: Roman Catholic (294,833 members), Methodist Episcopal (204,047), Lutheran (61,683), Disciples of Christ (60,973). Total, all denominations, 1,086,989.

School attendance is compulsory for 24 consecutive weeks annually during school age (7–16). In 1940, of the persons between the ages of 5 and 24 years, 526,057 (61.3 per cent.) were attending school; the national average for this age group is 57.7 per cent. In 1942–43, the 9,395 public elementary schools had 352,168 pupils, and the 1,000 public high schools (including 69 junior high schools with 26,631 pupils) had 126,475 pupils. Total expenditure on public schools in 1942–43, 52,452,881 dollars. Leading institutions for higher education (1943) were:—

| Year of Founding | Institution                                | Control        | Professors and Instructors | Students |
|------------------|--------------------------------------------|----------------|----------------------------|----------|
| 1847             | University of Iowa at Iowa City            | State          | 559                        | 6,471    |
| 1858             | State College of Agriculture, Ames         | State          | 490                        | 5,187    |
| 1847             | Grinnell College at Grinnell               | Congregational | 51                         | 888      |
| 1858             | Cornell College at Mt. Vernon              | Methodist      | 48                         | 697      |
| 1881             | Drake University at Des Moines             | Disciples      | 80                         | 1,180    |

| 1894             | Morningside College at Sioux City          | Methodist      | 40                         | 701      |
| 1876             | Iowa State Teachers College at Cedar Falls | State          | 146                        | 1,885    |

Marriage licences are granted only after both applicants have passed the Wasserman or similar blood tests

Old Age Assistance (maximum 25 dollars a month) was established in 1934 for citizens 65 years of age or older who have been residents of the State for 5 out of the last 9 years preceding application, with maximum income of 100 dollars per annum. In June, 1944, 51,326 persons were drawing an average of 28.40 dollars per month.

**Finance.**—For the year ending June 30, 1942, the revenue and expenditure were:—

|                        | Dollars     |
|------------------------|-------------|
| Balance, July 1, 1941  | 9,797,892   |
| Revenue, 1941-42       | 100,188,581 |
| Total                  | 109,986,473 |
| Disbursements, 1941-42 | 98,194,615  |
| Balance, June 30, 1942 | 11,791,858  |

On June 30, 1943, the net long-term debt was 829,000 dollars. The assessed value of real and personal property in 1943 was 3,054,241,096 dollars.

**Production and Industry.**—Iowa is pre-eminently an agricultural State, nearly the whole area being arable and included in farms. In 1943 211,577 farms had 34,763,894 acres of farm land, including 18,016,071 acres of crop land. The estimated value of farm land and buildings in 1944 was 4,345,000,000 dollars. Cash income from crops (1943), 290,993,000 dollars; from live-stock, 1,294,296,000 dollars; from Government payments, 51,335,000 dollars. It leads in oats, 178,096,000 bushels in 1943, and in maize, 580,688,000 bushels. In 1943 the crop of wheat was 2,396,000 bushels; barley, 600,000 bushels; rye, 158,000 bushels; soy beans, 35,708,000 bushels, and buckwheat, 43,000. Its output of popcorn, 52,250,000 lb., is about half the total. The crop of potatoes (1943) amounted to 5,238,000 bushels; of hay, to 5,193,000 tons. The State has active live-stock industries. It leads in the value of its live-stock (869,849,000 dollars in 1944) and in the number of horses, 612,000 on January 1, 1944, and of swine, 16,447,000; other live-stock on that date included 1,544,000 milch cows, 5,884,000 all cattle, 31,000 mules, and 1,915,000 sheep. Production of butter, 1943, 239,020,713 lb. The wool clip (1943) yielded 10,704,000 pounds of wool from 1,338,000 sheep.

The coal-fields covering 19,000 square miles, produced 2,782,249 short tons in 1943. Gypsum (417,995 tons in 1943), stone 3,544,000 short tons,

and cement 4,570,000 barrels. The approximate value of mineral products, 1943, was 23,000,000 dollars.

The census of manufactures in 1939 showed 2,670 enterprises, with 63,314 wage-earners, earning 73,466,119 dollars; materials, containers, fuel and power used, 473,736,522 dollars; output valued at 718,581,800 dollars.

The State, 1943, had 9,332.44 miles of steam railway and 405.76 miles of electric railway single track. State-maintained (1943) roads totalled 8,607.5 miles.

On June 30, 1943, Iowa had 102 licensed national banks, with deposits of 378,454,000 dollars, loans of 77,249,000 dollars and investments of 268,756,000 dollars; 542 State banks and trust companies had deposits of 772,757,000 dollars, loans of 211,069,000 dollars and investments of 369,782,000 dollars.

### KANSAS.

**Government.**—Kansas, first settled in 1727, was made a territory (along with part of Colorado) in 1854, and was admitted into the Union with its present area on January 29, 1861. The Legislature includes a Senate of 40 members, elected for four years, and a House of Representatives of 125 members, elected for two years. Sessions are biennial. The right to vote (with the usual exceptions) possessed by all citizens. Voters in the presidential elections of 1944 numbered 733,776; Franklin D. Roosevelt polled 39.2 per cent. of the total. The State is divided into 105 counties; the capital is Topeka. The State is represented in Congress by 2 Senators and 6 Representatives.

**Governor.**—Andrew F. Schoeppel (R), 1945-47 (5,000 dollars).  
**Secretary of State.**—Frank J. Ryan (R.)

**Area and Population.**—Area, 82,276 square miles, including 163 square miles of inland water. Government-owned land for Indians amounts to 1,010 acres. Census population on April 1, 1940, 1,801,028, a decrease of 79.971, or 4.2 per cent., over that of 1930. Estimated population, July 1, 1943, 1,780,930, a decrease of 1.1 per cent. since 1940. Population in four Federal census years (with distribution by sex, 1940) was:—

| Years  | White     | Negro  | Indian | Asiatic | Total     | Per Sq. Mile |
|--------|-----------|--------|--------|---------|-----------|--------------|
| 1870   | 346,377   | 17,108 | 914    | —       | 364,399   | 4.5          |
| 1920   | 1,708,006 | 57,925 | 2,276  | 150     | 1,769,257 | 21.6         |
| 1930   | 1,811,997 | 66,344 | 2,454  | 204     | 1,880,999 | 22.9         |
| 1940   | 1,734,496 | 65,138 | 1,165  | 229     | 1,801,028 | 21.9         |
| Male   | 873,095   | 32,452 | 617    | 176     | 906,340   | —            |
| Female | 861,401   | 32,686 | 548    | 53      | 894,648   | —            |

cent. of the total. The State is divided into 120 counties; the capital is Frankfort (census population in 1940, 11,472). The State is represented in Congress by two Senators and 9 Representatives.

*Governor.*—Simeon S. Willis (R.), 1943–47 (10,000 dollars).

*Secretary of State.*—Charles K. O'Connell (D.).

**Area, Population, Education.**—Area, 40,395 square miles, of which 286 square miles are water. Census population on April 1, 1940 2,845,627, an increase of 231,038, or 8·8 per cent., over that of 1930. Estimated population, July 1, 1943, 2,733,095, a decrease of 4·0 per cent. since 1940. Population in four census years (with distribution by sex, 1940) was:—

| Years            | White     | Negro   | Indian | Asiatic | Total     | Per Sq. Mile |
|------------------|-----------|---------|--------|---------|-----------|--------------|
| 1910             | 2,087,961 | 261,656 | 254    | 64      | 2,249,905 | 57·0         |
| 1920             | 2,180,500 | 235,938 | 57     | 75      | 2,416,630 | 60·1         |
| 1930             | 2,588,452 | 226,040 | 22     | 75      | 2,814,589 | 68·2         |
| 1940             | 2,681,425 | 214,031 | 44     | 127     | 2,845,627 | 70·9         |
| Male . . . . .   | 1,329,625 | 106,066 | 28     | 93      | 1,435,812 | —            |
| Female . . . . . | 1,351,800 | 107,965 | 16     | 34      | 1,409,815 | —            |

In 1940 the foreign-born white population (0·5 per cent. of the whole) numbered 15,631, of whom 4,630 were German, 1,326 Russian, 1,302 Italian and 1,076 English; of the total population in 1940, 29·8 per cent. were urban; 7·6 per cent. Negro, and 29·7 per cent. (698,571 males and 148,992 females, gainfully employed; occupied dwelling units numbered 698,538 (of 4·07 persons); 11,522 men and 14,819 women were reported divorced.

The census population of the principal cities was in 1940 as follows:—Louisville, 319,077; Covington, 62,018; Lexington, 49,304; Paducah, 33,765; Owensboro, 30,245, and Ashland, 29,587.

In 1930, illiterates 10 years of age or older numbered 131,545 (6·6 per cent. of the total in that age group), of whom 101,695 were native whites and 28,553 were Negroes; in 1940, of persons between the ages of 5 and 24, 4·6,771 (39·0 per cent.) were attending school. Attendance at school between the ages of 7 and 14 years is compulsory, the minimum term being 28 weeks, and in the larger cities 40 weeks. In 1940, the elementary and high schools had 18,802 teachers and 604,064 pupils. The State has 5 normal schools for white students and 2 for Negro students with about 10,000 students. Expenditure on elementary and high school education in 1940, 25,974,000 dollars. For superior instruction there are universities and colleges, the more important of which (1943) were Berea College (non-sectarian), with 49 teachers and 941 students; Kentucky University, Lexington, 339 teachers and 3,153 students; University of Louisville, 402 teachers and 2,586 students.

**Religion and Welfare.**—The predominant religious denominations of the State are: Southern Baptists, with 229,216 members (in 1936), Roman Catholic (191,660), and Methodists (99,371). Total membership, all denominations, was 913,482.

Marriage licences are granted only after both applicants have passed the Wasserman or similar blood test.

Counties are authorised (Act of 1926) to set up Old Age Assistance (maximum 250 dollars a year) for those 70 years of age or older who have been

citizens for 15 years and residents of the county for 10 years, with maximum income of 400 dollars per annum or maximum assets of 2,500 dollars. In June, 1943, 51,339 persons were receiving an average of 14·58 dollars per month.

**Finance.**—For the fiscal year ending June 30, 1943, general revenues were 79,361,000 dollars and general expenditures, 73,889,000 dollars. Tax on motor fuels yielded 12,810,000 dollars and tax on alcoholic beverages, 6,255,000 dollars; Federal grants totalled 13,107,000 dollars.

The net long-term debt of the State on July 1, 1943, was 7,936,000 dollars.

**Production and Industry.**—Kentucky is largely an agricultural State. In 1940, 252,894 farms had an area of 20,294,016 acres; value of farm lands and buildings, 776,494,098 dollars. The central portion of the State contains the 'blue grass region' which, having a rich soil, produces cereals, grasses and fruits of fine quality. Cash income, 1943, from crops, 143,776,000 dollars; from live-stock, 195,809,000 dollars; from Government payments, 12,118,000 dollars. In 1943, the maize crop amounted to 75,350,000 bushels, and the wheat crop to 3,902,000 bushels, other farm products being hay, potatoes, sweet potatoes, water-melons, and fruits of many sorts. Besides, hemp, some cotton, and also sorghum are grown. The chief crop, however, is tobacco; output in 1943, 321,765,000 pounds.

Stock raising is important in Kentucky, which has long been famous for its horses. The live-stock on January 1, 1944, included 231,000 horses, 205,000 mules, 636,000 milch cows, 1,438,000 all cattle, 930,000 sheep and 1,881,000 swine. In 1943, the wool clip yielded 5,633,000 pounds of wool from 972,000 sheep.

The principal mineral product of Kentucky is coal, 59,976,000 short tons mined in 1942. Output of fluorspar, 103,939 short tons in 1940; petroleum (1942), 4,534,000 barrels; natural gasoline or petrol (1942), 9,571,000 gallons; natural gas (1941), 69,067 million cubic feet. Total value of mineral products in 1941, 169,009,000 dollars.

In 1939, 1,640 manufacturing establishments had 62,794 wage-earners who earned 61,902,354 dollars, used materials, containers, fuel and power valued at 298,629,345 dollars, with output worth 481,029,771 dollars.

In 1935, the State had 3,742 miles of steam railway besides 400 miles of electric railway track; only 21 per cent. of the communities are served by electric railway track; only 21 per cent. of the communities are served by electric railway track; only 21 per cent. of the communities are served by electric railway track. This is the lowest percentage of all the States. The State railways maintain 5,950 miles of highway.

On June 30, 1943, Kentucky had 94 national banks with deposits of 387,231,000 dollars, loans of 88,038,000 dollars and investments of 281,013,000 dollars; 302 State banks and trust companies had deposits of 408,573,000 dollars, loans of 86,905,000 dollars and investments of 243,684,000 dollars.

\* Of the total population in 1940, 51,412 (or 3.0 per cent.) were foreign-born whites: 10,870 (21.1 per cent.) German, 6,401 (12.4 per cent.) Russian, 4,540 Swedish and 3,186 English. Of the total population in 1940, 41.9 per cent. were urban; 8.6 per cent. Negro; 48.0 per cent. of those 14 years old and over (466,944 males and 116,882 females) were employed and 48,775 seeking employment; occupied dwelling units numbered 512,819 (of 3.52 persons; 10,921 men and 12,170 women were reported divorced. Indian Reservations, 1942, covered 1,707 acres.

The census of 1940 gave Kansas City a population of 121,458; Wichita, 114,966; Topeka (capital), 67,838; Hutchinson, 30,013; Salina, 21,073; Leavenworth, 19,220; Pittsburg, 17,571; Coffeyville, 17,355.

**Religion, Education and Welfare.**—The most numerous religious bodies are Roman Catholic, with 157,292 adherents in 1936, Methodists (140,792), and Disciples of Christ (65,740). Total membership, all denominations, was 691,488.

In 1940, persons 25 years of age or older who had not completed one school year numbered 11,975 (1.1 per cent.); of persons between the ages of 5 and 24, 386,427 (62.8 per cent.) were attending school. In 1943, the 6,748 public elementary schools had 10,149 teachers and 251,929 enrolled pupils; 769 public high schools and junior high schools had 5,466 teachers and 99,441 pupils. Total expenditure in 1943, \$1,431,810 dollars.

Leading institutions for higher instruction are (1944):—

| Founded | Institution                               | Control   | Professors | Students |
|---------|-------------------------------------------|-----------|------------|----------|
| 1858    | Baker University, Baldwin City            | Methodist | 31         | 246      |
| 1865    | University of Kansas, Lawrence            | State     | 235        | 2,636    |
| 1868    | State College of Agriculture, Manhattan   | "         | 310        | 1,515    |
| 1865    | Ottawa University                         | Bapt.     | 36         | 180      |
| 1885    | Kansas Wesleyan University, Salina        | Methodist | 36         | 168      |
| 1928    | Wichita Municipal University, Wichita     | City      | 58         | 746      |
| 1885    | Southwestern College, Winfield            | Methodist | 80         | 302      |

| 1903    | Kansas State Teachers' College, Pittsburg | "         | 110        | 638      |
| 1941    | Washburn Municipal University, Topeka     | City      | 52         | 530      |

In June, 1944, 28,547 persons were receiving Old Age Assistance to an average amount of 27.50 dollars per month.

The State's penal and reformatory system in June, 1944 held 1,552 men and 222 women. Kansas is one of four States still adhering to complete Prohibition.

**Finance.**—For the year ending June 30, 1944, the total receipts and disbursements were:—

|                            | Dollars     |
|----------------------------|-------------|
| Cash Balance, July 1, 1943 | 68 176,994  |
| Receipts, 1943-44          | 98,271,085  |
| Total                      | 166,448,079 |
| Disbursements, 1943-44     | 82,159,384  |
| Balance, July 1, 1944      | 84,288,695  |

Assessed valuation of real and personal property, 1944, was 3,178,724,14; dollars; outstanding indebtedness, July 1, 1944, 10,200,000 dollars.

**Production and Industry.**—Kansas is pre-eminently agricultural, but sometimes suffers from lack of rainfall in the west. In 1940, 156,327 farms had an area of 48,173,635 acres; total value of farm lands and buildings, 1,421,387,464 dollars. Cash income, 1943, from crops, 282,755,000 dollars; from live-stock, 476,757,000 dollars; from Government payments, 42,007,000 dollars. The chief crops in 1943 were maize, 84,318,000 bushels; wheat, 144,301,000 bushels (three times that of any other State); soybeans, 15,540,000 bushels; barley, 15,540,000 bushels; rye, potatoes, flax oats, 47,424,000 bushels. The State has an extensive live-stock industry comprising, on January 1, 1944, 375,000 horses, 48,000 mules, 841,000 milch cows, 4,039,000 all cattle, 974,000 sheep, and 2,601,000 swine. Wool clip (1943), 7,155,000 pounds from 839,000 sheep.

Kansas has coal-fields covering 15,000 square miles, which produced 4,573,000 short tons in 1943. Yield of petroleum in 1943 was 106,178,000 barrels; of natural gas (1942), 133,000 million cubic feet; natural gasoline or petrol, 69,870,000 gallons; lead, 9,213 short tons; zinc, 56,944 short tons; Portland cement, 5,805,978 barrels; salt, 945,287 tons. Total value of mineral products, 1943, 220,438,000 dollars.

In 1940 there were 1,494 manufacturing establishments, with 31,614 wage-earners, earning 36,938,032 dollars, using materials, containers, fuel and power costing 345,401,036 dollars; output was valued at 464,353,506 dollars. The slaughtering industry (1940) had products valued at 143,835,891 dollars; petroleum refining, an output valued at 89,437,983 dollars.

There were 8,707 miles of steam railway line in 1943, and 261 miles of electric railway track within the State. In 1939, 78.3 per cent. of the electric railway track within the State. The State maintains 9,372 miles of highway, of which 8,924 miles are surfaced.

On June 30, 1943, Kansas had 178 licensed national banks with deposits of 466,958,000 dollars, loans of 84,666,000 dollars and investments of 276,418,000 dollars; on June 30, 1944 442 licensed State and private banks and trust companies had deposits of 454,479,333 dollars, loans of 80,029,856 dollars and investments of 311,353,424 dollars.

### KENTUCKY.

**Government.**—Kentucky, first settled in 1765, was originally part of Virginia; it was admitted into the Union on June 4, 1792. The General Assembly consists of a Senate of 38 members elected for four years, one-half retiring every two years, and a House of Representatives of 100 members elected for two years. Sessions are biennial. All citizens are (with necessary exceptions) qualified as electors. Voters in the presidential elections of 1944 numbered 867,921; Franklin D. Roosevelt polled 54.5 per

dollars; from Government payments, 3,887,000 dollars. Leads in production of potatoes; output, 73,485,000 bushels in 1942. Other crops are oats, 3,315,000 bushels; hay, 862,000 tons; apples, 704,000 bushels. On January 1, 1944, the farm animals comprised 85,000 horses, 125,000 milch cows, 217,000 all cattle, 43,000 sheep, and 72,000 swine.

Minerals are stone, lime, clay products, slate and (1940) 18,390 long tons of feldspar; total output, 1941, was valued at 4,692,000 dollars.

In 1943, according to the census of manufactures, the State had 787 manufacturing establishments employing 88,483 wage-earners, earning 139,307,245 dollars, and the value of the output was 586,734,282 dollars. The manufacture of paper, of pulp, and of boots and shoes and cotton and woollen materials are the most important industries; output of pulp and paper, in 1943, was valued at 126,655,277 dollars; of boots and shoes, 58,449,202 dollars; of woollen products, 121,194,869 dollars; of cotton products, 75,144,855 dollars.

Lumber is an important manufacturing product, the cut in 1943 being 395,653,000 feet, board measure, from 413 plants; white pine, spruce for wood pulp, hemlock, balsam, birch, cedar, oak, maple, beech and ash, are found.

In 1942, there were 1,912 miles of steam railway and 54.79 miles of electric railway. The State maintains 8,206 miles of surfaced roads.

On June 30, 1943, Maine had 35 national banks with deposits of 167,135,000 dollars, loans of 27,150,000 dollars and investments of 115,124,000 dollars; 63 State banks and trust companies had deposits of 286,989,000 dollars, loans of 60,255,000 dollars and investments of 210,652,000 dollars.

## MARYLAND.

**Government.**—Maryland, first settled in 1634, was one of the thirteen original States. The General Assembly consists of a Senate of 29, and a House of Delegates of 123 members, both elected for four years. Voters are citizens who have the usual residential qualifications; voters in the presidential elections of 1944 numbered 609,419; Franklin D. Roosevelt polled 51.9 per cent.

The State is divided into 23 counties and Baltimore City. The State capital is Annapolis. Maryland sends to Congress two Senators and six Representatives.

**Governor.**—Herbert R. O'Connor (D.), 1943-47 (4,500 dollars).

**Secretary of State.**—William J. McWilliams (D.).

**Area, Population, Education.**—Area, 10,577 square miles, of which 690 square miles are inland water; the Chesapeake Bay occupies 1,208 square miles. Census population on April 1, 1940, 1,821,244, an increase of 189,718

or 11.6 per cent. since 1930. Estimated population, July 1, 1943, 2,091,720, an increase since 1940 of 14.9 per cent.

Population according to five Federal censuses (with distribution by sex in 1940) was:—

| Years  | White     | Negro   | Indian | Asiatic | Total     | Per Sq. Mile |
|--------|-----------|---------|--------|---------|-----------|--------------|
| 1870   | 605,497   | 175,391 | 4      | 2       | 780,894   | 78.6         |
| 1910   | 1,062,639 | 282,250 | 55     | 402     | 1,345,346 | 130.3        |
| 1920   | 1,304,787 | 344,479 | 32     | 413     | 1,649,661 | 145.8        |
| 1930   | 1,354,326 | 276,379 | 50     | 871     | 1,631,526 | 165.0        |
| 1940   | 1,518,481 | 301,951 | 78     | 759     | 1,821,244 | 184.2        |
| Male   | 762,801   | 151,617 | 39     | 581     | 915,038   | —            |
| Female | 756,680   | 150,334 | 34     | 178     | 906,306   | —            |

Of the total population (1940) 82,591 (or 4.5 per cent.) were foreign born whites, of whom 12,008 were from Germany (17.0 per cent.), 15,158 (21.9 per cent.) from Russia, 10,119 from Italy, 9,817 from Poland, 4,581 from England, and 3,383 from Ireland. Of the total population in 1940, 59.3 per cent. were urban, 16.5 per cent. Negro, and 37.9 per cent. (509,990 males and 180,921 females) were gainfully employed; the number of occupied dwelling units was 465,633 (of 3.91 persons). In 1940, 6,705 men and 9,125 women were reported divorced.

The largest city in the State (containing 47 per cent. of the population of the State in 1940) is Baltimore, with 859,100. Other cities, with population in 1940, are Cumberland, 39,483; Hagerstown, 32,491; Frederick, 15,802; Salisbury, 13,813; Annapolis (capital), 13,069; Cambridge, 10,102.

Education is compulsory from 7 to 13 years of age (children of 14 and 15 may be excused if they are regularly employed). In 1930, illiterates 10 years of age or older numbered 49,910 (8.3 per cent. of that age group), of whom 13,202 were native whites, 11,539 foreign-born whites and 25,073 Negroes. In 1940, of persons between the ages of 5 and 24, 343,897 (54.6 per cent.) were attending school.

In 1942-43 the State had 1,014 elementary and junior high schools, with 238,899 pupils and 6,369 teachers. There are 186 public senior high schools, with 58,328 pupils and 2,344 teachers; 4 State teachers' colleges and 1 Baltimore City college (Cappin), with 912 pupils; also 8 vocational schools with 2,231 pupils and 8 teachers. Expenditure on education, 1942-43, was 22,899,361 dollars.

The most important institution for higher education is Johns Hopkins University, organized in 1876 with, in 1943, 762 teachers and 3,941 students. Goucher College, founded in 1888, had, in 1944-45, 72 instructors and 601 students. Other institutions are the Peabody Institute for Music, the Maryland Institute School of Art and Design, and University of Maryland, at Baltimore, with 802 professors and 3,945 students.

**Religion and Welfare.**—The Roman Catholic Church, with 272,884 adherents in 1936, is the leading denomination; next comes the Methodist, with 95,101. Jewish Congregations are third, with 75,225. Total membership of the 2,959 churches of all denominations, 751,600.

The State's penal system had in 1941, 4,811 men and women. Counties furnish Old Age Assistance (maximum one dollar per diem) for those 65 years of age or older who have been citizens for 15 years and residents of the county for 10 years. In June, 1944 the average grant was 25.55 dollars per month, but the number receiving it has decreased steadily since August, 1940, when 18,337 were receiving it.

**Finance.**—For the fiscal year ending June 30, 1944, the total receipts and disbursements were as follows:—

|                             | Dollars     |
|-----------------------------|-------------|
| Cash balance, June 30, 1943 | 32,190,389  |
| Receipts, 1943-44           | 75,421,519  |
| Total                       | 107,611,908 |
| Disbursements, 1943-44      | 77,748,455  |
| Cash balance, June 30, 1944 | 29,863,453  |

On June 30, 1944, the net long-term debt of the State amounted to 29,486,000 dollars; the assessed valuation of real and personal property in 1944 amounted to 2,945,457,000 dollars.

**Production and Industry.**—Agriculture is an important industry in the State; about 76·4 per cent. of the farms are worked by their owners. In 1940, there were 42,110 farms with an area of 4,197,827 acres; total value of land and buildings, 273,980,352 dollars. Cash income, 1943, from crops, 58,538,000 dollars; from live-stock, 90,940,000 dollars; from Government payments, 5,577,000 dollars. Crops in 1943 were: wheat (4,913,000 bushels), maize (11,804,000 bushels), hay, potatoes (1,980,000 bushels), tobacco (17,604,000 pounds). The farm animals in the State on January 1, 1944, were: horses, 73,000; mules, 20,000; milch cows, 216,000; all cattle, 366,000; sheep, 52,000; swine, 289,000.

Of mining industries the most important is coal-mining, with in 1943 an output of 1,931,792 short tons; coke, 1,869,200 tons; pig iron, 1,693,909 net tons. Maryland produces asbestos and some potash salts. Total mineral output (1943) was valued at 12,000,000 dollars.

In the census of 1939, Maryland had 2,893 manufactories, with 141,643 wage-earners; wages, 156,782,654 dollars; cost of materials, containers, fuel and power, 601,253,399 dollars; value of products, 1,027,354,074 dollars. Steel-manufacture and copper smelting and refining are the chief industries.

The State maintains a network of roads 4,228 miles in extent, all surfaced; steam railways had (1941) 1,361 miles of line; only 45 per cent. of the communities are served by railways. 50 steamship lines use the port of Baltimore, which is the ocean port nearest to the steel centres of Pittsburgh, Youngstown, Cleveland, Gary and Chicago, and handles a large part of grain and other exports.

On June 30, 1944, Maryland had 63 national banks with deposits of 702,029,000 dollars, loans of 106,698,000 dollars and investments of 450,088,000 dollars; 112 State banks and trust companies with deposits of 808,787,000 dollars, loans of 182,187,000 dollars and investments of 499,135,000 dollars, and 11 mutual savings banks with deposits of 280,167,000 dollars and total assets of 314,263,000 dollars.

## MASSACHUSETTS.

**Constitution and Government.**—The first permanent settlement within the borders of the present state was made at Plymouth in December, 1620, by the Pilgrims from Holland, who were separatists from the English Church, and formed the nucleus of the Plymouth Colony. In 1628 another company of Puritans settled at Salem, forming eventually the Massachusetts Bay Colony. In 1630 Boston was settled. In 1629 the whole region called New England was formed into a Province, the government of which was divided between the colony of Plymouth and that of Massachusetts Bay, but in 1691 they were united. In the struggle which ended in the separation of the American colonies from the mother country, Massachusetts took the foremost part, and in 1780 became one of the thirteen original States of the Union.

The legislative body, styled the General Court of the Commonwealth of Massachusetts, meets biennially and consists of the Senate with 40 members, elected biennially, and the House of Representatives of 240 members, elected in 164 districts, each of which returns one, two, or three representatives according to the number of legal voters. The State sends 2 Senators and 14 Representatives to the Federal Congress.

Electors are all adult citizens, with the usual residential qualifications, who can read and write the English language; excluded are paupers and those under guardianship. Voters in the presidential elections of 1944 numbered 1,960,625; Franklin D. Roosevelt polled 52·8 per cent.

The State has 14 counties, 39 cities and 812 towns; the capital is Boston.

**Governor.**—Maurice J. Tobin (D.), 1945-47 (salary, 10,000 dollars).

**Area and Population.**—Area, 8,257 square miles, 350 square miles being inland water. The census population, April 1, 1940, was 4,316,721, an increase of 67·107 or 1·5 per cent. since 1930. Estimated population, July 1, 1943, 4,265,204, a decrease since 1940 of 1·4 per cent. Population at four census years (with distribution by sex, 1940) was:—

| Years            | White     | Negro  | Indian | Asiatic | Total     | Per Sq. Mile |
|------------------|-----------|--------|--------|---------|-----------|--------------|
| 1910             | 3,324,926 | 38,055 | 688    | 2,747   | 3,366,416 | 418·8        |
| 1920             | 3,803,524 | 45,466 | 555    | 2,511   | 3,852,056 | 479·2        |
| 1930             | 4,192,992 | 52,365 | 574    | 2,383   | 4,248,514 | 517·4        |
| 1940             | 4,257,590 | 55,391 | 769    | 2,965   | 4,316,721 | 545·9        |
| Male . . . . .   | 2,072,515 | 27,240 | 409    | 2,315   | 2,102,479 | —            |
| Female . . . . . | 2,185,081 | 28,151 | 360    | 650     | 2,214,242 | —            |

Of the total population in 1940, 848,852 (19·4 per cent.) were foreign-born whites, of whom 142,462 (16·7 per cent.) were Canadian (English) and 81,411 (9·5 per cent.) were French Canadians; 114,862 from Italy; 113,924 (13·4 per cent.) were from Ireland; 64,575 from Russia; 58,438 from England; 53,783 from Poland; 28,128 from Sweden; 25,174 from Scotland; 24,182 from Portugal and 16,581 from Germany. Of the total population in 1940, 89·4 per cent. were urban, 1·2 per cent. Negro, and 85·5 per cent. (1,050,678 males and 484,109 females) were gainfully employed; occupied dwelling units numbered 1,120,694 (of 3·85 persons). In 1940 census, 14,677 men and 21,938 women were reported divorced.

In 1940, the population of the principal cities of the State was as follows:—

| Cities           | Population | Cities     | Population | Cities     | Population |
|------------------|------------|------------|------------|------------|------------|
| Boston (capital) | 770,816    | Somerville | 101,177    | Medford    | 63,063     |
| Worcester        | 198,694    | Lowell     | 101,889    | Brookline  | 62,843     |
| Springfield      | 148,554    | Lynn       | 98,123     | Malden     | 58,019     |
| Fall River       | 115,428    | Lawrence   | 84,323     | Holyoke    | 53,766     |
| Cambridge        | 110,879    | Quincy     | 75,810     | Pittsfield | 49,084     |
| New Bedford      | 110,341    | Newton     | 69,873     | Haverhill  | 46,752     |

**Education.**—In 1930, illiterates 10 years of age or older numbered 124,158 (3.5 per cent. of that age group), of whom 111,568 were foreign-born whites. In 1940, of persons between the ages of 5 and 24, 860,665 (60.9 per cent.) were attending school. School attendance is compulsory for children from 7 to 16 years of age (except in certain instances). Children are excused attendance at school for religious instruction (outside school) for periods not exceeding one hour per week, but no public funds may be expended in connection with this. For the school year ending June 30, 1943, the total expenditure for public day schools was 72,625,448 dollars, plus 1,232,260 dollars for teachers' colleges. The public day schools had 24,477 teachers and 631,016 pupils. The 259 public high schools had 6,754 principals and teachers and 139,638 pupils; junior high schools had 4,010 teachers and 92,948 pupils. There are 10 State teachers' colleges with a total enrolment for the school year, 1942-43, of 2,106 pupils and 300 teachers; also the Boston Teachers' College with 24 teachers and 123 students.

Within the State there are 25 colleges and universities, 15 professional schools, 12 teachers' colleges, 6 normal schools, 11 junior colleges, with about 6,500 professors and instructors, and 52,000 students. Some of the leading institutions (1943) are:—

| Year opened | Location and Name of University and College        | Professors and Instructors | Students |
|-------------|----------------------------------------------------|----------------------------|----------|
| 1921        | Amherst . Amherst College <sup>1</sup>             | 82                         | 875      |
| 1867        | Massachusetts State College <sup>2</sup>           | 135                        | 1,292    |
| 1869        | Boston . Boston University <sup>3</sup>            | 644                        | 10,770   |

| 1843        | Holy Cross                                         | 89                         | 1,140    |

<sup>1</sup> For men only.

<sup>2</sup> Co-educational.

<sup>3</sup> For women only.

<sup>4</sup> Badcliffe College is affiliated with, but is not legally a part of, Harvard University, certain professors in the university offering instruction to students in Badcliffe College.

**Religion and Welfare.**—The principal religious bodies are the Roman Catholics with 1,696,708 members in 1936, Jewish Congregations with

257,994 members, and Congregationalists with 163,411. Total membership, all denominations, was 2,559,101.

Marriage licences are granted only after both applicants have passed the Wasserman or similar blood test.

On June 30, 1944, the State had 12 public institutions for the insane, 1 for the criminally insane, 3 for the feeble-minded and 1 for epileptics, as well as 19 private hospitals. The number under care in institutions for the mentally ill and in family care in the State on that date was 33,051 (18,890 males and 16,161 females), of which number 29,843 were under public care.

On June 30, 1944, there were 5 institutions under the supervision of the Department of Public Welfare, consisting of the Tewkesbury State infirmary with 2,094 inmates, three industrial schools with 859 inmates, and a hospital with 2,094 inmates, three industrial schools with 179 inmates. As State minor wards, under school for crippled children with 179 inmates. As State minor wards, under the custodial care of the Department, there were 5,369 children boarded in families and 3,305 children in families without board, also 1,971 children in care of the Trustees of the Massachusetts Training Schools, placed in families and supervised by the Department of Public Welfare.

Old Age Assistance (maximum unstated) was established in conformity with Federal Social Security Law for those citizens 65 years of age or older who have lived in the State 8 out of 9 years preceding application. In June, 1944, 75,598 persons were drawing an average of 39.88 dollars per month.

The penal institutions in the State consist of 5 strictly State institutions and 17 county jails or houses of correction. On June 30, 1944, the number of prisoners in these institutions was 4,133 males and 657 females.

**Finance.**—For the fiscal year ending November 30, 1942, the net revenue and expenditures of the State were as follows:—

|                                                          | Dollars     |
|----------------------------------------------------------|-------------|
| Cash in Treasury, December 1, 1941 . . . . .             | 28,078,308  |
| Net receipts, year ending November 30, 1942 . . . . .    | 308,109,246 |
| Total . . . . .                                          | 336,187,548 |
| Net expenditure, year ending November 30, 1942 . . . . . | 294,981,488 |
| Cash in Treasury, November 30, 1942 . . . . .            | 41,206,060  |

The total net direct and contingent debt of the State on October 1, 1944, amounted to 60,136,336 dollars; the assessed value of real property, January 1, 1944, was 5,599,292,119 dollars, and of personal property, 554,709,118 dollars.

**Production, Industry, Commerce.**—In 1940, the number of farms was 31,897, with an area of 1,937,963 acres; value of farm land and buildings was 212,014,287 dollars; 29,072 farms were operated by the owners, 560 by managers, and 2,265 by tenants. Cash income, 1943, from crops, 63,980,000 dollars; from live-stock, 89,628,000 dollars; from Government payments, 892,000 dollars. Principal crops in 1943 were: hay, 559,000 tons; potatoes, 3,375,000 bushels; cranberries (leading all States), 485,000 barrels; tobacco, 8,258,000 pounds; apples, 2,228,000 bushels. On January 1, 1944, there were on farms in the State 19,000 horses, 135,000 milch cows, 195,000 all cattle, 8,000 sheep, and 124,000 swine.

The State census of manufactures in 1941 showed 9,084 establishments,

employing 606,446 wage-earners, who earned 863,542,882 dollars, using materials, containers, fuel and power, valued at 2,020,781,712 dollars, and turning out products worth 4,056,115,922 dollars. Chief industries are: woollen and worsted goods, 386,544,285 dollars; boots and shoes, 191,364,340 dollars, and cotton goods, 157,396,886 dollars. In the year ending July 31, 1943, 2,793,176 active cotton spindles consumed 625,416 bales of cotton.

There is little mining within the State. In 1942, 1,176,000 net tons of coke were produced. Total mineral output in 1941 was valued at 9,293,000 dollars.

On January 1, 1943, there were 1,753 miles of main and branch steam railroads in the State and 426 miles of electric railways. In 1943 the State maintained 1,928 miles of drained and graded roads, all surfaced.

On June 30, 1943, 124 national banks had deposits of 2,153,658,000 dollars, loans of 522,142,000 dollars and investments of 1,519,534,000 dollars; 260 State banks and trust companies had deposits of 3,098,444,000 dollars, loans of 1,108,574,000 dollars and investments of 2,007,059,000 dollars.

## MICHIGAN.

**Government.**—Michigan, first settled by Marquette at Sault Ste. Marie in 1668, became the territory of Michigan in 1805, with its boundaries greatly enlarged in 1818 and 1834; it was admitted into the Union with its present boundaries on January 26, 1837. The Senate consists of 32 members and the House of Representatives of 100 members. Electors are all citizens over 21 years of age resident in the State for 6 months next preceding the election. Voters in the presidential elections of 1944 numbered 2,205,217; Franklin D. Roosevelt polled 50.2 per cent. The State sends to Congress 2 Senators and 17 Representatives.

The State is organised in 83 counties, each administered by a Board of Supervisors, as well as in cities, townships and villages. The capital is Lansing.

**Governor.**—Harry F. Kelly (R.), 1945-47 (5,000 dollars).

**Secretary of State.**—Herman H. Dignan (R.).

**Area, Population, Education.**—Area, 58,216 square miles, of which 1,194 square miles are inland water. Population 1940 census, 5,256,106, an increase of 413,781, or 8.5 per cent., since 1930. Estimated population, July 1, 1943, 5,422,373, an increase of 3.2 per cent. since 1940.

| Years  | White     | Negro   | Indian | Asiatic | Total     | Per Sq. Mile |
|--------|-----------|---------|--------|---------|-----------|--------------|
| 1910   | 2,785,247 | 17,115  | 7,519  | 292     | 2,810,173 | 48.9         |
| 1920   | 3,601,627 | 60,082  | 5,614  | 1,089   | 3,668,412 | 63.8         |
| 1930   | 4,663,507 | 169,451 | 7,080  | 2,285   | 4,842,325 | 84.9         |
| 1940   | 5,039,643 | 208,845 | 6,282  | 1,596   | 5,256,106 | 92.2         |
| Male   | 2,584,459 | 105,491 | 3,835  | 1,412   | 2,694,737 | —            |
| Female | 2,455,184 | 103,354 | 2,917  | 424     | 2,561,379 | —            |

Of the total population in 1940, 683,030 (or 13.5 per cent. of the total) were foreign-born whites, of whom 158,416 (23.2 per cent.) were from Canada, 96,826 (14.2 per cent.) from Poland, 59,783 from Germany, 47,728 from England, 40,681 from Italy, 27,306 from Scotland, 32,229 from Russia, 24,722 from Holland, and 12,506 from Ireland. Of the total in 1940, 65.7 per cent. were urban, 4.0 per cent. Negro; 34.5 per cent. (1,427,459 men per cent. were urban, 4.0 per cent. Negro; 34.5 per cent. (1,427,459 men and 397,494 women) were gainfully employed; the number of occupied dwelling units was 1,396,014 (of 3.77 persons); 33,547 men and 35,891 women were reported divorced. In 1942, the area of the Indian reservations was 216 square miles, and the population 437.

In the census of April 1, 1940, population of the chief cities was:—

| Cities            | Pop.      | Cities        | Pop.   | Cities       | Pop.   |
|-------------------|-----------|---------------|--------|--------------|--------|
| Detroit           | 1,623,452 | Dearborn      | 63,584 | Muskegon     | 47,697 |
| Grand Rapids      | 164,292   | Kalamazoo     | 54,097 | Battle Creek | 43,453 |
| Flint             | 151,648   | Highland Park | 50,810 | Port Huron   | 32,759 |
| Saginaw           | 82,794    | Hamtramck     | 49,639 | Wyandotte    | 30,618 |
| Lansing (capital) | 78,755    | Jackson       | 49,656 | Ann Arbor    | 29,815 |
| Fontaine          | 64,626    | Bay City      | 47,956 | Royal Oak    | 25,087 |

In 1940, of persons between the ages of 5 and 24, 1,123,792 (68.1 per cent.) were attending school. Education is compulsory for the school term for children from 7 to 16 years of age. The total net expenditure for graded and ungraded public schools, for the fiscal year 1942, was 108,282,124 dollars. In 1942 there were 6,274 school districts (elementary and secondary schools) with 985,643 pupils and 37,457 teachers. There are 4 teachers' training colleges with 497 teachers and 10,021 students. The State University of Michigan, founded in 1817 at Detroit and removed to Ann Arbor in 1841, had in 1943, 821 teachers and 11,705 students; Michigan State College of Agriculture and Applied Sciences, 506 teachers and 6,724 students; Michigan College of Mining and Technology at Houghton, 80 professors and instructors and 795 students. Total net expenditure (1942) for seven State supported institutions, 10,525,327 dollars.

**Religion and Welfare.**—Leading religious bodies are the Roman Catholic, with 800,917 members in 1936, Methodist (142,141), Lutheran (Synod of Missouri, 108,854). Total membership, all denominations, 1,786,839. Marriage licences are granted only after both applicants have passed the Wasserman or similar blood test.

Old Age Assistance (maximum 40 dollars a month) was established in 1933 for American citizens 65 years of age or older, and later amended in conformity with Federal Social Security Law. Assets must not exceed 2,500 dollars in personal, real and household property. In June, 1943, 92,465 persons were drawing an average of 27.21 dollars per month. The State's penal and reformatory system in September, 1943, held 5,158 men and 222 women.

**Finance.**—For the year ending June 30, 1943, the revenue and expenditure were as follows:—

|                        | Dollars     |
|------------------------|-------------|
| Balance, July 1, 1942. | 70,467,253  |
| Receipts, 1942-43      | 340,679,679 |
| Total                  | 411,146,932 |
| Disbursements, 1942-43 | 352,894,402 |
| Balance, June 30, 1943 | 58,252,530  |

Total bonded indebtedness of the State was 13,561,000 dollars on November 15, 1943; total assessed valuation, 7,065,500,000 dollars.

**Production and Industry.**—The State, formerly agricultural, is now chiefly industrial, with the motor car industry leading. In 1940, it contained 187,589 farms with a total area of 18,037,995 acres of which 11,898,762 acres were crop land; value of land and buildings was 912,545,223 dollars. Cash income, 1943, from crops, 150,327,000 dollars; from live-stock, 312,214,000 dollars; from Government payments, 12,001,000 dollars. Principal crops were (1943) oats, 31,148,000 bushels; maize, 48,256,000 bushels; wheat, 11,390,000 bushels; hay, 4,088,000 tons; potatoes, 22,000,000 bushels; sugar beets, 406,000 tons; grapes, 15,000 tons, and beans, 6,588,000 bags. On January 1, 1944, there were in the State 896,000 sheep, 279,000 horses, 1,059,000 milch cows, 2,036,000 all cattle, and 1,397,000 swine. In 1943, the wool-clip yielded 6,224,000 pounds of wool from 798,000 sheep. The area of national forest land (June 30, 1942) was 5,150,564 acres. State forests totalled 1,836,009 acres.

Of the mineral output, coal, in 1942, amounted to 247,831 short tons; natural gas, 17,749 million cubic feet; magnesium, 30,066,881 lb; cement, 10,349,104 barrels; iron ore, 16,163,104 long tons; gypsum, 891,108 tons; copper (1943), 45,498 short tons; silver, a by-product of copper mining, 61,674 ounces; output of salt, 3,946,591 short tons, and stone, 15,884,930 short tons. Petroleum output, 21,753,711 barrels. Mineral output in 1942 was valued at 96,902,302 dollars.

Motor-vehicle manufacturing is by far the leading industry, with (1939 census) 189 plants which employed 253,917 wage-earners, paid 429,208,605 dollars in wages, and produced vehicles and parts valued at 2,284,666,538 dollars. The total number of manufacturing establishments (1939 census) was 6,318, employing 523,071 wage-earners, who earned 790,740,567 dollars; value of the materials, containers, fuel and power used, 2,550,346,742 dollars, and the output was valued at 4,341,413,189 dollars.

On January 1, 1943, there were 7,185 miles of steam railway, serving 65.8 per cent. of the communities. Trunk highway mileage (1943) totalled 9,353, of which 4,687 was hard surfaced.

On June 30, 1943, 75 national banks had deposits of 1,814,494,000 dollars; loans of 242,461,000 dollars and investments of 1,254,976,000 dollars; 357 State banks and trust companies had deposits of 1,378,435,000 dollars; loans of 243,102,000 dollars and investments of 861,125,000 dollars.

## MINNESOTA.

**Government.**—Minnesota, first explored in the 17th century and first settled in the 20 years following the establishment of Fort Snelling (1819), was made a territory in 1849 (with parts of North and South Dakota), and was admitted into the Union, with its present boundaries, on May 11, 1858. The Legislature consists of a Senate of 67 members, elected for four years, and a House of Representatives of 131 members, elected for 2 years. Voters in the presidential elections of 1944 numbered 1,126,159; Franklin D. Roosevelt polled 52.4 per cent.

There are 87 counties, few containing less than 400 square miles. Townships are 6 miles square, each divided into 36 sections of one square mile. Cities, of four classes, according to population, frame their own charters and are governed by a mayor and council or by a commission. The capital is St. Paul. The State sends to Congress 2 Senators and 9 Representatives.

Governor.—Edward J. Thye (R.). 1945-47 (7,000 dollars).

Secretary of State.—Mike Helm (R.).

**Area, Population, Education.**—Area, 84,068 square miles, of which 4,059 square miles are water. Census population on April 1, 1940, 2,792,300, an increase of 228,347, or 8.9 per cent. over that of 1930. Estimated population, July 1, 1943, 2,577,363, a decrease of 7.7 per cent. since 1940. Population in 4 census years (with distribution by sex in 1940) was:—

| Years  | White     | Negro | Indian | Asiatic | Total     | Per Sq. Mile |
|--------|-----------|-------|--------|---------|-----------|--------------|
| 1910   | 2,069,327 | 7,084 | 9,053  | 344     | 2,076,708 | 23.7         |
| 1920   | 2,368,936 | 8,809 | 8,761  | 619     | 2,387,125 | 29.5         |
| 1930   | 2,542,599 | 9,445 | 11,077 | 832     | 2,563,953 | 32.0         |
| 1940   | 2,763,982 | 9,978 | 12,538 | 862     | 2,792,300 | 34.9         |
| Male   | 1,415,169 | 5,185 | 6,514  | 677     | 1,427,545 | —            |
| Female | 1,348,813 | 4,793 | 6,014  | 185     | 1,364,755 | —            |

The foreign-born white inhabitants in 1940 numbered 294,904 (15.1 per cent. of the total) comprising 67,161 (22.8 per cent.) Swedes, 52,025 (17.6 per cent.) Norwegians, 42,047 (14.3 per cent.) Germans and 22,060 Canadians. Of the 1940 population, 49.8 per cent. were urban, 0.3 per cent. Negro, and 33.3 per cent. (722,505 males and 208,994 females) were gainfully employed. In 1940, 11,571 men and 14,721 women were reported divorced.

The largest cities are Minneapolis with a population of 492,370 in 1940; St. Paul (capital), 287,786, and Duluth, 101,065.

In 1920, illiterates 10 years of age or older numbered 26,302 (1.3 per cent. of that age group), of whom 16,759 were foreign-born whites; in 1940, persons between the ages of 5 and 24, 576,887 (60.0 per cent.) were attending schools. In 1943-44 the 3,195 elementary school districts of the State had 12,196 teachers and 308,692 enrolled pupils; 654 public accredited secondary schools had 7,578 secondary teachers and 164,373 secondary pupils. There were 11 junior colleges with 821 teachers and 8,833 pupils, with a total expenditure of 1,915,860 dollars. The State teachers' colleges at Mankato, Moorhead

and St. Cloud had war training programmes which accounted for the increase in the total number of teachers and expenditure over previous years. The total public school expenditure (1943) (elementary and secondary) was \$3,464,016 dollars, of which \$48,843,133 dollars were spent for maintenance. The University of Minnesota at Minneapolis, which was chartered in 1861 and opened in 1869, had a total enrolment in 1943-44 of 9,871 day students. Hamline University, at St. Paul, founded in 1854, had 55 instructors and 559 students. St. John's (Roman Catholic) University, at Collegeville, had 54 instructors and 600 students. Carleton College, at Northfield, had 95 instructors and 674 students. St. Olaf College, at Northfield, had 94 instructors and 1,080 students. Macalester College, at St. Paul, had 78 instructors and 473 students. Gustavus Adolphus College at St. Peter, founded in 1862, had 51 instructors and 525 students.

**Religion and Welfare.**—The chief religious bodies are: Roman Catholic, with 510,388 members in 1936, Norwegian Lutheran (173,540), Lutheran-Synod of Missouri (108,689). Total membership of all denominations, 1,352,662.

**Old Age Assistance** (maximum one dollar per diem) were set up in 1929 (at the option of the various counties) for needy persons 65 years of age or older who have resided in the county for 15 years, with assets not exceeding 5,000 dollars. On June 30, 1944, 58,692 persons were receiving an average of 32.81 dollars per month. The State's penal and reformatory system in 1944 held 2,298 men and women.

**Finance.**—The revenue fund and expenditure for the year ending July 1, 1944, were:—

|                                     |            |
|-------------------------------------|------------|
| Balance, July 1, 1943 . . . . .     | Dollars    |
| Receipts to June 30, 1944 . . . . . | 8,490,368  |
| Net receipts . . . . .              | 56,897,330 |
| Payments to June 30, 1944 . . . . . | 64,987,698 |
| Balance, July 1, 1944 . . . . .     | 57,514,968 |
|                                     | 7,472,730  |

The State's four principal trust funds (derived from royalties from State-owned iron mines, special tax on iron ore, and sales of land and of timber) on July 1, 1944, totalled \$34,354,880 dollars.

Unpaid bonds and debt certificates, June 30, 1944, were 82,176,508 dollars; assessed value of taxable property (1943), 1,311,761,616 dollars.

**Production and Industry.**—Minnesota is largely an agricultural State. In 1944, it contained 168,433 farms with a total area of 30,663,215 acres. Cash income, 1943, from crops, 172,829,000 dollars; from livestock, 600,729,000 dollars; from Government payments, 22,265,000 dollars. Minnesota usually ranks first in production of barley, 22,718,000 bushels in 1943; flax seed, 15,458,000 bushels, and rye, 1,538,000 bushels. Output in 1943 of spring wheat, 15,072,000 bushels; maize, 215,448,000 bushels; oats, 142,791,000 bushels; hay, 6,480,000 tons; potatoes, 23,571,000 bushels. On January 1, 1944, the farm animals included 539,000 horses, 3,871,000 all cattle and calves, 1,900,000 milch cows, 1,460,000 sheep, and 5,612,000 swine. Leads all states in production of creamery butter, 1943, 294,281,000 lb. In 1944, the wool-clip amounted to 3,793,000 pounds of wool from 1,460,000 sheep. National forest area, 1943, 5,004,041 acres.

The mining of iron ores, mostly red hematite, in the Mesabi, Vermilion,

and Cuyuna ranges, is important; output in 1943 amounted to 83,655,340 long tons. Value of mineral products, 1943, 168,587,000 dollars.

The census of manufacturers of 1939 showed 4,008 manufacturing establishments, employing 92,084 wage-earners, who earned 125,442,031 dollars; the cost of material, fuel and power used was 535,143,118 dollars, and the output was valued at 845,771,514 dollars.

In 1943, Minnesota had 8,945 miles of steam railway, besides 448 miles of electric railway track, including urban street railways; 67 per cent. of the communities were served by railways in 1939.

On June 30, 1944, 184 national banks had deposits of 1,595,435,000 dollars; assets, 1,697,272,000 dollars; 489 State banks, and trust companies had deposits of 561,943,622 dollars; loans of 127,906,413 dollars; investments of 809,637,144 dollars.

### MISSISSIPPI.

**Government.**—Mississippi, settled in 1716, was organised as a territory in 1798 and admitted into the Union on December 10, 1817. In 1804 and in 1812 its boundaries were extended, but in March, 1817, a part was taken to form the new territory of Alabama, leaving the boundaries substantially as at present. The Legislature consists of a Senate (49 members) and a House of Representatives (140 members), both elected for 4 years. The capital is Jackson; there are 82 counties. Electors are all citizens who have resided in the State two years, in the election district for one year (clergymen excepted) next before the election, have paid the legal taxes, and have been registered. The applicant for registration must be able to read the State Constitution or show that he understands it when it is read to him. Disfranchisement is heavy; Mississippi is one of 7 Southern States which disfranchise those who have not paid their poll tax. Voters in the presidential elections of 1944 numbered 172,379; Franklin D. Roosevelt polled 93.3 per cent. The State is represented in Congress by 2 Senators and 7 Representatives.

**Governor.**—Thomas L. Bailey (D.), 1944-48 (7,500 dollars).

**Secretary of State.**—Walker Wood (D.).

**Area, Population, Education.**—Area, 47,716 square miles, 296 square miles being inland water. Census population on April 1, 1940, 2,183,786, an increase of 173,975, or 8.6 per cent., over that of 1930. Estimated population, July 1, 1943, 2,231,401, an increase of 2.2 per cent. since 1940.

| Years            | White     | Negro     | Indian | Asiatic | Total     | Per Sq. Mile |
|------------------|-----------|-----------|--------|---------|-----------|--------------|
| 1910             | 786,111   | 1,009,487 | 1,253  | 263     | 1,797,114 | 33.8         |
| 1920             | 853,962   | 935,184   | 1,105  | 367     | 1,790,618 | 38.6         |
| 1930             | 998,077   | 1,009,718 | 1,458  | 568     | 2,009,821 | 42.4         |
| 1940             | 1,106,327 | 1,074,578 | 2,134  | 757     | 2,183,786 | 46.1         |

| Female . . . . . | 550,170   | 547,862   | 1,055  | 227     | 1,099,314 | —            |

12,745 Russian. Of the total population in 1940, 51.8 per cent. were urban, 6.5 per cent. Negro, and 34.2 per cent. (988,641 males and 308,453 females) were gainfully employed; occupied dwelling units numbered 1,068,642 (of 3.54 persons); 21,908 men and 29,996 women were reported divorced.

The largest cities in the State, with census population in 1940, are:—

| Cities      | Pop.    | Cities           | Pop.   | Cities         | Pop.   |
|-------------|---------|------------------|--------|----------------|--------|
| St. Louis   | 816,048 | Joplin           | 37,144 | Sedalia        | 20,428 |
| Kansas City | 399,178 | University City  | 33,023 | Cape Girardeau | 19,426 |
| St. Joseph  | 75,711  | Jefferson (cap.) | 24,268 | Webster Grove  | 18,394 |
| Springfield | 61,238  | Hannibal         | 20,865 | Independence   | 16,066 |

School attendance is compulsory for children from 7 to 14 years for the full term. In 1940, of persons between the ages of 5 and 24, 715,275 (57.4 per cent.) were attending school. In 1941-42, the 8,983 elementary schools had 17,987 teachers and 505,159 enrolled pupils; 987 public high school districts had 193,138 pupils and 18,208 teachers. There were 5 teachers' colleges with 13,608 students. Total expenditure for public schools (including building expenditures) in 1941-42, 57,249,173 dollars. For superior instruction, the more important institutions (1943) are the University of Missouri, at Columbia, founded in 1839, with 389 teachers and 4,708 students, Washington University (non-sectarian) at St. Louis founded in 1857, with 633 teachers and 3,432 students, and St. Louis University (Roman Catholic), founded in 1818, with 570 teachers and 4,830 students.

**Religion and Welfare.**—Chief religious bodies are Catholic, with 440,000 members in 1942, Southern Baptist (284,891), Southern Methodists (209,890) and Disciples of Christ (129,419). Total membership, all denominations, 1,392,860 in 1936.

In June, 1943, the State was paying Old Age Assistance (maximum 30 dollars a month for individuals and 45 dollars for couples) to 108,708 persons, who received an average of 23.97 dollars per month. The State's penal and reformatory system in 1942 held 3,055 men and women.

**Finance.**—In 1943, the State's revenue was 130,472,000 dollars (103,937,000 dollars from taxes and 21,631,000 dollars from Federal grants), while expenditures totalled 124,666,000 dollars. Taxes on sales furnished 31,168,000 dollars, and on motor fuels, 12,714,000 dollars.

On January 1, 1944, the net long-term debt was 76,584,000 dollars; the assessed value of property was then 3,978,890,388 dollars.

**Production and Industry.**—Agriculture is one of the chief occupations in the State. The 1940 census showed 256,100 farms, with a farm area of 34,739,598 acres; total value of farm lands and buildings was 1,107,302,598 dollars. Cash income, 1943, from crops, 109,385,000 dollars; from live-stock, 548,065,000 dollars; from Government payments, 28,894,000 dollars. Maize is the principal crop, representing nearly 50 per cent. of crop acreage and often 40 per cent. of total crop values. Output in 1943, 139,810,000 bushels; winter wheat, 12,649,000 bushels; oats, 51,750,000 bushels; potatoes, 3,827,000 bushels. In the south-east counties the 1943 cotton acreage was 375,000 acres, producing 295,000 bales; tobacco, 5,880,000 pounds. There are many orchards, and much small fruit is grown. Missouri is a great live-stock state, the January 1, 1944, totals being 172,000 mules, 519,000 horses, 1,673,000 sheep, 5,405,000 hogs, 1,115,000 milch cows

and 3,486,000 all cattle. The 1943 wool clip was 10,711,000 pounds from 1,609,000 sheep; mohair clip was 180,000 pounds from 75,000 goats. National forest area, 1940, 8,321,513 acres.

The coal-fields of Missouri have an area of about 14,000 square miles, producing, in 1942, 3,505,277 short tons of coal. In 1942, zinc, 36,394 short tons; lead, 199,548 short tons; silver, 69,106 fine ounces; Portland cement, 6,972,000 barrels; lime, 7,116,619 short tons; pig-iron; copper; barite, 96,147 short tons; fire clay, 1,774,997 short tons were produced. Value of total mineral production, 1941, 61,545,000 dollars.

Missouri's largest industry, judged by value of the product, is meat-packing, and its most important industry, in number of wage-earners employed, is the manufacture of boots and shoes. The 1941 census of manufacturers showed 4,601 plants, employing 273,702 wage-earners, manufacturing 485,570,280 dollars; materials, containers, fuel and power cost 1,133,217,988 dollars and output was valued at 2,097,626,205 dollars.

In the State there were in 1942, 7,510 miles of steam railway, besides 263 miles of electric railway track; 46.7 per cent. of the communities are served by railways. A new system of State highways covers 16,116 miles.

On June 30, 1943, Missouri had 83 national banks with deposits of 799,852,000 dollars; loans of 222,465,000 dollars; investments of 640,795,000 dollars; 518 State banks and trust companies had deposits of 1,172,675,000 dollars; loans of 318,877,000 dollars; investments of 784,329,000 dollars.

### MONTANA.

**Government.**—Montana, first settled in 1809, was made a Territory (out of a portion of Idaho Territory) in 1864 and was admitted into the Union on November 8, 1889. The Senate consists of 53 Senators, elected for 4 years, one half at each biennial election. The 90 members of the House of Representatives are elected for two years. Voters in the presidential elections of 1944 numbered 207,355; Franklin D. Roosevelt polled 54.3 per cent. The State is divided into 56 counties. The capital is Helena. Montana sends to Congress 2 Senators and 2 Representatives.

**Governor.**—Sam C. Ford (R.), 1945-49 (7,500 dollars).

**Secretary of State.**—Sam W. Mitchell (D.).

**Area, Population, Education.**—The State has a total area of 147,138 square miles, including 822 square miles of water. Public lands, unappropriated, on June 30, 1941, totalled 5,871,058 acres. Census population April 1, 1949, 559,456, an increase of 21,860 or 4.0 per cent. over that of 1930. Estimated population, July 1, 1943, 484,281, a decrease of 13.4 per cent since 1940. Population in 4 census years (with distribution by sex for 1940) was:—

The foreign-born inhabitants in 1940 numbered 5,988 (0·4 per cent. of the total) of whom 1,294 (21·6 per cent.) were Italian, 568 German, 412 Russian and 816 English. Of the population in 1940, 19·8 per cent. was urban, 49·2 per cent. Negro, and 88 per cent. (558,279 males and 174,176 females) were gainfully employed; occupied dwelling units numbered 534,956 (of 4·08 persons). In 1940, 5,726 men and 9,794 women were reported divorced. The largest cities (with population in 1940) are Jackson, 62,107; Meridian, 35,481; Vicksburg, 24,460; Hattiesburg, 21,026; Laurel, 20,598.

In 1930, illiterates 10 years of age or older numbered 199,761 (13·1 per cent. of that age group), of whom 20,070 were native whites and 177,695 were Negroes; in 1940, of persons between the ages of 5 and 24, 484,012 (54·5 per cent.) were attending school. Attendance at school is compulsory; white and coloured children are taught in separate schools. The elementary and secondary schools in 1940 had 594,799 white and coloured pupils and 14,773 white and coloured teachers; coloured public elementary and high schools had 292,397 pupils. The expenditure on elementary and secondary education in 1940 was 15,918,000 dollars. For higher education Mississippi has 20 universities and colleges, including the University of Mississippi, established 1844, which in 1943 had 108 instructors and 1,280 students; Mississippi State College with 120 teachers and 1,997 students; Mississippi State College for Women at Columbus with 75 instructors and 950 students; Agricultural and Mechanical College (founded 1880) with 100 teachers and 1,250 students.

**Religion and Welfare.**—Over half the church-going inhabitants of Mississippi are Baptists (Negro Baptists with 322,562 members in 1936 and Southern Baptists with 150,000 members) and one-sixth are Southern Methodists (107,245 members). Total membership, all denominations, 780,869. In June, 1943, 24,941 persons were receiving Old Age Assistance amounting to an average of 9·10 dollars per month.

**Finance.**—For the fiscal year ending June 30, 1943, the general revenues were 63,602,000 dollars (taxes, 50,846,000 dollars, and Federal grants, 9,124,000 dollars) and general expenditures were 56,097,000 dollars. Largest single source of revenue, the sales tax, yielded 13,164,000 dollars; tax on motor fuels yielded 11,670,000 dollars.

On June 30, 1943, the net long-term debt was 23,001,000 dollars; assessed valuation of real, personal and public utility property (1941), 377,886,000 dollars.

**Production and Industry.**—Agriculture is the chief industry of the State, which has a semi-tropical climate and a rich soil. In 1940, the farms numbered 291,092 with an area of 19,156,058 acres; total value of farm lands and buildings, 474,986,062 dollars. Cash income, 1943, from crops, 270,677,000 dollars; from live-stock, 76,421,000 dollars; from Government payments, 13,881,000 dollars. The chief product is cotton, which was grown on 2,516,000 acres, and yielded 1,841,000 bales in 1943. Other crops are pecans, 9,000,000 lb.; sweet potatoes, 6,970,000 bushels; maize, 43,508,000 bushels; rice, wheat and oats. Sorgo syrup, in 1942, 2,580,000 gallons; sugar cane syrup, 3,135,000 gallons. On January 1, 1944, there were in the State 115,000 horses, 353,000 mules, 591,000 milch cows, 1,488,000 all cattle, 71,000 sheep and 1,869,000 swine. National forest area, 1942, 2,777,325 acres.

Mississippi produced from 350 wells in 1942, 28,833,000 barrels of petroleum and a small quantity of natural gas from gas wells. The total

value of the meagre mineral deposits, including hydrated limestone, some coal and rich clay, in 1941, was 17,761,000 dollars.

In 1939, 1,298 manufacturing establishments employed 46,359 wage-earners, earning 27,437,033 dollars; materials, containers, fuel and power used cost 101,474,875 dollars, and output was valued at 174,937,294 dollars.

The State in 1941 had 3,856 miles of steam railway; 61 per cent. of the communities are served by railways. The state maintains 6,276 miles of highways.

On June 30, 1943, 23 national banks had deposits of 119,817,000 dollars, loans of 14,735,000 dollars and investments of 71,984,000 dollars, and 179 State banks and trust companies had deposits of 259,878,000 dollars, loans of 46,413,000 dollars and investments of 135,887,000 dollars.

## MISSOURI

**Government.**—Missouri, first settled in 1764, was made a Territory in 1812 and admitted to the Union on August 10, 1821. In 1837 its boundaries were extended to their present limits. The General Assembly consists of a Senate of 34 members elected for four years (half retiring every two years), and a House of Representatives of 160 members elected for two years. Voters (with the usual exceptions) are all citizens and aliens who, within a prescribed period, have applied for citizenship. Voters in the presidential elections of 1944 numbered 1,571,678; Franklin D. Roosevelt polled 51·4 per cent. The State is divided into 114 counties and the City of St. Louis, Jefferson City is the State capital. Missouri sends to Congress 2 Senators and 13 Representatives.

**Governor.**—Phil M. Donnelly (D.), 1945–49 (5,000 dollars).  
**Secretary of State.**—Dwight H. Brown (D.).

**Area, Population, Education.**—Area, 69,674 square miles, 404 square miles being water. Census population on April 1, 1940, 3,784,664, an increase of 155,297 or 4·2 per cent. over that of 1930. Estimated population, July 1, 1943, 3,749,819, a decrease since 1940 of 0·9 per cent.

| Years  | White     | Negro   | Indian | Asiatic | Total     | Per Sq. Mile |
|--------|-----------|---------|--------|---------|-----------|--------------|
| 1910   | 2,184,922 | 157,402 | 318    | 683     | 2,343,325 | 47·9         |

The foreign-born white population in 1940 numbered 114,125 (3·0 per cent.), of whom 27,832 (24·5 per cent.) were German, 13,168 Italian and

| Years  | White   | Negro | Indian | Asiatic | Total   | Per Sq. Mile |
|--------|---------|-------|--------|---------|---------|--------------|
| 1910   | 360,530 | 1,834 | 10,745 | 2,894   | 375,003 | 2.6          |
| 1920   | 534,300 | 1,658 | 10,966 | 2,015   | 548,939 | 3.8          |
| 1930   | 519,898 | 1,258 | 14,798 | 1,654   | 537,608 | 3.7          |
| 1940   | 540,468 | 1,130 | 16,841 | 1,027   | 559,466 | 3.8          |
| Male   | 288,975 | 647   | 8,647  | 740     | 299,009 | —            |
| Female | 251,493 | 478   | 8,194  | 287     | 260,447 | —            |

Of the total population in 1940, foreign-born whites numbered 55,642, or 10.1 per cent. Of these, 8,569 (16 per cent.) were Canadian, 6,896 (12.4 per cent.) Norwegian, 4,401 German, 4,134 English, 4,084 Russian and 4,032 Swedish. Japanese numbered 508, of whom 281 were citizens. Of the 1940 population, 87.8 per cent. were urban, and 83.2 per cent. (158,300 males and 82,264 females) gainfully employed; occupied dwelling units numbered 159,963 (of 3.50 persons); 4,907 men and 3,781 women were reported divorced.

The largest cities are Butte, with a population of 37,081 in 1940; Great Falls, 29,928; Billings, 28,361; Missoula, 18,449; Helena (capital), 15,056; Anaconda, 11,004. The Office of Indian Affairs administered, 1942, 6,364,270 acres, of which 1,232,948 acres were allotted to tribes.

In 1930, illiterates 10 years of age or older numbered 4,960 (1.7 per cent. of that age group), of whom 3,085 were foreign-born whites; in 1940, of persons between the ages of 5 and 24, 116,408 (59.5 per cent.) were attending school. The 2,018 public elementary schools in 1943 had 8,514 teachers and 69,236 enrolled pupils. The 198 public high schools had 1,425 teachers and 27,329 pupils. Total expenditure on public school education in 1938-39, 19,002,705 dollars. The University of Montana consists of the College of Agriculture and Mechanic Arts, at Bozeman (1942-43, 1,701 students and 86 instructors), the School of Mines at Butte (356 students and 19 instructors), the two Normal Colleges at Dillon and Billings, the Northern Montana College at Havre (256 students), and the State University at Missoula, founded in 1895 (1,230 students).

**Religion and Welfare.**—The leading religious bodies are (1936): Roman Catholic, with 75,292 members; Norwegian Lutheran, 13,363; Methodist, 13,238. Total membership, all denominations (1936), 160,138.

The Department of Public Welfare, created in 1937 under the Federal Social Security Act, administers old age assistance, aid to dependent children and similar activities. On June 30, 1943, 11,865 were receiving Old Age Assistance, drawing an average of 25.11 dollars per month. In 1943-44 the Montana State prison held on an average 344 men and women.

**Finance.**—The total receipts and disbursements for the year ending June 30, 1944, were:—

|                         | Dollars    |
|-------------------------|------------|
| Balance on July 1, 1943 | 22,122,063 |
| Receipts, 1943-44       | 37,935,347 |
| Total                   | 60,057,410 |
| Disbursements, 1943-44  | 32,756,880 |
| Balance, July 1, 1944   | 27,300,530 |

The net bonded debt of the State on July 1, 1944, was 7,825,225 dollars. The assessed valuation of all property (1944) was 1,146,828,734 dollars.

**Production and Industry.**—In 1940, there were 41,823 farms with an area of 46,451,594 acres; total value of farm land and buildings, 350,178,411 dollars. Irrigation works were available for 2,344,390 acres in 1940. National forests numbering 13 had an area (1942) of 18,992,061 acres, of which 16,339,119 acres were Federally administered.

The chief crops are wheat, amounting in 1943, to 4,335,000 bushels, including spring wheat, 52,416,000 bushels; hay, 2,499,000 tons; maize, 3,230,000 bushels; oats, 18,760,000 bushels; sugar beets, 581,000 short tons; potatoes, 2,645,000 bushels; barley and flax seed also grown. Cash income, 1943, from crops, 117,989,000 dollars; from live-stock, 120,548,000 dollars; from Government payments, 14,423,000 dollars. The raising of sheep and from Government payments. On January 1, 1944, there were cattle, etc., is a very important industry. On January 1, 1944, there were cattle, 3,440,000 sheep; horses, 252,000; milch cows, 170,000; all cattle, 1,727,000; swine, 414,000. The wool-clip in 1943 was 30,945,000 pounds from 3,477,000 sheep.

Chief mineral products, 1942, were: gold, 146,892 fine ounces; silver, 11,188,118 fine ounces; copper (1943), 138,295 short tons; lead, 40,100 short tons; zinc, 54,715 short tons; high grade manganese ore (1940), 8,230 long tons; coal, 3,858,000 short tons; lignite, 64,383 net tons. Petroleum output in 1943 was 8,289,000 barrels and of natural gas, 26,231 million cubic feet. Arsenous oxide, crystalline graphite and phosphate rock are also mined. Value of total mineral production, 1943, 78,362,000 dollars.

In 1939, 585 manufacturing establishments had 9,171 wage-earners, earning 12,148,428 dollars; cost of materials, containers, fuel and power used was 112,094,844 dollars; value of output, 151,885,026 dollars.

In 1941 there were 5,101 miles of steam railway in the State; 67 per cent. of the communities are served by railways. State maintained highway mileage (1942), 6,563, of which 5,012 miles are surfaced.

On June 30, 1943, Montana had 41 national banks with deposits of 137,254,000 dollars; loans of 18,089,000 dollars; investments of 78,897,000 dollars; 69 State banks and trust companies had deposits of 110,656,000 dollars, loans of 27,092,000 dollars, investments of 57,095,000 dollars.

### NEBRASKA.

The Nebraska region was first reached by white men from Mexico under the Spanish general Coronado in 1541. It was ceded by France to Spain in 1763, retroceded to France in 1801, and sold by Napoleon to the United States as part of the Louisiana purchase in 1803. Its first settlement was in 1847 and on May 30, 1854, it became a territory and on March 1, 1867, a State. In 1882 it annexed a small part of Dakota territory, and in 1908 it received another small tract from South Dakota.

**Government.**—By a constitutional amendment adopted in November, 1934, Nebraska has a single-chambered legislature of 43 members—the only State in the Union to have one. The present constitution

was adopted in 1875. Amendments adopted in 1912 and 1920 provide for legislation through the initiative and referendum and permit cities of more than 5,000 inhabitants to frame their own charters. Voters in the presidential elections of 1944 numbered 563,126; Franklin D. Roosevelt polled 41.4 per cent. The State has 93 counties; the capital is Lincoln. Nebraska is represented in Congress by two Senators and four Representatives.

*Governor.*—Dwight C. Griswold (R.), 1945-47 (7,500 dollars).

*Secretary of State.*—Frank Marsh (R.).

**Area and Population.**—Area, 77,237 square miles, of which 584 square miles are water. Public lands unappropriated on June 30, 1941, totalled 28,698 acres. Census population, April 1, 1940, 1,315,834, a decrease of 62,129, or 4.5 per cent., since 1930. Estimated population, July 1, 1943, 1,228,218, a decrease of 6.7 per cent. since 1940. Population in four census years (with distribution by sex for 1940) was:—

| Years  | White     | Negro  | Indian | Asiatic | Total     | Per Sq. Mile |
|--------|-----------|--------|--------|---------|-----------|--------------|
| 1910   | 1,180,293 | 7,689  | 3,502  | 780     | 1,192,214 | 15.5         |
| 1920   | 1,279,319 | 13,243 | 2,888  | 1,023   | 1,296,372 | 16.9         |
| 1930   | 1,360,028 | 13,752 | 3,256  | 932     | 1,377,968 | 18.0         |
| 1940   | 1,297,024 | 14,171 | 3,401  | 688     | 1,315,284 | 17.2         |
| Male   | 656,667   | 7,069  | 1,686  | 366     | 665,788   | —            |
| Female | 640,957   | 7,102  | 1,715  | 372     | 650,046   | —            |

The foreign-born white population in 1940 (6.3 per cent. of the whole) numbered 81,853, of whom 21,657 (26.5 per cent.) were German, 9,880 (12.1 per cent.) Czechoslovakian, 9,435 (11.2 per cent.) Swedish, 9,181 (11.2 per cent.) Russian. Of the total population in 1940, 89.1 per cent. were urban, 1.1 per cent. Negro, and 32.9 per cent. (345,629 males and 87,798 females) were gainfully employed; 6,478 men and 7,657 women were reported divorced. The largest cities in the State are: Omaha with a population of 223,844 in 1940; Lincoln (capital), 81,984; Grand Island, 19,180; Hastings, 15,145. Indian reservations in 1940 covered an area of 11 square miles and had a population of 4,562.

**Education.**—In 1940, of persons between the ages of 5 and 24, 292,121 (63.6 per cent.) were attending school; more than half the population aged 25 or over had completed at least eight years of school. School attendance is compulsory for children from 7 to 16 years of age for not less than six months each year. The 6,102 elementary schools in 1942-43, had 12,991 teachers and 178,436 enrolled pupils; the 502 accredited high schools, 3,295 teachers and 73,585 pupils; the 4 State normal schools, 196 teachers and 5,206 students. Total expenditure for common schools for year ending June 30, 1943, was 21,753,011 dollars. The more important higher academic institutions are (1944):—

| Opened | Institution                          | Professors, &c. | Students |
|--------|--------------------------------------|-----------------|----------|
| 1871   | Univ. of Nebraska, Lincoln (State)   | 476             | 4,267    |
| 1878   | Craigton Univ., Omaha (R.C.)         | 228             | 1,198    |
| 1887   | Nebraska Wesleyan Univ. (M.E.)       | 86              | 891      |
| 1882   | Hastings College, Hastings (Presby.) | 82              | 524      |
| 1930   | Municipal University, Omaha          | 43              | 1,186    |

A grant of 3,000,000 acres of public lands for permanent endowment of her schools was made by the Federal Government. Of this 1,689,791 acres are still held by the State; the value, 1942, was 6,527,512 dollars. Further sale of this land, with some minor exceptions, is forbidden, Nebraska being the only State which has adopted this policy. The permanent public school endowment is 11,310,931 dollars.

**Religion and Welfare.**—The Roman Catholics had 154,136 members in 1936, Methodist, 85,124 members, Lutheran—Synod of Missouri, 61,711 members. Total, all denominations, 566,806.

Old Age Assistance (maximum of 40 dollars a month and a minimum of 5 dollars) was established in 1935 for all citizens 65 years of age or older who have been residents of the State for 5 years, with an income not exceeding 360 dollars per annum. In July, 1944, 25,248 persons were drawing an average of 26.04 dollars per month.

The State's penal and reformatory system had, in 1944, 819 men and 211 women.

**Finance.**—For the financial year ending June 30, 1943, the State's revenues (as defined by the U.S. Department of Commerce to make its finances fully comparable with those of other States) were 39,898,000 dollars, and expenditures 36,052,000 dollars. Taxes furnished 27,752,000 dollars (motor fuels, 11,310,000 dollars), and Federal grants, 8,529,000 dollars. The receipts and disbursements of the State funds (as the State itself classifies them) were:—

|                        | Dollars    |
|------------------------|------------|
| Balance, July 1, 1942  | 6,653,026  |
| Receipts, 1942-43      | 32,495,217 |
| Total                  | 39,148,243 |
| Disbursements, 1942-43 | 27,771,981 |
| Balance, June 30, 1943 | 11,376,262 |

On June 30, 1943, the net long-term debt was 1,078,000 dollars. In 1944, the assessed valuation of tangible real and personal property amounted to 2,111,795,994 dollars.

**Production and Industry.**—Nebraska is one of the most important agricultural States. In 1940, it contained 121,062 farms with a total area of 47,848,981 acres, of which 25,414,860 acres were crop land; total value of farm lands and buildings, 1,137,808,019 dollars. The average value of farm lands and buildings was valued at 9,399 dollars. The principal crops are as follows, with 1943 yield: maize, 216,632,000 bushels; wheat, 61,285,000 bushels; oats, 71,676,000 bushels; barley, 27,918,000 bushels; rye, 5,052,000 bushels; alfalfa, 1,343,000 tons; potatoes, 12,090,000 bushels. About 2,800 farms grow sugar-beets for 7 factories; output, 1943, 568,000 short tons, yielding 74,000 short tons of sugar. It leads in production of wild hay, 2,072,000 tons in 1943. Cash income from crops, 1943, was 178,867,000 dollars; from live-stock, 478,305,000 dollars; from Government payments, 37,054,000 dollars. On January 1, 1944, the State contained 449,000 horses, 34,000 mules, 3,890,000 all cattle, 716,000 milch cows, 1,248,000 sheep and 4,294,000 swine. The wool-clip, 1943, was 4,744,000 pounds from 569,000 sheep. The area of national forest, 1941, was 207,209 acres.

In 1939, there were 1,160 manufacturing establishments in the State with 18,798 wage-earners, earning 20,609,975 dollars; the materials, con-

tainers, fuel and power used cost 204,418,572 dollars, and the output was valued at 278,478,444 dollars. The chief of these industries is meat-packing, mainly at South Omaha. Output of minerals, of which pumice is the most important, was valued at 6,499,000 dollars in 1941.

In 1944, there were 5,944 miles of steam railway in the State, besides 130 miles of electric railway track; 76.5 per cent. of the communities are served by railways. The State-maintained highway system embraced 11,320 miles (8,899 miles surfaced) in 1944.

On June 30, 1944, 130 national banks had deposits of 715,055,000 dollars, loans of 82,983,000 dollars and investments of 306,583,000 dollars; 278 State banks and trust companies had deposits of 214,802,000 dollars, loans of 33,892,000 dollars and investments of 112,214,000 dollars.

## NEVADA.

**Government.**—Nevada, first settled in 1849, when it was a part of the Territory of Utah (created 1850), was made a Territory in 1861 and was admitted into the Union on October 31, 1864. The Legislature consists of a Senate of 17 members elected for four years, about half their number retiring every two years, and an Assembly of 40 members elected for two years. Qualified electors are all citizens with the usual residential qualifications. Voters in the presidential elections of 1941 numbered 64,234; Franklin D. Roosevelt polled 54.6 per cent. The State capital is Carson City (population, 2,478 in 1940). There are 17 counties. The State Emblem is the sage-brush. Nevada is represented in Congress by two Senators and one Representative.

**Governor.**—E. P. Carville (D.), 1943-47 (7,000 dollars).  
**Secretary of State.**—Malcolm McEachin (D.).

**Area, Population, Education.**—Area, 110,540 square miles, 788 square miles being water. The Office of Indian Affairs controls, 1942, 1,188,044 acres, of which 1,045,687 acres have been assigned to Indian tribes. Estimated population on July 1, 1943, 143,818, an increase of 33,071, or 30.0 per cent., since 1940.

Population in 4 census years (with distribution by sex for 1940) was:—

| Years  | White   | Negro | Indian | Asiatic | Total   | Per Sq. Mile |
|--------|---------|-------|--------|---------|---------|--------------|
| 1910   | 74,276  | 812   | 5,240  | 1,846   | 81,874  | 0.7          |
| 1920   | 70,699  | 846   | 4,907  | 1,466   | 77,407  | 0.7          |
| 1930   | 84,515  | 516   | 4,871  | 1,156   | 91,058  | 0.8          |
| 1940   | 104,030 | 664   | 4,747  | 806     | 110,247 | 1.0          |
| Male   | 57,984  | 369   | 2,419  | 578     | 61,341  | —            |
| Female | 46,046  | 301   | 2,328  | 228     | 48,906  | —            |

In 1940, the foreign-born white population numbered 10,599 (10 per cent. of the total), of whom 2,258 were Italians, 841 Canadians and 833 Spanish.

Japanese numbered 470, of whom 225 were citizens. Of the total population in 1940, 39.3 per cent. were urban, and 37.3 per cent. (34,551 males and 6,911 females) were gainfully employed; number of occupied dwelling units was 38,291 (of 8.31 persons); 2,913 men and 1,311 women were reported divorced. Largest city is Reno, with population (1940) of 31,817; Las Vegas has 8,422.

School attendance is compulsory for children from 7 to 18 years of age. In 1940, of persons between the ages of 5 and 24, 19,593 (59.0 per cent.) were attending school. In 1945, there were 216 elementary public schools, 15 kindergartens and 41 high schools in Nevada, staffed by 892 teachers. The total enrolment of school children was 24,325. The University of Nevada, endowed by the State in 1862, has 4 colleges with 82 professors and instructors and 744 students in 1943. State expenditures for education, 1941-42, 1,814,640 dollars.

**Religion and Welfare.**—Chief religious bodies are the Roman Catholic with 12,053 members in 1936, the Mormons with 7,744, and the Protestant Episcopal with 3,557. Total membership, all denominations, 27,881.

Old Age Assistance (maximum one dollar per diem) is granted to all 65 years of age or older who have been American citizens for 15 years and residents in the State for 10 years, possessing assets less than 3,000 dollars; in June, 1943, 2,040 persons were receiving an average of 83.38 dollars per month. The State prison, Carson City, had 244 inmates in 1942; other institutions had 417 inmates.

**Finance.**—The receipts and disbursements in the fiscal year ending June 30, 1943, were as follows:—

|                                | Dollars   |
|--------------------------------|-----------|
| Balance on hand, July 1, 1942  | 1,781,461 |
| Receipts, 1942-43              | 8,082,529 |
| Total                          | 9,863,990 |
| Disbursements, 1942-43         | 6,984,915 |
| Balance on hand, June 30, 1943 | 2,929,075 |

Nevada has no debt except 4,628,046 dollars of State bonds (July 1, 1944) held by various State departments. The State eschews income taxes, death duties and similar devices, including the sale tax. Assessed value of taxable property in 1942 was 210,627,360 dollars.

**Production and Industry.**—In 1940, 3,573 farms (all but 309 being irrigated farms) had a farm area of 3,785,116 acres, of which 451,683 acres were crop land; total value, farm lands and buildings, 47,594,384 dollars. Irrigation works, 1940, were available for 841,304 acres. Cash income, 1943, from crops, 3,587,000 dollars; from livestock, 20,988,000 dollars; from Government payments, 231,000 dollars. Spring wheat crop in 1943, 426,000 bushels; barley, 863,000 bushels; potatoes, 680,000 bushels. On January 1, 1944, there were 37,000 horses, 22,000 milch cows, 422,000 all cattle, 662,000 sheep and 30,000 swine. In 1943 the wool-clip yielded 5,355,000 pounds of wool from 653,000 sheep. The area of national forests (1940) is 5,245,677 acres.

Output of minerals (1942) were: gold (295,112 fine ounces), silver (3,723,435 fine ounces), copper (1943) (71,553 short tons), lead (5,376 short tons), zinc (10,197 short tons), mercury (1943) (4,577 flasks), gypsum

(284,795 short tons in 1941). Some magnesite, vanadium, tungsten, antimony, cobalt and nickel are also mined. Value of chief mineral output for 1943, 27,770,047 dollars.

In 1939, 106 manufacturing establishments employed 1,103 wage-earners, earning 1,655,972 dollars; materials, containers, fuel and power used amounted to 8,872,843 dollars; output was valued at 20,630,850 dollars.

In 1940, there were 1,830 miles of steam railway, 73.3 per cent. of the communities being served by railways. The State maintains 5,531 miles of highway, of which 3,103 miles are surfaced. There are (1945) 12 standard airports and 25 secondary airports.

Nevada, on June 30, 1943, had 6 national banks with deposits of 77,032,000 dollars, loans of 12,960,000 dollars, investments of 50,673,000 dollars; 6 State banks and trust companies had deposits of 8,579,000 dollars, loans of 1,843,000 dollars, investments of 5,817,000 dollars.

## NEW HAMPSHIRE.

**Government.**—New Hampshire, first settled in 1623, was one of the thirteen original States of the Union. The sense of the people as to the calling of a convention for the revision of the Constitution must be taken every seven years. The Legislature consists of a Senate of 24 members, elected for two years, and a House of Representatives, of from 375 to 400 members, depending on the population. Electors must be adult citizens, able to read and write, duly registered and not paupers or under sentence for crime. Voters in the presidential elections of 1944 numbered 229,630; Franklin D. Roosevelt polled 52.1 per cent. The State is divided into 10 counties; the capital is Concord. New Hampshire sends to the Federal Congress two Senators and two Representatives.

**Governor.**—Charles N. Dole (R.), 1945–47 (5,000 dollars).

**Secretary of State.**—Enoch D. Fuller (R.).

**Area, Population, Education.**—Area, 9,304 square miles, of which 280 square miles are inland water. Census population on April 1, 1940, 491,524 an increase of 26,231, or 5.5 per cent., over that of 1930. Estimated population, July 1, 1943, 460,851, a decrease of 6.2 per cent. since 1940. Population at 4 Federal censuses (with distribution by sex for 1940) was:—

| Years        | White   | Negro | Indian | Asiatic | Total   | Per Sq. Mile |
|--------------|---------|-------|--------|---------|---------|--------------|
| 1910         | 429,906 | 564   | 34     | 68      | 430,572 | 47.7         |
| 1920         | 442,351 | 621   | 38     | 103     | 443,083 | 49.1         |
| 1930         | 464,361 | 790   | 64     | 88      | 465,393 | 51.6         |
| 1940         | 490,989 | 414   | 50     | 71      | 491,524 | 54.5         |
| Male . . .   | 244,608 | 222   | 24     | 88      | 244,909 | —            |
| Female . . . | 246,381 | 192   | 26     | 16      | 246,615 | —            |

Of the total population in 1940, 63,296 (representing 13.9 per cent. of the total population) were foreign-born white, of whom 41,972 (61.4 per cent.) were Canadian, 3,896 Irish (including Northern Ireland), and 3,250 Polish; of the population, 57.6 per cent. were urban, 0.1 per cent. Negro, and 35.8 per cent. (124,072 males and 51,927 females) were gainfully employed; the number of occupied dwelling units was 132,936 (of 3.70 persons). In 1940 census, 3,027 men and 3,426 women were reported divorced.

The largest city of the State is Manchester, with a population of 77,685 in 1940. Other cities are Nashua, 32,927; Concord (capital), 27,171; Berlin, 19,084; Dover, 14,990; Portsmouth, 14,821; Keene, 13,832; Laconia, 13,484; Rochester, 12,012; Franklin, 6,749; Somersworth, 6,136.

In 1940, those 20 years of age or older who had no years of schooling numbered 7,341; of persons between the age of 5 and 24, 95,228 (58.8 per cent.) were attending schools. School attendance is compulsory for children from 8 to 14 years of age during the whole school term, or to 16 if they have not completed the elementary grades. Employed illiterate minors between 16 and 21 years of age are obliged to attend evening or special classes, if provided by the district. In 1943–44, the 1,653 elementary schools of the State had 2,065 teachers and 48,424 enrolled pupils; 105 approved senior high schools and public academies had 1,112 teachers and 18,974 pupils. Maintenance of public schools in 1943–44 cost 7,706,051 dollars. The 2 teachers' colleges had 41 teachers and 362 students. Dartmouth College, at Hanover, founded in 1769, had (1943–44) 280 instructors and 3,976 students, including trainees for the defence forces; the University of New Hampshire at Durham, founded in 1866, had 165 instructors and 1,155 students.

**Religion and Welfare.**—The Roman Catholics, with 157,751 adherents in 1936, had 63 per cent. of the Church membership; other bodies are Congregational (22,363), Methodist (13,435). Total, all denominations, 237,786.

Marriage licences are issued only after both applicants have passed the Wasserman or similar blood test.

Aid to the needy blind was established in 1913, aid to dependent children in 1915 and Old Age Assistance in 1931; in 1936 the State joined the Federal Social Security Scheme. The State Department of Public Welfare on October 1, 1944, was servicing 9,126 families, representing 6,619 Old Age Assistance recipients (average grant, 28.10 dollars per month), 271 needy blind recipients (average grant, 28.50 dollars monthly), and 4,000 dependent children (average monthly grant per family, 56.41 dollars). Old Age Assistance (with a maximum of 35 dollars per month, except for medical, surgical and nursing care), covers all American citizens 65 years of age or older who are residents of the State, with personal property not exceeding 300 dollars and real property of less than 1,000 dollars net equity. The State prison on July 1, 1943, held 218 men and 1 woman.

**Finance.**—The receipts and disbursements for the fiscal year ending June 30, 1944, were:—

|                            | Dollars    |
|----------------------------|------------|
| Cash balance, July 1, 1943 | 5,151,940  |
| Receipts, 1943–44          | 27,800,194 |
| Total                      | 32,952,134 |
| Disbursements, 1943–44     | 27,985,766 |
| Balance, June 30, 1944     | 4,966,368  |

cent. For local government the State is divided into 31 counties. The State capital is Santa Fé; population (1940), 20,325. It sends to Congress two Senators and two Representatives.

*Governor.*—John J. Dempsey (D.), 1945-47 (5,000 dollars).

*Secretary of State.*—Cecelia T. Cleveland (D.).

**Area, Population, Education.**—Area, 121,666 square miles (155 square miles being water). Census population on April 1, 1940, 531,808, an increase of 108,491, or 25.5 per cent., since 1930. Estimated population, July 1, 1943, 538,983, an increase of 0.4 per cent. since 1940. In four census years the population (with distribution by sex for 1940) was:—

| Years          | White   | Negro | Indian | Asiatic | Total   | Per Sq. Mile |
|----------------|---------|-------|--------|---------|---------|--------------|
| 1910           | 304,594 | 1,628 | 30,573 | 506     | 337,201 | 2.7          |
| 1920           | 334,673 | 5,733 | 19,512 | 432     | 360,350 | 2.9          |
| 1930           | 391,095 | 2,840 | 28,941 | 431     | 423,317 | 3.5          |
| 1940           | 429,312 | 4,672 | 34,510 | 324     | 531,808 | 4.4          |
| Male . . . .   | 251,517 | 2,406 | 17,719 | 204     | 271,846 | —            |
| Female . . . . | 240,795 | 2,266 | 16,791 | 120     | 259,972 | —            |

In 1940, 15,247 (2.8 per cent. of population) were foreign-born whites, of whom 8,875 (60 per cent.) were Mexican, 1,148 (8.6 per cent.) Italians, 813 Germans and 504 English. Japanese numbered 186, of whom 114 were citizens. Of the 1940 population, 83.2 per cent. were urban, 0.9 per cent. Negro, and 26.3 per cent. (112,500 males and 27,769 females) gainfully employed; occupied dwelling units were 129,475 (of 4.11 persons). In 1940, 2,443 men and 2,984 women were reported divorced.

The largest towns are Albuquerque, with population of 35,449 in 1940; Santa Fé (capital) with 20,325; Roswell, 13,482. The U.S. Office of Indian Affairs administered, in 1942, 6,652,294 acres, of which 4,891,198 acres were assigned to tribes, chiefly Navajo, Apache and Pueblo (or town) Indians.

In 1930 illiterates 10 years of age or older numbered 41,845 (13.3 per cent. of that age group), of whom 18,733 were native whites and 530 were foreign-born whites. In 1940, of persons between the ages of 5 and 24, 129,187 (58.6 per cent.) were attending school. Elementary education is free, and compulsory between 6 and 16 years of age. In 1940 public elementary and secondary schools in the State had 132,589 pupils, and 3,798 teachers. The Federal Government maintains 26 Indian schools with about 2,000 pupils and 140 teachers. Total expenditure on education (1941-42), 6,456,000 dollars. For higher instruction (1943): College of Agriculture and Mechanic Arts, at State College, with 85 professors and 607 students; School of Mines, at Socorro, with 15 professors and 96 students; the Normal University at Las Vegas, with 27 professors and 1,247 students; and the State University at Albuquerque, with 138 professors and 1,350 students.

**Religion and Welfare.**—The prevailing form of religion is Roman Catholic, with 196,795 members in 1936; Southern Methodists had 10,225 members and Southern Baptists 8,687. Total, all denominations, 243,936.

Old Age Assistance, in accordance with Federal law, was being drawn in June, 1943, by 5,038 recipients, who averaged 29.57 dollars per month.

**Finance.**—For the year ending June 30, 1943, general revenues were 27,356,000 dollars (taxes, 20,521,000 dollars and Federal grants, 4,835,000

dollars) and general expenditures were 25,031,000 dollars. Sales tax yielded 5,895,000 dollars and tax on motor fuels, 4,486,000 dollars.

Net long-term debt on June 30, 1943, was 25,811,000 dollars; assessed value of real and personal property, 1941, was 329,034,000 dollars.

**Production and Industry.**—New Mexico produces cereals, vegetables, fruit, and cotton. Dry farming has proved valuable; irrigation, indispensable over wide tracts of fertile country, reached 731,990 acres in 1940. In 1940, 84,105 farms had an area of 38,860,427 acres; value of farm lands and buildings was 187,525,814 dollars. Cash income, 1943, from crops, was 41,201,000 dollars; from live-stock, 65,676,000 dollars; from Government payments, 2,826,000 dollars. The principal crops in 1943 were: maize, 2,930,000 bushels; wheat, 2,079,000 bushels; potatoes, 430,000 bushels; grain sorghums, 1,422,000 bushels; cotton, 108,000 bales from 110,000 acres. The farm animals on January 1, 1944, comprised 113,000 horses, 10,000 mules, 83,000 milch cows, 1,420,000 all cattle, 2,108,000 sheep, and 146,000 swine. In 1943, the wool-clip amounted to 15,718,000 pounds of wool from 2,105,000 sheep; mohair production was 916,000 lb. from 187,000 goats. National forest area (1943) covered 10,252,000 acres; about 4,000,000 acres of heavily forested lands are privately owned; public lands unappropriated (1943) amount to 14,775,394 acres.

The State has valuable mineral resources, of which in 1942, gold (11,961 ounces), silver (676,170 ounces), copper (1943) (78,804 short tons), coal (1,696,000 short tons), lead (4,608 short tons), and zinc (46,461 short tons) were the most important. Petroleum output, 1942, was 31,544,000 barrels; natural gas (1941), 64,655 million cubic feet, and natural gasoline or petrol (1942), 71,095,000 gallons. Mining of molybdenum is important, also potassium salts (2,270,000 tons of ore mined in 1941) and fluorspar. The value of the total mineral output in 1941 was 97,849,000 dollars.

In 1939, 272 manufacturing establishments employed 3,334 wage-earners, who received 2,912,993 dollars; cost of materials, containers, fuel and power used was 16,411,877 dollars; output was valued at 25,123,641 dollars.

In 1941, there were 2,692 miles of steam railway; 52.4 per cent. of the communities are served by railways. The State maintains 10,237 miles of highway, 3,884 miles surfaced.

On June 30, 1943, 22 national banks had deposits of 98,026,000 dollars, loans of 16,307,000 dollars, investments of 49,678,000 dollars; 19 State banks and trust companies had deposits of 32,775,000 dollars, loans of 5,550,000 dollars, investments of 14,560,000 dollars.

### NEW YORK STATE.

**Constitution and Government.**—From 1609 to 1664, the region now called New York was claimed by the Dutch; then it came under the rule of the English, who governed the country till the outbreak of the War of Independence. On April 20, 1777, New York adopted a Constitution which

transformed the colony into an independent State, and paved the way for its entrance into the Union as one of the 13 original States on its ratification, on July 26, 1788, of the Constitution of the United States.

The question whether there shall be a Convention to revise the Constitution has to be submitted to the people every 20 years, beginning with 1916, 'and also at such times as the Legislature may by law provide.' The voters on November 8, 1938, approved 16 amendments to the Constitution (including a new Bill of Rights) submitted to them by the Constitutional Convention; they rejected 41 proposed amendments. The Senate consists of 56 members elected every two years, and the Assembly of 150 members elected every two years. The State capital is Albany. The right of suffrage resides in every adult who has been a citizen for 90 days, and has the usual residential qualifications. Voters in the presidential elections of 1944 numbered 6,311,930; Franklin D. Roosevelt polled 3,304,238 votes (52.4 per cent.). For local government the State is divided into 62 counties. New York leads in State parks and recreational areas, covering 2,942,543 acres in 1941.

The State is represented in Congress by 2 Senators and 45 Representatives.

*Governor.*—Thomas E. Dewey (R.), 1943-47 (25,000 dollars).

*Secretary of State.*—Thomas J. Curran (R.).

Cities are in 3 classes, the first class having each 175,000 or more inhabitants and the third under 50,000. Each is incorporated by charter, under special legislation. The government of New York City is vested in the Mayor, elected for 4 years, and a City Council whose president is elected for 4 years and members for 2 years. The council has 26 members. The chief executive officer is the Mayor, who appoints all the heads of departments, except the Comptroller, who is elected by the city. Each of the five city boroughs (Bronx, Manhattan, Brooklyn, Queens and Richmond) has a president, elected for 4 years.

**Area, Population.**—Area, 49,204 square miles (1,550 square miles being water). Census population, April 1, 1940, 13,479,142, an increase of 891,076, or 7.1 per cent., since 1930. Estimated population, July 1, 1943, 12,858,203, a decrease of 4.6 per cent. since 1940. Population in four census years (with distribution by sex in 1940) was:—

| Years  | White      | Negro   | Indian | Asiatic | Total      | Per Sq. Mile |
|--------|------------|---------|--------|---------|------------|--------------|
| 1910   | 8,966,845  | 184,191 | 6,046  | 6,532   | 9,113,614  | 191.2        |
| 1920   | 10,172,027 | 198,483 | 5,503  | 9,214   | 10,385,227 | 217.9        |
| 1930   | 12,153,191 | 412,814 | 6,978  | 15,088  | 12,588,066 | 267.6        |
| 1940   | 12,879,546 | 571,221 | 8,651  | 19,724  | 13,479,142 | 281.2        |
| Male   | 6,408,192  | 261,806 | 4,487  | 16,841  | 6,690,326  | —            |
| Female | 6,471,354  | 309,915 | 4,164  | 8,383   | 6,788,816  | —            |

Of the total in 1940, 2,853,530 (21.2 per cent. of total population) were foreign-born whites, including 584,075 (20.5 per cent.) Italian, 436,028 (15.3 per cent.) Russian, 316,844 (11.1 per cent.) German, 281,080 (9.9 per cent.) Polish, 235,755 Irish, 172,347 Austrian, 123,737 Canadian and 117,370 English. Japanese numbered 2,538, of whom 766 were citizens. Of the 1940 population, 82.8 per cent. were urban; 31,424 men and 51,755 women were reported divorced. Of these 14 years or older, 3,482,885 or 57.2 per cent. were in the labour market. Number of occupied dwelling units in 1940 was 4,033,540 (of 3.68 persons).

The population of New York City, by boroughs, estimated by th

Department of Health as at July 1, 1944 (with 1940 census totals in brackets), was: Manhattan, 1,899,000 (1,889,924); Bronx, 1,450,000 (1,394,711); Brooklyn, 2,755,000 (2,698,285); Queens, 1,391,000 (1,297,634); Richmond, 182,000 (174,441); total, 7,677,000 (7,454,995).  
Census population of other cities, 1940, were:—

| Cities        | Pop.    | Cities       | Pop.   | Cities       | Pop.   |
|---------------|---------|--------------|--------|--------------|--------|
| Buffalo       | 575,901 | Poughkeepsie | 40,478 | Middletown   | 21,908 |
| Rochester     | 324,975 | White Plains | 40,327 | Olean        | 21,506 |
| Syracuse      | 205,967 | Auburn       | 35,753 | Hempstead    | 20,856 |
| Yonkers       | 142,598 | Rome         | 34,214 | Freeport     | 20,410 |
| Albany (cap.) | 130,577 | Watertown    | 33,385 | N. Tonawanda | 20,254 |
| Utica         | 100,518 | Amsterdam    | 33,329 | Ithaca       | 19,730 |
| Schenectady   | 87,549  | Newburgh     | 31,883 | Glens Falls  | 18,836 |
| Binghamton    | 78,309  | Kingston     | 28,589 | Kenmore      | 18,612 |
| Niagara Falls | 78,029  | Lockport     | 24,379 | Dunkirk      | 17,713 |
| Troy          | 70,804  | Lackawanna   | 24,058 | Endicott     | 17,702 |
| Mt. Vernon    | 67,362  | Gloversville | 23,329 | Peekskill    | 17,311 |
| New Rochelle  | 58,408  | Port Chester | 23,073 | Batavia      | 17,267 |
| Elmira        | 45,106  | Oswego       | 22,062 | Ogdensburg   | 16,346 |
| Jamestown     | 42,638  | Cohoes       | 21,955 | Watervliet   | 16,114 |

**Education.**—In 1940 there were 458,985 persons over 25 years of age, who had never attended school; of persons between the ages of 5 and 24, 2,554,162 (60.6 per cent.) were attending school. Education is compulsory between the ages of 7 and 16. In 1942-43, the children enrolled in the 5,857 school districts numbered 1,964,519 with 74,632 teachers. There were 994 public high schools and 276 private secondary schools with 711,849 pupils; 11 State teachers' colleges with 518 teachers and 5,552 students; immigration education classes enrolling 30,602 students. Total expenditure on public schools in 1942-43 was 355,232,973 dollars; on other types of State-schools 16,452,160 dollars; on universities, colleges and other higher institutions approximately 82,000,000 dollars.

There were (1942-43) 110 universities, colleges, professional and technical schools with 14,970 professors and teachers, and 213,592 students, including summer and extension courses. The State University of New York, governed by a board of 12 regents, is also the State education department.

The names, year of foundation, and numbers of instructors and students in 22 of the larger colleges and universities in 1943 were as follows:—

| Founded | Name and Place                                          | Professors, &c. | Students |
|---------|---------------------------------------------------------|-----------------|----------|
| 1836    | Alfred College, Alfred <sup>1</sup>                     | 71              | 506      |
| 1889    | Barnard College, New York <sup>2</sup>                  | 125             | 1,039    |
| 1889    | Brooklyn College, Brooklyn <sup>3</sup>                 | 342             | 7,784    |
| 1930    | Brooklyn College, Hamilton <sup>3</sup>                 | 74              | 876      |

<sup>1</sup> For men only.<sup>2</sup> For women only.<sup>3</sup> For men and women.

There are 47 other colleges and universities in the State, whose curricula are approved by the State Education Department, and 12 extra-territorial colleges, chartered by the University of the State of New York and located in Brazil, Syria, Turkey, Greece and China. There are also 175 colleges and schools for trade and professional training.

**Religion and Welfare.**—The chief churches are Roman Catholic, with 3,075,428 members in 1936, Jewish congregations (2,197,418) and Protestant Episcopal (349,528). Total membership, all denominations, 1936, was 7,150,501.

Marriage licences are issued only after both applicants have passed the Wasserman or similar blood test.

The State Department of Social Welfare administers 3 State training schools for juvenile delinquents and has supervisory authority approximately 1,500 charitable, eleemosynary, correctional and reformatory institutions, whether or not in receipt of public funds, and 138 agencies administering public assistance. Institutions supervised included: 144 homes for children, 91 child-placing agencies, 200 private homes for the aged, 93 child-caring institutions, 480 hospitals and 230 dispensaries, 62 county, city and town homes, 65 miscellaneous medical institutions, 115 temporary and special institutions for adults.

Old Age Assistance provides relief for all American citizens 65 years of age or older who have lived in the State for 5 of the 9 years immediately preceding application. Number of recipients in December, 1943, 113,112, drawing an average of 31.96 dollars per month. Aid to dependent children included 18,438 families, with 41,402 children, grants averaging 66.54 dollars per family. Assistance to blind included 2,715 persons, averaging 34.07 dollars.

**Finance.**—The State receipts and expenditures for the year ending March 31, 1944, were as follows:—

|                                | Dollars     |
|--------------------------------|-------------|
| Balance in hand, April 1, 1943 | 68,962,417  |
| Receipts, 1943-44              | 453,150,539 |
| Total                          | 522,112,956 |
| Disbursements, 1943-44         | 359,052,275 |
| Balance, April 1, 1944         | 163,060,681 |

The assessed valuation in 1944 of taxable real property in New York City was 16,011,224,055 dollars, distributed as follows: lands and buildings,

13,927,495,355 dollars; real estate of corporations, 1,378,592,665 dollars; special franchises, 765,196,036 dollars. The City of New York, June 30, 1943, had a gross funded debt of 2,962,704,129 dollars.

**Production, Industry, Commerce.**—New York has large agricultural interests. In 1940 (census), it had 153,238 farms, with a total area of 17,170,337 acres—56 per cent. of total land area of the State. About 9,581,126 acres of this were in woods and pastures, and 6,581,296 acres in crops harvested, including 401,024 acres in orchards and vineyards; total value of land and buildings, 947,073,893 dollars. Cash income, 1943, from crops, 185,773,000 dollars; from live-stock, 410,881,000 dollars; from Government payments, 7,533,000 dollars.

The agriculture of New York is dominated by the demands of the large urban population. The State is noted for the production of fruit and vegetables. Dairying is, however, the leading type of farming. In 1943, the production of milk was 7,784,000,000 pounds. Leads in production of cheese; 1939, 82,700,000 lb. In 1943, the crops comprised maize, 22,715,000 bushels; wheat, 4,482,000 bushels; oats, 9,724,000 bushels; barley, 1,650,000 bushels; hay, 6,185,000 tons; apples, 13,602,000 bushels; peaches, 95,000 bushels; pears, 528,000 bushels; cherries, 12,000 tons; grapes, 39,200 tons; cabbage (1941), 332,300 tons (leading all States); onions, 2,500,000 sacks (100 lb.); potatoes, 29,678,000 bushels; maple sugar, 124,000 lb., and maple syrup, 839,000 gallons. The farm animals on January 1, 1944, comprised approximately 267,000 horses, 4,000 mules, 1,441,000 milch cows, 2,162,000 all cattle, 341,000 sheep, 420,000 swine, and 16,678,000 chickens; on that date cattle, horses, sheep and swine had an inventory value of 299,856,000 dollars. The wool-clip in 1943 yielded 2,016,000 pounds of wool from 284,000 sheep.

Other productive industries are mining and quarrying. In 1941, gypsum, 1,080,320 tons; talc (1940), 99,380 short tons; silver, 37,734 ounces; aluminum, emery, abrasive garnet and sand-lime brick. In 1942, yield of zinc was 45,807 short tons; lead, 2,434 short tons; salt, 2,722,670 short tons; Portland cement, 11,067,000 barrels; crude petroleum, 5,421,000 barrels; natural gas (1941), 10,456 million cubic feet; coke, 5,180,000 net tons. Of natural gas products include pyrite, granite, trap rock, slate, marble, limestone and lime. The value of mineral output in 1941 was 91,583,000 dollars.

In 1939, the manufacturing establishments numbered 34,514, employing 937,853 wage-earners who earned 1,163,806,520 dollars, utilised materials, containers, fuel and power valued at 3,783,904,755 dollars, and turned out products valued at 7,184,400,147 dollars. Leading industries were women's clothing, with output valued at 599,999,155 dollars; printing and publishing, newspapers and periodicals, books and commercial printing, 552,664,488 dollars; men's clothing, 250,021,538 dollars; bread and other bakery products, 204,500,877 dollars.

In 1940, there were 2,250 publications, etc., of which 164 dailies, 824 weekly, 41 semi-weekly, 5 tri-weekly, 206 monthly, 40 semi-monthly, 23 fortnightly, were published in English; of the foreign languages there were 24 in Spanish, 25 in Italian, 11 in German, 13 in Yiddish, 5 in Hungarian, 10 in Polish, 6 in French, 4 in Czech-Slovak, 2 in Arabic, 4 in Greek, 4 in Swedish, 1 in Portuguese, 4 in Yugo-Slovak, 2 in Chinese, 2 in Finnish, 1 in Hebrew, 2 in Japanese, 1 in Welsh, 2 in Armenian, 1 in Danish-Norwegian, 2 in Lithuanian, 1 in Estonian, 4 in Russian, 1 in Ukrainian, 1 in Ladino and 4 in Roumanian.

The port of New York is the leading shipping port of the world. The imports of merchandise for year ending June 30, 1941, amounted to 1,324,345,000 dollars; exports, to 2,049,989,000 dollars.

In New York State (outside of Greater New York) there were on December 31, 1940, 7,781 miles of steam railways and 826 miles of electric railways; 51.4 per cent. of the communities were served by railways in 1939. The canals of the State, combined in 1918 in what is called the Improved Canal System, have a length of 525 miles, of which the Erie or 'Barge' canal has 339 miles. There are 70,334 miles of town and country roads, of which 46,669 miles are improved. Of the 14,136 miles embraced in the State highway system, 12,779 are improved.

On June 30, 1944, New York had 407 national banks with deposits of 11,721,883,000 dollars, loans of 2,376,239,000 dollars and investments of 8,028,146,000 dollars; 430 State banks had deposits 25,882,773,585 dollars, loans of 6,766,364,135 dollars and investments of 16,985,733,259 dollars.

## NORTH CAROLINA.

**Government.**—North Carolina, first settled in 1650, was one of the thirteen original States of the Union. The General Assembly consists of a Senate of 50 members, and a House of Representatives of 120 members, elected for two years. All registered citizens with the usual residential qualifications have a vote; registration is limited to those able to read any section of the Constitution in the English language for a substantial disfranchisement. Voters in the presidential election of 1944 numbered 789,554; Franklin D. Roosevelt polled 66.8 per cent.

The State is represented in Congress by 2 Senators and 12 Representatives. North Carolina is divided into 100 counties; the capital is Raleigh.

**Governor.**—R. Gregg Cherry (D.), 1945-49 (11,100 dollars).

**Secretary of State.**—Thad Eure (D.).

**Area, Population, Education.**—Area, 52,712 square miles, of which 3,570 square miles are inland water. Population at the census

April 1, 1940, 3,571,623, an increase of 401,347, or 12.6 per cent., since 1930. Estimated population, July 1, 1943, 3,637,975, an increase of 1.9 per cent. since 1940.

Population in four census years (with distribution by sex in 1940):—

| Years          | White     | Negro   | Indian | Asiatic | Total     | Per Sq. Mile |
|----------------|-----------|---------|--------|---------|-----------|--------------|
| 1910           | 1,500,511 | 697,843 | 7,851  | 82      | 2,206,287 | 45.8         |
| 1920           | 1,783,779 | 783,407 | 11,824 | 113     | 2,556,123 | 52.5         |
| 1930           | 2,234,958 | 918,647 | 16,579 | 92      | 3,170,276 | 64.5         |
| 1940           | 2,567,635 | 981,298 | 22,546 | 144     | 3,571,623 | 73.7         |
| Male . . . .   | 1,281,762 | 479,816 | 11,800 | 112     | 1,773,940 | —            |
| Female . . . . | 1,285,873 | 501,482 | 11,246 | 32      | 1,796,683 | —            |

Of the total in 1940, 9,046 (representing 0.2 per cent. of the total population) were white foreign-born, 1,114 (12.3 per cent.) being Greek, 1,088 (12.0 per cent.) English, 1,005 Canadian and 916 German. Urban population (1940) formed 27.3 per cent., and the Negro population 27.4 per cent. of the whole; 31.4 per cent. (854,910 males and 266,700 females) were gainfully employed; families numbered 794,860 (of 4.5 persons); 6,366 men and 11,064 women were reported divorced. Cities (with population in 1940) are: Charlotte, 100,899; Winston-Salem, 79,815; Durham, 60,195; Greensboro, 59,819; Asheville, 51,310; Raleigh (capital), 46,897; High Point, 38,495; Wilmington, 33,407.

In 1942-43, the school population, between ages of 6 and 21, numbered 1,102,574, of whom 753,140 were whites and 346,110 Negroes; of this number 783,140 (68.3 per cent.) were attending school. School attendance is compulsory between 7 and 13, inclusive. Separate schools are provided for white, coloured and Indian children. In 1942-43 the 3,551 public elementary schools (both white and coloured) had 18,367 teachers and 656,265 enrolled pupils. There were 1,065 public high schools with 7,986 teachers and pupils. There are 7 State-supported teachers' colleges (3 white, 201,782 pupils), and 5 four-year colleges (3 white and 2 negro). Total expenditure for elementary and high schools, 1942-43, 37,703,709 dollars.

Higher instruction is given in 7 State and 39 private and denominational institutions, including the University of North Carolina with three units, the University proper at Chapel Hill (founded in 1795) with (1943-44) 311 professors and 5,335 students; the State College of Agriculture and Engineering at Raleigh (founded in 1889) with 187 professors and 6,520 pupils; and the College for Women (Greensboro) with 165 professors and 2,519 students.

**Religion and Welfare.**—Leading denominations are the Southern Baptists (389,746 members in 1936), Negro Baptists (219,893) and Southern Methodists (207,875). Total, all denominations, 1,274,722.

Marriage licences are issued only after both applicants have passed the Wasserman or similar blood test. Old Age Assistance was being drawn in October, 1944, by 33,090 persons receiving an average of 11.50 dollars per month. Aid to dependent children was being drawn by 6,250 families, averaging 22.00 dollars per month.

**Finance.**—The State had receipts and disbursements in the year ending June 30, 1944, as follows:—

were gainfully employed; occupied dwelling units numbered 152,043 (of 422 persons). In the 1940 census 1,793 men and 1,988 women were reported divorced. The largest cities are Fargo with population, 1940, of 32,580; Grand Forks, 20,228; Minot, 16,577, and Bismarck, 15,496.

**Education and Welfare.**—In 1930, illiterates 10 years of age or older numbered 7,814 (1.5 per cent. of that age group), of whom 4,649 were foreign-born whites. In 1943, there was a school population between the ages of 6 and 21 of 170,996, of which 126,354, or 73.9 per cent., were attending school. School attendance is compulsory between the ages of 7 and 15, or 1943, 3,928 public elementary schools had 96,226 pupils and 6,976 teachers; 477 high schools had 30,128 pupils. The State University, founded in 1883, had (1943) 98 teachers and 1,812 students; the State Agricultural College, 116 teachers and 1,542 students; Jamestown College, 33 teachers, 500 pupils. Expenditure on education in 1943, 10,224,180 dollars. Old Age Assistance is provided for all needy persons 65 years of age or older (approximately 25 per cent. of those 65 or older) who have resided for ten years in the United States, and who have lived in the State five of the nine years preceding the application. In October, 1944, 8,829 persons were drawing an average of 32.32 dollars per month.

The State penitentiary in 1944 held 197 men and 3 women.

The leading religious denominations are the Roman Catholic, with 119,360 members in 1936, Norwegian Lutherans, with 74,185, and Lutherans-Synod of Missouri, with 18,330. Total, all denominations, 315,659.

Marriage licences are issued only after both applicants have passed the Wasserman or similar blood test.

**Finance.**—The revenue and expenditure for the year ending June 30, 1944, were:—

|                                | Dollars    |
|--------------------------------|------------|
| Cash in hand, July 1, 1943     | 22,254,885 |
| Receipts, 1943-44              | 41,821,499 |
| Total                          | 64,076,384 |
| Expenditure, 1943-44           | 30,698,975 |
| Balance in hand, June 30, 1944 | 33,377,409 |

Bonded debt on June 30, 1944, 19,811,350 dollars; assessed valuation of real, personal and public utility property in 1944, 908,972,104 dollars.

**Production and Industry.**—Agriculture is the chief pursuit of the North Dakota population. In 1940 census, there were 61,920 farms, with an area of 38,773,714 acres, of which 13,773,109 acres were crop land; value of farm lands and buildings, 490,197,358 dollars. Cash income, 1943, from crops, 256,872,000 dollars; from live-stock, 156,119,000 dollars; from Government payments, 24,645,000 dollars. The area for which irrigation works were available, 1940, covered 36,522 acres. North Dakota leads usually in the production of barley (63,648,000 bushels in 1943), of spring wheat (160,400,000 bushels), of rye (4,014,000 bushels), and of durum wheat (32,670,000 bushels). Other important products are flax seed (15,052,000 bushels); potatoes (22,100,000 bushels); wild hay (1,925,000 tons); oats (70,924,000 bushels); and maize. The State has also an active live-stock industry, chiefly horse and cattle raising. On January 1, 1944, the farm animals were: 314,000 horses, 608,000 milch cows, 1,834,000 all cattle, 1,058,000 sheep, and 1,101,000 swine. The wool-clip yielded

(1943), 8,406,000 pounds of wool from 989,000 sheep. National forest area, 1942, 764,425 acres.

The mineral resources of North Dakota consist chiefly of lignite coal (2,500,202 short tons produced in 1943 and valued at 3,752,000 dollars). Total value of mineral output, 1941, 3,328,000 dollars.

In 1939, 351 manufacturing establishments employed 2,809 wage-earners, who earned 2,901,231 dollars, using materials, containers, fuel and power costing 53,099,249 dollars, with output valued at 44,438,775 dollars.

In 1943, there were 5,272 miles of steam railway in the State; 81.8 per cent. of the communities are served by railways. This is the highest percentage of all the States. The State Highway Department maintains 6,588 miles of highway, of which 6,382 miles are graded and surfaced.

On June 30, 1944, 42 national banks had deposits of 140,087,000 dollars, loans of 14,828,000 dollars, and investments of 94,905,000 dollars; 113 State banks and trust companies had deposits of 185,136,000 dollars, loans of 15,760,000 dollars, and investments of 127,243,000 dollars.

## OHIO.

**Government.**—Ohio, first settled in 1788, was admitted into the Union on February 19, 1803. The question of a general revision of the Constitution drafted by an elected Convention is submitted to the people every 20 years.

Beginning with the biennium of 1943-44, the Legislature consists of a Senate of 33 members and a House of Representatives of 136 members, both Houses being elected for two years. Qualified as electors are (with certain necessary exceptions) all citizens 21 years of age who have the usual residential qualifications. Voters in the presidential elections of 1944 were 3,153,056; Franklin D. Roosevelt polled 49.8 per cent. Ohio is divided into 88 counties; the capital (since 1816) is Columbus. Ohio sends to Congress two Senators and 23 Representatives.

**Governor.**—Frank J. Lausche (D.), 1945-47 (10,000 dollars).  
**Secretary of State.**—Edward J. Hummel (R.).

**Area and Population.**—Area, 41,222 square miles, of which 100 square miles are inland water. Census population on April 1, 1940, 6,907,612, an increase of 260,915, or 3.9 per cent. over that of 1930. Estimated population, July 1, 1943, 6,886,316, a decrease of 0.3 per cent. since 1940. Population at four census years (with distribution by sex for 1940) was:—

| Years  | White     | Negro   | Indian | Asiatic | Total     | Per Sq. Mile |
|--------|-----------|---------|--------|---------|-----------|--------------|
| 1910   | 4,654,897 | 111,452 | 127    | 645     | 4,767,121 | 117.0        |
| 1920   | 5,571,893 | 186,187 | 151    | 1,163   | 5,759,394 | 141.4        |
| 1930   | 6,335,173 | 309,304 | 435    | 1,785   | 6,646,697 | 161.6        |

| Balance, June 30, 1944 . . . . . | 70,124,827  |

On June 30, 1943, the gross bonded debt amounted to 117,995,500 dollars; sinking fund, 21,829,052 dollars. The assessed value of personal and real property in 1943 was 2,760,261,628 dollars.

**Production and Industry.**—The chief occupation of the inhabitants of the State is agriculture. In 1940, the U.S. census showed 278,276 farms, including both owners and tenants. Total farm area, 18,845,338 acres; total value of land and buildings, 786,708,125 dollars. Cash income from farm crops, 1943, 400,231,000 dollars; from live-stock, 100,149,000 dollars; from Government payments, 14,250,000 dollars. Maize, produced in every county, is the principal crop; output, 1943, 51,018,000 bushels. The chief money crops are cotton, tobacco and peanuts. Cultivation of cotton (1943) on 846,000 acres produced 596,000 bales. North Carolina leads, usually, in the production of fine-cured tobacco (1943, 542,200,000 pounds), and of sweet potatoes (7,760,000 bushels). Output of peaches, 252,000 bushels; potatoes, 12,099,000 bushels; sorgho syrup, 732,000 gallons; peanuts, 308,040,000 pounds. On January 1, 1944, the farm animals were 85,000 horses, 295,000 mules, 752,000 all cattle, 403,000 milch cows, 56,000 sheep, and 1,539,000 swine. The area of national forest lands (1944) was 993,138 acres.

Minerals in great variety are found in the State. North Carolina since 1900 has furnished about 60 per cent. of the country's supply of mica (output, 1941, 1,000,000 pounds of sheet and punch mica and 12,000 tons of ground mica), feldspar (100,000 tons in 1941), and bromine from sea water. Other products are asbestos, kaolin, silica and abrasive garnet and talc (39,206 short tons in 1940). Some nickel and rare minerals such as olivine, vermiculite, monazite, zircon, columbite, allanite and wolframite are also found. Mineral products, 1941, were valued at 21,112,732 dollars.

North Carolina in 1940 had 3,232 industrial establishments, employing 274,174 wage earners, who received 182,032,202 dollars, using materials, containers, fuel and power costing 835,430,889 dollars, and turning out products valued at 1,932,008,527 dollars. The leading industries, measured by the value of their products in 1940 were: manufacture of cigarettes, 650,020,900 dollars (15,375 workers); textile goods, 814,895,291 dollars (182,936 workers); furniture manufacture, 89,434,696 dollars (20,006 workers); food products, 98,361,217 dollars (6,514 workers). In the year ending July 31, 1943, 5,716,000 active cotton spindles consumed 2,854,000 bales of cotton.

The State in 1944 contained 4,548 miles of steam railway, serving (1939) 59.6 per cent. of the communities; 1,096 miles of city bus routes; 16,846 miles of passenger vehicle routes, and 8,070 miles of freight vehicle routes. Electric street railways have been eliminated. The State maintains 11,338 miles of State highways, of which 9,902 miles are hard surfaced, and 49,123 miles of county highways (2,499 miles surfaced).

North Carolina on June 30, 1944, had 45 national banks with deposits of 302,095,000 dollars, loans of 50,419,000 dollars, investments of 163,879,000 dollars; 182 State banks and trust companies had deposits of 879,193,000 dollars, loans of 176,450,000 dollars and investments of 516,256,000 dollars.

### NORTH DAKOTA.

**Government.**—North Dakota, first settled around 1800, was admitted into the Union on November 2, 1889; previously it had formed part of the Dakota Territory. The Legislative Assembly consists of a Senate of 49 members elected for four years, and a House of Representatives of 118 members elected for two years. Qualified electors are (with necessary exceptions) all citizens and civilised Indians. Voters in the presidential election of 1944 were 220,171; Franklin D. Roosevelt polled 45.5 per cent. The State has 53 organised counties; the capital is Bismarck (census population 15,496 in 1940). The State sends to Congress two Senators and two Representatives.

**Governor.**—Fred G. Aandahl (R.), 1945-47 (4,000 dollars).

**Secretary of State.**—Thomas Hall (D.).

**Area, Population.**—Area, 70,665 square miles, 611 square miles being water. The Federal Office of Indian Affairs administered (1942) 1,043,700 acres, of which 46,874 acres were assigned to tribes. Population 1,043,700 acres, showing a decrease of 28,910, or 5.7 per cent., at the 1940 census was 641,935, showing a decrease of 28,910, or 5.7 per cent., since 1930. Estimated population, July 1, 1943, 542,652, showing a further decrease, due to migration towards war work, of 15.5 per cent. since 1940.

Population at 4 Federal censuses (with distribution by sex in 1940) was:—

| Years  | White   | Negro | Indian | Asiatic | Total   | Per Sq. Mile |
|--------|---------|-------|--------|---------|---------|--------------|
| 1910   | 569,855 | 617   | 6,486  | 98      | 577,056 | 8.2          |
| 1920   | 689,954 | 467   | 6,254  | 197     | 646,872 | 8.2          |
| 1930   | 671,551 | 377   | 8,337  | 330     | 680,645 | 9.7          |
| 1940   | 631,464 | 301   | 10,114 | 156     | 641,935 | 9.2          |
| Male   | 330,047 | 136   | 3,102  | 125     | 333,402 | —            |
| Female | 301,417 | 78    | 5,012  | 31      | 306,533 | —            |

The number of white foreign-born in 1940 was 74,272 (11.5 per cent. of the total population), of whom 21,637 (43.2 per cent.) were Norwegian, 17,351 (23.0 per cent.) Russian, 8,721 Canadian, and 6,876 German. Urban population formed 20.6 per cent. and the Negro population less than 0.1 per cent. of the whole; 31.1 per cent. (166,741 males and 33,655 females)

## OKLAHOMA.

**Government.**—The Territory of Oklahoma was organized in 1890 from the western part of Indian Territory and was thrown open to white settlers. In 1889 its boundaries were extended and on November 16, 1907, it was combined with the Indian Territory and admitted as a State. The constitution provides for the initiative and the referendum.

The Legislature consists of a Senate of 44 members who are elected for 4 years, and a House of Representatives elected for 2 years, and consisting of from 114 to 120 members. Electors are (with necessary exceptions) all citizens with the usual residential qualifications. Indians are qualified as voters. Voters in the presidential elections of 1944, 720,973; Franklin D. Roosevelt polled 55.7 per cent. The State has 77 counties; the capital is Oklahoma City.

The State is represented in Congress by 2 Senators and 8 Representatives.

*Governor.*—Robert S. Kerr (D.), 1943-47 (6,500 dollars).

*Secretary of State.*—Frank C. Carter (D.).

**Area and Population.**—Area, 69,919 square miles, of which 636 square miles are water. Census population on April 1, 1940, 2,336,434, a decrease of 59,606, or 2.5 per cent., since 1930. Estimated population, July 1, 1943, 2,168,066, a decrease of 7.2 per cent. since 1940. The population at 4 Federal censuses (with distribution by sex in 1940) was:—

| Years  | White     | Negro   | Indian | Asiatic | Total     | Per sq. mile |
|--------|-----------|---------|--------|---------|-----------|--------------|
| 1910   | 1,444,581 | 137,612 | 74,825 | 187     | 1,657,155 | 23.9         |
| 1920   | 1,821,194 | 149,408 | 57,337 | 344     | 2,028,283 | 29.2         |
| 1930   | 2,130,778 | 172,198 | 92,725 | 339     | 2,396,040 | 34.6         |
| 1940   | 2,104,223 | 168,849 | 63,125 | 232     | 2,336,434 | 33.7         |
| Male   | 1,066,258 | 83,465  | 31,998 | 173     | 1,181,892 | —            |
| Female | 1,037,970 | 85,384  | 31,129 | 59      | 1,154,542 | —            |

In 1940, 20,359 were foreign-born whites (0.8 per cent. of the total population), of whom 4,032 (20.0 per cent.) were Germans, 2,626 Russians, 1,654 Canadians and 1,323 English. Japanese numbered 57, of whom 41 were citizens. Indians occupy 2,860,591 acres administered by the Federal Office of Indian Affairs; 70,383 acres have been allotted to tribes. Of the total population, 37.6 per cent. were urban, 7.2 per cent. Negro, and 28.2 per cent. (530,123 males and 128,616 females) were gainfully employed,

occupied dwelling units numbered 610,424 (of 3.8 persons); 15,188 men and 20,297 women were reported divorced.

The most important cities are Oklahoma City (population in 1940, 204,424), Tulsa (142,157), Muskogee (32,332), Enid (28,081), Shawnee (22,053), Lawton (18,055), Ardmore (16,886), Ponca City (16,794), Bartlesville (16,267) and Okmulgee (16,051).

**Religion, Education and Welfare.**—The chief religious bodies are Southern Baptists (132,407 members in 1936); Southern Methodists (65,948); Negro Baptists (57,265); and Disciples of Christ (51,772). Total, all denominations, 587,425. Oklahoma is one of the few States still adhering to complete Prohibition.

In 1930, illiterates 10 years of age or older numbered 51,102 (2.8 per cent. of that age group), of whom 27,796 were native whites and 12,560 were Negroes. In 1940, of persons between the ages of 5 and 24, 555,998 (61.5 per cent.) were attending school. The State has a public school system embracing 8-year elementary and 4-year high public schools, 6 teachers' colleges, and 14 colleges for superior instruction. Separate schools have to be provided for whites and Negroes, all children not Negroes being classed as white. In 1941-42 there were 4,518 public elementary school districts with 528,293 pupils and 19,391 teachers; 848 accredited high schools and 75 junior high schools with 123,603 enrolled pupils. Total expenditure on pre-collegiate education in 1941-42, 32,015,748 dollars. The State University (founded at Norman in 1892) had, in 1943, 296 professors and 4,865 students; the Agricultural and Mechanical College (founded in 1891 at Stillwater) had 384 professors and 5,040 students.

The State's penal and reformatory system on June 30, 1943, held 3,474 men and women. Old Age Assistance, in November, 1943, was being drawn by 77,109 persons, receiving an average of 24.72 dollars per month.

**Finance.**—Income and expenditure for the year ending June 30, 1943:—

|                         | Dollars     |
|-------------------------|-------------|
| Balance, June 30, 1942. | 24,807,382  |
| Receipts, 1942-43.      | 82,750,956  |
| Total                   | 107,558,338 |
| Disbursements, 1942-43  | 72,715,377  |
| Balance, July 1, 1943   | 34,842,961  |

On June 30, 1943, the State debt amounted to 29,072,681 dollars. The assessed value of real and of personal property (1943) was 991,978,010 dollars; of public utility property, 310,595,490 dollars.

**Production and Industry.**—Oklahoma is mainly agricultural. In 1940, it had 179,687 farms with a total area of 44,341,120 acres (12,766,219 acres in crops); owners and part owners operated 81,086 and tenants and managers operated 98,601 farms. Total value of farm lands and buildings was 831,140,748 dollars. Oklahoma leads in production of broom corn (8,800 tons in 1943). The yield of maize in 1943 was 23,350,000 bushels; of wheat, 31,711,000 bushels; oats, 22,914,000 bushels; grain sorghums, 5,355,000 bushels. The cotton crop for 1943 on 1,500,000 acres amounted to 380,000 bales. Cash income from crops, 1943, was 123,549,000 dollars: from live-stock, 260,932,000 dollars; from Government payments, 15,529,000 dollars.

On January 1, 1944, the stock comprised 921,000 milch cows, 3,154,000 all cattle, 1,465,000 hogs, 330,000 sheep, 351,000 horses, and 117,000 mules. The wool-clip in 1943 was 3,194,000 pounds of wool from 363,000 sheep. National forest lands (1943) total 156,635 acres.

With 1,698,611 miles of common carrier pipe lines valued at 117,560,450 dollars and 24,500 miles of oil pipe-lines valued at 74,426,476 dollars on July 1, 1941, Oklahoma leads in pipe-line mileage. In 1942-43, 130,784,069 barrels of crude petroleum were produced; 147,796,000 gallons of natural gasoline; 273,108 million cubic feet of natural gas; coal (2,856,422 short tons). In 1942, 22,350 short tons of lead, 147,576 short tons of zinc and 255,730 short tons of gypsum (1943) were also produced. The total mineral output in 1941 was valued at 263,764,000 dollars.

There are few manufacturing industries. Petroleum refining is the chief industry, with 22 refineries operating (1943); value of output, 1938, was 106,666,837 dollars. In 1939, the State had a total of 1,606 industrial establishments, employing 28,113 wage-earners who earned 30,465,185 dollars, the cost of materials, containers, fuel and power used being 209,050,080 dollars, and the value of the output 312,168,499 dollars.

In 1943, Oklahoma had 5,832 miles of steam railway besides 189 miles of electric railway; 59.4 per cent. of the communities are served by railways in 1939. The State maintains 9,055 miles of highway.

On June 30, 1943, Oklahoma had 202 national banks with deposits of 622,955,000 dollars, loans of 137,388,000 dollars, investments of 348,652,000 dollars; 183 State banks and trust companies had deposits of 119,092,000 dollars, loans of 29,004,000 dollars, investments of 48,495,000 dollars.

## OREGON.

**Government.**—Oregon, first settled about 1830 by French Canadian employees of the Hudson's Bay Company and organized as a Territory in 1848, was admitted into the Union on February 14, 1859. The Legislative Assembly consists of a Senate of 30 members, chosen for four years (half their number retiring every two years), and a House of 60 Representatives, elected for two years. The Constitution was amended in 1902 to reserve to the voters the rights of the initiative and referendum. In November, 1912, suffrage was extended to women. Voters in the presidential elections of 1944 were 430,147; Franklin D. Roosevelt polled 51.8 per cent. There are 36 counties in the State; the capital is Salem.

The State sends to Congress two Senators and four Representatives.

**Governor.**—Earl Snell (R.), 1943-47 (7,500 dollars).

**Secretary of State.**—Robert S. Farrell, Jr. (R.).

**Area, Population, Education.**—Area, 96,981 square miles, 631 square miles being inland water. Public lands, unappropriated on June 30, 1942, totalled 13,258,006 acres. Census population, July 1, 1940, 1,089,684, an increase of 135,898, or 14.2 per cent., since 1930. Estimated population,

July 1, 1943, 1,235,432, an increase of 13.4 per cent. since 1940. Population at 4 Federal censuses (with distribution by sex for 1940) was:—

| Years            | White     | Negro | Indian | Asiatic | Total     | Per Sq. Mile |
|------------------|-----------|-------|--------|---------|-----------|--------------|
| 1910             | 655,090   | 1,492 | 5,090  | 11,093  | 672,765   | 7.0          |
| 1920             | 789,146   | 2,144 | 4,500  | 7,509   | 798,299   | 8.2          |
| 1930             | 938,597   | 2,234 | 4,776  | 8,179   | 953,786   | 9.9          |
| 1940             | 1,075,781 | 2,565 | 4,694  | 9,794   | 1,089,844 | 11.3         |
| Male . . . . .   | 554,719   | 1,384 | 2,831  | 4,255   | 562,689   | —            |
| Female . . . . . | 621,012   | 1,181 | 2,263  | 2,589   | 626,996   | —            |

The foreign-born whites in 1940 numbered 87,639, of whom 16,492 were Canadian, 9,888 German, 8,498 Swedish, 6,385 English and 6,129 Norwegian. Japanese were 4,071 (2,454 citizens). Of the total population in 1940, 48.8 per cent. were urban, 1.9 per cent. Negro, and 41.5 per cent. (355,766 males and 97,618 females) were gainfully employed; there were 337,731 occupied dwelling units (with 3.2 persons); 12,504 men and 11,868 women were reported divorced. The U.S. Office of Indian Affairs administers 1,734,070 acres, of which 1,324,938 acres have been allotted to tribes.

The largest towns, according to the 1940 census, are Portland, with a population of 305,394; Salem, 30,908; Eugene, 20,838; Klamath Falls, 16,497; Medford, 11,281; Astoria, 10,389.

School attendance is compulsory from 8 to 16 years of age if the eighth year of school has not been completed; those between the ages of 16 and 18 years, if legally employed, must attend part-time or evening schools unless they have already acquired the ordinary branches of learning encompassed in the first eight years of school. On June 30, 1943, the 1,453 public elementary schools and 249 four-year and standard senior high schools had 7,905 teachers and 220,957 pupils; the three teachers' training colleges had (1943-44) 71 teachers and 579 students. Total expenditure (1942-43) on elementary and secondary education was 18,050,918 dollars, excluding debt service and capital outlay.

The Oregon State College at Corvallis was adopted as the Agricultural College of the State in 1870. In 1943-44 the instructional staff numbered 247 and the student enrolment 2,193. The University of Oregon, organized at Eugene in 1876, has (1943-44) 223 professors and 2,002 full-term students. The Medical School at Portland in 1943-44 had 238 paid and volunteer instructors, 308 students of medicine and 347 students of nursing.

**Religion and Welfare.**—The chief religious bodies are Catholic (66,309 members in 1936), Methodist (28,598), Disciples of Christ (20,431), and Presbyterian (10,933). Total membership, all denominations, 249,275. Marriage licences are granted only after both applicants have passed the Wasserman or some similar blood test.

Old Age Assistance (maximum 40 dollars a month) is provided under the Federal Social Security Act for all needy persons 65 years or older who have been residents of the State for 5 years or more within the nine years immediately preceding application and for at least one year immediately preceding the date of application. On August 31, 1944, 19,572 aged persons were drawing an average of 34.11 dollars per month. A system of unemployment benefit payments, financed solely by employers, with administrative expense borne by Federal Government, started January 2, 1938, covers approximately 10,000 employers and 600,000 employees. By

August 30, 1944, about 75,450,000 dollars had been collected and 18,750,000 dollars paid out in benefits, leaving a balance of 56,700,000 dollars in the trust fund reserve. Benefits range from 10 dollars to 15 dollars weekly and from 83 dollars to 240 dollars in a calendar year.

The Oregon State penitentiary on October 10, 1944, held 843 men and 11 women.

**Finance.**—The receipts and disbursements of the General Fund of the State, for the calendar year ending December 31, 1943, were:—

|                                    | Dollars    |
|------------------------------------|------------|
| Balance, January 1, 1943 . . . . . | 13,266,888 |
| Receipts, 1943 . . . . .           | 74,943,706 |
| Total . . . . .                    | 88,210,594 |
| Disbursements, 1943 . . . . .      | 71,957,727 |
| Balance, January 1, 1944 . . . . . | 16,252,867 |

On June 30, 1944, net long-term debt was 5,602,298 dollars; assessed value of real and personal property (January 1, 1944) was 1,020,859,751 dollars.

**Production and Industry.**—Oregon, which has an area of 61,664,000 acres, is divided by the Cascade Range into two distinct zones as to climate. West of the Cascade Range there is a good rainfall and almost every variety of crop common to the temperate zone is grown; east of the Range irrigation is necessary and stock raising is the principal industry. In 1940, 19,389 farms, covering 1,049,176 acres, were under irrigation. The total forested area, June 30, 1943, was 29,661,000 acres, the ownership of which is as follows: Private, 11,661,000 acres; United States forest service, 12,302,000 acres; reverted old growth and cordwood lands, 2,162,000 acres; Indian lands, 1,199,000 acres; other Federal lands, including national parks and unappropriated public domain lands, 349,000 acres; State, 886,000 acres, and county and municipalities, 1,593,000 acres.

In 1940 there were 61,829 farms with an acreage of 17,988,307, including 5,255,467 acres in crops. Cash income from crops, 1943, 132,122,000 dollars; from livestock, 128,995,600 dollars; from Government payments, 5,613,000 dollars. The fruit and nut crops include apples, cherries, peaches, pears, prunes, walnuts and filberts. Farm-raised fur and game and honey are among the 'specialty' animal products grown commercially. Horses on January 1, 1944, numbered 117,000; milch cows, 284,000; all cattle, 1,182,000; sheep, 1,217,000; swine, 359,000. Range land for grazing cattle and sheep, 39,000,000 acres. In 1943 the wool-clip yielded 10,471,000 pounds from 1,277,000 sheep; mohair clip, 424,000 pounds from 106,000 goats. The salmon, sturgeon, halibut and oyster fisheries are abundant. In 1943 the salmon caught in the Columbia river (of which 85 per cent. was canned on the Oregon side) totalled 167,660 cases.

Oregon's mineral resources include gold, 46,233 fine ounces in 1942; silver, 87,376 fine ounces; copper, 208,000 pounds; lead, 46,000 pounds; mercury (1943), 4,651 flasks. Value of mineral products, 1942, was 12,000,000 dollars.

In 1941 Oregon had 1,748 industrial establishments employing 78,392 wage-earners who received in wages 114,764,832 dollars; the cost of the materials, containers, fuel and power used was 116,545,106 dollars, and the value of the product 367,726,741 dollars.

The Dalles and Celilo Canal, completed in 1915, opens the Columbia and Snake rivers to navigation to a length of 570 miles from the ocean. Large ocean-going vessels can reach Portland, 108 miles inland. The Bonneville Power and Navigation Project, first authorized in 1938, was completed in 1944. The State had (1942) a total steam railway mileage of 5,069, and a total electric railway mileage of 157; 58.6 per cent. of the communities are served by railways.

The State maintains (1944) 4,806 miles of primary highways, of which 4,612 are surfaced and 2,397 miles of secondary highways (1,923 miles are surfaced); the counties maintain 45,600 miles of highway (16,300 miles are surfaced).

On June 30, 1944, 26 national banks had deposits of 962,762,000 dollars, loans of 155,278,000 dollars, and investments of 603,727,000 dollars; 46 licensed State banks had deposits of 91,156,000 dollars, loans of 13,239,000 dollars and investments of 58,606,000 dollars.

### PENNSYLVANIA.

**Government.**—Pennsylvania, first settled in 1682, is one of the thirteen original States in the Union. The General Assembly consists of a Senate of 50 members chosen for four years, one-half being elected biennially, and a House of Representatives of 208 members chosen for two years. Every citizen 21 years of age, with the usual residential qualifications, may vote. Voters in the presidential elections of 1944 were 3,794,787; Franklin D. Roosevelt polled 51.1 per cent. The State sends to Congress two Senators and 33 Representatives.

The State is organized in counties (numbering 67), cities, boroughs, townships, school districts, and poor districts; the State capital is Harrisburg.

Governor.—Edward Martin (R.), 1943-47 (18,000 dollars).

Secretary of State.—Charles M. Morrison (R.).

**Area, Population, Education.**—Area, 45,333 square miles, of which 288 square miles are inland water. Census population April 1, 1940, 9,900,180, an increase of 268,830, or 2.7 per cent., since 1930. Estimated population, July, 1, 1943, 9,465,765,

a decrease of 4.4 per cent. since 1940. Population at four census years (with distribution by sex in 1940) was:—

| Years        | White     | Negro   | Indian | Asiatic | Total     | Per Sq. Mile |
|--------------|-----------|---------|--------|---------|-----------|--------------|
| 1910         | 7,467,713 | 198,919 | 1,508  | 1,976   | 7,668,111 | 171.0        |
| 1920         | 8,482,736 | 284,568 | 337    | 2,396   | 8,770,017 | 194.5        |
| 1930         | 9,196,007 | 431,257 | 523    | 2,563   | 9,629,350 | 218.8        |
| 1940         | 9,426,989 | 470,172 | 441    | 2,578   | 9,900,180 | 219.8        |
| Male . . .   | 4,718,483 | 230,477 | 258    | 1,989   | 4,950,207 | —            |
| Female . . . | 4,708,506 | 239,695 | 183    | 589     | 4,949,973 | —            |

In 1940, the foreign-born white population numbered 978,260 (9.8 per cent. of the total), of whom 197,281 (20.2 per cent.) were Italian, 117,519 Polish, 95,803 Russian, 80,111 German, 65,826 Irish, 59,394 Czechoslovakian and 55,346 English. Of the total population in 1940, 66.5 per cent. were urban, 4.7 per cent. Negro, and 82.6 per cent. (2,418,270 males and 811,897 females) gainfully employed; the number of occupied dwelling units was 2,516,423 (of 3.9 persons); 28,994 men and 32,064 women were reported divorced.

The population of the larger cities and townships, census of 1940, was:—

| Cities       | Population | Cities            | Population | Cities       | Population |
|--------------|------------|-------------------|------------|--------------|------------|
| Philadelphia | 1,981,384  | Harrisburg (cap.) | 53,893     | York         | 55,712     |
| Pittsburgh   | 671,659    | Altoona           | 30,214     | McKeesport   | 55,355     |
| Seranton     | 140,404    | Johnstown         | 66,688     | New Castle   | 47,688     |
| Erie         | 116,955    | Lancaster         | 61,345     | Williamsport | 44,355     |
| Reading      | 110,568    | Chester           | 59,238     | Lower Merion | 39,566     |
| Allentown    | 95,904     | Bethlehem         | 58,490     | Norristown   | 33,181     |
| Wilkes-Barre | 86,286     | Upper Darby       | 56,883     | Hastleton    | 38,009     |

School attendance is compulsory for children 8 to 18 years of age. In 1940, the public elementary and high schools had 60,963 teachers and 1,851,780 enrolled pupils. Expenditure on public schools (1940) was \$91,630,000 dollars, excluding debt service and capital outlay.

The leading academic institutions (1943) are as follows:—

| Founded | Institutions                                         | Professors | Students |
|---------|------------------------------------------------------|------------|----------|
| 1740    | University of Pennsylvania, Philadelphia (non-sect.) | 1,367      | 9,861    |
| 1787    | University of Pittsburgh (non-sect.)                 | 1,008      | 11,077   |
| 1839    | Haverford College (Quaker)                           | 43         | 236      |
| 1855    | Pennsylvania State College, State College, Pa.       | 545        | 6,896    |
| 1864    | Swarthmore College, Swarthmore (Quaker)              | 87         | 738      |
| 1878    | Duquesne University, Pittsburgh (R.C.)               | 154        | 1,467    |
| 1900    | Carnegie Institute of Technology, Pittsburgh         | 412        | 2,847    |
| 1884    | Temple University, Philadelphia (non-sect.)          | 655        | 5,841    |
| 1891    | Drexel Institute, Philadelphia                       | 126        | 2,067    |
| 1892    | Lafayette College, Easton                            | 80         | 860      |
| 1885    | Bryn Mawr College for Women                          | 87         | 658      |
| 1866    | Lehigh University, Bethlehem (non-sect.)             | 230        | 1,179    |
| 1846    | Bucknell University (Baptist)                        | 93         | 1,348    |
| 1842    | Villa Nova College                                   | 72         | 863      |

**Religion and Welfare.**—The chief religious bodies in the State are the Roman Catholic with 2,275,062 members in 1936, United Lutheran

(541,207) and Jewish Congregations (423,943). Total, all denominations, 5,412,244 members.

Marriage licences are granted only after both applicants have passed the Wasserman or some similar blood test.

Old Age Assistance is granted; in June, 1943, 90,163 persons were receiving an average of 27.64 dollars per month.

**Finance.**—For the fiscal year ending May 31, 1943, general revenues were (in dollars) 492,435,000 (taxes 408,775,000, Federal grants 43,725,000, miscellaneous 38,657,000), and general expenditures were 527,536,000, of which 175,416,000 were for direct State activities, 73,278,000 for State aid to other units, and 33,064,000 for capital outlays. Largest single source of revenue, the tax on motor fuels, furnished 45,892,000 dollars.

On June 1, 1943, net long-term debt amounted to 160,732,000 dollars; assessed value of taxable, real and personal property in 1942 amounted to 10,047,461,000 dollars.

**Production and Industry.**—Agriculture, market-gardening, fruit-growing, horticulture and forestry are pursued within the State. In 1940, there were 169,027 farms with a farm area of 14,594,134 acres (6,097,116 acres in crops); total value of farm land and buildings was \$64,199,795 dollars. Cash income from crops, 1943, was 120,708,000 dollars; from livestock, 373,120,000 dollars; from Government payments, 10,472,000 dollars. Pennsylvania leads, usually, in the production of buckwheat (2,508,000 bushels in 1943). In 1943, production of winter wheat was 13,277,000 bushels; rye, 624,000 bushels; oats, 14,878,000 bushels; maize, 49,173,000 bushels; potatoes, 18,656,000 bushels; tobacco, 40,014,000 pounds; hay, 3,399,000 tons; apples, 5,070,000 bushels, and grapes, 15,300 tons. On January 1, 1944, there were on farms: 282,000 horses, 38,000 mules, 924,000 milch cows, 1,607,000 all cattle, 366,000 sheep, 967,000 swine. Wool-clip, 1943, was 2,572,000 pounds from 343,000 sheep. National forest lands (1942) total 464,651 acres; State forests, 726,311 acres.

The value of Pennsylvania's mineral products, due principally to the production of coal, was in 1941, 737,144,000 dollars, anthracite and bituminous coal representing about 70 per cent. In 1942 anthracite coal output reached 59,961,000 tons and bituminous 143,174,000 tons. Other minerals were petroleum (17,779,000 barrels), natural gasoline or petrol (15,114,000 gallons); natural gas (1941) (92,819 million cubic feet). Output of fire clay (1940) was 794,702 tons; lime, 833,038 short tons; slate, 2,658,260 square feet; cement, 34,114,000 barrels in 1942; and coke (1942), 16,810,000 short tons.

The 1939 Federal census showed 13,802 manufacturing establishments employing 858,307 (wages, 1,003,347,730 dollars), using materials, containers, fuel and power valued at 2,980,948,116 dollars, and with output valued at 5,473,817,408 dollars.

In 1940, the aggregate length of steam railways was 10,323 miles; total of all tracks operated by electric railways, 2,294 miles; 57 per cent. of the communities are served by railways. The State highway system, not including township, city and borough roads and streets, has a mileage of 27,935 miles.

On June 30, 1943, 671 national banks had deposits of 3,688,205,000 dollars, loans of 696,985,000 dollars, investments of 2,748,726,000 dollars; 383 licensed State banks and trust companies had deposits of 3,480,386,000 dollars, loans of 708,205,000 dollars, investments of 2,497,574,000 dollars.

## RHODE ISLAND.

**Constitution and Government.**—The earliest settlers in the region which now forms the State of Rhode Island were colonists from Massachusetts who had been driven forth on account of their non-acceptance of the prevailing religious beliefs. The first of the settlements was made in 1638, settlers of every creed being welcomed. In 1647, a patent was granted for the government of the settlements, and on July 8, 1663, a charter was executed recognising the settlers as forming a body corporate and politic by the name of the English Colony of Rhode Island and Providence Plantations. On May 29, 1790, the State accepted the Federal Constitution and entered the Union as one of the 13 original States. The General Assembly consists of a Senate of 44 members and a House of Representatives of 100 members. Every citizen, 21 years of age, who has resided in the State for 2 years, and is duly registered, is qualified to vote. Voters in the presidential elections of 1944 were 297,948; Franklin D. Roosevelt polled 58.6 per cent. The State has 5 counties and 39 cities and towns. The capital is Providence. Rhode Island sends to Congress 2 Senators and 2 Representatives.

**Governor.**—J. Howard McGrath (D.), 1945-47 (8,000 dollars).

**Secretary of State.**—Armand H. Côté (D.).

**Area, Population, Education.**—Area, 1,214 square miles, of which 158 square miles are inland water. Population according to Federal Census, April 1, 1940, 718,346, an increase of 25,849, or 3.7 per cent., since 1930. Estimated population, July 1, 1943, 750,688, an increase of 5.2 per cent. since 1940. Population of four census years (with distribution by sex for 1940) was:—

| Years            | White   | Negro  | Indian | Asiatic | Total   | Per Sq. Mile |
|------------------|---------|--------|--------|---------|---------|--------------|
| 1910             | 532,492 | 9,529  | 284    | 305     | 542,610 | 508.5        |

The foreign-born whites in 1940 numbered 137,784 (19.3 per cent. of the total), of whom 28,851 (21.0 per cent.) were Italian, 23,168 (16.6 per cent.) French Canadian, 18,858 English and 12,082 Irish. The urban population was 91.6 per cent.; the Negro population, 1.5 per cent.; 37.1 per cent. (179,032 males and 85,641 females) were gainfully employed; occupied dwelling units numbered 187,706 (of 3.80 persons); 2,620 men and 4,252 women were reported divorced.

The chief cities and towns are Providence, which (census 1940) had a population of 253,504; Pawtucket, 75,797; Woonsocket, 49,303; Cranston, 47,085; E. Providence, 32,165; Newport, 30,532; Warwick, 28,757; Central Falls, 25,248; West Warwick, 18,188; North Providence, 12,156.

In 1930 census, illiterates 10 years of age or older numbered 27,536 (4.9 per cent. of that age group), of whom 24,124 were foreign-born whites. In 1940, of persons between the ages of 5 and 24, 139,151 (57.3 per cent.) were attending school. The State census of 1936 showed 6.8 per cent. of those 10 years of age or older were unable to read and write English; they numbered 38,748 (including 34,810 foreign-born whites). In 1943-44, the 316 public elementary school buildings had 2,054 teachers and 58,196 enrolled pupils; 34,943 pupils were enrolled in private and parochial schools. The high school buildings (28 senior and 34 junior) had 1,833 teachers and 38,852 pupils. Local expenditures for schools for 1943-44 totalled 11,921,559 dollars; State and Federal expenditures, 2,500,000 dollars. The State maintains a State College of Education with 30 professors and teachers and 238 students (1943-44), and a State College with 133 professors and 606 students. Brown University at Providence, founded in 1764, is now non-sectarian; in 1943-44, had 215 professors and instructors and 4,222 students. Providence College, at Providence, founded in 1928-29 by the Order of Preachers (Dominican) has 74 professors and 514 students.

**Religion and Welfare.**—Chief religious bodies are the Roman Catholic with 347,961 members in 1940, Methodists (68,825), Protestant Episcopal (30,000), Jewish congregations (28,214), and Congregational. Total, all denominations, 475,000.

Marriage licences are granted only after both applicants have passed the Wasserman or some similar blood test.

The State's penal, reformatory and mental homes system, on June 30, 1944, had 4,408 inmates.

In conformity with the Federal Social Security Act, the State administers a system of Old Age Assistance and one of aid to dependent children. In

1898, with 141 professors and 2,370 students as well as a number of smaller colleges.

**Religion and Welfare.**—The chief religious bodies are the Negro Baptists, with 238,217 members in 1936, Southern Baptists, 159,887, and Southern Methodists, 91,519. Total, all denominations, 710,163.

Old Age Assistance was being granted in June, 1943, to 20,998 persons, who received an average of 10.71 dollars per month.

**Finance.**—For the fiscal year ending June 30, 1943, general revenues (in dollars) were 63,975,000 (taxes furnished 52,383,000, and Federal grants, 8,942,000), while general expenditures were 61,150,000 (direct State activities took 19,821,000, State aid to other units, 19,456,000, capital outlays, 5,287,000). Chief single source of revenue, tax on motor fuels, furnished 10,736,000 dollars.

On June 30, 1943, the net long-term debt was 79,340,000 dollars, and assessed value of real and personal property (1942) was 383,599,000 dollars.

**Production and Industry.**—South Carolina is an agricultural State containing in 1940, 137,558 farms (more than half of which were negro farms), covering a farm area of 11,238,697 acres; total value of farm land and buildings was 338,494,517 dollars. About 68 per cent. of the area of the State is woodland. Cash income, 1943, from crops, was 156,105,000 dollars: from live-stock, 41,233,000 dollars; from Government payments, 9,335,000 dollars. The chief cereal crops in 1943 were maize, 24,720,000 bushels, and oats, 14,102,000 bushels. Peanuts, 37,400,000 pounds; peaches, 392,000 bushels, and sweet potatoes, 6,960,000 bushels, are grown. Of greater importance is the cultivation of cotton, under which in 1943 were 1,227,000 acres, yielding 696,000 bales of upland cotton. Tobacco in 1943 amounted to 86,430,000 pounds. On January 1, 1944, the farm animals in the State were 22,000 horses, 185,000 mules, 186,000 milch cows, 392,000 all cattle, 5,000 sheep, and 800,000 swine. National forest lands, 1942, amount to 564,005 acres.

The State has few mineral resources. Gold produced in 1942 was 8,102 fine ounces. The total value of mineral output in 1941 was 7,237,000 dollars.

The manufacturing establishments of the State in 1939 numbered 1,331 with 126,983 wage-earners, earning 86,616,242 dollars; materials, containers, fuel and power used were valued at 227,666,244 dollars, and the output at 397,512,863 dollars. In the year ending July 31, 1943, 5,347,000 active cotton spindles consumed 2,190,000 bales.

In 1941, the length of steam railway in the State was 3,354 miles. 72.7 per cent. of the communities are served by railways. The State maintains 10,759 miles of highways, of which 6,849 miles are surfaced.

South Carolina on June 30, 1943, had 22 national banks with deposits of 207,139,000 dollars, loans of 37,725,000 dollars, investments of 108,168,000 dollars; 123 State banks and trust companies had deposits of 105,883,000 dollars, loans of 20,337,000 dollars, investments of 44,437,000 dollars.

### SOUTH DAKOTA.

**Government.**—South Dakota, first settled in 1794, was organised as a State from part of Dakota Territory and admitted into the Union on November 2, 1889. It ceded a small part of its territory to Nebraska in 1908. Voters are all citizens 21 years of age or older who have complied with certain residential qualifications. Voters in the presidential elections of 1944 were 232,078; Franklin D. Roosevelt polled 41.7 per cent. The people reserve the right of the initiative and referendum. The Senate has 35 members, and the House of Representatives 75 members. The State is divided into 64 organised counties and five unorganised. The capital is Pierre (population, 1940, 4,322). The State sends two Senators and two Representatives to the Federal Congress.

Governor.—M. Q. Sharps (R.), 1943-47 (3,000 dollars).

Secretary of State.—Mrs. L. M. Larsen (R.).

**Area, Population, Education.**—Area, 77,047 square miles, of which 511 square miles are water. Area administered by the United States Office of Indian Affairs, 1942, covered 5,959,416 acres, of which 1,163,261 acres were held by tribes. Federal census population on April 1, 1940, 642,961, a decrease of 49,888, or 7.7 per cent., since 1930. Estimated population, July 1, 1943, 576,696, a decrease of 10.3 per cent. since 1940. Population in four Federal censuses (with distribution by sex in 1940) was:—

| Year         | White   | Negro | Indian | Asiatic | Total   | Per Sq. Mile |
|--------------|---------|-------|--------|---------|---------|--------------|
| 1910         | 563,771 | 817   | 19,137 | 163     | 533,888 | 7.6          |
| 1920         | 619,147 | 832   | 16,384 | 184     | 636,547 | 8.3          |
| 1930         | 670,269 | 646   | 21,833 | 101     | 692,849 | 9.1          |
| 1940         | 619,075 | 474   | 23,347 | 65      | 642,961 | 8.4          |
| Male . . .   | 320,188 | 263   | 12,019 | 44      | 332,514 | —            |
| Female . . . | 298,887 | 211   | 11,828 | 21      | 310,447 | —            |

Foreign-born whites in 1940 numbered 44,052 (6.8 per cent. of the total), of whom 8,708 (20.4 per cent.) were Norwegians, 8,304 Germans, 6,468 Russians and 4,361 Swedes. The urban population formed 24.6 per cent. and the Negro population 0.1 per cent. of the whole; 31.4 per cent. (164,497 males and 37,917 females) were gainfully employed; occupied dwelling units numbered 165,428 (of 3.89 persons); 2,539 men and 2,710 women were reported divorced.

The population of the chief cities (census of 1940) was: Sioux Falls, 40,832; Aberdeen, 17,015; Rapid City, 13,844; Huron, 10,843; Mitchell, 10,633; Watertown, 10,617.

In 1930, illiterates 10 years of age or older numbered 6,763 (1.2 per

June, 1943, 7,267 elderly persons were drawing an average of 26.83 dollars per month; 1,140 families (with 3,106 dependent children) were drawing an average of 6.05 dollars per month.

**Finance.**—For the fiscal year ending June 30, 1944, receipts and payments were as follows:—

|                             | Dollars    |
|-----------------------------|------------|
| Cash balance, June 30, 1943 | 5,930,875  |
| Receipts, 1943-44           | 25,599,050 |
| Total                       | 31,529,925 |
| Disbursements, 1943-44      | 27,097,256 |
| Cash on hand, June 30, 1944 | 4,432,659  |

Net bonded debt on June 30, 1944, was 21,465,588 dollars; assessed value of real and personal property in towns and cities in 1943 was 1,501,328,038 dollars.

**Production and Industry.**—Rhode Island is a manufacturing State. Though there is little farming, it ranks fourth in the value of commodities per farm unit. In 1940 census, it had 8,014 farms with an area of 221,918 acres, of which 48,753 acres were crop land. The total value of farm land and buildings in 1940 was 26,334,374 dollars. The small mineral output, mostly stone, sand and gravel, was valued (1941) at 1,133,000 dollars. At the United States census in 1939, 1,460 manufacturing establishments had 106,260 wage-earners, who earned 105,408,954 dollars; materials, containers, fuel and power used were valued at 278,101,981 dollars, and the output at 516,390,541 dollars. In the year ending August 31, 1944, 705,244 active cotton spindles consumed 94,958 bales of cotton.

In 1943, the railroads operated 186 miles of road; there were 82 miles of electric railway; 51 per cent. of the communities are served by railways. The State has 2,375 miles of rural roads, of which 809 miles are maintained by the State.

On June 30, 1944, Rhode Island had 12 licensed national banks with deposits of 235,841,000 dollars, loans of 31,928,000 dollars, investments of 175,318,000 dollars; 23 licensed State banks had deposits of 586,924,000 dollars, loans of 111,022,000 dollars, investments of 462,494,000 dollars.

## SOUTH CAROLINA.

**Constitution and Government.**—South Carolina, first settled in 1670, was one of the thirteen original States of the Union. The General Assembly consists of a Senate of 46 members, elected for four years (half retiring biennially), and a House of Representatives of 123 members, elected for two years. Only registered citizens have the right to vote; for registration, it is necessary to be able to read and write English and to have paid the taxes, due the previous year, on property in the State assessed at 300 dollars or more. Disfranchisement is heavy; the State is one of 7 Southern States which disfranchise those who have not paid their taxes. Voters in the presidential elections of 1944 numbered 103,375; Franklin D. Roosevelt polled 87.6 per cent. The State is divided into 46 counties. The capital is Columbia. South Carolina sends to Congress two Senators and six Representatives.

Governor.—Olin D. Johnston (D.), 1943-47 (7,500 dollars).

Secretary of State.—W. P. Blackwell (D.).

**Area, Population, Education.**—Area, 31,055 square miles, of which 461 square miles are inland water. Census population on April 1, 1940, was 1,899,804, an increase of 161,039, or 9.2 per cent., since 1940. Estimated population, July 1, 1943, 1,950,802, an increase of 2.7 per cent. since 1940. The population in four census years (with distribution by sex in 1940) was:—

| Years  | White     | Negro   | Indian | Asiatic | Total     | Per sq. Mile |
|--------|-----------|---------|--------|---------|-----------|--------------|
| 1910   | 679,161   | 335,843 | 331    | 85      | 1,515,400 | 49.7         |
| 1920   | 818,584   | 364,719 | 304    | 163     | 1,683,724 | 56.2         |
| 1930   | 944,049   | 708,681 | 959    | 76      | 1,738,765 | 56.8         |
| 1940   | 1,084,306 | 814,164 | 1,234  | 98      | 1,899,804 | 62.1         |
| Male   | 5,059,7   | 393,858 | 616    | 68      | 986,239   | —            |
| Female | 548,711   | 420,306 | 618    | 30      | 964,565   | —            |

The foreign-born white population in 1940 numbered 4,915 (0.2 per cent. of the total), of whom 713 were Greek, 570 German, 536 Russian and 447 English. Of the total population, 24.5 per cent. were urban, 42.8 per cent. Negro, and 34.7 per cent. (466,773 males and 194,300 females) were gainfully employed; the number of occupied dwelling units was 434,968 (of 4.87 persons). There is no venereal disease test for marriage. Divorce is not allowed; the 1940 census showed 1,848 men and 3,295 women residing in the State who had been divorced.

Large towns are: Charleston, with a population of 71,275 in 1940; Columbia (capital), 62,396; Greenville, 34,734; Spartanburg, 32,249.

In 1930 illiterates 10 years of age or older numbered 192,878 (14.9 per cent. of that age group), of whom 36,246 were native whites and 156,065 were Negroes. In 1940, of persons between the ages of 5 and 24, 452,361 (53.3 per cent.) were attending school. School attendance is compulsory since 1922. There are separate schools for white and coloured children. In 1940, the public elementary and high schools had 481,750 enrolled pupils (both white and Negro) and 15,042 teachers. Expenditure on public school education in 1940 was 18,099,000 dollars. For higher instruction the State has the University of South Carolina, founded at Columbia in 1801, with, in 1943, 124 professors and 1,780 students; Clemson Agricultural College, founded in

cent. of that age group), of whom 2,422 were foreign-born whites. In 1940, of persons between the ages of 5 and 24, 146,086 (60·8 per cent.) were attending school. Elementary and secondary education are free to all from 6 to 21 years of age. Between the ages of 8 and 16 attendance at a public day school is compulsory on all not otherwise taught. In 1940 the elementary and secondary schools had 8,267 teachers and 136,447 pupils. State educational institutions in 1948 were four Normal Schools with an enrolment of 3,000 students; a School of Mines, established 1885, with 483 students; an Agricultural College with 1,186 students; the State University, founded at Vermillion in 1882, 800 students. The Government maintains three Indian Schools in the State, at Flandreau, Rapid City and Pierre. State expenditure on schools (1941-42), 4,425,000 dollars.

**Religion and Welfare.**—The chief religious bodies are: Roman Catholic, with 89,001 members in 1936, Norwegian Lutherans (45,084), Methodist (23,928), Congregational, and Protestant Episcopal. Total, all denominations, 278,567.

Marriage licences are granted only after both applicants have passed the Wasserman or some similar blood test.

Old Age Assistance was being granted in June, 1943, to 14,004 persons, who received an average of 21·28 dollars per month.

**Finance.**—For the fiscal year ending June 30, 1943, general revenues (in dollars) were 22,712,000 (taxes furnished 16,067,000, and Federal grants, 4,613,000), while general expenditures were 19,131,000 (direct State activities taking 12,522,000, State aid to other units, 2,238,000, and capital outlays, 1,803,000). Chief single source of revenue, tax on motor fuels, yielded 4,013,000 dollars.

Gross long-term debt on July 1, 1943, was 28,911,000 dollars: net debt after sinking fund, 342,000 dollars; total valuation of property (1942) was 713,296,000 dollars.

**Production and Industry.**—In 1940, 72,454 farms had an acreage of 89,473,584; total value of farm land and buildings, 505,452,178 dollars. Cash income, 1943, from crops, 95,280,000 dollars; from live-stock, 251,150,000 dollars; from Government payments, 17,359,000 dollars. The yield of spring wheat in 1943 amounted to 27,439,000 bushels; of durum wheat, 2,670,000 bushels; maize, 79,718,000 bushels; oats, 70,500,000 bushels; barley, 35,843,000 bushels; rye, 5,220,000 bushels; flax seed, 4,726,000 bushels; potatoes, 3,680,000 bushels. Total national forest area, 1942, 1,111,047 acres. The live-stock within the State on January 1, 1944, consisted of 327,000 horses, 3,000 mules, 545,000 milch cows, 2,367,000 all cattle, 2,223,000 sheep, 2,392,000 swine. The wool-clip in 1943 amounted to 15,478,000 pounds of wool from 1,876,000 sheep.

The mineral products of the State include in 1942 gold (522,098 ozs.), silver (186,937 ozs.), lignite (40,664 tons in 1943), lithium minerals, feldspar, and some tin. Mineral products, 1941, were valued at 24,502,000 dollars.

The chief manufacturing industries of the State are meat-packing and the making of butter. In 1939, there were 468 industrial establishments, employing 5,538 wage-earners, who earned 6,035,524 dollars, the cost of materials, containers, fuel and power being 81,216,830 dollars and the value of the output, 81,171,887 dollars.

In 1942, the steam railways of the State were 3,984 miles in length 62 per cent. of the communities are served by railways. The State maintain 6,016 miles of highways, of which 5,060 are surfaced.

South Dakota had on June 30, 1943, 37 national banks with deposits of 111,707,000 dollars, loans of 23,168,000 dollars, investments of 67,081,000 dollars; 125 State banks and trust companies had deposits of 89,501,000 dollars, loans of 24,771,000 dollars, investments of 35,694,000 dollars.

## TENNESSEE.

**Constitution and Government.**—Tennessee, first settled in 1757, was admitted into the Union on June 1, 1796. The General Assembly consists of a Senate of 33 members elected for two years, and a House of Representatives of 99 members elected also for two years. No clergyman of any denomination is eligible to either House. Qualified as electors are all citizens (with the usual residential qualifications). Payment of a poll-tax is a requisite for all voters under the age of 50 years. Voters in the presidential elections of 1944 were 510,792; Franklin D. Roosevelt polled 60·5 per cent. Tennessee sends to Congress two Senators and ten Representatives. The State is divided into 95 counties; the capital is Nashville.

**Governor.**—Jim Nance McCord (D.), 1945-47 (4,000 dollars).  
**Secretary of State.**—Mrs. Joe C. Carr (D.).

**Area and Population.**—Area, 42,246 square miles (285 square miles water). Census population on April 1, 1940, 2,915,841, an increase of 299,285, or 11·4 per cent., since 1930. Estimated population, July 1, 1943, 2,958,668, an increase of 1·5 per cent. since 1940. In four census years the population (with distribution by sex in 1940) was:—

| Years  | White     | Negro   | Indian | Asiatic | Total     | Per Sq. Mile |
|--------|-----------|---------|--------|---------|-----------|--------------|
| 1910   | 1,711,432 | 473,088 | 216    | 53      | 2,184,789 | 52·4         |
| 1920   | 1,885,993 | 451,754 | 56     | 78      | 2,337,885 | 56·1         |
| 1930   | 2,138,644 | 477,646 | 161    | 105     | 2,616,556 | 62·4         |
| 1940   | 2,406,906 | 508,736 | 114    | 85      | 2,915,841 | 69·5         |
| Male   | 1,199,580 | 246,129 | 57     | 63      | 1,445,829 | —            |
| Female | 1,207,326 | 262,607 | 57     | 22      | 1,470,012 | —            |

The foreign-born whites numbered, in 1940, 11,320 (being 0·3 per cent. of the total), of whom 1,734 (18·1 per cent.) were Italian, 1,499 Russian, 1,477 German and 966 English. Of the total population in 1940, 35·2 per cent. were urban, 17·4 per cent. Negro, and 32·3 per cent. (728,203 males and 213,511 females) gainfully employed; the number of occupied dwelling units was 714,894 (of 4·08 persons); 10,904 men and 17,574 women were reported divorced.

The cities, with population in 1940, are: Memphis, 292,942; Nashville (capital), 187,402; Chattanooga, 128,168, and Knoxville, 111,580.

**Religion and Welfare.**—The leading religious bodies are the Southern Baptists, with 226,898 members in 1938, Southern Methodists (160,951), Negro Baptists (140,077). Total, all denominations, 918,809. The State permits the sale of alcoholic liquors for beverage purposes, under licence and with certain restrictions.

Marriage licences are granted only after both applicants have passed the Wasserman or some similar blood test.

Old Age Assistance was granted in November, 1944, to 38,290 persons, who received an average of 16.59 dollars per month.

**Education.**—In 1940, persons over 20 years of age having no years of schooling numbered 65,765 (8.73 per cent. of that age group), of whom 41,572 were native white and 24,193 were non-whites. Of persons between the age of 5 and 24, 602,378 (or 52.8 per cent.) were attending school. School attendance is now compulsory and the employment of children under 16 years of age in workshops, factories or mines is illegal. There are separate schools for white and for coloured children. In 1943-44, the 5,067 public elementary schools had 496,844 enrolled pupils with 15,984 teachers; 557 high schools had 109,576 pupils with 5,075 teachers; 6 normal schools had 262 teachers and 8,077 pupils. Total expenditure for maintenance of public elementary and high schools, June 30, 1944, 81,827,965 dollars. The more important universities and colleges (1943) are:—

| Began | Institutions                                       | Professors | Students |
|-------|----------------------------------------------------|------------|----------|
| 1867  | University of Chattanooga (M. E.)                  | 46         | 540      |
| 1794  | University of Tennessee at Knoxville (State)       | 228        | 4,361    |
| 1866  | Fisk University at Nashville (Negro)               | 51         | 358      |
| 1875  | Vanderbilt University at Nashville (non-sectarian) | 434        | 1,687    |
| 1842  | Cumberland University at Lebanon (Presb.)          | 25         | 250      |
| 1868  | University of the South, Sewanee (P. E.)           | 30         | 865      |
| 1819  | Maryville College, Maryville (Presb.)              | 63         | 666      |
| 1875  | George Peabody College for Teachers                | 94         | 1,115    |

**Finance.**—For the fiscal year ending June 30, 1944, the total income of the State government was 76,306,647 dollars (taxes and expendable income furnished 59,433,000 dollars, and Federal grants 15,224,000 dollars), while disbursements were 78,732,690 dollars (direct State operations taking 37,125,997 dollars, State aid to local units, 19,753,342 dollars, and debt payments and interest, 21,853,350 dollars). Chief single source of revenue, the tax on motor fuels, including inspection fees, yielded 22,908,311 dollars. Net long-term debt on June 30, 1943, amounted to 76,124,000 dollars. The assessed value of all property (1942) was 1,431,802,000 dollars.

**Production and Industry.**—In 1944, 240,000 farms had an acreage of 26,250,000; value of farm land and buildings, 1,033,000,000 dollars. Cash income, 1944, from crops, was 154,505,000 dollars; from live-stock, 169,310,000 dollars; from Government payments (1943), 10,165,000 dollars. The most important crop is maize, amounting in 1944 to 59,950,000 bushels. The winter wheat yield was 6,714,000 bushels. Oats (3,611,000 bushels in 1944), hay (1,626,000 tons), Irish potatoes (2,464,000 bushels), sweet potatoes (4,123,000 bushels), sorghum (915,000 gallons), peanuts (8,250,000 pounds), and other products are grown, the physical conditions permitting/

a great diversity of crops. The cotton crop for 1944 covered 679,000 acres and yielded 570,000 bales. The tobacco crop, all types (1944), was 115,470,000 pounds. On January 1, 1944, the domestic animals consisted of 170,000 horses, 288,000 mules, 666,000 milch cows, 1,499,000 all cattle, 393,000 sheep and 1,778,000 swine. Wool-clip in 1944, 1,845,000 pounds from 389,000 sheep.

The most important mineral product of Tennessee is coal from fields covering about 4,400 square miles; output in 1944 was 7,914,000 short tons. Tennessee is the only source of sinter iron and the leading source of pyrites. Other mineral products for 1944 were copper (15,112,937 pounds), zinc and lead (145,698,000 pounds), gold (187 fine ounces), silver (46,465 fine ounces), manganese ore (59,849 long tons), phosphate (1,770,537 long tons), marble (62,471 short tons), cement, 3,434,992 barrels. Total value of mineral products in 1944, exclusive of pig iron, was 61,703,144 dollars.

The manufacturing industries include iron and steel working, but the most important manufactured products are knit goods and rayon and allied products. In the year ending July 31, 1943, 529,000 active cotton spindles consumed 263,000 bales of cotton.

Census of manufactures, 1939, showed 2,289 manufacturing establishments, employing 131,874 wage-earners, who received wages of 109,661,769 dollars; cost of materials, containers, fuel and power used, 407,745,928 dollars; value of output, 728,087,825 dollars.

The State contains (1944) 3,545 miles of steam railway and maintains 7,500 miles of surfaced highways.

On June 30, 1944, Tennessee had 70 national banks with deposits of 974,610,000 dollars, loans of 166,273,000 dollars, investments of 588,708,000 dollars; 223 State banks and trust companies had deposits of 405,508,912 dollars, loans of 86,228,411 dollars, investments of 211,993,025 dollars.

### TEXAS.

**Constitution and Government.**—In 1836, Texas declared its independence of Mexico, and after maintaining an independent existence, as the Republic of Texas, for 10 years, it was on December 29, 1845, received as a State into the American Union. The State's first settlement dates from 1686. The Legislature consists of a Senate of 31 members elected for four years (half their number retiring every two years), and a House of Representatives of 150 members elected for two years. Qualified electors are all citizens with the usual residential qualifications, but persons subject to the poll-tax must have paid their tax prior to February 1 of the year in which they desire to vote. Voters in the presidential elections of 1944 were 1,150,343; Franklin D. Roosevelt polled 71.4 per cent. The State has

254 counties; the capital is Austin. Texas sends to Congress 2 Senators and 21 Representatives.

*Governor.*—Coke R. Stevenson (D.), 1945-47 (12,000 dollars).  
*Secretary of State.*—Sydney Latham (D.).

**Area and Population.**—Area, 267,339 square miles (including 3,695 square miles of inland water). Census population April 1, 1940, 6,414,824, an increase of 590,109, or 10·1 per cent., since 1930. Estimated population, July 1, 1943, 6,970,350, an increase—due to war work—of 8·7 per cent. since 1940.

Population for four census years (with distribution by sex for 1940) was :—

| Years        | White     | Negro   | Indian | Asiatic | Total     | Per Sq. Mile |
|--------------|-----------|---------|--------|---------|-----------|--------------|
| 1910         | 3,204,548 | 600,049 | 702    | 943     | 3,896,512 | 14·8         |
| 1920         | 3,918,165 | 741,694 | 2,109  | 1,260   | 4,663,228 | 17·8         |
| 1930         | 4,967,172 | 854,964 | 1,001  | 1,578   | 5,824,715 | 22·1         |
| 1940         | 5,487,545 | 924,891 | 1,108  | 1,785   | 6,414,824 | 24·3         |
| Male . . .   | 2,768,259 | 450,990 | 608    | 1,246   | 3,221,103 | —            |
| Female . . . | 2,719,286 | 473,401 | 495    | 539     | 3,193,721 | —            |

Of the total number (1940) 234,388, or 4·3 per cent., were foreign-born whites, 159,266 (67·9 per cent.) being Mexican, 17,970 (7·7 per cent.) German, 9,171 (3·9 per cent.) Czechoslovakian, 5,451 Italian and 5,046 English. Japanese numbered 458, of whom 291 were citizens. Of the total, 45·4 per cent. were urban, 14·4 per cent. Negro, and 33·3 per cent. (1,675,495 males and 462,860 females) were gainfully employed; occupied dwelling units were 1,678,396 (of 3·82 persons).

The largest cities of the State with census population in 1940, are :—

|                |         |                  |        |                  |        |
|----------------|---------|------------------|--------|------------------|--------|
| Houston . . .  | 384,514 | El Paso . . .    | 96,810 | Corpus Christi . | 57,301 |
| Dallas . . .   | 294,734 | Austin (capital) | 87,930 | Waco . . .       | 55,982 |
| San Antonio .  | 253,854 | Galveston . . .  | 60,862 | Amarillo . . .   | 51,686 |
| Fort Worth . . | 177,662 | Beaumont . . .   | 59,061 | Port Arthur . .  | 46,140 |

**Education.**—In 1940, persons 25 years of age or older who reported no school years completed numbered 179,426 (5·3 per cent. of that age group), of whom 81,514 were native whites and 38,236 Negroes; of persons between the ages of 5 and 24, 1,340,931 (55·3 per cent.) were attending school. School attendance is compulsory for children from 7 to 16 years of age. Separate schools are provided for white and coloured children. In 1941-42 the public elementary schools had 968,171 enrolled pupils, and 30,562 teachers; the public high schools, 343,638 pupils, and 17,101 teachers. There are also 7 teachers' colleges for white students and 1 for Negro students with (1941-42) 711 teachers and 20,136 students, of which 11,553 attended regular sessions and 8,583 attended summer sessions. Three other State colleges had 203 teachers and 4,995 students in 1941-42. Amount expended on public schools (not including colleges) for 1940-41 was approximately 76,000,000 dollars. For superior instruction leading institutions (1943) are :—

| Founded | Institutions                                       | Control   | Professors | Students |
|---------|----------------------------------------------------|-----------|------------|----------|
| 1888    | University of Texas, Austin . . .                  | State     | 750        | 10,574   |
| 1876    | Agr. and Mech. Coll., College Station . . .        | State     | 506        | 6,981    |

| 1914    | Texas College of Mines, El Paso . . .              | State     | 56         | 1,284    |
| 1891    | Hardin-Simmons University, Abilene . . .           | Baptist   | 43         | 695      |

**Religion and Welfare.**—The largest religious bodies are the Roman Catholic (with 604,308 members in 1936), Negro Baptists (388,044), Southern Baptists (360,421), and Southern Methodists (335,739). Total, all denominations, 2,298,966.

Marriage licences are issued only after the male applicant has presented a physician's certificate (void after a limited period) showing freedom from venereal disease.

Old Age Assistance was being granted in October, 1944, to 170,509 persons, who received an average of 21·58 dollars per month; aid was given to 4,623 blind persons (24·10 dollars per month) and to 10,697 families with 23,262 dependent children (average per family, 20·88 dollars).

The prison system, December, 1943, held 3,644 men and women.

**Finance.**—The receipts and disbursements from all sources in the year ending August 31, 1944, were :—

|                                      | Dollars     |
|--------------------------------------|-------------|
| Balance, September 1, 1943 . . . . . | 64,450,492  |
| Receipts, 1943-44 . . . . .          | 303,095,814 |
| Total . . . . .                      | 367,546,306 |
| Disbursements, 1943-44 . . . . .     | 319,248,947 |
| Balance, August 31, 1944 . . . . .   | 48,297,359  |

Revenue derived from the severance tax (i.e. tax on the removal of minerals, timber or other assets from the soil or waters of the State), in the 1943 fiscal year yielded 30,935,000 dollars; tax on motor fuels that year yielded 50,058,000 dollars.

Net long-term debt, August 31, 1943, was 14,851,000 dollars; the total assessed value (1943) of real and personal property was 4,676,337,873 dollars.

**Production and Industry.**—Texas is one of the most important agricultural States of the Union. In 1940, it had 418,002 farms covering 187,683,372 acres; value of farm lands and buildings was 2,589,978,936 dollars. There are 2,180,796 acres of irrigable lands in Texas, of which 1,045,224 acres, embracing 30,670 farms, were irrigated in 1939. Cash income, 1943, from crops, was 584,926,000 dollars; from live-stock, 573,994,000 dollars; from Government payments, 54,311,000 dollars.

The University of Utah (1850) (4,608 students and 265 instructors), is in Salt Lake City, and the Agricultural College of Utah (1890), in Logan. The Mormon Church maintains the Brigham Young University at Provo (1875), and other denominations also maintain colleges in the State.

**Religion and Welfare.**—Latter-Day Saints (Mormons) form about 90 per cent. of the Church membership of the State, with 336,184 members in 1936 out of a total, for all denominations, of 372,699. There are Catholics (15,474), Protestant Episcopalians (3,167), and others in small numbers.

Marriage licences are granted only after both applicants have passed the Wasserman or some similar blood test.

Old Age Assistance (maximum 25 dollars a month) was established in 1929 for all American citizens 65 years of age or older who have been residents of the State for 15 years (of the county for 5 years) with an income not exceeding 300 dollars; in June, 1943, recipients numbered 13,780, drawing an average of 34.97 dollars per month.

**Finance.**—For the year ending June 30, 1943, general revenue (in dollars) was 41,442,000 (taxes furnished 28,338,000 and Federal grants 8,581,000) while general expenditures were 38,428,000 (direct State activities taking 18,007,000, State aid to other units 7,209,000 and capital outlays 4,181,000). Chief single source of revenue, the sales tax, yielded 6,698,000 dollars; tax on motor fuels, 4,201,000 dollars.

The net long-term debt of the State on June 30, 1943, amounted to 607,000 dollars. The assessed valuation of real and of personal property in 1942 was 570,840,000 dollars.

**Production and Industry.**—The area of unappropriated and unserved lands within the State on June 30, 1943, was 21,695,146 acres; the State (1942) contained 7,818,221 acres of national forest. Irrigable lands in 1940 covered 1,357,714 acres; lands irrigated were 1,176,116 acres. In 1940, it had 25,411 farms with a total area of 7,302,007 acres, of which 968,088 acres were crop land; total value of farm land and buildings, 154,358,365 dollars. Cash income, 1943, from crops, 29,721,000 dollars; from live-stock, 72,114,000 dollars, and from Government payments, 2,787,000 dollars.

In 1943, the chief crops were wheat, 3,239,000 bushels; oats, 1,890,000 bushels; potatoes, 3,430,000 bushels; hay, 1,061,000 tons; alfalfa, 958,000 tons; sugar beet, 499,000 tons. On January 1, 1944, the number of animals was: horses, 84,000; mules, 1,000; milch cows, 121,000; all cattle, 515,000; sheep, 2,429,000; swine, 175,000. The wool-clip (1943) yielded 20,718,000 pounds of wool from 2,252,000 sheep; mohair, 150,000 pounds from 30,000 goats.

In 1942 the principal minerals were gold (391,544 fine ounces), silver (10,574,955 fine ounces), copper (613,382,000 pounds), coal (5,670,000 tons), lead (143,860,000 pounds), zinc (91,086,000 pounds), gypsum (45,421 short tons, 1940) and salt. Other products are sulphur, potash, arsenous oxide, uranium and vanadium ores, molybdenum and asphalt. Total value of mineral production, 1941, 122,886,000 dollars.

In 1939, there were 560 manufacturing establishments with 11,555 wage-earners, who earned 11,967,762 dollars; materials, containers, fuel and power used were valued at 123,452,364 dollars, and the value of the output was 167,172,226 dollars.

In 1941, the State had 2,071 miles of steam railways; 65.5 per cent. of the communities are served by railways. The State maintains 5,414 miles of highway, of which 3,435 miles are surfaced.

Utah on June 30, 1943, had 12 national banks with deposits of 141,823,000 dollars, loans of 22,508,000 dollars, investments of 98,902,000 dollars; 45 State banks and trust companies had deposits of 150,543,000 dollars, loans of 36,119,000 dollars, investments of 82,687,000 dollars.

### VERMONT.

**Constitution and Government.**—Vermont, first settled in 1724, was admitted into the Union as a State on February 18, 1791. The first Constitution was established by Convention at Windsor, July 2, 1777; in 1793 a new Constitution was adopted which, with amendments, is still in force. Amendments are proposed by two-thirds vote of the Senate each decennium, and must be accepted by two sessions of the Legislature before being submitted to popular vote. The State Legislature, consisting of a Senate of 30 members and a House of Representatives of 246 members, meets in January in odd numbered years. Electors are all citizens who possess certain residential qualifications and have taken the freeman's oath set forth in the Constitution. Voters in the presidential elections of 1944 were 125,347; Franklin D. Roosevelt polled 42.9 per cent. The capital is Montpelier (8,006, census of 1940). The State is divided into fourteen counties, and 246 towns and cities. The State sends to Congress two Senators and one Representative.

• Governor.—Mortimer R. Proctor (R.), 1945-47 (5,000 dollars).

Secretary of State.—Rawson C. Myrick (R.).

**Area and Population.**—Area, 9,609 square miles, of which 331 square miles are inland water. Census population on April 1, 1940, 359,231, a decrease of 380 since 1930. Estimated population, July 1, 1943, 327,449, a decrease of 8.8 per cent. since 1940. Population at four census years (with distribution by sex in 1940) was as follows:—

| Years            | White   | Negro | Indian | Asiatic | Total   | Per Sq. Mile |
|------------------|---------|-------|--------|---------|---------|--------------|
| 1910             | 254,298 | 1,621 | 26     | 11      | 355,956 | 39.0         |
| 1920             | 251,817 | 572   | 24     | 15      | 352,428 | 38.6         |
| 1930             | 258,966 | 543   | 36     | 41      | 359,611 | 38.8         |
| 1940             | 258,806 | 584   | 16     | 25      | 359,231 | 38.7         |
| Male . . . . .   | 181,975 | 220   | 9      | 20      | 182,224 | —            |
| Female . . . . . | 176,831 | 164   | 7      | 5       | 177,007 | —            |

In 1940, the foreign-born white population numbered 31,727, or 8.9 per cent. of the total. Of these, 11,976 (37.5 per cent.) were Canadian French, 7,759 (25.0 per cent.) Canadian English, 2,339 Italian, 1,378 English, 1,043 Irish and 1,020 Scottish. Of the population in 1940, 34.3 per cent. were urban and 34.8 per cent. (96,163 males and 28,929 females) gainfully employed; the number of occupied dwelling units was 92,435 (of 3.89

Texas leads in the production of cotton (2,823,000 bales in 1943) and grain sorghum (59,675,000 bushels). Other important crops in 1943 were: pecans (10,350,000 pounds), onions (1,834,000 sacks of 100 lb.); maize (in bushels), 88,416,000; wheat, 36,366,000; oats, 21,780,000; rice, 20,196,000; potatoes, 6,450,000; sweet potatoes, 5,616,000. Other products are peanuts (298,980,000 pounds), vegetables, peaches (900,000 bushels), oranges (3,400,000 boxes), grape fruit (17,500,000 boxes), and sorgo syrup (600,000 gallons). The State has a very great live-stock industry, leading in the number of all cattle (7,689,000 on January 1, 1944), of sheep (10,339,900), and of mules (400,000); it also had on that date 588,000 horses, 1,578,000 milch cows and 3,106,000 swine. The wool-clip in 1943 amounted to 80,713,000 pounds of wool from 10,607,000 sheep; mohair, 17,612,000 pounds from 3,660,000 goats.

Production of petroleum (1942), 484,000,000 barrels; of carbon black from natural gas, 480,212,000 lb. (1941); natural gas, 1,086,312 million cubic feet; natural gasoline, 1,180,221,000 gallons; coal (1942), 342,000 short tons; lignite (1943), 144,144 short tons; cement (1942) 11,401,000 barrels; salt (1942), 821,111 short tons. Texas is only source of helium (9,450,855 cubic feet in 1940). Other products (1941) were sulphur (2,842,988 tons), gypsum (446,119 short tons), granite, sandstone and native asphalt. In 1942, 672,781 oz. of silver were produced, and some mercury. Western Texas has extensive undeveloped potash fields. Total value of mineral products in 1941, \$54,211,150 dollars.

In 1939, there were in the State 5,376 manufacturing establishments with 126,992 wage-earners earning 128,138,703 dollars; materials, containers, fuel and power cost 1,077,155,253 dollars, and the value of the output was 1,580,220,675 dollars. In the year ending July 31, 1943, 289,000 active cotton spindles consumed 145,000 bales of cotton.

The port of Houston is by far the most important outlet for the cotton grown in the United States, and as a commercial port is now second only to New York. The Houston Ship Channel (50 miles long), connecting Houston with the Gulf of Mexico, makes that city the largest inland cotton market of the world. The steam railways (January 1, 1943) had a total mileage of 17,640 miles (main lines), serving 66.3 per cent. of the communities. The State maintains (1942) 23,997 miles of highways, of which approximately 20,000 miles are surfaced.

On June 30, 1943, 439 national banks had deposits of 2,261,278,000 dollars, loans of 478,358,000 dollars, investments of 1,323,739,000 dollars; 391 State banks and trust companies had deposits of 429,147,000 dollars, loans of 103,782,000 dollars, investments of 176,376,000 dollars.

### UTAH.

**Constitution and Government.**—Utah, which had been acquired by the United States during the Mexican war, was, in 1847, settled by Mormons, and on September 9, 1850, organized as a Territory. It was admitted as a State into the Union on January 4, 1896; it sends to Congress two Senators and two Representatives.

The Legislature consists of a Senate (in part renewed every two years) of 23 members, elected for four years, and of a House of Representatives of 59 members elected for two years. The Constitution provides for the initiative and referendum. Electors are all citizens, male or female, who, not being idiots, insane or criminals, have the usual residential qualifications. Voters in the presidential elections of 1944 were 247,979; Franklin D. Roosevelt polled 60.5 per cent.

There are 29 counties in the State. The capital is Salt Lake City.

**Governor.**—Herbert B. Maw (D.), 1945-49 (6,000 dollars).

**Secretary of State.**—E. E. Monson (D.).

**Area and Population.**—Area, 84,916 square miles, of which 2,570 square miles are water. The Federal Office of Indian Affairs in 1940 administered 1,714,184 acres, of which 1,607,428 acres were allotted to Indian tribes. Census population on April 1, 1940, 550,310, an increase of 42,413, or 8.2 per cent., since 1930. Estimated population, July 1, 1943, 633,636, an increase of 15.1 per cent. since 1940. Population at 4 Federal censuses (with distribution by sex for 1940):—

| Years            | White   | Negro | Indian | Asiatic | Total   | Per Sq. Mile |
|------------------|---------|-------|--------|---------|---------|--------------|
| 1910             | 366,598 | 1,144 | 3,123  | 2,501   | 373,366 | 4.5          |
| 1920             | 441,901 | 1,446 | 2,711  | 3,333   | 449,396 | 5.5          |
| 1930             | 499,967 | 1,108 | 2,869  | 3,903   | 507,847 | 6.2          |
| 1940             | 512,920 | 1,235 | 3,611  | 2,544   | 550,310 | 6.7          |
| Male . . . . .   | 274,587 | 682   | 1,826  | 1,525   | 278,620 | —            |
| Female . . . . . | 268,333 | 553   | 1,785  | 1,019   | 271,690 | —            |

Of the total in 1940, 32,298 (5.8 per cent.) were foreign-born whites, of whom 7,190 (21.8 per cent.) were English, 3,353 German, 3,158 Danes, 2,832 Swedes, 2,189 Italian and 1,882 Greek. There were 1,069 Mexicans. Japanese numbered 2,210, of whom 1,381 were citizens. Of the 1940 population, 55.5 per cent. were urban, 0.1 per cent. Negro, and 27.1 per cent. (120,109 males and 28,777 females) gainfully employed; occupied dwelling units were 139,487 (of 3.95 persons); 2,749 men and 3,548 women were reported divorced.

The largest city is Salt Lake City with a population of 149,934 according to the census of 1940. Ogden had 43,688; Provo, 18,071; and Logan, 11,868.

**Education.**—In 1930, illiterates 10 years of age and older numbered 4,640 (1.2 per cent. of that age group); in 1940, of persons between the ages of 5 and 24, 144,867 (64.8 per cent.) were attending school. School attendance is compulsory for children from 8 to 18 years of age. There were (1940) 136,519 pupils and 4,417 teachers in elementary and high schools. In 1941-42, the operating cost of public instruction was 13,409,000 dollars.

July 1, 1943, 3,077,497, an increase of 14.9 per cent. since 1940. Population for four Federal census years (with distribution by sex in 1940) was :—

| Years        | White     | Negro   | Indian | Asiatic | Total     | Per Sq. Mile |
|--------------|-----------|---------|--------|---------|-----------|--------------|
| 1910         | 1,889,809 | 671,096 | 539    | 168     | 2,061,612 | 51.2         |
| 1920         | 1,617,909 | 690,017 | 824    | 487     | 2,809,187 | 57.4         |
| 1930         | 1,770,441 | 650,165 | 779    | 466     | 2,421,851 | 60.7         |
| 1940         | 2,015,583 | 661,449 | 198    | 543     | 2,677,773 | 67.1         |
| Male . . .   | 1,018,119 | 330,378 | 98     | 409     | 1,349,004 | —            |
| Female . . . | 997,464   | 331,071 | 100    | 134     | 1,328,769 | —            |

Of the total population in 1940, 22,987, or 1.1 per cent., were foreign-born whites, of whom 2,795 (12.2 per cent.) were Russian, 2,792 (12.1 per cent.) English, and 2,353 German. The urban population in 1940 formed 35.3 per cent. and the Negro 24.7 per cent. of the whole; 34.8 per cent. (722,026 males and 211,032 females) were gainfully employed (excluding those on public works); the number of occupied dwelling units was 627,659 (of 4.3 persons); 8,348 men and 11,875 women were reported divorced.

The population, according to the census of 1940, of the principal cities was: Richmond, 193,042; Norfolk, 144,332; Roanoke, 69,287; Portsmouth, 50,745; Lynchburg, 44,541; Newport News, 37,067, and Petersburg, 30,631.

**Religion and Welfare.**—The principal churches are: the Negro Baptists, with 249,036 members in 1936, Southern Methodists (189,621) and Southern Baptists (177,196). Total, all denominations, 1,017,531 members. Marriage licences are issued only after both applicants have passed the Wasserman or some similar blood test.

In 1938 Virginia established a system of Old Age Assistance under the Federal Security Act; in June, 1943, 17,854 persons were drawing an average of 10.97 dollars per month.

**Education.**—In 1930, illiterates 10 years of age or older numbered 162,588 (8.7 per cent. of that age group), of whom 65,482 were native whites and 95,148 negroes. In 1940, of persons between the ages of 5 and 24, 554,903 (52.4 per cent.) were attending school. Elementary instruction is free, and for illiterate children compulsory between the ages of 8 and 12. No child under 12 may be employed in any mining or manufacturing work. White and coloured children must not be taught in the same school.

In 1942-43, the 556,710 enrolled pupils had 18,369 teachers; the 593 accredited high schools had 5,170 full-time teachers and 113,178 pupils. The 5 public normal schools (one for Negroes) have about 450 teachers and 4,743 students. Expenditure on the operation of public schools, 1941-42, 32,921,616 dollars. The more important institutions for higher education are (1943):—

| Founded | Name and Place of College                              | Staff | Students |
|---------|--------------------------------------------------------|-------|----------|
| 1693    | William and Mary Coll., Williamsburg (State)           | 93    | 1,489    |
| 1749    | Washington and Lee University, Lexington               | 55    | 678      |
| 1819    | University of Virginia, Charlottesville (State)        | 810   | 2,483    |
| 1866    | Virginia Union University, Richmond (Colored; Baptist) | 34    | 583      |
| 1872    | Virginia Polytechnic Institute, Blacksburg (State)     | 224   | 3,582    |
| 1889    | Virginia Military Institute, Lexington (State)         | 57    | 726      |
| 1776    | Hampden-Sidney College, Hampden-Sidney (Pres.)         | 19    | 343      |
| 1832    | Randolph-Macon College, Ashland (Methodist)            | 18    | 234      |
| 1852    | University of Richmond, Richmond (Baptist)             | 90    | 900      |
| 1892    | Randolph-Macon Woman's College, Lynchburg              | 75    | 677      |

**Finance.**—The revenue (including loans) and expenditure for year ending June 30, 1943, are shown thus:—

|                                       | Dollars     |
|---------------------------------------|-------------|
| On hand, July 1, 1942 . . . . .       | 30,743,877  |
| Receipts, 1942-43 . . . . .           | 149,232,307 |
| Total . . . . .                       | 179,979,185 |
| Disbursements, 1942-43 . . . . .      | 151,012,150 |
| Cash balance, June 30, 1943 . . . . . | 28,967,035  |

The bonded debt (June 30, 1943) amounted to 18,559,351 dollars; assessed valuation of all property, 1942, was 2,631,075,461 dollars.

**Production and Industry.**—In 1940, there were 174,885 farms in Virginia with an area of 16,444,907 acres, of which 3,840,189 acres were crop land; total value of farm lands and buildings, 674,975,424 dollars. Cash income, 1943, from crops, was 132,876,000 dollars; from live-stock, 141,682,000 dollars; from Government payments, 6,392,000 dollars. In 1943, the chief crops were wheat, 5,863,000 bushels; oats, 2,860,000 bushels; potatoes, 9,594,000 bushels; sweet potatoes, 2,976,000 bushels; apples, 5,590,000 bushels. The tobacco crop, 1943, was 109,416,000 pounds. The cotton crop covered 33,000 acres, yielding 24,000 bales. National forests, 1942, cover 1,404,909 acres.

Animals on farms on January 1, 1944, were 161,000 horses; 85,000 mules; 474,000 milch cows; 1,053,000 all cattle; 353,000 sheep; and 970,000 swine. Wool-clip (1943), 1,673,000 pounds of wool from 328,000 sheep.

Virginia has considerable mineral wealth, coal being the most important with output in 1942 of 19,900,000 short tons, and manganese ores (1,043 tons in 1940). Some sheet mica and titanium ore are produced. In 1941, the mineral output was valued at 71,341,000 dollars.

There are extensive ironworks in the State, but the manufacture of cigars and cigarettes and of rayon and allied products, and the building of ships and boats lead in value of products. In the year ending July 31, 1943, 636,000 active spindles consumed 260,000 bales of cotton. Census of manufactures in 1939 showed 2,579 establishments, employing 145,831 wage-earners and salaried officers, earning 142,882,000 dollars: cost of materials, containers, fuel and power used amounted to 609,325,000 dollars, and the value of the output was 988,813,000 dollars.

In 1941, 4,257 miles of steam railway served 48.1 per cent. of the communities. The State maintains 46,171 miles of highways, of which 8,515 miles are surfaced.

On June 30, 1943, Virginia had 130 national banks with deposits of 639,526,000 dollars, loans of 144,273,000 dollars, investments of 397,512,000 dollars; 185 State banks and trust companies had deposits of 427,194,000 dollars, loans of 128,172,000 dollars, investments of 223,437,000 dollars.

persons); 1,916 men and 2,029 women were reported divorced. The largest cities are Burlington, with a population in 1940 of 27,686; Rutland, 17,082; Barre, 10,909.

**Education.**—Illiterates 10 years of age or older in 1930 numbered 6,299 (2.2 per cent. of that age group), of whom 3,261 were native whites and 3,005 foreign-born whites. In 1940, of persons between the ages of 5 and 24, 73,240 (59.0 per cent.) were attending school. School attendance during the full school term is compulsory for children from 8 to 16 years of age. In 1943-44, the 996 public elementary schools had 1,810 teachers and 39,104 enrolled pupils; the 91 high schools had 685 teachers and 14,964 pupils; the 4 normal schools had 39 teachers and 291 students. The University of Vermont (1800) had, 1943-44, 207 instructors and 670 civilian students plus approximately 1,300 students from armed services; Middlebury College (1800) had 78 instructors and 565 civilian students plus 457 navy students; Norwich University (1834) had 64 instructors and 88 civilian students plus 900 students from armed services. Expenditure on education (1943-44) amounted to 5,550,000 dollars (estimated).

**Religion and Welfare.**—The principal religious denominations are: Roman Catholic (with 99,945 members in 1936), Congregational (20,713), Methodist (14,432), Baptist, Protestant Episcopal and Universalist, in the order given. Total, all denominations, 169,792.

Marriage licences are issued only after both applicants have passed a serological test.

Old Age Assistance was being granted in September, 1944, to 5,185 persons, who received an average of 20.59 dollars per month.

On October 1, 1943, the number of persons in State correctional institutions, including the hospital for insane, was 2,894.

**Finance.**—The revenue and expenditure for the year ending June 30, 1944, were:—

|                             |            |
|-----------------------------|------------|
| Cash balance, July 1, 1943  | Dollars    |
| Receipts, 1943-44           | 5,676,404  |
| Total                       | 17,176,727 |
| Disbursements, 1943-44      | 22,853,181 |
| Cash balance, June 30, 1944 | 15,257,507 |
|                             | 7,595,624  |

Bonded debt, July 1, 1944, was 4,351,031 dollars; assessed value of real and personal property, 1944, was 293,936,297 dollars.

**Production and Industry.**—Agriculture is the most important occupation within the State. In 1940, the State contained 23,582 farms with a total area of 3,666,835 acres, of which 1,022,581 acres were crop land; total value of farm lands and buildings, 111,108,534 dollars. Cash income, 1943, from crops, 11,713,000 dollars; from live-stock, 63,190,000 dollars; from Government payments, 1,276,000 dollars. The chief agricultural crops in 1943 were: hay, 1,190,000 tons; oats, 1,188,000 bushels; maize, 2,432,000 bushels; potatoes, 1,825,000 bushels, and apples, 722,000 bushels. Vermont leads in maple products, of which output, 1944, was 970,000 gallons of syrup, and 366,000 pounds of sugar.

On January 1, 1944, Vermont had 296,000 milch cows, 450,000 all cattle, 42,000 horses, 22,000 sheep, and 41,000 swine.

The forests provide annually over 180,000,000 board feet of lumber, approximately 60,000 cords of pulpwood, and 450,000 cords of fuel-wood.

The Federal census of manufactures in 1939 found 717 manufacturing establishments, employing 21,759 wage-earners who earned 21,232,355 dollars in wages, using materials, containers, fuel and power costing 51,212,722 dollars, and giving an output valued at 103,154,301 dollars.

In 1940 the approximate production and value of the following minerals were: Granite, 614,256 cubic feet, mostly for monumental use, value 7,104,142 dollars; marble, 500,000 cubic feet, for both monumental and building use, value 2,000,000 dollars; slate, value 1,600,000 dollars; talc, value 340,000 dollars. Vermont has the largest worked deposits of asbestos in United States. Total value of mineral products, 1941, 8,132,000 dollars.

There were (January 1, 1943) 913 miles of steam railway in the State, serving 51 per cent. of the communities. The State maintains 1,781 miles of highways, all surfaced.

On June 30, 1943, there were 89 national banks with deposits of 77,249,000 dollars, loans of 25,838,000 dollars, investments of 39,178,000 dollars; 41 State banks and trust companies had deposits of 143,834,081 dollars, loans of 65,363,670 dollars, investments of 78,470,172 dollars.

### VIRGINIA.

**Constitution and Government.**—The first English Charter for settlements in America was that granted by James I in 1606 for the planting of colonies in Virginia. The State was one of the thirteen original States in the Union. On the outbreak of the civil war in 1861, Virginia, after long hesitation, decided to join the seceding States, a course objected to by some in the western portion of the State, who set up a separate government which in 1863 was admitted into the Union as West Virginia.

The General Assembly consists of a Senate of 40 members elected for 4 years and a House of Delegates of 100 members, elected for 2 years. Qualified as electors are (with few exceptions) all citizens 21 years of age, fulfilling certain residential qualifications who have paid their State poll-tax and registered. (One of 7 Southern States which limit the vote to those who have paid their poll-tax.) In the Presidential elections of 1944 voters who have paid their poll-tax, 62.4 per cent. The State numbered 388,485; Franklin D. Roosevelt polled 62.4 per cent. The State capital is Richmond; the State contains 100 counties and 24 independent cities. The State sends to the Federal Congress 2 Senators and 9 Representatives.

*Governor.*—Colgate W. Darden, jun. (D.), 1943-46 (10,000 dollars).  
*Secretary of the Commonwealth.*—Ralph E. Wilkins (D.).

**Area and Population.**—Area, 40,815 square miles, including 916 square miles of inland water. Census population on April 1, 1940, 2,877,773, an increase of 255,922, or 10.6 per cent., since 1930. Estimated population,

on farms were 111,000 horses, 4,000 mules, 376,000 milch cows, 1,010,000 all cattle, 491,000 sheep and 442,000 swine. The wool-clip in 1943 amounted to 4,934,000 pounds of wool from 543,000 sheep. The national forest-lands of the State have an area, 1942, of 10,743,917 acres.

Coal is mined in large quantities: 1,988,000 short tons in 1942. Gold output (1942), 79,396 fine ounces; silver, 369,038 fine ounces; copper, 8,525 short tons; lead, 9,516,000 pounds; mercury; zinc, 28,750,000 pounds. Clay products, granite, sandstone, marble, limestone and grindstones are produced. Antimony ores, tungsten, diatomite, crude magnesite, olivine and platinum are found. Total mineral products in 1941 reached a value of 28,507,000 dollars.

In 1939, the Federal census showed 3,240 manufacturing establishments employing 90,324 wage-earners, who earned 118,326,000 dollars; they used material, containers, fuel and power costing 350,003,000 dollars, and gave an output valued at 636,650,000 dollars.

The steam railways within the State had, in 1941, 5,216 miles (main track); 64.3 per cent. of the communities are served by railways. The State maintains 6,304 miles of highways, of which 3,620 miles are surfaced.

On June 30, 1943, 43 national banks had deposits of 1,007,729,000 dollars, loans of 173,044,000 dollars and investments of 661,288,000 dollars; 90 State banks and trust companies had deposits of 232,175,000 dollars, loans of 59,157,000 dollars and investments of 139,666,000 dollars.

## WEST VIRGINIA.

**Government.**—In 1862, after the State of Virginia had seceded from the Union, the electors of the western portion ratified an ordinance providing for the formation of a new State, which was admitted into the Union by Presidential proclamation on June 20, 1863, under the name of West Virginia. Its constitution was adopted by the voters almost unanimously on March 26, 1863.

The Legislature consists of the Senate of 30 members elected for a term of four years, one half being renewed biennially, and the House of Delegates of 94 members, elected biennially. Voters are all citizens (with necessary exceptions) 21 years of age and meeting certain residential requirements. Voters in the presidential elections of 1944 were 715,596; Franklin D. Roosevelt polled 54.9 per cent. The State capital is Charleston; there are 55 counties.

The State sends to Congress two Senators and six Representatives.

**Governor.**—Clarence W. Meadows (D.), 1945–49 (10,000 dollars).

**Secretary of State.**—Wm. S. O'Brien (D.).

**Area and Population.**—Area, 24,181 square miles, of which 91 square miles are water. The population, by the census of April 1, 1940, is

1,901,974, an increase of 172,769, or 10.0 per cent., since 1930. Estimated population, July 1, 1943, 1,754,065, a decrease of 7.8 per cent. since 1940. Population in 4 Federal census years (with distribution by sex in 1940) was:—

| Years  | White     | Negro   | Indian | Asiatic | Total     | Per Sq. Mile |
|--------|-----------|---------|--------|---------|-----------|--------------|
| 1910   | 1,156,817 | 64,178  | 36     | 93      | 1,221,119 | 50.8         |
| 1920   | 1,377,285 | 86,345  | 7      | 114     | 1,463,751 | 60.9         |
| 1930   | 1,614,191 | 114,893 | 18     | 103     | 1,729,205 | 71.8         |
| 1940   | 1,784,102 | 117,754 | 25     | 93      | 1,901,974 | 79.0         |
| Male   | 907,906   | 60,595  | 14     | 67      | 968,582   | —            |
| Female | 876,196   | 57,159  | 11     | 26      | 933,392   | —            |

Of the total population in 1940, 41,899, or 2.2 per cent., were foreign-born whites, and of these 10,601 (25.4 per cent.) came from Italy, 4,245 (10.2 per cent.) from Poland, 3,221 (7.7 per cent.) from Hungary, 2,440 from England, and 2,197 from Germany. Urban population was 28.1 per cent. and the Negro population 6.4 per cent. of the whole; 33.4 per cent. (523,813 males and 111,144 females) were gainfully employed; the number of occupied dwelling units was 444,889 (of 4.3 persons); 6,353 men and 8,446 women were reported divorced.

In 1940 the population of the principal cities were: Huntington, 78,836; Charleston, 67,914; Wheeling, 61,099; Clarksburg, 30,579; Parkersburg, 30,103, and Fairmont, 23,105.

**Religion and Welfare.**—Chief denominations are Methodists (184,723 members in 1943), Northern Baptists (113,157 members), and Roman Catholics (71,265). Total membership, all denominations, 531,983.

Marriage licences are issued only after both applicants have passed the Wasserman or some similar blood test.

Since June, 1936, the State provides a system of Old Age Assistance; in June, 1943, 19,459 persons were receiving an average of 16.18 dollars per month; 8,730 families were receiving aid for dependent children amounting to 29.78 dollars a month. There are 19 charitable, penal and correctional institutions. The State prisons in June, 1941, held 2,867 men and women.

**Education.**—In 1930, illiterates 10 years of age or older numbered 62,492 (4.8 per cent. of that age group), of whom 42,476 were native whites and 10,173, Negroes; in 1940, of persons between the ages of 5 and 24, 440,123 (56.6 per cent.) were attending school. Elementary education is free for all from 6 to 21 years of age, and school attendance for a minimum 180 days annually is compulsory for all children between the ages of 7 and 16 years. The public or free schools are non-sectarian. In 1941–42, the 5,284 public elementary schools had 342,325 enrolled pupils and 10,717 teachers (including 644 Negro teachers), and 415 public high schools had 5,402 teachers (including 374 Negro) and 149,286 pupils. The 6 public teachers colleges have about 160 teachers and 2,300 students. Expenditure from State funds on public schools in 1941–42 was 15,437,285 dollars.

The West Virginia University, founded in 1868 at Morgantown, had in 1943, 270 professors and instructors and 2,781 full-time students. Bethany College (1840), under the auspices of the Christian Church, had 33 instructors and 479 students. West Virginia Wesleyan College (1890), a Methodist institution, had 31 instructors and 350 students; West Virginia Institute

## WASHINGTON.

**Government.**—Washington, formerly part of Oregon, was created a Territory in 1853, and was admitted into the Union as a State on November 11, 1889. Its settlement dates from 1811. The Legislature consists of a Senate of 46 members elected for 4 years, half their number retiring every 2 years, and a House of Representatives of 99 members, elected for 2 years. The State contains 39 counties. The State capital is Olympia (population, 1940, 13,254). To Congress the State sends 2 Senators and 6 Representatives.

Qualified as voters are (with some exceptions) all citizens 21 years of age, having the usual residential qualifications, who can read and speak English. In the presidential elections of 1944 voters numbered 856,828; Franklin D. Roosevelt polled 56.8 per cent.

**Governor.**—M. C. Wallgren (D.), 1945-49 (6,000 dollars).

**Secretary of State.**—Mrs. Belle Reeves (D.).

**Area and Population.**—Area, 68,192 square miles, of which 1,215 square miles are inland water. Public lands unappropriated on June 30, 1942, totalled 592,863 acres. Census population on April 1, 1940, 1,736,191, an increase of 172,795, or 11.0 per cent., since 1930. Mainly due to the influx of war workers, population July 1, 1943 (U.S. census estimate) was 2,032,949, showing an increase of 17.1 per cent. since 1940. Population in four Federal census years (with distribution by sex in 1940) was:—

| Years  | White     | Negro | Indian | Asiatic | Total     | Per Sq. Mile |
|--------|-----------|-------|--------|---------|-----------|--------------|
| 1910   | 1,109,111 | 6,058 | 10,997 | 15,824  | 1,141,990 | 17.1         |
| 1920   | 1,319,777 | 6,888 | 9,061  | 20,900  | 1,356,621 | 20.3         |
| 1930   | 1,521,661 | 6,840 | 11,253 | 23,642  | 1,563,396 | 22.3         |
| 1940   | 1,693,147 | 7,424 | 11,393 | 19,227  | 1,736,191 | 25.9         |
| Male   | 888,688   | 4,321 | 5,399  | 11,899  | 905,757   |              |
| Female | 814,459   | 3,103 | 5,454  | 7,418   | 880,434   |              |

The foreign-born white population in 1940 numbered 208,163, constituting 11.6 per cent. of the total population. Of this number 42,306 (20.6 per cent.) came from Canada, 26,998 from Sweden, 26,489 from Norway, 16,206 from England, 15,470 from Germany and 9,199 from Finland. Japanese numbered 14,565, of whom 8,882 were citizens. Of the total population in 1940, 53.1 per cent. were urban, 4.4 per cent. Negro, and 35.0 per cent. (478,325 males and 129,347 females) gainfully employed; number of occupied dwelling units was 537,337 (of 3.23 persons); 18,658 men and 18,439 women were reported divorced.

There are 18 Indian reservations, the largest being the Colville, which

contains 1,051,488 acres; total population, 1940, 14,103. Total area administered by the U.S. Bureau of Indian Affairs is 2,714,623 acres, of which 1,745,512 acres have been assigned to tribes.

Leading cities are Seattle, with a population (census of 1940) of 368,802; Spokane, 122,001; Tacoma, 109,408; Everett, 30,224, and Bellingham, 29,814.

**Education.**—Education is given free, and is compulsory for children from 8 to 15 years of age. In 1941, the 1,433 elementary schools had 5,970 teachers and 210,348 pupils; 80 junior high schools had 1,097 teachers and 33,479 pupils; 300 high schools had 3,247 teachers and 89,894 pupils. The 3 State colleges of education have 190 teachers and 2,200 students. The total expenditure on public elementary and secondary schools for the school year 1941 was 32,845,973 dollars. In 1940 private and parochial schools had 13,693 elementary and 4,549 high school pupils.

The University of Washington, founded 1861, at Seattle, had, in 1943, 450 teachers and 9,000 students, and the State College at Pullman for science and agriculture, founded 1890, had 245 teachers and 3,552 students. There are 26 other colleges and special schools.

**Religion and Welfare.**—Chief religious bodies are the Catholic (101,287 members in 1936), Methodist (40,978), Presbyterian (33,983), Lutheran, Baptist, Disciples, and Congregationalist. Total, all denominations, 367,261.

Marriage licences are issued only after both applicants have passed the Wasserman or some similar blood test.

Old Age Assistance is provided for American citizens 65 years of age or older who have been residents of the State for 5 years (within the 10 years immediately preceding application) with income not exceeding 480 dollars per annum and 40 dollars per month. In June, 1943, 61,729 persons were drawing an average of 34.76 dollars per month; aid to 8,045 dependent children averaged 27.71 dollars per child monthly; to 808 blind persons, 37.12 dollars per person monthly. The State's penal and reformatory system in 1942 held 2,254 men and women. Incapacitated persons and those in correctional institutions numbered 9,469.

**Finance.**—For the year ending March 31, 1943, the State's revenue was (in dollars) 151,884,000 (120,728,000 from taxes and 21,284,000 from Federal grants), while expenditure was 133,772,000 (58,959,000 in direct State operations and 19,795,000 through other agencies). Chief source of revenue, general sales taxes, furnished 48,598,000 dollars and taxes on motor fuels, 16,700,000 dollars.

Assessed valuation of taxable property in 1942 was 1,164,925,443 dollars; net long-term debt on April 1, 1943, was 8,974,000 dollars.

**Production and Industry.**—Agriculture is the leading occupation of the people. In 1940, there were 81,686 farms with an acreage of 15,181,815, of which 3,569,803 acres were crop land; total value of farm lands and buildings, 593,366,445 dollars. Cash income, 1943, from crops was 247,319,000 dollars; from live-stock, 150,300,000 dollars; from Government payments, 9,022,000 dollars. Washington far exceeds other states in production of commercial apples; 23,000,000 bushels in 1943. Other crops in 1943 were: wheat, 51,667,000 bushels; barley, 11,700,000 bushels; oats, 9,264,000 bushels; maize, 1,457,000 bushels; potatoes, 13,200,000 bushels; pears, 5,266,000 bushels; cherries, 31,800 tons; peaches, 2,052,000 bushels; prunes, 23,700 tons; hops, 15,207,000 pounds. On January 1, 1944, animals

of Technology (1891), at Institute, had 45 teachers and 781 students; Marshall College (1837), had an enrolment of 1,463 students.

**Finance.**—The State Fund revenue and expenditure for the year ending June 30, 1943, were as follows:—

|                                  | Dollars            |
|----------------------------------|--------------------|
| Balance, July 1, 1942 . . . . .  | 24,290,718         |
| Receipts, 1942-43 . . . . .      | 184,303,048        |
| <b>Total</b> . . . . .           | <b>158,593,766</b> |
| Disbursements, 1942-43 . . . . . | 130,399,805        |
| Balance, June 30, 1943 . . . . . | 28,193,961         |

The net long-term debt was 70,590,000 dollars on June 30, 1943; assessed value of all property in 1943 was 2,058,204,789 dollars.

**Production and Industry.**—In 1940, the State had 99,282 farms, with an area of 15,417,600 acres, of which 1,589,586 acres were crop land; total value of farm lands and buildings, 269,827,285 dollars. Cash income, 1943, from crops was 16,763,000 dollars; from livestock, 64,294,000 dollars; from Government payments, 2,774,000 dollars. The chief agricultural products in 1943 were wheat, 1,054,000 bushels; maize, 12,042,000 bushels; oats, 1,599,000 bushels; hay, 964,000 tons, and potatoes, 2,775,000 bushels. The tobacco yield, 1943, amounted to 2,702,000 pounds. Apples (2,046,000 bushels in 1943), peaches, plums and grapes are grown. On January 1, 1944, the domestic animals were 96,000 horses, 10,000 mules, 246,000 milch cows, 610,000 all cattle, 407,000 sheep and 351,000 swine. In 1943, the wool-clip produced 2,096,000 pounds of wool from 403,000 sheep. National forest lands, 1942, amounted to 903,411 acres.

West Virginia has extensive mining and quarrying industries. In 1942, output of petroleum from 17,100 wells was 3,574,000 barrels; natural gasoline, 71,922,000 gallons, and natural gas (1941), 207,681 million cu. ft. The coal area extends over 17,280 square miles, and estimated coal reserves are as of December 31, 1940, 63,687,664,661 tons; 156,750,000 short tons of coal were produced in 1942; coke (bee-hive) and by-product, 2,799,900 short tons. Pig iron output (1940), 921,812 long tons; lime (1940), 278,300 short tons; salt (1942), 140,216 short tons; sand and gravel (1940), 2,297,610 short tons; sandstone and limestone (1940), 4,330,360 short tons. The total value of mineral output in 1941 was 425,626,000 dollars.

The Federal census of manufactures of 1939 showed 1,130 manufacturing establishments employing 74,989 wage-earners who earned 88,487,000 dollars; materials, containers, fuel and power used cost 227,062,000 dollars, and the value of the output was 441,840,000 dollars.

In 1941, there were within the State 3,809 miles of steam railway, besides 302 miles of electric railway track. The State has a new system of improved highways totalling 38,000 miles, of which 4,426 miles are surfaced.

On June 30, 1943, West Virginia had 77 national banks with deposits of 265,713,000 dollars, loans of 53,627,000 dollars, investments of 151,389,000 dollars; 103 State banks and trust companies had deposits of 224,802,000 dollars, loans of 53,700,000 dollars, investments of 125,031,000 dollars.

## WISCONSIN.

**Government.**—Wisconsin, first settled in 1670, by French traders and missionaries, is a part of the country known first as New France from 1634 until surrendered to the British in 1763 and as the North-west Territory after its cession to the United States in 1783; the region now embraced by the State was successively part of the territories of Indiana, Illinois, and Michigan, in 1836 becoming the Territory of Wisconsin with boundaries embracing what is now Iowa, Minnesota and part of the two Dakotas. It was admitted into the Union with its present boundaries on May 29, 1848. The legislative power is vested in a Senate of 33 members, elected for four years, one-half (16 or 17 alternately) being elected each two years, and an Assembly of 100 members, all elected simultaneously for two years. The State has 71 counties. The capital is Madison.

Wisconsin has universal suffrage for all citizens over 21 years of age. In the presidential elections of 1944, voters numbered 1,339,132; Franklin D. Roosevelt polled 48.6 per cent. Wisconsin is represented in Congress by 2 Senators and 10 Representatives.

**Governor (Acting).**—Walter S. Goodland (R.), 1945-47 (6,000 dollars).  
**Secretary of State.**—Fred. R. Zimmerman (R.).

**Area and Population.**—Area, 56,154 square miles, including 1,439 square miles of inland water, but excluding any part of the Great Lakes. Census population, 1940, 3,137,587, an increase of 198,581, or 6.3 per cent. since 1930. Estimated population, July 1, 1943, 3,010,322, a decrease of 4.1 per cent. since 1940. Population in four census years (with distribution by sex in 1940) was:—

| Years  | White     | Negro  | Indian | Asiatic | Total     | Per Sq. Mile |
|--------|-----------|--------|--------|---------|-----------|--------------|
| 1910   | 2,320,555 | 2,900  | 10,142 | 263     | 2,333,860 | 42.2         |
| 1920   | 2,616,988 | 5,201  | 9,611  | 317     | 2,632,067 | 47.6         |
| 1930   | 2,916,255 | 10,739 | 11,548 | 464     | 2,939,006 | 53.7         |
| 1940   | 3,112,752 | 12,158 | 12,265 | 412     | 3,137,587 | 57.8         |
| Male   | 1,587,193 | 6,318  | 6,354  | 311     | 1,600,176 | —            |
| Female | 1,525,559 | 5,840  | 5,911  | 101     | 1,537,411 | —            |

The foreign-born white population in 1940 numbered 288,774, representing 9.3 per cent. of the total population. Of these 68,808 (30.8 per cent.) were German, 81,487 (10.9 per cent.) Polish, 23,211 Norwegian, 15,114 Russian, 14,880 Austrian, 13,697 Swedish, 12,654 Czechoslovakian, 11,622 Canadian, and 9,491 English. Of the total population in 1940, 53.5 per cent. were urban, 0.4 per cent. Negro, and 39.1 per cent. (967,550 males and 260,002 females) gainfully employed; number of occupied dwelling units was 827,265 (of 3.8 persons); 15,203 men and 17,604 women were reported divorced. On January 1, 1942, 448,761 acres of land (including 6 reservations) and about 18,000 persons were under the jurisdiction of the Bureau of Indian Affairs.

## WYOMING.

**Government.**—Wyoming, first settled in 1834, was admitted into the Union on July 10, 1890. The Legislature consists of a Senate of 27 members, elected for four years (about one-half retiring every two years), and a House of Representatives of 56 members elected for two years. The State contains 23 counties. The capital is Cheyenne. The State sends to Congress 2 Senators and 1 Representative. The suffrage extends to all citizens, male and female, who can read, and who have the usual residential qualifications. In the presidential elections of 1944, voters numbered 101,340; Franklin D. Roosevelt polled 48·8 per cent.

**Governor.**—Dr. L. C. Hunt (D.), 1943-47 (8,000 dollars).

**Secretary of State.**—William S. Jack (D.), appointed October 16, 1944.

**Area and Population.**—Area, 97,914 square miles, of which 406 square miles are water. Of the total, about 3,438 square miles are comprised within the Yellowstone National Park, which since 1872 has been reserved for public uses, and 150 square miles contained in the Grand Teton National Park established in 1929. Public lands unappropriated on June 30, 1943, totalled 16,660,805 acres; national forests (1942), 8,662,729 acres.

Census population on April 1, 1940, 250,742, an increase of 26,177, or 11·2 per cent., since 1930. Estimated population, July 1, 1943, 254,390, an increase of 1·5 per cent. since 1940. Federal census results for four years (including distribution by sex in 1940) were:—

| Years  | White   | Negro | Indian | Asiatic | Total   | Per Sq. Mile |
|--------|---------|-------|--------|---------|---------|--------------|
| 1910   | 140,318 | 2,285 | 1,486  | 1,926   | 145,955 | 1·5          |
| 1920   | 190,146 | 1,875 | 1,343  | 1,538   | 194,402 | 2·0          |
| 1930   | 221,941 | 1,250 | 1,845  | 1,229   | 225,565 | 2·3          |
| 1940   | 246,597 | 956   | 2,349  | 840     | 250,742 | 2·6          |
| Male   | 132,792 | 492   | 1,288  | 543     | 135,055 | —            |
| Female | 113,815 | 464   | 1,111  | 297     | 115,687 | —            |

In 1940, the foreign-born white population numbered 16,779 (6·8 per cent. of the total), of whom 1,490 (8·9 per cent.) were English, 1,392 German, 1,353 Swedish, 1,325 Russian and 1,198 Mexicans. Japanese numbered 643, of whom 390 were citizens. Of the total population in 1940, 37·3 per

cent. were urban, 0·4 per cent. Negro, and 40 per cent. (84,243 males and 16,166 females) gainfully employed; 69,374 occupied dwelling units had an average of 3·6 persons; 2,154 men and 1,875 women were reported divorced. The Federal Bureau of Indian Affairs in 1942 administered 2,058,551 acres, of which 1,885,070 acres were allotted to tribes.

The largest towns are Cheyenne (capital), with census population in 1940 of 22,474; Casper, 17,964; Laramie, 10,627, and Sheridan, 10,529.

**Education.**—In 1940, illiterates 10 years of age or older numbered 2,866 (1·7 per cent. of that age group); of persons between the ages of 5 and 24, 53,904 (59·0 per cent.) were attending school.

In 1942, 1,392 public schools had 2,825 teachers, and 55,268 enrolled pupils; 132 senior high schools had 849 teachers and 14,846 pupils. The University of Wyoming, founded at Laramie in 1887, had in 1943, 135 professors and instructors and 1,592 students. There is also a State Agricultural College at Laramie. Expenditure on elementary and secondary schools in 1941-42 was 6,741,229 dollars.

**Religion and Welfare.**—Chief religious bodies are the Roman Catholic (with 17,695 members in 1936), Mormon (16,497), and Methodist (6,284). Total, all denominations, 67,770.

Marriage licences are issued only after the male applicant has presented a physician's certificate (void after a very limited period) showing freedom from venereal disease.

Old Age Assistance (maximum 40 dollars a month) is provided for needy American citizens 65 years of age or older who have been residents of the State and county for 5 years out of the preceding 9 years; payments bridge the difference between a standard personal or household budget and actual income. On July 1, 1943, 3,411 cases were drawing an average of 31·17 dollars per month. Aid to 489 dependent children averaged 33·57 dollars monthly and aid to 122 blind averaged 34·76 dollars monthly.

The State penal and reformatory system in 1943 held 306 men and women.

**Finance.**—The cash receipts and disbursements for the biennium ending September 30, 1944, were:—

|                                       | Dollars    |
|---------------------------------------|------------|
| Balance, October 1, 1942 . . . . .    | 6,611,040  |
| Receipts for 1942-44 . . . . .        | 37,802,809 |
| Total . . . . .                       | 44,413,849 |
| Disbursements, 1942-44 . . . . .      | 31,804,963 |
| Balance, September 30, 1944 . . . . . | 12,608,886 |

On June 30, 1944, the bonded debt was 2,270,000 dollars, and the assessed value of real and personal property (1944), 377,876,833 dollars.

**Production and Industry.**—Wyoming is semi-arid and agriculture is carried on by irrigation and by 'dry farming.' Irrigable lands, 1940, amounted to 2,277,048 acres; area irrigated, 1939, 11,627 farms covering 1,486,498 acres. In 1940, there were 15,018 farms, with a total area of 28,025,979 acres, of which 2,054,203 acres were crop land; total value of farm land and buildings, 158,971,294 dollars. Cash income, 1943, from crops was 17,682,000 dollars; from live-stock, 69,275,000 dollars; from Government payments, 3,443,000 dollars. Principal crops in 1943 were: alfalfa, 542,000 tons; sugar beets, 270,000 tons; potatoes, 2,175,000 bushels, as well as cereals. The wool-clip (1943) yielded 32,997,000 pounds of wool from

8,367,000 sheep. Animals on farms on January 1, 1944, were 123,000 horses, 70,000 milch cows, 1,052,000 all cattle, 8,521,000 sheep, and 184,000 swine. The State has numerous fish hatcheries and the largest elk herds in the world.

Wyoming is largely a coal-producing State. In 1942 the output of coal was 8,025,000 short tons; petroleum, 32,812,000 barrels; of natural gasoline, 33,675,000 gallons; natural gas (1941), 29,284 million cubic feet; iron ore output (1940), 831,314 gross tons; bentonite (1940), 200,000 tons, which is 35 per cent. of the nation's total. The quarries yield limestone and sandstone; phosphate rock, tin, sodium salts and vermiculite are found. Value of mineral products in 1942 was 207,250,000 dollars.

The 1939 Federal census showed 310 industrial establishments; the wage-earners numbered 4,276, wages paid amounted to 6,437,565 dollars, the materials, containers, fuel and power used cost 29,798,628 dollars, and the output amounted to 45,423,103 dollars.

In 1942, the steam railways had a length of 2,012 miles; 60 per cent. of the communities are served by railways in 1939. The State highway system comprises 4,076 miles, of which 3,926 miles are surfaced.

On June 30, 1944, Wyoming had 26 national banks with deposits of 97,505,000 dollars, loans of 15,478,000 dollars, investments of 52,293,000 dollars; 30 State banks and trust companies had deposits of 38,581,000 dollars, loans of 9,888,000 dollars, investments of 16,637,000 dollars.

## OUTLYING TERRITORIES.

### ALASKA.

**Government.**—Alaska was purchased by the United States from Russia under the treaty of March 30, 1867, for 7,200,000 dollars, at one penny an acre. It was not organized until 1884, when it became a 'District' governed by the laws of the State of Oregon. By Act of Congress approved August 24, 1912, Alaska became a Territory; the legislative assembly consists of 16 senators, elected for 4 years, and 24 representatives, elected for 2 years. Congress reserved to itself the right to legislate on certain subjects, so that the Territory is governed conjointly by Congress at Washington and by its local legislative assembly. Regular sessions are held biennially and last for 60 days. Special sessions may be called by the Governor. The latter is appointed for four years by the President; to be eligible he must have resided for 3 years in the Territory.

The Territory is represented in Congress by one Delegate, elected biennially, who sits in the House of Representatives, but has no vote.

**Governor.**—Ernest H. Gruening, 1944–48 (10,000 dollars).

**Secretary of Alaska.**—Lew M. Williams.

**Area and Population.**—The gross area (land and water) is 586,400 square miles. Alaska has 2 national forests: the Tongass with an area of 16,080,000 acres, and the Chugach with an area of 4,800,000 acres total area, 20,863,779 acres under Federal control. Mt. McKinley National Park embraces 1,933,494 acres. Census population, in four census years, was:—

| Year | Population | Per Sq. Mile | Year | Population | Per Sq. Mile |
|------|------------|--------------|------|------------|--------------|
| 1900 | 64,356     | 0.1          | 1930 | 59,378     | 0.1          |
| 1920 | 55,036     | 0.1          | 1940 | 72,524     | 0.1          |

Of the population in 1940, 43,003 were males and 29,521 females; 39,170 were whites, of which 8,786 were foreign born, and 30,384 were native stock (of whom 11,283 were Indians, 15,576 were Eskimos and 5,599 were Aleuts). 4,334 from Scandinavian countries, 589 Germans and 263 Japanese.

The largest town is Juneau, the seat of Government, which had (census of 1940) a population of 5,729; other towns are Ketchikan, 4,695; Anchorage, 3,495; Fairbanks, 3,455; Sitka, 1,945; Nome, 1,550; Petersburg, 1,228. There are altogether 23 incorporated towns.

**Education and Justice.**—In 1940, of 24,778 persons between 5 and 24 years (including all races), 47.6 per cent. were attending school; 44.3 per cent. of the native races were attending school. In 1943, there were 802 teachers in 44 rural and 18 city schools with 5,349 pupils; the Office of Indian Affairs maintained 119 day schools where 296 teachers had 6,240 pupils and 3 boarding schools enrolled 430 students; this office also handles the education, hospitalisation (6 native hospitals) and general care of the native population. The University of Alaska (founded in 1922) had a total enrolment in all departments of 895 in 1943–44. A total of 1,030,835 dollars was expended on education in 1943–44.

The Territory constitutes one judicial district with 4 divisions, each with a district judge appointed by the President.

**Religion and Public Welfare.**—In Alaska are many religious missions representing the Russian Orthodox, Roman Catholic, Episcopalian, Presbyterian, Methodist and other denominations. The Federal public health services provide sanitary inspection, public health laboratories, nursing services for infants, school and crippled persons' welfare.

Old Age Assistance was established under the Federal Social Security Act, and 1,398 persons were recipients of an average of 31.32 dollars per month during 1943. Indians now come under the law. There are 109 needy children being aided through mothers' allowances.

**Finance.**—The fiscal system is controlled by laws enacted by the Territorial Legislature and is separate from revenues received by the Federal Government from occupation and trade licenses which are paid into and disbursed from the Alaska Fund in the Federal Treasury. Taxation is extremely light, especially of the extractive industries.

### HAWAII.

The Hawaiian Islands lie in the North Pacific Ocean, between 18° 54' and 22° 15' north latitude, and 154° 50' and 160° 30' west longitude. They are about 2,020 miles south-west of San Francisco, and are in the line of steamer travel between San Francisco and the Orient, Victoria, B.C., Australia and New Zealand.

**Government.**—The Hawaiian Islands (20 in number and 9 of them inhabited; formerly known as the Sandwich Islands), celebrated in August, 1928, the 150th anniversary of their discovery by Captain James Cook, the English navigator. The islands formed during the greater part of the nineteenth century an independent kingdom, but in 1893 the reigning Queen, Liliuokalani (died November 11, 1917), was deposed and a provisional government formed; in 1894, a Republic was proclaimed, and in accordance with the request of the people of Hawaii expressed through the Legislature of the Republic, and a resolution of the United States Congress of July 6, 1898 (signed July 7 by President McKinley), the islands were on August 12, 1898, formally annexed to the United States. On June 14, 1900, they were constituted as the Territory of Hawaii. The Organic Act has since been amended several times. At the elections in 1940 the islands expressed a desire for statehood, with 39,413 approving and 19,911 against; the registered voters numbered 87,812. There is a Legislature of two Houses, a Senate of 15 members elected for four years, and a House of Representatives of 30 members elected for two years. Sessions, limited to 60 days, are held biennially. The Governor and Secretary are appointed for four years by the President of the United States; both must have been residents of the islands for 3 years.

The Territory is represented in Congress by a delegate elected biennially to the House of Representatives.

**Governor.**—Ingram M. Stainback, 1942-46 (10,000 dollars).

**Secretary of the Territory.**—Charles M. Hile.

**Area and Population.**—The area of the 8 principal islands is 6,435 square miles with population, April 1, 1940, of 423,330, with 14,375 Hawaiians, 49,935 part-Hawaiians and 157,905 Japanese (of whom 120,552 were natives and citizens). The principal islands of the group are Hawaii, 4,030 square miles (population, 1940, 68,398); Maui, 728 (52,495); Oahu, 604 (310,503); Kauai, 555 (33,479); Molokai, 260 (5,032); Lanai, 141 (2,356); Niihau, 72 (136); Kahoolawe, 45 (2). The capital, Honolulu, on the island of Oahu, had an estimated population in 1941 of 200,158, and Hilo, 22,667; City and County of Honolulu, 1941, 310,503; County of Hawaii, 68,398; County of Maui, 52,495; County of Kauai, 33,479. Estimated number of non-Hawaiian races on June 30, 1941, were 159,534 Japanese, 141,627 Caucasians, 52,060 Filipinos, 29,237 Chinese, 8,460 Puerto Ricans, 6,881 Koreans, 849 others.

**Religion, Education and Welfare.**—The Hawaiians are Christians. There is an American Protestant Episcopal bishop at Honolulu; also a Roman Catholic bishop, and ministers of various denominations.

Elementary education is free. The language in the schools is English. In 1941 there were 188 public schools with 3,391 teachers and 91,121 enrolled pupils; also 127 private schools with 833 teachers and 19,836 enrolled pupils. High schools, both public and private, had 21,510 pupils in 1940. The pupils in public schools in 1940 were classed as 91,375 Hawaiian by birth and 446 foreign-born. There are a normal training school, a reformatory industrial school for boys and one for girls, a territorial trade school, a school for the deaf and blind, a school for feeble-minded; also a territorial university (University of Hawaii, Honolulu), founded in 1907, with 255 instructors and 4,431 students in 1941. Total expenditure for public elementary and secondary schools, 1940, was 8,530,000 dollars.

In 1940-41 the Federal Social Security Board spent 660,000 dollars for the benefit of more than 7,600 persons. Number of workers in the Federal Unemployment Compensation Scheme in June, 1942, was 108,300; funds available for benefit, December 31, 1942, were 11,545,000 dollars.

**Justice.**—Hawaii has a supreme court, circuit courts, a court of domestic relations, district courts, and a land registration court. The circuit judges sit also as juvenile courts. The judges of the supreme and circuit courts are appointed by the United States President; the district magistrates by the Chief Justice of Hawaii. There is also a United States District Court, the judges of which, and the U.S. Marshal, are appointed by the President.

**Finance.**—Revenue is derived mainly from taxation of real and personal property, income and inheritance taxes, licences, land sales and leases, water-works and road, school and poll taxes. For the year ending June 30, 1940, the receipts in the general fund were 12,194,829 dollars and disbursements, 11,760,407 dollars. For the biennium on June 30, 1941, there was a surplus in the general fund of 2,523,594 dollars.

On June 30, 1941, the bonded debt amounted to 36,539,000 dollars. In 1941 the assessed value of property was 402,962,545 dollars.

**Production and Commerce.**—In 1940, there were 4,995 farms with an acreage of 2,485,648; total value of land and buildings was 112,788,000 dollars. Sugar and pineapples are the staple industries, while molasses, coffee, hides, bananas, sisal and wool are also exported. For the calendar year 1940, output of sugar cane (from 42 plantations covering two-thirds of the productive land in the islands) was 8,535,023 tons; in 1941, output of sugar, 947,190 tons, of which 36,617 tons were consumed locally. The pineapple crop (from 48,598 acres operated by nine companies), in 1940 was 614,484 tons; shipments of canned pineapples and pineapple juice in the crop year ending May 31, 1941, were 22,341,429 cases. The 64 forest reserves aggregate 1,027,299 acres; public lands, 1,588,430 acres.

For the calendar year 1941 imports amounted to 192,855,457 dollars, and the exports to 133,653,066 dollars. The shipments of merchandise from the United States to Hawaii for 1941 amounted to 186,662,139 dollars, and those from Hawaii to the United States to 122,640,189 dollars, of which sugar, pineapples and coffee were the principal items. United Kingdom exports (Board of Trade figures) in 1938 totalled 39,179%, and imports, to Hawaii (Board of Trade figures) in 1939, 1940 and 1941 were 37,000%, 44,000% and 48,000% respectively; excluding such supplies, exports in 1942, 1943 and 1944 were 5,000%, 16,000% and 18,000% respectively.

**Shipping and Communications.**—Several lines of steamers connect the islands with the mainland of the United States, Canada, Australia, the

The Territory has no funded debt. The total assessed property valuation for 1943 was 45,464,277 dollars.

**Production and Industry.**—In some parts of the Territory the climate during the brief summer is not unsuitable for agricultural operations. In 1930, there were 500 farms with a total area of 525,942 acres, of which 8,825 acres was improved land. Total value of land and buildings in 1930 was 2,857,185 dollars. The 1930 census showed 37,287 dogs used as work animals and 468 horses. In Northern and Western Alaska are 200,000 square miles of treeless region worthless for agriculture but capable of furnishing pasturage for 4,000,000 reindeer. There were (in 1943) 140,000 reindeer on the ranges. The Office of Indian Affairs administers the reindeer industry on behalf of the native Esquimaux and Indians, the policy being to buy out non-native reindeer owners. In 1943, 19,758 reindeer were butchered, 17,496 of which were used for food and clothing. The Government-owned fur-seal herd of the Pribilof Islands, administered by the Department of Commerce, comprises about 85 per cent. of the fur seals of the world. This herd contained 2,720,780 animals on August 10, 1941.<sup>1</sup> Territory's 'wild life on the hoof' has an estimated value of about 100,000,000 dollars, of which 4 million dollars' worth is cropped annually by trappers and hunters. Value of furs shipped in 1943 was 2,048,942 dollars (excluding fur seals). Heading the list were 33,705 mink valued at 421,312 dollars; 212,852 muskrats valued at 424,704 dollars; 15,148 beaver valued at 454,380 dollars. Game and wild fur bearers are protected by closed seasons.

Timber fringes the shore of the mainland and all the islands extending inland to a depth of 5 miles. The estimated stand is about 84 thousand million board feet, of which 73 per cent. is western hemlock, 21 per cent. spruce and 6 per cent. cedars. A total of 110,000,000 board feet of timber were produced in 1943, mostly spruce, but including hemlock and cedar.

The chief industries of Alaska are salmon fishing and mining. In 1943, the commercial fisheries of Alaska employed 23,711 persons; the value of the products, exclusive of aquatic furs, was 66,516,317 dollars. In 1943, the total number of salmon caught was 85,848,723. The output of canned salmon totalled 5,428,269 cases, valued at 57,823,679 dollars, from 83 canneries, employing 19,143 people.

Gold is worked in South-East Alaska, where a low-grade ore is found, in the interior on the Yukon river, and at Nome and other places on the west coast. In 1941, 687,657 fine ounces of gold were produced; silver, 191,000 ounces; crude platinum, 25,000 troy ounces; copper, 20,000 pounds; lead, 1,760,000 pounds. Total value of mineral production, 1941, 26,193,000 dollars.

**Commerce and Communications.**—The value, in dollars, of the Territory's commerce for five calendar years was as follows:—

| Year | Imports from U.S. | Imports from others | chandise Exports to U.S. | Exports, gold and silver to U.S. | Merchandise Exports to others |
|------|-------------------|---------------------|--------------------------|----------------------------------|-------------------------------|
| 1936 | 89,060,577        | 285,148             | 60,807,603               | 16,870,580                       | 452,204                       |
| 1938 | 42,676,622        | 176,025             | 56,044,728               | 21,614,000                       | 605,300                       |
| 1939 | 44,364,710        | 151,383             | 42,228,758               | 30,150,000                       | 587,044                       |
| 1940 | 48,039,450        | 149,833             | 40,173,952               | 20,984,000                       | 411,315                       |
| 1941 | 82,029,238        | 177,367             | 67,699,706               | 17,929,349                       | 771,628                       |

<sup>1</sup> Only 137 fur-seal skins had been taken at the Pribilof Islands when war activities in the Aleutians caused the armed forces in June to evacuate the population to south-east Alaska, 1,500 miles away. Therefore, no computation of the herd was made in 1942.

There is a railway of 112 miles from Skagway to the town of Whitehorse (in the Canadian Yukon region); thence transport is by coach or aeroplane, or, in summer, by steamer. The Alaska railroad runs from Seward to Fairbanks, a distance of 470 miles (509 miles, including branches). Twenty-two aviation companies carried 83,823 passengers, 3,550,986 lb. of mail and freight in 1943. Alaska maintains, from navigable waterways and railroads into interior, 2,621 miles of roads, 139 miles of tramway, 2,376 miles of sled roads, and 7,972 miles of permanent trails. The Alaskan towns are connected by telephone with the United States and with the United States and Canada by telegraph and radio; there are 209 post-offices, and good mail services to the Territory.

On October 29, 1942, the Alaska Highway, to be known as the 'Alaska Military Highway,' was opened. It is 1,671 miles long, and runs from Fort St. John, British Columbia, following the general line of the airports which Canada had constructed at Fort Nelson, Watson Lake and Whitehorse, and thence via Boundary and Big Delta to Fairbanks. The highway links Alaska and the United States. The United States defrayed the cost of construction and the war-time maintenance of the road; after the war the road will become part of the Canadian highway system.

The Territory had, on June 30, 1944, four national banks and 14 territorial banks with combined capital of 985,000 dollars, surplus and net undivided profits of 1,836,350 dollars, and total deposits of 54,769,660 dollars.

Philippines, China, and Japan, but since 1939 the services have been curtailed. During the year ending June 30, 1941, 1,667 vessels of 11,893,803 tons entered ports of the islands. An inter-island steam navigation company with 7 steamers provides communication between the different islands. Post offices number 94. There are about 1,038 miles of railway in the islands, including 667 miles of plantation railways. There are telephones on the islands of Oahu, Maui, Hawaii, Kauai, and Molokai; telephone stations numbering 34 link 20,422 business and 30,842 residential telephones. There is also a radio-telephone system connecting the four principal islands with the United States. Wireless telegraphy is in operation between the islands for commercial purposes and for communication with vessels at sea and with the Pacific coast, and also with Japan. Hawaii is connected by cable with both shores of the Pacific and by radio-telephone to the United States, Europe and other parts of the world. Commercial air services between the islands carried 35,132 passengers in the year ending June 30, 1941.

Nine banks with 21 branches in operation on December 31, 1942, had combined capital and reserves of 22,000,000 dollars and total deposits of 287,700,000 dollars, of which 99,800,000 dollars were time or savings deposits.

#### PUERTO RICO.

**Government.**—Puerto Rico, by the treaty of December 10, 1898 (ratified April 11, 1899), was ceded by Spain to the United States. The name was changed from Porto Rico to Puerto Rico by an Act of Congress approved May 17, 1932. Its constitution is determined by the 'Organic Act' of Congress (1917), known as the 'Jones Act.' Puerto Rico has representative government, the franchise being restricted to citizens twenty-one years of

age or over, residence (one year) and such additional qualifications as may be prescribed by the Legislature of Puerto Rico, but no property qualification may be imposed. The executive power resides in a Governor appointed by the President of the United States. Seven heads of departments form the Governor's Executive Council. The legislative functions are vested in a Senate, composed of 19 members (2 from each of the 7 senatorial districts and 5 senators at large), and the House of Representatives, composed of 39 members (1 from each of the 35 representative districts and 4 elected at large). Puerto Rico is represented in Congress by a Resident Commissioner to the United States elected by the people for a term of four years.

On March 9, 1943, President Roosevelt requested Congress to pass legislation as soon as possible to enable the people of Puerto Rico to elect the Governor; the United States Senate did so on February 15, 1944, but the House of Representatives failed to take action.

The judiciary comprises a United States District Judge and United States Attorney, appointed by the President; a Supreme Court of 5 members and an Attorney-General of Puerto Rico is also appointed by the President; 8 District Courts with 13 judges appointed by the Governor; 34 municipal courts with 39 judges and 1 night court, the judges and officials of which, as well as the 57 justices of the peace, are appointed by the Governor.

**Governor.**—Rexford G. Tugwell, 1941 (10,000 dollars).

**Executive Secretary.**—Everett D. Brown.

**Area, Population and Education.**—The Island has an area of 3,435 square miles, and a population, according to the census of 1940, of 1,869,255, or 548.1 per square mile. Males (1940 census) numbered 938,280; females, 930,975; 76.2 per cent. of the population are white.

Chief towns (1940), with barrios or rural zone, San Juan, 169,247 inhabitants; Ponce, 105,116; Mayaguez, 76,487.

The Puerto Rican island of Vieques, 10 miles to the east, is about 20 miles long and 5 miles broad, and has 10,362 inhabitants, who grow sugar and rear cattle. The island of Culebra, with 860 inhabitants, between Puerto Rico and St. Thomas, has a good harbour.

Education was made compulsory in 1899. In the school-year 1942-43, there were 5,491 class-rooms in 2,402 school-buildings, with 802,806 public day-school pupils; and a well-distributed system of night schools. There are also 54 accredited private schools. The University of Puerto Rico, established in Rio Piedras, 7 miles from San Juan, with a branch in Mayaguez, is open to both men and women. The percentage of illiteracy was 28 per cent. of those 10 years of age or older.

**Finance.**—Receipts and disbursements of insular revenue (apart from trust funds) for the year ending June 30, 1943:—

|                        | Dollars.   |
|------------------------|------------|
| Balance, July 1, 1942  | 20,526,788 |
| Receipts, 1942-43      | 44,475,879 |
| Total                  | 65,002,687 |
| Disbursements, 1942-43 | 40,600,610 |
| Balance, July 1, 1943  | 24,402,077 |

In addition, trust funds had a balance of 19,303,965 dollars on July 1, 1942; receipts in the subsequent fiscal year of 46,871,790 dollars; ex-

penditures of 40,329,134 dollars, and a balance, July 1, 1943, of 25,846,621 dollars. Assessed value of property on June 30, 1943, was 348,114,312 dollars and bonded indebtedness was 16,398,000 dollars.

The police force (1943) consisted of 1,595 men; authorized strength, 1,745 men.

**Production, Industry and Commerce.**—The cultivated land in 1940 was divided into 55,519 holdings; value of land and buildings was about 173,860,000 dollars. The chief products of the island are sugar, molasses, tobacco, coffee, pineapples, grapefruit, coconuts, oranges, and vegetables, and the principal industries are the refining and manufacture of sugar and the manufacture of embroideries, men's clothing, rum, canned fruits, alcohol, straw hats, cigars, fruit juice, cordials, cigarettes and bay rum. Exports of rum mounted rapidly during the war years—2,745,000 proof gallons in 1942 and 5,621,000 in 1943. Exports of tobacco and tobacco manufactures in 1942-43 were valued at 9,587,560 dollars. Sugar production for three crop years: 1941, 932,000 tons; 1942, 1,147,590 tons; 1943, 1,039,237 tons. Raw sugar exported in 1942-43 amounted to 690,200 tons, valued at 50,669,223 dollars; exports of refined sugar, 56,886 tons, valued at 6,168,430 dollars.

An extensive programme of industrialization and land reform has been initiated; already functioning are a development bank, development company, planning board, water resources authority and communications authority.

Gold, silver, iron, copper, bismuth, tin, mercury, platinum and nickel are found in the island, but in quantities not warranting commercial exploitation. There are very productive salt works.

In the calendar year 1941, imports into Puerto Rico amounted to 153,269,895 dollars; exports were valued at 101,580,919 dollars; imports from the United States, 1941, 143,691,759 dollars; exports to United States, 99,651,309 dollars.

United Kingdom exports to Puerto Rico (including war supplies, if any, shipped by Government departments) in 1939, 1940 and 1941 were 81,000£., 78,000£. and 53,000£. respectively; exports (excluding such supplies) in 1942, 1943 and 1944 were 10,000£., 17,000£. and 19,000£. respectively.

**Shipping and Communications.**—In 1940-41, 2,047 American and foreign vessels of 8,108,577 gross tons entered and cleared Puerto Rico from the United States and foreign countries.

There are 1,830 miles of paved road in the island, and 385 miles of railway. The railway system connects towns on the west coast and now almost encircles the island, and penetrates the interior. There are 39,188 miles of telephone wire. There are 99 post offices, 84 telegraph stations, 1 U.S. Navy radio station, 5 commercial broadcasting stations, 3 cable companies and 20,639 telephones.

Twelve banks on December 31, 1942, had capital and reserves of 6,000,000 dollars, total deposits of 139,400,000 dollars and total assets of 151,800,000 dollars.

### VIRGIN ISLANDS OF THE UNITED STATES.

**Government.**—The Virgin Islands of the United States, formerly known as the Danish West Indies, were purchased by the United States from Denmark, for 25,000,000 dollars, in a treaty ratified by both nations and proclaimed January 25, 1917.

On June 22, 1936, the President of the United States approved an Act of Congress to provide a Civil Government for the Virgin Islands of the United States, which is the new Organic Act of the Islands; local legislative powers are vested in a Municipal Council of St. Thomas and St. John and in a Municipal Council of St. Croix, respectively. The first-named consists of seven members and the second-named of nine members, elected for a term of two years, beginning January 1, 1937. Joint sessions of these Municipal Councils constitute the Legislative Assembly of the Virgin Islands, with power to enact legislation applicable to the Virgin Islands as a whole as distinguished from the local legislative powers vested in each Municipal Council.

Beginning on January 1, 1938, the franchise was vested in residents of the Virgin Islands who are citizens of the United States, 21 years of age or over, and able to read and write the English language. [See THE STATESMAN'S YEAR BOOK for 1936, p. 644.] Women are enfranchised. The Organic Act further provides that the executive power of the Virgin Islands and of the Municipalities thereof shall be vested in the Governor and exercised under supervision of the Secretary of the Interior. The judicial power is vested in the District Court, and in minor courts.

**Governor.**—Charles Harwood (assumed office February 3, 1941) (8,000 dollars).

**Area, Population and Education.**—The Virgin Islands group, lying about 40 miles due east of Puerto Rico, between the Atlantic Ocean and Caribbean Sea, comprises the Islands of St. Thomas (32 square miles),

St. Croix (82 square miles), St. John (19 square miles), and about 50 small islets or keys, mostly uninhabited. The total area of the three principal islands is 133 square miles.

The population, according to the census of April 1, 1940, is 24,839, compared with 22,012 in 1930, an increase of 2,877 or 13.1 per cent. Population has slowly declined since 1835 when it stood at 43,000. Of the present total, 67.5 per cent. is urban; the 1930 census showed 9.1 per cent. white, 78.3 per cent. Negro and 12.4 per cent. mixed; 16.1 per cent. were illiterates. The populations of each of the islands are 11,265, 12,902, and 722. The islands contain 3 towns, Charlotte Amalie, on the island of St. Thomas, with a population of 9,801; and Christiansted and Frederiksted, on the island of St. Croix, with populations of 4,495 and 2,498 respectively. Education is compulsory. In St. Thomas there are 9 public and 3 private and parochial schools, 2,668 pupils and 89 teachers; and in St. John there are 4 public schools with an enrolment of 145 pupils and 6 teachers. In St. Croix there are 10 public schools and 3 private and parochial schools; total enrolment, 2,805 with 59 teachers. There are churches of the Protestant, Roman Catholic, and Jewish faiths in St. Thomas and St. Croix.

**Finance.**—Revenues are derived from customs, income tax, real and personal property tax, trade tax, pilotage charges, etc. Actual revenue for fiscal year ending June 30, 1944: 1,880,000 dollars; actual expenditure, 1,972,000 dollars. The annual deficit in the operation of the government is met by appropriations by the Congress of the United States.

**Production and Industry.**—The census of 1940 shows 610 farms in St. Croix, 188 in St. Thomas and 30 in St. John, a total of 828; value of land and buildings was 2,398,546 dollars. A Homesteading programme during 1933–36 has added 268 farms of an average of 7 acres under purchase contract with 100 additional farms under development. St. Thomas is the leading port in the Virgin Islands with coaling and oil-fuelling stations. The Island of St. John is noted for its bay oil, extracted from the leaves of the bay tree, and St. Thomas for the finished product of bay rum. Exportation of rum in 1942 amounted to 675,011 proof gallons. St. Croix is the largest and most fertile of the islands and its industries are mainly sugar cane and cattle-raising, the latter utilising 65 per cent. of the land.

Exports to the United States in 1941 were 2,419,597 dollars; total exports, 2,564,856 dollars; imports from the United States, 5,190,548 dollars; imports from all sources, 6,307,730 dollars. Exports to United Kingdom (Board of Trade figures) for 1938, 705%; imports from United Kingdom, 13.260%.

United Kingdom exports to the Virgin Islands (including war supplies, if any, shipped by Government departments) in 1939, 1940 and 1941 were 25,000%, 17,000% and 7,000% respectively; exports (excluding such supplies) in 1942, 1943 and 1944 were 10,000%, 10,000% and 6,000% respectively.

**Communication.**—There is a daily air-mail service from St. Thomas and cable offices in St. Thomas and St. Croix.

**Money and Banking.**—United States currency became legal tender on July 1, 1934, succeeding that formerly issued by the National Bank of the Danish West Indies in the form of the franc valued at 19.3 cents, United States money. The charter of the National Bank of the Danish West Indies expired in July, 1934. The Virgin Islands National Bank succeeded

it on May 1, 1935; on December 31, 1942, it had capital and reserves of 300,000 dollars, total deposits of 2,800,000 dollars and total assets of 3,100,000 dollars.

### COMMONWEALTH OF THE PHILIPPINES.

These islands, ceded by Spain to the United States by the treaty of peace concluded between the United States and Spain on April 11, 1899, form the largest island group of the Malay Archipelago, and extend almost due north and south from Formosa to Borneo and the Moluccas, embracing an extent of 16° of latitude and 9° of longitude.

The Japanese attacked the Philippine Islands on December 10, 1941, capturing Manila on January 2, 1942, and the entire archipelago by April 10. American forces landed on Leyte and Samar in October, 1944; on February 4, 1945, they entered Manila, and on February 27 restored full powers and responsibilities under the Constitution to President Osmena. But the islands were still, in part, occupied by the Japanese.

**President.**—Sergio Osmena assumed office on August 2, 1944, on the death of Manuel L. Quezon, the late President, to whom he was Vice-President; installed on October 10, 1944, at Tacloban, the capital of Leyte.

**Government.**—The Commonwealth of the Philippines, before the Japanese invasion, was governed by a dual instrument drafted under the Tydings-McDuffie Act signed by the President of the United States on March 24, 1934, and accepted by the Philippine Legislature on May 1, 1934. That dual instrument consists of, firstly, a permanent Constitution (subject to the usual powers of self-amendment when full sovereignty is achieved) drafted by a Filipino Constitutional Convention, and secondly an Ordinance governing the relations between the United States and the Commonwealth for a period of 10 years from November 15, 1935. When the Ordinance lapses (on July 4, 1946), the Commonwealth should automatically take over full sovereignty and become 'the Republic of the Philippines.' On May 14, 1935, this dual instrument was ratified overwhelmingly by the

Philippine electorate, both men and women, at a national plebiscite and came into force November 15, 1935.

Amendments to the Constitution adopted in 1940, limited the terms of President and Vice-President to four years, made the President eligible for one immediate re-election, and restored the former bicameral legislature to consist of a Senate of 24 members elected at large and a House of Representatives of not more than 120 members elected from districts. These legislative bodies are called the Congress of the Philippines. The President must be a natural-born Filipino. Under him are nine executive Departments, the Secretaries of which must all be Filipinos. Suffrage is enjoyed by all male and female citizens 21 years of age or older who can read or write Spanish, English or a native dialect, and who meet certain residential qualifications. Registered voters (1940) numbered 3,300,199, of whom 2,409,048 voted.

The Ordinance reserves to the United States some control over measures relating to national debt, foreign loans, currency, coinage, imports, exports, foreign relations, immigration, proposed amendments to the Constitution, as well as national defence.

The Constitution vests in the Commonwealth all ownership of the country's natural resources which, apart from public agricultural land, may not be alienated. Exploitation of natural resources is limited to citizens of the Philippines or of the United States and to corporations or associations 60 per cent. of whose capital is owned by Filipinos or Americans. Concessions and leases are limited to 25 years, renewable for another 25 years. Maximum area of agricultural land which any corporation may acquire or lease is 2,500 acres.

**Area and Population.**—The group is composed of 7,083 islands and islets, of which only 462 have areas of one square mile or over. Total area, 115,600 square miles. The eleven most important islands with their areas are: Luzon, 40,420 square miles; Mindanao, 36,537; Samar, 5,050; Negros, 4,205; Palawan, 4,550; Panay, 4,448; Mindoro, 3,759; Leyte, 2,785; Cebu, 1,703; Bohol, 1,492, and Masbate, 1,262 square miles.

The estimated total population on July 1, 1941, based on the 1918 and 1939 censuses, is 16,971,100, or 147 persons per square mile. The Philippine census of 1939 showed that out of the total population of 16,000,303, citizens of the Philippines amounted to 15,833,649; of China, 117,487; of Japan, 29,059; of the United States, 8,709; of Spain, 4,627; of Germany, 1,149; of Great Britain, 1,053; of Russia, 237.

On December 30, 1937, the President of the Philippines approved a law making a language based on Tagalog (a Malayan dialect) the national official language of the Commonwealth. About 4,260,000 people speak English and about 417,000 Spanish; for Government and commercial purposes these two languages are commonly used. About 64 native languages and dialects are spoken in the Philippines, of which 8 are of leading importance.

The population of Manila, the capital and the leading commercial and industrial centre, on January 1, 1941, was 673,000.

Other towns with their estimated present population are: Iloilo on Panay, 94,800; Cebu on Cebu, 155,100; Zamboanga on Mindanao, 137,700; and Davao on Mindanao, 103,100. Baguio, in the Mountain Province, has a population of 27,000.

**Justice and Defence.**—The judiciary is headed by the supreme court, with a chief justice and 6 associate justices (all Filipinos) appointed by the President; it cannot declare a law or treaty unconstitutional except by a

two-thirds vote. Decisions of the Supreme Court during the 'Commonwealth' period are subject to appeal to the U.S. Federal Courts. There is a Court of Appeals with a presiding judge and 14 members. There are 9 judicial districts, each with several judges of first instance.

Public order is maintained partly through the Philippine Constabulary and partly through the local police forces. Defence is entrusted to the Philippine Army. All able-bodied young men 20 years old are compelled to register for military training; of these 40,000 are annually chosen by lot for five and a half months' training. All male students in colleges and universities are required to take a 3-year course in military training (Reserve Officers Training Corps).

**Religion.**—The dominant religion of the islands is the Roman Catholic, having 12,603,365 followers, or about 80 per cent. of the population; the archipelago is divided into two archbishoprics, eleven bishoprics and three Apostolic Prefectures. The Dominican Order maintains the University of Santo Tomas, established in 1611 and made a Pontifical University in 1845. In 1902, an independent Filipino Church was founded by Mgr. Gregorio Aglipay, an ex-Catholic priest, who assumed the title of Obispo Maximo. He was succeeded by Mgr. Santiago Fonacier. It adheres to modern science, which it holds to be superior to Biblical tradition, thus denying the possibility of miracles. The ritual resembles somewhat that of the Roman Church. Marriage is allowed to its apostles. According to the Government census of 1939, the Independent Filipino Church had 1,573,608 followers, or about 10 per cent. of the population. Several Protestant denominations have extensive organisations and 378,361 communicants. Followers of the Buddhist religion number 47,852; while the Mahomedans number 677,903, and are chiefly to be found in the districts of Mindanao and Sulu. Other religions are Shintoists, numbering 13,681; Pagans, 626,008, and 'others,' 67,157.

**Education.**—Education in the public schools of the Philippines is free, secular, and co-educational, on the basis of a common language, English. Under the Ordinance the teaching of English is compulsory for the interim period of 10 years. Out of the 10,903,879 persons 10 years old and over, only 5,316,146 or 48.8 per cent. are literate. In 1940-41, there were 2,027,957 pupils in the 12,369 public schools, with 90 American and 46,899 Filipino teachers. The expenditure on public-school education for 1940-41 was 16,951,965 dollars. Special schools include the Philippine Normal School and 6 regional normal schools; the Philippine School of Arts and Trades and 26 provincial trade schools; the Central Luzon Agricultural School and 23 provincial agricultural schools, together with 182 farm settlement schools. For higher education there is the State-supported University of the Philippines, with (1941) 714 professors and 7,567 students; and 89 accredited private institutions of higher learning—among them the University of Sto. Tomas, founded in 1611, the oldest university under the American flag. There are in all 468 separate private schools of all grades of instruction accredited by the Government. The total enrolment in these approved private schools and colleges in 1940 was 168,584, and the total number of instructors and teachers was about 5,913.

There were 360 newspapers and magazines in 1940, published in English, Spanish and local dialects, and other languages, with an aggregate circulation of 2,224,340. There is a National Library at Manila, with branches in other cities.

**Finance.**—The revenues and expenditures of the central government for five years were (1 Philippine peso = 50 cents. U.S. currency):—

|                        | 1938 <sup>1</sup> | 1939 <sup>2</sup> | 1939-40     | 1940-41     | 1941-42 <sup>3</sup> |
|------------------------|-------------------|-------------------|-------------|-------------|----------------------|
|                        | Pesos             | Pesos             | Pesos       | Pesos       | Pesos                |
| Revenues . . . . .     | 131,414,238       | 87,808,479        | 158,022,870 | 153,667,908 | 102,982,082          |
| Expenditures . . . . . | 189,348,696       | 84,795,162        | 188,616,278 | 167,767,338 | 111,675,480          |

<sup>1</sup> Figures for 1938 are from January to December (calendar year).

<sup>2</sup> Figures for 1939 are from January to June only. Succeeding years from July 1 to June 30 (fiscal year).

<sup>3</sup> Estimated; include General Fund only.

For public education, about \$2,500,000 dollars was spent in 1941, \$4,689,511 dollars for the Army, and \$2,817,837 dollars for administration. Bonded debt on June 30, 1941, was \$6,065,000 dollars net, including provinces and municipalities; sinking fund, 20,053,931 dollars.

**Production and Industry.**—The Philippines have a total area of 73,214,700 acres, of which 45,946,420 acres, or 63 per cent. are suitable for cultivation; only 10,399,340 acres, or 14.1 per cent., were cultivated in 1940. About 97 per cent. of the total cultivated area is owned by Filipinos whose farms average 3 acres. The principal products are unhusked rice ('palay'), Manila hemp ('abaca'), copra, sugar cane, corn, tobacco and magney. Output of manila hemp, 1940, 134,224 metric tons; of magney, 17,699 tons; of copra, 697,776 metric tons. There are 46 sugar centrals; exports in 1940, 928,542 metric tons of centrifugal sugar and 52,931 tons of refined. Output, 1940, of raw sugar, including muscovada and panocha, 984,755 metric tons. Tobacco output, 1940, was 38,033,200 kilos. Exports of tobacco and tobacco products, 1940, was valued at 10,292,061 pesos. The principal fruit is the banana; there are also mangoes, papaya, lanzones, pillnut (*Canarium commune*), chico, mandarins and oranges. Production of uncleaned rice in 1940-41 was 62,510,570 cavanes of 56 kilos. The cultivation of rubber is mainly in the southern provinces where the large plantations are located; about 5,000 acres are now planted; exports of crude rubber (1940) were 1,200,296 kilos.

In the production of copra and coconut oil the Islands are classed among the foremost countries in the world. During the year 1940, there were exported 341,930 metric tons of copra, 105,028 tons of copra cake, 185,920 tons of coconut oil, and 40,518 tons of desiccated coconut.

On December 31, 1940, there were 3,015,400 carabaos (water buffaloes); 1,396,200 cattle; 343,500 horses and mules; 4,446,800 hogs.

The commercial forests furnish cabinet and construction timber, gums and resins, vegetable oils, rattan and bamboo, tan and dye barks and dye woods. About 97.5 per cent. of this belongs to the Government.

Gold is produced chiefly from the Baguio, Masbate and Mambulao districts; output in 1940 was 1,096,745 fine ounces, valued at 38,281,944 dollars. Chromite mines in Zambales and Pangasinan provinces produced, 1940, 189,919 long tons. Iron ore production in 1940 was 1,221,126 long tons. Manganese ore (58,038 tons shipped in 1940), coal, asbestos, rock asphalt, guano and silica deposits have been found, while seepages of petroleum have been reported from Tayabas, Marinduque, Cebu, Leyte, Abra and Mindanao.

Manufacturing is largely carried on in homes (chiefly embroidery, buntal

hats, woven cloths, mats and pottery) but the number of factories is increasing; it includes 46 sugar centrals, 4 sugar refineries, 131 lumber mills, 7 soap factories, 3 textile mills, 70 distilleries, 8 coconut oil mills, 6 desiccated cocoa factories, 8 shoe factories, 92 large cigar and cigarette factories, and 2,391 rice mills. In 1940 there were manufactured 339,535,723 cigars and 2,970,556,476 cigarettes. Output of domestic wines for local consumption was 627,784 gauge litres and 7,381,100 gauge litres of fermented liquor. In 1939 the Filipinos owned 187,511 commercial establishments; Chinese, 17,201; Japanese, 1,057, and Americans, 246.

**Commerce.**—The values of imports and exports (excluding gold and silver ore, bullion and coin) for recent calendar years are stated as follows in pesos (1 peso = 50 cents U.S. currency):—

|                   | 1936        | 1937        | 1938        | 1939        | 1940        |
|-------------------|-------------|-------------|-------------|-------------|-------------|
|                   | Pesos       | Pesos       | Pesos       | Pesos       | Pesos       |
| Imports . . . . . | 302,257,685 | 318,069,192 | 365,235,371 | 245,120,974 | 269,462,542 |
| Exports . . . . . | 295,353,915 | 331,184,968 | 294,001,841 | 315,784,146 | 311,849,047 |

In the calendar year 1940, the commerce was distributed principally as follows (in Philippine pesos, 1 peso = 50 cents U.S. currency):—

| Countries                 | Imports     | Exports     | Countries                  | Imports   | Exports   |
|---------------------------|-------------|-------------|----------------------------|-----------|-----------|

Exports to United Kingdom (Board of Trade figures) for calendar year 1938, 998,389; imports from United Kingdom, 747,008; re-exports to Philippine Islands from U.K., 11,809. United Kingdom exports to the Philippines (including war supplies, if any, shipped by Government departments) in 1939, 1940 and 1941 were 611,000, 529,000, and 379,000, respectively; exports in 1942 (excluding such supplies) were 22,000; in 1943 and 1944, nil.

**Shipping and Communications.**—The overseas trade of the Philippine Islands during 1940 was carried mainly by 558 American vessels aggregating 1,232,713 net tons, 496 British with 416,640 net tons, 643 Japanese with 1,766,199 net tons, 415 Dutch with 459,614 net tons, 48 Danish with 64,953 net tons, 475 Norwegian with 897,418 net tons, and 112 Philippine with 375,727 net tons. The coastwise trade of the islands is carried exclusively by domestic vessels.

On June 30, 1940, there were in operation, 1,050 post-offices, 9,125 miles of Government telegraph lines, and 9,056 miles of cable, with 459 telegraph offices, including 108 radio stations. There were 1,043 postal savings banks in operation, with 347,311 accounts, amounting to 16,568,817 pesos in 1938.

The government-owned Manila Railroad Co. had on January 1, 1941, 712 miles of main line track on Luzon, and the privately-owned Philippine Railroad Co. 132 miles on Panay and Cebu. Total length of roads, 14,235 miles. January 1, 1941, there were 33,898 motor cars and 20,236 trucks registered.

judicial power of the Government. The judiciary system comprises one Court of Appeal, an Island Court, a Justice Court and a police court.

Elementary education is compulsory. There are 4,953 pupils registered. English, handicrafts and agriculture are taught.

There is a Government radio station on the island, which is also in cable telegraphic communication with all parts of the world. The only transportation to and from Manila is by Army and Navy transports and one vessel which makes three trips a year, carrying mail, freight, and a limited number of male passengers. There are no hotels except one operated by Pan-American Airways as a service in its trans-Pacific air route.

By steamer 3,337 miles from Honolulu, 1,506 from Manila, and 1,353 from Japan, Guam is only 25 air hours from Honolulu, 11 from Manila, and 10 from Tokyo, and can be reached in but 42 hours from the West Coast of the United States.

The port is closed to foreign vessels of war and commerce except in special cases. Permission to visit the island must be obtained of the Navy Department in each case.

The products of the island are maize, copra, rice, sweet potatoes, coffee, bananas, pineapples, citrus fruits, limes, mangoes, papayas, breadfruit, cacao, yams, tobacco, cassava, kapok, alligator pears, and sugar-cane, besides valuable timber. Copra and coconut oil are the principal exports. On April 1, 1940, there were 5,845 head of cattle, 1,560 water buffaloes, 14,000 pigs and 1,353 goats. The imports into the island in the year ending June 30, 1941, amounted to 994,011 dollars, and the exports to 84,278 dollars.

The official currency is that of the United States.

*Governor.*—Captain George J. McMillin, U.S. Navy (appointed April 20, 1940; taken prisoner by the Japanese, December 12, 1941).

### SAMOAN ISLANDS.

#### (AMERICAN SAMOA.)

The history of American Samoa commenced in the year 1872, when the harbour of Pago Pago, in Tutuila, was ceded to the United States for a naval and coaling station. In 1878 rights of freedom of trade and extra-territorial jurisdiction in Samoa were granted. On June 14, 1889, a treaty between the United States, Germany, and Great Britain proclaimed the Samoan Islands neutral territory, with an independent government, the natives being allowed to follow their own laws and customs, while for civil and criminal causes involving foreigners a Supreme Court of Justice, with an American citizen as presiding judge, was established. This arrangement continued till 1899, when owing to disturbances, the kingship was abolished,

and, by the Tripartite Treaty of November 14 of that year, Great Britain and Germany renounced in favour of the United States all rights over the islands of the Samoan group east of 171 degrees of longitude west of Greenwich, the islands to the west of that meridian being assigned to Germany.

The total area of American Samoa is 76 square miles; census population, July 1, 1941, 13,273. Polynesians numbered 11,291 in the census of 1940, out of a total of 12,908; whites numbered 800 (200 males and 100 females). The Island of Tutuila, 70 miles from Apia, has an area of about 40·2 square miles, with a census population of 10,464 (including the island of Aunu'u). Ta'u has an area of 14 square miles and the other islets (Otu and Olosega) of the Manu'a group have an area of about 4 square miles with a population of 2,660, estimated 1941. Swain's Island, annexed in 1925, is from a mile and a half to two miles in diameter. Population (1941) was 149. The harbour at Pago Pago, which penetrates the south coast like a fjord, is the only good harbour in Samoa. It is a United States naval station.

The Commandant is also the Governor of American Samoa by commission from the President of the United States. He appoints officers and frames laws or ordinances, but native customs (not inconsistent with United States laws) are not changed without the consent of the people.

The islands are organised in three political divisions corresponding to the old Samoan political units. In each District there is a Native Governor, County Chiefs and Village Chiefs. All of these officials are appointed by governmental authority although the District Governor has indirect control of the County Chiefs, and the County Chiefs of the Village Chiefs. Judicial power is vested in village courts, in six judicial district courts, and in a High Court. There is a native guard (known as the Fitaftas) of 153.

There are no public lands in American Samoa. Nearly all the land is owned by natives. The soil is fertile; the fruits comprise orange, lime, banana, mangoes and alligator pears. Copra of excellent quality is abundant.

The census of 1940 showed illiterates 10 years of age or older were 540, or 6·3 per cent. of that age group.

The Government (1943) maintains 32 public schools with 64 native and 4 white teachers, giving every child over 7 years of age the opportunity of an elementary education: 2,315 pupils are enrolled. Four private schools under missionary auspices have about 500 children. There are no privately practising physicians or dentists. The entire population is under the care of the Medical Department of the U.S. Navy.

The native taxes, both poll and school, are fixed by the Governor, in December, payable in quarterly instalments during the following year. The chief island products are copra, taro, breadfruit, yams, coconuts, pineapples, oranges, and bananas. Chief exports are copra, 107 tons (1942) valued at 7,212 dollars; reed mats and curios. Imports: 1940-41, 263,703 dollars; exports totalled 93,839 dollars.

About 34 miles of public roads have been constructed. There is a United States Naval high-powered radio station (open to commercial traffic) on Tutuila, which reaches New Zealand, Australia, Honolulu, the United States, and the islands of the Pacific. The Bank of American Samoa, with capital of 100,000 dollars and total assets, December 31, 1942, of 1,100,000 dollars, is the only bank and does all types of commercial banking business. The fast mail steamers of the Matson Navigation Company touch here on their regular trips between the United States, Hawaii, Fiji, New Zealand and Australia.

**PART THE THIRD****OTHER COUNTRIES**

**Banking and Coinage.**—There are 16 banks in the Islands, of which 6 are foreign. Combined resources of all banks on June 30, 1940, was 193,605,754 dollars; capital and surplus, 22,479,188 dollars. The Philippine National Bank, inaugurated under a special charter from the Philippine Legislature in 1916, had on June 30, 1940, a capital of 10,000,000 pesos; surplus and undivided profits of 10,020,812 pesos; reserves, 6,771,378 pesos; deposits, 110,818,642 pesos. The Government has now purchased almost all the privately-owned shares of stock of the bank and guarantees the final redemption and payment of the circulating notes of the institution. Since July 1, 1916, the Bank has been the sole Government depository, and is now the only bank of issue.

The Philippines is on the gold-exchange standard. The Philippine peso is equivalent to fifty cents of the United States money. The maintenance of the parity of the peso with the U.S. dollar is provided for by legislation. The peso contains twenty grammes of silver, .800 fine. The coins used are: Peso, one-half peso, peseta (20 centavos), media peseta (10 centavos), all in silver of .750 fine; five centavo, in cupro-nickel; and one centavo, in bronze. Treasury certificates and bank notes are issued in one, two, five, ten, twenty, fifty, one-hundred, two-hundred, and five-hundred peso denominations. The Philippine coins are coined at the Mint in Manila.

### GUAM.

The Island of Guam, situated at the southern extremity of the Mariana Archipelago, in latitude 13° 26' N., longitude 144° 43' E., is the largest island of that group. Magellan is said to have discovered the island in 1521, which was ceded by Spain to the United States by the Treaty of Paris (December 10, 1898). It is a naval station and saluting port under the jurisdiction of the Navy Department of the United States. A garrison of marines and a shore naval force are normally maintained here.

Guam was captured by the Japanese on December 12, 1941. It was retaken by American forces on August 10, 1944.

The length of the island is 30 miles, the breadth from 4 to 8½ miles, and the area about 206 square miles. Agaña, the seat of Government, is about eight miles from the anchorage in Apra Harbour. The port of entry is Piti. The number of inhabitants (including the military establishment and non-native residents) on June 30, 1941, was 23,394, of whom 21,999 were classed as 'natives'—i.e. Chamorro. The census of April 1, 1940, showed a population of 22,290. The native language is Chamorro, but Spanish and English are also spoken. English is the official language. Catholicism is predominant.

The Governor of the island, a naval officer appointed by the President, takes precedence over and is entitled to the honours due to an Admiral. The Governor is also the Military Commander of the island, Commandant of the naval station, and combines the functions of the executive, legislative and

## • ABYSSINIA.

(ETHIOPIA.)

THE ancient Empire of Abyssinia, or 'Ethiopia,' includes the former Kingdoms of Tigré, in the north-east; Amhara and Gojjam, in the centre, and Shoa in the south; together with the modern acquisitions to the east and south, Harar, and the Galla, Shankalla and Dankali territories. The whole area is 350,000 sq. miles.

For treaties relating to the boundaries of Abyssinia see THE STATESMAN'S YEAR-BOOK for 1907, p. 667, and for 1923, p. 677. For the 1906 agreement between Great Britain, France and Italy, as well as the government prior to the Italian conquest of 1936, see THE STATESMAN'S YEAR-BOOK for 1936, p. 657. For the Italian conquest and rule, see THE STATESMAN'S YEAR-BOOK for 1941, p. 1060.

### Government.

*Emperor.*—Haile Silassie I, born July 17, 1891; crowned King (Negus) on October 7, 1928, proclaimed Emperor, after the death of the Empress Zauditu, on April 3, 1930, and crowned Emperor, November 2, 1930. Married Woizero Menin in 1912, and has 8 sons and 1 daughter. On January 25, 1931, the eldest son, Asfa Wassan was proclaimed Crown Prince and heir to the throne; he was married on May 9, 1932, to the daughter of Ras Seyum, hereditary ruler of Tigré.

When Italy declared war on Great Britain, on June 10, 1940, British and Imperial troops invaded Abyssinia, and by November 27, 1941, the country was cleared of Italian forces. As far back as February 4, 1941, the British Government declared that they would welcome the reappearance of an independent Ethiopian State and would recognize the claim of the Emperor Haile Silassie to the throne. At the same time the Government reaffirmed that they had no territorial ambitions in Abyssinia.

The Emperor, Haile Silassie, returned to his capital on May 5, 1941. On January 31, 1942, an Agreement and Military Convention was signed between Great Britain and Ethiopia, recognizing the sovereign independence of Ethiopia, providing financial help and technical and administrative advisers, and providing also for the re-establishment of diplomatic relations. Certain areas bordering on French Somaliland and including the whole of the railway and appurtenances in Ethiopia were 'reserved' and remained under British military administration. Abyssinia is now a sovereign independent State, and the establishment of law and order is a responsibility of the Emperor.

As the Emperor on May 25, 1944, gave notice of the termination of the Anglo-Ethiopian Agreement of January 31, 1942, the British Government signed a new agreement with Abyssinia on December 19, 1944, for a period of two years.

Government of the restored empire is by a Council of Ministers and by a parliament consisting of a Senate and a Chamber of Deputies.

On October 9, 1942, Abyssinia joined the United Nations and adhered to the Washington Agreement of January 2, 1943.

### Area and Population.

The present ruling race of Abyssinia, the Amhara, who number about 2 millions, inhabit the central Ethiopian highland. To the north of them are the Tigréans, akin to the Amhara and belonging to the same Christian church, but speaking a different, though related, language. Both these races are of

mixed Hamitic and Semitic origin, and further mixed by intermarriage with Galla and other conquered races. The Gallas, some of whom are Christian, some Moslem, and some Pagan, comprise more than one-half of the entire population, and are a pastoral and agricultural people of Hamitic origin. Ogaden, Issa and other Somalis inhabit Harar, the Somaliland plateau, and the south-east. These and most of the Danakil are Mohammedans. There are also Nilotic tribes of (in the south-west), and the Falashas (of Jewish religion) north of Lake Tana.

There are few towns in Abyssinia in our sense of the word—Addis Ababa, Dire Dawa and Harar being the most important. Addis Ababa, the capital, has some 150,000 inhabitants. Dire Dawa contains about 30,000 people, and the old walled city of Harar has a population of about 25,000. Other important towns, politically or commercially, are: Debra Markos, 5,000; Gondar, capital of the Amhara province of Begemdir, 22,000. Gambella, in Western Abyssinia, is a trading station leased to the Sudan Government.

The country is divided into 12 Provinces, each under a Governor-General, under the direct control of the Minister of the Interior. Each Province is divided into 3 or 4 Sub-Provinces under a Governor. All revenues collected in the Provinces are under the control of the Minister of Finance.

### Religion and Education.

Since the conversion of the Amharas to Christianity in the fourth century they have retained their connection with the Alexandrian Church through the Abuna, or head bishop, who was always an Egyptian Copt, and who was appointed and consecrated by the Coptic Patriarch of Alexandria. Both the Egyptian and Abyssinian Coptic Churches are monophysite, rejecting the decrees of the Council of Chalcedon (A.D. 451). When the Italians occupied Abyssinia they broke this traditional bond between the two churches and appointed an Abyssinian bishop Abuna of an independent Abyssinian church. The Coptic Patriarch excommunicated all bishops and priests appointed by the Italians. After the restoration of the Emperor the former Egyptian Abuna returned in 1942 to Addis Ababa and the relations of the Abyssinian and Egyptian churches were resumed, but in September, 1944, the Emperor intimated that when the time came for the present Archbishop to retire he must be succeeded by an Ethiopian. The priestly class is very numerous and the Church holds a considerable proportion of the land. Christianity is diffused in the northern and central plateau, from the uplands of Eritrea to Shoa, and from the Setit (Taczze) River to the Blue Nile, including all the Amhara territory.

Mahommedanism is practised in the north-west territories, in Harar, in Jimma, and in some territories of the Galla Sidamo State. Mahommedan minorities are found in Addis Ababa and in other commercial centres. The rite is mainly shafeitic. Harar is the most important Moslem centre for historical tradition and religious institutions, as well as for Arabic culture. There are government schools for Moslems in Addis Ababa, Harar and Jimma.

Elementary education is provided in the principal towns by government schools and foreign missions. There is at Addis Ababa one secondary school numbering some 70 boys.

### Justice.

In the pre-Italian period justice was administered by the provincial governors, and *shums*, or petty chiefs, with the right of appeal to the Emperor. Since 1930 the Ethiopian Penal Code has been in use. The

legal system is said to be based on the Justinian Code. The penal code is based on the Mosaic law.

The extra-territorial rights formerly enjoyed by foreigners have been abolished, but under the Anglo-Ethiopian Agreement foreigners have the right to bring their cases before the High Court, when at least one British judge shall sit as a member of the Court. The Ethiopian Government has undertaken that after the expiry of the Agreement all persons may elect to be tried by the High Court and may demand that one of the judges sitting 'shall have had long judicial experience in other lands.'

Provincial and district courts have been established and High Court judges visit the Provincial Courts on circuit. The Supreme Imperial Court at Addis Ababa is presided over by the Abyssinian Chief Justice. There is also a Political Court at Addis Ababa, a purely Abyssinian institution for the trial of political offences.

### Finance.

Under the terms of the Anglo-Ethiopian Agreement of 1944 the British Government undertook to make to the Ethiopian Government a gift of 1,000,000*l.* for three years, on condition that the money is disbursed through a development board appointed jointly by the two governments.

Revenue and expenditure for the last 2 financial years (the financial year coincides with the Ethiopian year beginning September 10) were as follows:—

| Year    | Revenue   | Subsidy   | Expenditure |
|---------|-----------|-----------|-------------|
|         | £         | £         | £           |
| 1942-43 | 1,614,900 | 1,125,000 | 2,543,918   |
| 1943-44 | 2,345,192 | 500,000   | 3,128,214   |

### Defence.

A new Ethiopian army of 10 battalions, commanded and trained by British officers, has been formed, and a territorial army of some 39 battalions, led and trained by Ethiopian officers, to include small technical units and artillery. The Holletta Military School, near Addis Ababa, has been re-opened.

An Ethiopian police force, trained by British officers, has been established in Addis Ababa, Harar, Dessie and Jimma, and in the southern province of Borana.

### Agriculture and Industry.

The chief industries are pastoral and agricultural. Cattle, sheep and goats are numerous. The horses of the country are small but hardy, and make excellent polo ponies; mules are bred, being used as pack animals; donkeys are also small and serve for baggage animals. Cotton, the sugar-cane, coffee, and rubber-vine thrive well in many districts, but, except coffee, are not yet extensively cultivated. Coffees produced are of three sorts, the Harari coffee (long berry Mocha), Jimma coffee, and Sidamo coffee. Besides these, which are cultivated, there grows more especially in southern and western Abyssinia a wild coffee plant, yielding a berry known as Abyssinian coffee, which grows in extensive forests. The supply is said to be unlimited. The native produce includes hides and skins, wax, barley, millet (dhurra), wheat, gesho (which serves as a substitute for hops), and tobacco; but, with the exception of hides, skins, wax, grain and coffee, not in sufficient quantities for export. Manufactures

turing industries are beginning to appear. The forests abound in valuable trees, including the landolphia rubber vine. Iron is found in some districts, also marble, mica, rock salt, and cinnabar. Placer gold mining and washing are carried on in the western districts; there is also a mine of unknown size worked by the Ethiopian Government at Adola. Coal, copper and sulphur have been found, also platinum. There are said to be valuable deposits of potash salts in the Danakil salt plains in the north-eastern part of the country, but the amount of these deposits is very uncertain.

### Commerce.

The principal artery of trade is the Franco-Ethiopian railroad. Caravans also carried a large trade in the interior and into neighbouring countries, but their use is now restricted to feeding the motor roads which exist along the principal trade routes. The chief trade routes besides the railway are the following:—(1) Khartoum-Gambeila via the Baro river; (2) Khartoum-Gallabat; (3) Mombasa-Nairobi-Moyale; (4) Zeyla-Aisha-Dire Dawa; (5) Berbera-Jijiga-Harar; (6) Massawa-Asmara-Gondar; (7) Massawa-Asmara-Dessie; (8) Assab-Dessie; (9) Mogadishu-Lugh-Dolo-Arusi.

The exports consist mainly of hides and skins (cattle, goat, sheep, leopard and monkey), coffee, grain, wax, eivet, bananas, gold, cotton and native butter. The imports are salt (from French Somaliland and Sudan), grey sheetings and other cotton piece-goods (from England, U.S.A., India and Japan), cotton yarns (from England, India, Japan and France), building materials, petrol and kerosene (from England, U.S.A. and Persia), sugar, glass, motor cars and soap.

Imports and exports for 3 years (to September 10):—

| Year            | Imports   | Exports   |
|-----------------|-----------|-----------|
|                 | £         | £         |
| 1941-42 . . . . | 1,857,739 | 697,528   |
| 1942-43 . . . . | 2,978,962 | 2,538,814 |
| 1943-44 . . . . | 3,910,090 | 2,164,108 |

The total trade between Abyssinia and Great Britain for 5 years (according to Board of Trade returns) was as follows:—

|                         | 1934    | 1935    | 1936    | 1937   | 1938   |
|-------------------------|---------|---------|---------|--------|--------|
|                         | £       | £       | £       | £      | £      |
| Imports from Abyssinia  | 163,864 | 190,784 | 185,939 | 88,971 | 98,110 |
| Exports to Abyssinia    | 47,211  | 48,880  | 9,248   | 4,836  | 1,347  |
| Re-exports to Abyssinia | 806     | 934     | 456     | 1,117  | 62     |

### Communications.

Roads in Abyssinia were formerly mere tracks, and transport was effected by means of porters, mules, pack-horses, donkeys, and, in some places, camels. In the capital and its vicinity several miles of metalled road were constructed in 1926 and in 1930, as well as 1,000 miles of dry-weather motorable track. In 1908 the Franco-Ethiopian Railway Co. was formed for the construction of a line from Jibuti in French Somaliland, which reached the capital in 1917. The line is of metre gauge, with a total length of 486½ miles. Trains ran twice weekly in each direction, covering the distance in three days, but running by day only. The railway was under French manage-

ment. By the Franco-Italian agreement of 1936, a proportion of the shares of the railway were handed over to Italy. By the agreement of 1944, the running of the Jibuti-Addis Ababa railway was handed over to the Government of Ethiopia, who undertook to recognize the legal rights of the Franco-Ethiopian company.

Great strides were made in road construction under Italian occupation. Chief among the new motor roads are the following: Asmara-Addis Ababa (asphalted almost throughout); Assab-Dessie (opened in September, 1939); Asmara-Gondar; Addis Ababa-Jimma; Addis Ababa-Lekemti; Dessie-Magdala; Jijiga-Hargeisa. 4,340 miles of the new roads are open to traffic; 1,401 miles are asphalted and 1,732 miles macadamised.

A telegraph line (about 1,229 kilometres) connected Addis Ababa with Massawa in Eritrea, but for external communication a wireless station at Addis Ababa had taken its place before the Italian war. A network of telephone lines, many of them installed by the Emperor Menelik II, covered the country, but now only those between Addis Ababa and Dessie, Dire Dawa and Harar are in use. Internal communication is chiefly by wireless. There is a civil wireless telegraph link with Khartoum and Aden.

### Money and Credit.

Both East African currency and the Maria Theresa dollar are now legal tender, pending the introduction of a new currency based on sterling.

### Weights and Measures.

The metric system of weights and measures is officially in use.

The principal native weights and measures, which are also used in trade with foreigners, are as follows:—

#### WEIGHTS.

*Ookia* = weight of Maria Theresa/Menelik dollar = 28.067 grammes, approximately 1 oz. avoirdupois.  
*Natr* = 80 *ookiat*, approximately 1 lb. 14 ozs. avoirdupois.  
*Faranula* = approximately 37½ lbs.  
*Kantar* = 100 lbs.  
 1 *Waggia* (for ivory) = 480 dollars' weight.  
 1 " (for rubber) = 640 dollars' weight.

#### LENGTH MEASURES

*Tat* = breadth of the index finger.  
*Gat* = breadth of the four fingers placed flat.  
*Sinzer* = span from thumb to tip of second finger.  
*Kend* = length of arm from elbow to tip of second finger.  
*Khalad* = 180 *kends* = 65 metres = 213½ feet, say 71 yards.

#### LAND MEASURE.

The measure is a *Gasha*, which varies according to the quality of the land and ranges between 15 *khalads* by 25 *khalads*, and 7 *khalads* by 11 *khalads*, the latter equalling roughly 400,000 sq. metres or 80 acres.

#### GRAIN MEASURES.

10 *kounna* = 1 *ladan*.  
 3 *ladan* = 1 *dawala* = 80 kilos.

#### MEASURE FOR HONEY AND CIVET.

10 *wanche* (horn cups) = 1 *goundo* = about 8 litres.

### Diplomatic Representatives.

- Ethiopian Minister in London.*—Belata Ayela Gabre (appointed September 15, 1942).  
*Counsellor.*—Ato Abbebe Retta.  
*British Envoy Extraordinary, Minister Plenipotentiary and Consul General.*—Robert George Howe, C.M.G. (appointed January 20, 1942).  
*Secretaries.*—F. A. Cook, O.B.E., R. F. G. Sarell and J. R. Boyce.  
*Consul.*—M. E. Taylor, M.B.E.

### AFGHANISTAN.

AFGHANISTAN is a country of Asia lying between parallels 29° and 38° 35' of north latitude, and 60° 50' and 74° 50' of east longitude, with a long narrow strip extending to 75° east longitude (Wakhan). For the boundaries, see THE STATESMAN'S YEAR-BOOK for 1925, pp. 654-55; for the treaty of November, 1921, see THE STATESMAN'S YEAR-BOOK for 1928, p. 642; and for earlier British relations with Afghanistan, see THE STATESMAN'S YEAR-BOOK for 1916, pp. 662-3.

Afghan independence dates from 1747; Anglo-Afghan relations began in 1809.

**Government.**—The government of Afghanistan is a constitutional monarchy, in which the supreme legislative power is vested in the Parlia-

ment consisting of the King, a Senate and a National Assembly. The Senate consists of 45 members, who are nominated for life by the King. They sit throughout the year. The National Assembly consists of 109 elected members. It is in session between May and October, and may be summoned at any time. There is also a Grand Assembly (*Loe Jirgeh*), which is summoned at irregular intervals of about four years to consider major questions of policy referred to it by the King. The title of King instead of Amir was adopted in 1926. The country is divided into five major provinces of Kábul, Mazar, Kandahár, Herat, and Kataghan-Badakhshán; and four minor provinces: Simat-i-Mashriqi (i.e. Eastern Province), Simat-i-Junubi (Southern Province), Farah, and Maimana. Each province is under a governor (called in major provinces *Nais-ul-Hukumeh* and in minor provinces *Hakim-i-'Ala*).

There are separate departments of War, Foreign Affairs, Internal Affairs, Education, National Economy, Justice, Public Works, Revenue, Health, Mines, and Posts and Telegraphs, each in charge of a Minister.

**Reigning King.**—Mohammed Zahir Shah, born at Kábul in 1914; married on November 7, 1931, to his cousin, Umairah, daughter of Sirdar Ahmed Shah Khan; succeeded his father, Mohammed Nadir Shah, who was assassinated on November 8, 1933. Offspring: 2 sons and 2 daughters.

**Area and Population.**—The extreme breadth of Afghanistan from north-east to south-west is about 700 miles; its length from the Herat frontier to the Kháibar Pass, about 600 miles; the area is 250,000 square miles. Population, according to the latest estimate, about 12 millions. The languages spoken are Persian and Pushtu, and Turki in Turkistan and parts of Badakhshán.

The largest towns are Kábul, the capital (population about 120,000), Kandahár (population with suburbs 60,000), Herat (population 85,000), and Mazar-i-Sharif (30,000).

**Religion and Education.**—The predominant religion is Sunni Mohammedanism, though there is a minority of about a million Shiahs Mohammedans. Elementary schools exist throughout the country, but secondary schools exist only in Kábul and provincial capitals. Both elementary and secondary education are free. Primary schools are being established in almost all villages of any size except in the Southern Province and parts of the Kandahár Province, and there are 2 training schools for teachers in Kábul. Technical, art, commercial and medical schools exist for higher education. The Kábul University, established in 1932, has 2 medical, 1 chemical and 1 law faculties.

**Justice.**—The law is based on the *Shariat* or Islamic law in principle. Lower Courts (*Mahakima-i-Ibtidaia*) are established in each seat of government, and Higher Courts (*Mahakima-i-Muraafaah*) may have appeals from the former brought before them. A High Court in Kábul is the supreme judicial authority. In many instances efforts are made by litigants to compose their differences by the aid of unofficial juries in each locality. There is also an Arbitration Court.

**Finance.**—The revenue of Afghanistan is subject to fluctuations. The Government share of the produce recoverable is said to vary from one-fifth to one-tenth, according to the advantages of irrigation. The total revenue is estimated at about 180 million (Afghani) rupees, a considerable portion of which is derived from Customs, land taxation and the earnings of Government monopolies, chiefly the caracul monopoly.

**Defence.**—The army, which is mostly Turkish trained, is recruited by annual calls to the colours and on a voluntary basis. Compulsory service is for a period of two years with the colours. Service is obligatory from 18 to 40. Voluntary enlistment is lifelong and officers are recruited for life. The peace strength of the army is 90,000. It is organized in 2 army corps, each of 2 divisions of all arms, 7 mixed provincial divisions, 1 mixed brigade of household troops, and 1 independent mixed brigade. In the event of war, besides the reserve, it is capable of support by a considerable number of warlike clansmen, who are armed with modern rifles. Mechanical transport has been introduced, and a military academy for the training of cadets has been opened at Kábul. There is also a small air force with a personnel of 300, officered by Afghans, some of whom have been trained in Europe, and others in India.

**Production and Industry.**—Although the greater part of Afghanistan is more or less mountainous, and a good deal of the country is too dry and rocky for successful cultivation, yet there are many fertile plains and valleys, which, with the assistance of irrigation from small rivers or wells, yield very satisfactory crops of fruit, vegetables and cereals. The castor-oil plant, madder and the asafetida plant abound. Fruit is produced in profuse abundance. It forms a staple food of a large class of the people throughout the year, both in the fresh and preserved state, and in the latter condition is exported in great quantities. The fat-tailed sheep is native to Afghanistan. These sheep furnish the principal meat diet of the inhabitants, and the grease of the tail is a substitute for butter. The wool and skins not only provide material for warm apparel, but also furnish one of the more important articles of export. Persian lamb-skins (*Karakulis*) are one of the chief exports. Cotton is also exported.

Most of the mineral resources of the country are undeveloped. Northern Afghanistan is reputed to be tolerably rich in copper, and lead and iron are found in many parts. Coal of poor quality is found in the Ghorband Valley and near the Lataband, but rich seams of coal exist on the northern slopes of the Hindu Kush. Crude petroleum has been discovered near Herat and in Northern Afghanistan. Neither oil nor silver are exploited at present, but silver mines exist in Panjsher Valley. Iron is smelted from Katghan and Parmal. Gold is obtained from Kandahár and also from several rivers in the North. Badakhshán is said to be the only area in the world to produce first-quality lapis lazuli. Raw asbestos has recently been discovered in Jidran district and a mica mine in the Panjsher valley. Sulphur deposits have been formed in the Province of Maimana.

At Kábul there are factories for the manufacture in small quantities of matches, buttons, leather, boots and furniture. There is a wool factory at Kandahár and a cotton factory at Jebel-us-Siraj. There is also a 'Machine-Khana' where arms and ammunition, boots and clothing, etc., for the army are manufactured. This also includes a mint. In addition, the factories are being erected under the supervision of Government by the Afghan National Bank and its subsidiary companies, including the Caracul Monopoly, the Afghan Sugar Manufacturing Co., and the Afghanistan Cotton Co. Other important monopolies are the Afghanistan Motor Co., the Afghanistan Motor Accessories Co., the Shirkat-i-Umuni-Barq Co., (monopoly on generation of electricity and import of electrical goods), Shirkat-i-Ittihadia Shimali (joint stock company of the north engaged in trade in wool, skins, fruits and miscellaneous goods), Shirkat-i-Watan (Kandahar company dealing in miscellaneous goods, especially wool), and Shirkat-i-Hajjari Najjari (stone-cutting and carpentry monopoly).

**Commerce.**—Trade is controlled by the Government through the instrumentality of the National Bank of Afghanistan. Eighty per cent. of the trade goes through India. Of the exports from India to Afghanistan the chief items are cotton goods, sugar, hardware, live animals, leather goods, tea, paper and cement. The imports into India include spices, fruits, caracul skins, carpets, cotton and raw wool.

Imports from Afghanistan into U. K. in 1938 (Board of Trade figures), 1,684,619*l.*; exports to Afghanistan, 29,468*l.*; re-exports, 414*l.*

**Communications.**—Access to Afghanistan is mainly through passes in the mountain at the north and south, where peaks rise to a height of over 10,000 ft. On the north-west frontier of India the best known pass is the Khyber Pass, connecting Kabul with Peshawar, an important Indian rail junction; the Kojak-Bolan-Sibi series of passes from Kandahar to the south, and the Gomal, Tochi and Kurram passes from Ghazni.

Afghanistan joined the Postal and Telegraphic Unions in 1928, and since February 1, 1938, postal parcels are exchanged between the Indian and Afghan Administrations on Union principles.

There are no railways in the country. A number of roads are fit for motor traffic, including the road, 228 miles long, between Kabul and Peshawar, but merchandise is still transported to a great extent on camel or pony back. There are practically no navigable rivers in Afghanistan, and timber is the only article of commerce conveyed by water, floated down stream in rafts. Telephones are installed in most of the larger towns. There is telegraphic communication between Peshawar-Kabul, Kabul-Gardez, Kabul-Kandahar, Kandahar-Herat, Kabul-Mazar-i-Sharif, Kabul-Khanabad, Kandahar-Chaman. A wireless installation connects Kabul with Europe, the Far East, America, and other distant parts of the world. There are five wireless stations in the country. The Kabul Radio also broadcasts in Pushtu and Persian.

**Banking and Currency.**—The monetary system is on the silver standard. The unit is an *afghani*, weighing 10 grammes of silver .900 fine, which is subdivided into 100 *puls*. The currency consists of:—(a) afghani rupee (silver); (b) kran ( $\frac{1}{2}$  rupee) (silver); (c) pul ( $\frac{1}{100}$  rupee) (copper); (d) 2 puls ( $\frac{1}{50}$  rupee) (copper); (e) 5 puls ( $\frac{1}{20}$  rupee) (copper); (f) 10 puls ( $\frac{1}{10}$  rupee) (copper and nickel); (g) 20 puls ( $\frac{1}{5}$  rupee) (copper); (h) 25 puls ( $\frac{1}{4}$  rupee) (copper and nickel). One Indian rupee = 1*s.* 6*d.* = 3.95 Afghani rupees at present stabilised rate of exchange. Since December 11, 1943, the exchange rate for the U.S. dollar is 13.0446 afghani.

The National Bank of Afghanistan (*Bank-e-Millie Afghani*), with branches in Asia, Europe and America, was established in May, 1933, and now has a capital of 60 million afghani. In addition, a State Bank has recently been established under the name of 'The Afghanistan Bank' with a capital of 120 million afghani. It has the exclusive right of note issue. The first notes were issued in November, 1935. They are of 5, 10, 20, 50 and 100 afghani denomination and convertible into silver coin. Paper currency in circulation amounted to 180 million afghani by the end of the year 1939.

**Weights and Measures.**—Weights and measures used in Kabul are:—Weights:—1 khurd =  $\frac{1}{2}$  lb.; 1 pao = 1 lb.; 1 charak = 4 lbs.; 1 seer = 16 lbs.; 1 kharwar = 1,280 lbs. or 16 maunds of 80 lbs. each. Long Measure:—1 yard or gaz = 40 inches. The metric system of measurement has also been introduced and is in common use by the bigger cloth merchants in

Kabul. Square Measure:—1 jarib = 60 × 60 kabuli yards; 1 kulba = 40 jaribs (area in which 2½ kharwars of seed can be sown).

Local weights and measures are in use at Kandahar, Herat and Jalalabad.

### Diplomatic Representatives.

#### 1. OF AFGHANISTAN IN GREAT BRITAIN.

*Envoy and Minister.*—Sardar Ahmed Ali Khan (presented letters of credence, May 4, 1939).

*Second Secretary.*—Abdul Sattar Khan.

There is an Afghan Consul-General at the headquarters of the government in India, Consuls at Bombay and Karachi, and *vice* officials at Peshawar and Chaman.

#### 2. OF GREAT BRITAIN IN AFGHANISTAN.

*Envoy and Minister.*—Giles Frederick Squire, C.I.E. (appointed May 21, 1943).

*Counsellor.*—Major C. L. Crighton.

*Military Attaché.*—Lt.-Col. A. S. Lancaster, O.B.E.

*First Secretary.*—W. Connor Green.

*Second Secretary.*—Captain G. I. Pettigrew.

*Commercial Attaché.*—Captain E. G. F. Scott.

There are Consuls at Jalalabad and Kandahar

## ALBANIA.

(SHQIPERIA.)

THE territory known as Albania is made up of parts of the old Turkish Provinces of Scutari, Yanina, Kosova and Monastir. The Albanians, from the point of view of their language, are divided into two principal groups—the Ghegs, who live to the north of the river Shkumbi, and the Tosks in the south.

The early history of the Albanians is complicated and local. The Illyrian kingdom in the north and Epirus in the south waged long wars to defend their independence against Roman invasions. They finally became parts of the Roman Empire. Later they fell under the rule of the Byzantine Empire, and after that their territories were invaded by the Slavs. After the war of Kossovo in 1389, most of Albania was overrun by the Turks, and after the death of George Kastrioti—nicknamed and popularly known as Skanderbeg—in 1467, under whom the Albanians had united and heroically resisted the Turks for a quarter of a century, Albania passed under Turkish suzerainty, and thus remained—nominally or actually according to the locality and period—until 1912. At the beginning of the eighteenth century Ali Pasha of Tepelen established a virtually independent Albanian State with Janina as its capital, and waged war against his Albanian rivals the Pashas Bushati (1750-1831) of Shkodër (Scutari), who had temporarily thrown off Turkish control in the north and Pashas of Vlora in Berat. Between 1878 and 1880 an Albanian League unsuccessfully attempted to establish Albanian autonomy.

The independence of Albania was proclaimed at Vlonë (Valona) on November 28, 1912, and on December 17, 1912, the London Conference of Ambassadors agreed to the principle of Albanian autonomy. Subsequently that Conference decided upon the frontiers of the new country, and agreed that a European Prince be nominated to rule it. Prince William of Wied, having accepted the crown of the Principality from an Albanian deputation at Newwid, on February 21, 1914, arrived at Durrës (Durazzo) on March 7, 1914.

Prince William's reign was foredoomed to failure. Intrigue and treachery were followed by revolt in central Albania. After the outbreak of the European War in 1914, the Prince on September 3 left Albania, which fell into a state of anarchy. By the secret Pact of London of April 26, 1915, provision was made for the partition of Albania; but this arrangement was repudiated by Italy on June 8, 1917, when the Italian Commander-in-Chief in Albania, proclaimed at Gjinokastër (Argirocastro) the independence of Albania. After the Armistice there was fighting between the Albanians and both the Italians and Yugoslavs; but eventually foreign forces were withdrawn beyond the Albanian frontier, and the independence of the country confirmed. In January, 1925, the country was proclaimed a Republic, which continued until 1928. A Constituent Assembly for the purpose of changing the Albanian Republic into a Monarchy was opened on August 25, 1928, and on September 1, the necessary amendments to the Constitution

were voted and Ahmed Beg Zogu, President of the Republic since January 31, 1925, was proclaimed King. King Zog reigned till April, 1939.

On November 22, 1927, a defensive alliance for a period of twenty years was signed between Albania and Italy.

On April 7 (Good Friday), 1939, Italian troops invaded Albania and conquered the country. On April 14, 1939, the Italian Cabinet approved a Bill for the Chamber according to which the King of Italy became also King of Albania, but the Italian Cabinet on November 30, 1943, officially made the title null and void.

On October 28, 1940, Italy sent an ultimatum to Greece, demanding immediate capitulation. The Greek government rejected the ultimatum and the Greek army proceeded to expel the Italian forces from Greek soil and then to invade Albania, from which the Italian forces were operating. By March 1941, the Greek army was in occupation of a large part of Albania, including Koritza, Santa Quaranta and Argirocastro. But in April, 1941, German troops, operating from Yugoslavia, came to the assistance of the Italians, and on April 23, 1941, forced the Greek army in Albania to capitulate.

A revolt spread among the Albanians. At the end of 1942 four guerrilla groups were operating in the country, and by the end of 1944 they had freed the whole of Albania from the Germans.

The dominant party in Albania is the National Liberation Front, led by General Enver Hoxha, who is both Commander-in-Chief and Premier of the Provisional Government, which is republican in character.

**Area and Population.**—The area of the country is 10,629 square miles, while the population, according to the Census held on May 25, 1930, was 1,008,124.

The country is divided into 10 prefectures, named after the principal towns, which with the population in 1930 are as follows:—

| Prefectures                | Population in 1930 |        | Prefectures       | Population in 1930 |        |
|----------------------------|--------------------|--------|-------------------|--------------------|--------|
|                            | Prefecture         | Town   |                   | Prefecture         | Town   |
| Berat                      | 142,616            | 10,403 | Korçe (Koritza)   | 147,536            | 22,787 |
| Dibër (Dibra)              | 86,992             | —      | Kosova (Kosovo)   | 49,081             | —      |
| Durrës (Durazzo)           | 77,890             | 8,739  | Shkodër (Scutari) | 132,334            | 29,209 |
| Elbasan                    | 111,480            | 13,796 | Vlonë (Valona)    | 53,461             | 9,100  |
| Gjinokastër (Argirocastro) | 143,926            | 10,836 | Tirana (Capital)  | 57,808             | 30,806 |

**Religion and Education.**—There is no State religion. The population is distributed according to the following estimates:—Moslems, 688,280; Orthodox Christians (the Orthodox Church of Albania), 210,313; Roman Catholics, 104,184. The Gheg Christians in the north are for the most part Roman Catholics under two Archbishops, three Bishops, and one Mitred Abbot (there is also an Apostolic Delegate), and the Tosk Christians in the south are members of the Albanian Autocephalous Church, which was under the rule of the Holy Synod (constituted February 18, 1929) and had as Primate, the Metropolitan Christophoros Kissi and three bishops, and was recognized as autocephalous by the Oecumenical Patriarchate on March 17, 1937.

Primary education is nominally compulsory for children between the ages

of 6 and 13, but owing to the shortage of schools this cannot be thoroughly enforced. There were (1939) 663 State primary schools with 1,302 teachers, 28,988 boy pupils and 17,948 girls; 18 intermediate schools for boys with 4,810 pupils and 256 teachers, and 1 intermediate school for girls with 1,425 pupils and 37 teachers. In the 22 infant schools there were 40 teachers (women), 1,229 boys and 1,206 girls.

**Justice** is administered by the Pretor, the tribunal of first instance and the collegiate tribunal. There is no special court of appeal. At Tirana there is a court of cassation.

**Finance.**—The estimated revenue and expenditure (in Albanian francs) for five years ending March 31 is as follows:—

|               | 1935-36    | 1936-37    | 1937-38    | 1938-39    | 1939-40    |
|---------------|------------|------------|------------|------------|------------|
|               | francs     | francs     | francs     | francs     | francs     |
| Expenditure . | 14,086,000 | 18,584,000 | 26,224,787 | 28,235,400 | 40,000,000 |
| Revenue . .   | 17,237,000 | 18,879,000 | 26,224,787 | 28,565,400 | 40,000,000 |

In May, 1925, Albania obtained a foreign loan to be used exclusively in carrying out public works. The loan was for the nominal amount of 50,000,000 gold francs in Italian lire, and by the rise in value of the lira the Government made a profit of 12,200,000 gold francs. Thus the sum to be expended was 62,700,000 gold francs.

**Production and Industry.**—The Albanian economic system is very primitive; each family provides for its own needs. Great tracts of the country remain uncultivated, and the areas at present under cultivation (about 1,276 square miles) are dealt with in a primitive way. A number of agrarian reforms were initiated in 1930, including the formation of an agricultural bank, opened August 1, 1937. The State owns some 123,500 acres of the best land in the plain between the rivers Shkumbi and Vjosa. The country for the greater part is rugged, wild, and mountainous, the exceptions being along the Adriatic littoral and the Korçë (Coriza) Basin, which are fertile. Tobacco, timber, wool, hides, furs, cheese and dairy products, fish, olive oil, corn, cattle and bitumen are the principal products of the country. Cattle-breeding receives special attention. The wool is made up into coarse and heavy native cloth and exported.

Livestock, December, 1938: horses, 54,426; asses, 44,579; mules, 10,391; cattle, 391,175; sheep, 1,573,857; goats, 932,333; pigs, 15,286.

There are vast tracts of forest land composed of oak, walnut and chestnut trees, as well as beeches, pines and firs. The mineral wealth of Albania is considerable but undeveloped. The copper mines in the Puka district are being exploited. The salt-pits at Vlonë (Valona) are said to be of commercial importance, and Selenizza bitumen mines are also worked successfully. The principal industries in the country are those connected with agriculture, such as flour-milling, olive-pressing and cheese-making.

**Commerce.**—Imports and exports for 5 years are shown as follows (in Albanian francs):—

|         | 1934       | 1935       | 1936       | 1937       | 1938       |
|---------|------------|------------|------------|------------|------------|
| Imports | 12,831,708 | 13,730,138 | 16,777,691 | 20,315,687 | 22,397,890 |
| Exports | 4,284,331  | 6,037,478  | 7,434,621  | 10,175,665 | 9,749,959  |

Total trade between Albania and Great Britain (according to Board of Trade returns) was as follows:—

|                       | 1934   | 1935   | 1936   | 1937   | 1938   |
|-----------------------|--------|--------|--------|--------|--------|
|                       | £      | £      | £      | £      | £      |
| Imports from Albania  | 106    | 715    | 2,434  | 1,043  | 6,922  |
| Exports to Albania    | 37,843 | 41,542 | 35,543 | 37,409 | 24,025 |
| Re-exports to Albania | 157    | 443    | 806    | 1,459  | 1,374  |

**Communications.**—All the principal towns of Albania are connected by passable roads. The mountain districts of the north are still, however, mostly inaccessible with wheeled vehicles, and communications are still by means of pack ponies or donkeys. The total length of roads suitable for motor traffic in the country on August 31, 1938, was 1,383 miles. The ports are four in number, viz. Shengjin (San Giovanni di Medua), Durrës (Durazzo), Vlonë (Valona), and Sarandë (Porto Edda). Durrës is being fully equipped; but the others remain primitive. Number of post and telegraph offices, 53. There are ten regular air routes in service and 4 wireless stations.

In May 1940, work on the first railway in the country, between Durazzo and Elbasan, was commenced.

**Banking and Currency.**—On September 2, 1925, the National Bank of Albania was established in Rome, with branches in Tirana, Durrës, Korçë, Vlonë, Shkodër, Berat, Elbasan and Gjinokastër. It has a capital of 12,500,000 gold francs. Albanian participation was to have amounted to 5,625,000, but owing to the failure of Albanians to subscribe, almost the whole of the Albanian quota was eventually taken up by Italians. The remainder of the capital was subscribed by an international financial group headed by the Credito Italiano. The Bank has the exclusive right of issuing paper money and metal coinage. The monetary unit chosen is the Albanian franc (5 lek) (2903225 gr.), with a parity of 6·25 lire.

The bank has issued bank notes of 100, 20, 5 Albanian francs, and metallic currency as follows:—gold, 100, 50, 20 and 10 franc pieces; silver, 2 and 1 franc pieces; nickel, 1,  $\frac{1}{2}$  and  $\frac{1}{4}$  lek; bronze, 0·02, 0·01 franc pieces. On October 31, 1939, there were in circulation notes amounting to 27,414,822 francs and coin to the value of 4,822,530 francs, of which 1,590,003 francs were gold, 2,215,037 francs silver coins, 1,005,763 francs nickel coins, and 11,700 francs bronze coins. The cover for the note circulation on that date consisted of 46,464,000 francs, of which 7,567,000 francs were in gold.

In addition to the bank of issue, the following institutions also carry on banking business:—The Export Bank of Belgrade, with a branch in Tirana; the Agricultural State Bank, founded August 1, 1937, and absorbed by the Banco di Napoli on May 12, 1939; and the Banco di Napoli, Albania (a subsidiary of the Banco di Napoli in Naples), founded November 28, 1937, with a capital of 2,000,000 Albanian francs.

## ARABIA.

ARABIA is essentially a desert country comprising an area of roughly 1,000,000 square miles and inhabited for the most part by nomadic Beduin tribes eking out a precarious pastoral existence by the breeding of camels, sheep and goats. Bounded on the north by Iraq and Transjordan (Palestine), it is enclosed on the other three sides by the sea—the Red Sea on the west, the Arabian Sea on the south and the Persian Gulf on the east. The land-surface of the peninsula enclosed within these limits slopes down steadily from the elevated mountain barrier, which runs down the whole length of its western side parallel with the Red Sea, to sea-level on the Persian Gulf, and the uniformity of this slope is interrupted only in the extreme south-eastern corner of the peninsula, where the mountains of the Oman district rear their crests to an elevation of 10,000 feet above sea-level. With the exception of this mountainous district and the similar district of the Yemen, Arabia is a barren country consisting of vast tracts of steppe-desert, sand-waste and mountainous wilderness. It is a country of insignificant rainfall (the Yemen and Oman excepted); here and there, scattered oases, or oases-groups, are formed. The Taif district, for instance, in the Hejaz mountains above Mecca, the Qasim and Jebel Shanmar provinces in Central Arabia and the Hasa province near the Persian Gulf are among the best examples of such districts, while Medina, Taima, Riyadh, Jauif and Wadi Dawasir are but a few among the many large oases which occur frequently throughout the country. The population of Arabia cannot be estimated with any certainty, but would seem to be about 10 millions.

The inhabitants of Arabia are at present found in every degree of transition from the purely nomadic life of the Beduin to the simple civic life of towns in the interior like Anaza or Buraida and the more highly developed civilisation of Mecca, Medina and Jedda. Political changes have contributed to a development whereby the patriarchal, tribal organisation of the Beduin has weakened steadily before a natural tendency to communal organisation into States and principalities imposed on the people by the development of civic life. The introduction of modern fire-arms and the growth of an Arab nationalist spirit (directed against Turkish domination) in the borderlands of Syria and Iraq tended to encourage this process during the first decade of the present century, and the rise to power of Abdul Aziz ibn Sa'ud, the present Wahhabi King, gave it a further impetus. Ibn Sa'ud set to work to organise the unsettled Bedouin into civic communities under cover of a great Wahhabi

revival, and in the spring of 1918 struck the first blow for the Arabs against the Turks by capturing the Hasa province from the latter. The Great War (1914-18) completed and stereotyped the process of political organisation in Arabia, and the ejection of the Turks from the Hejaz, Asir and the Yemen left the Arabs to work out their own salvation unchecked by foreign control. Internecine warfare not unnaturally followed, and the result of a six years' struggle was that a single power (the Ibn Sa'ud dynasty of Nejd) achieved a paramount position throughout the peninsula beyond the southern coastal fringe, where the States of Yemen and Oman are the most important of those which maintain an independent existence together with the lesser principalities of Kuwait and Bahrain, the crucial chiefs of the Oman coast, the Hadramaut and the Aden hinterland, all of which enjoy in a greater or less degree the protection of Great Britain. The principality of Asir (capital Sabya), reduced in extent to a mere strip of the coast, maintained a precarious independence between Ibn Sa'ud and the Imam of Yemen (capital Sana') until October, 1926, when it accepted the suzerainty of Ibn Sa'ud. In 1930 it was practically annexed to the Hejaz and it was formally incorporated completely in Ibn Sa'ud's dominions in 1938 as a result of an abortive rising under its titular ruler, the Idriai, in October, 1932. These events were the principal causes of a war which broke out between Ibn Sa'ud and the Imam of Yemen in March, 1934. It led to the conclusion on May 20, 1934, of a peace treaty to remain in force for 20 years, which defined the boundary so as to leave Asir and the inland region of Najran to Ibn Sa'ud. The northern province of Aqaba-Maan was annexed by the British Government to the Trans-Jordan mandated area in July, 1925. As Ibn Sa'ud did not recognize this annexation, the matter is still a subject of negotiation between the two governments.

## THE KINGDOM OF SAUDI ARABIA.

(AL-MAMLAKA AL-'ARABIYA AS-SA'UDIYA.)

Saudi Arabia is now a single kingdom under the rule of Abdul-Aziz ibn Abdur-Rahman Al-Faisal Al Sa'ud, G.C.B., G.C.I.E. (born in 1880), who had been proclaimed King of the Hejaz on January 8, 1926, and had in 1927 changed his title of Sultan of Nejd and its dependencies to that of King, thus becoming 'King of the Hejaz and of Nejd and its Dependencies.' The unification of his dominions under their joint name was effected by a decree of September 22, 1932. On May 20, 1927, a treaty was signed at Jedda between Great Britain and Ibn Sa'ud, by which the former recognized the complete independence of the dominions of the latter.

For a short account of the rise of the Wahhabis under Ibn Sa'ud, and of the latter's conquest of Hejaz, see THE STATESMAN'S YEAR-BOOK, 1929, pp. 645-47.

Ibn Sa'ud has placed his State in a dominant position among the States of Arabia. The dual character of his realm is maintained provisionally, and there are still two capitals, Mecca and Riyadh. His administration as regards the kingdom of Nejd and its dependencies is that of an absolute monarchy of a patriarchal character, without ministers of State or other imitations of Western Europe. The king's eldest son, the Amir Sa'ud, who was formally declared heir apparent on June 15, 1933, normally resides in Nejd and exercises there the functions of Viceroy and Commander-in-Chief of the armed forces. It was proposed in 1932 to provide a single constitution for the whole country. This has not yet been done, and the Hejaz is still technically governed under a 'Constitution' issued on August 29, 1926, and subsequently amended. In

its present form this Constitution provides for a Council of Ministers under the Presidency of the Amir Faisal, the King's second son, who is also Minister for Foreign Affairs, and in whose office the Ministry of the Interior has been merged. He acts as Viceroy of the Hejaz in his father's absence. The religious law of Islam is the common law of the land, and is administered by religious courts at the head of which is a Chief Judge, who is responsible for the Department of Sharia (legal) Affairs. The Constitution also provides for the setting up of certain advisory Councils, comprising a consultative Legislative Assembly in Mecca, Municipal Councils in each of the towns of Medina and Jedda, and Village and Tribal Councils throughout the provinces. The members of these Councils consist of chief officials and of notables nominated or approved of by the King.

The frontiers of the Hejaz are not sufficiently definite to allow of anything like an accurate estimate of its area, which probably does not exceed 150,000 square miles. The population is probably about 3,000,000, of whom Mecca, the capital, accounts for some 80,000, Medina for 20,000 and Jedda for 30,000, while the great majority of the rest are Beduin. The chief port is Jedda, the seaport of Mecca; Yanbu, next in importance, occupies a similar position in relation to Medina; while ports of less importance are Muwaila, Wajh, Rabigh, Lith and Qunfuda. Medina produces excellent dates in abundance; Taif and other oases in the mountains and valleys produce honey and a fair variety of fruit; while Beduin products are hides, wool, charcoal and clarified butter. But the exports of the Hejaz are insignificant, and the country depends for existence almost entirely on the annual pilgrimage which brings large numbers of pilgrims from abroad each year. Other sources of revenue are being sought, and during the last year or two, two foreign companies have secured concessions, one for oil and one for minerals.

Towns with a population exceeding 10,000 inhabitants are: (1) Hufuf; (2) Mubarratz; (3) Riyadh (about 60,000); (4) Shaqra; (5) Ansaiza; (6) Buraida; (7) Hail; (8) Jauif; (9) Sakaka, and (10) Hanta. Of these Hufuf has a population of about 30,000, but none of the others (except Riyadh) exceed 20,000.

The products of Nejd are dates, wheat, barley, fruit of various kinds, hides, wool, oil, clarified butter (*saman* or ghi) and abas (Arab cloaks), besides camels, horses, donkeys and sheep. Oil is exploited by an American concessionary company, the Arabian-American Oil Company, a subsidiary of the Californian Standard Oil Company, whose principal field is at Dhahran, near El Khobar on the Persian Gulf coast. Crude oil is shipped from there to Bahrein for refining. A small refinery for local needs exists at Ras Tannura. The export trade is still insignificant, though capable of considerable development, especially as regards dates, hides and clarified butter. The export of Arab horses to Bombay is not as active as it was in the past, and the annual export of camels to Syria and Egypt, formerly a steady source of income to the Beduin, is now much reduced owing, *inter alia*, to the rapid development of motor transport in those countries. The chief imports of Nejd are piece-goods, cereals, tea, coffee, sugar, rice, and motor vehicles, mostly via Jedda, but some via Ras Tannura on the Persian Gulf.

The imports from the United Kingdom into Saudi Arabia (including Asir) and Yemen, according to Board of Trade figures amounted in 1938 to 84,960L., exports to United Kingdom were 28,871L., re-exports from United Kingdom, 3,008L.

For defence Ibn Sa'ud depends mainly on levies of various kinds, but the elements of a small regular army have recently been brought together in the

Hejaz. A few aeroplanes have been acquired and a few young Saudis have received some training abroad as pilots. In 1937 a Ministry of Defence was established, and a new training school for officers.

There are no roads, properly so called, in the Hejaz, except the road from Jedda to Mecca (45 miles), which was completed in the autumn of 1941 and is asphalted throughout its whole length. There is also a track from Mecca eastward through Riyadh to Uqair and Dhahran on the Persian Gulf, a distance of 829 miles, which is used for motor transport. A similar route connects Jedda with Medina via Rabigh and Rabigh with Wejh via Yanbu. Motor cars can now travel between Riyadh and Kuwait and between Riyadh and Hail, Jauif and the Northern Frontier Towns and also between Jedda and Dhaha and Muwallih and between Jedda and Jizan and Sabya. A route for motor traffic for the convenience of pilgrims and open during the season only was established between Nejeif in Iraq and Medina via Hail early in 1936.

That section of the Hejaz Railway which is in Saudi Arabian territory is not now in working order. At present motor omnibuses ply between Jedda and Mecca and belong to a unified motor car company, in which all previously privately owned companies have merged their identities. In accordance with an agreement signed in October 1939 between Egypt and Saudi Arabia, Egyptian engineers have constructed a metalled road from Jedda to Mecca and Ararat, and are to repair the road from Jedda to Medina. They are also to instal electricity and a water supply at Mecca.

The English gold sovereign is in practice if not in theory the basis of the currency. On January 22, 1928, a new silver currency, the *Riyal*, weighing 24.055 grammes, .830 fine, was introduced in place of the Turkish *Mesidie*. Ten *Riyals* = £1 (gold) at par, but the *Riyal*, in September, 1944, was quoted at 44 to the £ gold. The *Riyal* is subdivided into 11 *Qursk* (piastres) *Miri*, and each Q.M. contains 2 *Qursk Darij*. The Q.D.,  $\frac{1}{2}$  and  $\frac{1}{4}$  Q.D. are nickel coins. In 1936 the *Riyal* described above began to be replaced by a *Riyal* of 11.664 grammes, 916.6 fine, the same size, weight and fineness as the Indian rupee and fractions thereof, the new par being 20 *Riyals* = £1 (gold). The Saudi *Riyal* was declared in 1940 to be equal in value to the Indian rupee, and accounts have now to be kept in *Riyals*; but a considerable amount of gold coin is in circulation. Branches of the Netherlands Trading Society of Amsterdam, and Messrs. Gellatly, Hankey & Co. (Sudan), Ltd., conduct banking business in Jedda.

Seven powers maintain legations at Jedda, viz. Egypt, France, Great Britain, Iraq, the Netherlands, Turkey and (since May, 1942) the United States of America. Belgium is represented by an honorary consul, and a Fighting French representative arrived in November, 1942.

Early in 1938 an American company, operating a concession in Saudi Arabia, struck oil in commercial quantities. By the end of 1939 ten wells were being exploited and many others being drilled, and the export of oil was already considerable. A new concession, extending the area of operations, was signed in August, 1939. The oil royalties have greatly increased the financial strength of the Saudi Arabian Government.

King Abdul Aziz announced in June, 1938, his intention to form an army of thousands of troops on modern lines, and the policy has now been carried out.

A treaty of Arab brotherhood and alliance between Iraq, Saudi Arabia, and the Yemen, signed in 1936, was ratified in 1937.

In November, 1937, a general agreement between Saudi Arabia and the Yemen concerning the settlement of disputes was ratified: and at the same time and place an agreement regarding the delimitation of the frontiers between Saudi Arabia and the Yemen was negotiated.

In May, 1942, Saudi Arabia and His Majesty's Government, acting on behalf of the Sheikh of Koweit, signed agreements for friendship and neighbourly relations, for the extradition of offenders and for the regulation of trade between Saudi Arabia and Koweit.

*Envoy Extraordinary and Minister Plenipotentiary.*—Laurence Barton Graffey-Smith, C.M.G., O.B.E. (appointed January 18, 1945).

*Consul.*—R. E. Ellison, M.C.

*Envoy Extraordinary and Minister Plenipotentiary (in London).*—Sheikh Hafiz Wahba (appointed November 10, 1930).

**Yemen.**—In the Treaty of San'a of February 11, 1934, with the United Kingdom and India, of which the ratifications were exchanged on September 4, 1934, the Zaidi Imam Yahya b. Muhammad b. Hamid ed Din is styled 'His Majesty the King of the Yemen, the Imam,' and his dominions, which lie to the north-west of Aden and the Aden Protectorate, contain some 75,000 square miles with a population of three and a half millions. His territories include the area to the north-west of the Anglo-Turkish boundary drawn in 1902-4 (accepted by the Treaty of San'a, of February 11, 1934, as the boundary between the Aden Protectorate and the kingdom of Yemen).

In the north the boundary between the Yemen and Saudi Arabia has been defined by the Treaty of Taif concluded in June, 1934. This frontier starts from the sea at a point some five or ten miles north of Midi and runs due east inland until it reaches the hills some thirty miles from the coast whence it runs northwards for approximately fifty miles so as to leave the Sa'da Basin within the Yemen. Thence it runs in an easterly and south-easterly direction until it reaches the desert area in the neighbourhood of Nejran.

The Treaty of Taif aimed at the elimination both of the original and of future causes of dispute between the two rulers. It provided *inter alia* for the delimitation of the frontier by a joint commission, for the extradition of fugitive criminals and for the representation of either party abroad by the representatives of the other party, in cases where this was desired. The two kings further bound themselves to submit to arbitration all disputes between them, to observe neutrality in the event of either being attacked by a third party, to prevent their territories being used as a basis for action against each other and to co-operate in Arabian and foreign affairs.

To the north of San'a are the Imamic large towns of Amran, Tawila, Al Khamr, Al Suda, Sada (Lat. 16° 47' N., Long. 43° 43' E.), Quflat Al Udhur, and also the region of Al Jauf, Upper, Middle and Lower, with their capitals respectively at Al Matamma, Al Hazm, and Al Ghail, where live the 'Shawaf,' clansmen of the influential Bakil tribe, all of which tracts, watered by the River Kharid, recognize the Imam's suzerainty. To south of Al Jauf, and to east by north of San'a at a distance of six days' journey, lies the district of Marib, or Saba, whose ruler is subject to the King. Other large towns in the Yemen are Taizz (alt. 4600 ft.), Ibb (6275 ft.), Yerim (8600 ft.), Dhamar (7650 ft.). The altitude of San'a is 7260 ft. The three principal ports are Mocha, Hodeida and Loheiya.

The population of San'a, a walled city with eight gates, is between 20,000 and 25,000. The old-time granaries of the Upper Yemen still exist, and lie chiefly between the towns of Ibb and Al Jibla, and in the Wadi Sahul below Ibb and to its north, though indeed the agricultural products are widely distributed throughout the country and comprise barley, wheat, and millet, together with coffee—the finest berries coming from Menakha. Hides also are largely exported.

The Imam has nine sons, the eldest of whom, Seif al Islām Ahmad, is the Amir of Hajja and the Commander-in-Chief of the King's forces.

The Imam broke with the Axis Powers on February 26, 1943.

**The Hadhramaut.** See under ADEN, p. 90.

**Muscat and Oman.**—Muscat is the capital of the independent Sultanate of Muscat and Oman situated at the easterly corner of Arabia. Its seaboard is nearly 1,000 miles long and extends from near Tibba on the west side of the Musandam Peninsula round to Ras Darbat Ali. Ras Darbat Ali marks the boundary between the Sultanate of Muscat and Oman and the territory of the Sultan of Kishen and Socotra, a Sultanate within the Aden Protectorate. A small strip of the coast on the east side of the Musandam Peninsula from Dibbah to Khor Kalba is administered by minor chiefs of Trucial Oman, independent of the Sultan. The Sultanate extends inland to the borders of the Ruba al Khali or Great Desert. Physically Muscat and Oman consists of three divisions—a coastal plain, a range of hills, and a plateau. The coastal plain varies in width from ten miles in the neighbourhood of Suwaiq to practically nothing in the vicinity of Matrah and Muscat towns where the hills descend abruptly into the sea. The mountain range runs generally from north-west to south-east. It reaches its greatest height in the Jebel Akhdar region, where heights of over 9,000 feet occur. The hills are for the most part barren but in the high area round Jebel Akhdar they are green and there is considerable cultivation. The plateau has an average height of a thousand feet. With the exception of oases there is little or no cultivation. North-west of Muscat the coastal plain is known as the Batineh. It is fertile and prosperous. The date gardens extend for over 150 miles. The Batineh dates are famous for their flavour. They ripen in the first half of July well before the Basra dates. The coast line between Muscat and the province of Dhofar is barren and forbidding. The fertile province of Dhofar lies on the south-eastern coast of Arabia. Its principal town is Salalah on the coast while Murbat is the port. The last remaining possession on the north coast of the Gulf of Oman is the port of Gwadar and a small tract of country surrounding the town. The town of Muscat is the capital and seat of Government. At one time a town of some commercial importance it has of recent years lost most of its trade which has been transferred to the adjacent town of Matrah. Matrah is the starting point for the trade routes into the interior.

The area of the Sultanate has been estimated as about 82,000 square miles and the population at 500,000, chiefly Arabs, but there is a strong infusion of negro blood, especially along the coast. The towns of Muscat and Matrah are composed of one-third Indian, one-third Baluch and one-third negro. There are few Arabs resident in these two towns. The capital, Muscat, has a population of 4,200, and the adjacent town of Matrah 8,500.

The present Sultan is His Highness Sir Saiyid Said bin Taimur, G.C.I.E. (born August 13, 1910), who succeeded his father Saiyid Sir Taimur bin Feisal, K.C.I.E., C.S.I., in 1932, as the 13th of his dynasty to be Sultan of Muscat and Oman.

A new treaty of friendship, commerce and navigation between Britain and the Sultan was signed on February 5, 1939. The treaty reaffirms the close ties which have existed between the British Government and the Sultanate of Oman and Muscat for nearly a century and a half.

The revenue of the Sultan from all sources varies between six and seven lakhs of rupees yearly. In the valleys of the interior, as well as on the

Batineh, date cultivation has reached a high level, and there are possibilities of agricultural development were the water supply more certain. Camels are bred in large numbers by the inland tribes.

Trade is mainly in the hands of the Indians, some of whom are British subjects. Imports and exports are mainly from and to India. The chief imports in 1942-43 were: rice, Rs. 18,74,782; coffee, Rs. 83,473; sugar, Rs. 60,838. Dates are the principal export, Rs. 42,35,734 in 1942-43. Pomegranates, fresh and dried limes, and dried fish are the only other exports of any note. There are no industries of any importance. Total imports for 1942-43 amounted to Rs. 63,40,792, and total exports to Rs. 81,08,976.

In 1938, trade with United Kingdom (Board of Trade figures) was: imports from Muscat and Oman, Trucial Oman and Kuwait, 18,354; exports from United Kingdom, 40,262; re-exports, 514.

The only port of call for steamers is Muscat where, in 1942-43, 57 steamships of 1,60,538 tons entered and cleared. It is one of the ports on the mail route between Bombay and Basra. The mail service is a weekly one in both directions. The Indian Government maintains a post office and Cable and Wireless, Ltd., a telegraph office at Muscat.

Inland transport is by pack animals. The motor road connecting Muscat with Matrah has now been extended to Kalba at the far end of the Batineh, a distance of 210 miles. Hagar, Basher and Qariyat are also connected by motorable roads with Matrah. Cars run daily between Muscat and the towns in the Batineh.

The common medium of exchange is the Maria Theresa dollar. On the coast the Indian rupee circulates, but not in the interior. There is one Omani coin, a small copper coin called a *Baiza*. The rate of exchange varies from 160-200 baizas to the dollar. The weights in use are 1 Kiyas = the weight of 6 dollars or 5-9375 oz.; 24 Kiyas = 1 Maakat Maund; 10 Maunds = 1 Farasala; 200 Maunds = 1 Bahar. Rice is sold by the bag; other cereals by the following measures:—40 Palis = 1 Farrah; 20 Farrah = 1 Khandil.

*H.B.M.'s Consul and Political Agent.*—Captain R. D. Metcalfe.

The State of Kuwait is situated on the north-western coast of the Persian Gulf. The reigning dynasty was founded by Subah abu Abdullah, who ruled from 1756 to 1762. In accordance with the terms of a letter written to the Sheikh in November, 1914, the British Government recognized the Sheikhdom of Koweit as an independent Government under British protection. The present Sheikh, H.H. Sir Ahmad al Jabir al-Subah, K.C.S.I., K.C.I.E. (born 1885), succeeded his uncle, the 9th Sheikh Salim ibn Mubarak, on February 23, 1921. There is an Advisory Council which meets under the presidency of Sheikh Abdulla Salim, C.I.E., cousin of the present Ruler and son of the 9th Ruler.

Estimated population, 80,000, to which an indeterminate number of Bedouin must be added.

Indian rupees and annas are legal tender in Kuwait town, and the post office issues Indian stamps. Maria Theresa dollars are still used in the interior.

*Political Agent.*—C. J. Pelly, O.B.E., Indian Political Service.

**The Trucial Sheikhdoms.**—From Khor Khalba, on the Gulf of Oman, 90 miles south of Ras Musandam, for nearly 50 miles to Dibah, the coast of the Gulf of Oman (with the exception of a small area belonging to the Sheikh of

Kalba, who has been recognised as independent) is attributed to the Sheikhdom of Shargah, but is to some extent under the local control of various petty Sheikhdoms. The capital of the Sheikhdom is on the Persian Gulf side of the Musandam peninsula which runs up to the Strait of Ormuz. The tip of the Musandam peninsula, from Dibah on its east side to near Sha'am about 35 miles from Ras Musandam on its west side, forms part of the Sultanate of Muscat and is peopled by the Shihuh tribe. From Sha'am for nearly 400 miles to Khor el Odeid at the south-eastern end of the peninsula of Qatar the coast, formerly known as the Pirate Coast, of the Persian Gulf belongs to the Trucial Sheikhdoms who in 1820, after hostilities with the Honourable East India Company, signed a general treaty prescribing peace with the British Government, and perpetual abstention from plunder and piracy (specifically including the slave trade) by land and sea. This treaty was followed by further agreements providing for the suppression of the slave trade and for the search and, if necessary, seizure of suspected engaging in this trade, and by a series of other engagements of which the most important are the Perpetual Peace Treaty of May, 1858, and the Exclusive Agreement of March, 1892. Under the latter, the Sheikhdoms, on behalf of themselves, their heirs and successors, undertook that they would on no account enter into any agreement or correspondence with any power other than the British Government, receive foreign agents, or cede, sell or give for occupation any part of their territory save to the British Government. The area of these Sheikhdoms is not defined, but the total population of the six has recently been estimated at about 95,000, of whom about one-tenth are nomads. Relations with the Trucial Sheikhdoms are normally conducted through the Political Officer, Trucial Coast, and the British Residency Agent on the Trucial Coast, under the control of the Political Resident in the Persian Gulf.

The Trucial Sheikhdoms are:—

|                |                            |                 |
|----------------|----------------------------|-----------------|
| Shargah        | Muhammad Sultan bin Saqar. | Succeeded 1924. |
| Ras al Khaimah | Sultan bin Salim.          | " 1919.         |
| Umm ul Qawain  | Ahmad bin Rashid.          | " 1929.         |
| Ajman          | Rashid bin Humaid.         | " 1928.         |
| Debai          | Said bin Maktum.           | " 1912.         |
| Abu Dhabi      | Shakbut bin Sultan.        | " 1928.         |
| Kalba          | Hamud bin Said             | " 1937.         |

**Qatar.**—This Sheikhdom, which includes the whole of the Qatar peninsula, extends along the coast of the Persian Gulf from Khor el Odeid to the boundaries of Hasa. Its settled population was estimated in 1916 at about 25,000. The relations of the Sheikh of Qatar with the British Government are similar to those of the Trucial Sheikhdoms, and are regulated by a Treaty of November 3, 1916.

*Sheikh of Qatar.*—Abdullah ibn Jasim al Thani, C.I.E., succeeded in 1913.

**The State of Bahrain.**—The Bahrain islands form an archipelago in the Persian Gulf 20 miles off al Hasa on the Arabian coast. Bahrain, the largest island, is 27 miles long and 10 miles wide. About a twentieth part of its area is cultivated, dates, citrus fruits and lucerne being the chief crops. Other islands are Muharraq, to the north-east of Bahrain, 4 miles long and 1 mile wide; Sitra, to the east, 3 miles long and 1 mile wide;

In 1943-44 the chief imports were: rice, Rs. 9,67,870; wheat, Rs. 62,38,560; wheat flour, Rs. 17,88,220; coffee, Rs. 11,51,820; dates, Rs. 19,64,820; sugar, Rs. 11,28,170; spices, Rs. 7,05,050; cotton piece goods, Rs. 35,20,260; silk piece goods, Rs. 18,350; building materials, Rs. 670; cement, Rs. 84,280. The chief exports were: pearls, Rs. 4,79,720; sugar, Rs. 20,20,440; tea, Rs. 2,16,080; wheat flour, Rs. 14,21,810; rice, Rs.

## ARGENTINE REPUBLIC.

(REPÚBLICA ARGENTINA.)

### Constitution and Government.

In 1516, Don Juan Díaz de Solís discovered the Río de La Plata. In 1534, Don Pedro de Mendoza was sent by the King of Spain to take charge of the 'Gobernación y Capitanía de las tierras del Río de La Plata.' In February 1536, he founded the city of the 'Puerto de Santa María del Buen Aire,' and in 1810 the population rose against Imperial Spanish rule. In 1816 Argentina proclaimed its independence. Civil wars and anarchy followed until, in 1853, a stable government was established with a constitution.

The following is a list of Presidents from 1898 onwards:—

|                                                                      |                                                                                       |
|----------------------------------------------------------------------|---------------------------------------------------------------------------------------|
| Gen. Don Julio Argentino Roca, Oct. 12, 1898—Oct. 12, 1904.          | Don Hipólito Irigoyen, Oct. 12, 1928—Sep. 6, 1930. (Deposed.)                         |
| Dr. Don Manuel Quintana, Oct. 12, 1904—Mar. 12, 1906. (Died.)        | Gen. Don José Félix Uriburu (Provisional), Sep. 6, 1930—Feb. 20, 1932.                |
| Dr. Don José Figueroa Alcorta (Acting), Mar. 12, 1906—Oct. 12, 1910. | Gen. Don Agustín P. Justo, Feb. 20, 1932—Feb. 20, 1938.                               |
| Dr. Don Roque Sáenz Peña, Oct. 12, 1910—Aug. 9, 1914. (Died.)        | Dr. Don Roberto M. Ortiz, Feb. 20, 1938—June 24, 1942. (Resigned.)                    |
| Dr. Don Victorino de la Plaza (Acting), Aug. 9, 1914—Oct. 12, 1916.  | Dr. Don Ramón S. Castillo, June 27, 1942—June 4, 1943. (Deposed by a military junta.) |
| Don Hipólito Irigoyen, Oct. 12, 1916—Oct. 12, 1922.                  | General Arturo Rawson, June 5, 1943—June 7, 1943. (Resigned.)                         |
| Dr. Don Marcelo Torcuato de Alvear, Oct. 12, 1922—Oct. 12, 1928.     | General Pedro P. Ramírez, June 7, 1943—March 9, 1944. (Resigned.)                     |

The Constitution of the Argentine Republic bears date May 25, 1853, with modifications in 1860, 1866 and 1898. The President is normally elected for six years by 376 electors appointed by the fourteen provinces and the capital, equal to double the number of senators and deputies combined. A Vice-President, elected at the same time, presides over the Senate, but has otherwise no political power. The President is commander-in-chief of the army and navy, and appoints to all civil, military, naval, and judicial offices,

in certain cases with the approval of the Senate, and has the right of presentation to bishoprics; he is responsible with the Ministry for the acts of the executive; both President and Vice-President must be Roman Catholics, Argentine by birth, and cannot be re-elected, unless a period of six years intervenes. The President has a salary of 96,000 paper pesos, and 28,800 paper pesos for official expenses. The National Congress consists of a Senate and a House of Deputies. The Senate numbers 30, two from the capital and from each province, elected for nine years (one-third retiring every three years) by a special body of electors in the capital, and by the legislatures in the provinces. The Chamber of Deputies has 158 members elected by the people. The deputies are elected for four years, one-half retiring every two years. The two chambers meet annually from May 1 to September 30; the lower house receives the budget and initiates fiscal legislation.

In January, 1944, all political parties were dissolved.

*President of the Republic.*—Brigadier-General Edelmiro J. Farrell (on March 9, 1944, succeeded General Ramirez, resigned).

On February 25, 1944, a coup deprived General Ramirez of his Presidential powers, which were taken over by General Farrell, who became Acting President. He became President on March 9, 1944. Neither the United States nor Great Britain recognized the new régime. Bolivia, Chile, Spain, Switzerland, Sweden and Paraguay have given the régime recognition. On June 27, 1944, the United States ambassador in Buenos Aires was recalled to Washington; the British ambassador's recall followed immediately. At Argentina's request, the Pan-American Union agreed on November 1, 1944, to transmit to the governments of the American republics a proposal for a meeting of the Foreign Ministers of the Americas to consider Argentina's external policy.

The Ministry, appointed by and acting under the orders of the President, consists of eight Secretaries of State controlling the various departments.

On January 26, 1944, Argentina broke off relations with Germany and Japan, and on February 4, 1944, diplomatic relations were also broken with Vichy France, Bulgaria, Rumania and Hungary.

### LOCAL GOVERNMENT.

The Constitution, with certain small exceptions, is identical with that of the United States. Such matters as affect the Republic as a whole are under the Central Government. The governors of the various provinces, elected by the people of each province for a term varying between three and four years, are invested with very extensive powers, and are independent of the central executive. The provinces elect their own legislatures, and have complete control over their own affairs. The territories are under the supervision of governors appointed by the President. In Buenos Aires the 'Intendente' or Mayor is appointed by the President with the approval of the Senate. He is assisted by a deliberative council of 30 elected by the male inhabitants over 18 years, including foreigners who comply with certain conditions. Voting is compulsory under penalty of a fine. The Province of San Juan has enfranchised women. The deliberative council votes on measures relating to city finance, works, and general administration, and its decisions are carried out by the Mayor. Other municipalities have constitutions of a similar character.

<sup>1</sup> Figures for 1943.

## Finance.

Total ordinary and extraordinary receipts and expenditures for recent years have been as follows, in paper pesos:—

| Year | Receipts      | Expenditure   | Year  | Receipts      | Expenditure   |
|------|---------------|---------------|-------|---------------|---------------|
|      | Paper pesos   | Paper pesos   |       | Paper pesos   | Paper pesos   |
| 1937 | 991,304,000   | 1,321,123,000 | 1941  | 910,865,000   | 1,367,015,000 |
| 1938 | 991,444,000   | 1,273,352,000 | 1942  | 1,041,070,000 | 1,559,185,000 |
| 1939 | 1,014,932,000 | 1,460,287,000 | 1943* | 1,040,000,000 | 1,204,344,000 |
| 1940 | 966,855,000   | 1,819,731,000 | 1944* | 1,251,080,000 | 1,674,000,000 |

\* Includes payments made from the proceeds of bonds of 172,640,000 paper pesos in 1936; 243,336,000 in 1937; 270,397,000 in 1938; 384,858,000 in 1939; 182,709,000 in 1940; 195,164,000 in 1941, and 275,368,000 in 1942.

\* Budget Estimates.

On June 30, 1943, the national debt (excluding provincial and municipal debts) amounted to 8,260,301,220 paper pesos, of which 1,291,115,284 was external; public debt of the provinces and the municipalities amounted to 2,653,279,812 paper pesos, of which 477,526,676 was external.

National mortgage bonds outstanding December 31, 1943, totalled 1,511,843,500 paper pesos.

British investments, end of 1944, were 371,998,509*l.*, including 35,336,539*l.* in government bonds, 280,595,243*l.* in railways and 76,006,727*l.* in miscellaneous. Interest received was 8,079,295*l.*; 191,826,555*l.* (51.5 per cent.) was in default.

American investments, end of 1943, were 310,596,391 dollars, in dollar obligations of the National and Provincial Governments; this was 12.4 per cent. of the total invested in Latin-America. American direct investments in Argentine enterprises, 1940, were 387,945,000 dollars.

## Defence.

## ARMY.

The army of the Argentine Republic is a National Militia, service in which is compulsory for all citizens from their 20th to their 45th year. Naturalised citizens are exempt for a period of 10 years. For the first 10 years the men belong to the 'active' army, or first line (Permanent Forces). After completing 10 years in the first line, the men pass to the National Guard and serve in it for another 10 years, finishing their service with 5 years in the Territorial Guard; the latter is mobilised only in case of war. The period of continuous service, or training in the ranks with the permanent forces, is for 1 year. The reservists can be called out for training periodically.

The territory of the Republic is divided into 6 military districts for administrative purposes. The strength of the army in 1939 was 37,000 all ranks. The army is organised in 6 skeleton divisions, 3 cavalry brigades and 2 mountain detachments. On mobilisation, divisions would be brought up to strength, and their number doubled.

There is a trained reserve numbering 300,000 men, of whom 215,000 belong to the National Guard and 70,000 to the Territorial Guard. The territorial reserve numbers 100,000 men.

The military budget for the year 1939 was 110,000,000 paper pesos.

There is a military aviation training school at El Palomar. The air force is organised in 3 aviation groups, each comprising 3 reconnaissance and 1 fighting group. Each group is composed of two flights. There is a national aircraft factory at Córdoba.

## NAVY.

| Laid down | Name                      | Standard Displacement Tons | Armour |      | Principal Armament                | Torpedo tubes | Indicated Horse Power | Nominal speed knots |
|-----------|---------------------------|----------------------------|--------|------|-----------------------------------|---------------|-----------------------|---------------------|
|           |                           |                            | Belt   | Guns |                                   |               |                       |                     |

|           | Moreno . . . . .          | 27,720                     | 10     | 12   | 12 12-in., 12 6-in., 4 3-in. A.A. | —             | 45,000                | 23                  |
|           | Rivadavia . . . . .       |                            |        |      |                                   |               |                       |                     |
| 1935      | CROUZERS                  | 6,000                      | 3      | 2    | 9 6-in., 4 4-in. A.A.             | 6             | 60,000                | 31                  |
|           | Almirante Brown . . . . . | 6,800                      | 1      | 2    | 6 7.5-in., 12 4-in.               | 6             | 85,000                | 32                  |
| 1927      | 25 de Mayo . . . . .      |                            |        |      |                                   |               |                       |                     |
| 1890      | COAST DEFENCE VESSELS     |                            |        |      |                                   |               |                       |                     |
|           | Pueyrredón . . . . .      | 6,100                      | 6      | 6    | (2 10-in., 8 6-in. . . . .)       | —             | 13,000                | 18                  |
|           | Belgrano . . . . .        |                            |        |      | (2 10-in., 8 4.7-in. . . . .)     |               |                       |                     |
| 1889      | Independencia . . . . .   | 2,595                      | 8      | 8    | 2 9.4-in., 4 4.7-in. . . . .      | —             | 3,000                 | 14                  |
|           | Libertad . . . . .        |                            |        |      |                                   |               |                       |                     |

There are also 14 destroyers, 3 submarines, 14 mine-sweepers, and some training and miscellaneous craft.

The battleships *Moreno* and *Rivadavia*, the coast defence ironclads *Independencia* and *Libertad*, *Pueyrredón* and *Belgrano*, and 4 destroyers have been converted to oil burning and otherwise modernised. The *Belgrano* is at present employed as a submarine depot ship. A naval programme, to involve the expenditure of 75,000,000 gold pesos, was approved in 1926. It provided for extension of the present dockyard accommodation in the River Plate and at Puerto Belgrano, and the construction of a new yard at Mar del Plata. New construction covered by this legislation included the cruisers listed above, 3 submarines, built in Italy, and 11 of the destroyers enumerated, nine of which were built in England. Two British-built surveying vessels were delivered in 1928. Two 800-ton sloops are building in Argentina, and two more are projected. A destroyer is to be acquired from the Spanish Government to replace one that was lost.

The active personnel of the navy comprises 337 officers, 130 engineers, 27 electrical engineers, and about 11,000 men (including about 5,000 conscripts), who have to serve two years. There is a corps of coast artillery of 450 men, a naval school, a school of mechanics, a school for artillery, and a school for torpedo practice.

## Production and Industry.

Argentina has an area of about 670,251,120 acres, of which about 41 per cent. is pasture land, 32 per cent. woodland and 10 per cent. (67,400,000 acres) cultivated. The agricultural census of June, 1937, showed 439,874 farms and ranches, of which 164,871 were operated by owners, 197,174 by tenants, and 77,829 under special arrangements. Owners and tenants included 276,129 Argentines; of the total, 111,379 were illiterate. Cereals occupied 46,840,000 acres.

In the territories the Federal Government owns 237,768,000 acres suitable in general for pastoral colonisation, and these lands are conditionally offered free or for sale or on lease.

The area planted and produce of principal crops are shown as follows for recent years were :—

|           | Acreage    |            |            | Produce<br>(Metric Tons) |           |           |
|-----------|------------|------------|------------|--------------------------|-----------|-----------|
|           | 1941-42    | 1942-43    | 1943-44    | 1941-42                  | 1942-43   | 1943-44   |
| Wheat .   | 18,125,000 | 16,500,000 | 16,428,000 | 6,088,900                | 6,400,000 | 6,800,000 |
| Oats .    | 8,560,000  | 4,619,000  | 5,107,000  | 450,000                  | 580,600   | 924,800   |
| Maize .   | 12,355,000 | 10,221,000 | 10,878,000 | 9,034,000                | 1,945,184 | 8,988,000 |
| Linseed . | 6,805,000  | 6,075,000  | 5,659,000  | 1,600,000                | 1,897,979 | 1,578,000 |

The total grain and meat exported for three years, in metric tons, is shown as follows :—

| Year | Wheat     | Maize   | Linseed | Oats   | Meat    |
|------|-----------|---------|---------|--------|---------|
| 1941 | 2,389,678 | 553,100 | 664,716 | 88,330 | 687,055 |
| 1942 | 2,176,189 | 219,859 | 315,107 | 75,387 | 696,538 |
| 1943 | 1,195,447 | 190,408 | 646,469 | 59,017 | 658,288 |

Alfalfa, on about thirteen and a half million acres for feeding livestock, is Argentina's most successful crop. Cotton, potatoes, sugar, vine, tobacco, rice and yerba mate (Paraguayan tea) are also cultivated. Sugar production in 1942, 360,514 tons; in 1943, 409,823 tons; 24,257,935 litres of alcohol were also produced. There were 41 cane sugar mills and one beet sugar factory. Total production of wine, in 1942, 179,826,660 gallons. Production of table grapes, 1942-43, 237,700 tons. Citrus fruit in 1943-44 produced 384,663 tons of oranges, 126,534 tons of tangerines and 62,000 tons of lemons. Total fruit exports, 1943, 18,300 tons, of which pears and apples furnished two thirds. Potato harvest, 1943-44, amounted to 1,404,483 metric tons. The area under tobacco production, 1943-44, was 19,000 hectares; output (1943-44), 16,069 tons. Production of yerba mate amounted to 83,000 metric tons; the plant is a rich source of chlorophyll, useful in the manufacture of medicines. Production of cotton in 1943-44 amounted to 119,921 tons of fibre from 369,520 hectares. Peanut crop, 1943-44, 199,000 tons; sunflower seed (first grown by Russian immigrants in 1900 and now furnishing the country's most popular edible oil), 645,100 tons. Exports of vegetable oils (from sunflower, cotton seed, rape seed and peanuts), 1943, 97,500 tons. Export of quebracho-extract in 1943 (from output of 162,722 tons) totalled 144,504 tons; export (1943) of logs for treatment abroad, 436 metric tons. Argentina is the world's largest source of tannin.

In the provinces of Buenos Aires, Santa Fé, and Entre Rios 463,000 acres of agricultural lands have been acquired by the Jewish Colonisation Association; 158,000 acres are under cultivation.

The live-stock census (July 1, 1942) showed cattle, 31,459,500; horses, 6,756,534; mules and asses, 508,739; sheep, 50,902,430; goats, 2,837,989; pigs, 5,707,165. Wool production in 1943 was 232,500 tons; exports, 1943, 88,700 metric tons. Butter production (1943), 46,978 tons, with exports of 16,400 metric tons; casein, 28,600 tons, with exports of 14,600 metric tons; cheese, 68,500 metric tons, with exports of 13,400 tons.

The principal industry is meat refrigeration. In 1943, 294,827 metric tons of chilled and frozen beef, 94,571 tons of tinned corned beef, 96,645 metric

tons of mutton and 58,415 metric tons of pork were exported. The largest refrigerating plant in the world, with a daily capacity of 5,000 cattle and 10,000 sheep, is at Buenos Aires. Cattle killed in Argentina in 1943, 6,697,921 heads; sheep, 11,900,370; hogs, 3,500,292. Exports in 1943 of hides, 111,670 tons. Flour milling ranks second to refrigeration. In 1943, 162 mills produced 1,588,916 tons of flour; exports, 1943, 85,291 tons.

Gross value in 1943 of agricultural production was 1,600 million pesos (1,750 million in 1942); of livestock production, 1,750 million pesos (unchanged in 1942), and of industrial production, 7,800 million pesos (7,000 million in 1942).

In 1941 there were 57,940 industrial establishments; 852,154 manual workers earned 1,284,789,000 pesos, producing products valued at 6,387,304,000 paper pesos, utilizing 3,247,895 horse power and raw material valued at 3,851,366,000 pesos. Capital invested in manufacturing was 5,000,000,000 pesos. In 1941, only 53 factories employed more than 1,000 workers; there were 7,196 textile establishments; 14,017 making foodstuffs, beverages and tobacco; 9,617, machinery and vehicles; 5,479, forestal products; 4,594 metals (not machinery); 1,399, chemical and pharmaceutical substances. In 1942, 977 electric power stations produced 2,773 million kilowatt hours. Twenty breweries report output of 1,475,927 hectolitres, valued at 36,831,298 pesos.

Mining is of no great importance. Mineral production in 1942 was valued at 214,300,730 pesos, of which petroleum accounted for 134,840,530 pesos. Gold, silver and copper are worked in Catamarca, where there are also two valuable tin mines, and gold and copper in San Juan, La Rioja and the south-western territories. Coal is found in the Andine Provinces, in the Cordillera region of Patagonia and in Northern Patagonia. Tungsten (1,923 tons in 1942) is also an important mineral, others being lead, zinc and limestone. During 1942 crude-oil production was 3,768,547 cubic metres (23,742,000 barrels), of which 2,445,586 cubic metres came from Government oilfields (2,632,901 cubic metres in 1943 plus 340,602,000 cubic metres of natural gas) and 1,322,961 cubic metres from private companies' oilfields.

### Commerce.

Agricultural products account for from 50 to 65 per cent. of total exports. Import values include charges for carriage, insurance and freight; export values are on a f.o.b. basis. Real values of foreign trade in paper pesos, exclusive of coin and bullion :—

|         | 1940                      | 1941                      | 1942                      | 1943                    | 1944                      |

Total trade (Board of Trade returns) between Argentina and the United Kingdom for 5 years:—

|                                   | 1934       | 1935       | 1936       | 1937       | 1938       |
|-----------------------------------|------------|------------|------------|------------|------------|
|                                   | £          | £          | £          | £          | £          |
| Imports from Argentina into U.K.  | 47,029,541 | 43,966,596 | 45,069,682 | 59,326,092 | 38,446,000 |
| Exports to Argentina from U.K.    | 14,854,653 | 15,236,670 | 15,266,220 | 20,043,196 | 19,838,366 |
| Re-exports to Argentina from U.K. | 249,978    | 844,076    | 272,987    | 948,406    | 877,194    |

United Kingdom exports to Argentina (including shipments of war supplies, if any, by Government departments) for 1939, 1940 and 1941 were 20,428,000£, 17,763,000£ and 15,497,000£ respectively. Excluding such shipments, exports in 1942, 1943 and 1944 were 13,308,000£, 9,553,000£ and 4,070,000£ respectively.

### Shipping and Navigation.

The total number of vessels entering Argentine ports from abroad in 1943 was 1,268 of 2,533,448 tons, 523 being Argentine, 145 Swedish, 178 British, 115 Spanish, 89 Brazilian and 65 American. The mercantile marine (1943) was 4,079 vessels of 455,807 tons; the State-owned fleet comprised 27 vessels of 134,811 tons.

### Communications.

The first railway concession dates from 1854. Length of railways, June 30, 1944, was 26,107 miles, of which 8,060 miles belong to the State. Total receipts to June 30, 1944, were 676,860,356 paper pesos. A new railway connecting Salta, Argentina, with Antofagasta, Chile (550 miles), is being completed.

On June 30, 1943, 39,732 miles of national and provincial highways were open. In February, 1940, the Transandine tunnel was opened to motor traffic, facilitating all-year road traffic with Chile. The four main roads constituting Argentina's portion of the Pan-American Highway are (1942) open to traffic.

In 1943 the national post-office handled a total of 1,084,851,385 pieces of mail; national telegraph lines totalled 29,510 miles; telegrams transmitted through 4,382 post-offices totalled 29,018,443. In 1943, the telephone services operated 478,658 instruments. Wireless telephony between Buenos Aires, Chile, the United States and Europe is in general use. There are 55 broadcasting stations and about 1,250,000 receiving sets. Cable service to other Latin American countries and the United States is provided by All-America Cables.

### Banking and Credit.

A law promulgated March 28, 1935, transferred from the Banco de la Nación to a newly-created Central Bank the duties of banker to the Government and of management of the clearing system; it is barred from making loans to Provincial or local authorities and loans to the Government are limited to 15 per cent of its capital and reserves. It has control of the gold stock. The Central Bank has exclusive right to issue notes except that those of 5 pesos or less in value (as well as nickel and copper coinage) are issued by the State and subject to the limit of 20 pesos at the request of the Central Bank and must keep a sufficient reserve of gold per inhabitant; the Central Bank must keep a minimum reserve of 25 per cent. of notes and total sight liabilities. The Central Bank reported August 31, 1944, deposits of 2,179,046,000 pesos; note circulation, 2,106,000,000 pesos; gold at home, 1,239,000,000 pesos; in the Exchange Equalization Fund and abroad, 2,438,000,000 pesos. On March 31, 1942, there were 41 banks with capital of 1,000,000

paper pesos or over (including the Banco de la Nación, by far the largest), consisting of 9 provincial banks, 21 domestic banks, and 11 foreign banks, all of whom are shareholders in the Central Bank.

The Banco de la Nación (founded in 1891) reported June 30, 1944, capital and reserves of 249,749,900 paper pesos; deposits, 2,887,846,800 paper pesos; loans and discounts, 1,169,133,100 paper pesos; cash, 686,875,700 paper pesos. It has 266 branches, including one abroad at Asunción, Paraguay.

The national postal savings bank (*Caja Nacional de Ahorro Postal*) had on August 31, 1944, 9,706 branches and 2,852,489 depositors with total deposits amounting to 257,756,540 paper pesos; 8,105 of the branches were in schools. Total savings deposits, all banks, March 31, 1944, were 2,605,700,000 pesos.

### Money, Weights and Measures.

The monetary system of the Republic is on a gold exchange standard, the unit for foreign transactions being, nominally, the *peso oro* (gold peso) and for domestic transactions, the *peso moneda nacional* (paper peso), legal tender for all domestic debts. Figures in gold pesos are followed by the abbreviation *o/s* (*oro sellado*, minted gold); figures in paper pesos, by the abbreviation *m/n* (*moneda nacional*, national money). The paper peso is equal to  $\frac{1}{44}$  gold peso; to convert paper pesos into gold pesos, multiply by  $\frac{1}{44}$ . To convert gold pesos into paper pesos, multiply by 2.2727.

The gold peso weighs 1.6129 grammes of gold  $\frac{1}{4}$  fine; it is divided into 100 *centavos*. The monetary law of November 5, 1881, authorized the coinage of five and two-and-a-half gold peso pieces. The 5-peso gold piece (the *Argentino*) weighs 8.0645 grammes, .900 fine, and therefore contains 7.25805 grammes of fine gold, but gold is not widely in circulation. Circulation consists chiefly of paper notes (issued since 1897) ranging from 1,000 pesos down to 50 centavos. The coins actually circulating (1942, were nickel, 50, 20, 10 and 5 centavos, and bronze, 2 centavos and 1 centavo.

Convertibility of paper pesos into gold was suspended December 17, 1929. Control of foreign exchange was established October 13, 1931. Beginning December 11, 1933, foreign exchanges were quoted in paper pesos; on January 19, 1934, the paper peso was 'pegged' to sterling at the official buying rate for export bills of 15 pesos = 1£ and the official selling rate for imports and financial services of 16 pesos = 1£. These rates have been changed from time to time. On September 22, 1939, the peso was pegged to the U.S. dollar at the rate of 3.3582 peso = 1 dollar or peso = 29.773 cents; in 1941 in addition a special export rate was fixed of 23.704 cents, which, unchanged in 1942, rose to 25.125 in 1943 and 1944.

The Argentine gold peso had in 1929 an average rate in London of 47.09 pesos to the £; in 1930, 41.34; 1931, 35.36; 1932, 39.80; 1933, 41.56 (free rate, 32.50); 1934, 36.48 (27.50). The paper peso, quoted in 1935, had an average rate of 15 (free rate, 18.59). In 1940 the peso in London ranged between 16.90 and 18.00 to the £; in 1944 the conversion rate in Buenos Aires varied between 16.18 and 16.25 to the £.

Since January 1, 1887, the use of the metric system has been compulsory by law, but actually its enforcement is lax.

### Diplomatic Representatives.

#### 1. OF THE ARGENTINE REPUBLIC IN GREAT BRITAIN.

*Ambassador Extraordinary and Plenipotentiary*.—Dr. Miguel Angel Carcano, K.B.E. (appointed December 24, 1941).

*Counsellor*.—Ricardo J. Siri.

*Secretaries*.—Dr. Rodolfo Munoz, Alejandro Cullen and Luis Castella.

*Military Attaché*.—Col. Pablo Berretta.

*Naval Attaché*.—Captain Ricardo Lopez Campo.

*Commercial Counsellor*.—Ricardo Q. Blamey-Lafone.

*Commercial Attaché*.—Adolfo M. Flores Piran.

*Economic Attaché*.—Diego Lezica-Alvear.

*Agricultural Attaché*.—Pascual Russo.

There are Consular representatives at Cardiff, Dublin, Glasgow, Liverpool, Manchester and Southampton.

#### 2. OF GREAT BRITAIN IN THE ARGENTINE REPUBLIC.

*Ambassador Extraordinary and Plenipotentiary*.—Sir David Victor Kelly, K.C.M.G., M.C. (appointed March 27, 1942).

*Counsellor*.—Sir Andrew Noble, Bt.

*Secretaries*.—J. G. S. Beith and C. A. E. Shuckburgh.

*Military Attaché*.—Lt.-Col. K. R. Stirling-Wyllie.

*Naval Attaché*.—Rear-Admiral H. A. Foster, M.V.O.

*Air Attaché*.—Air Commodore A. A. Walser, M.C., D.F.C.

*Commercial Counsellor*.—C. R. Jerram, C.M.G.

*Commercial Secretary*.—W. N. Storey.

*Consul-General* (at Buenos Aires).—A. H. Marlow, C.B.E.

There is a Consul at Rosario and there are Vice-Consuls at Bahía Blanca, Comodoro Rivadavia, Concordia, Córdoba, La Plata, Mendoza, Río Gallegos, San Julián, Santa Cruz, Santa Fe, Trelew, Tucuman and Villa Constitución.

## BELGIUM.

(ROYAUME DE BELGIQUE—KONINKRIJK BELGIË.)

### Reigning King.

**Leopold III**, born November 3, 1901, son of the late King Albert (died February 17, 1934), and of Princess *Elizabeth of Bavaria*; succeeded his father, February 23, 1934; married (1) on November 4, 1926, to Princess *Astrid of Sweden*, died August 29, 1935, and (2) on September 11, 1941, to Mlle. Marie Lillian *Baels*, who renounced the title and rank of Queen and bears the title of Princess de Réthy.

*Children of the King's first marriage.*—(1) Josephine Charlotte, born October 11, 1927. (2) Prince Baudouin, born September 7, 1930. (3) Prince Albert, born June 6, 1934.

*Child of the King's second marriage.*—Philip, Prince of Réthy, born July 20, 1942.

*Brother and Sister of the King.*—(1) Prince *Charles*, Count of Flanders, born October 10, 1903. (2) Princess *Marie-José*, born August 4, 1906, married to Prince Umberto, heir-apparent to the crown of Italy, on January 8, 1930.

*Aunts of the King.*—(1) Princess *Henriette*, born November 30, 1870; married February 12, 1896, to Prince Emmanuel of Orleans, Duke of Vendôme (died February 1, 1931). (2) Princess *Josephine*, born October 18, 1872; married May 28, 1904, to Prince Charles of Hohenzollern (died February 21, 1919).

The King has a civil list of 12,000,000 francs, and the Queen-Mother of 2,000,000 francs.

The Kingdom of Belgium formed itself into an independent State in 1830, having from 1815 been a part of the Netherlands. The secession was decreed on October 4, 1830, by a Provisional Government, established in consequence of a revolution which broke out at Brussels, on August 25, 1830. A National Congress elected Prince Leopold of Saxe-Coburg King of the Belgians on June 4, 1831; he ascended the throne July 21, 1831. On his death in 1865 he was succeeded by his son, Leopold II, who reigned until 1909.

By the Treaty of London, November 15, 1831, the neutrality of Belgium was guaranteed by Austria, Russia, Great Britain and Prussia. It was not until after the signing of the Treaty of London, April 19, 1839, which established peace between King Leopold I and the King of the Netherlands, that all the States of Europe recognised the Kingdom of Belgium. In the Treaty of Versailles (June 28, 1919), it is stated that as the treaties of 1839 'no longer conform to the requirements of the situation,' these are abrogated and will be replaced by other treaties.

On May 10, 1940, suddenly and without warning or ultimatum, the armed forces of Germany attacked the Netherlands, Belgium and Luxembourg. By May 17 the Germans had occupied Brussels, Louvain and Malines. Next day they had taken Antwerp. On May 28 King Leopold, who was commander-in-chief of the army, was compelled to surrender unconditionally to the Germans, and became a prisoner of war. On May 30 the Belgian Cabinet unanimously decided to go on with the struggle, and approved a decree that, in the name of the Belgian people, in pursuance of Article 32 of the Constitution and in view of the fact that

it was impossible for the king to reign, the powers normally vested in him would be exercised by the Government. Next day the Belgian Parliament, meeting at Limoges, supported this view of the Belgian Cabinet and declared its intention of continuing the fight against the Germans by the side of the Allies. On June 6 the British Government declared that they recognised the Belgian Government as the only legal Government of Belgium, and that the Kingdom of Belgium was regarded as territory in occupation of Germany. On October 22 the Belgian Cabinet established its seat in London.

In November, 1944, Allied armies drove the last German forces out of Belgium and completed the liberation of the country. Brussels had already been liberated in September; on September 8, 1944, the Belgian Cabinet returned to Brussels from London. In view of the detention of King Leopold in Germany, the Belgian parliament (Senate and Chamber), on September 20, elected Prince Charles, Count of Flanders, brother of the King, as Regent of the Kingdom of Belgium.

### Constitution and Government.

According to the Constitution of 1831 Belgium is 'a constitutional representative, and hereditary monarchy.' The legislative power is vested in the King, the Senate, and the Chamber of Representatives. The royal succession is in the direct male line in the order of primogeniture. By marriage without the King's consent, however, the right of succession is forfeited, but may be restored by the King with the consent of the two Chambers. No act of the King can have effect unless countersigned by one of his Ministers, who thus becomes responsible for it. The King convokes, prorogues, and dissolves the Chambers. In default of male heirs, the King may nominate his successor with the consent of the Chambers. If the successor be under eighteen years of age, the two Chambers meet together for the purpose of nominating a regent during the minority.

Those sections of the Belgian Constitution which regulate the organisation of the legislative power were revised in October, 1921. For both Senate and Chamber all elections are held on the principle of universal suffrage.

The Senate consists of members elected for four years, partly directly and partly indirectly. The number elected directly is equal to half the number of members of the Chamber of Representatives. The constituent body is similar to that which elects deputies to the Chamber; the minimum age of electors is fixed at twenty-one years, and the minimum length of residence required is six months. In Belgium, only the following women may vote in parliamentary elections: (1) Widows, not re-married, of soldiers killed in the Great War; widows of Belgian citizens killed by the enemy during the war, or failing them, their mothers, if the latter are widows; (2) Widowed mothers of bachelor soldiers killed in the war; (3) Women condemned to imprisonment or subjected to preventive detention, for political reasons, during the enemy occupation of Belgium. In the election of members both of the Senate and Chamber of Representatives directly, the principle of proportional representation of parties was introduced by Law of December 29, 1899. Senators elected indirectly are chosen by the provincial councils, on the basis of one for 200,000 inhabitants. Every addition of 125,000 inhabitants gives one for 200,000 inhabitants. Each provincial council elects at least three senators. There are at present 44 provincial senators. No one, during two years preceding the election, must have been a member of the council

appointing him. Senators are elected by the Senate itself in the proportion of half of the preceding category. The senators belonging to these two latter categories are also elected by the method of proportional representation. All senators must be at least forty years of age. They receive 28,000 francs per annum. Sons of the King, or failing these, Belgian princes of the reigning branch of the Royal Family are by right senators at the age of eighteen, but have no voice in the deliberations till the age of twenty-five years.

The members of the Chamber of Representatives are all elected directly by the electoral body. Their number at present, 202 (law of April 11, 1936), is proportioned to the population, and cannot exceed one for every 40,000 inhabitants. They sit for four years. Deputies must be not less than twenty-five years of age, and resident in Belgium. Each deputy has an annual indemnity of 42,000 francs, and a free pass all the year over Government and Companies' railways.

The Senate and Chamber meet annually in the month of November, and must sit for at least forty days; but the King has the power of convoking them on extraordinary occasions, and of dissolving them either simultaneously or separately. In the latter case a new election must take place within forty days, and a meeting of the Chambers within two months. An adjournment cannot be made for a period exceeding one month without the consent of the Chambers.

Parties in the Chamber elected April 2, 1939:—Socialists, 64; Catholics, 73; Liberals, 33; Rexistes, 4; Flemish Nationalists, 17; Communists, 9. Parties in the Senate elected April 2, 1939:—Socialists, 61; Catholics, 62; Liberals, 25; Rexistes, 4; Flemish Nationalists, 12; Communists, 3.

The Executive Government, appointed February 11, 1945, is composed as follows:—

*Prime Minister and Minister of Fuel.*—Achille Van Acker (Socialist).

*Deputy Prime Minister and Minister of Foreign Affairs.*—Paul-Henri Spaak (Socialist).

*Minister of the Interior.*—Adolphe Van Glabbeke (Liberal).

*Minister of Justice.*—Charles du Bus de Warnaffe (Catholic).

*Minister of Finance.*—Gaston Eyskens (Catholic).

*Minister of Education.*—Auguste Buissereel (Liberal).

*Minister of National Defence.*—Léo Mundeleer (Liberal).

*Minister of Labour and Social Insurance.*—Elié Troclet (Socialist).

*Minister of Public Works.*—Hermien Vos (Socialist).

*Minister of Economic Affairs.*—Albert de Smaele (No party).

*Minister of Agriculture.*—Louis Delvaux (Catholic).

*Minister of Food.*—Edgard Lalmand (Communist).

*Minister of Communications.*—Ernest Rongvaux (Socialist).

*Minister of the Colonies.*—Edgard de Bruyne (Catholic).

*Minister of Public Health.*—Dr. Albert Marteauz (Communist).

*Minister of Information.*—Edouard Ronse (Catholic).

*Minister for War Victims.*—Henri Pauwels (Catholic).

*Minister without Portfolio.*—Paul Kronacker (Liberal).

#### LOCAL GOVERNMENT.

The provinces and communes (2,670 in 1939) of Belgium have a large measure of autonomous government.

In regard to the communal electorate, the law of April 15, 1930, definitely lays it down that all Belgians over 21 years of age without distinction of sex, who have been domiciled for at least six months, have the right to vote. Proportional representation is applied to the communal elections, and communal councils are to be renewed every six years. In each commune there is a college composed of the burgomaster, the president, and a certain number of aldermen.

#### Area and Population.

Belgium (including the districts of Eupen and Malmédy) has an area of 30,506 square kilometres, or 11,775 English square miles. The following table shows the population at various dates:—

| Census Years | Population | Total Increase | Increase per cent. per annum | Census Years | Population | Total Increase | Increase per cent. per annum |
|--------------|------------|----------------|------------------------------|--------------|------------|----------------|------------------------------|
| 1876         | 5,386,185  | 508,352        | 1.05                         | 1910         | 7,422,784  | 730,236        | 1.09                         |
| 1890         | 6,069,321  | 549,312        | 0.99                         | 1920         | 7,465,782  | 41,998         | 0.06                         |
| 1900         | 6,698,548  | 624,227        | 1.03                         | 1930         | 8,092,004  | 626,222        | 0.84                         |

#### Area and population of provinces:—

| Provinces        | Area:<br>Eng. sq. miles | Population              |                            |                            |
|------------------|-------------------------|-------------------------|----------------------------|----------------------------|
|                  |                         | Census<br>Dec. 31, 1930 | Estimated<br>Dec. 31, 1940 | Estimated<br>Dec. 31, 1941 |

| Mouscron                          | 35,722  | Ronse (Renaix)       | 25,261 |

<sup>1</sup> The suburbs comprise 15 distinct communes, viz., Anderlecht, Etterbeek, Forest, Ixelles, Jette, Koekelberg, Molenbeek St. Jean, St. Gilles, St. Josse-ten-Noode, Schaerbeek, Uccle, Woluwe St. Lambert, Auderghem, Watermael-Boitsfort, Woluwe-St. Pierre.

### Religion.

Of the inhabitants professing a religion the majority are Roman Catholic, but no inquiry as to the profession of faith is now made at the censuses. There are, however, statistics concerning the clergy, and according to these there were in 1937 :—Roman Catholic higher clergy, 87; inferior clergy, 6,387; Protestant pastors, 31; Anglican Church, 9 chaplains; Jews (rabbis and ministers), 17. The State does not interfere in any way with the internal affairs of either Catholic or Protestant Churches. There is full religious liberty, and part of the income of the ministers of all denominations is paid from the national treasury.

In 1937 there were six Roman Catholic dioceses subdivided into 262 deaneries.

The Protestant (Evangelical) Church is under a synod. There is also a Central Jewish Consistory, a Central Committee of the Anglican Church and a Free Protestant Church.

### Education.

There are universities at Louvain (founded September 7, 1426), Brussels, Ghent and Liège, the two latter being State institutions. In October, 1930, Ghent University became a Flemish university. In 1937-38 Brussels had 3,036 students; Ghent, 1,324; Liège, 2,145, and Louvain, 4,270. On November 11, 1923, the Colonial School at Antwerp (founded January 11, 1920) and the School of Tropical Medicine were constituted a Colonial university. There are also several State agricultural institutes, viz., a State veterinary school at Cureghem, and 2 State agricultural institutes (at Gembloux and Ghent). Besides the Royal Academy of Fine Arts at Antwerp there are 4 royal conservatoires at Brussels, Liège, Ghent and Antwerp, 120 schools of music and 64 schools of design.

*Secondary Education* (December 31, 1938): 30 royal atheneums, with 17,085 pupils; 33 *sections d'athénée* with 5,702 pupils (3,358 boys and 2,344 girls); 6 communal and provincial colleges with 2,662 pupils, and 14 other colleges

with 3,590 pupils. There were also 7 lycées for girls with 3,051 pupils. The next grades of schools are the higher grade schools (*écoles moyennes*), of which there were 160 State schools (104 for boys and 56 for girls) with 48,125 pupils (33,160 boys and 14,965 girls), 13 communal (7 for boys and 6 for girls) with 4,557 pupils (2,696 boys and 1,861 girls), and 10 other schools with 1,507 pupils (7 for boys with 811 pupils, and 3 for girls with 696 pupils).

*Elementary Education* (December 31, 1938): there were 8,712 primary schools, with 955,038 pupils; 4,145 infant schools with 250,089 pupils; and 581 adult schools with 17,037 pupils.

*Normal Schools*: there are (1938) 7 for training secondary teachers (562 students) and 81 for training elementary teachers (13,891 students).

There are many private or free schools, mostly under ecclesiastical care. No statistics are available for these.

Each commune must have at least one primary school. The cost of primary instruction devolves on the communes, with subsidies from the State and provinces.

In 1937, there were 2,447 libraries, with 5,688,015 volumes and 637,638 readers; number of volumes borrowed, 10,608,660.

Both French and Flemish are spoken.

### Justice and Crime.

Judges are appointed for life. There is one Court of Cassation, three Courts of Appeal, and Assize Courts for political and criminal cases. There are 26 judicial districts, each with a Court of first instance. In each of the 230 cantons is a justice and judge of the peace. There are, besides, various special tribunals. There is trial by jury.

### Social Welfare.

Apart from private charity, the poor are assisted by the communes through the agency of the *bureaux de bienfaisance* whose duty it is to provide outdoor relief, and by the governing bodies of the *hospices civils*. Provisions of a national character have been made for looking after war orphans and men disabled in the war. Certain other establishments, either State or provincial, provide for the needs of deaf-mutes and the blind, and of children who are placed under the control of the courts. Provision is also made for repressing begging and providing shelter for the homeless.

### Finance.

Budget estimates for 5 years :—

|             | 1937         | 1938         | 1939         | 1940         | 1941         |
|-------------|--------------|--------------|--------------|--------------|--------------|
|             | 1,000 francs | 1,000 francs | 1,000 francs | 1,000 francs | 1,000 francs |
| Revenue     | 10,734,424   | 11,392,000   | 11,482,737   | 11,343,082   | 16,040,000   |
| Expenditure | 13,449,127   | 11,318,000   | 11,563,061   | 11,632,978   | 16,040,000   |

On December 31, 1943, the Belgian public debt amounted to 136,400,000 Belgian francs, as compared with 74,393,000 francs at the end of 1940, and 62,456,300 at the end of 1939.

### Defence.

#### ARMY.

According to the Military Law passed in 1937, the Belgian Army was recruited by means of annual calls to the Colours and by voluntary enlistments. Military service was compulsory for those called to the Colours.

Voluntary enlistment was for 5 years (for youths less than 17), 4 years (for youths less than 18), and 3 years (for youths over 18).

By the law of 1937 the period of service of the annual contingent became 17 months and 12 months. The duration of military obligation was 25 years, of which 15 were in the Regular Army and Reserve, and 10 years in the Territorial Army.

The peace-time organization comprised a frontier-covering force, a motorized cavalry corps, a division of Chasseurs Ardennais, and 6 infantry divisions, artillery and engineer units. The latter were to be first doubled, and then trebled, on mobilization. The German invasion in May, 1940, was too rapid to permit the completion of this scheme; nevertheless, some 17 divisions were placed in the field. Total number of men called up was 600,000.

The Belgian forces in Great Britain are organised along British lines in so far as equipment and arms are concerned. Belgian officers are in command.

#### NAVY.

Many Belgian seamen have joined the Royal Navy (Belgian section), which now mans 2 corvettes and two other vessels, which force is gradually being developed into a new Belgian Navy.

#### AIR FORCE.

A military Air Force consisted of headquarters, 3 regiments and training establishments. Since the German occupation, units of the Belgian Air Force have been co-operating with the R.A.F. Before the war the Air Force had about 210 first-line aeroplanes.

### Production and Industry.

#### I. AGRICULTURE.

Of the total area of 3,056,660 hectares, there were in 1938, 1,832,453 hectares under cultivation, of which 81.90 per cent. were under cereals, 0.73 per cent. vegetables, 4.89 per cent. industrial plants, 12.85 per cent. root crops and 49.63 per cent. forage. In 1937, 1,842,484 hectares were under cultivation. The forest area covers 18 per cent. of the land surface.

The following figures show the yield of the chief crops for three years:—

| Crop           | Acreage |         |         | Produce in metric tons |           |           |
|----------------|---------|---------|---------|------------------------|-----------|-----------|
|                | 1935    | 1936-37 | 1937-38 | 1936                   | 1937      | 1938      |
| Wheat . .      | 424,469 | 423,807 | 424,724 | 439,614                | 423,198   | 547,874   |
| Barley . .     | 84,699  | 73,823  | 85,336  | 79,304                 | 85,587    | 89,280    |
| Oats . .       | 516,865 | 534,117 | 521,118 | 558,177                | 520,109   | 621,063   |
| Rye . .        | 370,512 | 384,475 | 373,846 | 337,134                | 345,016   | 385,038   |
| Potatoes .     | 402,427 | 395,350 | 389,449 | 3,225,422              | 3,090,837 | 3,358,483 |
| Beet (sugar).  | 127,175 | 117,859 | 118,955 | 1,491,413              | 1,376,007 | 1,301,681 |
| Beet (fodder). | 217,305 | 207,991 | 207,297 | 5,649,438              | 5,626,051 | 4,596,280 |
| Tobacco .      | 8,072   | 6,728   | 6,259   | 6,063                  | 5,729     | 4,776     |

On December 31, 1939, there were 245,549 horses, 1,599,837 horned cattle (including 885,853 dairy cows), and 855,928 pigs.

#### II. MINING AND METALS AND OTHER INDUSTRIES.

Output (in metric tons) in 1939: coal, 29,846,890; briquettes, 1,525,190; coke, 5,176,650; pig-iron, 3,068,200; wrought iron, 31,060; steel, 3,036,160; wrought steel, 2,202,420.

In 1937, there were 36 sugar factories, output 34,586 tons of raw sugar; 9 sugar refineries, output 194,646 tons; 19 distilleries, output 394,846 hectolitres of potable and industrial alcohol; 1,223 breweries, output 14,227,647 hectolitres of beer; 27 margarine factories, output 55,847 tons; 47 vinegar factories, output 161,770 hectolitres; 9 match factories, output 58,439 million matches.

The total quantity of fish landed at the various Belgian ports amounted (1938) to 39,135 metric tons, valued at 124,379,000 francs. The fishing fleet had a total tonnage of 27,000 tons.

According to an industrial census taken on December 31, 1930, the number of people engaged in industry was 1,938,118 (1,592,351 men and 345,767 women); of these, 222,585 were employers, 49,986 managers, 184,850 clerical employees and 1,480,753 operatives. The industries with the largest number of workers were: metals, 292,200; textiles, 225,650; building, 159,597; transport, 109,658; mining, 160,964; timber and furniture, 101,362. In commercial life there were 564,577 (321,022 men and 243,555 women); of these 186,871 were engaged in the provision of food and 106,855 in the hotel industry.

#### Commerce.

By the Convention concluded at Brussels on July 25, 1921, between Belgium and Luxembourg and ratified on March 5, 1922, an Economic Union was formed by the two countries, and the Customs frontier between them was abolished on May 1, 1922.

On September 5, 1944, there was concluded a Customs union between Belgium and Luxembourg on the one hand and the Netherlands on the other. The arrangement is a temporary one, but it is expected that in due course it will be made permanent.

The following table shows imports and exports for 6 years (in thousands of paper francs):—

| Year | Imports     | Exports     | Year | Imports     | Exports     |
|------|-------------|-------------|------|-------------|-------------|
|      | 1000 francs | 1000 francs |      | 1000 francs | 1000 francs |
| 1934 | 14,021,997  | 13,794,794  | 1937 | 27,892,782  | 25,516,225  |
| 1935 | 17,445,761  | 16,125,953  | 1938 | 28,166,507  | 21,723,963  |
| 1936 | 21,707,531  | 19,745,228  | 1939 | 19,690,000  | 21,670,000  |

#### Trade by principal countries:—

|                     | Imports from |             | Exports to  |             |
|---------------------|--------------|-------------|-------------|-------------|
|                     | 1937         | 1938        | 1937        | 1938        |
|                     | 1000 francs  | 1000 francs | 1000 francs | 1000 francs |
| France . . .        | 3,442,777    | 3,324,802   | 4,401,400   | 3,360,415   |
| United States . .   | 2,367,749    | 2,559,332   | 1,908,773   | 1,442,053   |
| United Kingdom .    | 2,307,083    | 1,835,820   | 3,454,511   | 2,972,291   |
| Netherlands . .     | 2,274,984    | 2,079,300   | 2,818,317   | 2,614,454   |
| Germany . . .       | 3,174,846    | 2,598,563   | 2,779,036   | 2,654,497   |
| Argentine Republic. | 1,766,129    | 944,172     | 946,886     | 693,919     |
| Italy . . .         | 203,865      | 213,154     | 313,060     | 249,511     |
| Switzerland . .     | 305,717      | 277,073     | 620,045     | 587,659     |
| Belgian Congo . .   | 2,285,067    | 1,938,287   | 388,036     | 410,994     |

In 1938 the principal articles imported into the United Kingdom from Belgium (according to Board of Trade returns) were:—flax, 2,018,396*l*.; glass and glass ware, 1,197,646*l*.; cotton piece goods, 669,424*l*.; cement,

268,236l.; iron and steel bars, etc., 997,048l.; bricks, 192,105l. The principal exports to Belgium were:—cotton piece goods, 155,477l.; coal tar pitch, 179,507l.; machinery, 893,550l.; coal, 597,156l.; cotton yarns, 230,969l.; woollen piece goods, 271,416l.

The total trade between England and Belgium for 5 years was as follows:—

|                                 | 1934       | 1935       | 1936       | 1937       | 1938       |
|---------------------------------|------------|------------|------------|------------|------------|
|                                 | £          | £          | £          | £          | £          |
| Imports from Belgium to U.K.    | 14,562,926 | 15,491,174 | 18,444,892 | 22,701,097 | 18,590,570 |
| Exports to Belgium from U.K.    | 8,795,567  | 8,680,479  | 9,466,433  | 11,118,860 | 8,231,754  |
| Re-exports to Belgium from U.K. | 4,110,602  | 4,442,926  | 4,693,163  | 5,902,116  | 4,482,713  |

### Shipping and Navigation.

On July 1, 1939, the Belgian merchant fleet was composed of 200 ships of 408,418 tons net.

There were 36 Belgian shipping companies at the beginning of 1931, of which the most important were the Compagnie Maritime Belge, with 44 ships, and the Adolf Deppe, with 35 ships.

The navigation at Belgian ports was as follows:—Number of vessels entered, 1937, 20,128; tonnage, 32,390,773; 1936, 18,806; tonnage, 29,999,944. Number of vessels cleared, 1937, 20,060; tonnage, 32,262,615; 1936, 18,706; tonnage, 29,975,917. In 1937, 13,555 vessels of 25,568,152 tons entered the port of Antwerp; in 1938, 11,462 vessels of 24,144,705 tons. 240 regular shipping lines connected Antwerp with all parts of the world.

### Communications.

The total length of the roads in Belgium (1938) was as follows:—State roads, 5,580 miles; provincial roads, 977 miles; conceded roads, 3 miles; total, 6,560 miles. The majority of the roads are paved with stone.

Number of motor vehicles in Belgium, April 1, 1942, 41,625 (305,575 in 1938).

The total length of navigable waterways (rivers and canals) in 1936 was 998 miles.

In September, 1926, the State handed over its control of the railways to a private company, the Société Nationale des Chemins de Fer Belges for a period of 75 years. The length of railway operated on January 1, 1939, was 3,189 miles of main line, of which 3,010 miles were operated by the Société Nationale and 179 miles by 4 other companies. There were also 3,879 miles of provincial lines.

In 1938 the Post Office in Belgium handled 325,675,000 private letters, 70,849,000 official letters, 93,178,000 post-cards, 424,045,000 packets of printed matter, and 449,791,000 newspapers. On December 31, 1938, there were 1,733 post offices in Belgium. The gross revenue of the Post Office in the year 1938 amounted to 472,373,771 francs, and the expenditure to 488,600,045 francs (in 1937, 450,377,643 and 443,987,414 respectively).

A Régie of telegraphs and telephone, for running the services on business lines was created by the law of July 19, 1930, effective November 1, 1930. In 1937 the telegraph system carried 7,724,796 dispatches, of which 1,163,473 were official. Total length of public telegraph wires was 34,814 miles, and of line 6,194 miles. There were 1,435 telegraph offices. Receipts for 1937 were 54,370,436 francs; expenditure, 71,567,500 francs (1936: 51,583,629 and 65,836,928 francs respectively).

In 1937 there were 322 radiograph stations and 26,638 radiotelegrams were despatched.

In 1937, the telephone service comprised 528 exchanges, connecting 1,412 public telephone stations and 287,851 subscribers. There were 1,950,470 miles of telephone line in service, including 1,585,996 miles of local line and 354,474 miles of inter-urban and international lines, and the total number of calls, including 3,167,824 international calls, was 318,210,892. Receipts in 1938: 394,764,311 francs; expenditure: 348,552,861 francs (1936: 373,888,169 and 319,108,642 respectively).

### Money and Credit.

The franc, containing 0.0301264 gramme of fine gold, is the unit of currency.

No gold had been minted since 1882 (save only 5,000,000 francs struck in 1914), and no silver 5-franc pieces since 1876, but in Dec. 1934 new 20 franc silver pieces were issued. Under a law of May, 1935, a piece in silver of 50 francs was to be issued to replace notes of the same value, which are to be demonitized after January 1, 1940. At the time of the German occupation the following coins were in circulation: silver, 50 and 20 francs; nickel, 5 francs and 1 franc; cupro-nickel, 25, 10 and 5 centimes.

On October 26, 1926, the Belgian franc was stabilised and the paper currency relinked to gold, when all notes of the National Bank of Belgium became payable in gold or its equivalent in foreign currency. A new currency unit—called the *Belga*, with a weight of 0.20921 grammes of fine gold—was introduced. The Monetary Law of March 30, 1935, gave the Government the power to fix a new parity for the franc, between 75 per cent. maximum and 70 per cent. minimum of the 1926 parity. The purchase and sale of foreign exchange carried out by virtue of this law by the Exchange Equalization Fund took place according to a decree of March 31, 1935, on the basis of 0.150632 grammes of fine gold to the belga. A decree dated March 31, 1936, stabilized this *de facto* rate and this new parity of the belga represents 72 per cent. of its former gold content. One belga equals five paper francs. The franc, however, remains the basis of the monetary system, and will continue to circulate in the country, and is the medium of exchange in all domestic business. New nickel coins of the value of 5 francs or 1 belga were put into circulation in 1930. The use of the belga is compulsory in all foreign exchange transactions.

The one bank of issue in Belgium is the National Bank, instituted 1850. Bylaw of March 26, 1900, its constitution was modified, and its duration extended to January 1, 1929. In 1926 its privileges were prolonged for further 25 years. It is the cashier of the State, and is authorised to carry on the usual banking operations. The note circulation on February 15, 1945, amounted to 47,391,000,000 francs.

The popular savings bank in Belgium is mainly concentrated in the Caisse Générale d'Epargne et de Retraite, at Brussels. The Caisse d'Epargne is a private company with legally regulated functions and operates under the supervision of the Minister of Finance. It co-operates with the Belgian postal service, thus obviating any need of a postal-savings system. During the year 1942 deposits amounted to 2,248 million francs and withdrawals to 1,416 million francs.

The weights and measures are those of the metric system.

### Diplomatic Representatives.

#### 1. OF BELGIUM IN GREAT BRITAIN.

*Ambassador.*—Baron de Cartier de Marchienne, G.C.V.O., G.B.E. (appointed in 1927).

*Minister and Counsellor.*—Vicomte de Lantaeere, C.V.O.

*Counsellor.*—Baron Beyens.

*First Secretary.*—M. A. Holvoet.

*Military Attaché.*—Major André Bigwood.

*Commercial Secretary.*—Antoine De Clercq.

*Agricultural Attaché.*—Louis Borremans.

*Chancellor.*—René Debaecker.

There are Consular representatives at all the important centres, including Aberdeen, Belfast, Birmingham, Dundee, Glasgow, Manchester, Newcastle and Southampton.

## 2. OF GREAT BRITAIN IN BELGIUM

*Ambassador.*—Sir Hughe Montgomery Knatchbull-Hugessen, K.C.M.G. (appointed on September 4, 1944).

*Counsellor.*—A. F. Aveling, C.M.G., C.B.E.

*Secretaries.*—A. E. Lambert and C. H. de Saumarez.

There is a Consul-General at Antwerp and Leopoldville (Congo), there are Consuls at Costermansville and Elizabethville (Congo), and a Vice-Consul at Matadi (Congo).

## BELGIAN CONGO.

(CONGO BELGE.)

**Constitution and Government.**—Until the middle of the nineteenth century the territory drained by the Congo River was practically unknown. When Stanley reached the mouth of the Congo in 1877, King Leopold II of the Belgians recognized the immense possibilities of the Congo Basin and became the foremost leader for its exploitation. Various nations immediately put forward claims by right of earlier explorations, especially Portugal on the strength of the discovery of the mouth of the Congo by its navigators in the fifteenth century. Other claims and conflicts led to the Berlin Conference of 1884, by which King Leopold II was recognized as the sovereign head of the State.

The annexation of the State to Belgium was provided for by treaty of November 28, 1907 which was approved by the chambers of the Belgian Legislature in August and September and by the King on October 18, 1908. The Minister for the Colonies is appointed by the King, and is a member of the Council of Ministers. He is President of the Colonial Council, consisting of 14 members, 8 of whom are appointed by the King, and 3 chosen by the Senate and 3 by the Chamber of Representatives. One of those appointed by the King, and one chosen by the Legislative Chambers, retire annually, but may be re-appointed. The King is represented in the Colony by a Governor-General, assisted by a Vice-Governor-General, one or more State-Inspectors, and six Provincial Governors. The budget is presented to the Chambers, and voted by them; the financial accounts have to be verified by the Court of Accounts. An annual report on the Congo Administration has to be presented to the Chambers.

The annexation has been recognised by all the Powers.

**Governor-General.**—Pierre Ryckmans (appointed September, 1934).

The precise boundaries of the Congo Colony were defined by the neutrality declarations of August, 1885, and December, 1894, and by treaties with Germany, Great Britain, France, and Portugal.

On July 22, 1927, a convention was signed between Belgium and Portugal by which the former ceded to the latter territory in the extreme south-west portion of the Belgian Congo, having an area of 3,500 square kilometres (480 square miles), in return for a cession by Portugal of an area in the estuary of the Congo, near Matadi, of three square kilometres. Belgium further undertook to commence the construction of a railway to link up with the Portuguese railway (the Lobito Bay-Katanga line). This railway was opened on July 1, 1931.

The Colony is divided into six Provinces and sixteen administrative districts. Each district is divided into administrative territories, of which there are 112 in the whole country. The capital of each province bears the name of the province itself. *The Elisabethville Province*; districts: Haut-Katanga, Lualaba, Tanganika. *The Léopoldville Province*; districts: Bas-Congo, Moyen Congo, Kwango, Lake Léopold II. *The Coquilhatville Province*; districts: Congo-Ubangi, Tshuapa. *The Lusambo Province*; districts: Sankuru, Kasai. *The Costermansville Province*; districts: Kivu, Maniéma. *The Stanleyville Province*; districts: Uélé, Kibali-Ituri, Stanleyville. The capital of the Colony, formerly Boma, was, by royal decision (1923), changed to Léopoldville. At the head of each Province there is a Governor.

**Area and Population.**—The area of Belgian Congo is estimated at 902,082 square miles. The black population of the Belgian Congo is chiefly of Bantu and Sudanese origin with some nilotics and pygmies. On January 1, 1944, the native population numbered 10,486,291, and the white population, 34,888. Of the latter, 22,668 were Belgians, 3,293 Greeks, 2,594 Portuguese, 1,428 Italians, 1,370 British, 613 Americans, 580 Dutch, 454 French, 357 Luxemburgers, 249 Swiss, 165 South Africans, 133 Poles, 127 Russians, 117 Turks, 75 Swedes, 52 Germans, 45 Spaniards, 20 Danes, 19 Norwegians, 18 Canadians, 12 Yugoslavs, 11 Rumanians and 488 others. Total foreigners, 12,222.

Kiswahili is the language spoken by the natives who have been under Arab influence. Bangala and Kigwana are the commercial languages on the Upper Congo; Kikongo is used near the coast, Tshiluba in the southern part, and Lomongo in the central regions.

**Religion and Education.**—The religion of the natives consists of a gross fetichism; mission work is actively carried on. There were, on January 1, 1943, 3,873 missionaries, of whom 3,064 were Catholic and 809 Protestant, with 558 centres (353 Catholic and 205 Protestant). In education they co-operate with the Government. In 1943 there were 30 schools for European children attended by 3,762 pupils; for native children, 6 official schools with 3,350 pupils and 5,413 subsidised primary schools with 293,094 pupils. Subsidised secondary schools: 37 normal schools, 9 middle schools, 7 professional schools, with 3,691 pupils. Schools not subsidised: 194 primary schools with 42,222 pupils, 8,669 rural schools with 238,342 pupils and 22 professional schools with 1,288 pupils. In 1943 the Government grant to the missionaries for education of native children amounted to 27,800,000 francs, while the total expenditure on education was 44,298,000 francs.

There are 24 public libraries in Belgian Congo and Ruanda-Urundi.

**Justice.**—There are 6 courts of first instance, 16 district courts, 16 prosecutors' courts, 104 police courts, and 2 courts of appeal (one at Léopoldville and the other at Elisabethville).

**Finance.**—Estimates of revenue and expenditure for five years (in francs):—

|             | 1940        | 1941        | 1942          | 1943          | 1944          |
|-------------|-------------|-------------|---------------|---------------|---------------|
| Revenue     | 747,208,000 | 920,568,800 | 1,123,592,000 | 1,366,300,000 | 1,765,683,000 |
| Expenditure | 779,821,500 | 806,714,374 | 1,123,892,000 | 1,302,982,000 | 1,601,405,000 |

For 1944 the receipts and expenditure were estimated as follows:—

| Receipts                                                      | Francs        | Expenditure                                                                    | Francs        |
|---------------------------------------------------------------|---------------|--------------------------------------------------------------------------------|---------------|
| Duties and taxes . . . .                                      | 1,420,125,000 | Institutions and services acting in Belgium                                    | 391,571,000   |
| Domianial receipts . . . .                                    | 17,126,000    | Expenses of administration in Africa, those of the Public Force included       | 315,196,000   |
| Judicial receipts and receipts of the administrative services | 98,705,000    | Expenses for social and humanitarian works . . . .                             | 196,009,000   |
| Proceeds of the Régies . . . .                                | 147,700,000   | Expenses of economic order . . . .                                             | 325,591,000   |
| Proceeds of capital & revenues                                | 81,907,000    | Deficits—Restitutions & expenditures respecting closed budgetary years . . . . | 27,298,000    |
| Extraordinary receipts . . . .                                | 120,000       | Crisis Fund . . . . .                                                          | 176,165,000   |
|                                                               |               | Extraordinary expenses . . . .                                                 | 162,604,000   |
| Total . . . . .                                               | 1,765,683,000 | Total . . . . .                                                                | 1,601,405,000 |

Debt, December 31, 1939, 5,841,941,679 francs, of which 3,992,980,029 francs were consolidated debt, 480,004,400 francs floating debt, and 1,368,957,250 francs indirect (guaranteed capital).

**Defence.**—The Colony in peace time possesses a force of native troops amounting to (1939) 141 European officers, 143 European non-commissioned officers and 13,734 natives, including the recruits and about 4,400 men of the territorial police. The force is recruited by conscription and voluntary enlistment.

**Production.**—The yield of the chief products in 1943 was as follows (in metric tons):—palm-oil, 120,000; cotton, 43,000; palm-nuts, 80,000; coffee, 30,000; cocoa, 1,000; rubber, 12,000; sugar, 13,800; timber, 170,000 (cubic metres); ground-nuts, 50,000. Cattle thrive only in the districts where there is no tsetse fly, notably in the highlands of Katanga, Ituri and Kivu. Mining flourishes, the chief minerals being copper, diamonds, gold, silver, tin, cobalt, uranium, radium and iron. The most important mines in the Congo are the copper mines near Kambove, Kipusulu and Elisabethville in Haut Katanga, operated by the Union Minière du Haut Katanga. The total output of copper in 1943 was 156,850 metric tons; in 1942, 168,000 metric tons. The gold mines in 1943 produced 15,138 kilos, chiefly from the Kilo-Moto mines. The Union Minière produces radium from the Chinkolobwe mines. The output of diamonds (chiefly from the mines of the Forminière company in the Kasai district) in 1943 amounted to 4,882,000 carats. Output in 1943 of cobalt, 4,836 tons; tin, 23,967 metric tons; manganese, 30,000 metric tons; zinc, 40,870 metric tons; iron, 23,964 tons; lead, 971 tons.

**Weights and Measures.**—The metric system was introduced by law on August 17, 1910.

**British Consul-General.**—F. M. Shepherd, O.B.E. (at Léopoldville).  
There are British Vice-Consuls at Elisabethville and Matadi.

## MANDATED TERRITORY.

(TERRITOIRES DU RUANDA-URUNDI.)

The Territory of Ruanda-Urundi (formerly in German East Africa) was ceded to Belgium as mandatory of the League of Nations. The Territory is united administratively with the Congo, under the direction of a Vice-Governor, by a law of August 21, 1925. Ruanda-Urundi is populated by three races—the Bat-utsi, the Ba-hutu and the Batwa. The Territory is rich in cattle. The frontier was formally ratified on October 20, 1924. Usumbura is the capital.

**Area and Population.**—The area is 52,112 square kilometres, or 20,132 square miles. Native population (December 31, 1939), 819,397 adult males. Estimated total population, 3,775,335. European population, 1,404 (905 Belgians, 72 British, 67 French, 62 Italians, 59 Greeks, 47 Dutch, 45 Americans, 38 Germans, 26 Portuguese, 23 Swiss, 16 Luxemburgers, 11 Swedes, 10 Danes, 8 Canadians, 6 Russians, 14 others). Asiatics numbered 714.

**Education.**—On January 1, 1941: State schools, 2; pupils, 950; native teachers, 20; European teachers, 15. Catholic Mission Schools, 2,637; pupils, 211,979; native teachers, 914; Europeans, 77. Protestant Mission Schools, 964; pupils, 24,641; teachers, 581 (35 Europeans). Expenditure on education (1939), 2,196,946 francs.

**Finance.**—For 1940, ordinary and extraordinary revenue was estimated to be 63,698,700 francs, and expenditure, 59,784,700 francs.

On December 31, 1939, the public debt was 135,000,000 francs.

**Defence.**—Military force consisted on January 1, 1938, of 4 officers, 4 non-commissioned officers and 645 other ranks. The police force numbered 167.

**Commerce.**—Imports: 1939, 55,040,979 francs; exports, 43,854,788 francs. 1938: Imports, 62,801,643 francs; exports, 64,861,412 francs. Principal exports (1939), cotton, 2,464 tons; coffee, 4,950 tons; hides, 455 tons; tin, 1,556 tons; gold, 914 kilograms.

**Communications.**—Total length of principal roads open to traffic, 1,747 miles.

## BHUTÁN.

STATE in the Eastern Himalaya, between 26° 45' and 28° N. latitude, and between 89° and 92° E. longitude, bordered on the north and east by Tibet, on the west by the Tibetan district of Chumbi and by Sikkim, and on the south by British India. Extreme length from east to west 190 miles; extreme breadth 90 miles. Area about 18,000 square miles; population estimated at 800,000.

The original inhabitants of Bhután, the Tephús, were subjugated about two centuries ago by a band of military colonists from Tibet. In 1774 the East India Company concluded a treaty with the ruler of Bhután, but

repeated outrages on British subjects committed by the Bhután hill men led from time to time to punitive measures, usually ending in the temporary or permanent annexation of various *duars* or submontane tracts with passes leading to the hills. In November, 1864, the eleven western or Bengal *duars* were thus annexed. Under a treaty signed in November, 1865, the Bhután Government was granted a subsidy of Rs. 50,000 a year on condition of good behaviour. By an amending treaty concluded in January, 1910, the British Government undertook to exercise no interference in the internal administration of Bhután. On its part the Bhutanese Government agreed to be guided by the advice of the British Government in regard to its external relations. The treaty also provided for the increase of the subsidy to Rs. 100,000. Since April 1, 1912, the subsidy has been further increased to Rs. 200,000.

The form of Government in Bhután, which existed from the middle of the sixteenth century until 1907, consisted of a dual control by the clergy and the laity as represented by Dharma and Deb Rájá. In 1907 the Deb Rájá, who was also Dharma Rájá, resigned his position, and the Tongsa Penlop, Sir Ugyen Wangchuk, G.C.I.E., K.C.S.I., was elected as the first hereditary Maharaja of Bhután. He died on August 21, 1926, and was succeeded by Maharaja Jig-me Wang-chuk, K.C.S.I., K.C.I.E.

Chief fortresses or castles: Punakha, a place of great natural strength; Tashi-Cho-dzong, Páro, Angdophodang (Wangdupotrang), Tongsa and Byaka.

The people are nominally Buddhists, but their religious exercises consist chiefly in the propitiation of evil spirits and the recitation of sentences from the Tibetan Scriptures. Tashi-Cho-dzong, the chief monastery in Bhután, contains 800 priests.

Beyond the guards for the defence of the various castles, there is no standing army.

The chief productions are rice, Indian corn, millet, lac, wax, different kinds of cloth, musk, elephants, ponies, and chowries. Extensive and valuable forests abound. Muzzle-loading guns and swords of highly-tempered steel are manufactured.

His Highness keeps an Agent at Kalimpong who is also Assistant to the Political Officer in Sikkim for Bhutanese affairs.

## BOLIVIA.

(REPÚBLICA BOLIVIANA.)

### Constitution and Government.

THE first Constitution of the Republic of Bolivia (so named in 1825) bears date October 28, 1880. A new Constitution was adopted in October, 1938, whereby executive power is vested in a President, elected for four years by

direct popular vote, and not eligible for re-election until four years after his term has ended. In the event of his death or failure to assume the office, the President of the Senate becomes President. There is a Congress of two chambers, called the Senate and the Chamber of Deputies, which meets annually on August 6 at La Paz. There are 8 Senators for each of nine Departments, elected for six years (one third retiring every two years), and 70 Representatives are elected for four years (one-half retiring every two years). Extraordinary sessions may be held for special purposes when convoked by the Executive, or by a majority of both Chambers. The President's Cabinet consists of the Ministers of 11 departments.

On April 7, 1943, the Cabinet decreed that a state of war exists with the Axis powers; on May 5 the President signed at Washington an offensive and defensive alliance with the United Nations, which was ratified by the National Congress on November 26; on December 4 Bolivia formally declared war against the Axis powers. This position was re-affirmed by the Nationalist Revolutionary Movement which seized power on December 30, 1943.

The following is a list of Presidents since 1899 and the dates on which they took office:—

|                                                                              |                                                                              |
|------------------------------------------------------------------------------|------------------------------------------------------------------------------|
| General José Manuel Pando, Aug. 6, 1899.                                     | Dr. Daniel Salamanca, Mar. 5, 1931 (resigned Nov., 1934).                    |
| General Israel Montes, Aug. 6, 1904.                                         | Don Luis Tajada Sorzano, Nov. 27, 1934 (deposed May 17th, 1936).             |
| Dr. Ellodoro Villazon, Aug. 6, 1908.                                         | Colonel José David Toro, May 17, 1936 (deposed July 13, 1937).               |
| General Israel Montes, Aug. 6, 1912.                                         | Lt.-General German Busch, July 13, 1937 (committed suicide August 23, 1939). |
| Dr. José Gutiérrez Guerra, Aug. 6, 1917 (deposed July 13, 1920).             | General Carlos Quintanilla (provisional), August 23, 1939—March 12, 1940.    |
| Provisional Junta, under Dr. Saavedra, July 12, 1920—Jan. 10, 1921.          | General Enrique Peñaranda, March 12, 1940 (deposed December 20, 1945).       |
| Dr. Bautista Saavedra, Jan. 10, 1921 (resigned).                             |                                                                              |
| Dr. Felipe Guzman, Sept. 1, 1925 (provisional).                              |                                                                              |
| Dr. Hernando Siles, Jan. 10, 1926 (deposed June 22, 1930).                   |                                                                              |
| Provisional Junta, under General Blanco Galindo, June 22, 1930—Mar. 5, 1931. |                                                                              |

*President.*—Major Gualberto Villarroel, following a successful *coup d'état* by the Nationalist Revolutionary Movement on December 20, 1943. He was formally elected by the National Assembly on August 6, 1944.

The Republic is divided into 8 departments and 8 territories, with 71 provinces administered by sub-prefects, and 940 cantons (the number varies) administered by corregidores. The supreme political, administrative, and military authority in each department is vested in a prefect, but legislative matters are under a Departmental Assembly composed of the Senators and Deputies from that department and of delegates elected by the various provinces and the capital. The territories in the north-west of the Republic and in the Chaco and Oriente are governed by three officials, called *delegados nacionales*. Prefects are appointed by the President of the Republic, from lists presented by the Departmental Assembly; sub-prefects (virtually chief constables) are appointed by the Prefects; corregidores and village alcaldes are appointed annually by the sub-prefects of the provinces.

Bolivia has not always been land-locked. Down to 1884, when she was defeated by Chile, she had a strip bordering on the Pacific which contains extensive nitrate beds and the ports of Arica and Antofagasta. She lost this to Chile. In August, 1943, the Bolivian Government demanded a port on the Pacific, but Chile refused, basing her refusal on the Peace Treaty signed in 1904.

Bolivia's most serious boundary difficulty has been with Paraguay, her eastern neighbour, growing out of a long-standing dispute as to where

The public debt of Bolivia on March 31, 1937, amounted to 2,009,645,822 bolivianos. The foreign debt (in default since 1931) amounted on June 30, 1932, to 98,070,061 dollars (U.S.) and 1,144,187*l*.; the internal debt, to 355,928,497 bolivianos. A scheme for resuming in 1941 a limited service on the defaulted debt was adopted in 1940. American direct investments, 1940, were 26,829,000 dollars; American investments, end of 1941, in dollar bonds, amounted to 53,600,000 dollars (all in default). British investments, 1944, were 4,420,817*l*., on which interest and dividends that year amounted to 2·4 per cent.; 1,720,817*l*. was in default.

### Defence.

The territory of the Republic is divided into 8 military districts, with divisional headquarters respectively in La Paz, Oruro, Sucre, Camiri, Puerto Suárez, Riberalta, Cochabamba and Santa Cruz de la Sierra. Each military region is divided into two or more military districts, according to its importance, and is garrisoned by a division, which comprises 2 or 3 infantry regiments, 1 cavalry regiment, 1 artillery regiment, 1 battalion of engineers, 1 company of signals and 1 company of auxiliary services (medical service). Some of the divisions, according to the geographical nature of the region, include special units of railway and pontoon battalions.

An infantry regiment is composed of 2 battalions and each battalion of 3 light companies (with light machine guns, pistol machine guns, rifles and grenades) and 1 heavy company (with anti-tank guns, mortars and heavy machine guns).

A cavalry regiment is composed of 3 carbineer squadrons (with carbines, light machine guns and pistol machine guns) and 1 heavy squadron (with anti-tank guns, mortars and heavy machine guns).

An artillery regiment is composed of 3 batteries and each battery of 4 guns, the material being 75 mm. or 105 mm., mountain, field or howitzer, according to the region.

The law of 1943 provides for a permanent force of 15,000 men, excluding the police force and the frontier carabineers. Military service is compulsory for all males from the 19th to the 50th year. Those from 19 to 25 years of age serve not more than 2 years with the standing army; those from 25 to 30 years of age, 'the ordinary reserve,' return at some time for 3 months' service. After this the men pass to the 'extraordinary reserve' for 10 years, and finally complete their service by 10 years' enrolment in the Territorial Guard.

A new law provides pre-military training for boys and girls between the ages 14 and 18, comprising technical physical training, athletics and swimming.

The Army is under the command of the general staff for all technical, organisation and instruction purposes. The Defence Ministry is responsible for the administrative side.

The Bolivian Army has the following training institutes: a staff college (*escuela de guerra*) to prepare staff officers; a military college (*colegio militar*) to provide officers for the different arms; a school of arms (*escuela de armas*) for the formation of non-commissioned officers and warrant-officers; a geographical institute (*instituto geográfico*), and also a school for mechanics and a school for musicians.

The Bolivian Air Force is being reorganised by an American air mission, which has already been a year in the country. The following schools have been established: elementary flying training, in Santa Cruz de la Sierra; operational training, in Cochabamba, and the technical training, in La Paz.

The combat units comprise the squadrons (*escuadrillas*) of fighters, army co-operation and light bombers. Each squadron is composed of from 9 to 12 machines. The machines used are of United States manufacture. It is planned to train 2,000 pilots by the end of 1944.

The principal bases are La Paz, Oruro, Cochabamba, Santa Cruz de la Sierra and Puerto Suárez.

### Production and Industry.

The extensive and undeveloped region of Bolivia lying east of the Andes comprises about three-quarters of the entire area. It is estimated that

about 4,940,000 acres are under cultivation, but bark and hides are the principal products and agriculture is in a backward condition; wheat, rice, sugar and other basic food-stuffs have to be imported. Potatoes, maize, coffee, barley, oats, highland rice, and rubber are produced. Bolivia ranks as the second rubber-exporting country of South America, coming next to Brazil; exports in 1942, 1,486 tons, chiefly to the United States. Tropical forests with woods ranging from the 'iron tree' to the light palo de balsa await exploitation. The public lands of the State have an area of about 245,000 square miles, of which 104,000 square miles are reserved for special colonisation. Two-thirds of the population depend upon agriculture and only 60,000 (less than 2 per cent.) on mining. A colony of Jewish refugees was established in 1940 at Buen Tierra, 60 miles east of La Paz.

Mining is still the most important industry, and Oruro is its principal centre. The mineral wealth of Bolivia includes tin, silver, copper, lead, zinc, antimony, bismuth, wolfram, gold, and borate of lime. Output of gold, 1942, 20,228 fine ounces; silver, 8,139,378 fine ounces. Bolivia produces 15 per cent. of the total tin output of the world, ranking third in the production of this metal and 11 per cent. of world output of wolfram. Tin mines are at altitudes of from 12,000 to 15,000 feet, where few except native Indians can stand the conditions; transport is costly. Output of tin in 1943 was 38,383 tons; of tungsten, 3,610 tons. Export of tin, 1942, 38,901 metric tons; 1941, 42,740 tons. Exports, 1941, of other minerals, nett weight in metric tons: silver, 229; lead, 15,853; copper, 7,274; zinc, 6,065; antimony, 14,870; tungsten, 2,613 tons; bismuth, 11. Beginning in 1940, the United States became chief importer of Bolivian tin and wolfram. Bismuth is mined in La Paz and Potosí. In 1939, Bolivia was the world's chief source of antimony. Large deposits of common salt are found near Lake Poopó and in the south of Bolivia. Surface indications of petroleum and gas abound in the whole territory between the Argentine frontier and the north-west territory bordering Peru; some geologists have declared this to be potentially the largest oil field in South America; output, 1939, 215,000 barrels of crude oil. In March, 1937, the military Government Junta cancelled the Standard Oil Company concession and authorised the Bolivian National Oil Deposits to take over the former's oil lands. A compensation agreement was made in 1942. An agreement signed with Brazil in February, 1938, and later with Argentina, permits the transport of oil by pipe-lines and new railways to markets. Bolivia now exports to Argentine refineries about 300 metric tons per day.

### Commerce.

The value of imports and exports are given as follows in old gold bolivianos, of which the par was 13.33 to the £, or 36.5 cents, U.S.; actually the currency has ranged from 60 bolivianos to the £ in 1936, to 186 in 1941, at which point it was pegged; roughly, 1 boliviano = 2 cents, U.S.:-

|         | 1937                     | 1938                     | 1939                     | 1940                     | 1941                                  |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|---------------------------------------|
| Imports | Bolivianos<br>59,394,452 | Bolivianos<br>70,558,889 | Bolivianos<br>66,461,727 | Bolivianos<br>93,914,624 | Bolivianos<br>48,106,892 <sup>1</sup> |
| Exports | 124,598,852              | 94,879,659               | 117,599,540              | 174,262,787              | 205,854,833                           |

<sup>1</sup> Figures for first 6 months only.

Total imports, calendar year 1941, were valued at 27 979,000 dollars, U.S., and exports at 63,201,000 dollars.

**Commerce and Shipping.**—The value of the commerce (special trade) for six years was as follows (in francs):—

| Years | Imports       | Exports       | Years | Imports       | Exports       |
|-------|---------------|---------------|-------|---------------|---------------|
|       | Francs        | Francs        |       | Francs        | Francs        |
| 1936  | 724,792,783   | 1,489,581,772 | 1941  | 1,477,728,141 | 3,256,613,428 |
| 1937  | 1,187,091,690 | 2,486,995,468 | 1942  | 2,711,452,818 | 3,589,047,803 |
| 1938  | 1,022,636,980 | 1,897,153,811 | 1943  | 2,905,604,082 | 2,289,473,009 |

The special trade was distributed as follows in 1942:—

| Imported from                      | Imports,<br>1943<br>Value in<br>1000 frs. | Exported to                        | Exports,<br>1943<br>Value in<br>1000 frs. |
|------------------------------------|-------------------------------------------|------------------------------------|-------------------------------------------|
| United States . . . . .            | 980,646                                   | United States . . . . .            | 1,564,467                                 |
| United Kingdom . . . . .           | 335,864                                   | United Kingdom . . . . .           | 1,585,884                                 |

| Tanganyika Territory . . . . .     | 32,018                                    | Nigeria . . . . .                  | 17,123                                    |

According to the Board of Trade returns the imports into the United Kingdom from the Belgian Congo in 1938 amounted to the value of 185,669%; and the exports of British produce and manufactures to the Belgian Congo to 417,863%; re-exports from U.K. were 14,406%.

At the port of Matadi, the most important harbour of Belgian Congo, in 1938 there entered 158 sea-going vessels of 553,296 tons. In the coasting trade there entered 389 sailing ships, of 11,784 tons. The two other ports are Banana and Boma.

**Communications.**—The Congo is navigable for 83 miles from its mouth to Matadi. Above Matadi, for over 249 miles, numerous rapids render the river unnavigable as far as Stanley Pool (Léopoldville). Above the Pool are 1,050 miles of navigable water, reaching Stanley Falls, while several of the great tributaries are navigable over a considerable extent of their course (total, 6,279 miles). Above the Stanley Falls the Congo is called Lualaba and navigable for 585 miles, from Ponthierville to Kindu and from Kongolo to Bukama (Katanga).

There were (January 1, 1943) 55,029 miles of road (88,488 km.). The total length of railways on January 1, 1943, was 3,106 miles (4,998.929 km.).

An important development in 1911 was the construction of a pipe-line from Matadi to Léopoldville, 246 miles long, for the purpose of transporting crude oil for the use of river steamers. It has a diameter of 4 inches, with 8 pumping stations delivering 50,000 tons of oil at Léopoldville, the terminus. The concession is for 70 years, at the expiration of which period all the pipe-lines, with the material, except the vessels and stores of petroleum, will become the property of the Congo Government.

There are 45 first-class aerodromes and 126 second-class, private or emergency aerodromes. A regular air service, operated by the Belgian

company Sabena, runs weekly: (1) between Léopoldville and Elisabethville via Kikwit, Tshikapa, Luluaburg, Bukama (1,444 km.); (2) between Elisabethville and Stanleyville via Manono, Kindu (1,385 km.); (3) between Léopoldville and Lagos (Nigeria) (2,230 km.); (4) between Takoradi (Gold Coast) and Cairo (Egypt) via Stanleyville (7,050 km.); fortnightly: (1) between Léopoldville and Stanleyville via Banningville, Coquilhatville, Bumba (1,530 km.); (2) between Léopoldville and Stanleyville via Coquilhatville, Basankusu, Bumba (1,670 km.); (3) between Léopoldville and Stanleyville via Coquilhatville, Libenge, Bangui (French Equatorial Africa) (1,911 km.); (4) between Elisabethville and Stanleyville via Manono, Usumbura, Costermansville, Irumu (2,071 km.); (5) between Léopoldville and Cape Town (South Africa) via Luluaburg, Elisabethville, Bulawayo (Southern Rhodesia), Johannesburg (S.A.), Bloemfontein (S.A.) (4,860 km.); monthly: between Léopoldville and England via Libreville (French Equatorial Africa), Rhodesia), Johannesburg (S.A.), Aoulef (Algeria), Casablanca (Morocco), Lisboa (Portugal) (about 7,000 km.). The British Overseas Airways Corporation operate a flying-boat service between Lagos (Nigeria) and Cairo (Egypt) via Léopoldville and Stanleyville. The Pan-American Airways operate a fortnightly flying-boat service between Miami (U.S.A.) and Léopoldville via Puerto Rico, Trinidad, Belem, Natal, Fisherman's Lake. The French Military Air Lines operate two monthly services between Algiers and Tananarive (Madagascar), one via Stanleyville, and the other one via Luluaburg. The Belgian company Avia operates air transports in and around the Kivu district.

In 1943 there were 143 post offices. In the internal service 5,117,373 letters, papers, etc., were transmitted; and in the external, 1,782,302 were handled (667,933 sent and 1,114,369 received). In 1943, 2,122,447 postal packets were carried in the internal air mail service and 298,810 in the international service (168,121 sent and 130,689 received). The Congo is included in the Postal Union and in the African Postal Union. Total length of telegraph lines, 4,209 miles. In 1943 198,688 private telegrams and 143,447 official telegrams were handled in inland service, while 41,330 foreign telegrams were sent and 40,698 received; there were also 4,586 on transit service. There were 37 stations of wireless telegraphy and 71 telegraph offices. In 1943 there were 23 central telephone stations serving 2,466 subscribers, 4,000 miles of telephone lines, and 5,540 miles of telephone wire. Number of calls in 1943, 4,569,660, besides 74,653 inter-urban calls.

**Money and Credit.**—The monetary unit is the Congolese franc. An agreement with the Banque du Congo Belge on June 21, 1935, approved by Royal Decree on July 27, 1935, authorises the Bank to issue notes in Belgian Congo and Ruanda-Urundi, and also copper-nickel coins. The notes at present in circulation are of a nominal value of 10,000, 1,000, 500, 100, 50, 20, 10 and 5 francs. Coins in circulation are of the nominal value of 50 francs, 5 francs, 2 francs, 1 franc, 50, 20, 10, 5, 2 and 1 centimes. The notes and coin in circulation have a cover of 40 per cent. in gold and gold currencies. The notes and coins in circulation in the Colony are not legal tender in Belgium. By virtue of a financial agreement concluded on January 21, 1941, between the Government of the United Kingdom and the Belgian Government, the Congo was placed in the sterling area and the rate of exchange of the Congolese franc was established at 176.625 francs for the £ sterling.

Four banks are in existence, viz. the Banque du Congo Belge, the Banque Commerciale du Congo, the Banque Belge d'Afrique, and the Banco do Angola.

## 750

## BOLIVIA

Tin ore has usually constituted in value about 90 per cent. of Bolivia's exports since 1920.

Bolivia having no seaport, imports and exports pass chiefly through the free ports of Arica, Mollendo, Antofagasta, La Quiaca, and river-ports on the rivers flowing into the Amazon. The chief imports are sugar, flour, wheat, coal, petroleum, iron and steel products, mining machinery, coaches, motor vehicles, textiles and ready-made clothes. In 1941, imports from the United States amounted to 11,980,000 dollars, U.S.; exports to the United States, 27,338,000 dollars.

Total trade between U.K. and Bolivia (Board of Trade figures) for 5 years:—

|                                 | 1934      | 1935      | 1936      | 1937      | 1938      |
|---------------------------------|-----------|-----------|-----------|-----------|-----------|
|                                 | £         | £         | £         | £         | £         |
| Imports from Bolivia to U.K.    | 2,305,070 | 3,582,871 | 3,721,285 | 3,413,535 | 3,088,552 |
| Exports to Bolivia from U.K.    | 260,562   | 198,744   | 184,922   | 255,257   | 306,288   |
| Re-exports to Bolivia from U.K. | 7,838     | 5,812     | 8,026     | 10,219    | 7,946     |

British exports to Bolivia (Board of Trade returns) in 1939, 1940 and 1941 (including shipments of war supplies, if any, by Government departments) were 199,000*l.*, 383,000*l.* and 430,000*l.* respectively. Excluding such supplies, exports for 1942, 1943 and 1944 were 473,000*l.*, 557,000*l.* and 262,000*l.* respectively.

### Communications.

The total length of railway open in Bolivia is 1,867 miles; 506 miles are State-owned. The principal line is the Antofagasta and Bolivian Railway. Total length in Bolivia, 744 miles. Under the Bolivian-Chilian treaty of October 24, 1904, the Arica-La Paz line (276 miles, of which 151 miles are in Bolivia) was built from La Paz via Lluta with Taregra and to Corocoro. Two treaties signed with Brazil in 1938 provide for joint construction of a railway from the isolated department of Santa Cruz de la Sierra in Bolivia to a point near the river-port of Corumba in Brazil.

National air lines in 1943 covered 3,495 route miles; the Lloyd Aéreo Boliviano was nationalized in 1941; its routes, all domestic, covered 2,024 route miles in 1943. Pan-American Airways, with a non-exclusive concession expiring in 1967, links Bolivia with U.S.A. and nearly all South American countries.

Traffic on Lake Titicaca is carried on by the steamers of the Peruvian Corporation. About 12,000 miles of rivers, in three systems, are open to navigation by light-draught vessels.

Of main highways there are (1944) one from La Paz through Puno into Peru, another from La Paz, via La Quiaca, into Argentine, passable throughout the year, and others from Villazon to Villa Montes via Tarija, and from Potosí to Sucre, totalling 2,925 miles, besides 3,275 miles of secondary roads passable during the dry season, and over 1,000 miles under construction. American credits for 7,000,000 dollars in 1942 are facilitating a 400-mile highway from highlands of Cochabamba to the lowland farming region of Santa Cruz.

In Bolivia there were, in 1936, 548 post offices, 683 telegraph, telephone and wireless offices, and about 8,000 miles of telegraph lines. The Bolivian Power Co. was given in 1928 a concession to operate a countrywide telephone system; it now operates exchanges at La Paz, Cochabamba and Oruro;

telephone instruments, 1941, were 2,621. There are 54 commercial broadcasting stations and 6 operated by the Government. There are about 40,000 radio sets and 10,000 radio-gramophone sets, of which 80 per cent. can receive international short-wave broadcasts.

### Banking, Money, Weights and Measures.

On July 1, 1929, on the recommendation of the Kemmerer Mission, the Banco Central de Bolivia was inaugurated at La Paz, taking over the assets of the Banco de la Nación Boliviana; it acts as a Central Bank of issue. It was taken over by the State in August, 1939. Note circulation, September 1, 1944, 1,186,000,000 bolivianos; deposits, 733,000,000; gold, at home and abroad, 600,000,000; foreign exchange, 384,000,000 bolivianos.

On July 11, 1928, the gold exchange standard was adopted; notes of the Banco Central de Bolivia (which has a monopoly of the note issue) were convertible on demand into gold or gold exchange. The unit of account was the gold boliviano, containing 0.54917 grams of fine gold and equal then in U.S. money to 36.5 cents (61.8 cents in new U.S. gold dollars). There is no Bolivian gold yet in circulation. Gold is legal tender up to any amount, and silver up to 10 bolivianos. Coins in circulation, 1942, 50 and 10 centavos cupronickel; the mint was re-opened in 1942 for the coinage of silver 1 and 5 boliviano pieces and of centavo pieces of a metal alloy. Paper notes in denominations of 1, 5, 10, 20, 50 and 100 bolivianos are the chief circulating medium. Monetary stock, *per capita*, end of 1942, was: gold, 2.91 bolivianos; silver, 1.12 bolivianos, and paper, 236.71 bolivianos.

On September 25, 1931, gold payments were suspended, and exchange control set up. Gold stock rose within a year from 1 million dollars (U.S.) to around 3½ million dollars, reaching 9½ million dollars by the end of 1942. Broadly, the gold value of the official rate has depreciated from 98.3 per cent. of par in 1929 (annual average) to around 4 per cent. in 1942. The official rate in 1940 averaged 89.09 bolivianos to the dollar; by decree of June 1, 1941, the bank's gold stock was re-valued at 46.00 bolivianos to the dollar, making the boliviano equal to 2.17 cents, U.S. The special account rate for sterling under the Anglo-Bolivian Agreement, 1942, has been 186 bolivianos to the £.

The Bank of Agriculture was established on July 27, 1942, with an authorized capital of 200 million bolivianos and a paid-up capital of 50 million bolivianos, of which 30 millions were provided by the Bank of Bolivia and the remainder by the State. In June, 1936, the governing Junta created the Mining Bank of Bolivia with paid up capital of 4,000,000 bolivianos (subsequently increased to 57,000,000 bolivianos in 1940) provided by the Government, the Central Bank, the associated banks and the mining interests. This was taken over by the Government in June, 1939.

The metric system of weights and measures is used by the administration and prescribed by law, but the old Spanish system is also employed.

### Diplomatic and Consular Representatives.

#### 1. OF BOLIVIA IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Antenor Patino.  
Secretaries.—Guillermo Scott-Murga, Juan Peharanda Minchin and Eduardo Aramayo.  
Consul-General.—Luis Romero Jacuz.  
Consul-General (at Liverpool).—A. M. Moreno.

is the clause in the 1934 Constitution declaring 'there shall be no privileges or distinctions by reasons of birth, sex, race, profession of the individual or of his parents, social class, wealth, religious or political ideas.' The death penalty (for the first time in the history of Republican Brazil) has been instituted, both for certain types of wilful murder and for 'political crimes.' Censorship of the press is established. All this is officially described as 'O Estado Novo' or 'New Regime.'

The franchise, under the 1934 Constitution, extended to all citizens, both men and women, not under eighteen years of age who could read and write; disfranchised were mendicants, enlisted soldiers, those found guilty of political activity against the State, and prisoners serving sentence. Several women hold responsible Government offices. Voting is secret and compulsory.

On March 1, 1945, President Vargas signed a decree restoring democratic government and giving Brazil a new Constitution.

*President of the Republic.*—Dr. Getulio Dornelles Vargas.

Dr. Vargas became chief of the provisional government November 3, 1930, after a military uprising in various States and the capital had forced the resignation of President Washington Luis Pereira de Souza and prevented the installation of Dr. Julio Prestes, elected March, 1930. Dr. Vargas was elected President by the Constituent Assembly on July 18, 1934.

There are Secretaries of State at the head of the following Departments:—Finance; Justice and Interior; War; Marine; Foreign Affairs; Communications and Public Works; Agriculture; Labour, Industry and Commerce; Instruction and Public Health. By decree February 15, 1941, a new Air Ministry was established to supervise of aviation, both civil and military.

On August 22, 1942, Brazil declared war on Germany and Italy, and on February 6, 1943, announced her decision to subscribe to the declaration of the United Nations and to the Atlantic Charter, thus extending her belligerency to include Japan.

On December 29, 1943, a covenant was signed between Brazil and Portugal for the 'defence, expansion and prestige' of the Portuguese language in the world.

#### LOCAL GOVERNMENT.

The United States of Brazil consists of twenty States, the Federal Territory of the Acre, and one Federal District. Each State under the 1934 Constitution was organised under the republican form of government, with distinct administrative, legislative, and judicial authorities, its own Constitution, and laws which must, however, agree with the constitutional principles of the Union. Taxes on inter-State commerce, levied by individual States which previously flourished, were prohibited; export taxes on products shipped abroad were limited to 10 per cent. *ad valorem*. The governors and members of the legislatures were elected, but magistrates were appointed and were not removable from office save by judicial sentence.

President Vargas in November, 1937, divested all the Governors (except that of Minas Gerais) of their offices and reappointed them (or others) as Federal Interventors.

#### Area and Population.

Following are the census returns for 1920 and 1940 (capitals of States in brackets):—

| States                            | Area :<br>sq. miles | Population       |                  |                      |
|-----------------------------------|---------------------|------------------|------------------|----------------------|
|                                   |                     | 1920<br>(Census) | 1940<br>(Census) | Per sq. mile<br>1940 |
| Alagoas (Maceió)                  | 22,577              | 978,748          | 957,621          | 42.41                |
| Amazonas (Manaus)                 | 731,363             | 363,166          | 449,077          | 0.6                  |
| Bahia (São Salvador)              | 164,601             | 3,334,465        | 3,907,086        | 23.7                 |
| Ceará (Fortaleza)                 | 40,241              | 1,319,228        | 1,994,009        | 49.5                 |
| Espirito Santo (Victoria)         | 17,308              | 457,328          | 758,425          | 43.8                 |
| Goyaz (Goiânia)                   | 288,462             | 511,919          | 832,865          | 2.9                  |
| Maranhão (São Luiz)               | 177,515             | 874,337          | 1,246,813        | 7.0                  |
| Matto Grosso (Cuiabá)             | 532,210             | 246,612          | 427,629          | 0.8                  |
| Minas Gerais (Belo Horizonte)     | 221,894             | 5,888,174        | 6,797,219        | 30.06                |
| Pará (Belém)                      | 443,789             | 983,507          | 949,808          | 2.1                  |
| Parahyba (Parahyba)               | 28,846              | 961,106          | 1,424,457        | 49.4                 |
| Paraná (Curitiba)                 | 93,269              | 685,711          | 1,243,838        | 13.3                 |
| Pernambuco (Recife)               | 49,560              | 2,154,835        | 2,674,683        | 53.9                 |
| Piauí (Teresina)                  | 116,494             | 609,003          | 832,250          | 7.1                  |
| Rio de Janeiro (Niteroi)          | 26,627              | 1,552,371        | 1,861,727        | 69.9                 |
| Rio Grande do Norte (Natal)       | 22,189              | 537,135          | 774,503          | 34.9                 |
| Rio Grande do Sul (Porto Alegre)  | 112,278             | 2,182,713        | 3,336,632        | 29.7                 |
| Santa Catharina (Florianópolis)   | 20,785              | 668,743          | 1,162,854        | 56.9                 |
| São Paulo (São Paulo)             | 91,310              | 4,592,188        | 7,230,168        | 79.2                 |
| Sergipe (Aracaju)                 | 15,089              | 477,064          | 544,945          | 36.1                 |
| Federal District (Rio de Janeiro) | 431                 | 1,157,873        | 1,781,567        | 4,133.5              |
| Acre Territory                    | 58,672              | 92,379           | 81,326           | 1.4                  |
| Região da Serra dos Aimorés       | —                   | —                | 67,103           | 12.6                 |
| Total                             | 3,275,510           | 30,635,605       | 41,356,605       | —                    |

Estimated population, 1942, was 43,550,000. The language is Portuguese, though Italian and German are widely used in the Southern States.

An area of 200,000 square miles, previously parts of several States, and forming a belt around Brazil, was taken over by the Federal Government on October 1, 1943, and made into five federal territories to be called Amapa (capital, Amapa), Rio Branco (capital, Boa Vista), Guapore (capital, Foz de Velho), Ponta Pora (capital, Ponta Pora) and Iguassu (capital, Foz de Iguassu); they are under the direct administration of the President. The Iguassu Territory insulates the country from French Guiana and Surinam (Dutch Guiana); Rio Branco borders Venezuela, reaching almost to Colombia and Northern Peru; Guapore abuts Southern Peru and Bolivia; Ponta Pora borders Paraguay and Argentina; Iguassu faces the Misiones province of Argentina.

In 1936 the estimated population of Rio de Janeiro was 1,711,466; São Paulo, 1,120,405; Recife, 472,764; Bahia de S. Salvador, 363,726; Porto Alegre, 321,628; Belém, 293,036; Belo Horizonte, 167,712; Fortaleza, 143,277; Maceió, 129,105; Niteroi, 125,247; Curitiba, 116,632; João Pessoa, 101,280; Manaus, 89,346; São Luiz, 70,272.

The number of immigrants between 1820 and 1939 was 4,645,462. Italian,

756

BRAZIL

Portuguese and Spanish immigrants amounted (1937) to 3,492,118 or 75·8 per cent. Japanese immigration began only in 1908 and amounts to 180,359 or 3·9 per cent. of the total for the 118 years. Germans number 222,951 or 4·9 per cent. Under the new Constitution, as amended in May, 1938, each nationality has its immigration restricted to 2 per cent. per year of the number calculated for the previous fifty years, except that the quota may be increased to 3,000 per annum, providing that 80 per cent. of the immigrants are 'farmers or rural technicians.' Settlements of foreigners must include 30 per cent. of Brazilians. In 1939 there was a total of 22,668 immigrants.

Religion.

The population is overwhelmingly Roman Catholic. In 1889 connection between Church and State was abolished but the 1934 constitution restored the former connection, among all forms of religion. Brazil has a representative at the Vatican. The Catholics maintain 6 seminaries; there are 17 ecclesiastical provinces and archdioceses with 3 archbishops, 10 bishops, 21 prelates, and 2 apostolic prefects. The 2,450 parishes have 4,200 priests. Catholic seminaries have 4,000 students and the religious orders have 7,000 men and women. In 1935 Protestants numbered 167,457. There are numerous Evangelic sects, while Judaism, Buddhism, Mahometanism, Spiritualism, and Positivism have many followers.

Education.

Education is free, and in some States (e.g. Ceará, Maranhão, Alagoas, Matto Grosso, Minas Gerais, S. Paulo, Santa Catharina) it is compulsory. The Union Government undertook to provide, in part, for higher or university instruction within the Union, but there are institutions of this nature maintained, some by the States, and some by private associations, while primary schools are chiefly maintained and supervised, either by the States or by the municipalities and private initiative. There is one official university in Brazil, the University of Brazil (Federal District), founded on September 7, 1920, and three private universities, at Porto Alegre, Bello Horizonte (Minas Gerais) and Curitiba (Paraná); there are moreover 56 faculties which confer degrees. At the Capital are maintained by the Federal Government a school for the blind, another for deaf and dumb. The School of Fine Arts and National Institute of Music are incorporated in the University of Brazil. There are seven engineering and mining polytechnics at Rio de Janeiro (University), S. Paulo, Rio Grande de Sul, Bahia, Minas Gerais, and Pernambuco; 19 schools of medicine; 40 of pharmacy and dentistry; 12 schools of law and social sciences; and 97 industrial schools, 41 agricultural, and 48 commercial schools. The Faculties of Law (S. Paulo) and of Medicine (Bahia) are of importance. The Oswaldo Cruz Institute, in Rio de Janeiro, is devoted to experimental medicine, and the Butantan Institute, in S. Paulo, to the preparation of anti-ophidic and other serums.

There were in 1940, 39,650 primary schools with enrolment of 3,106,784 pupils; 718 secondary schools with 143,289 pupils; 564 commercial schools with 40,537 pupils; 153 industrial schools with 14,540 pupils, and 213 superior schools conferring degrees with 22,300 pupils. Libraries numbered 1,226, with 1,138,281 volumes.

There are 150 relief institutions and pension funds with 844,000 subscribers; 51,785 persons received relief in 1937. Medical-sanitary assistance is furnished by 447 Federal, State and Municipal establishments, with 4,466,964 patients in 1937.

Justice.

There is a supreme Federal court of Justice at Rio de Janeiro, which celebrated its centenary on January 20, 1929; it has 11 justices, but may have up to 16, appointed by the President with the approval of the Senate. There are also Federal Tribunals in each State and the Federal District and the Territory of Acre, as well as an elaborate system of 'Electoral Courts' to protect the elections. Justice is administered in the States in accordance with State law, by State courts, but in Rio de Janeiro Federal Justice is administered. Judges are appointed for life. There are also 727 magistrates dealing with commercial cases and 4,968 justices of the peace. There is no divorce, but there is a form of judicial separation.

Finance.

Receipts and expenditures for five calendar years have been as follows in contos of cruzeiros (paper) (ranging in value between 50·70 U.S. dollars in 1941 and 51·80 in 1945):—

|             | 1941                | 1942                | 1943                | 1944 <sup>1</sup>   | 1945 <sup>1</sup>   |
|-------------|---------------------|---------------------|---------------------|---------------------|---------------------|
| Revenue     | Contos<br>4,045,555 | Contos<br>4,376,580 | Contos<br>5,442,645 | Contos<br>6,450,233 | Contos<br>8,222,899 |
| Expenditure | 4,539,685           | 5,748,013           | 5,944,000           | 6,403,523           | 8,305,268           |

<sup>1</sup> Estimates.

Chief items of revenue in the 1944 budget are as follows (in millions of cruzeiros): income taxes, 5,319; Government property, 10; industrial enterprises, 269; special revenues, 243. The principal items of expenditure are: finance, 1,298; transportation and public works, 902; war, 1,008; education and health, 411; navy, 417; aeronautics, 375; justice and internal affairs, 293; labour, industry and commerce, 191; agriculture, 216.

The consolidated Federal foreign debt of Brazil on December 31, 1942, amounted to 98,263,000l., 273,634,212 paper French francs, 1942, amounted to 149,801,000 dollars (U.S.); external debt (1942) of the States was 38,547,000l., 101,429,000 dollars (U.S.), 225,138,000 paper francs, and 6,428,000 Dutch florins; external debt of the municipalities, 9,318,000l., 21,520,000 paper francs and 54,231,000 dollars (U.S.). Internal debt, December 31, 1942, was 5,290,200 contos; external debt, 1,370,800, and note circulation, 8,237,800, making total Federal indebtedness of 14,898,800 contos. Service of the sterling debt in 1941 took 1,642,764l.; in 1942, 1,657,800l. In March, 1940, partial service of the external debt (in default since November 10, 1937) was resumed, and in 1943 a new scheme for gradual redemption of the debt at a fraction of the original amount was laid down effective from January 1, 1944. British investments, 1944, were 229,147,252l., of which 21,760,126l., or 9·4 per cent., were in default; average interest received was 3·8 per cent. Of the 1944 total, 139,799,232l. were in Government loans, 30,916,632l. in railways and 58,431,388l. in miscellaneous enterprises. American direct investments, 1940, amounted to 240,108,000 dollars. American holdings of dollar bonds, end of 1943, were 887,242,028 dollars.

Defence.

Army.—Under the Constitution of 1934, military service is compulsory except for women. The military law of 1923 provided compulsory military service for every Brazilian from 21 years of age to 45. The terms of service are 9 years (from the 21st to the 30th years of age) in the Army 'first line'

(1 in the ranks, the rest in the reserve), and 14 years (from the 30th to the 45th years of age) in the army 'second line' (7 in the 'second line' and 7 in the reserve of the same). The reservists are called up for training annually for 4 weeks, besides which there is rifle practice once a month. The men in the territorial army also have an annual training of 2 to 4 weeks. The total peace strength for 1938 was 6,548 officers and 72,525 other ranks, organized in 5 divisions, 3 cavalry divisions, 1 mixed brigade, and 1 coast defence district. Brazilian forces were fighting with the Allied armies in Italy during 1944. The military police under the War Office number 38,213.

**Air Force.**—There is an Air Force (independent of both the Army and Navy since 1940) of 3 air regiments, 2 balloon battalions and 2 balloon companies, a personnel of 5,000. Air defence is organized in 5 zones and 5 air regiments. Equipment is chiefly of United States manufacture.

**Navy.**—The principal ships of the Brazilian Navy are as follows:—

| Laid down | Name                                                                           | Displacement | Armour |     | Principal Armament                          | Torpedo Tubes | H. P.  | Nominal speed |
|-----------|--------------------------------------------------------------------------------|--------------|--------|-----|---------------------------------------------|---------------|--------|---------------|
|           |                                                                                |              | Belt   | Gun |                                             |               |        |               |
| 1907      | BATTLESHIPS.<br>( <i>Minas Gerais</i><br>( <i>São Paulo</i> . . . . .)         | 19,281       | 9      | 9   | { 12 12-in., 14 4-7-in., 4<br>3-in. A. A. } | —             | 30,000 | 21            |
| 1907      | PROTECTED<br>CRUISERS.<br>( <i>Baia</i><br><i>Rio Grande do Sul</i> . . . . .) | 3,150        | —      | —   | 10 4-7-in. . . . .                          | 4             | 22,000 | 27            |

There are 3 river monitors (*Pernambuco*, *Paraguassú*, *Parnaíba*), 1 river gunboat, 8 destroyers, 1 old torpedo boat, 4 submarines, 6 corvettes, 16 submarine chasers and a submarine depot ship. The battleship *Minas Gerais* and cruisers *Baia* and *Rio Grande do Sul* have been extensively refitted, oil-fired boilers being installed. A similar reconstruction is being undertaken in the case of the *São Paulo*. A British-built four-masted training ship with auxiliary diesels, the *Almirante Saldanha*, was delivered in 1934. Six more destroyers are being built in Brazil. Six small mine-layers and six corvettes were built in Brazilian yards.

There are three naval dockyards—at the Ilha das Cobras (Rio de Janeiro), Pará and Ladario de Matto Grosso (this latter a river base).

### Production and Industry.

Brazil's total production of goods (1939) was valued at 27 million contos (337,000,000), of which industry accounted for 12½ millions, agriculture 9 millions, livestock 3 millions, and minerals 1 million.

Brazil is an agricultural country, though only a small portion is under culture. The total cultivated area covers about 17,387,000 acres, of which 4,135,000 acres are in coffee, 6,919,000 in maize, 5,461,000 in cotton, and (1940) 12,290 in rice. About 67,455 acres of the dry region in the North-Eastern section are under irrigation. Brazil ranks first in the production of coffee and castor-beans, second in the production of cocoa, and third in that of sugar and tobacco. The four States of São Paulo, Rio de Janeiro, Espírito Santo and Minas Gerais are the principal districts for coffee growing. Brazil, with 3,017,234,000 coffee trees, has three-fourths of the world supply. Large plantations or fazendas with more than 100,000 trees are the rule. Production (1941-42) was 12,787,400 bags (of 132 lb.); exports, 1943,

10,115,969 bags, valued at 2,803,768 contos (37,400,000). The United States took 84 per cent. Sales since February, 1931, have been controlled by the Federal Government; stocks purchased by the Government and the Coffee Council are incinerated to maintain the price. Total destroyed up to December 31, 1943, was 77,803,547 bags; the incineration policy was suspended in October, 1943. In 1940 the Government acquired the right to exploit an American patent for converting surplus coffee into raw material for plastics. Highest output recorded was 29,880,000 bags in 1933-34. Production and export of cocoa was nationalized in May, 1943. Bahia furnishes 96 per cent. of the output from about 250,000 acres; total output, 1942-43, 1,808,035 bags of 60 kilos; exports during that crop year were 1,496,310 bags. Exports of cocoa, 1939, at 132,155 tons constituted a record. Two crops a year are grown. The United States takes two-thirds of the crop. Castor-bean output exceeds 200,000 tons; exports in 1941, 218,347 tons, of which the United States took 88 per cent. The plant grows wild. Tobacco output averages 250,000 bales per annum. Sugar production, 1942, was 15,437,977 bags of 60 kilos. Anhydrous alcohol is distilled from sugar surplus, producing, in 1936, 4,887,766 gallons. Annual beer production has reached 50,000,000 gallons for domestic consumption only. Brazil now ranks second only to the United States in production of oranges (1,990,000 boxes in 1938). Domestic consumption of bananas, 1940, was 76,000,000 stems. Cotton production, 1942-43, 469,426 metric tons from 5,000,000 acres; São Paulo produced 375,098 tons. Exports, 1941, 288,274 tons. Brazil furnishes only 10 per cent. of her own requirements in wheat; output, 1942, 9,126,000 bushels from 742,000 acres.

Rubber is another great natural product of the country, chiefly in the Acre Territory and the States of Amazonas and Pará. Output, stimulated by the war, was 18,635 tons in 1940, and in 1943 about 30,000 tons; peak reached in 1912 (when rubber realized 3 dollars (U.S.) a pound) of 42,510 tons. However, exports have been disappointing. Exports of raw rubber, 1941, were 10,734 tons; 1943, 12,100 tons. Henry Ford's plantations shipped 90 tons in 1942. Rubber goods manufactured in 1942 amounted to 11,636 metric tons. Brazil is the chief source of carnauba wax, used for electric insulation and gramophone records, exporting 11,766 tons in 1941. Carao fibre is grown as a substitute for Indian jute. Plantations of tung trees established in 1930 are beginning to yield tung oil in commercial quantities.

The cattle census, 1935, showed 50,298,000 cattle, 24,773,600 swine, 13,049,100 sheep, 6,177,300 goats, 6,131,700 horses, and 37,868,300 asses, mules and oxen. Sericulture, started by Italian immigrants, produced 700 tons of cocoons in 1941. The fishing industry (including a fleet of 120 vessels) is owned by the Government, which pays the men wages; the catch in 1943-44 was 8,916,384 kilos, compared with an annual average of 3,000,000 kilos.

Both the mines and forests of Brazil are important. Brazil is the only source of high-grade quartz crystal in commercial quantities; exports in 1941, 1,980 tons. It is an important source of industrial diamonds (exports, 1941, 64,309 grammes); the second largest Western producer of chrome ore (reserves of 4,000,000 tons); fifth in the output of mica; third in zirconium; she has large reserves of beryllium, graphite, titanium ore and magnesite awaiting development. Manganese ores of high content are important; exports in 1941 were 437,402 tons, valued at 80,374 contos; the United States took 97 per cent. Coal deposits exist in Rio Grande do Sul, Santa Catharina, Paraná, and São Paulo. Total reserves are estimated at about 5,000 million tons, and the output (1943), from 7 mines, 2,034,000 tons. Iron is found chiefly in Minas Gerais, where 17

plants are located. At Itabira, the Government is now opening up what is believed to be one of the richest iron ore deposits in the world. With the support of Export-Import Bank, a steel industry is being developed, starting with plants at Volta Redonda, State of Rio Janeiro, which are expected to furnish 59 per cent. of Brazil's steel requirements in 1943. Output of pig iron (1941), 208,795 tons; of steel, 154,189 tons. Exports of iron ore, 1941, 420,756 tons. Gold is found in practically every State, though large scale mining is confined to a single mine in Minas Gerais; the production in 1941 was 147,311 fine ounces. Private export of gold has been forbidden since 1918; the output is used to guarantee the inconvertible Treasury notes and bank notes. Salt output (1938), 859,222 tons. Diamond districts are Diamantina, Grão Mogol, Chapada Diamantina, Bagagem, Goyas, Matto Grosso, and other States. Cement output from seven plants, 1939, was 697,798 tons.

The most important manufacturing industry in Brazil is cotton weaving (30 per cent. of the factories are in São Paulo and another 30 per cent. in the Federal District and in Minas Gerais). Output of cotton textiles, 1942, was 159,809 tons of yarn and 889,197,000 square yards of cloth; domestic consumption of yarn was 134,122 tons. Exports of cotton piece goods, 1942, were 25,169 tons; 1941, 9,238 tons. Exports of cotton yarn, 1942, 2,658 tons; in 1941, 971 tons. There were, in 1936, 338 cotton factories, 13 silk mills, 3 rayon plants (with output of 7,044,500 kilos in 1939), 162 hosiery mills, 85 woollen mills and 16 jute mills. In 1942, there were 80,633 factories of all types, employing 1,311,000 workers. Total value of national production (farming, mineral and industrial) is between 40,000 and 45,000 million cruzeiros, of which industrial production represented 25,000 million. All branches of the petroleum industry, including production, importation and refining, were placed under Federal control in April, 1938.

### Commerce.

Imports and exports (excluding specie) for 5 years in contos of cruzeiros (cruzeiro = approximately 5 cents, U.S., and 1,000 cruzeiros or 1 conto = 50 dollars, U.S.):—

|               | 1939      | 1940      | 1941      | 1942      | 1943      |
|---------------|-----------|-----------|-----------|-----------|-----------|
|               | Contos    | Contos    | Contos    | Contos    | Contos    |
| Imports . . . | 4,988,682 | 4,964,149 | 5,514,417 | 4,644,000 | 6,078,328 |
| Exports . . . | 5,615,518 | 4,960,588 | 6,729,401 | 7,495,000 | 8,728,569 |

Exports in 1942 were 2,660,827 metric tons; in 1943, 2,696,089 tons. Imports, 1942, 3,008,444 tons; 1943, 3,302,000 tons. Principal imports in 1939 and 1940 were (metric ton = 2,204.6 lb.):—

|                                       | Quantities |           | Value       |             |
|---------------------------------------|------------|-----------|-------------|-------------|
|                                       | 1939       | 1940      | 1939        | 1940        |
| Motor cars . . . . . (units)          | 21,748     | 23,495    | 284,992,000 | 193,723,000 |
| Fuel and diesel oil . . (metric tons) | 724,441    | 604,092   | 124,809,000 | 171,101,000 |
| Chemicals . . . . . "                 | 156,101    | 140,555   | 290,814,000 | 279,706,000 |
| Iron and steel . . . . . "            | 287,353    | 196,492   | 442,181,000 | 444,034,000 |
| Machinery . . . . . "                 | 62,980     | 43,021    | 990,107,000 | 839,706,000 |
| Coal and coke . . . . . "             | 1,382,471  | 1,209,242 | 284,606,000 | 285,569,000 |
| Beverages . . . . . "                 | 8,191      | 5,745     | 38,332,000  | 29,887,600  |
| Wheat . . . . . "                     | 966,831    | 857,937   | 368,592,000 | 471,809,000 |

Principal exports in 1943 were: coffee (32 per cent.), cotton piece goods (12.6 per cent.), raw cotton (4.7 per cent.), cocoa (3.9 per cent.), quartz crystal (3.7 per cent.), canned beef (3.1 per cent.), pine wood (2.9 per cent.), carnauba wax (2.6 per cent.), castor seed (2.4 per cent.), crude rubber (2.2 per cent.), rice (2.2 per cent.), followed by hides and skins, rubber tyres and tubes, and diamonds (each 2.1 per cent.).

Under the U.S.—Brazil commodity agreement of 1943, the United States agreed to take goods valued at 9,000,000 contos (112,500,000\$), including rubber (2,100,000 contos), coffee (2,047,000), tyres and tubes (1,000,000), and iron ore (450,000 contos).

In 1943 the United States took 52 per cent. of Brazil's total exports, Great Britain 14.11 per cent., and Argentina 9.18 per cent. Of imports, the United States furnished 54.50 per cent., Argentina 18.07 per cent., Great Britain 7.20 per cent., and Canada 1.35 per cent.

Brazilian exports to the United Kingdom in 1941 were 446,588 metric tons, including 204,677 tons of iron ore, 49,961 tons of tinned beef, 39,238 tons of chilled beef and 38,016 tons of cotton.

Total trade between United Kingdom and Brazil (according to Board of Trade returns) for 5 years:—

|                                | 1934      | 1935      | 1936      | 1937      | 1938      |
|--------------------------------|-----------|-----------|-----------|-----------|-----------|
|                                | £         | £         | £         | £         | £         |
| Imports from Brazil into U.K.  | 8,439,866 | 7,194,266 | 9,884,830 | 8,459,834 | 7,705,085 |
| Exports to Brazil from U.K.    | 5,741,541 | 4,757,152 | 4,785,569 | 7,046,620 | 5,195,145 |
| Re-exports to Brazil from U.K. | 140,376   | 186,550   | 107,040   | 156,761   | 181,296   |

United Kingdom exports (including shipments of war supplies, if any, by Government departments) in 1939, 1940 and 1941 were 4,590,000\$, 5,028,000\$ and 3,539,000\$ respectively. Excluding such shipments, exports in 1942, 1943 and 1944 were 3,578,000\$, 4,085,000\$ and 2,307,000\$ respectively.

### Shipping and Navigation.

Inland waterways, mostly rivers, are open to navigation over some 21,944 miles. By means of its waterways Brazil is connected with the neighbouring States. All coasting and river vessels must be Brazilian; subsidies for the merchant marine were 54,842 contos in 1938 budget. Rio de Janeiro and Santos are the two leading ports; there are 18 other large ports. Bolivia and Paraguay have been given free ports at Santos. During 1938, 35,882 vessels with tonnage of 51,258,455 entered Brazilian ports and 85,873 vessels of 51,265,702 tonnage cleared.

The largest company, the Lloyd Brasileiro, is owned and operated by the Government. Brazilian shipping, June 30, 1939, 305 vessels of 487,820 tons.

### Communications.

Railway history in Brazil begins in 1854 with 9 miles. In 1943, the total length of railways was 24,000 miles, of which 2.5 per cent. had been electrified. No railway lines connect northern and southern Brazil. The Central Brazil Railway (2,082 miles) is the principal railway in Brazil, and is owned by the State; it joins up the railways of Brazil with those of Uruguay, Argentina and Paraguay, and is being electrified. Four Anglo-Brazilian railways have a length of 3,165½ miles. Brazilian railways to-day operate over tracks of five different gauges. Total receipts of all railways in 1938 were 1,196,124 contos; expenses were 1,181,494 contos. The railways transported 174,026,000

passengers, 33,479,000 tons of freight, 957,000 tons of luggage and parcels, and 3,704,000 animals. The total length of first-class highways in 1939 was 124,208 miles. Plans for a co-ordinated highway system, criss-crossing the country from north to south and from east to west, were adopted in 1944, embracing 27 highways with a total mileage of 24,000.

Of the telegraph system of the country about half, including all inter-State lines, is under control of the Government. There were in 1936, 77,776 miles of line (including 46,291 miles of Government property, 7,516 miles of railway property) and 21,196 miles of submarine cables. There are over 5,000 telegraph offices. Telephone service is largely local, but in 1944 the Brazilian subsidiary of the International Telephone and Telegraph Company was ordered to establish inter-urban service between all the State capitals. The long-distance radio-telephone connections along the Brazilian coast, heretofore restricted to official use, have (1944) been thrown open to the public. Telephone instruments in use, 1941, were 290,910. Sixty-five wireless stations have been established; there are 485 wireless land stations. Wireless sets, 1941, numbered 500,000.

Brazilian Post-office, with 4,870 offices, during 1936 handled 1,964,648,544 letters and post-cards; air-mails handled 261,034 pounds of mail.

Six companies, especially the *Compagnie Generale Aeropostale* and the Pan-American Airways, furnish air-mail and passenger services; in 1940 the mileage flown amounted to 4,337,300 and passengers carried to 70,734. In December, 1942, Brazil took over the German-owned Condor Aviation Company. Civil airlines cover 42,160 miles, and military airlines 11,780 miles. In 1940, there were 100 commercial air ports, 512 landing fields and 7,900 flights in commercial machines. Rio Janeiro has 71 airline arrivals and departures weekly.

A decree was issued in 1913 adopting the standard time and longitude of Greenwich (instead of that of Rio de Janeiro) as from January 1, 1914.

### Money, Credit and Banking.

Brazil for many years had a dual currency, with a gold milreis (1,000 reais or reis) for foreign trade and a paper milreis for domestic trade. At one time the gold milreis was worth 27*d.*, but fell to 15*d.* before the last war, to 5·93*d.* in 1929 and to 2·78*d.* in 1938.

Beginning November 1, 1942, the currency unit, the milreis, was re-named the cruzeiro (Cr.\$), composed of 100 centavos. Metallic currency now consists of 1, 2 and 5 cruzeiros and 10, 20 and 50 centavos; notes are of the value of 10, 20, 50, 100, 200, 500 and 1,000 cruzeiros, all resembling the former notes for similar amounts of milreis. One thousand milreis (or cruzeiros) is known as '1 conto,' roughly equivalent to 50 dollars, U.S.

In 1929, the milreis had an average value in London of 5·93*d.*: 1932, 4·89*d.*; 1934, 3·20*d.* (official rate, 4·19*d.*); 1936, 2·78*d.* (4·25*d.*); 1938, 2·78*d.* (official rate suspended); 1939, 2·75*d.* (suspended); 1940, 2·20*d.* (3·97*d.*). In New York in 1929 the milreis had an average (official) value of 11·81 cents; in 1935, 8·29 cents; 1936, 8·57 cents (free rate, 5·88 cents); 1937, 8·64 cents (6·20 cents); 1938, 8·84 cents; 1939, 6·00 cents (free rate 5·12 cents). Since 1940 the official rate has been 6·06 cents and the free rate has ranged between 5·02 and 5·18 cents.

The Bank of Brazil (founded in 1808 and reorganized in 1906) with an authorised capital of 100,000 contos of reis has 83 branches throughout the Republic (and a branch in La Paz, capital of Bolivia, and in Asuncion, capital of Paraguay), and does a general banking business. On August 31, 1944, note circulation was 13,667,377 contos of cruzeiros. The country's

gold stock has fluctuated severely, falling from 7½ million fine ounces in 1929 to ½ million in 1930; since the outbreak of war it has risen from 1,148,000 ounces to 8,486,000 in July, 1944, or from 40,000,000 dollars (U.S.) to 297,000,000 dollars.

Native commercial banks on June 30, 1941, had cash on hand of 1,242,880 contos; total advances of 13,648,045 contos; deposits were 15,138,034 contos. In 1941 all foreign banks were given 5 years in which to conclude operations; American banks were excepted from this.

### Weights and Measures.

The metric system has been in use in all official departments since 1862. It was made compulsory in 1872, but the ancient measures are still partly employed in certain rural districts of the interior. They are: *Libra* = 1·012 lbs. avoirdupois; *Arroba* = 32·38 lbs.; *Quintal* = 129·54 lbs.; *Alqueire* (of Rio) = 1 imperial bushel, or 40 litres; *Oitava* = 55·34 grains.

### Diplomatic and Consular Representatives.

#### 1. OF BRAZIL IN GREAT BRITAIN.

*Ambassador Extraordinary and Plenipotentiary*.—Dr. José Joaquim de Lima e Silva Moniz de Aragao, C.B.E. (appointed October 14, 1939).

*Counsellor*.—Joaquim de Sousa Leão.

*First Secretaries*.—Sylvio Ribeiro de Carvalho and Hugo Gouthier de Oliveira Gondim.

*Second Secretaries*.—Paschoal Carlos Magno and Josias Carneiro Leao.

*Military Attaché*.—Colonel Jayme de Almeida.

*Air Attaché*.—Colonel Alvaro Hecksher.

*Attaché*.—Paulo Teixeira Boavista.

*Consul-General in London*.—Ildefonso Falcão.

There are Consuls at Liverpool, Southampton, Cardiff and Glasgow, and a Consular representative at Newcastle.

#### 2. OF GREAT BRITAIN IN BRAZIL.

*Ambassador Extraordinary and Minister Plenipotentiary*.—Sir Donald St. Clair Gainer, K.C.M.G., O.B.E. (appointed May 3, 1944).

*Counsellor*.—J. D. Greenway.

*Secretary*.—P. F. Grey.

*Commercial Secretaries*.—A. H. W. King, C.B.E., J. A. Burns and R. S. Isaacson.

*Naval Attaché*.—Captain R. A. Wilson, D.S.O., R.N.

*Military Attaché*.—Col. W. F. Rhodes.

*Air Attaché*.—Commodore E. V. Chappell, M.C.

*Consul-General (São Paulo)*.—M. A. B. Denton-Thompson.

*Consul-General (Rio de Janeiro)*.—R. C. Stevenson, C.B.E.

There are Consular representatives at Bahia, Pará, Pernambuco, Rio Grande do Sul, São Paulo, Santos, Ceará, Maceió, Maranhão, Porto Alegre, Manaus, Morro Velho, Ilheus, and other towns.

## BULGARIA.

(BULGARIYA.)

### Reigning King (Tsar).

Simeon II, only son of King Boris III and of Queen Ioanna (Princess Gioranna of Savoy), daughter of Victor Emmanuel III, King of Italy, succeeded to the throne on the death of his father, August 28, 1943. He was born on June 16, 1937.

Sister of the King.—Princess Marie Louise, born January 13, 1933.

Uncle and Aunts of the King.—(1) Prince Cyril, born November 17, 1895; (2) Princess Eudoxia, born January 17, 1898; and (3) Princess Nadejda, born January 30, 1899; m. January 24, 1924, to Duke Albert Eugène of Württemberg.

During the King's minority a Council of Regency rules the country; it was composed of Prince Cyril, the King's uncle, Professor Bogdan Filoff and General Mikhoff, and was approved by the Bulgarian Parliament on September 9, 1944. But the Georgiev ministry deposed these Regents, and on September 9, 1944, appointed Professor Ganev and M. Pavlov as Regents in their stead. The first three Regents were executed on February 2, 1945, for their collaboration with Germany.

According to the Constitution the Sovereign and the heir to the throne must profess the Orthodox religion, and must reside permanently in the country. The royal title is hereditary.

The civil list is fixed (1939) at 4,791,705 leva, besides 27,289,900 leva for the maintenance of palaces, etc.

### Constitution and Government.

The Principality of Bulgaria and the Autonomous Province of Eastern Rumelia, both under Turkish suzerainty, were constituted by the Treaty of Berlin, July 13, 1878. The former was a revival of the ancient kingdom of Bulgaria which, in the reign of King Ivan Shishman III became tributary to Turkey in 1366 and was annexed in 1393. Prince Alexander of Battenburg was elected Prince of Bulgaria on August 29, 1879. On September 18, 1885, a coup d'état effected the union of Eastern Rumelia with Bulgaria, and this was recognized by the Porte on April 6, 1886, when Prince Alexander was appointed Vali Pasha, or Governor General for the Sultan, of the Province which had, however, merged its autonomy in the constitution of Bulgaria. As the result of a domestic coup d'état and the hostility of the Emperor Alexander III of Russia, Prince Alexander abdicated on September 7, 1886. After a Regency Prince Ferdinand of Saxe-Coburg and Gotha, sometimes

described as of Saxe-Coburg-Kohary, was elected Prince of Bulgaria July 7, 1887, but it was not until March 14, 1896, that the Porte recognized him as Prince and went through the form of appointing him Vali Paasha of Eastern Rumelia. On September 22 (October 3), 1908, Bulgaria declared her independence of Turkey and Prince Ferdinand assumed the title of Tsar of the Bulgarians. This was recognized by the Porte and the Powers in April, 1909. King Ferdinand abdicated on October 3, 1918, and was succeeded by his son, King Boris III, who died in mysterious circumstances on August 28, 1943.

For details of the First and Second Balkan Wars and the territorial arrangement following from them, see THE STATESMAN'S YEAR-BOOK, 1937, pp. 748-49.

By the Constitution of 1879, amended May, 1893, and June, 1911, the legislative authority was vested in a single Chamber, called the Sobranie or National Assembly, composed of 227 members. In October, 1937, a new electoral law was issued, fixing the number of seats in the Sobranie at 160, and the constituencies to have at least 20,000 electors. These comprise all males over 21 and all married females over 21. Candidates must be 30 years old. Party candidature is prohibited. A General Election held on January 30, 1940, resulted in the return of 140 supporters of the Government and an Opposition of 20 (including 9 Communists).

On September 9, 1944, the following Cabinet was appointed :—

*Premier.*—Kimon Georgiev.

*Deputy Prime Minister.*—M. Petkov.

*Minister of Foreign Affairs.*—M. Stoyanov.

*Minister of National Defence.*—Col. Vultchev.

*Minister of Public Works.*—M. Stefanov.

*Minister of Education.*—Professor Mikhailchev.

*Minister without Portfolio.*—M. Popov.

For local administration the country was divided in 1934 into 7 counties, each under a local governor. The counties are divided into districts, each under a district governor, and the districts into municipalities, each under a mayor. The county governors, district governors, and mayors are appointed by the Minister of the Interior.

Bulgaria, on March 1, 1941, signed the Three Power Pact, and on November 25, 1941, the Anti-Comintern Pact. Both were denounced on September 5, 1944. Until August 26, 1944, when Bulgaria asked Great Britain and the United States for an armistice, Bulgaria formed part of the German-Italian-Japanese bloc. The U.S.S.R. formally declared war on Bulgaria on September 5, 1944. The Bulgarian Government immediately asked the Soviet Government for an armistice, and at the same time announced that Bulgaria had declared war on Germany. The armistice was signed on October 28, 1944.

### Area and Population.

The area of Bulgaria is 103,146 square kilometres, or 39,825 English square miles, and the census population on December 31, 1934, was 6,077,939 (3,053,893 males and 3,024,046 females), as against 5,478,741 (2,743,025 males and 2,735,716 females) in the census of 1926; 21.4 per cent. of the population was urban and 78.6 per cent. rural.

By the Peace Treaty of Neuilly, signed on November 27, 1919, Bulgaria ceded Thrace to the Allied and Associated Powers and the Strumnitza line and a strip of territory on the north-west frontier to Serbia.

On September 8, 1940, by the treaty of Craiova between Rumania and Bulgaria, the former ceded to the latter the Southern Dobruja, fixing the new frontier on the 1912 line. This runs north of Silistria on the Danube to a point on the Black Sea just south of Mangalia. The Bulgarians thus get the two provinces of Durostor and Caliacra. The total area of Bulgaria is therefore increased to 110,842 sq. kilometres or 42,796 sq. miles.

In April, 1941, after the German invasion of Greece, Bulgaria occupied the whole of Yugoslav Macedonia, Greek Western Thrace, Eastern Macedonia, and the districts of Florina and Castoria.

On March 30, 1943, an agreement was signed in Tirana between a representative of the Bulgarian military authorities and one of the Italian military authorities in Albania whereby the frontier between Bulgaria and Albania was settled.

Population of counties, according to census of December 31, 1934 :—

| Counties.              | Area in sq. miles | Population |           |           | Per sq. mil |
|------------------------|-------------------|------------|-----------|-----------|-------------|
|                        |                   | Males      | Females   | Total     |             |
| Burgas . . . . .       | 5,258             | 281,635    | 273,812   | 554,947   | 106         |
| Plovdiv . . . . .      | 6,115             | 399,536    | 402,219   | 801,755   | 131         |
| Pleven . . . . .       | 5,960             | 495,887    | 500,849   | 996,686   | 167         |
| Shumen . . . . .       | 5,690             | 516,616    | 503,883   | 1,020,499 | 177         |
| Sofia . . . . .        | 6,502             | 583,972    | 568,081   | 1,152,053 | 177         |
| Stara Zagora . . . . . | 6,002             | 405,378    | 407,255   | 812,633   | 135         |
| Vratsa . . . . .       | 4,298             | 370,919    | 368,447   | 739,366   | 172         |
| Total . . . . .        | 39,825            | 3,053,893  | 3,024,046 | 6,077,939 | 153         |

The capital is the city of Sofia, with a population (estimate, January 1, 1942) of 401,300. The other principal towns, with population in 1934 (census figures), are Philippopolis (Plovdiv), 99,883; Varna, 69,944; Ruschuk (Ruse), 49,447; Burgas, 36,230; Plevena (Pléven), 31,520; Slivno (Sliven), 30,571; Stara Zagora, 29,825; Haskovo, 26,516; Shumen, 25,486; Jambol, 24,920; Pazarjik, 23,228; Vidin, 18,465; Assenovgrade, 17,778; Kustendil, 16,241; Vratsa, 16,177.

The movement of population in four years has been :—

| Years | Marriages | Living Births | Still-births | Deaths | Surplus of Births |
|-------|-----------|---------------|--------------|--------|-------------------|
| 1936  | 48,950    | 150,146       | 1,751        | 87,723 | + 71,423          |
| 1937  | 51,141    | 150,771       | 1,599        | 84,674 | + 66,097          |
| 1938  | 53,275    | 142,415       | 1,650        | 85,373 | + 57,042          |
| 1939  | 57,117    | 134,833       | 1,718        | 84,150 | + 50,683          |

### Religion and Education.

The national faith is that of the Greek Orthodox Church, though, in 1870, in consequence of its demand for and acceptance of religious autonomy, the Bulgarian Church was declared by the Patriarch of Constantinople to be outside the Orthodox Communion. But in February 1945 the schism was abrogated and the Bulgarian Church returned to the fold of the Greek Orthodox Church. The Church is governed by the Synod of Archbishops. There are 11 dioceses, viz., Sofia, Plovdiv, Stara Zagora, Sliven, Varna, Ruse, Tirmovo, Vratsa, Lovetch, Vidin and Nevrokop, in addition to 4 in Macedonia and 1 in Thrace (suspended at present). In addition to the Archbishops in charge of these dioceses there are Bishops of Bregalnitsa,

Dragovitsa, Nishava, Velitsa, Vranitsa and Znepolye. The clergy, both Orthodox and of other religious bodies, are paid by the State and also receive fees for services at burials, marriages, etc. There were, according to the last census of 1934, 5,128,690 members of the Orthodox Church of Bulgaria (84.4 per cent.), 821,298 Moslems (15.5 per cent.), 48,898 Jews (0.8 per cent.), 45,764 Catholics (0.8 per cent.), 23,476 Armenian-Gregorians, 8,371 Protestants, and 1,802 others.

Elementary education is obligatory and free for children between the ages of 7 and 14. The census of 1934 showed that 20.4 per cent. of the male population and 42.8 per cent. of the female population were illiterate.

The following are the educational statistics of Bulgaria for 1938-39: 184 public and 68 private kindergartens, the former with 206 teachers and 9,724 pupils, the latter with 75 teachers and 2,978 pupils; 4,743 public elementary schools with 7,556 male and 8,809 female teachers and 307,317 boys and 288,704 girls; 1,933 lower secondary schools with 3,596 men and 3,692 female teachers and 167,014 boys and 119,342 girls; 112 higher secondary schools with 1,064 men and 1,300 women teachers and 47,655 boys and 26,775 girls. There is one university (at Sofia) with 285 professors and 4,377 men and 1,653 women students.

### Old Age Pensions.

In February, 1941, the Legislature passed laws instituting as from January 1, 1942, old age pensions for the peasantry as well as for manual workers. Peasants, on reaching the age of 60, will be granted a monthly pension of 800 leva; in order to qualify for this, every peasant must contribute 60 leva per annum.

### Justice.

With Royal Decree No. 174 of November 10, 1934, and in conformity with Article 47 of the Bulgarian Constitution, the following judicial institutions were established: District and County courts, Courts of Appeal, the Supreme Administrative Court, and the Supreme Court of Cassation. The seats of the District Courts are located in the chief district towns, and those of the County Courts in the chief county towns. There are three Courts of Appeals, namely: (1) Sofia—for the Sofia and Vratza administrative counties; (2) Russé—for Pleven and Shoumen administrative counties; (3) Plovdiv (Philippopolis)—for Plovdiv, Stara Zagora and Burgas administrative counties. There is only one Supreme Court of Cassation, sitting at Sofia.

### Finance.

The revenue and expenditure of Bulgaria for 5 years were as follows (in thousands of leva):—

|             | 1937 <sup>1</sup> | 1938 <sup>1</sup> | 1939       | 1940       | 1941 <sup>1</sup> |
|-------------|-------------------|-------------------|------------|------------|-------------------|
| Revenue     | 6,912,000         | 7,200,000         | 10,316,921 | 11,821,612 | 10,164,600        |
| Expenditure | 6,912,000         | 7,200,000         | 9,868,715  | 11,422,064 | 10,065,922        |

<sup>1</sup> Estimates.

On June 30, 1940, the total debt of Bulgaria was given as follows:— Foreign debt: consolidated, 369,873,000 gold francs, 171,783,000 French francs, 3,844,900£ sterling, 16,635,000 dollars, total equivalent to 12,315,921,000 leva; non-consolidated, 1,990,000 dollars, total equivalent to 167,170,000 leva, or a grand total of consolidated and non-consolidated foreign debt of 12,483,091,000 leva. Internal debt: 11,767,514,000 leva (consolidated, 2,529,644,000 leva; non-consolidated, 9,237,870,000 leva).

### Defence.

The pre-war peace strength of the Bulgarian army was about 3,900 officers and 56,000 other ranks. Its war strength was approximately 500,000 men.

Under the terms of the Treaty of Neuilly of November 27, 1919, the total military forces of Bulgaria was not to exceed 20,000 men, enrolled by voluntary system. But by the agreement signed at Salonika on July 31, 1938, between Bulgaria and the Balkan Entente (Rumania, Yugoslavia, Turkey and Greece), the military restrictions imposed on Bulgaria by the Treaty of Neuilly were removed. At the time of Bulgaria's capitulation in the autumn of 1944, her army consisted of 15 divisions, of which 12 were in her own country, while 3 were helping to occupy Northern Greece and Yugoslavia. At present the army is reduced to a peace basis of 39,000 men.

Since May, 1940, military service is compulsory from the age of 17 to 65, and ordinary service is for 2 years.

### Production and Industry.

Agriculture is the chief occupation of the people. Land is held in absolute freehold by the owners and there is a land tax. The communes hold pasture-land and wood-land in perpetuity and pay no rent, and over such lands the members of the communes have grazing and wood-cutting rights. The greater part of the pasture land has been cleared and sown with crops.

According to the census of 1934, 80 per cent. of the active population (2,744,927) were engaged in agriculture, most of them being small proprietors holding from one to six acres. The methods of cultivation are in general primitive, but machinery is being gradually introduced. In the districts where industrial crops are cultivated, such as cotton, flax, hemp and tobacco, intensive cultivation is carried out.

The total area of Bulgaria is 10,314,620 hectares, or 25,488,343 acres; of this the cultivated area is (1938) 4,459,284 hectares, or 11,266,393 acres, and the forest area (1938) 3,333,106 hectares, or 8,236,398 acres (790,331 hectares belonging to the State, 1,922,292 hectares, or 4,750,153 acres, to the municipalities, and 677,610 hectares, or 1,533,268 acres, to others).

The area and yield of cereals for 2 years are given as follows:—

| Cereals | 1937          |                      | 1938          |                      |
|---------|---------------|----------------------|---------------|----------------------|
|         | Area<br>Acres | Yield<br>Metric tons | Area<br>Acres | Yield<br>Metric tons |
| Wheat   | 2,891,079     | 1,537,481            | 3,447,372     | 2,149,674            |
| Rye     | 454,720       | 210,653              | 464,621       | 188,028              |
| Barley  | 530,328       | 319,498              | 557,040       | 353,914              |
| Oats    | 268,987       | 124,016              | 253,091       | 88,691               |
| Maize   | 1,652,689     | 838,748              | 1,730,869     | 532,288              |
| Total   | 5,797,803     | 3,030,391            | 6,552,993     | 3,312,490            |

Fruit grown in abundance, especially in the neighbourhood of Kustendil and Plovdiv. The area under vines was 233,651 acres in 1938. Cotton in 1938 yielded 69,467 quintals, from 135,949 acres. Sugar production in 1938, 19,638 metric tons, the area under beet being 28,956 acres; in 1937 the production was 27,902 metric tons, the area under beet being 25,919 acres; 13,957 acres were under rose cultivation in 1937. Tobacco area in 1938, 76,890 acres, yield, 25,901 metric tons. In 1938, the production of silkworm cocoons was 2,178,767 kilos valued at 99,391,000 leva; in 1937, the production was 1,640,128 kilos valued at 74,558,000 leva.

According to the census of 1934 (latest available) there were in Bulgaria

581,519 horses, 1,497,624 cattle, 8,889,492 sheep, 913,088 goats, 901,976 pigs and 12,772,740 poultry.

Industry is not much developed, though the State encourages industrial enterprise. On January 1, 1939, there were 3,381 undertakings in operation. Mining development has been slow. The country is rich in coal; there are three State mines (at Pefnik, Bobovdol and Maritza), and several privately-owned mines. Total coal production in 1937, 1,852,544 metric tons, of which 1,512,520 tons came from State mines and 340,024 tons from privately-owned mines, compared with 1,678,379 tons (1,862,789 tons from State mines and 315,590 tons from private mines in 1936). In 1937 there were mined the following minerals (in metric tons):—aluminium, 3,548; and salt, 9,745.

### Commerce.

Imports and exports for 5 years:—

|               | 1937                    | 1938                    | 1939                    | 1940                    | 1941                     |
|---------------|-------------------------|-------------------------|-------------------------|-------------------------|--------------------------|

### Shipping and Communications.

Mercantile marine, June 30, 1939, comprises 14 vessels of 17,476 tons.

The number of vessels entered at all the Black Sea ports of Bulgaria in 1939 was 9,311 of 1,776,576 tons; number of vessels cleared, 9,291 of 1,770,484 tons. At all the Danube ports there entered, in 1939, 15,175 vessels of 2,429,642 tons; and cleared, 15,169 vessels of 2,435,013 tons.

In 1939, there were in Bulgaria 19,638 miles of roads.

In 1939, Bulgaria had 1,941 miles of railway of ordinary gauge and 270 miles of narrow gauge; total, 2,211 miles. Number of passengers in 1942, 17,779,300; goods carried (1940), 6,567,000 metric tons. All the lines belong to the State, which works them. Railways connect Sofia with the general European system. In 1939, there were 49 miles of electric tramways.

There were, in 1939, 806 post offices. Total correspondence handled, 66,075,000 letters and postcards, 976,123 parcels. Length of telegraph line (excluding line belonging to the railways) in 1939, 372 miles; number of offices, 798; number of messages, 4,043,000. In 1939 there were 772 telephone stations; length of line, 13,208 miles, number of conversations, 56,909,000, of which 88,000 were international.

### Money and Credit.

The National Bank of Bulgaria, with headquarters at Sofia and branches in the different towns of Bulgaria, has a capital of 500,000 000 leva, provided by the State. It has the sole right of note issue. On January 1, 1940, it had in hand 2,006,000,000 leva in gold, and other assets of 1,758,000,000 leva. The note circulation on December 31, 1942, was 18,920,000,000 leva. There is also a State Agricultural Bank for the purpose of providing cheap credit for the agricultural community. Its capital (1939) was 917,682,000 leva. The Bulgarian International Bank for facilitating and encouraging international trade was established on January 11, 1922. The original capital of this bank was 75,000,000 leva, of which 30,000,000 leva were apportioned to the Bulgarian National Bank and the Bulgarian Agricultural Bank, and the remainder to foreign banks and organisations. Early in 1935 the Bulgarian International Bank was amalgamated with the Bulgarian United Banks under the name Bulgarian Credit Bank. The Bulgarian Co-operative Bank is another State bank founded in 1910. By order of the government on October 18, 1934, the Agricultural Bank of Bulgaria and the Bulgarian Central Co-operative Bank were fused as from December 31, 1934, under the name of Bulgarian Agricultural and Co-operative Bank.

Deposits in the Savings Banks of Bulgaria at November 30, 1942, amounted to 28,640,000,000 leva.

Coins in circulation: silver pieces of 100, 50, and 20 leva; copper-nickel pieces of 10, 5, 2, and 1 leva; copper pieces of 50 stotinki (centimes); the notes of the National Bank circulate at par. The leva has been stabilised at 92 leva to 1 gramme of fine gold, or 678·659 leva = 14 (gold).

The metric system is in general use. On April 1, 1916, the Gregorian calendar came into force in Bulgaria.

### Diplomatic and Consular Representatives.

As, after Bulgaria's signature of the Three Power Pact on March 1, 1941, German troops, with the connivance of the Bulgarian Government, occupied the country in order to use it as a base against British and allied forces, the British Government, on March 5, 1941, broke off diplomatic relations with

Bulgaria, and from December 18, 1941, to October 28, 1944, Great Britain was at war with Bulgaria. After the acceptance by Bulgaria of the armistice terms of the United Nations, Great Britain appointed a 'Political Representative' in Sofia.

*British Political Representative in Sofia.*—W. E. Houstoun-Boswall, C.M.G., M.C. (November 11, 1944).

## CHILE.

(REPÚBLICA DE CHILE.)

### Constitution and Government.

THE Republic of Chile threw off allegiance to the Crown of Spain, constituting a national government on September 18, 1810, finally freeing itself from Spanish rule in 1818.

The following is a list of the Presidents since 1896:—

|                                                                                          |                                                                                        |
|------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------|
| Don Federico Errázuriz, Sept. 18, 1896—Sept. 18, 1901.                                   | Don Emiliano Figueroa Larraín, Dec. 23, 1925—May 6, 1927. <sup>a</sup>                 |
| Don Germán Riesco, Sept. 18, 1901—Sept. 18, 1906.                                        | Gen. Don Carlos Ibañez (Acting, then elected), May 6, 1927—July 26, 1931. <sup>a</sup> |
| Don Pedro Montt, Sept. 18, 1906—Aug. 16, 1910. <sup>1</sup>                              | Don Pedro Opazo (Acting), July 26, 1931—July 27, 1931. <sup>a</sup>                    |
| Don Elias Fernandez Albano (Acting), Aug. 16, 1910—Sept. 6, 1910. <sup>1</sup>           | Don Juan Esteban Montero (Acting), July 27, 1931—Aug. 18, 1931. <sup>a</sup>           |
| Don Emiliano Figueroa Larraín (Acting), Sept. 6, 1910—Dec. 23, 1910.                     | Don Manuel Trucco (Acting), Aug. 18, 1931—Nov. 15, 1931.                               |
| Don Ramón Barros Luco, Dec. 23, 1910—Dec. 23, 1915.                                      | Don Juan Esteban Montero, Nov. 15, 1931—June 4, 1932. <sup>a</sup>                     |
| on Juan Luis Sanfuentes, Dec. 23, 1915—Dec. 23, 1920.                                    |                                                                                        |
| Don Arturo Alessandri, Dec. 23, 1920—Sept. 10, 1924. <sup>2</sup>                        | <i>Junta appointed.</i>                                                                |

By the Constitution of October 18, 1925, legislative power is vested in the National Congress, consisting of the Senate and the Chamber of Deputies, both of which are elected by direct popular vote. The Senate consists of 45 members, elected for eight years, who represent 9 provincial groups of departments. Each group elects five senators. One-half the Senate is renewable every four years. The Chamber of Deputies consists of 143 members elected for four years by departments or groups of departments, one member for every 30,000 inhabitants or fraction of not less than 15,000. The Belgian system of proportional representation prevails. For presidential and congressional elections electors are all male citizens of 21 years of age or over, who are able to read and write; electorate (1937) numbers 495,648. For municipal elections women and foreigners (of 5 years' residence) are eligible to vote. All voting is by ballot. Congress sits from May 21 to September 18. The President is elected for six years, by direct popular vote, but is not eligible for re-election. He has a modified veto; a bill which he has vetoed may, by a two-thirds vote of the members of both Chambers (a majority of the members being present), be sustained and become law. The validity of all elections of President, Deputies and Senators is determined by a special body called *Tribunal Calificador*, consisting of five members chosen by lot from past-presidents or vice-presidents of the Chamber and Senate, members of the Supreme Court, and members of the Court of Appeal of the city where Congress meets. The capital is Santiago, founded on February 12, 1541.

On January 20, 1943, Chile broke off diplomatic relations with Germany, Italy and Japan, and on May 18, 1943, with Bulgaria, Hungary, Vichy France and Rumania; on February 14, 1945, Chile announced a state of war with Japan and joined the United Nations.

*President of the Republic.*—Don Juan Antonio Ríos, elected February 2, 1942 (his 6-year term began on April 1, 1942); born November 10, 1868.

The salary of the President is fixed at 84,000 pesos.

The President is assisted by nine Ministers of State, who constitute a Cabinet and who are responsible to him. The Constitution of 1925 made the Cabinet a unit, i.e. the individual Minister whose proposals were modified or rejected by the National Congress was no longer compelled to resign. Ministers may speak in Congress but do not vote.

#### LOCAL GOVERNMENT.

For the purposes of local government the Republic is divided into Provinces, presided over by *Intendentes*; and the Provinces into Departments, with *Gobernadores* as chief officers, appointed by the President. The Departments constitute one or more municipal districts each with a council or municipality of 5 to 15 members, elected for three years. The Government in 1934 took over control of the finances of the 70 Departments, to safeguard a loan made to them in New York of 15 million dollars.

#### Area and Population.

Chile is divided into 25 provinces. All provinces except three extend from the Pacific to the international boundary, while the inter-provincial boundaries in most cases now follow watersheds instead of rivers, thus confining within one province the waters of a single system and avoiding jurisdictional disputes.

For an account of the dispute between Chile and Peru regarding the provinces of Tarapacá and Tacna-Arica, see *THE STATESMAN'S YEAR-BOOK* for 1931, p. 718.

The present areas of these various provinces and their populations, as determined by the censuses of 1930 and 1940, are as follows:—

| Provinces     | Area :<br>Sq. Miles<br>(1940) | Popula-<br>tion 1940<br>(Census) | Pop.<br>1930<br>(Census) | Provinces    | Area :<br>Sq. Miles<br>(1940) | Popula-<br>tion 1940<br>(Census) | Popula-<br>tion 1930<br>(Census) |
|---------------|-------------------------------|----------------------------------|--------------------------|--------------|-------------------------------|----------------------------------|----------------------------------|
| Tarapacá .    | 21,340                        | 104,097                          | 118,331                  | Cautín .     | 5,705                         | 374,659                          | 315,364                          |
| Antofagasta . | 47,502                        | 145,147                          | 178,766                  | Valdivia .   | 7,721                         | 191,642                          | 149,039                          |
| Atacama .     | 30,834                        | 84,312                           | 61,098                   | Chiloé .     | 9,058                         | 101,706                          | 92,944                           |
| Coquimbo .    | 15,897                        | 245,609                          | 198,336                  | Aysén .      | 34,348                        | 17,014                           | 8,515                            |
| Aconcagua .   | 3,959                         | 118,040                          | 108,054                  | Magallanes . | 52,271                        | 48,801                           | 37,918                           |
| Santiago .    | 5,567                         | 1,361,717                        | 967,603                  | Valparaíso . | 1,800                         | 425,065                          | 360,490                          |
| Colchagua .   | 3,422                         | 138,08                           | 126,408                  | Curicó .     | 2,214                         | 81,185                           | 75,035                           |
| O'Higgins .   | 2,745                         | 200,297                          | 170,586                  | Linares .    | 3,790                         | 134,968                          | 123,085                          |
| Talca .       | 3,721                         | 157,141                          | 142,219                  | Malleco .    | 5,511                         | 154,174                          | 135,825                          |
| Maule .       | 2,173                         | 70,497                           | 74,553                   | Llanquihue . | 7,005                         | 117,325                          | 91,651                           |
| Ñuble .       | 5,485                         | 243,185                          | 231,390                  | Osorno .     | 3,866                         | 107,341                          | 87,086                           |
| Concepción .  | 2,201                         | 308,341                          | 267,323                  |              |                               |                                  |                                  |
| Arauco .      | 2,232                         | 66,107                           | 61,074                   |              |                               |                                  |                                  |
| Bio-Bio .     | 4,342                         | 127,312                          | 113,988                  | Total .      | 286,222                       | 5,023,539                        | 4,287,445                        |

Estimated population on May 31, 1943, 5,191,027.

Many islands to the north, west, and south belong to Chile. The coast-line is about 2,485 miles in length; the average width of the country, 110 miles.

In the census of 1930, 2,122,709 were males and 2,164,736 females, and 49.4 per cent. were urban; 1,337,814 or 31 per cent. were gainfully employed. Foreigners included in the census of 1930 numbered 105,463, of whom Spaniards, with 23,439, formed the largest group. The great majority of the population is of European origin. The indigenous inhabitants are of three branches, the *Fuegians*, mostly nomadic, living in or near Tierra del Fuego; the *Araucanians* (98,703) in the valleys or on the western slopes of the Andes; the *Changos*, who inhabit the northern coast region and work as labourers.

The two leading cities, with census population in 1940, are Santiago, 639,546, and Valparaíso, 215,614. Other towns with census population in 1940 are:—Concepción, 92,364; Temuco, 84,696; Viña del Mar, 70,013; Chillán, 61,535; Talca, 56,735; Antofagasta, 51,107; Valdivia, 49,481; Talcahuano, 41,536; Iquique, 39,232; Magallanes, 33,134. Punta Arenas, on the Straits of Magellan, with a population of about 25,000, is the most southern city in the world. A severe earthquake on January 24, 1939, destroyed with great loss of life the towns of Chillán, San Carlos and Bulnes, and damaged Talca, Concepción, Cauquenes and others.

Births in 1940, 166,593; marriages, 42,187; deaths, 107,771. There is no divorce.

#### Religion.

The Roman Catholic religion was maintained by the State until 1925, when the church was disestablished. There is one archbishop (Santiago), 15 bishops, and two vicars apostolic. There were in 1931, 1,239 churches and chapels.

#### Education.

Education is gratuitous and at the cost of the State, and since August 26, 1920, compulsory for at least six years in the cities and four years in the rural districts. A decree issued February, 1928, makes it compulsory for all children between the ages of 7 and 15. There were in 1939, 4,757 public and private primary schools with 611,494 pupils; 10 public and private normal schools with 1,764 pupils; 253 public and private secondary schools with 43,424 pupils; 25 commercial schools with 6,441 pupils. In all there are 151 schools giving special instruction to 32,176 pupils. Professional and secondary instruction is provided in the State University of Chile (founded in 1842, with 4,774 students in 1938-39, of whom 509 were foreigners), the Catholic University at Santiago (934 students), the National Institute of Santiago, the University of Concepción, and in the lyceums and colleges established in the capitals of provinces, and in some departments. A school of technology was opened at Valparaíso (Universidad Industrial de Valparaíso). There were 6,448 university students (1939).

There are (1939) 1,195 newspapers and journals published in Chile, including 88 dailies and 254 weeklies.

#### Justice and Crime.

There are, in addition to a High Court of Justice in the capital, eight Courts of Appeal distributed over the Republic, Tribunals of First Instance in the departmental capitals, and second class judges in the subdelegations. The police force had (1939) 15,949 officers and men; it is organised and regulated by the President of the Republic.

## Finance.

In recent years the revenue and expenditure were as follows (in paper pesos equal to 5·169 cents, U.S.):—

| Year | Revenue       | Expenditure   | Year              | Revenue       | Expenditure   |
|------|---------------|---------------|-------------------|---------------|---------------|
|      | Paper Pesos   | Paper Pesos   |                   | Paper Pesos   | Paper Pesos   |
| 1929 | 1,792,528,955 | 1,777,882,738 | 1942              | 2,953,776,867 | 3,051,988,814 |
| 1940 | 2,051,560,534 | 2,201,821,184 | 1943              | 3,737,648,844 | 3,959,782,884 |
| 1941 | 2,299,693,426 | 2,564,794,804 | 1944 <sup>1</sup> | 4,089,864,383 | 4,472,099,162 |

<sup>1</sup> Preliminary figures.

The principal items of expenditure in the 1944 Budget were (in millions of pesos): national defence and aviation, 1,090; Ministry of Interior, 592; Treasury, 565; education, 515; health, 341. Chief sources of revenue were: taxes, 2,939; national services, 231; national properties, 50.

Funded external debt, December 31, 1943 (after allowance for bonds purchased and cancelled), amounted to 27,741,071*l.*, 157,034,000 dollars, U.S., and 108,662,500 Swiss francs. On December 31, 1941, total internal debt was 1,752,000,000 pesos; short-term or banking debt (domestic and foreign) amounted to 383,300,000 pesos and foreign debt to 1,909,800,000 pesos. In addition the Government had guaranteed the service of loans amounting to 1,164,000,000 pesos. Service on the external funded debt is derived from the Government's income from the Chilean Nitrate and Iodine Corporation, and from the income tax on copper; this amounted in 1944 to 6,624,758 dollars (U.S.), of which one-half was applied to the payment of interest (2*s.* 6·24*d.* or approximately 1½ per cent. per annum); some of the remainder was utilized for the purchase of outstanding bonds. Nominal or par value of bonds purchased for cancellation in 1943 was 5,702,500 dollars (U.S.) and 1,400*l.* American dollar loans to Chile, end of 1941, amounted to 178,900,000 dollars, of which 75·8 per cent. were in default. American direct investments, 1940, were 413,983,000 dollars of which nearly two-thirds were in copper and nitrates. British investments, end of 1944, were 50,193,610*l.*, of which 24·7 per cent. were in default.

## Defence.

## ARMY.

The Chilean Army is a national militia in which all able-bodied citizens are obliged to serve. Liability extends from the 20th to the 45th year, inclusive. Recruits are called up in their 20th year, and are trained mostly for nine months. Afterwards they serve for 12 years in the reserve of the active army, after which they belong till the completion of their 45th year to the second reserve. The latter is organised as a second-line army.

Chile is divided into 4 zones or military districts, each of which furnishes a complete division on mobilisation. The army is organised in 4 divisions and a cavalry division, divided into 3 brigades, comprising: 12 regiments and 4 mountain infantry battalions, 6 cavalry regiments, 4 field artillery regiments, 1 heavy artillery group and 6 mountain artillery groups, 4 engineering battalions (pontons, sappers and communications), 1 regiment of railway troops, 1 regiment of heavy-bridge engineers, 2 mixed detachments and other troops.

In 1941 a special Defence Law was passed, voting an amount of 4,000 million pesos for rearmament. During 1943 various motorized divisions were created, and the total Army strength in that year was 1,800 officers and 725,000 other ranks.

## AIR FORCE.

The Chilean Air Force was greatly expanded during 1943, being increased to 4 brigades, 1 for each military zone, equipped with chiefly American material.

## NAVY.

The principal vessels of the Chilean fleet are as follows:—

| Name                           | Launched | Displacement, Tons | Extreme Armouring, Inches | Main Armament                | Torpedo Tubes | Indicated Horse-Power | Nominal Speed |
|--------------------------------|----------|--------------------|---------------------------|------------------------------|---------------|-----------------------|---------------|
| <i>Battleship:</i>             |          |                    |                           |                              |               |                       |               |
| <i>Almirante Latorre</i> . . . | 1913     | 28,000             | 10                        | 10·14-in.; 14·6-in.; 4·4-in. | 4             | 37,000                | 23            |
| <i>Cruisers:</i>               |          |                    |                           |                              |               |                       |               |

The *Almirante Latorre* served in the British Fleet during the 1914–18 war as the *Canada*, and in 1930–31 was refitted and modernised at Devonport Dockyard under a contract between the Chilean Government and the Admiralty. The construction of 2 cruisers of 3,000 tons was approved in 1939, but no contracts have yet been placed. There are 8 large destroyers, 9 submarines, 2 coast defence ships, a surveying vessel, various training and auxiliary vessels, a submarine depot ship (the *Araucano*), and two oil tankers, all built in England. The active strength of the Navy is normally about 8,000 men.

## Agriculture, Mining and Industry.

There are three zones in Chile—the arid zone in the north, which for many years furnished the world's entire supply of natural nitrate of soda, 90 per cent. of its iodine and 18 per cent. of copper consumed; the agricultural zone in the centre; and the forest zone in the south. Total area of agricultural land (1936) was 60,219,583 acres; of forest land, 8,671,051 acres; of fruit trees and vines, 459,872 acres; of meadows, 12,393,677 acres. Number of farms in 1937, 201,997. Area planted with cereals in 1942, 2,234,930 acres. The import, export and marketing of wheat is controlled by a State Board. Rice output, 1941–42, was 631,701 metric hundredweight, the largest in the country's history. Chile produces excellent wine (output in 1940, 323,689 gallons, and exports in 1941, 346,720 gallons, chiefly to Latin America, especially Ecuador). Fruit, largely for export to European markets, is normally important. The principal crops of the harvest for 3 years are shown as follows:—

|                    | Hectares |         |         | Produce in Metric Cwts. |           |           |
|--------------------|----------|---------|---------|-------------------------|-----------|-----------|
|                    | 1938–39  | 1939–40 | 1940–41 | 1939–40                 | 1940–41   | 1941–42   |

| Potatoes . . . . . | 54,026   | 46,444  | 53,528  | 4,169,477               | 4,278,779 | 5,215,088 |

Valparaíso, Talcahuano, Valdivia, Puerto Montt, Magallanes (formerly known as Punta Arenas), and Quilicura (near Santiago). The first international radio station was opened at Quilicura in 1928. A wireless station has been erected on the Juan Fernandez Islands, about 400 miles west and south of Valparaíso. There are 3 large broadcasting stations.

### Banking and Credit.

In January, 1926, the Government opened at Santiago the Central Bank of Chile, authorized to issue a new peso, value 6d., to be the basis of a new national currency; gold payments were re-established. On July 31, 1944, the Central Bank had gold amounting to 273,000,000 pesos, against notes of 2,302,000,000, bank deposits of 419,000,000 pesos and other deposits of 150,000,000 pesos. Since 1936 the bank's gold stock has risen from 29,000,000 dollars, U.S., to 56,000,000 dollars in July, 1944. The country's gold production, sold to the Central Bank, has ranged from 9,018,000 dollars in 1936 to 11,999,000 in 1940, falling to about 5,900,000 in 1944. In December, 1941, a bill was passed providing for the revaluation of the Central Bank's monetary reserves in paper pesos instead of gold pesos, but opposition has prevented the proposed change.

On May 31, 1943, the total deposits in the commercial banks stood at 3,366,600,000 pesos, compared with 2,608,900,000 pesos the previous year, while their total loans stood at 3,458,200,000 pesos, compared with 3,042,400,000 pesos.

The Caja Nacional de Ahorros (founded in 1884) has a monopoly of savings accounts; on May 31, 1943, its 131 branches had savings deposits amounting to 2,153,200,000 pesos.

### Money, Weights and Measures.

The monetary unit is the gold *peso*, containing 0.18357 grammes of fine gold, with, originally, a par value of 6d. sterling gold or 12.17 cents U.S. (old U.S. gold dollar; now worth 20.6 cents U.S.). £1 sterling therefore equalled at par, 40 gold pesos. Ordinarily no gold circulates, but in December 1943 the Government agreed to mint a gold coin (for the commercial bourses) valued at 1,000 pesos and containing 20 grammes of fine gold. Taking the £ to be equal to 100 pesos, this makes the Chilean value of gold about £15 10s. per fine ounce. The silver coinage was mainly one coin, the peso, with formerly a fine silver content of 2.4 grammes, but in 1934 pesos of nickel (25 per cent.) and copper (75 per cent.) replaced the silver pesos. In April, 1932, the convertibility of the currency was suspended, and the gold value of the peso was fixed, nominally, at 0.091529 grammes of fine gold, equal to 3d. gold; on December 31, 1934, it was further devalued to 1½d. gold, equal to 96 pesos to the paper pound. However, imports and exports are still valued in the old peso at 6d. gold. Foreign exchange is controlled by the Central Bank. Average rate in New York, 1934, was 10.145 cents; 1936, 5.124 cents; 1938, 5.170 cents; 1939, 5.170 cents; 1940, 5.167 cents; 1941, 5.166 cents; 1942, 1943 and 1944, unquoted. In London, the average, 1934, was 121.84 to the £; 1935, 118.92; 1936, 130.80; 1937, 126.84; 1938, 117.45. In 1943 the special account rate on London was 100.625-101.350 to the £. There are nickel-copper coins of 1, 0.20, 0.10 and 0.05 peso. Actually the currency in circulation is chiefly paper issued by the Central Bank, in denominations of 10,000, 5,000, 1,000, 500, 100, 50, 10 and 5 pesos. From 1934 to the outbreak of the war the conversion rate of the gold peso was around 24 to the £; subsequently it has been around 20 to the £.

The metric system has been legally established in Chile since 1865, but the old Spanish weights and measures are still in use to some extent. Greenwich time has been adopted in place of Chilean time.

### Diplomatic and Consular Representatives.

#### 1. OF CHILE IN GREAT BRITAIN.

*Ambassador Extraordinary and Minister Plenipotentiary.*—Don Manuel Bianchi Gundian (appointed March 19, 1941, to be Ambassador also to France and Minister to Belgium).

*Counsellor.*—Leon Subercaseaux.

*Secretaries.*—Guillermo Rossel, Hefren Silva and Jose Antonio Gandarillas.

*Financial Adviser.*—Julio Bittencourt.

*Naval Attaché.*—Captain Roberto Gilmore.

*Military Attaché.*—Colonel Antonio Tovariás.

*Air Attaché.*—Group-Captain Raul Gonzalez.

*Consul-General in London.*—Humberto Videla Jara.

There are Consular representatives at Liverpool, Dublin, Glasgow and Southampton.

#### 2. OF GREAT BRITAIN IN CHILE.

*Ambassador Extraordinary and Minister Plenipotentiary.*—Sir Charles William Orde, K.C.M.G. (appointed March 4, 1940).

*Naval Attaché.*—Captain A. C. W. Domville, R.N.

*Military Attaché.*—Lt.-Col. G. O. Simson.

*Air Attaché.*—Wing-Commander N. R. Dobree.

*Commercial Secretary.*—A. J. Pack, O.B.E.

*Consul-General at Valparaíso.*—H. H. Cassells, C.B.E., M.V.O.

There are Consular representatives at Antofagasta (C.), Arica (V.C.), Concepción (C.), Iquique (V.C.), Magallanes (C.), Santiago (C.), Tocopilla (V.C.), and other centres.

*Edwards (A.), My Native Land.* (History, description and culture of Chile.) London, 1928.—The Dawn (covering the 50 years' period to 1841). London, 1930.

Cattle in 1942 numbered 2,346,384; sheep in 1936, 5,749,069 on 83,956 ranches; horses, 527,827; asses and mules, 93,525; swine, 571,493. Exports of wool in 1941, 11,183 metric tons.

In Patagonia and Tierra del Fuego large tracts of country are devoted to sheep-farming, largely by British subjects; there are about 2,800,000 sheep, chiefly Corriedales. Magallanes has also begun the breeding of fine-furred animals, especially foxes, for their pelts. Extensive natural forests are found, the largest in the provinces of Valdivia, Llanquihue and Chiloé. Timber production amounts to about 165,400,000 square feet. About 2,500 tons of *guilay* (soap) bark is produced annually, mostly for export. Digitalis, both wild and cultivated, flourishes in Southern Chile.

The wealth of the country, however, consists chiefly in its minerals, especially in the northern provinces of Atacama and Tarapacá. The metals are gold, chiefly obtained by 'washings' (187,835 fine ounces in 1942), silver (905,140 fine ounces in 1942), copper, cobalt, zinc, molybdenum, tungsten and manganese; the non-metallic substances being coal, nitrate, borate, salt, sulphur (about 25,000 tons per year) and guano. Chile's copper reserves are 36.8 per cent. of the world's reserves. Marble and onyx are mined. Exports of fresh bird guano (like that from Peru) are forbidden, but exports of fossilized guano, mainly from the one-time famous beaches south of Iquique, sprang up in 1934. Iron-ore deposits are found in the provinces of Atacama and of Coquimbo, estimated at over 1,000,000,000 tons. Coal production in 1943, 2,227,000 tons. Reserves total 2,000,000,000 metric tons, partly low in thermal unit. Cement output, 1942, 364,584 tons.

Nitrate of soda, or 'salitre,' is an important article of export and usually a substantial source of governmental revenue. It is found in the section of the desert of Atacama some 450 miles long and from 5 to 40 miles wide, known locally as the 'pampa salitrera,' and situated from 4,000 to 7,500 feet above sea level. There are 152 nitrate works or oficinas with a productive capacity of 58,136,000 quintals. Three large producers furnish 90 per cent. of total output. Capital is mostly British and American. Exports, 1941, 1,270,479 tons, valued at 114,343,142 gold pesos. The industry was reorganised by the Government on January 8, 1934; in July, 1935, it joined the International Nitrate Cartel (dissolved in August, 1939). In 1910, with output of 420,964 tons, Chile furnished 64 per cent. of world production, but in recent years its share has fallen to 8 per cent. owing to the competition of synthetic and by-product nitrogen. About 66 per cent. of the world's supply of iodine is a by-product of the Chilean nitrate oficinas; exports, 1941, were 896,583 kilos, valued at 8,965,835 gold pesos.

The textile industry consumes almost the entire wool clip of the central and south-central zones; it supplies 85 per cent. of the country's consumption of silk and rayon fabrics; it employs about 22 per cent. of the working population.

### Commerce.

Imports and exports (including re-exports and including bullion and specie) (1 gold peso = 6d. gold or 20.6 cents U.S.):—

|               | 1939                      | 1940                      | 1941                      | 1942                      | 1943                      |
|---------------|---------------------------|---------------------------|---------------------------|---------------------------|---------------------------|
| Imports . . . | Gold Pesos<br>410,745,100 | Gold Pesos<br>507,110,400 | Gold Pesos<br>523,250,868 | Gold Pesos<br>622,300,000 | Gold Pesos<br>687,300,000 |
| Exports . . . | 671,354,512               | 696,727,900               | 781,504,406               | 862,900,000               | 867,300,000               |

Imports from the United States in 1943 were valued at 237,700,000 gold pesos (37.3 per cent. of the total), from Peru 142,700,000 (22.4 per cent.), from Argentina 108,900,000 (17.1 per cent.), from Brazil 62,900,000 (9.3 per cent.), and from Great Britain 44,600,000 (7.0 per cent.). Exports to the United States were valued at 594,400,000 gold pesos (67.7 per cent.), Argentina 36,700,000, Brazil 33,700,000 and Great Britain 19,900,000 gold pesos.

Mining products furnished 70 per cent. of exports in 1943, food products 4 per cent. and wool 3 per cent.

Total trade between Chile and United Kingdom for 5 years (Board of Trade figures):—

|                                 | 1934           | 1935           | 1936           | 1937           | 1938           |
|---------------------------------|----------------|----------------|----------------|----------------|----------------|
| Imports from Chile to U.K. . .  | £<br>5,236,832 | £<br>5,179,357 | £<br>5,239,659 | £<br>9,368,092 | £<br>7,867,749 |
| Exports to Chile from U.K. . .  | £<br>1,448,076 | £<br>2,051,202 | £<br>1,746,447 | £<br>1,903,604 | £<br>1,639,866 |
| Re-exports to Chile from U.K. . | £<br>43,189    | £<br>40,635    | £<br>24,492    | £<br>34,372    | £<br>26,149    |

United Kingdom exports to Chile (Board of Trade returns) since 1938 have been: 1939, 1,503,000£.; 1940, 2,875,000£.; 1941, 1,209,000£.; 1942, 1,428,000£.; 1943, 2,027,000£.; 1944, 799,000£. Totals for the first three years include shipments of war supplies, if any, by Government departments.

### Shipping and Navigation.

The commercial shipping of Chile consisted, on June 30, 1940, of 106 steamers, motor-driven vessels and sailing vessels of 160,232 tons gross. Valparaíso is the chief port. Coastal shipping in 1942 carried 1,631,000 tons of freight. In the overseas trade, 1942, 768 vessels of 2,143,000 net tons entered and cleared the ports of Chile.

### Communications.

In 1939, there were in Chile 24,855 miles of highways, of which 7,146 miles were earth roads, 9,321 miles of sand and clay or gravel, 7,456 miles of crushed stone and 932 miles of concrete or asphalt. About 19,378 are fit for motor traffic. There were (1940) 33,704 automobiles and 16,464 trucks and motor-buses. There are 851 miles of navigable river, and 497 miles of navigable lakes.

The total length of railway lines amounts to 5,200 miles; private railway lines, principally British-owned (1941) amounted to 1,369 miles. The Chilean Transandine Line is now part of the State Railway system. A new line 550 miles long, connecting Salta, in Argentina, with Antofagasta, is (1943) under urgent construction. The first locomotive built in Chile went into service in 1943. Electrification of the railways is proceeding. Aviation is highly developed between interior points and abroad; a plant for the manufacture of aeroplanes was established in 1930. There are 6 civilian and 2 government airports. Commercial aeroplanes covered 358,493 miles and carried 2,733 passengers in 1940.

The 1,107 post-offices and agencies dispatched, in 1940, 108,852,730 postal pieces. The length of telegraph lines in 1940 was 10,869 miles. In 1940, there were 488 telegraph offices, and 284 telephone exchanges with 68,893 subscribers; in 1941 there were 90,943 instruments in use. The largest telephone company is American owned.

A chain of wireless stations along the coast for shore-to-ship transmission is operated by the Navy; stations are at Arica, Antofagasta, Coquimbo,

both countries indicated that the question was to be settled shortly by treaties. The treaties were signed in Chungking and Washington respectively on January 11, 1943, and ratified on May 20, 1943. The Governments of the Netherlands and of Belgium took like action in 1943 (Belgium on October 20). This constitutes complete recognition of China's sovereignty.

On July 7, 1937, fighting broke out between Chinese and Japanese troops, resulting in a local clash for which each side blamed the other. Without declaring war Japan invaded China and by March, 1945, was in occupation of 10 Chinese provinces, as well as having footholds in the 3 southern provinces of Fukien, Kwangtung and Kwangsi, totalling an area of some 440,000 sq. miles, or 11 per cent. of the whole area of China and its dependencies. Japan also controlled the 4 greatest cities in China—Shanghai, Tientsin, Hankow and Canton.

The Japanese, on March 30, 1940, set up a so-called 'National Government of the Republic of China' at Nanking. On November 30, 1940, 'a treaty of basic relations between China and Japan' was signed. The treaty and the annexed documents in actual and implicit terms gave Japan virtual military and economic control over China for an indefinite period. Wang Ching-wei, in a joint declaration by China, Japan and Manchukuo, recognised Manchukuo. On July 1, 1941, the Nanking Government received *de jure* recognition by Germany, Italy, Bulgaria, Rumania, Slovakia, Croatia, Spain and Hungary. In consequence the Chinese Government severed diplomatic relations with Germany and Italy.

### Religion.

Three religions are acknowledged by the Chinese as indigenous and adopted, viz. Confucianism, Buddhism and Taoism.

With the exception of the practice of ancestral worship, which is everywhere observed throughout the Republic, and was fully commended by Confucius, Confucianism has little outward ceremonial.

Buddhism and Taoism present a very gorgeous and elaborate ritual in China, Taoism—originally a pure philosophy—having abjectly copied Buddhist ceremonial on the arrival of Buddhism 1,800 years ago. Most Chinese (not Mohammedans or Christians) profess and practise all three religions.

Mohammedans are found in every province of China, being most numerous in Yunnan, Shensi, Kansu, Hopei, Honan, Shantung, Szechuan, Sinkiang, and Shansi. The total for China, including Manchukuo (7,583,680), is estimated at over 48,000,000, with over 42,000 mosques (6,570 in Manchukuo).

Roman Catholicism has had a footing in China for more than three centuries. Protestant Missions date from 1807. Attached to Protestant Missions in 1934 were 19 colleges of university standing, 267 middle schools, with 37,714 pupils. Under Christian instruction were 239,655 pupils.

Most of the aboriginal hill-tribes are still nature-worshippers, and ethnically are distinct from the prevailing Mongoloid population. There is also a colony of Chinese Jews in K'ai-feng, capital of Honan.

### Education.

There are two kinds of primary schools, the higher lasting two years, and the lower four years. The period of compulsory education is six years, from the age of 6 to 12. But provinces in the country differ widely in carrying out compulsory education. The figures for primary education in China available for 1941-42 were 232,145 primary schools with 551,390 teachers and 19,490,092 scholars.

Secondary education comprises the middle school, of two grades; the

junior middle school and the senior middle school, each of three years; the normal school and the vocational school. Number of schools in 1941-42 was 2,606; number of teachers, 52,700; number of pupils, 768,590. Secondary education is a function of the provincial governments, under the supervision of the Ministry of Education.

Institutions of higher education in China are of three types: full-fledged universities, independent colleges, and technical schools of junior college standing. In 1941-42 the total number of institutions of higher education in China was 182, of which 46 were universities, 37 colleges and 47 technical schools; 33 of them are supported by the National Government. The total number of students for the whole country in 1941-42 was 57,858; the number of teachers, 8,666. Budget expenditure for higher education, 1941-42, 91,196,556 yuan.

### Justice.

A provisional Criminal Code was drawn up in the closing year of the Ch'ing dynasty, and proclaimed on March 10, 1912, the first year of the Republic. Since then three codes have been drawn up and revised—the Code of Civil Procedure, the Commercial Code, and the Code of Criminal Procedure. The work of drawing up and revising the new Codes is undertaken by the Law Codification Commission, which is also engaged in the drafting of commercial laws.

The Judicial Yuan, the highest judicial authority of the land, was established on November 16, 1928. This Yuan is composed of the Supreme Court, the Administrative Court, the Commission of the Disciplinary Punishment of Officials, and the Ministry of Justice. The last mentioned has charge over all matters relating to the administration of justice. It has established over 50 new courts throughout the country, carried out vast improvement of prisons, and drafted many codes and laws.

### Finance.

Receipts and disbursements (ordinary revenue and expenditure) of the National Government, for 5 years, from July 1 to June 30 are shown as follows:—

|             | 1934-35 *   | 1935-36     | 1936-37 <sup>1</sup> | 1937-38 <sup>1</sup> | 1938 <sup>2</sup> |
|-------------|-------------|-------------|----------------------|----------------------|-------------------|
|             | Dollars     | Dollars     | Dollars              | Dollars              | Dollars           |
| Revenue     | 744,922,042 | 762,041,299 | 758,822,155          | 879,616,858          | 2,850,800,000     |
| Expenditure | 940,928,456 | 734,572,588 | 754,068,198          | 949,740,543          | 2,850,000,000     |

\* Estimates.

<sup>1</sup> January to December.

Since January 1, 1938, the fiscal year runs with the calendar year.

For estimated revenue and expenditure for 1937-38 see THE STATESMAN'S YEAR-BOOK, 1939, pp. 776-7.

The customs receipts for 2 years were (in Chinese dollars):—1939, 831,320,000; 1940, 475,740,000.

The Salt Revenue returns (latest available) for two years are (in Chinese dollars): 1935, 184,209,300; 1936, 205,433,000.

Following the initiative of the United States of America in returning to China her share of the 1900 Indemnity, commonly known as 'boxer indemnity,' Great Britain exchanged Notes with China on September 19 and September 22, 1930, by which it was agreed that Great Britain should also return her share of the 1900 Indemnity as from December 1, 1922, to the control of the Chinese Government, stipulating that the bulk of the funds thus remitted be devoted to railway building and educational purposes.

## CHINA.

(CHUNG-HUA MIN-KUO, i.e. REPUBLIC OF CHINA.)

### Government.

ON February 12, 1912, China, one of the oldest of Monarchies, became a Republic. For account of the Revolution of 1911, see THE STATESMAN'S YEAR-BOOK for 1912, pp. 699-701, and for later developments, see THE STATESMAN'S YEAR-BOOK for 1919, pp. 740-41, for 1928, p. 734, and for 1937, p. 766.

The National Government at Chungking is a Committee form of Government, appointed by, and responsible to, the Kuomintang, or National People's Party (of China), acting, during the period of Educative Government (or Political Tutelage), in theory at least, as trustees of the people. According to the 'Law Governing the Organisation of the National Government of the Republic of China,' commonly but inaccurately known as 'Organic Law of China,' which the Kuomintang promulgated on October 4, 1928, and vitally amended in December, 1931, and December, 1932, the National Government is composed of the National Government Council, sometimes also known as State Council, the Chairman of which is known as President of the National Government and occupies the position of Head of

State. The members of this Council are disqualified from holding any concurrent posts. From the more strictly political point of view, the National Government means the five *Yuan* (Councils) under the National Government Council—Executive, Legislative, Judicial, Examination and Supervisory. The Executive Council is the highest executive organ of the National Government. It establishes Ministries to which are entrusted various executive duties, and it may appoint commissions for specified executive matters. The Executive Council, or *Yuan* thus occupies a similar position as the Cabinet in Western countries, its Chairman being virtually a Prime Minister—the Head of the Government of the day.

The Council has the authority to decide all matters which cannot be settled between two or more of the *Yuan*. The permanent Constitution was drafted and adopted by the Legislative *Yuan* on October 16, 1934, and was revised again by this *Yuan* on October 25, 1935. It was then decided by the First Plenary Session of the Fifth Central Executive and Supervisory Committees on December 4, 1935, that the Draft Constitution of the Chinese Republic should be published on May 5, 1936, and that a People's Assembly convoked on November 12, 1936, for the final adoption of the Draft Constitution.

The Legislative Council is the highest legislative organ. It has power to decide upon legislation, budgets, amnesties, declarations of war, negotiations for peace, the conclusion of treaties, and other important international matters. It has a President and Vice-President, and is composed of between 49 and 99 members appointed by the National Government at the instance of the President of the Legislative Council. The term of office is two years, and members may not concurrently be non-political administrative officials of the various organs of the Central or local Governments.

The Judicial Council is the highest judicial organ, and takes charge of judicial trial, judicial administration, disciplinary punishment of officials and trial of administrative cases. The granting of pardons, reprieves, and restitution of civil rights may be submitted by the President of the Judicial Council to the National Government for approval and action.

The Examination Council is the highest examination organ, and takes charge of examinations and determines qualifications for the public service. All public functionaries are appointed only after they have passed an examination and their qualifications for the public service have been determined by the Examination Council.

The Supervisory Council is the highest supervisory organ, and exercises the powers of impeachment and auditing. It has a President and Vice-President, and is composed of from 19 to 29 members who are appointed by the National Government at the instance of the President of the Control Council.

During the war there came into existence the People's Political Council, which has met in July 1938, March 1941 and October 1942. It is a war-time semi-legislative assembly, acting till the formal election of the National Congress. The Council consists of 240 members.

*President of the National Government of China and Commander-in-Chief.* General Chiang Kai-shek (elected September 13, 1943). Born October 31, 1883.

There is also a Cabinet of Ministers, appointed on December 12, 1935, and reorganized on November 20, 1944, as follows—

*President of the Executive Yuan.*—T. V. Soong (December 4, 1944).

*Minister of Finance.*—O. K. Fui (November 20, 1944).

*Minister of Foreign Affairs.*—T. V. Soong.

Chinese Eastern Railway), of which about 1,800 miles have been constructed by British enterprise and British capital.

The principal railways in China are:—(1) Peiping-Hankow Railway, 814 miles; (2) Tientsin-Pukow Railway, 686 miles; (3) Canton-Hankow Railway, 768 miles; (4) Peiping-Mukden Railway, 832 miles, including 305 miles of branch line; (5) Nanking-Shanghai Railway, 247 miles; (6) Shanghai-Hangchow-Ningpo Railway, 179 miles; (7) Lung-Hai Railway, 687 miles; (8) Kiaochow-Tsinan Railway, 285 miles; (9) Peiping-Suiyuan Railway, 540 miles; (10) Chekiang-Kiangsi Railway, 403 miles; (11) Tatung-Puchow Railway, 389 miles; (12) Yunnan Railway, from the Tonkin border to Kwenning, 288 miles; (13) South Manchuria Railway, from Changchun to Dairen, 696 miles; (14) the Chinese Eastern Railway running eastward from Manchuli through Northern Manchuria to Suifeihō (Russian name, Pogranichnaya), the last station in Chinese territory, where it joins the Ussuri Railway, and then runs due east to Vladivostok, and southerly from Harbin to Changchun, joining the South Manchuria Railway. This line was built by the Russians, and under agreements dated August 2, 1896, and March 6, 1898, was operated by Russians and Chinese. It runs for 1,470 miles in Chinese territory. On March 23, 1935, the Soviet Government sold the Chinese Eastern Railway to the Government of Manchukuo. The Chinese Government protested against the sale. The gauge is the Russian standard of 5 feet, whilst that of all the other railways is 4 feet 8½ inches, with the exception of the Yunnan Railway, which has a gauge of 1 metre.

Of the 12,500 miles of railway built before the war, Free China holds 1,875 miles. New lines are being built between Kwangsi and Kweichow, a distance of 390 miles; and an extension of the Lung-Hai from its old terminus at Paochi westward to Tienhsui, a distance of 105 miles.

China has a fairly well developed telegraph service. Telegraphs connect all the principal cities in the country, and there are lines to all the neighbouring countries. The telegraph lines in 1943 had a length of 59,275 miles. Wireless telegraph stations have been installed at many centres. Telephones are in use in the main cities of China; length of telephone lines, 1943, 41,384 miles.

The postal work of China, formerly carried on by the Government Courier service and the native posting agencies, was gradually taken in hand by the Chinese Imperial Post Office, begun in 1897 under the management of the Maritime Customs. By Edict of November 6, 1906, the control of the Postal Service was transferred to the Ministry of Communications, and the transfer was actually effected in July, 1911. Number of post offices of all kinds in 1943 was 70,650. Length of mail routes in 1943 was 370,461 miles. In the fiscal year 1937-38 the number of letters posted was 355,925,900; of post-cards, 23,310,300; of newspapers, 38,762,400; of printed matter, 60,311,900; of commercial papers, 4,664,700; of samples of merchandise, 690,500; of trade circulars, 1,401,700; grand total (including all others), 578,225,600. The number of parcels posted in 1937-38 was 4,946,800. The revenue of the post office in 1937-38 was 37,052,852 dollars, and the expenditure 39,173,258 dollars. On December 31, 1939, the postal staff numbered 39,907, including 23 foreigners.

## Banking and Credit.

Since the foundation of the Republic, many banks have come into existence. The most important, the Central Bank of China, was opened on November 1, 1928, with a capital of 20,000,000 dollars supplied by the Ministry of Finance. It has the right to issue bank notes, to mint and issue coins, to

serve as the National Treasury, and to direct the flotation of national loans and treasury notes. In 1984 its capital was increased to 100,000,000 dollars.

After the Revolution the Ta Ching Bank was re-organised as the Bank of China. In 1928 the Bank of China Regulations further made it an international exchange bank. Its capital was 25,000,000 dollars, the Government subscribing 5,000,000 dollars. In 1935 its capital was again increased to 40,000,000 dollars, half of which was subscribed by the Government. It now has 190 branches in the country and abroad. In 1928 the revised regulations of the bank converted the Bank of Communications into a bank specially devoted to the development of the industries of the country. It was capitalised at 10,000,000 dollars, the Government providing 2,000,000 dollars. In 1935 the capital was increased to 20,000,000 dollars, of which 60 per cent. was supplied by the Government. It has 102 branches.

The sole bank of issue since July 1 1942, is the Central Bank of China. The Bank of China is charged with dealing exclusively in foreign trade. The Bank of Communications is entrusted with fostering China's industrial and economic reconstruction programme. The Farmers' Bank of China has a monopoly of extending farm loans and assisting rural finance. The Postal Savings and Remittance Bank is mainly a savings bank under the new arrangement. The capital of the Bank of China, the Bank of Communications, and the Farmers' Bank of China was increased to 60,000,000 Chinese dollars each by a Government decree in July, 1942.

Since March 1, 1943, the Hong Kong and Shanghai Banking Corporation, and also the Chartered Bank of India, Australia and China, have been conducting banking business in Chungking, the war-time capital of Free China.

In 1934 the Government promulgated the Savings Banks Law, fixing the method of investment and requiring the deposit with the Central Bank one-fourth of the total savings of each bank in the form of government bonds and other securities. In 1940 savings deposits amounted to 552 million dollars; in 1941 to 1,199 million dollars, and in 1942 to 3,065 million dollars.

The Post Office has operated as a Savings Bank since July 1, 1919, with 81 officials under the control of 11 district head offices. In January, 1930, the banking department was authorised by the National Government to form a separate administration from that in charge of posts and mail. The Post Office Savings Law was promulgated in 1931. By June 30, 1936, there were 679 establishments with savings facilities, with 236,646 depositors, and total deposits amounting to 37,612,579 dollars.

## Money, Weights and Measures.

**MONEY.**

On November 3, 1935, the *guan*, or Chinese dollar, was made *fapi*, or legal tender. On July 10, 1942, the rate of exchange of *fapi* was fixed at .05 U.S. dollar. The new dollar is 880/1000 fine, and has a gross weight of 26.6971 grammes, with a fine silver content of 23.493448 grammes. It is minted at the Central Mint established in Shanghai by the National Government. In unoccupied China zinc or aluminium 5-cent and 1-cent pieces are in circulation.

In China, standards of weights, measures and length vary all over the country. Generally speaking, two kinds of standards are now in use, namely, the old and the new. The old standard was formulated from the Weights and Measures Law promulgated in 1914, establishing a double system, the standard metric unit and that based on *ying tsao ch'ih*, or 'builder's foot' for length and Kuping tael or *liang* for weight. The law

The funds to which the agreement refers amounted to 3,442,731.7 in April, 1931, when the Board of Trustees for the administration of these funds was instituted, while the future instalments payable by the Chinese Government from April, 1931, to December, 1946, when all payments are due to cease, will amount to 7,743,816.7.

Before July 7, 1937, when the Japanese war broke out, the amount of foreign loans secured on customs, salt and national treasury revenues totalled 59,059,200.7; 30,400,000 U.S. dollars; 3,300,000 yen, and 1,340,000 Chinese dollars. The unpaid amount of principal and interest on these loans is 52,749,833.7; 22,885,100 U.S. dollars; 2,161,000 yen and 1,340,000 Chinese dollars.

Since the outbreak of hostilities the National Government has raised twelve foreign loans, amounting to 870,000,000 U.S. dollars and 58,047,000.7, as follows: (1) on February 1, 1942, from the United States, 500,000,000 dollars; (2) on May 2, 1944, from Great Britain, 50,000,000.7; (3) the Sino-American Tung Oil Loan of 25,000,000 U.S. dollars; (4) the Sino-American Tin Loan of 20,000,000 U.S. dollars; (5) the Sino-American Tungsten Loan of 25,000,000 U.S. dollars; (6) the Sino-American Metal Reserve Loan of 50,000,000 U.S. dollars; (7) the first Sino-Soviet Barter Credit Loan of 50,000,000 U.S. dollars; (8) the second Sino-Soviet Barter Credit Loan of 50,000,000 U.S. dollars; (9) the third Sino-Soviet Barter Credit Loan of 150,000,000 U.S. dollars; (10) the first Sino-British Export Credit Loan of 183,000.7; (11) the second Sino-British Export Credit Loan of 2,859,000.7; and (12) the third Sino-British Export Credit Loan of 5,000,000.7.

Since the beginning of the war the National Government has floated a number of domestic loans in various currencies, totalling 10,022,000,000 Chinese dollars: Customs gold units (each worth 20 Chinese dollars), 100,000,000; 200,000,000 U.S. dollars, and 20,000,000.7; and in August, 1944, a new Allied Victory Loan amounting to 5,000,000,000 Chinese dollars.

## Defence.

### ARMY.

The organisation of the national army is based upon a system of compulsory citizen service. For the regular army the principle of obligatory and voluntary service is adopted. The period of service is three years for active service, six years for regular service, and extended service up to the age of 40. Recruits must be between the ages of 20 and 25.

At the outbreak of the war with Japan the organised forces at the disposal of the Central Government are estimated to have numbered 1,600,000, comprising 135 infantry and 11 cavalry divisions, but much of this organisation was on paper only. The nominal strength of the Chinese National Army now is 5,000,000 men, but owing to the extreme shortage of modern arms and equipment it is to be doubted whether the effective strength is more than 1,000,000, if so many. The separate Chinese Communist forces are estimated to number up to 500,000 men.

### NAVY.

In July, 1929, the Government requested the services of a British Naval Mission to reorganise the training of the Fleet; the services of a naval officer were subsequently lent for two years. A number of Chinese junior naval officers have undergone training in the British Navy.

As a result of hostilities with Japan, the majority of the ships comprising the Chinese Navy have ceased to exist, but five river gunboats have been

presented to China by the British, French and U.S. Governments, which with eight others are still operating on the Upper Yangtze.

There are no naval bases of any importance. Existing dockyards are: Foochow, Taku, Kiangan (Shanghai), and Amoy (Fukien), some of which are in Japanese hands.

## Production and Industry.

**Agriculture.**—China is essentially an agricultural country, and the land is mostly freehold held by families on the payment of an annual tax. Total arable land in China is estimated at about 192,060 square miles. The holdings are in general small; irrigation is common. Chinese agriculture is intensive rather than extensive. Rotation of crops is practised. Horticulture is a favourite pursuit, and fruit trees are grown in great variety. Indeed the Chinese are gardeners rather than farmers. Vegetable culture has reached a high state of perfection. Wheat, barley, maize, kaoliang and millet and other cereals, with peas and beans, are chiefly cultivated in the north, rice, sugar, and indigo in the south. China's fibre crops are also important: chief are abutilon, hemp, jute, ramie and flax.

The production of the principal crops in 1938 and 1939 in the following 15 provinces in Free China (Shensi, Kansu, Ninghsia, Chinghai, Honan, Hupeh, Szechwan, Yunnan, Kweichow, Hunan, Kiangai, Chekiang, Fukien, Kwangtung and Kwangsi) was as follows:—

|                    | 1938        | 1939        |
|--------------------|-------------|-------------|
|                    | Piculs      | Piculs      |
| Rice . . . . .     | 746,146,000 | 763,678,000 |
| Wheat . . . . .    | 202,911,000 | 198,188,000 |
| Barley . . . . .   | 90,338,000  | 91,534,000  |
| Kaoliang . . . . . | 33,969,000  | 34,273,000  |
| Corn . . . . .     | 70,249,000  | 71,158,000  |
| Millet . . . . .   | 33,110,000  | 24,018,000  |
| Oats . . . . .     | 3,118,000   | 3,378,000   |
| Potatoes . . . . . | 275,520,000 | 347,721,000 |

The total land under cultivation in these 15 provinces was estimated to be 580,000,000 mow.

Cotton is grown widely even as far north as the southern and central part of Hopei, the chief area of production being along the Yangtze and Yellow River valleys. China ranks after the United States and India as the third among the world producers of cotton, her output in normal years varying between 2,500,000 and 4,000,000 bales (estimated for 1942, 2,600,000 bales). Tea is cultivated exclusively in the west and south; silk culture is one of the most successful industries of China. The production of silk cocoons is estimated at 3,300,000 *piculs*, of which about 40 per cent. is produced in the central provinces of Kiangsu, Chekiang and Anhwei.

Pigs are raised everywhere in China, and pigs' bristles have become an important article of export. The annual output is over 100,000 *piculs*, valued at about 10,000,000 Hk. Tls.; about two-thirds are exported. In Mongolia, camels are raised chiefly as transport animals. The National Agricultural Research Bureau of the Ministry of Industry estimates that in 1935 the total number of cows in the country was 22,647,000; buffaloes, 11,603,000; goats, 20,957,000; sheep, 21,933,000; pigs, 62,639,000; horses, 4,080,000; donkeys, 10,547,000; mules, 4,666,000; chickens, 246,688,000; ducks, 56,724,000; geese, 10,538,000.

governing the new standard was promulgated by the National Government on February 6, 1929, and it is intended to be the legal standard of weights and measures throughout China. For convenience sake and customary usage it also established a double system; one is the standard metric unit, which came into operation in the Customs' service on February 1, 1934, and the other, which is temporary in nature and to be abolished as soon as the people are accustomed to the use of standard units, is designed only for market use. The latter is derived from the former by taking one litre of Kung Sheng as one Shih Sheng, which is nearest to the Chinese customary unit of capacity 'Sheng'; one-half kilogramme as one Shih Chin, which is the average weight of the different varieties of 'Chin' in different localities; and one-third of a metre or Kung Ch'ih as one Shih Ch'ih, which is the average length of different varieties of Chinese 'Foot' in different localities, thus constituting the so-called 1-2-3-system of Chinese weights and measures based on international metric standard. Such a system as devised by the Ministry of Industry, Commerce and Labour and proclaimed by the National Government to be put into force may also have great bearing on the users of British 'foot-pound' system by taking the following approximate value: 1 quart equals to 1 litre, 1 pound equals to  $\frac{1}{2}$  kilogramme and 1 yard equals to 1 metre. The Russian and Japanese system can also be thus varied accordingly so as to fit themselves to the international system. The following table shows the old units of weight, capacity and length:—

## WEIGHT.

|                 |                                     |
|-----------------|-------------------------------------|
| 10 Sui . . .    | = 1 Hao.                            |
| 10 Hao . . .    | = 1 Li.                             |
| 10 Li . . .     | = 1 Fen (Candareen).                |
| 10 Fen . . .    | = 1 Ch'ien (Mace).                  |
| 10 Ch'ien . . . | = 1 Liang (Tael) = 37.301 grammes.  |
| 16 Liang . . .  | = 1 Chin (Catty) = 596.816 grammes. |

## CAPACITY.

|                |                                                                                                        |
|----------------|--------------------------------------------------------------------------------------------------------|
| 10 Sho . . .   | = 1 Ko.                                                                                                |
| 10 Ko . . .    | = 1 Sheng.                                                                                             |
| 10 Sheng . . . | = 1 Tou = 10.354688 litres.                                                                            |
| 5 Tou . . .    | = 1 Hu.                                                                                                |
| 2 Hu . . .     | = 1 Tan. Commodities, even liquids, such as oil, spirits, etc., are commonly bought and sold by weight |

## LENGTH.

|                 |                                           |
|-----------------|-------------------------------------------|
| 10 Fen . . .    | = 1 Ts'un (inch).                         |
| 10 Ts'un . . .  | = 1 Ch'ih (foot) = .32 metre.             |
| 10 Ch'ih . . .  | = 1 Chang = 3.2 metres.                   |
| 180 Chang . . . | = 1 Li = 576 metres = $\frac{1}{3}$ mile. |

By treaty between Great Britain and China, the Ch'ih of 14.1 English inches has been adopted as the standard, the Tael, Catty, and Picul have been fixed at 1 $\frac{1}{2}$  oz., 1 $\frac{1}{2}$  lb., 133 $\frac{1}{2}$  lb. avoirdupois respectively. 1 Mou =  $\frac{1}{4}$  of an acre.

## Diplomatic Representatives.

## 1. OF CHINA IN GREAT BRITAIN.

*Ambassador*.—Dr. V. K. Wellington Koo (appointed April 24, 1941).

*Counsellors*.—Chen Wei-cheng (W. C. Chen) and Sze Chao-Kuei.

*First Secretaries*.—Tan Pao-shen, Tsien Tsuen-Dien, Fu Kuan-Hsing and Dr. Liang Yuen-li.

*Second Secretaries*.—Chai Feng Yang and Dao Ying.

*Third Secretary*.—Lee En-Kuo.

*Attachs*.—Wou K'uan, Lin Chih-Chi, Chao Chin-Yung, Kwoh Tseh-Ching and Wang Yung-Yuan.

*Military Attaché*.—Colonel Tang Pao-huang.

*Naval Attaché*.—Captain Chow Ying-tsung.

*Air Attaché*.—Air Lieut.-Colonel Huang Pun-young.

*Commercial Counsellor*.—Dr. Wang Ching Chun.

*Consul-General in London*.—Tan Pao-Shen.

There are Consular representatives at Birmingham, Liverpool and Manchester.

## 2. OF GREAT BRITAIN IN CHINA.

*Ambassador*.—Sir Horace Seymour, K.C.M.G., C.V.O. (appointed January 26, 1942).

*Acting Counsellor*.—G. A. Wallinger.

*Secretaries*.—H. M. Eyres and R. G. A. Etherington-Smith.

*Chinese Secretary*.—G. V. Kitson.

*Commercial Counsellor*.—J. C. Hutchison, O.B.E.

*Naval Attaché*.—Captain E. W. Billyard-Leake, D.S.O.

*Military Attaché*.—Major-General G. E. Grimsdale.

*Air Attaché*.—Group-Captain G. Bartholomew.

There are British Consular representatives at Chung-king (C.G.), Chengtu (C.), Foochow, Kashgar (C.G.) and Yunnan-fu (C.G.).

*Indian General Agent in China*.—Sir Mohamed Zafrullah (appointed May 28, 1942).

## Chinese Outer Territories.

## Manchukuo (Manchuria)

On September 18, 1931, the Japanese army occupied Mukden. A series of military operations continued, and on February 18, 1932, the three north-eastern provinces of China, Fengtien, Kirin and Heilungkiang, together with Jehol, were, with the assistance of Japan, proclaimed an independent puppet state under the name of Manchukuo, with the capital at Changchun, renamed Hsinking. Japan has formally recognised Manchukuo. The League of Nations in 1932 sent a commission of inquiry, under the chairmanship of Lord Lytton, to inquire into the formation of Manchukuo, and in February, 1933, adopted the Lytton report, which was critical of Japanese action. By March 1942, Japan, Italy, Germany, Hungary, Rumania, Poland and San Salvador had recognised Manchukuo.

Manchukuo extends between 39° 40' and 53° 50' North latitude and 115° 20' and 135° 20' East longitude. It is bounded on the north by Siberia, on the east by Korea, on the south by the Yellow Sea and the Gulf of Pechili, and on the west by Outer Mongolia, Eastern Inner Mongolia and China proper. The area is estimated at 1,303,143 sq. kilometres (503,013 sq. miles) and the population (October 1, 1940) at 43,233,954.

The population by provinces is as follows (December 31, 1939) :—

| Province   | Population |            |            |
|------------|------------|------------|------------|
|            | Male       | Female     | Total      |
| Heilung    | 248,921    | 166,552    | 415,473    |
| Kirin      | 2,878,159  | 2,484,312  | 5,362,471  |
| Langkiang  | 993,995    | 830,577    | 1,824,572  |
| Pelan      | 1,150,620  | 915,597    | 2,066,217  |
| Heiho      | 57,889     | 37,175     | 95,064     |
| Senkiang   | 695,088    | 515,857    | 1,210,945  |
| Tungan     | 194,267    | 142,545    | 336,812    |
| Mutankiang | 263,692    | 181,693    | 445,385    |
| Pinkiang   | 2,120,834  | 1,714,818  | 3,835,652  |
| Chientao   | 401,743    | 336,551    | 738,294    |
| Tunghua    | 507,591    | 342,099    | 849,690    |
| Antung     | 1,185,543  | 1,032,236  | 2,217,779  |
| Fengtien   | 5,309,096  | 4,486,042  | 9,795,138  |
| Chinchow   | 2,246,003  | 2,008,980  | 4,254,983  |
| Jehol      | 2,268,316  | 1,847,010  | 4,115,326  |
| Heilung W. | 364,095    | 294,668    | 658,763    |
| Heilung S. | 504,853    | 404,413    | 909,276    |
| Heilung N. | 85,025     | 54,547     | 139,572    |
| Heilung N. | 59,218     | 37,397     | 96,615     |
| Total      | 21,530,957 | 17,923,069 | 39,454,026 |

The principal cities with their populations on December 31, 1939, are as follows: Mukden (863,515), Harbin (517,127), Hsinking, the capital (415,264), Antung (220,587), Kirin (138,910), and Yingkow (165,918).

The Organic Law of March 9, 1932, provides for a Chief Executive, a Privy Council, and a Cabinet. In January, 1933, it was decided to make Henry Pu-Yi the Chief Executive, hereditary Emperor (*Huangti*) of Manchukuo. He was crowned on March 1, 1934, as the Emperor Kang Teh.

**Prime Minister.**—General Chang Ching-hui (appointed May 21, 1935).

**Justice.**—The Minister of Justice supervises the courts, the Procurators' offices and the prisons, and has charge of matters concerning civil and criminal cases, execution of sentences, non-contentions cases, census and cadastral registrations, and other matters concerning judicial administration. The organisation of the courts and the Procurators' offices is based upon the Organisation Law of Courts, January 4, 1936.

**Education.**—In June, 1939, there were 15,877 elementary schools (1,579,169 pupils and 37,639 teachers); 254 secondary schools (60,368 pupils and 2,904 teachers). Higher education is provided in 14 colleges (4,372 students and 596 teachers). For normal education, there are 16 teachers' training schools and teachers' training colleges (4,045 students and 308 teachers). There are also 66 vocational schools (5,048 students and 563 teachers). Expenditure in 1939 on elementary schools, 25,342,740 yuan, and on secondary schools, 6,155,630 yuan.

**Finance.**—Estimates of revenue, 1941, 1,800,000,000 yuan; expenditure, 1,787,000,000 yuan.

**Defence.**—The army numbers about 80,000. On April 11, 1940, the National Army Law was promulgated, providing for the conscription of men between 19 and 40, with a three year period of service.

There are a destroyer, 15 gunboats, 6 patrol vessels and a number of smaller craft which comprise the new Manchukuo navy. The majority of these vessels are quite modern, having been built in Japan under the present regime.

**Agriculture and Industry.**—Manchukuo is primarily an agricultural country, the arable area being estimated at 32,736,000 hectares in 1937. In 1940 the principal crops were (in metric tons) soya beans, 3,800,000; kaoliang, 4,407,000; millet, 3,900,000; maize, 3,100,000; wheat, 807,000. There were, in 1937: cattle, 1,633,200; sheep, 1,965,900; goats, 1,243,000; camels, 12,800; and pigs, 5,335,800. In 1938 the forest area was estimated at 87,740,000 hectares and the timber resources at 3,719,096 cubic metres. Many minerals are found, including iron, gold, coal, magnesite, and oil shale. In 1936 production of iron ore amounted to 1,934,288 metric tons, coal 12,580,000 metric tons. In 1936 the yield of shale oil was 3,648 metric tons.

**Commerce.**—Imports and exports for 5 years (in thousands of Manchukuo yuan) were as follows :—

|         | 1935    | 1936    | 1937    | 1938      | 1939      |
|---------|---------|---------|---------|-----------|-----------|
| Imports | 604,149 | 691,830 | 887,411 | 1,374,748 | 1,783,366 |
| Exports | 421,077 | 602,758 | 645,297 | 723,454   | 826,190   |

Of the total imports in 1939 (in 1,000 M. yuan), 1,505,011 came from Japan; 64,226 from China; 87,739 from U.S.A.; 24,440 from British India; 51,786 from Germany, and 4,441 from Great Britain. Of the exports (in 1,000 M. yuan) Japan took 516,792; China, 165,207; Germany, 50,358; Great Britain, 3,270. The principal commodities imported in 1939 were (in 1000 M. yuan):—cotton goods, 9,810; raw cotton, 9,066; iron and steel, 104,256; machinery and tools, 169,624; wheat flour, 68,581; sugar, 42,363; paper, 49,640; principal exports: soya beans, 206,378; bean cakes, 123,958; coal, 24,059; bean oil, 3,025.

In 1938 (Board of Trade returns), imports into U.K. from Manchuria (excluding Kwantung Peninsula) were 297,504; exports from U.K., 31,848; re-exports from U.K., 5,983.

**Communications.**—Railway mileage in 1940 was 7,380 miles, including State railways, 4,319 miles; the South Manchuria Railway Co., 701 miles; and privately-owned lines, 221 miles. There were also 3,960 miles of State highways.

Number of post offices, 474; of postal agencies, 1,420. Telegraph and telephone offices, 802. Inland business, 1939, outward: letters, 111,259,000; postcards, 30,888,000; parcels, 1,173,000; inwards: letters, 111,879,000; postcards, 21,247,000; parcels, 1,297,000.

In 1939 the air routes totalled 16,070 kilometres; air mail handled, 2,738,000.

**Banking and Currency.**—The Central Bank of Manchou was established on July 1, 1932. Its head office is at Hsinking and there are branch offices at Mukden, Kirin, Tsitsihar and Harbin. It has a capital of 80,000,000 yuan. It has the right to coin and issue money. On June 30, 1940, its notes in circulation amounted to 632,214,000 yuan. There is also the Industrial Bank of Manchou, established in December 21, 1926, with a capital of 30,000,000 yen. Foreign banks with branches in Manchukuo are the National City Bank of New York, Russo-Asiatic Bank, Far Eastern Bank, Hongkong Shanghai Banking Corporation, Chartered Bank of India. Postal savings June 30, 1940, 190,302,000 yuan.

On June 11, 1932, the Currency Law was promulgated and the country

was placed under the silver standard with the 'yuan,' containing 23.91 grams of pure silver, as the standard unit. The yuan is divided decimally into the 'chiao' (1/10 of the yuan), the 'fen' (1/100 of the yuan), and the 'li' (1/1000 of the yuan). Notes issued are in denominations of 100, 10, 5, and 1 yuan, and 5 chiao or 50 fen; coins are 1 chiao and 5 fen in nickel, and 1 fen and 5 li copper. The right of minting coins and issuing notes belongs exclusively to the Manchukuo Government, and is carried out by the Central Bank of Manchou.

### Tibet.

Tibet, extending from the Pamir region eastwards between the Himalaya and Kwen-lun mountains to the borders of Chinghai and Sikong, has an area of 463,200 square miles with a population estimated at between 1,500,000 and 6,000,000. Recent estimates, however, place the figures as low as 700,000 to 800,000. Lhasa, the capital, has about 50,000 inhabitants, Chamdo, 2,000 inhabitants; and Gyantse, about 5,000. The country being bleak and mountainous and strangers having been jealously excluded, wide regions are still unexplored.

Chinese authority was in the past represented by two *Ambans* who had charge, respectively, of foreign and military affairs. There were three Chinese commandants of troops at Lhasa, Shigatse, and Dingri, where the permanent military force of about 4,600, provided by China, were mostly quartered. There were a few other Chinese officials, but the civil and religious administration of the country was left almost entirely to Tibetans. The head of the government is the Dalai Lama, who resides at the Po-ta-la (or palace) near Lhasa. He acts through a minister or regent appointed from among the chief Tibetan Lamas (*Silon*). Under the *Silon* is the *Kashag* or Grand Council composed of four members (*Kalons*). Early in 1908 the territory of Western Szechuen and the adjoining territory of Eastern Tibet were united into a new 'special administrative area,' known as the Province of Sikang, with Batang, re-named Baanfu, as capital.

The prevailing religion is Lamaism, a corrupt form of Buddhism, but along with it there exists the Bon, or Shamanistic, faith. Almost one fifth of the population is said to be lamas. Two public schools have been established at Lhasa, one for the training of prospective ecclesiastical officials and the other for lay government officers. There are also a number of private schools.

In some places agriculture is carried on, barley and other cereals as well as pulse and vegetables being grown. In some favoured regions fruits, including peaches and even grapes, are produced. In other places the pursuits are pastoral, the domestic animals being sheep and yak (often crossed with Indian cattle), while in some regions there are buffaloes, pigs, and camels. Wool-spinning, weaving, and knitting are common, and there are many hands skilful in making images and other decorations for religious edifices. The chief minerals worked are gold, borax, and salt. There is a large trade with China and considerable traffic across the Indian frontier. Dense forests are found in the Eastern part of Tibet. A telegraph line, 144 miles long, connects Lhasa with Gyantse.

The trade between India and Tibet has to be carried through lofty passes between 14,000 and 18,000 feet high, most of which are practically impassable during seasons of heavy rain and snow. Sheep and also crosses between yaks and ordinary cattle are used as beasts of burden. The most important route into Tibet from India is from Siliguri, near Darjeeling in northern

Bengal, and across the small Frontier State of Sikkim to Gyantse and Yatung in Tibet, the two leading trade routes authorised by the existing Convention. The other chief means of access to Tibet are from Almora in the northern part of the United Provinces, and from Simla over the Simla-Tibet road to Gartok in western Tibet, which is at about 14,200 feet elevation above the sea. Three media of exchange exist in Tibet, the Indian rupee, the half-dollar coins of Szechuan, and the Tibetan paper notes, but of these the rupee is the standard currency unit.

For treaties regulating trade between Tibet and India, see THE STATES-MAN'S YEAR-BOOK, 1935, pp. 771-2.

Sin-Kiang consists of Chinese Turkestan, Kulja, and Kashgaria, and comprises all Chinese dependencies lying between Mongolia on the north and Tibet on the south. It is now regarded as a separate province, its Governor residing at Urumchi, or Tihwafu, the capital. Its area is estimated at about 550,340 square miles and population at about 1,200,000. The inhabitants are of various races, known as Turki (Kashgari, Kalmuk, Khirghiz, Taranchi, etc.), mostly Mohammedan and Chinese, who have of recent years greatly increased in numbers. The chief towns are Ili, Kashgar, Yarkand, Khotan, and Aksu. The country is administered under Chinese officials, residing at Urumchi, the subordinates being usually natives of the country. In regions about the Kashgar and Yarkand rivers the soil is fertile, irrigation is practised, and cereals, fruits and vegetables are grown. Other productions of the country are wool, cotton, and silk. Jade is worked, and in some districts gold is found. The whole territory is yearly increasing in population and prosperity. A trade agreement with Soviet Russia was signed in 1924.

British Consul-General at Kashgar.—M. C. Gillett (appointed July 18, 1942).

### Mongolia.

The vast and indefinite tract of country called Mongolia stretches from the Khinghan mountains on the east to the Tarbagatai mountains on the west, being intersected towards its western end by the Altai mountains and the Irtysh river. On the north it is bounded by Siberia and on the south by the outer Kan-su and other regions which are united into Sin-Kiang. The area of Mongolia is about 1,875,000 square miles, and its population about 750,000 Mongols and about 100,000 other nationalities, principally Chinese and Russians. The monks (lamas) are the most important element in the population, forming 15 per cent. of the total, and over 80 per cent. of the male population. A wide tract in the heart of this region is occupied by the Desert of Gobi which extends south-westwards into Chinese Turkestan. The inhabitants are nomadic Mongols and Kalmucks who range the desert with camels, horses, and sheep. Even in fertile districts they are little given to agriculture. But of recent years there has been a great extension of Chinese immigration. The chief town or centre of population is Urga (which, since 1924, is known as Ulan Bator Hoto, i.e. 'Town of the Red Heroes'), 170 miles due south of Kiakhta, a frontier emporium for the caravan trade carried on with China across the Gobi Desert. Urga has some 100,000 inhabitants. Kiakhta is a Siberian frontier town, and stands about 100 miles from the south end of Lake Baikal. The chief exports are livestock and animal products. The following quantities were exported in 1930: sheep's wool, 8,770 tons; pigs, 1,200,000; sheep and goats, 2,000,000.

The foreign trade of Mongolia in recent years has been handled by

Government organisations backed by Soviet capital. The chief trading concern is the Mongo Central Co-operative Society.

During the summer months motor-car services cross the Gobi desert, the journey between Kalgan and Urga (1,160 road miles) occupying 4-6 days. It was inaugurated in 1917. During 1930 work was commenced on the new railway line from Tao An to Solun.

For a history of political events in Mongolia from 1912 to 1923, see *THE STATESMAN'S YEAR-BOOK* for 1923, p. 794.

**Meng-Chiang.**—On November 22, 1937, the Japanese set up the 'Federated Council of the Mongol Border Land' (Meng-Chiang) with supervisory functions over three so-called federations:—(1) the Federal Autonomous Government of the United Leagues of Mongolia, with its capital at Hohohoto; (2) the Federal Autonomous Government of Chin-Pei (North Shansi), with its capital at Tatung; (3) the Federated Autonomous Government of Cha-Nan (Southern Chahar), with its capital at Kalgan. On September 1, 1939, Meng-Chiang was reorganised under the style of Federal Autonomous Government of Mongolia. The area is roughly 200,000 sq. miles and its population 5 to 7 million.

**Outer Mongolia.**—In 1924, on the death of the last Hutukhtu or theocratic ruler of Outer Mongolia, there was a revolution, as a result of which the Mongolian People's Revolutionary Government, run on Soviet lines, was established. According to the constitution adopted in November, 1924, which follows the Soviet model, the highest power is vested in a parliament (the *Great Huruldan*) which is elected by universal suffrage, male and female, over 18 years of age. It has to meet once a year at least, and alone has the power to amend the constitution. It elects from its number 30 members who form the executive committee (the *Little Huruldan*) which is responsible to it. This committee elects five of its members to a board which carries on current state affairs.

In 1932 the population of Outer Mongolia was estimated at 540,000, of whom about one-sixth were Russians and some 5,000 Chinese. The Mongols are mainly herdsmen, and in 1928 were estimated to have 1,340,000 horses, 270,000 camels, 1,500,000 oxen, and 10,600,000 sheep.

There are some gold mines in the country, as well as other mineral deposits of unascertained value. Wool, skins and furs are exported, chiefly to the Soviet Union.

Communications are chiefly by caravan route. In 1926 an agreement was reached between the Soviet Union and Outer Mongolia for the construction of a railway between Urga and Chita, but, according to the latest information, has not yet been implemented. An air service has been established between Verkhneudinsk and Urga, and there are steamer services on the Selenga and Orkhon rivers. There is telegraphic communication with the Soviet Union, and a wireless station has been established at Urga.

Since March, 1915, Mongolia has had a legal currency of its own. The present currency, introduced in 1925, is based on the *Tukhrik*, a silver coin equivalent theoretically to half an American gold dollar, and divided into 100 *Mongo*. In 1924 a state note-issuing bank, the Commercial and Industrial Bank (Mongolbank), was founded, with a capital of 175,000 Mexican dollars, which has since been increased to 3,000,000 Mexican dollars. The Soviet State Bank holds fifty per cent. of the capital.

Buddhist Lamaism is the prevalent form of religion, the Lamas having their residence at Urga and other centres.

**Tannu-Tuva** (Tuvian People's Republic) is an independent republic, under Soviet protection, to the north-west of Mongolia, between 50° and 53° N. lat., and between 90° and 100° E. long. It is bounded to the East, West and North by Siberia, and to the South by Outer Mongolia.

As Uryankhai the territory now known as Tannu-Tuva was considered part of Outer Mongolia until the Mongolian insurrection of 1911. Russian colonists had been settled there since 1870, and consequently the Imperial Russian Government at this time made claims to the territory. It was not included in autonomous Mongolia, and after a period of nominal independence, it was proclaimed a Russian protectorate on the outbreak of the Great War in 1914, and became virtually a department of the Ussinsk district of the Altai Province of Siberia.

During the Russian civil war Uryankhai came again under Chinese jurisdiction, but after the Soviet occupation of Urga it was proclaimed an independent republic under the name of Tannu-Tuva. The Chinese Government and the Government of the Mongol Republic set up under Soviet influence protested against its separation from Outer Mongolia, and a mixed commission was appointed to settle its status. In 1926 a Treaty of Friendship was signed by Outer Mongolia and Tannu-Tuva.

According to the Constitution adopted in 1924 supreme power is vested in the *Great Huruldan*, which is composed of district representatives elected by all citizens of 22 years of age excepting those belonging to high noble and priestly families. The *Great Huruldan* meets once a year and elects a *Little Huruldan* of 30 members, which in turn elects a President and the members of the Government, who are responsible to it. The *Little Huruldan*, which is the legislative body, meets four or five times a year.

*President of the Little Huruldan.*—M. Tonduk.

The area of Tannu-Tuva is about 64,000 square miles. The total population is about 65,000, of whom some 50,000 are Tuvians, 12,000 Russians, and the rest Chinese and Mongols. The Tuvians are a Turki people, formerly ruled by hereditary or elective tribal chiefs.

Tannu-Tuva is well-watered and has much good pastoral land. The Tuvians are mainly herdsmen and cattle farmers, and the Russians in Tannu-Tuva merchants, farmers, and gold prospectors. There are deposits of gold and asbestos. The main exports are hair, hides and wool, and the imports manufactured goods and iron. The capital city is Kysylchoto (in Russian Krasny), formerly known as Khem-Belder (Russian Bietotsarsk). It has some 10,000 inhabitants.

A Soviet steamer service along the river Yenisei maintains communication with Minussinsk, in Central Siberia. There is a telegraph line connecting Kysylchoto with Soviet Russia.

## COLOMBIA.

### (LA REPÚBLICA DE COLOMBIA.)

#### Constitution and Government.

THE Republic of Colombia, which in colonial days was called 'Viceroyalty of New Granada,' gained its independence of Spain in 1819, and was officially constituted December 17, 1819, together with the present territories of Panama, Venezuela and Ecuador, the State of 'Greater Colombia,' which continued for about twelve years. It then split up into Venezuela, Ecuador, and the Republic of New Granada in 1830. The Constitution of May 22, 1858, changed New Granada into a confederation of eight States, under the name of Confederation Granadina. May 8, 1863, saw another Constitution, and the adoption of the name of the United States of Colombia. The revolution of 1885 led the National Council of Bogotá, composed of two delegates from each State, to promulgate the Constitution of August 5, 1886, forming the Republic of Colombia, which abolished the sovereignty of the States, converting them into departments, with governors appointed by the President of the Republic, though they retained some of their old rights, such as the management of their own finances. A decree of May, 1928, abolished their right to borrow abroad without the sanction of the central Government.

On December 19, 1941, Colombia broke off diplomatic relations with the Axis powers; on November 27, 1943, it declared a state of belligerency with Germany.

The legislative power rests with a Congress of two Houses, the Senate, of about 57 members, elected for 4 years, and the House of Representatives, of about 119 members, chosen for 2 years. By the Act of 1930 the Senators are elected indirectly by departmental assemblies, at least 3 Senators and not more than 9 for each department according to population; the Representatives are chosen by the people in each department (one for every 50,000). Voters at the 1941 elections numbered 1,933,345, or 46·16 per cent. of the electorate. Congress meets annually at Bogotá on July 20.

The President is elected by direct vote of the people for a term of 4 years, and is not eligible for re-election until 4 years afterwards. Congress elects, for a term of one year, two substitutes, one of whom occupies the presidency in the event of a vacancy during a presidential term.

The following is a list of Presidents since 1898:—

|                                                                                                                     |                                                       |
|---------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------|
| Dr. Manuel Antonio Sanclemente, Aug. 7, 1898—July 31, 1900.                                                         | Dr. Marco Fidel Suárez, Aug. 7, 1918—Nov. 11, 1921.   |
| Dr. José Manuel Marroquín, July 31, 1900—Aug. 7, 1904.                                                              | General Jorge Holguín, Nov. 11, 1921—Aug. 7, 1922.    |
| General Rafael Reyes, Aug. 7, 1904—April, 1909. Went abroad April, 1909, and re-signed on his return July 29, 1909. | General Pedro Nel Ospina, Aug. 7, 1922—Aug. 7, 1926.  |
| General Jorge Holguín, April, 1909—Aug. 7, 1909.                                                                    | Dr. Miguel Abadía Méndez, Aug. 7, 1926—Aug. 7, 1930.  |
| Dr. Ramón González Valencia, Aug. 7, 1909—Aug. 7, 1910.                                                             | Dr. Enrique Olaya Herrera, Aug. 7, 1930—Aug. 7, 1934. |
| Dr. Carlos E. Restrepo, Aug. 7, 1910—Aug. 7, 1914.                                                                  | Dr. Alfonso López, Aug. 7, 1934—Aug. 7, 1938.         |
| Dr. José Vicente Concha, Aug. 7, 1914—Aug. 7, 1918.                                                                 | Dr. Eduardo Santos, Aug. 7, 1938—Aug. 7, 1942.        |

*President of the Republic.*—Dr. Alfonso López Pumarejo (born January 31, 1886; elected May 3, 1942; holds office from August 7, 1942, to August 7, 1946).

The ministries are those of the Interior; Foreign Affairs; Finance; War; National Economy; Labour, Hygiene and Social Welfare; Education; Posts and Telegraphs; Public Works; Mines and Petroleum. A National Economic Council, including 5 Ministers and representatives of banking, agriculture and commerce, has been functioning since May, 1935.

On November 3, 1903, Panama asserted its independence and was formed into a separate Republic. On April 6, 1914, Colombia signed a treaty with the United States, at Bogotá, agreeing to recognise the independence of Panama and receiving as indemnity for the Panama Canal zone 25 million dollars, U.S., and certain rights in the zone. (See Introduction of THE STATESMAN'S YEAR-BOOK, 1915.) This Treaty was ratified by both countries in 1921.

A boundary dispute with Peru, which lasted for over 100 years, was finally settled on May 25, 1934, by a treaty signed in Rio de Janeiro adjusting the differences; that treaty has been ratified by the two governments.

On April 5, 1941, Colombia signed a treaty with Venezuela, fixing the frontiers and establishing the free navigation of the rivers common to both countries.

### Area and Population.

The area of the Republic is estimated at 439,997 square miles. It has a coastline of about 2,007 miles, of which 1,094 miles are on the Caribbean Sea and 913 miles on the Pacific Ocean. According to the census of 1942, population is 9,523,200 or 21.6 persons per square mile. The area and population of the 14 departments, 4 intendencias and 6 commissaries were, according to the census of July 5, 1938, as follows (the capitals in brackets):—

|                          |   | Census Population, July 5, 1938. |         |         |           |
|--------------------------|---|----------------------------------|---------|---------|-----------|
|                          |   | Area<br>sq. miles                | Males   | Females | Total     |
| <i>Departments.</i>      |   |                                  |         |         |           |
| Antioquia (Medellin).    | . | 25,419                           | 576,138 | 612,449 | 1,188,587 |

| Meta (Villavicencio)        | 32,916            | 28,697                           | 22,777    | 51,474    |
| San Andrés (San Andrés)     | 21                | 3,135                            | 3,893     | 6,928     |
| <i>Commissaries.</i>        |                   |                                  |           |           |
| Arauca (Arauca)             | 9,990             | 5,679                            | 5,477     | 11,156    |
| Caquetá (Florescencia)      | 39,777            | 11,628                           | 9,286     | 20,914    |
| Górgira (Uribia)            | 4,730             | 27,757                           | 25,652    | 53,409    |
| Putumayo (Mocoa)            | 10,220            | 8,549                            | 7,139     | 15,688    |
| Vaupés (Mitú)               | 57,850            | 4,192                            | 3,575     | 7,767     |
| Vichada (Puerto Carreño)    | 39,780            | 4,806                            | 4,288     | 9,094     |
| Grand Total                 | 439,997           | 4,312,764                        | 4,389,162 | 8,701,926 |

Of the total population (including 105,807 Indians in 398 tribes) in 1938, 49.56 per cent. were males; urban population totalled 2,539,721, or 29.2 per cent.

For distribution of population in 1938 as wage earners, see THE STATESMAN'S YEAR-BOOK, 1944, p. 809.

Immigration is almost negligible; foreigners in 1938 numbered 34,322, including: Venezuelan, 9,942; Italian, 1,448; German, 2,977; American, 2,887; British, 1,944; French, 1,055; Polish, 1,059.

The bulk of the population lives at altitudes of from 4,000 to 9,000 feet above sea level.

The capital, Bogotá (population in 1942, 395,300), lies 8,703 feet above the sea. The chief commercial towns, with their population in 1942, are: Medellín (198,100; Barranquilla (183,500), and Cali, a coffee and mining centre (121,300). Other towns with population in 1938 are: Manizales (86,027); Cartagena (84,987); Ibagué (61,447); Cúcuta (57,248); Bucaramanga (51,283); Pasto (49,644); Neiva (34,294); Santa Marta (33,245); Popayán (30,038); Tunja (20,236). Buenaventura, the principal port on the Pacific, was destroyed by fire in 1931; it has been rebuilt. Barranquilla, which used to be connected with the coast at Puerto Colombia by 17 miles of railway and road, is now a seaport by the opening of the Bocas de Ceniza. The railway which at one time ran between Puerto Colombia and Barranquilla is no longer in service, the rails having been taken up in September, 1942.

The language spoken is Spanish. The purest Spanish spoken in South America is that of Bogotá.

### Religion, Education and Justice.

The religion of the nation is Roman Catholic. There are 4 Catholic archbishops, viz., of Bogotá, Cartagena, Medellín and Popayán, the first having 4 suffragans and the others 3 each. Other forms of religion are permitted, so long as their exercise is 'not contrary to Christian morals nor to the law.'

Population over 10 years of age numbered 5,610,715 in 1928, of whom 51.57 per cent. were literate, compared with 32 per cent. at the 1918 census. Illiterate males numbered 23.12 per cent. and illiterate females 25.12 per cent. of those over 10 years of age.

Primary education is free but not compulsory. In 1940, the Government instituted travelling schools. In January, 1942, there were 571 private schools (289 for boys and 282 for girls); 525 kindergartens, with 13,400 pupils; 8,562 elementary schools, with 570,061 pupils; 37 vocational schools, with 3,513 pupils; 185 night schools, with 9,989 pupils; 127 commercial schools, with 11,823 pupils; 450 high schools, with 34,599 pupils; 22 agricultural schools, with 981 pupils; 16 art schools, with 2,490 pupils; 29 religious schools, with 1,657 pupils; 63 colleges and universities, with 7,635 pupils. Besides the National University in Bogotá (founded 1572), the departments have four universities, that of Antioquia at Medellín, of Bolívar at Cartagena, of Cauca at Popoyán, and Nariño at Pasto. These four universities and the private universities, in 1937, had 27 faculties with 599 teachers and 3,324 students. There are 6 schools of music and art, with 684 students and 73 teachers. A law signed December 17, 1934, requires that at least 10 per cent. of National Government's revenue must be devoted to education.

By a new judicial code, effective January 1, 1932, the Supreme Court, at Bogotá, is divided into 4 chambers—civil cassation, criminal cassation, general business and civil 'de unica instancia.' Each judicial district has a superior court of 3 judges or more. By a law of November 12, 1932, married women were granted full control of their property, and a share of property jointly acquired since marriage.

### Finance.

Ordinary revenue and expenditure for 6 calendar years in paper pesos (worth about 57 cents, U.S.):—

| Year | Revenue    | Expenditure | Year              | Revenue     | Expenditure |
|------|------------|-------------|-------------------|-------------|-------------|
|      | Pesos      | Pesos       |                   | Pesos       | Pesos       |
| 1939 | 91,558,848 | 89,331,267  | 1942              | 77,015,000  | 103,217,000 |
| 1940 | 78,096,165 | 83,696,307  | 1943 <sup>1</sup> | 122,500,000 | 122,500,000 |
| 1941 | 81,711,000 | 113,186,000 | 1944 <sup>1</sup> | 105,713,281 | 105,713,281 |

<sup>1</sup> Estimates.

The budget estimates for 1941 provide for revenue from direct taxation of 26,450,000 pesos; from indirect taxation, 17,694,000 pesos; miscellaneous receipts, mostly from petroleum, 1,818,137 pesos. Estimated expenditure: public debt service, 20,410,746 pesos; defence, 15,800,826 pesos; public works, 15,564,160 pesos; education, 10,107,285 pesos.

On December 31, 1941, the total debt of the Central Government was 214,748,656 pesos; external debt in actual circulation was 84,025,711 pesos; internal debt was 130,723,945 pesos. The servicing of the United Kingdom sterling debt was resumed in July, 1942, and a definite settlement reached in December, 1943. British investments, 1944, were 7,714,689%, of which 9.0 per cent. were in default. American dollar loans outstanding at the end of 1941 were 123,000,000 dollars, of which 79.3 per cent. were in default. American direct investments, 1940, were 111,616,000 dollars.

### Defence.

Military service is compulsory between the years of 21 and 30. Service with the colours is for 1 year. The permanent Army consists of infantry,

artillery, cavalry, engineers, motorised troops and the usual services. The Air Force, to which are attached several training schools, comprises fighting and training squadrons and possesses an appreciable number of aircraft of various types. The peace effective is about 10,000; the war effective is about 300,000. Number of police, 5,500.

Colombia has 2 modern destroyers, the *Antioquia* (1932) and *Caldas* (1933); 3 seagoing gunboats; 3 coastguard patrol vessels; 4 river gunboats, and several motor launches for customs services. In 1934 the Colombian Navy was reorganised by retired British naval officers. Effectives in 1935: 184 officers and 686 warrant officers and men.

### Production and Industry.

Very little of the country is under cultivation but much of the soil is fertile and is coming into use as roads improve. Colombia is the largest producer of mild coffee, demand for which is unaffected by over-production in Brazil. Crops are grown by smallholders, and are picked all the year round. Quality is carefully guarded; the coffee census of 1935 showed 150,000 plantations with 532,200,000 producing trees. At the Washington Coffee Conference, November 1940, Colombia agreed to limit her coffee exports to the U.S.A.; quota for 1943-44 was 4,152,993 bags (of 60 kilos). Rice, for domestic consumption, is increasingly important; output, 1941, 119,841 metric tons. Banana exports, 1941, 2,291,693 stems (exports ceased in 1942, due to inroads of the sigatoka disease). The rubber tree grows wild, and its cultivation has begun. Fibres are being exploited, notable the 'fique' fibre, which furnishes all the country's requirements for sacks and cordage; output, 1941, 38,428,500 lbs. Tolu balsam is cultivated, and copaiba trees are tapped but are not cultivated. Dye and cedar woods are abundant on the Magdalena River, but little or no wood of any sort is exported. Forest lands total 150 million acres. An important agricultural colony has been established at Solano Bay in El Chocó Territory on the northern Pacific Coast. Livestock census in 1937 showed 9,167,455 cattle, 1,865,185 pigs, 1,018,267 horses, 913,993 sheep, 561,390 goats and 815,923 mules and asses.

Colombia is rich in minerals; gold is found in Antioquia, Cauca, Caldas, Tolima, Nariño, Chocó and Cundinamarca; output in 1943, 565,400 fine ounces. Other minerals are silver (248,243 fine ozs. in 1942), copper, lead, mercury, manganese, emeralds, and platinum (first discovered in Colombia in 1785), which was long abundant in the alluvial deposits of the Chocó River; production, 1941, 37,849 fine ozs. The working of the emerald mines is Government-controlled, but exports have ceased. The chief mines are those of Muzo (Government-owned) and Chiver (American-owned). The country also has coal, iron, limestone, sand, and fireclay deposits, so that in some parts it is highly favourable for the development of metallurgical industries. The extraction of salt from the remarkable mines in Zipaquirá (several hundred feet thick and covering several hundred square miles) and the evaporation at the numerous natural salt pans along the Caribbean coast are a Government monopoly, leased to the Banco de la República; total output of salt in 1941 was 23,927 tons. Petroleum production in 1941 amounted to 24,637,872 barrels; about half goes to Curaçao for refining. Oil concessions on national land issued in 1943 numbered 80, each embracing from 50,000 to 200,000 hectares; existing leases on private land covered 500,000 hectares.

Value of industrial output from 1,569 establishments in 1941 was 225,169,152 pesos, exclusive of salt, precious metals and petroleum. Value

banknotes in Colombia. The capital amounts to 11,735,800 pesos. Its note issues must be covered by a reserve in gold or foreign exchange of 80 per cent. of their value; deposits are covered by a special currency reserve up to 25 per cent. of their total. Gold stock has risen from 5,000,000 dollars, U.S., at the start, to 21,000,000 dollars at the outbreak of the war and to 88,000,000 dollars in August, 1944. On July 31, 1944, the Central Bank had gold valued at 150,032,000 pesos and foreign exchange of 114,328,000 pesos, against a note circulation of 154,551,000 pesos; deposits were 138,920,000 pesos.

The Agricultural Mortgage Bank of Bogotá, formed by the consolidation of the mortgage departments of 5 principal banks in 1925, was supplemented in 1931 by the Agrarian Credit Bank with capital of 10 million pesos subscribed by Government, Departments, Municipalities and others.

There are 23 commercial banks with total paid-up capital and reserves (June 30, 1942) of 23,220,000 pesos, including 3 foreign banks (1 English, 1 Canadian, 1 American) and 4 native mortgage banks, 1 savings and 1 credit bank for agriculture, industry and mining. This does not include the Banco de la República. The French-Italian Bank and the Banco Aleman-Antioqueño were placed under Government control when Colombia severed diplomatic relations with the Axis powers in December, 1941. Later, in May, 1942, the Banco Aleman-Antioqueño became a Colombian bank under the style of Banco Comercial-Antioqueño.

The metric system was introduced into the Republic in 1857, but in ordinary commerce Spanish weights and measures are generally used.

### Diplomatic and Consular Representatives.

#### 1. OF COLOMBIA IN GREAT BRITAIN.

*Ambassador.*—Dr. Don Jaime Jaramillo Arango (September 4, 1940).

*First Secretary.*—Dr. Don Abel Botero.

*Attachés.*—Tomas Jaramillo and Luis Robledo.

*Consul-General in Liverpool.*—Alvaro Holguin y Caro.

There are Consular representatives at London, Glasgow, Liverpool and Swansea.

#### 2. OF GREAT BRITAIN IN COLOMBIA.

*Ambassador.*—Thomas Maitland Snow (appointed May 19, 1941).

*Secretaries.*—T. B. Wildman and E. F. Wise.

*Military Attaché.*—Captain I. Higginbotham.

*Naval Attaché.*—Rear Admiral Hector Boyes (serving as Captain), C.M.G., C.I.E., R.N.

*Air Attaché.*—Wing-Commander H. G. F. Gaubert, D.F.C.

*Commercial Secretary.*—R. A. Macdonald.

There are Consular representatives at Barranquilla, Cartagena, Medellín, Manizales, Santa Marta, Coveñas, Cali, Buenaventura and Mariquita.

### COSTA RICA.

(REPÚBLICA DE COSTA RICA.)

#### Constitution and Government.

THE Republic of Costa Rica (literally the 'Rich Coast') has been an independent State since the year 1821, although it formed, from 1824 to 1829, part of the Confederation of Central America. It is governed under

a Constitution promulgated on December 7, 1871, and modified very frequently since that date. The legislative power is now vested in a single chamber called the Constitutional Congress, and made up (since 1939) of 44 deputies, one for every 8,000 inhabitants. The members of the Chamber are elected for the term of four years, one-half retiring every two years. The President is elected for four years; the candidate receiving the largest vote, provided it is over 40 per cent. of the total, is elected, but a second ballot is required if no candidate gets 40 per cent. of the total. By the Election Law of August 18, 1913, universal suffrage was adopted for all male citizens who are of age and able to support themselves, except those deprived of civil rights, criminals, bankrupts and the insane. Voting for President, Deputies and Municipal Councillors is, by the Law of July 26, 1925, secret, direct and free and, by an amendment to the Constitution in 1936, compulsory. Diplomatic relations with Panama, severed since 1921, were resumed October, 1928. Costa Rica is the seat of the Pan-American Agricultural Institute, serving all Latin America.

Costa Rica declared war on Japan on December 8, 1941, and on Germany and Italy on December 11, 1941; it joined the United Nations on January 1, 1942, and severed relations with Hungary and Rumania on May 15, 1942.

*President of the Republic.*—Teodoro Picado (elected on February 12, 1944; assumed office May 8, 1944, for ensuing four years).

The administration normally is carried on by nine Secretaries of State, appointed by the President, who direct the departments of: Interior and Police; Foreign Affairs, Justice and Public Worship; Agriculture; Education; Public Security; Finance and Commerce; Public Works; Hygiene and Public Health; Labour and Public Welfare.

### Area and Population.

The area of the Republic is estimated at 23,000 English square miles, divided into the seven provinces listed below. The last census, taken in May, 1927, showed a population of 471,525, made up as follows:—

| Province       | Population          |                           | Province        | Population           |                           |
|----------------|---------------------|---------------------------|-----------------|----------------------|---------------------------|
|                | Census<br>May, 1927 | Estimated<br>Jan. 1, 1944 |                 | Census<br>May, 1927  | Estimated<br>Jan. 1, 1944 |
| San José . . . | 153,183             | 229,504                   | Puntarenas . .  | 28,739               | 45,737                    |
| Alajuela . . . | 97,577              | 148,771                   | Limón . . . . . | 32,278               | 39,793                    |
| Heredia . . .  | 83,407              | 58,028                    |                 |                      |                           |
| Cartago . . .  | 70,199              | 106,242                   | Total . . . . . | 471,525 <sup>1</sup> | 706,596 <sup>1</sup>      |
| Guanacaste . . | 51,142              | 84,536                    |                 |                      |                           |

<sup>1</sup> There are about 3,500 aborigines (Indians).

The vital statistics for four years were as follows:—

|      | Marriages | Births | Deaths | Increase | Immigration | Emigration |
|------|-----------|--------|--------|----------|-------------|------------|
| 1939 | 4,052     | 27,027 | 11,687 | 15,340   | 7,626       | 7,183      |
| 1940 | 3,722     | 28,004 | 11,211 | 16,793   | 7,409       | 7,270      |
| 1941 | 3,880     | 28,263 | 13,559 | 14,704   | 11,901      | 11,294     |
| 1942 | 3,812     | 38,468 | 11,784 | 26,784   | 14,588      | 14,025     |

The population of European descent, many of them pure Spanish blood, dwell mostly around the capital, the city of San José (population, January 1, 1941, 76,178), and in the towns of Cartago (21,709), Limón (17,065), Alajuela (12,541), Heredia (10,397), Puntarenas (8,920), and Guanacaste (4,277). Limón, on the Caribbean coast, is the country's chief seaport. There are some 18,000 coloured British West Indians, mostly in Limón Province, on the banana farms. The native Indian population is dwindling.

Spanish is the language of the country.

### Religion and Education.

The Roman Catholic is the religion of the State, but there is entire religious liberty under the Constitution. The Archbishop of Costa Rica has under him the Bishop of Alajuela.

Elementary instruction is compulsory and free. Elementary schools are provided and maintained by local school councils, while the national government pays the teachers, besides making subventions in aid of local funds. In December, 1943, there were 797 elementary schools with 3,797 teachers and 75,150 enrolled pupils. For secondary instruction there are at San José a lyceum for boys with 761 pupils and 56 instructors, and a college for girls with 905 pupils and 66 teachers. A normal school established in 1915 at Heredia has 583 pupils and 52 teachers. There is also a high school at Cartago with 462 pupils and 29 teachers, and the Alajuela Institute has 552 pupils and 48 teachers. The National University, founded in San José in 1843, had in 1942, 118 professors in nine faculties. Expenditure on education, 1943, 8,515,851 colones. Beginning in 1944, English is being taught in all elementary schools.

### Justice.

Justice is administered by the Supreme Court of Justice, two Appeal Courts, and the Court of Cassation. There are also subordinate courts in the separate provinces, and local justices throughout the Republic. Capital punishment cannot be inflicted. In 1943 there were 665 criminal cases, and 10,973 cases of misdemeanour, including drink and traffic convictions.

### Finance.

The revenue and expenditure for five years have been as follows (nominally, £1 sterling = 10.45 colones; 1 colon = 78.79 cents, U.S., but since 1939 the controlled rate has been 1 colon = 17.79 cents, U.S., and 22.55 colones = £1):—

|                 | 1940       | 1941       | 1942       | 1943       | 1944 <sup>1</sup> |
|-----------------|------------|------------|------------|------------|-------------------|
|                 | colones    | colones    | colones    | colones    | colones           |
| Revenue . . . . | 41,762,891 | 42,602,822 | 39,635,723 | 50,350,221 | 38,536,563        |
| Expenditure . . | 43,991,991 | 47,393,502 | 49,840,192 | 71,542,272 | 88,586,368        |

<sup>1</sup> Estimates.

Revenue in 1943, included customs revenue, 19,630,199 colones; conversion tax, 1,466,612 colones; liquor monopoly, 10,664,455; Pacific Railway, 7,592,110 colones (gross); fixed export taxes (including one of 2 cents, U.S., per stem on bananas), 322,063 colones. The largest items of

expenditure (1943) were public debt service, 6,615,974 colones; public instruction, 8,515,851 colones; public works, 27,814,484 colones, and public safety, 6,965,783 colones.

The foreign debt of the Republic outstanding on January 1, 1944, was 141,817,185 colones, including 5 per cent. gold refunding bonds, 1911, 1,217,020; the French Loan of 1911 (pre-1914 gold) francs, amounting to 5,663,500 francs; a U.S. loan of 1926, 5,862,000 dollars; 7½ per cent. Pacific Railway bonds, 1,217,000 dollars (U.S.), and a loan from the Export-Import Bank of 6,395,000 dollars (U.S.). The internal debt amounted to 64,979,365 colones.

### Defence.

Costa Rica has an army of about 700 'resguardos' (mainly coastal guards), some 1,000 police and the Army proper of 500 officers and men. The standing and active Army is limited to 500 by a convention reached in 1923 by the States of Central America. The Republic has also 1 motor launch on the Atlantic side and 1 on the Pacific side for Revenue purposes.

### Production and Industry.

Agriculture is the principal industry. The cultivated area is about 1,040,000 acres; grass lands cover 6,552,000 acres. There are thousands of square miles of public lands in Costa Rica that have never been cleared, on which can be found quantities of virgin rosewood, cedar, mahogany, and other cabinet woods. The war has temporarily stimulated the collection of wild rubber, the establishment of plantation rubber on 2,500 acres, and the planting of some 11,500 acres to abaca or hemp. It has also led to intensive cutting and shipping of balsa wood, the quota for 1944 being 4 million board feet. The principal agricultural products are coffee (1942-43 crop, 24,214 metric tons), bananas (2,706,047 bunches, 1943) and cocoa (5,545 metric tons). Under the Inter-American Coffee Agreement, the export quota to the United States for 1943-44 was 263,644 bags (of 60 kilos). Maize, sugar-cane, rice and potatoes are commonly cultivated. About 5,000 acres are under tobacco. The distillation of spirits is a government monopoly. The live-stock, in 1929, consisted of 398,737 cattle, 84,563 horses, 83,174 pigs and 8,177 mules. Gold and silver are mined on the Pacific slope. There are also deposits of quartz, alabaster, granite, oil, alum, slate, onyx and mercury; sulphur and copper also exist, but mining in the Republic is not very fully developed. Output of salt is between 3,000 and 4,000 tons annually.

Most manufacturing activities in the country are based on agriculture. Electricity, derived from water power in the highlands, is widely used as motive power; it was nationalized in 1928.

### Commerce.

The value of imports into and exports from Costa Rica in 5 years (including coin and bullion) was as follows in colones (5·62 colones = 1 dollar, U.S.):—

|         | 1939       | 1940       | 1941       | 1942       | 1943        |
|---------|------------|------------|------------|------------|-------------|
|         | Colones    | Colones    | Colones    | Colones    | Colones     |
| Imports | 64,424,810 | 63,098,607 | 67,455,906 | 69,132,207 | 114,573,052 |
| Exports | 45,432,490 | 28,438,846 | 38,202,376 | 59,836,953 | 69,866,497  |

The value of the chief imports and exports for 1943 (in U.S. dollars, at the rate of 5·62 colones = 1 dollar) was as follows:—

| Imports                     | 1943<br>U.S. dollars | Exports | 1943<br>U.S. dollars |
|-----------------------------|----------------------|---------|----------------------|
| Cotton goods                | 2,709,746            | Coffee  | 7,997,749            |
| Mineral oil and derivatives | 914,751              | Bananas | 2,128,562            |
| Flour                       | 876,078              | Cocoa   | 1,106,926            |
| Lard                        | 752,924              |         |                      |
| Woollen textiles            | 657,341              |         |                      |
| Silk goods                  | 611,504              |         |                      |
| Jute bags                   | 573,875              |         |                      |

Of the import value in 1943, 60·8 per cent. was from the United States and 5·7 per cent. from the British Empire. Of the value exported in 1943, 74·3 per cent. went to the United States and 6·5 per cent. to the British Empire. Coffee furnished about 64 per cent. of exports, by value; bananas 16 per cent. and cocoa 8 per cent.

Total trade between the United Kingdom and Costa Rica (Board of Trade returns) for 5 years:—

|                                    | 1934      | 1935    | 1936    | 1937    | 1938    |
|------------------------------------|-----------|---------|---------|---------|---------|
|                                    | £         | £       | £       | £       | £       |
| Imports from Costa Rica into U.K.  | 1,240,563 | 713,357 | 674,054 | 558,948 | 806,447 |
| Exports to Costa Rica from U.K.    | 182,909   | 125,942 | 110,318 | 158,145 | 149,868 |
| Re-exports to Costa Rica from U.K. | 1,997     | 2,274   | 1,903   | 3,058   | 2,877   |

United Kingdom exports to Costa Rica since 1938 have been: 1939, 144,000; 1940, 220,000; 1941, 168,000; 1942, 118,000; 1943, 124,000; and 1944, 63,000. Totals for the first three years included shipments of war supplies (if any) by Government departments.

### Shipping and Communications.

In 1943, there entered and cleared the ports of the Republic 797 ships of 546,529 tons.

In July, 1940, plans for the canalization of the River San Juan, which divides Nicaragua and Costa Rica, and which would give both countries a clear waterway from the Caribbean Sea to the Pacific, were accepted by Costa Rica.

The railway system totalled (1939) 413 miles and connects San José with Limón, the Atlantic port, and with Puntarenas, the Pacific port; it is operated by 4 different companies. When the railway system is completed, through rail communication will be established between Port Limón and the new port of Almirante in Panama. Work on the Pan-American Highway is in progress. About 300 miles of motoring roads are now open.

In 1942 there were 450 post offices; international air mail and passenger services run both north and south from San José, 3 times each week, linking it with Central America and the United States. There are 490 route miles in operation.

There are 1,922 miles of telegraph lines, with 201 telegraph offices. In 1932 there were about 2,560 telephones; the telephone lines in 1942 had a length of 374 miles. Wireless telegraphy is working from Limón to Bocas del Toro (Panama), 60 miles, and to Bluefields, in Nicaragua, and to Colon, in Republic of Panama. The Government has a large wireless station at San José, and a small one at Colorado (mouth of R. San Juan, near Nicaraguan

border). There are 13 long-wave and 2 short-wave broadcasting stations, of which 12 are Government stations.

### Banking and Credit.

In October, 1914, the Banco Internacional de Costa Rica was established as a Government Bank of Issue. It was authorised (January, 1932) to issue up to 25,000,000 colones in notes to bearer (guaranteed by Government 6 per cent. Bonds, un-issued balance of Costa Rica Gold Refunding Bonds of 1911, and other Government securities). On January 1, 1937, the Banco Internacional was merged with the Credito Hipotecario to form the Banco Nacional, with an Exchange Equalization Board and control of coinage and currency. Commercial banks are represented on it. The average exchange rate in 1943 was 5·61 colones = 1 dollar (U.S.). The total circulation of the country on December 31, 1943, was: note circulation of the Banco Internacional, 76,253,254 colones; Conversion 'Caisse,' 132,983 colones; silver certificates, 4,613 colones; nickel, 2,288,641, and copper, 1,245,885 colones. Total, 79,925,376 colones.

The National Insurance Bank—a Government bank which has a monopoly of new insurance business—reported December 31, 1943, total insurance written amounting to 198,899,200 colones. The Mortgage Loan Bank is being liquidated by the Banco Nacional.

### Money, Weights and Measures.

On October 26, 1896, an Act was passed for the adoption of a gold standard, the monetary unit to be the gold *colon*, weighing 778 grammes, .900 fine (value about 22·9d. at par or 46·5 cents, U.S.). Gold coins have, however, disappeared from circulation. Silver coins of 1 colon, 50 centimos, and 25 centimos have also largely disappeared; in 1935 they were replaced by 1,200,000 colones of coins made up of 3 parts copper and 1 part nickel, and given the same value as the subsidiary silver currency. There are copper coins of 10 centimos and 5 centimos.

The metric system is legally established and now in use; but in the country districts the following old Spanish weights and measures are found:—

|                            |                                 |
|----------------------------|---------------------------------|
| The <i>Libra</i> . . . . . | = 1·014 lb. avoirdupois.        |
| „ <i>Quintal</i> . . . . . | = 101·40 „                      |
| „ <i>Arroba</i> . . . . .  | = 25·35 „                       |
| „ <i>Fanega</i> . . . . .  | = 11 bushels (imperial bushel). |

On January 15, 1921, the Republic adopted as its standard time that of the meridian 90 degrees west of Greenwich.

### Diplomatic and Consular Representatives.

#### 1. OF COSTA RICA IN GREAT BRITAIN.

*Envoy Extraordinary and Minister Plenipotentiary for Europe.*—(Vacant.)  
*Consul.*—John Charles Eggers.

There are Consular Representatives at Birmingham, Bristol, Cardiff, Glasgow, Manchester, Southampton and Swansea.

#### 2. OF GREAT BRITAIN IN COSTA RICA.

*Envoy Extraordinary and Minister Plenipotentiary.*—S. G. Irving, C.M.G. (who is also Minister at Panama, where he resides) (appointed September 11, 1943).

*Chargé d'Affaires and Consul.*—Norman Mayors.

## CUBA.

### Constitution and Government.

CUBA, except for a brief period of British occupancy in 1762–63, remained a Spanish possession from the date of its discovery by Columbus in 1492 until December 10, 1898, when the sovereignty was relinquished under the terms of the Treaty of Paris which ended the armed intervention of the United States in the struggle of the Cubans against Spanish rule. Cuba thus became an independent State. A convention which assembled on November 5, 1900, drew up a constitution which was adopted February 21, 1901, under which the Island assumed a republican form of government, with a President, Vice-President, a Senate and a House of Representatives.

See THE STATESMAN'S YEAR-BOOK for 1935 for subsequent developments.

Since the last representative in Cuba of the King of Spain, General Don Adolfo Jimenez Castellanos, handed over the island on January 1, 1899, the following have been at the head of the Administration:—

| Took Office                                                                                   |               | Took Office                                      |                |
|-----------------------------------------------------------------------------------------------|---------------|--------------------------------------------------|----------------|

| <i>President.</i> —Dr. Ramón Grau San Martín (elected June 1, 1944; born September 13, 1887). |               |                                                  |                |

The President has a Cabinet consisting of the Premier, his own secretary, 12 heads of departments and 3 ministers without portfolios.

The Constitution, or 'Ley Constitucional,' was drafted by President Mendieta and his Cabinet and came into effect June 12, 1935; based largely on the Constitution of 1901, it provided for a 4-year term for the President (without re-election), restored the Vice-Presidency, gave Representatives 4-year and Senators 8-year terms of office, and granted votes to women. In February, 1940, a convention began drafting a new constitution, which came into force in October, 1940. According to this the Cabinet is responsible to Congress; if it receives a vote of no-confidence, the Cabinet must resign within 48 hours. The Constitution also provides for thirty days' holiday with pay for all manual workers.

The country is divided into six provinces and 119 municipalities.

Cuba declared war on Japan on December 9, 1941, and on Germany and Italy on December 11.

### Area and Population.

Cuba has an area of 44,164 square miles (41,634 square miles for the island of Cuba, 1,180 square miles for the Isle of Pines, and 1,350 square miles for the other islands), with an estimated population, on December 31, 1938, of 4,227,587, of which 2,242,114 were males, and 1,985,473 females; 3,083,809 are white and 1,143,788 are coloured or mixed. There are 305,230 classified foreigners. Estimated total population, December 31, 1940, was 4,199,952. A census taken in 1943 showed a total population of 4,777,284. The area, population and density of population of each of the six provinces, on December 31, 1938, were as follows:—

| Province      | Area         | Population<br>(December 31, 1938) | Pop. per sq.<br>mile |
|---------------|--------------|-----------------------------------|----------------------|
|               | Square miles |                                   |                      |
| Havana        | 3,170        | 1,015,677                         | 329.3                |
| Pinar del Rio | 5,206        | 564,388                           | 70.0                 |
| Matanzas      | 3,256        | 364,126                           | 111.8                |
| Santa Clara   | 8,237        | 371,418                           | 105.5                |
| Camagüey      | 10,064       | 489,897                           | 48.6                 |
| Oriente       | 14,211       | 1,142,620                         | 80.4                 |
| Total         | 44,164       | 4,227,587                         | 95.7                 |

The language is Spanish, though English is widely understood.

The chief towns (with population, 1938) are Havana, 568,913; Holguine 140,854; Camagüey, 138,295; Santiago de Cuba, 107,125; Santa Clara, 99,509; Sancti Spiritus, 92,299; Cienfuegos, 92,258; Matanzas, 72,826; Guantánamo, 68,372; Manzanillo, 65,965, and Pinar del Rio, 64,823.

### Justice and Religion.

There is a Supreme Court in Havana and a Court of Appeal in each of the Provinces. The Provinces are divided into judicial districts, with courts for civil and criminal actions, with municipal courts for minor offences. The Civil Code guarantees aliens the same property and personal rights as are enjoyed by natives. There is no State Church, though Roman Catholics predominate.

### Education.

Education is compulsory and free. In the year ending June 30, 1940, the 8,796 public class-rooms had 9,410 teachers and 445,706 children. There

were also (1939) 67 travelling teachers who taught, in 145 communities, 3,089 children; 188 night schools for working people with 8,972 pupils and (1940) 473 private schools with 1,859 teachers and 85,290 pupils. The Government maintains 21 institutes for advanced education and 8 normal schools for training teachers. Near Havana there is a special school with a staff drawn from English public schools, on which the school is modelled. University instruction is given at the University of Havana (founded on September 12, 1721). In 1929-30, it had 4,795 students, of whom 2,303 were studying medicine.

### Finance.

Revenue and expenditure for 5 years (Cuban peso = U.S. dollar) were as follows:—

|             | 1938-39    | 1940       | 1941       | 1942       | 1943        |
|-------------|------------|------------|------------|------------|-------------|
|             | Pesos      | Pesos      | Pesos      | Pesos      | Pesos       |
| Revenue     | 83,250,000 | 75,670,000 | 75,945,000 | 89,960,000 | 119,138,796 |
| Expenditure | 83,178,788 | 79,238,000 | 77,549,000 | 89,956,000 | 111,316,000 |

Note:—In 1939, the fiscal year was made concurrent with the calendar year. In November, 1941, it was decided to revert to the previous fiscal year, from July 1 to June 30.

Actual revenue, 1942, was 95,872,000 pesos, but the transfer to the budget of 10,272,000 pesos from taxes earmarked for other purposes gave total revenue of 105,996,000 against expenditure (highest on record) of 104,810,000 pesos. Internal revenue produced 39,457,000 pesos and customs 19,872,000 pesos.

The consolidated public debt of the Republic (December 31, 1942) was 118,416,000 pesos, of which 7,317,000 pesos was internal and 111,099,000 pesos was the external debt. This is exclusive of the floating debt, believed to exceed 50,000,000 pesos. There is a contingent liability for 42,000,000 pesos outstanding of the Sugar Stabilisation Loan. On April 10, 1934, dollars outstanding of the redemption of the external debt were suspended until payments toward the redemption of the external debt were suspended until such time as the Government annual revenues reach 60,000,000 pesos. On December 31, 1941, American dollar loans to Cuba outstanding amounted to 67,200,000 dollars. American direct investments, 1940, were 559,797,000 dollars, compared with 918,957,000 in 1929. British investments, end of 1944, were 27,425,885, of which 82.4 per cent. were in default.

### Defence.

The army is composed of 895 officers and 15,450 men, organized in 6 cavalry regiments, 4 infantry battalions and 3 batteries with auxiliary services. The navy consists of 2 escort vessels (*Cuba* and *Patria*), 5 gunboats, an armed transport, and about a dozen coastguard vessels of small size. The strength of the navy is 2,508 men, 130 officers and 25 cadets. The air force consists of 116 men, with 16 aircraft. Unofficial estimates place the personnel of the Army, Navy and police at 20,000 men. 'Reservists' (men and women), number 30,000.

### Production and Industry.

The staple products of Cuba are tobacco and sugar, but coffee, cocoa, cereals and potatoes are grown, and a considerable trade is done in fruit and minerals. Cuba is the second largest producer of sugar in the world. In 1941, 2,326,717 acres were producing sugar-cane; 23 sugar mills manufactured 2,406,988 metric tons of sugar and 331,351,953 gallons of high test molasses; in 1941, 446,604,845 gallons of molasses and syrup were exported,

chiefly to United States. Production of raw sugar in recent crop years has been limited by presidential decree; output for 1944 was 5,652,123 short tons. Tobacco is grown principally in the famous Vuelta-Abajo district, near Pinar del Rio. Output in 1943-44 was 59,500,000 lb. from 90,347 acres on some 5,000 farms. In 1940, number of cigars produced amounted to 22,819,526. Coffee production, chiefly from the Province of Oriente, amounted in 1943-44 to 604,000 bags (of 60 kilos each). Under the Inter-American Coffee Agreement, Cuba's export quota to the United States, 1943-44, was 105,458 bags (each of 132 pounds). The principal fruits exported, practically all to the United States, are pineapples, bananas, citrus fruit, tomatoes and pimientos. Export of honey (principally to the United States) in 1943, 15,279,800 lb., valued at 1,222,900 dollars.

In 1940, the live stock in the island included 5,334,813 head of cattle, the foundation of a rapidly expanding trade in chilled and frozen beef.

Cuba has forest lands, many of which are in private ownership: State forests total about 1,250,000 acres. These forests contain valuable cabinet woods, such as mahogany and cedar, besides dye-woods, fibres, gums, resins, and oils. Cedar is used locally for cigar-boxes, and mahogany is exported; hard woods are used for railway sleepers, carts, ploughs and other local purposes.

Iron ore abounds, with deposits estimated at 3½ milliard tons, of which 90 per cent. are held as reserves by American steel interests; shipments, 1940, 109,453 metric tons. Shipments of copper ore (1940) was 40,161 metric tons; manganese ore, 133,361 metric tons; crude chromite, 53,583 tons; silica, 88,700 tons; barytes, 16,105 tons. Gold is also worked. Cuba has a small annual output of petroleum, about 11,000 barrels. Six salt deposits yielded 28,005,230 lbs. of refined salt in 1937.

Cuban industrial production in 1939 was valued at 63,970,624 pesos. Workers employed in these industries totalled 32,010. Raw material involved totalled 22,334,299 pesos.

### Commerce.

The value of the imports and exports (including bullion and specie) for 5 years were as follows (the Cuban peso = the U.S. dollar):—

|         | 1939        | 1940        | 1941        | 1942        | 1943        |
|---------|-------------|-------------|-------------|-------------|-------------|
|         | Dollars     | Dollars     | Dollars     | Dollars     | Dollars     |
| Imports | 105,861,814 | 103,860,139 | 133,590,137 | 146,737,569 | 177,436,346 |
| Exports | 147,676,258 | 127,284,307 | 211,507,591 | 182,375,414 | 350,623,767 |

The United States in 1943 took 85·7 per cent. of exports and furnished 78 per cent. of the imports; the United Kingdom took 7·9 per cent. of the exports and supplied 2·5 per cent. of the imports. The value of principal exports (1943) were, in dollars:—sugar, 280,412,480; tobacco, 28,063,628.

Total trade between Cuba and the United Kingdom (Board of Trade returns) for five years:—

|                              | 1934    | 1935      | 1936      | 1937      | 1938      |
|------------------------------|---------|-----------|-----------|-----------|-----------|
|                              | £       | £         | £         | £         | £         |
| Imports from Cuba into U.K.  | 767,916 | 3,759,537 | 5,248,673 | 4,519,791 | 4,962,639 |
| Exports to Cuba from U.K.    | 910,428 | 874,258   | 1,019,498 | 1,410,001 | 848,685   |
| Re-exports to Cuba from U.K. | 9,919   | 18,300    | 14,155    | 17,791    | 14,061    |

United Kingdom exports to Cuba (Board of Trade returns) since 1938 have been: 1939, 675,000£.; 1940, 904,000£.; 1941, 907,000£.; 1942, 865,004£.; 1943, 738,000£., and 1944, 470,000£. Totals for the first three years included shipments of war supplies (if any) by Government departments.

### Shipping and Communications.

The merchant marine of Cuba in July, 1939, consisted of 39 steamers of 29,947 gross tonnage. In 1940, 3,688 vessels entered the ports of the Republic in the foreign trade.

In Cuba there were in 1940, 3,070 miles of public railway—the United Railways of Havana and the Cuba Railway being the greatest systems. The lines now connect the principal towns and seaports from Pinar del Rio in the west, to Santiago de Cuba in the east. In addition the large sugar estates have 2,892 miles of private lines connecting them with the main lines.

There were 2,040 miles of highways open to traffic in 1938, of which 846 miles are first-class. The new and impressive Central Highway, traversing the island for 706 miles from Pinar del Rio to Santiago and costing 101,123,000 dollars, was opened February 24, 1931. There are (1941) 3,402 buses and 14,625 motor trucks using the new highways in competition with the railroads and 31,474 automobiles. There are (1938) 634 post, 358 telegraph offices, and 150 radio and radio-telegraph stations (1940), of which 14 are operated by the Government. There are 3,545 miles of public and 8,902 miles of private telegraph wires. Cuba has 74 medium-wave and 6 short-wave broadcasting stations. The telephone system (1942) had 68,483 instruments. Direct telephone connection with American and European cities has been maintained since 1921. Air mail service between Cuba and Central America, and between Cuba and New York, was established in 1930.

### Currency and Banking.

By the law of November 7, 1914, the monetary unit was a gold peso (equal to the U.S. gold dollar) of 1·6718 grammes (1·5046 grammes fine). On May 22, 1934, the peso (following the devaluation of the dollar to 59·06 per cent. of its former value) was reduced to 0·9878 gramme of gold (0·8886 gramme fine). The gold coins were the 20, 10, 5, 4, 2 and 1 peso pieces; the 20, 10 and 5 pesos pieces were of the same weight and value as the corresponding United States gold coins. The old gold pesos and U.S. gold coins are no longer legal tender, but may only be sold to the Government at the rate of 35 silver pesos per oz. troy.

Silver is coined in pieces of 1 peso, 40 cents, 20 cents, and 10 cents, while nickel coins of 5, 2, and 1 cent pieces are also issued. There is no limit to the coinage of silver. Between 1933 and 1938 (inclusive), 66,300,000 silver pesos were minted in order to cover the national deficits. Note circulation on June 30, 1944, was 203,479,912 pesos, coverage for which consisted of 76,529,774 dollars in gold bullion, 1,240,712 pesos in gold coin, 45,919,426 dollars in United States currency, and 79,790,000 pesos in 1-peso silver coins.

Banking is largely in the hands of the Royal Bank of Canada, the National City Bank of New York, the Chase National Bank of New York, the Bank of Nova Scotia, and the Banco del Comercio. Total number of banks and branches is 169. Total bank assets, December 31, 1942, 261 million dollars.

The metric system of weights and measures is in use.

## Diplomatic and Consular Representatives.

### 1. OF CUBA IN GREAT BRITAIN.

*Envoy and Minister.*—Guillermo de Blanck y Menocal (appointed February, 1937).

*Counsellor.*—Dr. Vicente Valdes Rodriguez.

*Attaché.*—Ignacio de Agramonte.

*Consul* (in London).—Julio A. Brodermann y de Vignier.

There are Consular representatives in Belfast, Birmingham, Cardiff, Glasgow and Liverpool.

### 2. OF GREAT BRITAIN IN CUBA.

*Envoy and Minister.*—James Lieshman Dodds, C.M.G. (appointed July 13, 1944).

*Naval Attaché.*—Rear-Admiral H. Pott, M.V.O., R.N.

*Military Attaché.*—Major F. A. Samson.

*Air Attaché.*—Squadron Leader C. J. Lewin.

*Consul-General.*—E. A. Cleugh, M.V.O.

There are Vice-Consuls at Camaguey, Cienfuegos and Santiago de Cuba.

## Books of Reference concerning Cuba.

### 1. OFFICIAL PUBLICATIONS.

## CZECHOSLOVAKIA.

(ČESKOSLOVENSKÁ REPUBLIKA.)

THE term Czechoslovaks comprises two branches of the same Slav nation: the Czechs (pronounced Tchechs) of Bohemia, Moravia and Silesia, and the Slovaks of Slovakia.

The Czechoslovak State came into existence on October 28, 1918. On that day the *Národní Výbor* (National Council) took over the government of the Czechoslovak countries, including Bohemia, Moravia, Silesia, Slovakia and Ruthenia, which had hitherto formed part of the former Austro-Hungarian Monarchy. On November 14, 1918, the Czechoslovak National Assembly met in Prague, and formally declared the Czechoslovak State to be a Republic, with Professor T. G. Masaryk as its first President.

By the Treaty of Peace of September 10, 1919 (the Treaty of St. Germain), the Allied and Associated Powers formally recognized the Czechoslovak Republic, declaring that 'the peoples of Bohemia, of Moravia, and of part of Silesia, as well as the peoples of Slovakia, have decided of their own free will to unite . . . for the purpose of forming a single sovereign independent state under the title of the Czechoslovak Republic.'

In July and August, 1938, the German Government intensified the agitation for the cession to Germany of the Sudeten (border) districts of Czechoslovakia. On September 12, Hitler made a speech in which the German demands were uncompromisingly put forward, and presently the German Government issued an ultimatum, in which it threatened to seize the Sudeten territory by force on October 1. The Four Power Conference (Gt. Britain, France, Germany and Italy) at Munich on September 29 averted warlike measures, but the Germans obtained all their demands. By October 1 the first German troops entered the Sudeten area and portions of Slovakia (Petřalka, Devin, etc.), and by October 10 German troops were in occupation of all the territory claimed by Germany. The new frontier with Germany was eventually fixed on November 20, 1938. (See Cmd. 5908.)

For the results of the Munich Agreement, see THE STATESMAN'S YEAR-BOOK for 1939, p. 820.

**Sudetenland.**—On November 21, 1938, the Sudeten territory was by Hitler's decree joined to Germany. At the census of May 17, 1939, the territory had a population of 3,396,244 (1,608,885 males and 1,787,359 females), living in an area of 29,110 sq. kilometres or 11,236 sq. miles.

**The Protectorate of Bohemia and Moravia.**—The arrangement agreed to at Munich did not long continue. On March 15, 1939, German troops, without any notice, invaded Bohemia and invested Prague. On March 16, 1939, Hitler issued a decree in which he declared that Czechoslovakia had ceased to exist, and that by reason of the 'greatness and the qualities of the German people,' they alone were fitted to maintain peace in the territories of Czechoslovakia. Accordingly, the territories of Bohemia and Moravia were declared a Protectorate of the German Reich as the 'Protectorate of Bohemia and Moravia.' Great Britain, the U.S., France and the U.S.S.R. refused to recognize this new status. The citizens of the Protectorate possess only a sort

of second-class citizenship, inferior to the full citizenship of the Reich. While the Protectorate might be expected to be autonomous and administer itself, and while the Head of the State is permitted to remain, the real ruler of the country is the Reich Protector, appointed by Berlin. Germany is responsible for the foreign affairs of the Protectorate and for its defence; Germany also takes charge of communications and of the post and telephone services. The Protectorate belongs to the Customs Union of the Reich.

On October 1, 1940, the German Government abolished the Customs boundary between Germany and Bohemia-Moravia. The Reichsmark is the official currency between the Protectorate and other countries, and the Czechoslovak National Bank and most of the other Czech banks have become branches of Berlin institutions.

Theoretically there are two parallel administrative systems, one for the 'autonomous' Czech Government, the other for the Protector. In practice, however, the Protector's jurisdiction is omnipotent.

Since September 8, 1939, the Protectorate is considered by the British Government as territory in the occupation of Germany in the meaning of the Trading with the Enemy Act.

The population in 1939 was estimated at 7,380,000.

*President.*—Dr. Emil Hácha (born in Trhové Sviny, Bohemia, July 12, 1872; elected November 30, 1938).

*Reich Protector.*—Dr. Wilhelm Frick (appointed August 24, 1943).

Slovakia declared its independence as the Republic of Slovakia on March 14, 1939, and on March 16 Hitler undertook to 'protect' Slovakia; on March 18, 1939, a Treaty was signed in Vienna by Hitler and von Ribbentrop for Germany, and by Dr. Tiso and Dr. Durkansky for Slovakia, with the following provisions:—

1. Germany guarantees to protect the boundaries of Slovakia for a period of 25 years. To afford this protection the German Armed Forces are entitled at any time to construct military works in a zone running westwards from the Slovak frontier and eastwards on a general line running along the eastern slope of the Small Carpathians, the eastern slopes of the White Carpathians, and the eastern slopes of the Javorník Mountains. These military works may be manned by the military forces of German troops.

2. Slovakia is an independent sovereign State, with its own army, its own currency, and its own diplomatic representatives abroad.

3. Slovakia is to receive, as the basis of its currency, 15 to 25 per cent. of the gold and foreign exchange holdings of the Czechoslovak National Bank.

4. Slovakia will also receive a goodly portion of Czech war material at present located within its borders.

5. Slovakia is at liberty to join the German Customs Union.

*President of Slovakia.*—Dr. Josef Tiso (elected October 26, 1939).

*Prime Minister and Minister of Foreign Affairs.*—Dr. Štepan Tiso (September 5, 1944).

The capital of Slovakia is Bratislava (Pressburg).

Since September 8, 1939, Slovakia is likewise considered by the British Government as territory in the occupation of Germany.

A draft constitution for Slovakia was agreed to by the Slovak Government on June 22, 1939. This declares that Slovakia is a Republic on a

totalitarian basis with a President at its head, elected by Parliament for a period of 7 years. The constitution further provides for setting up 6 'estates' or 'corporations,' and every citizen must be a member of one of these.

Slovakia signed the Three Power Pact on November 24, 1940.

Ruthenia was occupied by Hungary partly after the Vienna Arbitration in November, 1938, and partly on March 14, 1939. The whole territory covers 4,871 square miles, with a population of 725,357, and received the name of 'Carpatho-Ukraine.' This territory was liberated from enemy occupation in October, 1944, by Soviet and Czechoslovak troops.

On July 29, 1941, recognition was given to the Czechoslovak Government in London.

*President of the Czechoslovak Republic.*—Dr. Edward Benesh (born 1884).

On September 12, 1944, the Cabinet was reconstructed as follows:—

*Prime Minister.*—Mgr. Jan Šrámek.

*Minister of Foreign Affairs, Deputy Prime Minister and Minister of National Defence.*—Jan Masaryk.

*Minister of Finance.*—Ladislav Feierabend.

*Minister of Interior.*—George Slavík.

*Minister for Economic Reconstruction.*—František Némec.

*Minister for Industry and Commerce.*—Václav Mojer.

*Minister of Social Welfare.*—Jan Bečko.

*Minister of Justice.*—Jaroslav Stránský.

*Minister of Agriculture and Public Works.*—Jan Lichner.

*Minister of State.*—Hubert Ripka.

Dr. Benesh and members of his Cabinet returned to liberated Czechoslovakia on February 26, 1945.

*British Ambassador to the Czechoslovak Government.*—Philip Nichols, C.M.G., M.C. (appointed October 24, 1941).

**Area and Population.**—The Czechoslovak Republic consists of Bohemia, Moravia and Silesia, Slovakia, and Ruthenia (Carpatho-Ukraine).

The area (1935) and population of the various provinces, according to the census of December 1, 1930, were as follows:—

|                             | Area in<br>square<br>kilometres | Area in<br>English<br>sq. miles | Census<br>Dec. 1, 1930 | Population<br>per square<br>mile, 1930 |
|-----------------------------|---------------------------------|---------------------------------|------------------------|----------------------------------------|
| Bohemia                     | 52,062                          | 20,101                          | 7,109,376              | 353.7                                  |
| Moravia and Silesia         | 26,808                          | 10,351                          | 3,565,010              | 344.4                                  |
| Slovakia                    | 49,006                          | 18,921                          | 3,329,793              | 176.0                                  |
| Ruthenia (Carpatho-Ukraine) | 12,617                          | 4,871                           | 725,357                | 148.9                                  |
| Total                       | 140,493                         | 54,244                          | 14,729,536             | 271.5                                  |

Of the total population 9,756,604 are Czechoslovaks, 3,318,445 Germans, 719,569 Hungarians, 568,941 Russians, 100,322 Poles, 204,779 Jews, and 60,876 others; total, 14,729,586. There were besides 249,971 aliens.

Census on December 15, 1940, in Slovakia showed a population of 2,653,564.

The population of the principal towns still in Czechoslovakia after the territorial changes of 1938 was, according to December 1, 1930, census figures:—

|                             |         |                            |        |                  |        |
|-----------------------------|---------|----------------------------|--------|------------------|--------|
| Praha (Prague) . . . . .    | 848,823 | Budějovice České . . . . . | 43,686 | Přelov . . . . . | 21,870 |
| Brno . . . . .              | 264,925 | Prostějov . . . . .        | 35,487 | Zlín . . . . .   | 21,584 |
| Ostrava, Moravská . . . . . | 125,847 | Pardubice . . . . .        | 26,641 | Nitra . . . . .  | 21,259 |
| Bratislava . . . . .        | 128,862 | Trnava . . . . .           | 22,971 | Kladno . . . . . | 20,751 |
| Plzeň . . . . .             | 114,704 | Písek . . . . .            | 22,302 |                  |        |
| Olomouc . . . . .           | 66,440  | Ostrava Slezská . . . . .  | 22,289 |                  |        |

**Religion.**—The majority of the population in the Czechoslovak Republic was Catholic. In 1930 the division of the population according to religion was:—Roman Catholics, 10,831,696; Greek and Armenian Catholics, 586,041; Protestants, 1,129,758; Orthodox, 145,598; Jews, 356,330; Old Catholics, 22,712; other faiths, 9,878; and without any religion, 854,638.

In January, 1920, part of the Roman Catholic clergy of Czechoslovakia decided to withdraw from the jurisdiction of the Pope and to found a Czechoslovak Church, which had, according to the Census of 1930, 793,385 adherents.

**Education.**—The following table contains the data for elementary and advanced schools (public and private) in Czechoslovakia as at October 31, 1937:—

|                     | Elementary Schools<br>(public and private) |                            |                             | Higher Grade Schools<br>(public and private) |                            |                             |
|---------------------|--------------------------------------------|----------------------------|-----------------------------|----------------------------------------------|----------------------------|-----------------------------|
|                     | No. of<br>Schools                          | No. of<br>Pupils<br>(boys) | No. of<br>Pupils<br>(girls) | No. of<br>Schools                            | No. of<br>Pupils<br>(boys) | No. of<br>Pupils<br>(girls) |
| Bohemia             | 6,815                                      | 327,039                    | 338,100                     | 1,164                                        | 139,018                    | 115,300                     |
| Moravia & Silesia } | 3,640                                      | 194,181                    | 199,427                     | 660                                          | 72,022                     | 60,154                      |

| Ruthenia .          | 809                                        | 72,507                     | 72,215                      | 49                                           | 5,923                      | 5,307                       |
| Total .             | 15,552                                     | 860,371                    | 868,579                     | 2,105                                        | 245,510                    | 214,465                     |

During the school-year 1936-37 there were in Czechoslovakia 380 secondary Latin and technical schools (gymnasias and real-schools) with 154,768 pupils.

There were 4 universities in Czechoslovakia, and 4 technical high schools with students as follows (winter term 1936-37):—

| Universities              | Number of Students |         | Technical High Schools | Number of Students |         |
|---------------------------|--------------------|---------|------------------------|--------------------|---------|
|                           | Total              | Females |                        | Total              | Females |
| Prague, Czech (1848)      | 9,300              | 2,343   | Prague, Czech          | 3,952              | 224     |
| Prague, German            | 4,429              | 701     | Prague, German         | 1,301              | 51      |
| Brno, Czech (1918)        | 3,363              | 714     | Brno, Czech . .        | 984                | 24      |
| Bratislava, Slovak (1919) | 2,264              | 356     | Brno, German .         | 890                | 33      |
|                           | 19,356             | 4,116   |                        | 7,027              | 232     |

During 1939 the Reich Protector closed both Czech universities and technical high schools and all Czech schools of university rank in Bohemia and Moravia. Secondary and elementary schools have also been rigorously

reduced in numbers on the pretext that acquisition of knowledge by the Czechs is superfluous.

**Finance.**—Budget estimates for five years in thousands of crowns:—

|                       | 1935                     | 1936                     | 1937                     | 1938 <sup>a</sup>         | 1939 <sup>a</sup>        |
|-----------------------|--------------------------|--------------------------|--------------------------|---------------------------|--------------------------|
| Revenue . . . . .     | 1000 crowns<br>7,365,256 | 1000 crowns<br>8,032,531 | 1000 crowns<br>8,456,499 | 1000 crowns<br>10,120,233 | 1000 crowns<br>8,191,400 |
| Expenditure . . . . . | 7,983,298                | 8,032,196                | 8,454,971                | 10,117,423                | 3,191,300                |

<sup>a</sup> Ordinary budget. Extraordinary budget provides for an additional expenditure of 3,508,688,300 crowns to be provided by credit operations.

<sup>b</sup> These estimates are for the Central Government alone. Estimates for 1939 for Bohemia, Moravia and Silesia provide 4,638 million crowns revenue and 4,901 million crowns expenditure.

The national debt was as follows (in million crowns):—1938: internal debt, 43,532; foreign debt, 9,418; total, 52,950. Total, 1939, 54,000; 1943, Bohemia, Moravia, 59,771; Slovakia, 5,230.

Budget of Slovakia, 1945:—revenue, 3,307 million crowns; expenditure, 4,256 million crowns.

**Defence.**—After the German invasion of Bohemia and Moravia, the Czechoslovak army was disbanded and disbanded. In the Protectorate a Government army of 7,000 men was established on a voluntary basis, with a period of service of 12 years.

On January 18, 1940, universal military service was introduced for all men in Slovakia between 20 and 50. The period of service was 2 years. But in the autumn of 1944 the army was disbanded and its ranks reorganized as a labour corps.

**Production and Industry.**—Agriculture in the Czechoslovak Republic was highly developed and intensive farming was carried on. In 1937, 5,854,155 hectares (41·67 per cent. of the total land area) were returned as arable land, 4,686,741 hectares (32·65 per cent.) forests, 2,331,271 hectares (16·59 per cent.) meadows and pastures.

In 1935-36, there were 119 sugar factories in the country, which produced 572,746 metric tons of sugar. Hops of excellent quality are also grown, both for export and beer production (Pilsener). The agricultural industries include also flourishing beer, spirit, malt and foodstuffs industries.

On January 1, 1939, the number of live-stock in Bohemia and Moravia was: Cattle, 2,280,755 (including cows, 1,201,816); horses, 273,261; pigs, 1,607,191; sheep, 21,992, and goats, 591,669. In Slovakia (January 1, 1941): cattle, 902,610; horses, 164,201; pigs, 506,272; sheep, 279,554.

Czechoslovakia ranks among the most richly wooded countries in Europe, and the timber industry is important.

The mineral production of the Czechoslovak Republic before the German occupation comprised both soft and hard coal (chief coalfields Most, Chomutov, Teplice, Moravská Ostrava, and Falknov), iron, graphite, and garnets, silver (in Bohemia), copper and lead (in Slovakia), and rock-salt (in Eastern Slovakia and Ruthenia).

The number of factories in 1936 was 10,934. Of these, 1,631 were textile mills, 2,035 glass works and stone factories, 1,700 for food production, 1,180 for furniture and bent wood manufacture, 920 machine factories, 926 for metal manufacture, 370 paper mills, 633 chemical factories.

**Commerce.**—Imports and exports for 5 years are shown as follows (in thousands of crowns):—

|               | 1933      | 1934      | 1935      | 1936      | 1937       |
|---------------|-----------|-----------|-----------|-----------|------------|
| Imports . . . | 6,125,196 | 6,891,566 | 6,742,147 | 7,916,215 | 10,981,526 |
| Exports . . . | 5,923,023 | 7,287,549 | 7,946,649 | 8,036,368 | 11,982,668 |

Slovakia: imports, 1943, 4,365,000 crowns; exports, 4,094,000 crowns.

Total trade between the United Kingdom and Czechoslovakia for 5 years (according to Board of Trade returns):—

|                                            | 1934        | 1935        | 1936        | 1937        | 1938        |
|--------------------------------------------|-------------|-------------|-------------|-------------|-------------|
| Imports from Czechoslovakia into U.K. . .  | £ 3,680,640 | £ 4,837,141 | £ 5,843,862 | £ 7,279,625 | £ 6,937,592 |
| Exports to Czechoslovakia from U.K. . .    | 1,246,867   | 1,432,087   | 1,821,345   | 2,601,124   | 2,287,389   |
| Re-exports to Czechoslovakia from U.K. . . | 240,033     | 309,962     | 504,748     | 580,052     | 562,086     |

**Communications.**—On December 31, 1936, there were 13,925 kilometres or 8,653 miles of railway in the Czechoslovak Republic.

In 1936, there were nearly 43,615 miles of road in the Czechoslovak Republic, of which 5,899 miles are maintained by the State, 4,114 by the provinces, the remainder being interregional roads, for the upkeep of which the district authorities are responsible.

**Banking and Currency.**—In 1943 there were 7 joint-stock banks in Bohemia and Moravia (the capital of each, in million crowns, shown in brackets): Zivnostenska Banka (396.25), Böhmische Union-Bank (150), Böhmische Escompte-Bank (150), Moravská Banka (120.6) and Landwirtschaftliche Bank fuer Böhmen und Mähren (75). Each of these institutions has come under the control of one or other of the great German banks.

On June 30, 1944, the deposits in the savings banks in the German Protectorate amounted to 24 million crowns.

The monetary unit in the Czechoslovak Republic was the *Koruna* or Crown (K) of 100 *halefu* or heller. On March 17, 1939, the German authorities decreed that in the Protectorate 10 crowns should equal 1 German mark. Actual coins in circulation in Bohemia-Moravia: zinc, 50, 20, 10 heller with German and Czech inscriptions; notes of National Bank of Bohemia-Moravia from one krone upwards.

The share capital of the National Bank, which was set up in 1926, was fixed at 405,000,000 Czechoslovak crowns. On April 9, 1939, the Czechoslovak National Bank became the National Bank of Bohemia and Moravia. Its notes in circulation on December 31, 1944, amounted to 33,500 million crowns.

On April 4, 1939, the National Bank of Slovakia was established with the right to issue bank notes. The unit of currency is the Slovakian Crown, divided into 100 *halefu*.

National Slovak coinage in circulation: 20 Ks. silver coin; 5 Ks. nickel Slovak coin; 20 h. bronze Slovak coin; 10 h. bronze Slovak coin.

### Diplomatic Representatives.

#### 1. OF CZECHOSLOVAKIA IN GREAT BRITAIN.

**Ambassador Extraordinary and Plenipotentiary.**—Maximilian Lobkowitz (entered on his duties October 24, 1941).

**Counsellor.**—Viktor Jansa.

**First Secretary.**—Karel Vanek.

**Second Secretary.**—Otakar Vojtisek.

**Military and Air Attaché.**—Lieut.-Colonel Josef Kalla, O.B.E.

There are Consular representatives at London, Belfast, Birmingham, Bradford, Glasgow, Liverpool, Sheffield and Dublin.

#### 2. OF GREAT BRITAIN IN CZECHOSLOVAKIA.

As Czechoslovakia is territory in occupation of Germany, Great Britain has no diplomatic representatives there (but see p. 829).

## DENMARK.

(KONGERIGET DANMARK.)

### Reigning King.

**Christian X.** born September 26, 1870; son of King Frederik VIII and Queen Louise; married April 26, 1898, to Princess *Alexandrine* of Mecklenburg; succeeded to the throne on the death of his father, May 14, 1912.

### Children of the King.

I. Crown Prince *Frederik*, born March 11, 1899; married May 24, 1935, to Princess *Ingrid* of Sweden; offspring: Princess *Margrethe*, born April 16, 1940; a second Princess was born on April 29, 1944.

II. Prince *Knud*, born July 27, 1900; married September 8, 1933, to Princess *Caroline Mathilde* of Denmark; offspring: Princess *Elisabeth*, born May 8, 1935; Prince *Ingolf*, born February 18, 1940.

### Brothers and Sisters of the King.

I. Prince *Carl*, born August 3, 1872; elected King of Norway, under the title of *Haakon VII.* November, 1905; married July 22, 1896, to Princess *Maud* of Great Britain (died November 20, 1938); offspring, Prince *Alexander* (now Crown Prince *Olav* of Norway), born July 2, 1903; married March 21, 1929, to Princess *Märtha* of Sweden.

II. Prince *Harald*, born October 8, 1876; married April 28, 1909, to Princess *Helena* of Sonderburg-Glücksborg; offspring, Princess *Feodora*, born July 3, 1910; married September 9, 1937, to Prince *Christian* of Schaumburg-Lippe; Princess *Caroline Mathilde*, born April 27, 1912; married September 8, 1933, to Prince *Knud*, second son of King

*Christian*; Princess *Alexandrine Louise*, born December 12, 1914; married January 22, 1937, to Count *Luitpold Alfred zu Castell-Castell* (died November 6, 1941); Prince *Gorm*, born February 24, 1919; Prince *Olaf*, born March 10, 1923.

III. Princess *Ingeborg*, born August 2, 1878; married August 27, 1897, to Prince *Charles* of Sweden.

IV. Princess *Thyra*, born March 14, 1880.

V. *Dagmar*, born May 23, 1890; married November 23, 1922, to Lieutenant *Jörgen Castenskjöld*; offspring, *Carl*, born 1923; *Christian*, born 1926; *Jürgen*, born 1928; *Dagmar*, born 1931.

The crown of Denmark was elective from the earliest times. In 1448 after the death of the last male scion of the Princely House of Svend Estridsen the Danish Diet elected to the throne *Christian I*, Count of Oldenburg, in whose family the royal dignity remained for more than four centuries, although the crown was not rendered hereditary by right till the year 1660. The direct male line of the House of Oldenburg became extinct with the sixteenth king, *Frederik VII.*, on November 15, 1863. In view of the death of the king without direct heirs, the Great Powers of Europe, 'taking into consideration that the maintenance of the integrity of the Danish Monarchy, as connected with the general interests of the balance of power in Europe, is of high importance to the preservation of peace,' signed a treaty at London on May 8, 1852, by the terms of which the succession to the crown of Denmark was made over to Prince *Christian* of Schleswig-Holstein-Sonderburg-Glücksburg, and to the direct male descendants of his union with the Princess *Louise* of Hesse Cassel, niece of King *Christian VIII* of Denmark. In accordance with this treaty, a law concerning the succession to the Danish crown was adopted by the Diet, and obtained the royal sanction July 31, 1853.

King *Christian X* has a civil list of 1,000,000 kroner. Annuities to other members of the royal house amount to 151,200 kroner.

Subjoined is a list of the Kings of Denmark, with the dates of their accession, from the time of election of *Christian I* of Oldenburg:—

### House of Oldenburg.

|                              | A.D. |                               | A.D. |
|------------------------------|------|-------------------------------|------|
| <i>Christian I</i> . . . .   | 1448 | <i>Christian V</i> . . . .    | 1670 |
| <i>Hans</i> . . . . .        | 1481 | <i>Frederik IV</i> . . . .    | 1699 |
| <i>Christian II</i> . . . .  | 1513 | <i>Christian VI</i> . . . .   | 1730 |

| <i>Christian IV</i> . . . .  | 1588 | <i>Christian VIII</i> . . . . | 1839 |
| <i>Frederik III</i> . . . .  | 1648 | <i>Frederik VII</i> . . . .   | 1848 |

### House of Schleswig-Holstein-Sonderburg-Glücksburg.

*Christian IX*, 1863. *Frederik VIII*, 1906. *Christian X*, 1912.

### Constitution and Government.

The present Constitution of Denmark is founded upon the 'Grundlov' (charter) of June 5, 1915, as amended on September 10, 1920. This may in many respects be said to be a further development along the lines laid down in the 'Grundlov' of June 5, 1849, the charter which introduced the Constitution in Denmark. The amendments of September 10, 1920, are mostly of a formal character, necessitated by the incorporation of parts of *Slesvig* in 1920.

According to the present 'Grundlov,' the legislative power lies with the King and the 'Rigsdag' (Diet) jointly. The executive power is vested in

The population (excluding the Faroes) consisted of 1,824,238 males and 1,882,116 females in 1935. The total population at the census of 1930 was 8,550,656, showing an increase during 1930-35 of 0.86 per cent. per annum. In Denmark the town population has increased from 1,511,062 in 1930 to 1,644,403 in 1935; while the rural population has increased from 2,039,594 in 1930 to 2,061,946 in 1935. The population is almost entirely

Scandinavian; in 1930, of the inhabitants of Denmark proper, 97·4 per cent. were born in Denmark.

Estimated population on July 1, 1942, 3,903,000.

On November 5, 1935, the population of the capital, Copenhagen (Kjøbenhavn), was 843,168; Aarhus, 90,898; Odense, 76,116; Aalborg, 48,132; Randers, 30,254; Horsens, 29,856.

The following table gives the total number of births, deaths and marriages with the surplus of births over deaths for three years:—

| Years | Total Births<br>(living) | Still Births | Marriages | Deaths | Surplus of<br>Births over<br>Deaths |
|-------|--------------------------|--------------|-----------|--------|-------------------------------------|
| 1936  | 66,418                   | 1,757        | 34,680    | 40,919 | 25,499                              |
| 1937  | 67,440                   | 1,762        | 34,130    | 40,442 | 26,998                              |
| 1938  | 68,462                   | 1,764        | 33,625    | 39,058 | 29,404                              |

Of the births in 1936, 8·5 per cent. were illegitimate; in 1937, 8·8; in 1938, 9·0. In 1936, there were 3,210 divorces; in 1937, 3,344; in 1938, 3,394.

Emigrants, in 1936, 9,760; in 1937, 9,500; in 1938, 11,123.

### Religion.

The established religion of Denmark is the Lutheran, which was introduced as early as 1536. The affairs of the National Church are under the superintendence of nine bishops, who have no political character. Complete religious toleration is extended to every sect, and no civil disabilities attach to Dissenters.

According to the census of 1921 there were 3,221,843 Protestants, 22,187 Roman Catholics (under a Vicar Apostolic resident in Copenhagen), 535 Greek Catholics, 5,947 Jews, 17,349 other or of no confession.

### Education.

Elementary education has been widely diffused in Denmark since the beginning of the last century, and in 1814 it was made compulsory. The school age is from 7 to 14. In 1938 Denmark had 4,472 lower schools; of these 34 were maintained by the Government, 3,886 by the local communities and 552 were private institutions. The instruction in the public schools is mostly gratuitous. The number of pupils in the 4,486 schools was on January 1, 1938: 480,000. In 1938, 2,139 students were admitted to the university; of these 770 were women. For higher instruction there are furthermore (1938): a veterinary and agricultural college at Copenhagen with 70 professors and teachers and about 770 students; about 300 technical schools with about 43,000 pupils; 18 training colleges for teachers with about 1,800 students; a high school of commerce with about 1,000 pupils; about 100 commercial schools with about 18,000 pupils; 20 agricultural or horticultural schools with about 2,000 pupils; 57 *folkehøjskoler* or popular high schools (adult schools) with about 5,800 pupils; a college of pharmacy (founded 1892) with 16 teachers and about 100 students; a school for dentists with about 20 teachers and about 180 students; a Royal academy of arts (founded 1754) with 24 teachers and about 350 students; a Polytechnic Institution (founded 1829) with 120 professors and teachers and about 1,100 students. The *folkehøjskoler* are all private, but to them and the agricultural schools the State annually makes a

grant of about 1,800,000 kroner. The University of Copenhagen, founded in 1479, has about 130 professors and teachers, and about 5,200 students. The University of Aarhus, founded in 1928, and opened on September 11, 1933, has about 500 students.

### Pauperism and Old Age Pensions.

In 1933 the Danish Social Legislation was co-ordinated into four Acts ('The Social Reform'), dated May 20, and put into force on October 1, 1933. It was the intention to make these enactments integral parts of a common system, and to obviate every kind of double relief by means of co-operation between the various administrative units. The Social Reform comprises an Act regarding Public Assistance and three Insurance Acts—regarding (1) Labour Exchanges and Employment Insurance, (2) Accident Insurance, and (3) Sickness, Invalidity and Old-Age Insurance.

The Act of Public Care contains regulations for the protection of children and for child welfare, including children of widows and widowers, and children of unmarried mothers; also regulations for assistance for burial, sickness, cripples and the blind. In 1937-38, some 252,000 recipients, exclusive of children, were supported, at a cost of 113·0 million kroner, of which 19·2 million kroner were spent in child-welfare and child-support, 32·6 million kroner in special relief, 57·1 million kroner in local relief, and 2·3 million kroner in poor relief.

The Act named above under (3) concerning Sickness, Invalidity and Old-Age Insurance (changed by an Act of 1937), grants an annual sum of money as old age pension (*Aldersrente*) to any person being 60 years of age and fulfilling certain conditions. The old age pension, which does not involve the loss of civil rights, varies according as the commune of domicile is a town or a rural commune, and certain deductions are made for earned incomes. In Copenhagen, for example, the old age pension for a married couple, both 60 years of age, without any earned income is 1,192 kroner per annum. For the financial year ending March 31, 1938, 141,000 persons were relieved. The total expenditure was 92·8 million kroner.

### Justice and Crime.

The lowest courts of justice in Denmark are organized in 99 tribunals where cases of only small consequence are dealt with by a single judge. Cases of greater consequence are dealt with by the superior courts (*Landsretterne*); these courts are also courts of appeal for the above-named minor cases. Of superior courts there are two: *Østre Landsret* in Copenhagen with 19 judges, *Vestre Landsret* in Viborg with 12 judges. From this an appeal lies to the supreme court (*Højesteret*) in Copenhagen, composed of 13 judges. Judges under 65 years of age can be removed only by judicial sentence.

In 1938, 5,689 men and 648 women were convicted of crimes and delicts. On December 31, 1938, 1,283 men and 24 women were in the penitentiaries of Denmark.

### Finance.

By the terms of the Constitution of Denmark the annual financial budget, called the 'Finanslovsforslag,' must be laid on the table of the Folketing at the beginning of each session, i.e. at the beginning of October. As to the annual financial accounts, called 'Statsregnskab,' the Constitutional

Charter prescribes them to be examined by four paid revisers, two of whom are elected by the Folketing and two by the Landsting. Their report is submitted to both Chambers which, after due consideration, pass their resolution generally to the effect that they have no remarks to make on the balance-sheet.

The following shows the actual revenue and expenditure for three years ending March 31 and the estimates for two years :—

|                         | 1939-40     | 1940-41 <sup>1</sup> | 1941-42 <sup>1</sup> | 1942-43 <sup>1</sup> | 1943-44 <sup>1</sup> |
|-------------------------|-------------|----------------------|----------------------|----------------------|----------------------|
|                         | Kroner      | Kroner               | Kroner               | Kroner               | Kroner               |
| Current Revenue . . .   | 640,800,000 | 644,400,000          | 522,800,000          | 822,400,000          | 718,900,000          |
| Current Expenditure . . | 681,500,000 | 693,160,000          | 589,000,000          | 909,900,000          | 962,500,000          |

<sup>1</sup> Budget estimates.

The public debt of Denmark on March 31, 1942, amounted to 1,090,993,000 kroner

The cost to Denmark of the German army of occupation was in February, 1944, nine million kroner daily.

### Defence.

The Danish Army was a national army. Every able-bodied Danish subject was liable to serve in the Army or Navy, except the inhabitants of the Faroe Islands and Greenland. Exemptions in Denmark were few, even clergymen having to serve. On September 1, 1943, the Germans dissolved and disbanded the Danish Army.

The number of recruits called up annually for training was 6,800, organised in two divisions. The Air Force had 65 aeroplanes.

The Navy comprised the fleet and the coast-defence forces. It included one coast defence ironclad of 3,500 tons (*Peder Skram*, carrying a pair of 9.4-inch and four 6-inch guns), 5 fishery patrol vessels (*Hvidbjørnen*, *Hejmdal*, *Ingolf*, *Islands Falk*, *Beskytteren*), 16 torpedo boats, 3 mine sweepers, 12 submarines, the repair ship *Henrik Gerner*, one royal yacht (*Dannebrog*), the surveying vessel *Freja* and 4 minelayers (*Lindermen*, *Lossen*, *Kvintus* and *Sixtus*), but many of these vessels were scuttled in 1943, and some may prove beyond salvage.

The coast defence includes several permanent fortifications. The recruits of the Navy were trained up to 365 days in the fleet and for about 135 days in the coast defences.

### Production and Industry.

The soil of Denmark is greatly subdivided, owing partly to the state of the law, which interdicts the union of small farms into larger estates, but encourages, in various ways, the parcelling out of landed property, and leaves the tenant entire control of his land so long as the rent is paid.

According to the census of July 15, 1938, the extent of the cultivated area in Denmark was as follows (in thousand acres):—grain areas, 3,347; root crop, 1,294; other crop, 105; green fodder and grass, 3,113; fallow land, 80; total cultivated area, 7,939. The area and production of the chief crops for two years were as follows:—

| Crops               | Area          |               | Production       |                  |
|---------------------|---------------|---------------|------------------|------------------|
|                     | 1942          | 1943          | 1942             | 1943             |
|                     | 1000 hectares | 1000 hectares | 1000 metric tons | 1000 metric tons |
| Wheat . . . . .     | 59.0          | 49.1          | 20               | 180              |
| Rye . . . . .       | 190.6         | 223.5         | 410              | 500              |
| Barley . . . . .    | 421.4         | 394.7         | 1,390            | 1,370            |
| Oats . . . . .      | 343.5         | 334.7         | 1,010            | 1,040            |
| Mixed grain . . . . | 380.7         | 332.0         | 950              | 870              |
| Potatoes . . . . .  | 100.6         | 106.9         | 1,870            | 1,940            |
| Root crops . . . .  | 449.3         | 435.4         | 22,570           | 22,210           |

On July 17, 1943, there were in Denmark 599,000 horses, 2,988,000 head of cattle, 2,449,000 swine, and 14,105,000 hens.

According to statistics collected on May 28, 1935, there were 102,300 industrial factories employing altogether 459,800 persons, of whom 318,200 were actual labourers; 43,600 of these establishments used mechanical power. Moreover there were about 100,000 commercial establishments with about 257,000 employees. In 1943 174,000 tons of beet-sugar were produced. Milk production 1943, 3,810,000 metric tons; 1942, 3,338,000 tons. Butter production 1943, 125,000 tons; 1942, 109,000 tons. Cheese production 1943, 40,300 tons; 1942, 32,000 tons.

In the Danish fisheries the total value of the fish caught was, 1943, 150 million kroner; 1942, 135 million kroner.

### Commerce.

The following table shows the value, according to official returns, of the imports and general exports (excluding precious metal) for six years:—

| Year | Imports      | Exports      | Year | Imports      | Exports      |
|------|--------------|--------------|------|--------------|--------------|
|      | 1,000 Kroner | 1,000 Kroner |      | 1,000 Kroner | 1,000 Kroner |
| 1938 | 1,655,273    | 1,583,762    | 1941 | 1,311,000    | 1,277,600    |
| 1939 | 1,749,800    | 1,578,000    | 1942 | 1,209,800    | 1,058,400    |
| 1940 | 1,877,870    | 1,517,500    | 1943 | 1,226,100    | 1,296,100    |

The following table shows the distribution of Danish foreign trade:—

| Countries           | Imports      |              | Exports      |              |
|---------------------|--------------|--------------|--------------|--------------|
|                     | 1938         | 1939         | 1938         | 1939         |
|                     | 1,000 Kroner | 1,000 Kroner | 1,000 Kroner | 1,000 Kroner |
| Germany . . . . .   | 898,967      | 470,175      | 804,423      | 368,288      |
| United Kingdom . .  | 562,294      | 574,264      | 860,895      | 825,722      |
| Sweden . . . . .    | 106,512      | 126,358      | 74,459       | 76,992       |
| Norway . . . . .    | 41,140       | 40,171       | 40,830       | 55,580       |
| United States . . . | 127,926      | 127,159      | 17,094       | 21,329       |
| Italy . . . . .     | 15,818       | 15,159       | 6,257        | 11,289       |
| Netherlands . . .   | 61,869       | 60,506       | 26,115       | 29,305       |
| France . . . . .    | 20,047       | 28,474       | 21,867       | 16,178       |
| Switzerland . . .   | 20,370       | 19,777       | 11,265       | 19,427       |

Total trade (Board of Trade returns) between Denmark and the United Kingdom for 5 years:—

|                                 | 1934       | 1935       | 1936       | 1937       | 1938       |
|---------------------------------|------------|------------|------------|------------|------------|
|                                 | £          | £          | £          | £          | £          |
| Imports from Denmark to U.K.    | 32,885,245 | 32,037,572 | 33,235,907 | 36,569,583 | 37,859,914 |
| Exports to Denmark from U.K.    | 18,356,676 | 18,759,198 | 14,943,471 | 16,901,742 | 15,783,256 |
| Re-exports to Denmark from U.K. | 730,765    | 776,791    | 642,167    | 667,119    | 585,514    |

### Shipping and Navigation.

On June 30, 1939, Denmark possessed 2,705 vessels (above 20 registered tons gross) of 1,175,000 registered tons gross in her mercantile marine.

Cargo movement to and from foreign countries through Danish ports in 1943 amounted to 6,018,000 metric tons; of this, 4,559,000 tons consisted of incoming and 1,459,000 tons of outgoing freight.

### Communications.

Denmark proper (exclusive of Copenhagen) has (March 31, 1938) 7,842 kilometres or 4,873 miles of road, besides about 27,000 miles of by-ways. There are (1938) railways of a total length of 3,106 miles open for traffic in the kingdom. Of this total, 1,485 miles belong to the State. The revenue for the year 1943 amounted to 134 million kroner from passenger transport and 146 million kroner from freight.

The Post Office in the year 1938-39 carried 341,731,000 letters, post-cards and printed matter, and 281,384,000 newspapers. There are 1,495 post-offices. The State telegraphs in 1938-39 carried 3,169,000 messages, of which 907,000 were internal. The length of State telegraph lines (March 31, 1939) was about 7,800 miles; number of offices, 616. At the same date the railway telegraphs had 426 offices. On December 31, 1942, the length of telephonic wires of the State and the private companies was 2,343,600 miles. In the year 1942 there were 415,000 telephone subscribers. Postal revenues, 1939-40, 80,300,000 kroner; expenditure, 76,800,000 kroner.

*Air Traffic.*—The number of kilometres flown in Denmark in 1943, according to information published by the Danish air transportation company 'Det Danske Luft-Fartsselskab,' was 533,655, compared with 765,748 in 1942 and 718,009 in 1941. The number of passengers carried in 1943 was 30,430, against 38,835 in 1942 and 32,676 in 1941.

### Banking and Credit.

On December 31, 1939, the accounts of the National Bank balanced at 952 million kroner. The assets included 117 million kroner in bullion and specie. The liabilities included 600 million kroner note issue, 50 million kroner general capital fund and 16 million kroner reserve fund. On December 31, 1943, the notes in circulation amounted to 1,359 million kroner.

On December 31, 1942, there were 162 other banks for commercial, agricultural and industrial purposes; their deposits amounted to 3,595 million kroner (3,116 on December 31, 1941); their advances to 1,994 million kroner (1,898 in 1941).

### Money, Weights and Measures.

The monetary unit, the *Krone* of 100 öre, is of the value of 1s. 1½d., or about 18 kroner to the pound sterling. The krone contains 0.403226 gramme of gold.

Gold coins are 20- and 10-kroner pieces. The 20-kroner piece weighs 8.870 grammes .900 fine, and thus contains 8.0645 grammes of fine gold. Small change: 2 kroner, 1 kroner and ½ kroner pieces of aluminium-bronze; 25 öre and 10 öre pieces of nickel, and 5 öre, 2 öre and 1 öre pieces of iron and of bronze.

The standard of value is gold.

The use of the metric system of weights and measures, under the law of May 4, 1907, became obligatory in Denmark in public offices on April 1, 1910, and generally on April 1, 1912.

### Diplomatic and Consular Representatives.

#### 1. OF DENMARK IN GREAT BRITAIN.

*Envoy and Minister.*—Count Eduard Reventlow (appointed January 1, 1938).

*Counsellor.*—Gustav Rasmussen.

*Secretary.*—Count Eggert Adam Knuth.

*Naval and Air Attaché.*—Captain Preben Lembcke.

*Agricultural Attaché.*—Per Algot Moltessen.

*Press Attaché.*—C. E. Aagaard.

*Commercial Counsellor and Consul General in London.*—Christian M. Rottböll.

As a matter of courtesy, the Danish Minister in London retained diplomatic privileges, and is recognized by the British Government as continuing to be responsible for the protection of such Danish interests as are not under enemy control.

#### 2. OF GREAT BRITAIN IN DENMARK.

As the Danish Government are under enemy control, the British Government are unable to maintain diplomatic relations with them.

### Colonies.

Greenland is the only colonial possession of Denmark. Its total area is 736,518 English sq. miles, made up as to 705,234 sq. miles of ice cap and 31,284 sq. miles of ice free land. The population in 1930 numbered 16,630. Of the total 408 were Danes and 16,222 natives; the latter numbered 7,694 men and 8,528 women. West Greenland had a population of 15,744 inhabitants, East Greenland 886 inhabitants. In the settlement Kap York (Thule) lived 266 natives. The imports from Greenland into Denmark in 1938 amounted to 5,939,000 kroner, and the exports from Denmark to Greenland, 3,064,000 kroner. Exports to U.K. in 1938 (Board of Trade returns), 521½. Imports from U.K., 2,145½. The trade of Greenland is a State monopoly.

By the 'Agreement relating to the Defence of Greenland,' signed on April 9, 1941, the United States, in order to protect the *status quo* in the western hemisphere, acquired the right 'to construct, maintain, and operate such landing fields, seaplane facilities, and radio and meteorological installations as may be necessary.' The Agreement explicitly recognises the sovereign rights of Denmark in Greenland.

## DOMINICAN REPUBLIC.

(REPÚBLICA DOMINICANA.)

On December 6, 1492, Columbus discovered the island of Santo Domingo which he called La Española, now called Hispaniola, and the city of Santo Domingo, founded by his brother, Bartholomew, in 1496, was for long the centre of Spanish power in America. The western part of the island—about one-third of the whole, and now known as the Republic of Haiti—was later occupied and colonized by the French to whom the Spanish colony of Santo Domingo was also ceded in 1795. In 1808 the Dominican population, aided by British troops, expelled the French, and the colony returned to the rule of Spain, from which it declared its independence in 1821. It was invaded and held by the Haitians from 1822 to 1844 when they were expelled, and the Dominican Republic was founded and a Constitution adopted. The country was occupied by American marines from 1916 to the adoption of a new constitution in 1924. In 1936, the name of the capital city was changed from Santo Domingo to Ciudad Trujillo.

The Dominican Republic declared war on Japan on December 8, 1941, and on Germany and Italy on December 11, 1941.

**Constitution and Government.**—The Republic is governed under the Constitution proclaimed on January 10, 1942.

Congress is composed of a senate of 19 members (1 from each of the 18 provinces and the District of Santo Domingo) chosen for 5 years by direct popular vote and a chamber of 38 deputies (1 for every 60,000 inhabitants or fraction above 30,000 in each province), with a minimum of 2 deputies for any one province, also for 5 years. The District of Santo Domingo, established from January 1, 1935, returns 1 senator and 3 deputies. A new province was created on January 1, 1943. Senators and deputies receive 300 dollars (U.S.) per month.

The executive power is vested in the President, who is elected for 5 years, by direct vote. In case of death, resignation or disability, the President is succeeded by the Secretary of State for War and Marine. There are 8 Secretaries of State in charge of departments.

General elections under the new Constitution, at which women voted for the first time, were held on May 16, 1942; 2 women were elected to the Chamber and 1 to the Senate.

*President of the Republic.*—Rafael Leonidas Trujillo Molina (born October 24, 1891; assumed office on May 18, 1942).

**Area and Population.**—The Dominican Republic occupies the eastern portion (about two-thirds) of the island of Hispaniola, Quisqueya or Santo Domingo, the western division forming the Republic of Haiti. Area is estimated at 19,332 square miles, with 1,017 miles of coast line, 193 miles of frontier line with Haiti, and a population, on December 31, 1942, of 1,826,407. Since 1938 the number of provinces has been increased from 12 to 18 by breaking up some of the larger ones. The population (1935) of the principal cities was as follows: Ciudad Trujillo, 71,297; Santiago de los Caballeros, 83,919; San Pedro de Macoris, 18,889; Puerto Plata, 11,777; La Romana, 10,935; San Francisco de Macoris, 10,305; La Vega, 9,342.

The boundary with Haiti, long in dispute, was re-surveyed under a treaty signed in 1929. A final settlement was made in a treaty signed on April 14, 1936.

The population is partly of Spanish descent, but is mainly composed of a mixed race of European, African and Indian blood. Tax exempt land

has been set aside for the settlement of European refugees, both Jewish and non-Jewish, who are guaranteed full civic rights; the first settlements are being made on 26,000 acres at Sosúa, donated by President Trujillo. Refugees are barred from competing with the natives in raising sugar, cocoa, coffee and tobacco. The language is Spanish, but many educated Dominicans speak English.

The capital, Ciudad Trujillo, on the right bank of the river Ozama, was practically destroyed, except for a few historic buildings, by a disastrous hurricane on September 3, 1930. It has been rebuilt and materially improved.

**Religion and Education.**—The religion of the State is Roman Catholic; other forms of religion are permitted. There is a Papal Nuncio with residence at Port-au-Prince (Haiti) as well as an Archbishop, known as the Primate of the Indies, in Ciudad Trujillo.

Primary instruction is gratuitous and obligatory for children between 7 and 14 years of age; there are also secondary, normal, vocational and special schools, the total at the end of 1944 being 2,091 (including emergency schools), of which 1,910 were official (wholly maintained by the State), 125 semi-official (State aided) and 56 private. The total enrolment of pupils in primary schools was 210,602. The University of Santo Domingo (founded 1588) has 9 schools for professional students.

**Justice.**—The judicial power resides in the Supreme Court of Justice, the Courts of Appeal, the Courts of First Instance, the Communal Courts and other tribunals created by special laws, such as the Land Courts. The Supreme Court consists of a president and 8 judges chosen by the Senate, and the Procurator-General, appointed by the executive; it supervises the lower courts. The Republic is divided into 3 departments and, in all, 16 judicial districts, each having its own Procurator Fiscal and Court of First Instance (that of Ciudad Trujillo has 2 courts); these districts are subdivided, in all, into 66 communes, each with one or more local justices (alcaldes), a secretary and one or more bailiffs (alguaciles). Each department has a Court of Appeal of a President and 4 judges, appointed by the Senate, and a departmental Procurator-General appointed by the President; these courts sit at San Cristobal, Santiago and La Vega. The death penalty was abolished in 1924, but is imposed in war time for treason or espionage.

**Finance.**—The receipts and disbursements for 6 years, in U.S. dollars (adopted in 1897 as the monetary standard) were:—

|          | Revenue    | Expenditure |                       | Revenue    | Expenditure |
|----------|------------|-------------|-----------------------|------------|-------------|
|          | Dollars    | Dollars     |                       | Dollars    | Dollars     |
| 1939 . . | 11,039,518 | 12,103,970  | 1942 <sup>1</sup> . . | 12,839,000 | 12,737,925  |
| 1940 . . | 12,227,597 | 11,016,146  | 1943 <sup>1</sup> . . | 13,265,000 | 13,195,000  |
| 1941 . . | 14,153,898 | 13,075,800  | 1944 <sup>1</sup> . . | 15,732,368 | 15,713,856  |

<sup>1</sup> Budget estimates.

Chief items of revenue in the 1944 budget are (in dollars): internal revenue, 10,000,000; custom receipts, 2,800,000; licence fees, 838,600; miscellaneous taxes and income, 1,636,350; postal, telegraph and water service, 411,100. Chief items of expenditures are: war and navy, 3,141,000; service on public debt, 1,872,000; education, 1,844,500; Treasury and commerce (including Chamber of Accounts), 1,119,370; public works, 1,435,310; Judiciary, 1,228,000; Presidency, 429,000; sanitation and welfare, 1,045,610; interior and police, 1,249,420; all other, 2,349,650.

Since April 1, 1941, the American Receivership has been abolished, and administration and collection of the Customs resumed by the Dominican Government, who make the requisite monthly debt payments through a Bondholders' Representative in Ciudad Trujillo. These payments are recognized as a first lien on all the revenues of the Dominican Government. The bond issues are consolidated into two 5½ per cent. loans, each originally for 10,000,000 dollars; the total outstanding on July 31, 1944, was 12,850,000 dollars. Under the revised arrangements made in 1934, the standard interest and amortization payments now total 1,099,040 dollars a year, subject to increases on a sliding scale in respect of Government revenue in excess of 12,500,000 dollars a year; an extra sum of 307,159 dollars was paid on this account in 1943.

American holdings of Dominican dollar bonds, end of 1943, were 5,000,000 dollars; about 4,500,000 dollars were held in enemy or enemy-occupied countries, and about 2,500,000 dollars held by Dominicans or by Allied firms doing business in the Republic. American direct investments, end of 1940, were 41,895,000 dollars.

**Defence.**—The armed forces, which are under the administration of the Secretary of State for War and Marine, consist of the army with a total strength between 3,500 and 4,000, a small aviation corps and a number of coastal patrol boats. The estimates for 1943 were 2,355,867 dollars.

The municipal police force were in 1936 organized into a single body as a national constabulary under direct supervision from the capital, and in addition to exercising ordinary police functions they provide a subsidiary force to the army.

**Production and Industry.**—Agriculture is the chief source of wealth, sugar cultivation being the principal industry. Of the total area, 9,900 square miles are cultivable, and about 3,700 are under cultivation. Twelve agricultural settlements were established in 1937, occupying 807,324 acres, of which 274,707 were cultivated; in 1943, 102,232 acres were ploughed. Most of the remainder is forest land, mainly pine-groves, which is useless for agriculture. The largest sugar estates are in the southern part of the Republic. Sugar production, 1944, 512,000 metric tons. Exports of raw sugar in 1943, 391,197 metric tons. There are 14 sugar 'centrals,' of which 9 are owned and operated by American companies, although very little of the sugar is sold to the United States. Coffee, grown originally for the French market, is making headway in the United States, which takes 120,000 bags per annum. Exports in 1942, 7,820 metric tons. Export quota (to the United States) in 1943-44 was 157,866 bags (of 60 kilos). Production of rice is fostered; exports, 1942, 10,109 metric tons. Cocoa is the second principal crop; output has increased tenfold since 1900. Exports in 1942, 17,743 metric tons. Other principal exports in 1942 were: leaf tobacco, 3,359 tons; maize, 17,335 tons, and molasses, 49,217 tons.

In 1939, 1,674 industrial establishments had capital amounting to 74,726,642 dollars, of which 61,129,635 dollars was represented by United States interests; capital invested in the sugar industry amounted to 61,460,625 dollars. These concerns employed 35,750 persons, and paid 6,570,690 dollars in wages, used raw materials valued at 10,694,367 dollars, and had an output valued at 25,931,499 dollars.

Various minerals are found, principal among which are gold and copper. Iron is found in the form of black magnetic oxide of iron, and petroleum has been found in the Azua region. Silver and platinum have been found,

## ECUADOR.

(REPÚBLICA DEL ECUADOR.)

### Constitution and Government.

THE Republic of Ecuador is situated in the north-west of South America, with about one-fifth of its area lying north of the Equator. It is bounded on the north by Colombia, on the south by Peru and Brazil, on the east by Colombia and Brazil, and on the west by the Pacific Ocean and Peru.

The Spaniards under Francisco Pizarro founded a colonial empire in the territory after defeating the local ruler at the battle of Cajamarca on November 16, 1532. Spanish rule continued until August 10, 1809, when the Presidency of Quito, as it was known, became part of the original Republic of Colombia, founded by Simon Bolivar in 1819 by uniting it to the Vice-Royalty of New Granada (now Colombia) and the Captaincy-General of Venezuela at the Congress of Angostura, December 17, 1819. The Presidency of Quito became the Republic of Ecuador by amicable secession May 13, 1830.

Border warfare between Ecuador and Peru, which has been intermittent for nearly a century, was resumed in 1941, when Peru invaded the important coffee-growing province of El Oro, but on July 10, 1941, it was submitted to arbitration by Argentina, Brazil and the United States and an agreement was reached on January 29, 1942; final notes ratifying the details of the agreement were signed on May 22, 1944. (For map of the boundary, see THE STATESMAN'S YEAR-BOOK, 1942.)

Under the Constitution promulgated March 26, 1929, the President was elected directly by the people for a term of four years and Congress consisted of two Houses; the Upper with 32 Senators and the Chamber of 56 Deputies.

On September 27, 1935, the Constitution was abolished by Executive

Decree and that of 1906 was provisionally restored pending arrangements for a new Constitutional Convention. A Constituent Assembly met on August 10, 1938, but after study failed to issue a new Constitution. Women voted for the first time in 1939, but neither the Constitution of 1906 nor the electoral law of March 1, 1939, clearly establishes their right to the franchise.

The following is a list of the Presidents and Provisional Executives since 1897, with the date on which they took office:—

- |                                                                |                                                                                                                      |
|----------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------|
| Gen. Don Eloy Alfaro, Jan. 17, 1897.                           | Don Juan de Dios Martínez Mera, Nov. 1, 1932. <sup>1</sup>                                                           |
| Gen. Don Leonidas Plaza G., Sept. 1, 1901.                     | Dr. Abelardo Montalvo, Oct. 20, 1933. <sup>4</sup>                                                                   |
| Don Lizardo García, Sept. 1, 1905. <sup>1</sup>                | Dr. José María Velasco Ibarra, Sept. 1, 1934. <sup>4</sup>                                                           |
| Gen. Don Eloy Alfaro, Jan. 15, 1906.                           | Dr. Antonio Pons, Aug. 20, 1935. <sup>4</sup>                                                                        |
| Gen. Don Emilio Estrada, Sept. 1, 1911.                        | Sr. Federico Paz, 'Supreme Head of the State,' Sept. 24, 1935; elected Acting President, Aug. 10, 1937. <sup>4</sup> |
| Gen. Don Leonidas Plaza G., Sept. 1, 1912.                     | Gen. G. Alberto Enriquez, 'Supreme Head of the State,' Oct. 23, 1937. Relinquished power on Aug. 10, 1938.           |
| Dr. Don Alfredo Baquerizo Moreno, Sept. 1, 1916.               | Dr. Manuel M. Borrero, Provisional President, Aug. 11-Dec. 3, 1938.                                                  |
| Dr. Don José Luis Tamayo, Sept. 1, 1920.                       | Dr. Aurelio Mosquera Narváez, elected December 3, 1938—died November 19, 1939.                                       |
| Dr. Don Gonzalo S. Córdova, Sept. 1, 1924. <sup>1</sup>        | Don Carlos Alfredo Arroyo del Río, elected January 12, 1940. Relinquished power on May 30, 1944.                     |
| Provisional Juntas July 9, 1925—Apr. 1, 1926.                  |                                                                                                                      |
| Dr. Don Isidro Ayora, Apr. 1, 1926. <sup>4</sup>               |                                                                                                                      |
| Col. Don Luis A. Larrea Alba, Aug. 25, 1931. <sup>2</sup>      |                                                                                                                      |
| Dr. Don Alfredo Baquerizo Moreno, Oct. 15, 1931. <sup>3</sup>  |                                                                                                                      |
| Period of revolutions Aug. 27—Sept. 2, 1932.                   |                                                                                                                      |
| Dr. Don Alberto Guerrero Martínez, Sept. 2, 1932. <sup>4</sup> |                                                                                                                      |
- <sup>1</sup> Deposed. <sup>2</sup> Deposed Oct. 15, 1931. <sup>3</sup> Deposed Aug. 27, 1932. <sup>4</sup> Provisional.  
<sup>5</sup> Arrested and deposed by the Army, August 20, 1935. <sup>6</sup> Resigned Sept. 26, 1935.  
<sup>7</sup> Resigned Oct. 23, 1937.

*President of the Republic.*—Dr. José María Velasco Ibarra, returned from exile in June, 1944 (following a revolt in Guayaquil in May), and formed a cabinet; the Constituent Assembly unanimously confirmed him as President in August, 1944.

The Provinces are administered by Governors, appointed by the Government; their subdivisions, or cantons, by political chiefs and elected cantonal councillors; and the parishes by political lieutenants. The Galapagos Archipelago is under the administration of a Territorial Chief under the Ministry of National Defence.

On January 29, 1942, Ecuador severed diplomatic relations with Germany, Italy and Japan; it declared war on Japan on February 2, 1945, and on February 7, 1945, formally subscribed to the anti-Axis declaration of the United Nations.

### Area and Population.

Though the frontiers of Ecuador have now been settled, no definite figure of the area of the country can yet be given. One military estimate shows 455,454 square kilometres (175,855 square miles), including the Archipelago of Colon (the 13 Galapagos Islands) with 7,430 square kilometres (3,028 square miles). Calculations of the geographer Wolf, also officially adopted, show 714,860 square kilometres (275,936 square miles). The country is divided into 17 provinces (two comprising the 'Region Oriental') and one territory—the Archipelago of Galapagos—officially called 'Colon,' situated in the Pacific Ocean about 600 miles to the west of Ecuador and comprising 15 islands; there are 74 cantons, 119 urban parishes and 585 rural parishes. In September, 1942, naval bases were granted to the United States in the Galapagos Islands and on the Santa Elena peninsula.

The first census was taken in January, 1942; it showed a population of

and near Neiba there are several hills of rock salt covered with only a thin layer of soil. Alluvial washing of gold by pans is allowed; exports of gold in 1940, 271 kilos, valued at 241,987 dollars.

**Commerce.**—The total imports into and exports from the Dominican Republic for 5 years were valued as follows in U.S. dollars (which are legal currency):—

|         | 1939       | 1940       | 1941       | 1942       | 1943       |
|---------|------------|------------|------------|------------|------------|
|         | Dollars    | Dollars    | Dollars    | Dollars    | Dollars    |
| Imports | 11,592,166 | 10,811,403 | 11,739,031 | 11,490,857 | 14,850,000 |
| Exports | 18,648,302 | 18,880,185 | 17,123,937 | 20,057,300 | 26,205,000 |

The foreign trade for 2 years was distributed as follows (in U.S. dollars):—

| Country           | Imports   |           | Exports   |            |
|-------------------|-----------|-----------|-----------|------------|
|                   | 1942      | 1943      | 1942      | 1943       |
|                   | Dollars   | Dollars   | Dollars   | Dollars    |
| United States     | 8,397,323 | 8,986,285 | 5,717,750 | 10,320,553 |
| United Kingdom    | 411,246   | 580,685   | 8,773,902 | 20,575,005 |
| British India     | 783,196   | 1,230,824 | —         | —          |
| Puerto Rico       | 1,239,263 | 105,819   | —         | 1,891,604  |
| Dutch West Indies | 366,345   | 562,907   | 707,678   | 1,051,744  |
| Canada            | 219,824   | 244,142   | 131,719   | 259,904    |
| Cuba              | 478,382   | 153,673   | —         | 122,740    |

In 1943, the chief imports were (in dollars): cotton goods, 3,897,118; iron and steel manufactures, 1,004,475; chemical and pharmaceutical, 996,627; machinery, 921,847; jute bags, 1,260,424, and petrol. Principal exports in 1943 were (in dollars): raw sugar, 22,344,368; cocoa beans, 4,089,142; coffee, 2,469,141; molasses, 355,648. Exports of raw sugar, in 1943, to United Kingdom were valued at 20,582,630 dollars (91 per cent.)

Total trade between the Dominican Republic and the United Kingdom for 5 years (Board of Trade returns):—

|                                            | 1934    | 1935      | 1936      | 1937      | 1938      |
|--------------------------------------------|---------|-----------|-----------|-----------|-----------|
|                                            | £       | £         | £         | £         | £         |
| Imports from Dominican Republic to U.K.    | 791,164 | 1,484,922 | 1,081,007 | 1,065,938 | 1,453,045 |
| Exports to Dominican Republic from U.K.    | 152,841 | 130,262   | 107,894   | 145,122   | 91,966    |
| Re-exports to Dominican Republic from U.K. | 515     | 801       | 462       | 447       | 11        |

United Kingdom exports (Board of Trade returns) since 1938 have been: 1939, 94,000£; 1940, 100,000£; 1941, 90,000£; 1942, 120,000£; 1943, 114,000£; 1944, 49,000£. Totals for the 3 years, 1939–41, included war supplies, if any, shipped by Government departments.

**Shipping and Communications.**—In 1940, 824 vessels of 1,173,429 tons entered the ports of the republic to discharge 124,843 tons of cargo, and 804 with a tonnage of 1,341,208 cleared with export cargo of 642,572 tons.

The mercantile marine of the republic which, at the time of its entry into the war, had a tonnage of about 6,700, has suffered severely in proportion to its size, vessels of a tonnage of over 3,000 having been sunk by

enemy action. Under war conditions the country is reached from the American continents and the Caribbean islands mainly by the Pan-American Airways system. Since May, 1944, a local aviation company has connected Ciudad Trujillo with La Romana and Santiago de los Caballeros.

Three main trunk highways, with branches, now extend eastward from Ciudad Trujillo to Higüey (106 miles), northward to Santiago and Monte Cristi and Dajabón (204 miles), and westward to San Juan (128 miles) and Elías Piña on the Haitian border (161 miles). At Elías Piña the road joins the Haitian road to Port-au-Prince. The journey between the Haitian and Dominican capitals is now possible by motor in 9 hours. Total highway system in 1942 was 2,300 miles, plus about 1,000 miles of second class and inter-communal roads.

There are 168 miles of railway lines Government owned and operated (serving a limited area in the Cibao region) and about 637 miles of private lines on the sugar and other large estates.

Number of post offices, 1940, 238; telephone or telegraph offices, 117; telephone instruments (1942), 2,400. The telephone system is operated by an American company. The telegraph has a total length of about 1,034 miles, and has been leased to All-America Cables, Incorporated, which also controls submarine cables connecting, in the north, Puerto Plata with Puerto Rico and New York, and in the south, Ciudad Trujillo with Puerto Rico, Cuba and Curaçao.

There are wireless stations in Ciudad Trujillo, Santiago and six other towns.

**Money, Banking, Weights and Measures.**—On July 1, 1897, the United States gold dollar was adopted as the standard of value, and United States money has since continued to be a legal currency in the Republic, except that in April, 1938, U.S. silver, nickel and copper coins and old Dominican silver coins were withdrawn from circulation and replaced by a new issue of Dominican coins. On July 31, 1944, total bank deposits amounted to 29,831,799 dollars, and cash held by banks to 5,190,951 dollars.

On October 24, 1941, a law was passed for the creation of the Banco de Reservas de la República Dominicana, with a capital of 1,000,000 dollars. The new bank opened for business on October 27, 1941. It is authorized to perform all customary banking transactions, but is not a bank of issue.

The metric system was adopted on August 1, 1913, but English and Spanish units are quite common in ordinary commercial transactions.

### Diplomatic and Consular Representatives.

#### 1. OF THE DOMINICAN REPUBLIC IN GREAT BRITAIN.

*Envoy Extraordinary and Minister Plenipotentiary.*—Dr. Ricardo Pérez-Alfonseca (accredited June 2, 1943).

#### 2. OF GREAT BRITAIN IN THE DOMINICAN REPUBLIC.

*Envoy Extraordinary and Minister Plenipotentiary.*—Cyril Frank Wilton Andrews (appointed February 16, 1943).

*Military Attaché.*—Lt.-Col. F. A. Sampson.

*Air Attaché.*—Acting Wing-Commander H. G. D. Devey, R.A.F.

*Naval Attaché.*—Rear-Admiral Hector Boyes (serving as Captain), C.M.G., C.I.E., R.N.

There are Vice-Consuls at Ciudad Trujillo, San Pedro de Macoris, Puerto Plata, La Romana and Barahona.

The public debt on December 31, 1942, was:—Foreign debt (chiefly the bonds, in default, of the Guayaquil and Quito Railway), 29,473,738 dollars; internal debt, 36,235,928 sucres. American direct investments in Ecuadorian enterprises, 1940, amounted to 5,107,000 dollars. British investments, end of 1944, were 3,807,340£., of which 66·6 per cent. were in default.

### Defence.

The Ecuadorean regular Army had a strength in 1938 of 701 officers and 6,806 men. This force is composed of 4 regiments of artillery, 9 battalions of infantry, 1 regiment and 3 squadrons of cavalry, 3 battalions of sappers, and 1 aviation company, which form the army. Military service was made compulsory on May 24, 1921, and was enforced for the first time in 1935 with 200 conscripts. The regular infantry have the Mauser rifle; the artillery have Vickers Maxim, Z.B. machine guns, old-fashioned Krupps and new Ehrhards. The country is divided into 4 military districts. A school of military engineering and artillery is established at Quito with 250 cadets.

A training ship of 1,030 tons was bought in the United States in 1935, and incorporated in the Navy under the name of *Presidente Alfaro*, and in 1943 three more small craft were taken over from the U.S. Navy.

The Government has at Guayaquil an aviation school and a naval school in Salinas with United States instructors. Flying fields have been established at Guayaquil, Quito, Latacunga, Loja, Manta and Riobamba.

### Production and Industry.

Ecuador is divided into two agricultural zones: the coast regions and the lower river valleys, where tropical farming is carried on in an average temperature of from 18° C. to 25° C.; and the hill country, the foothills, and the mountain valleys, adapted to grazing, dairying and the production of cereals, potatoes and the fruits and vegetables suitable to temperate climes. Only about 11,480,000 acres are actually cultivated. Ecuador is the world's chief source of balsa supply; the tree (of the *Ochroma* or silk-cotton family) is found on the western coastal lowlands and also in the 'Oriente' region. The lightest balsa weighs half of the same bulk of cork, but its strength is about half that of spruce. It is a prolific grower in suitable climates, growing faster than any other form of jungle vegetation except the wild papaya. The staple produce of Ecuador is excellent cocoa, sold chiefly to the United States; exports in 1943, 18,621 metric tons, valued at 52 million sucres. Production, 1943, 39,400 metric tons. Coffee is also grown, about 350,000 quintals per annum; under the Inter-American Coffee Agreement, export quota to the United States for 1943-44 was 197,733 bags (of 60 kilos). Rice production is increasing; production, 1943, about 2,000,000 quintals, which is a record. Wild rubber is abundant, but output has suffered from the competition of plantation rubber in the Orient; output, 1941, 1,500,000 pounds. Mangrove bark (for tanning), alligator skins and kapok (silk cotton tree fibre, *Bombax ceiba*) are exported in small quantities. Considerable attention is being paid to the cultivation of cotton, especially in the province of Manabí, and to sugar; ivory nuts, or *taquas*, are produced and exported in large quantities; production in 1939, 225,000 quintals. Sugar output, 1943, 589,187 quintals (of 101·4 lb.). Tobacco is being increasingly cultivated, especially in Esmeraldas; the manufacture of tobacco is a government monopoly.

Live-stock, estimated in 1939: cattle, 2,500,000; horses, 1,200,000; sheep and goats, 3,500,000; pigs, 3,200,000.

Ecuador is auriferous. In 1942, 102,416 fine ounces of gold were produced,

all of which was sold to the Central Bank for re-sale to the United States; valued at 3,584,560 dollars (U.S.). At Pillshum in Cañar rich silver ore is found, but is not now worked. Cyanide precipitates of silver (1942) amounted to 261,945 fine ounces. Output of petroleum is about 2,300,000 barrels; exports (1939), 215,064 tons, valued at 25,005,266 sucres. The area of oil concessions in exploitation in the Republic is 245,419 acres, located in the Santa Elena Peninsula, in the Province of Guayas. The country is known to be also rich in copper, iron, lead and coal; sulphur exists in great quantities in the Chimborazo district and in the Galapagos Islands. All salt mined must be sold to the Government, which has a monopoly of imports, exports and sales.

Excepting the inter-Andean plateau and a few arid spots on the Pacific coast, Ecuador is a vast forest. Roughly estimated, 10,000 square miles on the Pacific slope extending from the sea to an altitude of 5,000 feet on the Andes, and the Amazon Basin below the same level containing 80,000 square miles, nearly all virgin forest, are rich in dyewoods, cinchona trees, and other valuable timber. The 'balsa wood,' renowned for its lightness and strength, is widely used in airplane construction; it grows profusely in the Caribbean region, but Ecuador is almost the sole exporter of it; the United States took over 9,000,000 board feet in 1941.

Panama or 'Jipijapa' hats, made of *Toquilla* straw, are made very largely in Ecuador, the principal centres being Jipijapa, Montecristi, Tabacundo and Cuenca. The war has benefited the trade by eliminating Italian, Japanese and Philippine competition.

### Commerce.

Imports and exports for five years in sucres (between 6 and 7 cents (U.S.); were as follows:—

|         | 1939               | 1940               | 1941               | 1942               | 1943               |
|---------|--------------------|--------------------|--------------------|--------------------|--------------------|
| Imports | Sucres 147,860,226 | Sucres 173,753,312 | Sucres 142,499,000 | Sucres 199,715,113 | Sucres 217,982,993 |
| Exports | 164,841,159        | 167,850,806        | 199,703,758        | 298,975,108        | 175,131,727        |

The United States furnished 47·7 per cent. of imports in 1943 (103,582,705 sucres). The United States took 79·3 per cent. of Ecuador's exports (239,237,757 sucres) in 1943.

Total trade between Ecuador and the United Kingdom for five years (according to Board of Trade returns):—

|                                 | 1934      | 1935     | 1936      | 1937      | 1938      |
|---------------------------------|-----------|----------|-----------|-----------|-----------|
| Imports from Ecuador into U.K.  | £ 206,777 | £ 203,41 | £ 155,683 | £ 109,655 | £ 188,882 |
| Exports to Ecuador from U.K.    | 191,679   | 221,66   | 230,229   | 272,647   | 131,239   |
| Re-exports to Ecuador from U.K. | 2,748     | 3,985    | 2,159     | 1,963     | 878       |

United Kingdom exports to Ecuador (Board of Trade returns) since 1938 have been: 1939, 138,000£.; 1940, 192,000£.; 1941, 174,000£.; 1942, 128,000£.; 1943, 263,000£., and 1944, 162,000£. Totals for the 3 years, 1939-41, include shipments of war supplies, if any, by Government departments.

### Shipping and Communications.

Ecuador has 10 seaports, of which Guayaquil is the chief. Considerable progress in road improvement is being made. There are

3,085,871. It was estimated (1938) that of the total population whites form 8 per cent.; Indians, 27 per cent.; mixed, 54 per cent.; mulattos, 6 per cent.; negroes, 2 per cent.; others, 3 per cent.; foreigners numbered about 20,000 persons. The language of the country is Spanish, but the Indians speak what is called the Quechua-language, and in the Oriental Region the wild tribes have a language of their own—'Jibaro.'

The estimated population of the Republic (June 30, 1938) was distributed as follows among the provinces (capitals in brackets):—

| Provinces                                     | Area in Square Miles (Wolf's estimates) | Population (Est. 1938) | Population per Square Mile |
|-----------------------------------------------|-----------------------------------------|------------------------|----------------------------|
| Esmeraldas (Esmeraldas)                       | 5,464                                   | 58,950                 | 10.8                       |
| Manabí (Portoviejo)                           | 7,891                                   | 312,850                | 39.6                       |
| Los Rios (Babahoyo)                           | 2,295                                   | 150,830                | 65.7                       |
| Guayas (Guayaquil)                            | 8,831                                   | 441,660                | 53.0                       |
| El Oro (Machala)                              | 2,838                                   | 77,539                 | 28.2                       |
| Carchi (Tulcan)                               | 1,495                                   | 80,650                 | 53.9                       |
| Imbabura (Ibarra)                             | 2,414                                   | 146,280                | 60.6                       |
| Pichincha (Quito)                             | 6,218                                   | 808,480                | 48.8                       |
| Ocotaxi (Latacunga)                           | 2,595                                   | 202,970                | 77.9                       |
| Tangarahu (Ambato)                            | 1,685                                   | 328,100                | 132.4                      |
| Chimborazo (Riobamba)                         | 2,989                                   | 258,500                | 86.5                       |
| Bolivar (Guaranda)                            | 1,159                                   | 99,800                 | 86.1                       |
| Cañar (Azogues)                               | 1,521                                   | 118,250                | 74.4                       |
| Amay (Cuenca)                                 | 8,873                                   | 236,800                | 31.1                       |
| Loja (Loja)                                   | 8,705                                   | 198,100                | 22.5                       |
| Napo Pastaza and Santiago Zamora <sup>1</sup> | 219,095                                 | 295,200                | 1.3                        |
| Galapagos Islands (San Cristobal)             | 2,868                                   | 1,000                  | 0.3                        |
| Migratory population                          |                                         |                        |                            |
| <b>Totals</b>                                 | <b>275,936</b>                          | <b>3,900,000</b>       | <b>11.6</b>                |

<sup>1</sup> These two provinces, formed in 1925, together constitute the 'Region Oriental'; of their combined areas only about 110,000 square miles have any inhabitants. The capital of the former is Tena, and of the latter, Macas.

The chief towns are the capital, Quito (150,374, census of 1942), Guayaquil (159,937). Other towns with estimated 1938 figures are: Cuenca (48,300), Ambato (25,200), Riobamba (19,500), Loja (19,000), Latacunga (17,800), and Azogues (8,200).

Vital statistics for 3 years were as follows:—

| Year | Births  | Deaths | Marriages |
|------|---------|--------|-----------|
| 1938 | 118,282 | 56,231 | 16,076    |
| 1939 | 118,053 | 61,225 | 17,192    |
| 1940 | 110,976 | 62,188 | 16,940    |

### Religion and Education.

The State recognises no religion; grants freedom of worship to all, but forbids the entry into the country of all foreign clergymen of whatever faith. The Catholic Church has one archbishop (Quito) and six suffragan bishops. Since 1895 all State appropriations for the benefit of the Church have ceased. Members of the Episcopate must be Ecuadorean citizens. A Modus Vivendi was concluded by the Ecuadorean Government and the Holy See on July 24, 1937, governing the relations between the Catholic Church and the State. Civil registration of births, deaths and marriages is obligatory.

Primary education is gratuitous and obligatory. Secondary education is carried on in 40 secondary schools or colleges and higher education in the 3 universities at Quito (founded in the eighteenth century by the

Dominicans), at Guayaquil and at Cuenca. The State maintains three music schools for vocal and instrumental music; tuition is free. There is also a Law School at Loja. Private schools, both primary and secondary, are under some state supervision. There were (1940-41) 2,710 primary schools in the Republic, with 316,749 pupils; at the 36 secondary schools there were (1940-41) 8,957 pupils; at the universities, 1,755. The total estimated expenditure on public education in 1939 was 28,744,200 sucres.

### Justice and Crime.

The Supreme Court in Quito is the highest tribunal and consists of 5 justices and the Minister Fiscal. Of the eight superior courts, three are composed of 6 judges and five of 3 judges each. There are numerous and well distributed lower courts. The popular jury was abolished in 1923 and criminal cases are heard before a 'special jury' consisting of 3 members of the Ecuadorean bar, or 'three citizens of recognised integrity' appointed annually by the superior courts. Capital punishment and all forms of torture are prohibited under the Constitution. Likewise imprisonment for debt and contracts involving personal servitude or slavery. Substantial amendments expediting judicial procedure were introduced in 1936 and salaries for all judicial officials replaced remuneration by fees.

### Finance.

Revenue and expenditure for recent years are given as follows (at par 1 sucres = 20 cents (U.S.)), but since 1939 it has been equal to between 6 and 7 cents):—

|             | 1940 <sup>1</sup> | 1941 <sup>1</sup> | 1942 <sup>1</sup> | 1943 <sup>1</sup> | 1944 <sup>1</sup> |
|-------------|-------------------|-------------------|-------------------|-------------------|-------------------|
|             | Sucres            | Sucres            | Sucres            | Sucres            | Sucres            |
| Revenue     | 118,050,000       | 117,200,000       | 180,800,000       | 159,383,000       | 198,260,000       |
| Expenditure | 118,050,000       | 117,200,000       | 180,800,000       | 159,383,000       | 198,260,000       |

<sup>1</sup> Estimates.

The budget estimates for 1943 and 1944 are shown as follows:—

| Revenue                       | 1943         | 1944         | Expenditure                 | 1943         | 1944         |
|-------------------------------|--------------|--------------|-----------------------------|--------------|--------------|
|                               | 1,000 sucres | 1,000 sucres |                             | 1,000 sucres | 1,000 sucres |
| Ordinary budget:              |              |              | Ordinary budget:            |              |              |
| Income from national property | 7,633        | 8,200        | Legislature                 | 440          | 707          |
| Income from national services | 10,660       | 11,275       | Judiciary                   | 2,741        | 3,363        |
| Income from taxes             | 123,341      | 158,060      | Executive departments       | 136,319      | 167,511      |
| Miscellaneous revenue         | 8,466        | 7,905        | Miscellaneous organizations | 986          | 1,495        |
|                               | 160,000      | 185,500      | Public debt                 | 9,514        | 12,514       |
| Extraordinary budget:         | 8,853        | 12,230       | Total ordinary budget       | 150,000      | 185,500      |
| Special rural school budget   | 530          | 530          | Extraordinary budget:       |              |              |
|                               |              |              | Highways and public works   | 4,320        | 4,497        |
|                               |              |              | Railway construction        | 4,533        | 7,733        |
|                               |              |              | Total extraordinary budget  | 8,853        | 12,230       |
|                               |              |              | Special rural school budget | 530          | 530          |
| Total                         | 159,383      | 198,260      | Total expenditures          | 159,383      | 198,260      |

now 1,591 miles of main trunk roads, 1,121 miles of branch roads and 2,227 miles of bridle paths; most roads are narrow, the width of a motor-car. The Pan-American Highway section (872 miles) will be, when completed, the main artery, extending from Rumichaca on the Colombian border to Macará in the south. There is river communication, improved by dredging, throughout the principal agricultural districts on the low grounds to the west of the Cordillera by the rivers Guayas, Daule and Vinces (navigable for 200 miles by river steamers in the rainy season), and other small affluents thereof.

A railway is open from Durán (opposite Guayaquil) to Quito (288 miles). The total length of the 9 Ecuadorean railways actually in operation is 1,048 kilometres.

The German owned and operated air service with twice-weekly service between Quito and Guayaquil was suspended in 1941. An American air service is maintained from Cristóbal to Quito, 6 hours; to Cali (Colombia), 2 hours; to Guayaquil, 1 hour, and to New York, 36 hours. All the leading towns are connected by an almost daily air service.

Quito is connected by telegraph with Colombia and Peru, and by cable with the rest of the world. Wireless telegraphy has been installed for domestic use; there are 26 stations in Quito, Guayaquil, Cuenca, Loja, Esmeraldas and other principal towns, as well as in the Archipelago of Colon. In December, 1941, there were 27 broadcasting stations.

In 1940 there were 446 post offices in the country, 211 telegraph offices, 6,957 kilometres of telegraph wires, and 5,995 kilometres of telephone wires; there were 95 telephone offices and 7,753 subscribers in the capital.

### Banking and Credit.

On March 4, 1927, a decree was issued establishing at Quito the 'Central Bank of Ecuador,' with a capital of 10,000,000 sucres, the only body authorised to issue currency. It is organised to protect the country's gold reserves and its general functions resemble those of the Federal Reserve Banks of the United States. On July 20, 1944, the Central Bank had gold in its vaults, 269,483,000 sucres (gold having been revalued, June 4, 1941, at 0.0602 gramme of fine gold per sucre); foreign exchange, 49,463,000 sucres; demand deposits, 236,510,000 sucres; note circulation, 240,259,000 sucres.

All the commercial banks must be affiliated to the Central Bank.

### Money, Weights and Measures.

By a new Monetary Law, prepared by the Kemmerer Financial Mission and decreed on March 4, 1927, Ecuador returned to the gold standard with its currency stabilized at the rate of 24.3 sucres = £1 or 1 sucre = 20 cents U.S., compared with the previous par value of 10 sucres = £1 or 1 sucre = 48.665 cents U.S. On February 8, 1932, the gold standard was abandoned. The gold sucre (named after the national hero, Marshal Antonio José de Sucre) contained 0.300933 grammes of pure gold, instead of the previous weight of 0.73224, but on December 18, 1935, it was revalued at the rate of 1 sucre = 0.10032 grains of fine gold; on June 13, 1936, it was further revalued to the equivalent of 9.66 cents U.S., and on June 4, 1940, it was revalued at 0.0602 gramme of fine gold per sucre. Foreign exchange value in New York, 1939, averaged 16.42 sucres to the dollar; in 1940, 15.00 to the dollar. In July, 1942, the Central Bank fixed the buying rate for dollars at 14.80 sucres to the dollar, and the selling rate at 15.00; in 1944 it was 18.70-14.10 to the dollar. The Bank's gold was revalued at 14.00 to the

dollar. The sucre is divided into 100 centavos. Nickel coins were minted in 1937 to replace the whole of the existing coinage of Ecuador; they consist of 1 sucre, 20, 10, 5 and 2½ centavo pieces. There is a 1 centavo coin of copper. The currency consists mainly of the notes of the Central Bank in denominations of 5, 10, 20, 50 and 100 sucres.

By a law of December 6, 1866, the metric system of weights and measures was made the legal standard of the Republic; but the Spanish measures are in general use. The quintal is equivalent to 101.4 pounds. The meridian of Quito has been adopted as the official time.

### Diplomatic and Consular Representatives.

#### 1. OF ECUADOR IN GREAT BRITAIN.

*Minister Plenipotentiary.*—Carlos Freile Larrea (accredited August 3, 1943).

*Counsellor.*—Alberto Puig Arosemena.

*Military Attaché.*—Lieut.-Colonel Cesar Alfaro.

Consular representatives at London, Birmingham, Glasgow, Liverpool and Southampton.

#### 2. OF GREAT BRITAIN IN ECUADOR.

*Envoy Extraordinary and Minister Plenipotentiary.*—Leslie Charles Hughes-Hallett (appointed June 25, 1941).

*Naval Attaché.*—Rear-Admiral Hector Boyes (serving as Captain), C.M.G., C.I.E., R.N.

*Military Attaché.*—Captain I. Higginbotham.

*Air Attaché.*—Wing-Commander H. G. F. Gaubert, D.F.C.

There are Consular officers at Quito and Guayaquil.

## EGYPT.

(MISR.)

EGYPT was originally part of the Turkish Empire. Since the end of the 18th century Great Britain has had special interests in Egypt. In 1882 internal disorders led to British military intervention, and on December 18, 1914, a British Protectorate over Egypt was declared, and the next day a Proclamation was issued deposing 'Abbás Hilmi, lately Khedive of Egypt, and conferring the title of Sultan of Egypt upon Hussein Kamil, eldest living prince of the family of Mohamed Ali. The British Protectorate was recognised by the Great Powers. Sultan Hussein Kamil died in 1917, and was succeeded by his brother as Sultan Fuad. The Protectorate terminated on February 28, 1922, and the Sultan was proclaimed King on March 15, 1922, since when Egypt has been an independent State.

On August 26, 1936, an Anglo-Egyptian Treaty of Alliance was signed in London (ratifications exchanged on December 22, 1936) to continue for 20 years, whereby the military occupation by British Forces was terminated, the special British interest in the defence of the Suez Canal Zone recognized, and the administration of the Sudan remains in accordance with the arrangement resulting from the Condominium Agreements of 1899. On May 8, 1937, a Convention was signed at Montreux, by the Egyptian Official Delegation and representatives of the Capitulatory Powers for the abolition of the Capitulations in Egypt. (See under JUSTICE, p. 863.)

### King.

**Faruk I** was born on February 11, 1920; son of the late King Fuad I and of Queen Nazli; succeeded his father on April 28, 1936; married January 20, 1938, Farida Zulfikar, daughter of Yussuf Pasha Zulfikar, and granddaughter of Mohamed Pasha Said, Prime Minister 1910-1914 and in 1919.

*Offspring of the King:* (1) Princess Ferial, born November 17, 1938; (2) Princess Fawzieh, born April 7, 1940; (3) Princess Fadia, born December 15, 1943.

*Sisters to the King:* (1) Princess Fewkieh, born October 6, 1897 (step-sister); (2) Princess Fawzieh, born November 5, 1921; married to the Shah of Persia, March 15, 1939; (3) Princess Faiza, born November 8, 1923; betrothed on January 21, 1945, to Prince Mohamed Aly Raouf; (4) Princess Faika, born June 8, 1926, and (5) Princess Fathia, born December 17, 1930.

The heir-presumptive is Prince Mohamed Aly (born November 9, 1875), first cousin to the King and younger brother of the former Khedive Abbas Hilmi II.

According to Law No. 50 of 1938, the King's Civil List is fixed at £E100,000, and the Royal Family's allowances at £E100,000.

The present sovereign of Egypt is the tenth ruler of the dynasty of Mohamed Ali. On April 13, 1922, the late King Fuad issued a rescript declaring the throne hereditary in the dynasty of Mohamed Ali and establishing the succession of kings in the direct male line by primogeniture. Failing such direct line, it provides that the throne shall pass first to the King's brothers and their direct descendants by right of age, whom failing to the King's uncles and their direct descendants by right of age, it being laid down that each new king establishes a new house and that the succession is vested in his direct line.

Female members of the house and their descendants are excluded, also anyone who is not in possession of full mental powers, who is not a Moslem, or who is not the son of Moslem parents.

### Constitution and Government.

For an account of the government before 1922, see THE STATESMAN'S YEAR-BOOK, 1924, pp. 834-5. For an account of the Constitution which was promulgated on October 22, 1930, see THE STATESMAN'S YEAR-BOOK, 1934, pp. 827-828.

The 1930 Constitution was abrogated by royal decree on November 30, 1934, and Parliament was dissolved. On December 12, 1935, the reintroduction of the Constitution of April 19, 1923, which had been abrogated by royal decree on October 22, 1930, was announced. This provides for a Parliament (*Barlaman*) composed of a Senate (*Maglis ash Shuyukh*) two-fifths of whom are appointed by the King and the remaining three-fifths are elected for 10 years, and a Chamber of Deputies (*Maglis an Nuwwab*) composed of 264 members, at least 30 years of age. The Senate is composed of 147 members, at least 40 years of age. For both Houses the vote is based on universal male suffrage. Soldiers have no vote.

The monarchy is hereditary, and the King acts through a Council of Ministers appointed by him, but responsible to Parliament. The administration is divided into Legislative, exercised by the King with the two Houses of Parliament; Executive, by the King acting through his Ministers, and Judiciary. The last branch consists of (1) National courts, (2) Mixed tribunals, and (3) National Courts of Personal Status. Ministers need not be members of either House of the Legislature, though in practice they generally have seats in either.

The elections held on January 8, 1945, resulted in the return of Saadists, 124; Liberals, 74; Makramists, 30; Independents, 29, and Nationalists, 7.

The Cabinet, appointed on February 24, 1945, is composed as follows:—

*Prime Minister and Minister of the Interior.*—Mahmud Pasha El Nokrashy (Saadist).

*Minister for Foreign Affairs.*—Abdel Hamid Pasha Badawy (March 7, 1945).

*Minister of Finance.*—Makram Pasha Ebeid (Independent).

*Minister of Commerce and Industry.*—Hefni Bey Mahmud (Liberal).

*Minister of Communications.*—Ibrahim Dessouki Bey Abaza (Liberal Constitutional).

*Minister of Public Health.*—Ibrahim Abdel Bey Hadi (Saadist).

*Minister of Wakfs (Religious Foundations).*—Mustapha Abdel Pasha Razek (Liberal).

*Minister of Agriculture.*—Ahmed Abdel Pasha Ghaffar (Liberal).

*Minister of Supply.*—Taha Bey el Sibli (Independent).

*Minister of Defence.*—Maitre Sayed Selim (Independent).  
*Minister of Public Works.*—Mahmud Pasha Ghaleb (Saadist).  
*Minister of Justice.*—Hafez Pasha Ramadan (Nationalist).  
*Minister of Education.*—Abdel Razek Bey el Sanhoury (Saadist).  
*Minister of Social Affairs.*—Abdel Meguid Bey Badr (Saadist).

Egypt declared war against Germany and Japan on February 26, 1945.

#### LOCAL GOVERNMENT.

The Provincial Councils were endowed in 1909 with the powers of applying bye-laws, authorising public-markets, fixing the number and pay of ghafirs (village watchmen), and authorising the creation of ezbas (hamlets). They are the local authorities in connection with elementary vernacular education and trade schools. They consist of two elected representatives from each Markaz. The Mudir is the *ex-officio* President of the Council.

In 1934 a new law (Law No. 24, 1934) was passed by the Egyptian Parliament, extending the powers of the Provincial Councils, in particular with reference to educational, public health and agricultural matters. A notable modification is that elementary education, through all the villages and towns of the provinces, was made a duty exclusively of the Councils.

Egypt Proper is administratively divided into 5 governorships (muháfzas) of principal towns, and 14 mudiriats or provinces, subdivided into districts or Markazes.

In fourteen towns (Alexandria, Mansûra, Medînet el-Faiyûm, Tanta, Zagazig, Damanhâr, Beni Suêf, Mahalla el-Kubra, Minya, Mit Ghamr, Zifta, Kafr el-Zayât, Benha and Port Said), Mixed Commissions composed of both Europeans and Egyptians in equal numbers have been formed to govern locally the towns and look after their interests.

Since October 15, 1937, the date fixed by the Montreux Agreement, municipal taxes have been imposed on all local residents, whether Egyptians or foreigners.

The Municipal Commission of Alexandria obtained in 1890 from European Powers full power to impose local taxation on all residents in the town.

In 57 other towns, another form of local commission exists with four elected members only. Foreign members, not to exceed two in number, can be nominated at the discretion of the Central Government.

These local commissions have practically the same taxing powers as the Mixed Commissions mentioned above.

A third form of local commissions was formed in 1918 under the name of Village Council and exists now in 86 villages in Egypt. This is composed of four elected members only, but without any power of nomination of Foreign members. It has the same taxing power as the Mixed Commissions.

The Central Government has complete power of veto on all decisions of every form of Commission in Egypt.

#### Area and Population.

The total area of Egypt proper, including the Libyan Desert, the region between the Nile and the Red Sea, and the Sinai Peninsula is about 386,198 square miles; but the cultivated and settled area, that is, the Nile Valley, Delta and Oases covers only about 13,600 square miles. Canals, roads, date plantations, etc., cover 1,900 square miles; 2,850 square miles are comprised in the surface of the Nile, marshes, and lakes. Egypt is divided into two great districts—'Wagh-el-Bahri,' or Lower Egypt, and 'El-Said,' or Upper Egypt.

The following table gives the area of the settled land surface, and the results of the census taken in 1927 and on March 26-27, 1937:—

| Administrative Divisions | Area in sq. miles (approx.) | 1927 Census | 1937 Census |           |            | Population per sq. mile 1937 |
|--------------------------|-----------------------------|-------------|-------------|-----------|------------|------------------------------|
|                          |                             | Total       | Males       | Females   | Total      |                              |
| Cairo                    | 62                          | 1,064,567   | 672,589     | 639,537   | 1,312,096  | 21,161                       |
| Alexandria               | 29                          | 573,068     | 347,698     | 338,088   | 685,736    | 23,646                       |
| Canal                    | 40                          | 129,797     | 83,309      | 77,837    | 161,146    | 4,028                        |
| Suez                     | 7                           | 40,528      | 26,159      | 23,527    | 49,686     | 7,098                        |
| Damietta                 | 1                           | 34,907      | 20,501      | 19,831    | 40,332     | 40,332                       |
| Western Desert           | 179                         | 48,956      | 28,421      | 24,156    | 52,576     | 612                          |

Estimated population in 1942, 17,287,000.

In 1925, Egypt ceded to Italian Cyrenaica the oasis of Gaghbub. (For the new frontier between Egypt and Cyrenaica, see map in the 1927 edition of THE STATESMAN'S YEAR-BOOK.)

The principal towns, with their populations, according to the census of 1937, are:—Cairo, 1,312,096; Alexandria, 685,736; Port Said, 124,749; Tanta, 95,260; Mansûra, 69,036; Faiyûm, 63,703; Mahalla el Kubra, 63,292; Damanhâr, 61,962; Asyût, 60,338; Zagazig, 59,793; Minya, 51,026; Suez, 49,686; Beni Suêf, 45,492; Damietta, 40,332; Giza, 37,779; Qena, 34,431; Shibtn el-Kôm, 32,712; Sohâg, 31,839; Benha, 28,922; Rosetta, 25,684; Aswân, 22,192.

Vital statistics for 3 years in whole Egypt:—

| Year | Births  | Marriages | Divorces | Deaths  |
|------|---------|-----------|----------|---------|
| 1939 | 698,746 | 183,823   | 53,436   | 429,033 |
| 1940 | 697,700 | 198,839   | 54,227   | 444,448 |
| 1941 | 695,016 | 235,725   | 60,446   | 440,981 |

obligation to bring the national courts up to the standard of the mixed courts by the time that the latter were abolished. A step in this direction was taken by a law passed on July 26, 1943, which guarantees the complete independence of the Egyptian judiciary by removing from the Minister of Justice the prerogatives of appointments, promotions and transfers of judges and handing over these powers to a professional judicial council.

### Finance.

Revenue and expenditure for six years (ending April 30):—

| Years   | Revenue<br>£E | Expenditure<br>£E | Years                | Revenue<br>£E | Expenditure<br>£E |
|---------|---------------|-------------------|----------------------|---------------|-------------------|
| 1939-40 | 39,408,529    | 41,174,155        | 1942-43              | 67,141,000    | 56,553,000        |

The foreign debt of Egypt began in 1862, when loans amounting to 3,292,800*l.* were issued for the purpose of extinguishing the floating debt. Other issues followed in rapid succession. The dual control by England and France began in 1879. In January, 1880, the two Controllers-General reported that Egypt could not possibly meet her engagements in full, and in July the Liquidation Law, in accordance with the recommendation of an International Commission of the Great Powers, was promulgated. By this law the Unified Debt was reduced to 4 per cent. interest; further conversions were made, and the Unified Debt thus increased to 57,776,340*l.*; certain unconsolidated liabilities were added to the Preference debt, which thus rose to 22,587,800*l.*; and the Daira Sania debt was increased to 9,512,900*l.*, the interest being reduced to 4 per cent. In 1885 and subsequent years further loans and conversions were entered into.

The Daira Sania and the Domains loans were paid off on October 15, 1905, and June 1, 1913, respectively. The amount and the charge of the various debts on May 1, 1942, were as follows:—

|                                                             | Debt<br>£ sterling | Charge<br>£E. |
|-------------------------------------------------------------|--------------------|---------------|
| Consolidated Debt—                                          |                    |               |
| Guaranteed Loan, 3 per cent. . . . .                        | 1,070,500          | 307,125       |
| Privileged Debt, 3½ per cent. . . . .                       | 30,633,980         | 1,045,384     |
| Unified Debt, 4 per cent. . . . .                           | 55,250,460         | 2,154,768     |
| Total . . . . .                                             | 86,954,940         | 3,507,277     |
| Egyptian Tribute Loans—                                     |                    |               |
| Turkish Government Loans (4 per cent.) of 1891 . . . . .    | 2,173,920          | 273,608       |
| Turkish Government Conversion Loan (3½ per cent.) . . . . . | 3,577,660          | 321,018       |
| Total . . . . .                                             | 5,751,580          | 594,626       |
| Grand Total . . . . .                                       | 92,706,520         | 4,101,903     |

The charges on account of debts of all kinds (including tribute), as shown in the estimates for 1943-44, amount to £E4,101,903.

In 1888 and 1890, reserve funds were established, the balances of which, in virtue of the Anglo-French Convention of April 4, 1904, were placed at the disposal of the Egyptian Government in 1905. The amount received by the Egyptian Government was carried to a General Reserve Fund. In this Fund on April 30, 1942, there was a balance of £E33,085,221. Of this amount £E12,235,787 represents the engaged Reserve.

### Defence.

#### EGYPTIAN ARMY.

According to the terms of Article 8 of the Anglo-Egyptian Treaty of Alliance, 1936, Egypt authorises, without prejudice to her Sovereign rights, British forces to station in the vicinity of the Canal, to ensure, temporarily in co-operation with the Egyptian forces, the defence of the Canal, until the Egyptian army is in a position to ensure by its own resources such defence. Service in the army is compulsory and owing to the proposed expansion of the army all men fit for service are enlisted on a large scale. The strength of the army was 22,560 in 1937-38, of which 860 were Egyptian officers, excluding coast-guards, frontier administration and His Majesty's Body-guard. It has since been increased and re-equipped.

### Religion.

In 1937, the population (excluding Nomads) consisted of 14,562,695 Moslems; 1,099,186 Copts and Greek Orthodox; 78,203 Protestants; 126,581 Latins and Uniates; 62,953 Jews; 1,076 others and unknown. Thus Moslems formed 91.40 per cent. of the population; Christians, 8.19 per cent.; Jews, 0.40 per cent.; others, 0.01 per cent. The principal seat of Koranic learning is the Mosque and University of El-Azhar at Cairo, founded in the year 361 of the Hegira, being 972 of the Christian era. The main centres of Higher Islamic learning under the supervision of the Council and the University of El-Azhar are: the Faculty of Theology, the Faculty of Islamic Law (1,181 students in 1943-44), the Faculty of Arabic Language (868 students in 1943-44), the Faculty of Sources of Law (876 students in 1943-44), together with the following institutions of El-Azhar (with 4,853 students in 1943-44), at Cairo, at Alexandria, at Tanta, at Asyût, at Disûk, at Dâmiyetta, at Zagazig, at Shebin El-Kom and at Kena.

There are in Egypt large numbers of native Christians connected with the various Oriental churches; of these, the largest and most influential are the Copts, the descendants of those ancient Egyptians who adopted Christianity in the fourth century of the Christian era. Their head is the Coptic Patriarch, Mgr. Anba Makarius, Archbishop of Assiut, who was elected on February 6, 1944. There are fifteen metropolitans and two bishops in Egypt, and one bishop for Khartum; there are also archpriests, priests, deacons and monks. Priests must be married before ordination, but celibacy is imposed on monks and high dignitaries. The Copts use the Diocletian (or Martyrs') calendar, which differs by 284 years from the Gregorian calendar.

### Education.

Education was made compulsory for all children between the ages of 7 and 12 by a law passed in April, 1933.

For elementary education there were in 1943-44, 331 Government schools for boys, with 70,990 pupils, and 380 for girls, with 67,600 pupils; 201 *maktabs* for boys, with 60,764 pupils, and 204 for girls, with 59,208 pupils. There were besides 137 elementary schools for both boys and girls, with 16,784 pupils; 43 rural schools for boys, with 2,651 pupils. Of kindergarten and primary schools there were, in 1943-44, 142 for boys, with 34,785 pupils, and 33 for girls, with 6,186 pupils; 297 private schools for boys, with 50,206 pupils, and 100 for girls with 13,958 pupils, besides 30 Government kindergartens, with 4,453 pupils, and 94 private kindergartens, with 10,957 pupils.

For secondary education there were, in 1943-44, 41 Government schools for boys, with 28,773 pupils, and 9 for girls, with 2,733 pupils, besides 70 private schools for boys, with 16,067 pupils, and 11 for girls, with 997 pupils.

For technical education (commercial, industrial and agricultural) there were altogether, in 1933-34, 54 schools, with 13,825 pupils.

There are two universities in Egypt. The University of Fuad I, in Cairo (founded in 1908 as a private institution and taken over by the Government in 1925), had, in 1933-34, 8,179 students (394 women); the University of Farouk I, founded by the Government in Alexandria in 1943, had, in 1943-44, 2,049 students (63 women).

There are also 8 training colleges for men (998 students in 1943-44) and 8 for women (932 students).

### Justice.

Before 1883 the only native tribunals in the country were the *Mekkemas*, presided over by the *Qâdis*. At the present time, they retain jurisdiction

only in matters of personal law (marriage, succession, etc.), and *wakfs*—the latter being either charitable foundations, or family settlements with an ultimate remainder in favour of a charitable foundation—and also in certain non-religious cases (e.g. succession) between non-Moslem natives. Other Courts of Personal Status, the *Magalis Hasbiya* (reorganised by a Law of October, 1925), deal with the appointment of tutors; the interdiction of incapable persons and the nomination of guardians for them; the nomination of mandatories for the absent, and the control of the persons so appointed or nominated. In matters of personal law other than intestate succession, non-Musulmans are, however, in general subject to their own Patriarchate, or any other recognised religious authority. In other matters, natives are justiciable before the so-called National Courts established in 1883. These now consist of 102 Summary Tribunals and of 8 Judicial Delegations, each presided over by a single judge, with civil jurisdiction in matters up to £E150 in value, and criminal jurisdiction in offences punishable by fine or by imprisonment up to three years, except in cases relating to the trafficking in narcotics where the period rises up to 5 years and a fine not exceeding £E1,000. That is, police offences and misdemeanours; eleven Central Tribunals, each of the Chambers of which consists of three judges; and two Courts of Appeal, one at Cairo and the other at Asyût. Under a law of 1904, there are also weekly sittings of the Markaz Tribunals (to the number of 33) in the Governorates of Cairo, Alexandria, Port Said, Suez, Damietta and Ismailia for the disposal of petty offences, the judge having powers up to three months' imprisonment or fine of £E10, and the prosecution being conducted by the police. Civil cases not within the competence of the Summary Tribunals are heard in first instance by the Central Tribunals, with an appeal to one of the Courts of Appeal. The Central Tribunals also hear civil and criminal appeals from the Summary Tribunals. Since 1905 serious crimes (and, under a law of 1911, and a decree of 1925, all press offences) are tried at the Central Tribunals by three judges of the Court of Appeal sitting as an Assize Court, assizes being held monthly. By a law of 1931 a separate Court of Cassation over and above the Courts of Appeal was set up. The new Court of Cassation is composed of ten Judges divided into two Chambers of 5 Judges each, one for Civil and the other for Criminal cases. The prosecution before Summary Tribunals and Assize Courts is entrusted to the *Parquet*, which is directed by a *Chef de Parquet*, having under him a Substitut or Substitut-Adjoint at each Summary Tribunal of the circumscription; the investigation of crimes is ordinarily conducted by the *Parquet*, or by the police under the direction of the *Parquet*; cases going before an Assize Court are further submitted to a special committing judge. Offences against irrigation laws, etc., are tried by special administrative tribunals.

The so-called 'Cantonal' Courts (numbering approximately 240) composed of village notables, created in 1912, with a general civil jurisdiction in suits up to 5*l*. in value and a petty criminal jurisdiction were suppressed by Law No. 34 of 1930, their jurisdiction being transferred to the Summary Tribunals.

The Capitulations were abolished by the Convention of Montreux, which came into force on October 15, 1937. The Convention laid down that the Mixed Courts, with a much amplified jurisdiction, should remain for another twelve years, to expire on October 14, 1949. During this period, called the 'Transitional Period,' the different laws of the country will be indiscriminately applied to natives and foreign nationals alike. In regard to legislation of a fiscal nature, it has been agreed that under no circumstances shall it discriminate against foreigners residing in Egypt.

Under the Montreux Convention the Egyptian Government accepted an

## ALLIED BRITISH FORCE IN EGYPT.

In the summer of 1939 the British garrison of Egypt comprised an infantry division and an armoured division. An Indian division was moved thither just before the outbreak of war, and that autumn an Australian contingent arrived. In the late summer of 1940, after Italy entered the war, the forces in Egypt were strongly reinforced, especially in air and mechanized units.

## NAVY.

There are an escort vessel, *El Amir Farouq*, a transport, *El Amira Fauzia*, four motor patrol vessels, and a fishery research vessel, *Mabahiss*, maintained by the Coastguard and Fisheries Department; the transport *Sollum* (ex-British sloop *Syringa*) and some smaller vessels, under the Ports and Lighthouses Department; and the royal yacht *Mahrussa*.

In October, 1938, it was decided by the Defence Council to build a nucleus fleet comprising a cruiser, four minesweepers and six motor torpedo boats, at a cost of 3,500,000*l.*, but the war has held up this programme.

For 1942-43 the expenditure of the Ministry of Defence was estimated at £E6,638,000.

## Production and Industry.

Rain seldom falls in Upper Egypt and only at irregular intervals in Cairo where the average for the year is no more than 1·2 ins. At Alexandria the average is 8 ins.

The cultivable area of Egypt Proper was reckoned in 1940-41 at 8,853,419 feddāns (1 feddān = 1·038 acre), and of this 891,555 were taken up for public utility purposes and 2,314,330 were uncultivated for want of reclamation. The agricultural population (Fellahin) forms about 62 per cent. of the whole. A large proportion of them are small landholders with under 5 feddāns, while others, almost or altogether landless, are labourers, the relation between the employers and the employed being mostly hereditary. The following table shows, on December 31, 1941, the number of landholders and the distribution of the land among foreigners and Egyptians:—

| Extent of holding in feddāns | Foreigners      |             | Egyptians       |             | Total of Area |             | Total of Landowners |             |
|------------------------------|-----------------|-------------|-----------------|-------------|---------------|-------------|---------------------|-------------|
|                              | Area in feddāns | Land-owners | Area in feddāns | Land-owners | Feddāns       | Per-centage | Land-owners         | Per-centage |
| Up to 1                      | 910             | 1,814       | 730,340         | 1,773,682   | 731,250       | 12·5        | 1,775,496           | 70·8        |
| From 1-5                     | 2,970           | 1,134       | 1,176,130       | 571,596     | 1,179,100     | 20·2        | 572,730             | 22·8        |
| " 5-10                       | 4,452           | 640         | 569,054         | 85,000      | 574,106       | 9·8         | 85,640              | 3·4         |
| " 10-20                      | 6,881           | 472         | 550,543         | 40,904      | 557,424       | 9·5         | 41,376              | 1·6         |
| " 20-30                      | 5,676           | 227         | 281,680         | 11,530      | 287,356       | 4·9         | 11,757              | 0·5         |
| " 30-50                      | 11,519          | 287         | 345,053         | 8,982       | 356,572       | 6·2         | 9,269               | 0·4         |
| Over 50                      | 581,690         | 811         | 1,776,669       | 11,207      | 2,158,379     | 36·9        | 12,018              | 0·5         |
| Total                        | 414,098         | 5,385       | 5,430,089       | 2,502,901   | 5,844,187     | 100·0       | 2,508,286           | 100·0       |

Irrigation occupies a predominant place in the economic development of the country. The Aswān reservoir can now hold up to 5,500 million cubic metres of water, and the Gebel Aulia reservoir, completed in 1937, holds 2,000 million cubic metres. Barrages have been erected at Esna, Nag' Hammādi, Assiut and Zifta, and at the bifurcation of the Nile below Cairo. Nag' Hammādi barrage, completed in 1930, ensures full basin supplies even in low flood to Girga province, and will facilitate perennial irrigation when

basin lands are converted. Assiut barrage having been remodelled will meet the greater demands of the area it now commands. The Esna barrage now secures basin irrigation to lands in Qena province. New barrages (Mohamed Ali barrages) have been completed at the bifurcation of the Nile below Cairo to replace the existing structures which, built in 1861, are now unable to meet the conditions following the increase in summer supplies, the reclamation of large areas of waste lands and the earlier watering of food crops.

The area and production of cotton for six years were:—

| Year | Area, Feddāns | Crop, Qantārs | Year | Area, Feddāns | Crop, Qantārs |
|------|---------------|---------------|------|---------------|---------------|
| 1937 | 1,978,151     | 11,008,862    | 1940 | 1,634,669     | 9,169,684     |
| 1938 | 1,783,911     | 8,539,517     | 1941 | 1,643,629     | 8,373,610     |
| 1939 | 1,624,817     | 8,692,097     | 1944 | 712,810       | 3,569,408     |

In 1940-41, the area and yield of wheat were 1,502,381 feddāns and 7,491,978 ardebs; barley, 255,776 feddāns and 1,754,481 ardebs; beans, 368,870 feddāns and 1,835,947 ardebs; lentils, 82,471 feddāns and 389,552 ardebs; onions, 32,538 feddāns and 5,490,450 qantārs. In the year 1943 the area and the yield of maize were 1,950,967 feddāns and 9,836,000 ardebs; millet, 729,106 feddāns and 5,524,000 ardebs; rice, uncorticated, 642,121 feddāns and 725,000 daribas (1 dariba = 945 kilos).

The millet harvest for 1942 is estimated at 6,885,685 ardebs (1 ardeb = 5·44 bushels), against 3,352,180 ardebs in 1941; the estimated maize crop is 10,368,835 ardebs, against 9,157,677 ardebs in 1941; rice at 994,535 daribas (1 dariba of nondecorticated rice = 294 kilograms), against 606,000 daribas in 1941; and barley at 2,306,091 ardebs, compared with 1,754,481 ardebs in 1941.

In June, 1943, there were in Egypt 30,896 horses, 826,796 donkeys, 12,225 mules, 1,202,284 cows, 1,001,124 buffaloes, 1,423,772 sheep, 759,794 goats, 174,054 camels and 30,950 pigs.

The principal mineral products in 1941 were (in metric tons): phosphate rock, 111,708; petroleum, 1,220,557; manganese ore, 2,175. Other products are: Ochres, sulphate of magnesia, talc, building stones, clay, cement, gypsum, natron, carbonate and sulphate of sodium, nitrate of soda and salt.

The fishing industry is of some importance. The catch of the Egyptian seas and lakes fisheries in 1940 amounted to 30,558 metric tons, and 3,904 metric tons Nile fisheries, the total production being valued at £E655,076. During 1940 there were 27,002 men and 11,867 boys engaged in fishing; and 9,406 boats for fishing.

## Commerce.

Imports and exports for six years:—

| Year | Imports    | Exports <sup>1</sup> | Year | Imports    | Exports <sup>1</sup> |
|------|------------|----------------------|------|------------|----------------------|
|      | £E         | £E                   |      | £E         | £E                   |
| 1935 | 82,288,859 | 85,603,162           | 1938 | 36,954,373 | 29,342,485           |
| 1936 | 81,532,947 | 82,973,400           | 1939 | 34,090,923 | 34,080,706           |

## Shipping and Navigation.

Egyptian shipping on June 30, 1938 :—52 vessels of 55,887 tons.

In 1940, excluding warships and vessels requisitioned by the military authorities, 3,896 steamers of a net registered tonnage of 11,014,013 entered at, and 3,878 steamers of a net registered tonnage of 10,667,983 departed from, all the Egyptian ports (Alexandria, Port Said, Suez, Ter, El Qoseir, Safage, Hurghada, Ras Gharib, Abu Zenima, Sidi Barrani, Marsa Matrüh and Soll ).

## Suez Canal.

The Suez Canal is 103 miles long (including 4 miles of approach channels for the harbours), connecting the Mediterranean with the Red Sea. It has a depth of 34 feet, an average width of 197 feet and cost 29,725,000l. to construct. It was opened for navigation November 17, 1869. The concession to the Suez Canal Company expires on November 17, 1968. By the Convention of Constantinople of October 29, 1888, the canal is open to vessels of all nations and is free from blockade. The canal is owned by a French corporation, in which the British Government holds 295,026 shares out of a total of 652,932. The canal is governed by a board of 32 adminis-

trators, of whom 19 are French, 10 British (8 representing the British Government), 2 Egyptian and 1 Dutchman.

*Representatives of the British Government.*—Norman Young, the Earl of Cromer and Sir Ronald Graham.

The following table shows the number and net tonnage of commercial vessels (excluding vessels requisitioned by the military authorities) of all nationalities that passed through the Canal in 1940 :—

| Nationality        | No. of transits | Suez Canal net tonnage | Nationality                   | No. of transits | Suez Canal net tonnage |
|--------------------|-----------------|------------------------|-------------------------------|-----------------|------------------------|
| British . . . . .  | 1,219           | 6,841,531              | Greek . . . . .               | 178             | 686,198                |
| American . . . . . | 41              | 233,500                | Italian . . . . .             | 371             | 1,728,082              |
| Danish . . . . .   | 34              | 124,872                | Japanese . . . . .            | 35              | 219,840                |
| Dutch . . . . .    | 164             | 971,264                | Norwegian . . . . .           | 156             | 864,200                |
| French . . . . .   | 94              | 607,964                | Swedish . . . . .             | 14              | 64,109                 |
| German . . . . .   | —               | —                      | Russian . . . . .             | —               | —                      |
|                    |                 |                        | Other nationalities . . . . . | 123             | 383,444                |
|                    |                 |                        | Total . . . . .               | 2,419           | 12,712,979             |

The number of Government vessels (warships and transports) that passed through the canal in 1940 was 40 of 379,636 Suez Canal net tonnage (including 31 British of 445,250 Suez Canal net tonnage).

The number and net tonnage of vessels that have passed through the Suez Canal (including warships), and the gross receipts of the company, have been as follows in six years :—

| Year | No. of Transits | Net Tonnage | Receipts      | Year | No. of Transits | Net Tonnage | Receipts      |
|------|-----------------|-------------|---------------|------|-----------------|-------------|---------------|
|      |                 |             | Fr.           |      |                 |             | Fr.           |
| 1935 | 5,953           | 22,727,592  | 927,746,902   | 1938 | 6,127           | 34,249,745  | 1,784,278,001 |
| 1936 | 5,789           | 31,903,580  | 986,213,234   | 1939 | 5,972           | 29,263,344  | 1,491,635,891 |
| 1937 | 6,570           | 36,129,101  | 1,448,484,830 | 1940 | 2,459           | 13,092,615  | —             |

The number of passengers (civil and military) who went through the canal was, in 1935, 618,769; 1936, 751,592; 1937, 669,963; 1938, 464,126; 1939, 383,879; 1940, 98,944.

## Communications.

In 1940-41 there were 3,686 miles of rails belonging to and worked by the State, including 2,619 miles of main line, 158 miles of branch line, and 909 miles of sidings. There were also 862 miles of agricultural light railways owned by private companies. The State railways have a gauge of 4 ft. 8½ in. inside rails (the line, 124 miles in length, from Luxor to Assuan being opened on wide gauge in December, 1926), except that to the Western Oases, which is 2 ft. 5½ in.

The British Army built a track from Haifa to Tripoli, 175 miles in length, providing for the first time a continuous line linking the Turkish rail system with Egypt and the Southern Mediterranean coast. It has put a modern steel swing bridge across the Suez Canal and extended the Egyptian coastal railway into Cyrenaica, so that it is possible to take train from Istanbul right through to the Libyan port of Tobruk. At the same time, a motor highway suitable for daily use by heavy transport has been built from Haifa across the Syrian desert through Northern Iraq to Baghdad.

The number of passengers carried in 1943-44 by the State railways was 58,165,264; weight of goods carried, excluding service transports, 8,486,958

tons. Net receipts in 1943-44 were £E11,255,962; working expenses, £E6,013,360.

The telephones have belonged to the Egyptian Government since April, 1918. In 1940-41, the State telegraphs had a length of 11,788 miles of wire, and telephones, 444,972 miles. The Eastern Telegraph Company, by concessions, have telegraph lines across Egypt from Alexandria via Cairo to Suez, and from Port Said to Suez, connecting their cables to England, India and Port Sudan. The number of telegrams forwarded and received in 1940-41 was, local, 1,583,500 commercial and 3,635,759 service; foreign, 533,180. The number of telegrams forwarded and received by the State wireless stations in 1941 was 177,735, and by Marconi Radio Telegraph Co., 526,353.

There were in 1941, 5,605 post offices and stations. In the inland service (1941) there passed through the post-office 132,639,000 ordinary and registered articles of correspondence; 3,368,000 ordinary and registered articles of correspondence, and 8,600,000 were despatched and received to and from abroad respectively. In 1941 receipts were £E774,674; expenses, £E738,280.

Air transport activities increased recently, but war conditions have curtailed them. Before the war, the Misr Airways S.A.E. was the National Air Transport Co. in Egypt. The company operated various air services within the country and a daily service between Egypt and Palestine and a service to Bagdad twice weekly.

### Banks and Credit.

The National Bank founded in 1898 has the privilege of bank-notes issue. The position of the Bank on December 31, 1941, was (in thousand Egyptian pounds):—Issue Department, gold, 6,241; British Treasury bills and British War Loan, 44,959; Egyptian Government Securities, 1,500; notes issued, 52,700. Banking Department, assets, investments, 57,793; advances and bills, 6,881; cash, 2,256; sundry accounts, 1,797; liabilities, capital and reserve, 5,850; deposits, 33,409; banker's accounts, 4,835; Public Debt account, 3,019; other liabilities, 11,614.

On June 27, 1939, the shareholders of the bank agreed to the conversion of the bank into a central bank, and it is expected that the Government will take steps to pass legislation for the purpose.

The Agricultural Bank of Egypt was founded in November, 1930, with a capital of £E1,000,000 (half subscribed by the Government).

In 1901, a Post-Office Savings Bank was opened, and on December 31 of that year, it had 6,740 depositors with balances amounting to £E47,492; on December 31, 1941, the depositors numbered 486,169, and their balances amounted to £E9,118,850.

The balance of deposits in the savings departments of the banks in Egypt at the end of 1940 amounted to £E2,181,149 and the number of depositors to 26,357.

### Money, Weights and Measures.

#### MONEY.

By decree of October 18, 1916 (20 Zi'l-Higga 1334), the monetary unit of Egypt is the gold Egyptian pound of 100 piastres. It weighs 8.5 grammes .875 fine, and therefore contains 7.4375 grammes of fine gold. Its value in sterling is £1 0s. 6½d. A new coinage was introduced at the same time in which the *Tughra* of the Sultan of Turkey was superseded by that of the ruler of Egypt.

The 10-piastre silver piece weighs 14 grammes .833 fine, and therefore

contains 11.67 grammes of fine silver. The piastre is worth 2.46d. in English money. It is subdivided into tenths (*ushr el girsh* or milliemmes).

Coins in circulation are the Egyptian pound (100 piastres) and half pound in gold; 20, 10, 5, and 2 piastre pieces in silver; 1, ½, ¼, ⅓, ⅕ piastre pieces in nickel, and ½, ¼ pieces in bronze. Silver coin is legal tender only up to £E2, and nickel or bronze coins up to 10 piastres. For some years gold coins have not been issued, and the gold circulating in Egypt and the Sudan is almost exclusively British sovereigns, which are legal tender at the rate of 97½ piastres. The gold pieces of the former Latin Monetary Union equivalent to the French 20 franc piece are permitted to circulate at a uniform rate of £E0.7715.

Bank notes are issued by the National Bank in various denominations: P.T.25 and 50, £E1, 5, 10, 50, 100. They are in principle not legal tender, and the bank was compelled to keep a 50 per cent. gold cover for the issue. Soon after the outbreak of the great war of 1914 the notes were made legal tender, and in October, 1916, a further step was taken authorising the bank to deposit British Treasury Bills and Treasury Bonds in lieu of gold for any extension of the then existing issue. The amount of notes issued on July 31, 1942, was £E73,700,000. Gold cover was £6,240,583; Egyptian Government securities, £E1,500,000; British Treasury Bills and War Loan, £65,959,417. Notes in circulation, May, 1944, £E105,291,000.

The principal units of Egyptian weights and measures are as follows:—

#### MEASURE OF CAPACITY.

*Kaddh* = 1/96th ardeb = 3.63 pints.

*Rob* = 4 kadahs = 1.815 gallons.

*Keila* = 8 kadahs = 3.63 gallons.

*Ardeb* = 96 kadahs = 43.555 gallons, or 5.44439 bushels.

#### WEIGHTS.

*Roll* = 144 dirhems = 0.9905 lb.

*Oke* = 400 dirhems = 2.75137 lbs.

*Heml* = 200 okes = 550.274 lbs.

*Qantār* { or 100 rotls or } = 99.0493 lbs.  
                  36 okes

1 *Qantār* of unginned cotton = 315 lbs.

1 *Qantār* of ginned cotton = 100 lbs.

The approximate weight of the ardeb is as follows:—Wheat, 150 kg.; beans, 155 kg.; barley, 120 kg.; maize, 140 kg.; cotton seed, 121 kg.

#### LENGTH MEASURES.

|                                                      | Inches     |
|------------------------------------------------------|------------|
| <i>Diraa Baladi</i> (for textiles) . . . . .         | = 22.8347  |
| <i>Diraa Mināri</i> (for building, etc.) . . . . .   | = 29.5276  |
| <i>Qasaba</i> (for agricultural land) = 3.8823 yards | = 139.7639 |

#### MEASURES OF SURFACE.

*Feddān*, the unit of measure for land = 4,200½ sq. metres = 7,468.148 sq. pica = 1.03805 acre.

1 sq. pic = 6.0547 sq. ft. = 0.5625 sq. metre.

In March, 1939, a law was passed establishing the metre, the kilogramme and the litre as the weights and measures legal in Egypt. While in practice existing weights and measures will continue to be used, their metric equivalents will have to be indicated.

chosen by direct and proportional election, in which all who are entitled to vote have an equal vote. The suffrage is possessed, with the usual exceptions, by every Finnish citizen (man or woman) who has reached his or her 24th year. There are 16 electoral districts with a representation proportioned to the population, a rearrangement being required every 10 years. Each district is divided into voting circuits. The voting system, devised with a view to proportional representation, provides for the formation of voters' associations which prepare lists of candidates, the votes for whom are in a falling scale according to the order in which the voter has placed them on the list voted for. There may, within limits, be compacts between associations, and joint candidates may be entered in competing lists, while any voter may either support an association list or vote for any candidate he pleases. Every citizen entitled to vote is eligible to the House of Representatives, which is elected for 3 years.

The President is elected for 6 years by an electoral college elected by the votes of the citizens. He receives a salary of 700,000 marks and 200,000 marks for allowances. The Council of State (Ministry), appointed by the President, must enjoy the confidence of the House of Representatives.

At the elections held on March 18, 1945, the following parties were returned: Social-Democrats, 52; Democratic Union (extreme Left group, including Communists), 50; Agrarian, 48; National Union (Conservative), 27; Swedish People's Party, 16; Finnish Progressive Party, 7.

*President of Finland.*—Field-Marshal *Mannerheim* (born 1889; elected August 4, 1944).

The Council of State, appointed on November 17, 1944, is composed as follows:—

*Prime Minister.*—Juko *Paasikivi*.

*Minister for Foreign Affairs.*—M. *Enckell* (Independent).

*Minister of Finance.*—M. *Helo* (Socialist).

*Minister of the Interior.*—M. *Hillilä* (Agrarian).

*Minister of Justice.*—M. *Kekkonen*.

*Minister of Defence.*—Lieutenant-General *Valo* (non-party).

*Minister of Communications and Public Works.*—M. *Vuori* (Socialist).

#### LOCAL GOVERNMENT.

For administrative purposes Finland is divided into ten departments. The provincial administration is entrusted in each of the departments to a prefect, who is appointed by the President. The unit of local government is the commune. Each rural parish and each town forms a commune in which all men and all women of 21 years of age who have paid the local taxes for the preceding two years are voters. In all communes a communal council is elected to decide questions of administration and local economy. The executive power is vested in rural communes in a college formed by the head of the commune and four or more aldermen elected by the council. In towns the executive authority is the town board with an appointed official as president and four or more members elected by the council. There were, in 1938, 38 towns, 27 boroughs, and 537 rural communes in Finland. As executive officers of the prefects there are the bailiffs of 55 and sub-bailiffs of 304 districts.

The department of Åland has a county council (*landsting*) consisting of one chamber which is elected on the basis of the same suffrage as the Parliament. The county council settles the internal affairs of the government. The executive authority is with an executive council, of which the *lantråd* is president.

#### Area and Population.

The area and population of Finland, according to the census taken on December 31, 1920, and that taken on December 31, 1930, were as follows (Swedish names are given in brackets):—

| Departments                 | Area <sup>1</sup><br>sq. miles | Popula-<br>tion<br>Dec. 31,<br>1920 | Popula-<br>tion<br>Dec. 31,<br>1930 | Popula-<br>tion per<br>sq. mile<br>1930 |
|-----------------------------|--------------------------------|-------------------------------------|-------------------------------------|-----------------------------------------|
| Uusimaa (Nyland)            | 4,435                          | 446,329                             | 507,708                             | 114.5                                   |
| Turku-Pori (Åbo-Björneborg) | 8,496                          | 495,561                             | 522,222                             | 61.3                                    |
| Åhvenanmaa (Åland)          | 572                            | 26,911                              | 27,875                              | 47.9                                    |
| Häme (Tavastehus)           | 7,123                          | 360,528                             | 359,056                             | 54.6                                    |
| Vilpuri (Viborg)            | 12,408                         | 558,202                             | 622,553                             | 50.2                                    |
| Mikkeli (St. Michel)        | 6,748                          | 204,425                             | 208,901                             | 31.0                                    |
| Kuopio                      | 14,583                         | 255,701                             | 381,190                             | 26.1                                    |
| Vaasa (Vasa)                | 15,062                         | 548,055                             | 582,874                             | 38.7                                    |
| Oulu (Uleåborg)             | 65,130                         | 369,095                             | 425,278                             | 6.5                                     |
| Total                       | 134,557                        | 3,364,807                           | 3,667,067                           | 27.3                                    |

<sup>1</sup> Excluding water area, which amounts to an additional 13,254 square miles (inland waters only).

Of the total on December 31, 1930, 1,809,068 were males and 1,857,999 females. In 1930, 3,022,257 spoke Finnish, 342,916 Swedish, 8,216 Russian, 3,719 German, 2,113 Laponic.

When on June 22, 1941, the Germans launched their attack on Russia, the Finnish army co-operated with the Germans and took part in the invasion of Russia. On September 19, 1944, after Russian troops had invaded Finland, an armistice was signed in Moscow between Finland on the one hand and Russia and Great Britain, acting on behalf of the United Nations, on the other. According to this Finnish troops were to be withdrawn behind the frontier fixed by the Treaty of March 12, 1940, between Russia and Finland; Finland agreed to cede to Russia the Petsamo area and to lease to Russia for 50 years the Porkkala headland, with a considerable stretch of sea and land, to be used as a military base. (See map in this volume.) Further, Finland undertook to pay 300 million dollars in reparations within 6 years.

The growth of the population is shown as follows:—

| Years | In Towns | In Country | Total     | Percentage in towns |
|-------|----------|------------|-----------|---------------------|
| 1800  | 46,604   | 786,055    | 832,659   | 5.60                |
| 1900  | 339,613  | 2,372,949  | 2,712,562 | 12.52               |
| 1925  | 781,785  | 3,005,059  | 3,786,844 | 20.64               |
| 1926  | 794,177  | 3,012,986  | 3,807,163 | 20.86               |
| 1937  | 825,848  | 3,008,814  | 3,834,662 | 21.54               |

On December 31, 1942, the population was 3,887,217, including 1,902,303 males and 1,984,914 females.

The movement of the population for three years was as follows:—

| Year | Living Births | Of which illegitimate | Stillborn | Marriages | Deaths (exclusive of stillborn) | Excess of Births |
|------|---------------|-----------------------|-----------|-----------|---------------------------------|------------------|
| 1935 | 69,942        | 4,964                 | 1,843     | 28,758    | 45,370                          | 24,572           |
| 1936 | 68,895        | 4,803                 | 1,779     | 29,841    | 49,728                          | 19,172           |
| 1937 | 72,319        | 5,050                 | 1,750     | 32,464    | 47,150                          | 25,169           |

Emigration: 1934, 402; 1935, 573; 1936, 711; 1937, 1,536; 1938, 1,447.

The principal towns, with the number of their inhabitants at end of 1939, are: Helsinki (Helsingfors), 304,965; Tampere (Tammerfors), 76,730; Turku (Åbo), 74,351; Viipuri (Viborg), 74,247; Vaasa (Vasa), 32,695; Oulu (Uleåborg), 28,021; Lahti, 26,864; Kuopio, 24,836; Kotka, 22,135; and Pori (Björneborg), 21,201.

### Religion and Education.

The National Church is Evangelical Lutheran religion, but entire liberty of conscience is guaranteed to the members of all religions and confessions. Ecclesiastically (the Evangelical Church of) Finland is divided into 5 bishoprics (Turku being the archiepiscopal see), 56 provostships, and 598 parishes.

Of the total population there were at end of 1937: Lutherans, 3,680,237; English Church, 14; Greek-Catholics and Raskolnics, 70,887; Roman Catholics, 1,551; Baptists, etc., 9,840; Jews, 1,755; Mohammedans, 360; belonging to the civil register, 70,018. The Greek-Catholics are under an archbishop, resident at Sortavala.

Finland has 3 universities: at Helsinki (founded in 1640 at Turku, and removed to Helsinki after having been burned down in 1827), with (1938) 365 teachers and 6,461 students (2,127 women); at Turku (Swedish, opened 1919), with 53 teachers and 317 students (46 women); and at Turku (Finnish, opened 1922), with 36 teachers and 291 students (122 women). In 1938, there were also 1 technical university at Helsinki, with 114 teachers and 975 students (98 women), and 3 commercial universities, one Finnish with 23 teachers and 361 students, and the others Swedish with 32 teachers and 347 students.

For secondary education there were, in 1937, 150 lyceums, leading to university, 2,667 teachers and 42,034 pupils (20,998 girls); 68 middle schools (with a curriculum of 5 years), with 629 teachers and 8,546 pupils. There were 8 training colleges for elementary school teachers, with 83 teachers and 981 students; and 4 for infant school teachers, with 265 students. There were also 57 high schools for the people, with 442 teachers and 3,007 pupils (2,151 females). For elementary education (1937) there were in the country 5,573 elementary schools, with 229,952 pupils (112,114 girls); 5,531 lower elementary schools, with 120,871 pupils. In the towns there were (in autumn 1936) 1,676 classes of higher elementary schools, with 52,580 pupils (25,656 girls). There were besides 6 navigation schools, with 246 pupils; 44 commercial schools, with 3,582 pupils; 12 industrial schools, with 1,536 pupils; 2 technical schools, with 353 pupils; 166 schools for arts and crafts, with 8,712 pupils; 52 agricultural schools, with 2,008 pupils; 4 dairy schools, with 89 pupils; 40 cattle-management schools, with 1,473 pupils; 45 household schools, with 2,191 pupils; 5 horticultural schools, with 85 pupils; and 7 forestry schools, with 308 pupils. The school age in primary schools is from 7 to 15 years.

In 1937, there were published 639 newspapers and reviews in Finnish, 124 in Swedish, 83 in Finnish and Swedish, and 8 in other languages.

### Justice and Crime.

The administration of justice is independent of the Government. The lowest courts of justice in Finland are those of the District. In towns these district courts are held by the burgomaster and his assessors; in the country by a judge and 12 jurors—peasant proprietors, the judge alone deciding, unless the jurors unanimously differ from him, when their decision prevails. From these courts an appeal lies to the Superior Court (*Hovioikeus*) in Turku,

Vaasa and Viipuri. The Supreme Court of Judicature (*Korkein oikeus*) sits in Helsinki. Judges can be removed only by judicial sentence.

Two functionaries, the *Oikeuskansleri* or the Chancellor of Justice, and the *Oikeusasiamies*, or the Attorney-General, exercise control over the administration of justice. The former acts also as counsel and public prosecutor for the Government; while the latter, who is appointed by the Parliament, has to extend a general supervision over all the courts of law.

At the end of 1937, the prison population numbered 5,544 men and 807 women, while the number of sentences pronounced in 1936 was 66,819 for crimes and 21,677 in civil cases.

### Pauperism.

The number of paupers in 1936 supported by the towns and the village communities was 161,426 (4.2 per cent. of the population); and the total cost in 1936 was 404,776,000 marks.

### Finance.

Revenue and expenditure for 5 years in thousands of marks according to Balance of Accounts:—

|                       | 1940 <sup>1</sup> | 1941       | 1942 <sup>1</sup> | 1943 <sup>1</sup> | 1944 <sup>1</sup> |
|-----------------------|-------------------|------------|-------------------|-------------------|-------------------|
| Revenue . . . . .     | 5,970,000         | 10,870,000 | 11,100,000        | 18,879,263        | 15,880,000        |
| Expenditure . . . . . | 17,500,000        | 20,900,000 | 26,600,000        | 28,500,000        | 29,000,000        |

<sup>1</sup> Estimates.

At the end of December, 1938, the foreign loans totalled 775,300,000 marks and the internal loans 2,476,000,000 marks, a total of 3,251,300,000 marks. Of the foreign loans the total amount, and of the internal loans 2,419,200,000 marks, were consolidated. On August 31, 1943, the consolidated debt amounted to 44,800,000,000 marks, as compared with 36,500,000,000 marks on December 31, 1941, and 5,600,000,000 marks on December 31, 1939.

### Defence.

#### ARMY.

The military forces of Finland consist of: (1) the Army, Air Force and Coast Defence, recruited on the principle of universal service, (2) the Civic Protective Guards Organisation, recruited from the voluntarily enrolled citizens.

The President of the Republic is Commander-in-Chief of the Finnish military forces, but during war he may invest a general with that authority. In peace time the Minister of Defence appointed by the President is responsible for the military administration. The Chief of the Army directs the commanding affairs of the Army, Air Force and Coast Defence.

Every citizen is liable to serve from the age of 17 to the age of 60. The Finnish regular forces include the active Army, the first reserve, and the second reserve ('*landwehr*').

All young men who have reached the age of 21 years are summoned to active service. The period of service is generally 350 days, and 440 days for those who are appointed to be trained as officers or non-commissioned officers of reserve. At the end of this service the soldier remains in the first reserve to the age of 40 years. The first reserve contains periods of active training, in all 40 to 60 days.

The second reserve, or '*landwehr*,' is divided into three classes; to the first class belong the conscripts who after their service in the reserve are relegated to the second reserve (men of 40–60 years); to the second, the conscripts who are considered as incapable for active service in peace time (men

## Diplomatic Representatives.

## 1. OF EGYPT IN GREAT BRITAIN.

*Ambassador.*—Vacant (March, 1945).

*Minister Plenipotentiary.*—Mohamed W. Rustom.

*Secretaries.*—Hussein Mohammed Said and Moustafa Moine El Arab.

*Attachés.*—Mohammed Kamal El Labban and Amin M. Mouftah.

*Commercial Attachés.*—Mahmoud Rifaat, Abdel Latif Fahmy and Fouad Aziz Yousef.

*Consul.*—Mohamed Aref Zulfikar.

There is a Consul at Liverpool.

## 2. OF GREAT BRITAIN IN EGYPT.

*Ambassador.*—Rt. Hon. Lord Killearn, G.C.M.G., C.B., M.V.O. (assumed office January 12, 1937).

*Secretaries.*—B. A. B. Burrows, C. H. Johnston and P. Carter.

*Commercial Counsellor.*—C. Empson.

*Commercial Secretaries.*—R. Reid Adam and F. H. Todd.

*Oriental Counsellor.*—Sir W. A. Smart, K.C.M.G.

*Oriental Secretaries.*—F. H. Tomlyn, O.B.E., D. J. Mill Irving, T. C. Ravensdale, T. E. Evans, P. G. D. Adams.

*Legal Adviser.*—E. F. Bealy, C.M.G.

*Financial Adviser.*—W. J. Johnson, C.M.G., O.B.E.

There are Consuls-General at Alexandria and Cairo, Consuls at Port Said and Suez, a Vice-Consul at Ismailia, and Consular agents at 9 other places.

## FINLAND.

(SUOMEN TASAVALLA.)

## Constitution and Government.

## CENTRAL GOVERNMENT.

Finland is a Republic according to the Constitutional Law of July 17, 1919.

From 1809 Finland was united to the Russian Empire as an autonomous Grand-Duchy. On December 6, 1917, the House of Representatives unani- mously proclaimed Finland an independent and sovereign State, and she has been recognised as such by the Powers. According to the Constitutional Law of 1906, the House of Representatives consists of one Chamber of 200 members

of 21-60 years), and to the third, young men (17-21 years) who cannot on account of their youth yet be enrolled as conscripts.

At the peak of her war strength Finland could place 20 divisions in the field, but in the autumn of 1944 this figure had shrunk to 12 divisions.

The Air Force in 1939 consisted of 3 air regiments, each of 3 squadrons, under an Air Staff.

The Coast Defence consists of the coast artillery and the coast fleet.

The Territorial Organisation provides for the preparation of mobilisation and consists of 9 military governments divided into 29 military districts.

The Civic Guards are an essential part of the plan of defence. For the administration the Commander-in-Chief of the Guards appointed by the President is subordinated to the Minister of Defence, and directly responsible to the President with regard to his command. The number of the Protective Guards is about 100,000.

#### NAVY.

The naval forces consist of 3 gun-boats, 7 motor torpedo-boats, 3 mine-layers, 5 submarines and a number of smaller vessels.

#### Production and Industry.

Agriculture is the chief occupation of the people in Finland, although the cultivated area only covers 6·6 per cent. of the land. The land was divided in 1929 into 285,390 farms, and the landed property was distributed as follows:—Less than 3 hectares cultivated, number of farms, 109,155; 3-10 hectares, farms 108,642; 10-25 hectares, farms 51,683; 25-100 hectares, farms 15,083; over 100 hectares, farms 827 (1 hectare = 2·47 acres).

The principal crops of 1937 were as follows:—rye, 596,632 acres, yielding 431,400 tons; barley, 299,103 acres, yielding 176,000 tons; oats, 1,124,875 acres, yielding 727,500 tons; potatoes, 214,498 acres, yielding 1,387,500 tons; hay, 3,294,255 acres. Total land under cultivation, 1937, 6,368,483 acres. Creamery butter production in 1937 was 29,711 tons.

Domestic animals in 1937:—Horses, 380,000; horned cattle, 1,925,100; sheep, 1,072,300; goats, 10,372; pigs, 504,200.

The total forest land amounts to 62,429,000 acres, of which 24,835,000 acres belong to the State. The productive forest land covers 49,764,000 acres, of which 17,570,000 acres belong to the State.

Finland had, in 1937, 4,246 large factories, employing an aggregate of 207,506 workers, and yielding an aggregate product of 21,076·0 million marks.

In 1937, there were 602 saw mills with 145 water, 522 steam, 51 oil and gas, and 3,936 electric motors.

#### Commerce.

Imports and exports for 5 years, in thousands of Finnish marks:—

|         | 1937      | 1938      | 1939      | 1940      | 1941      |
|---------|-----------|-----------|-----------|-----------|-----------|
| Imports | 9,306,423 | 8,612,283 | 5,772,600 | 5,179,600 | 8,818,000 |
| Exports | 9,879,724 | 8,431,111 | 7,710,300 | 2,980,300 | 4,189,000 |

Total trade between the United Kingdom and Finland for 5 years (according to Board of Trade returns):—

|                                 | 1934         | 1935         | 1936         | 1937         | 1938         |
|---------------------------------|--------------|--------------|--------------|--------------|--------------|
| Imports from Finland into U.K.  | £ 15,215,340 | £ 14,014,652 | £ 18,145,231 | £ 22,436,701 | £ 19,281,768 |
| Exports to Finland from U.K.    | £ 3,611,967  | £ 4,152,904  | £ 4,217,895  | £ 5,962,008  | £ 5,528,917  |
| Re-exports to Finland from U.K. | £ 886,880    | £ 463,928    | £ 361,941    | £ 397,942    | £ 827,437    |

#### Shipping and Navigation.

The mercantile marine of Finland on January 1, 1938, aggregated 3,431 vessels of 544,000 net registered tons, and consisted of 120 sailing vessels of 34,000 tons; 567 steam vessels of 308,000 tons, 37 motor boats of 9,000 tons, 142 sailing vessels with subsidiary motors of 11,000 tons, and 2,565 lighters of 183,000 tons.

The total number of vessels entering and leaving Finnish ports were:—1939, 6,985 and 7,038; 1940, 2,589 and 2,537; 1941, 2,320 and 2,247.

#### Communications.

For internal communications Finland has a remarkable system of lakes connected with each other and with the Gulf of Finland by canals, navigable at a length of about 3,000 miles and floatable at a length of about 29,000 miles. The number of vessels which passed along the canals in 1937 was 39,630, and the number of timber-rafts 21,267; the receipts from vessels, 10,230,700 marks.

In 1937, there were 20,863 miles of high roads and 18,965 miles of other public roads.

Railway history in Finland begins in 1860, when the State built a line 66 miles long between Helsinki and Hämeenlinna. On December 31, 1937, there were 3,670 miles of railways, all but 158 miles belonging to the State. The gauge is 1·524 metres (4·9 feet). The traffic upon the State railways in 1937 was 22,800,000 passengers and 15,710,000 tons of goods. The total cost of the State railways to the end of 1937 was 6,204,746,000 marks. The total revenue in 1937 was 1,066,029,000 marks, and the total expenditure 825,033,000 marks.

Finland had 3,624 post offices in 1937, and revenue and expenditure of posts and telegraphs combined were respectively 277,301,000 and 208,139,000 marks. The number of letters and postcards was 107,936,000; ordinary and printed packages, 2,515,000; newspapers, 262,285,000; money-orders, 2,574,000; total, 375,310,000.

There were in 1937, 23,762 miles of telegraph wires belonging to the State in Finland. The number of telegraph messages sent in the year 1937 was 978,659. The telegraph system and part of the telephone system are State property. The total length of the telephone wires was 117,810 miles.

#### Banking, Money, Weights, &c.

The Bank of Finland (founded in 1811) is the State Bank and the only bank of issue. The Bank is under the guarantee of the House of Representatives; its capital and reserves are fixed by its constitution, and its note circulation is limited by the value of its metallic stock and foreign correspondents, and the additional right of issue 1,800 million marks. Notes in circulation are: 1,000, 500, 100, 50 and 20 markkaa. The paper currency of the Bank of Finland on April 15, 1943, was 10,400 million marks, as against 5,551 million marks on December 31, 1940. Finland had in 1937, besides the State bank, 9 joint stock banks with 487 offices. The deposits of all the commercial banks on November 30, 1938, were 9,453 million marks.

The number of ordinary savings banks at the end of 1937 was 483; number of depositors 1,094,000, who had to their credit 6,739 million marks; in the Post Office savings banks 184,000 depositors had 454 million marks; and on the savings accounts with various Co-operative institutions 2,012 million marks were deposited.

The unit of currency is the *markka* of 100 *penni*.

According to the monetary law gold coin is struck of the value of 100 and 200 markkaa. The former contains 4·21053 grammes of gold,

and Italy for an armistice, which was signed on June 22 with Germany and on June 24 with Italy.

On July 2 the French Government moved to Vichy. There, on July 9, the French Parliament voted to give the Pétain Government full powers to establish a new Constitution. The vote in the Chamber of Deputies was 395 to 3; in the Senate, 225 to 1. The new Constitution was drawn up mainly by Laval and provided for an authoritarian Government under Marshal Pétain as 'Chief of the State.'

For details of the constitutional aspect of the Vichy Government, see *THE STATESMAN'S YEAR-BOOK* for 1943, pp. 872-873.

A new French Government was formed on April 18, 1942, with Pierre Laval as Prime Minister and virtually Dictator of France.

Allied armies landed on the Normandy coast on June 6, 1944, and by August 23, 1944, Paris was liberated.

On June 18, 1940, General Charles Joseph de Gaulle accused the Bordeaux Government of having capitulated before all its means of existence had been exhausted and announced the formation of a Provisional French National Committee. On June 28 an official statement was issued in London, as follows:—'His Majesty's Government recognize General de Gaulle as leader of all free Frenchmen, wherever they may be, who rally to him in support of the Allied cause.'

On September 25, 1941, a French National Committee was formed, and reconstituted on October 18, 1942.

On July 14, 1942, the Free French Movement, in full agreement with the British Government, changed its name to *La France Combattante* (Fighting France).

On June 3, 1943, agreement was reached in Algiers on the constitution of a French Executive Committee. Under the name of the French Committee for National Liberation it was presided over by General Giraud and General de Gaulle.

On November 9, 1943, General Giraud resigned the co-presidency of the Committee, remaining commander-in-chief of the French forces, to which office he had been appointed on August 1.

After the defeat of the Germans and the liberation of Paris and practically the whole of France, General de Gaulle entered the capital (August 25, 1944), and on September 10, 1944, a French Provisional Government was formed as follows:—

*President of the Council.*—General Charles Joseph de Gaulle.  
*Minister of State.*—Jules Jeanneney (formerly Radical).  
*Minister of Foreign Affairs.*—Georges Bidault (Resistance Movement).  
*Minister of Justice.*—François de Menthon (Christian States Party).  
*Minister of the Interior.*—Adrien Tixier (Socialist).  
*Minister of War.*—André Diethelm (non-party).  
*Minister of the Navy.*—Louis Jacquinot (Moderate Republican).  
*Minister of Air.*—Charles Tillon (Communist).  
*Minister of Finance.*—René Pleven (Christian Democrat).  
*Minister of National Economy.*—Pierre Mendès-France (Radical).  
*Minister of Production.*—Robert Lacoste (Resistance Movement).  
*Minister of Agriculture.*—M. Tanguy-Prigent (Socialist).  
*Minister of Food and Supplies.*—Paul Ramadier.  
*Minister of the Colonies.*—Paul Giacobbi (Radical).  
*Minister of Education.*—René Capitant (Resistance in North Africa).  
*Minister of Transport.*—René Mayer (non-party).

*Minister of Posts and Telegraphs.*—Augustin Laurent (Socialist).

*Minister of Health.*—François Billoux (Communist).

*Minister of Pensions and War Prisoners.*—Henri Fresnay (Combat).

*Minister of Labour.*—Alexandre Parodia (Resistance).

*Minister of Information.*—M. Tietgen (Christian Democrat).

The new Provisional Government regards itself as formally continuing the Third Republic. Four of the Allied Governments (Belgium, Czechoslovakia, Luxemburg and Poland) gave official recognition to the Provisional Government of the French Republic on June 14, 1944; the Governments of Great Britain and the United States signified their recognition in Agreements, signed on August 25, 1944, providing for the taking over of the civil administration in the liberated territories. Formal agreement by the Governments of Great Britain, the United States, the U.S.S.R., Canada, Australia, New Zealand and South Africa, was made on October 23, 1944. On November 11, 1944, the Governments of Great Britain, the United States and the U.S.S.R. agreed to the admission of France as a full and permanent member of the European Advisory Commission in London.

On December 10, 1944, a Treaty of Alliance was signed in Moscow between France and the U.S.S.R., to continue for 20 years.

A provisional Consultative Assembly was also created; that body held its first session on November 3, 1943. On November 7, 1944, it met again in Paris with 248 members: 148 representatives of Metropolitan Resistance, 28 representatives of Corsica and Extra-Metropolitan Resistance; 60 representatives of the former Chamber of Deputies and the Senate, and 12 representatives of overseas territories.

## II. LOCAL GOVERNMENT.

For administrative purposes France was divided into 90 departments. Since 1881, the three departments of Algeria have also been treated for most purposes, as part of France proper.

The unit of local government is the *commune*, the size and population of which vary very much. There were, in 1936, in the 90 departments into which France was divided, 38,014 communes. Most of them (34,069) had less than 1,500 inhabitants, and 22,933 had even less than 500; while 186 communes had more than 20,000 inhabitants. The local affairs of the commune were under a Municipal Council, composed of from 10 to 36 members, elected by universal suffrage, and by the *scrutin de liste* for 6 years by Frenchmen of 21 years or over after 6 months' residence.

Each Municipal Council elected a Mayor, who was both the representative of the commune and the agent of the central government. He was the head of the local police and, with his assistants, acted under the orders of the Prefect.

In Paris the Municipal Council was composed of 90 members; the Council has now been replaced by a commission chosen by the Government. Each of the 20 *arrondissements* into which the city was subdivided had its own Mayor. The place of the Mayor of Paris was taken by the Prefect of the Seine, and, in part, by the Prefect of Police. Lyons had an elected Mayor, but the control of the police was vested in the Prefect of the department of the Rhone.

The next unit was the *canton* (3,028 in 1936), which was composed of an average of 12 communes, although some of the largest communes were, on the contrary, divided into several cantons.

The district, or *arrondissement* (281 in 1936), had an elected *conseil d'arrondissement*, with as many members as there were cantons, its chief function being to allot among the communes their respective parts in the direct taxes assigned to each *arrondissement* by the Council General.

On August 9, 1944, the Provisional Government of the French Republic issued an ordinance which renders void the legislation of the Vichy Government, while maintaining certain laws as temporary measures. Regional Prefects were replaced by Regional Commissioners of the Republic and a Regional Commissary's Office was created in Strasbourg.

### Area and Population.

#### I. PROGRESS AND PRESENT CONDITION.

The legal population at the date of the last two enumerations was:—

| Departments                   | Area :<br>Engl. sq.<br>miles | Population  |             | Population per<br>square mile.<br>1936 |
|-------------------------------|------------------------------|-------------|-------------|----------------------------------------|
|                               |                              | March, 1936 | March, 1931 |                                        |
| Ain . . . . .                 | 2,248                        | 316,710     | 322,918     | 140.8                                  |
| Aisne . . . . .               | 2,866                        | 484,647     | 489,368     | 169.1                                  |
| Allier . . . . .              | 2,848                        | 368,778     | 373,924     | 129.4                                  |
| Alpes (Basses-) . . . . .     | 2,697                        | 85,090      | 87,893      | 31.5                                   |
| Alpes (Hautes-) . . . . .     | 2,178                        | 88,210      | 87,566      | 40.5                                   |
| Alpes-Maritimes . . . . .     | 1,443                        | 513,714     | 493,376     | 356.0                                  |
| Ardèche . . . . .             | 2,144                        | 272,698     | 282,911     | 127.1                                  |
| Ardennes . . . . .            | 2,027                        | 288,632     | 293,746     | 142.8                                  |
| Ariège . . . . .              | 1,892                        | 155,134     | 161,265     | 81.9                                   |
| Aube . . . . .                | 2,326                        | 239,563     | 242,596     | 102.9                                  |
| Ande . . . . .                | 2,448                        | 285,115     | 296,880     | 116.4                                  |

<sup>1</sup> Not including military and naval forces and crews of the commercial navy abroad which in 1936 numbered 107,538, and in 1931, 98,928.

According to the Peace Treaty with Germany (June 28, 1919) Alsace-Lorraine was transferred to France, as from the date of the Armistice, November 11, 1918. The districts of Lower Alsace, Upper Alsace and Lorraine have become the departments of Bas-Rhin (1,848 square miles and population 711,830); Haut-Rhin<sup>1</sup> (1,354 square miles, population 507,551), and Moselle (2,403 square miles, population 696,246). Thus the total area added to France is 5,605 square miles, population (1936) 1,915,627.

In 1936 the rural population was 19,935,358 and the urban population 21,971,698.

In the following table, the third, fourth, and fifth columns give [in brackets] for the first five censuses the population, its density, and its average annual increase of France, excluding Alsace-Lorraine, and are thus comparable with the data for the censuses posterior to the loss of Alsace and Lorraine (1872-1911).

| Dates | Area: sq. miles | Domiciled Population       | Inhabitants per sq. mile | Annual increase per 10,000 inhabitants |
|-------|-----------------|----------------------------|--------------------------|----------------------------------------|
| 1801  | 207,765         | 27,349,008<br>[26,930,756] | 131<br>[130]             | —                                      |

| 1936  | —               | 41,907,056                 | 197                      | 5.2                                    |

<sup>1</sup> Decrease.

Total number of foreigners in 1936 was 2,453,507; in 1931, 2,890,923. Number of households, 1936, 13,145,184, occupying 9,109,687 houses.

## II. MOVEMENT OF THE POPULATION.

### Births, Deaths and Marriages.

| Year              | Marriages | Living Births | Deaths  | Surplus of Births over Deaths | Still-born |
|-------------------|-----------|---------------|---------|-------------------------------|------------|
| 1934              | 298,482   | 677,878       | 634,073 | + 43,805                      | 23,835     |
| 1935              | 284,895   | 640,527       | 658,379 | — 17,852                      | 21,929     |
| 1936              | 279,902   | 630,818       | 642,318 | — 11,500                      | 21,781     |
| 1937 <sup>1</sup> | 274,122   | 616,863       | 628,603 | — 11,740                      | 23,006     |
| 1938 <sup>1</sup> | 273,903   | 612,138       | 646,879 | — 34,741                      | 22,258     |

<sup>1</sup> Provisional figures.

Number of deaths (civilian deaths only) in 1939, 619,295; in 1940, 734,350.

The number of divorces was 20,414 in 1934, 21,004 in 1935, 21,987, in 1936, 23,614 in 1937, and 11,096 in 1940.

## III. PRINCIPAL TOWNS.

The following towns, according to the census of 1936, had each a population of over 100,000 (figures for census of 1931 added for comparison):—

|                            | 1936      | 1931      |
|----------------------------|-----------|-----------|
| Paris . . . . .            | 2,829,746 | 2,891,020 |
| Marseilles . . . . .       | 914,232   | 800,881   |
| Lyons . . . . .            | 570,622   | 579,763   |
| Bordeaux . . . . .         | 258,348   | 262,990   |
| Nice . . . . .             | 241,916   | 219,549   |
| Toulouse . . . . .         | 213,220   | 194,564   |
| Lille . . . . .            | 200,575   | 201,568   |
| Nantes . . . . .           | 195,185   | 187,343   |
| Strasbourg . . . . .       | 193,119   | 181,465   |
| St. Etienne . . . . .      | 190,236   | 191,088   |
| Le Havre . . . . .         | 164,083   | 165,076   |
| Toulon . . . . .           | 150,310   | 133,263   |
| Rouen . . . . .            | 122,832   | 122,957   |
| Nancy . . . . .            | 121,301   | 120,578   |
| Rheims . . . . .           | 118,687   | 112,820   |
| Roubaix . . . . .          | 107,105   | 117,190   |
| Clermont-Ferrand . . . . . | 101,128   | 103,143   |

On July 7, 1940, the population of Paris was shown, as the result of a census, to be 1,051,046.

The following towns had a population over 50,000, according to the census of 1936:—

|                              |        |                            |        |                                 |        |
|------------------------------|--------|----------------------------|--------|---------------------------------|--------|
| Rennes . . . . .             | 98,538 | Brest . . . . .            | 79,342 | Avignon . . . . .               | 59,172 |
| Boulogne-sur-Seine . . . . . | 97,379 | St. Denis . . . . .        | 78,401 | Courbevoie . . . . .            | 58,638 |
| Mulhouse . . . . .           | 96,397 | Tourcoing . . . . .        | 78,393 | Troyes . . . . .                | 57,961 |
| Dijon . . . . .              | 96,257 | Versailles . . . . .       | 73,839 | Neuilly-sur-Seine . . . . .     | 56,938 |
| Grenoble . . . . .           | 95,806 | Béziers . . . . .          | 73,305 | Saint-Maur-des-Fossés . . . . . | 56,740 |
| Limoges . . . . .            | 95,217 | Orléans . . . . .          | 73,155 | Clichy . . . . .                | 56,475 |
| Amiens . . . . .             | 93,773 | Perpignan . . . . .        | 72,207 | Aubervilliers . . . . .         | 55,871 |
| Nîmes . . . . .              | 93,753 | Asnières . . . . .         | 71,831 | Boulogne-sur-Mer . . . . .      | 52,371 |
| Montpellier . . . . .        | 90,787 | Montreuil . . . . .        | 71,803 | Bastia . . . . .                | 52,208 |
| Angers . . . . .             | 87,938 | Calais . . . . .           | 67,568 | St. Ouen . . . . .              | 51,106 |
| Le Mans . . . . .            | 84,525 | Levallois-Perret . . . . . | 65,186 |                                 |        |
| Tours . . . . .              | 83,753 | Besançon . . . . .         | 65,022 |                                 |        |
| Metz . . . . .               | 83,119 | Colombes . . . . .         | 61,944 |                                 |        |
| Villeurbanne . . . . .       | 81,322 | Caen . . . . .             | 61,334 |                                 |        |
|                              |        | Argenteuil . . . . .       | 59,314 |                                 |        |

## Religion.

Under the Third Republic, no religion was recognised by the State.

Under the law promulgated on December 9, 1905, the Churches were separated from the State, the adherents of all creeds were authorised to

*Girls.*—The following table gives the figures for the institutions for girls:—

| Institutions                                     | Nov. 1936 |        | Nov. 1937 |        | Nov. 1938 |        |
|--------------------------------------------------|-----------|--------|-----------|--------|-----------|--------|
|                                                  | No.       | Pupils | No.       | Pupils | No.       | Pupils |
| <i>Lycées</i> (France and Algeria) . . . . .     | 75        | 51,039 | 77        | 56,546 | 78        | 60,377 |
| Colleges (France and Algeria) . . . . .          | 98        | 24,735 | 93        | 26,326 | 93        | 27,966 |
| Secondary courses (France and Algeria) . . . . . | 27        | 5,280  | 25        | 4,995  | 24        | 4,958  |
| Total . . . . .                                  | 195       | 81,004 | 195       | 87,867 | 195       | 93,301 |

*Higher Instruction* was supplied by the State in the universities and in special schools, and by private individuals in the private faculties and schools. The law of July 12, 1875, provided for higher education free of charge. This law was modified by that of March 18, 1880, which granted the State faculties the exclusive right to confer degrees. A decree of December 28, 1885, created a general council of the faculties, and the creation of universities, each consisting of several faculties, was accomplished in 1897, in virtue of the law of July 10, 1896.

There were 17 universities in France. The following table shows the year of foundation and the total number of students on July 31, 1938:—

| Universities                      | Students | Universities                 | Students           |
|-----------------------------------|----------|------------------------------|--------------------|
| Aix-Marseille (1409) . . . . .    | 3,513    | Montpellier (1125) . . . . . | 2,801              |
| Algiers . . . . .                 | 2,209    | Nancy (1573) . . . . .       | 2,226              |

<sup>1</sup> Including 294 students in the two faculties of theology. Strasbourg was transformed into a German university in September, 1940.

The faculties were of four kinds: 15 faculties of law (Paris, Aix, Bordeaux, Caen, Dijon, Grenoble, Lille, Lyons, Montpellier, Nancy, Poitiers, Rennes, Strasbourg, Toulouse, and Algiers); 9 faculties of medicine (Paris, Montpellier, Bordeaux, Lille, Lyons, Toulouse, Nancy, Strasbourg, and Algiers); 17 faculties of science (Paris, Besançon, Bordeaux, Caen, Clermont, Dijon, Grenoble, Lille, Lyons, Marseilles, Montpellier, Nancy, Poitiers, Rennes, Toulouse, Strasbourg, and Algiers); 17 faculties of letters (in the towns last named); 4 faculties of medicine and 4 faculties of pharmacy (Paris, Montpellier, Nancy, Strasbourg), and 5 mixed faculties of medicine and pharmacy (Algiers, Bordeaux, Lille, Lyons, Toulouse); 15 schools with full functions and preparatory schools of medicine and pharmacy.

The following statement shows the number of students by faculties or schools in July, for 3 years:—

| Students of        | 1936               | 1937               | 1938               |
|--------------------|--------------------|--------------------|--------------------|
|                    | State Institutions | State Institutions | State Institutions |
| Law . . . . .      | 21,642             | 20,454             | 22,094             |
| Medicine . . . . . | 17,699             | 17,930             | 16,513             |
| Science . . . . .  | 11,329             | 10,713             | 11,000             |
| Letters . . . . .  | 17,221             | 16,750             | 18,720             |
| Pharmacy . . . . . | 5,654              | 6,022              | 6,211              |
| Theology . . . . . | 307                | 284                | 294                |
| Total . . . . .    | 73,852             | 72,153             | 74,832             |

There were free faculties: in Paris (the Catholic Institute of Paris comprising theology, law and advanced scientific and literary studies); Angers (theology, law, science, letters, agriculture); Lille (theology, law, medicine and pharmacy, science, letters, social science and politics); Lyon (theology, law, science, letters); Marseilles (law); Toulouse (the Catholic Institute with theological, literary, and scientific instruction). There were, besides, in Paris a large institution for free higher education in political science, the *École libre des Sciences Politiques*, and also one for the study of international law, the *Institut des Hautes Études Internationales*.

The other higher institutions under the Ministry of Public Instruction were the *Collège de France* (founded by Francis I in 1530), which had courses of study bearing on various subjects (literature and language, archaeology, mathematical, natural, psychology and social science, political economy, etc.); the Museum of Natural History, giving instruction in science and natural history; the *École Pratique des Hautes Études* (history and philology, mathematical and physico-chemical sciences, natural science and theology), having its seat at the Sorbonne; the *École Normale Supérieure*, which prepared teachers for secondary education and, since 1904, followed the curricula of the Sorbonne without special teachers of its own; the *École des Chartes*, which trained the archivist paleographers; the *École des Langues Orientales vivantes*; the *École du Louvre*, devoted to art and archaeology; the *École des Beaux-Arts*, and the Bureau des Longitudes, the Central Meteorological Bureau; the Observatoire de Paris; and the French Schools at Athens, Rome, Cairo and Indo-China, besides a school for Morocco.

Outside Paris there are eight observatories (Mendon, Besançon, Bordeaux, etc.). The observatory at Nice was under the Academy of Sciences.

*Professional and Technical Instruction.*—The principal institutions of higher or technical instruction dependent on other ministries were: the Conservatoire des Arts et Métiers at Paris (with 20 evening courses on the applied sciences and social economy), the *École Centrale des Arts et Manufactures*, the *École des Hautes Études Commerciales*, 18 higher schools of commerce with 2,189 pupils (1935-36), under the Ministry of Public Instruction; the National Agronomic Institute at Paris, the Veterinary school at Alfort a school of forestry at Nancy, the higher national school of colonial agri-

form associations for public worship (*associations cultuelles*). As transitional measures, ecclesiastics over 45 years of age and of over 25 years of service remunerated by the State were entitled to a pension, and all other ecclesiastics were to receive a grant during a period of from four to eight years. All buildings actually used for public worship and as dwellings in that connection were to be made over, after an inventory was taken, to the associations for public worship: the places of worship for the total period of the existence of these associations, the ecclesiastical dwellings for a time.

The law of January 2, 1907, provided (among other things) that, failing *associations cultuelles*, the buildings for public worship, together with their furniture, would continue at the disposition of the ministers of religion and the worshippers for the exercise of their religion; but, in each case, there was required an administrative act drawn up by the *préfet* as regards buildings belonging to the State or the Departments, and by the *maire* as regards buildings belonging to the Communes. Forms of the documents necessary under the new law were supplied by the Government.

There were 17 archbishops and 68 bishops of the Roman Catholic Church in France, not including Alsace and Lorraine, Algeria or the colonies, in addition to 51,000 clergy of various grades. The Protestants of the Augsburg Confession are, in their religious affairs, governed by a General Consistory, while the Reformed Church is under a Council of Administration, the seat of which is in Paris. There are about a million Protestants in France.

The Associations law, passed July 1, 1901, required religious communities to be authorised by the State, and no monastic association could be authorised without a special law in each particular case. Before the passing of that law there were 910 recognised associations, and 753 not recognised; the establishments, mostly not recognised, numbered 19,514, and their members 159,628 (30,136 men and 129,492 women). After the passing of the law, of the 753 associations not recognised, 305 dissolved themselves and 448 asked for authorisation, which was refused by the Chambers to the majority of them.

### Education.

Under the Third Republic the State elementary schools constituted the University of France and were divided into three classes, primary, secondary, and higher. The Supreme Council of 52 members had deliberative, administrative, and judiciary functions, and a Consultative Committee advised respecting the working of the school system, but the inspectors-general were in direct communication with the Minister. For local educational administration France was divided into 17 academic areas, each of which had an Academic Council whose members included a certain number elected by the professors or teachers. The Academic Councils dealt with all grades of education. Each was under a Rector, and each was provided with academy inspectors, one for each department except Nord which had two (one being for elementary education), and Seine which had eight (one being director of elementary education), besides inspectors of elementary schools, usually one for each *arrondissement*, 20 inspectors (male or female) for the department of the Seine.

The law of August 9, 1879, rendered obligatory for each department the maintenance of two elementary training schools, one for school-masters, the other for school-mistresses. Under the Pétain government, however, colleges for the training of elementary teachers (*Écoles normales*) have been suppressed. Future teachers, after studying for three years at a secondary school, receive training in all professional subjects, including ethics and handicraft, at *Instituts de Formation professionnelle*. In 1937-38

there were in the 90 departments 86 normal schools for male teachers (5,325 students), and 86 normal schools for female teachers (5,246 students). There were two higher normal schools for elementary education: one at Fontenay-aux-Roses for professors for normal schools for school-mistresses, the other at St. Cloud for professors for normal schools for school-masters. The law of June 16, 1881, made education absolutely free in all elementary State schools; that of March 23, 1882, rendered it obligatory for all children from 6 to 13 years of age, and the law of August 9, 1936, extended this age limit to 14 years of age. The law of October 30, 1886, was the organic law of elementary education in force; it established that teachers should be lay; for infant schools it substituted *écoles maternelles* instead of *salles d'asile*; it fixed the school programmes and established freedom of private schools under the supervision of the school authorities.

The following table shows the condition of elementary education for 3 years:—

| Description of Schools     | 1935-36 |                 | 1936-37 |                 | 1937-38 |                 |
|----------------------------|---------|-----------------|---------|-----------------|---------|-----------------|
|                            | Schools | Enrolled Pupils | Schools | Enrolled Pupils | Schools | Enrolled Pupils |
| <i>Infant Schools:</i>     |         |                 |         |                 |         |                 |
| State . . . . .            | 3,364   | 886,597         | 3,381   | 880,564         | 3,419   | 880,789         |
| Private . . . . .          | 453     | 24,260          | 895     | 22,629          | 406     | 22,018          |
| Total . . . . .            | 3,817   | 410,857         | 3,776   | 403,193         | 3,825   | 402,757         |
| <i>Elementary Schools:</i> |         |                 |         |                 |         |                 |
| State . . . . .            | 68,720  | 4,827,690       | 69,742  | 4,410,768       | 70,069  | 4,503,669       |
| Private . . . . .          | 11,568  | 982,844         | 11,471  | 921,355         | 11,521  | 932,885         |
| Total . . . . .            | 80,288  | 5,260,534       | 81,213  | 5,332,123       | 81,590  | 5,436,554       |

On November 15, 1937, there were 315 higher elementary schools for boys and 240 for girls. The number of pupils on November 15, 1937, was 49,917 boys and 52,455 girls, compared with 49,815 boys and 50,454 girls on November 15, 1936. Higher elementary education is also given in continuation schools (*cours complémentaires*) attached to the elementary schools. On November 15, 1937, there were 52,009 boys and 61,450 girls taking these courses in State schools and 7,781 boys and 83,985 girls in private schools. These courses have been discontinued by the Vichy Government.

*Secondary Instruction: Boys.*—Secondary instruction was supplied in two types of schools—by the State in the lycées, and by the communes in the colleges, by associations and by private individuals in free establishments (*écoles libres*). The course of study extended over 7 years. Since the beginning of the school year, 1934-35, secondary education has been free, but under the Vichy régime secondary education was no longer free in the upper forms.

The number of State secondary schools for boys and the number of pupils for 3 years were as follows:—

| State Institutions:<br>France and Algeria | Nov. 1936 |         | Nov. 1937 |         | Nov. 1938 |         |
|-------------------------------------------|-----------|---------|-----------|---------|-----------|---------|
|                                           | No.       | Pupils  | No.       | Pupils  | No.       | Pupils  |
| <i>Lycées</i>                             | 126       | 111,374 | 128       | 119,553 | 130       | 124,767 |
| Communal colleges .                       | 224       | 61,203  | 228       | 62,002  | 222       | 64,281  |

## Finance.\*

The following figures show the budget estimates for 6 years:—

| Years             | Revenue<br>Francs | Expenditure<br>Francs        | Years | Revenue<br>Francs | Expenditure<br>Francs        |
|-------------------|-------------------|------------------------------|-------|-------------------|------------------------------|
| 1939              | 66,845,179,529    | 66,517,371,819 <sup>1</sup>  | 1943  | 80,000,000,000    | 138,500,000,000 <sup>4</sup> |
| 1940 <sup>2</sup> | 79,961,163,112    | 79,889,137,098               | 1944  | 102,000,000,000   | 128,300,000,000              |
| 1941 <sup>3</sup> | 68,205,014,000    | 134,193,864,000 <sup>3</sup> | 1944  | 186,900,000,000   | 151,000,000,000 <sup>4</sup> |

<sup>1</sup> As in 1937 and in 1938, a fund has been provided for a programme of public works to remedy the unemployment situation, and for re-armament. This fund will be drawn from loans which amount to 27,616,420,000 francs in 1939.

<sup>2</sup> Civil Budget, excluding military expenditure (final figures).

<sup>3</sup> Of this total, 96,959,905,000 francs were in the ordinary budget, and 37,233,959,000 francs in the extraordinary budget (which in turn was subdivided into 28,955,966,000 francs for 'liquidation of expenses resulting from hostilities' and 8,277,993,000 francs for public works and for combating unemployment).

<sup>4</sup> These estimates, as in the past, do not include the 'annexed budget' covering radio, coinage, posts, telegraphs, and telephones, the printing office, and various services, in which receipts and expenditures are balanced at 12,689,604,000 francs. Neither the ordinary nor the extraordinary budget includes any of the payments to meet the expenses of the German army of occupation (400,000,000 francs per day up to May and 300,000,000 francs for the rest of the year).

<sup>5</sup> Of this total 105,500,000,000 francs are in the ordinary budget and 33,000,000,000 francs in the extraordinary budget. To the total figure must be added the cost of the German army of occupation, 120,400 million francs, and the deficit on the Franco-German clearing account, 30,000 million francs, making a total expenditure for 1942 of 288,900 million francs.

<sup>6</sup> Exclusive of 197,410 million francs, the cost of the German army of occupation.

The accounts of revenue and expenditure of the Government officials are examined by a special administrative tribunal (*Cour des Comptes*), instituted in 1807.

Budget estimates in francs for the years 1943 and 1944:—

| REVENUE.                                          |                |                |  |
|---------------------------------------------------|----------------|----------------|--|
|                                                   | 1943           | 1944           |  |
|                                                   | Million francs | Million francs |  |
| Taxes and Monopolies . . . . .                    | 84,600         | 107,700        |  |
| State Industries . . . . .                        | 600            | 1,800          |  |
| State Domains . . . . .                           | 800            | 2,100          |  |
| Various . . . . .                                 | 16,000         | 25,800         |  |
| Total . . . . .                                   | 102,000        | 136,900        |  |
| EXPENDITURE.                                      |                |                |  |
|                                                   | 1943           | 1944           |  |
|                                                   | Million francs | Million francs |  |
| Public debt . . . . .                             | 23,000         | 28,100         |  |
| Pensions, etc. . . . .                            | 17,600         | 18,400         |  |
| Personnel . . . . .                               | 26,200         | 32,400         |  |
| Materials and the operation of services . . . . . | 10,200         | 12,900         |  |
| Public works, building, etc. . . . .              | 4,100          | 8,500          |  |
| Subsidies . . . . .                               | 11,000         | 9,400          |  |
| War expenditure . . . . .                         | 21,900         | 31,200         |  |
| Total (including all others) . . . . .            | 128,800        | 151,000        |  |

The French internal national debt (excluding war debts estimated at August 31, 1938, at 6,655 million dollars owing to the United States and 756 millions sterling owing to Great Britain, the two together at the current

rate of exchange being 379·1 milliards of francs) on June 30, 1942, and November 30, 1943, was as follows:—

| Public Debt                                  | June 30, 1942  | November 30, 1943 |
|----------------------------------------------|----------------|-------------------|
|                                              | Million francs | Million francs    |
| Perpetual Debt . . . . .                     | 44,000         | 44,301            |
| Amortizable Debt . . . . .                   | 290,000        | 358,475           |
| Ways and Means and Short-term Debt . . . . . | 376,000        | 504,991           |
| Floating Debt . . . . .                      | 257,000        | 399,075           |
| Total . . . . .                              | 968,200        | 1,301,842         |

For the year 1939, the total service of the internal debt amounted to 34·5 milliards of francs, of which 14·8 milliards was for the *dette viagère*.

## Defence.

## I. LAND DEFENCES.

France has a coastline of 1,760 miles, 1,304 on the Atlantic and 456 on the Mediterranean. Its land frontiers extend over 1,665 miles, of which 1,246 miles are along the Belgian, German, Swiss, and Italian frontiers, and 419 along the Spanish frontier.

The Franco-German frontier was covered by the Maginot Line—which, if not so deep as the German Siegfried Line, was a more elaborately fortified system, composed of a closely interlinked chain of underground forts and concrete pill-boxes. The extension of this line along the Franco-Belgian frontier, however, was begun very late, and constructed on a much lighter pattern. On the outbreak of war, it consisted of no more than a single chain of pill-boxes, 1–2 kilometres apart, covered by a single anti-tank ditch. Although, during the winter of 1939–40, it was considerably developed, its total depth was no more than some five miles, compared with the 30-mile depth of the Siegfried Line.

## II. ARMY.

The French Army was divided into the Home and the Colonial Armies; both came under the War Minister, but the estimates for Colonial troops other than those maintained in Algeria, Tunis and Morocco were included in the budget of the Minister for the Colonies. The Home Army was divided into the *Regular Army*, the *Reserve Troops* and the *Territorial Army*. The Army was localised and territorialised in the military government of Paris and 18 army corps areas. The normal composition of a French army corps was 2 infantry divisions, 1 army corps reconnaissance group, 1 regiment of artillery, 1 battalion of engineers, 1 group and 1 company of observation balloons, and administrative services.

The infantry division consisted of a reconnaissance group, 3 regiments of infantry each of 3 battalions, and 2 regiments of artillery of 3 batteries each of 3 groups.

The peace establishment of the French Army provided for 5 cavalry divisions, of which 2 were mechanised, and 25 divisions of the Active Metropolitan Army.

The *Reserve Troops* formed divisions corresponding to those in the *Regular Army* on mobilisation, in the same districts as those to which the *Regular divisions* belonged. The *Territorial Army* formed a second line and was similarly organised in divisions on mobilisation. The *Customs Corps* was organised in battalions, as were the *Sapeurs Forestiers*; both these were recruited from men who had passed into the *Territorial Army*.

culture, national agricultural schools at Grignon, Rennes, Montpellier, 44 schools of Agriculture, etc., under the Ministry of Agriculture; the École Supérieure de Guerre, the École Polytechnique, the military school at St. Cyr, the École d'Artillerie at Fontainebleau, the École de Cavalerie at Saumur, and other schools under the Ministry of War; the Naval School at Brest under the Ministry of Marine; the School of Mines at Paris, the School of Civil Engineering at Paris, the School of Mines at St. Etienne, and the Schools of Mines at Alais and Donai; with other schools under the Ministry of Public Works; the École Coloniale at Paris, under the Ministry of the Colonies. The École des Beaux Arts, the École Nationale des Arts Décoratifs, and the Conservatoire de Musique et de Déclamation under the Department of Fine Arts, which is attached to the Ministry of Public Instruction. The municipal school of Industrial Physics and Chemistry was under the City of Paris. In the provinces there were national schools of fine arts, and schools of music, and several municipal schools as well as free subventioned schools, etc.

Technical schools of a somewhat lower grade under the Ministry of Public Instruction were very numerous, comprising in 1938 seven national schools of arts and trades (Aix, Angers, Chalons, Cluny, Lille, Paris, Strasbourg), two schools of clock-making, twelve national professional schools, 208 practical schools of commerce and industry (of which 49 are for girls) with 56,094 pupils (15,454 girls).

### Justice and Crime.

Under the Third Republic, the Courts of lowest jurisdiction in France were those of the Justices of Peace (*juges de paix*, one in each *canton*) who tried small civil cases and acted also as judges of Police Courts, where all petty offences (*contraventions*) were disposed of. The Correctional Courts pronounced upon all graver offences (*délits*), including cases involving imprisonment up to 5 years. They had no jury, and consisted of 3 judges who administered both criminal and civil justice. In all cases of a *délit* or a *crime* the preliminary inquiry was made in secrecy by an examining magistrate (*juge d'instruction*), who either dismissed the case or sent it for trial before a court where a public prosecutor (*Procureur*) endeavoured to prove the charge. Crimes were pronounced upon by the Courts of Assizes sitting in every department, in which the 3 judges were assisted by a jury of 12 men. The highest courts were the 26 Courts of Appeal, composed each of one President and a variable number of members, for all criminal cases which had been tried without a jury; and one Supreme Court of Appeal which sat at Paris, for all criminal cases tried by jury, so far as regards matters of law.

The French penal institutions consisted, first, of Houses of Detention. Next came Departmental Prisons, also styled *maisons d'arrêt, de justice and de correction*, where persons awaiting trial as well as those condemned to less than one year's imprisonment were kept, as also a number of boys and girls transferred from, or about to be transferred to, reformatories. There were 5 reformatories for boys and 5 for girls. The Central Prisons (*maisons de force et de correction*), in which all prisoners condemned to more than one year's imprisonment were kept, were provided with large industrial establishments for the work of prisoners, and numbered 9 for men and 3 for women. The average population in 1933 of all penal establishments was 17,075 men and 2,149 women.

### Social Welfare and Social Insurance.

Under the Third Republic, indigent and necessitous persons were assisted partly through public 'bureaux de bienfaisance' and partly by private and ecclesiastical charity. The funds of the 'bureaux' were partly derived from endowments, partly from communal contributions, and partly from public and private charity. It was also under the Third Republic that free medical assistance for sick destitute persons was organized. Under the terms of the Act of July 18, 1893, sick destitute persons were cared for free of charge in hospitals or at home, and the benefits comprised all medical services and treatment provided by the hospital. This law was completed by the law of April 16, 1916, instituting the public dispensaries, and by the law of September 7, 1919, creating sanatoria for the treatment of tuberculosis. The law of June 30, 1898, regulated assistance for the insane, and the cost of such assistance was met by payments from the patient or his family and by payments made by the commune, department or State. Assistance to French citizens who are destitute and over the age of seventy or incurable, was regulated by the Act of July 14, 1918, amended in 1930, 1933, 1935 and 1934. Such assistance might be given at home in the form of a monthly payment, or the assisted person could be placed in a public infirmary. Poor and destitute children were cared for under the law of June 27, 1904, and approximately 175,000 such children received assistance at the end of 1933.

Unemployed persons of all industries and occupations who have been in paid employment for at least six months immediately before they become unemployed and who depend on their work for a livelihood, received benefits under the National Unemployment Fund set up on August 30, 1914. The total amount of relief granted to any one household varies according to the number of dependent children. The monthly average of persons receiving relief in 1935 was 295,000.

With a view to counteracting the falling birth-rate, four different Acts were passed. In accordance with the Act of July 14, 1918, for the assistance of large families, every French citizen of insufficient means who was supporting more than three children received an annual allowance for each child beyond the third child under 15 years of age. The Act of July 23, 1928, instituted a national scheme to encourage large families and, under it, the State granted to a French family including more than three living children an allowance for each child beyond the second under thirteen years. These allowances were fixed according to the number of children and to whether one or both parents were alive. The system of granting birth bonuses for large families, to which the State made a contribution, was laid down by the law of June 29, 1918, and finally the Acts of June 17, 1918, and October 24, 1919, amended in 1917 and 1930, instituted maternity assistance to Frenchwomen in confinement and to nursing mothers. The authorities fix the rate of the daily maternity allowance, and there is a supplementary monthly allowance payable under the Act of October 24, 1919, to a nursing mother in receipt of the maternity allowance during the first six months after confinement, and a smaller allowance for the next six months.

The grant of family allowances to workers having one or more children dependent on them was generalised by the Act of March 11, 1932, which required employers of workers or salaried employees in industry, commerce, agriculture and the liberal professions to belong to an equalisation fund or a similar institution approved by the Ministry of Labour. The Decree of July 29, 1939, supplemented and consolidated the various measures hitherto adopted in favour of French families. Its object was to avoid excluding any family whatsoever from the benefit of family allowances and to ensure that all persons covered by the measure in question would receive more equal treatment than that established by previous systems. Allowances were payable to workers, irrespective of their occupation or that of their employers, and to officials and staff of the public services, independent employers and workers in industry, commerce, agriculture and the liberal professions, share-farmers and all who derived their principal means of existence from some form of occupation. A lump sum bonus of not less than 2,000 francs was paid for the first child, and a varying rate of allowance for the second, third and subsequent children.

Workmen's compensation was dealt with in the Act of April 9, 1898, instituting compensation for industrial accidents and for occupational diseases, which was amended by the Act of July 1, 1938, and the scope of insurance was extended to all manual and non-manual workers, whatever their trade or profession. It included accidents occurring in the course, or as a consequence, of employment, irrespective of place of employment. Benefits were paid in respect of temporary or permanent incapacity, or death.

The Act of October 28, 1935, for general social insurance for workers in commerce and industry against sickness, maternity, invalidity, old age and death, was amended by a decree of June 14, 1938. For agricultural occupations, a Decree of June 15, 1938, which came into force on January 1, 1939, amended the previous law and tended to lessen the difference which existed between insurance in agricultural occupations and that in commerce and industry.

In order to provide better housing conditions for workers, legislation for encouraging the building of cheap dwellings for persons of limited means and workers living mainly on their wages was laid down by the Siegfried Act of 1894, which was consolidated by the laws of December 5, 1922, and July 1928 (known as the Loucheur Act), and by the Bonnevay Act of 1930. The Loucheur Act provided for the construction of dwellings at medium rents, to which was added the 'improved cheap dwelling' of the Bonnevay Act.

Annual holidays with pay were made compulsory in 1936.

Before the war, the French mobilization scheme had been organised on a graduated plan. By the middle of September, 1939, some 50 divisions were available. This total did not provide the strength to deliver a powerful attack on the German frontier, while the backward state of the French Army's equipment more definitely nullified its offensive power.

To meet the German invasion in 1940 the French had 89 divisions available—compared with 94 in 1914. They comprised 1 armoured division, 3 light mechanised (cavalry) divisions, 5 mounted cavalry divisions, and 80 infantry divisions. The latter were composed of 44 regular divisions, comprising 18 fortress divisions and 36 reserve divisions with equipment inferior to that of the regular divisions.

On the eve of the German offensive the solitary French armoured division was being reorganised to produce a total of three, but when the blow fell, the number of tanks available for all three was no more than in each of the German armoured divisions.

In July, 1940, after the fall of France, the number of men who formed the Free French Army under General de Gaulle was only 1,200. By the autumn of 1942 they had risen to over 60,000, not including sailors and airmen.

Since North Africa was cleared, the French forces have grown in numbers, but only a small proportion has yet been equipped with modern weapons on a scale adequate for active operations. The French 19th Corps took part in the final stages of the Tunisian campaign, where their experience of mountain warfare made them particularly valuable. In May, 1944, the French Colonial Corps under General Juin played a decisive part in breaking through the Gustav Line, and in the subsequent advance which led to the capture of Rome. In the summer several French divisions took part in the operations which cleared France of the Germans, and were later formed into the First French Army, operating in Alsace. By the beginning of 1945, 8 French divisions were in the field, and plans were in course of execution for producing a fully equipped force of 750,000 men in time for the spring campaign.

### III. NAVY.

In 1935, France laid down her first 35,000-ton battleship, the *Richelieu*, followed early in 1937 by a second, the *Jean Bart*. A third, the *Clemenceau*, was put in hand during 1939, and a fourth, the *Gascogne*, was to have been begun had not events ordered it otherwise.

The *Clemenceau*, an incomplete bulk, was bombed and sunk at Brest in August, 1944. The *Richelieu* has been refitted at New York, while the *Jean Bart* was disabled in action at Casablanca in 1942, and has still to undergo renovation.

On November 27, 1942, the majority of the warships at Toulon, comprising 3 battleships, 7 cruisers, about 20 destroyers and 30 submarines, besides a seaplane carrier and sundry subsidiary vessels, were scuttled in shallow water or otherwise put out of action for the time being.

Six destroyers, six submarines, two sloops and a number of minesweepers, which were building or completing in Mediterranean shipyards, may ultimately pass into service, but otherwise the extensive programme of naval construction which was in hand up to June, 1940, seems to have been abandoned.

All naval aircraft are under the control of the Ministry of Marine. The coastal defences are also under the control of the Navy, and have been reorganised in four coast 'naval frontier' districts, in relation to 4 divisions

of aircraft (40 flotillas), while a fifth division (10 flotillas) is attached to the active fleet. Coastal defence aircraft have been placed under the Air Ministry. The naval frontier districts normally include considerable forces of destroyers, submarines and minelayers.

Navy estimates for 1939 were 8,072,000,000 francs, plus 1,565,000,000 supplementary credit.

The Navy is under the supreme direction of the Minister of Marine in Paris, aided by the Chief of the Naval Staff. There is also a Commander-in-Chief, who is in charge of the fleet at sea.

The French Navy is manned partly by conscription and partly by voluntary enlistment. Through the 'Inscription Maritime,' which was introduced by Colbert, and on the lists of which are the names of all male individuals of the 'maritime population,' France was formerly provided with a reserve of 114,000 men, of whom about 25,500 were usually serving with the fleet; now large numbers are taken from the shore for engine-room and other duties. The active personnel at the time of the armistice with Germany was about 85,000 officers and men, but has since been severely reduced.

The following is a summary of the strength of the fleet at the periods shown (excluding ships scuttled in harbour at Toulon):—

|                              | Complete at end of |      |      |
|------------------------------|--------------------|------|------|
|                              | 1942               | 1943 | 1944 |
| Battleships                  | 5                  | 5    | 3    |
| Aircraft Carriers            | 1                  | 1    | 1    |
| Cruisers                     | 9                  | 9    | 9    |
| Destroyers and Torpedo Boats | 20                 | 20   | 20   |
| Submarines                   | 23                 | 24   | 25   |

Below is a list of the principal ships in service at the end of 1944:—

| Launched          | Name                | Standard Displacement | Armour |         | Armament                         | Torpedo Tubes             | Indicated horse-power | Max. speed |
|-------------------|---------------------|-----------------------|--------|---------|----------------------------------|---------------------------|-----------------------|------------|
|                   |                     |                       | Belt   | Guns    |                                  |                           |                       |            |
| Battleships.      |                     |                       |        |         |                                  |                           |                       |            |
| 1939              | Richelieu . .       | 35,000                | 16     | 16      | 8 15 in.; 15 6 in.               | —                         | 155,000               | over 30    |
| 1940              | Jean Bart . .       |                       | 16     | 16      | 8 13 4 in.; 14 5 5 in.; 8 3 9 n. | —                         | 29,000                | 30         |
| 1918              | Lorraine . .        | 22,189                | 10 1/2 | 17      |                                  |                           |                       |            |
| Cruisers          |                     |                       |        |         |                                  |                           |                       |            |
| 1927              | Suffren . .         | 9,988                 | }      | Shields | 8 8 in.; 8 3 5 in. A.A.          | 6                         | 90,000                | 32         |

## FRANCE

## IV. FISHERIES.

For the French fisheries, including those of Algeria, the following are statistics for 1937 (the latest available):—Persons employed, 130,710; sailing-boats, 9,711; steamers, 401; motor boats, 11,873; value of products, 1,156,819,000 francs.

## Commerce.

Imports and exports, in thousands of francs, for three years were:—

|                   | 1937       | 1938       | 1941       |
|-------------------|------------|------------|------------|
| Imports . . . . . | 42,890,585 | 45,981,168 | 55,000,000 |
| Exports . . . . . | 28,988,658 | 30,585,780 | 14,000,000 |

The chief imports for home use and exports of home goods are to and from the following countries, in thousands of francs:—

| Countries               | Imports    |            | Exports   |           |
|-------------------------|------------|------------|-----------|-----------|
|                         | 1937       | 1938       | 1937      | 1938      |
| United Kingdom          | 3,380,300  | 3,237,630  | 2,952,700 | 3,551,461 |
| Germany . . . . .       | 3,248,610  | 3,315,604  | 1,415,005 | 1,440,832 |
| Belgium . . . . .       | 3,059,583  | 3,158,671  | 3,146,035 | 4,181,693 |
| Switzerland . . . .     | 812,839    | 987,040    | 1,445,776 | 1,924,008 |
| Spain . . . . .         | 815,038    | 191,996    | 424,957   | 388,982   |
| Italy . . . . .         | 571,258    | 570,286    | 631,480   | 485,295   |
| United States . . . .   | 4,033,232  | 5,284,829  | 1,585,478 | 1,681,128 |
| Brazil . . . . .        | 404,905    | 727,970    | 189,172   | 299,876   |
| Argentina . . . . .     | 942,342    | 985,661    | 534,377   | 729,405   |
| Czechoslovakia . . . .  | 408,100    | 299,337    | 421,181   | 405,464   |
| Japan . . . . .         | 338,388    | 367,948    | 161,146   | 99,577    |
| French Colonies . . . . | 10,349,490 | 12,465,605 | 6,776,443 | 8,398,943 |

The total quantity of wine imported into the United Kingdom from France in 1935, 1,916,955 gallons; in 1936, 2,409,356 gallons; in 1937, 2,216,942 gallons; in 1938, 1,889,372 gallons.

Total trade between France and United Kingdom for 5 years (in thousands of pounds):—

|                                    | 1934   | 1935   | 1936   | 1937   | 1938   |

| Imports from France into U.K. . .  | 19,226 | 21,614 | 25,628 | 25,626 | 23,638 |
| Exports to France from U.K. . .    | 16,751 | 16,702 | 17,752 | 21,410 | 15,131 |
| Re-Exports to France from U.K. . . | 6,719  | 6,806  | 8,034  | 8,623  | 8,209  |

## Shipping and Navigation.

On June 30, 1939, the French mercantile marine possessed 11,282 vessels with a gross tonnage of 2,952,975.

Shipping in foreign trade in 1938, is shown as follows with cargoes only: entered, 24,595 vessels of 51,991,071 tons; cleared, 18,575 vessels of 42,737,004 tons.

In the 1941 Budget, 824,330,293 francs were provided for subsidies to merchant shipping.

## Communications.

## I. RIVERS, RAILWAYS, ETC.

In 1933, there were in France 49,809 miles of national roads, 3,477 miles of departmental roads, 338,205 miles of local roads, making a total of 391,491 miles.

In 1937, there were 6,016 miles of navigable waterways with a total traffic of 47,775,000 tons.

According to a decree of August 31, 1937, all the independent railway companies were merged with the existing State railway system in a Société Nationale des Chemins de Fer Français, in which the State holds 51 per cent. of the shares. As from January 1, 1938, when the merger came into force, the railway system is divided into 5 regions: Nord: Est (now including Alsace and Lorraine); Ouest (formerly the State Railway Company); Sud-Est (formerly P.L.M.), and Sud-Ouest (formerly P.O.-Midi).

The length of principal lines open for traffic on January 1, 1938, was 26,427 miles, made up as follows: State, 5,954 miles; Nord, 2,378 miles; Est, 3,187 miles; Paris-Orléans-Midi, 7,294 miles; Paris-Lyons-Mediterranean, 6,178 miles; Alsace-Lorraine, 1,436 miles. The railways in 1942 carried 579,000 passengers and 103,000 tons of merchandise. Over 2,000 miles of railway are electrified and developments in this direction are continuing.

## II. POSTS, TELEGRAPHS AND TELEPHONES.

In 1937, the receipts on account of posts, telegraphs, and telephones amounted to 4,516 million francs; the expenditure to 4,222 million francs. The number of ordinary letters carried in 1937, was 1,687 millions, and of registered letters 69 millions.

The total length of the telegraphic lines in 1937, was 229,476 miles. In 1937, there were despatched 36,131,000 telegrams, of which 24,289,000 were internal and 8,324,000 international. In 1937, gross telegraph receipts were 267,078,000 francs.

In 1937, the telephone systems in France had 126,274 miles of line, and 5,825,725 miles of wire; number of subscribers, 1,550,000; number of conversations, 962,306,000.

## Banking and Credit.

The ordinary savings-banks numbered 559 (with about 2,213 branch offices) on December 31, 1938; the number of depositors was 10,493,200, with deposits to the value of 37,460,500,000 francs, representing an average of 3,495 francs to each depositor.

The National savings-banks, on December 31, 1938, held deposits and interest amounting to 26,041,500,000 francs due to 10,575,800 depositors, representing an average of 2,462 francs per account. On September 30, 1941, deposits and interest amounted to 29,125,000 francs.

The Bank of France, founded in 1800, and placed under State control in 1806, has the monopoly (since 1848) of issuing bank notes. The privileges of the Bank were last renewed on December 20, 1918, for a further 25 years, i.e., until December 31, 1945. On July 25, 1936, the constitution of the Bank was radically reformed with the object of bringing it more under government control. But on November 28, 1940, the Pétain Government set aside the reorganization of the Bank of 1936 and brought the Bank's constitution more into accord with that of other limited companies. On November 8, 1944, the Provisional Government adopted a new ordinance

In the flotillas are included 15 destroyers of from 1,319 to 2,569 tons, with speeds ranging from 33 to 40 knots, besides 5 rated as torpedo boats. There are 14 ocean-going submarines, of which 2 are minelayers, and 11 smaller submarines. Most of these are of recent design and construction.

#### IV. FRENCH AIR FORCE.

Under the Armistice terms, France was allowed to maintain a small part of her armed forces, including aircraft.

In 1942, the Air Force was under the direct command of the Air Minister and controlled by the Supreme Air Council. The Metropolitan Air Force, with two regional headquarters in Aix-en-Provence and Toulouse, comprised fighter, bomber and reconnaissance groups.

The three air commands of Algeria, Tunisia and Morocco, under a combined higher command with headquarters in Algiers, had fighter, bomber, reconnaissance and transport groups. The Naval Air Force was composed of a few air flotillas.

The French West African Air Command had fighter and bomber groups, and a flotilla of naval aircraft.

There were two or three squadrons in Madagascar.

#### V. FREE FRENCH AIR FORCE.

A considerable number of Air Force personnel rallied to General de Gaulle. Serving in co-operation with the R.A.F., they are in every theatre of operations.

### Production and Industry.

#### I. AGRICULTURE.

Of the total area of France, including Alsace and Lorraine (136,093,433 acres), 26,562,594 acres were under forests in 1937, 13,983,963 acres were returned as moor and uncultivated land, and 79,083,870 acres, of which 50,148,088 acres were arable, were returned as under crops, fallow and grass.

The following tables show the area under the leading crops and the production for three years:—

| Crop                      | Area (1,000 acres) |        |        | Produce (1,000 metric tons) |        |        |
|---------------------------|--------------------|--------|--------|-----------------------------|--------|--------|
|                           | 1936               | 1937   | 1938   | 1936                        | 1937   | 1938   |
| Wheat . . . . .           | 12,859             | 12,584 | 12,473 | 6,930                       | 7,017  | 10,148 |
| Mixed corn . . . . .      | 181                | 180    | 197    | 87                          | 88     | 110    |
| Barley . . . . .          | 1,623              | 1,627  | 1,640  | 715                         | 740    | 804    |
| Oats . . . . .            | 1,835              | 1,859  | 1,889  | 1,019                       | 1,017  | 1,273  |
| Beans . . . . .           | 8,181              | 9,085  | 8,096  | 4,214                       | 4,347  | 5,449  |
| Potatoes . . . . .        | 2,512              | 2,554  | 2,467  | 15,251                      | 15,911 | 17,094 |
| Industrial beet . . . . . | 768                | 785    | 770    | 8,256                       | 8,666  | 8,120  |

The annual production of wine and cider appears as follows:—

| Year | Under Vines, acres | Wine produced, thousands of gallons | Wine Import, thousands of gallons | Wine Export, thousands of gallons | Cider produced, 1,000 gallons |
|------|--------------------|-------------------------------------|-----------------------------------|-----------------------------------|-------------------------------|
| 1936 | 8,468,886          | 868,978                             | 244,286                           | 16,260                            | 630,924                       |
| 1937 | 8,619,490          | 1,130,259                           | 267,008                           | 16,720                            | 379,409                       |
| 1938 | 8,640,780          | 1,373,976                           | 353,840                           | 22,638                            | 761,322                       |

In 1942, 38,000,000 hectolitres of wine (836 million gallons) were produced in France.

The production of fruits (other than for cider making) and nuts for 1937, is given in metric tons, as follows (figures for 1938 in brackets):—Apples and pears 254,800 (281,558), plums 31,200 (40,222), peaches 64,300 (49,094), apricots 12,100 (12,170), cherries 47,300 (41,434) and nuts 42,300 (37,892).

On February 10, 1941, the numbers of farm animals were: Horses, 2,069,427; mules, 89,526; asses, 147,658; cattle, 14,285,460; sheep and lambs, 8,431,932; pigs, 4,036,279.

Silk culture, with Government encouragement (*primes*), is carried on in 17 departments of France—most extensively in Gard, Drôme, Ardèche, Var and Lozère. Silk production for 4 years:—

| Year           | Number of producers | Quantities of eggs put into incubation | Total production | Total value of produce |
|----------------|---------------------|----------------------------------------|------------------|------------------------|
|                |                     | Kilogs.                                | 1000 Kilogs.     | 1000 Francs.           |
| 1936 . . . . . | 12,087              | 371                                    | 674              | 2,908                  |
| 1937 . . . . . | 12,546              | 357                                    | 645              | 5,607                  |
| 1938 . . . . . | 11,189              | 312                                    | 599              | 5,177                  |

#### II. MINING AND METALLURGICAL INDUSTRIES.

The following are the statistics of the principal minerals produced for 3 years, in thousands of metric tons:—

|                       | 1937   | 1938   | 1939   |                          | 1937  | 1938  | 1939  |
|-----------------------|--------|--------|--------|--------------------------|-------|-------|-------|
| Coal . . . . .        | 44,816 | 46,502 | 49,106 | Auriferous ore . . . . . | 235   | 238   | 234   |
| Lignite . . . . .     | 1,015  | 1,058  | 1,107  | Rock salt . . . . .      | 2,286 | 2,069 | —     |
| Iron ore . . . . .    | 37,889 | 33,176 | 32,924 | Potash salts . . . . .   | 490   | 581   | 614   |
| Bauxite . . . . .     | 601    | 604    | 693    | Pig iron . . . . .       | 7,914 | 6,049 | 7,441 |
| Pyrites . . . . .     | 140    | 148    | 181    | Crude steel . . . . .    | 7,902 | 6,137 | 7,883 |
| Mineral oil . . . . . | 70     | 72     | 70     | Aluminium . . . . .      | 34.5  | 45.3  | 52.5  |

† Figures showing the pure potash contained in commercial salts (the crude salts extracted amounted in 1939 to 5,542).

The output of iron and steel products was as follows (in thousands of metric tons): pig iron, 1936, 6,237; 1937, 7,914; 1938, 6,061; crude steel, 1936, 6,703; 1937, 7,920; 1938, 6,186. The output of aluminium was as follows (1000 metric tons): 1936, 26.5; 1937, 34.5; 1938, 45.3.

Coal and lignite production in 1938, amounted to 47,560,000 metric tons. Potash salts output in 1938 was 572,000 metric tons.

#### III. MANUFACTURES.

**Sugar.**—In 1937–38, there were 108 sugar works, employing 41,129 men, 1,437 women, and 110 children. The yield of sugar during 12 years (expressed in metric tons of refined sugar) was:—

| Years   | Tons      | Years   | Tons    | Years   | Tons      |
|---------|-----------|---------|---------|---------|-----------|
| 1928–29 | 815,361   | 1931–32 | 788,968 | 1934–35 | 1,100,502 |
| 1929–30 | 825,333   | 1932–33 | 920,032 | 1935–36 | 833,884   |
| 1930–31 | 1,084,129 | 1933–34 | 851,620 | 1936–37 | 796,686   |
|         |           |         |         | 1937–38 | 872,337   |
|         |           |         |         | 1940–41 | 425,000   |
|         |           |         |         | 1941–42 | 640,000   |

**Alcohol.**—In 1906, 59,616 thousand gallons of alcohol were produced; in 1934, 103,543; in 1935, 97,256; in 1936, 106,267; in 1937, 78,226.

**Cotton.**—On July 31, 1938, there were 9,794,000 spindles.

for the administration of the Bank, which was placed under a directorate of 14, 2 to be elected by the shareholders, and 1 (by secret ballot) by the staff of the bank, 6 to be designated, in agreement with the Minister of Finance, by ministers representing various branches of the national economy, and a seventh to represent the combined interests of these ministries. The 4 remaining councillors will be included by right of office—the director-general of the *Caisse des Consignations*, the governor of the *Crédit Foncier*, the director-general of the *Crédit National*, and the director of the *Caisse Nationale du Crédit Agricole*. To supervise the Board of Governors 4 Censors are appointed, 2 by the Minister of Finance and 2 by the shareholders.

The capital of the bank is fixed at 182,500,000 francs. Its note circulation on December 28, 1939, was 151,322 million francs (gold cover, 57.9 per cent.); on December 26, 1940, it was 218,383 million francs (gold cover, 29.38 per cent.); on December 31, 1941, it was 270,144 million francs (gold cover, 28.40 per cent.); on December 31, 1942, it was 430,336 million francs (gold cover, 19.66 per cent.); on May 25, 1944, it was 551,969 million francs (gold cover, 14.09 per cent.); on December 28, 1944, it was 611,118 million francs, and on February 8, 1945, it was 562,416 million francs.

The following are the principal banks:—The *Crédit Foncier de France*, founded in 1852, which lends money on mortgage; the *Crédit Lyonnais*, founded in 1863; the *Société Générale*, founded in 1864; the *Comptoir National d'Escompte de Paris*; *Banque de Paris et des Pays Bas*; and the *Banque Nationale pour le Commerce et l'Industrie*.

A law of June 13, 1941, 'regarding the regulation and organization of the banking profession,' established a new régime for banks in France, organized control over such enterprises, and established the statutes of the bankers' profession. A Bankers' Association, a Permanent Professional Organization Committee for Banks, and a Commission of Control were created for the execution of these aims.

### Money, Weights and Measures.

The French monetary unit is the franc.

The franc of 100 *centimes* was in normal pre-war (1914-18) conditions worth 9½d. or 25.225 francs to the pound sterling.

A new Monetary Law was introduced on June 24, 1928, stabilising the franc on a gold basis. According to this law, the franc consisted of 65½ milligrammes of gold, 900/1,000 fine. On June 30, 1937, France went off the gold standard. By a decree dated March 2, 1940, the gold content of the franc was fixed at 28.34 grammes of gold, 900/1000 fine. The Mint has struck gold coins of 100 francs, 900/1,000 fine, and these coins are to be unlimited legal tender. To replace the 5, 10 and 20 franc notes of the Bank of France, which were withdrawn from circulation on December 31, 1932 (from which date they ceased to be legal tender), the French Mint had issued coins of 10 and 20 francs in silver 500/1,000 fine and 5, 2, 1, 0.50, 0.25, 0.10 and 0.05 in nickel alloy. The Germans have taken possession of these coins because of the value of metal for war purposes.

The weight of the 10-franc silver coins is fixed at 10 grammes and of the 20-franc piece at 20 grammes, with a margin of five-thousandths both as regards weight and fineness.

A currency agreement signed at Algiers on February 8, 1944, fixed at 200 francs to the £, and 50 francs to the \$, the official rate of exchange

for all the territories of the French Empire under the authority of the French Committee of National Liberation.

The metric system of weights and measures is in general use in France.

### Diplomatic Representatives.

#### 1. OF FRANCE IN GREAT BRITAIN.

*Ambassador Extraordinary and Plenipotentiary*.—René Massigli (presented Letters of Credence on November 23, 1944).

*First Counsellor*.—Jacques-Camille Paris.

*Second Counsellors*.—Louis Roché and Conte Pierre de Lenase.

*Military Attaché*.—Brigadier Roger Noiret.

*Commercial Counsellor*.—André Leprévost.

*Financial Counsellor*.—Pierre Rauzan.

*First Secretary*.—Pierre Francfort.

*Second Secretaries*.—Jean Le Roy and Olivier Wormser.

*Attachés*.—Raoul Le Bourgeois and Michel Fontaine.

*Chancellor*.—René Gallery.

#### 2. OF GREAT BRITAIN IN FRANCE.

*Ambassador Extraordinary and Plenipotentiary*.—Rt. Hon. A. Duff Cooper, M.P., D.S.O. (appointed November 22, 1943; arrived in Paris, September 13, 1944).

*Minister*.—A. Holman, C.M.G., M.C.

*Counsellor*.—P. W. S. Y. Scarlett.

*Secretaries*.—D. P. Reilly, J. M. Addis, Viscount Duncannon and G. Marker.

*Minister (Commercial)*.—A. R. Fraser, C.M.G., M.B.E.

*Head of Consular Section*.—R. H. Tottenham-Smith.

British consular posts have been re-opened at the following places: Bordeaux, Lyons, Marseilles, Nice and Rouen, and Algiers, Antananarivo, Dakar, Noumea and Tunis. There are also consular posts at Brazzaville, Duala, Jibuti, Pondicherry and Tahiti.

### Statistical and other Books of Reference concerning France.

#### 1. OFFICIAL PUBLICATION.

*Annuaire Statistique*. (Annual.) Paris. [For other pre-war official publications see THE STATESMAN'S YEAR-BOOK for 1940, p. 898.]

*Journal Officiel de l'État Français*, Vichy.

*Journal Officiel de la France Combattante*, London.

#### 2. NON-OFFICIAL PUBLICATION.

### ANDORRA.

The independence of the valleys of Andorra was of Carolingian origin. Their political status was regulated by the *Paréage* of 1278, according to which they were placed under the joint suzerainty of the Comte de Foix and of the Spanish Bishop of Urgel. The rights vested in the House of Foix passed by marriage to that of Béarn and, on the accession of Henri IV, to the French Crown; they were later exercised by the President of the French Republic. The country consists of gorges, narrow valleys and defiles, surrounded by high mountain peaks of the Eastern Pyrenees. Its maximum length is 17 miles, and its width 18 miles; it has an area of 191 square miles and a population of 5,231, scattered in 6 villages. The surface of the country is rough and irregular, with an altitude varying between 6,562 and 10,171 feet. The country is governed by a Council-General of twenty-four members elected for four years by the heads of families; half of the council is re-elected every two years. The council nominates a First Syndic (*Syndic procureur des Vallées*) to preside over its deliberations; in the First Syndic was vested the executive power. A Second Syndic was also nominated as deputy of the First Syndic. The judicial power is exercised in civil matters in the first instance by 2 civil judges (*Bayles*) appointed by the Bishop and by France respectively. There is a Judge of Appeal appointed alternately by each co-Prince, and in the third instance a Supreme Court of Andorra at Perpignan, and an Ecclesiastical Court of the Bishop at Urgel. For criminal suits two magistrates (*le Viguier de France* and *le Viguier Episcopal*), assisted by the Judge of Appeal, preside over a criminal court at Andorra-la-Vieille. The valleys of Andorra pay an annual due of 960 francs to France and 460 pesetas to the Bishop. A permanent delegate, the Prefect of the Pyrénées Orientales, moreover, has charge of the interests of France and his department controls the public services established by France, such as education, posts and telegraphs. A good road traverses the country, connecting the Spanish and French frontiers by way of Sant Julia, Andorre-la-Vieille, les Escaldes, Encamp, Camillo and Solder: it crosses the Col d'Envalira (2407 metres). Another road connects Andorre-la-Vieille with Ordino. Catalan is the language spoken. French and Spanish currency are both in use.

### Colonies and Dependencies.

Before the German occupation of France the colonies and dependencies of France (including Morocco) had an area which was given officially as about 11,962,640 sq. kilometres, or 4,617,579 square miles, with a population of 84,946,975. Algeria, however, was under the jurisdiction of the Ministry of the Interior, and Tunis and Morocco were attached to the Ministry of Foreign Affairs. For Togo, and Cameroon France held mandates under the League of Nations. The administration of the colonies was directed or controlled by the Ministry of the Colonies, which was organised as a separate department in 1894. Most of them enjoyed some measure of self-government and had elective councils to assist the governor. The older colonies had also direct representation in the French legislature, Réunion, Martinique and Guadeloupe, sending each a senator and two deputies, French India a senator and a deputy, Senegal, Guiana, and Cochinchina each a deputy, while most of the others are represented on the 'Conseil Supérieur des Colonies.' This council consisted of the senators and deputies of colonies, delegates from other colonies, and officials and other persons appointed on account of their special knowledge or qualifications. Some only of the colonies had a revenue sufficient for the cost of administration.

On November 8, 1942, United States troops landed on the Mediterranean and Atlantic coasts of French North Africa and quickly occupied Algiers, Oran, Casablanca and Bone. French West Africa, with the port of Dakar, on November 24, agreed to co-operate with the Allies, and by the beginning of December Allied forces were in occupation of the whole of French possessions in North Africa as far eastwards as Tunisia, the eastern coast of which had been seized by the Axis powers, and the Allied forces took up positions to expel them. Tunisia was liberated on May 12, 1943.

On December 1, 1942, Admiral Darian proclaimed himself High Commissioner in French North Africa. After his assassination on December 24, 1942, he was succeeded by General Henri Giraud, who, on February 7, 1943, received the title of 'French, Civil and Military Commander-in-Chief.' A war committee assists General Giraud in a consultative capacity, and an economic high council was also set up.

On November 23, 1942, satisfactory agreements were reached between the United States and Martinique covering all French possessions in the western hemisphere, including French Guiana. Martinique joined the French Committee of National Liberation on July 15, 1943; Madagascar on January 5, 1943, and French Somaliland on December 28, 1942.

On May 5, 1942, British forces landed in Madagascar, entered the capital on September 23, and an armistice was signed on November 5.

The area and population of the colonial domain of France are as follows:

|                                                                                          | Year of Acquisition | Area in Square Miles | Population |

### FRENCH INDIA.

Governor.—Louis Bonvin.

The chief French possession in India is Pondicherry. It was founded by the French in 1674, taken by the Dutch in 1693, and restored in 1699. The English took it in 1761, restored it in 1765, re-took it in 1778, restored it a second time in 1785; re-took it a third time in 1793, and restored it in 1814.

As established by the treaties of 1814 and 1815, the French possessions in India consist of five separate colonies, which cover an aggregate of 50,803 hectares (about 196 square miles), and have in 1941 the following populations (census of 1941):—

|                         |        |                        |        |                        |         |
|-------------------------|--------|------------------------|--------|------------------------|---------|
| *Pondichéry . . . . .   | 53,101 | Modéliarpeth . . . . . | 20,124 | Grande Aldée . . . . . | 8,128   |
| *Chandernagor . . . . . | 38,284 | *Karikal . . . . .     | 19,363 | Cotchéry . . . . .     | 7,142   |
| Oulgaret . . . . .      | 32,204 | Ariancepom . . . . .   | 16,906 | Neravy . . . . .       | 6,891   |
| Villenour . . . . .     | 25,751 | *Mahé . . . . .        | 14,092 | Nédoukadou . . . . .   | 6,593   |
| Bahour . . . . .        | 21,372 | Nettapacom . . . . .   | 13,847 | *Yanaon . . . . .      | 5,711   |
| Tiroubouvané . . . . .  | 21,348 | Tirnoular . . . . .    | 12,438 | Total . . . . .        | 323,295 |

In 1941, the population of the Provinces was as follows:—Pondichéry, 204,653; Karikal, 60,555; Chandernagor, 38,284; Mahé, 14,092; Yanaon, 5,711.

The colonies are divided into five *dependances* (the chief towns of which are marked with an asterisk in the above table) and seventeen communes, having municipal institutions. There is also an elective general council. The Governor of the colonies resides at Pondichéry. In the colonies the birth-rate in 1942 was 2.21 per cent. for Europeans and mixed, and 3.32 per cent. for Indians; and the death-rate 1.55 per cent. for Europeans and mixed, and 3.23 per cent. for Indians. There were in 1942, 67 primary schools and 4 colleges, all maintained by the Government, with 371 teachers and 13,319 pupils. Local revenue (budget, 1943) was 3,274,850 rupees and expenditure 3,274,850 rupees. The principal crops are paddy, rice, manioc, ground-nuts. On December 31, 1942, there were 35,563 cattle, 23,024 sheep, and 17,700 goats. There are at

Pondichéry 3 cotton mills, and at Chandernagor 1 jute mill; the cotton mills have, in all, 1,932 looms and 87,524 spindles, employing 6,858 persons. There are also at work a few oil presses for ground-nuts, and one ice factory. Two bone mills have also recently been established in Pondichéry. At the ports of Pondichéry and Karikal, in 1942, the imports amounted to 35,749,000 francs, and the exports to 17,850,000 francs. At these ports in 1942, 86 vessels entered and cleared. Railway open, 43 miles, Pondichéry to Villapuram, and Peralam to Karikal. The Banque de l'Indochine has a branch in Pondichéry.

*British Consul-General.*—Lieut.-Col. E. H. Gastrell, O.B.E. (resident at Pondichéry).

### FRENCH INDO-CHINA.

#### CENTRAL GOVERNMENT.

*Governor-General and High Commissioner for all the French Possessions in the Pacific War Zone.*—Vice-Admiral Decoux (July 20, 1940).  
*Secretary-General.*—Pierre Delaalle (February 20, 1939).

**Government, Area and Population.**—French Indo-China has an area of about 286,000 square miles and a population of 23,853,500, including 41,285 French and 975 other Europeans, 435,800 Chinese and 5,400 other Asiatics. It consists of 5 States: the Colony of Cochinchina, the Protectorates of Annam, Cambodia (including the territory around Battambang ceded by Siam in 1907), Tonking and Laos; and Kwang-Chau-Wan, leased from China. The whole country is under a Governor-General, assisted by a Secretary-General, and each of the States has at its head an official bearing the title of Resident-Superior, except in the case of Cochinchina, which, being a direct French Colony while the others are only Protectorates, has a Governor at its head.

On March 3, 1941, an agreement was signed in Tokio between representatives of the Pétain régime, Japan and Thailand, whereby the Vichy Government ceded to Thailand a strip of territory in Laos on the right bank of the river Mekong, and also a portion of Cambodia on the Thailand border.

On July 30, 1941, the Pétain régime concluded a pact with Japan whereby Japanese troops were granted points of access to Indo-Chinese territory and the right of occupation of certain agreed places.

On March 10, 1945, the Japanese seized complete control of the Colony, placing the Governor-General under 'protective custody.'

**Education.**—Instruction is given in public and private schools. The system of education for French children is like that of France, and instruction is given (1939) in elementary schools (83, with 5,504 pupils), higher elementary schools for boys and girls (6 with 792 pupils) and in the three lycées at Hanoi, Saigon and Dalat (Annam) (with 1,930 pupils). For native children there were, in 1939, 7,141 primary and elementary schools, with 519,000 pupils and 12,200 teachers, and 19 higher elementary schools, with 5,640 pupils, and 4 secondary schools with 550 pupils. There were also 47 professional schools with 2,630 pupils. The University of Hanoi (organised in 1917) consists of a faculty of medicine (262 students of whom 25 are French), a faculty of law (311 students including 54 French) and a faculty of fine arts (50 students). There are private schools both lay and confessional and special schools for the foreign elements of the population (Chinese, etc.).

**Justice.**—In Cochinchina justice is administered by French magistrates for both Europeans and natives, but in the Protectorates there are native tribunals for matters affecting natives, and French courts for matters affecting Europeans and Chinese. From the native tribunals there is an appeal to courts at Saigon and Hanoi. In these appeal courts European judges, in matters affecting natives, are assisted by Annamite mandarins.

**Finance.**—There is a common budget for the whole of Indo-China, and also a separate budget for each of the States. The Provinces have also their budget, as have the municipalities. The general budget is supported by receipts from customs, Government monopolies, indirect contributions, posts, telegraphs, and railways in all the countries of the union, and besides maintaining these, provides for military and judicial services, public works, and other matters relating to the whole of the union. For 1941 the revenue and expenditure of the general budget balanced at 129,014,750 piastres. There is also an extraordinary budget which for 1941 balanced at 18,933,780 piastres. The outstanding debt of Indo-China on January 1, 1941, amounted to 251,589,411 piastres, comprising Government loans, 238,543,324 piastres, and loans for the purchase of railway materials, 13,046,087 piastres.

**Defence.**—The military force consists of three divisions.

**Production.**—Indo-China is divided into three main economic areas:—(1) The territory tributary to Saigon (Cochinchina, Cambodia, Southern Laos, and Annam South of Cape Varella), which, apart from the fisheries on the Coast and the interior lakes, is almost entirely agricultural, being one of the great rice regions of the world. (2) The region tributary to Haifong (Tonking and the three northern districts of Annam), which is devoted to agriculture, mining and manufacture. (3) Central Annam (the region between Porte d'Annam and Cape Varella), with Tourane as the principal port, which is mainly agricultural, but is not a great rice-growing district; its main exports are cinnamon, sugar, tea, maize and manioc. High mountain ranges in the north provide valuable tropical hardwoods, bamboo, lac, herbs and essential oils. Fishing is a secondary but important native occupation. Fish forms a major article of diet, while a considerable surplus is exported to neighbouring areas. The minerals of Indo-China are anthracite (output in 1939, 2,615,000 metric tons), zinc (5,867 metric tons), tin (1,491 metric tons), wolfram (304 metric tons).

**Commerce.**—In 1887, the French possessions in Indo-China, including Annam, Tonking, Cochinchina and Cambodia, were united into a Customs Union. In 1939, the total imports amounted to 2,382,262,000 francs, and exports to 3,494,724,000 francs. The chief export is rice, 1,692,000 tons in 1939, valued at 1,386,000,000 francs. Other exports are rubber (68,880 tons, valued at 956 million francs), fish, coal, pepper, cattle and hides, corn, zinc and tin ore. The principal imports are cotton and silk tissues, metal goods, kerosene and motor cars.

In 1939, the imports into Great Britain from Indo-China amounted to 419,051L, and the exports from Great Britain, 845,650L; re-exports to Indo-China from U.K. were 1,398L.

**Communications.**—There are 5,563 miles of colonial routes and 11,477 miles of local roads (December 31, 1938).

The principal railways are from Saigon to Mytho (44 miles); from Hanoi to Nacham (111 miles); from Hanoi to Saigon and branch line (1,160 miles);

from Haiphong to Yunanfon (524 miles); from Phnom Penh to Mongkol Borey (211 miles); and from Bendongxo to Locninh (43 miles). Total length of line, three-quarters Government, 2,093 miles. There were 364 principal post offices and more than 700 rural post offices (1938).

In 1938 there were 8,932 miles of telephone lines in Indo-China, and 42,209 miles of wire. The number of calls made was 13,466,000, the number of subscribers 9,087. There is a radio-telephonic service to Europe from Saigon. The length of telegraph line in 1938 was 9,687 miles; number of inland telegrams sent, 1,087,000.

**Money and Banking.**—According to a decree of May 31, 1930, the piastre was linked to the franc, the rate of stabilisation being 10 francs = 1 piastre.

The Bank of Indo-China has the monopoly of note issue in Indo-China. This privilege was renewed for a period of 25 years by the law of March, 1931. Its capital is 150,000,000 francs. Notes in circulation, May 31, 1940, 260,200,000 piastres.

#### STATES AND PROTECTORATES.

##### Cochin-China.

Cochin-China was ceded by the King of Annam to France in 1862. Its area is estimated at 26,476 square miles. The whole is divided into 21 provinces. The towns of Saigon, Cholon, Cantho, Bacieu and Rachgia have been formed into municipalities, and a new administrative division, named 'Région Saigon-Cholon,' has been created. The Colonial Council contains 24 members (12 French, 12 native). The colony is represented in France by one deputy. The population consists mainly of Annamites, Chinese and foreigners. In 1936, the total population was put at 4,615,968, of whom 15,449 were French and 363 European foreigners (excluding the military forces, about 2,500 troops). There were 170,698 Chinese in 1936, of whom 65,055 resided in Cholon. Saigon had, in 1936, a population of 110,577, of whom 9,821 were French and 274 other Europeans. The town of Cholon has 145,254 inhabitants, of whom 782 are French and 31 other Europeans. There are (1937) 1,724 schools, with 3,994 teachers and 190,512 pupils.

Of the total area, 2,307,990 hectares (5,700,735 acres) are cultivated (1939). The chief culture is rice, of which the production in 1938 was 3,714,656 metric tons from 2,164,000 hectares. Other crops are sugarcane (yielding 11,577 metric tons of sugar in 1938), tobacco, coffee, rubber (41,158 metric tons in 1938), coconuts, betel-nuts, pepper, oranges, bananas, sweet potatoes, cotton, pineapples, beans, etc. The farm animals in 1938 comprised 12,300 horses, 278,000 buffaloes, 668,300 pigs, 232,000 oxen, 8,480 sheep and goats.

River and coast fishing is actively carried on; the fishery products are valued at 63,000,000 francs yearly. There are 30 rice mills in Saigon and Cholon. In these towns are also 8 saw-mills, 6 soap factories, a varnish factory, a tyre factory, several rubber factories, several fruit and fruit-juice preserve factories and 2 cigarette factories. Commerce is mostly in the hands of Europeans and Chinese, but about 18,000 Annamites are small traders. The total exports in 1938 amounted to 2,211,857,893 francs, and imports to 1,127,457,229 francs. The chief exports in 1938 were rice (1,077,637 metric tons), maize (434,000 metric tons), dried and salted fish (26,652 metric tons), pepper (5,450 metric tons), copra (9,839 metric tons),

rubber (60,080 metric tons). During 1938, 777 ships of 2,494,000 tons entered the port of Saigon, and 782 ships of 2,498,000 tons left the same port. There are about 5,500 miles of roads, of which nearly 5,000 miles are suitable for all weathers. There are also 3,480 miles of navigable waterways.

At Saigon there are 7 banks or bank-agencies, but the two chief ones are the Franco-Chinese Bank and the Indo China Bank.

In 1939, the local budget balanced at 17,500,000 piastres.

##### Annam.

French intervention in the affairs of Annam, which began as early as 1787, was terminated by a treaty, signed on June 6, 1884, and ratified at Hué on February 23, 1886, by which a French protectorate has been established over Annam. The King Bao-Dai, born in 1913, succeeded to the throne on January 8, 1926. The King governs the country, assisted by a Council of Ministers, in accordance with the wishes of the French Government, represented by a Resident Supérieur. A Chamber of representatives of the people was established in 1926. The ports of Tourane and Qui-Nhon are opened to European commerce, and the customs revenue conceded to France; French troops occupy part of the citadel (called Mang-Ca) of Hué, the capital (population in 1938, 13,056, of whom 474 were French). Province of Binh-Dinh had 478,445 inhabitants in 1935. Annamite functionaries, under the control of the French Government, administer all the internal affairs of Annam. The area of the protectorate is about 56,973 square miles, with a population in 1939 of 6,211,228. There were 2,827 Europeans, 637,990 Moïs, 15,230 Chinese, and 121 Indians in 1939. The population is Annamite in the towns and along the coast, and consists of various tribes of Moïs in the hilly tracts. There were in 1939, 1,240 preparatory schools with 87,244 pupils; 4 higher primary schools for boys with 1,136 pupils and one for native girls at Hué with 640 pupils; one professional school at Hué with 141 students; and one lycée with 713 pupils. Local budget, 1938, balanced at 9,907,387 piastres. The Phanrang river has been utilised to irrigate about 6,900 acres, and similar works, on a smaller scale, have been carried out in Central Annam. Rice is the most important product. Others are cotton, maize, and other cereals, the areca nut, mulberry, cinnamon, tobacco, sugar, betel, manioc, bamboo; excellent timber abounds, also caoutchouc, cardamoms, coffee, dye, and medicinal plants. Raw silk is produced. There are about 953,000 head of cattle in Annam, and cattle rearing is of some importance. There is a gold mine at Bông-Miêu in the province of Quang-nam, worked by a French Company. Copper, zinc, coal and iron ore are also found in various districts. In North, Central, and Southern Annam there are salt works. The chief imports are cotton-yarn, cottons, tea, petroleum, paper goods, and tobacco; chief exports, sugar, rice, cotton and silk tissues, cinnamon, tea, and paper. Imports in 1938 were valued at 47,738,000 francs and exports at 112,859,000 francs. In 1938, 229 French ships, besides a few ships of other nationalities, cleared the port of Tourane.

##### Cambodia.

Cambodia is bounded on the south by Cochin-China, on the east by Annam, on the north by Laos and Siam, on the west by Siam, and on the south-west by the Gulf of Siam. The French Protectorate was established in 1863.

Area, 67,550 square miles; population according to the census of 1936 :

3,046,482, of whom 2,023 were Europeans (excluding the military forces), 191,094 Annamites, 105,710 Chinese, 2,594,010 Cambodians, 73,465 Malaysians and Chams, 19,887 Laotians, and 63,762 various races. The present King, Sihanouk, succeeded on April 26, 1941. The country is divided into 14 provinces. The four chief towns are Phnôm-Penh (population 102,678, including 1,510 Europeans, of whom 182 were military), the capital of the territory, located at the crossing of Tonlé-Sap and Mékong rivers; Battambang, 180 miles farther north-west; Kampot (92 miles from the capital), and Kompong-Cham. The budget for 1939 balanced at 11,369,696 piastres, including a sum of 450,000 piastres allowed for the civil list of the king. There were (1938) 1,020 schools, of which 818 were native schools, *écoles de pagodes*, with 84,500 pupils; 196 mixed schools, with 18,800 pupils; 2 French schools, with 270 pupils; one college (Sisowath), with 360 pupils; one professional school (with 114 pupils), and a school of applied arts (with 133 pupils).

The soil is fertile, but only a part of it is under cultivation owing to shortage of labour. The chief product of Cambodia is rice, which is exported by way of Cholon, where the rice is milled, and Saigon, where it is shipped. Amongst the other products are tobacco, kapok, cotton, pepper, maize, palm sugar, rubber and silk. Pepper is especially grown in the provinces of Kampot and Takéo, output ranging between 3,000 and 3,500 metric tons per annum, the whole of which is exported. Maize growing is extending; the production of maize is estimated at 3/400,000 tons, the whole of which is exported. Rubber is cultivated on the basaltic red soils of the Kg-Cham region. The plantations cover an area of about 68,000 acres. Production in 1939 was 19,000 tons. The output of rice varies between 1,000,000 and 1,800,000 metric tons a year; about a quarter is exported. Cattle breeding is a flourishing native industry. Other native industries are: weaving of silk and cotton, pottery and making of rush mats. There is a cotton-ginning mill and rice-mills at Phnôm-Penh, and a silk factory at Kampot. Valuable forests cover an area of about 20,000,000 acres. Phosphate is the principal mineral, but not worked very extensively. There are also precious stones and jet workings. The overflow of the Mekong river fills up the Great Lake, which occupies the middle of Western Cambodia. With the low-water season the lake slowly empties and leaves innumerable ponds on the ground it covered during the high-water season. These ponds are filled with an enormous quantity of fish suitable for salting and smoking. This is the principal native industry. The imports comprise salt, beverages, textiles, chemicals, cigarettes, iron and opium; the exports comprise rice, salted fish, pepper, maize, cotton, tobacco, fish-oil, palm-sugar, sticklac, kapok, wood, resin, hides and cattle.

Cambodia possesses two little sea-harbours, Kep and Réam, both on the Gulf of Siam and connected to Bangkok by the steamers of the Siam Steam Navigation Company. The Mékong and the Great Lake, with their affluents, give a total of 875 miles of waterways, of which about 370 are not navigable to launches during the low-water season. River-steamers easily reach Phnôm-Penh, which has good quays and embankments.

Cambodia possessed in 1939, 675 miles of asphalt roads, 1,395 miles of macadamised roads, 235 miles of dirt tracks, 1,515 miles of road open in the dry season only. The chief roads are from Saigon to the Siamese frontier, via Phnôm-Penh and Battambang, from Phnôm-Penh to the Gulf of Siam, and Mount Bokor (hill-station), from Saigon to Kratié (and on to Laos), and from Phnôm-Penh to Angkor via Kompong-Thom. The railway between Phnôm-Penh and Mongkol Borey will shortly be connected up with the Siamese railway system.

Of all the countries of the Far East, Cambodia is among the richest in ancient monuments. The ruins of Angkor are specially famous.

### Tonking.

This territory, brought under France's protectorate in 1884, has an area of 40,530 square miles, and is divided into 23 provinces, and 4 military territories, with 10,101 villages and a population in 1940 of 9,264,309, of whom 11,678 were French (exclusive of military forces) and 889 other Europeans. The King of Annam was formerly represented in Tonking by a viceroy, but in July, 1897, he consented to the suppression of the viceroyalty and the creation of a French residency in its place. Chief town Hanoi, a fine and large modern town, with a population of 124,840 in 1940 (French, 6,443; other Europeans, 191; natives, 127,169; and Chinese, 5,291). This town on January 1, 1902, became the capital of Indo-China, instead of Saigon. In 1940, there were in Hanoi 12 native primary schools (6,278 pupils), 1 primary high school for native boys (346 students), 1 college for native girls (480 pupils), 1 lycée for native boys (811 students), 1 technical and professional school (128 students), 1 French primary school for girls (301 pupils), 2 French primary high schools (1,186 pupils), and 1 French lycée for French and natives (1,389 pupils). There are also in the provinces 1,164 official primary schools for natives (94,784 pupils), 1,527 village schools (71,269 pupils), 5 primary high schools for natives (918 pupils), 13 primary schools for French children (591 pupils) and 1 high primary school for French boys and girls at Haiphong (228 pupils). There is a university at Hanoi with medical, pharmacy, law, and fine arts facilities. The local budget for 1940 balanced at 120,849,762 piastres. The chief crop is rice (total production, 1939, 1,956,322 tons). Other products are maize (production, 1939, 123,077 tons), arrow-root, sugar-cane, coffee, tea, various fruit trees, and tobacco. A large quantity of raw silk is produced annually, most of which is used in native weaving and the remainder exported. There are rich limestone quarries, calamine and tin mines, and also rich hard coal beds.

Imports in 1939, 946,439,000 francs; exports, 548,119,000 francs.

Chief imports are tools and machinery, yarn and tissues, beverages; chief exports, iron, coal, rice, maize, cattle, tea, various essences for perfumery, castor oil, and lac oils for ship-bottom paints. The principal port is Haiphong, which is visited regularly by the steamers of French, British and American lines.

The Laos territory, since 1893 under direct administration (the Kingdom of Luang-Prabang excepted), has an area of 231,400 square kilometres, or 89,320 square miles; the population in July, 1939, was 1,023,314. The territory includes 10 administrative provinces (*circonscriptions*), of which the following 8 (capitals in parentheses) are under the authority of an administrator with the title of French Resident: Bassac (Paksé), Saravane (Saravane), Savannakhet (Savannakhet), Cammon (Thakhek), Vientiane (Vientiane), Tranninh (Xieng-Khouang), Houaphan (Samneua), Haut-Mékong (Houeisai); the following is under an administrator with the title of Government Commissioner, Luang-Prabang (Luang-Prabang); and lastly the 5th Military Territory (Phongsaly) under a Superior Officer of the Colonial Army. Three of the above provinces, Luang-Prabang, Houaphan, and the 5th Military Territory, form the Kingdom of Luang-Prabang, which is under the sovereignty of King Sisavang Vong. The whole colony is governed by a Superior Resident at Vientiane, the capital. The soil is fertile, producing

rice (output in 1939, about 373,120 tons), cotton, indigo, tobacco, benzoin, cardamom, sticklac and fruits, and bearing teak forests, from which the logs are now floated down the Mékong to Saigon; cattle rearing is also of some importance. Gold, tin, lead and precious stones are found, and concessions have been granted to several French mining companies. Great attention is being paid to the improvement of communications. The capital road from Saigon to Luang-Prabang is now completed from Saigon to Pakse, from Savannakhet to Thakhek and from Pakse to Vientiane. The section Pakse-Savannakhet is under construction. The road from Savannakhet to Donghà is the principal route to Annam and is open throughout the whole year. The road from Thakhek to Vinh via Napé is closed for 5 months of the year during the rainy season. A hard road connects Luang-Prabang, the capital of the Kingdom of Luang-Prabang, to Xieng-Khouang and Vinh; this road is closed during the rainy season. A telegraph line connects Hué in Annam with the towns on the Mékong, and these with Saigon and Hanoi. The local budget for 1937 balanced at 3,113,350 piastres.

The territory of **Kwang Chau Wan** (or, according to the French official spelling, **Kouang-Tchéou-Wan**), on the coast of China, has been leased by China to France for 99 years, by virtue of the preliminary agreement of April 10, 1898, completed by the convention of boundary delimitation of November 16, 1899. The territory is placed under the authority of the Governor-General of Indo-China; it is divided into three administrative districts and includes two towns: Tchékam (50,000 inhabitants), commercial centre, city entirely Chinese; Fort-Bayard (20,000 inhabitants), the seat of the local administration. Its area is about 825 square miles and its population 300,000. The police force numbers 500 men. There is a Franco-Chinese elementary school at Fort-Bayard and a Chinese elementary school in each important centre of the territory. Four sanitary establishments are in service in the territory: an ambulance at Fort-Bayard, two hospitals for the natives at Fort-Bayard and at Tchékam and one sick ward at Tong-san. The imports are chiefly cotton yarns, petroleum, matches, refined sugar, cunao (for tinctorial purposes); the exports are straw sacks, swine, cattle, brown sugar, ground-nuts and fire-crackers. Imports in 1940, 22,806,367 Chinese dollars; exports, 27,416,453 dollars. The port is free. The territory is regularly visited by the vessels of French, Portuguese, British and Norwegian companies; in 1940, 316 vessels of 390,704 tons entered. The local budget for 1941 balanced at 914,200 piastres. A regular service of automobiles connect Fort-Bayard with the principal centres. There are 168 miles of roads in the territory, a base for hydroplanes at Port-Beaumont, an aerodrome four miles from Fort-Bayard, with a radio station and a telephone line. Fort-Bayard and Tchékam are provided with electric light; telephonic and telegraphic lines connect these two localities. A wireless station connects the territory, through Indo-China, with other countries.

On February 22, 1943, the Japanese announced that they had occupied Kwang Chau Wan.

## AFRICA\*

## ALGERIA.

(L'ALGÉRIE.)

## Government.

The government and administration of Algeria are centralised at Algiers under the authority of the Governor-General, who represents the Government of the Republic throughout Algerian territory. With the exception of the non-Musulman services of Justice, Public Instruction, Worship, and the Treasury, which are under the appropriate central ministries, all the services are under his direction. He has to prepare a special budget for Algeria, he grants concessions for works, and he contracts loans in the name of the Colony.

Northern Algeria has three departments (Oran, Algiers, Constantine) divided into *arrondissements*, which include *communes de plein exercice* with administration on French lines, and *communes mixtes* with natives in large numbers. The latter divisions are often large and are under special administrators; each has a municipal council helped by native sheikhs, caids or aghas. Natives elect representatives in all local assemblies.

The territories of the South, forming a separate colony, are each under a military command which directs all the administrative and civil services under the authority of the Governor. They have a budget distinct from that of Algeria. The natives are represented on the communal administration. By the law of February 4, 1919, the position of French citizens is accorded to natives, above the age of 25 and monogamous, who served in the war, who are proprietors or farmers, who can read or write or who hold a French decoration.

Allied troops landed in Algiers, which was occupied on November 9, 1942. British troops in French North Africa are being paid in special sterling notes. These notes are issued in denominations of 12, 10s., 5s., 2s. 6d., and 1s. In agreement with the American authorities, the rate of exchange has been fixed at 12, or four dollars, to 300 Algerian francs.

Governor-General.—Yves Chataigneau.

## Area and Population.

The census of March 8, 1936, showed a population (including the military forces) amounting to 7,234,684 (of whom 987,252 were Europeans, 6,247,432 natives), on an area of 847,500 sq. miles. The colony has been organised in 2 great divisions called respectively Northern (80,117 sq. miles) and Southern Algeria (767,435 sq. miles). Northern Algeria consists as formerly of Civil Territory and Territoire de Commandement, but the Civil Territory has been extended, while the Territoire de Commandement has been diminished and will before long be completely merged in the Civil Territory. Northern Algeria contains 17 *arrondissements*, 304 *communes*, and 78 mixed *communes*, in the Civil Territory. Southern Algeria consists of the 4 Territories of Ain-Sefra, Ghardaia, Tougourt, and the Saharan Oases, organised under decrees of August 14, 1905. These territories contain 13 *communes*, of which 7 are mixed and 6 native.

\* See also MOROCCO.

Population, including military forces, according to the census of March 8, 1936:—

|                    | Municipal Population |           |           | Population numbered separately |        |        | Grand Total |
|--------------------|----------------------|-----------|-----------|--------------------------------|--------|--------|-------------|
|                    | European             | Native    | Total     | European                       | Native | Total  |             |
| Northern Territory | 989,381              | 5,570,107 | 6,509,638 | 38,766                         | 43,639 | 82,895 | 6,592,033   |
| Southern Territory | 6,482                | 631,037   | 637,519   | 2,478                          | 2,659  | 5,132  | 642,651     |
| Grand Total        | 946,013              | 6,201,144 | 7,147,157 | 41,239                         | 46,288 | 87,527 | 7,234,684   |

Population, according to Departments and Territories (census of March 8, 1936):—

| Northern Algeria (Departments) | Population | Southern Algeria (Territories) | Population |
|--------------------------------|------------|--------------------------------|------------|
| Algiers . . . .                | 2,240,911  | Ain Sefra . . . .              | 193,347    |
| Oran . . . . .                 | 1,623,356  | Ghardaia . . . .               | 166,366    |
| Constantine . . .              | 2,727,766  | Tougourt . . . .               | 243,868    |
|                                |            | Saharan Oases . .              | 89,575     |
| Total . . . . .                | 6,592,033  | Total . . . . .                | 642,651    |
| Grand Total . . . .            |            | 7,234,684                      |            |

In 1936, of the total European population of 987,252, the French numbered 853,209 and foreigners, 134,043.

The chief towns with population in 1936 were: Algiers, 252,321; Oran, 194,746; Constantine, 106,830; Bona, 83,275; Philippeville, 64,857; Tlemçen, 51,580; Sidibel-Abbes, 51,094; Tizi Ouzon, 40,526; Blida, 40,149; Mostaganem, 36,961; Sétif, 36,041; Mascara, 31,842; Bougie, 30,659.

## Religion and Education.

The native population is entirely Musulman, the Jews being now regarded as French citizens. The Roman Catholic Church has an archbishop and 2 bishops, with some 400 officiating clergymen. There are 13 Protestant pastors and 6 Jewish rabbis sharing in Government grants.

At Algiers (city) there is a university, attended (July 31, 1938) by 2,248 students (966 for law, 588 medicine and pharmacy, 241 science, 458 arts). There are also special schools for commerce, the fine arts, hydrography, and agriculture. In 1938 there were also 689 Musulman schools with 76,859 pupils. There are higher Musulman schools (*médéras*) at Algiers, Tlemçen and Constantine, with 163 students (November 5, 1938) (149 Arabs, 14 Kabyles). There were, on November 5, 1938, 12 establishments for secondary education for boys with 9,914 pupils (8,952 French, 923 natives and 89 foreigners) and 6 establishments for girls with 4,392 pupils (4,377 French, 68 natives and 47 foreigners). There were, in 1938, 18 higher primary schools for boys with 5,695 pupils, and 12 for girls with 3,691 pupils. In 1938 there were 1,224 primary schools, public and private, with 159,725 pupils (84,749 boys and 74,976 girls), and 120 infant schools with 11,817 boys and 9,932 girls. There were (1938) three normal schools for men teachers with 45 professors and 368 students, and three normal schools for women teachers with 26 professors and 116 students.

### Justice and Crime.

There is an Appeal Court at Algiers, and in the arrondissements are 17 courts of first instance. There are also commercial courts and justices of the peace with extensive powers. Criminal justice is organised as in France for Europeans. Since 1902, there have been criminal courts and special repressive tribunals for trying natives accused of crime.

Mussulman justice is administered to natives by Justices of the Peace and Cadis in the first instance with an appeal to French courts.

### Finance.

The budget (including extraordinary budget) for five years were as follows (in francs):—

|                   | 1937          | 1938          | 1939          | 1940 <sup>1</sup> | 1944 <sup>1</sup> |
|-------------------|---------------|---------------|---------------|-------------------|-------------------|
| Revenue . . .     | 1,719,796,891 | 2,173,848,028 | 2,416,617,471 | 2,526,128,968     | 4,623,468,652     |
| Expenditure . . . | 1,719,502,228 | 2,173,785,238 | 2,322,898,075 | 2,525,778,285     | 4,619,286,835     |

<sup>1</sup> Estimates.

There is a separate Post Office budget which is estimated to balance revenue and expenditure at 267,010,081 francs for 1939.

### Defence.

Before the war the military force in Algeria and Tunis comprised the XIXth Army Corps, which included 8 divisions. French residents were under the same obligation to serve as in France; natives were under the obligation to serve 2 years with the colours and could be called up as reservists in case of mobilisation. The troops might be stationed in North Africa or employed on Colonial expeditions, but they belonged to the 'Metropolitan,' not to the Colonial Army. There were 6 regiments of zouaves, each of 3 battalions, of 5 companies; 6 regiments of cavalry (Chasseurs d'Afrique), of several squadrons; 3 groups of field and 1 of heavy artillery; 1 battalion of engineers, and 1 regiment of the Flying Corps. These were all European troops, and in the case of the artillery and engineers their recruiting depôts were in France. The Foreign Legion of 4 regiments of a varying number of battalions were recruited from foreigners of any nationality, but officered chiefly by Frenchmen; the headquarters of the regiments were in Sidi-Bel-Abbes, in Oran, but battalions were sent to any colony where they might be required. The natives were 12 regiments of Algerian Tirailleurs each of 3 battalions, and 6 regiments of Spahis (Arab cavalry) each of several squadrons. The officers and a proportion of the non-commissioned officers of the native regiments were French.

### Agriculture and Industry.

There exists in Algeria a small area of highly fertile plains and valleys in the neighbourhood of the coast, mainly owned by Europeans, which is cultivated scientifically, and where profitable returns are obtained from vineyards, cereals, etc., but the greater part of Algeria is of limited value for agricultural purposes. The northern portion is mountainous and generally better adapted to grazing and forestry than agriculture, and a large portion of the native population is quite poor. In spite of the many

excellent roads built by the Government, a considerable area of the mountainous region is without adequate means of communication and is accessible only with difficulty.

The soil is, under various systems, held by proprietors, by farmers, and by métayers or khammés. Most of the State lands have been appropriated to colonists. The area under cultivation is 24,474,350 acres, of which 5,793,797 acres are owned by European farmers and the balance by native farmers. The chief crops in 1938 were wheat, 4,051,516 acres with a yield of 946,160 metric tons; barley, 2,828,532 acres with a yield of 580,185 metric tons; and oats, 450,743 acres with a yield of 158,101 metric tons; maize, potatoes, artichokes, beans, peas and tomatoes. Flax, silk, and tobacco (the cultivation of the latter being most remunerative) are also produced. In 1938 there were 16,813 tobacco planters, the area under cultivation was 57,899 acres, and the yield 19,054 metric tons.

In 1937, the yield of wine was 339,327,208 gallons from an area of 974,447 acres compared with 253,590,216 gallons from 964,295 acres in 1936. Dates, bananas, pomegranates, almonds, figs, and many other fruits grow abundantly. The production of olive oil amounted to 1,570,580 gallons in 1937. In 1937 the total acreage of forests belonging to the State amounted to 5,430,074 acres. The greater part is mere brushwood, but there are very large areas covered with cork-oak trees, Aleppo pine, evergreen oak and cedar. The dwarf-palm and alfalfa are worked on the plains. Timber is cut for firewood, also for industrial purposes, for railway sleepers, telegraph poles, etc., and for bark for tanning. Considerable portions of the forest area are also leased for tillage, or for pasturage for cattle, sheep or pigs. The forest revenue in 1936 was 21,947,439 francs.

In 1938, there were in Algeria 181,000 horses, 182,000 mules, 319,000 asses, 789,000 cattle, 5,965,000 sheep, 2,737,000 goats, 60,000 pigs, and 170,000 camels. The wool-clip in 1936 was 7,382 metric tons.

There are extensive fisheries for sardines, anchovies, sprats, tunny-fish, etc., and also shell-fish. In 1936, 1,081 boats and 3,609 persons were employed in fishing, and the quantity of fish taken amounted to 20,354,891 kilos, valued at 51,750,397 francs.

Algeria possesses deposits of iron, zinc, lead, mercury, copper and antimony. The mineral output in 1937 was as follows: iron ore, 2,325,500 metric tons (1,884,000 metric tons in 1936); lead, 7,912 metric tons (4,896); zinc, 17,742 metric tons (5,647); iron pyrites, 27,100 metric tons (20,000); phosphate rock, 566,571 metric tons (488,807). Kaolin, marble and onyx, salt, coal and antimony are also found.

### Commerce.

The foreign trade of Algiers in recent years has been as follows (in 1,000 francs):—

|      | Imports      | Exports      |      | Imports      | Exports      |
|------|--------------|--------------|------|--------------|--------------|
| 1938 | 1,000 francs | 1,000 francs | 1936 | 1,000 francs | 1,000 francs |
|      | 4,071,660    | 3,817,271    |      | 3,235,796    | 3,469,379    |
| 1934 | 3,578,549    | 2,626,666    | 1937 | 4,083,383    | 4,331,599    |
| 1935 | 2,884,227    | 2,613,366    | 1938 | 4,466,565    | 5,619,701    |

The principal imports in 1938 were (in millions of francs), textiles, 250 (of which 420 were from France); machines, spare parts, 260 (175 from France); petroleum, 77; sugar, 205 (205 from France); coal, 105; iron and steel, 112 (112 from France); cereals, 105; coffee, 150; livestock, 110.

## TUNIS.

(AFRIKIYA; TUNISIA.)

**Boy.**—Sidi Mohammed al-Amin, born September 4, 1881, succeeded his cousin, Sidi Mohammed al-Mounsaf, May 15, 1943, after his abdication.

The reigning family of Tunis, occupants of the throne since 1705, descend from Hussein ben Ali, commonly believed to be a native of the Isle of Crete, who made himself master of the country, acknowledging, however, the suzerainty of the Sultan of Turkey.

**Government.**—After the French invasion of the country in the spring of 1881, the treaty of Kassar-Said (May 12, 1881), confirmed by convention signed June 8, 1883, placed Tunis under the protectorate of France. The government is carried on under the direction of the French Foreign Office, which has a special department for Tunisian affairs, under the control of a French Minister Resident-General, who is also Minister of Foreign Affairs, and a ministry of 11 heads of departments, 8 of the ministers being French and 3 Tunisian. The country is divided into 19 districts (contrôles civils), and 6 military circles; the district governors (contrôleurs) are French; the subordinate officials (Caid, Kahias and Sheiks) are native. French tribunals administer justice between subjects of European powers, and also between them and natives; there are native courts for cases between natives (tribunaux at Ouzara and Charaâ). In 1914, the Tunisian penal law was codified. French administration in Tunis has been confirmed by conventions with all the European Powers regulating the status and the conditions of trade of their respective citizens within the regency.

**French Resident-General.**—General Charles Mast (appointed May 10, 1943).

**Area and Population.**—The present boundaries are: on the north and east the Mediterranean Sea, on the west the Algerian province of Constantine, and on the south the great desert of the Sahara and Libya. The area is about 48,300 English square miles, including that portion of the Sahara which is to the east of the Djerid, extending towards Gadamès.

According to the census held on March 12, 1936, the total European population was 213,205, composed of 108,068 French (exclusive of the army of occupation and of the navy), 94,289 Italians, 7,279 Maltese, 323 Spaniards, 454 Greeks, and 2,792 other foreigners. The total native population, according to the census held on March 12, 1936, was 2,395,108, of whom 2,335,623 were Arabs and Bedouins, and 59,485 Jews. Grand total was 2,608,313.

The capital, the city of Tunis, had, in 1936, a population of 219,578, of whom 93,356 were Moslems, and 27,345 Jews, besides 42,678 French, 49,878 Italians, 4,890 Maltese, and 1,467 other Europeans. By means of the channel, which was opened in 1893, Tunis is directly accessible to ocean-going vessels. Other towns are Sfax with 43,333 inhabitants; Bizerta with

28,468 (11,257 Europeans); Sousse with 28,465; Kairouan, the Holy City of the Moslems, with 22,991 natives exclusively; Gabes with 18,611 inhabitants; Moknine with 14,205 natives exclusively; Nefta with 13,619 natives exclusively, and Ferryville with 6,330 inhabitants (5,864 Europeans).

The bulk of the population is Moslem under the Sheik-ul-Islam, and the revenue from the 'Habus' lands, like that from the 'Wakf' lands in Egypt, is applied to religious, educational, and charitable purposes. There are about 200,000 Roman Catholics, under the ministrations of the Archbishop of Carthage, and about 125 other clergymen. The Greek Church (400), the French Protestants, and the English Church are also represented, and there are 30 English Protestant missionaries at work.

**Education.**—Within the regency there are (1937) some 492 public schools, including 8 lycées and colleges, and 35 private schools (of which 6 Jewish schools are provided for by the Government). In the schools there are 96,520 pupils, of whom 63,622 are boys. Of the total number of pupils, 23,335 are French and 7,847 Italian. In the Great Mosque at Tunis there is a Moslem university. In the city are 78 and in the interior 1,254 Moslem primary schools, some of them assisted by Government funds. 16 Moslem apprenticeship-schools have been created during the last few years, embracing 990 native pupils.

**Finance.**—Receipts and expenditure for 5 years :—

|             | 1936        | 1937        | 1938        | 1939        | 1940        |
|-------------|-------------|-------------|-------------|-------------|-------------|
|             | Francs      | Francs      | Francs      | Francs      | Francs      |
| Revenue     | 541,677,400 | 611,319,700 | 704,151,400 | 802,631,060 | 811,198,000 |
| Expenditure | 541,664,861 | 611,191,652 | 704,061,680 | 802,535,002 | 810,954,000 |

At the end of 1937, the Tunisian public debt amounted to 1,009,593,000 francs. The yearly charge for interest, together with sinking fund, 44,180,000 francs.

**Defence.**—The army of occupation consisted of 25,000 men, including 1,145 officers. There were also native regiments (*tirailleurs* and *spahis*), and the Foreign Legion.

**Production and Industry.**—Tunis may be divided into five districts—the north, characterised by its mountainous formation, having large and fertile valleys (e.g., the valley of the Medjerdah, and the plains of Mornag, Mateur, and Beja); the north-east, with the peninsula of Cap Bon, the soil being specially suited for the cultivation of oranges, lemons, and citrus fruits; the Sahel, where olive trees abound; the centre, the region of high table lands and pastures; and the south, famous for its oases and gardens, where dates grow in profusion. The chief industry is agriculture, and large estates predominate. Of the total area of nearly 31 million acres, about 22½ million acres are productive in the following proportions: 32·6 per cent. arable; 11·28 per cent. forests; 4·4 per cent. orchards and vineyards; 1·1 per cent. meadow and grass land; 50·5 per cent. common and uncultivated. The production of wheat in 1938 was 374,670 tons; of barley, 100,000 tons; of oats, 30,000 tons. In 1938 the wine yield was 43,068,304 gallons. Olives are cultivated on a large scale. In 1938 the yield was 25,000 metric tons of oil. Production of dates in 1938 was 25,400 metric tons. Other products are almonds, oranges, lemons, shaddockes, pistachios, alfalfa grass, henna, and cork. Considerable areas of agricultural land have been acquired either on lease or by purchase by immigrants.

The principal exports in 1938 were (in millions of francs), wines, 2,900 (2,700 to France); cereals, 280 (270 to France); sheep, 142 (130 to France); olive oil, 185 (123 to France); phosphate, 44; esparto, 75; spirits, 138. In 1941 the principal exports (in 100 lbs.) were: grain, 1,780,000; dates, 207,000; figs, 55,000; citrus fruit, 55,000; vegetables and fruit, 1,130,000.

In 1938 the receipts of the customs authorities amounted to 371,547,275 francs and in 1937 to 311,602,317 francs.

Total trade between the United Kingdom and Algeria (Board of Trade returns) for 5 years:—

|                                 | 1934      | 1935      | 1936      | 1937      | 1938      |
|---------------------------------|-----------|-----------|-----------|-----------|-----------|
|                                 | £         | £         | £         | £         | £         |
| Imports from Algeria into U.K.  | 1,675,687 | 1,721,064 | 2,218,062 | 2,412,983 | 2,900,370 |
| Exports to Algeria from U.K.    | 962,845   | 924,682   | 822,587   | 825,684   | 1,016,818 |
| Re-exports to Algeria from U.K. | 8,434     | 2,404     | 2,961     | 1,781     | 3,249     |

### Shipping and Communications.

In 1938, 3,956 ships of 7,163,459 tons entered the ports of Algeria, discharging 3,925,179 tons of merchandise, and 4,540 ships of 7,920,844 tons cleared after loading 7,290,377 tons of merchandise.

In 1937 the Algerian merchant fleet consisted of 13 vessels over 2,000 tons, 5 between 1,500 and 2,000, and 1,062 below 1,500 tons, with a total tonnage of 76,746 tons.

There were 31 national roads in 1938, with a length of 4,347 miles, 41 miles of Departmental roads, 8,055 miles of main roads and 18,333 miles of by-roads.

On January 1, 1939, there were 2,784 miles of railway open for traffic (exclusive of lines on Tunisian territory), the railway receipts (1938) amounting to 336,859,080 francs. There is a regular postal and passenger air service between Algiers and Marseilles (800 kilometres), and a postal air service between Algiers and Brazzaville in the French Congo and between Oran and Elizabethville in the Belgian Congo. There is also a passenger air service locally between Algiers and Oran and Algiers and Tunis.

The postal receipts in 1938 were 52,882,322 francs, and there were 763 post offices on December 31, 1938. The telegraphic receipts were 19,757,420 francs, and those from telephones 46,939,951 francs. Postal traffic in 1937 was as follows: ordinary postal packets, 84,523,478 inland service (France and Colonies); 2,630,445 international service. In 1938, 2,045,978 private telegrams were sent, and 2,626,979 received; on transit service there were 216,737; official telegrams sent and received totalled 311,729.

There were on January 1, 1939, 34,351 telephone subscribers, 957 public telephone offices, and 29,246 miles of inter-urban line. Number of conversations in 1938, 25,878,216.

Postal cheque accounts were opened at Algiers on February 1, 1921, and on December 31, 1938, there were 24,401 accounts, with a total balance of 178,221,068 francs.

### Banking, Money, Weights and Measures.

The Bank of Algeria is a bank of issue, with a capital of 20,000,000 francs. By the law of April 9, 1932, its note circulation was limited (as a temporary measure) to 3,000 million francs. Several co-operative agricultural

banks, assisted by Government funds, are in operation. Barclays Bank (Overseas), Ltd., have branches at Algiers and Oran.

The money, weights and measures of France only are used.

In 1937, the farm animals were:—horses, 109,787; asses, 156,554; mules 56,615; cattle, 507,802; sheep, 3,382,894; goats, 1,672,352; camels, 144,762; pigs, 29,247.

Principal mineral is phosphate, the output of which is increasing yearly. Mineral output in 1939 (in metric tons):—lead ore, 28,280; iron ore, 764,781; phosphate rock, 1,608,045; zinc ore, 903; pig lead, 23,403.

Native industries are the spinning and weaving of wool for garments, carpet weaving, leather embroidery, saddle making, the manufacture of slippers, pottery (in ancient style), and matting; tanning and silk weaving are declining.

The fisheries are principally in the hands of Italians and Tunisians. In 1937, 3,130 boats (5,731 tons) were engaged in this industry, with a total of 10,820 men. The catch in 1937 amounted to 11,556 tons, valued at 84,483,000 francs. Sponge fishing is also carried on—production in 1937 was 106,205 kilos.

**Commerce.**—The imports and exports for 5 years (in thousands of francs, were as follows:—

|               | 1935                      | 1936                      | 1937                      | 1938                      | 1939 <sup>1</sup>       |
|---------------|---------------------------|---------------------------|---------------------------|---------------------------|-------------------------|
| Imports . . . | 1,000 francs<br>1,280,894 | 1,000 francs<br>1,018,608 | 1,000 francs<br>1,824,812 | 1,000 francs<br>1,559,000 | 1,000 francs<br>849,131 |
| Exports . . . | 772,255                   | 846,944                   | 1,140,876                 | 1,353,000                 | 752,408                 |

<sup>1</sup> Figures are for January to June, 1939. Later statistics have been suspended.

Exports of phosphate rock, 1938, 1,591,239 tons; 1939, 1,902,841 tons.

Total trade between Tunis and the United Kingdom (according to Board of Trade returns) for 5 years was:—

|                                 | 1934     | 1935        | 1936        | 1937        | 1938        |
|---------------------------------|----------|-------------|-------------|-------------|-------------|
| Imports from Tunis into U.K. .  | £ 92,724 | £ 1,108,953 | £ 1,205,531 | £ 1,813,102 | £ 1,656,576 |
| Exports to Tunis from U.K. .    | 191,586  | 223,770     | 231,032     | 275,668     | 272,433     |
| Re-exports to Tunis from U.K. . | 87,203   | 13,485      | 8,294       | 18,941      | 2,981       |

**Communications.**—In the year 1937, there entered the ports of the regency 7,011 vessels of 4,735,325 tons, and cleared 7,005 vessels of 4,737,446 tons.

In 1935 there were 4,155 miles of roads, of which 1,915 miles were main roads, 884 miles second-class roads, and 1,356 miles local roads.

In 1936 there were 1,293 miles of railways, of which 1,000 belonged to the State, and 293 miles to the Cie. des Phosphates (Sfax-Gafsa system). The State railways in 1936 carried 2,694,000 passengers and 1,870,000 tons of goods, and the Sfax-Gafsa system 163,000 passengers and 1,928,000 tons of goods.

There were in 1937, 3,718 miles of telegraphs; 285 telegraph offices, and 14 wireless transmitting stations. The telephone systems had 13,278 miles of subscribers' lines and 19,030 miles of inter-urban lines in 1935, the number of subscribers being 12,792. There were in 1936, 178 post offices. There were 7,206 savings accounts in the Postal Savings Bank in 1936, deposits at the end of that year standing at 153,000,000 francs.

**Money, Weights and Measures.**—In 1937 there were 13 banks operating in Tunis, including the Banque de Tunisie and Banque d'Algérie. The note circulation on October 31, 1939, was 982,163,710 francs.

The legal coinage since 1892 consists of pièces similar to the French, the pieces being coined in France. New silver coins of 5, 10, and 20 francs were introduced in February, 1935.

The ounce = 31.487 grammes; the multiples of the ounce are the various denominations of the *Rottolo*, which contains from 16 to 42 ounces.

The *kafis* (of 16 *whibas*, each of 12 *sabs*) = 16 bushels.

The principal measure of length is the *pik*: the *pik Arbi* for linen = 5892 yd.; the *pik Turki* for silk = 7058 yd.; the *pik Andouli* for cloth = 7094 yd.

French weights and measures have almost entirely taken the place of those of Tunis, but corn is still sold in *kafis* and *whibas*.

### FRENCH EQUATORIAL AFRICA.

French Equatorial Africa extends along the Atlantic coast between the Cameroons and the territories of the Belgian Congo, with the exception of the Spanish territory on the coast from the Muni river on 1° N. lat. to the Cameroons, and inland to the meridian of 11° 20' E. of Greenwich, and the Kabinda region, which is Portuguese. Inland it is bounded by the Congo and Ubangi rivers and stretches northwards to the Bahr-el-Ghazal and Lake Chad. French acquisition began on the Gabun river in 1889; Libreville was founded in 1848; Cape Lopez was gained in 1862, and the French possessions extended along the coast for about 200 miles. Since then the territories have been increased by exploration and military occupation and their limits have been defined in a series of international conventions. The boundary between French

Equatorial Africa and the Anglo-Egyptian Sudan was fixed by a protocol signed on February 28, 1924.

By decree of January 15, 1910, the French Congo was divided into three territories which form three colonies, viz.:—the Gabun Colony (capital Libreville), the Middle Congo Colony (capital Brazzaville), and the Ubangi-Shari Colony (capital Bangui). The Chad Territory, which was formerly a dependency of the Ubangi-Shari Colony, was, by decree issued on March 17, 1920, made a separate colony. It extends from Lake Chad across the Eastern Sudan and includes Wadai. Capital, Fort Lamy.

By decrees issued on January 15, 1910, the name of the French Congo was changed into French Equatorial Africa.

By a decree of June 30, 1934, French Equatorial Africa was constituted a single administrative unit under the rule of a Governor-General, who is assisted by an administrative council, and a Secretary-General, who acts as his deputy in the Governor-General's absence. The headquarters of the Governor-General are at Brazzaville.

The area is 959,256 square miles, containing a native population which at the census of August 1, 1943, numbered 3,724,710; the Europeans numbered 6,099. The area and population of the separate colonies are shown as follows as at August 1, 1943 :—

| Colony                 | Area in square miles | Europeans | Natives   |
|------------------------|----------------------|-----------|-----------|
| Gabun . . . . .        | 91,218               | 1,376     | 408,476   |
| Middle Congo . . . . . | 166,069              | 2,481     | 738,291   |
| Ubangi-Shari . . . . . | 238,767              | 1,179     | 946,187   |
| Chad . . . . .         | 461,202              | 1,063     | 1,531,806 |
| Total . . . . .        | 959,256              | 6,099     | 3,524,710 |

Under the system of government introduced by the decree of June 30, 1934, there is only a general budget for the whole of French Equatorial Africa. The budget for 1944 balanced at 600,000,000 francs.

In the colony there were in 1944, 127 native schools with 13,834 pupils, and 42 European teachers with 340 native assistants. Private schools in 1944 numbered 133 with 14,858 pupils, and 42 European teachers with 374 native assistants. These schools are run by the religious missions. Since 1941 private schools receive Government grants.

The resources of French Equatorial Africa are quite undeveloped. There are about 300,000 square miles of tropical forest extending to the Gabun coast, containing many species of trees of industrial value. Wild rubber is the most important. Palm oil and coconuts are produced to some extent. Coffee, cacao, cotton, peanuts and sisal are also cultivated, and beeswax, copal and karite butter produced. In the Chad Colony large numbers of cattle, sheep, asses, camels, horses and ostriches are raised, but there are no facilities for export. Ivory is an important article of export. Copper, zinc, gold, lead, diamonds, corundum and tantalum are found.

Imports into French Equatorial Africa in 1942 totalled 106,307 metric tons, valued at 778,358,000 francs, and exports 82,746 metric tons, valued at 469,314,000 francs.

The principal industries are centred in a tapioca factory, an oil refinery, a tannery and a match factory.

The main ports are Port Gentil, Libreville and Pointe-Noire (also the largest aerodrome in the colony). At Loango steamers have to anchor about three miles off the coast. Whale fishing commenced in 1922.

On February 6, 1921, a new railway was started to connect Brazzaville with the Atlantic at Pointe-Noire, a distance of 318 miles, and was completed in 1930. Length of roads in 1944, 8,750 miles.

A river port is under construction at Brazzaville, to facilitate traffic between the Congo and the railway.

The Central African telegraph line connects Brazzaville with Pointe-Noire, the terminus of the French cable from Brest via Dakar and Libreville, and is in communication with the English Atlantic cable. Several wireless lines connect Brazzaville with the rest of the colony and numerous radio stations have been constructed in the main post offices of the interior. Radio Brazzaville, built in 1942, with its 50 kilowatts capacity, is one of the most powerful stations in the world, and broadcasts in about a dozen languages. The total length of telegraph line in operation is about 3,253 miles.

On the north-east of Lake Chad is the state of Kanem, which came under French control in 1903, and is now only a district of the Colony of Chad with Maô for its capital. Wadai, to the east of Kanem, with an area of about 170,000 square miles, and a semi-civilised population, accepted the French Protectorate in the summer of 1903. In 1911 a French force occupied Arada, some miles to the north of the capital, Abeshir, which had caravan communication with Benghazi, on the coast of Tripoli, and in 1913 Ain-Galakka was occupied.

The principal banks are Banque de l'Afrique Occidentale, Banque Commerciale Africaine and Banque Belge d'Afrique.

### MADAGASCAR.

Madagascar was originally discovered by the Portuguese, Diego Diaz, in 1500. On the return of Diaz to Portugal the King concluded that the island must be Madagascar, about which he had read in Marco Polo's 'Voyages.' Polo, however, had not been there, but believing his Arab informants, ascribed to an island what was really the kingdom of Mogadisho, on the east coast of Africa. Mispronouncing and mis-spelling the name, he coined the word Madagascar, by which name it has been known ever since. For the next two hundred years the island was prominent chiefly as a pirate refuge. John Plaintain for example lived there from 1720 to 1725, and so successfully

### Finance.

The local revenue of Madagascar is derived chiefly from direct taxation (including a poll tax and taxes on land, cattle, and houses), from customs and other indirect taxes, from colonial lands, from posts and telegraphs, markets, and miscellaneous sources. The chief branches of expenditure are general administration, public works, health services, education, the post office, and the public debt. The budget estimates for the calendar year 1943 balanced at 495,644,000 francs.

At December 31, 1938, the contracted debt of the colony amounted to 823,866,684 francs (principally for public works).

### Defence.

In peace time the troops in Madagascar (including the forces at Diégo-Suarez) consist of 1,580 Europeans and 3,720 natives. The police and militia, consisting of 4,400 natives, are maintained on the local budget.

### Production and Industry.

In 1896, on the completion of the French occupation of the Island, the Malagasy system of land tenure was modified on the model of the Torrens Act of Australia. Since then, a decree issued in 1926, specifies that the French State is presumed to be the owner of any land not under cultivation, exploited nor put under registration. And in 1929 there was issued a new regulation concerning the native property and providing reserved zones for the local communities. The principal crops are rice, sugar-cane, coffee, manioc, maize, cacao, vanilla, tobacco, butter beans, lima beans, and cloves. The area under cultivation in 1938 was as follows:—rice, 1,319,250 acres; manioc, 558,100 acres; maize, 218,162 acres; sweet potatoes, 296,400 acres; haricot beans, 75,230 acres; potatoes, 29,640 acres; coffee, 230,080 acres; vanilla, 55,840 acres; sugar-cane 43,401 acres. The forests contain many valuable woods, while caoutchouc, gum, resins, and plants for tanning, dyeing and medicinal purposes abound.

Cattle breeding and agriculture are the chief occupations of the natives. There were on December 31, 1936, 6,000,000 cattle in the island.

Silk and cotton weaving are carried on, and the working of metal and the making of panama and other straw hats. The preparation of sugar, rice, soap, tapioca, etc., is being undertaken by Europeans, as well as the canning of meat. There are large meat-preserving factories at Bo-anamary (Majunga), Diégo-Suarez, Tamatave, Antananarivo and Antsirabe.

The value of the total output of minerals in 1938 was 50,700,000 francs, graphite (14,400 tons) accounting for 18,500,000 francs, and mica (677 tons) for 14,600,000 francs. The production of phosphates (5,692 tons) was valued at 668,000 francs. The production of precious stones in 1938 was valued at 996,000 francs. Madagascar also produces gold, rock-crystal, agate and corundum.

### Commerce.

The trade of Madagascar has been as follows in five years:—

|               | 1936        | 1937        | 1938        | 1939        | 1940        |
|---------------|-------------|-------------|-------------|-------------|-------------|
|               | Francs      | Francs      | Francs      | Francs      | Francs      |
| Imports . . . | 300,149,000 | 467,786,000 | 602,710,000 | 641,378,246 | 368,758,903 |
| Exports . . . | 438,298,000 | 589,742,000 | 819,397,000 | 756,097,807 | 616,501,638 |

France supplies the bulk of the imports (460,166,354 francs in 1938), and that country also receives the bulk of the exports (647,925,085 francs in 1938).

According to Board of Trade returns, the imports from Madagascar into Great Britain in 1938 amounted to 523,771*l*., and in 1937 to 431,184*l*., and the exports from Great Britain amounted to 70,999*l*. in 1938 and 105,988*l*. in 1937. Re-exports to Madagascar from U.K. were 2,022*l*. in 1938, and 3,631*l*. in 1937.

### Shipping and Communications.

Tamatave, the principal seaport of the island, is visited by the steamers of two French shipping companies, and the principal ports are connected with each other by coasting steamers plying regularly. In 1938, 7,364 vessels of 4,306,309 tons entered and 7,287 vessels cleared at the ports of Madagascar. Of the total vessels entering, 6,154 were French and 837 were British; and of those clearing, 6,068 were French and 846 British.

At the end of 1938, there were about 16,000 miles of roads suitable for motor traffic in the dry season. Four railways are at present worked in Madagascar. The first is the through railway line between Antananarivo and Tamatave (229 miles) which was opened for traffic on March 9, 1913. The second is the railway between Antananarivo and Antsirabe (noted for its thermal springs), 99 miles south of Antananarivo, opened for traffic on October 15, 1923. The third is the branch line of the Tamatave railway, from Moramanga to Lake Alaotra in the Antsahanaka Districts, towards the north of the island, which was opened for traffic in October, 1917, a distance of 105 miles. The fourth a new line from Fianarantsoa to the east coast of the island (101 miles) was opened to traffic on April 1, 1936. Total railway mileage on that date was 534 miles. There is also a motor-car service with a network of routes covering more than 1,375 miles.

Before the world war there was a regular weekly air service by the Régie Air-Afrique between Antananarivo and Paris and vice versa, both for mails and passengers. Two air lines serve the interior of the island, but for mails only.

There is postal communication throughout the island. There were in 1939, 188 ordinary post offices and 431 rural offices. The telegraph line has a length of 10,008 miles. There is cable communication to Mauritius, Réunion and Aden. In 1939 there were 8,510 miles of urban and inter-urban telephone line, and 36 Government wireless telegraph stations. The important wireless station at Antananarivo, forming part of the French inter-colonial network of wireless stations, was opened towards the end of 1924.

### Money and Banks.

By the decree of December 22, 1925, a Bank of Issue was established—the Bank of Madagascar, with a capital of 20 million francs. It has a branch at Antananarivo and agencies at Diégo-Suarez, Fianarantsoa, Majunga, Mananjary, Nossi-Bé, Tamatave and Tuléar. The Comptoir National d'Escompte de Paris has agencies at Antananarivo, Tamatave, Nossi-Bé, Morondava, Diégo-Suarez, Mananjary, Majunga and Tuléar. The Crédit Foncier de Madagascar is also established in the island. On January 1, 1920, a Savings Bank was established.

The monetary system is the same as that of France.

### MAYOTTE AND THE COMORO ISLANDS.

The archipelago of the Comoro Islands is formed by the islands of Mayotte, Anjouan, Grande Comore and Moheli. Before 1912, only Anjouan was a colony, but by a law of July 25, 1912, and a decree of February 23,

1914, the whole archipelago has become a colony, attached to the general government of Madagascar, of which it forms a Région under the command of a Superior-Administrator.

British forces occupied Mayotte on July 2, 1942.

In 1936, the combined population was 128,608, including 451 French and 249 foreigners.

The island of Mayotte (140 square miles) had a population (1936) of 17,477. The chief product was formerly sugar-cane, but the cultivation of vanilla has been considerably extended in recent years. There are now only two sugar works and two distilleries for rum. Besides vanilla and sugar-cane, cacao, aloes and perfume plants (citronella, ylang-ylang, patchouli, etc.) are cultivated.

Grande Comore, Moheli, Anjouan, and a number of smaller islands, have an area of about 650 square miles and population in 1936 of 111,131. Grande Comore itself is about 40 miles long and 18 miles at its broadest points. Vanilla, cacao and perfume plants are cultivated. Grande Comore has a fine forest and exports timber for building and for railway sleepers.

The principal imports are cotton fabrics, metals, and rice; the principal exports, sugar, copra, sisal, and vanilla.

The other dependencies surrounding Madagascar are the islands: Europa, Juan de Nova, Barren, Bassas da India, Glorieuses. Then half-way between Cape of Good Hope and Australia lie Amsterdam and St. Paul, also the archipelago of Kerguelen, whaling and fishing stations, and near the Antarctic pole Crozet islands and Terre Adélie. Amsterdam, St. Paul, Kerguelen, Crozet and Terre Adélie were made dependencies of Madagascar by decrees of March 26 and November 27, 1924.

## RÉUNION.

Réunion (or Bourbon), about 420 miles east of Madagascar, has belonged to France since 1643. It is administered by a Governor assisted by a Privy Council, and an elective Council-General, and is represented in the French Parliament by a Senator and two Deputies. It has an area of 970 square miles and a population (1941) of 220,955, of whom 214,382 were French; there were also 1,404 British Indians, 572 natives of Madagascar, 113 Africans, 3,858 Chinese. The chief towns are: St. Denis, with 32,637 inhabitants in 1941; St. Paul, 23,055; St. Louis, 20,867; St. Pierre, 20,150. The towns are under the French municipal law. Réunion has a lycée with (1943) 25 teachers and 768 pupils, and a secondary school for girls with (1943) 6 teachers and 253 pupils. Primary education is given at St. Denis in two schools, one for boys with 350 pupils and 14 teachers, and one for girls with 900 pupils and 21 teachers. There are besides three infant schools under State supervision, and three private establishments. In the rest of the island, primary education is given in 192 schools by 466 teachers, and in 43 private schools. The number of pupils attending school in the island is (1943) 22,900. There is a teachers' training course at the lycée attended by 71 pupils with 4 teachers. The chief port, Pointe-des-Galets, is connected by a coast railway of 80 miles with St. Benoit on the one hand, and St. Pierre on the other. The chief productions are sugar (62,000 acres), rum, manioc (12,000 acres), tapioca, vanilla, essences. The forests occupy about 150,000 acres. The production of spirits (expressed as 100 per cent. alcohol) in 1943 amounted to 46,700 hectolitres (1,377,777 gallons) in industrial distilleries. The sugar production in 1943 was 24,762 metric tons. Total value of imports in 1943, 181,674,000 francs; of exports,

18,923,000 francs. The chief imports are rice (valued at 12,468,638 francs in 1943), grain, cotton goods (4,185,387 francs in 1943); the chief exports are sugar (3,634 metric tons valued at 9,227,287 francs in 1943) and spirits (6,768 hectolitres valued at 5,119,491 francs in 1943). U.K. imports from Réunion in 1938 (Board of Trade figures), 27,569t. and 39,816t. in 1937; exports to Réunion, 20,951t. in 1938, 40,560t. in 1937; re-exports from U.K. 114t. in 1938 and 319t. in 1937. In 1943, 50 vessels entered and cleared at the ports of the island. The Tamatave-Réunion-Mauritius telegraph cable is open for traffic. The wireless station is also open for public traffic. There are 44 post offices and 54 central telephone offices. The budget for 1937 showed 61,620,700 francs for receipts and expenditure. The currency of Réunion consists of local bank notes and token nickel coinage. It has nominally the same value as that of France. The Bank of Réunion has a capital of 6 million francs.

Fighting French troops landed in Réunion on November 29, 1942.

Governor.—Jean Capagorry.

waged war against the chiefs of the various tribes, mostly in the south, that he proclaimed himself King of Madagascar.

In the period 1800 to 1883 the most important sovereign was King Radama I, who was followed by Queen Ranaivalo I, who reigned for 36 years; she died in 1861 and was succeeded by Ranaivalo II.

The last native sovereign of Madagascar, Ranaivalona III (born 1861, died 1916), succeeded in 1883. The French having claimed a portion of the north-west coast as having been transferred to them by local chiefs, hostilities were carried on in 1882-84 against the Hovas, who refused to recognise the cession. In 1885 peace was made, Diégo Suarez having been surrendered to France. A French Resident-General was received at the capital, and the foreign relations of the country were claimed to be regulated by France. By the Anglo-French agreement of August 5, 1890, the protectorate of France over Madagascar was recognised by Great Britain; but the Native Government having refused to carry out the clauses of the treaty of 1885, a French expedition was despatched in May, 1895, to enforce the claims of France, and on October 1, the capital having been occupied, a treaty was signed whereby the Queen recognised and accepted the protectorate. By a unilateral convention made in January, 1896, Madagascar became a French possession, and by law promulgated August 6, 1896, the island and its dependencies were declared a French colony.

On May 5, 1942, British forces landed in Madagascar in order to forestall the seizure of the island by the Japanese. On September 23, 1942, British forces entered the capital and an armistice was signed on November 5.

### Government.

*Governor.—M. de Saint Marc.*

A Consultative Council of Administration has been established at Antananarivo, and there is also at Antananarivo an Economic and Financial Delegation, consisting of a French section and a native section. The former is composed of delegates, French citizens, from each region and from the Archipelago of the Comoro Islands, elected for two years by the Chambers of Commerce; of French citizens representing the elected members of the Municipal Councils; of one member, not an official, appointed by the Superior-Administrator of the Comoro Islands. The native section consists of twenty-four members, who are elected by the heads of the villages, representing the different racial groups, in addition to a native delegate from the Archipelago of Comoro. These delegations meet once a year in ordinary session to examine the budget and questions of an economic and financial nature and can be convoked in extraordinary session by the Head of the Colony. Between sessions there is a permanent commission composed of eight French delegates and eight native delegates.

The territory of Madagascar is divided into 8 regions (not including the Comoro Islands); 90 districts and 51 controlled posts. Natives are employed to a large extent in subordinate positions both in the civil and military administration. In all parts of the island the natives are allowed to choose chiefs who represent them in their relations with the Government.

### Area and Population.

Madagascar is situated to the south-east coast of Africa, from which it is separated by the Mozambique Channel, the least distance between island and continent being 240 miles; its length is 980 miles; greatest breadth, 360 miles, and it has a coast line of over 3,000 miles. The area is estimated at 241,094 sq. miles. According to the last census (July 1, 1936) the popu-

lation (including that of the Mayotte and Comoro islands) was 3,797,986 (15·7 per sq. mile), of whom 3,758,388 were Malagasy, 25,255 were French and 14,843 foreigners, including Europeans and others.

The Malagasy races or tribes are very numerous, the more important being the Hova (877,735), the Betsileo (515,880), the Betsimisaraka (587,124), the Tanala (184,085), the Antandroy (162,170), the Sakalava (233,773), and the Bara (176,103). Hindus, Chinese, Arabs, and other Asiatics carry on small retail trade. The most intelligent and enterprising tribe is the Hova or Merina, whose language, allied to the Malayan and Oceanic tongues, is understood over a large part of the island.

The slave trade was nominally abolished in 1877; slavery in Imerina and in all parts under French authority was abolished by proclamation on September 27, 1896. The system of forced labour in the public service was abolished on January 1, 1901, but the personal tax due from 17 to 60 years of age, formerly 5 francs, has been increased to 50 or 60 francs according to the districts. The populations of the chief towns were, in 1936, the capital, Antananarivo, in the centre of the island 126,515 (6,440 French and 936 foreigners); Tamatave, 21,421 (2,955 French and 1,080 foreigners); Fianarantsoa, 14,740; Antsirabe, 18,215; Majunga, 23,684; Diégo Suarez, 12,287; Tuléar, 15,180; Morondava, 4,293; Fort-Dauphin, 10,283. The principal ports are Tamatave, on the east coast, Majunga on the north-west coast, Diégo-Suarez in the north, and Tuléar in the south-west.

In 1896, Diégo-Suarez (a French colony from 1885), the island of Nossi-Bé (area 130 sq. miles) on the west coast, and the island of Ste. Marie on the east coast (area 64 sq. miles), and in 1914 the Comoro Islands, were placed under the authority of the Governor-General of Madagascar.

### Religion, Education, Justice.

Up to 1895, a large portion of the Hova and of the other tribes in the central districts had been Christianised. The Christian population was estimated at 450,000 Protestants, and 150,000 Roman Catholics. There are many missionary societies at work, French (Catholic and Protestant), British (the London Missionary Society, the Friends' Mission, and the Anglican Mission); there is also a Norwegian Lutheran Mission and an American Mission. There are in the colony 1,867 Roman Catholic churches, 3,493 Protestant (high and low) churches and 75 mosques. The outlying tribes are still mostly heathen.

Education is compulsory from 6 to 14 years of age in the primary schools for European children and from 8 to 14 years of age in native first grade schools for native children. Instruction is given in secondary schools (Europeans and natives) and in higher grade schools (natives). On January 1, 1939, there were 1,011 official schools with 126,947 pupils and 2,012 teachers, and 706 private schools, with 94,232 pupils and 1,604 teachers. At Antananarivo there are a school of native medicine, a school of administration, including a special section for training natives for the various public services, a native industrial school, and an agricultural school. There are also two other agricultural schools, one at Ambatondrazaka, and the other at Ivoloia near Tamatave.

For the administration of French justice there are a court of appeal, 4 courts of first instance in the principal towns, and 4 justices of the peace with special powers at Fianarantsoa, Tuléar, Nossi-Bé and Mayotte; and 18 ordinary justices of the peace in the principal centres of the colony. For native justice there are tribunals in the districts, and the natives have the right of appeal from lower to higher tribunals. There are also arbitration courts for settling labour disputes.

### FRENCH SOMALILAND.

The colony of the Somali Coast is situated in the Gulf of Aden between British Somaliland and what was formerly Italian East Africa. The frontier starts from Loyada, on the coast, 23 kilometres east of Djibouti. It then passes by Djalelo, the Daguén Mountains, crosses the Addis Ababa railway at Kilometre 112, 6 to the south of the Daouenlé station, rejoins the Airoli Mountains, which on the south enclose the Gobad Plain, passes Lake Abbé, Lake Alii, the Daimoli Wells, the peaks of Agheno and Daddato and terminates at Cape Doumeirah, opposite Perim, on the Straits of Bab el Mandeb. It is administered by a Governor, assisted by an Administrative Council.

In 1888 a port was created at Djibouti, the seat of government since 1892.

The territory has an area of 23,500 square kilometres (9,071 square miles), and the native population was estimated at the census of July 1, 1944, at 40,100, of whom there were: Somali, 14,056; Arabs, 3,392; Danakils, 21,546. Djibouti has (1944) 10,421 inhabitants, of whom 627 are European (480 French).

There is one public school for elementary education and two private schools, one Catholic and one Arab. The local budget for 1944 balanced at 43,000,000 francs. Salt production is the only industry in the country. Salt has been mined since 1912; in 1943, 51,223 metric tons were exported; other minerals supposed to exist are: gypsum, mica, amethyst, sulphur and petrol. The chief imports are cotton yarns and cotton goods, cattle, coal, sugar; the chief exports were coffee, hides and salt. The total imports in 1943 amounted to 192,000,000 francs and the total exports to 157,000,000 francs. Transit trade in 1943 was valued at 400,000,000 francs. Part of the traffic between Abyssinia and the outer world passes through Djibouti, utilising the railway from Djibouti to Addis Ababa (496 miles). Trade with the United Kingdom in 1938 (Board of Trade figures):—exports to the United Kingdom 41,679l., imports from the United Kingdom 75,966l., re-exports from the United Kingdom 612l. In 1938 there entered at Djibouti 643 steam merchant vessels of 2,823,096 tons. Of these vessels, 192 were French, 91 English, 311 Italian, 15 Norwegian, 26 German, 1 Swedish and 2 Dutch.

Governor.—M. Chalvet.

### FRENCH WEST AFRICA AND THE SAHARA.

French West Africa comprises the following colonies:—(1) Senegal, (2) French Guinea, (3) the Ivory Coast, (4) Dahomey, (5) French Sudan, (6) Mauritania, (7) Niger, and (8) Circonscription of Dakar and Dependencies.

The approximate area and population of French West Africa in 1940 and 1941 are shown as follows:—

| Colony                           | Area (in Square Miles) | Population |            |
|----------------------------------|------------------------|------------|------------|
|                                  |                        | 1940       | 1941       |
| Senegal . . . . .                | 77,780                 | 1,692,873  | 1,723,068  |
| Guinea . . . . .                 | 96,886                 | 2,099,745  | 2,117,705  |
| Ivory Coast . . . . .            | 184,174                | 4,018,954  | 4,047,041  |
| Dahomey . . . . .                | 48,282                 | 1,883,670  | 1,424,220  |
| French Sudan . . . . .           | 581,966                | 3,754,799  | 3,794,270  |
| Mauritania . . . . .             | 323,810                | 347,438    | 866,858    |
| Niger . . . . .                  | 499,410                | 1,908,278  | 1,944,190  |
| Dakar and Dependencies . . . . . | 60                     | 140,787    | 165,188    |
| Total . . . . .                  | 1,815,768              | 15,386,044 | 15,582,535 |

In 1940 Europeans numbered 33,961 and 18,233 in 1941.

By decree of September 5, 1932, which came into force on January 1, 1933, Upper Volta ceased to be a colony; its territory and population were distributed as follows: to Niger, 27,290 square miles and 268,239 inhabitants; to French Sudan, 20,226 square miles and 713,167 inhabitants; and to Ivory Coast, 59,212 square miles and 2,018,837 inhabitants.

The principal tribes are the Ouolofs in Senegal (about 600,000, mostly Moslems); Bambaras and Mandingos in the Sudan (about 1,200,000); Peuls (Fulles) in the Sudan, Upper Volta, Niger and Guinea (about 2,000,000); the Mossi in the Upper Volta (about 1,300,000), and the Baoules, Agnins, Gouros and Krcumen on the Ivory Coast.

A treaty of October 19, 1906, determines the course of the Anglo-French boundary from the Gulf of Guinea to the Niger. The delineation of the boundary was completed in 1912, and approved by the two governments in 1914. The British government has leased to France for purposes of commerce two pieces of land, one on the right bank of the Niger between Lealaba and the confluence of the rivers Mousa and Niger, and the other on one of the mouths of the Niger, each to form one block of from 25 to 120 acres with a river frontage not exceeding 436 yards; the lease, at first, to be for 30 years. It is further stipulated that, within the boundaries indicated in the convention, British and French as regards persons and merchandise shall enjoy for 30 years the same treatment in all matters of river navigation, of commerce, and of tariff and fiscal treatment and taxes of all kinds.

Under the Anglo-French Convention of April 8, 1904, the river port of Yarbata on the Gambia (belonging to the British colony of Gambia), with all its landing places, was ceded to France, and, if this port should prove inaccessible to sea-going merchantmen, access to the river will be granted to France at an accessible point lower down. At the same time the Los Islands were ceded to France.

By a Convention between Great Britain and France the former recognised the right of France to all territory west of the Nile basin, which practically includes the whole of the Sahara (exclusive of the Libyan Desert), and the State of Wadai. The French Sahara may be roughly estimated at about 1½ million square miles.

Over the whole of French West Africa there is a Governor-General, who is assisted by a Council, the seat of the general government being

at Dakar. The Colonies, including the Circonscription of Dakar, are each under a Governor, all subject to the direction of the Governor-General, who has been relieved of the direct administration of any portion of his Government, and is free to devote the whole of his attention to directing and controlling the common interests of all the Colonies. To facilitate this object a General Budget has been created, drawn up by the Governor-General, which provides for all the services which are common to all the Colonies, particularly public works of general interest and social services, and the funds for which are provided by the customs and shipping dues of each of the Colonies, which have now only their internal revenues to depend upon for their local budgets, which have, however, been relieved of the cost of all the general services. There is also a unified transport budget annexed to the General Budget, covering the railways, the automobile services and the principal ports of French West Africa with the exception of Dakar, which has its own budget, and of such ports, the exploitation of which has been granted to private organisations.

There were in 1936-37, 806 rural schools with 24,931 pupils; 84 country schools with 21,941 pupils; 22 urban schools with 8,037 pupils; 7 higher primary schools with 582 pupils; 2 secondary schools (Dakar and Saint-Louis) with 843 pupils; 13 technical schools with 778 pupils; 7 'moderées' or Mussulman schools with 350 pupils. There were 78 private schools with 10,848 pupils. The expenditure on education was 27,367,000 francs in 1938.

The following are the financial estimates for 1943:—

|                   | General Budget | Local Budgets | Supplementary Budgets | Total         |
|-------------------|----------------|---------------|-----------------------|---------------|
|                   | francs         | francs        | francs                | francs        |
| Revenue . . .     | 1,422,000,000  | 968,285,500   | 627,583,000           | 3,017,818,500 |
| Expenditure . . . | 1,422,000,000  | 968,285,500   | 627,583,000           | 3,017,818,500 |

The imports into French West Africa are mostly textiles, fuel oil, mechanical implements, food substances and beverages; the exports from these colonies are chiefly fruits, oils and oil seeds, as well as cocoa, gold, timber, coffee and gum. The principal exports in 1942 were as follows (figures in parentheses representing value in thousands of francs):—ground-nuts, 81,485 tons (226,062); cocoa, 28,594 tons (123,380); palm-kernels, 41,669 tons (78,430); palm-oil, 7,803 tons (27,187); coffee, 19,984 tons (183,369); cabinet-wood, 7,966 tons (8,826); bananas, 762 tons (3,223); cotton-gins 3,522 tons (65,229); dried bananas, 5,647 tons (127,677); ground nut oil, 11,020 tons (85,74), and gum, 5,007 tons (46,992).

The following is a comparative table in thousand francs of the imports and exports during 1941 and 1942 for each of the colonies:—

| Colonies                                   | Imports    |              | Exports      |              |
|--------------------------------------------|------------|--------------|--------------|--------------|
|                                            | 1941       | 1942         | 1941         | 1942         |
| Sénégal, Mauritania and French Sudan . . . | 1,4 francs | 1,000 francs | 1,000 francs | 1,000 francs |
| French Guinea . . .                        | 8 018      | 1,331,034    | 906,452      | 540,285      |
| Ivory Coast . . .                          | 1 808      | 104,633      | 92,995       | 206,367      |
| Dahomey . . .                              | 1 370      | 233,387      | 435,906      | 598,407      |
| Niger . . .                                | 4 47       | 70,597       | 115,980      | 188,810      |
|                                            | 88         | 81,779       | 3,560        | 2,761        |
| Total . . .                                | 1,222 6    | 1,821,480    | 1,564,323    | 1,451,623    |

Of the imports, 882,432,000 francs in 1941 and 1,341,784,000 francs in 1942 were from France; of the exports, 1,237,713,000 francs in 1941 and 1,080,588,000 francs in 1942 went to France.

Total trade between Great Britain and French West Africa,<sup>1</sup> according to Board of Trade returns for three years, was as follows:—

|                                                | 1936      | 1937      | 1938    |
|------------------------------------------------|-----------|-----------|---------|
|                                                | £         | £         | £       |
| Imports from French West Africa into U.K. . .  | 246,141   | 329,089   | 397,506 |
| Exports to French West Africa from U.K. . .    | 1,724,007 | 1,695,253 | 756,353 |
| Re-exports to French West Africa from U.K. . . | 98,024    | 117,977   | 60,441  |

<sup>1</sup> Including French Equatorial Africa.

In 1937, 9,694 vessels of 13,332,000 tons entered and 9,564 of 13,170,500 tons cleared the ports of French West Africa.

There were (January 1, 1937) 2,458 miles of railway in operation; 8,314 miles of telephone line, with 1,356 subscribers, and 21,457 miles of telegraph line. In 1937 there were 273 post offices, divided as follows:—Senegal and Dakar, 60; French Sudan, 49; Guinea, 88; Ivory Coast, 51; Dahomey, 33; Mauritania, 17; Niger, 25.

A savings bank was established by a decree of July 22, 1920, and began to function on October 1, 1922, with a single office at Dakar. On January 1, 1938, there were 121 offices and 32,459 depositors with 51,035,000 francs to their credit. The Banque de l'Afrique Occidentale Française has the exclusive right to issue notes, up to 7,000,000,000 francs (law of May 2, 1943). It has branches at Dakar, Bamako, Conakry, Abidjan, Kotonou, Lomé and Kaolack. Its capital is 50,000,000 francs. The Banque Commerciale Africaine, Banque Nationale pour le Commerce et l'Industrie, Société Générale and Crédit Lyonnais are also important banking institutions in French West Africa. The use of French weights and measures, and money, is compulsory throughout French West Africa.

Governor-General of French West Africa.—Pierre Charles Cournaris (July 1, 1943).

The colony of Senegal was last reorganised by the decree of December 4, 1920. The capital is St. Louis, an old town founded in 1658 (population, 1942, 40,338). The other important towns are Kaolack (26,844), Diourbel (18,006), Thiès (32,769). By a decree of December, 1924, Dakar and its surroundings (including Gorée and Rufisque) were formed into a special territory called *circonscription de Dakar et Dependances*. There is one municipal commune, St. Louis.

The total area is 77,730 square miles, and the total population in 1942 was 1,751,368. The natives of the municipality and their descendants are French citizens, and other natives are French subjects.

The Colony is represented in the French Parliament by a deputy.

The Colony is administered by a Governor, assisted by a Colonial Council of 44 members. The Colony is divided into 11 'circles,' each under the rule of an administrator. The local budget for 1944 was 219,306,000 francs.

For elementary education there were, in 1944, 77 rural schools and 32 regional schools. There were also 10 urban schools at St. Louis, which give the same education as the French elementary schools, modified to suit local requirements, including a girls' elementary school (35 pupils), 2 teachers' training schools (60 students) and a school for apprentices (65 pupils). At

St. Louis a higher elementary school has 130 pupils, and a school for apprentices has 80 pupils. Total pupils in the elementary schools of the colony in 1943 was 13,444. Secondary education is provided at St. Louis (440 pupils in 1944). In 1944, 2,920,000 francs were provided for secondary education.

The soil is generally sandy. In 1944, there were 700,000 sheep and goats, 371,000 cattle, 47,700 asses and 31,800 horses. The natives cultivate ground-nuts (exports, 1943, 400,000 tons), millet, maize and some rice; other products are castor beans, some coco-nuts, gum from Mauritania, and rubber from the Casamance river. Ground-nuts form the bulk of the exports. A salt industry is being developed. Native industries comprise weaving, pottery, brick-making and jewellery; a small quantity of gold and titanium-bearing sand is produced.

Imports in 1938, 1,016,836,000 francs; exports, 708,812,000 francs (including Soudan). The chief imports are cottons, foodstuffs, metal-work and coal. The chief exports in 1938 were ground-nuts (522,350 tons), turtles, hides and skins, ground-nut oil, gums (5,000 tons).

The colony possesses 3,723 miles of telegraph and 1,824 miles of telephone lines. There are 2 French submarine cables, Brest-Dakar and Brest-Casablanca-Dakar. There are three other cables, one Spanish, one French West African, and the third belonging to a South American company.

One railway connects Dakar, Rufisque and St. Louis (165 miles) and Longa-Linguère; another one Thiès, Kayes and Bamako (French Sudan), 450 miles, with a branch to Kaolack and another to Touba.

There is a river service on the Senegal from St. Louis to Podor (140 miles) open throughout the year. During the rainy season ships of 14 to 15 feet draught can get as far as Kayes, 484 miles from Dakar. The Senegal river is closed to foreign flags. La Banque de l'Afrique Occidentale (established June 29, 1901, and reorganised by a law of January 29, 1929), with a capital of 50,000,000 francs, and reserve funds 17,500,000 francs, was founded for the purpose of carrying on financial, industrial, or commercial operations; it has a branch at Dakar, and an agency at Kaolack. La Banque Belge d'Afrique has an agency at Dakar. The Banque Commerciale Africaine has several agencies, as has the Banque Nationale pour le Commerce et l'Industrie. Including Dakar, there were, in 1937, 10 branches of the savings bank, with 10,571 depositors.

*Governor of Senegal.—M. Dagnin.*

*Governor of Dakar.—M. Mercadier.*

French Guinea lies on the coast between Portuguese Guinea and the British colony of Sierra Leone, and extends some considerable distance inland. The area is about 89,436 square miles, and the estimated population in 1943, was 2,096,000, including 5,000 Europeans. Conakry, with 10,000 inhabitants, is the capital; other important towns are Kankan, Kindia, Mamou, Kounoussa, Labé and Boke. A regular system of Government lay schools has recently been introduced all over French West Africa. The principal products are palm oil and nuts, rubber, millet, earth-nuts, rice, gum, bananas, pineapples, and coffee, which is grown in the Rio Nunez Fouta and military regions. There is an experimental garden at Camayenne near Conakry, where the culture of bananas, pineapples, rubber trees, and other plants is being tried. Fouta Djallon contains cattle in abundance. In 1939 there were 456,642 cattle, 87,905 sheep, 127,726 goats, 1,618 horses, 2,318 pigs and 579 asses. Gold is found in the river Tinkisso and in the Bouré and Siecke districts. Imports in 1938, 182,421,828 francs;

exports, 178,098,725 francs. The principal exports in 1938 were gold, 75,521,610 francs; hides, 4,610,023 francs; bananas, 57,964,602 francs; palm kernels, 20,912,125 francs; animal wax, 2,411,525 francs; orange oil, 7,269,238 francs. The principal imports in 1938 were cotton fabrics, 45,621,527 francs; metal goods, 15,402,207 francs; petrol, 6,534,889 francs; wines, 3,566,205 francs; motor cars, 7,516,588 francs; machinery, 5,143,078 francs; phosphatic fertilisers, 3,073,381 francs. In 1942 there were 5,297 miles of road, and 386 miles of railway. In the colony there were 2,200 miles of telegraph line and 593 miles of telephone line. The Colony is connected by cable with France and Pernambuco; also with Freetown, Monrovia, and Grand Bassam. There is a wireless station at Conakry affording communication with Dakar (Senegal), Bamako (French Sudan) and Grand Bassam (Ivory Coast). Conakry is visited regularly by the steamers of four French companies and one English company. The budget of the colony provided for 1942 the sum of 101,798,000 francs. In 1938 there were 23 branches of the savings bank with 3,755 depositors.

*Governor.—M. Fourneau.*

The Ivory Coast lies between Liberia and the British Gold Coast Colony. It has common frontiers with French Guinea, French Sudan, and French Niger. France asserted and obtained rights on the coast about 1842, but did not actively and continuously occupy the territory till 1882. On January 1, 1933, a portion of Upper Volta was added to the Ivory Coast. Area about 180,802 sq. miles; native population (1941 census), 4,090,617; Europeans, 9,451. The seat of administration, previously at Bingerville, has now been transferred to Abidjan (population 26,143, European 1,478). There is a central school group at Bingerville, and a number of Government schools in the districts. The chief ports, in respect of population and commerce, are Abidjan-Port-Bonnet, Grand-Bassam (population 5,743), Assinie (683), Grand Lahou (4,402), Sassandra and Tabou. Other important centres are Ouagadougou (16,595, of which 218 are Europeans), Bobo-Dioulasso (18,589, including 235 Europeans), and Bouaké 4,842, including 177 Europeans. The natives cultivate ground-nuts, maize, rice, millet, bananas, pineapples, and many other fruits. They have also been taught to grow cocoa, the export of which increased from an average of 4 tons in 1904-1908 to 48,064 tons in 1937, and 52,724 tons in 1938. The cultivation of cotton is being developed; coco-nuts and rubber are collected. The mahogany forests inland are worked. Gold is found near Grand-Bassam, in Baoulé, on the Comoé and Bia Rivers, in Indenié, and in Lobé. Manganese deposits have also been located. The imports in 1942 amounted to 282,159,000 francs, and the exports to 568,406,000 francs. Chief imports in 1942 were: cotton tissues, 80 tons; wines, 1,011 tons; metal work, 413 tons; automobiles, 111. Chief exports were: palm kernels, 2,801 metric tons; cacao, 28,591 metric tons; coffee, 19,798 metric tons; cabinet wood, 8,135 metric tons; bananas, 3,175 metric tons; cotton, 1,983 metric tons. Number of steam vessels entered in 1942: 74 of 403,955 tons, and cleared 689 vessels of 2,144,356 tons. From Abidjan, on the north side of the lagoon, a railway has been constructed, running between Abidjan and Bobo-Dioulasso (494 miles). There is also a railway connecting Abidjan and Port-Bonnet (7 miles), and between Bobo-Dioulasso and Ouagadougou (93 miles were opened on January 1, 1941). There is a large network of roads suitable for motor traffic, total length about 11,130 miles. At the end of 1938, there were 4,879 miles of telegraphic and 518 miles of telephonic lines. The telegraph connects the principal towns and extends to adjoining colonies. Telephonic

communication exists between Abidjan, Aboisso, Assinie, Bassam, Bingerville, Dabon, Lahou, and Tiassalé. There are six wireless stations in the colony. The budget of the colony for 1939 has been fixed at 183,087,000 francs. In 1938 there were 44 branches of the savings bank, with 3,999 depositors.

*Governor.*—A. Latrille.

Dahomey stretches from the coast between Togoland on the west and the British possessions of Lagos and Nigeria on the east, and is bounded on the north-east by the river Niger, and on the north by the colony of Niger. France obtained a footing on the coast in 1851, and gradually extended her power until in 1894 the whole kingdom of Dahomey was annexed. The colony has only about 70 miles of coast, but opens out northwards into a wide hinterland. The area is 43,232 sq. miles, and the population, in 1941, 1,424,220. The seat of government is Porto Novo (the chief business centre, near Cotonu the biggest port of the colony), which has 27,483 inhabitants. Village, regional, and urban schools are instituted under the new West African educational system. In 1935, 1,802,185 francs were spent on education. The natives are of pure Negro stock, and belong to the Fon branch of the Ewe family. They are industrious agriculturists in the coast region, and grow maize, manioc and yams. In 1935, there were 200,000 pigs; 100,000 sheep; 100,000 goats. The forests contain oil palms, which have been profitably utilized. These furnish the chief exports—kernels and oil. Cotton cultivation has recently been successfully introduced in the central provinces; coffee cultivation has given good results in the south provinces. Imports in 1938, 108,076,000 francs; exports, 114,180,000 francs. The principal exports (1938), were palm kernels, 39,909,000 francs; palm oil, 15,583,000 francs; cotton, 5,774,000 francs; maize, 22,280,000 francs; dried fish, 11,136,000 francs. The principal imports in 1938 were cotton goods, 15,500,000 francs; metal goods, 8,500,000 francs; tobacco, 9,000,000 francs; petrol, 6,500,000 francs.

A metalled road, called the East Road (297 miles in length), for motor traffic runs from Savé to Malenville on the Niger. There is also a road from Dassa-Zoumé to Porga (281 miles), called the North-west Road. Other roads are: Cotonu-Dassa-Zoumé-Savé (188 miles), Cotonu to Anecho (68 miles), Abomey to Ketou (75 miles). There are now altogether more than 2,711 miles of carriage road, of which 871 miles are first-class roads. At Cotonu an iron pier has been erected, and from that port a railway runs into the interior to Pankou (257 miles), with a branch line to Whydah and Segbourné on Lake Ahémé (36 miles). The gauge is a metre. A metre gauge railway has also been constructed from Porto Novo to Pobé (50 miles) along the Lagos frontier. Another line has been constructed from Grand-Popo to Lokossa along the Togoland frontier (30 miles). A new railway linking the capital with the port of Cotonu was opened to traffic on June 1, 1930 (22 miles). On January 1, 1935, a stretch of railway, 36 miles in length, was opened to traffic, connecting Tchaourou to Parakou. A telegraph line connects Cotonu with Abomey, Togoland, the Niger, and Senegal. In the colony there were (in 1934) 1,390 miles of telegraph line, and 625 miles of telephone line. In 1938, 379 vessels entered and cleared the ports of Dahomey. French coins only are in circulation. The budget for 1939 was 59,260,000 francs. In 1937 there were 25 branches of the savings bank, with 11,404 depositors.

*Governor.*—D'Astier de Pompignan.

The Colony of French Sudan was formed in 1904, from the Territories of Senegambia and the Niger, less the Senegal Protectorate, which was restored

to Senegal. Its old name of Upper Senegal-Niger was changed to French Sudan by decree of December 4, 1920. On January 1, 1933, a portion of Upper Volta was added to it.

The Colony is bounded on the north by the Algerian sphere; on the west by Mauritania, the Falmé river, and the frontier of French Guinea; on the south by the frontier of the Ivory Coast, and on the east by the Colony of the Niger. The area is 590,966 square miles, with a population of 3,794,270 in 1941.

The whole of the French Sudan is under civil administration, with the same judicial and educational systems as the other Colonies comprised in the Government General. The budget of the Colony for 1940 provided for 97,800,000 francs.

The following are the most important towns in the French Sudan with population in 1940 shown in parentheses: Bamako, the capital (32,761), Kayes (15,894), Sikasso (11,859), Ségou (8,391), Onahigouya (6,979), Gao (6,923), Timbuktu (6,432), Goundam (6,344), Dire (5,970), Djenné (4,969), Mopti (4,790). All the principal towns have regional or urban schools; Bamako has a professional school, a junior high school, a veterinary school and a school for artisans; there is a Mussulman superior school at Timbuktu with 30 pupils, called a *médresa* (official). In 1934 a similar institution was opened in Timbédra for sons of chiefs; it has 40 pupils. In 1936 a new normal school was opened at Katibougou to train teachers for rural schools.

The natives cultivate ground-nuts, millet, maize, rice, cotton, sesame; other products are rubber, gum arabic and kariti. In 1939 the colony possessed 1,287,513 head of cattle, 60,182 horses, 162,244 asses, 5,085,369 sheep and goats and 21,960 camels. Important irrigation schemes have been carried out in the Segou district on the north bank of the Niger river. These form part of an irrigation programme which will be completed on the construction of the Sansanding Barrage.

Native industries comprise pottery, brick-making, jewellery, weaving, leather-making. Chief imports are cottons, food-stuffs, automobiles, petrol, building material, sugar, salt, beer; total in 1939, 230,228,657 francs. Chief exports are ground-nuts, cattle, gum, kopak, skins, cotton, wool, sisal, kariti and wax; total in 1939, 62,897,254 francs.

There is a very complete system of telegraphs throughout the Colony from Kayes to Niamey, Zinder, and Lake Chad.

Since the completion of the section from Thiès to Kayes (January, 1924), French Sudan is connected with the coast by a railway 760 miles in length, stretching from Dakar to Koulikoro by way of Thiès, Kayes and Bamako. For about seven months in the year small steamboats perform the service from Koulikoro to Timbuktu and Gao, and from Bamako to Kouroussa. A motor-car service connects the Colony with North Africa and Europe via the Sahara (Cie. Générale Transsaharienne).

Wireless telegraph connects Kabara, Kidal and Bamako with the Eiffel Tower in Paris, and with Dakar, Rufisque, Conakry, Abidjan, Cotonu, and Brazzaville.

In 1939 there were 41 branches of the savings bank, with 4,150 depositors.

*Governor.*—M. Calvel.

Mauritania, formed into a Protectorate in May, 1903, converted into a special 'Civilian Territory' in October, 1904, became a Colony on December 4, 1920, with a Lieutenant-Governor at its head. It consists of the districts of Trarza, Brakna, Gorgol, Assaba, Guidimaka, Adrar, Levrier Bay, Akjoujt, and Tagant, with a total area of 323,310 square miles. The native popu-

lation (1942) numbers 371,695, mostly Moorish Mussulmans (279,758); European population, 824 (French, 730). The northern limit of the Colony is approximate, and the foregoing area is obtained by taking the latitude 25° N. as the northern boundary. Chief products are cattle, gum and salt. In 1942 there were 77,700 camels, 224,500 cattle, 52,000 asses and 1,800,000 sheep.

Imports in 1942 amounted to 6,697,485 francs, and exports to 2,501,437 francs. The budget of the Colony for 1942 was 28,900,000 francs.

*Governor.*—M. Laigret.

The Colony of the Niger was formed by a decree of October 13, 1922. By a decree dated December 28, 1926, the circle of Say and part of the circle of Dori were transferred from the Colony of Upper-Volta to the Colony of the Niger. On January 1, 1933, on the abolition of the Colony of Upper Volta the remainder of the circle of Dori, and also the circle of Fada, were added to it. Area, 499,167 square miles; population (January 1, 1944), 2,071,425 (Europeans, 936; French, 904). The country is composed of a zone in the north, which is largely desolate country; a central strip which is wooded; and the southern zone, richly wooded and abounding in cattle. On January 1, 1944, there were 81,325 horses, 1,002,139 oxen, 2,483,580 sheep and goats, 184,377 asses, 71,892 camels. In the southern zone rice, cotton, wheat, tobacco, maize, barley and indigo can be produced. In 1943 the chief agricultural products were, millet (514,000 tons), earth-nuts (60,000 tons), manioc (165,000 tons), dates (1,300 tons), beans (80,000 tons), tobacco (350 tons), and cotton (400 tons). The whole colony lacks water, with the exception of (1) the western districts which are watered by the Niger and its tributaries, (2) part of the southern zone where there are a number of wells, (3) the extreme south-east touching Lake Chad. Imports in 1943 were 27,685,000 francs, and exports, 11,742,000 francs. Local budget in 1944, 75,180,000 francs. In 1943 there was 1 branch of the savings bank, with 1,394 depositors having total deposits of 4,097,968 francs. Niamey is the capital.

*Governor.*—Jean Toby.

## MANDATED TERRITORIES IN AFRICA: TOGO AND CAMEROON.

**Togo.**—Togo lies between the Gold Coast Colony on the west and French Dahomey on the east. It was surrendered unconditionally by the Germans to British and French forces in August, 1914, and is now divided between the French and British. The Mandate was approved by the League of Nations on July 20, 1922. Of the total area of 33,700 square miles, the French have obtained about two-thirds, 21,893 square miles, the boundary running from the north-east in a generally south-east and south direction to Lomé, in such a manner that no part of the coast is included in the British sphere. Lomé (population in 1938, 14,106 natives and 274 Europeans) is the seat of the administration. The total population of the whole of Togo in 1938 was 780,000 natives and 497 Europeans.

The southern half of Togoland is peopled by natives using 30 different languages, of which the principal is Ewe—these may be regarded as an offshoot of the Bantu peoples. The northern half contains, ethnologically, a totally different population descended largely from Hamitic tribes and speaking in all 16 languages, of which Dagomba and Tim are the most important.

The majority of the natives are pagans, but many profess Mohammedanism, while Christianity has, latterly, been making some progress in the coast districts. In 1938, 69,266 natives had adopted the Roman Catholic, and 28,495 the Protestant faith.

In 1938, there were altogether 60 official schools in the territory, with 4,997 pupils, of whom 632 were girls. Total number of teachers, 10 European and 104 natives.

Inland the country is hilly, rising to 3,600 feet, with streams and waterfalls. There are long stretches of forest and brushwood, while dry plains alternate with arable land. Maize, yams, cassava, plantains, ground-nuts, etc., are cultivated by the natives; oil palms and dye-woods grow in the forests; but the main commerce is the barter trade for palm oil, palm kernels, cocoa, rubber and copra carried on with the European factories. There are considerable plantations of oil and cocoa palms, coffee, cacao, kola and cassava. During recent years the natives have been increasingly engaged in the cultivation of cocoa and cotton. Production of cotton amounted to 1,836 metric tons in 1938, compared with 1,632 metric tons in 1937. Production of cocoa amounted to 7,632 metric tons in 1938, compared with 8,027 metric tons in 1937. Other products in 1938 were, palm-oil, 522 metric tons; palm kernels, 8,650 metric tons; coffee, 346 metric tons; copra, 2687 metric tons. In the Sokodé and Sansane-Mangu districts in the French territory there are about 65,000 head of cattle; in some districts horses of small size are bred. Native industries are: weaving, pottery, smith-work, straw-plaiting, wood-cutting, etc. There is no mining by Europeans, but the natives in the Sokodé and Klouto districts smelt iron, in which this Colony is very rich. For 1939, imports amounted to 91,644,000 francs, and exports to 74,227,000 francs. The principal exports (1938) were, palm kernels, 10,721,000 francs; cocoa, 19,082,000 francs; ginned cotton, 7,848,000 francs; copra, 4,262,000 francs; corn, 10,635,000 francs. The local budget for 1939 balanced at 50,534,000 francs. There was also a railway budget, 12,889,000 francs.

There are good roads, connecting the more important centres of the Colony. There are three railways connecting Lomé with Anecho (Little Popo) (27 miles), with Palime (72 miles), and with Blitta (143 miles via Atakpamé, 103 miles); total, 242 miles, with 5 stations and sub-stations. There are 18 post and telegraph offices and 4 branch offices, connected by telegraph and telephone with the Gold Coast Colony, French Dahomey, and with Europe.

The port of Lomé has a wharf with a capacity of 600 tons of traffic daily. At Anecho embarkation is made by means of surf boats. In 1938, 386 vessels cleared at the two ports.

*Commissioner.*—M. Noutary.

**Cameroon.**—The former German Colony of Kamerun, including the area of French Equatorial Africa ceded by France to Germany, was occupied by French and British troops in 1916. The greater portion of the territory has been placed under French administration, and a strip on the southern and northern border of Nigeria under British. The total area allotted to France amounts to 166,489 square miles, excluding the 107,270 square miles ceded to Germany in 1911, which is now included in French Equatorial Africa. Native population on January 1, 1938, was 2,513,517. The Europeans numbered 3,106, of whom 2,208 were French. The portion of Cameroon placed under the Mandate of France by the Treaty of Versailles has, by decrees of March 23, 1921, and February 21, 1925, been constituted an autonomous territory both

administratively and financially. The seat of government is Yaoundé (population, 1936, 20,000). In 1939, there were: 1 high school at Yaoundé (100 pupils), 9 regional schools (3,687 pupils), 64 village schools (6,950 pupils), 2 professional schools, 2 domestic economy schools (110 pupils), 1 kindergarten school (46 pupils) and 81 private schools receiving grants (5,351 pupils). There were 31 European teachers and 172 native teachers. The budget (1939) provided for 3,236,850 francs for public education, and 507,500 francs for new school buildings. General budget for 1938 showed 139,439,747 francs for receipts and 118,328,574 francs for expenditure. Chief products are ground-nuts, palm oil, almonds, hides, timber, cacao, coffee and ivory. On January 1, 1939, there were 900,000 oxen and 25,000 asses. Imports in 1938 amounted to 215,212,000 francs, and exports to 251,959,000 francs. In 1938, 628 vessels of 1,529,776 tons entered and cleared at the ports of Douala, Kribi, Campo and Garoua. The country has 3,105 miles of roads, and 314 miles of railway.

Governor.—Henri-Pierre Nicolas.

## AMERICA.

### GUADELOUPE AND DEPENDENCIES.

Guadeloupe, situated in the Lesser Antilles, consists of two islands separated by a narrow channel, called 'Rivière Salée.' That on the west is called Guadeloupe proper, the principal town of which is Basse-Terre, the capital of the colony, and that to the east Grande-Terre; they have a united area of 1,510 square kilometres (583 square miles), and a circumference of 275 miles. There are five dependencies consisting of the smaller islands, Marie Galante, Les Saintes, Désirade, St. Barthélemy, and St. Martin; the total area with these is 688 square miles. The island dependencies of Guadeloupe are still inhabited by the white descendants of the Normans and Bretons who came there two or three hundred years ago. They live removed from the world, in patriarchal families of shipbuilders, fishermen and small farmers. The colony is under a Governor and an elected council, and is represented in the French parliament by a senator and two deputies. Population (1936) 304,289. Instruction (1943-44) is given in 2 lycées, one at Pointe-à-Pitre with 699 pupils and one at Basse-Terre with 407 pupils, and a secondary course for girls at Pointe-à-Pitre, with 272 pupils, and 128 public and private elementary schools. The public elementary schools have 501 teachers and 22,486 pupils, and the private have 1,816 pupils. The seat of government is Basse-Terre (13,638 inhabitants). Pointe-à-Pitre (48,551 inhabitants) has a fine harbour. Revenue and expenditure balanced at 83,608,979 francs for 1939. Outstanding debt at December 31, 1938, 12,110,210 francs.

Chief products are sugar, bananas, rum, coffee and cocoa. For local

consumption there are grown sweet potatoes, manioc, tobacco, indian corn and vegetables.

In 1938 the imports were 250,583,000 francs; exports, 296,472,000 francs. The principal exports in 1938 were sugar, 45,328 tons; coffee, 327 tons; rum, 115,477 hectolitres; cacao, 134 tons; vanilla, 5,212 kilogrammes; bananas, 50,287 tons. Guadeloupe is in direct communication with France by means of two steam navigation companies: with North and South America by four steam navigation companies, and (weekly) two Pan-American Airways System's planes (one to West Indies Islands and Natal, southward; one northward to Miami). A new wireless station at Destrellan was opened in 1918. It is connected with each of the dependencies. In 1943-44 there were 60 post offices, 9 wireless stations, and 379 miles of telegraph and telephone circuits. Within the islands traffic is carried on by means of roads, of which there were 754 miles in 1938. The Bank of Guadeloupe, with a capital of 3,000,000 francs, and reserve funds amounting to 7,010,000 francs, advances loans chiefly for agricultural purposes. The Banque Nationale pour le Commerce et l'Industrie has set up 3 branches in the colony. The Caisse Centrale de la France d'Outre Mer is the official banking institution of the colony, enjoying the privilege of issuing bank notes. Silver coin has disappeared from circulation; nickel treasury tokens (bons) of 1 franc and of 50, 25, 10 and 5 centimes are authorized up to total emission of 1,000,000 francs.

Governor.—M. Bertaut.

#### GUIANA

The colony of French Guiana, on the north-east coast of South America, is administered by a Governor, assisted by a Privy Council of 7 members. The colony has a Council-General of 8 members elected by French citizens resident in Guiana, and is represented in the French Parliament by one deputy. Area about 34,740 square miles, and population, census of 1936, 30,906. Cayenne, the chief town, has a population of 11,704, and the other 11 communes have 19,202. These figures are exclusive of the population of the penal settlement of Maroni, of the floating population of miners without any fixed abode, as also officials, troops, and native tribes. At Cayenne there are a court of first instance, and a superior court of appeal, with jurisdiction in other localities. The military force consists of 353 officers and men of the Colonial Infantry. Primary education is given gratuitously since 1889 in lay schools for the two sexes in the communes and many villages. There is also (1943-44) a college and a normal course (200 students), a primary school (1,795 pupils), and a kindergarten school (280 pupils). There are also several Congregational schools (1,000 pupils) and a private school for leprosy children (50 pupils). The school population in 1943-44 was 3,469. The penal settlement also has 3 schools with 125 pupils. The budget for 1944 balanced at 42,510,110 francs. The country has immense forests rich in many kinds of timber. There is little agriculture in the colony; only about 7,900 acres are under cultivation. The crops consist of rice, maize, manioc, cocoa, bananas and sugar-cane. The most important industry is gold-mining (placer). The exports consist of cocoa, bananas, various woods, gold, fish glue, rum, rosewood essence, balata and hides. The total imports in 1940 were valued at 64,164,188 francs, and the exports at 44,502,181 francs. There are three ports—Cayenne, Saint-Laurent-du-Maroni and Oyapoc. Cayenne and Saint-Laurent are visited once a month by a packet boat of the Compagnie Générale Transatlantique. There is also steamboat communication between

the capital and the other towns of the colony. Vessels entered and cleared, 1940, 378. The Pan-American Airways System visits Cayenne daily. There are three chief and many secondary roads connecting the capital with various centres of population in the interior with motor-car services. There is a telegraph system connecting Cayenne with Macouria, Kourou, Sinnamary and Iracoubo, as well as with the penal settlement. There are wireless stations at Cayenne, Oyapoc, Regina, St. Laurent.

Since 1854, Cayenne has had a penal settlement for habitual criminals and convicts sentenced to hard labour. In 1944 the penal population consisted of 2,240 men.

The Bank of Guiana, under Government control, with a capital of 1,200,000 francs, with statutory reserve fund amounting to 600,000 francs, advances loans for agricultural and other purposes.

Territory of Inini includes the hinterland separated from French Guiana by a Decree of July 6, 1930. It is under the direct administration of the Governor of French Guiana, who is assisted by an administrative Council of 4 members acting in a consultative capacity. The Territory is administered from 6 posts: Maripasoula (Maroni), Mana (Moyenne Mana), Saül (Haut Mana), Sinnamary (Centre), Pierrette (Approuague), Maripa (Oyapoc). The Territory is bounded on the north by Guiana, on the west by Maroni and Itany, on the east by Oyapoc and on the south by Tumuc-Hamac. The area is 30,301 sq. miles and the population (1936), 6,099. The Territory is connected with Guiana by waterways which, despite rapids, are navigable by local craft. Budget for 1944 balanced at 4,323,900 francs. The principal products are rose wood and cabinet wood. Gold is also found. The trade of the Territory is included in the Guiana returns. There are 3 post offices and 1 wireless station.

Governor.—M. Rapenne.

#### MARTINIQUE.

The colony is under a Governor assisted by a Privy Council. An elected General Council votes the Budget, and elective municipal councils administer the communes. It is represented by a senator and two deputies in the French Chamber. Area 385 square miles, divided into 32 communes; population (census 1936) 246,712. Justice is administered by 5 justices of the peace, a tribunal of first instance, a court of appeal and a court of assizes. The military force consists of one company of infantry and a battery of artillery. There is a law school (at Fort-de-France) with (1938) 170 students; a lycée for boys, with 730 pupils; a high school for girls with 800 pupils; primary schools, with 31,000 pupils; 3 private schools; a commercial school with 80 pupils, and a school of arts and crafts (90 pupils). The capital and chief commercial town is Fort-de-France (population, 52,059), with a landlocked harbour some 15 sq. miles in extent. The budget for 1937 balanced at 101,100,000 francs. Sugar and rum are the chief productions, then come cocoa, pineapple, bananas and coffee. There are 15,000 hectares under sugar-cane, 3,000 hectares under bananas, 1,000 hectares under cocoa, coffee and pineapple, and 6,000 hectares food-producing crops. In 1937 livestock in Martinique numbered 44,000 cattle, 30,000 sheep, 30,000 pigs, 25,000 goats and 15,000 horses. There are 20 sugar works with distilleries attached, 158 agricultural distilleries, 2 industrial distilleries devoted to the production of rum, and 12 industrial establishments. In 1938, 106,618 short tons of sugar, 5,684,000 gallons of rum, 3,866,000 bunches (50 lb.) of bananas, and 746,000 lb. of cocoa beans were

exported. The total imports in 1937 were valued at 213,723,000 francs, and the exports at 231,006,000 francs. Vessels entered in 1937, 600. The island is visited regularly by the steamers of French and American companies. For local traffic there are subsidised mail coaches and motor-cars; and subsidised steamers ply along the coast. There are 55 postal offices and agencies. A local savings bank is under the direction of the head of the post, telegraph and telephone services. The colony is in telegraphic communication with the rest of the world by telegraph cables and wireless. The Bank of Martinique at Fort-de-France with a capital of 3,000,000 francs, the Crédit Martiniquais with a capital of 10,000,000 francs, and a branch of the Royal Bank of Canada advance loans for agricultural and other purposes.

Governor.—Georges Parisot.

### ST. PIERRE AND MIQUELON.

The largest islands of two small groups close to the south coast of Newfoundland. Area of St. Pierre group, 10 sq. miles; estimated population in 1944, 8,600; area of Miquelon group, 83 sq. miles; population, 520; total area, 93 sq. miles; total population, 4,120. A Governor, whose title is Administrateur du Territoire des Îles Saint-Pierre et Miquelon, regulates the various branches of the public services with the co-operation of chiefs of services appointed by him. For the general administration of the islands, he is assisted by a Council of Administration, which includes functionaries and civil members, the latter elected by the people. Chief town, St. Pierre, is also the seat of the Court of Appeal and the see of the Apostolic Prefecture. Primary instruction is free. There are 3 public schools for boys and 3 for girls, with (in all) 16 teachers and 900 pupils. There are, besides, infant schools, 'salles d'asile,' attended by 150 children. There are a private boarding school and two private schools.

The islands, being mostly barren rock, are unsuited for agriculture. The chief industry is cod-fishing. Imports in 1943, 30,338,370 francs (13,913 metric tons); exports, 10,259,434 francs (1,038 metric tons). The imports comprise textiles, salt, wines, foodstuffs, meat; and the exports, cod, dried and fresh, and fish products. St. Pierre is in regular steam communication with North Sydney and Halifax; and is connected by telegraph cable with Europe and the American continent. Local budget for 1940 balanced at 13,788,690 francs.

Governor.—Pierre Garroute.

## AUSTRALASIA AND OCEANIA.

### NEW CALEDONIA AND DEPENDENCIES.

Governor.—A. Tallec.

New Caledonia is administered by a Governor assisted by a Privy Council consisting of the Secretary-General, the head of the Judicial administration, the Superior Commandant of the Troops, the head of the Department of Domains and Colonisation, and two notables of the colony appointed by the Central Government. The colony has also an elective Council-General of 15 members. Nouméa, the capital, has a municipality; other centres of population are locally administered by municipal commissions.

The island is situated between the 20° 1' and 22° 26' parallels south latitude, and 161° 30' and 164° 40' east longitude. It has a total length exceeding 243 miles and an average breadth of 31 miles. Area, 8,548 square miles. According to the census of July 1, 1936, the population was 53,245, of whom 17,055 were free, 329 of convict origin, and 23,800 Melanesians and Polynesians. Nouméa had (1936) 11,108 inhabitants. The immigrants from France are not numerous. Other immigrants (July 1, 1936) were 4,510 Javanese, 2,356 Tonkinese, 27 Indians, and 168 islanders from the New Hebrides. Primary instruction is provided in public and also in private elementary schools, the former being assisted by the local budget. In 1937, there were 45 public and private primary schools with 2,896 pupils, and 85 native schools with 3,752 pupils. In Nouméa the 'Collège La Pérouse' gives classical tuition to 232 pupils and professional instruction (iron and wood) to 57 pupils. Local budget for 1939 balanced at 44,100,000 francs. Of the total area one-third is not cultivable; about 1,600 square miles are pasture land; about the same area is cultivated or cultivable; and about 500 square miles contain forest which is being worked. The land is divided into 2 domains: that of the state (in which gratuitous concessions may be made); and that of the native reserve. The chief agricultural products are coffee, copra, cotton, manioc (cassava), maize, tobacco, bananas, pineapples. There are 105,651 cattle, 5,343 sheep, 11,232 goats, 10,007 horses, and 11,213 pigs. The mineral resources are very great; chrome, cobalt, nickel, iron, and manganese abound; antimony, mercury, cinnabar, silver, gold, lead, and copper have all been obtained. The nickel deposits are of special value, being without arsenic. About 193,182 hectares of mining land are owned, and 29,854 hectares have been granted for prospecting. In 1937, the blast furnaces produced 6,830 tons matte of nickel valued at 33,431,394 francs. Local industries are developing; there are a grain storage and cleaning depot, meat preserving works, barking mills for coffee and cotton, and two blast

furnaces melting nickel ore. A hydro-electric factory was established in 1926. The imports in 1938 were valued at 158,571,000 francs, and the exports at 146,453,000 francs. The imports comprise wine, coal, flour, rice; the exports, minerals, coffee, copra, cotton and preserved meats. In 1938, 141 vessels of 361,316 tons entered and 136 of 347,628 tons cleared at the ports of New Caledonia. Of those which entered, 80 (150,245 tons) were French. Nouméa is connected once monthly with Sydney in New South Wales by regular steamers sailing monthly, and by other vessels sailing irregularly. There is a mail service by steamer along the coast. There is a narrow-gauge railway (single line) from Nouméa to Paita, about 20 miles long. The proposed extension to Bourail, 105 miles from Nouméa, has, however, been postponed. There is a daily motor road service for passengers from Nouméa to Gomen on good roads; the rest of the Colony's roads are only suitable for horseback transport. There are 840 miles of telegraph line and 1,596 miles of telephone line.

United States troops occupied New Caledonia on April 25, 1942.

Dependencies of New Caledonia are:—

1. The Isle of Pines, 30 miles to the south-east, with an area of 58 square miles and a population of about 570.
2. The Wallis Archipelago, north-east of Fii, with an area of 40 square miles and 4,243 inhabitants. The islands were placed under the French protectorate in 1842. There is a French Resident; and the archipelago is in regular communication with Nouméa *via* Port Vila. Budget for 1939, 600,940 francs.
3. Futuna and Alofi, south of the Wallis Islands, with about 2,000 inhabitants, were placed under French protectorate in 1842.
4. The Loyalty Islands, 60 miles east of New Caledonia, consisting of 3 large islands, Maré, Lifou, and Uvée, and many small islands with a total area of about 800 square miles. The chief culture in the islands is that of coconuts; the chief export, copra.
5. The Huon Islands, 170 miles north-west of New Caledonia, a most barren group.
6. The Bélep Archipelago, about 7 miles north-east of New Caledonia.
7. Chesterfield Islands are on the 20° parallel, south, about 342 miles west of the northern headland of New Caledonia.
8. Walpoole lies south-east of Maré (Loyalty Islands) and east of the Isle of Pines, about 93 miles from each of these islands.

The New Hebrides, in accordance with the Anglo-French convention of February (ratified in October), 1906, are jointly administered by the High Commissioners of His Britannic Majesty and the French Republic. A second protocol of 1914, ratified by France and England on March 18, 1922, guaranteed British, French and native interests. An Anglo-French conference was appointed to devise means of remedying the defects of the condominium. In 1936 there were 750 French and 178 English. There are French and English courts, and a mixed court with a judge foreign to both nations. French Local budget for 1939, 6,083,000 francs. Exports in 1938 amounted to 20,315,661 francs, of which 19,893,462 francs were French trade, and 422,199 francs British trade; imports were 19,091,682 francs, of which 14,008,897 francs were in French trade, and 5,082,785 francs British trade. Maize, coffee, cotton, cocoa, vanilla, and coconuts are grown, and are the chief articles of export. In some places sulphur is abundant. In 1938, 58 vessels of 162,285 tons entered, and 52 vessels of 163,163 tons cleared the ports. Of those

entering, 14 were British (16,903 tons) and 34 French (122,702 tons). Of those clearing, 16 were British (18,754 tons) and 31 French (121,735 tons).

### FRENCH ESTABLISHMENTS IN OCEANIA.

Governor.—Colonel Orselli.

These, scattered over a wide area in the Eastern Pacific, are administered by a governor with a Private Council and an assembly of economic and financial delegations consisting of certain officials, the *maire* of Papeete, and the Presidents of the Chambers of Commerce and Agriculture. The establishments consist of the **Society Islands**, the most important of which are Tahiti and Moorea, the former with an area of about 600 square miles and (census November 1, 1941) 23,133 inhabitants, the latter with an area of 50 square miles and 2,279 inhabitants. The principal products are phosphate (annual production, 80,000 metric tons) and copra (20,000 metric tons). Other groups are the **Marquess Islands**, with a total area of 480 square miles and 2,699 inhabitants, the two largest islands being Nukahiwa and Hivaoa; the **Taamotu group**, consisting of two parallel ranges of islands from King George's Island on the north to Gloucester Island on the south, their total population being 4,681; the **Leeward Islands** (*Iles sous le Vent*) (11,891 inhabitants), of which the more important are Huahiné Raiatée and Tahaa and Bora-Bora-Maupiti; the **Gambier, Austral, and Rapa Islands**; the Gambier group (of which Mangareva is the principal) having six square miles of area and 1,504 inhabitants; the Austral (or southern) Islands, of which Rurutu is the largest, Tubuai, Raiavavae (or Vavitu), Rimatara, and, far to the south, Rapa, having together an area of 115 square miles and 3,621 inhabitants; Makatea, 1,248 inhabitants; Island of Maiao, 165 inhabitants. The total area of the Establishments is estimated at 1,520 square miles, and their population, according to the census of November 1, 1941, was 51,221. There were 44,280 French, 5,455 Chinese, 168 Indo-Chinese, 146 English, 86 Americans, 60 Czech, 24 Japanese, 17 Dutch, 7 Germans, and 978 floating population. In 1903 it was decreed that separate islands or groups should no longer be regarded as distinct Establishments, but that all should be united to form a homogeneous colony. Budget for 1941 balanced at 28,800,000 francs.

The most important of the islands is Tahiti, whose chief town is Papeete with 11,614 inhabitants (1941 census), of whom about half are French. A higher primary school, with a normal school, has been established at Papeete, and there are (1935) 87 primary schools, with 180 teachers and 7,230 pupils. Pearls and mother-of-pearl are important products. The island is mountainous and picturesque with a fertile coastland bearing coconut, banana, and orange trees, sugar-cane, vanilla, and other tropical fruits, besides vegetables grown in temperate climates. The chief industries are the preparation of copra, sugar and rum. Value of imports (1941) 53,429,000 francs, exports 124,583,000 francs. The chief imports are tissues, wheat, flour, metal work. The chief exports were copra (20,683 tons), mother-of-pearl, vanilla and phosphates. The export of phosphates in 1935 was 130,000 tons; in 1937, 163,169 tons; in 1938, 112,949 tons; in 1939, 160,680 tons. The New Zealand company (with a French subvention) has a service connecting San Francisco, New Zealand and Australia with Papeete. The shipping between the islands is carried on by sailing and motor boats. In 1941, 45 overseas vessels with a total tonnage of 164,195 entered the ports of the Colony.

British Consul at Tahiti.—D. Cameron.

At the outbreak of the first world war the number of workers in Germany was 17 million; at the outbreak of the second world war it was 24·6 million; on May 1, 1943, it was 28·1 million, of whom 12 million were foreign workers.

According to the Treaty of Versailles (June 28, 1919) Germany agreed to the following territorial arrangements:—(1) Alsace-Lorraine ceded to France, (2) the greater part of the Provinces of West Prussia and Posen ceded to Poland, (3) a part of Upper Silesia and of East Prussia likewise to Poland, (4) a portion of Upper Silesia to Czechoslovakia, (5) Memel to the League of Nations, annexed in 1923 by Lithuania, (6) Danzig, a Free State under the protection of the League of Nations, (7) Eupen and Malmédy to Belgium, (8) a part of Schleswig to Denmark.

On March 13, 1938, German troops seized Austria and Hitler decreed the absorption of Austria in the German Reich, Austria becoming one of the *Länder* or Federal Divisions of Germany, and now known as the *Ostmark*. The country was subordinated to the German Reich and to the Hitler dictatorship. The army was incorporated in the German army; Austrian diplomatic representation abroad was ended, the German diplomatic representatives taking over from the former Austrian officials; the mark currency was decreed to be legal tender in Austria (by May 1, 1938, the mark had displaced the schilling entirely); the Austrian National Bank was liquidated and the railway system united with the German railways. As from April 1, 1940, the *Ostmark* has been divided into 7 *Gaus* or districts, each under the direct rule of a *Statthalter* (see p. 963). For statistics concerning Austria prior to the German invasion, see THE STATESMAN'S YEAR-BOOK, 1938, pp. 710-719.

On October 1, 1938, with the concurrence of Great Britain, France and Italy at the Munich Conference, German troops marched into the Sudeten area of Czechoslovakia, and by October 10 had occupied the fifth zone in that area, completing the extent of German occupation.

On March 14, 1939, German troops seized what was left of Czechoslovakia after the separation from it of Sudetenland, and Hitler proclaimed the Protectorate of Bohemia and Moravia. (See under CZECHOSLOVAKIA.)

On March 21, 1939, Lithuania returned Memel to Germany.

On September 1, 1939, German troops invaded Poland, and after conquering the country, Hitler annexed to the Reich the whole of German-occupied Poland, being a territory 72,432 sq. miles in extent with a population of 20,600,000.

On September 1, 1939, the Free City of Danzig was, by a decree of Hitler, incorporated in the German Reich.

On May 19, 1940, Eupen and Malmédy were, by decree of Hitler, again incorporated in the Reich. The area of these districts was 1,036 sq. kilometres and their population 60,000.

On May 9, 1940, Hitler occupied Denmark and invaded Norway. On May 10, 1940, he sent his troops into Holland, Belgium and Luxemburg; by June 22, they had made themselves masters of France; on that day the armistice with Germany was signed by the French Government. On April 6, 1941, Germany launched an attack on Yugoslavia and Greece. The former was conquered by April 18, when the Yugoslav armies capitulated; the latter by April 27, when German troops entered Athens. By March, 1945, the German army was still in occupation only of Norway, Denmark and parts of Holland. By the military successes of the armies of the United Nations during the summer of 1944 and the early months of 1945, the German forces had been cleared out of France, Belgium, Luxemburg, Yugoslavia, Greece, Rumania, Bulgaria and Poland, and the Russian

armies had penetrated into Germany from the east to beyond the river Oder (occupying more than 1,000 square miles of Germany), while Anglo-American and French forces were in occupation of Germany west of the Rhine (Cologne captured, March 7, 1945) and had crossed that river.

For the Three Power Pact, see under JAPAN.

The following table shows the increase in population at various periods, with the annual rate of increase per cent.:—

| Year              | Increase  | Annual Rate per cent. | Year | Increase               | Annual Rate per cent. |
|-------------------|-----------|-----------------------|------|------------------------|-----------------------|
| 1871 <sup>1</sup> | 970,171   | 0·60                  | 1900 | 4,087,277              | 1·56                  |
| 1880              | 4,175,269 | 1·13                  | 1905 | 4,274,100              | 1·52                  |
| 1885              | 1,621,648 | 0·72                  | 1910 | 4,284,715              | 1·41                  |
| 1890              | 2,572,766 | 1·10                  | 1933 | 2,807,842 <sup>2</sup> | 0·56                  |
| 1895              | 2,851,431 | 1·15                  | 1939 | 3,454,152              | 0·67                  |

<sup>1</sup> Since 1867.

<sup>2</sup> Excluding the Saarland.

Early in 1940 the population of Germany was increased by the wholesale migration of Germans from the three Baltic States, from Soviet Russia, and from South Tyrol. Exact figures are not available; an estimate for South Tyrol places the figure at 220,000.

## II. MOVEMENT OF THE POPULATION.

The following table shows the movement of the population of the Republic during six years:—

| Year | Marriages | Total Births | Stillborn | Illegitimate | Total Deaths           | Surplus of Births |
|------|-----------|--------------|-----------|--------------|------------------------|-------------------|
| 1936 | 609,770   | 1,312,053    | 33,470    | 102,031      | 795,793                | 482,796           |
| 1939 | 946,279   | 1,639,126    | —         | —            | 1,011,009 <sup>1</sup> | 628,117           |
| 1940 | 731,629   | 1,645,691    | —         | —            | 1,042,265 <sup>1</sup> | 603,426           |
| 1941 | 589,226   | 1,528,187    | —         | —            | 993,618 <sup>1</sup>   | 534,519           |
| 1942 | 606,982   | 1,236,869    | —         | —            | 990,383 <sup>1</sup>   | 248,486           |
| 1943 | 591,453   | 1,318,091    | —         | —            | 999,370 <sup>1</sup>   | 321,721           |

<sup>1</sup> Civil population only and excluding all engaged in war work.

The number of divorces in Germany was in 1934, 54,402; in 1935, 49,784; in 1936, 50,337; in 1937, 46,786; in 1938, 49,497.

The annual number of German emigrants for five years was as follows:—1934, 14,232; 1935, 12,226; 1936, 15,190; 1937, 14,203; 1938, 22,263. Of the total in 1938, 12,754 migrated to the United States.

## III. PRINCIPAL TOWNS.

German towns are distinguished as large towns (with 100,000 inhabitants and upwards); medium towns (20,000-100,000 inhabitants); small towns (5,000-20,000 inhabitants), and country towns (2,000-5,000 inhabitants). The number of large towns is shown as follows:—1871, 8; 1880, 14; 1890, 24; 1900, 38; 1910, 48; 1925, 45; 1933, 52; 1939, 61. According to the results of the census of May 17, 1939, the population of the principal towns was as follows:—

| Town                | State     | Pop.<br>(May 17,<br>1939) | Town          | State    | Pop.<br>(May 17,<br>1939) |
|---------------------|-----------|---------------------------|---------------|----------|---------------------------|
| Berlin <sup>1</sup> | Prussia   | 4,332,242                 | Krefeld-Uer-  |          |                           |
| Vienna              | Austria   | 1,918,462                 | dingen        | Prussia  | 169,485                   |
| Hamburg             | Hamburg   | 1,682,220                 | Erfurt        | "        | 166,661                   |
| Munich              | Bavaria   | 828,325                   | Aachen        | "        | 165,710                   |
| Cologne             | Prussia   | 768,426                   | Mainz         | Hesse    | 158,971                   |
| Leipzig             | Saxony    | 701,606                   | Lübeck        | Prussia  | 153,630                   |
| Essen               | Prussia   | 659,871                   | Hagen (West-  |          |                           |

<sup>1</sup> Area of Berlin, 341 square miles.

### Religion.

According to the census of June 16, 1933, there were in Germany 40,865,258 Protestants (62.7 per cent. of the total population), 21,171,991 Catholics (32.6 per cent.), 34,927 other Christians (0.1 per cent.), 499,682 Jews (0.7 per cent.), and 2,646,603 adherents of other professions of religion (4.0 per cent.). By March 1944, the Jews of Germany had been either expelled or massacred.

During 1934 efforts were made to unite the Evangelical Churches in the German Evangelical Church under the direction of a Reich bishop, 'called' by the National Synod at the nomination of the heads of the regional Churches. The efforts failed completely, and throughout 1935 the State

authority was in conflict with the Evangelical regional Churches. On September 24, 1935, a law was promulgated for the Security of the German Evangelical Church, giving absolute powers in Church matters to the Minister for Church Affairs. During the years 1937-1942 the State authorities were in conflict with both the Protestant and Catholic church organizations, the State authorities being determined to establish a German National Church closely associated with the Neo-Heathenism of the doctrines of Alfred Rosenberg.

There are 6 Roman Catholic archbishoprics, 17 suffragan bishoprics, 1 bishopric immediately subject to Rome, 2 parts of bishoprics attached to non-German bishoprics, and 1 apostolic administration. The 'Old Catholics' have a bishop at Bonn. A Concordat between Germany and the Holy See was signed on July 20, 1933, and was ratified on September 10, 1933.

In 1934 there were in Austria 6,116,250 Catholics (90.57 per cent.), 295,452 Protestants (4.38 per cent.), 191,481 Jews (2.83 per cent.), 149,961 'others' (2.22 per cent.), and 7,089 unknown. The Catholic Church has 2 archbishoprics and 4 bishoprics.

### Education.

Education is general throughout Germany, all children between the ages of 6 and 14 being bound to attend some recognized school.

Since September, 1941, the Latin script has replaced the Gothic in all German schools.

According to the law of April 23, 1920, German children are all bound to receive a four years' course of instruction in the 'Foundation School' (*Grundschule*). The next highest school for elementary education is the 'People's School' (*Volksschule*), which, like the *Grundschule*, is supported partly by the State (mostly for personnel), and partly by the municipalities (mostly for school buildings, etc.).

According to a school census taken May 25, 1938, there were 51,118 public elementary schools in Germany with 179,260 teachers (131,279 males and 47,981 females), and 7,596,487 pupils (3,828,778 boys and 3,767,659 girls). There were in 1938, 308 private schools with 24,783 pupils and 1,063 teachers.

Besides the *Volksschule* there is found the 'Middle School' (*mittlere Schule*), which differs from the former in that instruction is provided in English and French. In 1937 there were 1,563 *mittlere Schulen* with 9,582 teachers and 272,635 pupils (133,697 boys and 138,668 girls).

To prepare for the universities and for admission into certain professions, there are several kinds of secondary schools with a course of study extending in the main over 8 years. Of these the oldest is the *Gymnasium*, which specializes in classical studies; side by side with this was the *Realgymnasium*, which specialized in mathematics, natural science and modern languages, but this, as well as the *Oberrealschule*, was abolished in October, 1938. Experimentally two other kinds of schools have been established—the German High School (*Deutsche Oberschule*) and the *Aufbauschule*, the former to stress German subjects (besides modern languages), and the latter to provide an intensive and curtailed high school education for the bright scholars of elementary schools.

Besides these are a number of Nazi Boarding Schools (*Internate*) for the education of prospective civil servants; the 'Adolf Hitler Schulen,' for the education of Nazi Party bosses; and (since 1941) the 'Deutsche Heimatschulen,' for the education of the children of officers who fell in the war and of officers and technicians whose duties take them outside Germany.

For girls there are *Lyceen*, *Oberlyceen* and certain other educational institutions which prepare for the universities.

On May 15, 1937, the number of secondary schools was as follows:—For boys, 1,526, with 465,652 pupils, of whom 434,689 were members of the Hitler Youth Movement. Total number of teachers, 29,031 (853 women). For girls, high schools, 756; with 13,982 teachers and 205,243 pupils. Of this total, 180,802 were members of the Hitler Youth Movement.

On May 25, 1938, the census of special schools showed that there were in Germany 21 schools for the blind (980 pupils and 151 teachers), 61 schools for the deaf (5,183 pupils and 659 teachers), 116 schools for mentally deficient (6,275 pupils and 313 teachers).

There are 10 fully-equipped technical high schools, with the right of granting degrees. The statistics for the winter term 1937-38 were as follows:—

| Schools   | Teaching Staff<br>(1935-36) | Matriculated<br>Students <sup>1</sup> | Of whom |            | Schools   | Teaching Staff<br>(1935-36) | Matriculated<br>Students <sup>1</sup> | Of whom |            |
|-----------|-----------------------------|---------------------------------------|---------|------------|-----------|-----------------------------|---------------------------------------|---------|------------|
|           |                             |                                       | Women   | Foreigners |           |                             |                                       | Women   | Foreigners |
| Aachen    | 187                         | 668                                   | 8       | 87         | Hanover   | 117                         | 884                                   | 17      | 41         |

| Dresden   | 148                         | 1,074                                 | 42      | 219        | Total     | 1,515 <sup>1</sup>          | 9,554 <sup>2</sup>                    | 213     | 1,573      |

<sup>1</sup> Of whom 8 were women.

<sup>2</sup> In addition to 944 on leave or excused attendance at lectures, and 862 special students.

There were, besides, the following (number of students in the winter term 1937-38 shown in brackets): 1 veterinary high school (530), 1 agricultural high school (141), 2 forestry high schools (147), 2 mining academies (182), 4 commercial high schools (1,782), and 16 high schools for training of elementary school teachers with a total of 8,631 students.

There are 25 universities in Germany besides the philosophical and theological high schools at Augsburg, with 16 students, Bamberg (165), Dillingen (157), Eichstätt (282), Frankfurt-on-Main (297), Freising (216), Fulda (212), Mainz (162), Paderborn (439), Passau (217), Regensburg (221), which have only faculties of theology (Roman Catholic) and philosophy (Augsburg has philosophy only).

The following table gives the date of foundation, the number of teachers and students for the winter term of 1937-38:—

| University and Date of<br>Foundation | Professors<br>and<br>Teachers<br>(1935-36) | Students | Of whom |            |
|--------------------------------------|--------------------------------------------|----------|---------|------------|
|                                      |                                            |          | Women   | Foreigners |
| Berlin (1809)                        | 837                                        | 6,414    | 860     | 862        |

| Würzburg (1582)                      | 157                                        | 1,475    | 217     | 52         |
| Total                                | 5,868                                      | 43,189   | 6,234   | 2,724      |

In four universities, namely, Academie Braunsberg, Freiburg, Munich and Würzburg, the faculties of theology are Roman Catholic; four are mixed, both Protestant and Roman Catholic—Bonn, Breslau, Münster and Tübingen; and the rest are Protestant. Cologne, Frankfurt and Hamburg have no theological faculties. The Catholic faculty in Munich was closed February 17, 1939.

Austria has three universities, viz., Vienna (in 1936-37, 948 teachers and 10,153 students), Graz (292 teachers and 2,137 students), and Innsbruck (218 teachers and 1,737 students), and there are also two technical high schools at Vienna (346 teachers and 1,871 students) and Graz-Leoben (154 teachers and 643 students).

A German university was opened in Posen on April 27, 1941.

By the beginning of 1945, 8 German universities were closed completely and in the rest 146 faculties were not working.

### Justice and Crime.

Since April 1, 1935, a uniform system of law courts exists throughout Germany, and all courts including the Reichsgericht and the People's Courts, are organs of the Central Government.

The Nazi concept of justice was defined (in 1936) in the sentence, 'Right is what is in the interests of the German people. Wrong (*Unrecht*) is what is against those interests.'

The lowest courts of first instance are the *Amtsgerichte* (1,901 on October 1, 1938), competent to try petty civil and criminal cases. Cases relating to property in which the amount involved does not exceed 1,000 marks are usually tried by a single judge. In the trial of more serious criminal cases the judge is assisted by two assessors (*Schöffengericht*). The *Amtsgerichte* deal also with guardianships, estates and official records. The *Landgerichte* (174 on October 1, 1938) contain both civil and criminal chambers. The former, consisting of three judges, are competent to deal in first instance with all civil cases in so far as they have not been referred to the *Amtsgerichte*, especially with divorces, and also exercise an appellate jurisdiction over

The following table shows a number of returns for the four main classes of social insurance in 1937:—

|                        | Total Number of Insured | Revenue in Million RM. | Expenditure in Million RM. |
|------------------------|-------------------------|------------------------|----------------------------|
| Sickness . . . . .     | 22,357,000 <sup>1</sup> | 1,644.3                | 1,611.7                    |
| Accidents . . . . .    | 30,057,027 <sup>2</sup> | 418.3                  | 367.1                      |
| Invalidity . . . . .   | 18,100,000              | 1,715.7                | 1,273.0                    |
| Unemployment . . . . . | 12,803,000              | 1,708.7                | 1,461.3                    |

<sup>1</sup> Men, 14,726,000; women, 7,631,000.

<sup>2</sup> Figures for 1936.

In 1937 the total income from all sources for social insurance amounted to 4,708.9 million marks (contributions, 3,770.7 million marks), and the total expenditure, 3,815.5 million marks (cost of administration, 282.3 million marks), while the value of investments amounted to 7,439.2 million marks.

In 1937 there were in Germany 4,745 hospitals with a total of 628,684 beds. Of the hospitals, 2,076 were public institutions, 1,552 semi-public and 1,117 private.

### Finance.

In the pre-Hitler period it was customary for the German Government to publish the text of the Annual Budget Law, together with an explanatory memorandum. In 1933 the details of the budget were not published; in 1934 the explanatory memorandum was not published, and since 1935 no budget has been published.

It is therefore impossible to discover the expenditure of the Government, but returns of certain revenues are issued officially: The following table gives a survey of these for five years (in million marks):—

| Financial Year<br>(ending March 31) | Revenue from<br>Taxation and<br>Customs | The total includes                   |        |         |
|-------------------------------------|-----------------------------------------|--------------------------------------|--------|---------|
|                                     |                                         | Taxes on<br>Property and<br>Business | Excise | Customs |
| 1938-39                             | 17,712                                  | 13,061                               | 2,333  | 1,818   |
| 1939-40                             | 23,575                                  | 16,300                               | 5,800  | —       |
| 1940-41                             | 27,221                                  | 17,700                               | 5,400  | —       |
| 1941-42                             | 32,258                                  | —                                    | —      | —       |
| 1942-43                             | 34,700 <sup>1</sup>                     | —                                    | —      | —       |

<sup>1</sup> Total revenue for the year 1942-43 amounted to 60,700 million marks. The difference between total revenue and that from taxation and customs only was provided by extraordinary revenues—e.g. fees, rents, administrative revenues of all kinds, war contributions of municipalities, payments for occupation troops in conquered countries and contributions from Bohemia and Poland.

The growth of the German debt is shown as follows:—

| Year<br>(March 31) | Million<br>Reichsmark | Year              | Million<br>Reichsmark |
|--------------------|-----------------------|-------------------|-----------------------|
| 1875               | 4,925.8               | 1939 <sup>1</sup> | 45,876.3              |
| 1913               | 8,971.7               | 1940 <sup>1</sup> | 79,498.7              |
| 1931               | 12,089.6              | 1941 <sup>1</sup> | 123,500.0             |
| 1936 <sup>1</sup>  | 15,245.9              | 1942 <sup>2</sup> | 161,140.0             |
| 1937 <sup>1</sup>  | 17,570.0              | 1943 <sup>3</sup> | 208,830.0             |
| 1939 <sup>2</sup>  | 37,400.0              | 1944 <sup>4</sup> | 269,100.0             |

<sup>1</sup> December 31.

<sup>2</sup> August 31, the beginning of the war.

<sup>3</sup> July 31.

<sup>4</sup> May 31.

<sup>5</sup> February 28.

On August 31, 1941, the total disclosed Reich debt amounted to 107,530,000,000 Reichsmarks, and the short-term debt to 51,140,000,000

Reichsmarks. On February 28, 1944, the short term debt had risen to 150,210,000,000 RM.

To the above figures must be added the Special Bills (*Sonderwechsel*) for financing the special needs of the State; these Bills do not necessarily carry any claim for repayment. Furthermore, there were in circulation unnamed amounts of irredeemable loans and of Tax Certificates, which after a period of years are accepted in payment of taxes.

### Defence.

#### I. ARMY.

On March 16, 1935, Germany repudiated the armament clauses of the Treaty of Versailles. The strength of the German Army on January 1, 1934, was 102,218 all ranks. The Führer and Chancellor of the Reich is head of the land, sea and air forces. Under him the Reich Minister of War directs the Army, Navy and Air Force. Military service is compulsory and begins from the completion of the 18th year and lasts to the completion of the 21st year. Service in the Regular Army is preceded by service in the labour corps, which usually lasts six months; the conscript enters the Reichswehr in his 20th year and serves for two years. He passes then to the Reserve for 14 years, and to the Landwehr for 9 years. Men who for various reasons have not done military service form the Ersatz Reserve.

In 1939, before the war, the German Army at peace strength was reported to comprise some 39 infantry divisions, 3 mountain divisions, 5 light mechanised divisions and 5 armoured divisions. At the outbreak of war, mobilisation approximately doubled the infantry strength, but not the mechanised strength, although one of the light divisions had been converted into an armoured division. Some 70 divisions of all types were concentrated against Poland, which was able to mobilise only 22 infantry divisions and 8 cavalry brigades. Moreover, apart from the Germans' overwhelming superiority in mechanised forces, their infantry divisions had approximately double the fire-power of the Polish divisions.

By the time the Germans delivered their offensive in the west—May, 1940—they had formed and equipped so many additional units as to raise their total strength to an estimated total of over 200 divisions, of which at least 160 were ready to take the field. Of this total some 120 divisions were concentrated in the west, and included 10 armoured divisions.

By June, 1944, the number of divisions was estimated at 320, of which 50 were armoured divisions. The armoured divisions were frequently grouped in corps, consisting of two armoured and one or two motorised divisions.

The striking force of an armoured division has, however, been halved since 1940. It now comprises only one tank regiment instead of two—a regiment (of three battalions) numbering usually just over 200 tanks and 2,600 men. Altogether, the so-called 'armoured' division comprises nearly 17,000 men and 2,800 unarmoured vehicles. Other elements of the division include a reconnaissance unit, of armoured cars and motor-cyclists; a motorised battalion of engineers; an artillery regiment (of three batteries); an anti-aircraft battalion; an anti-tank battalion, and two motorised infantry regiments. Attached to the division is an air formation of 12 close-reconnaissance machines and about 30 dive-bombers.

A motorised division comprises two regiments, each of three infantry battalions, a support-weapons battalion (which includes light tanks and close-support guns), and a tank-chaser battalion equipped with anti-tank

guns on self-propelled mountings similar to a tank chassis. The division also includes reconnaissance, artillery, and anti-aircraft elements.

An ordinary infantry division comprises a reconnaissance unit; three infantry regiments (each of 3 battalions); an artillery regiment (of 4 batteries—48 pieces); an anti-tank or 'tank-chaser' battalion; an anti-aircraft battalion, and an engineer battalion. Its total strength is 17,500 men, and it is still mainly dependant on horse-transport.

Among other specialised forces are the parachute and other airborne troops, in the strength of which there has been a great development. An airborne division consists of two infantry regiments, together with a reconnaissance unit and an anti-aircraft battalion. Its total strength is only some 7,000 men, but a parachute regiment is attached to it for operational purposes.

In the summer of 1944, after the invasion of Normandy, it was estimated that the strength of the German forces in the west had been raised to some 65 divisions, and in Italy to 27 divisions. In Norway there were about 10 divisions; in Denmark, 4; in Hungary and Yugoslavia, rather more than 20. On the Russian front the number was reported to be almost unchanged, though many of the 180 divisions were much depleted in effective strength. The grand total was over 300 divisions, supplemented by nearly 70 from satellite countries.

A large proportion of the German forces in the west were overrun and rounded up in the break-out from Normandy of the Allied armies, and when these approached the borders of Germany barely 20-25 divisions were available to cover her western frontiers. In this crisis all sources of man-power were exploited to the full, and successive batches of hastily trained *Volkegrenadier* divisions were formed from these scourings. By such emergency measures, and by drawing on less active fronts, some 80 divisions were gathered in the west by the time the Anglo-American armies had built-up their strength close to Germany's frontiers, and were ready to launch a general offensive in the middle of November. As a result, the Germans were able to check the Allied offensive, and then, when its edge was blunted, to launch a powerful counterstroke that dislocated the Allies' winter plans. But only temporarily, for the Germans were driven back beyond their starting point.

## II. NAVY.

The fleet consists of 2 so-called 'pocket battleships,' officially rated as armoured ships, built 1929-34, the *Lützow* (formerly the *Deutschland*) and *Admiral Scheer*, each of 10,000 tons, driven by Diesel engines at a speed of 26 knots. Each is armed with six 11-inch guns, and is claimed to have a radius of action of 10,000 miles. Of more formidable design is the battleship *Gneisenau*, displacing 26,000 tons and armed with nine 11-inch and twelve 6-inch guns, completed in 1938, but she is at present completely dismantled and must be regarded as non-effective. The cruisers include the *Emden*, of 5,400 tons, completed 1925, armed with eight 6-inch guns; the *Leipzig*, *Nürnberg* and *Köln*, of 6,000 tons, completed 1931-35, each armed with nine 6-inch guns. There are two cruisers of 10,000 tons, the *Admiral Hipper* and *Prinz Eugen*, each mounting eight 8-inch guns; a third of this type, the *Seydlitz*, does not appear to have been completed. Four cruisers of 7,000 tons, armed with 6-inch guns were laid down in 1938-39, but little progress appears to have been made with them. Two aircraft carriers of 19,250 tons named *Graf Zeppelin* and *Peter Strasser*, have failed to make their appearance at sea, and it is believed that their construction may have

been abandoned. There are about 30 destroyers and torpedo-boats, built in 1926-40, and a considerable number of minesweepers, motor torpedo boats and motor launches. There are also the depot ships *Saar* and *Tsingtau*, the Admiralty yacht *Grille* and some patrol vessels. The construction of submarines was resumed in 1935, and they have since been built in very large numbers, though losses have exceeded 500.

There are also the coast defence ironclads *Schlesien* and *Schleswig-Holstein*, normally employed as training ships.

## III. AIR FORCE.

Before the outbreak of war in 1939 the Air Force was estimated at 3,200 first-line aircraft, but there are no official figures. The force was organized in seven groups, each with 60 squadrons of 12 aircraft in commission, including immediate reserves.

## Production and Industry.

### I. AGRICULTURE.

Generally speaking, small estates and peasant proprietorship prevail in the West and South German States, while large estates prevail in the north-east.

According to the latest official returns for Germany (census of May 17, 1939) of agricultural holdings, there were 3,902,466 holdings in Germany, with an area of 131,801,265 acres. The following are some of the details of the return, giving the number of holdings and in brackets the area in acres:—2 to 5 hectares, 943,958 (7,728,648); 5 to 10 hectares, 746,952 (13,181,086); 10 to 20 hectares, 596,233 (20,802,785); 20 to 50 hectares, 354,613 (25,891,999).

The areas under the principal crops, in acres, and the yields, in metric tons, were as follows:—

|              | Acreage.   |            |            | Produce (Metric tons). |            |                         |
|--------------|------------|------------|------------|------------------------|------------|-------------------------|
|              | 1937       | 1938       | 1939       | 1937                   | 1938       | 1939                    |
| Wheat . . .  | 5,041,295  | 5,095,922  | 6,048,587  | 4,466,684              | 5,580,000  | 5,584,500               |
| Rye . . . .  | 10,601,800 | 10,656,050 | 12,078,890 | 6,916,694              | 8,610,000  | 9,380,700               |
| Barley . . . | 4,166,807  | 4,181,835  | 4,833,317  | 2,637,844              | 4,250,000  | 4,243,600               |
| Oats . . . . | 6,774,002  | 6,743,617  | 8,204,912  | 5,918,546              | 6,366,000  | 6,826,900               |
| Potatoes . . | 6,807,282  | 6,896,125  | 7,952,950  | 55,309,725             | 56,410,000 | 56,800,000 <sup>a</sup> |
| Sugar Beet . | 1,235,382  | 1,254,880  | 1,421,072  | 15,701,278             | 17,200,000 | 17,890,000              |
| Hay . . . .  | 18,786,605 | —          | 18,779,335 | 40,587,728             | 25,879,147 | 25,016,884              |

<sup>a</sup> In 1940, 58,900,000 tons.

In 1938 the area devoted to vines was 183,250 acres, the wine yield 53,795,390 gallons. Area devoted to tobacco, 1938, 33,495 acres; 1937, 32,550 acres; yield 1937, 32,772,300 kilos; 1936, 32,885,900 kilos. In 1938 the hop production was 9,918 tons on an area of 21,180 acres.

In 1938 the number of fruit trees was as follows (in thousands):—Apple trees, 101,989; pear trees, 89,870; plum trees, 54,707; cherry trees, 27,878; apricot, 1,451; peach trees, 17,213; walnut trees, 2,620.

The number of domestic animals, poultry, etc., in Germany for 4 years (December 31) :—

|                               | 1936       | 1937       | 1938       | 1939        |
|-------------------------------|------------|------------|------------|-------------|
| Horses <sup>1</sup> . . . . . | 3,410,327  | 3,433,797  | 3,442,741  | 3,800,000   |
| Cattle . . . . .              | 20,088,040 | 20,503,600 | 19,911,200 | 23,500,000  |
| Sheep . . . . .               | 4,340,790  | 4,692,300  | 4,809,000  | 6,000,000   |
| Pigs . . . . .                | 25,891,558 | 23,846,924 | 23,481,328 | 24,100,000  |
| Goats . . . . .               | 2,633,530  | 2,630,100  | 2,508,900  | 3,200,000   |
| Poultry . . . . .             | 88,422,748 | 85,392,600 | 83,529,600 | 130,200,000 |
| Geese . . . . .               | 5,889,471  | 5,465,000  | 5,944,500  | 8,000,000   |
| Ducks . . . . .               | 2,724,080  | 2,403,000  | 2,655,700  | 2,800,000   |
| Bees (hives) . . . . .        | 2,503,449  | 2,467,900  | 2,561,800  | 2,800,000   |

<sup>1</sup> Exclusive of Army horses.

In June, 1943, there were in Germany (in millions) 22.9 cattle, 3.42 horses, 6.9 sheep and 15.4 swine.

In June, 1943, 18.9 million kilos of milk were produced, 695,000 tons of butter and 280,000 tons of fats.

### II. FORESTRY.

Forestry in Germany is an industry of great importance, conducted under the care of the State on scientific methods. The forest area of Germany in its present extent was put in 1927 at 31,635,443 acres, State and partly State forests, 10,328,563 acres; communal forests, 4,914,498 acres; private forests, 15,129,785 acres, and forests belonging to various associations or foundations, 1,262,597 acres. Of the whole forest area 9,110,040 acres are under deciduous trees, oak, birch, ash, beech, etc., and 22,525,403 acres bear pine, larch, red and white fir, etc. The forest area in 1939 was 42,796,660 acres.

### III. MINING.

The great bulk of the minerals raised in Germany is produced in Prussia, where the chief mining districts are Westphalia, Rhenish Prussia and Silesia for coal, iron and metal smelting works, Central Germany for brown coal, the Harz for iron and copper ore, and the Westerwald for iron ore. Saxony has coal mines.

The quantities of the principal minerals raised were as follows in metric tons :—

|                                                      | 1935        | 1936        | 1937        |
|------------------------------------------------------|-------------|-------------|-------------|
| Coal . . . . .                                       | 143,002,800 | 158,282,800 | 184,512,800 |
| Lignite . . . . .                                    | 147,071,500 | 161,396,700 | 184,708,800 |
| Iron ore . . . . .                                   | 6,048,509   | 7,570,400   | 9,791,800   |
| Iron content . . . . .                               | 1,848,600   | 2,258,700   | —           |
| Zinc content . . . . .                               | 140,900     | 156,500     | 165,600     |
| Lead content . . . . .                               | 60,700      | 68,600      | 78,900      |
| Copper ore . . . . .                                 | 1,120,500   | 1,124,200   | 1,243,400   |
| Copper content . . . . .                             | 27,400      | 26,900      | 27,100      |
| Rock salt . . . . .                                  | 2,077,800   | 2,383,800   | 2,757,300   |
| Brine salt . . . . .                                 | 561,588     | 574,560     | 603,000     |
| Potash . . . . .                                     | 11,672,560  | 11,764,600  | —           |
| Pure potash content of the product as sold . . . . . | 1,895,800   | 1,441,100   | 1,673,400   |
| Petroleum . . . . .                                  | 427,400     | 445,000     | 451,000     |

In 1913 the total output of pig iron was 16,763,809 metric tons; in 1937, 16,347,000 tons; in 1938, 18,618,000 tons. Ingot steel production (including castings from steel-works) in 1913 totalled 17,147,860 metric tons;

in 1937, 19,849,824 tons (including Saarland); in 1938, 23,241,931 tons. In 1937, the output of coke was 40,921,000 tons; in 1938, 43,511,000 tons. Coal output in 1938-39 was 187,481,000 metric tons; in 1943-44, it was 268,218,000 metric tons.

### IV. FISHERIES.

In 1937 the yield of the North Sea fisheries was 619,804,800 kilos of fish, valued at 90,047,300 RM., and of the Baltic fisheries, 51,705,100 kilos of fish, valued at 12,569,700 RM.

### V. MANUFACTURES.

The chief seat of the German iron production is the Ruhr and Saarland; to a less extent also in Sieg, Lahn and Dill districts. Steel is chiefly made in the Ruhr and Saarland. The manufacture of both iron and steel is carried on in the vicinity of the coal mines in the district of the Lower Rhine, Saarland, and in Westphalia. The electrical industry is found principally in Berlin. The chemical industry is centred in Bavaria, Rhenish Prussia and in Prussian Saxony. Saxony (Free State) is the leading State in the production of textiles, but Silesia and Westphalia also produce linen; Saxony (Free State), Westphalia, Württemberg and Bavaria produce cotton goods. Woollens are manufactured in Saxony, Brandenburg, Rhenish Prussia and Thuringia; silk in Rhenish Prussia and Baden. Beetroot sugar is an important manufacture in Prussia, chiefly in the provinces of Saxony, Silesia, Hanover and Pomerania. Potash is produced mainly in Prussian Saxony, Thuringia and Hanover. Glass, porcelain, and earthenware in Bavaria, Thuringia, Silesia, Brandenburg and Saxony; clocks and wooden ware in Baden, Württemberg and Bavaria, and beer principally in Bavaria.

According to the industrial census of June 16, 1933, there were in Germany 1,903,420 industrial establishments, employing 8,998,753 workpeople (6,750,342 males; being 75 per cent. of the total, and 2,248,411 females).

The following are the statistics of the beet sugar manufacture in Germany :—

| Years beginning 1 September | Number of Factories | Beetroot used in Metric Tons | Production in Metric Tons |          | No. of Kgs. Beetroot to produce 1 Kg. of Sugar |
|-----------------------------|---------------------|------------------------------|---------------------------|----------|------------------------------------------------|
|                             |                     |                              | Raw Sugar                 | Molasses |                                                |
| 1935-36                     | 212                 | 9,862,524                    | 1,665,290                 | 315,524  | 5.89                                           |
| 1936-37                     | 211                 | 10,648,814                   | 1,806,905                 | 340,611  | 5.88                                           |
| 1937-38 <sup>1</sup>        | 211                 | 13,635,602                   | 2,210,458                 | 444,575  | 6.19                                           |

<sup>1</sup> Preliminary figures.

The quantity of beer (in thousands of hectolitres, 1 hectolitre = 22 gallons) brewed in Germany in 1914 was 59,378; in 1935, 39,762; in 1936, 39,897; in 1937, 43,599; in 1938, 43,646; in 1939, 48,106.

The total number of active breweries in Germany with a yearly production of over 500 hls. was in 1933, 2,643; in 1934, 2,683; in 1935, 2,760; in 1936, 2,679; in 1937, 2,691.

Production of alcohol for four years :—

| Year    | No. of Distilleries | Gallons    | Year    | No. of Distilleries | Gallons    |
|---------|---------------------|------------|---------|---------------------|------------|
| 1933-34 | 34,010              | 78,832,622 | 1935-36 | 36,349              | 85,696,600 |
| 1934-35 | 39,007              | 82,602,328 | 1936-37 | —                   | 88,514,800 |

17,757 vessels of 6,468,568 tons. In 1937, 133,080,000 tons of goods were carried on the inland waterways.

On October 30, 1938, the Midland Canal was opened, joining from east to west a net-work of some 7,000 miles of inland waterways in Germany. To connect the Danube with the German canal system, the Oder-Danube Canal is under construction. Further canal construction includes an extension of the Oder-Vistula Canal in an eastward direction as far as the Dniester River to connect the German waterway system with that of Soviet Russia, and the Elbe-Oder Canal to connect central Germany with the Danube, while the Rhine-Maine-Danube Canal, already under construction, will connect western and northern Germany with the Danube.

The activities of the Deutsche Lufthansa are shown as follows for 3 years:—

|                             | 1938    | 1939    | 1940   |
|-----------------------------|---------|---------|--------|
| No. of passengers . . . . . | 255,000 | 243,000 | 95,000 |
| Luggage . . . . . (tons)    | 388     | 408     | 440    |
| Goods traffic . . . . .     | 1,322   | 1,026   | 900    |
| Postal traffic . . . . .    | 5,289   | 5,913   | 1,000  |

### III. POSTS AND TELEGRAPHS.

The postal and telegraphic services are retained in the hands of the Central Government.

Statistics for 1937-38:—Employees, 397,890; total number of post, telegraph, telephone, and radio offices, 64,766; operating revenue, 1,971.6 million marks; operating expenditure, 1,906.3 million marks.

In 1937-38, number of inland letters handled (in million), 6,438,000; sent abroad, 275,000; received from abroad, 102,000; number of parcels handled, 309,578.

The following are the telegraph and telephone statistics for the year 1937-38:—Length of telegraph and telephone lines, 397,200 kilometres or 236,260 miles; of telegraph wire, 28,256,500 kilometres or 17,519,300 miles; number of foreign telegrams, 6,417,000; of inland telegrams, 13,834,000; number of telephone boxes, 3,623,700; of telephone connections, 2,723,900,000.

International cable service is normally provided by the Deutsch-Atlantische Telegraphengesellschaft, which operates cables via Emden, the Azores, Emden-Dumpton-Eastern (London) and Emden-Vigo.

### Currency, Banking and Credit.

By the Currency Law of August 30, 1924, which came into operation on October 11, 1924, the notes of the Reichsbank were made legal tender.

On October 16, 1923, a proposal was adopted for the setting up of a Rentenbank to issue notes (Rentenmark) secured (since August 30, 1924) by first mortgages in gold marks on the entire German landed property. Since September 3, 1939, 5-mark Rentenbank notes are legal tender.

On June 30, 1942, there were in circulation Reichsbank notes to the value of 20,954 million marks; notes of the Rentenbank, 1,295 million marks, and coins 1,634 million marks; making a total of 23,883 million marks, as compared with 16,770 million marks on December 31, 1940. On September 30, 1944, Reichbank notes amounted to 42,301 million marks, while on February 18, 1945, the figure was over 53,000 million marks. The

above figures do not include an unknown amount of 'Wehrmachtverpflichtungsscheine' (Army Promissory Notes) nor the paper currency of the German Reichskreditkassen ('Reichskreditkassenscheine') issued in the six countries occupied by Germany for the use of the army of occupation in Denmark, Norway, Holland, Belgium, Luxembourg and France. On December 31, 1943, the amount of the Reichskreditkassenscheine was 3,100 million marks.

By the Bank Law of August 30, 1924, the privileges of the Reichsbank were renewed for 50 years. The capital of the Reichsbank is 150,000,000 Reichsmarks.

On December 31, 1938, the 2,622 German Savings Banks had deposits amounting to 22,871 million Reichsmarks; number of depositors, 36,170,000. Amount of deposits on December 31, 1943, 77,000 million marks.

In 1936, there were 259 private banks in Germany (5 in Berlin), and 93 official or state banks (state banks, 10), making a total of 352 banking institutions.

The following table shows the figures at which the principal banking institutions balanced their accounts (in millions of Reichsmarks) in recent years:—

|                                        | 1940  | 1941  | 1942  | 1943  |
|----------------------------------------|-------|-------|-------|-------|
| Deutsche Bank . . . . .                | 5,315 | 6,573 | 7,504 | 8,763 |
| Dresdner Bank . . . . .                | 4,118 | 4,917 | 5,736 | 6,680 |
| Commerzbank . . . . .                  | 2,306 | 2,957 | 3,436 | 4,240 |
| Reichskredit-Bank . . . . .            | 857   | 1,001 | 1,055 | 1,138 |
| Berliner Handelsgesellschaft . . . . . | 400   | 479   | 528   | 542   |
| Deutsche Arbeitsbank . . . . .         | 1,795 | 2,654 | 3,681 | 4,657 |

### Money, Weights and Measures.

The *Reichsmark*, of 100 *Reichspfennig*, is of the normal value of 11½d., or 20.43 *Reichsmark* to the pound sterling. It contains 0.358423 grammes of gold. On December 31, 1943, the total value of the coinage in circulation was 1,821 million RM., including silver coins (1,360 million RM.), aluminium coins (195 million RM.), aluminium-bronze coins (79 million RM.), and zinc coins (237 million RM.).

The rate of exchange for military purposes of Allied currency in Germany has been provisionally fixed at 40 marks to the £ and 10 marks to the dollar.

The metric system of weights and measures is in force.

### Diplomatic Representatives.

On September 3, 1939, a state of war was declared to exist between Great Britain and Germany, and diplomatic relations were broken off between the two countries.

## GREECE.

(KINGDOM OF HELLAS.)

GREECE gained her independence from Turkey in 1821-29, and by the Protocol of London, of February 3, 1830, was declared a kingdom, under the guarantee of Great Britain, France, and Russia. The crown was accepted by Prince Otto of Bavaria, who ascended the throne January 25, 1833, as Otto I, King of Hellas, being under the age of eighteen. He was expelled the Kingdom, after a reign of 29 years, in October, 1862, which event was followed by the election, in 1863, under the directing guidance of the three guaranteeing Powers, of Prince William, younger son of Christian IX, King of Denmark, as King George I, King of the Hellenes. George I, who was assassinated on March 18, 1913, was succeeded by his son Constantine, who reigned until June 11, 1917, when he was excluded from the throne by the allied Powers. Alexander, second son of King Constantine, then reigned till his death on October 25, 1920. Constantine returned to Greece on December 19, 1920, reigned until his abdication on September 27, 1922, and died in exile on January 11, 1923. He was succeeded by his eldest son George II, who was forced to leave Greece on December 13, 1923.

By a plebiscite on April 13, 1924, the Republic was established. The Republic continued until November 3, 1935, when in the plebiscite taken on the question, there voted for the restoration of the Monarchy, 1,491,992, for the Republic, 32,454. In accordance with the result, King George II returned to Greece on November 25, 1935, as King of the Hellenes.

On December 30, 1944, King George set up a Regency during the period of emergency until the will of the people should be known as to whether they desired a monarchy or a republic.

Regent.—Archbishop Damaskinos (sworn in, December 31, 1944).

## Reigning King.

Georgios II, born July 20, 1890, married February 27, 1921, *Elizabeth*, elder daughter of King Ferdinand and Queen Marie of Rumania, from whom he was divorced on July 7, 1935.

*Living Brother and Sisters of the King*.—(1) Prince *Paul*, the Diadoch, born December 14, 1901, married January 9, 1938, Princess Frederika Luise,

daughter of the Duke of Brunswick; *offspring*: Princess *Sophia*, born November 2, 1938; Prince *Constantine*, born June 2, 1940; Princess *Irene*, born at Capetown on May 11, 1942; (2) Princess *Helen*, born May 3, 1896, married March 10, 1921, Carol II, King of Rumania (from whom she obtained a divorce June 21, 1928), styled the Queen-Mother of Rumania; (3) Princess *Irene*, born February 13, 1904, married July 1, 1939, Aymon, Duke of Aosta, born March 9, 1900, son of Emanuele-Filiberto, Duke of Aosta, second cousin of the King of Italy; and (4) Princess *Catherine*, born May 4, 1913.

The re-establishment of the Constitution of 1911 was proclaimed by General Kondylis on October 11, 1935. On January 26, 1936, a general election was held for a Revisionary Chamber empowered to amend that Constitution, but on August 4, 1936, fearing a Communist rising, the Government proclaimed martial law, suspended certain articles of the Constitution, dissolved the Chamber and set up a Dictatorship under General Metaxas.

The Cabinet formed on January 4, 1945, is composed as follows:—

*Prime Minister, Minister of National Defence (War, Air and Marine) and of Mercantile Marine.*—General Nikolaos Plastiras.

*Minister of Foreign Affairs.*—John Sophianopoulos.

*Minister of Finance and of Supplies.*—George Sideris.

*Minister of Justice, Social Welfare and Public Health.*—M. Kolyvas.

*Minister of Agriculture and of National Economy.*—John Glavanis.

*Minister of Communications and Transport.*—General Lukas Sakellariopoulos.

On October 28, 1940, Italy sent an ultimatum to Greece, demanding certain concessions amounting to complete capitulation. The ultimatum being rejected, the Italians marched from Albania into Greece. By March, 1941, not only had the Greeks driven the Italian army beyond the frontier but Greek forces were in occupation of one quarter of Albania, including Koritza, Santi Quaranta, Argyrokaastro and Chimara. But on April 6, 1941, Germany launched an attack on Greece, and the German armies came to the assistance of the Italians in Albania, forced the Greek army there to capitulate on April 20, and conquered Greece by April 27, when German troops marched into Athens.

Political and military events forced the Germans to evacuate Greece, and by October 15, 1944, the whole of the country was cleared. M. Papandriou, the then Prime Minister, arrived in Athens on October 18.

### Area and Population.

The total area of the country is 129,880 square kilometres or 50,147 square miles, of which the mainland accounts for 41,328 square miles and the islands account for 8,819 square miles.

The population of the country was 6,204,684, according to the census of May 16, 1928. By geographical divisions the population was as follows, revised as at December 31, 1938;—

| Geographical division               | Area in sq. miles | Population | Geographical division    | Area in sq. miles | Population |
|-------------------------------------|-------------------|------------|--------------------------|-------------------|------------|
| Central Greece and Euboea . . . . . | 9,704             | 1,799,169  | Macedonia . . . . .      | 18,360            | 1,686,479  |
| Thessaly . . . . .                  | 5,208             | 562,020    | Epirus . . . . .         | 3,688             | 368,041    |

<sup>1</sup> In August, 1937, this was the Greek name into which the department and town formerly known as Salonika was changed.

Pireus, the second city in Greece, has a population of 284,070.

There were 3,076,235 males and 3,128,449 females according to the 1928 census, while the urban population was shown as 33 per cent., and rural population 67 per cent. On December 31, 1938, the population was estimated at 7,108,814; for 1940 at 7,535,000.

Mount Athos, the easternmost of the three prongs of the peninsula of Chalcidice is inhabited by the monks of Greek (17), Russian (1), Bulgarian (1), and Serbian (1) monasteries and hermitages (*Sketari*). The monks and the novices till the fields, tend the vineyards, take in the harvest, fish,

weave, transact business in their own shops, and, indeed, carry on the secular duties of the community as well as the sacred. Originally inhabited by one mediæval ascetic, Peter the Athonite, it has in the course of time grown to a religious colony of 4,858 males (census of 1928), distributed in 20 monasteries with their respective dependencies; and after having passed in the fifteenth century from the sovereignty of the Greek Emperors of Byzantium to that of the Sultans it fell again into the hands of the Greeks, who occupied it in November, 1912. Each of the 20 monasteries is a sort of little republic in itself, those of the 'coenobitic' category being ruled by abbots elected by the brethren of the monastery, while the 'idiorrhhythmic' monasteries are administered by a board of overseers (*epitropoi*) elected for a certain term of years. For centuries the peninsula was administered by a Council of 4 members, and an Assembly of 20 members, the latter consisting of 1 deputy from each monastery. The Greek government on September 10, 1923, recognized the autonomous form of government existing in Mount Athos for centuries and ratified it by Articles 109-112 of the Constitution. It has also sanctioned by a law the Charter of Mount Athos, which was drawn up at the extraordinary double meeting held by representatives of its 20 monasteries on May 20, 1924.

Since 1925, there has been a fiscal Free Zone in the town of Salonika (Thessaloniki) covering (1937) an area of 268,505 square yards on land and 191,354 square yards on water with 7,655 yards of railway. Since 1924 there has been a Yugoslav Free Zone in the port of Salonika (Thessaloniki) with an area of 72,623 square yards on land and 40,512 square yards on water with 2,461 yards (of railway). Since 1932 there has been a Free Zone in the town of Piræus, covering (1937) an area of 217,067 square yards in land, with a frontage on the sea of 1,941 yards and 1,094 yards of railway.

Vital statistics for 1937:—births, 183,862; marriages, 45,785; deaths, 105,762.

### Religion.

According to the census of 1928, there were 5,961,529 adherents of the Greek Orthodox Church, 35,182 Catholics, 9,003 Protestants, 126,017 Mussulmans, 72,791 Jews and 162 belonging to other religions. By the terms of the Constitution of 1864, the Greek Orthodox Church was declared the religion of the State, but complete toleration and liberty of worship was guaranteed to all other sects. The government of the Orthodox Church is at present vested in a permanent council, called the Holy Synod, consisting of the Metropolitan of Athens as president and 12 metropolitans, who must during their year of office reside at Athens. The Orthodox Church has 30 archbishops in the old territory and 43 archbishops and 6 bishops in the new territories. By agreement with the Œcumenical Patriarchate of Constantinople in 1929 the sees within the spiritual jurisdiction of the latter in the new territories were provisionally attached to that of the Holy Synod of Athens for convenience in administration.

### Education.

All children between the ages of seven and twelve years must attend school.

There were (1937-38) 743 infant schools with 781 teachers and 38,338 pupils (19,663 boys and 18,725 girls); 8,389 primary schools with 15,573 teachers (8,854 men and 6,719 women) and 985,018 pupils (531,735 boys and 453,283 girls). For secondary education there were 407 high schools with 3,735 teachers (3,131 men and 604 women) and 92,687 pupils (63,689 boys and 29,998 girls). For higher studies there were 2 universities in

Athens, the National University, founded 1834, and the Capodistria University, with 218 professors and 5,748 students (5,069 men and 679 women), and 1 at Salonika with 76 professors and 1,582 students (1,416 men and 166 women); the Polytechnic in Athens, with 5 faculties and 3 annexed schools, 47 professors and 521 students (515 men and 6 women); the School of Fine Arts, providing instruction in painting, sculpture, etc., with 14 professors and 147 students (103 boys and 44 girls).

The Ministry of Education is also charged with the Service of Antiquities, managed by an Archaeological Council, which is responsible for the conservation and reparation of ancient monuments of all periods (Prehistoric, Classical, Byzantine and Mediæval), the upkeep of museums and the conduct of excavations.

British scholarship is represented in Athens by the British School of Archaeology, which, by the aid of grants from the Government, universities, and private subscribers, is able to encourage and carry out scientific research of all kinds, but especially art, archaeology and history. Members of the school have in recent years been responsible for the excavations at Knossos, in Crete, in Melos, at Sparta, in Thessaly, at Mycenæ, and elsewhere. There are also similar French, American, Italian, Austrian and German institutions.

### Finance.

The estimates of revenue and expenditure for 6 years are as follows:—

| Year    | Revenue        | Expenditure    | Year    | Revenue        | Expenditure    |
|---------|----------------|----------------|---------|----------------|----------------|
|         | Drachmai       | Drachmai       |         | Drachmai       | Drachmai       |
| 1934-35 | 10,498,112,747 | 11,819,779,488 | 1937-38 | 16,093,889,112 | 15,467,308,101 |
| 1935-36 | 10,812,968,823 | 11,165,106,587 | 1938-39 | 14,519,062,942 | 15,106,354,667 |
| 1936-37 | 11,184,010,480 | 12,798,879,116 | 1939-40 | 14,014,821,660 | 14,662,841,014 |

The total public debt of Greece amounted on December 31, 1938, to 52,141,931,380 drachmai, distributed as follows: Loans in gold, 32,069,845,879 drachmai; loans in banknotes, 13,837,633,960 drachmai; floating debt, 990,921,243 drachmai; various engagements and unpaid interest outstanding, 5,243,530,298 drachmai. The service on this debt during the fiscal year ended March 31, 1939, is estimated at 2,194,472,115 drachmai.

In accordance with the peace preliminaries between Greece and Turkey and the Greek Law of Control of March, 1898, the financial commission of delegates representing France, Great Britain, and Italy (the mediating Powers) is established at Athens in direct relation with the Greek Minister of Finance. The public debt of Greece is in large measure under the control of this commission. To this commission were assigned, for the payment of the interest on the external debt, the revenues (for the most part in Old Greece) from certain Government monopolies, the stamp duty, and the import duties at the port of the Piræus. The total income from these sources was in 1939, 4,909,000,000 drachmai. Returns for 1939 (1938 in parentheses), in thousands of drachmai, were as follows: tobacco, 1,763,927 (1,661,778); stamp fees, 470,949 (438,484); alcohol, 804,841 (810,463); matches, 141,325 (125,839); kerosene, 124,215 (116,279); salt, 120,102 (115,130); cigarette paper, 52,063 (62,318); emery of Naxos, 22,257 (20,415), and playing cards, 15,376 (14,758).

The payments made by the commission in 1938-39 for the service of Greek foreign debts totalled 1,975,608,708 drachmai.

 The Nazi Primer (Word for word translation of the Official Handbook for Nazi Youth). New York, 1938.  
 Germany Speaks. London, 1938.  
 Germany: The Last Four Years. By 'Germanicus.' (Reprinted from *The Banker*.) Boston, 1937.  
 Documents concerning German-Polish relations and the outbreak of hostilities between Great Britain and Germany on September 3, 1939. (Cmd. 6106.) London, 1939.  
 Documents illustrating the horrors of concentration camps in Germany. (Cmd. 6120.) London, 1939.

The collection of the assigned revenues and the administration of the monopolies are entrusted to a Greek Company, called the 'Société de Régie des Revenus affectés au Service de la Dette Publique,' which is under the control of the international commission.

## Defence.

### I. ARMY.

Military service in Greece was compulsory and universal. It commences in the 21st year and lasted up to the 50th. The normal term of service in the active army was 24 months for all arms, followed by 19 years in the first reserve of the active army and 8 years in the second. The normal annual contingent of recruits in peace time was about 50,000. Each annual contingent was called up for service in the active army in two batches in March and September.

Prior to the war the Army was organised in 4 army corps, with headquarters at Athens, Larissa, Salonica and Cavalla, and comprised 13 divisions and 1 cavalry division. Each division contained 2 or 3 regiments of infantry (6 battalions) and one regiment of mountain artillery (3 or 4 batteries). Its armament was mostly of obsolescent types.

After the Italian invasion, the Greek Army was furnished by the British with a number of more modern weapons—including anti-aircraft and anti-tank guns. These were supplemented by arms captured from the Italians.

The Air Ministry, created in 1929, controlled Army and Navy aviation. Before the war there were 10 groups, each of 3 flights of 4 aircraft. Greek air squadrons are co-operating with the R.A.F.

### II. NAVY.

The Greek Navy is composed mainly of light craft. The largest vessel is the cruiser *Averof*, of 9,450 tons, launched in 1910, but modernised in 1925-27. Her armament includes four 9.2 in. and eight 7.5 guns, and she has a nominal speed of 22.5 knots.

There are 13 destroyers, 3 old torpedo boats, 4 submarines, 4 corvettes, 15 minesweepers and sundry miscellaneous craft.

All the above vessels are serving with the Allied forces.

## Production and Industry.

Greece is mainly an agricultural country. Of the total area only one-fifth is cultivable. The total area under cultivation in 1938 was 2,409,553 hectares (6,023,882 acres). Forest area is 2,406,502 hectares (5,944,059 acres), of which 4,121,119 acres were State owned.

The acreage and production of the chief crops for two years were as follows:—

|                | Area in Acres |           | Production in Metric Tons |         |
|----------------|---------------|-----------|---------------------------|---------|
|                | 1937          | 1938      | 1937                      | 1938    |
| Wheat . . .    | 2,115,928     | 2,151,217 | 817,825                   | 980,237 |
| Barley . . .   | 523,613       | 488,562   | 219,104                   | 221,075 |
| Maize . . .    | 689,651       | 693,713   | 322,599                   | 217,382 |
| Oats . . .     | 359,362       | 342,081   | 134,321                   | 134,905 |
| Tobacco . . .  | 235,442       | 210,176   | 69,315                    | 48,066  |
| Cotton . . .   | 178,272       | 170,334   | 54,564                    | 45,296  |
| New wine . . . | 385,280       | 392,382   | 336,854                   | 463,557 |
| Currents . . . | 192,284       | 199,325   | 189,176                   | 187,508 |

In 1940 the tobacco yield was 48,900 metric tons; wheat, 896,000 metric tons; currants, 121,775 metric tons; raisins, 23,000 metric tons; olives, 24,000 metric tons.

Olives are abundant, about 380,000 acres being under cultivation; olive oil production in 1938 was 102,805 metric tons, valued at 2,233,306,011 drachmai, as compared with 187,471 metric tons, valued at 4,007,965,670 drachmai in 1937. Fruit production in 1938 was: lemons, 296,124,000, valued at 71,660,723 drachmai; oranges, 268,612,000 (178,248,505 drachmai); mandarins, 155,367,000 (78,274,127 drachmai); apples, 71,959 metric quintals (48,267,081 drachmai); pears, 285,274 metric quintals (89,163,769 drachmai); figs (dried), 323,406 metric quintals (171,109,780 drachmai). Rice is cultivated in Greek Macedonia—Vodena, near Salonika, being the principal centre. Two kinds of cheese are produced in Greece—sliced cheese in brine (commercially known as Fetta cheese) and head-cheese.

There were in Greece (1938) 363,083 horses, 183,619 mules, 404,379 asses, 967,322 cattle, 8,138,772 sheep, 4,356,120 goats, and 429,748 pigs.

Greece has a great variety of mineral deposits. The ore and other minerals worked include iron, iron-pyrites, emery, copper, zinc, lead, silver, manganese, aluminium, antimony, nickel, magnesite ore, lignite, sulphur ochre, bitumen, marble (white and coloured), and various other earths. The Laurium district, Thessaly, Euboea, the Aegean islands and other parts of Greece yield a large output of ores and earths.

The principal mineral output of Greece for three years is given as follows (in metric tons):—

|                       | 1936        | 1937        | 1938        |                 | 1936        | 1937        | 1938        |
|-----------------------|-------------|-------------|-------------|-----------------|-------------|-------------|-------------|
|                       | Metric tons | Metric tons | Metric tons |                 | Metric tons | Metric tons | Metric tons |
| Iron ore . . .        | 280,271     | 300,498     | 348,613     | Chromites . . . | 47,347      | 52,620      | 42,464      |
| Iron pyrites . . .    | 208,050     | 206,650     | 244,000     | Emery . . .     | 15,000      | 7,458       | 3,078       |
| Lead (ore) . . .      | 19,730      | 20,181      | 14,889      | Lignites . . .  | 105,621     | 181,083     | 108,010     |
| Magnesite (raw) . . . | 116,106     | 161,676     | 168,243     |                 |             |             |             |

Industry in Greece is making considerable progress. The leading industrial products are olive oil, wine, textiles, chemicals, articles of food. In 1938 the value of the production of industries was 13,552,083 drachmai, as compared with 13,829,834 drachmai in 1937.

## Commerce.

Value of the commerce of Greece (in thousands of drachmai) for five years was as follows:—

|               | 1936           | 1937           | 1938           | 1939           | 1940           |
|---------------|----------------|----------------|----------------|----------------|----------------|
|               | 1,000 Drachmai | 1,000 Drachmai | 1,000 Drachmai | 1,000 Drachmai | 1,000 Drachmai |
| Imports . . . | 11,962,620     | 15,204,363     | 14,761,395     | 12,275,404     | 12,215,326     |
| Exports . . . | 7,378,377      | 9,555,293      | 10,149,180     | 9,199,867      | 9,009,380      |

The trade was distributed, by principal countries, as follows:—

| Countries      | Imports from   |                | Exports to     |                |
|----------------|----------------|----------------|----------------|----------------|
|                | 1938           | 1939           | 1938           | 1939           |
|                | 1,000 Drachmai | 1,000 Drachmai | 1,000 Drachmai | 1,000 Drachmai |
| Great Britain  | 1,926,068      | 1,479,142      | 648,446        | 1,356,906      |
| Egypt          | 244,029        | 819,946        | 218,641        | 208,880        |
| United States  | 1,069,585      | 868,980        | 1,731,047      | 1,991,250      |
| Bulgaria       | 38,182         | 71,093         | 30,045         | 24,903         |
| France         | 228,598        | —              | 295,819        | —              |
| Germany        | 4,256,428      | 3,674,428      | 3,901,067      | 2,581,909      |
| Switzerland    | 85,910         | 106,723        | 97,251         | 171,890        |
| Italy          | 500,609        | 652,975        | 525,386        | 582,182        |
| Netherlands    | 305,681        | 229,756        | 231,045        | 389,584        |
| Rumania        | 1,516,167      | 1,151,798      | 234,217        | 197,344        |
| U.S.S.R.       | 864,618        | 239,035        | 51,524         | 14,841         |
| Yugoslavia     | 452,816        | 418,487        | 226,092        | 197,425        |
| Turkey         | 272,772        | 164,909        | 66,001         | 105,819        |
| Sweden         | 178,713        | —              | 49,334         | —              |
| Czechoslovakia | 241,186        | 244,648        | 295,771        | 187,716        |
| Hungary        | 108,581        | 210,989        | 150,789        | 92,366         |

In 1940 Germany led the way in both imports and exports: 2,871,301,000 drachmai and 343,056,200 drachmai respectively; the United States came second with 1,889,253,000 drachmai imports and 2,273,842,000 drachmai exports.

The staple article of import from Greece into the United Kingdom (Board of Trade returns) is currants, the value of which amounted in 1938 to 1,112,465*l*. Other articles of import in 1938 were:—raisins, 162,711*l*; gums and tobacco, 182,074*l*. Of the exports from the United Kingdom to Greece in 1938, cotton piece goods were valued at 325,385*l*; woollen and worsted yarns and manufactures, 617,422*l*; coal, 165,264*l*; machinery, 182,542*l*.

The total trade between Greece and the United Kingdom for 5 years was as follows:—

|                                | 1934      | 1935      | 1936      | 1937      | 1938      |
|--------------------------------|-----------|-----------|-----------|-----------|-----------|
| Imports from Greece to U.K.    | 2,386,741 | 2,095,213 | 2,174,982 | 2,124,788 | 1,978,089 |
| Exports to Greece from U.K.    | 2,682,181 | 2,924,378 | 3,321,703 | 2,946,094 | 3,751,907 |
| Re-exports to Greece from U.K. | 239,691   | 282,287   | 317,850   | 233,622   | 116,806   |

### Navigation and Shipping.

The merchant navy of Greece on June 30, 1939, had 589 steam and motor ships of 1,812,723 tons and 710 sailing vessels of 55,417 tons. In the year 1938, 2,992 vessels of 5,475,764 tons entered and 2,263 vessels of 4,864,110 tons cleared the ports of Greece.

### Communications.

There are 8,440 miles of roads in Greece, of which 7,064 are improved earth, gravel, and water-bound macadam; 1,191 of surface treated and penetration macadam; and 185 of bituminous concrete and asphalt surfaced concrete roads.

There is a canal (opened November 9, 1893) across the Isthmus of Corinth

(about 4 miles). In 1938, 6,942 steamers of 2,736,298 tons and 863 sailing vessels of 11,791 tons passed through the canal.

Railways open for traffic total a length of 1,668 miles, of which 823 miles are operated by the State.

There was an air service, run by a Greek company, which connects Athens with Drama via Salonica, and Athens and Jannina (Epirus), via Agrinion. In 1938, 7,395 passengers were carried, and 230,800 kilogrammes of freight, in addition to 7,785 kilogrammes of postal matter. A number of foreign air companies also operate services in Greece.

The telegraph lines on December 31, 1938, had a length of 24,101 kilometres, with 59,123 kilometres of wire. The number of offices was 5,423. They handled 4,783,842 inland telegrams, and 634,141 international, of which 291,246 were despatched abroad and 342,895 were received.

In 1938 there were 1,208 kilometres of urban telephone lines with 207,834 kilometres of wire, and 11,096 kilometres of inter-urban lines with 33,380 kilometres of wire. The number of subscribers was 38,427, and the number of offices 42.

There were 1,368 post offices at the end of 1937, and there passed through the post in that year (inland post):—letters, 44,790,780; post-cards, 1,543,720; printed matter journals and samples, 35,806,547; postal orders, 1,588,897, of a total value of drachmai 1,768,190,245; parcels, 515,126. Foreign postal service (despatched):—letters, 9,405,134; post-cards, 1,053,265; printed matter and journals, 2,950,734; parcels, 11,695. Foreign postal service (received):—letters, 10,822,923; post-cards, 967,380; journals and other printed paper, 4,036,286; parcels, 67,808; money orders, 33,890, of a total value of drachmai 44,908,357. Total postal revenue, 515 million drachmai in 1939.

### Banking, Money, Weights and Measures.

The National Bank (founded in 1841) was authorised to issue bank notes, the amount being increased each time the privilege of the bank was extended. According to a decree of May 12, 1928, the note-issuing privilege of the National Bank was transferred to the new issuing bank, the Bank of Greece, as from May 14, 1928, in accordance with the conditions of the Geneva Protocol of September 15, 1927. By the same decree, the drachma was stabilised, its gold content being fixed at 0.01952634 grammes of gold, corresponding to 77.02 drachmai to the U.S. dollar, but the stabilisation has been suspended since April 26, 1932. On December 31, 1939, the total bank-note circulation amounted to 9,458,000,000 drachmai; total gold, 4,223,000,000 drachmai.

On December 31, 1936, there were 29 banks in Greece with deposits amounting to 17,371 million drachmai, and capital, 1,970 million drachmai.

On December 31, 1936, the balance standing to the credit of the 550,568 depositors in the Post Office Savings Bank totalled 2,870,975,000 drachmai.

The *Drachma* consists of 100 *lepta*. Nickel coinage in circulation consists of 10, 20 and 50 *lepta*, 1 and 2 drachmai; there are also pieces of 5, 10, and 20 drachmai, made of silver and nickel, but these silver and nickel pieces are to be withdrawn from circulation on July 1, 1940. In November, 1940, 100 and 20 gold drachmai pieces were struck.

On November 11, 1944, the Greek currency was stabilised at 600 drachmai to the £ sterling or the British military pound. The new notes are to be backed to the extent of 100 per cent. by gold and foreign exchange.

In 1920 the metric system was made compulsory. The use of the Gregorian Calendar has been authorised as from March 1, 1923.

The old weights and measures are still met with. The principal are :—

- 1 oke = 400 drams = 2.832 lb.
- 1 kantar = 44 okes = 124.608 lb.
- 1 pik = 27 inches.
- 1 stremma = 2471 acres.

The Great Venetian pound (G. V. lb.) is used universally in the currant trade; 2,128 G. V. lb. = 1 long ton.

### Diplomatic Representatives.

#### 1. OF GREECE IN GREAT BRITAIN.

*Ambassador Extraordinary and Plenipotentiary.*—Thanassis Aghnides (assumed office, December 3, 1942).

*Counsellor.*—Jean A. Romanos.

*First Secretaries.*—Dimitri Lambros and Othon Contostavlos.

*Second Secretary.*—Thomas Ypsilanti.

*Military Attaché.*—Col. George Contoleon.

*Naval Attaché.*—Captain J. Vlahopoulos, R.H.N.

*Air Attaché.*—Wing Commander Menelaos Kinatos, R.H.A.F.

*Commercial Counsellor.*—Spiro X. Constantinidi.

*Consul-General.*—Georges Dracopoulos.

There are consular officers of Greece at London, Belfast, Birmingham, Bradford, Bristol, Cardiff, Glasgow, Manchester, Liverpool, Newcastle, Portsmouth and Southampton.

#### 2. OF GREAT BRITAIN IN GREECE.

*Ambassador Extraordinary and Plenipotentiary.*—Sir Reginald Wildg (Allea Leeper, K.C.M.G. (appointed February 27, 1943).

*Secretaries.*—E. R. Warner, R. P. Heppel and A. R. Brown.

There are Consular officers at Patras, Piræus and Salonika.

### Statistical and other Books of Reference concerning Greece.

#### 1. OFFICIAL PUBLICATIONS.

*Annuaire Statistique de la Grèce.* First issue, 1931.

The Statistical Bureau also publishes many monthly and annual returns, among others :—  
Recensements de la population. Résultats statistiques généraux des recensements.—  
Statistique du mouvement de la population.—Statistique des causes de décès.—Statistique des élections.—Statistique annuelle du Rendement Agricole etc. de la Grèce.—(Effectif du bétail.—Dénombrement des arbres.)—Bulletins du mouvement de la navigation de la Grèce avec l'étranger.—Bulletins mensuels et annuels du commerce spécial de la Grèce avec les pays étrangers.—Statistique des Postes, Télégraphes et Téléphones.—Bulletin mensuel de Statistique.

Compte Rendu (annuel) des opérations de la Commission Financière Internationale.

## GUATEMALA.

(REPÚBLICA DE GUATEMALA.)

### Constitution and Government.

THE Republic of Guatemala was established on April 17, 1839, after having formed for eighteen years part of the Confederation of Central America. The present Constitution came into effect January 1, 1928. The legislative

power is vested in a single-chambered National Assembly, consisting of 74 representatives (one for every 30,000 inhabitants) chosen by direct popular vote for 4 years. In addition a Council of State of 7 members, 3 elected by the National Assembly, and 4 appointed by the President of the Republic, has supervision of public concessions and contracts, and large advisory powers. The President is normally elected for 6 years, and barred from re-election for a period of 12 years, but President Ubico's term, which expired in 1937, was, as the result of a plebiscite held in June, 1935, and through an amendment to the Constitution in September, 1941, extended to March 15, 1949.

*President of the Republic.*—Dr. Juan José *Averato*, elected December 19, 1944 (following the overthrow of the short-lived dictatorship of General Frederico Ponce, who had gained power in July, 1944); assumed office March 15, 1945, for four years.

Guatemala declared war against Japan on December 8, 1941, and against Germany and Italy on December 11, 1941; it broke off relations with Spain on January 24, 1945.

The administration is carried on, under the President, by the heads of seven departments—of Foreign Affairs, Government and Justice, Finance and Public Credit, Public Instruction, Public Works, War, and Agriculture.

### Area and Population.

The area is officially given as 45,452 square miles, including the territory recently acquired from Honduras by arbitration award. In March, 1936, Guatemala, Salvador and Honduras agreed to accept the peak of Mt. Montecristo as the common boundary point. The population, according to the 1940 census, was 3,284,269. Estimated population in 1943, 3,450,732. About 60 per cent. are pure Indians, of 21 different groups descended from the Maya-Quiché tribe; most of the remainder are mixed Indian and Spanish (*ladinos*); the ruling classes are of European descent. There were 18,405 foreigners on December 31, 1934. Recent legislation has abolished the system of peonage and debt servitude formerly prevailing on the large plantations; the maximum amount of debt which may be charged against a peon's wages is 2 quetzales or dollars. But work is obligatory for at least 150 days per annum. Guatemala is administratively divided into 22 departments, each with a governor appointed by the President.

The capital is Guatemala City, with 176,780 inhabitants (April, 1910), almost all *ladinos* or descendants of Europeans. Other towns are Quezaltenango (30,125), Coban (26,774) and Zacapa (18,094).

### Religion and Education.

Roman Catholicism is the prevailing religion; but all other creeds have complete liberty of worship. Guatemala has an archbishopric.

In the calendar year 1943, there were 2,784 primary schools with 5,100 teachers and an attendance of 152,274 pupils; in 1942 there were 28 secondary schools with 710 teachers and an attendance of 5,600 pupils; the University of Guatemala (originally founded in 1878 as the University of San Carlos de Borromeo) was re-opened in 1910 with seven faculties and schools, 168 teachers and an attendance of 694 students. All education is free.

There are 37 public libraries in the country.

### Justice and Crime.

Justice is administered in a supreme court, 6 appeal courts, and 28 courts of first instance. Under the 1935 amendments to the Constitution, Judges

of first instance are appointed directly by the President, but Supreme Court and Appeal Court Judges continue to be appointed by the National Assembly as before.

All holders of public office have to show on entering office, and again on leaving, a full account of their private property and income.

### Finance.

Ordinary revenue and expenditure in currency (1 quetzal = 1 U.S. dollar):—

|               | 1939-40                 | 1940-41                 | 1941-42 <sup>1</sup>    | 1942-43 <sup>1</sup>    | 1943-44 <sup>1</sup>    |
|---------------|-------------------------|-------------------------|-------------------------|-------------------------|-------------------------|
| Revenue . .   | Quetzales<br>12,150,178 | Quetzales<br>11,589,800 | Quetzales<br>10,223,120 | Quetzales<br>10,083,212 | Quetzales<br>10,575,692 |
| Expenditure . | 10,949,762              | 10,874,905              | 10,223,120              | 10,083,212              | 10,575,692              |

<sup>1</sup> Budget estimates.

Actual expenditures, 1941-42, were 10,851,846 quetzales; in 1942-43, 12,752,880 quetzales. Actual revenues in both years were not published, though officially stated to be greater than the expenditures.

Principal items of expenditure in quetzales (1943-44) were: public debt service, 800,000; war, 1,900,000; education, 1,330,000; interior, 2,022,000; finance, 1,155,000; and public works, 1,082,000.

On December 31, 1943, the total public debt was 4,003,943 quetzales, excluding the 'English debt' of 1,520,432. Sinking fund of the external debt has been suspended since 1932, but interest payments have continued. On June 28, 1944, a few days before resigning, President Ubico decreed the total redemption of the 4 per cent. external debt and of the bonds of the Republic (debt of the International Railways of Central America); the bonds were duly redeemed on January 15, 1945. British investments, 1944, were 10,587,728, of which 59.6 per cent. was in default. American direct investments, 1940, were 68,224,000 dollars; American holdings of Guatemala dollar bonds, end of 1941, were 2,600,000 dollars.

### Defence.

Military service is compulsory between the ages of 18 and 50 (from 18 to 30 in the special reserves). Service in the active Army is for 1 year for infantry and cavalry and 2 years for artillery and engineer corps; in addition there are 80 companies of volunteers. The effectives for 1944 were 21,148 for the fighting services and 575 for auxiliary services. There is a small Air Force under French instruction. New air-ports were built during 1944 at Puerto Barrios and San José. The military estimates for 1943-44 were 1,900,000 quetzales.

### Production and Industry.

The Cordilleras divide Guatemala into two unequal drainage areas, of which the Atlantic is much the greater. The Pacific slope, though comparatively narrow, is exceptionally well watered and fertile between the altitudes of 1,000 and 5,000 feet, and is the most densely settled part of the Republic. The Atlantic slope is sparsely populated and has little of commercial importance beyond the chicle and timber cutting of the Petén, coffee cultivation of Coban region, and banana raising of the Motagua Valley and Lake Izabal district.

The soil in general is exceedingly fertile and agriculture is the most important industry. The principal crop is coffee; there were 10,841 coffee

plantations in 1943, occupying one-fifth of the cultivated land and accounting for 70 per cent. of total exports. Germans normally own and control between 30 and 40 per cent. of the coffee plantations of Guatemala, but in 1942 the Government took over the German plantations, which are now owned by the nation and administered by the Central Bank. In 1943, 425,544 persons were employed in the production of coffee. The United States took 850,557 metric quintals or 90 per cent. of coffee exports in the 1940-41 crop year. Value of exports, 1942, was 13,636,000 dollars. Under the Inter-American Coffee Agreement, her export quota to the United States, 1943-44, was 705,248 bags (of 60 kilos). Next to coffee, bananas are the most important export crop; exports, 1943, 2,664,314 stems. Output in 1941, 8,826,580 stems. Sugar production in 1940-41 amounted to 20,745 metric tons; maize, beans and wheat are important domestic crops. Guatemala is, after Mexico, the largest producer of chicle gum used for chewing gum manufacture in the United States; exports in 1942 season was 3,700,000 lb. Twenty-five nurseries for rubber trees and cinchona plantations for the production of quinine were established, but the alkaloid content of the succirubra seedlings grown in Guatemala (for quinine) proved too low to justify the effort. Cattle-grounds (potreros) occupy about 758,640 acres. A census of livestock in 1943 showed 729,241 cattle, 438,330 sheep and goats, and 107,356 horses, mules and asses.

The forest area has an extent of 1,316,482 acres. The department of Petén is rich in mahogany and dye woods; exports (1943) were 4,000,000 board feet.

Owing to the lack of transport, general mining is little developed. Chromite is mined in small quantities. Output of salt, 1938, was 10,465 metric tons.

### Commerce.

Value of the commerce for 5 years (normally 1 quetzal = 1 dollar, U.S.):—

|         | 1937                 | 1938                 | 1939                 | 1940                    | 1941                 |
|---------|----------------------|----------------------|----------------------|-------------------------|----------------------|
| Imports | Quetzales 16,742,907 | Quetzales 16,761,888 | Quetzales 15,295,729 | Quetzales 12,066,970    | Quetzales 16,098,907 |
| Exports | 16,108,610           | 16,836,203           | 16,985,360           | 12,039,492 <sup>1</sup> | 14,502,803           |

<sup>1</sup> A new system of customs valuation partly accounts for the drop in 1940.

In 1941, 78.5 per cent. of the imports came from the United States and 3.3 per cent. from Great Britain; of the exports (1941) 92 per cent. went to the United States and 3.9 per cent. to Canada.

The principal imports are cotton textiles, wheat flour, cotton yarn, petroleum products, medicines, lorries and motor cars, and woollen and artificial silk textiles.

Exports included were gold, hides, honey, essential oils and timber.

Total trade between Guatemala and the U.K. for 5 years (according to Board of Trade returns):—

|                                   | 1934      | 1935     | 1936      | 1937     | 1938     |
|-----------------------------------|-----------|----------|-----------|----------|----------|
| Imports from Guatemala to U.K.    | £ 338,102 | £ 16,608 | £ 203,391 | £ 23,910 | £ 42,980 |
| Exports to Guatemala from U.K.    | 183,449   | 213,353  | 194,385   | 278,409  | 170,653  |
| Re-exports to Guatemala from U.K. | 1,687     | 2,099    | 2,157     | 2,041    | 1,623    |

United Kingdom exports (Board of Trade returns) since 1938 have been: 1939, 118,000£.; 1940, 75,000£.; 1941, 133,000£.; 1942, 115,000£.; 1943, 82,000£., and 1944, 52,000£. Totals for the 3 years, 1939-41, included shipments of war supplies, if any, by Government departments.

### Shipping and Communications.

The chief ports on the Atlantic side are Puerto Barrios and Livingston; on the Pacific side, San José and Champerico.

The principal railway system is the American-owned International Railways of Central America which represents a consolidation of 4 small companies, with total mileage, 652. The lines extend from Puerto Barrios to Guatemala City, thence to San José, on the Pacific Ocean. The system extends westward to Ayutla on the Mexican border where it connects with the Mexican State railways. All roads are of 3 ft. gauge. Total mileage of all lines is 737 miles.

There were (1943) 4,320 miles of main and secondary highways in good condition for motor traffic. The opening of a new bridge in 1942 across the Suchiate river between Mexico and Guatemala has completed the linking by railway of North and South America, though differences in gauge make it necessary to change trains at Ayutla.

There were (1938) 385 post-offices. The national telegraph lines had (December 31, 1934) a length of 4,079 miles, and the telephones, 4,172 miles. There are 235 telegraph offices and 12 central and 79 subordinate telephone stations; instruments, 1941, numbered 3,800. Radio stations have been opened at Quezaltenango, Guatemala City, Puerto Barrios and Livingston, which communicate with Mexico City. There are 3 broadcasting stations at Guatemala City; wireless sets in use, 1941, 22,000.

Air-mail and passenger service connects Guatemala City with Tegucigalpa (Honduras), San Salvador, Managua, San José (Costa Rica), Panama, Mexico City and New Orleans.

### Banking, Money, Weights and Measures.

The creation of the Central Bank of Guatemala, with an authorised capital of 10,000,000 quetzales (1,875,000 quetzales paid up in 1940), and the exclusive right to issue paper money for 10 years, was decreed on June 30, 1926. This ended a paper money regime which had lasted since 1897. Total circulation of bank-notes (backed by a gold reserve fixed by law at a minimum of 40 per cent.) on December 31, 1943, was 39,319,417 quetzales, with a gold and foreign exchange reserve of 147 per cent. On August 5, 1942, the bank was given permission to issue notes up to 10 times its capital and reserves. There are five banks, besides the Central Bank. By a decree of May 12, 1932, silver coinage is limited to 2,000,000 quetzales, and copper-nickel to 500,000 quetzales. There is no exchange control.

The unit of currency is the gold *quetzal*, established May 7, 1925, equal to the United States dollar (containing 1.504665 grammes of fine gold), called after the national bird (emblematic of liberty). It is equal to 60 old Guatemala paper pesos. The quetzal, nominally 4.86 to the £, was 4.025 in 1942 and thereafter. Gold coins (being withdrawn from circulation), 20, 10, and 5 quetzales; quetzal notes in circulation, 20, 10, 5, 2, 1 and 50 centavos. Silver coins are in circulation (since May 1, 1933) of

resignation of the Fiscal representative and placed the supervision of the customs in the hands of the Banque Nationale d'Haiti.

### Area and Population.

The area of the Republic, which embraces the western portion of the island of Hispaniola, formerly known as Haiti—the larger but less populated eastern division forming the Dominican Republic—is estimated at 10,204 English square miles. On January 1, 1936, the estimated population was about 3,000,000, excluding 2,000 white foreign residents. There are about 275 persons per square mile. The majority of the population are Negroes; there are also great numbers of Mulatto Haitians, the descendants of the former French settlers. Wealthy and middle-class Haitians number about 5 per cent. of the population, of whom the majority have an average cash income of less than 4 dollars a year. Capital, Port-au-Prince, with about 115,000 inhabitants, situated on a large bay and possessed of an excellent harbour. Cap-Haitien has an estimated population of 12,000; Aux Cayes, 11,875; Gonaïves, 10,500; Port de Paix, 5,000. The official language of the country is French, though most of the common people speak a dialect known as Creole French. The cultural focus of the educated classes is Paris.

### Religion and Education.

The religion is Roman Catholicism. There is an archbishop with 4 suffragan bishops. The Catholic clergy are French (mostly Bretons).

Elementary education is free and compulsory; the school system is modelled after that of France, under the direction of the Secretary of Public Instruction with the country divided into 24 inspectors' districts. The teaching of English was made obligatory in all schools, beginning October 1, 1942. Primary schools (about 1,060) have 1,190 teachers and are attended by approximately 54,000 boys and 33,000 girls. There are 6 national lycées and 15 private secondary schools, with about 6,000 pupils. Agricultural and industrial education is provided by 60 farm schools for boys and 8 urban schools for boys and girls with a total registration of 12,200. There are 2 normal schools at Port-au-Prince. Higher education (free) is offered at the National School of Medicine, the National School of Law, the School of Applied Science, and the Central School of Agriculture. In addition there are strong systems of schools maintained by the Catholic Teaching Orders and a small group under Protestant direction.

### Justice.

Justice is administered by a Court of Cassation and by lower courts, all appointed for 10 years by the President and irremovable, unless impeached.

### Finance.

About 77 per cent. of the revenue of Haiti is derived from customs, paid in American currency on exports and imports. Debt charges absorb about 10 per cent. of revenue.

Revenue and expenditure (fiscal year ending September 30) for five years (in United States dollars; 5 gourdes = 1 U.S. dollar) were:—

|                       | 1938-39   | 1939-40   | 1940-41   | 1941-42   | 1942-43   |
|-----------------------|-----------|-----------|-----------|-----------|-----------|
| Revenue . . . . .     | 6,229,117 | 6,887,000 | 6,754,000 | 5,119,851 | 6,545,817 |
| Expenditure . . . . . | 5,914,960 | 7,042,000 | 6,310,000 | 5,543,232 | 5,605,996 |

Total public debt, December 31, 1943, was 13,553,195 dollars. Debt service is being met in full. American holdings of Haitian dollar bonds, December 31, 1941, were 5,600,000 dollars; direct investments in Haitian enterprises, 1940, 12,479,000 dollars.

### Defence.

An armed force (Garde d'Haiti) of 4,533 officers and men has the functions of a gendarmerie and soldiery. It possesses six 75 m.m. guns for coast defence, six aeroplanes for reconnaissance purposes, three tanks and six coast-guard vessels which are now manned by the newly formed Coast-guards. Two small control vessels are also maintained for Customs purposes. The military budget for 1941-42 amounted to 7,545,595 gourdes.

### Production.

The industries of Haiti are mainly agricultural, carried on in 7 large plains, from 200,000 to 25,000 acres, and in 15 smaller plains down to 2,000 acres. Irrigation is extensively used. The most important product is coffee of excellent quality grown by peasants. Production in 1943-44, 23,600,000 kilos; export quota to the United States, 1943-44, 362,510 bags (of 60 kilos). Cocoa is grown extensively, and cotton and sisal are exported in increasing quantities. The cultivation of tobacco and bananas (brought to Haiti in 1515) is extending. Output of rice is enough for domestic consumption. Haiti has a greater diversity of export crops than any other West Indian area. Sugar is grown; production 1943-44, 63,879 short tons of raw sugar and 3,224,988 gallons of molasses. An extensive sugar central, founded with American capital, has been constructed near Port-au-Prince. An American firm—Société Haitiano-Américaine de Développement Agricole (SHADA)—is planting thousands of acres with cryptostegia rubber and sisal for the war effort. Rum and other spirits are distilled but not exported. Logwood is an important product, and other valuable woods are now exported. Cattle breeding is encouraged.

Haiti possesses undeveloped mineral resources of gold, silver, copper, iron, antimony, tin, sulphur, coal, nickel, gypsum and porphyry.

### Commerce.

Imports and exports for 6 fiscal years ending September 30 (in U.S. dollars):—

|                | Imports   | Exports   |                | Imports    | Exports    |
|----------------|-----------|-----------|----------------|------------|------------|
|                | Dollars   | Dollars   |                | Dollars    | Dollars    |
| 1938 . . . . . | 3,521,472 | 6,981,505 | 1941 . . . . . | 7,431,109  | 6,657,307  |
| 1939 . . . . . | 8,180,737 | 7,267,635 | 1942 . . . . . | 8,467,000  | 5,577,060  |
| 1940 . . . . . | 7,940,115 | 5,399,040 | 1943 . . . . . | 10,972,622 | 10,628,356 |

In 1941-42, the principal exports were coffee, 18,105 metric tons valued at 3,476,578 dollars; raw cotton, 2,290 metric tons, valued at 471,970 dollars; raw sugar, 19,336 metric tons, valued at 1,085,293 dollars; bananas, 1,931,305 stems, valued at 909,424 dollars; and sisal, 11,607 metric tons, valued at 1,692,962 dollars.

During 1943 the United States continued the most important market for Haitian exports and the principal supplier of Haitian imports. The chief countries sharing in Haiti's foreign trade were: United States, 76 per cent.; Mexico, 5.6 per cent.; Canada, 4.5 per cent.; United Kingdom, 3.1 per cent.; Colombia, 3.6 per cent.

the value of 25-centavo, 10-centavo and 5-centavo, and also new 2-centavo, 1-centavo and half-centavo copper-nickel coins.

|                                          |                 |                                          |                 |
|------------------------------------------|-----------------|------------------------------------------|-----------------|
| <i>Libra</i> of 16 oz. . . . .           | = 1.014 lb.     | <i>League</i> . . . . .                  | = 3 miles.      |
| <i>Arroba</i> of 25 libras . . . .       | = 25.35 lb.     | <i>Vara</i> . . . . .                    | = 32 inches.    |
| <i>Quintal</i> of 4 arrobas = 101.40 lb. |                 | <i>Manzana</i> . . . . .                 | = 100 varas sq. |
| <i>Tonelada</i> of 20 quintals . . . .   | = 18.10 cwt.    | <i>Caballeria</i> of 64 manzanas . . . . | = 110 acres.    |
| <i>Fanega</i> . . . . .                  | = 1½ imp. bahl. |                                          |                 |

The metric system has been officially adopted.

## Diplomatic and Consular Representatives.

### 1. OF GUATEMALA IN GREAT BRITAIN.

*Chargé d'Affaires*.—Dr. Ismael González Arevalo.

There are also Consular representatives at Glasgow, Liverpool (C.G.) and Belfast.

### 2. OF GREAT BRITAIN IN GUATEMALA.

*Envoy Extraordinary, Minister Plenipotentiary, and Consul-General*.—John Hurlston Leche, C.M.G., O.B.E. (appointed June 1, 1939).

*First Secretary, Commercial Secretary and Consul*.—J. W. Taylor, M.B.E.

*Second Secretary and Vice-Consul*.—J. H. Dickinson.

*Air Attaché*.—Wing-Commander D. M. Ryan, D.F.C.

*Military Attaché*.—Col. N. P. Wright.

*Naval Attaché*.—Rear Admiral H. Pott, M.V.O.

*Canadian Trade Commissioner*.—O. S. Bissett (resident at Mexico City).

There is an unsalaried Consul at Quezaltenango, and unsalaried Vice-Consuls at Puerto Barrios and San José.

## HAITI.

(RÉPUBLIQUE D'HAÏTI.)

AFTER the discovery of Hispaniola by Columbus in 1492, Spain took possession of the island and of its native Indians. Owing to war and other causes, the natives disappeared, and to repopulate the island, Bishop Las Casas in 1617 obtained permission from the Spanish Crown to bring over African Negroes, thus establishing the African-American slave traffic.

### Constitution and Government.

The Republic of Haiti, which had been a French colony since 1677, was proclaimed independent on January 1, 1801, under the leadership of a black chieftain, Toussaint L'Ouverture, who founded a kingdom which lasted until 1820. Since then Haiti has been a Republic which is now governed under a centralized system laid down by the Constitution of 1935, to which, however, 20 amendments were added in July, 1939, materially increasing the powers of the National Assembly. The President is now elected by two-thirds vote of the National Assembly, serves for 7 years and is eligible for re-election. Amendments to the Constitution are now the exclusive power of the National Assembly, which is composed of 37 deputies and 21 senators and, as life members, all the former Presidents of the Republic who have completed one term of office. Deputies are elected for 4 years by popular vote; senators for 6 years, 11 of these are elected by the Chamber of Deputies and 10 are appointed by the President of the Republic. One-third of the number retires every 2 years. Under the Constitution, deputies and senators must own real property in Haiti.

Women of 30 years of age are eligible for all public offices, but do not have the right to vote.

*President of the Republic*.—Élie Lescot (born 1883); elected April 15, 1941, for a period of 5 years from May 15, 1941; term extended by the National Assembly on April 22, 1944, to May 15, 1951.

The administration of the Republic is carried on, under the President, by departments.

Haiti declared war on Japan on December 8, 1941; on Germany and Italy on December 12, and on Bulgaria, Hungary and Rumania on December 24.

In November, 1915, both Houses of the Haitian Congress ratified a treaty with the United States by which the latter agreed to assist in the establishment of responsible, orderly government. The treaty, which expired in 1936, provided for a number of American Advisers to the Haitian Government, appointed by the President of Haiti on the recommendation of the President of the United States; by a subsequent agreement the Financial Adviser-General Receiver and his assistants were succeeded on January 1, 1934, by a Fiscal Representative, appointed by the President of Haiti on the nomination of the President of the United States, to supervise the customs on behalf of holders of Haitian bonds. On assumption of office President Lescot, with the acquiescence of United States government, accepted the

sylvania, the University of Kolozsvár belongs to Hungary. Total number of students at the first four universities, 1939-40, 7,032 (1,011 women). According to the Law of May 29, 1934, some high schools of economic and technical or agricultural character were united into the 'József Nádor Technical and Economic University.' The economic faculty of that university in 1938-39 had 81 professors and 933 students, the technical faculty 93 professors and 929 students, the veterinary faculty 25 professors and 337 students, the faculty of forestry and mining (in Sopron) 32 professors and 221 students. There are also 29 theological colleges, viz., 24 Roman Catholic, 3 Protestant, 1 Greek Catholic and 1 Jewish, with a total of 190 professors and 1,229 students; and 3 law schools with 35 professors and 778 students; 3 agricultural colleges with 31 professors and 422 students. There are 5 other high schools with 35 professors and 1,107 students.

### Justice and Crime.

The Supreme Court in Budapest (curia) is the highest instance in all civil and criminal matters. There are also six Courts of Appeal for civil and criminal cases (Budapest, Debreczen, Győr, Kassa, Pécs and Szeged); the Patent Court in Budapest for suits concerning patents, trade marks, etc., whence appeal lies to the Patent Chamber of the Supreme Court; the Administrative Court for certain cases of fiscal, administrative or constitutional law. The Land Reform Court established by the Agrarian Reform Law of 1920 still carries on some of its former duties. The system of single judges was introduced into the county courts in a number of criminal cases in 1921, and in practically all civil cases of first instance in 1930. The functioning of juries has been continuously suspended since the outbreak of the world war in 1914. For military cases there is a special Army Supreme Court with a number of army courts under it.

### Social Insurance and Pauperism.

In 1927 and 1928, two fundamental laws were passed to regulate optional and obligatory social insurance, and called into existence the National Social Insurance Institute. The Institute affords its members medical and hospital treatment gratuitously and pays a subsidy to any member during the period of his illness, and grants, moreover, an old age and disability pension. The membership of the Institute, including membership of all other social insurance bodies, amounted to 1,250,329 on December 31, 1939. The insurance of farm-workers is obligatory in Hungary, done by the Agricultural Workers' National Fund, with a membership of 395,488; while the number of agricultural machines declared for the purpose of the obligatory accident insurance of workers, was 53,619 (end of 1939).

In Hungary poor relief is in the main left to communal administration. In the smaller communes orphans and the indigent are cared for by official guardians and overseers, while in the larger there are poor-houses, the funds being mostly derived from fines and taxes. The number of asylums for paupers and orphans is about 300.

### Finance.

Budget estimates for 5 years (in thousands of pengos):—

|             | 1939-40 <sup>1</sup> | 1941 <sup>2</sup> | 1942 <sup>2</sup> | 1943 <sup>2</sup> | 1944 <sup>2</sup> |
|-------------|----------------------|-------------------|-------------------|-------------------|-------------------|
| Revenue     | 1,000 Pengos         | 1,000 Pengos      | 1,000 Pengos      | 1,000 Pengos      | 1,000 Pengos      |
| Expenditure | 4,145,000            | 2,036,280         | 3,081,060         | 4,047,000         | 5,866,700         |
|             | 4,080,000            | 2,044,442         | 3,256,000         | 4,247,400         | 6,147,100         |

<sup>1</sup> July 1, 1939, to December 31, 1940 (actual revenue and expenditure).

<sup>2</sup> Calendar year.

The public debt on September 30, 1943, was given as 6,500,000,000 pengos. In 1944 the service of the debt required 361,000,000 pengos.

### Defence.

In 1938 Hungary refused to comply in future to the military restrictions imposed on her by the Treaty of Trianon, and re-introduced compulsory military service by the National Defence Act of January 28, 1939, according to which every male citizen of the country between 18 and 60 is liable to military service. The duration of active service is 2 years with the Army and 3 years in the Air Force, after which, and up to the age of 42, men belong to the first, from 42 to 48 to the second, and from 48 to 60 to the third reserve. Men unfit for military service must engage in public works (Act II of 1939).

Hungary is divided into the following eight army corps:—Budapest, Székesfehérvár, Szombathely, Pécs, Szeged, Debreczen, Miskolc and Kassa. To each of these districts is allotted an army corps, each composed generally of 3 infantry brigades, 3 to 7 rifle battalions, 1 cavalry squadron, 3 field artillery groups, 1 pioneer battalion and 2 train groups. In addition to the 8 army corps there are 2 motorized brigades and 2 cavalry brigades.

In the autumn of 1944 the mobilised Army consisted of 30 small-sized divisions, of which half were fighting with the German armies on the Russian front and half were at home.

Hungary has no Navy, but only four patrol vessels for police duty on the Danube.

The budget expenditure on the Army in 1944 was 1,513,400,000 pengos.

### Production and Industry.

The cultivation of the soil is the chief industry of Hungary. The soil is noted for its fertility and the variety of its products. The area and production of crops in Hungary for two years was as follows:—

| Crop               | 1938-39 <sup>1</sup> |                         | 1939-40 <sup>2</sup> |
|--------------------|----------------------|-------------------------|----------------------|
|                    | Area                 | Yield                   | Estimated Yield      |
|                    | Acres                | Quintals                | Quintals             |
| Wheat              | 4,625,616            | 50,781,736              | 20,674,631           |
| Rye                | 1,717,892            | 8,637,845               | 7,241,222            |
| Barley             | 1,320,735            | 7,895,528               | 6,931,026            |
| Oats               | 632,837              | 3,659,137               | 4,343,241            |
| Maize              | 3,112,774            | 23,315,394              | 29,640,385           |
| Potatoes           | 766,048              | 22,930,404              | 31,413,580           |
| Sugar-beet         | 129,653              | 11,005,255              | 17,582,095           |
| Grapes             | 567,104              | 96,145,590 <sup>3</sup> | —                    |
| Tobacco            | 40,734               | 198,216                 | 165,491              |
| Turnips for fodder | 400,179              | 39,758,457              | —                    |

<sup>1</sup> Excluding Subcarpathia.

<sup>2</sup> Including Subcarpathia.

<sup>3</sup> Gallons.

In Hungary there were, in 1940,<sup>1</sup> 989,450 horses, 2,605,490 cattle 1,750,221 sheep, and 4,648,463 pigs.

The total area under forest in Hungary (1939<sup>1</sup>) was 4,921,762 acres.

The production of coal in Hungary was in 1930, 6,987,826 tons; in 1937, 8,972,152 tons; in 1938, 9,347,878 tons, and in 1939 (including Subcarpathia), 10,625,452 tons. The best quality coal is found in the Mecsek Mountain, in the district of Pécs. Bituminous coal is found at Ajk. Hungary

taxes, but in the representative bodies of the town and county municipalities ('municipal committee') the proportion of those who pay the highest taxes has been reduced to two-fifths of the total number of members. The members of the representative bodies have an authorization for a fixed period. Each community has the right to issue orders within the limits prescribed by law, to be carried out either by its own officials at the county municipality, or by the subordinate communities.

### Area and Population.

The Treaty of Trianon, signed on June 4, 1920, and ratified by Hungary on November 13, 1920, mentions in general terms the boundaries of the new State with Austria, Czechoslovakia, Yugoslavia and Rumania. As a result of negotiations with Austria and of the consequent plebiscite, Hungary in 1921 obtained Sopron in Western Hungary.

The population of post-war Hungary according to the conscription of November 18, 1939, was 9,106,252, and its area 35,875 square miles, as against a population of 8,688,319 in 1930. Of the total population, 4,455,856 were males and 4,650,396 females. On September 1, 1940, the area of Hungary was 160,250 square kilometres (61,728 square miles), its population being 12,708,439. Of this total, 11,927 square kilometres (4,605 square miles) and 1,044,438 souls were restored to Hungary by the Vienna arbitration of November 2, 1938, while 12,146 square kilometres (4,690 square miles), with a population of 671,962, were annexed in March and April, 1939. According to the census taken on January 31, 1941, the population of Hungary was 14,679,578, including 11,017,170 Magyars (75 per cent.), 1,144,260 Rumanians (8 per cent.), 865,580 Germans (6 per cent.), 586,800 Ruthenians (4 per cent.), 513,450 Serbs and Croats (3 per cent.), 308,070 Slovaks (2 per cent.), 161,370 Jews (1 per cent.), and 73,350 others.

On August 30, 1940, Germany and Italy by the second Vienna award restored the northern portion of Transylvania to Hungary, having an area of 43,104 square kilometres (16,642 square miles), with a population of 2,392,603. The restored districts include Klausenburg and the three Szekler counties. At the end of the year 1944 the whole of Transylvania had been occupied by Russian troops.

Vital statistics for 4 years:—

|                     | 1936    | 1937    | 1938    | 1939 <sup>1</sup> |
|---------------------|---------|---------|---------|-------------------|
| Births . . . . .    | 183,369 | 182,449 | 182,306 | 207,427           |
| Marriages . . . . . | 77,217  | 80,759  | 74,276  | 69,210            |
| Deaths . . . . .    | 128,383 | 128,049 | 130,628 | 129,542           |

<sup>1</sup> Including territory ceded by first Vienna award.

The principal towns, with population on November 18, 1939, are:—

<sup>1</sup> Population of Budapest on July 15, 1943, 1,216,726.

### Religion.

Religious toleration is one of the fundamental principles of the Hungarian State. The law establishes two categories of religion having a legal

standing—'incorporated' and 'recognised' religions. The former includes the Roman, Greek and Armenian Catholic, the Evangelical (Augsburg and Helvetican), the Unitarian, the Greek Oriental, and the Jewish; the second category includes the Baptist (since 1905), and the Mohammedan (since 1916). These last two religions (as well as—since 1940—the Jews) have no representation in the Upper House, and do not possess full rights in regard to the collection of their church rates, and the acquisition of immovable property. Other denominations (Methodists, Gregorian-Armenians, Anglicans, etc.) have the legal status of private associations.

In 1930 (census), the population according to religion was estimated as follows: Roman Catholics, 5,834,003 (64.9 per cent.); Greek Catholics, 201,093 (2.3 per cent.); Helvetican Evangelicals, 1,818,162 (20.9 per cent.); Augsburg Evangelicals, 534,165 (6.1 per cent.); Greek-Orientals, 39,839 (0.5 per cent.); Unitarians, 8,266 (0.1 per cent.); Jews, 444,567 (5.1 per cent.); others, 15,224.

### Education.

Public education in Hungary comprises the following grades:—(1) infant schools; (2) elementary schools; (3) industrial and commercial apprentice schools; (4) primary (city) schools; (5) training colleges for teachers; (6) middle or secondary schools; (7) special schools; (8) universities and colleges.

In 1930, 9.6 per cent. of the population over 6 years of age was illiterate. School attendance is compulsory for children of six to twelve years at day schools, and then for three years in continuation schools. There were in the school year 1938-39 altogether 1,407 infants' schools and permanent foster-homes with 1,906 female teachers and 133,288 infants, and 4 training colleges for female teachers of infant schools.

In Hungary there were in the school-year 1938-39, 8,103 elementary schools with 1,104,916 pupils and 23,215 teachers. There were also 4,448 general, 1,852 agricultural continuation schools (or courses) and 57 agricultural public schools with special teachers attached to them. There were 446 apprentice schools, 416 for industrial and 30 for commercial apprentices. The number of industrial apprentices was 64,300 and of commercial apprentices 8,491. Training colleges for elementary schools (for males and females) are being changed into lyceae. Actually the upper forms are still training colleges, with 244 teachers and 6,926 students, while the lower forms of these same institutions were already transformed into lyceae. The number of primary schools was for boys 141, for girls 200, for both sexes 77, with 105,466 pupils and 4,619 teachers.

In the middle schools the curriculum extends over eight years. They are maintained by the State, by the larger communes, or (in the case of the denominational schools) by ecclesiastical foundations, with sometimes a subvention from the State. There were in 1938-39, 138 gymnasia, 49 girls' secondary schools, 2 gymnasium courses, 3 military modern schools, 2 foreign gymnasia, 21 lyceae, 38 lyceae for girls, 1 mixed lyceum (for boys and girls), 6 agricultural middle schools, 1 industrial, 1 commercial and 1 foreign commercial middle school. Total number of teachers, 4,709; pupils, 79,435 (57,763 boys and 21,672 girls).

Hungary has six universities all maintained by the State. In 1938-39 the University of Budapest had 432 professors and 3,947 students; the University of Szeged (returned to Klausenburg in October, 1940), 94 professors and 1,109 students; the University of Pécs, 96 professors and 1,296 students, and of Debrecen, 93 professors and 1,051 students—the last two having been founded in 1912. Since the annexation of Northern Tran-

has a considerable number of brown-coal and lignite mines. Her bauxite deposits may be counted among the largest in the world; bauxite production in 1939 amounted to 500,193 tons.

Hungary retains important fishery preserves in the Danube and Theiss rivers and in Lake Balaton. The latter, situated in the west, is the largest lake in central Europe, being 50 miles long and from 2 to 7 miles broad. Its waters contain plentiful supplies of perch, carp, pike, sheatfish, shad and other fish. The north shore of Lake Balaton is an important wine-producing district. The best known Hungarian wines come from the Hilly country, 'Tokaj,' in the north-east section of Hungary.

The industries of Hungary are based on agriculture. They include milling, distilling, the manufacture of sugar (1,303,980 metric quintals of raw sugar in 1939-40), hemp and flax, and also iron and steel works (409,292 metric tons of pig-iron and 782,615 metric tons of steel in 1939). In 1942 there were in Hungary 5,648 factories, employing on an average 534,000 workmen, with an output valued at 7,044,000 pengos.

### Commerce.

Trade for 5 years is shown as follows (in thousands of pengos):—

|               | 1939    | 1940    | 1941    | 1942      | 1943      |
|---------------|---------|---------|---------|-----------|-----------|
| Imports . . . | 488,985 | 602,500 | 789,700 | 923,600   | 1,148,000 |
| Exports . . . | 605,473 | 514,900 | 796,700 | 1,148,600 | 1,288,000 |

The trade was distributed among the principal countries as follows:—

| Country           | Imports<br>Million Pengos |       |       | Exports<br>Million Pengos |       |       |
|-------------------|---------------------------|-------|-------|---------------------------|-------|-------|
|                   | 1941                      | 1942  | 1943  | 1941                      | 1942  | 1943  |
| Germany . . .     | 429.4                     | 483.8 | 612.4 | 477.0                     | 632.5 | 776.6 |
| Italy . . .       | 116.4                     | 248.5 | 201.3 | 113.5                     | 339.0 | 156.8 |
| Turkey . . .      | 21.1                      | 82.1  | 64.2  | 12.2                      | 39.5  | 32.8  |
| Switzerland . . . | 21.6                      | 88.7  | 44.7  | 64.4                      | 58.8  | 78.0  |
| Sweden . . .      | 14.8                      | 21.5  | 25.7  | 17.6                      | 28.1  | 32.4  |
| Spain . . .       | 2.1                       | 2.0   | 6.4   | 0.9                       | 2.2   | 5.3   |
| Portugal . . .    | 8.5                       | 6.9   | 2.3   | 0.3                       | 1.1   | 2.9   |

Total trade between Hungary and the United Kingdom according to Board of Trade returns for five years:—

|                             | 1934      | 1935      | 1936      | 1937      | 1938      |
|-----------------------------|-----------|-----------|-----------|-----------|-----------|
|                             | £         | £         | £         | £         | £         |
| Imports from Hungary . . .  | 1,421,912 | 1,858,654 | 2,255,040 | 2,472,593 | 2,464,471 |
| Exports to Hungary . . .    | 500,487   | 485,921   | 500,519   | 500,519   | 593,069   |
| Re-exports to Hungary . . . | 71,020    | 63,201    | 107,156   | 107,215   | 76,100    |

### Communications.

In 1939 there were 3,625 miles of state roads, 14,743 miles of municipal roads and 5,273 miles of inferior roads; total, 23,641 miles of road.

The length of railways in Hungary in 1938-39 was 6,307 miles, of which 4,787 miles are owned by the State. Of the total 1,126 kilometres or 700 miles are double track. The passengers carried in 1938-39 were: State railways, 90,100,715; private railways, 34,862,001; and freight 26,137,419 and 2,866,816 metric tons respectively. There are 23 air lines

over which 4,510 flights were made in 1939 with 30,708 passengers and 1,057 metric tons of freight. Distance flown was 1,113,637 miles.

Number of Hungarian post-offices (not including collecting places and railway post) (1939), 2,898. In 1939, the inland postal service handled 476,077,307 pieces of correspondence, and the international 37,440,734 pieces; 12,729,907 parcels were carried on the inland service, and 580,615 on the international service. On December 31, 1939, the length of telegraph lines was 6,902 miles; of telegraph wires, 56,472 miles; of telephone lines, 20,976 miles; and of wire, 493,192 miles. The postal and telegraphic services are in the hands of the Government.

The total number of telegrams handled in 1939 was 3,723,867 (2,715,285 inland, 859,291 foreign, and 149,291 transit). The number of telephone conversations in 1939 was: local, 195,123,452; inter-urban, 6,881,270; international service, 748,275; transit, 271,053.

### Currency and Banking.

By a law of November 18, 1925, a new monetary unit, the 'pengő' (= 12,500 paper crowns), subdivided into 100 *fillér*, was instituted, and came into use on December 27, 1926. The pengő contains 0.263158 grammes of fine gold. Since June, 1941, 1 and 2 pengő pieces are made of aluminium and 2, 10 and 20 fillér pieces of steel. Silver and nickel coins were withdrawn from circulation. On June 30, 1942, there were in circulation coins to the value of 212 million pengos.

The amount of the bank notes in circulation, issued by the National Bank of Hungary, was 4,392,000,000 pengos on December 31, 1943.

On October 31, 1940, the total saving deposits in the Postal Savings Bank and the banks belonging to the Central Corporation of Banking Companies amounted to 1,665,500,000 pengos.

The metric system of weights and measures is in use. For land measure a cadastral yoke (1.422 acres) is used.

### Diplomatic Representatives.

As a result of the armistice, an Allied Control Commission arrived at Debreczen on February 27, 1945.

*British Political Representative.*—A. D. F. Gascoigne, C.M.G.

## ICELAND.

(ÍSLAND.)

ICELAND is a large island in the North Atlantic, close to the Arctic Circle, and comprises an area of about 103,000 sq. kilometres (39,768 sq. miles), with its extreme northern point (the Rifstangi) lying in latitude 66° 32' north, and its most southerly point (Dyrhólaey, Portland) in latitude 63° 24' north, not

including the islands north and south of the land: if these are counted in, the country extends from 67° 10' north (the Kolbeinsey) to 63° 19' north (Geirfuglaaker, one of the Westman Islands). With longitudinal direction east–west, it stretches from 13° 30' west of Greenwich (the Gerpir) to 24° 32' west of Greenwich (Látrabjarg). The skerry *Hvalbakur* (The Whaleback) lies 13° 16' west of Greenwich, or a little farther east than the Gerpir.

The first settlers came to Iceland in 874. Between 930 and 1264 Iceland was an independent republic, but by the 'Old Treaty' of 1263 the country recognised the rule of the King of Norway. In 1381, Iceland, together with Norway, came under the rule of the Danish Kings, but when Norway was separated from Denmark in 1814, Iceland remained under the rule of Denmark. Since December 1, 1918, it has been acknowledged as a sovereign State, and was united with Denmark only through the identity of the Sovereign.

**Constitution and Government.**—On May 24, 1944, the people of Iceland decided in a referendum to sever all ties with the Danish Crown. The voters were asked whether they were in favour of the abrogation of the Union Act, and whether they approved of the bill for a republican constitution. The referendum brought 98 per cent. of the electorate to the polls, and showed that 70,725 voters were for severance of all political ties with Denmark and only 370 against it; 69,048 were in favour of the republican constitution, 1,042 against it, and 2,550 cast votes that were declared invalid. On June 17, 1944, the republic was formally proclaimed, and as the republic's first President the Althing elected Sveinn Björnsson for a one-year term.

The Republic has been recognised by the Governments of Great Britain, the United States, the U.S.S.R., France, Norway and Sweden.

*President of the Republic of Iceland.*—Sveinn Björnsson (elected on June 17, 1944).

The Althing or Parliament (52 members) is divided into two Houses, the Upper House and the Lower House. The former is composed of one-third of the members elected by the whole Althing in common sitting. The remaining two-thirds of the members form the Lower House. The members of the Althing receive payment for their services, besides travelling expenses.

At the elections held on October 18, 1942, the following parties were returned:—Independents, 20; Progressives, 15; Communists, 10; Labour, 7.

The Althing must meet on February 15 in every year. The Budget Bills must be laid by the Government before the two Houses in joint session, but all other Bills can be introduced in either of the Houses. If the Houses do not agree they assemble in a common sitting, and the final decision is given by a majority of two-thirds of the voters, with the exception of Budget Bills, where a simple majority is sufficient. The ministers have free access to both Houses, but can vote only in the House of which they are members.

The executive power is exercised under the President by a ministry divided into six departments. The ministry, appointed October 1, 1944, is as follows:—

*President of the Council and Minister of Foreign Affairs.*—Ólafur Thors.

*Minister of Industry.*—Áki Jakobsson.

*Minister of Communications.*—Emil Jónsson.

*Minister of Justice and Social Affairs.*—Finnur Jónsson.

*Minister of Education.*—Brynjólfur Bjarnason.

*Minister of Finance and Trade.*—Pjetur Magnússon.

The ministers are responsible for their acts. They can be impeached by the Althing, and in that case their cause will be decided by the *Landsdómur*, a special tribunal, which can try only parliamentary impeachments.

On May 10, 1940, a British force landed on the island. The British Government declared that the occupying power would not interfere with the government of the country, and that the troops should be withdrawn immediately after the conclusion of the war. On July 7, 1941, United States troops landed in Iceland. At the same time it was notified that the American Government, in pursuance of an agreement with the Icelandic Government and with the assent of Great Britain, has taken charge of the defence of the country during the continuance of the war, at first jointly with Great Britain, but later single-handed.

For administrative purposes Iceland is divided into 16 provinces (*sýslur*), each governed by a chief executive functionary (*sýslumaður*). Each province forms one or two municipal districts with a council superintending the rural municipalities (about 200). There are also 10 urban municipalities with a town council, independent of the provinces, and forming by themselves administrative districts co-ordinate with the provinces. The municipal councils are elected direct by universal suffrage (men and women over 21 years of age), in urban municipalities by proportional representation, but in rural municipalities by simple majority.

**Area and Population.**—The following table gives the area and population of Iceland according to the census in 1940 :—

| Divisions                       | Area,<br>English sq. m. | Population,<br>1940 | Population,<br>1940,<br>Per sq. m. |
|---------------------------------|-------------------------|---------------------|------------------------------------|
| The South-West . . . . .        | 4,135                   | 57,396              | 13.9                               |
| The Western peninsula . . . . . | 3,658                   | 12,953              | 3.5                                |
| The North . . . . .             | 12,095                  | 37,406              | 3.0                                |
| The East . . . . .              | 5,954                   | 10,123              | 1.7                                |
| The South . . . . .             | 12,277                  | 13,595              | 1.1                                |
| Total . . . . .                 | 82,709                  | 121,474             | 3.1                                |

Population on December 31, 1943, 125,915.

In 1943, 45,370 were domiciled in rural districts, and 80,545 in towns and villages (of over 300 inhabitants). The population is almost entirely Icelandic. In 1940, the foreign-born population numbered only 1,562, or 1.3 per cent. of the whole; 650 were born in Denmark, 357 in Norway and 555 in other countries.

The capital of Iceland, Reykjavík, had in 1943 a population of 42,815; other towns are Akureyri, 5,842; Hafnarfjörður, 3,944; Vestmannaeyjar, 3,524; Ísafjörður, 2,874; Siglufjörður, 2,841; Akranes, 2,004; Nes, 1,159; Seyðisfjörður, 881, and Ólafsfjörður, 767.

The following table gives the total number of births, deaths and marriages, with the surplus of births over deaths, for three years :—

| Years | Marriages | Total living<br>Births | Stillborn | Deaths | Surplus of Births<br>over Deaths |
|-------|-----------|------------------------|-----------|--------|----------------------------------|
| 1941  | 1,024     | 2,638                  | 56        | 1,354  | 1,334                            |
| 1942  | 1,070     | 3,048                  | 55        | 1,292  | 1,756                            |
| 1943  | 970       | 3,200                  | 67        | 1,363  | 2,027                            |

**Religion.**—The national Church, and the only one endowed by the State, is Evangelical Lutheran. But there is complete religious liberty, and

no civil disabilities are attached to those not of the national religion. The affairs of the national Church are under the superintendence of one bishop. At the census of 1940 2,859, or 2.4 per cent., were returned as Dissenters.

**Education.**—There is a university in Reykjavík, inaugurated on June 17, 1911. There are 2 grammar schools, several public high schools, besides 2 ladies' schools, a school for elementary-school teachers, 2 schools of agriculture, a school of navigation, a commercial high school, and several other special schools. The elementary instruction is compulsory for a period of 8 years, the school age being from 7 to 14 years. There are also several continuation schools for young people.

**Pauperism and Social Insurance.**—Ordinary poor-relief is regulated by the law of December, 1935. Every pauper is entitled to poor-relief in the community where he has a settled habitation.

Besides, there are in operation 3 branches of social insurance, regulated by the law of February 1, 1936: (1) Accident insurance; (2) Sickness insurance, and (3) Invalidity and old age insurance.

**Justice and Crime.**—The lower courts of justice in Iceland are those of the provincial magistrates (*sýslumenn*) and town judges (*þingfóglar*). From these there is an appeal to the Supreme Court (*hæstiréttur*) in Reykjavík, which has 3 judges.

**Finance.**—Current revenue and expenditure for 6 years (12. = kr. 26.22) :—

| Year           | Revenue    | Expenditure | Year           | Revenue     | Expenditure |
|----------------|------------|-------------|----------------|-------------|-------------|
|                | Krónur     | Krónur      |                | Krónur      | Krónur      |
| 1940 . . . . . | 27,811,092 | 21,815,491  | 1943 . . . . . | 110,961,641 | 92,733,768  |
| 1941 . . . . . | 50,582,448 | 52,258,769  | 1944 . . . . . | 94,906,997  | 89,768,832  |
| 1942 . . . . . | 86,736,000 | 76,112,000  | 1945 . . . . . | 106,177,878 | 100,211,675 |

<sup>1</sup> Budget estimates.

Budget estimates for the year 1945 for current revenue and expenditure :—

| Revenue                                 | Krónur      | Expenditure                                      | Krónur      |
|-----------------------------------------|-------------|--------------------------------------------------|-------------|
| Taxes . . . . .                         | 38,010,000  | Interest on State debt . . . . .                 | 1,575,650   |
| Customs and excise . . . . .            | 30,400,000  | Central Government . . . . .                     | 200,000     |
| Balance on State undertakings . . . . . | 29,935,255  | Althing . . . . .                                | 1,214,357   |
| Balance of domain revenue . . . . .     | 10,193      | The central administration . . . . .             | 2,827,450   |
| Interest on State assets . . . . .      | 722,430     | Justice, police, etc. . . . .                    | 11,003,498  |
| Other revenues . . . . .                | 100,000     | Sanitary affairs . . . . .                       | 8,174,585   |
|                                         |             | Communications . . . . .                         | 26,648,247  |
|                                         |             | Ecclesiastical affairs and instruction . . . . . | 16,530,066  |
|                                         |             | Science, literature and art . . . . .            | 3,596,568   |
|                                         |             | Agriculture, fisheries and industries . . . . .  | 9,783,398   |
|                                         |             | Social welfare . . . . .                         | 7,580,325   |
|                                         |             | Pensions . . . . .                               | 2,322,586   |
|                                         |             | Other expenditure . . . . .                      | 8,750,000   |
| Total revenue . . . . .                 | 108,177,878 | Total expenditure . . . . .                      | 100,211,675 |

The public debt of Iceland was on December 31, 1943, 52,661,000 krónur, besides 13,185,000 krónur on behalf of banks and mortgage institutions, of altogether 65,746,000 krónur, of which the foreign debt amounted to 31,123,000 krónur, and the internal debt 34,623,000 krónur.

The State assets amounted on December 31, 1943, to 149,649,000 krónur.

**Defence.**—Iceland possesses neither an army nor a navy, nor any fortifications. Three fishery protection vessels are maintained by the Government.

**Production.**—Of the total area of Iceland, about six-sevenths is unproductive, but only about one-quarter per cent. is under cultivation, which is confined to hay, potatoes, and turnips. In 1943, the total hay crop from cultivated and uncultivated land was about 3,928,000 cwt., the crop of potatoes 110,000 cwt., and of turnips 7,000 cwt. In the spring of 1943 the live stock was as follows:—Horses, 62,000; head of cattle, 40,000; sheep, 818,000; goats, 1,700.

The total value of the fisheries in 1941 was estimated at 94,500,000 krónur (about 3,600,000£), whereof the cod fishery was valued at 84,700,000 krónur, and the herring fishery at 9,800,000 krónur.

**Commerce.**—Total value of imports and exports for 5 years in thousands of krónur:—

|         | 1939         | 1940         | 1941         | 1942         | 1943.        |
|---------|--------------|--------------|--------------|--------------|--------------|
|         | 1,000 Krónur | 1,000 Krónur | 1,000 Krónur | 1,000 Krónur | 1,000 Krónur |
| Imports | 64,168       | 73,900       | 181,129      | 247,747      | 251,301      |
| Exports | 70,536       | 133,029      | 188,629      | 200,572      | 233,246      |

The value of the leading imports and exports for 2 years was as follows:—

|                                                                           | 1942      |           | 1943      |           |
|---------------------------------------------------------------------------|-----------|-----------|-----------|-----------|
|                                                                           | Imports   | Exports   | Imports   | Exports   |
|                                                                           | 1,000 kr. | 1,000 kr. | 1,000 kr. | 1,000 kr. |
| Food products, beverages, tobacco                                         | 29,661    | 150,355   | 34,199    | 168,392   |
| Animal and vegetable oils, fats, etc.                                     | 3,621     | 42,799    | 6,022     | 47,864    |
| Chemicals and allied products                                             | 12,815    | —         | 11,790    | —         |
| Rubber                                                                    | 3,121     | —         | 2,089     | —         |
| Wood and cork                                                             | 16,306    | 18        | 17,995    | —         |
| Paper                                                                     | 7,942     | —         | 8,615     | —         |
| Hides, skins and leather                                                  | 3,240     | 6,207     | 1,664     | 6,363     |
| Textiles                                                                  | 30,390    | 395       | 22,051    | 9,107     |
| Articles of clothing and miscellaneous made-up textile goods              | 25,256    | 12        | 24,349    | 12        |
| Products for heating, lighting and power, lubricants and related products | 27,016    | —         | 28,159    | —         |
| Non-metallic minerals and manufactures thereof                            | 14,149    | —         | 10,050    | —         |
| Metals and manufactures thereof                                           | 24,636    | 4         | 31,388    | 2         |
| Machinery, apparatus and appliances, vehicles                             | 34,126    | —         | 41,103    | 20        |
| Other articles                                                            | 9,438     | 782       | 9,818     | 1,436     |
| Total                                                                     | 247,747   | 200,572   | 251,301   | 233,246   |

The following table shows the value of the trade with the different countries for 2 years:—

|                 | 1942         |              | 1943         |              |
|-----------------|--------------|--------------|--------------|--------------|
|                 | Imports      | Exports      | Imports      | Exports      |

Total trade (Board of Trade returns) between Iceland and the United Kingdom for 5 years:—

|                                 | 1934    | 1935    | 1936    | 1937    | 1938    |
|---------------------------------|---------|---------|---------|---------|---------|
|                                 | £       | £       | £       | £       | £       |
| Imports from Iceland to U.K.    | 208,981 | 271,007 | 273,244 | 321,838 | 444,422 |
| Exports to Iceland from U.K.    | 556,446 | 482,167 | 373,095 | 493,844 | 462,659 |
| Re-exports to Iceland from U.K. | 55,882  | 49,311  | 29,812  | 61,478  | 33,322  |

**Shipping and Navigation.**—The mercantile marine of Iceland (above 12 gross tons) was, in 1943, 58 steam vessels of 23,961 gross tons, and 385 motor vessels of 15,354 gross tons; total, 443 vessels of 39,315 gross tons.

**Communications.**—There are no railways in Iceland. At the end of 1936 there were completed 2,728 miles of roads, of which 1,736 miles are carriage roads mostly open during the summer season. In 1944 there were registered 4,106 automobiles, of which 2,115 were passenger vehicles and 1,991 trucks.

There are 307 post offices.

The length of the telegraph and telephone lines at the end of 1940 was 9,700 miles. There were 500 telegraph and telephone offices. Number of dispatches sent in the year 1943 was 759,000, of which 349,000 were internal. Number of inter-urban telephone conversations was 985,000. The total surplus of receipts over expenditure was 1,128,000 krónur.

**Banking and Credit.**—There are 3 banks in Iceland, *Landsbanki Islands* (The National Bank), a note-issuing bank which belongs entirely to the State; *Bunadarbanki Islands* (The Rural Bank of Iceland), a State

Bank founded 1930, and *Uvægsbanki Íslands* (The Fishing Trade Bank), a private joint-stock bank, founded in 1930, the majority of shares being held by the Government. On December 31, 1942, the accounts of the Issue Department of the National Bank balanced at 332,916,000 krónur. A special department for loans on mortgage is connected with the National Bank.

At the end of 1943 there were 54 savings banks with deposits amounting to 60,578,000 krónur.

**Money, Weights and Measures.**—The Icelandic name of the monetary unit is *króna*, pl. *krónur*. From October, 1925, to March, 1939, the relation of the value of the Icelandic króna to £ was unaltered (£1 = Kr. 22·15), but this value was not stipulated by law. Under a law of April 4, 1939, the Icelandic króna was devalued by 22 per cent., as the rate of the £ was raised from kr. 22·15 to kr. 27·00. This rate was unaltered till September, 1939. But a law of September 18, 1939, provides that when the rate of £ expressed in dollars falls below 4·16, the value of the Icelandic króna shall be adjusted to the dollar instead of the £. Since June 20, 1940, the exchange rate of the £ has been unaltered, kr. 26·22, and that of 100 dollars 650·50.

The metric system of weights and measures is obligatory.

## Diplomatic and Consular Representatives.

### 1. OF ICELAND IN GREAT BRITAIN.

**Envoy Extraordinary and Minister Plenipotentiary.**—Stefan Thorvaldsson (presented letters of credence from the Republic of Iceland, July 13, 1944).

**Secretaries.**—Olafur Björnsson and Eiríkur Benedikt.

There are consular representatives in Edinburgh, Newcastle-on-Tyne, Aberdeen, Fleetwood, Grimsby and Hull.

### 2. OF GREAT BRITAIN IN ICELAND.

**Envoy Extraordinary and Minister Plenipotentiary.**—Edward Henry Gerald Shepherd, C.M.G. (appointed November 28, 1942).

**Consul-General at Reykjavík (local rank of Counsellor).**—S. B. Sigurdsson, O.B.E.

There are also Consular representatives at Akureyri, Nordfjord and Vestmannaeyjar (Westmann Islands).

## IRAQ.

(MESOPOTAMIA.)

IRAQ was freed from the Turks during the Great War. It was recognised as an independent State, to be placed under a Mandatory Power, and the mandate was allotted to Great Britain. Relations between the two countries were defined by a treaty concluded in October, 1922, which provided that Great Britain should as soon as possible recommend Iraq for admission to membership of the League of Nations. This recommendation was made and accepted in October, 1932, whereupon the mandate was terminated and Iraq became an independent sovereign State member of the League of Nations (October 4, 1932). The treaty of 1922 also came to an end and was replaced by a Treaty of Alliance, which provides that each of the two high contracting parties shall immediately come to the aid of the other in the event of war. Iraq declared war on Germany, Italy and Japan on January 16, 1943.

**Reigning King.**—**Faisal II**, born May 2, 1935, succeeded his father, Ghazi, second King of Iraq, who died as the result of an accident on April 4, 1939. There is a Regency under the King's relative, Emir Abdul Illah, G.C.V.O. (appointed April 3, 1939).

**Government.**—In 1920 a Council of State was formed, as a provisional measure, to conduct the administration of the country. On August 23, 1921, the High Commissioner proclaimed the Emir Faisal King of Iraq, by election of the people, as the result of a plebiscite in which 96 per cent. of the inhabitants of the country voted in his favour.

The Organic Law passed by the Constituent Assembly in June, 1924, provides for a limited monarchy and a responsible government. The

legislative body consists of a Senate (Majlis al A'ayan) of 20 'elder statesmen,' nominated for 8 years, and the Lower House (Majlis al Nuwwab) of 115 elected deputies.

In March, 1924, the elective Constituent Assembly met for the purpose of ratifying the Anglo-Iraqi treaty of 1922, passing the Organic Law and the Electoral Law for the election of a subsequent parliament. It completed these duties early in August, and was then dissolved. The first Parliament under the Constitution was opened by King Faisal on July 16, 1925.

The Cabinet, appointed on August 30, 1944, is composed as follows:—

*Prime Minister.*—General Hamdi al Pachachi.

*Minister of Foreign Affairs and Acting Minister of Defence.*—Seyyid Arshad al Umari.

*Minister of the Interior.*—Seyyid Mustafa al Umari.

*Minister of Finance and Acting Minister of Supplies.*—Seyyid Salih Jabr.

*Minister of Justice.*—Seyyid Ahmed Mukhtar Baban.

*Minister of Education.*—Seyyid Ibrahim Akif al Alousi.

*Minister of Communications and Public Works.*—Seyyid Abdul Amir al Uzri.

*Minister of Economic Affairs.*—Seyyid Tawliq Wahbi.

*Minister of Social Affairs.*—Seyyid Mohammed Hassan Kubbah.

The country is now divided into the following Liwas: Mosul, Arbil, Kirkuk, Sulaimani, Diyala, Baghdad, Dulaim, Kut, Karbala, Hillah, Diwaniyah, Muntafiq, 'Amarah, Basrah. Each Liwa is administered by a Mutasarrif, and is sub-divided into Qadhas (under Qaimmaqams) and Nahyahas (under Mudirs).

**Area and Population.**—The country has an area of 116,600 square miles and a population according to an estimated census made in 1935, of 3,560,456. The following are the detailed figures of the census results:—

| Liwa      | Males     | Females   | Total     |
|-----------|-----------|-----------|-----------|
| Baghdad   | 256,908   | 242,507   | 499,410   |
| Mosul     | 229,940   | 222,064   | 452,004   |
| Arbil     | 92,180    | 88,491    | 180,671   |
| Sulaimani | 98,470    | 85,734    | 184,204   |
| Kirkuk    | 112,714   | 110,920   | 223,634   |
| Diyala    | 110,057   | 105,843   | 215,900   |
| Kut       | 70,097    | 68,103    | 138,200   |
| Amarah    | 137,554   | 126,954   | 264,508   |
| Basrah    | 145,212   | 141,100   | 286,312   |
| Muntafiq  | 114,921   | 117,069   | 231,990   |
| Diwaniyah | 174,250   | 242,581   | 416,831   |
| Hilla     | 107,784   | 103,882   | 211,666   |
| Karbala   | 62,082    | 62,208    | 124,290   |
| Dulaim    | 67,777    | 62,059    | 129,836   |
| Total     | 1,779,941 | 1,780,515 | 3,560,456 |

Of the total population there were in 1935 3,136,632 Muslims (Sunni and Shiite, in proportion of roughly 5:8); 101,375 Christians (Orthodox, 20,668; Catholics, 33,098; Protestants, 7,740; others, 39,869); 90,970 Jews; and 41,134 other religions (Mandaeans, Yazidis, Bahais, etc.).

On November 25, 1933, the Council of the League of Nations fixed the

boundary between Iraq and Syria, including the whole of the Jebel Sinjar in Iraq.

**Education.**—Primary education is free and compulsory, but compulsion has not yet been enforced everywhere. Secondary education is not free. Fees have now been fixed on a new basis, exempting the poor boys who have an average of not less than 65 per cent. in their examinations. The medium of instruction is Arabic. Kurdish is used in the Kurdish-speaking districts. The figures for the school year 1943-44 for the State school system are as follows:—Elementary schools 788, of which 590 are for boys, with 61,697 pupils, and 198 for girls, with 19,031 pupils, and 52 for children, with 6,717 children; total enrolment, 87,445. Private primary schools 61, with 13,784 pupils. The majority of these receive State grants.

There are also 45 intermediate schools (first stage of secondary education), 27 for boys, with 6,987 students, and 18 for girls, with 1,946 students; total enrolment, 8,933. Of secondary schools (second stage), there are 13 for boys, with 1,919 students, and 3 for girls, with 402 students; total enrolment, 2,321. Besides these, there are 2 technical schools for boys, with 291 students; 2 home-arts schools for girls, with 248 students; 1 agricultural school, with 139 students; 1 health service school, with 81 male students; 1 school for nurses, with 93 students; 1 midwifery school, with an enrolment of 7 girls (all these 3 schools are managed and financed by the Ministry for Social Affairs), and 1 engineering school, with 140 students (managed and financed by the Ministry of Works and Communications). There are 4 training colleges for elementary school teachers (2 for men and 2 for women), with 1,432 students.

Iraq has no university, but there is 1 College of Engineering, with 140 students (managed and financed by the Ministry of Works and Communications), 1 College of Medicine, with 302 students; 1 College of Pharmacy, with 114 students; 1 Institute of Physical Education, with 41 students; 1 Higher Teachers' Training College, with 372 students; 1 College of Law, with 733 students; 1 Military College.

All these colleges, with the exception of the Engineering College, Military College and the Institute of Physical Education are co-educational.

Expenditure under the Education Budget for the financial year 1943-44 amounted to 1,492,748 dinars.

**Justice.**—The Courts are established throughout the country as follows:—For civil matters: The Court of Cassation at Baghdad with a British President, 5 Principal Courts of First Instance, 2 of them with British Presidents, 9 Single Judge Courts of First Instance and 47 Peace Courts, some of which have limited powers of Courts of First Instance. For *Sharia* (religious) matters: The Sunni and Shia Benches of Revision in Baghdad; *Shara* Courts at all places where there are Civil Courts, constituted in some places of specially appointed Qadhis (religious judges) and in other places of the Judges of the Civil Courts. For criminal matters: The Court of Cassation; 6 Sessions Courts presided over by the Presidents of the Principal Courts of First Instance; Magistrates Courts at all places where there are Civil Courts, constituted of Civil Judges exercising magisterial powers of the First and Second Class. There are also a number of Third Class Magistrates Courts, limited to powers granted to Municipal Councils and a number of administrative officials. Some administrative officials are granted the powers of a Peace Judge to deal with cases of debts due from cultivators.

The prison population at the end of August, 1944, was 5,200; in the reformatory there were 96 boys.

**Finance.**—Ordinary civil receipts and expenditure:—

|             | 1940-41                                | 1941-42                                | 1942-43                                 | 1943-44                                 | 1944-45<br>(Estimates)     |

<sup>1</sup> Exclusive of 1,575,915 dinars oil royalties, 60,000 dinars receipts from Currency Board, 1,000,000 dinars interest-free loan from Iraq Petroleum Co. Ltd., and 281,766 dinars foreign credit loan for purchases of war equipment and railway extension.

<sup>2</sup> Exclusive of capital works expenditure, amounting to 2,709,423 dinars.

<sup>3</sup> Exclusive of 1,463,371 dinars oil royalties, 60,000 dinars receipts from Currency Board, 1,000,000 dinars interest free loan from Iraq Petroleum Company and 91,573 foreign credit loan for purchases of war equipment and railway extension.

<sup>4</sup> Exclusive of capital works expenditure amounting to 959,180 dinars.

<sup>5</sup> Exclusive of 1,463,371 dinars oil royalties, 60,000 dinars receipts from Currency Board and 9,889 dinars foreign credit loan for purchases of war equipment and railway extension.

<sup>6</sup> Exclusive of capital works expenditure amounting to 975,373 dinars.

<sup>7</sup> Exclusive of 2,794,345 dinars oil royalties, 60,000 dinars receipts from Currency Board and 790,000 dinars refunds of advances.

<sup>8</sup> Exclusive of capital works expenditure amounting to 1,562,833 dinars.

**Defence.**—The establishment of the Iraqi Army on June 30, 1938, was as follows:—3 cavalry regiments, 9 batteries of field artillery, 6 batteries of mountain artillery, 1 mechanised battery, 28 infantry battalions, 1 motor machine-gun company, 2 signal battalions, 1 armoured car section, 1 light tank company, 1 engineer battalion, and a river flotilla. These forces were organised as two divisions and army troops. The administrative services consisted of 2 mechanical transport companies, veterinary and remount services, ordnance services and medical services. The Royal Iraqi Air Force consisted of 2 army-air co-operation squadrons, 1 bomber-transport squadron, 1 fighter squadron, 1 communication squadron, 1 flying training school, 1 apprentices training school, and 1 aircraft depot. Total strength, army and air force (1938), 28,000 officers and men. In January, 1936, compulsory military service for all men then between the ages of 19 and 25, came into force. Eighteen months to 2 years, according to arms, were served with the Colours, four in the First Class Reserve and four in the Second. Students in secondary, technical and religious schools and the physically unfit were exempt, and exemption from service could be obtained by the payment of 50 dinars. The Ministry of Defence was advised by a British Military Mission.

On June 30, 1944, the Iraqi Police Force comprised 195 Iraqi gazetted officers, 560 inspectors, 123 sub-inspectors, 4,727 mounted police and 11,841 foot police—total strength, 17,446. The strength of the British Inspectorate staff is 3 gazetted officers. There is also a British technical adviser in the Criminal Investigation Department. The force is under complete Iraqi executive control. Police budget for the year 1944-45 is 1,293,720 dinars. There is a camel corps, total strength, 153, which patrols and garrisons the western and south-western frontiers in co-operation with 23 armed cars, equipped with Lewis and Vickers guns. This force is in wireless communication with its bases and headquarters. There is a Mobile Force, comprising 326 mounted police and 1,495 foot police, with a complement of armed cars.

**Production.**—Iraq is a land of great potentialities. The soil of the country is rich, but there are vast areas which can only be cultivated if irrigated by canals or pumps. The Irrigation Department operates several canal systems, and new irrigation works are under consideration.

The chief winter crops are wheat and barley. The date crop is important,

the country furnishing about 80 per cent. of the world's total output; the chief producing area is the tidally irrigated riverain belt of the Shatt-el-Arab. Wool is also an important export. From the cotton crop in 1943, 615 tons of ginned cotton were produced (725 tons in 1942). The cotton area in 1943 was 10,825 acres (13,250 acres in 1942).

An oilfield, 30 miles south of Khanaqin, in the area known as the Transferred Territories near the Persian frontier, is operated by the Khanaqin Oil Company, a subsidiary of the Anglo-Iranian Oil Company, and there is a pipe-line to a refinery near Khanaqin. Oil for consumption in Iraq is refined at this refinery and distributed and marketed by an associated company, the Rafidain Oil Company in all parts of Iraq at cheap prices controlled by an agreement between the company and the Government. An oilfield at Kirkuk has been tested by the Iraq Petroleum Company, an international group, who have constructed pipe-lines to the Mediterranean in order to go into production. The British Oil Development Company (Mosul Oilfields Ltd.) holds a concession for oil covering Iraqi territory west of the Tigris and north of the 33rd parallel of latitude. Several wells have been drilled but no oil has yet been marketed. The Basra Petroleum Company have been granted a concession for oil covering the southernmost part of Iraq (the old Basra vilayet). Oil production in 1939 was 4,295,126 tons; 2,495,728 tons in 1940.

**Commerce.**—Imports and exports for five calendar years were as follows:—

|                      | 1939                      | 1940                                   | 1941                                   | 1942                                    | 1943                                    |
|----------------------|---------------------------|----------------------------------------|----------------------------------------|-----------------------------------------|-----------------------------------------|
| Imports              | Iraqi Dinars<br>8,156,179 | Iraqi Dinars<br>7,953,993 <sup>1</sup> | Iraqi dinars<br>6,702,973 <sup>2</sup> | Iraqi dinars<br>12,121,705 <sup>3</sup> | Iraqi dinars<br>15,631,618 <sup>4</sup> |
| Exports <sup>1</sup> | 8,759,401                 | 4,098,105                              | 4,181,570                              | 4,708,559                               | 5,368,874                               |

<sup>1</sup> Exports do not include the shipments of oil of the Iraq Petroleum Company and movements of gold bullion and currency are excluded from these tables.

<sup>2</sup> Exclusive of imports by the Ministry of Defence.

Customs and Excise gross revenue in 1943-44, 4,007,232 dinars (2,430,893 dinars Customs). Transit, 1942, 9,183,706 dinars; 1943, 10,267,478 dinars.

The principal imports and exports for two years were as follows (in thousands of dinars):—

| Imports                    |  | 1942  | 1943  | Exports         |  | 1942  | 1943  |
|----------------------------|--|-------|-------|-----------------|--|-------|-------|
| Cotton piece-goods         |  | 8,418 | 2,780 | Dates           |  | 1,298 | 1,932 |
| Silk and rayon piece-goods |  | 282   | 223   | Barley          |  | 793   | 894   |
| Woollen piece-goods        |  | 149   | 191   | Wool            |  | 748   | 383   |

Date exports amounted in 1942 to 105,598 tons; in 1943 to 72,327 tons.

The distribution of trade in 1943 was as follows (in thousand of dinars):—Imports: India, 8,742; United Kingdom, 1,708; Syria, 1,088; Iran, 1,022; United States of America, 968; Palestine and Trans-Jordan, 651. Exports: Iran, 1,643; Syria, 1,222; Turkey, 699; Palestine and Trans-

Jordan, 547; United Kingdom, 362; India, 195; United States of America, 153.

The total trade between Iraq and United Kingdom, according to the Board of Trade returns, was as follows for five years:—

|                              | 1934      | 1935      | 1936      | 1937      | 1938      |
|------------------------------|-----------|-----------|-----------|-----------|-----------|
|                              | £         | £         | £         | £         | £         |
| Imports from Iraq            | 489,574   | 1,900,182 | 2,467,517 | 3,709,207 | 2,734,455 |
| Exports to Iraq              | 1,655,870 | 1,954,345 | 1,935,094 | 2,545,040 | 2,420,726 |
| Re-exports to Iraq from U.K. | 20,062    | 82,532    | 28,655    | 40,524    | 33,277    |

**Communications.**—The Iraqi State railway system consists of a metre gauge line from the Port of Basra, which is the Port of Iraq situated on the Shatt-el-Arab at the head of the Persian Gulf, to Baghdad, a distance of 570 kilometres (354 miles). At Baghdad the line crosses the River Tigris by a wagon ferry, whence it connects with the important town of Kirkuk in Northern Iraq (201 miles from Baghdad). At Jouloula (Qaraghan), which is 92 miles from Baghdad, the line branches to Khanaqin (17 miles), the latter situated near the Iraqi-Iranian frontier. There is also a standard gauge (4 ft. 8½ in.) line from Baghdad to Tel-Kotchek (328 miles) along the Syrian frontier following the right bank of the Tigris via Mosul. The main Basra-Baghdad line passes the ancient cities of Ur of the Chaldees, Babylon and Kish, and special facilities are provided to enable travellers to visit these cities. A daily service for passenger and goods is run between Basra-Baghdad and Baghdad-Kirkuk and Khanaqin, whence goods are transferred by road to the markets in Northern and Central Iraq, as well as Iran. The standard gauge line links with the Syrian railway system at Tel Kotchek, thus establishing a through goods and passenger service from the Persian Gulf to Turkey and the cities of Europe. The total route mileage open on March 31, 1944, was 964 miles. There also exist 193 miles of siding, making a total of 1,157 miles.

Since the 1914-18 war about 4,000 miles of roads and tracks have been developed for vehicular traffic. Of this total, about 1,200 miles are metalled complete with bitumen seal coat, about 150 miles are metalled without bitumen seal, and the remainder are earth roads and tracks. On the latter, however, the essential bridges and culverts of permanent type have been installed, except for several old timber and boat bridges in the Euphrates area, whose replacement is urgently necessary, though impossible until after the war. The bitumen sealed roads include the main road north from the rail-head at Kirkuk via Mosul to a point near the Turkish frontier at Zakho; the branches east from this road to the Iranian frontier, and to the Kurdish province of Sulaimaniyah, and also about 350 miles of the main road west from Bagdad to the Trans-Jordan frontier, whence it continues with the same type of surface to connect with the road system of Palestine. The road east of Bagdad, which connects the road system of Iran near Khanaqin, is now complete as a metalled bitumen sealed surface. The distance is 115 miles.

In the year 1940-41, 173 steamers of a gross registered tonnage of 818,393 entered the port of Basra.

At the close of the financial year 1943-44 there were 156 post and telegraph offices in Iraq. At most of these money orders are issued and paid. A restricted number of offices also issue and pay postal orders and accept and deliver insured and value payable postal packets.

Mail communication is maintained over distances totalling 17,078 miles, as follows:—11,763 miles by air, 936 miles by rail, 3,500 miles by mechanical

road transport, 649 miles by pack animals and runner services, 240 miles by river.

Air mail correspondence is both despatched and received in mails conveyed by the British Overseas Airways Corporation, Ltd., five times a week. The transit period between Iraq and England by this service takes, owing to the present exceptional circumstances, over 30 days, and between Iraq and India about 8 days. Air mail communication with U.S.A. is maintained by the Pan-American Transpacific Air Service, which operates once a week. Air mail correspondence is also sent and received by the direct air service operating between the United Kingdom and India. The transit period is about a week. The transit time taken by the airgraph service is about a fortnight. In addition to Great Britain this service operates to Australia and New Zealand.

During 1943 the number of ordinary postal articles dealt with in the inland post was approximately 6,896,800 letters and postcards and 1,133,000 packets. The number of inland registered articles and parcels amounted to 191,050 and 33,057 respectively. The insured articles and parcels numbered 321 and 165, while the C.O.D. articles and parcels numbered 12 and 50 respectively. The number of ordinary articles received from abroad was 820,200 and those despatched from Iraq amounted to 1,410,500.

The registered articles numbered 75,300 (received) and 71,220 (despatched), and parcels numbered 18,094 (received) and 1,813 (despatched). The insured articles and parcels amounted to 1,860 (received) and 96 (despatched).

The number of inland money orders dealt with during the year was 174,059, of an aggregate value of I.D. 410,653. Foreign money orders received for payment in Iraq were 1,101, of a value of I.D. 5,655, and those issued in Iraq for payment in foreign countries amounted to 4,270, aggregating I.D. 35,765.

British postal orders sold during the year under review amounted to 3,198, of a total value of 2,604£., and the number of British postal orders paid was 6,352 of a total value of 5,226£.

On March 31, 1944, the line and wire mileage of the Iraq telegraph and telephone system amounted to 5,115 miles and 44,807 miles respectively. The number of post and telegraph offices open for public telegraphic traffic was 120; in addition, 68 railway telegraph offices also dealt with public telegrams.

The total number of inland telegrams transmitted during 1943-44 was 525,210. Ordinary foreign telegrams sent and received totalled 33,187 and 46,378 respectively. The number of wireless messages sent and received was 48,954 and 56,491 respectively. At the end of March, 1944, there were 130 departmental public telephone exchanges, and 61 sub-exchanges operating private systems. The number of connections in the public system was 9,856.

**Currency, Banking, Weights and Measures.**—The rupee currency was displaced by a national Iraqi currency and note issue, by a Currency Law published on April 19, 1931. By this law, which came into effect on July 1, 1931, but was suspended until April 1, 1932, the monetary unit became the 'Iraqi dinar (I.D.) = 1,000 fils = 5 riyals = 20 dirhams = 1 pound sterling. Silver coins for 50 fils (*Dirham*) and 20 fils are in circulation, and other coins for 10, 4 (nickel), 10, 4, 2 and 1 (bronze) fils. Notes are for a quarter, a half, and one dinar, and for 5, 10 and 100 dinars. The 50-fils coins are of a silver alloy, the fineness of which is 500 parts of pure silver in 1,000 parts, and of a weight of 9.00 grammes, while the 20-fils coin is of a silver alloy, the fineness of which is the same, but of a weight of 3.60 grammes. A larger coin of 200 fils was put into circulation in June, 1933. The total currency in circulation on March 31, 1944, amounted to 38,955,831

dinara. The currency is controlled by an Iraqi Currency Board sitting in London. The principal banks are the Ottoman Bank, the Imperial Bank of Persia, and the Eastern Bank, with branches in the chief towns. In 1936 an Agricultural and Industrial Bank, financed by the Iraqi Government was instituted to make advances to cultivators and otherwise to promote the agricultural and industrial development of the country. In 1941 the Rafidain Bank, financed by the Iraqi Government, was instituted to carry out normal banking transactions and act as government bankers. Head office in Baghdad, with branches in Basra and Mosul.

The metric system is gradually being introduced, but native weights and measures are still met with, the principal ones being: *hogga* = 2.8 lbs.; *man* = 56 lbs.; *uzna* = 224 lbs.; *tughar* = 4,480 lbs.; *dhra* = 29.38 inches (27 inches in Aleppo); *mishara* = 0.62 acres.

### Diplomatic Representatives.

#### 1. OF IRAQ IN GREAT BRITAIN.

*Envoy and Minister.*—Vacant (March, 1944).

*Secretaries.*—Seyyid Awni al Khalidi and Seyyid Shakir al Wadi, M. V. O.

*Attaché.*—Seyyid Burhan-ud-Din Baahayan.

*Military Attaché.*—Major Sabih al Ansari.

#### 2. OF GREAT BRITAIN IN IRAQ

*Ambassador.*—Sir Francis Hugh William Stonehewer-Bird, K.C.M.G., O.B.E., D.S.O. (appointed February 8, 1945).

*Counsellor.*—G. H. Thompson, C.M.G.

*Secretaries.*—W. N. M. Hogg, P. F. Hancock and J. A. Paterson-Morgan.

*Oriental Counsellor.*—S. H. Perowne, O.B.E.

*Commercial Secretary.*—E. R. Lingeman.

*Air Officer Commanding British Forces.*—Air Vice-Marshal A. P. Davidson, C.B.E.

*British Consul, Baghdad.*—J. G. Baillie.

*British Consul-General, Basra.*—W. L. C. Knight, C.M.G.

*British Consul, Mosul.*—J. P. G. Finch, O.B.E.

## ITALY.

(REGNO D'ITALIA.)

### King of Italy.

**Vittorio Emanuele III**, born November 11, 1869, the only son of King Umberto I of Italy and of Queen Margherita; succeeded to the throne on the death of his father, July 29, 1900; married October 24, 1896, to *Elena*, born January 8, 1873, daughter of Nicholas, King of Montenegro; offspring, (1) Princess *Jolanda*, born June 1, 1901, married on April 9, 1923, to Count Calvi di Bergolo; has three daughters and a son, born in 1924, 1927, 1930 and 1933 respectively; (2) Princess *Mafalda*, born November 19, 1902, married on September 23, 1925, to Prince Philip of Hesse; has three sons, born in 1926, 1927 and 1937 respectively, and a daughter born in 1940; (3) Prince *Umberto Nicola Tomaso Giovanni Maria*, Prince of Piedmont and Heir Apparent, born September 15, 1904, married January 8, 1930, to Marie José of Belgium, born August 4, 1906; offspring: Princess *Maria Pia*, born September 24, 1934; Prince *Vittorio Emanuele*, born February 12, 1937, Prince of Naples; Princess *Maria Gabriella*, born February 25, 1940; Princess *Beatrice*, born February 2, 1943; (4) Princess *Giovanna*, born November 13, 1907, married to King Boris of Bulgaria, on October 25, 1930; has one daughter and a son, born in 1933 and 1937 respectively; (5) Princess *Maria*, born December 26, 1914, married January 23, 1939, to Prince Louis of Bourbon-Parma, ninth son of the late Robert, Duke of Parma; offspring: two children, one born August 7, 1940, and the other July 18, 1942.

#### Cousin of the King.

Prince *Vittorio Emanuele*, of Savoy-Aosta, Count of Turin, born November 24, 1870, son of the late Prince Amedeo of Savoy, Duke of Aosta (deceased January 18, 1890), from his union with Maria Vittoria, Princess of Pozzo della Cisterna, who died January 8, 1876.

#### Second Cousin of the King.

Prince *Aymon*, formerly Duke of Spolito, since 1942, on the death of his brother, Duke of Aosta, was born on March 9, 1900; married to Princess Irene of Greece on July 1, 1939.

### Regent.—PRINCE UMBERTO, since June 5, 1944.

Most genealogists trace the origin of the reigning house to a German Count Berthold, who, in the eleventh century, established himself on the western slope of the Alps, between Mont Blanc and Lake Geneva. In the end of the eleventh century the Count of Savoy acquired the countries of Turin and Susa. Count Amadeus, in 1383, founded a law of primogeniture which led to the immediate acquisition of the territory of Nice. In 1416 the Counts of Savoy adopted the title of Duke; in 1418 they acquired the Principality of Piedmont; and in 1713 they obtained the island of Sicily, with the title of King. Sicily had to be exchanged, in 1720, for the isle of

president of the Provincial Administration Board (*Giunta Provinciale Amministrativa*), of the Prefecture Council (*Consiglio di Prefettura*), and of the Provincial Corporations Council (*Consiglio Provinciale delle Corporazioni*). Each province, as a body by itself, had an administrative head (*Presidente*), assisted by a Rectorship (*Rettorato*), composed of from 4 to 8 members, according to the size of the population.

Each municipality, as a body by itself, had a head, the Mayor (*Podestà*), who was also a government official; he was assisted, in the municipalities which are the capitals of a province or have over 10,000 inhabitants, by a Municipal Consultative Board (*Consulta Comunale*) of 10 to 40 members.

In the Municipality of Rome, the head of the local authority was a Governor (*Governatore*).

### Area and Population.

The following figures show the increase of the population of the kingdom of Italy:—

| Year<br>(1 Jan.)  | Population | Increase per<br>cent. per<br>annum | Year<br>(1 Jan.)  | Population              | Increase per<br>cent. per<br>annum |
|-------------------|------------|------------------------------------|-------------------|-------------------------|------------------------------------|
| 1816              | 18,388,000 | —                                  | 1931 <sup>a</sup> | 41,176,671              | 0.768                              |

| <b>Total for Kingdom . . . . .</b> | <b>119,764</b>       | <b>42,993,602<sup>1</sup></b> | <b>359.0</b>                     |

<sup>1</sup> The total represents the legal population; the total shown in the previous table is the *de facto* population.

On December 18, 1934, the province of Littoria was constituted. It was carved out of the adjoining provinces of Rome and Frosinone, embraces the whole of the area reclaimed or in process of reclamation under the Pontine Marshes reclamation scheme.

By a decree of January 9, 1939, the four provinces of Libya (Tripoli, Misurata, Benghazi and Derne) were incorporated in the national territory of Italy. The territory of Libyan Sahara is not affected by this decree. The area of the four provinces is 213,876 sq. miles and the population 66,287 (census, April 21, 1936).

For area and population of the provinces see THE STATESMAN'S YEAR-BOOK, 1935, p. 1042.

### MOVEMENT OF POPULATION.

Births, deaths and marriages:—

| Year | Marriages | Births Living |                             |           | Stillborn | Deaths<br>exclusive<br>of the<br>Stillborn | Surplus of<br>Births |
|------|-----------|---------------|-----------------------------|-----------|-----------|--------------------------------------------|----------------------|
|      |           | Legitimate    | Illegitimate and<br>Exposed | Total     |           |                                            |                      |
| 1937 | 377,219   | 950,676       | 41,191                      | 991,867   | 32,536    | 615,420                                    | 376,447              |
| 1938 | 324,844   | 995,046       | 42,134                      | 1,037,180 | 34,205    | 612,229                                    | 424,951              |
| 1940 | —         | —             | —                           | 1,037,586 | 59,814    | 602,865                                    | 434,721              |

*Emigrants.*—Total number in 1935, 57,408; in 1936, 41,710; in 1937, 59,945; in 1938, 61,548; in 1940, 67,063. In 1938, 30,570 went to European countries, and 30,978 to other countries.

The municipal legal population of the capitals of provinces was as follows, according to the census of April 21, 1936:—

| Municipalities          | Population | Municipalities      | Population | Municipalities     | Population |
|-------------------------|------------|---------------------|------------|--------------------|------------|
| Agrigento . . . . .     | 32,951     | Cosenza . . . . .   | 40,032     | Milano . . . . .   | 1,115,848  |

Sardinia, to which henceforth the royal dignity remained attached. The Genoese territory was added at the peace of 1815. The direct male line of the House of Savoy died out with King Carlo Felice in 1831, and the crown fell to Prince Carlo Alberto, of the house of Savoy-Carignano, a branch founded by Tommaso Francesco, born in 1596, younger son of Duke Carlo Emanuele I of Savoy. King Carlo Alberto abdicated the throne March 23, 1849, in favour of his son, the late King Vittorio Emanuele II, who, by the Peace of Zürich, November 10, 1859, obtained Lombardy, with the exception of Mantua and a part of the surrounding territory. On March 11, 1860, annexation to Sardinia was voted by *plébiscites* in Parma, Modena, the Romagna, and Tuscany; on October 21, Sicily and Naples (including *Benevento* and *Pontecorvo*, part of the Papal States), and on November 4, the Marches and Umbria. The first Italian Parliament assembled in February, 1861, and declared (March 17, 1861) Vittorio Emanuele King of Italy. The remaining part of the province of Mantua and Venetia were added in 1866. Finally, the remaining part of the Papal States (province of Rome), having been taken possession of by an Italian army (September 20, 1870), was annexed to the kingdom by *plébiscite* on October 2.

After the Great War, by the Treaty of Saint Germain (September 10, 1919) there were annexed to the kingdom: the Venezia Tridentina and the Venezia Giulia; by the Treaty of Rapallo (November 12, 1920) there were annexed Zara, the islands of Cherso, Lussino and other minor ones. By the Agreement of Rome (January 27, 1924), Fiume was also annexed.

By Royal Decree of May 9, 1936, and a Law of May 18, 1936, the territories and the populations of the Empire of Abyssinia were placed under the sovereignty of Italy. The King of Italy assumed for himself and his heirs also the title of Emperor of Ethiopia. But on November 30, 1943, the Badoglio Cabinet officially deprived the King of his title of Emperor of Ethiopia.

On April 7, 1939 (Good Friday), Italy invaded Albania and seized that country. On April 14 the Albanian Constituent Assembly offered the Crown of Albania to King Victor Emmanuel, who accepted the offer and became King of Albania. Of this title he was likewise deprived by the Badoglio Cabinet on November 30, 1943.

The civil list has been settled (1919) at 11,250,000 lire; by a law of 1925 an allowance of 8,000,000 lire was settled on the Prince of Piedmont, Heir Apparent; Duke of Aosta and the Duke of Genoa receive an allowance of 1,000,000 lire each.

The greater part of the private domains of the reigning family has been given up to the State.

### Constitution and Government.

For the 1848 Constitution and its transformation into the Fascist Constitution, as well as for an account of the Fascist Dictatorship of Mussolini, see *THE STATESMAN'S YEAR-BOOK* for 1943, pp. 1024-1026.

On the successful conclusion of the North African campaign on May 15, 1943, Allied forces invaded Sicily, where every resistance ended on August 17. Before that, however, on Sunday, July 25, 1943, Mussolini had resigned and was succeeded as Prime Minister by Marshal Badoglio. On July 28 the new Italian Government dissolved the Fascist Party, and during the first week of August made approaches to the British Government for the purpose of obtaining an armistice. An armistice was signed at Algiers on September 3, and on September 8 the unconditional surrender of the Italian forces was announced. On October 13 the Badoglio Government declared war on Germany.

The Badoglio Government resigned on June 9, 1944, and was succeeded by a government under Ivano Bonomi. One of the conditions for the establishment of this government was that the King should retire from public life and that Prince Umberto should become Regent. A royal decree of June 5 accordingly nominated Prince Umberto as 'Lieutenant-General of the Realm.' The first Bonomi Government resigned on November 26 and was succeeded by a second Bonomi Government formed on December 10, 1944, with representatives of the four great Italian parties—the Liberals, Christian Democrats, Democratic Labour and Communists as follows:—

*Premier*.—Ivano Bonomi (Liberal).

*Vice-Premiers*.—Signor Togliatti (Communist) and Signor de Rodini (Christian Democrat).

*Minister of Foreign Affairs*.—Signor de Gasperi (Christian Democrat).

*Minister of Finance*.—Prof. Pesenti (Communist).

*Head of the Committee for National Reconstruction*.—Signor Ruini (Democratic Labour).

*Minister of Justice*.—Signor Tupini (Christian Democrat).

*Minister for the Territories Occupied by the Enemy*.—Signor Scoccimarro (Communist).

After the conquest of Sicily and Sardinia, Allied forces landed on the Italian mainland and entered Rome on June 6, 1944. By March, 1945, they held the whole of southern Italy up to a line running from Ravenna to Bologna and Pisa.

Sicily, Sardinia and Southern Italy were at first governed by the Allied Military Government of Occupied Territory ('Amgot'); but after the armistice three organizations were set up for the Allied control of Italy:—(1) The Allied Commission, to ensure the Italian fulfilment of the armistice terms; (2) Allied Military Government ('A.M.G.'), the new designation for 'Amgot,' for direct local military government, and (3) the Advisory Council for Italy, composed of representatives of the United States, the United Kingdom, the Soviet Union and the French Committee of National Liberation (and later of Greek and Yugoslav representatives).

On February 25, 1945, the Allies granted Italy a new international position and greater, and in some cases full, freedom of action, besides extended powers in both foreign and domestic affairs. The Italian Government may now enter into direct diplomatic relations with other governments; the Italian Government now enjoys full legislative authority, and the Allied Commission is a consultative body.

By August 15, 1944, roughly one-third of Italy (36 provinces), including Rome, Sicily and Sardinia, was under the jurisdiction of the Italian Government.

On July 22, 1943, the Chancellor of the Exchequer announced that the exchange rate for the lira in those parts of metropolitan Italy now occupied by the Allies had been fixed at 400 lire to the pound sterling, or 100 lire to the dollar.

On September 15, 1943, Mussolini proclaimed the establishment of a Republican Fascist Party, with himself at its head and a new Fascist Government whose writ ran only where the German army was in occupation.

### LOCAL GOVERNMENT.

Under the Fascist régime the head of each province was the Prefect (*Prefetto*), who was the direct representative of the Government and was

| Municipalities    | Population | Municipalities | Population | Municipalities | Population |
|-------------------|------------|----------------|------------|----------------|------------|
| Roma <sup>1</sup> | 1,155,722  | Taranto        | 117,722    | Udine          | 63,098     |

<sup>1</sup> Population on March 1, 1943, 1,430,253.

### Religion.

The treaty between the Holy See and Italy, of February 11, 1929, admits and confirms the principle established by the first article of the Fundamental Statute of the Kingdom of Italy that the Catholic Apostolic Roman Religion is the only religion of the State. Other creeds are permitted, provided always they do not profess principles, or follow rites, contrary to public order or to moral behaviour. The profession of such creeds is free, and discussion on religious matters is freely admitted.

The appointment of Archbishops and of Bishops is made by the Holy See; but before proceeding to such appointments the Holy See submits to the Italian Government the name of the person to be appointed in order to obtain an assurance that the latter will not raise objections of a political nature.

Catholic religious teaching is given in elementary and intermediate schools. Marriages may be celebrated before a Catholic clergyman in accordance with the rules of Canon Law, or before a clergyman of other religions admitted by the State. Civil marriages when celebrated in accordance with prescribed legal formalities are also recognized.

According to the census of 1931, 99.6 per cent. of the Italians were Catholics (41,014,096); 83,618 were Protestants; 47,825 Jews; orthodox, 6,801; other religions, 1,475; atheists, 17,283; religion not disclosed, 5,578.

### Education.

Elementary education is free and it is compulsory from the age of 6 up to the age of 14. It is given in 3 grades: Preparatory in the so-called 'Maternal Schools' or 'Asili' maintained by the municipalities (3 years), Lower (3 years), and Higher (2 years).

Secondary education is given by the Gymnasium (*Ginnasio*), by the Classical Lyceum (*Liceo classico*), by the Lyceum for Science (*Liceo scientifico*), and also by the Institute for Teachers. Secondary technical education is given by the Technical Institutes and also by other schools and institutes, divided into several sections (agricultural, commercial, industrial, nautical).

Higher instruction is given in the Royal Universities and Higher Institutes, and also in the Free Universities and Free Higher Institutes ('Free' denotes that they are self-supporting).

The 'School Charter' of February 15, 1939, provides that all education in Italy is to have a specifically Fascist stamp.

Physical education is generally organized by the *Comitato Olimpionico Nazionale Italiano*, which directs and co-ordinates the activity of 33 National Federations. In the Elementary and Secondary Schools physical education for boys and for girls is entrusted to the *Gioventù Italiana del Littorio*.

### Statistics of various classes of schools (1937-38):—

| Elementary Schools                  |  | No.     | Teachers | Pupils    |

\* Including students of schools for commercial education, of agriculture, the engineering colleges, the schools of architecture and veterinary colleges, and schools for teachers, the higher naval college and the schools for oriental languages at the universities.

\* Including lecturers.

The Italian Academy consists of 60 members, divided into 4 categories.

### Justice and Crime.

Italy has 1 Court of Cassation, in Rome, and is divided for the administration of justice into 18 appeal court districts (with 6 detached sections), subdivided into 143 tribunal districts, and these again into mandamenti, each with its own magistracy (Pretura), 986 in all. There are also 91

there are stations under charge of senior naval officers (Genoa, Leghorn, Porto Ferraro, Augusta, Trapani, Gaeta, Cagliari and Zara).

The Mercantile Marine is administered by a Directorate General of the Ministry of Communications.

Summary of the Italian Navy (excluding vessels in enemy's hands):

|                         | Completed at end of |      |      |
|-------------------------|---------------------|------|------|
|                         | 1942                | 1943 | 1944 |

There are a dozen destroyers with speeds between 34 and 39 knots, nearly all completed since the 1914-18 war, besides 11 torpedo boats. Most of the cruisers and all the destroyers are equipped as mine-layers.

## Production and Industry.

### I. AGRICULTURE.

The area of Italy comprises 76,625,218 acres, mainly distributed, on December 31, 1938, as follows (the figures are in acres):—cereals, 18,374,139; leguminous plants, 2,861,577; industrial plants, 776,184; vegetables,

1,490,096; vines, 2,386,377; olive trees, 2,033,004; woods and forests, 14,457,597; forage and pasture, 21,989,660. The total agricultural land extended to 70,548,131 acres.

According to the population census taken on April 21, 1936, the number of persons engaged in agriculture as their main occupation numbered 8,756,064 (6,328,531 males and 2,427,533 females).

The production of the principal crops (in thousands of bushels) were as follows in 1939 and 1940:—Wheat, 293,285 (1939) and 260,880 (1940); rye, 6,950 (1939) and 5,998 (1940); barley, 10,816 (1939) and 10,056 (1940); oats, 37,690 (1939) and 39,318 (1940); maize, 101,661 (1939) and 135,006 (1940); potatoes, 102,155 (1939) and 121,211 (1940). Tomatoes yielded 1,931,318,000 lbs. in 1939 and 2,444,813,000 lbs. in 1940.

The 1944 grain harvest in liberated Italy was estimated at 33,894,000 quintals (1940, 42,520,000 quintals; 1941, 41,297,000 quintals; 1942, 34,894,000 quintals).

On March 31, 1938, Italy had 791,120 horses, 796,390 asses, 431,150 mules, 7,666,890 cattle, 2,940,440 pigs, 9,467,400 sheep, and 1,828,070 goats. Sheep on March 19, 1940, numbered 9,968,000. On March 31, 1939, there were 7,879,000 cattle, 3,303,000 pigs, 9,875,000 sheep and 1,867,000 goats.

### II. FORESTRY.

The total forest area was 5,850,585 hectares (14,457,597 acres) in 1938. The forest area belonging to the State on December 31, 1938, was 160,231 hectares (395,947 acres).

### III. MINES AND MINERALS.

The Italian mining industry is most developed in Sicily (Caltanissetta), in Tuscany (Arezzo, Florence, and Grosseto), in Sardinia (Cagliari, Sassari and Iglesias), in Lombardy (particularly near Bergamo and Brescia), and in Piedmont.

Production of metals and minerals in 1937 and 1938 was as follows:—

| Metals and Minerals    |  | 1937               | 1938               |
|------------------------|--|--------------------|--------------------|
| <i>Mining output.</i>  |  | <i>Metric tons</i> | <i>Metric tons</i> |
| Iron pyrites . . . . . |  | 914,524            | 930,312            |

| Zinc . . . . .         |  | 37,962             | 37,744             |
| Aluminium . . . . .    |  | 22,947             | 25,767             |
| Copper . . . . .       |  | 3,677              | 4,700              |

The production of iron and steel in 1938 was:—Pig iron, 864,536 tons; crude steel, 2,322,856 tons.

In 1938 the 8,982 quarries in activity employed 56,965 workmen, the output of building and decorative stone being valued at 424,600,000 lire.

### IV. MANUFACTURES.

The textile industry is the largest and most important. In the cotton industry the number of factories was, in 1938, 938; of spindles, 5,473,595;

Assize Courts. For civil business, besides the magistracy above mentioned, *Conciliatori* have jurisdiction in petty plaints.

By a law of November, 1926, a special tribunal was instituted with jurisdiction in offences (*delitti*) against the security of the State.

During 1941 the new Civil Code, in accordance with Fascist principles, was formally promulgated. It came into force on April 21, 1942.

Number of persons convicted of offences of all kinds: 1937, 537,145; 1938, 684,331.

On December 31, 1938, there were 1,000 establishments for imprisonment before trial (with 36,684 male and 4,337 female prisoners), 64 penal establishments (with 12,760 male and 981 female prisoners), and 42 establishments for the execution of preventive measure of safety (with 6,952 male and 528 female prisoners).

### Pauperism.

In Italy legal charity, in the sense of a right in the poor to be supported by the parish or commune, or of an obligation on the commune to relieve the poor, does not exist. Nevertheless the State supervises such charitable work as is carried on. By a law of June 3, 1937, there was set up in every municipality a Municipal Assistance Body (*Ente Comunale di Assistenza*), to dispense charity to the needy, out of funds provided partly by pious foundations and partly by taxation.

There is, moreover, the National Institution for the protection of Maternity and Infancy (*Opera Nazionale per la protezione della Maternità e dell' Infanzia*), which in 1938 spent in relief over 133 million lire. The organization *Juventus Italiana del Littoria* also sent 886,694 children to 4,526 health camps in 1939.

### Finance.

Total effective revenue and expenditure for six years (in millions of lire):—

| Years ending<br>June 30. | Revenue.     | Expendi-<br>ture. | Years ending<br>June 30. | Revenue.     | Expendi-<br>ture. |
|--------------------------|--------------|-------------------|--------------------------|--------------|-------------------|
|                          | million lire | million lire      |                          | million lire | million lire      |
| 1938-39 <sup>1</sup>     | 25,078       | 25,035            | 1941-42 <sup>1</sup>     | 31,082       | 89,876            |
| 1939-40                  | 32,350       | 60,388            | 1942-43                  | 48,844       | 135,158           |
| 1940-41 <sup>1</sup>     | 29,002       | 24,895            | 1944-45 <sup>1</sup>     | 13,000       | 78,000            |

<sup>1</sup> Estimates.

<sup>2</sup> For 36 liberated provinces

The deficit for the year 1942-43 was accounted for mainly by war expenditure, totalling 81,109 million lire. The deficit on the ordinary budget for 1942-43 was (in millions of lire) 5,205; for 1940-41 it was 6,264; for 1941-42 it was 6,028. War expenditure in 1940-41 was 57,135 lire; in 1941-42, 71,318 lire.

On September 30, 1935, the public debt was as follows:—Floating debt, 13,261 million lire; consolidated and redeemable debt, 93,817 million lire; total, 107,078 million lire. On June 30, 1943, the total debt was 405,823 million lire.

### Defence.

#### I. FRONTIER.

The extent of the land frontier of Italy is as follows:—French frontier 19 miles; Swiss 446; German 258; Yugoslav 162; frontier of San Marino 24; Vatican City 2; in all (exclusive of San Marino and Vatican City) 1,185

miles. The coast line of the peninsula measures 2,592 miles; of Sicily, 700; of Sardinia, 862; of Elba and the small islands, 1,172; the total length of coast is thus 5,326 miles.

#### II. ARMY.

Service in the Army (or Navy) is compulsory and universal. Liability to service begins at the age of 21 up to the age of 55.

The term of service in the active Army is normally 18 months for all arms. After passing through the ranks, the men are placed on 'unlimited' leave, i.e., they are transferred to the reserve, in which they remain until the age of 55.

The Army is divided into the metropolitan army and the colonial troops, the former being under the Ministry of War, the latter under the Ministry of Italian Africa.

The metropolitan army, which had a normal peace establishment of 260,000, was organised in 17 army corps, 1 armoured army corps, 1 motorized army corps.

At the time of Italy's entry into the war in June, 1940, her Army was estimated to have mobilised a total of about 64 divisions—made up of 51 infantry divisions, 5 Alpini (mountain) divisions, 3 mobile divisions, 2 armoured divisions, and 3 motorised divisions.

After Italy broke away from Germany in 1943, and became a co-belligerent with the Allies, steps were taken to reconstitute the Italian Army to assist in clearing the country of the German forces. By the beginning of 1945 six Italian divisions had been re-formed and re-equipped by the Allies.

The Carabinieri are a force of military police. They are recruited by selection from the Army and by voluntary enlistment. In 1938 the strength of the Carabinieri was 52,000.

#### III. AIR FORCE.

The Royal Italian Air Force in 1940 consisted of a general staff, four commands of the Metropolitan (or Home) Air Zone, and separate commands for Sicily, Sardinia, the Aegean Islands, Libya, and Italian East Africa. Operationally, the Air Army is organized under corps, divisional, brigade, group, squadron and flight commands. The flight is the smallest tactical unit.

The Army Air Force is composed of Army co-operation units.

The Naval Air Force consists of four commands of reconnaissance groups, and comprises all aircraft carried on ships.

Administratively, a distinction is drawn between flying and non-flying units and branches, and there are separate branches as follows: technical staff (fitters, armourers, electricians, photographers, radio operators, etc.), engineers (fully qualified men and their assistants, dealing with maintenance, construction and equipment) and medical.

Some of the Italian air units are operating with the Allies in the Mediterranean area.

#### IV. NAVY.

The naval expenditure for 1939-40 was estimated at 2,703,000,000 lire, and for 1940-41 at 3,350,591,838 lire.

The coast line of the peninsula is divided into zones placed under the jurisdiction of Admirals, Commanders-in-Chief of Maritime departments, with headquarters at Spezia, Naples, Venice and Taranto. In localities more important from a strategical point of view, there exist Maritime commands (Pola, La Maddalena, Brindisi, Messina, Lero); and in other localities

and of looms, 186,085. Silk culture, while flourishing most extensively in Lombardy, Piedmont and Venetia, is carried on all over Italy. The quantity of silk produced was (in tons), 1937, 2,861; 1938, 2,789; number of factories, 1,063; of spindles, 1,427,877; of looms, 23,871. The production of artificial fibre (including rayon) was in 1937, 124,888 metric tons, in 1938, 126,514 metric tons, in 31 factories with 736,210 spindles. For woollen goods, there were in 1938, 719 factories with 1,162,244 spindles and 19,455 looms. The chemical industry has greatly developed; in 1938 the production of sulphuric acid was 1,721,268 metric tons; of superphosphate, 1,405,863 metric tons; of copper sulphate 124,843 metric tons. Sugar output (in metric tons) in 1938, 361,980. The manufacture of cheese is also an important industry. The output of macaroni from 635 factories was, in 1938, 508,154 metric tons.

The total number of industrial workers in 1940 was 3,825,542. The 1,153 large-scale industrial concerns (with over 250 workers) employed 1,532,675 workpeople.

### Commerce.

In February, 1939, a number of State controlled companies were set up to regulate import and export trade.

The following table shows value of Italy's special foreign trade for five years (in millions of paper lire), excluding precious metals:—

| Year          | 1934    | 1935    | 1936    | 1937     | 1938     |
|---------------|---------|---------|---------|----------|----------|
| Imports . . . | 7,675.4 | 7,700.0 | 6,089.8 | 13,948.4 | 11,278.1 |
| Exports . . . | 5,224.1 | 5,258.2 | 5,542.1 | 10,443.7 | 10,497.5 |

The following table shows the ten countries with which the principal commercial relations were maintained by Italy in 1937 and 1938:—

| Countries           | Imports into Italy (1937) | Exports from Italy (1937) | Imports into Italy (1938) | Exports from Italy (1938) |
|---------------------|---------------------------|---------------------------|---------------------------|---------------------------|
| Germany . . .       | 1,000 Lire                | 1,000 Lire                | 1,000 Lire                | 1,000 Lire                |
| United States . . . | 3,220,669                 | 1,793,024                 | 8,016,242                 | 2,002,364                 |
| Argentina . . .     | 1,589,064                 | 788,687                   | 1,885,364                 | 782,375                   |
| Great Britain . . . | 1,053,747                 | 402,542                   | 274,067                   | 405,173                   |
| Switzerland . . .   | 560,791                   | 641,103                   | 727,615                   | 586,906                   |
| France . . .        | 412,288                   | 508,185                   | 376,468                   | 495,435                   |
| Rumania . . .       | 490,540                   | 441,955                   | 254,197                   | 327,834                   |
| Poland . . .        | 894,680                   | 128,805                   | 255,480                   | 130,742                   |
| Hungary . . .       | 296,640                   | 102,842                   | 320,160                   | 114,764                   |
| Yugoslavia . . .    | 410,164                   | 201,504                   | 189,508                   | 167,058                   |
| Turkey . . .        | 254,342                   | 192,516                   | 154,949                   | 222,066                   |
|                     | 99,844                    | 128,509                   | 188,648                   | 98,832                    |

Total trade between Italy and the United Kingdom (Board of Trade returns) for 5 years (in thousands of pounds sterling):—

|                                            | 1934  | 1935  | 1936  | 1937  | 1938  |
|--------------------------------------------|-------|-------|-------|-------|-------|
| Imports from Italy to United Kingdom . . . | 8,422 | 7,902 | 2,281 | 7,739 | 7,186 |
| Exports to Italy from United Kingdom . . . | 9,314 | 6,790 | 533   | 4,942 | 5,719 |
| Re-exports to Italy from U.K. . . . .      | 1,228 | 1,856 | 408   | 662   | 445   |

### Navigation and Shipping.

On June 30, 1939, the mercantile marine consisted of 2,301 sailing vessels of 99,228 metric tons, and 1,057 steamships of 1,600,486 tons, and 293 motorships of 378,996 tons.

In July, 1941, plans were completed for the construction of a ship-canal between Milan and Venice.

### Communications.

#### I. ROADS AND RAILWAYS.

Italy's roads totalled (December 1940) 204,566 kilometres (126,830 miles), of which 21,456 kilometres were State roads, 46,500 kilometres provincial roads, 126,800 kilometres communal roads, 9,300 kilometres consorsial roads, and 510 kilometres motor highways.

Railway history in Italy began in 1839, with a short line between Naples and Portici (5 miles). Length of railways (June 30, 1939), 23,252 km., of which 16,981 km. were State railways. State railways on June 30, 1942, 17,172 km. Of the State-owned lines, 5,430 km. have been electrified; 212 km. were converted to electric traction during 1941-42. Receipts from State railways in 1937-38, 4,278,222,296 lire; expenditure, 4,068,525,449 lire. In 1941-42 the State railways carried 285,000,000 passengers and 73,000,000 metric tons of goods.

#### II. POSTS AND TELEGRAPHS.

In the year 1938 (June 30) there were 11,896 post offices. In the postal correspondence (1937-38), 2,700,875,000 pieces, including insured and registered pieces, were dealt with at ordinary rates.

On June 30, 1938, the telegraph lines had a length of 66,748 km., and the wires 551,453 km. There were 10,044 telegraph offices, of which 1,067 were railway and tramway offices with telegraph service for the public. In 1937-38, 24,934,869 private telegrams were sent inland, and there were 1,493,236 private international telegrams.

The telephone service in 1937-38 (June 30) had 424,079 subscribers. There were 995 urban systems, and also 6,375 inter-urban systems. Total number of inter-urban and international conversations in the year, 36,596,000.

During the year 1937-38 the maritime radio-telegraphic service, with its 16 coast stations, transmitted and received 5,030,000 words, while local continental radio stations despatched and received 1,100,192 messages of 20,208,060 words.

### Banking and Currency.

According to the law of May 6, 1926, there is only one bank of issue, the Banca d'Italia.

The gold and foreign credits reserve of the Bank of Italy amounted to 3,131,600,000 lire on December 31, 1939, as compared with 3,826,000,000 at the end of 1938 and 4,028,000,000 at the end of 1937. By the end of March 1940, the gold reserve had declined further to 2,601,000,000 lire (holdings of foreign credits are not available for this date), from 2,738,200,000 on December 31, 1939, and 3,674,000,000 on December 31, 1938. Banknote circulation at the end of 1939 was 24,432,000,000 lire and the coverage was at a new low of 12.8 per cent., as against 20.2 a year earlier. By March 1940, however, circulation had been reduced to 22,643,900,000 lire, but by July 20, 1943, the total was 96,541,000,000 lire. Circulation figures do not include 10-lire State currency, for which no recent figures are available.

The increase in circulation during 1939 is ascribed largely to advances to the State for the temporary financing of budget deficits, and the recent flotation of Treasury bonds to an amount of over 14,000,000,000 lire has contributed to the reduction in circulation in the early months of 1940.

By a decree-law of March 16, 1936 (No. 375), which was subsequently modified by one of July 17, 1937 (No. 1400), all credit institutions are under the control of a state organ, named 'Inspectorate of Credit'; the Bank of Italy was declared to be a 'public institution,' whose capital is held exclusively by corporate bodies of a public nature; while other credit institutions were classified into the following categories:—(1) Public-law credit institutions (such being the Banco di Napoli, Banco di Sicilia, Banca Nazionale del Lavoro, Monte dei Paschi di Siena, Istituto di S. Paolo in Turin); (2) Banks of national interest (such being at present the three joint stock companies working on a national scale, viz. the Banca Commerciale Italiana in Milan, the Credito Italiano in Genoa and the Banco di Roma in Rome); (3) Banks and credit concerns in general, including co-operative banks with limited liability of associates; (4) Savings banks; (5) Monti di Credito on pegno (institutions granting loans against personal chattels as security); and (6) Casse rurali e agrarie (agricultural banks, established as co-operative institutions with unlimited liability of associates).

At the end of 1937, there were 2,707 credit institutes with deposits amounting to 41,151,500,000 of lire. At the same date the capital and reserves of these 2,707 credit institutes were 8,087,300,000 lire.

Deposits in the savings-banks on December 31, 1938, were as follows: Post Office savings banks, 29,236,242 thousands of lire; ordinary savings banks, 18,349,241 thousands of lire.

By a decree of April 29, 1923, life assurance business is carried on only by the National Insurance Institute and by other institutions, national and foreign, authorised by the Government. Branches of the National Institute of Insurance have been established in every Province of Italy, in Italian Africa and also abroad. The insurance effected by the Institute in 1942 was to the value of 29,939,500 thousands of lire for capital insured. Insurance premiums for the year totalled 1,426,400,000 lire. The net profit for the year was 83,600,000 lire.

### Money, Weights and Measures.

The standard coin is the *Lira* of 100 *Centesimi*. The lira contains 0.04677 grammes of gold.

Before the war the coin in circulation consisted of silver, 5-lire, 10-lire, and 20-lire pieces; nickel and steel alloy, 20-cent, 50-cent, 1-lira, and 2-lira pieces; and bronze, 5-cent and 10-cent pieces. There were also in circulation State notes of the denomination of 5 lire and 10 lire, and Bank notes of denominations of 50, 100, 500 and 1,000 lire; they are neither convertible into gold or foreign monies nor exportable abroad, nor importable from abroad into Italy (except for certain specified small amounts). Ten-lire currency notes are being issued, with an upper limit of 2,500,000,000 lire, to replace the 10 and 20-lire silver coins, which were withdrawn from circulation on December 31, 1938.

Following the conquest of Abyssinia, new imperial coins were issued, by decrees of September 3, 1936 (No. 2510), September 23, 1937 (No. 1738) and February 7, 1938 (No. 907). Such coins consist of bronze, nickel and silver pieces in the same denominations as before, and of 50-lire and 100-lire gold pieces.

The metric system of weights and measures is in general use.

### Diplomatic Representatives.

#### 1. OF ITALY IN GREAT BRITAIN.

*Ambassador.*<sup>1</sup>—Count Carandini (appointed October 25, 1944).

#### 2. OF GREAT BRITAIN IN ITALY.

*Ambassador and British High Commissioner.*—Sir Noel Hughes Havelock Charles, Bt., K.C.M.G., M.C. (appointed October 25, 1944).

### ITALIAN COLONIAL EMPIRE.

The Italian Colonial Empire consisted of (1) Libya; (2) Italian East Africa, including Abyssinia, Eritrea and Italian Somaliland; (3) the Aegean Islands. Libya was completely conquered by Allied Forces in January, 1943; Abyssinia became an independent State in January, 1942; Eritrea was conquered by the Allies in April, 1941, and Somaliland in February, 1941. The Italians have been expelled from East Africa and from North Africa.

#### Libya.

(LIBIA ITALIANA.)

Italian Libya lies along the north coast of Africa between Ras Agedir, frontier point in Tunis on the west and Egypt on the east, in longitude from about 9° to 25° east. The extreme northerly point of Libya is at about the parallel of latitude 33° north. The territory in effective occupation was greatly extended southwards in 1930-31. According to an arrangement with France (September 12, 1919) as a result of the Treaty of 1915, the western frontier extends in a curve from west of Ghadames to south of Tummo including Ghat. According to the agreement with France of January 7, 1935, the southern frontier with French West Africa runs along a line between Tummo and a cross-point indicated by 24° longitude east from Greenwich and 18°45' latitude north. On the Egyptian frontier Italy has obtained Jarabub from Britain. The eastern boundary is Mt. Tibesti.

Tripoli fell under Turkish domination in the sixteenth century, and though, in 1711, the Arab population secured some measure of independence, the country was in 1835 proclaimed a Turkish vilayet. In September, 1911, a quarrel broke out between Turkey and Italy, and the latter occupied Tripoli and established an army there. On November 5, 1911, a decree was issued annexing Tripoli, and on February 23, 1912, the Italian Chamber passed the Bill which ratified the decree of annexation. The war, nevertheless, continued until October 18, 1912, when the Treaty of Ouchy was signed, by which the sovereignty of Italy in Tripoli was established. This has been recognised by the Great Powers.

The oasis of Jarabub, on the eastern border of Cyrenaica, was ceded by Egypt to Italy, and Italian troops occupied it on February 7, 1926. On the other hand, the frontier in the neighbourhood of Sollum on the sea was rectified in favour of Egypt.

For administrative and military purposes the country is divided (since January 1, 1934) into four provinces, viz., Tripoli, Misurata, Benghazi, and Derne, and into a military territory in the south with the capital at Hon, having jurisdiction over the southern regions of all the four provinces.

By a decree of January 9, 1939, the four provinces of Libya (Tripoli,

<sup>1</sup> Count Carandini has not presented letters of credence but enjoys the personal rank of Ambassador.

Misurata, Benghazi and Derne) were incorporated in the national territory of Italy. The territory of Libyan Sahara is not affected by this decree.

Italy declared war on Great Britain on June 10, 1940. Since then fighting took place in Cyrenaica, with the result that by the end of 1942 British forces drove the Axis out of Cyrenaica, and out of Tripoli in January, 1943. Tobruk was captured by British forces on November 13, 1943; Benghazi on November 20; Sirte on December 25; Homs on January 20, 1943, and Tripoli on January 23. The North African campaign was successfully concluded on May 15, 1943.

**British Administrator of the Province.**—Brigadier Lush (January 26, 1943).

In addition to the lira currency, British military authority money is also in circulation at the rate of 480 lire to the pound sterling.

**Area and Population.**—The area of the territory is estimated at 1,759,540 square kilometres, or 679,358 square miles. On December 31, 1938, the population was 888,401 (89,098 Italians, 6,078 other Europeans, and 793,225 natives, of whom 763,179 were Moslems and 30,046 Jews). Of the Mussulman population the negroes of various races form about 85 per cent. Arabic is more generally spoken than written, and both Italian and Arabic are the official languages. On December 31, 1938, the population of the principal towns was: Tripoli, 108,240 (39,696 Italians); Benghazi, 64,641 (19,412 Italians); Misurata, 45,097; Homs, 34,940, and Derne, 21,547. Inland are the caravan halting places, Ghadames, Sinauen, Mizda, Murzûk and Ghat.

**Justice.**—In so far as personal status or family or succession matters are concerned, justice is administered by Mohammedan tribunals for native Mohammedans according to their own religious law, and by regional tribunals according to Italian law in civil and commercial matters, whether the parties concerned be Italians, strangers or natives.

Judicial tribunals include arbitrators (*arbitri conciliatori*); civil and penal courts in Tripoli and Benghazi, with subsidiary courts at Misurata and Derne; Courts of Assize in Tripoli and Benghazi; and the Court of Appeal in Tripoli.

**Education.**—For Italians, public schools up to secondary instruction are provided. For natives there are primary schools and professional apprenticeship schools. There is also an Arabic school for girls (Tripoli) for education and apprenticeship. In Benghazi, as well as in Tripoli, there are Koranic and Jewish schools.

**Finance.**—For the financial year 1939-40 the estimated revenue and expenditure balanced at 600,115,000 lire.

**Production and Industry.**—Libya has three zones from the coast inland—the Mediterranean, the sub-desert and the desert. The first, which covers an area of about 17,231 square miles, is the only one properly suited for agriculture, and may be further subdivided into (1) the oases along the coast, the richest in N. Africa, in which thrive the date-palm, the olive, the orange, and all Mediterranean plants; (2) the steppe district, suitable for cereals (barley and wheat) and pasture. This district is the one where Italian colonisation has chiefly spread; it has olive, almond, vine, orange and mulberry trees and ricinus plants; (3) the dunes, which are being gradually afforested with acacia, robinia, poplar and pine; (4) the Jebel (the mountain district, Tarhuna, Garian, Nalut-Yefren), in which thrive the olive, the fig, the vine and other fruit trees, and which on the east slopes down to the sea with the

fertile hills of Maellata. The sub-desert zone produces the alfa plant. The desert zone and the Fazzan contain some fertile oases, such as those of Ghadames, Ghat, Soona, Sebha, Brak. It is estimated that in Tripolitania and Fazzan there are about 2½ million date palms and about 500,000 in Cyrenaica. In 1938, there were in the colony: 890,323 sheep, 726,006 goats, 69,670 cattle, 91,782 camels, 55,676 donkeys, mules and horses, and 2,057 pigs.

Sponge-fishing and tunny-fishing are of great importance. The quantity of tunnies caught was 9,272 quintals in 1938. The quantity of sponges fished amounted to 96,937 kilograms in 1938. Among the other industries the most flourishing is that of tobacco and tobacco manufactures. The Libyan salt-pits yielded 36,905 tons in 1938; exported, 11,290 tons. Among the other products are matting, carpets, leather articles, fabrics embroidered with gold and silver, and other articles of value of a local character.

**Commerce.**—The trade of Libya was: Imports, 1938, 882,057,532 lire; exports, 1938, 108,961,545 lire. In 1938 the exports to the United Kingdom (Board of Trade returns) were 16,985%, and the imports from U.K. 14,278%. Re-exports from U.K. in 1938 were 2,893%.

**Communications.**—Tripoli (town) is connected by telegraph cable with Malta and Syracuse, and by land lines with Bengardane (Tunis).

Tripoli is also connected by a wireless station with Rome (Coltano). The telegraph lines of Libya have a length of 2,756 kilometres, and are completed by wireless communications. The telephone lines have a length of 7,934 kilometres.

The principal railways are Tripoli-Zuara (68 miles); Tripoli-Garian (61 miles); Tripoli-Tagiura, 13 miles; Benghazi-Barce, 66 miles; and Benghazi-Soluch, 34 miles. The principal means of communication inland are the caravans, which follow long-frequented routes. There are 3,544 kilometres of carriage road. Good motor roads connect Tripoli to Zuara, to Tagiura, to Zavia, to Nalut, to Gadames, to Hon, to Homs and Misurata, to Benghazi, and to Tobruk.

**Banking and Currency.**—The Banca d'Italia, the Banco di Sicilia, the Banco di Napoli, the Banco di Roma, the Cassa di Risparmio, the Cassa di Piccole Prestite and other banks carry on financial operations. The official currency is the Italian.

**Weights and Measures.**—Although the metric system has been officially adopted, the following native weights and measures are still used: *ote* = 1.282 kilogramme; *kantar* = 40 otes = 51.28 kilogrammes; *draa* = 46 centimetres; *handaza* = 68 centimetres.

## Italian East Africa.

(AFRICA ORIENTALE ITALIANA.)

### Eritrea.

As a result of the Act of June 1, 1936, establishing the territory of Italian East Africa, Eritrea was incorporated as a State or Government of Italian East Africa. Eritrea extends from Cape Kasar (18° 2' N.) to Cape Dumeirah on the Strait of Bab-el-Mandeb (12° 30' N.). The length of coast is about 670 miles. The total area of the old colony was 15,754 square miles, and the population according to a census taken in 1931 is 600,573 inclusive of 4,188 Italians. Since June 1, 1936, the districts

of Tigré (Tigrai), Danakil-land (Dancalia) and Haussa (Aussa), formerly part of Abyssinia, were added to Eritrea. Massawah has (August 31, 1939) 17,169 inhabitants, of whom 6,098 are Italians, 13 other Europeans, and 11,058 natives. The seat of the Government is Asmara, a modern town 7,765 feet above the sea-level, with 85,000 inhabitants (50,000 Italians). The religions of the native population are the Christian (Coptic rite) and the Mohammedan. There are some Roman Catholics and a few Pagans. The principal languages of Eritrea are Tigrine and Tigré, two languages originating from the ancient Gheez, the Ethiopic language, which is the ecclesiastical language of the Eritrean Christians. Tigrine is spoken by the Abyssinian stock and Tigré in the North, in Massawah and district, and is understood to a certain extent in the whole of Eritrea. Other languages are spoken in the plateau, and Arabic in the lowlands and ports.

For climatic and agricultural purposes the country must be divided into two zones, the lowlands along the sea coasts and the plains, where the climate is tropical and the rains fall in winter; and the uplands, where the climate is cool, and sometimes cold, and the rains fall in summer. Both in the lowlands and the uplands the annual rain is sufficient for the successful raising of the crops. Irrigation works are being carried on in the lower zone in order to facilitate intensive production by Italian farmers. Pasture is abundant, and the pastoral population is partly nomadic. Pearl-fishing is carried on at Massawah and the Dahlak archipelago. There are 3 salines on the coast at Massawah, Assab and Ouakiro. Their production totalled about 200,000 tons every year and is of growing importance. There are gold mines worked successfully in several localities of Haussaland. The exports of salt in 1937 were 156,000 metric tons; in 1938, 100,700 metric tons; in 1935, 90,645 metric tons.

There are 75 miles of railway from Massawah to Asmara, 65 miles from Asmara to Cheren, 53 miles from Cheren to Agordat and Asmara-Cheren-Agordat-Bisceia, 140 miles. There are new motor roads from Massawah to Asmara and from Asmara to Cheren, Agordat and Sablierat. There are weekly sailings between Massawah and Genoa and Massawah and Trieste, and weekly sailings for Egypt, and frequent sailings for the Far East. There are 33 post offices. There is a telegraph line of 1,442 miles in length with 30 public offices. There are 12,679 miles of telephone lines. Wireless telegraph stations have been opened at Massawah, Assab, Asmara and Marsa Fatma Eri.

Asmara was captured by Allied troops on April 1, 1941.

### Italian Somaliland.

(SOMALIA ITALIANA.)

As a result of the Act of June 1, 1936, establishing the territory of Italian East Africa, Italian Somaliland was incorporated as a State or Government of Italian East Africa. The total area of the old colony was about 194,000 sq. miles and a population (1931) of 1,021,572 (1,631 Italians and 37 other Europeans). It extends along the east coast of Africa from British Somaliland to Dick's Head in Kenya Colony.

As a result of the Treaty of 1915 and the Colonial rearrangements consequent on the Great War, Britain has ceded Italy territories on the right bank of the Juba with the port of Kismayu (Chisimaio). This district is incorporated in Somalia and forms one of its provinces. [See map in THE STATESMAN'S YEAR-BOOK for 1925.] Mogadiscio (population 55,000, of whom 8,000 are Italians), is the capital of the State.

British Imperial troops invaded Italian Somaliland, taking Kismayu on February 14, 1941, and Mogadiscio on February 25.

The principal occupations of the people are cattle-rearing and agriculture. In Southern Somaliland the whole country near the banks of the Webi Shebelli and the Juba is inhabited and cultivated by the natives, and in the district of Merca-Genale and in that of Villaggio Duca degli Abruzzi there are Italian plantations with a cultivated area of some 18,555 hectares. The Mijertina rear camels and sheep. Exports (1937) were 40,675,000 lire; imports, 378,817,000 lire. Imports are cottons goods, sugar, rice, tea, coffee, iron, machinery, oils, tobacco, wines, timber; exports, sesame oil, gum, hides, butter, cotton and cotton-seed oil, resin, kapok, fruit and bananas. In 1936 exports to U.K. amounted to 341l. and imports from U.K. 5,884l. Re-exports from U.K. in 1936 amounted to 5l. New motor roads are being built to replace old tracks; steamship service on the Juba River from Kismayu to Bardera, and on Webi Shebelli from Bülo Burti to Afgoi.

The budget of Italian Somaliland for the year 1935-36 was as follows: Revenue proper of the colony, 23,200,000 lire; State contribution, 47,190,000 lire; special administration, 360,000 lire; total, 70,750,000 lire. Civil expenditure, 44,790,000 lire; military, 25,960,000 lire; total, 70,750,000 lire.

Twenty-eight wireless telegraph stations are working in the State. The wireless station at Mogadiscio communicates directly with Italy.

There are in the State 29 principal post offices and 17 secondary post offices. A railway runs from Mogadiscio to Afgoi, Adalei, Villaggio Duca degli Abruzzi (70·23 miles).

The currency is the Italian lira (silver coins and currency notes issued by the Banca d'Italia).

### AEGEAN ISLANDS.

Italy occupied the Aegean Islands in 1912, during the Tripoli War. By the Treaty of Lausanne, which came into force on August 6, 1924, Turkey ceded them, with the island of Castelrosso, to Italy in full sovereignty. The Governor, who is subject to the Foreign Office in Rome, is head of the administration; his authority is represented in the smaller islands by the Regent of the Government of Cos and five delegates in the islands of Lero, Calino, Simi, Scarpanto and Castelrosso. The municipalities of the cities of Rhodes and Cos debate autonomously the matters within their province. The municipal councils of these two cities are appointed by the Governor. The other towns and villages are administered by *podesta* and *demogerontii* elected by the people according to ancient customs.

**Area and Population.**—The following are the Italian islands in the Aegean with their areas and population on April 21, 1936 (Italian names in brackets):—

| Island              | Area in sq. miles | Population 1936 | Island                  | Area in sq. miles | Population 1936 |
|---------------------|-------------------|-----------------|-------------------------|-------------------|-----------------|
| Rhodes (Rodi) .     | 545               | 61,886          | Symi (Simi) .           | 25                | 6,195           |
| Cos (Coo) .         | 111               | 19,731          | Astypalaea (Stamalia) . | 44                | 2,006           |
| Patmos (Patino) .   | 22                | 3,184           | Karpathos (Scarpanto) . | 118               | 7,770           |
| Lipso (Lisso) .     | 7                 | 977             | Casos (Caso) .          | 27                | 1,890           |
| Kalymnos (Calino) . | 49                | 15,347          | Castelrosso .           | 4                 | 2,238           |
| Leros (Lero) .      | 28                | 13,657          |                         |                   |                 |
| Nisyros (Nisiro) .  | 18                | 3,391           |                         |                   |                 |
| Tilos (Piscopi) .   | 25                | 1,215           |                         |                   |                 |
| Calchi (Calchi) .   | 12                | 1,461           | Total . .               | 1,035             | 140,849         |

The chief towns are: Rhodes (capital) with 27,466 inhabitants (1936); Calino, 15,247; Cos, 9,852; Simi, 6,195. Of the total population the natives form 85 per cent., the Italians 12 and the foreigners 3.

**Justice.**—The special judiciary of the Aegean Islands includes (1) the Department of Judicial Services, under which are all the judicial offices of the possession; (2) the Tribunal of Second Instance (appeal); (3) the Assize Court; (4) a Civil and Penal Tribunal of First Instance at Rhodes, with jurisdiction over the islands of Calchos, Simi, Piscopi, Scarpanto, Caso and Castelrosso; (5) a Civil and Penal Tribunal of First Instance at Cos, with jurisdiction over all the other islands.

**Finance.**—The State contribution is 3,000,000 lire on a budget of 48,000,000 lire (1934-35).

**Education.**—There are Government schools for boys and girls, both elementary and secondary, and practical agricultural school, commercial school of first and second degree, and a normal school; and private schools, both elementary and secondary, for the various communities. In Rhodes there is a Rabbinical college.

**Defence.**—The Aegean Islands are garrisoned by an infantry regiment of two battalions, one stationed at Rhodes and the other at Cos. These battalions send detachments to the smaller islands. The Italian Navy has a station at Rhodes, to which are attached the units scattered over the Aegean and the naval base of Porto Lago in Leros. The police and passport service is in the hands of the Carabinieri (one company). The Customs services are carried out by the Finance Guard (one company).

**Agriculture, Commerce and Navigation.**—The agriculture of the islands of Rhodes and Cos is highly developed. These islands are famous for the cultivation of the very famous table grapes. Olives, tobacco, oranges, and other fruits, and vegetables are also cultivated. In 1938 there were in the islands 51,907 sheep, 62,735 goats, 4,710 oxen, 6,460 horses, asses and mules, and 2,656 pigs.

The most important industries are the manufacture of oriental carpets, wines in bottles, olive oils, artistic pottery and tiles, that are specially exported to Italy and to Egypt, and the manufacture of tobacco. The market to which the greater part of the exports is directed is Italy, which is connected with Rhodes by speedy steamship lines. Rhodes is developing a considerable tourist traffic, partly dependent on the thermal springs at Calitea. Sponge fishing is of great importance in the islands of Kalymnos, Simi and Castelrosso. The transit and inter-island commerce gives rise to a brisk harbour movement of sailing vessels and small steamers, which serve the neighbouring islands. The countries which import manufactures and food-stuffs are principally Italy, Egypt and Turkey. The trade of Aegean Islands was (1938): imports, 157,421,000 lire; exports, 21,851,000 lire. In 1938, exports to U.K. (Board of Trade returns) were 61,674; imports from U.K., 6711; re-exports from U.K., nil. There are no railways.

**Communications.**—Every week a steamship sails from Brindisi and from Alexandria to Rhodes and *vice versa*. The means of communications are assured by steamships and motorships of the Adriatica, Messageries Maritimes and many other steamship companies which touch at Italian ports of the Tyrranean and Adriatic Seas and the Piræus, Smyrna, Syria, Palestine and Egypt. There is an air-mail every week from Brindisi and Athens to Rhodes.

There are in Rhodes 291 miles of good roads; in Cos, 55 miles; in Karpethos, 36 miles. There are telegraph lines (cable and wireless) and automatic telephones in each island.

**Banking and Currency.**—The Banca d'Italia, the Banco di Roma, the Banco di Sicilia and other banks carry on financial operations. Italian money is current; the metric system of weights and measures is in use.

**Concession of Tientsin.**—The Italian concession of Tientsin, under the agreement with China of June 7, 1902, lies on the left bank of the Pei-Ho and has an area of about half a square kilometre with a population of 7,953 (Chinese, 7,411; Italians, 358; other Europeans, 184) according to a census of April 21, 1936.

**Island of Saseno.**—3 miles long and 1.24 miles broad. Lies at the entrance of the Vallona Bay (Albania) and is inhabited by some few shepherds and by marines of the Royal Navy. The very small harbour of St. Nicholas (San Nicolò) is suitable for small ships, which engage in fishing. The island has a radio-telegraphic station.

## Statistical and other Books of Reference concerning Italy.

### 1. OFFICIAL PUBLICATIONS.

The *Annuario Statistico Italiano* (Annual), the *Compendio Statistico Italiano* (Annual) and *Bollettino mensile di Statistica* (Monthly), issued by the Istituto Centrale di Statistica, gives statistical information about Italy and her Colonies.

The publications of the various Departments of Government; Agriculture and Forestry; Public Works; Finance; War; Marine; Aeronautics; Interior; National Education and Enlightenment; Justice; Foreign Affairs; Communications; Corporations; Italian Africa; Trade and International Payments.

Census publications are issued by the Istituto Centrale di Statistica.

## JAPAN.

(NIPPON.)

## Reigning Sovereign.

THE Japanese claim that their empire was founded by the first Emperor Jimmu Tennō, 660 B.C., and that the dynasty founded by him still reigns.

From 1186 until 1867 the Emperors remained in a spiritual seclusion while successive families of Shoguns exercised the temporal power on their behalf. The most important of these families were cadets of the Imperial House descended from the Emperor Sei-wa 859-876. They were the Minamoto which held the Shogunate from 1186 to 1219; the Ashikaga, 1334 to 1573; and the Tokugawa 1603 to 1867. In that year the Emperor Meiji, grandfather of the present sovereign, recovered the plenitude of the Imperial power after the abdication on October 14, 1867, of the fifteenth and last Tokugawa Shogun Keiki, known historically as Yoshinobu. In 1871 the feudal system (Hōken Seiji) was entirely suppressed. The Emperor bears title of Dai Nippon Teikoku Tennō ('Imperial Son of Heaven of Great Japan'). Only foreigners make use of the poetical title 'Mikado.'

*Emperor of Japan.*—Hirohito, born at Tōkyō, April 29, 1901; succeeded his father, Yoshihito, December 25, 1926; married, January 26, 1924, to Princess Nagako, born March 6, 1903, daughter of H.I.H. Prince Kuninomiya (died January 27, 1929). Offspring:—I, Princess Shigeko (Terunomiya), born December 6, 1925. II, Princess Sachiko (Hisanomiya), born September 10, 1927; died March 8, 1928. III, Princess Kazuko (Takanomiya), born September 30, 1929. IV, Princess Atsuko (Yorinomia), born March 7, 1931. V, Prince Akihito of Tsugunomiya, born December 23, 1933. VI, Prince Masahito of Yoshinomiya, born November 28, 1935. VII, Princess Takeko Suga, born March 2, 1939.

*Empress Dowager.*—Princess Sadako, born June 25, 1884; daughter of Prince Kujō; married, May 10, 1900, to late Emperor.

*Brothers of the Emperor.*—I, Prince Yasuhito (Chichibunomiya), born June 25, 1902; married, September 28, 1928, to Setsu-Ko Matsudaira. II, Prince Nobuhito (Takamatsunomiya), born January 3, 1905; married, February 3, 1930, to Kiku-Ko Tokugawa. III, Prince Takahito (Mikasanomiya), born December 2, 1915.

By the Imperial House Law of February 11, 1889, the succession to the throne has been definitely fixed upon the male descendants. In case of failure of direct descendants, the throne devolves upon the nearest prince and his descendants. The civil list is fixed at 4,500,000 yen.

## Constitution and Government.

By the Constitution of February 11, 1889, the Emperor combines in himself the rights of sovereignty, and exercises the whole of the executive powers with the advice and assistance of the Cabinet Ministers, who are responsible to him, and are appointed by himself. There is also a Privy Council, who are consulted by the Emperor on important matters of State. The Emperor can declare war, make peace, and conclude treaties, and he exercises the legislative power with the consent of the Imperial Diet. It is his prerogative to give sanction to laws, to convoke the Imperial Diet, to open, close, and prorogue it, and to dissolve the House of Representatives. The Imperial Diet consists of two Houses, a House of Peers and a House of Representatives. Every law requires the consent of the Imperial Diet. Both Houses may respectively initiate projects of law, can make representations to the Government as to laws or upon any other subject, and may present addresses to the Emperor.

The House of Peers (404 members) is composed of (1) male members of the Imperial family of full age (16 in number); (2) princes and marquises of the age of 30 and upwards (15 princes and 30 marquises); (3) counts,

viscounts, and barons of the age of 30 and upwards, who have been elected by the members of their respective orders, to the total number of 18 counts, 86 viscounts and 66 barons; (4) persons above the age of 30 years, who have been nominated members by the Emperor for meritorious services to the State or for erudition, not to exceed 125 in number, the term of membership being, in principle, for life; (5) 4 members of the Imperial Academy of Sciences above the age of 30 years, who have been elected by the members of that body; (6) 1 or 2 persons above the age of 30 years, who have been elected in Hokkaido and each Fu and Ken from among and by respectively 100 or 200 male inhabitants thereof, paying therein the highest amount of direct national taxes on land, trade or industry, to the total number of 66. The term of membership under (3), (5) and (6) is seven years.

Until May, 1925, the suffrage for the House of Representatives was restricted by qualification arising from payment of taxes. But in May, 1925, general manhood suffrage was enacted to come into force at the first general election. According to the new law, the members of the House shall number 466, a fixed number being returned from each electoral district for a term of 4 years.

The proportion of the total number of members to the population of Japan proper is 1 to 133,309. In principle, all the male Japanese subjects above the age of 25 years are electors and those above the age of 30 years eligible. Heads of the families of peers and persons in the army and navy can neither elect nor be elected; holders of certain specified offices in the Government are ineligible; and no Government officials except the *semukan* (political) class are, while in office, permitted to be members of the House. Such persons as have not lived continuously for not less than a year within the same city, town or village, shall not be registered as electors. Voting is by secret single ballot.

The President and Vice-President of the House of Peers are nominated by the Emperor from among the members, and President and Vice-President of the House of Representatives are nominated by the Emperor from among three candidates, elected by the House. The Presidents of both Houses receive an annual salary of 7,500 yen; Vice-Presidents, 4,500 yen; elected and nominated members of the House of Peers and members of the House of Representatives, 3,000 yen, besides travelling expenses. The Imperial Diet, which must meet annually, has control over the finances.

At the elections held on April 30, 1942, there were returned to the 72nd Diet:—The Government Party, to support the 'Imperial Rule Association' (whose purpose is the complete destruction of liberalism, individualism, and other political doctrines originating from Anglo-American sources), 377; other groups, 89; total, 466.

The Cabinet (appointed on July 19, 1944) consists of the following members:—

*Prime Minister.*—General Kuniaki Koiso.  
*Minister of Foreign Affairs.*—Mamoru Shigemitsu.  
*Minister for Home Affairs.*—General Kishaburo Ando.  
*Minister of War.*—Field-Marshal Sugiyama.  
*Minister for the Navy.*—Admiral Mitsumasa Yonai.  
*Minister of Munitions.*—Genjiro Fujiwara.  
*Minister of Finance.*—Sotaro Ishiwata.  
*Minister of Justice.*—Michiyo Iwamura.  
*Minister of Education.*—Nagakage Okabe.  
*Minister of Agriculture and Commerce.*—M. Shimada.

*Minister of Transport.*—Yonezo Maeda.

*Minister of Welfare.*—Surgeon-General Chikahiko Koizumi.

*Minister of Greater East Asia.*—Razuo Aoki.

*Minister without Portfolio.*—Chuji Machida.

On September 27, 1940, Germany, Italy and Japan signed a 10-year pact to assure their mutual co-operation in the establishment of a 'new world order.' German and Italian leadership is recognized in Europe and Japanese leadership in Asia.

In September, 1940, plans were completed for giving Japan a new national structure with a certain resemblance to Italian Fascism.

On December 7, 1941, Japan attacked United States and British bases in the Pacific, and then declared war on these two countries. By March, 1945, Japan held the greater part of Eastern Asia, including the occupied territory of China, Burma, Malaya, the Philippines and several of the islands of the Pacific. But during 1944 Allied forces gradually expelled the Japanese from islands in the south-west Pacific, including the Marshall Islands, Guam and Leyte, and also forced them back in Burma, while Manila was captured on February 5, 1945, and the Island of Iwojima in the Volcano group (in the Bonin Islands) on March 14, 1945.

#### LOCAL GOVERNMENT.

For local administration Japan (except Hokkaidō or Yezo; Chōsen, formerly Korea; Karafuto or Japanese Sakhalin; and Taiwan or Formosa) is divided into prefectures ('Fu' and 'Ken'). The prefectures are subdivided into municipalities ('Shi'), towns ('Chō') and villages ('Son'). Okinawa Prefecture and some islands have, however, special organisations. Municipality, town and village are the units of local government. These administrative divisions form at the same time local corporations of the same names. In each prefecture there are a governor ('Chiji'), a prefectural assembly ('Fukwai' or 'Ken-kwai'), and a prefectural council ('Fu-Sanji-kwai' or 'Ken-sanji-kwai'), of which the governor is president; in each municipality a mayor, a municipal assembly, and a municipal council, of which the mayor is the president; and in each town or village a chief magistrate and a town or village assembly. Prefectural assemblies give decisions upon certain matters prescribed by the Law (chiefly upon financial affairs); and municipal, town and village assemblies, upon public affairs in general. The prefectural council gives decisions upon matters delegated by the prefectural assemblies and upon matters of pressing necessity when the assembly is not in actual session.

Citizenship in a municipality, town, or village, is recognised, in principle, for every male person above the age of 25 years who has resided for two years continuously within the municipality, town or village, with similar exceptions to those in the case of the suffrage for the House of Representatives. Every citizen is qualified to elect and be elected for the municipal, town, or village assembly of his own city, town or village, and also for the prefectural assembly of the prefecture to which his city, town, or village belongs.

#### Area and Population.

The Empire consists of the five principal islands of Honshū (mainland), Kinshin, Shikoku, Hokkaidō (Yezo), and Taiwan (Formosa); besides the Chishima (Kuriles), Sado, Oki, Awaji, Iki, Tsushima, Riukiu (Luchu Islands), Ogasawarajima (Bonin Islands), Bōkōtō (Pescadore) islands, the

peninsula Chōsen (Korea), and the southern half of the island of Karafuto (Sakhalin). Total area is shown as follows:—

| Principal Islands                             | Number of Adjacent Small Islands | Area in square miles |                                       |           |
|-----------------------------------------------|----------------------------------|----------------------|---------------------------------------|-----------|
|                                               |                                  | Principal Islands    | Total with all Adjacent Small Islands | Per cent. |
| Mainland . . . . .                            | 382                              | —                    | 88,919                                | 84.11     |
| Shikoku . . . . .                             | 167                              | —                    | 7,248                                 | 2.78      |
| Kiūshū . . . . .                              | 378                              | —                    | 16,217                                | 6.28      |
| Hokkaidō (excluding the Oshima)               | 68                               | —                    | 84,276                                | 18.15     |
| Rikū . . . . .                                | 89                               | —                    | 921                                   | 0.85      |
| (Sado . . . . .                               | 1                                | —                    | 331                                   | 0.13      |
| Awaji . . . . .                               | 1                                | —                    | 229                                   | 0.09      |
| Oki . . . . .                                 | 5                                | —                    | 185                                   | 0.06      |
| Included in Japan proper                      | —                                | —                    | —                                     | —         |

1 Not including islands having a coast-line of less than 2.4 miles.

Administratively there exists a division into 47 prefectures. There is also a division into 552 rural districts (*gun*), 148 cities, 1,715 towns, and 9,514 villages (October 1, 1938).

Taiwan (Formosa) and Bōkotō (the Pescadores) were ceded by China in accordance with the treaty of Shimonoseki in 1895, and Japanese Karafuto was ceded by Russia by the Treaty of Portsmouth, N.H., in 1905. By the same Treaty of Peace the Russian Government ceded to Japan the lease of Port Arthur, Ta-lien, and adjacent territory and waters, and also the railway between Chan-Chun and Port Arthur, and the coal mines worked in connection therewith. In March, 1915, the Chinese Government agreed to extend the lease of the territory on Liaotung Peninsula, including Port Arthur and Dalny, to 99 years. The Sino-Japanese Treaty of December 22, 1905, provided for the interests of China and Japan with respect to Manchuria. By a treaty between Japan and Korea on August 28, 1910, the Korean Territory was annexed to the Empire of Japan.

By an agreement signed May 25, 1915, Japan obtained from China exclusive mining rights in Eastern Mongolia, and the right to settle in the province, and in Shantung the transference of all mining and railway privileges hitherto enjoyed by the Germans; also the extension of the lease of Port Arthur to 99 years, and a joint control over certain industrial works in which they have a large financial interest, besides other privileges. (For full details, see Introduction to THE STATESMAN'S YEAR-BOOK for 1916.)

On March 31, 1944, a Soviet-Japanese agreement was announced concerning the transfer of Japanese oil and coal concessions in North Sakhalin to the Soviet Union and the renewal for five years of the fisheries convention.

The Japanese Government agrees to cancel, 26 years before they expire, the oil and coal concessions granted to Japan by the Soviet Government in 1925, and to transfer to the Soviet

Government in return for the payment of 5,000,000 roubles all Japanese oil and coal properties in North Sakhalin. The Soviet Government will supply on commercial terms 50,000 metric tons of oil to Japan annually from the Okha oilfields during the five years following the end of 'the present war.'

The population of Japan, according to the census of October 1, 1935, is shown as follows:—

|                                                | Area sq. miles | Population according to the Census of October 1, 1935 |            |            | Pop. per sq. mile |
|------------------------------------------------|----------------|-------------------------------------------------------|------------|------------|-------------------|
|                                                |                | Male                                                  | Female     | Total      |                   |

According to the census of October 1, 1940, the total population of the Japanese Empire was 105,228,101.

On January 1, 1944, the number of Japanese residing in countries at war with Japan was estimated as follows:—Brazil, 210,000; Hawaii, 160,000; United States, 120,000; Canada, 23,000; Peru, 20,000; Mexico, 6,000; Australia, 3,400; India, 2,100; Chile, Paraguay, Cuba, Bolivia, 600–700 each, and Great Britain, 300.

Movement of population for three years:—

| Year | Marriages | Births    | Deaths    | Stillbirths | Divorces | Excess of Births |
|------|-----------|-----------|-----------|-------------|----------|------------------|
| 1936 | 549,116   | 2,101,969 | 1,230,278 | 111,056     | 46,167   | 871,691          |
| 1937 | 674,500   | 2,180,784 | 1,207,899 | 111,485     | 46,500   | 972,835          |
| 1938 | 538,881   | 1,928,321 | 1,259,805 | 99,528      | 44,656   | 668,516          |

In 1938 the figures represented per 1,000 of the population, 7.46 for marriage, 26.70 for births and 17.44 deaths.

The following is a list of large cities on October 1, 1935:—

|                                  |           |                               |         |                               |         |
|----------------------------------|-----------|-------------------------------|---------|-------------------------------|---------|
| Tōkyō <sup>1</sup> . . . . .     | 5,875,667 | Yawata <sup>1</sup> . . . . . | 208,629 | Kawasaki . . . . .            | 154,748 |

| Kōbe <sup>1</sup> . . . . .      | 912,179   | Kumamoto . . . . .            | 187,382 | Niigata . . . . .             | 134,992 |
| Yokohama <sup>1</sup> . . . . .  | 704,290   | Yokosuka . . . . .            | 182,871 | Hamamatsu . . . . .           | 133,338 |
| Hiroshima <sup>1</sup> . . . . . | 310,118   | Kagoshima . . . . .           | 181,736 | Shimonoseki . . . . .         | 132,737 |
| Fukuoka <sup>1</sup> . . . . .   | 291,158   | Wakayama . . . . .            | 179,732 | Gifu . . . . .                | 128,721 |
| Kure . . . . .                   | 231,333   | Saseho . . . . .              | 173,283 | Moji . . . . .                | 121,611 |
| Sendai . . . . .                 | 219,547   | Okayama . . . . .             | 168,144 | Kokura <sup>1</sup> . . . . . | 110,372 |
| Nagasaki . . . . .               | 211,702   | Kanazawa . . . . .            | 163,733 | Omura . . . . .               | 104,992 |

<sup>1</sup> On October 1, 1940, population of Tokyo was given as 6,773,504, that of Osaka as 3,252,840; Nagoya, 1,328,084; Kyoto, 1,089,736; Yokohama, 968,091; Kobe, 967,234; Hiroshima, 343,968; Fukuoka, 306,706; Yawata, 261,509, and Kokura, 173,638.

### Religion.

There is absolute religious freedom. The chief forms of religion are—(1) Shintoism, with 13 sects; (2) Buddhism, with 12 sects (56 denominations), including *Bushido*, the way of the Bushi or Sumarai, that is the warriors' way. There is no State religion, and no State support. In 1937 Shinto shrines numbered 49,728 (besides 60,703 minor shrines), and the priests, 15,873; Buddhist temples (1936), 71,326 (besides 35,308 minor temples); high priests and priestesses, 55,930. There were, in 1936, 3,081 licensed preachers and 2,104 churches and preaching stations of the Roman Catholic, Greek, Catholic, and Protestant Churches. Since 1891 the Roman Catholics have had an episcopate of one archbishop and three suffragan bishops. In May, 1941, Roman Catholicism was accorded legal recognition. There are shrines dedicated to the eminent ancestors of the Imperial House, and to meritorious subjects; these are independent of any religious sect, and some of them are supported by State or local authorities.

### Education.

Modern education began in Japan in 1872. Elementary education is compulsory. There is a good system of secondary education for both boys and girls, as well as technical and special schools. After those schools there is, for boys only, the *Koto Gakko*, or high school, which gives a three or a four years' course, followed, in turn, by the *Daigaku*, or university, with a course of three or four years and offering its graduates the Bachelor's degree and, after two years more of study, the Doctor's degree. Though in the pre-Meiji era higher education (or indeed any kind of education) for girls was practically non-existent, at the present time there is a larger number of pupils in the secondary schools for girls than in those for boys.

The following are the educational statistics for 1936-37:—

| Institutes                                                        | Number | Teaching Staff | Students and Pupils |
|-------------------------------------------------------------------|--------|----------------|---------------------|
| Kindergarten . . . . .                                            | 1,946  | 6,039          | 152,627             |
| Elementary schools . . . . .                                      | 25,840 | 261,462        | 11,566,912          |
| Middle " for boys . . . . .                                       | 559    | 14,197         | 352,320             |
| Girls' High " . . . . .                                           | 985    | 16,455         | 432,553             |
| Normal " . . . . .                                                | 101    | 2,232          | 30,256              |
| Schools for the Blind and for Deaf Mutes . . . . .                | 140    | 1,292          | 10,566              |
| High schools . . . . .                                            | 32     | 1,431          | 17,097              |
| Universities and colleges . . . . .                               | 45     | 6,621          | 72,195              |
| Special schools . . . . .                                         | 118    | 5,794          | 71,779              |
| Special technical schools . . . . .                               | 60     | 2,408          | 26,591              |
| Technical schools (excluding Special technical schools) . . . . . | 1,301  | 19,632         | 433,437             |
| Preparatory technical schools . . . . .                           | 17,043 | 74,043         | 1,964,599           |

Japan has 6 imperial universities, and 39 other institutions of imperial rank (1936-37).

Particulars of the imperial universities are given as follows:—

| University                             | Location          | Established | 1936-37  |          |
|----------------------------------------|-------------------|-------------|----------|----------|
|                                        |                   |             | Teachers | Students |
| Tokyo Imperial University . . . . .    | Tokyo . . . . .   | 1877        | 676      | 8,039    |
| Kyoto Imperial University . . . . .    | Kyoto . . . . .   | 1897        | 567      | 5,681    |
| Tohoku Imperial University . . . . .   | Sendai . . . . .  | 1907        | 293      | 1,784    |
| Kyushu Imperial University . . . . .   | Fukuoka . . . . . | 1918        | 272      | 1,960    |
| Hokkaido Imperial University . . . . . | Sapporo . . . . . | 1918        | 225      | 2,253    |
| Osaka Imperial University . . . . .    | Osaka . . . . .   | 1931        | 227      | 1,291    |

The remaining 39 institutions had 4,312 teachers and 51,286 students. In 1936, there were 4,759 libraries in Japan, with 12,318,000 volumes. In 1937, 30,732 original books and translations, and 13,268 periodicals, monthly, weekly, and daily, were published.

### Justice and Crime.

A system of justice founded on modern jurisprudence has been established. Judges are irremovable, except by way of criminal or disciplinary punishment. There are four classes of courts in Japan; namely, subdistrict courts, district courts, courts of appeal, and court of cassation. In the court of cassation five judges preside; in the courts of appeal and in the district courts three judges; in each case one of them being the chief judge. In the subdistrict courts a single judge presides. A court which deals with disputes respecting administrative affairs is under the direct supervision of the Emperor.

The following are the criminal statistics for four years:—In 1933, 177,067 criminals were condemned; in 1934, 182,042; in 1935, 183,168; in 1936, 192,377.

In 1937 there were 51 prisons, 104 detached prisons and houses of correction. Number of prisoners of all kinds, convicted and accused, and those in houses of correction at the close of 1936:—Men, 56,204; women, 919; total, 57,123.

### Pauperism.

The relief statistics for 3 years show expenditure as follows (in yen):—

| Year    | Food      | Clothing | Providing with work | Shelter and Temporary lodgings | Total (including miscellaneous) |
|---------|-----------|----------|---------------------|--------------------------------|---------------------------------|
| 1934-35 | 1,437,806 | 338,899  | 1,184,326           | 583,891                        | 7,200,139                       |
| 1935-36 | 753,211   | 81,181   | 637,418             | 133,950                        | 4,916,796                       |
| 1936-37 | 50,525    | 25,926   | 132,505             | 46,375                         | 261,858                         |

In 1931-32 the Government relieved 18,118 persons to the amount of 624,228 yen. On March 31, 1932, 609 foundlings were being maintained, and the expense in that year was 67,992 yen. There are, besides, several workhouses established by local corporations and private persons. The number of hospitals in 1935 was 2,961 (15 State, 109 public and 2,837 private).

### Finance.

#### I. IMPERIAL.

Revenue and expenditure, ordinary and extraordinary:—

|             | 1939-40               | 1940-41 <sup>1</sup>   | 1941-42 <sup>1</sup>  | 1942-43 <sup>1</sup>  | 1943-44 <sup>1</sup> |
|-------------|-----------------------|------------------------|-----------------------|-----------------------|----------------------|
| Revenue     | 1000 Yen<br>4,494,000 | 1000 Yen<br>10,282,000 | 1000 Yen<br>4,900,000 | 1000 Yen<br>6,698,000 | 1000 Yen<br>13,275   |
| Expenditure | 3,364,000             | 12,205,000             | 12,874,000            | 8,698,000             | 13,275               |

<sup>1</sup> Budget estimates.

<sup>2</sup> Including extraordinary military expenditure of 4,880 million yen in 1940-41 and 4,880 million yen in 1941-42.

<sup>3</sup> Exclusive of supplementary credits of 3,463,000 thousand yen for the financial year 1941-42, and 18,799,000 thousand yen for 1942-43.

<sup>4</sup> Exclusive of 27,000 million yen extraordinary military expenditure.

Public debt, July 31, 1941:—Internal loans (4 and 5 per cent.), 31,707,000,000 yen; foreign loans (4 to 6½ per cent.), 1,229,000,000 yen;

Destroyers, submarines, minelayers and minesweepers are being turned out in considerable numbers annually.

The principal state dockyards are at Kure and Yokosuka, where capital ships are being built, and there is a dockyard also at Sasebo, where lighter vessels are constructed. The Kawasaki private shipbuilding yard at Kobe and the Mitsubishi establishment at Nagasaki are well equipped with modern plant, and the building yard at Misiduru has recently been extended and now ranks as a first-class establishment. There are smaller yards at Uraga and elsewhere, as well as the government armour and armament factory at Kure. Japan is thus practically independent of Europe for the building and arming and equipment of her warships.

A statement of the Japanese fleet follows:—

|                              | Completed at end of |      |      |
|------------------------------|---------------------|------|------|
|                              | 1942                | 1943 | 1944 |
| Battleships                  | 9                   | 9    | 6    |
| Aircraft Carriers            | 8                   | 10   | 6    |
| Cruisers                     | 25                  | 20?  | 12?  |
| Coast Defence Ships          | 5                   | 5    | 5    |
| Destroyers and Torpedo Boats | 100                 | 90?  | 70?  |
| Submarines                   | 75                  | 100? | 90?  |

The following table shows all capital ships, cruisers and aircraft carriers that may be in service, including the many lost ships that cannot be identified:—

| Year of laying down | Name | Standard Displacement | Armour     |         | Main Armament | Torpedo Tubes | Indicated Horse-power | Speed |
|---------------------|------|-----------------------|------------|---------|---------------|---------------|-----------------------|-------|
|                     |      |                       | Water-line | On Guns |               |               |                       |       |

#### Battleships.

|      |                    | Tons   | inches | inches |                                  |   |        | Knots |
|------|--------------------|--------|--------|--------|----------------------------------|---|--------|-------|

Many cruisers and destroyers have been lost. Ships that may be building or completing include 1 or 2 battleships, and some aircraft carriers, besides numerous destroyers, submarines and subsidiary vessels.

The gross amount of the Navy Estimates for 1941-42 was 1,241,000,000 yen, and for 1940-41, 1,029,075,517 yen, exclusive of extraordinary expenditure. The active personnel numbers 325,000.

#### Production and Industry (in Japan proper).

About three-fifths of the arable land is cultivated by peasant proprietors and the remaining portion of it by tenants. According to the official report of January 1, 1938, taxed land owned by private persons and local corporations was 42,679,432 acres, of which under rice, 8,024,902 acres; other cereals, 6,280,987 acres; forests, 21,965,423 acres; plains, 5,083,397 acres; buildings, 1,141,882 acres.

The forest area on January 1, 1937, was 51,551,069 acres, of which 18,901,538 acres belonged to the State, and 3,015,357 acres to the Imperial household.

The notes of the Bank of Japan are of five denominations, 1, 5, 10, 20 and 100 yen.

The total amount of notes in circulation on September 30, 1941, was 4,619,000,000 yen. The embargo on the export of gold, imposed on September 12, 1917, was removed on January 11, 1930, and Japan thus returned to the gold standard. The embargo, however, was re-imposed on December 13, 1931, to check the gold efflux.

The modern banking system dates from 1872. The principal banks of Japan are the Nippon Ginko (Bank of Japan), the Yokohama Specie Bank, the Hypothec Bank, the Industrial Bank of Japan, the Hokkaidō Colonisation Bank, the Bank of Taiwan, and the Bank of Chosen. In order to deal with war problems, beside giving the Bank of Japan wide powers, two new banks have been set up as instruments of Government financial policy—the War-Time Financing Bank and the Bank for the Development of the Southern Areas.

The depositors in the Post Office Savings Bank on November 30, 1938, numbered 71,152,425, and their deposits amounted to 4,341,741,122 yen.

### Money, Weights and Measures.

The present monetary law came into force from October, 1897, by which gold standard was adopted. The unit of value is 0.75 gramme of pure gold, and is called the yen = 2s. 0½d., which, however, is not coined. The pieces coined are as follows:—Gold coins (20, 10, and 5 yen pieces), silver coins (50, 20, and 10 sen pieces), nickel coin (10 and 5 sen pieces), and bronze coins (1 sen and 5 rin pieces). The sen is the hundredth part of a yen, and the rin is the tenth part of a sen. The gold coins are .900 fine, and the silver coins .720 fine. The gold coins formerly issued (20, 10, 5, 2 and 1 yen pieces) are used at double their face value. The one-yen silver coin formerly issued is withdrawn. The old copper 2, 1 and ½ sen pieces are used as formerly.

Weights and measures are as follows:—

|                                      |                    |   |   |   |                          |
|--------------------------------------|--------------------|---|---|---|--------------------------|
| The <i>Kin</i>                       | = 160 <i>momme</i> | . | . | . | = 1.323 lb. avoirdupois. |
| " <i>Kwan</i>                        | = 1,000 "          | . | . | . | = 8.267 lb. "            |
| " <i>Picul</i>                       | = 100 <i>kin</i>   | . | . | . | = 132.27 lb. "           |
| " <i>Sun</i>                         | .                  | . | . | . | = 1.193 inches.          |
| " <i>Shaku</i>                       | = 10 <i>sun</i>    | . | . | . | = 11.930 inches.         |
| " <i>Ken</i>                         | = 6 <i>shaku</i>   | . | . | . | = 5.965 feet.            |
| " <i>Chō</i>                         | = 60 <i>ken</i>    | . | . | . | = ⅓ mile, 5.4229 chains. |
| " <i>Ri</i>                          | = 36 <i>chō</i>    | . | . | . | = 2.44 miles.            |
| " <i>Ri sq.</i>                      | .                  | . | . | . | = 5.9552 sq. miles.      |

| " <i>To</i> , liquid = ⅓ <i>roku</i> | .                  | . | . | . | = 3.9680 gallons.        |
| " " dry                              | .                  | . | . | . | = 1.9351 pecks.          |

The metric system was made obligatory by a law passed in March, 1921, the period of grace for its compulsory use has been extended until December 31, 1958. The following rates are recognised:—

metre = 3.3 *shaku*.      gramme = 0.266667 *momme* (⅓ *momme*).

### Diplomatic Representatives.

On December 8, 1941, a state of war was declared to exist between Great Britain and Japan and diplomatic relations were broken off between the two countries.

### KOREA (CHOSEN OR TYOSEN).

**Government.**—By a treaty concluded between Japan and Korea on August 22, 1910, the Korean Empire was formally annexed to the Empire of Japan. The Emperor abdicated, and the title of the country was changed back to 'Chosen,' from Tai Han, which had been adopted in 1897, and the office of Japanese Governor-General established. The head of the Korean ex-Imperial House now holds the title of Prince Yi.

**Governor-General.**—General *Nobuyuki* (appointed July 24, 1944).

**Area and Population.**—The area is 85,246 square miles. The country is divided into thirteen provinces, each under a local prefect, or governor. Population, at the end of 1938, was 22,800,647. Of these 22,098,310 were Koreans, 630,104 were Japanese, and 52,233 foreigners, of whom about 1,000 were Europeans and Americans, the rest being Chinese. In 1940, the population was 24,326,327. The population of the largest cities and towns was as follows:—Keijo (Seoul), the capital, 935,464; Heijo (Pyeng-Yang), 285,965; Fusan, 249,734; Taikyū, 110,866; Jinsen (Chemulpo), 102,478.

The language of the people is intermediate between Mongolo-Tartar and Japanese, with a large admixture of Chinese words, and an alphabetical system of writing is used. Education and all official business is carried on in Japanese, and the authorities are endeavouring to substitute the latter for the Korean language as the speech of the people.

**Religion and Education.**—The knowledge of Chinese classics and of Confucian doctrine, formerly considered essential to the education of the upper classes, has given way under Japanese and foreign influence to a more practical system of instruction, but the worship of ancestors is still observed with as much punctiliousness as in China. Shinto being the national religion of Japan, shrines are being officially established throughout the peninsula. Attendance at the shrines on stated occasions is obligatory on government officials, teachers and pupils at schools and colleges. In the country there are numerous Buddhist monasteries, which, however, are looked upon with scant respect. French missionaries were working in the country from 1784 and struggled for a century in the face of official persecution. The ban on Christianity was raised in 1882 and the first Protestant missionaries came to Korea in 1884. At the end of 1938 there were 499,300 Christians of all denominations. The missions early established numerous hospitals and schools throughout the country.

Since annexation the Japanese authorities have provided schools in all parts of the country, but it is recognized that much is required to be done. It is hoped eventually to establish an elementary school in every *myen* or village, but lack of funds hinders the speedy attainment of this ideal.

In 1938 the hitherto existing separate designations of schools for Japanese and Koreans were abolished. The latest available statistics of all government and private schools are as follows:—3,372 elementary schools, with 1,311,270 pupils; 53 middle schools, with 27,867 pupils; 57 girls' high schools, with 22,277 pupils; 226 technical schools, with 34,060 pupils; 10 normal schools, with 5,565 pupils. For higher education there were 1

The following are some agricultural statistics for three years :—

| Crop           | Area (hectares) |           |           | Produce (metric tons) |            |           |
|----------------|-----------------|-----------|-----------|-----------------------|------------|-----------|
|                | 1938            | 1939      | 1940      | 1938                  | 1939       | 1940      |
| Rice . . . .   | 3,247,567       | 3,192,338 | 3,178,234 | 9,633,355             | 10,344,669 | 9,071,318 |
| Wheat . . . .  | 781,143         | 745,558   | 841,305   | 1,338,486             | 1,211,305  | 1,311,432 |
| Barley . . . . | 860,538         | 858,891   | 840,462   | 778,122               | 776,406    | 752,525   |
| Rye . . . . .  | 418,279         | 409,557   | 404,406   | 788,261               | 672,969    | 626,234   |

In 1937, the principal fruits produced were (in metric tons) as follows :—peaches, 46,326; pears, 164,344; apples, 155,897; grapes, 69,045; persimmons, 230,730; mandarins, 438,820.

In 1936, the number of oxen was 1,770,938; horses, 1,431,920; sheep, 89,815 (1937); goats, 293,302 (1937); swine, 1,109,739.

In 1940, the total quantity of cocoons obtained was 43,867,981 kwan, valued at 500,499,471 yen. Total raw silk produced in 1937, 41,875 metric tons; of waste, 12,128 metric tons; of floss silk, 389 metric tons.

Production of rayon yarn in 1938, 199,876,000 lbs. Exports of rayon yarn in 1938, 21,984,000 lbs., valued at 17,845,000 yen.

In 1936 the raw marine products amounted to the value of 212,648,020 yen. The production of salt in 1933-34, was 630,706 metric tons; in 1934-35, 676,175 metric tons; in 1935-36, 604,321 metric tons; in 1936-37, 518,818 metric tons.

### Commerce.

Trade of Japan proper for 5 years was as follows :—

|                            | 1936          | 1937          | 1938          | 1939          | 1940          |
|----------------------------|---------------|---------------|---------------|---------------|---------------|
|                            | Yen           | Yen           | Yen           | Yen           | Yen           |

| Re-exports to Japan from U.K. . | 165   | 132   | 90    | 397    | 314   |

### Shipping and Navigation.

Shipping movements at five Japanese ports (Yokohama, Kobe, Nagasaki, Moji and Osaka) :—Total entered, 1937, 56,512 vessels of 140,414,825 tons; cleared, 66,063 vessels of 138,616,070 tons.

In 1937 the registered merchant navy (Japan proper) consisted of 2,602 steamers of European style, of 4,034,284 tons; and 15,688 sailing vessels of Japanese style, of 930,322 tons. There were only 20 steamships of more than 10,000 tons, all belonging to the Nippon Yusen Kaisha. On July 1, 1939, number of steamers, 2,337; gross tonnage, 5,629,845.

### Communications.

The total length of roads in Japan is 594,491 miles (1936).

The first railway in Japan was built in 1872, between Tokyo and Yokohama, a distance of 18 miles. By 1880 there were 73 miles of railway in operation; by 1900, 3,638 miles; by 1910, 5,354 miles; by October, 1923, 9,974 miles. The following table gives the railway statistics for 1936-37 :—

|                         | State Railways | Railways owned by Private Companies | Total         |
|-------------------------|----------------|-------------------------------------|---------------|
| Length in miles . . .   | 10,808         | 4,361                               | 15,169        |
| Gross income, yen . . . | 598,171,299    | 101,710,620                         | 699,881,919   |
| Expenditure, yen . . .  | 3,442,373      | 57,558,086                          | 411,978,459   |
| Goods carried, tons . . | 89,342,111     | 30,315,179                          | 119,657,290   |
| Passengers, number . .  | 1,055,630,711  | 575,602,267                         | 1,631,232,978 |

It has been decided to make the standard gauge 4 feet 8½ inches. The work is expected to be completed in 1943, and the cost estimated at 1,408,000,000 yen. Comprehensive plans have been made for the electrification of the Japanese Government railways. On March 31, 1937, there were 2,771 miles electrified, of which 233 miles were state-owned and 2,538 miles owned by private companies.

The following are postal and telegraphic statistics for four fiscal years (ended March 31) :—

|                                    | 1934-35       | 1935-36       | 1936-37       | 1937-38       |

| Total . . . . .    | 28,737,900 | 18,202,999 | 23,000,000 | 20,600,000 | 33,725,516 |

reserve. The postal savings bank had 6,006,378 depositors with a total amount of 112,802,101 yen on March 31, 1940.

The coinage is identical with that of Japan. Notes are issued by the Bank of Chosen in the following denominations: 100 yen, 20 yen, 10 yen, 5 yen, and 1 yen.

### FORMOSA (TAIWAN).

The Island of Formosa, or Taiwan, was ceded to Japan by China by the treaty which was ratified on May 8, 1895, and Japan took formal possession on June 2 of the same year. Japanese civil government in the island began on March 31, 1896.

*Governor-General.*—Admiral Kiyoshi Hasegawa (appointed November, 1940).

The island has an area of 13,890 square miles, with a population, according to the census of October 1, 1940, of 5,872,084 (2,970,655 males and 2,901,429 females). There were 299,280 Japanese, 5,261,404 Formosans, 1,985 Koreans, and 46,373 foreigners in the island at the end of 1936. The chief towns are Taihoku (340,114 inhabitants in 1940 census), Tainan, Kûrun, and Taichu. The official language is Japanese, but Chinese (Amoy dialect) is the most used.

The island is divided into five provinces (Taihoku, Shinchiku, Taichu, Tainan and Takao) and three districts (Karenko, Taito and the Pescadores).

A colonising scheme was commenced in 1909, whereby Japanese were settled in Taiwan. An educational system has been established for Japanese and natives. In 1937 there were for the instruction of the Japanese 143 primary schools, with 1,108 teachers and 43,671 pupils. For the instruction of the natives there were 788 schools, with 7,242 teachers and 445,396 pupils. There are also normal schools, a medical school, an industrial school, and a school for teaching the Japanese language to natives, and native languages to Japanese. The University of Formosa was opened in April, 1928.

The receipts of the Japanese administration are from inland taxes, customs, public undertakings, and also subsidies from Japan ranging from 5 to 9 million yen annually. The expenditure is chiefly for internal administration and the working of public undertakings.

<sup>1</sup> Budget estimates.

The agricultural products of Formosa are rice, tea, sugar, sweet potatoes, ramie, jute, turmeric; while camphor is worked in the forests under a Government monopoly. The quantity of tea produced in 1936 was 10,848,856 kilograms; in 1935, 10,681,642 kilograms. Production of rice in 1940, 46,000,000 bushels. Yield of raw sugar in 1938-39, 11,761,272 metric tons. The number of animals (December 31, 1937) was:—horses, 924; goats, 70,384; cattle, 76,341; pigs, 1,849,195; buffaloes, 282,101. The industries comprise flour-milling, sugar, tobacco, oil, spirits, iron-work, glass, bricks, soap, and many other manufactures. Mining is making

steady progress; gold, silver, copper and coal being the principal minerals; the output of coal in 1935, was 1,507,126 metric tons, and in 1936, 1,599,516 metric tons. The total value of minerals in 1936 was 30,770,825 yen. There were 55 new style and 75 old style sugar mills in Taiwan in 1937.

Imports in 1937 totalled 822,123,742 yen and exports 440,174,995 yen. The commerce of Formosa is largely with Japan, imports from Japan totalling 241,143,808 yen in 1937 and exports to Japan, 353,863,205 yen. The principal imports in 1937 were: fertilisers, 44,288,818 yen; cotton and silk textiles, 21,635,155 yen; iron and steel, 16,795,909 yen; timber, 13,055,510 yen; motor vehicles, 8,980,185 yen. The principal exports were: sugar, 188,985,935 yen; rice, 126,171,092 yen; bananas, 11,736,412 yen, and tea, 4,986,107 yen. In 1937 the value of camphor and camphor oil exported was 1,859,936 yen.

In December, 1937, there were 138 steamships, of 9,496 tons, and 46 sailing vessels, of 3,478 tons, registered in Formosa. In 1936, 3,701 vessels of 8,858,524 tons entered the ports of Formosa from Japan and other countries.

Roads have been and are being constructed throughout the island. There were, in 1937, 646.3 miles of railways belonging to the Government and 316.8 miles to private companies, and 1,246.2 miles to exclusive use of private companies. In 1937-38 there were 193 post offices, through which passed packets (including parcels), 83,054,442 (received only). The telegraph service has 217 offices; length of line, 734 miles; of wire, 3,843 miles; messages, 3,844,753. Telephone line, 2,946 miles; length of wire, 71,112 miles; calls, 129,054,379.

The post office savings bank had 633,053 depositors with 27,136,748 yen to their credit (1937-38).

The coinage current in the island is that of Japan.

Bōkotō, or the Pescadores, consist of about 12 islands, with a total area of about 50 square miles.

Japanese Sakhalin (or Karafuto) consists of that portion of Sakhalin which lies to the south of the parallel of 50° north latitude. It has an area of about 13,935 sq. miles, and, in 1938, the population was 339,357, of whom 329,743 were Japanese, 7,628 Koreans and 338 Europeans. The most important industry of the island is the herring fishery (value of catch, 9,660,078 yen in 1937), but large areas are fit for agriculture and pasturage, and Japanese settlers have been provided with seed and domestic animals. There is a vast forest area of larch and fir trees, covering 8,207,500 acres. The minerals found are coal and alluvial gold; coal raised in 1938, 343,539 tons. Petroleum also abounds; output in 1939, 3,869,000 barrels. Total length of railways, 404 miles.

The budget for the year ending March 31, 1939, balanced at 46,747,712 yen.

The leased Territory of Kwantung, the southern part of the Liaotung Peninsula, has an area of about 1,438 sq. miles and a population (October 1, 1935) of 1,656,726, of whom 995,447 were males and 661,279 females. At the end of 1937, there were 1,009,870 Manchurians and 174,587 Japanese (exclusive of army and navy). The Territory is under a Japanese governor-general, the seat of administration being at Dairen (or Tairend, formerly called Dalny). At the end of 1936 there were 67 elementary schools with 48,837 pupils, 10 secondary schools with 6,860 pupils, and 12 girls'

schools with 7,517 pupils, for the instruction of the Japanese, and 169 schools with 57,516 pupils for the instruction of the natives; also an American Presbyterian Mission with a church and a hospital.

The revenue for 1938-39 is estimated at 23,021,204 yen, and expenditure 23,921,204 yen.

The chief agricultural products of the Territory are maize, millet, beans, wheat, buckwheat, rice, tobacco, hemp, and various vegetables. There is an active fishing industry, the catch in 1937 being 61,278,038 kilogs, valued at 7,461,840 yen. The chief manufactured product is salt, which is abundant in the Territory. In 1937 production amounted to 429,188 metric tons. Since July 1, 1907, the Territory forms a Customs district under the Chinese Imperial Customs, Dairen being the Customs port, with out-stations at Kinchow, Pulantien, Pitzewo, and Port Arthur. The port is free, goods being subject to duty only on crossing the frontier of the leased territory. The trade is mostly with Japan and China. Imports (1937), 680,061,785 yen; exports, 451,798,860 yen, of which 541,075,279 yen were imported from Japan, and 212,558,562 yen exported to that country. Dairen has a fine harbour, ice-free all the year, and protected by a break-water 1,000 yards long. The harbour is provided with sheds and warehouses, under the control of the South Manchuria Railway Company. The railway connects Port Arthur and Dairen with Mukden, Harbin, and the Eastern Chinese Railway System. In 1937-38, 17,807,615 passengers and 25,339,714 tons of goods were carried. In 1937 its total length was 699 miles.

Exports to U.K. in 1938 (Board of Trade returns) were 432,509; imports from U.K., 268,281; and re-exports from U.K., 9,797.

**Pacific Islands.**—Under the Treaty of Versailles Japan was appointed mandatory to the former German possessions north of the Equator. These include:—(1) *The Marianne (or Ladron) Islands*.—By treaty of February 12, 1919, these islands, with the exception of Guam (the largest of the Marianne Islands) ceded to the United States in 1898, passed on October 1, 1919, from Spanish to German possession for payment of 840,000. There are 14 islands with an area of 246 sq. miles. Saipan is the seat of Government. Rota and Tinian produce cotton. The Japanese population of the islands at October 1, 1935, numbered 39,728, and the natives 4,297. The northern group is actively volcanic and uninhabited.

(2) *The Caroline Islands*.—The Carolines consist of about 549 coral islets, Ponapé having 11,467 inhabitants, Yap 6,650, and Parao 12,798 (each at October 1, 1935). The population is mainly of Malay origin, with some Chinese and Japanese. The chief export is copra. For administrative purposes the islands were divided into two groups: (a) the Eastern Carolines, with Truk and Ponapé as the centres of administration. There are in Truk 1,980 Japanese, 24 foreigners, and 15,129 natives; in Ponapé there are 2,486 Japanese, 28 foreigners, and 8,953 natives. (b) The Western Carolines, with Palau and Yap as administrative centres. There are in Palau 6,553 Japanese, 6,230 natives, and 15 foreigners. In Yap there are 633 Japanese, 6,606 natives, and 11 foreigners.

(3) *Marshall Islands*.—The Marshall Islands, consisting of two chains or rows of lagoon islands (several uninhabited), known respectively as Ratak (with thirteen islands) and Ralik (with eleven islands), first came under German rule in 1885. The population on October 1, 1935, consisted of 481 Japanese, 7 foreigners, and 9,958 natives. The chief island and administrative centre is Jaluit; Protestant (American) and Catholic missions are at

work. There are plantations of coco-palm (32,072 hectares in 1936). The chief export is copra.

Justice is administered in 8 district courts and in a court of appeal. The islands contain 23 primary schools for Japanese and 25 for natives. Besides coco-palm, the principal products are sugar-cane and cotton. In 1936, there were in the islands 5,856 cattle, 2,874 goats and 21,440 pigs.

The revenue and expenditure for the Pacific Islands for 1937-38 is estimated at 8,682,482 yen.

On February 7, 1944, the whole island chain which forms the great atoll of Kwajalein, in the Marshall Group, fell into American hands, and the Commander of the U.S. Navy in the area was appointed Military Governor of the Marshall Islands.

university (at Seoul), with 558 students, and 18 special colleges, including medical, law, commercial, technical, agricultural, dendrological and other colleges, with a total of 4,915 pupils; 1 higher technical school, 1 higher agricultural and dendrological school, and certain other special colleges.

**Finance.**—The finances of Korea form a special account in the Budget of Japan. The estimated revenue and expenditure for two years are shown as follows:—

| Revenue             | 1940-41              | 1941-42              | Expenditure         | 1940-41              | 1941-42              |
|---------------------|----------------------|----------------------|---------------------|----------------------|----------------------|
| Ordinary . . .      | 1,000 Yen<br>595,730 | 1,000 Yen<br>732,544 | Ordinary . . .      | 1,000 Yen<br>555,377 | 1,000 Yen<br>551,787 |
| Extraordinary . . . | 803,444              | 290,083              | Extraordinary . . . | 435,332              | 460,790              |
| Total . . .         | 899,174              | 1,012,577            | Total . . .         | 883,609              | 1,012,577            |

The outstanding debt (March 31, 1938) was 593,646,215 yen.

**Production.**—Korea is essentially an agricultural country; the cultivated area at end of 1937 was approximately 11·0 million acres. The chief crops are rice (about 27 per cent. of the cultivated area), barley, wheat, beans, grain of all kinds, besides tobacco and cotton. The rice crops for 4 years were (in bushels):—1937, 132,912,872 (the largest on record); 1938, 119,728,815; 1939, 71,204,728; 1940, 106,775,869. In 1940, 37,549,620 bushels of barley and in 1939, 25,977,578 bushels of millet, 19,184,462 bushels of soya beans, 14,858,612 bushels of rye, 12,358,157 bushels of wheat and 157,752,637 lb. of cotton were produced. 170 million lb. of apples were grown in 1937. Silkworm rearing is also carried on and in 1940 there were produced 22,713,000 kilos of cocoons compared with 20,566,000 kilos in 1939. Live-stock is raised as a by-product of agriculture. The cattle are well known for their size and quality. In 1939, there were 1,705,000 cattle, 51,000 horses, 1,400,000 pigs, 20,000 sheep. The fishing industry is developing; value of catch in 1939, 151,090,000 yen. Whale fishing is carried on off the coast.

Gold mining is carried on; the value of the 1936 output was 49,909,775 yen. Iron and coal are abundant in Korea; the development of these resources has been impeded by defective means of communication, but is making steady progress. The output of pig iron in 1936 was valued at 7,866,613 yen; iron ore at 1,429,840 yen; coal 13,300,027 yen, of which 6,000,000 yen was soft coal and 7,000,000 yen anthracite; graphite, 1,010,833 yen. Molybdenum, wolfram and mica also are found in fair quantities. The total value of mineral products in 1936 (the last year for which mineral production statistics were published) was 110,429,655 yen. The Government has the monopoly of ginseng, salt and tobacco, the latter yielding 34,298,029 kilos in 1939.

**Industry.**—Industries have shown considerable development during the last few years. The most important are cotton spinning and cotton, silk and rayon weaving. The nitrogeous fertiliser works of the Chosen Chiaso Company and its allied chemical factories at Konan, on the east coast, are an important development of recent years. Cement, paper, saké, pottery, flour, electric bulbs, enamelled ironwares are also being increasingly manufactured. The total number of factories in March, 1938, was 6,233, employing 201,641 operatives, and having an output valued at 959,308,000 yen.

**Commerce.**—The principal open ports are Keijo (Seoul), Jinsen (Chemulpo), Fusan, Gensan, Chinnampo, Mokpo, Kunsan, Seishin, Heijo, Rashin, Yuki, Joshin and Shingishu.

Trade (merchandise only) at the open ports:—

|         | 1936        | 1937        | 1938          | 1939          | 1940 <sup>1</sup> |
|---------|-------------|-------------|---------------|---------------|-------------------|
|         | Yen         | Yen         | Yen           | Yen           | Yen               |
| Imports | 762,417,134 | 863,552,502 | 1,055,928,466 | 1,388,448,284 | 1,176,120,813     |
| Exports | 593,313,046 | 685,542,752 | 879,606,257   | 1,006,793,785 | 700,848,030       |

<sup>1</sup> First 9 months only. The war in Europe and the abnormal international situation have considerably affected the external trade of Korea. No statistics of foreign trade have been published since September, 1940.

Imports from United Kingdom (Board of Trade returns) were 122,854£. in 1936, 62,973£. in 1937, and 27,969£. in 1938. Exports to United Kingdom were 7,090£., 26,141£., and 5,810£., and re-exports from U.K. were 838£., 2,303£., and 3,265£., in the three years respectively.

**Shipping and Communications.**—Shipping entered at Korean ports engaged in foreign trade amounted to 2,171,268 tons in 1939, and in the domestic trade to 11,474,445 tons. In December, 1939, there were 738 steamships, of 106,712 tons, and 1,125 sailing ships, of 45,431 tons, registered in Korea.

Transport in the interior is by rail, road (motor-car, oxen, pack-horses, etc.), and river. At the end of March, 1939, there were 27,887 kilometers of roads (including third-class roads). At the end of August, 1940, there were 4,293 kilometers of Government railways and 1,815 kilometers of private railways.

A daily express air service is maintained between Tokyo, Fukuoka, Keijo and Dairen, with connecting services from Dairen to Tientsin and from Keijo to Mukden and Hsinking. An ordinary daily air service is also maintained between Osaka, Fukuoka and Dairen, calling in Korea at Ulsan, Taikyu, Keijo, Heijo and Shingishu.

Post, telegraph and telephone data, August, 1940: post offices (including sub-post offices), 1,093; telegrams despatched and received, 27,743,062; telephone subscribers, 55,540; telephone messages, 350,447,307; value of domestic money orders issued and paid, 497,834,415 yen; value of foreign money orders issued and paid (including Manchukuo), 35,428,328 yen.

**Currency and Banking.**—In June, 1940, there were 9 banks, semi-Government and ordinary, registered in Korea, with 84,431,000 yen paid-up capital. Deposits at June, 1940, amounted to 879,764,000 yen, this figure including deposits with the branches in Korea of three banks whose head offices are in Japan. The Hong Kong and Shanghai Banking Corporation has an agency at Jinsen (Chemulpo).

The central Government bank is the Bank of Chosen, whose notes circulate within the jurisdiction of the Government-General of Chosen, and are exchangeable with convertible notes issued by the Bank of Japan. The Bank of Chosen has a paid-up capital of 30 million yen, the total deposits, including branches abroad, amounting to 1,011,688,000 yen in June, 1940. Notes issued at June 30, 1940, 437,669,000 yen. Against their issue must be provided a reserve of the same amount, consisting of gold coin, gold and silver bullion, and convertible notes of the Bank of Japan; silver bullion, however, must not exceed one-fourth of the total

## LIBERIA.

**Constitution and Government.**—The Republic of Liberia had its origin in the efforts of several American philanthropic societies to make permanent provision for freed American slaves by establishing them in a colony on the West African coast. In 1822 a settlement was formed on the west coast of Africa near the spot where Monrovia now stands. On July 26, 1847, the State was constituted as the Free and Independent Republic of Liberia. The new State was first recognised by Great Britain and France, and ultimately by other Powers. The Constitution of the Republic is on the model of that of the United States, with important differences. The executive is vested in a President and Cabinet, and the legislative power in a legislature of two Houses, called the Senate and the House of Representatives. The President is elected for eight, the House of Representatives for four, and the Senate for six years. The President must be at least thirty-five years of age, and have unencumbered real estate to the value of 2,500 dollars, or 500*l*. Electors must be of negro blood, and owners of land. The natives of the country are not excluded from the franchise, but, except in the centres of civilisation, they take no part in political life. The official language of the Government is English.

**President of Liberia.**—William V. S. Tubman (elected on May 6, 1943, for the period, 1944–52).

**Vice-President.**—Charles Lorenzo Simpson.

Liberia is one of the original members of the League of Nations.

On March 31, 1942, an agreement was signed between the United States and Liberia by which the United States were given the right to construct, control, operate, and defend airports in Liberia for the duration of the war. The United States is also given the right to assist in the protection and defence of any part of the republic which might be liable to attack. Liberia retains her sovereignty over all such airports and defence areas, while the United States maintains jurisdiction over American military and civilian personnel stationed in Liberia. At the same time the United States agrees

## AREA, POPULATION—RELIGION, EDUCATION, JUSTICE 1077

to extend certain defence aids to Liberia, and to carry out an extension of the Liberian system of roads. On June 8, 1943, a further mutual-aid agreement was concluded with the United States, which extends lend-lease aid to Liberia for the purpose of defence, and enables it to increase its armed forces. Liberia entered the war on the side of the United Nations on January 27, 1944.

**Area and Population.**—Liberia has about 350 miles of coast line, extending from the British colony of Sierra Leone, on the west, to the French colony of the Ivory Coast on the east, and it stretches inland to a distance, in some places, of about 200 miles. The boundaries were determined by the Anglo-Liberian agreement of 1885 and the Franco-Liberian agreements of 1892 and 1907–10. Early in 1911 an agreement was concluded between the British and Liberian Governments transferring the territory of Kanre-Lahun to Sierra Leone in exchange for a strip of undeveloped territory of about the same area on the south side of Morro River, which now becomes the boundary.

The total area is about 43,000 square miles. The total population is estimated at 1 to 1½ millions, all of the African race. Since the organisation of the frontier force the Government has obtained complete control of Northern Liberia and of the Kru countries in Southern Liberia. The indigenous natives belong in the main to six principal stocks: (1) the Mandingos (Muhammadan), (2) the Gissi, (3) the Gola, (4) the Kpwezi, (5) the Kru negroes and their allies, and (6) the Greboes. The other principal tribes in the Republic are: Vai, Mendi, Belle, Dey, Manoh, Geo, Bassa, Buzzi, Gbandi, Krahn, and Geh.

The Kru tribes are mostly Pagan. The number of Americo-Liberians is estimated at about 12,000. About 60,000 of the coast negroes may be considered civilised. There is a British negro colony of about 400, and there are about 250 Europeans and Americans. The coast region is divided into counties, Bassa, Sino, Maryland, and Cape Mount, each under a Government superintendent, and Montserrado, subdivided into 2 districts, each under a superintendent. Monrovia, the capital, has, including Krutown, an estimated population of 10,000, and is administered as a Commonwealth District by a Municipal Board appointed by the President. It is one of the nine ports of entry along the 350 miles of coast, the others being Robertsport (Cape Mount), Marshall (Junk), Buchanan, River Cess, Greenville (Sinoe), Sasstown, Grand Cess, and Harper (Cape Palmas). Other towns are Boyesville, Arthington, Careysburg, Millsburg, Whiteplains, Bopora (native), Rocktown (native), Garraway, Upper Buchanan, Edina, Kakata, Paynesville, Clay Ashland.

**Religion, Education and Justice.**—Religious institutions in Liberia are mainly Baptist, Methodist, Episcopalian, African Methodist, Pentecostal, Seven Day Adventist and Lutheran. There are several American, Canadian and Roman Catholic missions at work.

There are at present (1944) 190 schools, of which 78 are Government, 79 maintained by missions, 16 private schools, 2 philanthropic schools, 5 tribal schools, 3 kindergartens and 7 schools maintained by churches. The total number of pupils receiving instruction is over 15,000.

The Government has a college at Monrovia (Liberia College), with 6 professors, 4 instructors, 3 tutors and 160 students. There are 6 high schools maintained by Government, one by the Methodist Mission and another by the Protestant Episcopal Mission.

A criminal code was enacted in 1914; the customs laws were codified in 1907 and revised in 1938.

**Finance.**—The revenue and expenditure for 5 years, in Liberian dollars (all dollars are Liberian, at fixed rate—4-80 dollars equals 1£, except external funded debt, which is in U.S. dollars):—

|             | 1939               | 1940               | 1941                 | 1942                 | 1943                 |
|-------------|--------------------|--------------------|----------------------|----------------------|----------------------|
| Revenue     | Dollars<br>827,302 | Dollars<br>898,614 | Dollars<br>1,166,693 | Dollars<br>1,005,272 | Dollars<br>1,429,336 |
| Expenditure | 906,558            | 757,032            | 855,808              | 960,279              | 1,044,647            |

The customs revenues were for 1939, 473,386 dollars; for 1940, 430,684 dollars; for 1941, 517,941 dollars; for 1942, 595,895 dollars; for 1943, 724,200 dollars.

Important sources of revenue (1943):—hut tax, 232,367 dollars; total internal revenues, 544,038 dollars. Main expenditures: debt charges, interest, and amortization, 202,751 dollars; Government operational expenses, 841,905 dollars.

In 1926 arrangements were made with the Finance Corporation of America for a loan of 5,000,000 dollars, of which approximately half has been issued. The previous 1912 loan, in which British financial interests preponderated, was paid off from the proceeds of the new loan, which was originally secured by a first lien on customs revenues and headmoneys. Since 1943, however, the service of the loan is a first lien on all revenues in excess of 565,000 dollars (U.S.), which sum is devoted to general Government operations.

The Loan Agreement also provides for financial supervision by American officials and additional experts to be employed by the Liberian Government. The external bonded debt on January 1, 1944, was 1,193,000 dollars.

The internal floating debt as of January 1, 1944, amounted to 74,666 dollars.

**Defence.**—For defence every citizen from 16 to 45 years of age capable of bearing arms is liable to serve. The establishment organized on a militia basis numbers 4,000, divided into 7 infantry regiments. There is in addition an enlisted Frontier Force of 60 officers and 1200, men.

**Production, Commerce.**—The agricultural, mineral and industrial resources of Liberia are comparatively undeveloped. The soil is productive, but due to excessive rainfall (from 160–180 inches per year), there are large swamp areas. The forests are mainly of the jungle variety, not well adapted to production of timber. Many forest products are gathered for export, of which piassava, fibre and palm kernels are the most important, and the collection of wild rubber is once more being undertaken. Rice, cassava, coffee and sugar cane are cultivated.

However, rice production does not equal consumption, and sugar cane is grown for manufacture of locally consumed rum. Coffee production is rapidly decreasing. A large rubber plantation is now in production.

Gold mining from alluvial deposits is of increasing importance, large deposits of iron are known to exist, while diamonds have been found in certain sections. Mineral resources have, however, not been completely surveyed. There are no important manufacturing industries.

Foreign trade for five years was as follows:—

|         | 1939      | 1940      | 1941      | 1942      | 1943      |
|---------|-----------|-----------|-----------|-----------|-----------|
|         | Dollars   | Dollars   | Dollars   | Dollars   | Dollars   |
| Imports | 2,002,864 | 2,235,961 | 3,291,967 | 4,732,446 | 4,679,602 |
| Exports | 2,714,133 | 3,242,290 | 5,096,919 | 8,151,023 | 8,997,896 |

The principal imports in 1942 were (in dollars): metals and manufactures, 576,488; machinery and vehicles, 747,820; non-metallic minerals, 1,269,128; vegetable food products and beverages, 364,780; textile fibres and manufactures, 563,641, and chemicals and related products, 364,733.

The principal exports in 1943 were (in dollars): crude rubber (32,279,404 lb.), 8,095,319; crude gold, 814,839; piassava, 86,441. The principal port for exports was Marshall, adjacent to the rubber plantations, about 40 miles east of Monrovia, the capital.

According to Board of Trade returns, the value of the trade between the United Kingdom and Liberia was as follows in five years:—

|                                    | 1934   | 1935   | 1936   | 1937   | 1938   |
|------------------------------------|--------|--------|--------|--------|--------|
|                                    | £      | £      | £      | £      | £      |
| Imports into U.K. from Liberia     | 5,996  | 5,246  | 7,595  | 12,267 | 7,184  |
| Exports of U.K. produce to Liberia | 69,115 | 74,919 | 81,980 | 91,414 | 77,659 |
| Re-exports to Liberia from U.K.    | 4,041  | 6,001  | 5,531  | 8,533  | 7,871  |

**Shipping.**—In 1943, 63 ships entered the ports. Of these, 49 were American; 11 were British; 3 were French.

**Communications.**—There are no railways in Liberia, and means of transport are extremely limited. At present there are about 200 miles of State roads, and another 200 miles of private roads in the rubber plantations fit for light motor traffic, all of which are in the coastal area, but the State is beginning to extend the highway system with lend-lease aid gradually towards the interior. In the interior, communication is maintained between villages by tracks, all goods being carried by native porters.

A harbour development is being planned for Monrovia, to be constructed under the auspices of the United States Government under lend-lease terms. Construction was expected to be begun before the end of 1944. The work will take three years to complete.

Air communication for passengers and mails within Liberia is maintained by Pan-American Airways from Fisherman's Lake in the east to Harper (Cape Palmas) in the west via Monrovia and Robertsfield. Fisherman's Lake is also a landing port for a clipper service to South America. The French Airways Company Aeromaritime make a stop-over at Monrovia on their weekly air service between Lagos and Dakar.

The River St. Paul is navigable for a distance of 25 miles from its mouth for small craft of shallow draft, and a service of motor launches runs between Monrovia and White Plains. The Cavalla river is navigable for 50 miles.

There is cable communication with Europe and America via Dakar and a wireless station is maintained by the Government at Monrovia. There is no telephone or telegraph service in the country, except on the Firestone plantations.

There are wireless stations at Monrovia, Bassa, Harper, Kolahun and Sinoe. The Firestone Plantations Company has private wireless stations at Harbel and near Cape Palmas.

**Money, Weights and Measures.**—The money in circulation is United States currency since November 3, 1942, but there is a Liberian coinage in silver and copper. Official accounts are kept in dollars and cents. The Liberian coins are as follows:—Silver, 50-, 25- and 10-cent pieces; alloy, 2-, 1- and  $\frac{1}{2}$ -cent pieces.

British currency ceased to be legal tender after the end of 1943, and on January 1, 1944, the Liberian dollar was raised to parity with the United States.

Weights and measures are the same as Great Britain and the United States.

The Firestone Plantations Company have established a bank at Monrovia under the title of 'The Bank of Monrovia, Inc.'

## LIECHTENSTEIN.

The Principality of Liechtenstein, lying between the former Austrian province of Vorarlberg and the Swiss cantons of St. Gallen and Graubünden, is a

sovereign State, whose history dates back to May 8, 1842, when Count Hartmann I became ruler of the Principality of Vaduz. Additions were later on made to the count's domains, and by 1434 the territory reached its present boundaries. It consists of the two counties of Schellenberg and Vaduz (formerly immediate fiefs of the Roman Empire). The former in 1699 and the latter in 1712 came into the possession of the house of Liechtenstein and, by diploma of January 23, 1719, granted by the Emperor Karl VI, the two lordships were constituted as the Principality of Liechtenstein. After the Treaty of Pressburg, John I, who had succeeded his brother, Aloys I, as seventh Prince in 1805, seceded from the Holy Roman Empire on July 12, 1806, and joined the Confederation of the Rhine under the Protectorate of the Emperor, Napoleon I, and after the fall of the French Empire joined the German Confederation June 8, 1815. He was succeeded in 1836 by his son, Aloys II, whose son, John II, in 1858 began his long reign, which lasted until 1929. This Prince, who was of age at his accession, saw the dissolution of the German Confederation in August, 1866, and thereafter maintained the political independence of the Principality.

The Reigning Prince is Francis Joseph II, born August 16, 1906; succeeded his great uncle, July 25, 1938; married on March 7, 1943, to Countess Gina von Wilczek (Princess Georgine). The reigning family originated in the twelfth century, and traces its descent through free barons who in 1608 became princes of Liechtenstein. The monarchy is hereditary in the male line. The constitution, adopted in October, 1921, provides for a Diet of 15 members elected for four years by direct vote on the basis of universal suffrage and proportional representation. The capital and seat of Government is Vaduz (pop. 1941, 2,020). The principality has a High Court. Since February, 1921, Liechtenstein has had the Swiss currency, and since January, 1924, it has been included in the Swiss Customs Union; the posts and telegraphs are administered by Switzerland.

Area, 167 square kilometres, or 60 square miles; population, of German origin (census, December, 1941), 11,218. In 1930 there were Catholics, 9,492; Protestants, 253. In 1942 there were 284 births and 141 deaths. In 1942-43 there were 42 elementary schools and 20 continuation schools, with 1,701 pupils and 42 teachers (26 men and 16 women). Budget estimates for 1944: revenue, 2,530,490 francs; expenditure, 2,435,749 francs. Public debt on December 31, 1944, 2,732,503 francs. The inhabitants of Liechtenstein since 1867 have not been liable to military service. The Principality has no army (since 1868). Police force, 50. The population is in great part agricultural, the chief products of the country being corn, wine, fruit and wood. On June 19, 1943, there were 5,941 cattle, 324 horses, 627 sheep, 873 goats, 2,855 pigs and 25,233 chickens. The industries are cotton weaving and cotton spinning, leather goods and pottery. The rearing of cattle, for which the fine alpine pastures are well suited, is highly developed. Number of telephones, 664. On April 3, 1943, a canal for irrigating the valley, 26 km. in length, was opened. The cost of construction was 4 million francs.

*Head of the Government.*—Dr. Joseph Hoop.

Consolidated debt on December 31, 1938, amounted to 624,703,615 francs, floating debt to 137,831,507 francs.

**Defence.**—The Treaty of London of 1867 imposed disarmed neutrality on Luxembourg. It is expected that after the war Luxembourg will abandon its traditional neutral status and will raise an army of 15,000 men.

**Production and Industry.**—Agriculture is carried on by about 90,000 of the population (about 32 per cent.); 398,173 acres were under cultivation in 1938. The principal crops are oats and potatoes.

According to the latest census (October 15, 1939), the country possesses 18,017 horses, 107,417 head of cattle, 154,727 pigs, 8,465 sheep, and 8,107 goats.

The mining and metallurgical industries are the most important. In 1938 production (in metric tons) of iron ore was 5,140,632; of pig iron, 1,550,703; of steel, 1,436,506.

The number of blast furnaces in 1938 was 35, employing 3,315 workers, the wages paid being 51,856,978 francs. There were 7 steelworks, and the number of workers was 2,038 in 1938.

**Communications.**—In 1938, there were 1,301 miles of State roads and 1,343 miles of local roads. In 1937 there were 339 miles of railway (249 miles normal gauge and 90 miles secondary gauge), and 796 miles of telegraph line with 2,016 miles of wire, and 466 telegraph offices. There were also 52 telephone systems with 1,485 miles of line and 35,337 miles of wire. In 1937 there were 144 post-offices, through which there passed: inland mail: 5,128,600 letters and post-cards, 24,690,400 pieces of printed matter and newspapers; foreign mail: 16,940,100 pieces of mail matter.

**Currency.**—According to a law of April 1, 1935, the parity of the Luxembourg franc in relation to the Belgian franc was fixed, as from that date as follows: 1 Luxembourg franc = 1.25 Belgian franc. Belgian bank-notes are received in payment in the Grand-Duchy at this rate. Notes of the Belgian National Bank are legal tender in Luxembourg. On January 1, 1939, there were 206,331 depositors in the State Savings Bank, with a total of 709,753,403 francs to their credit.

## MEXICO.

(REPÚBLICA MEXICANA.)

### Constitution and Government.

Mexico's history falls into three epochs. She was annexed to the Spanish Crown by conquest in 1521, and for three centuries was governed by Spain through 32 Viceroyalties, from Antonio de Mendoza (1535-1550) to Juan O'Donohú (1821-1822). From 1822 to 1911 was the second epoch covering nearly a century of national existence and abounding in movements and events shaping the national life. After three quarters of a century marked by stormy events (*see STATESMAN'S YEAR-BOOK*, 1928, p. 1099) the country settled down in 1876 to a long and quiet régime under the presidency of General Don Porfirio Díaz (died July 2, 1915), who ruled the country with the exception of four years (1880-4, General Manuel González) until May 25, 1911, when he presented his resignation to Congress. Then began the third or revolutionary epoch, commencing with *coups d'état* and civil war and culminating in bold social and economic experiments. The names of the Presidents are shown in the following table:—

|                                                |                                           |
|------------------------------------------------|-------------------------------------------|
| Gen. Don Porfirio Díaz                         | Dec. 1, 1884—May 25, 1911. <sup>1</sup>   |
| Don Francisco León de la Barra (Provisional)   | May 25, 1911—Nov. 1, 1911.                |
| Don Francisco Indalecio Madero                 | Nov. 1, 1911—Feb. 19, 1913. <sup>1</sup>  |
| Don Pedro Lascurain (Provisional)              | Feb. 19, 1913—Feb. 19, 1913. <sup>2</sup> |
| Gen. Don Victoriano de la Huerta (Provisional) | Feb. 19, 1913—July 15, 1913. <sup>1</sup> |
| Don Francisco Carbajal (Provisional)           | July 15, 1914—Aug. 13, 1914. <sup>1</sup> |
| (Period of disputed succession.)               |                                           |
| Don Venustiano Carranza ('First Chief')        | Aug. 20, 1914—Nov. 24, 1914.              |
| Don Eulalio Martín Gutiérrez (Provisional)     | Nov. 10, 1914—Jan. 16, 1915.              |
| Gen. Don Roque González Garza (Provisional)    | Jan. 16, 1915—June 9, 1915.               |
| Don Francisco Lagos Cházaro (Provisional)      | July 31, 1915—Oct. 1915.                  |
| Don Venustiano Carranza (Provisional)          | Oct. 1915—Mar. 11, 1917.                  |
| Don Venustiano Carranza                        | Nov. 11, 1917—May 21, 1920. <sup>2</sup>  |
| Don Adolfo de la Huerta (Provisional)          | May 25, 1920—Nov. 30, 1920.               |
| Gen. Don Alvaro Obregón                        | Dec. 1, 1920—Nov. 30, 1924.               |
| Gen. Don Plutarco Elías Calles                 | Dec. 1, 1924—Nov. 30, 1928.               |

Owing to the assassination, on July 17, 1928, of General Obregón, the President-elect, a Provisional President took office.

|                                     |                                          |
|-------------------------------------|------------------------------------------|
| Don Emilio Portes Gil (Provisional) | Dec. 1, 1928—Feb. 4, 1930.               |
| Don Pascual Ortiz Rubio             | Feb. 5, 1930—Sept. 3, 1932. <sup>1</sup> |
| Gen. Don Abelardo Rodríguez         | Sept. 4, 1932—Nov. 30, 1934.             |
| Gen. Lázaro Cárdenas                | Dec. 1, 1934—Nov. 30, 1940.              |

<sup>1</sup> Resigned.

<sup>2</sup> Assassinated.

*President.*—General Manuel Ávila Camacho (assumed office December 1, 1940, to serve until November 30, 1946).

Mexico broke off diplomatic relations with Japan on December 8, 1941; with Germany and Italy on December 11; with Hungary on December 19, and with Bulgaria on December 20, 1941. She declared war against Japan.

## LUXEMBURG.

THE Grand Duchy of Luxemburg, situated between Belgium, France and Germany, is a constitutional monarchy, the hereditary sovereignty being in the Nassau family, in conformity with the Pact of June 30, 1783, and Article 71 of the Treaty of Vienna of June 9, 1815, and the first Article of the Treaty of London on May 11, 1867.

**Reigning Grand Duchess.**—Charlotte, born January 23, 1896, was the daughter of William, Grand Duke of Luxemburg, Duke of Nassau (died February 25, 1912) and of Marie-Anne, Princess of Braganza, born July 13, 1861 (died July 7, 1942), succeeded on the abdication of her sister *Marie-Adelaide*, on January 9, 1919; married to Prince Felix of Bourbon-Parma on November 6, 1919. *Offspring*:—Prince *Jean*, born January 5, 1921, Princess *Elisabeth*, born December 22, 1922, Princess *Marie-Adelaide*, born May 21, 1924, Princess *Marie-Gabrielle*, born August 2, 1925, Prince *Charles*, born August 7, 1927, and Princess *Aliz*, born August 24, 1929. Sisters of the Grand Duchess:—Princess *Marie-Adelaide*, born June 14, 1894, died January 24, 1924; Princess *Hilda*, born February 15, 1897; Princess *Antoinette*, born October 7, 1899; Princess *Elisabeth*, born March 7, 1901; Princess *Sophie*, born February 14, 1902.

On September 28, 1919, a Referendum was taken in Luxemburg to decide on the political and economic future of the country. Those entitled to vote were men and women of 21 (voters on the register, 127,775; actual voters, 90,984). The voting resulted as follows:—for the reigning Grand Duchess, 66,811; for the continuance of the Nassau-Braganza dynasty under another Grand Duchess, 1,286; for another dynasty, 889; for a Republic, 16,885; for an economic union with France, 60,133; for an economic union with Belgium, 22,242. But France refused in favour of Belgium to consider the possibility of an economic union, and negotiations to this end between Belgium and Luxemburg were concluded on December 22, 1921, when the Chamber of the Grand Duchy passed a Bill for the economic union between Belgium and Luxemburg. The Agreement, which is for 50 years, provides for the disappearance of the customs barrier between the two countries and the use of Belgian currency in the Grand Duchy. It came into force on May 1, 1922.

On September 28, 1938, a law was passed empowering the Government to take any steps required to 'preserve the safety of the State and its inhabitants.' On the eve of the invasion of Poland, on August 29, 1939, the Luxemburg Chamber of Deputies met to extend the time limit of the 1938 law of full powers, this time indefinitely.

On May 10, 1940, suddenly and without warning or ultimatum, the armed forces of Germany attacked the Netherlands, Belgium and Luxemburg. On July 25 a German Civil Governor of Luxemburg was appointed and on August 30, 1942, the Grand Duchy was annexed to the Reich by the Germans. On September 10, 1944, the Grand Duchy was liberated by American forces and the Government returned to the capital.

The Cabinet, appointed on November 5, 1937, which is still in office, is composed of Pierre Dupong, Prime Minister and President of the Government, Joseph Bech, Foreign Minister, Victor Bodson, Minister of Justice, Pierre Frieden, Minister of Education (December, 1944), and Pierre Krier, Minister of Labour.

**Constitution and Government.**—The Constitution was proclaimed on October 17, 1868; in 1919 some important changes were introduced into it, viz. the Constituent Assembly decided that the sovereign power resided in the Nation (Article 32); that all secret treaties were abolished (Article 37); that the deputies are to be elected on the basis of universal suffrage, pure and simple, by scrutiny of lists, according to the rules of proportional representation and in conformity with the principle of the smallest electoral quotient (Article 52).

The country is divided into four electoral districts: the South, North, Centre, and East. In order to qualify as an elector it is necessary to be a citizen (male or female) of Luxemburg and to have completed 21 years of age; to be eligible for election it is necessary to have completed 25 years of age and to fulfil the conditions required for active electorate. The Members of the Chamber of Deputies are elected for 6 years; half are renewed every 3 years (Article 56); they receive a salary which may not surpass 4,000 francs per annum; they are also entitled to receive a travelling allowance (Article 75).

The Chamber of Deputies consists of 65 members.

The head of the State takes part in the legislative power, exercises the executive power, and has a certain part in the judicial power. The Constitution leaves to the sovereign the right to organise the Government, which consists of a Minister of State, who is President of the Government, and of at least three Ministers.

Besides the Government there is a Council of State. It deliberates on proposed laws and Bills, on amendments that might be proposed; it also gives administrative decisions and expresses its opinion regarding any other question referred to it by the Grand Duke or by the Law. The Council of State is composed of 15 members chosen for life by the sovereign, who also chooses a president among them each year.

**Area and Population.**—Luxemburg has an area of 999 square miles, and a population (December 31, 1935) of 296,913. The population is Catholic, save (December 31, 1935), 3,216 Protestants, 3,144 Jews, 450 belonging to other sects, and 5,653 without religion (or having given no indication on this subject). The chief town, Luxemburg, has 57,740 (December 31, 1935) inhabitants. Other towns are Esch-Alzette, the centre of the mining district, 27,517 inhabitants; Differdange, 15,945 inhabitants; Dudelange, 13,572 inhabitants; and Petange, 10,525 inhabitants.

In 1938 there were 4,490 births, 3,811 deaths, and 2,472 marriages.

**Education.**—Education is compulsory for all children between the ages of 6 and 13. In 1936-37 the primary schools had 1,072 teachers (540 women); there are 22 higher elementary schools, 3 classical schools, 2 commercial and industrial colleges, 2 girls' colleges, 4 technical schools, 2 teachers' training colleges (male and female), a mining school, a college of agriculture, and an academy of music.

**Finance.**—Revenue and expenditure (including extraordinary) for five years (in francs):—

|             | 1935        | 1936 <sup>1</sup> | 1937 <sup>1</sup> | 1938 <sup>1</sup> | 1939 <sup>1</sup> |
|-------------|-------------|-------------------|-------------------|-------------------|-------------------|
| Revenue     | 267,896,441 | 388,725,752       | 337,355,629       | 343,341,049       | 355,225,716       |
| Expenditure | 313,903,671 | 378,949,355       | 332,937,143       | 355,137,434       | 353,439,719       |

<sup>1</sup> Estimates.

Germany and Italy on May 22, 1942 (declaration ratified by Congress, May 28).

A new Constitution, amending the Constitution of 1857, was promulgated on February 5, 1917, and amended in 1929 and 1933. By its terms Mexico is declared a federative republic, divided into 28 States, each of which has the right to manage its own local affairs, while the whole is bound together in the usual federal system. Citizenship, including the right of suffrage, is vested in all male nationals who are 18 years old if married or 21 years old if unmarried and having 'an honourable means of livelihood'; in July, 1938, Congress passed a constitutional amendment giving women equal citizenship and suffrage with men, but only two of the 28 States had ratified this by the end of 1940; two-thirds must do so before the amendment is effective.

Congress consists of a Chamber of Deputies (170 members) elected for three years by universal suffrage, at the rate of one member for 100,000 inhabitants, and a Senate of fifty-eight members, two for each State and the Federal District, elected for six years. Senators and Deputies are ineligible for re-election until another term has elapsed. Congress sits from September 1 to December 31. During the recess there is a Permanent Committee consisting of fourteen Senators and fifteen Representatives appointed by the respective Houses.

The President is elected by direct popular vote in a general election, and holds office for six years. Failing the President, Congress acts as an electoral college for the election of a successor. The administration is carried on under the direction of the President and a Council formed by the Secretaries of nine Ministries and the heads of five Departments.

#### LOCAL GOVERNMENT.

Mexico is divided into twenty-eight States, one Federal District (comprising Mexico City and 11 surrounding villages), and three Territories (two occupying the peninsula of Lower California and the third, Quintana Roo). Each State has its own constitution, government, taxes, and laws; but inter-State customs duties are not permitted. Each State has its governor, legislature, and judicial officers popularly elected under rules similar to those of the Federation. All the States must publish and enforce laws issued by the Federal Government. The President appoints the Governors of the Territories and the Chief of the Federal District.

#### Area and Population.

Mexico is situated between the parallels of 14°33' and 32°43' north, and 86°48' and 117°8' west, and comprises, according to Mexican measurements, 1,220,361 square miles.

The population at the census of May 15, 1940, was 19,478,741, an increase of 2,821,019 or 17 per cent. since 1930; density was 25.49 persons per square mile; census results are shown in the following table (the capitals of the states and territories are in brackets):—

| States and Territories               | Area, in square miles | Census Population, 1940 |         |         |
|--------------------------------------|-----------------------|-------------------------|---------|---------|
|                                      |                       | Males                   | Females | Total   |
| Aguascalientes (Aguascalientes)      | 2,499                 | 76,300                  | 83,962  | 160,262 |

Estimated population, June 30, 1942, 20,625,826.

Census figures in 1930 show that 4,620,880 of the population were Indian, 9,040,590 of mixed race, 2,444,466 pure white, 140,094 of unknown racial origin, and 159,876 foreigners. Urban population numbered 5,540,631 (33.47 per cent.); gainfully employed, 5,166,803 (31.21 per cent. of the total), of whom 3,626,278 (70.17 per cent.) were in agriculture, 743,407 in industry, 278,841 in commerce, 107,058 in transport, and 415,225 in all other occupations. The language is Spanish, but there are 54 native Indian languages spoken exclusively or by preference by about 3,000,000 Indians. Total Indian population is (1940) considered to be about 11 millions.

The chief cities, with population at the census of 1940, are:—Mexico City (capital), 1,464,556; Guadalajara, 228,049; Monterrey, 180,942; Puebla, 137,324; Mérida, 98,834; León, 86,089; Tampico, 81,334; Aguascalientes, 81,124; San Luis Potosí, 78,042; Torreón, 76,613; Veracruz, 70,958; Chihuahua, 57,456; Pachuca, 52,387; Saltillo, 49,658; Ciudad Juárez, 48,676; Orizaba, 47,982; Morelia, 44,826; Toluca, 42,820; Jalapa, 38,785; Oaxaca de Juárez, 33,867; Querétaro, 33,563; Durango, 33,318.

Movement of population for 5 years:—

| Year | Marriages | Births  | Deaths  | Migration |          |
|------|-----------|---------|---------|-----------|----------|
|      |           |         |         | Entered   | Departed |
| 1938 | 180,840   | 829,651 | 436,476 | 143,253   | 132,459  |
| 1939 | 133,746   | 865,081 | 448,216 | 182,726   | 156,061  |

| 1941 | —         | 878,935 | 446,861 | —         | —        |
| 1942 | —         | 871,554 | 459,306 | —         | —        |

### Religion, Education and Justice.

The prevailing religion is the Roman Catholic (7 archbishops and 23 bishops), but by the Constitution of 1857, the Church was separated from the State, and the Constitution of 1917 provided strict regulation of this and all other religions. No ecclesiastical body may acquire landed property and since 1917 the property of the Church has been held to belong to the State. In 1928 all foreign priests were expelled, and in June, 1931, the Papal Delegate; the authorized priesthood has been reduced to about 350. However, all churches eschewing public affairs flourish freely, and in 1936 and 1937 a number of States permitted the Catholic churches to re-open.

Primary education is free and compulsory (up to 15 years of age), and secular in all State establishments, but illiteracy is high—about 48 per cent. of the population. Clergy are forbidden to set up primary schools. All private schools must conform to Government standards, including support of the Socialist ideals set forth in the Constitution. Coeducation is aimed at; military drill is compulsory for boys under 15 years. In the Federal District and in the Territories education is controlled by the National Government; elsewhere by the State authorities. The census of 1930 showed 59.26 per cent. of those over 10 years old to be illiterate; in the Federal District, 23.06 per cent. There are 10 universities enjoying considerable autonomy; two in the Federal District and one each in Jalisco (founded 1792), Michoacán, Nuevo León (1933), San Luis Potosí, Puebla, Veracruz, and Yucatán (founded 1922). Of these the most important is the National University at Mexico City, re-organised in 1910, and with full autonomy granted in 1929; it has about 10,000 students, including women. The first university exclusively for women was opened March 1, 1943. In 1943 there were 15,531 primary schools with 1,343,500 pupils; 180 secondary schools with 29,886 pupils; 29 industrial and commercial schools with 13,674 pupils. Ranches, mills, mines and other concerns are compelled to maintain schools for employees and their children.

Budget for educational expenditure in 1942, 91 million pesos; in 1943, 100,290,440 pesos.

Magistrates of the various Courts are appointed by Congress for six years. They include the Supreme Court with 16 judges, nine Circuit Courts with 9 judges, and District Courts with 44 judges. The Federal District has a Higher Court of Justice composed of 22 magistrates and 4 supernumeraries. The new Penal Code of January 1, 1930, abolished the death penalty, except for the Army, and set up a Commission of alienists and other specialists, in place of the Courts, to pass on criminal cases; there is no appeal from their recommendations as to the proper treatment.

### Federal Finance.

The ordinary receipts and expenditure (in pesos ranging from 22 cents, U.S., to 18 cents) for five years:—

|                   | 1940        | 1941 <sup>1</sup> | 1942 <sup>1</sup> | 1943 <sup>1</sup> | 1944 <sup>1</sup> |
|-------------------|-------------|-------------------|-------------------|-------------------|-------------------|
|                   | Pesos       | Pesos             | Pesos             | Pesos             | Pesos             |
| Revenue . . .     | 515,154,651 | 492,000,000       | 666,000,000       | 703,000,000       | 1,102,000,000     |
| Expenditure . . . | 628,728,187 | 492,000,000       | 847,747,591       | 818,517,400       | 1,102,000,000     |

<sup>1</sup> Budget estimate.

In 1943 the largest expenditures budgeted were for national defence, 147,000,000 pesos; education, 97,000,000, and public debt, 96,000,000.

The funded debt (in default since 1914) on December 31, 1940, was:—  
Direct debt, 1,185,660,844 pesos; indirect debt, 104,019,828 pesos.

Nominal value of the external debt was estimated in 1942 at 235,000,000 dollars, U.S., of which 80 per cent was in the hands of Axis-controlled nationals and institutions and 40 per cent. divided about equally between holders in the United States and Great Britain. A debt settlement was reached in December, 1942, between the Government and the International Committee of Bankers in New York, but London creditors holding about 20 per cent. of the debt were not consulted; of the railway debt, also in default, about one-half is held in London. The agreement scaled down the payments to one-fifth of their dollar value; the total will be repaid by 1963 and 1968. Axis interests are excluded. American direct investments in Mexico, December, 1940, totalled 357,927,000 dollars, compared with 682,536,000 dollars in 1929. British investments in December, 1944, amounted to 137,834,190£, of which 74.9 per cent. was in default.

### Defence.

Every citizen is compelled to serve in the active Army or in the National Guard. Supreme command is vested in the President, exercised through the Secretary for War. The active Army in 1938 had a strength of 3,405 officers and 38,430 other ranks, organised in 50 battalions of infantry, 40 regiments of cavalry, 2 regiments of military police, 2 marine corps, 2 regiments of artillery and 3 detached companies. Military education is provided at a military college and in officers' training schools, and is compulsory in the colleges. To combat illiteracy in the Army, 165 regimental schools have been established. The Air Force comprises 2 regiments each of 3 squadrons with 51 aeroplanes.

After Mexico's entry into the war, in May, 1942, the standing Army was expanded with fresh drafts of conscripts, being almost doubled within a year. It was also progressively re-equipped with modern weapons.

Three Mexican companies are fighting with the Allied Fifth Army in Italy, and two companies with the Eighth Army.

The Navy, which is little more than a police force, consists of 6 sloops, 10 coastguard patrol and other minor craft.

### Production and Industry.

Mexico is well suited for agriculture. In the tropical regions, in the mountain valleys, and on the great central plateau are millions of acres of virgin soil and millions more which have been barely skimmed by the antiquated methods of agriculture in vogue. In 1942 about 16,795,000 acres of arable land were actively farmed; about 56 per cent. was planted to maize.

Up to December 1, 1941, 65,000,000 acres of confiscated lands (much of it belonging to foreigners) had been distributed to 1,606,507 families in accordance with the agrarian laws, which made the rural village, the *ejido*, the unit for holding land in common. The *ejido* was strictly communal; the title to the land was held by the State on behalf of the village and was inalienable. The fertile portion was divided into small holdings of equal size which were assigned by lot to the heads of families called *ejidatarios*; these might hold for life and bequeath to their heirs but they lost their rights if they failed to farm two years in succession. The land cannot be rented. However, the President, General Camacho, has checked this movement by decree of December 11, 1941, designed to restore private ownership to peasants living on 16,700 communal farms. The *ejido* movement has been aided by a special Credit Bank (with loans of 51 million pesos) and by Co-operative Societies. The Laguna region in North-central Mexico is the seat of the largest experiment of this type.

In 1943 Mexico had 10,082,958 cattle, 1,887,478 horses, 721,343 mules, 2,159,734 asses, 3,673,887 sheep, 6,544,129 goats and 3,698,233 pigs.

Wheat, cotton, garbanzos, sugar, tomatoes and vegetables are grown principally on irrigated lands. Principal products in metric tons for 1943 were:—maize, 1,775,000; rice, 130,000; sugar-cane, 7,189,000; wheat, 429,000; beans, 156,000; tobacco, 14,000. Sugar consumption, 1943, was 479,500 short tons of refined sugar and 110,230 short tons of 'piloncillo' or unrefined brown sugar; annual *per capita* consumption was 55 lb., the highest in history. Production of alcohol, 1943, was 46,000,000 litres. Export quota for coffee has been fixed at 626,155 bags (of 60 kilos) to the United States in 1943-44; production (1943), 52,000 metric tons. Alfalfa production (1941) was 1,805,644 metric tons. The Yucatán peninsula produces about 50 per cent. of the world's supply of sisal; plantations are almost wholly Mexican-owned. The 1941 sisal crop amounted to 101,975 tons of fibre from 218,000 acres. Banana production started in 1895 in the State of Tabasco, reaching a peak in 1937 when 14,752,424 stems were exported; exports, 1942, 5,856,544 stems. The west coast ships fresh vegetables, mostly tomatoes, to the United States. The cotton production, 1943, was 500,000 bales (of 230 kilos).

Timber lands are estimated to extend over 25,000,000 acres and to contain pine, spruce, cedar, mahogany, logwood and rosewood.

The chief Mexican oil-fields (with reserves estimated at 750,000,000 barrels) may be grouped in five districts, controlled mainly by 3 big companies (until expropriated by government decree, March 20, 1938). In May, 1942, Mexico and the United States agreed on a valuation of 23,995,991 dollars for the American oil properties expropriated. Petroleum output was as follows:—In 1939, 42,897,504 barrels, of which 18,000,000 barrels were exported, mainly to the United Kingdom, Germany and Italy; in 1943, 33,500,000 barrels were produced; exports (1944) were 5½ million barrels. The petroleum fields have 17 plants and 5 refineries, employing 15,000 men; refining capacity, 150,000 barrels per day.

Mining is the principal industry in Mexico, but practically 97 per cent. of the 31,000 mining properties are foreign-owned. Of the annual output (from 166 active mines and 115 metallurgical plants), measured in pesos, probably less than 10 per cent. is Mexican-owned. Nearly all the mines yield silver; output is about 40 per cent. of world production. Silver output in 1942 was 84,864,359 fine ozs., valued at 32,795,832 dollars (U.S.); gold in 1942, 799,114 fine ozs., valued at 27,988,745 dollars (U.S.).

Coal is produced only in the State of Coahuila; 545,000 metric tons in 1938. Opals are mined in Querétaro. Output of cement, 1943, 744,000 metric tons from nine plants.

The following table shows the quantities of mineral products for two years:—

| Metals      | 1939        | 1940        |
|-------------|-------------|-------------|
|             | Metric tons | Metric tons |
| Copper      | 44,390      | 41,450      |
| Lead        | 219,506     | 216,383     |
| Zinc        | 134,166     | 126,717     |
| Antimony    | 7,873       | 13,523      |
| Graphite    | 9,816       | 13,588      |
| Quicksilver | 254         | 402         |
| Arsenic     | 7,062       | 10,216      |
| Molybdenum  | 872         | 568         |
| Bismuth     | 164         | 185         |
| Cadmium     | 817         | 826         |
| Tin         | 294         | 845         |
| Tungsten    | 109         | 114         |
| Vanadium    | 148         | 57          |
| Manganese   | 27          | 302         |

The industrial census of 1940 showed 11,964 manufacturing establishments with invested capital of 872,119,997 pesos; number of employees, 240,762; wages and salaries, 239,253,655 pesos; materials used, domestic, 627,409,960 pesos; foreign, 183,902,960 pesos; value of output, 1,521,673,527 pesos. There were (1940) 53 tobacco factories, 941 cotton textile factories, 382 timber mills, 420 metal factories, 328 photographic and cinematograph companies, 410 chemical plants, and 8,044 making foods.

### Commerce.

The trade of Mexico for 5 years (in pesos ranging from 22 cents, U.S., to 18 cents) is shown as follows:—

|         | 1939        | 1940        | 1941        | 1942        | 1943          |
|---------|-------------|-------------|-------------|-------------|---------------|
|         | Pesos       | Pesos       | Pesos       | Pesos       | Pesos         |
| Imports | 629,708,225 | 669,016,462 | 915,100,000 | 753,038,993 | 909,383,302   |
| Exports | 914,389,882 | 960,041,432 | 729,400,000 | 992,454,689 | 1,129,850,025 |

Of total imports in 1943, 805,472,811 pesos (88·4 per cent.) came from the United States; 18,227,589 (2·0 per cent.) from Great Britain, and 22,111,436 (2·5 per cent.) from Argentina. Of total exports, 991,485,628 pesos (87·7 per cent.) went to the United States; 26,322,901 (2·3 per cent.) went to Cuba; 18,351,249 went to Guatemala.

Vegetable products, at 162,213,733 pesos, were the leading imports in 1943, as they were also the leading exports, valued at 337,903,691 pesos; exports of base metals and their manufactures reached 219,436,838 pesos.

Total trade between Mexico and the United Kingdom for 5 years (according to Board of Trade returns):—

|                                      | 1934      | 1935      | 1936      | 1937      | 1938      |
|--------------------------------------|-----------|-----------|-----------|-----------|-----------|
|                                      | £         | £         | £         | £         | £         |
| Imports from Mexico to U. Kingdom    | 3,106,866 | 3,219,832 | 3,071,064 | 3,541,129 | 2,108,790 |
| Exports to Mexico from U. Kingdom    | 1,582,643 | 1,886,466 | 1,886,255 | 1,738,621 | 853,917   |
| Re-exports to Mexico from U. Kingdom | 16,806    | 12,698    | 8,460     | 18,958    | 11,480    |

United Kingdom exports to Mexico (Board of Trade returns) since 1938 have been: 1939, 703,000£.; 1940, 1,023,000£.; 1941, 1,561,000£.; 1942, 1,250,000£.; 1943, 683,000£.; 1944, 619,000£. Totals for the three years, 1939-41, included the shipments of war supplies, if any, by Government departments.

### Shipping and Communications.

Mexico has 22 ocean ports of which the most important are Vera Cruz and Tampico, both on the Gulf of Mexico. In 1940, 10,368 steam and motor and sailing vessels entered and cleared at all the ports with cargoes amounting to 5,683,391 tons. Total shipping under Mexican flag on June 30, 1940, 10,368 vessels of 1,657,899 gross tons.

Total road mileage, 1940, 43,614 miles, of which 9,573 miles are good for all-year-round motor traffic. In July, 1936, was opened the new highway (770 miles) between Mexico City and Laredo, on the American border. In 1942 the Inter-American Highway, from Suchiate in Mexico to Balboa Basin in the Panama Canal Zone (1,588 miles) was begun. On December 5, 1943, the newly completed 220-mile highway connecting Matamoros in the state of Puebla and the city of Oaxaca, Mexico, was formally opened. This is a

## MONACO.

Prince Louis II, born July 12, 1870, succeeded his father, Prince Albert I, June 26, 1922.

*Heiress.*—Princess Charlotte, Duchess of Valentinois, born September 30, 1898; married March 19, 1920, to Pierre Grimaldi, from whom she was divorced February 18, 1933. Issue:—(1) Princess *Antoinette*, born December 28, 1920; (2) Prince *Renier*, born May 31, 1923.

Monaco is a small Principality on the Mediterranean, surrounded since 1860 by the French Department of Alpes Maritimes except on the side towards the sea. From 968 it belonged to the house of Grimaldi. In 1715 it passed into the female line, Louise Hippolyte, daughter of Antoine I, heiress of Monaco, marrying Jacques de Goyon Matignon, Count of Thorigny, who took the name and arms of Grimaldi. Antony I died in 1731, Louise Hippolyte reigning only ten months and dying in 1732. She was succeeded by her husband under the name of Jacques I, who also succeeded Antony I as Duc de Valentinois, and was in his turn succeeded by his son Honoré III. This Prince reigned from 1731 until 1793, when his dominions were annexed by France. He died in 1795 and in 1814 his son Honoré IV recovered the Principality, which was placed under the protection of the Kingdom of Sardinia by the Treaty of Vienna, 1815. Honoré V, who had acted as Regent for his invalid father since the Restoration, became Prince in 1819. He was succeeded in 1841 by Florestan, against whom, in 1848, Mentone and Roccabruna revolted, and declared themselves Free Towns, only to be occupied by the Sardinians. His son Charles III succeeded in 1856 and sold his rights over these two towns in 1861 to France, to which the Sardinian protectorate was transferred after the cession of Nice and Savoy in that year. Prince Albert I, who acquired fame as an oceanographer, succeeded his father, Charles III, in 1889.

On January 5, 1911, a Constitution was promulgated, which provides for a National Council elected by universal suffrage and *scrutin de liste*. The Government is carried out under the authority of the Prince by a Ministry assisted by a Council of State. The legislative power is exercised by the Prince and the National Council, which consists of 12 members elected for four years.

The territory of the Principality is divided into three communes—Monaco-Ville, La Condamine and Monte Carlo—which are administered by a municipal body, elected by vote. Women do not vote.

In 1819 the Government adopted a code founded upon the French codes and a Court of First Instance, as well as a Juge de Paix's Court. The Principality issues its own separate postage-stamps, and has its own flag.

The small harbour, absolutely sheltered, has an area of 47 acres, depth at entrance 90 feet, and alongside the quay 24 feet at least. The Customs duties are the same as in France.

The area is 149 hectares, or 370 acres. Population (census June 21, 1939), 23,973. Towns: Monaco, 1,938; La Condamine, 11,339; Monte Carlo, 10,681.

There has been since 1887 a Roman Catholic bishop. A semi-military police force has taken the place of the 'guard of honour' and troops formerly

section of the road that begins at Nuevo Laredo and that will eventually end at the Mexican-Guatemalan border, where it will join the Guatemalan section of the Pan-American Highway. Nearly 1,100 miles have now been completed by Mexico and about 600 are yet to be made.

In 1937 the main railway lines of Mexico (15,044 miles covering 7,365 route miles) were fully nationalized. In addition the Government (1943) operates 1,026 miles of the privately-owned Inter-oceanic Railway.

On December 31, 1940, the Federal telegraph and telephone system had 1,080 offices and 25,719 miles of line. Systems belonging to individual States and private companies had 1,115 offices and 17,066 miles of line. Telephones in use 1941, 178,726. The General Bureau of Posts and Telegraphs, 1940, had 812 regular offices, 85 branch offices, 2,785 travelling post offices, 122 postal tranship offices, 1,300 places licensed to sell postage. Letters, postcards, etc., in foreign and domestic service amounted (1942) to 256,283,158. There are 141 broadcasting stations, of which 7 are Government-operated.

There is a State mail, express, and passenger airplane service between Mexico City and Tampico and Tuxpan, as well as over other routes. Airplane service to South and Central America was established in 1930. Fourteen companies operated 15,890 miles of airways in Mexico in 1943.

### Banking and Credit.

On December 31, 1938, the banks of the Republic (mostly national and including the Bank of Mexico) had total resources of 497,730,278 pesos. An export-credits bank, under Government control, was started in July, 1937.

On September 1, 1925, the Bank of Mexico was established with an authorized capital of 100,000,000 gold pesos, of which 66,771,000 pesos were paid up by December 31, 1930. It succeeded a number of former banks of issue, and under Article 28 of the Constitution it has the sole right to issue notes. It has 5 branches, but discontinued commercial banking in April, 1932, becoming solely a central reserve and issue bank, with capital reduced to 50,000,000 pesos (30,606,000 pesos paid). The Government holds 51 per cent. of the capital stock. The bank is now closely modelled on the Federal Reserve system, with large powers to 'manage' the currency, but its published reports have been infrequent. On July 31, 1944, metallic monetary reserves (gold, silver and foreign exchange forming the required 25 per cent. reserve against notes and other demand liabilities) were 535,000,000 pesos; 'authorized' holdings of securities, 1,368,000,000 pesos. Note circulation (outside the Bank of Mexico) was 1,212,000,000 pesos. The gold stock has fluctuated from 54,000,000 dollars, U.S., in October, 1941, to 28,000,000 in February, 1942; on November 30, 1944, it stood at 222,000,000 dollars, U.S. In April, 1943, the bank began selling gold coins freely against silver pesos; an additional 50,000,000 in silver pesos and 1-peso notes were issued.

### Money, Weights and Measures.

By a decree of April 29, 1925, the monetary unit was the gold peso or dollar, the legal value of which was fixed at .75 gramme of pure gold. At par it equalled 24.58¢ or 50 cents (old U.S. gold dollar or 84.40 cents, new U.S. dollar), but the excessive premium (30 to 40 per cent.) commanded by the gold peso led to a decree on July 26, 1931, setting up the silver peso as full legal tender at a fixed value of .75 grammes of gold. This system broke down when on April 25, 1935, the price of fine silver reached 72 cents (U.S.) per oz., and on April 27, 1935, the Govern-

ment issued a decree making silver coins (after a short period) no longer legal tender, calling in the entire silver coinage and substituting a paper currency made up of Bank of Mexico notes for 5, 10, 20, 50, 100, 500 and 1,000 pesos, supplemented by 1-peso, 50-centavo and 20-centavo silver coins (.720 fine) and fractional copper currency of 1, 2, 5 and 10 centavos. Export of silver is forbidden. Since 1931, the old gold coins of 50, 20, 10, 2½ and 2 peso denominations have figured in foreign exchange transactions at their gold value. A decree of August 28, 1938, reaffirmed that the monetary unit was the peso but left its value to be later defined by law. Since November, 1941, the peso has been pegged at about 4.85 to the dollar; average rate in 1944 was 20.581 cents, U.S.

The weights and measures of the metric system were introduced in 1884 and their use is enjoined by law of December 14, 1928, though the old Spanish measures are still in use.

### Diplomatic and Consular Representatives.

#### 1. OF MEXICO IN GREAT BRITAIN.

*Ambassador.*—Señor Dr. Don Alfonso de Rosenzweig Diaz (presented letters of credence on January 21, 1942).

*Counsellor.*—Gustavo Luders de Negri

*Second Secretary.*—Don Oscar Crespo y la Serna.

*Military Attaché.*—Col. Luis Rivas Lopez.

*Naval Attaché.*—Lieut.-Commander Alfredo Marquez Ricano.

There are Mexican consulates at Birmingham, Cardiff, Glasgow, Hull and Newcastle-on-Tyne.

#### 2. OF GREAT BRITAIN IN MEXICO.

*Ambassador.*—Charles Harold Bateman, C.M.G., M.C. (appointed October 24, 1941).

*Secretary.*—E. O. Coote.

*Naval Attaché.*—Rear-Admiral H. Pott, M.V.O.

*Military Attaché.*—Colonel N. P. Wright.

*Consul-General.*—D. J. Rodgers C.B.E.

There are also consular posts at Chihuahua, Coahuila, Coahuila, Durango, Guadalajara, Guaymas, Mazatlan, Merida and Progreso, Monterey, Pachuca, Puebla and Tampico.

## MOROCCO.

(MOGHREB-EL-AKSA, i.e. The Farthest West.)

### Reigning Sultan.

THE introduction of Islam into Morocco about the end of the 7th century was followed by an exceedingly confused period, to the latter part of which belongs the great Arab influx of the 11th century known as the Hilalian invasion. This period witnessed the rise and fall of various Arab and Berber dynasties, notably the Idrissids, under whom Fez was founded or refounded early in the 9th century, and the Almoravids, the first of whom, Youssef Ben Tashfin, founded Marrakesh in 1062, and later extended his power over the north of Morocco and into Spain. His dynasty was followed by the Almohads (12th and 13th centuries), and the Merinids (13th to 16th centuries), whose decline led up to the establishment of the Sherifian dynasties, the Saadians (16th and 17th centuries) and the Alaouis. The latter claim descent from Ali, the son-in-law of the Prophet, through the Filali Sherifs of Taflelt. The present Sultan is the 18th of this dynasty.

**Sidi Mohammed**, third son of Moulay Youssef (reigned 1912-1927), was proclaimed Sultan on November 18, 1927, on the death of his father.

### Government.

The Empire of Morocco is in principle an absolute monarchy, in which the Sultan exercises supreme civil and religious authority; the latter in his capacity of Emir-el-Muminin or Commander of the Faithful. The majority of his subjects are Sunni Moslems of the Malekite school, the teachings of which formerly constituted the common law of Morocco. The country is now, however, divided into three Zones, in each of which a different system of government prevails as the outcome of the Protectorate Treaty concluded between France and the Sultan at Fez on March 30, 1912, the subsequent Convention between France and Spain of November 27, 1912, and the Convention between Great Britain, France and Spain of December 18, 1923 (modified July 25, 1928), providing for a special Statute in the Tangier Zone.

The Sultan resides in the French Zone usually at Rabat, but occasionally in one of the other traditional capitals, Fez (founded in 808), Marrakesh (founded in 1062), and Meknes. His government, known as the Makhzen, consists of the Grand Vizier, the Vizier of Justice, the Vizier of 'Habous' or Pious Foundations, the Grand Vizier's Delegate for Public Instruction and

the Presidents of the Sherifian High Court and the Religious Court of Appeal. All effective authority is exercised by the Protecting Power, which is represented by a Resident General. The latter is Minister of Foreign Affairs to the Sultan and head of an elaborate French administration which has its headquarters at Rabat and which is divided into departments for Finance, Economic Affairs, Public Instruction, etc. The French have created a large body of modern law in the form of Imperial Edicts or 'Dahirs' issued by the Sultan but promulgated and made executory by the Resident General, and decrees of minor importance, all of which similarly require French approval. Local administration is in the hands of native Pashas or Caids and French Controllers. The French civil administration has been made independent of military authority in the coastal regions and the Oujda district adjoining Algeria. Moors are given facilities for entering the administration. In other districts it is still subordinate to military authority. In the less settled districts in the south-east of the Zone the French control is less direct than elsewhere, although the system of governing through the 'Grand Caids' or tribal overlords is on the decline.

In the Spanish Zone the Sultan's powers are entirely delegated to a Khalifa, whom he chooses from a list of two candidates presented by the Spanish Government, and whose administration is controlled by a Spanish High Commissioner resident at Tetuan. Spanish authority in the Zone was consolidated by successful military operations terminating in the spring of 1927. Spain effectively occupied Ifni in April, 1934, and the territory has since then acquired a certain importance on account of its transit trade with the interior. Spain has treaty rights in an area extending south from the river Dra and some distance inland from the coast about Cape Juby.

The 1923 Tangier Statute came into force on June 1, 1925, but did not receive the adhesion of all the Powers signatory of the Act of Algeiras of April 7, 1906. It was modified by a Protocol signed at Paris on July 25, 1928, to which Italy, one of the previously non-adhering Powers, was a party. The Statute was concluded for a period of twelve years from the date of ratification (May 14, 1924), and was to be renewable automatically for one or more 12-year periods if none of the contracting powers demanded its revision. No such notice having been given by the appointed date (November 14, 1935), the Statute will continue for at least another 12 years from May 14, 1936.

The Zone is permanently neutralised and demilitarised. The régime is one of autonomy, and legislative power is vested in an international Assembly of 27 members, but the parties to the Statute agreed on certain regulations and fiscal enactments which were not to be modified for two years, as well as on a special code of law. A Committee of Control, composed of the Consuls of the Powers signatory of the Act of Algeiras, is invested with a right of veto and certain other powers. The administration of the Zone is entrusted to an administrator, with assistant administrators for finance, health, etc., and justice. The Sultan is represented by a Mendoub, who is ex-officio President of the Assembly and who is in charge of the administration of native affairs.

On June 14, 1940, Spanish Khalifan troops occupied Tangier, 'with the object of guaranteeing the neutrality of the Zone and the City.' The Spanish Foreign Office declared at the time that the international administration would be continued, and the rights of interested powers respected. Yet on November 3, the Officer Commanding the Spanish troops in Tangier issued a proclamation, stating that in view of present conditions, the Committee of Control, the Assembly, and the Mixed Bureau of Information will cease to function, and appointing himself Governor of Tangier and

delegate of the High Commissioner of Spanish Morocco. Another order reinstated the peseta as legal currency. On May 4, 1941, the Spaniards assumed control of the Customs.

On March 16, 1941, the Spanish authorities ejected the Mendoub (the representative of the Sultan) from Tangier.

On December 1 a law was published in Madrid establishing a new juridical régime for the Tangier Zone under which the laws which apply to the Spanish Protectorate of Morocco will also have force in the Tangier Zone.

British capitulations in French Morocco, which existed since 1856, were abolished by the Anglo-French Convention of July 29, 1937, including the British Postal Agencies at Casablanca and other towns in the French zone. British subjects are now subject to the jurisdiction of the same tribunals as French citizens. British capitulations in Spanish Morocco continue in force, and there is a British Postal Agency at Tetuan, subordinate to the Central British Post Office at Tangier.

*French Resident General and Commander-in-Chief.*—Gabriel Puaux (appointed June 7, 1943).

*Spanish High Commissioner.*—Lt.-General Varela (appointed March 4, 1945).

*Khalifa for Spanish Zone.*—Sidi Muley Hassan Ben el Mehedi.

### Area and Population.

The French zone comprises the whole of Morocco (except the Ifni enclave and the Cape Juby area) from the Atlantic to the Algerian frontier, and from the confines of the Sahara to the boundary of the Spanish Zone as agreed to in 1912. The Franco-Spanish boundary has not been fully delimited. It follows a generally eastern direction from a point on the Atlantic about 16 miles south of Larache to the river Moulouya, which completes the boundary to the Mediterranean. The Spanish Zone comprises the area between this line and the sea, with the exception of the small territory around Tangier which is included in the zone of international administration. The southern and eastern boundaries of Morocco being largely indeterminate, no exact estimate can be made of the total area, but it may be estimated as follows:—

|              |                       |
|--------------|-----------------------|
| French Zone  | 153,870 square miles. |
| Spanish Zone | 18,009 " "            |
| Tangier Zone | 225 " "               |
| Total        | 172,104               |

The native population consists mainly of Islamised Berbers and Arabs dating from the great invasions of the Middle Ages. These elements have to some extent intermixed with each other and with negro stocks. There is a large native Jewish population, mostly in the towns. Since 1912 the European element has greatly increased, especially owing to the influx of French into the towns of the French Zone and of a fair number of agricultural settlers, also mostly French. A census of the French Zone taken on March 8, 1936, shows a total population of 6,298,528, including 5,874,888 native Moslems, 161,312 native Jews, 173,533 French, and 59,058 other Europeans. An official estimate of the Spanish Zone (1936) gives the population as 795,202 (about 738,000 Moslems, 44,379 Europeans and 12,918 Jews), and that of the Tangier Zone (1941) at about 100,000 (36,500 native Moslems, 16,500 Europeans and 7,000 native Jews).

The following table shows the population of the principal towns of the French Zone on the results of an urban census in 1936:—

|                        | Europeans | Natives | Total   |
|------------------------|-----------|---------|---------|
| <i>French Zone:—</i>   |           |         |         |
| Casablanca             | 72,762    | 184,668 | 257,430 |
| Fes                    | 9,628     | 124,801 | 144,424 |
| Port Lyautey (Kenitra) | 5,684     | 11,917  | 17,601  |
| Marrakesh              | 6,849     | 188,465 | 195,314 |
| Mazagan                | 1,794     | 22,597  | 24,391  |
| Meknes                 | 12,310    | 62,592  | 74,702  |
| Mogador                | 767       | 14,899  | 15,666  |
| Oujda                  | 15,277    | 19,246  | 34,523  |
| Ouezzan                | 475       | 15,967  | 16,442  |
| Rabat                  | 26,256    | 57,123  | 83,379  |
| Safi                   | 1,831     | 28,328  | 29,159  |
| Salé                   | 1,090     | 30,733  | 31,823  |
| Taza                   | 3,408     | 11,566  | 14,974  |

Estimated population of French Zone in 1941, 7,991,000. Population, in 1941, of Casablanca, 453,000 (Europeans, 131,000); of Rabat, 171,600 (Europeans, 83,600); of Meknes, 109,500 (Europeans, 15,000), and of Oujda, 65,000.

The principal towns in the Spanish Zone are Tetuan (population in 1936, 49,535), Alcazar (30,762), Larache (29,477), Xauen (6,065), Arzila (6,158).

There are important British colonies at Casablanca (about 1,000), and Tangier (about 1,600). Spaniards form an important element in the European population of the coast towns.

The principal languages are Moorish-Arabic, and numerous Berber dialects. The use of French for official and business purposes is very widespread, except in the Spanish Zone, where Spanish is chiefly used. In the Tangier Zone, French, Spanish and Arabic are recognised as the official languages.

### Education.

The bulk of the native population is illiterate. There are numerous Koranic schools imparting a very elementary education, and a number of higher schools attached to mosques. The most notable is the Kairoween University at Fes, which is highly reputed in the Islamic world. In the French Zone education on European lines is given in the French schools, and schools provided by the Protectorate for Moslem natives. There were in 1939 for European boys and girls, 175 primary public schools (including 18 kindergarten) with 31,061 pupils (16,020 boys and 15,041 girls), and 38 primary private schools with 6,294 pupils; 16 secondary schools with 11,385 pupils in all (6,523 boys and 4,812 girls), including an industrial and commercial school at Casablanca. The system is correlated with the French system, and pupils can take their baccalauréat in the French zone. The Institut des Hautes Études Marocaines at Rabat was attended in 1938 by 1,490 students for Arabic and 199 students for the Berber language; 371 students were following courses in the faculty of law attached to the Institut. The boys' and girls' high schools at Rabat have sections for training teachers. For Moslems there were in the French Zone in 1939: for boys, 111 primary schools, 17 technical schools, and 4 colleges for the sons of notables, with a total of 19,995 pupils; and 22 schools for girls with a total of 5,711 pupils. A training school for teachers in Moslem schools was reorganised in 1938 at Rabat. Instruction was given in 1939 to 17,169 Jewish pupils (8,459 boys and 8,710 girls) in 48 schools, under the joint auspices of the Protectorate and the Alliance Israélite.

There are State schools in the chief towns of the Spanish Zone, also certain Hispano-Arabic schools for education of natives. Two new institutes, the Moulay el Hassan and the Moulay el Mehdi, have been opened at Tetuan to improve education and to facilitate the study of Arabic culture. The Alliance Israélite has schools in Tetuan and Larache, and a native school of arts and industries exists in Tetuan, and a carpet-weaving school at Xauen.

In the Tangier Zone the education of native Moslems is mainly confined to the elementary Koranic schools. The Government of the French Protectorate and the Spanish Government, however, maintain several primary and elementary schools for natives, and there are French technical schools for boys and girls. There are several primary and secondary schools for Jews maintained by the Jewish community but connected with the Alliance Israélite. The French Protectorate and Spanish Governments also maintain a number of primary and secondary schools for European boys and girls, to some of which natives are admitted, and there is an Italian school with primary and secondary classes for Europeans as well as natives.

### Justice.

*French Zone.*—Native justice is administered by religious courts and in a large range of criminal and civil cases by the Pashas and Caids. Under the Protectorate two Courts of Appeal corresponding to these jurisdictions have been set up at Rabat. French Courts modelled on those in France were created in 1913, and deal with cases brought by or against French and other foreigners. By a convention signed in London on July 29, 1937, Great Britain renounced capitulatory rights in the French Zone as from the coming into force of the Convention (January 1, 1938). The French Courts are the Court of Appeal at Rabat, Courts of First Instance at Rabat, Casablanca, Oujda, Marrakesh and Fez, and fourteen *tribunaux de paix*. Rabbinical Courts deal with matters affecting the personal status of Jews.

It is intended to give a large share in the administration of justice to Moorish magistrates and a Moroccan Penal Code is being drawn up.

*Spanish Zone.*—Native and Jewish justice is similar to that in the French Zone, except that all criminal cases are tried in the Spanish Courts. These consist of Audiencia, or Supreme Court, Court of First Instance, and *Tribunaux de Paix*. British subjects and American citizens are justiciable in their own Consular Courts. Autonomy has been granted to Native Courts for the practice and application of Islamic standards of justice to native affairs.

*Tangier Zone.*—Native justice is administered as in the French Zone, the Moudoub having a jurisdiction similar to that of Pashas and Caids. The Statute provides for a Mixed Tribunal which deals with all cases involving foreigners, except the subjects of the U.S.A. which have not adhered to the Convention and still have capitulatory rights.

### Finance.

Estimates of Revenue and Expenditure of the French Zone for five years (ordinary budget):—

|                       | 1937        | 1938          | 1939          | 1943          | 1944          |
|-----------------------|-------------|---------------|---------------|---------------|---------------|
|                       | Francs      | Francs        | Francs        | Francs        | Francs        |
| Revenue . . . . .     | 902,374,500 | 1,068,706,270 | 1,185,054,970 | 2,040,000,000 | 2,604,982,000 |
| Expenditure . . . . . | 902,862,310 | 1,068,634,280 | 1,184,958,490 | 2,040,000,000 | 2,604,658,000 |

The Moroccan debt consists of French loans (1904, 1910, 1914, 1918, and 1920). The 1904 loan amounted to 62,500,000 francs and bears interest at 5 per cent. The 1910 loan was for 101,124,000 francs and also bore interest at 5 per cent. The 1914 loan, guaranteed by the French Government, was for 170,250,000 francs. By a law dated March 25, 1916, the 1914 loan was increased to 242,000,000 francs. The first issue of 70,250,000 francs in July, 1914 was at 4 per cent., and the second issue 171,750,000 francs in March, 1918, was at 5 per cent. By the law of August 19, 1920, a further loan, also guaranteed by the Government, was authorised for 744,140,000 francs. Of this amount 300 million francs had been issued by 1923, after which no further issue was made. Provision was made in 1928 for a new loan of 819,822,000 francs in which was to be merged the balance of the 1920 loan not already earmarked for expenditure. A first issue of Fr. 325,000,000 at 4½ per cent. (price of issue Fr. 925 for Fr. 1,000) was made in May, 1929. The second issue of Fr. 425,000,000 at 4 per cent., price Fr. 977·50, followed in July, 1930. In April, 1932, a further loan of 1,535,676,000 francs was authorised mainly for public works.

The budget of the Spanish Zone for 1938 balanced at 111,785,245 pesetas. The principal revenue of the Tangier Zone is from Customs and consumption duties. No budget has been published by the Spanish authorities in respect of Tangier since the abolition of the International Administration in 1940.

### Defence.

The Sherifian Army as such no longer exists, except for the Black Guard or Sultan's bodyguard. The military forces in the French Zone are made up of drafts (consisting largely of African troops) from the French Metropolitan and Colonial armies, a portion of the Foreign Legion and native levies of various kinds. Following on the termination of the Riff war a Presidential decree of October 3, 1926, placed the Army under the control of the Resident General for all purposes except actual operations, and directed that the regular land forces should be organised in three divisions and two mixed brigades. This arrangement was amended by decree, October 14, 1937. The French peace-time forces include 2,059 officers and 46,173 N.C.O.'s and men of the regular Army, as well as the following irregulars:—8 auxiliary native officers, 228 French non-commissioned officers, 140 French brigadiers, 14,028 native rank and file. The Spanish forces in the Spanish Zone are said to consist of 5 divisions of all arms. The Tangier Zone is demilitarised.

### Production and Industry.

*French Zone.*—Agriculture is by far the most important industry. The total agricultural area is estimated at 24,875,000 acres, not including forests. Forest land is estimated at about 4,940,000 acres, of which one-third lies within the agricultural area. The principal crops are cereals, especially wheat and barley; beans, chickpeas, fenugreek and other legumens; canary-seed; cumin and coriander; linseed; olives; vines and other fruits, especially almonds. The approximate yield of the principal crops in 1938 was as follows in metric quintals (220·4 lbs.):—barley, 10,857,000; wheat, 3,655,000; maize, 2,174,000. Market-gardening for export has become important in the neighbourhood of Casablanca. The almost universal wild palmetto is put to various uses, including the manufacture of *crin végétal*. The trees grown include cork (covering some 750,000 acres), cedar, arar, argan, oak, and various conifers. In 1938 there were 7,929,000 olive trees, 1,547,000 orange and lemon trees, 1,118,000 palm trees (dates), 4,604,000 almond trees. Olive oil yield, 1943, 8,000 tons. Tizra

wood is exported for tanning purposes. Gums are produced in considerable quantities. Stock-raising is an important industry. The number of animals in the Zone in 1942 was:—cattle (bovine), 2,155,800; sheep, 12,000,000; goats, 6,950,000; pigs, 175,000; horses and mares, 202,001; mules, 154,000; asses, 719,000; camels, 164,200.

The principal mineral exploited is phosphate, the output of which (under a State monopoly) has grown rapidly from 8,232 metric tons in 1921 to 1,447,327 tons in 1938. Zinc and lead ore (33,031 metric tons in 1938), manganese (82,520 metric tons in 1938), and molybdenum ore (205 metric tons in 1938) are the principal minerals. Iron ore (270,000 tons in 1938), tin and antimony ore are also mined.

The coasts abound in fish. The chief fishing centres are near Casablanca and at Fedhala, which possesses an important preserving industry.

**Spanish Zone.**—Agriculture is potentially important, but undeveloped. A programme has been announced (1939) for undertaking the drainage of low-lying ground along the main estuary areas; irrigation enterprises; State assistance to farmers in the form of subventions, provisions of seed, importation of modern agricultural machinery, equipment, etc. European colonisation, unlike the French Zone, is almost entirely confined to the towns. Iron ore is mined in the eastern region and about 1,500,000 tons are exported through the port of Melilla. Lead, antimony and manganese ore and graphite are exported on a small scale, but the Zone is reported to be rich in minerals of various kinds.

**Tangier Zone.**—The agricultural output, consisting principally of wheat, barley and chickpeas, is insufficient for the needs of the population. There are also fisheries and preserving factories and a certain amount of market gardening for local requirements.

### Commerce.

**French Zone.**—Imports and exports for five years were:—

|               | 1934          | 1935          | 1936          | 1937          | 1938          |
|---------------|---------------|---------------|---------------|---------------|---------------|
|               | Francs        | Francs        | Francs        | Francs        | Francs        |
| Imports . . . | 1,819,704,859 | 1,189,188,000 | 1,150,502,060 | 1,765,624,000 | 2,136,885,000 |
| Exports . . . | 667,395,185   | 621,380,000   | 781,483,722   | 1,143,980,000 | 1,502,262,000 |

**Spanish Zone.**—Imports in 1938 were valued at 123,146,184 pesetas, and exports at 71,143,224 pesetas. The principal imports are flour, semolina, sugar (refined), tea, seed oils, wines, liquid fuel, laundry soap, candles, cotton goods, automobiles and parts; the principal exports, cattle, eggs, iron ore.

**Tangier Zone.**—Imports and exports for five years:—

|               | 1934        | 1935       | 1936       | 1937       | 1938       |
|---------------|-------------|------------|------------|------------|------------|
|               | Francs      | Francs     | Francs     | Francs     | Francs     |
| Imports . . . | 129,018,688 | 62,474,294 | 67,700,000 | 80,000,000 | 94,693,850 |
| Exports . . . | 12,866,417  | 18,796,162 | 8,764,840  | 8,200,000  | 11,380,286 |

Total trade between Morocco and the United Kingdom for 5 years (Board of Trade returns):—

|                                     | 1934    | 1935    | 1936    | 1937    | 1938    |
|-------------------------------------|---------|---------|---------|---------|---------|
|                                     | £       | £       | £       | £       | £       |
| Imports from Morocco to U.K. . .    | 246,163 | 249,414 | 571,581 | 941,167 | 759,170 |
| Exports to Morocco from U.K. . .    | 863,834 | 715,473 | 545,546 | 480,281 | 518,214 |
| Re-exports to Morocco from U.K. . . | 38,625  | 86,464  | 24,524  | 32,981  | 10,983  |

### Shipping and Communications.

In 1938, 3,352 vessels of 5,640,397 tons entered the ports of the French zone. Of these 1,263 vessels of 2,634,997 tons were French, and 2,099 vessels of 3,005,400 tons were foreign. Of the total, 2,077 vessels of 4,379,593 tons entered the port of Casablanca.

In 1938, 474 coast-wise vessels called at Spanish Zonal ports with a tonnage of 128,055; in the same year 475 ocean-going vessels were cleared with a tonnage of 121,084.

At the end of 1938, there were 1,063 miles of normal gauge railways in operation. In 1938, 3,215,553 metric tons of freight and 3,279,282 passengers were carried. The principal standard-gauge lines are from Casablanca eastward to the Algerian border, forming part of the continuous rail line to Tunis; the French Moroccan portion of the line from Tangier (in the International Zone) to Petit-jean on the main east-west line; Casablanca to Marrakesh with two important branches, one eastward from a point slightly north of Settat to Oued Zem tapping the Khouirbga phosphate mines, the other westward from Ben Guerir to the port of Safi passing about midway through the phosphate district of Louis Gentil and Oujda southward to Bou Arfa near the Djerada coal mines.

The existing railways in the Spanish Zone are Ceuta-Tetuan (41 km.), Nador-Tistutin (36 km.) and Larache-Alcazar (40 km.), besides the portion of the Tangier-Fez railway which crosses the zone.

On December 31, 1939, there were 2,800 miles of main roads and 2,100 miles of secondary roads in the French Zone; about 3,600 miles of road are tarred. Motor vehicles in circulation in the French Zone at the end of 1937 were 33,434 private touring cars, 10,654 lorries and omnibuses, 3,036 motorcycles. The Spanish Zone has about 540 miles of good roads suitable for traffic. The roads in the Tangier Zone have been considerably improved since the coming into force of the Statute. There are now about 65 miles of urban and rural roads.

A Sherifian postal service under French management exists in the French zone. European mails are in normal times conveyed by steamer services from Marseilles and Bordeaux, overland through Spain, and by daily steamers between Algeciras and Tangier and increasingly by air from Toulouse. The Sherifian service in 1938 received 39,677,400 letters, including registered letters, also 242,700 parcels, and 9,559,100 printed papers and samples; and despatched 34,683,000 letters and registered letters, 55,600 parcels and 3,568,000 printed papers and samples. The Spanish authorities maintain the ordinary postal service in the Spanish Zone. Spain retains a post-office in Tangier, and Great Britain maintains the only foreign postal service still existing in Morocco, with offices at Tetuan, and head office at Tangier.

The total length of telegraph lines open to the public in the French Zone on December 31, 1938, was 3,499 miles. In 1938, 843,785 telegrams were received and 641,785 despatched. All important centres in the Spanish Zone are connected by land lines. Communication between Morocco and Europe is maintained by cables between Casablanca and Brest, Tangier-Casablanca-Le Havre, Tangier-Gibraltar, Tangier-Cadiz, Larache-Cadiz via Algeciras.

Telephone systems exist in all the principal towns of the French Zone and there is a complete inter-urban connection. In 1938 there were in the Zone 15,496 subscribers and 16,560,483 messages sent. Urban services exist in the principal towns of the Spanish Zone and at Tangier.

An inter-zonal system between the Spanish and French Zones of Morocco functions only in so far as official trunk-calls are concerned—i.e.

between diplomatic or consular posts only. No post or mission in the French Zone can telephone to a commercial house or private individual in the Spanish Zone. Between French Morocco and Algiers the system is generally good, and official priority calls not long delayed. Business and private calls are not authorised.

### Currency, Weights and Measures.

Since the withdrawal of the Hassani currency in 1920 the *franc* has been the sole currency in the French Zone. Measures were taken later to protect the note-issue of the Moroccan State Bank from the competition of Algerian and French notes, and steps were taken at the end of 1924 to make those measures really effective. The Moroccan franc (State Bank notes of all denominations from frs. 5 upwards) was in 1928 placed on the same gold basis as the French franc. In 1934 silver coins (Moroccan) of 5, 10 and 20 francs were issued in the French zone.

On December 31, 1931, the value of State bank-notes in circulation was 637,609,000 francs.

Spanish currency circulates in the Spanish Zone.

Moroccan francs are legal tender in the Tangier Zone; Spanish money, which is legal tender under the terms of the Statute, is temporarily suspended.

The metric system of weights and measures became in 1923 the sole legal system in the French Zone.

The principal native measures still in current use are:—

*Weight*.—1 kantar = 100 rotls; 1 rotl = 16 ookeyas. The rotl varies widely round about 2 lbs. *Capacity*.—The mudd, which varies by locality. *Length*.—1 kama = 50 inches; 1 dra = 20 inches; 1 kala = 22 inches.

### Diplomatic and Consular Representatives of Great Britain in Morocco.

Under the Tangier Convention of December 18, 1923, the diplomatic agencies maintained by the signatory Powers were suppressed.

*Consul at Tetuan*.—R. G. A. Meade.

*Consul at Casablanca*.—A. N. Williamson-Napier.

*Consul at Fez*.—J. W. Blanch.

There is a Consul-General at Tangier and Rabat, and consular posts at Marrakesh, Mazagan, Cetta Melilla and Larache.

## NEPÁL.

An independent Kingdom in the Himálayas, between 26° 25' and 30° 17' N. lat., and between 80° 6' and 88° 14' of E. long.; its greatest length 500 miles; its greatest breadth about 150; bounded on the north by Tibet, on the east by Sikkim, on the south and west by British India.

The sovereign is His Majesty Mahárájadhírāja Tribhuvana Bir Bikram Jung Bahádur Shah Bahádur Shumshere Jung, who was born on June 30, 1906, and succeeded his father on December 11, 1911. The Prince-Royal and Heir-apparent was born on June 11, 1920. The government of Nepál is a modified aristocracy based on birth and is military in organization. All power is in the hands of the Prime Minister, to whom it was permanently delegated by the Mahárájadhírāja Surendra Bikram Shah under pressure of the Bharadárs or nobles of the State in 1867. The present Prime Minister is His Highness Mahárája Joodha Shumshere Jung Bahádur Ráná (born April, 1875), who was installed in office on September 1, 1932; created G.C.B., 1939; Hon. G.C.S.I., 1935; Hon. G.C.I.E., 1933. The office of Prime Minister is always held by a member of the ruling family, the succession being determined by special rules.

The aboriginal stock is Mongolian with a considerable admixture of Hindu blood from India. They were originally divided into numerous hill clans and petty principalities, one of which, Gorkha or Gurkha, became predominant in about 1769 and has since given its name to men from all parts of Nepál. The ruling family are Hindu Rajputs.

A commercial treaty between India and Nepál was signed in 1792, and a British Resident was sent to reside at Kátmándu, but was recalled two years later. A frontier outrage, in 1814, compelled the Indian Government to declare war; and a British force advanced to within three marches of the capital. Peace was concluded and the Treaty of Sagauli signed in December, 1815. Since then the relations of the British with Nepál have been friendly. In 1854 hostilities broke out between the Nepalese and Tibetans, and in 1856 a Treaty was concluded between the Nepalese and Tibetan Governments. The Tibetans bound themselves to pay an annual sum of Rs. 10,000 to Nepál, to encourage trade between the two countries and to receive a Nepalese Representative of high rank at Lhasa in place of a headman as heretofore. Besides, trade agents are maintained at Gyantse, Kuti, Kerrong, and other trade marts in Tibet.

In accordance with the treaty of Sagauli, which amongst other things provides that accredited ministers of each shall reside at the Court of the other, a British Envoy, with a small escort of Indian sepoy, lives at the capital; but he does not interfere in the internal affairs of the State. The appointment of the British Envoy was raised to that of His Majesty's Envoy Extraordinary and Minister Plenipotentiary at the Court of Nepal on May 18, 1934, and a Nepalese representative of the same rank was appointed to the Court of St. James with effect from June 12, 1934.

A fresh treaty was signed on December 21, 1923. By it all previous treaties, agreements and engagements since and including the Treaty of Sagauli were confirmed, and the British and Nepalese Governments acknowledged one another's independence, internal and external.

**Area and Population.**—Area about 54,000 square miles; population estimated at about 5,600,000. The estimated gross revenue is 12,500,000 rupees. The races of Nepál, besides the dominant Gurkhas, include earlier inhabitants of Tartar origin, such as Magars, Gurungs, and Bhotias. The Newars, who came from Southern India, live in the valley or adjacent to it.

Capital, Kátmándu, 75 miles from the Indian frontier; population about 108,805, and of the surrounding valley 450,000. Patan has a population of 104,928, and Bhatgaon 93,178.

**Religion.**—Sanatan or Pauranic, i.e. traditional or ancient Hinduism, is the religion of the bulk of the people, and is gradually but steadily overlaying the Buddhism of the primitive inhabitants.

**Defence.**—The Army consists of about 45,000 men, mainly infantry, of whom about 20,000 are regulars. The armament comprises about 15,000 magazine .303 rifles, 25,000 Martini-Henry rifles, 110 machine or Lewis guns, 30 modern, 12 fairly modern and about 240 old-fashioned guns.

**Trade.**—The principal articles of export are cattle, hides and skins, opium and other drugs, gums, resins and dyes, jute, wheat, pulse, rice and other grains, clarified butter, oil seeds, spices, tobacco, timber, saltpetre. The chief imports are cattle, sheep and goats, salt, spices, sugar, tobacco, drugs and dyes, petroleum, leather, brass, iron and copper wares, raw cotton, twist and yarn, silk, cotton and woollen piece goods. Nepál possesses very valuable forests in the southern part of the country.

A telephone connects the capital with Birganj near the southern frontier, and Raxaul (Bengal and North-Western Railway) on frontier. A second telephone line connects Kátmándu with the eastern part of the Terai foothills. In February, 1927, the first railway into Nepál (narrow gauge), from Raxaul on the Bengal and North-Western Railway to Amlekhganj, a distance of 25 miles, and in 1940 the second railway in Nepál (also narrow gauge) from Jayauagar on the Bengal and North-Western Railway to Janakpur and thence to Bijulpara, a distance of 33 miles, was opened. There is a suitable road for motors from Amlekhganj to Bhimphe, a distance of about 27 miles. A ropeway was opened at about the same time for the carriage of goods over the last 14 miles of the road from Dhursing above Bhimphe into the Kátmándu valley. A topographical survey of the country by Indian personnel of the Government of India was completed in 1927.

The Nepalese rupee is 171 grains in weight as compared with the British Indian rupee which weighs 180 grains. The present rate of exchange is 110 to 101 Nepalese rupees for 100 British Indian rupees. The silver mohar is valued at 6 annas and 8 pies of British Indian currency. Copper pice, of which 50 go to a silver mohar, are also coined.

**Envoy Extraordinary and Minister Plenipotentiary.**—General Sir Shingha Shum Shere Jung Bahádur Ráná, K.B.E. (appointed March 29, 1939).

**Secretaries.**—Mir Suba Krishna Mohan, O.B.E., and Suba Narendraman Acharya Dikshit.

**Military Attaché.**—Major Yagya Bahádur Basnayak.

**Envoy Extraordinary and Minister Plenipotentiary at the Court of Nepal, Kátmándu.**—Lt.-Col. G. L. Betham, C.I.E., M.C. (appointed 1944).

**First Secretary.**—Lt.-Col. J. D. Ogilvy.

**Archivist.**—Rai Sahib Raja Ram.

Bills; the functions of the Upper Chamber being restricted to approving or rejecting them without the power of inserting amendments. The meetings of both Chambers are public, though each of them, by the decision of the majority, may form itself into a private committee. The ministers may attend at the meetings of both Chambers, but they have only a deliberative vote unless they are members. Alterations in the Constitution can be made only by a Bill declaring that there is reason for introducing those alterations, followed by a dissolution of the Chambers and a second confirmation by the new States-General by two-thirds of the votes. Unless it is expressly declared, the laws concern only the realm in Europe, and not the Colonies. The executive authority, belonging to the Sovereign, is exercised by a responsible Council of Ministers. The Ministry, appointed August 10, 1939, and reconstructed during 1940-1945, is composed as follows:—

*President of the Council of Ministers, Minister for the Co-ordination of Warfare and Minister of Justice.*—Prof. Dr. P. S. Gerbrandy (born 1885).

*Minister of Foreign Affairs.*—Dr. E. N. van Kleffens.

*Minister for the Overseas Territories.*—Dr. J. I. J. M. Schirtzer (February 24, 1945).

*Minister of General Affairs.*—H. van Boeijen.

*Minister of Home Affairs.*—Dr. L. J. M. Beel (February 24, 1945).

*Minister of War.*—Jonkheer O. C. A. van Lidth de Jeude (September 15, 1942).

*Minister of Finance.*—Dr. G. W. M. Huymans (February 24, 1945).

*Minister for Naval Affairs.*—Vice-Admiral J. T. Furstner (July 29, 1941).

*Minister of Instruction, Science and Arts.*—G. Bolkestein.

*Minister of Communications.*—J. W. Albarde.

*Minister of Trade, Commerce and Agriculture.*—Dr. J. S. Gispem (February 24, 1945).

*Minister of Social Affairs.*—F. C. M. Wijffels (February 24, 1945).

*Minister of Shipping, the Navy and War.*—J. M. de Booy (June 2, 1944).

*Minister Without Portfolio.*—Jhr. E. Michiels van Verduynen (January 24, 1942).

There is a State Council—*Raad van State*—of 14 members, appointed by the Sovereign, of which the Sovereign is president, and which is consulted on all legislative and a great number of executive matters.

On May 10, 1940, suddenly and without warning or ultimatum, the armed forces of Germany attacked the Netherlands, Belgium and Luxemburg. German parachute troops seized Rotterdam at 4 a.m. By May 12, the Groningen Province had been overrun, and on May 14 the Commander-in-Chief of the Dutch Army issued a proclamation to the troops to cease fighting; the capitulation of the Army was signed on May 15. The Cabinet advised the Queen to leave the country; she departed for London, where it was announced on May 20, that the Government were establishing their seat. The Netherlands Government never capitulated either with regard to the Netherlands in Europe or to the overseas territory.

*German Commissioner for the Occupied Territory of the Netherlands.*—Dr. Arthur von Seyss-Inquart (appointed May 18, 1940).

In August, 1941, by a decree of the Reich Commission of the occupied territory of the Netherlands all representative bodies—Parliamentary, provincial, and municipal—have been suspended, 'to strengthen the authoritarian administration of the country.'

After liberating France and Belgium the Allied armies reached Holland in September, 1944, and by November, 1944, the Provinces of Zeeland, South Brabant and Limburg were practically cleared of the enemy.

## II. LOCAL GOVERNMENT.

The territory is divided into 11 provinces and 1,054 communes (January 1, 1940). Each province has its own representative body, the Provincial States. The members are elected for 4 years, directly from among the Dutch inhabitants of the province who are 25 years of age. Except that they must be inhabitants of the province, the electors are the same as for the Second Chamber. The members retire in a body and are subject to re-election. The number of members varies according to the population of the province, from 82 for Holland (South) to 35 for Drenthe. The Provincial States are entitled to make ordinances concerning the welfare of the province, and to raise taxes according to legal precepts. All provincial ordinances must be approved by the Crown. The Provincial States exercise a right of control over the municipalities. They also elect the members of the First Chamber of the States-General. They meet twice a year, as a rule in public. A permanent commission composed of 6 (in Drenthe 4) of their members, called the 'Deputed States,' is charged with the executive power in the province and the daily administration of its affairs. This committee has also to see the common law executed in the province. Both the Deputed as well as the Provincial States are presided over by a Commissioner of the Sovereign, who in the former assembly has a deciding vote, but in the latter named only a deliberative vote. He is the chief magistrate in the province. The Commissioner and the members of the Deputed States receive an allowance.

Each of the communes forms a Corporation with its own interests and rights, subject to the general law. In each commune is a Council, elected for four years directly, by the same voters as for the Provincial States, provided they inhabit the commune. All the Dutch inhabitants 23 years of age are eligible, the number of members varying from 7 to 45, according to the population. The Council has a right of making and enforcing bye-laws concerning the communal welfare. The Council may raise taxes according to rules prescribed by common law; besides, each commune receives from the State Treasury an allowance proportioned to the total number of its inhabitants and to the share which its non-contributing inhabitants have failed to pay towards local taxes. All bye-laws may be vetoed by the Sovereign. The Municipal Budget and the resolutions to alienate municipal property require the approbation of the Deputed States of the province. The Council meets in public as often as may be necessary, and is presided over by a Mayor, appointed by the Sovereign for 6 years. The executive power is vested in a college formed by the Mayor and 2-6 Aldermen (*wethouders*), elected by and from the Council; this college is also charged with the execution of the public law. The Municipal Police are under the authority of the Mayor; as a State functionary the Mayor supervises the actions of the Council; he may suspend their resolutions for 30 days, but is bound to inform the Deputed States of the province.

## Area and Population.

### I. PROGRESS AND PRESENT CONDITION.

Population at various census periods:—

|      |           |      |           |      |           |
|------|-----------|------|-----------|------|-----------|
| 1829 | 2,618,487 | 1869 | 4,511,415 | 1920 | 6,865,314 |
| 1869 | 3,579,529 | 1909 | 5,858,175 | 1980 | 7,985,565 |

Area (excluding water) and the population, according to the results of the census of December 31, 1930, and the estimated population on December 31, 1938 and 1942:—

| Provinces           | Area:<br>square miles<br>(Dec. 31, 1938) | Population    |                        |                        |
|---------------------|------------------------------------------|---------------|------------------------|------------------------|
|                     |                                          | Dec. 31, 1930 | Dec. 31, 1938          | Dec. 31, 1942          |
| Groningen . . .     | 696                                      | 392,436       | 421,605                | 432,470                |
| Friesland . . .     | 1,291                                    | 399,659       | 422,233                | 436,786                |
| Drente . . .        | 1,039                                    | 222,432       | 245,321                | 261,098                |
| Overijssel . . .    | 1,302                                    | 520,788       | 569,920                | 598,904                |
| Gelders . . .       | 1,940                                    | 829,293       | 914,207                | 970,296                |
| Utrecht . . .       | 526                                      | 406,960       | 472,709                | 508,304                |
| North Holland . . . | 1,142                                    | 1,509,587     | 1,666,368              | 1,694,657              |
| South Holland . . . | 1,130                                    | 1,957,578     | 2,138,819              | 2,162,322              |
| Zeeland . . .       | 690                                      | 247,006       | 254,565                | 257,922                |
| North Brabant . . . | 1,921                                    | 898,386       | 1,019,123              | 1,087,390              |
| Limburg . . .       | 846                                      | 550,840       | 602,983                | 643,180                |
| Total . . .         | 12,712                                   | 7,935,565     | 8,728,569 <sup>1</sup> | 9,048,529 <sup>2</sup> |

<sup>1</sup> Including 616 persons registered in the central register of population.

<sup>2</sup> Excluding 27,341 persons registered in the central register of population, making a grand total of 9,075,870.

Of the total on December 31, 1938, 4,352,878 were males and 4,375,691 females.

The area, including the interior waters, amounted in 1930 to 13,203 square miles, whilst the total area, including gulfs and bays, amounted in 1930 to 15,771 square miles.

On June 14, 1918, a law was passed for the purpose of forming a new province by the draining of the Zuiderzee to the extent of 523,000 acres. The work, which was commenced in 1924, is expected to take 15 years, and the total outlay for the first stage is calculated at 66,250,000 florins.

## II. MOVEMENT OF THE POPULATION.

| Years | Total Births<br>Registered as<br>Living | Illegiti-<br>mate | Deaths | Marriages | Surplus of<br>Births over<br>Deaths | Stillborn |
|-------|-----------------------------------------|-------------------|--------|-----------|-------------------------------------|-----------|
| 1936  | 171,675                                 | 2,612             | 73,923 | 63,486    | 97,752                              | 4,414     |
| 1937  | 170,220                                 | 2,355             | 75,516 | 66,040    | 94,704                              | 4,894     |
| 1938  | 178,422                                 | 2,557             | 74,043 | 67,040    | 104,379                             | 4,515     |

In 1938, 1,346 Dutch emigrants and 487 foreigners sailed from Dutch and foreign ports to countries outside Europe.

## III. PRINCIPAL TOWNS.

Population on January 1, 1939:—

|                  |         |                        |        |                      |        |
|------------------|---------|------------------------|--------|----------------------|--------|
| Amsterdam . . .  | 703,526 | Delft . . .            | 54,108 | Alkmaar . . .        | 31,774 |
| Rotterdam . . .  | 612,372 | Breda . . .            | 50,793 | Vlaardingen . . .    | 30,695 |
| The Hague . . .  | 495,518 | Heerlen . . .          | 50,552 | Bussum . . .         | 28,792 |
| Utrecht . . .    | 163,559 | Emmen . . .            | 48,127 | Helmoud . . .        | 28,320 |
| Haarlem . . .    | 137,576 | Amersfoort . . .       | 48,079 | Venlo . . .          | 27,602 |
| Groningen . . .  | 120,015 | 's Hertogenbosch . . . | 48,080 | Rheden . . .         | 27,111 |
| Eindhoven . . .  | 111,179 | Velsen . . .           | 47,470 | Voorburg . . .       | 26,874 |
| Tilburg . . .    | 95,141  | Zwolle . . .           | 42,134 | Roosendaal . . .     | 25,775 |
| Nymegen . . .    | 94,103  | Deventer . . .         | 40,309 | Bergen op Zoom . . . | 25,078 |
| Enschede . . .   | 90,289  | Hengelo . . .          | 39,962 | Flushing . . .       | 22,554 |
| Arnhem . . .     | 88,997  | Kerkrade . . .         | 37,279 | Hillegersberg . . .  | 22,470 |
| Leiden . . .     | 77,009  | Helder . . .           | 37,113 | Heereveen . . .      | 22,032 |
| Hooversum . . .  | 73,489  | Zaandam . . .          | 36,440 | Zutphen . . .        | 21,490 |
| Apeldoorn . . .  | 71,158  | Ede . . .              | 35,647 | Beverwijk . . .      | 20,771 |
| Maastricht . . . | 67,607  | Almelo . . .           | 35,621 | Renkum . . .         | 20,644 |
| Schiedam . . .   | 62,624  | Gouda . . .            | 32,703 | Kampen . . .         | 20,612 |
| Dordrecht . . .  | 62,007  | Zelst . . .            | 32,674 | Assen . . .          | 20,285 |
| Leeuwarden . . . | 54,537  | Haarlemmermeer . . .   | 32,870 |                      |        |

On May 14, 1940, German warplanes bombed and almost completely destroyed the centre of the city of Rotterdam.

## Religion.

Entire liberty of conscience is granted to the members of all religious confessions. The royal family and a great part of the inhabitants belong to the Reformed Church. The State Budget (1940) contains allowances for the different churches: for Protestant Churches, about 1,806,414 guilders; for Roman Catholics, about 750,532; for Jansenists, about 18,043; and for Jews, about 15,925.

The number of adherents of the different Churches in the various provinces according to the census of 1930 was: Dutch Reformed Church, 2,732,333; Other Protestants, 876,958; Catholics, 2,890,022; Jansenists, 10,182; Jews, 111,917; and other creeds or those of none, 1,313,968 (other creeds, 169,575; no religion, 1,144,393; unknown, 185).

The government of the Reformed Church is Presbyterian. At the end of 1939 the Dutch Reformed, Walloon, English Presbyterian, and Scotch Churches had 1 Synod, 10 provincial districts, 44 classes, and 1,430 parishes. Their clergy numbered 1,674. The Roman Catholic Church had one archbishop (of Utrecht), 4 bishops, and 1,398 parishes. The Old Catholics had 1 archbishop, 2 bishops, and 27 parishes. The Jews had 138 communities.

## Education.

The following table gives details of educational institutions for 1938-39:—

| Institutions                                            | Number           | Teaching Staff     | Pupils or Students |         |
|---------------------------------------------------------|------------------|--------------------|--------------------|---------|
|                                                         |                  |                    | Total              | Female  |
| Public Universities:                                    | 4                | 611                | 8,341              | 1,793   |
| Voluntary Universities:                                 | 2                | 67                 | 1,054              | 133     |

<sup>1</sup> Leiden (founded 1575), Utrecht (1638), Groningen (1614), Amsterdam (1632).

<sup>2</sup> In 1918 the Agricultural School at Wakeningen was created a high school.

<sup>3</sup> One at Rotterdam and the other at Tilburg (Roman Catholic High School of Commerce, founded October 8, 1927).

<sup>4</sup> The number of pupils taught in secondary, technical, and housewifery schools, and agricultural schools includes a number of non-fulltime students.

<sup>5</sup> Figures for the year 1937-38.

<sup>6</sup> The Calvinist University of Amsterdam and the Roman Catholic University of Nijmegen.

On November 28, 1940, the Germans closed the University of Leiden. For the session 1944, 48 students registered at Utrecht, 250 at Amsterdam, 18 at Groningen.

Of the conscripts called up in 1938, 0·07 per cent. could neither read nor write. Of the total number of children at the age of 6-13 years on December 31, 1930, 4 per cent. received no instruction.

### Justice and Crime.

As from January 1, 1934, justice is administered by the High Court of the Netherlands (Court of Cassation), by 5 courts of justice (Courts of Appeal), by 19 district tribunals, and by 62 cantonal courts; trial by jury is unknown in Holland. The Cantonal Court, which deals with minor offences, is formed by a single judge; the more serious cases are tried by the district tribunals, formed as a rule by 3 judges (in some cases one judge is sufficient); the courts are constituted of 3 and the High Court of 5 judges. All Judges are appointed for life by the Sovereign (the Judges of the High Court from a list prepared by the Second Chamber). They can be removed only by a decision of the High Court.

Juvenile courts were called into existence in 1922. The juvenile court is formed by a single judge specially appointed to try children's civil cases, at the same time charged with the administration of justice for criminal actions committed by young persons who are not yet 18 years old, unless imprisonment of six months or more ought to be inflicted, in which case the judge of the juvenile court acts as judge-examiner.

The number of persons convicted (offenders concerning taxes not included) was, in 1937, 228,364 males and 17,187 females.

There are both State and municipal police. The State police consists of field-constables and cavalry. The former are spread over the country, the latter guard the frontiers (eastern and southern). There are about 1,339 field-constables—appointed and paid by the Government—divided into numerous brigades. Besides each commune has its own field-constables or police force.

### Finance.

The revenue and expenditure in five years (ordinary and extraordinary) were, in thousands of guilders:—

|                      | 1936                      | 1937                      | 1938                      | 1939 <sup>a</sup>         | 1940 <sup>a</sup>         |
|----------------------|---------------------------|---------------------------|---------------------------|---------------------------|---------------------------|
| Revenue <sup>1</sup> | 1,000 guilders<br>707,383 | 1,000 guilders<br>756,088 | 1,000 guilders<br>870,881 | 1,000 guilders<br>742,069 | 1,000 guilders<br>770,005 |

<sup>1</sup> Without the revenues of loans.

<sup>a</sup> Estimates.

The total State debt of the Netherlands increased from 3,910,000,000 guilders on September 30, 1939, to 9,770,000,000 on September 30, 1943, and to 10,649,000,000 guilders on March 31, 1944. The debt on the earlier date consisted of 880,000,000 guilders in short-term obligations and 3,030,000,000 guilders in long-term obligations. On the latter date these amounts were 3,570,000,000 guilders and 6,200,000,000 guilders respectively.

### Defence.

#### I. FRONTIER.

The Netherlands are bordered on the south by Belgium, on the east by Germany. On the former side the country is quite level, on the latter

more hilly; the land frontier is open all round. The frontiers were defended by few fortresses. The scheme of defence adopted in 1874 contemplated the concentration of the defensive forces in a restricted area, known as the 'Holland Fortress.' This comprises the provinces of North and South Holland, with parts of the main portions of Utrecht. Two-thirds of the area is surrounded by the sea. On the land side, to the east and south, were lines of more or less permanent works, which by inundations could be covered against attack. This scheme of defence was no longer suited to modern conditions, where a closely concentrated defence offered a similarly concentrated target to air attack. Although, in the last year or two before the war, the Dutch began to construct chains of pill-boxes along the German frontier, these represented a very thinly fortified system. It was particularly vulnerable in the north—which did not matter—and also in the south—where lay the vital hinge of the combined resistance that Belgium and Holland together could offer. By draining the Peel marsh some years earlier, the Dutch had unwittingly facilitated the advance of the German mechanised forces into southern Holland, and thence against the flank of the Belgian defences. These dangers were increased by the obsolescence of much of the Dutch military material, and the relatively short training of most of their troops.

#### II. ARMY.

According to an Act of 1922, service in the Army was partly voluntary and partly compulsory; the voluntary enlistments bore a small proportion to the compulsory. Every Dutch citizen and, in certain circumstances, every other resident in the Netherlands, was liable to personal service in the army (or navy) from the age of 20 up to 40. Budget for Army and Navy, 1940, 147,797,000 florins.

#### III. NAVY.

The Navy is maintained for a double purpose—viz. the protection of the Netherland waters and coast, and the defence of the East Indian possessions. The Royal Netherlands Navy normally had its bases in Holland, in the South-west Pacific (Netherlands East Indies) and in the Caribbean (Netherlands West Indies).

Following is a list of principal ships of the Royal Netherlands Navy:—

| Laid down | Name       | Displacement, tons | Armour water line | Max. Armour on guns | Principal Armament | Torpedo Tubes | Indicated Horse-power | Normal Speed |
|-----------|------------|--------------------|-------------------|---------------------|--------------------|---------------|-----------------------|--------------|
|           | CRUISERS   |                    | inches            | inches              |                    |               |                       |              |
| '38       | Heemskerk. | 3,350              | 2                 | shields             | 6 6-in.            | 6             | 56,000                | 32·5         |
| '36       | Tromp.     |                    |                   |                     |                    |               |                       |              |

There are also 2 destroyers, 3 seagoing torpedo boats, 13 submarines, 3 sloops, 1 frigate, 1 corvette, 1 gunboat, 4 mine-layers and 14 minesweepers. Various warships which were under construction at the time of the German invasion were destroyed to avoid seizure, and a number were lost in action with the Japanese in the East Indies during the early months of 1942.

#### IV. AIR FORCE.

The Royal Netherlands Navy, the Royal Netherlands Army and the Royal Netherlands Indian Army each have their own Air Force. They are now co-operating with the Allied Air Forces

## Production and Industry.

### I. AGRICULTURE.

The surface of the Netherlands was divided in 1942 as follows (in acres):—Arable land, 2,602,384; permanent meadows, 3,016,796; land for flower bulbs, 12,202; kitchen gardens and orchards, 148,760; flower cultivation and nurseries, 8,033; making a total of cultivated lands of 5,788,175 acres. To this must be added private gardens, heaths and forests, 693,062 acres, and land formed by sea deposits not yet protected by dykes, 14,125 acres, making a grand total of 6,495,362 acres.

The areas under the principal crops, in acres, were as follows:—

| Products              | 1941    | 1942    | Products               | 1941      | 1942      |
|-----------------------|---------|---------|------------------------|-----------|-----------|
|                       | acres   | acres   |                        | acres     | acres     |
| Autumn wheat, white . | 172,467 | 90,399  | Autumn barley . .      | 16,749    | 11,303    |
| Autumn wheat, red . . | 30,061  | 29,450  | Spring barley . .      | 99,194    | 114,547   |
| Spring wheat, white . | 78,608  | 153,494 | Oats, white and yellow | 247,084   | 240,178   |
| Spring wheat, red . . | 67,487  | 82,453  | Oats, black . . . .    | 22,104    | 15,583    |
| Autumn rye . . . . .  | 565,141 | 659,863 | Maise . . . . .        | 8,624     | 9,084     |
| Spring rye . . . . .  | 30,393  | 33,644  | Total . . . . .        | 1,327,807 | 1,439,898 |

In addition, in 1942, 100,788 acres were planted with sugar beet, 522,801 acres with potatoes and 134,956 acres with mangels.

The yield of the more important products for 3 years was as follows:—

| Crop             | Produce |         |         | Crop               | Produce   |           |           |
|------------------|---------|---------|---------|--------------------|-----------|-----------|-----------|
|                  | 1936    | 1937    | 1938    |                    | 1936      | 1937      | 1938      |
|                  | Tons    | Tons    | Tons    |                    | Tons      | Tons      | Tons      |
| Wheat . . . . .  | 418,275 | 341,724 | 433,782 | Rye . . . . .      | 490,968   | 494,541   | 551,060   |
| Barley . . . . . | 115,620 | 117,660 | 140,465 | Sugar beet . . . . | 1,638,225 | 1,581,930 | 1,519,503 |
| Oats . . . . .   | 316,940 | 355,596 | 446,549 | Flax . . . . .     | 74,150    | 88,635    | 118,750   |

According to the live-stock census of May 1942, the Netherlands possessed 2,440,553 cattle, 491,000 pigs, 337,177 horses and 574,497 sheep.

The production of butter under State control in 1939, amounted to 229,978,000 lbs., compared with 214,557,000 lbs. in 1938, and that of cheese, under State control, 205,779,000 lbs., compared with 208,243,000 lbs. in 1937. The export of eggs and egg products was 225,000,000 lbs. in 1939. Of the horticultural produce a large quantity was exported. The export in 1938 consisted of 69,149,000 lbs. of vegetables (chiefly onions, tomatoes, salads and preserved vegetables), and 98,796,000 lbs. of fruit (chiefly fruit-pulp, grapes, apples, strawberries and gooseberries).

### II. MINING AND MANUFACTURES.

A few coal-mines are found in the province of Limburg; some of them belong to the State. The quantity of coal extracted in 1937 was 14,321,269 metric tons, and in 1938, 13,487,625 metric tons. In 1939 the private mines produced 5,289,981 tons, and the State mines, 8,197,544 tons. There is one salt mine at Boekelo, production: 1936, 76,271 tons; 1937, 132,430 tons; 1938, 166,064 tons.

There were, in 1938, 268 distilleries, 11 sugar refineries, 3 beet-sugar factories, 12 salt works, 110 breweries, and 2,694 tobacco factories. In the following industries there were employed the number of workers shown, and the value of the output given in florins:—brick-making, 12,536 (14,585,000

## COMMERCE—SHIPPING, NAVIGATION—COMMUNICATIONS 1117

florins in 1937-8); clothing, 25,571 (79,140,000 florins in 1937); boots and shoes, 11,600 (28,445,000 florins in 1938); engines, boilers, 21,612 (71,842,000 florins in 1937); shipbuilding, 34,458 (154,499,000 florins in 1937); cotton and linen, 36,434 (136,565,000 florins in 1938).

### III. FISHERIES.

In 1938, 3,308 vessels of all kinds were engaged in the fisheries. The produce of the herring fishery in the North Sea was valued at 8,181,506 guilders in 1938; the weight of the catch of herrings was 96,580 tons. The quantity of oysters produced in 1938 amounted to 849,235 kilos.

### Commerce.

The following are the returns of the special imports (exclusive of gold and silver coins and bullion) and the special exports for six years (in thousands of guilders):—

| Year | Imports   | Exports | Year | Imports   | Exports   |
|------|-----------|---------|------|-----------|-----------|
| 1934 | 1,088,276 | 711,803 | 1937 | 1,550,123 | 1,148,110 |
| 1935 | 985,917   | 675,098 | 1938 | 1,414,768 | 1,089,166 |
| 1936 | 1,010,524 | 746,125 | 1939 | 1,516,651 | 966,215   |

Value of the trade (excluding gold and silver coins and bullion) with the leading countries for two years in thousands of guilders:—

| Imports              |  | 1938    | 1939    | Exports              |  | 1938    | 1939     |
|----------------------|--|---------|---------|----------------------|--|---------|----------|

| France . . . . .     |  | 64,926  | 74,345  | France . . . . .     |  | 60,205  | 50,559   |

<sup>1</sup> Including Austria.

Total trade between the Netherlands and the United Kingdom (in thousands of pounds sterling) for 5 years (Board of Trade returns):—

|                                       | 1934   | 1935   | 1936   | 1937   | 1938   |
|---------------------------------------|--------|--------|--------|--------|--------|
| Imports from Netherlands to U.K. .    | 20,947 | 23,066 | 25,089 | 32,010 | 29,341 |
| Exports to Netherlands from U.K. .    | 12,090 | 11,658 | 12,343 | 15,019 | 15,142 |
| Re-exports to Netherlands from U.K. . | 1,991  | 2,303  | 1,959  | 2,065  | 1,659  |

### Shipping and Navigation.

The number of vessels in the mercantile navy on December 31, 1938, was:—7 sailing vessels, of 5,400 cubic metres; 933 steamers and motor vessels, of 3,796,174 cubic metres; total, 940 vessels of 3,801,574 cubic metres.

Total number of vessels entered the ports of the Netherlands, 1938, was 21,096 of 31,793,955 tons, and cleared, 20,856 of 31,808,511 tons.

### Communications.

#### I. CANALS AND RAILWAYS.

The total extent of rivers and navigable canals is about 4,817 miles; of roads about 16,000 miles. Of the roads, 8,534 miles are macadamized, of

### Overseas Territories.

The overseas territories of the Netherlands, situated in the East Indies and the West Indies, embrace an area of about 790,000 square miles, with a total population of 60,954,890 in 1934.

### NETHERLANDS INDIES.

(NEDERLANDSCH-INDIË.)

The Netherlands possessions in Asia, forming the territory of the Netherlands Indies, are situated between 6° N. and 11° S. latitude, and between 95° and 141° E. longitude.

In the first centuries after Christ, the Hindus from India invaded several of the islands and established a number of kingdoms. In the fifteenth century Moslem invaders converted practically the whole Archipelago (the island of Bali was an important exception). In the sixteenth century Portuguese traders in quest of spices settled in some of the islands, only to be ejected fifty years later by the British and the Dutch (1595). The latter finally ousted the former. In 1602 the Netherlands created their East India Company. This company conquered successively the Netherlands Indies, and ruled them during nearly two centuries. After the dissolution of the company in 1798 the Netherlands possessions were governed by the mother-country from 1816 onward.

### Government and Constitution.

Politically, the territory is under the sovereignty of the Crown, since the Constitution of 1922 declared that the Kingdom of the Netherlands consists of the territory of the Netherlands, the Netherlands Indies, Surinam and Curaçao. It is divided into (1) Lands under direct government, (2) Native States.

The administration and executive authority of the East Indies rest in the hands of a Governor-General. He is assisted by a Council of four to six members of an advisory character. The members of the Council, however, have no share in the executive. The Governor-General and the members of the Council are nominated by the Queen. In 1918 a 'Volksraad' was installed to discuss the budget, and to advise the Government on matters of general importance as a first step towards the development of self-government in the overseas territories. Indonesians are eligible for all public offices. Since then a number of modifications of the Constitution of the Netherlands Indies enlarged its powers considerably, and in 1927 the Volksraad became the legislature for all internal affairs of the Netherlands Indies. Of the 60 members, 22 are appointed by the Government, 38 are elected by the local councils, and the Chairman is appointed by the Crown. It includes Europeans, Indonesians and foreign Orientals (Chinese, Arabs). By the Constitution of 1922, the Netherlands Indies is granted self-government in internal affairs under supervision of the Home Government, the legislative powers being shared between the Volksraad and the Governor-General.

About 1925 a reform of the administration took place in Java and Madura. These islands have been divided into 3 autonomous provinces, under Governors, and sub-divided into residencies, governed by Residents, who are assisted by Assistant-Residents and a number of subordinate Netherlands officials. Local government is almost entirely exercised by native civil servants, under the Regents. To the native states Soerakarta and Jogjakarta Governors are

appointed, who with their staff take care of the relations between the Government and the self-governing princes. The Outer Islands are divided into 3 areas, under Governors, and sub-divided into 17 residencies, governed by Residents, who are assisted by Assistant-Residents and a number of subordinate European officials.

Early in 1942 the Japanese invaded the Dutch Indies; on February 20 their forces landed on Bali, and on March 5 they occupied Batavia.

On September 14, 1944, a Lieutenant-Governor of the Netherlands Indies was appointed, and his governmental organization set up at Brisbane (Queensland), pending the liberation of the territory from Japanese occupation.

### Area and Population.

The Netherlands Indies comprise five large islands: Java, Sumatra, Borneo, Celebes and New Guinea (the western half of the latter being Dutch, the eastern British and Australian), besides some fifteen minor but still important islands, and literally thousands of small ones. Area and population are shown as follows:—

|                                  | Area:<br>square miles | Population<br>Oct. 7, 1930<br>(Census) | Population<br>1920<br>(Census) | Population<br>per sq. mile<br>1930 |
|----------------------------------|-----------------------|----------------------------------------|--------------------------------|------------------------------------|
| Java and Madura                  | 51,032.4              | 41,718,364                             | 34,977,237                     | 817.5                              |
| Sumatra                          | 19,219.3              | 1,910,298                              | 1,578,808                      | 99.4                               |
| Island of Sumatra                | 15,087.6              | 1,042,583                              | 855,739                        | 69.1                               |
| Sumatra, West Coast              | 36,518.6              | 1,693,200                              | 1,197,554                      | 46.4                               |
| Sumatra, East Coast              | 10,134.9              | 323,123                                | 257,140                        | 31.9                               |
| Island of Sumatra                | 11,113.4              | 361,563                                | 233,903                        | 32.5                               |
| Sumatra, West Coast              | 33,341.9              | 1,098,725                              | 827,985                        | 33.0                               |
| Sumatra, East Coast              | 17,345.0              | 245,272                                | 164,618                        | 14.1                               |
| Atjeh                            | 21,386.9              | 1,003,082                              | 736,348                        | 46.9                               |
| Bian-Lingga Archipelago          | 12,234.9              | 298,325                                | 223,104                        | 24.4                               |

1 Including New Guinea.

The population of Java and Madura on October 7, 1930 (census), consisted of 20,424,225 males and 21,294,139 females; 192,571 were Europeans, 40,891,093 natives (or Indonesians), and 634,700 other Orientals, chiefly Chinese and Arabs (582,431 Chinese). The population of the outer provinces (census 1930) was 19,008,869 (including an estimate of 135,350), with 9,580,325 males and 9,293,194 females; 47,846 were Europeans, 13,246,974 Natives, 650,783 Chinese, and 63,266 other Asiatics. The estimated population in 1940 was officially given as 70 millions. Some of the principal

ances are the Achinese in Sumatra, the Sundanese in Java, the Sasaks in Lombok, the Menadonese in Celebes, the Dayaks in Borneo and the Papuas in New Guinea.

The whole population of the territory is legally divided into Europeans, Natives and foreign Orientals. The former generally live under the same laws as the inhabitants of the mother-country, while in the government of the latter the Indian customs and institutions are preserved. The Governor-General, however, is, in agreement with the Council, authorised to make individual exceptions to this rule.

Some sixty languages are spoken in the Netherlands Indies, of which Javanese, Sundanese and Madurese are the most important, but Malay is understood in most islands. The Japanese invaders are endeavouring to introduce a knowledge of Japanese among the population.

### Religion.

Religious liberty is granted to all denominations. The bulk of the natives are Mohammedans. There are about two and a half million Christians; in Bali and the western part of Lombok there are a million and a quarter Brahmans; in the outer territories there are heathen tribes. There are also about a million Buddhists.

The Protestant Church counted, at the end of 1939, 41 ministers, 38 preachers and assistant preachers and 343 native preachers paid by the Government, and in addition 1,154 native assistants not paid out of public funds; the Roman Catholics had 37 priests and 14 native preachers paid by the Government, 507 priests and 16 native preachers not paid out of the public funds. During 1940, 57 societies were allowed to practise their missionary work.

### Education.

The following table shows the number of schools, the school attendance, the teaching staff, and the expenditure on education in the school year ending July 30, 1940:—

| Schools                                  | Number | Teaching Staff | Pupils    | Cost (in guilders) |
|------------------------------------------|--------|----------------|-----------|--------------------|
