Higher education is given at the Government University at Batavia, with 4 faculties, Law (1924), Medicine (1927), Academy for Indonesian Civil Servants (1938) and Arts (1940); and at the Technical College at Bandoeng, erected in 1920.

### Justice and Crime.

The administration of justice for Europeans is mainly entrusted to European judges, while for natives their own chiefs have a large share in the trial of cases. There is a Supreme Court of Justice at Batavia; High Courts of Justice at Batavia, Samarang, Sourabaya, Padang, Medan and Makassar; resident courts and police courts for less important criminal cases; native courts,

magistrate courts, police courts, regent courts, district courts, and courts of priests for natives.

Some nineteen distinct systems of native civil law are to be found in the islands.

### Finance.

Revenue and expenditure:—

| Year              | Revenue     | Expenditure   | Surplus or Deficit |
|-------------------|-------------|---------------|--------------------|
|                   | Guilders    | Guilders      | Guilders           |
| 1940              | 743,871,086 | 761,302,298   | — 17,631,212       |
| 1941 <sup>1</sup> | 746,149,905 | 1,060,163,910 | — 314,019,005      |
| 1942 <sup>1</sup> | 750,918,773 | 813,802,815   | — 62,884,042       |

<sup>1</sup> Estimates.

The sources of revenue in 1942 are stated as follows (in guilders): From direct and indirect taxes, 317,818,000; opium and salt monopolies, 15,985,000; dredging service, 627,000; all other sources, 49,892,000, including net surplus of State business enterprises (as opium factory, pawnshops, salt winning, Government agricultural estates, Government printing office, tin, coal, harbours, post, telegraph and telephone services, electric enterprises and naval establishment). Net receipts of pawnshops, 4,441,000; Government agricultural estates, 1,408,000; tin, 15,000,000; coal, 1,248,000; harbours, 89,000; post, telegraph and telephone services, 4,585,000. Public funded debt on December 31, 1941, was 1,283,889,000 guilders.

### Defence.

The Netherlands forces in the East Indies long constituted a colonial army which was entirely separate from the home army. The battalions were mixed battalions, the companies composed either of Europeans or of Indonesians; the greater part of the officers, and a proportion of the non-commissioned officers, were Europeans. The strength of the army on January 1, 1939, was 1,170 officers, 35,719 volunteers.

After the German conquest of Holland, and in face of the growing threat from Japan, the forces in the Netherlands East Indies were expanded, mainly by the recruiting of Indonesians. Early in 1942 the total strength of the land forces was estimated at 50,000. The Air Force, too, had been developed, with the help of American machines and American training personnel.

### Production and Industry.

Scattered all over the island of Java are many agricultural estates chiefly owned by agricultural companies, Europeans and Chinese. Yet the greater part of the soil of Java belongs to and is cultivated by the Indonesians.

The harvested area under various 'native' cultures in Java and Madura was in 1940 as follows, in acres:—Irrigated rice, 9,202,333; non-irrigated rice, 902,567; maize, 4,899,427; cassava, 2,672,921; sweet potatoes, 516,303; groundnuts, 621,116; soya beans, 1,032,700; other pulses, 557,855; tobacco (native), 410,441; other secondary crops, 1,823,895; total, 22,589,563.

In 1940, the harvested areas of the principal 'other secondary crops' were other tubers, 334,989 acres; capsicum, 211,599 acres; onions, 47,401 acres; cotton, 13,615 acres; potatoes, 18,152 acres; and native sugar-cane, 44,947 acres. Separate from this area native tea was planted on 184,974 acres; native rubber on 40,556 acres; and native coffee on 63,044 acres.

The total area in use for agriculture in the Netherlands Indies in 1939

was 6,164,522 acres, of which 77,234 acres were Government-estates, 816,226 acres were private lands, and 148,664 acres lands hired from native states in Java and Madura, 2,517,874 acres lands hired on long-lease (*erfpacht*) from the Government or from native states, 2,347,268 acres agricultural concessions in the Outer Provinces granted by the Government or by native states (*landbouwconcessie*), 257,255 acres lands hired on short-lease from natives. Of the total only 2,978,981 acres were planted.

The following table gives a comparison of the production of sugar for 5 years:—

|                                | 1936    | 1937      | 1938      | 1939      | 1940      |
|--------------------------------|---------|-----------|-----------|-----------|-----------|
| Harvested area . . . . . acres | 87,897  | 208,782   | 209,617   | 234,519   | 224,277   |
| Total production metric tons . | 574,710 | 1,379,924 | 1,375,510 | 1,562,462 | 1,587,864 |

<sup>1</sup> Hevea only.

<sup>2</sup> Including 55,000 tons native coffee.

<sup>3</sup> Including 184,964 tons native rubber.

<sup>4</sup> Including 3,984 tons native tobacco.

<sup>5</sup> Including 38,371 tons native coffee.

<sup>6</sup> Preliminary figures, including 266,282 tons native rubber.

<sup>7</sup> Including 6,613 tons native tobacco.

<sup>8</sup> Including 13,293 tons native tea.

<sup>9</sup> Including 13,773 tons native tea.

<sup>10</sup> Oil.

\* Revised figures.

The tin mines of Bangka are worked by the Government; those of Billiton by a combined Governmental and private undertaking; and those of Riau and Sumatra by private enterprise. Their total yield was in metric tons: 1936, 31,221; 1937, 39,760; 1938, 27,737; 1939, 28,342; 1940, 44,031.

The yield of the principal coal mines in Java, Sumatra and Borneo was, in metric tons: 1936, 1,147,196; 1937, 1,363,596; 1938, 1,456,547; 1939, 1,780,632; 1940, 2,009,422

Number of animals in 1940:—horses, 711,461; cattle, 4,599,181; buffaloes, 3,176,067.

The production of the principal mineral oil enterprises was, in metric tons: 1936, 6,437,798; 1937, 7,262,008; 1938, 7,398,144; 1939, 7,948,694; 1940, 7,938,993.

During the last ten years the development of industry has been intensive. There are shipyards at Taudjong Prioh, Sourabaya, Semarang and Amboina. There are many textile factories, soap and margarine factories, cigarette and cigar factories, two large paper factories, an automobile assembly works, large construction works, a tyre factory, a glass factory and a chemical factory.

### Commerce.

Imports and exports in thousand guilders for 5 years:—

|                   | 1936    | 1937      | 1938    | 1939    | 1940    |
|-------------------|---------|-----------|---------|---------|---------|
| Imports . . . . . | 287,367 | 515,951   | 497,385 | 529,368 | 437,678 |
| Exports . . . . . | 630,739 | 1,012,231 | 714,323 | 787,079 | 883,239 |

The distribution of trade for 2 years is shown as follows (in thousands of guilders):—

| Country                             | Imports |         | Exports |         |

| 1940 | Steamers . . . . .        | 9,836   | 10,156,516 | 4,906                       | 1,688,899 |
|      | Sailing vessels . . . . . | 3,070   | 165,557    | 1,631                       | 83,779    |

On December 31, 1940, the Netherlands Indies had about 43,700 miles of roads. The highway mileages of some of the larger islands are reported as follows: Java and Madura, 16,850; Sumatra, 15,800; Borneo, 2,250; Celebes, 5,090; Bali and Lombok, 1,250; Timor, 2,100, and the Moluccas, 250.

At the end of 1940 the total length of rail and tramways (State and private) was about 4,611 miles (3,378 in Java and 1,233 in Sumatra); the gross receipts (1940) about 60,218,000 guilders; working expenses (1940), about 39,915,000 guilders; number of passengers (1940) about 90,589,000.

In 1940 the postal and telegraph services of the Netherlands Indies included 676 post offices, 1,380 rural postal agencies, 481 telegraph offices, 629 rural telegraph agencies and 66 fixed, 7 coast and 12 aeronautical radio stations. Moreover, there were 722 telegraph offices and 37 fixed, 3 coast and 4 aeronautical radio stations of other Government services and private companies; 220 of the above-mentioned 722 telegraph offices are situated in places where also a telegraph office of the postal and telegraph services has been established.

The Government telegraph lines extended in 1940 over 4,573 miles, the Government telephone cables over 252 miles, making a total of 4,825 miles. The numbers of telegrams were 1,082,000 (internal). Internal ordinary letters, lettercards and postcards carried in 1939 amounted to 45,078,000, while there were 45,029,000 printed matter, newspapers, etc., 1,838,000 paid registered articles, 12,849,000 official letters and 1,739,000 official registered articles for the interior. The international correspondence dealt with was 12,202,000 letters, lettercards and postcards, 8,072,000 other articles, and 745,000 registered articles.

The Government telephone aerial lines extended in 1940 over 16,921 miles, the Government telephone cables over 1,479 miles. At the end of 1940 there were 340 Government telephone exchanges and 51,606 telephones.

Before the Japanese invasion regular air services were maintained by the Royal Netherland Indies Airways (K.N.I.L.M.), the Royal Dutch Airlines (K.L.M.) and the Qantas Empire Airways, Ltd. On the regular K.N.I.L.M. lines, in 1940, 29,430 passengers, 202,439 kilos of freight and 74,205 kilos of mail were carried.

### Banking and Credit.

The Java Bank, established in 1828, has a capital of 9,000,000 guilders. On September 28, 1941, its position (in thousands of guilders) was as follows: gold and silver, 393,681; discounts and advances, 184,679; notes in circulation, 255,003; deposits and bills payable, 318,411. The other large Netherlands banking institutions are the Netherlands Trading Company, the N.E.I. Commercial Bank, and the N.E.I. Escompto Company, besides which there are branches of British and Japanese banks.

In the Postal Savings-Bank there were in 1940 about 520,400 depositors, with a deposited amount of about 50,607,000 guilders.

### Weights and Measures.

The introduction of the metric system of weights and measures was officially started in February, 1923, and gradually continued; it came into full operation on January 1, 1938.

The following are the old weights and measures:—

|                               |                               |
|-------------------------------|-------------------------------|
| The <i>Picul</i> . . .        | = 136.16 lbs. avoirdupois     |
| „ <i>Katti</i> . . .          | = 1.36 „                      |
| „ <i>Tjengkal</i> . . .       | = 4 yards „                   |
| „ <i>Paal</i> (Java) . . .    | = 1,506 metres                |
| „ <i>Paal</i> (Sumatra) . . . | = 1,852 metres                |
| „ <i>Square Paal</i> . . .    | = 227 hectares = 561.16 acres |
| „ <i>Bouw</i> . . .           | = 1.7536 acres                |

The legal coins of 10, 5, 2½, 1 and ½ guilders, as well as the weights and measures, of the Netherlands Indies, are those of the Netherlands, but the country has coins of its own, viz., 25, 10, 5, 2½, 1 and ½ cent pieces.

The Japanese have fixed the rate of exchange at 100 cents equal to 1 yen.

### Consular Representatives.

As the Netherlands East Indies are in enemy occupation, there is no British consular representative there.

### NETHERLANDS WEST INDIES.

The Netherlands possessions in the West Indies are (a) *Surinam*, or *Netherlands Guiana*, and (b) *Curaçao*.

### Surinam or Netherlands Guiana.

Netherlands Guiana or Surinam is situated on the north coast of S. America between 2° and 6° N. latitude, and 53° 50' and 58° 20' W. longitude, and bounded on the north by the Atlantic Ocean, on the east by the river Marowijne, which separates it from French Guiana, on the west by the river Corantijn, which separates it from British Guiana, and on the south by inaccessible forests and savannas to the Tumac-Humac mountains, which separate it from Brazil.

At the peace of Breda, in 1667, between England and the United Netherlands, Surinam was assured to the Netherlands in exchange for the colony of New Netherlands in North America, and this was confirmed by the treaty of Westminster of February, 1674. Since then Surinam has been twice in the possession of England, 1799 till 1802, when it was restored at the peace of Amiens, and in 1804 to 1816, when it was returned according to the Convention of London of August 13, 1814, confirmed at the peace of Paris of November 20, 1815, with the other Dutch colonies, except Berbice, Demerara, Essequibo, and the Cape of Good Hope.

According to the Constitution of 1922, Surinam is part of the Netherlands Kingdom (the other part being the Netherlands, East Indies and Curaçao). The administration and executive authority are in the hands of a governor assisted by an advisory council consisting of the governor as president, a vice-president and three members, all nominated by the Queen of the Netherlands. The States of Surinam (15 members) form the representative body of the colony; 10 of the members are elected by voters and 5 are appointed by the Governor, for a period of four years.

*Acting Governor.*—Dr. J. C. Brons (appointed January 3, 1944).

Netherlands Guiana is divided into six districts.

Area, 54,291 English square miles; population (December 31, 1943) 189,484, inclusive of the negroes and Indians living in the forests. The capital, Paramaribo, has 60,723 inhabitants.

*Births and deaths for 3 years:—*

|                 | Births |       |       | Deaths |       |       |
|-----------------|--------|-------|-------|--------|-------|-------|
|                 | 1941   | 1942  | 1943  | 1941   | 1942  | 1943  |
| Males . . . .   | 2,576  | 2,558 | 2,561 | 1,100  | 1,189 | 1,284 |
| Females . . . . | 2,564  | 2,601 | 2,584 | 823    | 959   | 1,196 |
| Total . . . .   | 5,140  | 5,159 | 5,145 | 1,923  | 2,148 | 2,480 |

Number of marriages in 1941, 451; in 1942, 943; in 1943, 738.

There is entire religious liberty. At the end of 1943 the numbers of the different religious bodies were: Reformed and Lutheran, 13,578; Moravian Brethren, 34,869; Roman Catholic, 32,539; Jews, 962; Mohammedans, 43,861; Hindus, 36,255; Confucians, 1,652; others, 4,120.

There were, in 1943, 43 public schools with 5,583 pupils, and 72 private schools with 12,666 pupils.

There is a court of justice, whose members are nominated by the Sovereign. There are three cantonal courts.

For relieving pauperism the Government not only subsidises orphanages and other religious or philanthropical institutions, but itself maintains an almshouse.

The expenditure, the local revenue (derived from import, export, and excise duties, taxes on houses and estates, personal imposts, and some

indirect taxes), and the State subvention are shown as follows for 4 years in thousands of guilders:—

|                       | 1942   | 1943   | 1944   | 1945  |
|-----------------------|--------|--------|--------|-------|
| Revenue . . . . .     | 18,887 | 16,536 | 11,619 | 8,171 |
| Expenditure . . . . . | 10,570 | 16,838 | 11,602 | 8,167 |

The Netherlands forces in Surinam consist of a civic guard, artillery and infantry.

On November 24, 1941, it was announced that at the request of the Dutch Government the United States and Brazil will, for the duration of the war only, co-operate in the protection of the bauxite mines of Dutch Guiana.

Principal products for 2 years:—

|                             | 1942       | 1943      |                             | 1942       | 1943       |
|-----------------------------|------------|-----------|-----------------------------|------------|------------|
| Sugar (kilos) . . . . .     | 14,125,640 | 7,115,149 | Paddy (kilos) . . . . .     | 40,856,832 | 32,632,080 |
| Cacao (kilos) . . . . .     | 50,017     | 49,467    | Maize (kilos) . . . . .     | 625,890    | 380,612    |
| Bananas (bunches) . . . . . | 362,278    | 226,335   | Rum (litres) . . . . .      | 600,184    | 575,963    |
| Coffee (kilos) . . . . .    | 799,688    | 659,991   | Molasses (litres) . . . . . | 2,351,030  | 2,801,767  |

The production of gold in 1943 was 180,224 grammes; of balata, 299,456 kilos, and of bauxite, 1,694,541 metric tons.

In 1943 there were 25,361 head of cattle, 7,603 goats and 7,856 pigs.

Imports and exports for 6 years:—

| Year | Imports   | Exports   | Year | Imports    | Exports    |
|------|-----------|-----------|------|------------|------------|
|      | Guilders  | Guilders  |      | Guilders   | Guilders   |
| 1938 | 6,861,756 | 6,609,139 | 1941 | 9,429,922  | 11,898,877 |
| 1939 | 7,882,353 | 7,959,210 | 1942 | 14,423,725 | 12,021,671 |
| 1940 | 8,519,684 | 7,319,419 | 1943 | 22,298,102 | 14,173,267 |

Principal exports in 1943: sugar, 2,668,702 kilos; coffee, 189,352 kilos; rice, 799 kilos; bauxite, 1,662,766 metric tons.

Board of Trade figures show U.K. imports from Netherlands Guiana in 1938, 30,537L; and U.K. exports to Netherlands Guiana, 41,161L; U.K. re-exports to Guiana, 696L.

In 1943 there entered 588 vessels of 3,370,613 register tons, and cleared 596 vessels of 3,403,941 register tons.

The communication between several districts of the colony is carried on by vessels and small steamers. An overseas steamship service extends to British Guiana. The capital, Paramaribo, has a harbour open to ships of 19-foot draught; regular connections in both directions exist with the United States by different steamship companies (Royal Netherlands Steamship Company, American Caribbean Line and Alcoa Steamship Company). In September, 1929, a weekly air service was established between Paramaribo and the United States. In February, 1939, air services were further increased when Paramaribo was made a regular stop of a weekly service between the United States and Buenos Aires. Both these services are by the Pan-American Airways, Inc. Since September, 1939, the Royal Dutch Airlines (K.L.M.) maintain also a weekly service between Curaçao and Surinam *via* Trinidad.

### Curaçao.

Curaçao was acquired by the Netherlands as a result of the defeat of the Spaniards in 1634, and has ever since remained in the possession of the

Dutch, except during a short interval in the Napoleonic period, when for a few years it was under British control. Formerly a Colony, Curaçao, now, in accordance with the Constitution of 1922, an integral part of the Kingdom of the Netherlands, consists of two groups of islands about 500 miles apart. One group is made up of the first three islands in the following list; the other of the last three:—

|                                   | Square Miles | Population Dec. 31, 1943 |
|-----------------------------------|--------------|--------------------------|
| Curaçao . . . . .                 | 210          | 75,176                   |
| Aruba . . . . .                   | 69           | 37,337                   |
| Bonaire . . . . .                 | 95           | 5,709                    |
| St. Martin <sup>1</sup> . . . . . | 17           | 2,035                    |
| St. Eustatius . . . . .           | 7            | 1,062                    |
| Saba . . . . .                    | 5            | 1,221                    |
|                                   | 408          | 122,540                  |

<sup>1</sup> Only the southern part belongs to the Netherlands, the northern to France.

Governor.—Dr. P. A. Kasteel (appointed May 21, 1942).

The Governor is assisted by a Council composed of a vice-president and three members, nominated by the Sovereign. The States of the territory of Curaçao consist of 15 members (10 elected by the voters and 5 nominated by the Governor). The city of Willemstad, on Curaçao, is the seat of government. Its population on December 31, 1943, was 36,437. The different islands, except Curaçao, are under officials called 'Gezaghebber,' nominated by the Governor. In 1943, 3,893 births were registered and 991 deaths. Schools in 1943 numbered 60, with 18,978 pupils.

Dutch is the official language. Spanish and English are also spoken. In addition a native language has evolved, called 'Papiamentu.'

The revenue is derived from import, export and excise duties, taxes on income, on land and some other taxes. In the Budget for 1944 the revenue is estimated at 24,954,000 guilders and the expenditure at 24,942,000 guilders.

The imports of Curaçao and the other islands in 1943 were valued at 100,559,069 guilders; the exports of Curaçao and the other islands at 5,592,734 guilders, inclusive of imports and exports of crude and refined oil. The chief products are refined oil, straw hats, salt, and phosphate of lime. The chief industry is oil-refining. There were in 1943, 245 horses, 4,667 cattle, 24,689 sheep, 58,035 goats, 3,791 pigs.

There entered the ports of the different islands in 1943, 13,204 vessels of 91,718 registered tonnage.

In 1944 the colony had 674 kilometres of highway, distributed as follows: Curaçao, 305 kilometres; Aruba, 300; Bonaire, 48; St. Martin, 21.

Consul at Curaçao.—M. E. Vibert.

There are British consular posts at Willemstad (Curaçao) and Aruba.

## NICARAGUA.

(REPÚBLICA DE NICARAGUA.)

### Constitution and Government.

THE new Constitution of Nicaragua, of March 22, 1939, vests the legislative power in a Congress of two houses consisting of 40 deputies, elected for 6 years, and 15 Senators (plus ex-Presidents of the Republic, who are appointed for life) selected for 6 years, all by popular vote. The President is elected for 6 years. The Constitution grants citizenship to women over 18 years of age who can read and write, but leaves the granting of the franchise to the decision of the legislature.

Nicaragua declared war on Japan on December 8, 1941; on Germany and Italy on December 11, and on Bulgaria, Hungary and Rumania on December 19.

*President*.—General Anastasio Somoza (elected December 8, 1936, to serve until 1940; re-elected for period March 30, 1939, to May 1, 1947).

The President exercises his functions through the ministers, who are heads of the departments. He may form, when occasion requires, a Council of State to advise on public contracts and other matters.

The Republic is divided into 15 'departments' and 2 'comarcas,' each of

which is under a political head, who has supervision of finance, instruction and other matters. The Mosquito Reserve now forms a department named Zelaya.

On February 18, 1916, the Bryan-Chamorro treaty between Nicaragua and the United States was signed, under which the United States in return for 3 million dollars acquired the option for a canal route through Nicaragua and also a naval base in the Bay of Fonseca on the Pacific coast and Corn Island on the Atlantic coast. It was ratified by Nicaragua on April 7, 1916, and by the United States on June 24, 1926. Two commissions of American Army engineers began in August, 1939, to survey the route for a canal.

### Area and Population.

Area estimated at 57,143 English square miles, with a coastline of over 300 miles on the Atlantic and 200 miles on the Pacific. Estimated population, December 31, 1941, 1,013,946. Nicaragua is the largest in area and most thinly populated of the Central American republics. At least 75 per cent. of the inhabitants live in the western half of the country. The two halves of the Republic differ greatly in many respects and there is little communication between them, the journey by trail and river being slow and difficult, though progress is being made, especially in canalizing the San Juan river connecting Lake Nicaragua with Bluefields on the Atlantic. A paved highway is being built between Managua and Bluefields.

The people of the western half of the Republic are principally of mixed Spanish and Indian extraction, some of pure Spanish descent and many Indians. The population of the eastern half is composed mainly of Mosquito and Zambo Indians and Negroes from Jamaica and other islands of the Caribbean, with some Americans. Immigration has been severely restricted since 1930, for Chinese, Turks, Arabs, Negroes and Jews.

There are 120 municipalities, of which 98 have from 2,000 to 30,000 inhabitants. The capital is Managua, situated on the lake of the same name, with (1943) 124,357 inhabitants; it was almost totally destroyed by earthquake on March 31, 1931, but has been largely rebuilt. León has a population, estimated in 1943, of 50,058; Matagalpa, 47,966; Jinotega, 35,922; Granada, 35,250; Masaya, 32,537; Chinandega, 23,887, and Bluefields, 19,114.

### Religion, Education and Justice.

The prevailing form of religion is Roman Catholic, but there is complete religious liberty. The Republic constitutes one archbishopric and ecclesiastical province (Nicaragua) with the Seat at Managua. There are four bishoprics, León, Granada, Bluefields and Matagalpa.

There were (1943) 774 State elementary schools, 7 normal schools, 18 secondary schools, 5 professional schools, 408 mixed (urban and rural) schools and 133 other schools. The total number of teachers was 2,196. Illiterate persons, of all ages, number about 60 per cent. of the population. Secondary education, neither obligatory nor free, is being carried on by private individuals, with Government assistance in the form of grants and numerous scholarships. Nicaragua has three universities in the cities of Managua, León and Granada, and a newly created military academy.

The judicial power is vested in a Supreme Court of Justice at Managua, five chambers of second instance (León, Masaya, Granada, Matagalpa and Bluefields), and 153 judges of inferior tribunals.

## Finance.

Revenue and expenditure for 5 fiscal years ending June 30 in córdobas (nominally 4·86 córdobas = £ 1; 1 córdoba = 1·00 U.S. dollars, but exchange rate since 1939 has been 5 córdobas = 1 dollar):—

|                 | 1939-40                | 1940-41 <sup>1</sup>   | 1941-42 <sup>1</sup>   | 1942-43 <sup>1</sup>   | 1943-44 <sup>1</sup>   |
|-----------------|------------------------|------------------------|------------------------|------------------------|------------------------|
| Revenue . . .   | Córdobas<br>28,147,699 | Córdobas<br>25,530,318 | Córdobas<br>33,941,670 | Córdobas<br>41,640,147 | Córdobas<br>45,060,789 |
| Expenditure . . | 23,388,785             | 25,280,318             | 33,941,670             | 41,221,512             | 45,060,789             |

<sup>1</sup> Estimate.

The principal items of expenditure in the 1943-44 budget were:—6,485,366 córdobas for the Ministry of Development, 5,880,264 córdobas for railways and 4,547,762 córdobas for the Ministry of War, Navy and Aviation.

By an agreement reached in 1911 between the Government and the British bondholders, modified and extended in 1917 and 1920, customs receipts and certain other revenues are collected by the Collector-General of Customs (who must be an American) and applied by a High Commission of 2 members (the Nicaraguan Minister of Finance, as President, and the Collector-General of Customs) to the payment of the external debt, the balance being turned over to the Government.

Nicaragua's public debt, at December 31, 1943, consisted of 387,840l., 3,428,000 dollars and 1,776,944 córdobas. Converting pounds sterling and córdobas into dollars at the current rates of exchange, the total was equivalent to 5,166,587 dollars.

## Defence.

The National Guard numbers (1939) 220 officers and 3,318 other ranks, besides 4,000 in the trained reserve. Period of enlistment, 3 years. During period of enlistment, soldiers cannot vote.

Coastguard boats patrol the east and west coast to prevent smuggling.

Aviation has received considerable attention, and many good airports have been opened for commercial and military purposes.

## Production and Industry.

Of the total land area (about 30 million acres), about 10,000,000 acres are under timber, 900,000 acres are used for grazing and about 2,000,000 acres are cultivated.

Agriculture is the principal source of national wealth. The principal product of the eastern part of the Republic was formerly bananas, but the crop in 1943 was nil, due to a blight. Cotton production was 1,211 metric tons. Plantains, oranges, pineapples and yucca are raised for home consumption. The products of the western half are much more varied, the most important being coffee, sugar cane, cacao, corn and beans. Sugar producers have a combine, under government control, which fixes the price for internal sales; profits are now made solely on domestic consumption. Rice is grown abundantly and some wheat in the hilly Nueva Segovia district, while tobacco is cultivated round Masaya. The annual average coffee crop, from 104,000 acres, is estimated at 30,000,000 lb.; exports, 1943, 11,967,353 kilos. In value, coffee exports constituted (1943) 22 per cent. of total exports. Under the Inter-American Coffee Agreement of 1940, Nicaragua's export quota to the United States was fixed (1943-44)

at 257,053 bags (of 60 kilos). With the exception of plantains and yucca or cassava, the greater part of the food supply of the eastern section is imported from the United States. The western half of the country produces much of its own food.

Timber production is declining, though the forests contain mahogany and cedar, which were formerly largely exported, three varieties of rose-woods, guayacan (*lignum vitae*), dye-woods, gums, and medicinal plants. Wild rubber is abundant in the virgin forests on the Atlantic watershed, but there are very few rubber plantations owing to the labour shortage. Exports (1943) of dyewoods were 913,764 board feet, and of timber, 11,941,965 board feet.

There are several gold mines. Production has risen from 44,500 fine ounces in 1938 to 244,920 ounces in 1943. Exports of gold, value 7,735,757 dollars (U.S.), constituted 50 per cent. of total exports in 1943, and all went to the United States; gold, however, is worked by foreigners under concession and only about 60 per cent. of the proceeds remains in Nicaragua. Output of silver, 1943, was 345,500 fine ounces; exports were valued at 110,964 dollars. Copper and precious stones are also found.

## Commerce.

The foreign trade of Nicaragua, in córdobas, was as follows in 5 years (nominally and for purposes of trade statistics 1 córdoba = 1 U.S. dollar, hence these figures should be multiplied by 5 to show the value in the national currency):—

|               | 1939                  | 1940                  | 1941                   | 1942                  | 1943                   |
|---------------|-----------------------|-----------------------|------------------------|-----------------------|------------------------|
| Imports . . . | Córdobas<br>6,884,591 | Córdobas<br>7,016,451 | Córdobas<br>10,426,735 | Córdobas<br>6,772,273 | Córdobas<br>13,529,870 |
| Exports . . . | 8,300,972             | 9,510,441             | 11,931,091             | 14,326,597            | 15,440,367             |

The customs collections in 1943 were 15,373,840 córdobas (ordinary córdobas, not the statistical unit used above).

In 1943 the value of the principal imports (in dollars) was:—Textiles, 4,496,121; iron and steel manufactures, 2,401,613; chemicals, drugs and medicines, 1,310,889; food and drink, 879,455; petrol and oil, 1,473,947. The principal countries of import in 1943 were (values in dollars):—United States, 8,256,952 (61·0 per cent.); Great Britain, 272,491 (2·1 per cent.); Peru, 553,227 (4 per cent.).

In 1943 the value of the principal exports (in dollars) was:—Coffee, 3,436,779; gold and silver, 7,846,269. The principal countries of export, in values exported (in dollars), were: United States, 13,559,964 (89 per cent.).

Total trade between Nicaragua and United Kingdom (Board of Trade returns) for 5 years:—

|                                   | 1934     | 1935     | 1936     | 1937     | 1938     |
|-----------------------------------|----------|----------|----------|----------|----------|
| Imports from Nicaragua to U.K. .  | £ 97,736 | £ 21,643 | £ 13,091 | £ 12,795 | £ 52,881 |
| Exports to Nicaragua from U.K. .  | 104,696  | 100,848  | 128,363  | 97,254   | 54,076   |
| Re-Exports to Nicaragua from U.K. | 951      | 733      | 726      | 800      | 187      |

United Kingdom exports to Nicaragua (Board of Trade returns) since 1938 have been: 1939, 74,000l.; 1940, 46,000l.; 1941, 46,000l.; 1942, 45,000l.; 1943, 40,000l.; 1944, 23,000l. Total for the 3 years, 1939-41, include shipments of war supplies, if any, by Government departments.

### Shipping and Communications.

Western Nicaragua has two seaports, Corinto (the largest) and San Juan del Sur, through which pass most of the imports and exports of the Republic. The eastern ports are Bluefields, Cabo Gracias, Puerto Cabezas and San Juan del Norte (Greytown). In 1941, 657 vessels of 473,916 tonnage entered and cleared Nicaragua's ports. Plans have been made for the canalization of the River San Juan, which divides Nicaragua and Costa Rica, and which would give both countries a clear waterway from the Caribbean Sea to the Pacific.

Most of the roads are still mere tracks over which ox-carts alone can travel in the wet season, but some good roads are under construction. The east coast, hitherto practically shut off from the west coast, will be joined by a highway built with American credits of 5,000,000 dollars. The Nicaraguan section of the Trans-Continental Highway, between Puerto Díaz and Bluefields, is under construction, as well as the Pan-American highway.

The Pacific Railroad of Nicaragua, owned and operated by the Government and the principal line in the republic, has a total length of 367 miles, all single-track. The line runs from Granada to Corinto (192 kilometres); Masaya-Diriamba (44 kilometres); León-El Sauce (71 kilometres); San Jorge-San Juan del Sur (31 kilometres). There is a recently completed line, Chinandegan-Puerto Morazán (30 kilometres).

There is a regular daily air service (Pan-American Airways) to the Central and South American republics and the United States. T.A.C.A. (Transportes Aéreos Centro Americano), an American air line, have a twice-weekly service to Costa Rica, Honduras, and El Salvador from Managua.

There are (1943) 3,798 miles of telegraph wire, and 137 offices; also 1,245 miles of telephone wire and 87 telephone stations serving 1,944 instruments. There are 135 post offices, and good service between the chief towns of the western section; service into the interior is carried by air mail. All-America Cable Co. connects with New York and has a powerful station at San Juan del Sur.

The Tropical Radio Telegraph Company maintains a powerful station at Managua, and branch stations at Bluefields and Cabo Gracias a Dios. The Government operates the National Radio with 50 broadcasting stations; wireless sets in use, 1941, were 4,000.

### Money and Banking.

Under the Act of October 26, 1940, the monetary unit is the *córdoba*, divided into 100 centavos. Its exchange parity with gold is fixed by the Issue Department of the National Bank of Nicaragua. No gold or silver coins are minted. On December 31, 1943, total circulation was 34,871,439 paper córdobas, and fractional currency of 1,690,880 córdobas. Gold coins provided by law are 10, 5 and 2½ córdobas, but no gold coins have ever been struck. National banknotes form the great part of the currency, in denominations from 500 córdobas to 1 córdoba. Silver coins in circulation are ½, ¼ córdobas and 10 centavos; nickel coins, 5 centavos; copper coins, 1 centavo. The National Bank announced in January, 1941, the redemption of all silver coins in circulation at their nominal value for six months; thereafter they were redeemed at their metallic value.

The National Bank of Nicaragua at Managua, founded in 1912, owned by the Government since 1924, was completely reorganised in May, 1940. Its directorate was transferred from the United States to Managua. The Banking Department, with assets of 27,000,000 córdobas, functions as a

commercial bank and its Issue Department (with assets of 16,400,000 córdobas) is the sole bank of issue.

Since January 7, 1893, the metric system of weights and measures has been in use.

### Diplomatic and Consular Representatives.

#### 1. OF NICARAGUA IN GREAT BRITAIN.

*Envoy Extraordinary and Minister Plenipotentiary.*—Senor Dr. Don Constantino Herdocia.

*Vice-Consul, in charge at London.*—F. V. Cock.

There are Consular representatives in Liverpool and Manchester.

#### 2. OF GREAT BRITAIN IN NICARAGUA.

*Envoy Extraordinary, Minister Plenipotentiary, and Consul-General.*—John Hurleston Leche, C.M.G., O.B.E. (appointed June 1, 1939; resident at Guatemala City).

*Chargé d'Affaires and Consul.*—J. R. M. Leake (resident at Managua).

There are Vice-Consuls at Managua, Corinto, León and Bluefields.

### NORWAY.

(NORGE.)

### Reigning King.

**Haakon VII**, born August 3, 1872; second son of Frederik VIII, King of Denmark, elected King of Norway by the Storting, November 18, 1905; accepted the crown, November 18, 1905; landed in Norway, November 25, 1905; married, July 22, 1896, to Princess *Maud*, born November 26, 1869 (died November 20, 1938), the third daughter of the late Edward VII, King of Great Britain and Ireland.

*Son.*—*Olav*, Crown Prince, born July 2, 1903, married on March 21, 1929, to Princess Märtha of Sweden, born March 28, 1901, daughter of Prince Carl (second son of Oscar II, late King of Sweden). *Offspring:* Princess *Ragnhild Alexandra*, born June 9, 1930; Princess *Astrid Maud Ingeborg*, born February 12, 1932; Prince *Harald*, born February 21, 1937.

According to the Constitution, Norway is a constitutional and hereditary monarchy. The royal succession is in direct male line in the order of primogeniture. In default of male heirs the King may propose a successor to the Storting, but this assembly has the right to nominate another, if it does not agree with the proposal.

By the Treaty of January 14, 1814, Norway was ceded to the King of Sweden by the King of Denmark, but the Norwegian people declared themselves independent and elected Prince Christian Frederick of Denmark as their King. The foreign Powers refused to recognise this election, and on August 14 a convention was made proclaiming the independence of Norway in union with Sweden. This was followed on November 4 by the election of Karl XIII (II) as King of Norway. Norway declared this union dissolved, June 7, 1905, and after some months' negotiation, a mutual agreement for the repeal of the union was signed, October 28, 1905. The throne of Norway was offered to a prince of the reigning house of Sweden, but declined, and, after a *plébiscite*, Prince Carl of Denmark was formally elected King and took the name of Haakon VII.

The following is a list of the Sovereigns of Norway since the year 1204, with the date of their accession:—

|                               |      |                               |           |
|-------------------------------|------|-------------------------------|-----------|
| Inge Baardsson . . . . .      | 1204 | Erik af Pommern . . . . .     | 1389      |
| Haakon Haakonsson . . . . .   | 1217 | Kristofer af Bayern . . . . . | 1442      |
| Magnus Lagabæter . . . . .    | 1263 | Karl Knutsson . . . . .       | 1449      |
| Erik Magnussen . . . . .      | 1280 | Same Sovereigns as in Denmark |           |
| Haakon V Magnussen . . . . .  | 1299 |                               | 1450-1814 |
| Magnus Eriksson . . . . .     | 1319 | Kristian Fredrik . . . . .    | 1814      |
| Haakon VI Magnussen . . . . . | 1355 | Same Sovereigns as in Sweden  |           |
| Olav Haakonsson . . . . .     | 1381 |                               | 1814-1905 |
| Margræta . . . . .            | 1388 | Haakon VII . . . . .          | 1905      |

### Constitution and Government.

The Constitution of Norway bears date May 17, 1814, with several modifications passed at various times. It vests the legislative power of the realm in the Storting (Parliament), the representative of the sovereign people. Only the Storting can vote supplies and has the power of the purse. The royal veto in regard to acts may be exercised twice; but if the same Bill pass three Stortings formed by separate and subsequent elections, it becomes the law of the land without the assent of the sovereign. The King has the command of the land, sea and air forces, and makes all appointments.

The Storting assembles every year. The meetings take place *suo jure*, and not by any writ from the King or the executive. They begin on the first weekday after January 10 each year, and the Storting remains assembled as long as it may find it necessary. Every Norwegian subject of twenty-three years of age (provided that he resides and has resided for five years in the country) is entitled to elect, unless he is disqualified from a special cause. Women are, since 1918, entitled to vote under the same conditions as men. The mode of election is direct, and the method of election is proportional. Since April 5, 1938, the people choose their 150 representatives every fourth year. The country is divided into districts, each electing from three to eight representatives. Representatives must not be less than thirty years of age, must have resided in Norway for ten years, and be voters in the district from which they are chosen. Former members of the Cabinet can be elected representatives of any district of the Kingdom without regard to their residence. By a law which came into force in June, 1938, all branches of the Government service, including the State Church, are now open to women.

At the elections for the Storting held in October, 1936, the following parties were elected for the period 1937-39: Labour Party 70, Conservatives 36, Liberals 23, Agricultural Party 18, and 3 others.

The Storting, when assembled, divides itself by election into two sections, the 'Lagting' and the 'Odelsting.' The former is composed of one-fourth of the members of the Storting, and the other of the remaining three-fourths. The Ting nominates its own presidents. Questions relating to laws must be considered by each section separately. Most other matters are settled by both sections in common sitting. The Storting elects five delegates, whose duty it is to revise the public accounts. All new laws must first be laid before the Odelsting, from which they pass into the Lagting to be either accepted or rejected. If the Odelsting and Lagting do not agree, the two sections assemble in common sitting to deliberate, and the final decision is given by a majority of two-thirds of the voters. The same majority is required for alterations of the Constitution. The Lagting and the ordinary members of the supreme court of justice (*Høyesterett*) form a High Court of the Realm (the *Riksrrett*) for the impeachment and trial of Ministers, members of the *Høyesterett*, and members of the Storting.

The executive is represented by the King, who exercises his authority through a Cabinet called a Council of State (*Statsraad*), composed of a Prime Minister or Minister of State (*Statsminister*), and at least seven ministers (*Statsraader*). The ministers are entitled to be present in the Storting and to take part in the discussions, but without a vote. The Cabinet, appointed March 19, 1935, and reconstructed on June 30, 1939, is as follows:—

*Prime Minister.*—Johan Nygaardsvold (born 1879).

*Minister of Foreign Affairs.*—Trygve Halvdan Lie (February 21, 1941).

*Minister of Defence.*—Oscar Fredrik Torp (March, 1942).

*Minister of Ecclesiastical Affairs and Education.*—Nils Hjelmteit.

*Minister of Justice.*—Terje Wold.

*Minister of Finance.*—Paul Hartmann (March, 1942).

*Minister of Agriculture.*—Hans Ystgaard.

*Minister of Social Affairs.*—Sverre Kornelius Eilifsen Støstad.

*Minister of Public Works and Acting Minister of Commerce.*—Olav Hindahl.

*Minister of Supply and Reconstruction.*—Anders Frihagen (October, 1942).

*Minister of Shipping.*—Major Arne Sund.

*Minister of State.*—Sven Nielsen.

On April 9, 1940, German forces invaded Norway, and the German Minister at Oslo presented a demand to the Norwegian Government that the country should be handed over to German administration. The Government refused to submit to the German demands, and with the assistance of Allied forces, naval and military operations were carried on against the German troops by the Norwegian Army until June 10. The King and the Government, who left the country, were in London on June 10, and they declared their intention of carrying on the war from there. The Germans took over the administration, and on September 25, 1940, the German Reich Commissar for Norway, by a decree pretended to dispose of the King, the Royal Family, the legal Government and all political parties, and established a council of thirteen Commissars belonging to the Quisling Party, the *Nasjonal Samling*, which from then became the only tolerated political party in Norway. On February 1, 1942, the German Commissioner appointed Vidkun Quisling 'Minister-President' of a 'puppet' Government. The Norwegian Government in London promptly repudiated the appoint-

students. There were in 1937-38, 159 secondary schools—18 State schools, 91 communal, and 18 private entitled to give certificates, and 37 private schools not having this right, with respectively 7,016, 23,643, 1,841, and 1,292 pupils in April, 1938. Most of the secondary schools are mixed. Norway has one university, viz. at Oslo (founded 1811), attended in 1939 by 4,118 students. There is a technical high school at Trondheim attended in 1939 by 892 students, one agricultural high school in Aas, with 198 students, a teachers' training college at Lade with 24 students, a military high school with 27 students, a dentist high school with 146 students, and the State academy of arts with 61 students, also a veterinary high school with 69 students and a commercial high school with 165 students. There are also several special schools, particularly continuation schools for young people between 15 and 18, and industrial, crafts, technical, and arts schools for both sexes.

The Norwegian Government in London has established the following schools for Norwegian children in the United Kingdom: one primary boarding-school for boys and girls from 7 to 15 years of age, in Scotland (70 pupils); a primary day school in London (15 pupils), and a class of first formers of a secondary school in London (12 pupils).

Norwegian is an independent language closely related to Danish and Swedish. As to the written language, there exist two idioms, and both may be officially used.

### Justice and Crime.

The judicature in Norway is common to both civil and criminal cases. The same judges, who are state officials, preside over both kinds of cases. The participation of lay assessor and jurors, summoned for each case, varies, however, according to the civil or criminal nature of the case.

The ordinary Court of First Instance (*Herreds- og byrett*) is presided over by a judge who, as a general rule, is assisted by two lay assessors, chosen by ballot from a panel elected by the district council. In criminal matters the Court of First Instance is competent in cases where the maximum penalty incurred is 5 years imprisonment. Altogether there are 101 Courts of First Instance. There is a Court of Mediation (*Forlikssråd*) for each community, consisting of three men or women, elected by the district council, before which, as a general rule, civil cases must first be brought for mediation.

The Court of Second Instance (*Lagmannsrett*) is presided over by a judge, together with two other judges, all of them being state officials. In civil matters there is participation by lay assessors, ordinarily 4 but in some cases 2, chosen and elected in the same way as mentioned above. In criminal cases the lay element is a jury composed of 10 jurors. This court is a court of appeal in both civil and criminal cases. In addition, as a court of first instance, it takes cognizance of all criminal cases (other than military or those coming under the *Riksrätt*—the court for impeachments) which do not come under the competence of the Court of First Instance. The kingdom is divided into 5 districts (*Lagdømmer*) for the purpose of the Courts of Second Instance. Each district is divided into circuits in which courts are held at specific times.

The Supreme Court (*Høyesterett*) is the ultimate court of appeal, in criminal cases, however, generally deciding on questions of law. It consists of a president and 4 other justices.

There are 4 convict prisons; inmates, July 1, 1939, 372 males and 15 females. There are 36 local prisons, in which were detained, July 1, 1939, 721 males and 55 females.

### Pauperism.

The relief of the poor is mostly provided for by local taxation by the Communes. The number of persons receiving relief amounted to 140,486 in 1938.

### Finance.

Revenue and expenditure for five years:—

| Year ending<br>June 30 | Revenue   |           | Expenditure |           |
|------------------------|-----------|-----------|-------------|-----------|
|                        | Total     | Current   | Total       | Current   |
|                        | 1,000 kr. | 1,000 kr. | 1,000 kr.   | 1,000 kr. |
| 1936-37                | 525,013   | 460,187   | 466,581     | 387,221   |
| 1937-38                | 572,185   | 529,870   | 526,623     | 434,760   |
| 1938-39                | 675,565   | 590,877   | 623,651     | 485,788   |
| 1939-40 <sup>1</sup>   | 624,631   | 539,074   | 624,651     | 511,109   |
| 1940-41 <sup>2</sup>   | 790,256   | 660,694   | 790,256     | 674,088   |

<sup>1</sup> Budget voted.

<sup>2</sup> Budget proposal.

The public debt of Norway has been incurred for the main part by railway undertakings and construction of telegraph lines and water-power developments. The following gives the national liabilities for six years:—

| Year ending<br>June 30 | Total debt <sup>1</sup> | Year ending<br>June 30 | Total debt <sup>1</sup> |
|------------------------|-------------------------|------------------------|-------------------------|
|                        | Kroner                  |                        | Kroner                  |
| 1935                   | 1,476,181,000           | 1938                   | 1,428,744,000           |
| 1936                   | 1,481,806,000           | 1939                   | 1,464,200,000           |
| 1937                   | 1,493,297,000           | 1943                   | 9,500,000               |

<sup>1</sup> At the rate of par on foreign loans.

Of the total on June 30, 1939, 596,400,000 kr. were foreign debt; 867,800,000 kr. internal debt.

All the expenditure of the Norwegian Government in London, the maintenance of the central administration, the payment of interest and instalments on Norway's national and State guaranteed municipal foreign loans, the maintenance of the Norwegian Armed Forces and social welfare, is borne by the assets of the Norwegian Government, principally the Norwegian Merchant Navy. The National Budget for the financial year 1941-42 amounted to approximately 13,000,000L, of which over half went to national defence and a large part of the remainder to social welfare for the seamen, and to payment of interest and instalments on Norway's national debt.

### Defence.

The main fortifications of Norway were Oscarsborg, Oslofjord, Kristiansand, Bergen and Agdenes.

### ARMY.

The Army of Norway was a national militia. Service was universal and compulsory, liability commencing at the age of 18, and continuing till the age of 55. The men were called out at 21, and for the first 12 years belonged to the line. Men from 18 to 21 and from 45 to 55 belonged to the landstorm, which can be called out in a national emergency, and from 33 to 45 to the landvaern. Military training lasted 84 days for all branches. The strength of the permanent forces in 1939 was 1,135 officers and 765 N.C.O.s; the numbers trained in that year were approximately 12,500, for organization into 6 skeleton divisions.

All Norwegian men in Great Britain between 18 and 55 are called up for military service. In May, 1941, a decree was passed extending conscription to include all Norwegian men in countries other than Great

Britain. The Ministry of Defence decides in which countries and to what extent this decree shall apply. In July, 1942, Norwegian women in Great Britain between 18 and 40 also became liable for military service.

A new Norwegian Army has been formed in Great Britain. It includes infantry and artillery, as well as other specialised branches such as parachute units, and is armed and equipped with British material as well as Norwegian equipment. Officers and N.C.O.s are trained at British courses and in British units and also at the Norwegian Military College, and other Norwegian courses. As many officers and N.C.O.s as possible are trained, so that they can form the core of the new armies which will be raised in Norway.

#### NAVY.

The Norwegian Navy consists of 25 warships and 30 auxiliary vessels, which are fighting side by side with the Allies in co-operation with and under the operational command of the Royal Navy.

The warships comprise 6 destroyers, 8 corvettes, 2 submarines, 4 motor torpedo-boats, 4 motor launches and 1 submarine chaser. The auxiliary vessels consist of converted whale-catchers, trawlers and other small craft.

Personnel totals 600 officers and 4,600 men, of whom about 150 officers and 1,500 ratings have been posted as gunners on board ships of the Norwegian Merchant Navy. The Royal Norwegian Women's Auxiliary Service was established in August, 1942.

#### AIR FORCE.

The Royal Norwegian Air Force has several squadrons, as well as other units, on active service. Many Norwegian pilots are serving in R.A.F. squadrons, and other Norwegian airmen have served in the Ferry Command. The Royal Norwegian Women's Auxiliary Air Force was established in the beginning of 1943.

### Production and Industry.

In 1930, 30 per cent. of the population lived on agriculture and forestry, 28 per cent. on industry, 10 per cent. on navigation and other transportation, 10 per cent. on trading and 7 per cent. on fishery and whaling.

#### I. AGRICULTURE.

Norway is a barren and mountainous country. The arable soil is found in comparatively narrow strips, gathered in deep and narrow valleys and around fjords and lakes. Large continuous tracts fit for cultivation do not exist. Of the total area, 72.2 per cent. is unproductive, 24.2 per cent. forest, and 3.6 per cent. under cultivation and other used soils.

The acreage and products of the principal crops for 3 years were as follows:—

| Crops      | Acreage   |           |           | Produce (quarters)      |                         |                         |
|------------|-----------|-----------|-----------|-------------------------|-------------------------|-------------------------|
|            | 1936      | 1937      | 1938      | 1937                    | 1938                    | 1939*                   |
| Wheat      | 74,559    | 79,160    | 86,366    | 303,346                 | 320,398                 | 309,970                 |
| Barley     | 149,343   | 148,901   | 147,799   | 683,040                 | 657,510                 | 664,623                 |
| Oats       | 210,455   | 211,108   | 210,542   | 1,349,578               | 1,408,818               | 1,311,705               |
| Rye        | 14,648    | 14,689    | 13,324    | 53,691                  | 52,445                  | 49,413                  |
| Mixed Corn | 10,843    | 11,080    | 11,080    | 61,827                  | 68,017                  | 60,423                  |
| Potatoes   | 127,487   | 128,270   | 132,315   | 34,887,199 <sup>1</sup> | 38,012,219 <sup>1</sup> | 38,143,895 <sup>1</sup> |
| Hay        | 1,658,229 | 1,664,676 | 1,668,516 | 2,901,428 <sup>1</sup>  | 2,999,719 <sup>1</sup>  | 2,537,395 <sup>1</sup>  |

<sup>1</sup> Bushels.

<sup>2</sup> Tons.

<sup>3</sup> Preliminary.

On June 20, 1939, the country possessed live-stock as follows:—Horses, 203,981; cattle, 1,455,016; sheep, 1,743,802; goats, 248,916; swine, 361,953. Number of reared silver foxes (1938), 491,741.

#### II. FORESTRY.

The forests are one of the chief natural sources of wealth. The total area covered with forests is estimated at 29,455 square miles, of which 70 per cent. is under pine trees. The State forests occupy about 5,200 square miles. The productive forest area covers 24.2 per cent. of the land area. An inconsiderable part of the coniferous growth is exported as timber. Beyond the home consumption of timber and fuel wood, the essential part of the growth is consumed as raw material in the paper industry, most of which is exported. The annual yield is about 10,400,000 cubic metres, of which one-third is exported in normal years. In recent years the export value of timber produce has been some 25 per cent. of the country's total export.

#### III. MINERALS AND METALS.

Pyrites and iron ore are the most important mineral products.

The production and value of the chief ores, metals and alloys in 1938 are shown in the following table:—

| Ores and Minerals         | Tons      | 1,000 Kroner | Metals and Alloys | Tons    | 1,000 Kroner |
|---------------------------|-----------|--------------|-------------------|---------|--------------|
| Silver ore                | 14,907    | 887          | Silver            | 7.3     | 890          |
| Copper ore                | 35,105    | 5,017        | Copper            | 10,547  | 8,997        |
| Pyrites                   | 1,027,776 | 18,167       | Nickel            | 8,467   | 27,705       |
| Nickel ore                | 84,220    | 1,521        | Aluminium         | 29,085  | 45,179       |
| Iron ore and titanium ore | 1,474,478 | 28,252       | Pig iron          | 135,627 | 41,561       |
| Zinc ore and lead ore     | 15,089    | 679          | Zinc              | 38,121  | 5,357        |
| Rutile                    | 124       | 89           | Other products    | —       | 15,287       |
| Molybdenum ore            | 775       | 3,210        |                   |         | 36,315       |
| Other products            | 525       | 110          |                   |         |              |
| Total                     | —         | 57,432       | Total             | —       | 180,741      |

#### IV. FISHERIES.

The number of persons in 1937 engaged in cod fisheries was 61,322; in winter herring fisheries, 31,500, and in summer herring fisheries, 30,800.

The value of the sea fisheries (based on the prices paid at the fishing places) in kroner in 1937 was: Cod, 31,500,000; herring, 28,110,000; mackerel, 2,058,000; salmon and sea trout, 2,430,000; other fisheries, 25,597,000; lobsters, 2,577,000; total, 92,272,000, against 81,307,000 in 1936 and 77,147,000 in 1935. The output of the sea fisheries in tons totalled in 1937: 903,646, of which herring yielded 523,217 tons and cod 210,760 tons.

The catch of whale, walrus and seal produced in 1939 a total of about 40,000,000 kroner.

Whale-oil production: 1,317,000 barrels in 1933; 1,253,000 barrels in 1934; 1,239,000 barrels in 1935; 1,163,000 barrels in 1936; 1,057,000 barrels in 1937; 988,000 barrels in 1938, and 733,000 barrels in 1939.

#### V. MANUFACTURES.

Industry is chiefly based on raw materials produced within the country (wood, fish, etc.), and on water power of which the country possesses an enormous amount. The pulp and paper industry, the canning industry

and the electro-chemical and electro-metallurgical industries are the most important export manufactures.

For 1938 statistics of industrial establishments, see THE STATESMAN'S YEAR-BOOK, 1940, p. 1185.

### Commerce.

Total imports and exports in five years:—

|                     | 1937          | 1938          | 1939 <sup>1</sup> | 1940    | 1941    |
|---------------------|---------------|---------------|-------------------|---------|---------|
|                     | Kroner        | Kroner        | Kroner            | Kroner  | Kroner  |
| Imports (foreign)   | 1,292,717,000 | 1,192,650,000 | 1,261,835,000     | 709,000 | 888,000 |
| Exports (Norwegian) | 823,258,000   | 786,529,000   | 808,172,000       | 442,000 | 446,000 |

<sup>1</sup> Preliminary figures.

Trade with different countries in 1937 and 1938 was as follows (in thousands of kroner):—

| Countries                       | 1937         |              | 1938                 |                      |
|---------------------------------|--------------|--------------|----------------------|----------------------|
|                                 | Imports      | Exports      | Imports              | Exports              |
|                                 | 1,000 Kroner | 1,000 Kroner | 1,000 Kroner         | 1,000 Kroner         |
| Sweden                          | 138,379      | 66,148       | 137,083              | 69,241               |
| Denmark                         | 58,727       | 29,498       | 41,740               | 38,972               |
| Russia                          | 15,844       | 1,684        | 19,257               | 9,574                |
| Germany                         | 219,067      | 107,481      | 219,781 <sup>1</sup> | 121,509 <sup>1</sup> |
| Switzerland                     | 9,927        | 5,142        | 11,984               | 6,871                |
| Netherlands                     | 32,637       | 27,868       | 38,713               | 20,731               |
| Belgium                         | 56,382       | 33,650       | 41,766               | 26,296               |
| Great Britain and North Ireland | 236,472      | 206,997      | 198,295              | 198,901              |

### Shipping and Navigation.

The total registered Norwegian mercantile marine on January 1, 1940, was as follows:—Sailing: 64 vessels, 5,000 gross tons; steam: 1,590 vessels, 1,758,000 gross tons; motor: 2,737 vessels, 3,083,000 gross tons; total:

4,391 vessels, 4,846,000 gross tons (steam and motor vessels above 25 and sailing vessels above 50 gross tons).

### Communications.

On June 30, 1938, the length of public roads in Norway was 25,720 miles. The length of State Railways on June 30, 1938, was 2,373 miles; of private companies 99 miles; total 2,472 miles; 1,897 miles have a gauge of 4ft. 8½in.; 533 miles, 3ft. 6in.; 14 miles, 3ft. 3½in.; 35 miles, 2ft. 5½in. Total receipts year ending June 30, 1938: State railways, 85,184,000 kroner; companies, 2,869,000 kroner. Total expenses (interest on capital excluded): State railways, 94,559,000 kroner; companies, 2,811,000 kroner. Goods carried: State railways and companies, 13,264,000 metric tons. Passengers carried: State railways and companies, 21,822,000. On 209 miles of State and 26 miles of private railways electric power is installed.

The following are the postal statistics:—

|                                   | 1934        | 1935        | 1936        | 1937        | 1938        |

<sup>1</sup> Including registered letters.

Length of telegraph and telephone lines and wires, June 30, 1938: 37,152 miles of line, 762,166 miles of wires (State, 24,172 and 540,392 miles respectively). Number of paid messages on the State lines, 3,907,800. Number of telephone conversations on trunk lines, 17,595,500. State telegraph offices, 3,037; receipts, 39,595,000 kroner; expenses, 35,739,000 kroner (interest on capital included).

The Government possesses 138 wireless telegraph and telephone stations, of which 2 are at Svalbard, 1 at Jan Mayen, 1 at Bjørnøya, and 1 at Myggbukta on East Greenland.

### Currency, Credit and Banking.

On December 31, 1938, the nominal value of the coin in circulation was: 26,668,000 kroner. Gold coin which is not in circulation excluded.

There is no Government paper money.

The 'Norges Bank' is a joint-stock bank, of which, however, a considerable part is owned by the State. The bank is, besides, governed by laws enacted by the State, and its directors are elected by the Storting except the president and vice-president of the head office, who are nominated by the King. It is the only bank in Norway that is authorised to issue bank notes for circulation. The balance-sheets of the bank for February, 1940, show the following figures: bullion, 120,049,000 kroner; gold abroad and foreign bills, 154,921,000 kroner; notes in circulation, 560,091,000 kroner; deposits, 109,169,000 kroner; loans and discounts, 326,023,000 kroner; securities, 138,844,000 kroner.

At the end of 1938, there were 105 private joint-stock banks in free operation. The total amount of capital and funds possessed by these banks was 253,316,000 kroner (capital 176,464,000, funds 76,852,000).

Deposits amounted to 1,010,940,000 kroner, of which 142,508,000 kroner were deposits on demand, and 868,432,000 kroner deposits on time.

The number of savings-banks at the end of 1938 was 608. The total amount of the funds of the savings-banks amounted to 275,871,000 kroner, and total deposits 1,971,140,000 kroner, of which 24,650,000 kroner were on demand, and 1,946,490,000 kroner on time. The number of depositors on demand was 2,257,877.

As from January 1, 1925, all private joint-stock banks must be chartered by royal licence. Their operations are regulated, to a considerable extent, by the law, and controlled by the Ministry of Finance.

### Money, Weights and Measures.

By a treaty signed October 16, 1875, Norway adopted the same monetary system as Sweden and Denmark. The Norwegian krone, of 100 öre, is of the value of 1s. 1½d. at par, or about 18 kroner to the pound sterling. The gold 20-kroner piece weighs 8.960572 grammes, .900 fine containing 8.0645 grammes of fine gold. The standard of value is gold. National Bank notes of 5, 10, 50, 100, 500, and 1,000 kroner are legal means of payment, and the Bank is ordinarily bound to exchange them for gold on presentation. By a Royal Decree of September 27, 1931, the gold standard was suspended and there was placed an embargo on gold.

As a result of the German occupation *Reichskreditkassenscheine* and *Reichskreditkassenmünzen* are also legal tender.

The metric system of weights and measures is obligatory.

### SPITSBERGEN, BEAR ISLAND, AND ADJACENT ISLANDS (SVALBARD).

An archipelago situated between 10° and 35° longitude east of Greenwich and between 74° and 81° latitude north. The distance from Norway to Bear Island is 240 miles, and to Spitsbergen (South Cape) 360 miles.

It is claimed that in all probability the archipelago was discovered by Norwegians in 1194 and re-discovered by the Dutch navigator Barents in 1596. The English explorer Henry Hudson visited Spitsbergen in 1607. In the 17th century a very lucrative whale-hunting was started and for some time there were Dutch, British, and Norwegian claims to sovereignty and quarrels about the hunting-places. But when in the 18th century the whale-hunting ended, the question of the sovereignty of Spitsbergen lost its actuality, and it was not until the beginning of this century that the question was again raised, owing to the discovery and exploitation of rich coalfields. It was settled by a Treaty, signed on February 9, 1920, at Paris, in which Norway's sovereignty over the archipelago was recognised. On August 14, 1925, the archipelago was officially taken possession of by Norway.

Total area about 24,294 square miles. The chief islands are West Spitsbergen or Mainland, North East Land (about half the former), Prince Charles Foreland, Edge Island, Barents Land, King Karl's Land, Hope Island, and Bear Island (area, 68.75 sq. miles). The climate is essentially arctic, tempered by the Gulf Stream.

Coal is the principal product. There are six mining camps inhabited all the year round. Population during the winter 1938-39, 2,210. In 1932, 257,120 metric tons of coal were exported; in 1933, 353,943; in 1934, 453,841; in 1935, 634,819; in 1936, 703,676; in 1937, 745,000, and in 1938, 608,000.

U.K. exports to Spitsbergen in 1938 (Board of Trade returns), 3541.

### JAN MAYEN ISLAND.

This is a bleak and desolate island between Greenland and Northern Norway, and about 300 miles north of Iceland. It is 34 miles long and its greatest breadth is 9 miles. The total area is about 144 square miles. It is of volcanic origin and is mountainous, Beerenberg in the north reaching a height of 8,350 ft. It is uninhabited, but is occasionally visited by seal hunters, whalers, and fishermen. In 1921 the Norwegian Meteorological Institute established a weather forecast station there, and the decision of the Norwegian Government to annex the island was largely due to this action.

The island was discovered by Henry Hudson in 1607, and it was first named Hudson's Tutches (Touches). It was again and again rediscovered and renamed. Its present name was taken from that of a Dutch navigator of the early 17th century, whose claim to have visited the island cannot be substantiated. For the period of a year (1882-83) an Austrian station for scientific observations was maintained there. On May 8, 1929, Jan Mayen Island was officially proclaimed as incorporated in the Norwegian State, and at the same time the manager of the meteorological station on the island was invested with magisterial authority. The final relation to Norway was settled by law of February 27, 1930. Norwegian sovereignty over the island has been officially recognised by the British Government.

### BOUVET ISLAND.

This uninhabited island in the Southern Atlantic was discovered in 1739 by a Frenchman, Pierre Bouvet, but no flag was hoisted till, in 1825, Captain Norris raised the Union Jack. A neighbouring island, Thompson Island, has been reported but its existence is seriously doubted. In 1928 a diplomatic dispute arose between Great Britain and Norway as to the claim to Bouvet, particularly in connection with the occupation since December, 1927, by a Norwegian whaling expedition, and the Norwegian decision to erect a wireless station on the island, and Great Britain decided in November, 1928, to waive its claim. By law of February 27, 1930, it is stated that Bouvet Island belongs to Norway as a dependency. The area is about 22 square miles.

### PETER I ISLAND.

This uninhabited island in the Antarctic Ocean was discovered in 1821 by the Russian explorer, Admiral von Bellinghousen, who got a sight of it at a distance. The first landing was made in 1929 by a Norwegian expedition which hoisted the Norwegian flag and took possession of the island. On April 23, 1931, Peter I Island was proclaimed as incorporated in the Norwegian State. The area is about 94 square miles.

### NORWEGIAN ANTARCTIC CONTINENT DEPENDENCY.

On January 14, 1939, the Norwegian Cabinet resolved to place that part of the Antarctic Continent from the border of Falkland Islands dependency in the west to the border of the Australian Antarctic dependency in the east (between 20 deg. west and 45 deg. east) under Norwegian sovereignty. The territory is explored only by Norwegians and has hitherto been ownerless.

### Diplomatic Representatives.

#### 1. OF NORWAY IN GREAT BRITAIN.

*Ambassador Extraordinary and Plenipotentiary in London.*—Erik Andreas Colban (appointed May 16, 1934).

*Counsellor.*—Ingwold Smith-Kielland.

ment. On February 7, 1942, Quisling issued a decree abolishing the Constitution and making himself virtual dictator.

Early in November, 1944, Russian armies liberated parts of north Norway from German occupation.

*German Commissioner in Norway.*—Joseph Terboven (appointed April 24, 1940).

## II. LOCAL GOVERNMENT.

The administrative division of the country is into twenty districts, each governed by a chief executive functionary (*Fylkesmann*), viz., the town of Oslo and Bergen, and 18 *Fylker* (counties). There are 43 municipalities, 24 towns, and 682 rural communes (*Herreder*), mostly parishes or sub-parishes (wards). The government of the Herred is vested in a body of representatives (from 12 to 48), and a council (*Fornannskap*), elected by and from among the representatives, who are four times the number of the 'Fornannskap'. The representatives elect conjointly every third year (from 1946 every fourth year) from among the 'Fornannskap' a chairman and a deputy chairman. All the chairmen of the rural communes of a Fylke form with the Fylkesmann the Fylkesting (county diet), which meets yearly to settle the budget of the Fylke. The municipalities and the towns form 65 communes, also governed by a council (5 to 21), and representatives (four times the size of the council). The members of the local governing bodies are elected under the same conditions as those of the Storting. Since 1910 women are entitled to vote and to be elected under the same conditions as men.

## Area and Population.

### I. PROGRESS AND PRESENT CONDITION.

| Fylker           | Area: English square miles | Census Population Dec. 1, 1920 | Census Population Dec. 1, 1930 | Pop. per square mile 1930 |
|------------------|----------------------------|--------------------------------|--------------------------------|---------------------------|
| Oslo (town)      | 6.3                        | 258,483                        | 253,124                        | 40,178.41                 |

| Sogn og Fjordane | 7,135.1                    | 90,114                         | 91,808                         | 12.87                     |
| Møre og Romsdal  | 5,811.7                    | 159,391                        | 165,064                        | 28.40                     |
| Sør-Trøndelag    | 7,241.4                    | 166,797                        | 174,946                        | 24.16                     |
| Nord-Trøndelag   | 8,659.1                    | 89,221                         | 96,016                         | 11.09                     |
| Nordland         | 14,727.9                   | 173,826                        | 186,920                        | 12.69                     |
| Troms            | 10,005.5                   | 90,750                         | 97,467                         | 9.74                      |
| Finnmark         | 18,580.6                   | 44,190                         | 53,308                         | 2.87                      |
| Total            | 124,556.4                  | 2,649,775                      | 2,814,194                      | 22.59                     |

In 1930, 2,013,680 were domiciled in rural districts, and 800,514 in towns; there were 1,371,919 males, and 1,442,275 females.

According to provisional figures, the population at the end of 1939, totalled 2,937,000.

Conjugal condition of the domiciled population, 1930:—

|         | Unmarried | Married | Widowed or Divorced |
|---------|-----------|---------|---------------------|
| Males   | 841,550   | 473,650 | 56,719              |
| Females | 847,088   | 476,248 | 118,939             |

The distribution of the population according to professions in 1930, showed 838,848 (29.9 per cent.) dependent on agriculture, forestry and gardening; 774,031 (27.6 per cent.) on industry; 285,555 (10.1 per cent.) on trading; 272,805 (9.6 per cent.) on transportation; 196,772 (7 per cent.) on fishery and whaling; 155,257 (5.5 per cent.) on public administration and liberal professions.

## II. MOVEMENT OF THE POPULATION.

### *Births, Deaths and Marriages.*

| Year | Marriages | Births (exc. still-born) | Stillborn | Illegitimate, living | Deaths (exc. still-born) | Excess of Births |
|------|-----------|--------------------------|-----------|----------------------|--------------------------|------------------|
| 1927 | 28,959    | 48,808                   | 1,003     | 2,769                | 80,217                   | 13,591           |
| 1928 | 24,385    | 45,819                   | 1,030     | 2,716                | 29,211                   | 16,108           |
| 1929 | 25,926    | 46,919                   | 1,022     | 2,793                | 29,539                   | 17,350           |

<sup>1</sup> Provisional figures.

## III. PRINCIPAL TOWNS.

At the census taken December 1, 1930, the number of towns with a population of above 100,000 was one, above 20,000 five, above 10,000 eighteen, above 5,000—twenty-eight in all. The population of the principal towns was:—

|                     |         |              |        |          |        |
|---------------------|---------|--------------|--------|----------|--------|
| Oslo <sup>1</sup>   | 253,124 | Aalesund     | 18,350 | Tönsberg | 11,997 |
| Bergen <sup>2</sup> | 98,308  | Haugesund    | 17,166 | Horten   | 10,768 |
| Trondheim           | 54,458  | Skien        | 15,596 | Larvik   | 10,471 |
| Stavanger           | 46,780  | Kristiansund | 14,646 | Arendal  | 10,351 |
| Drammen             | 25,493  | Fredrikstad  | 14,053 | Halden   | 10,387 |
| Kristiansand        | 13,781  | Sarpsborg    | 12,392 | Tromsø   | 10,336 |

December 1, 1938 (estimated): 275,000.

<sup>2</sup> December 1, 1938 (estimated): 106,500.

As from January 1, 1925, the name of the capital, Kristiania, was changed to Oslo.

## Religion and Education.

The evangelical Lutheran religion is the national Church and the only one endowed by the State. Its clergy are nominated by the King. All religions are tolerated, but Jesuits are, according to the Constitution, not admitted into the country. Ecclesiastically Norway is divided into 7 *Bispedømmer* (bishoprics), 91 *Prostier* (provostships or archdeaconries), and 522 *Prestegjeld* (clerical districts). In 1930 there were 91,459 dissenters, including 2,827 Roman Catholics, 248 Greek Catholics, 12,207 Methodists, 7,788 Baptists, 3,325 Adventists, 667 Mormons, 81 Quakers, and 1,359 of Mosaic Confession. The Roman Catholics are under a Vicar Apostolic resident at Oslo.

Education is compulsory, the school age being from seven to fourteen. In 1937-38 (the latest date for which there are statistics) there were in the country 5,704 public elementary school districts with 278,080 pupils, and in the towns 74,912 pupils; the amount expended on both being in 1936-37 72,219,000 kroner, of which 33,713,000 kroner were granted by the State, the rest being provided locally. Teachers' colleges had in 1938-39 529

**Commercial Counsellor.**—Johan Georg Baeder.  
**First Secretary.**—Jørgen Magnus Finne-Grønn.  
**Military Attaché.**—Major-General Oscar Sigvald Strugstad, C.B.E.  
**Naval Attaché.**—Captain J. E. Jacobsen, O.B.E.  
**Air Attaché.**—Lt.-Col. Adolf Bjarne Øen, O.B.E.  
**Consul General.**—G. K. Conradi.

There are consular representatives in Cardiff, Glasgow, Hull, Leith, Manchester, Newcastle, and many other places.

## 2. OF GREAT BRITAIN TO THE NORWEGIAN GOVERNMENT IN LONDON.

As Norway is in enemy occupation British Diplomatic Representatives are not maintained there, but there is a British Minister accredited to the Norwegian Government in London.

**Ambassador Extraordinary and Plenipotentiary.**—Sir Laurence Collier, K.C.M.G. (appointed May 8, 1941).

## PANAMA.

(REPÚBLICA DE PANAMA.)

**Government.**—Panama, formerly a department of the Republic of Colombia, asserted its independence on November 3, 1903, and the *de facto* Government was on November 13 recognized by the Government of the United States, and soon afterwards by the other Powers. In 1914, Colombia, in the Treaty of Bogota entered into with the United States, agreed to recognize the independence of Panama. This Treaty was ratified by the United States and Colombia in 1921, and on May 8, 1924, diplomatic relations between Colombia and Panama were established.

On March 2, 1936, a new Treaty between the United States and Panama, ratified by the United States Senate on July 25, 1939, annulled the old provision by which the United States 'guaranteed the independence of Panama' but permitted the United States, in the event of war, to defend the canal in any way necessary.

The new Constitution, which came into force on January 2, 1941, continues the existing provisions for a National Assembly of 32 members. The deputies mandate has been extended from 4 to 6 years (one for every 20,000 inhabitants; Provinces with fewer may elect 1 deputy). The Assembly meets biennially on January 2. The term of the President of the Republic, elected by direct vote, has been extended from 4 to 6 years, and he is not eligible for the succeeding term.

Panama declared war against Japan on December 7, 1941 (ratified on

December 10), and against Germany and Italy on December 12 (ratified on January 12, 1942).

**Provisional President of the Republic.**—Señor Ricardo Adolfo de la Guardia (born March 14, 1899; assumed office October 9, 1941, by a successful coup d'état, deposing Dr. Arnulfo Arias).

In December, 1944, he suspended the Constitution and announced that a Constitutional Convention, to be elected in May, 1945, would draft a new Constitution.

There are three Vice-Presidents, chosen by the National Assembly, and a Cabinet of six Ministers.

**Area and Population.**—Extreme length is about 480 miles; breadth between 37 and 110 miles; coast line, 477 miles on the Atlantic and 767 on the Pacific; total area is 28,576 square miles; population (excluding the Canal Zone) according to the September, 1940, census was 622,576, of whom 68,897 were white, 82,871 Negroes, 55,987 native Indians (who live in tribes), 3,882 Orientals and 406,814 mestizos or mixed, and 4,125 of other race groups. In 1940 the civil population was 566,589, excluding the Indian population. There are approximately 30,000 British subjects on the Isthmus, chiefly coloured people from the West Indies. The new Constitution prohibits the immigration of negroes whose original language was not Spanish, members of the yellow races and of the original races of India, Asia Minor and Northern Africa. The official language is Spanish. There are now 7 provinces with populations (1940, Indians excluded) as follows (the capitals in brackets):—Bocas del Toro (Bocas del Toro), 9,731; Chiriquí (David), 92,071; Coclé (Penonomé), 59,994; Colón (Colón), 57,297; Los Santos (Chitré), 91,286; Panama (Panama City), 176,021; Veraguas (Santiago), 80,189. The capital, Panama City, founded in 1519, on the Pacific coast, had (1940) 111,893 inhabitants, and Colón on the Atlantic coast (1940) 44,393. Smaller ports on the Pacific are Aguadulce, Pedregal, Montijo, Puerto Mutis and Puerto Armuelles; on the Atlantic, Bocas del Toro, Portobello and Mandinga.

**Religion.**—The 1940 census showed that 93 per cent. of the population was Catholic and 6 per cent. Protestant. In the Canal Zone Protestantism chiefly prevails.

**Education.**—Elementary education is obligatory for all children from 7 to 15 years of age. The Government maintains 648 primary schools throughout the provinces (13 of which are for native Indians, which function under the Ministry of Government and Justice), and 65,247 (1,040 Indian) children, excluding children enrolled in the Canal Zone public schools, received free instruction in 1943-44 from 2,025 teachers. Only 45 primary schools are in cities; the remaining 603 are in rural districts. The 12 public secondary schools have (1943-44) 5,417 students. Panama has a college for higher instruction for boys (Instituto Nacional), with 1,081 students in 1944, a secondary school for girls with 397 students; a professional school for young women with 795 students, and a school of crafts and trades for 1,021 boys from 14 years of age, and a trades school for 164 girls. A new normal school opened at Santiago in 1938 accommodates 769 students of both sexes. The National University of Panama at Panama City, inaugurated on October 7, 1935, had a total enrolment (July 1, 1944) of 843 students in the schools of law, science, and other professional subjects.

**Justice.**—The laws were codified and promulgated in 1916 and 1917. These codes—civil, penal, commercial, judicial, administrative, fiscal and

mining—are being revised to meet modern conditions. The death penalty has never existed. The Supreme Court consists of 5 justices appointed by the executive, one every 2 years to serve for 10 years.

**Finance.**—All the revenue collected on importations into the Republic belongs to the Panamanian Government; the United States have the right to import into the Zone supplies of all descriptions required for canal construction, maintenance and protection and for the use of their employees free of all taxes.

Expenditures and revenues are on a biennial basis, for two calendar years beginning January 1, 1933. For recent years budget estimates have been as follows (1 balboa = 1 dollar U.S.):—

|             | 1935-36               | 1937-38               | 1939-40               | 1941-42               | 1943-44               |
|-------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| Revenue     | Balboas<br>15,319,447 | Balboas<br>18,813,700 | Balboas<br>22,795,000 | Balboas<br>30,127,977 | Balboas<br>39,278,714 |
| Expenditure | Balboas<br>15,319,447 | Balboas<br>18,813,700 | Balboas<br>22,795,000 | Balboas<br>30,127,977 | Balboas<br>39,278,714 |

For the year ending December 31, 1943, actual revenue amounted to 27,567,900 balboas, whilst expenditure was 26,642,600 balboas.

The chief items of revenue were (in thousands of dollars) import duties and consular fees, totalling 7,842; internal taxes, 8,811; charity taxes (including National Lottery) 6,165; and other receipts, 3,072. Largest single source of revenue was the National Lottery (5,920,822 balboas), followed by income tax, 2,290,892 balboas. The expenditures included 4,140 for public safety; health and public works, 7,146; education, 3,640; Treasury, 1,251; debt service, 2,083 (of which 891 were for external and 1,191 for internal debt).

The revenue, under the treaty signed at Washington on March 2, 1936, includes an annual subsidy of 430,000 balboas or dollars (equivalent to 250,000 old gold dollars as originally provided in the treaty of 1903) from the United States so long as the latter maintains and operates the Canal; payments, in arrears since 1933, were resumed with the ratification of the new treaty on July 25, 1939.

The public debt on December 31, 1943, amounted to 20,448,390 balboas or dollars, consisting of an internal debt of 2,279,899 dollars and a consolidated foreign debt of 18,168,490 dollars, represented by four different bond issues and a loan from the Export and Import Bank of Washington for the construction of the Chorrera-Rio Hato highway. (A treaty ratified by the U.S. Senate on April 26, 1943, agreed to the refunding of this loan). With the ratification in 1939 of the 1936 treaty with the United States, Panama received the former arrears of 2,150,000 dollars, permitting Panama to resume payments on its own foreign debt. An agreement was reached in 1941 reducing the external debt by 3,046,891 dollars and the cost of servicing from 806,790 to 576,869 dollars. American direct investments in miscellaneous enterprises outside the Canal Zone amounted in 1940 to 36,815,000 dollars; American holdings of Panamanian dollar bonds on December 31, 1941, were 12,300,000 dollars, of which 61.8 per cent. were in default.

The Republic has no army or navy to support, but in view of the war emergency during 1942 the nucleus of a cadet force and a militia was formed with the assistance of United States officers. The National Police Force numbers 150 officers and 2,000 men. In 1941 the Republic granted

air and anti-aircraft bases to the United States for the defence of the Canal Zone.

**Production.**—Of the whole area about five-eighths are unoccupied, and of the remainder only a small part is cultivated, though the land is rich in resources. The most important product is bananas, the exports of which, almost wholly to the United States, are declining, amounting, in 1943, to 945,251 stems valued at 754,793 dollars (1941, to 5,399,433 stems). Other products, with exports in 1943, are cocoa (2,789,103 kilos), abaca fibres (1,331,187 kilos) and abaca seeds (16,413,427 kilos). Export of coconuts was banned in 1942. Rubber in the form of caucho blanco, negro, cauchillo, goma de balata o leche de nispero was prominent up to 1925. Since then exports have been very small; 36,256 kilos were sent to United States in 1943. The 1941 rice crop was estimated at 950,538 quintals; the 1942 crop at 1,356,892 quintals. Beer production (national monopoly), in 1942, amounted to 23,730,212 litres. Other liquor production, 1942, including whisky, rum, 'seco,' anise, gin, etc., was 3,850,024 litres. Coffee (about 500,000 bushes) is grown in the province of Chiriqui, near the Costa Rican frontier; the home market consumes almost the entire output. Other products of the soil of Panama are mahogany and other woods, notably copaiba, sarsaparilla and ipecacuanha. The country has great timber resources. Sugar growing (about 80,000 bags of 100 lb. each produced annually) is assuming importance. Cattle rearing (333,960 head in 1942) is carried on successfully, and hides (8,546 in 1942) are among minor articles of export. Concessions are held for the planting of rubber, abaca and bananas.

Pearl fishing is carried on at the Pearl Islands in the Gulf of Panama.

**Commerce.**—The imports and exports (excluding re-exports), for six calendar years are as follows (1 balboa = 1 dollar, U.S.) :—

| Year | Imports    | Exports   | Year | Imports    | Exports   |
|------|------------|-----------|------|------------|-----------|
|      | Balboas    | Balboas   |      | Balboas    | Balboas   |
| 1938 | 17,651,454 | 3,743,968 | 1941 | 32,917,892 | 4,283,145 |
| 1939 | 20,463,765 | 3,487,378 | 1942 | 37,928,071 | 2,229,079 |
| 1940 | 23,936,657 | 4,054,866 | 1943 | 40,267,592 | 1,971,085 |

The heavy adverse balance is met by invisible exports such as the expenditures of Canal Zone employees, United States army and navy personnel and tourists. Its excellent bazaars, which undersell those of neighbouring countries, draw an extensive cash trade. A law of October, 1941, placed virtually all retail trade in the hands of Panamanians.

Of the total imports (1942) 28,719,323 balboas or 75·7 per cent. came from the United States, which also took 98 per cent. of the exports, valued at 2,204,268 balboas.

Total trade between Panama (including Canal Zone) and the United Kingdom (Board of Trade returns) for 5 years :—

|                                | 1934    | 1935    | 1936    | 1937    | 1938    |
|--------------------------------|---------|---------|---------|---------|---------|
|                                | £       | £       | £       | £       | £       |
| Imports from Panama to U.K.    | 20,208  | 21,620  | 29,605  | 33,529  | 17,990  |
| Exports to Panama from U.K.    | 442,279 | 297,310 | 368,812 | 428,496 | 459,059 |
| Re-exports to Panama from U.K. | 8,764   | 10,449  | 16,751  | 12,337  | 12,454  |

United Kingdom exports (Board of Trade returns) to Panama (including the Canal Zone) since 1938 have been: 1939, 315,000l.; 1940, 403,000l.; 1941, 358,000l.; 1942, 228,000l.; 1943, 209,000l.; 1944, 126,000l. Totals for the 3 years, 1939–41, include shipments of war supplies, if any, by Government departments.

**Shipping, Communications.**—All the international maritime traffic for Colón and Panama now runs through the Canal Zone ports of Cristobal and Balboa; Bocas del Toro is used for both the provincial and international trade. The port of Puerto Armuelles, opened in 1928, provides an outlet for bananas from plantations on the Pacific Coast. Shipping under Panamanian registry has increased during the war. It totalled on December 31, 1942, 326 ocean-going vessels of 1,342,072 gross tons.

The Panama Railroad, which connects Panama City on the Pacific with Colón on the Atlantic, is the principal railway in the country. It is 47·61 miles long and, with the exception of the termini at Panama and Colón, passes through Canal Zone territory. As most vessels unload their cargo at Cristobal (Colón), the greater portion of the merchandise destined for Panama City is brought by the Panama Railroad. In the Province of Chiriqui there is a narrow gauge railway, 32 miles long, connecting the port of Pedregal with Boquete, and passing through David, the provincial capital. Between David and La Concepción there is a line 18 miles long, which has now been extended to the Port of Puerto Armuelles. In Bocas del Toro, between Almirante and Guabito (property of the United Fruit Company), railway service is provided up to El Valle de Talamanea on the Costa Rican border.

There is at present a road from Panama City westward as far as the City of David. Work on its prolongation to the Costa Rican frontier is being expedited with the help of United States engineers as a war measure in order to form the Panamanian link in the highway from the United States to the Panama Canal.

Commercial aviation has developed rapidly in Panama. Daily air service, in both directions, connects Panama and David. Daily air mail and passenger services operate between Panama and New York City via Brownsville, Texas, or Miami, Florida, and connect with other countries of South and Central America. Passengers totalled 21,020 for year ending June 30, 1941; mails, 361,868 pounds.

There are telegraph cables from Panama to North American and Central and South American ports, and from Colón to the United States and Europe. There are 200 Government telephone stations (about 7,000 instruments in use), 45 telegraph offices and radio stations, some of which are operated by the Navy Department of the United States. There are now 10 radio broadcasting stations functioning in Panama.

**Money and Credit.**—The present monetary unit is the *balboa*, which is of the same size and fineness as the United States silver dollar and is equivalent in value to that coin. Other silver coins are the half-balboa (of 12·5 grammes ·900 fine, and equal to 50 cents, U.S.); the quarter and tenth of a balboa piece; nickel coins of 5 and 2½ cents; and copper coins of 1 cent. United States paper currency is widely used. Altogether 1,130,640 balboas of the new Panamanian silver currency had (1942) been placed in circulation.

Part of the 10,000,000 dollars (canal money) paid by the United States has been applied to public improvements in the several provinces, and 6,000,000 dollars have been invested in the United States, particularly in New York real estate.

English weights and measures are in general use as well as those of the metric system.

### The Panama Canal and the Canal Zone.

On November 18, 1903, a treaty between the United States and Panama was signed, providing facilities for the construction and maintenance of the inter-oceanic Canal. In this treaty, Panama granted in perpetuity the use, occupation and control of a zone (Canal Zone) five miles wide on each side of the Canal route, and within this zone the exclusive right to exercise sovereign power and authority. For the needs of the Panama Canal other territory was granted, including certain islands in Panama Bay. The cities of Panama and Colón remain under the authority of Panama, but certain jurisdiction was granted to the United States in both the cities and in their harbours in all that relates to sanitation and public health. In return for these grants the United States paid 10,000,000 dollars and 250,000 dollars yearly (beginning 9 years after the date of the treaty). The treaty was ratified on February 26, 1904, and in July, 1904, the agreement for the provisional delimitation of the boundaries of the United States territory on the Isthmus was signed. Later, in September, 1914, a boundary convention was signed. A new treaty, ratified by Panama in December, 1938, and by the United States on July 25, 1939, makes various concessions to Panama, increasing the annual payment to Panama to 430,000 balboas, and containing various provisions designed to remove sources of friction. In September, 1939, the President of the United States placed the Canal and the Zone under the control of the United States Army, and in January, 1942, he established American naval control over the Gulf of Panama and the maritime approaches to Cristobal.

*Governor of Panama Canal Zone.*—Lt.-General George H. Brett, as commander of the American troops in the Zone, is in complete control of the Canal and the Zone. Governor J. C. Meahaffey is in direct charge of the operations and civil government of the Panama Canal, subject to the supervision of Lt.-General George H. Brett.

The area of the Canal Zone, including land and water, but not including the water area within the 3-mile limit from the Atlantic and Pacific ends, is 552.8 square miles. The area of Gatun Lake, when its surface is at its normal elevation of 85 feet above sea level, is 163.4 square miles. The water area of the zone is 190.94 square miles.

The canal has a summit elevation of 85 feet above the sea. It is 50.72 statute miles in length from deep water in the Caribbean Sea to deep water in the Pacific Ocean, and from shore to shore is approximately 40½ miles. The channel ranges in width from 800 to 1,000 feet. The average bottom width of the channel is 649 feet, and the minimum 300 feet, with a minimum depth of 41 feet. The average time of passage through the canal is from 7 to 8 hours; the record passage is 4 hours 10 minutes. The maximum traffic capacity of the canal is estimated at 48 ships of usual size in a day or about 17,000 in a year.

The Gatun dam along the crest is 8,400 feet long, including the spillway, or over 1½ miles, and ½ mile wide at its greatest width. The crest of the dam is at an elevation of 105 feet above sea level, or 20 feet above the normal level of Gatun Lake, and 100 feet wide. The width of the dam at the normal water level of the lake, i.e., 85 feet above sea level, is about 388 feet. A concrete dam, 97½ feet long and 228 feet high, across the Chagres River at Alhajuela, was completed in 1935, creating Madden Lake, which at its

maximum level covers 22 square miles at 260 feet above sea level; this provides a reserve of 22 milliard cubic feet of water for maintaining the level of Gatun Lake during dry seasons. The length of the cut through the Continental divide (Culebra, now Gaillard Cut) is 8 statute miles. On July 1, 1940, construction was begun on a new set of locks located approximately parallel to the existing locks at Gatun, Pedro Miguel and Miraflores.

The civilian (only) population of the Canal Zone, according to the census of June 30, 1941, was 42,346, of whom 15,434 were Americans. The total force employed by the Canal and the Panama Railroad in June, 1941, numbered 7,260 on the 'gold roll' (chiefly Americans) and 25,994 on the 'silver roll' (chiefly natives of the tropics). No land in the zone is privately owned and the zone is, in effect, a Government-owned reservation dedicated to the operation, maintenance and protection of the canal and its appurtenances.

The gross capital investment for the construction, operation and maintenance of the canal to June 30, 1944, totalled 701,532,682 dollars, and the net investment, after depreciation, was 655,795,477 dollars, including 128,991,063 dollars interest on funds borrowed to construct the canal up to the opening on July 12, 1920. The net revenues, in excess of all operating expenses, but excluding any interest charges on the investments, have totalled 274,697,568 dollars since that date. This is a return of about 2½ per cent. on the net investment. There was a net deficit from tolls and other sources during the year ending June 30, 1944, of 5,367,631 dollars.

The canal was informally opened to commerce by the passage of the 9,000-ton steamer *Ancon* on August 15, 1914. The journey was made without mishap in ten hours. It was formally opened to commerce by proclamation of the President of the United States on July 12, 1920. The canal has been in use since 1914, except for various short periods in 1915 and from September 18, 1915, to April 15, 1916, when the channel was entirely blocked by slides in the banks of Gaillard Cut. There has been no appreciable interruption since January 11, 1917.

Particulars of the traffic through the Canal for 5 fiscal years (ending June 30, 1940, when publication ceased) are given as follows:—

| Fiscal year ending June 30 | Northbound<br>(Pacific to Atlantic) |             | Southbound<br>(Atlantic to Pacific) |             | Total   |             | Tolls levied<br>(in dollars) |
|----------------------------|-------------------------------------|-------------|-------------------------------------|-------------|---------|-------------|------------------------------|
|                            | Vessels <sup>1</sup>                | Cargo, tons | Vessels                             | Cargo, tons | Vessels | Cargo, tons |                              |
| 1936                       | 2,612                               | 18,256,044  | 2,770                               | 8,349,899   | 5,382   | 26,605,943  | 23,479,114                   |
| 1937                       | 2,522                               | 18,212,748  | 2,865                               | 9,895,632   | 5,387   | 28,108,380  | 23,102,137                   |
| 1938                       | 2,578                               | 17,697,364  | 2,946                               | 9,688,590   | 5,524   | 27,385,954  | 23,160,889                   |
| 1939                       | 2,757                               | 18,855,360  | 3,146                               | 9,011,267   | 5,903   | 27,866,627  | 23,961,021                   |
| 1940                       | 2,607                               | 17,479,416  | 2,768                               | 9,819,600   | 5,375   | 27,299,016  | 21,144,675                   |

<sup>1</sup> I.e. Ocean-going commercial vessels, over 300 net tons Panama Canal measurements, excluding Canal vessels and launches, and U.S., Panamanian and Colombian Government vessels.

Total traffic for the year 1941 comprised 4,727 transits carrying cargo amounting to 24,950,791 long tons and paying tolls of 18,157,740 dollars.

Of the total number of commercial transits of the Canal during the year ended June 30, 1940, 1,997 were American, 1,073 British, 557 Norwegian, 345 Dutch, 272 Japanese, 243 Panamanian, 175 Greek, 174 Danish, 110 Swedish, 93 French, and the remaining 386 of 19 other nationalities. Total commercial transits, 5,370.

## Diplomatic and Consular Representatives.

## 1. OF PANAMA IN GREAT BRITAIN.

*Envoy and Minister.*—(Vacant, March, 1945.)

*Chargé d'Affaires and Consul-General* (in London).—Dr. Demetrio A. Porras.

*Commercial Attaché.*—Eusebio A. Morales.

There are consular representatives in Birmingham, Cardiff, Grimsby, Liverpool and Newcastle-on-Tyne.

## 2. OF GREAT BRITAIN IN PANAMA.

*Envoy Extraordinary and Minister Plenipotentiary.*—Stanley Gordon Irving, C.M.G. (appointed September 11, 1943; is also Minister to Costa Rica).

*Naval Attaché.*—Rear-Admiral Herbert Pott, M.V.O., R.N.

*Assistant Naval Attaché.*—Commander Leopold Edward Rebbeck, R.N.

*Military Attaché.*—Colonel Kenneth MacKessack.

*Air Attaché.*—Wing-Commander H. G. D. Devay.

*Consul for the Republic and Canal Zone* (with rank of *First Secretary*).—W. K. Smith.

There is a Vice-Consul at Colón, Panama and Bocas del Toro.

## PARAGUAY.

(REPÚBLICA DEL PARAGUAY.)

## Constitution and Government.

THE Republic of Paraguay gained its independence from Spanish rule in 1811, and after a short government by two consuls, the supreme power was seized, in 1815, by Dr. José Gaspar Rodríguez Francia, who exercised autocratic sway as dictator till his death, September 20, 1840. Subsequently, in 1844, a new Constitution was adopted providing for the election of a President. President López, in 1864, began a dispute with the Government of Brazil, which resulted in the entry of a Brazilian army, aided by forces of the Argentine Confederation and Uruguay, into the Republic, June, 1865. After a struggle of five years, in which Paraguay lost probably 500,000 men, López was killed at Cerro Corá, March 1, 1870, in the last battle of the war. Argentina in August, 1942, and Brazil in May, 1943, voided the reparations debt imposed upon Paraguay which Paraguay had never paid.

Under the old Constitution of 1870 the President was elected for four years, but see below. The following is a list of Presidents since 1898, with the date on which each took office:—

Don Emilio Aceval—Nov. 25, 1898.\*

Don Hector Carvallo—Jan. 9, 1902.\*

Don Juan E. Acuña—Nov. 25, 1902.

Don Juan G. Zona—Oct. 18, 1904.\*

Dr. Don Cecilio Báez—Dec. 8, 1905.\*

Dr. Don Bernardino Ferreira—Nov. 25, 1906.

Don Emiliano González Navero—July 5, 1908.\*

Don Manuel Gondra—Nov. 25, 1910.

Col. Don Albino Jara—Jan. 11, 1911.\*

Don Liberato Marcial Rojas—July 6, 1911.\*

Dr. Don Pedro Peña—Feb. 29, 1912.\*

Don Emiliano González Navero—Mar. 22, 1912.\*

Don Eduardo Schaerer—Aug. 15, 1912.

Dr. Don Manuel Franco—Aug. 15, 1916.\*

\* Died Jan. 9, 1902.

\* Succeeded as Vice-President.

\* Deposed Feb. 17, 1936.

Dr. Don José Montero—June 7, 1916.\*

Don Manuel Gondra—Aug. 15, 1920.

Dr. Don Félix Paiva—Oct. 31, 1921.\*

Dr. Don Eusebio Ayala—Nov. 3, 1921.\*

Dr. Don Eligio Ayala—April 1, 1923.\*

Dr. Don Luis Riart—April 12, 1924.\*

Dr. Don Eligio Ayala—Aug. 15, 1924.

Dr. Don José Guggiari—Aug. 15, 1928.

Don Emiliano González Navero—Oct. 26, 1931.\*

Dr. Don José Guggiari—Jan. 28, 1932.

Dr. Don Eusebio Ayala—Aug. 15, 1932.\*

Col. Rafael Franco—Feb. 18, 1936.\*

Dr. D. Félix Paiva—Aug. 15, 1937.

General José Félix Estigarribia—Aug. 15, 1939.\*

\* Provisional, i.e., following a coup d'état.

\* Died June 5, 1919.

\* Killed in aeroplane accident.

On December 31, 1941, the external debt of Paraguay was 15,272,422 gold pesos; the internal debt was 24,001,134 gold pesos. The total net cost of the war with Bolivia is estimated at 10,000,000 dollars, U.S. In 1936 proceeds of the export tax on *yerba maté* and hides were earmarked for service of the external debt. Paraguay agreed, beginning January 1, 1945, to resume service on the external sterling debt, in default since 1934; coupons in arrears were to be paid off at the rate of 7s. 9d. per £ nominal. Balance outstanding was 652,150£. British investments, end of 1944, were 2,842,150£., of which 47.1 per cent. was in default. American direct investments, 1940, were 5,037,000 dollars, compared with 12,615,000 dollars in 1939.

In 1942 Argentina cancelled the reparations imposed upon Paraguay following the war of 1865 to 1870 and amounting originally to some 300,000,000£.

### Defence.

The military establishment is about 100 officers and 2,800 men. The permanent organisations comprise 4 regiments of infantry, 1 regiment of cavalry, and 2 batteries of artillery. In the event of war, service is compulsory in the active Army for 2 years between the ages of 18 and 20; between 20 and 29 in the reserve of active Army; between 29 and 39 with national guard, and between 39 and 45 in the territorial guard.

The Navy consists at present of a flotilla of 2 armoured river gunboats of 745 tons (built in Italy) and 2 small converted merchant vessels, river craft armed with modern guns. The larger of the latter is about 370 tons gross register.

### Production and Industry.

The soil of Paraguay is productive and the climate suitable for many sub-tropical products. Much of the country is admirably suited to pastoral purposes. It is estimated that there are about 4,000,000 head of cattle in the country. There are four packing plants, encouraged by the Government; hides, jerked beef, corned beef and other animal products are exported. Annual output of hides is about 250,000 wet and 100,000 dry hides, plus about 120,000 hides from the packing plants. *Yerba maté*, or strong-flavoured Paraguay tea, which is a plantation product as well as a natural product of the virgin forests (covering from 25,000 to 30,000 square miles), with output (1940) of 21,024 metric tons, is one of the chief articles of export; exports, 1941, 8,863 metric tons. Heavy dark tobacco amounted to 7,953 metric tons. Timber resources of excellent quality are enormous. Paraguay produces in the Chaco region quebracho logs, of which a small tonnage is exported. The chief product is quebracho extract, output of which (1942) amounted to 49,079 metric tons; in 1941, 46,232 metric tons, of which 37,270 tons were exported. Fruit-growing, especially oranges, is general. Grape-fruit is now being grown for export to London where it arrives when supplies from other sources are lacking. Yaguaron is the chief source of petit-grain oil, distilled from the leaves of a bitter orange tree and used in the manufacture of many perfumes; it is now exported chiefly to the United States; exports, 1941, 199,487 kilos. About 25,000 acres are devoted to sugar cultivation, largely for the manufacture of spirit (sugar production, 1940, 12,494 metric tons), but far larger quantities are imported. Cane sugar production in 1941 was 491,890 metric tons. There are 10 sugar factories in Paraguay, the most important of which is at Tebicuari. 11,224 metric tons of rice were grown in 1940. Banana production (1941) was 5,426,796 stems. Harvest of peanuts, 1942, was 12,649 tons, producing 571 tons of peanut oil. Production (1941)

of mandioc amounted to 89,719 metric tons; sweet potatoes, 41,000 metric tons, mostly grown for local consumption. Agriculture is primitive, but the training of small-holders for settlement in rural colonies was expanded in 1942. About 134,000 acres are planted to maize; output in 1941, 45,021 metric tons. The cultivation of cotton of the American uplands type is encouraged by the authorities; it matures early and reaches the market when the American crop is scarce; production (1941) 42,422 metric tons. It is commonly sold, however, as Argentine cotton, chiefly to the United Kingdom; about 8,000 metric tons of cotton seed oil is produced annually. Lace-making, of the 'spider-web' variety, is a thriving industry.

Iron, manganese, copper, and other minerals are encountered in abundance. The Ibicuí iron mines were worked as early as 1863. The Quiquió and Ibicuí manganese mines contain ore deposits estimated at 60,000,000 tons. Copper has also been found at San Miguel, Concepción and Quiquió.

### Commerce.

The following is the value, in gold pesos, of the imports and exports (at par 1 gold peso = 1.63 dollars (U.S.), but of recent years it has been equal to about 59 cents (U.S.)) :—

|         | 1939                  | 1940                  | 1941                  | 1942                  | 1943                  |
|---------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| Imports | Gold pesos 12,740,449 | Gold pesos 14,894,543 | Gold pesos 12,187,843 | Gold pesos 17,164,000 | Gold pesos 21,058,864 |
| Exports | 16,001,345            | 11,385,104            | 15,153,149            | 16,540,000            | 20,245,408            |

Chief exports in 1941 included quebracho extract, valued at 2,906,895 pesos; canned meats, 3,389,616 pesos; salted hides, 1,698,070 pesos; yerba maté, 708,324 pesos; and cotton, 1,582,705 pesos. The most important imports were food, drink and tobacco, cotton goods and vehicles.

Of the total imports in 1943, goods to the value of 10,058,079 gold pesos came from Argentina; 4,516,972 from Brazil; 3,682,702 from the United States, and 1,277,279 from the United Kingdom. Exports to Argentina, 1943, 13,724,748 gold pesos; to United States, 1,501,332; to Great Britain, 3,014,950, and to Uruguay, 1,580,385.

The trade between Paraguay and the United Kingdom (Board of Trade returns) for 5 years was as follows :—

|                                  | 1934     | 1935      | 1936      | 1937      | 1938     |
|----------------------------------|----------|-----------|-----------|-----------|----------|
| Imports from Paraguay to U.K.    | £ 50,348 | £ 110,729 | £ 265,616 | £ 164,917 | £ 22,648 |
| Exports to Paraguay from U.K.    | 123,971  | 77,237    | 62,793    | 95,154    | 72,308   |
| Re-exports to Paraguay from U.K. | 1,036    | 2,089     | 5,201     | 1,304     | 714      |

United Kingdom exports (Board of Trade returns) to Paraguay since 1938 have been: 1939, 73,000£.; 1940, 86,000£.; 1941, 73,000£.; 1942, 83,000£.; 1943, 100,000£.; 1944, 52,000£. Totals for the 3 years, 1939-41, include shipments of war supplies, if any, by Government departments.

### Communications.

Paraguay is enclosed in the centre of the South American Continent, from 800 to 1,600 miles up La Plata River and its tributaries. The Paraguay River divides the country into two distinct parts and is navigable for 12-foot draft vessels as far as Concepción, 180 miles north of Asunción, and for

## PERSIA.

(IRÂN.)

### Reigning King (Shah).

On October 31, 1925, the Majlis, 'in the name of the national welfare,' proclaimed the deposition of the Shah, Sultan Ahmad and the overthrow of the Kajar dynasty. On December 13 the Constituent Assembly elected Riza Khan Pahlavi Shah of Persia, and made the Crown of Darius hereditary in his family. On December 15 the new Shah took the oath to defend the Constitution, and on December 16 he was publicly proclaimed. On September 16, 1941, Riza Shah abdicated and left the country. He died in Johannesburg on July 26, 1944. He was succeeded by his son, **Muhammed Riza Pahlavi** (born October 29, 1919), who was sworn before the Majlis on September 18, 1941. On March 15, 1939, the Shah married Princess Fawzieh, eldest sister of the King of Egypt. They have a daughter, born in 1940.

### Constitution and Government.

The form of government in Persia up to the year 1906 was, in its most important features, similar to that of Turkey. The Shah, within the limitations imposed by the Moslem religion, was an absolute ruler, but had to reckon with the power of the leading doctors of law (*Mujtahid*), who resided at Najaf and Kerbela in Mesopotamia. Unlike the Sultan of Turkey he had no religious standing. In 1905, the Persian people demanded representative institutions, and in January, 1906, the Shah gave his consent to the establishment of a National Assembly, or 'Majlis,' which sat from October, 1906, to June, 1908, and drew up a Constitution which received the Shah's approval on December 30, 1906.

The government of the country is in the hands of the Cabinet, which is responsible to the Majlis. The present Cabinet was appointed on August 30, 1944, as follows:—

*Prime Minister and Minister for Foreign Affairs.*—Muhammad Saad Maraghehi.

*Minister of Industry and Commerce.*—Dr. Muhammad Nakha'i.

*Minister of Finance.*—Ali Ashgar Zarinkafsh.

*Minister of the Interior.*—Muhammad Sururi.

*Minister of War.*—Major-General Muhammad Husain Firuz.

*Minister of Education.*—Baqir Kazimi.

*Minister of Communications.*—Mahmud Nariman.

*Minister of Justice.*—Allahyar Salih.

*Minister of Health.*—Manuchihr Iqbal.

*Minister of Posts and Telegraphs.*—Yusuf Mushar.

*Minister Without Portfolio.*—Khalil Fakimi.

The country is divided into 10 'ustâns,' each under an 'ustândâr. Each 'ustân' is subdivided into a number of 'shahristâns,' varying in size

and governed each by a 'farmândâr.' The 'shahristân' is in turn subdivided into 'bakhshes,' each under a 'bakshdâr'; and the 'bakhsh' into 'dehiâtâns,' each under a 'dehdâr.' This final subdivision consists of a village or group of villages. The number of 'shahristâns' is at present fixed at 49. All the above mentioned officials are appointed, directly or indirectly, by the central government.

Towns generally have a municipality, the director of which is nominated by the central government.

On January 29, 1942, a treaty of alliance was signed in Tehran between Great Britain, the U.S.S.R. and Persia. The British and Soviet Governments undertook to respect the territorial integrity, sovereignty and political independence of Persia.

On September 9, 1943, Persia declared war on Germany and on September 14 she joined the United Nations. On March 1, 1945, she declared war on Japan.

At the Tehran conference, November 27 to December 2, 1943, Mr. Churchill, President Roosevelt and Marshall Stalin issued a 'Declaration of the Three Powers concerning Iran,' dated December 1, 1943, pledging economic assistance to Persia both in the war period and in the period after the war.

Relations with Russia were regulated by the Treaty of Peace of February 26, 1921, and relations with Persia's other neighbours by the Non-aggression Pact of Saadabad of July 8, 1937, between Turkey, Iraq, Persia and Afghanistan.

### Area and Population.

Persia, which has an area of about 628,000 square miles, lies between 25° and 40° north latitude and between 44° and 63° 30' east longitude. A vast portion of this area is an absolute desert, and the population is everywhere so scanty as to approximate, on the average, 19 inhabitants to the square mile.

The total population of Persia has been estimated at between 15 and 18 millions, but, since the 35 largest towns contain only about 2½ millions, it is probable that the country's total population is less than 10 millions. It is estimated that the country contains some 3 million nomads.

The principal cities of Persia are:—Tehran and district, with a population, according to official figures of March 1, 1940, of 540,087; Tabriz, 214,000; Isfahan, 205,000; Meshed, 176,000; Shiraz, 129,000; Resht, 122,000; Hamadan, 104,000; Kermanshah, 89,000; Ardebil, 63,000; Yezd, 60,000; Kazvin, 60,000; Sultanabad, 55,000; Kerman, 50,000; Kashan, 45,000; Abadan, 40,000; Pahlavi, 37,000; Ahwaz, 30,000; Khorramshahr (Muham-merah), 30,000; Babal (Barfurush), 30,000; Kuni, 30,000.

### Religion.

The official religion of Persia is the *Ihnd-'Ashariyya*, which recognizes twelve Imâms or spiritual successors of the Prophet Mahomet. Of the total population, 850,000 are of the Sunni sect; 10,000 are Parsis (Gabrs), 40,000 Jews, 50,000 Armenians, and 30,000 Nestorians; there are also some other Christians, and 'Bahais,' whose number cannot, however, be estimated.

The Moslems of the sect called Shi'a differ to some extent in religious doctrine (especially in their rejection of the *Sunna* or traditional body of rules, as distinct from the actual text of the Koran), from the Moslems of the former Ottoman Empire, who are called Sunni. The power of the Persian priesthood has disappeared in recent years, as the result of the increased power

smaller vessels for a further distance of 600 miles northward. The Paraná River is navigable by large boats from Corrientes up to Puerto Aguirre, at the mouth of the Yguazu River. Boats of a few hundred tons capacity navigate the tributary rivers in Paraguay, the largest of which are the Tebicuary, south of Asunción, the Mahduvire, Jejuaguazu, and the Aquidabana rivers, north of Asunción.

Asunción, the chief port, is 950 miles from the sea. In 1937, 4,503 steam vessels, with an aggregate tonnage of 251,331 tons, entered at the port of Asunción, and 5,450 with a tonnage of 258,436 cleared. The principal companies engaged in the river service on the Paraguay and the Alto Paraná are the Argentine Navigation Company, Ltd., the controlling interest in which is British, and the Lloyd Brasileiro. All imports and exports for ocean shipment have to be transhipped at Montevideo or Buenos Aires.

There is a British-owned railway (the Paraguay Central Railway) from Asunción to Encarnación, on the Rio Alto Paraná. This railway has a total main-track length (1941) of 274 miles. There is now a through train service without break of bulk from Asunción to Buenos Aires. El Ferrocarril del Norte, owned by a Paraguayan company, runs from Concepción as far as Horqueta, a distance of 33 miles. This road is projected to run as far as Pedro Juan Caballero on the Brazilian border. Total length of railways, 713 miles. The country roads are in general mere bullock tracks, and transport is difficult. Highways, 1940, had a mileage of 3,759 miles. There are 29 miles of tramway lines. There are 3 air ports. Brazilian military planes carry mails between Asunción and Santos and Rio de Janeiro. The Paraguayan Air Force Command was authorized in 1944 to establish a government-owned aviation company with, initially, 5 aeroplanes.

The national telegraph (129 offices) connects Asunción with Corrientes and Posadas in the Argentine Republic, and thus with the outside world; total, 2,070 miles. Telephone lines, 1941, 5,322 miles; instruments, 3,800. Long-distance telephone communication with Posadas was established in 1932. Eight wireless telegraph stations have been erected. Wireless sets in use, 1941, numbered about 12,500. Paraguay joined the postal union in 1881; the number of post offices (1941) is 155.

### Money and Credit.

The unit of value in the guaraní, established on October 5, 1943, equal to 100 of the old paper pesos. The gold peso, which is no longer used, is nominally valued at 1.75 guaraníes. The latter is divided into 100 centimos, and is symbolized by the letter G with a line through it, similar to the dollar sign. At the then buying rate of 300 paper pesos per U.S. dollar, it was worth 33½ cents, U.S. The official rate established on November 8, 1943, was 3.072 guaraníes = 1 dollar (making 1 guaraní 32.55 cents) and 12.32 guaraníes = 1. Under the new law the Bank of the Republic is placed in charge of all paper and metallic currency.

The old unit of value was the gold peso, which had been based since 1923 on the Argentine gold peso. Actually there was no gold or silver current, and the paper peso (worth in 1942 three-tenths of 1 cent, U.S., or 5 pesos = 1 penny, U.K.) was the only circulating medium with the exception of nickel coins of ten and five pesos, aluminium coins of two pesos, one peso and fifty cents pieces.

For previous currency history, see THE STATESMAN'S YEAR-BOOK, 1943, p. 1162.

The National Bank of Paraguay (now called Banco del Paraguay) opened in March, 1943, with a gold stock of 20,000,000 pesos and foreign exchange

amounting to 2,115,000,000 against a note circulation of 2,287,000,000 pesos. On July 31, 1944, gold was 331,000,000 pesos (equal to 3,310,000 guaraníes), foreign exchange 2,490,000,000 pesos (24,900,000 guaraníes); while note circulation was 2,812,000,000 pesos (28,126,000 guaraníes). The bank has a savings section and a commercial section.

The other banks in Paraguay are a branch of the Bank of London and South America, Ltd.; the Banco Germanico de la America del Sud, the Banco del Hogar Argentino, and the Banco Agrícola. The last mentioned is practically a department of the Government, charged with agricultural development.

### Weights and Measures.

The metric system was officially adopted on January 1, 1901.

### Diplomatic and Consular Representatives.

#### 1. OF PARAGUAY IN GREAT BRITAIN.

Secretary of Legation.—Luis Franco.

There are Consuls at Glasgow, Birmingham, Cardiff, Liverpool and Southampton.

#### 2. OF GREAT BRITAIN IN PARAGUAY.

Envoy Extraordinary and Minister Plenipotentiary.—N. O. W. Steward, M.B.E. (January 13, 1944).

Military Attaché.—Lt.-Col. K. R. Stirling-Wyllie.

Air Attaché.—Air Commodore A. A. Walser, M.C., D.F.C.

was reported to have included 2,586,948,940 cigarettes of all kinds, 436,552 cigars, 2,078,553 pounds of water-pipe tobacco, 6,809,616 pounds of powdered pipe tobacco, 11,917 pounds of cut cigarette tobacco, 138,063 pounds of semiground tobacco (Nimcoub) for making cigarettes, 6,864 pounds of nicotine and 594 pounds of snuff.

Persia has substantial mineral deposits relatively undeveloped, including coal, iron, copper, lead, manganese, marble, borax, nickel, cobalt, iron oxide, sulphur, sodium sulphate and other sodium salts, and rock salt. In 1939 a concession was granted to a Dutch company, the Algemeen Exploratie Maatschappij, to explore the mineral resources in two areas in the region of Bandar Abbas. Turquoise mines are worked at Nishapour.

The production of the Anglo-Iranian Oil Company, which holds a concession for a large area in S. Persia, was: 1935, 7,487,697 tons; 1936, 8,198,800 tons; 1937, 10,200,000 tons (estimate); 1938, 10,195,371 tons.

### Commerce.

The Government monopoly of foreign trade established in 1931 was abolished in 1941-42. The following goods, however, are now Government monopolies, and may be imported only by, or under special permit from, the Government:—cereals, motor vehicles, tyres and accessories, hessians, sugar, tea, cotton piece goods and pharmaceutical products.

The principal centres of commerce are Tabriz, Tehran, Hamadan, Meshed, and Isfahan; the principal ports, Bandar Abbas, Khorramshahr, Bushire and Bandar Shapour on the Persian Gulf, and Astara, Pahlavi (Enzeli), Babol Sar, Bandar Guez and Bandah Shah on the Caspian.

The values of the imports and exports for six years were as follows:—

| Years   | Imports    | Exports    | Years   | Imports    | Exports    |
|---------|------------|------------|---------|------------|------------|
|         | £          | £          |         | £          | £          |
| 1937-38 | 17,327,688 | 31,799,766 | 1940-41 | 15,772,054 | 34,586,068 |
| 1938-39 | 15,410,879 | 22,066,184 | 1941-42 | 7,622,060  | 17,698,829 |
| 1939-40 | 14,064,198 | 32,411,491 | 1942-43 | 10,049,032 | 4,265,537  |

The following table shows, in thousands of rials (130.75 rials = £1.), the value of the chief imports into and exports from Persia during the year March 21, 1942, to March 20, 1943 (exclusive of duty free imports and oil exports of the Anglo-Iranian Oil Company):—

| Imports                                      | 1942-43     | Exports              | 1942-43     |
|----------------------------------------------|-------------|----------------------|-------------|
|                                              | 1,000 Rials |                      | 1,000 Rials |
| Cotton piece goods . . .                     | 355,581     | Carpets . . . . .    | 137,819     |
| Tea . . . . .                                | 309,505     | Wool . . . . .       | 75,221      |
| Sugar . . . . .                              | 173,811     | Gum tragacanth . . . | 64,823      |
| Wheat, barley, etc. . .                      | 61,147      | Opium . . . . .      | 48,748      |
| Tissues of natural and artificial silk . . . | 51,314      | Rice . . . . .       | 31,933      |
| Pharmaceuticals and chemical products . . .  | 28,698      | Almonds . . . . .    | 31,374      |
| Dates . . . . .                              | 24,857      | Casings . . . . .    | 25,981      |
| Machines and electric equipment . . . . .    | 21,087      | Lambskins . . . . .  | 17,041      |

In the year ending March 20, 1943, the distribution of the trade of Persia to and from the principal countries was as follows (excluding duty-free imports and oil exports):—

| Country                         | Imports             | Exports     |
|---------------------------------|---------------------|-------------|
|                                 | 1,000 Rials         | 1,000 Rials |
| India . . . . .                 | 724,645             | 90,855      |
| U.S.A. . . . .                  | 145,956             | 172,554     |
| U.S.S.R. . . . .                | 179,247             | 119,716     |
| Iraq . . . . .                  | 62,701              | 57,826      |
| United Kingdom . . .            | 59,358              | 46,598      |
| Syria . . . . .                 | 108                 | 45,409      |
| Netherlands Indies (Java) . . . | 43,792 <sup>1</sup> | —           |

<sup>1</sup> Goods cleared from the Customs.

The total of duty-free imports amounted to 1,080,241,640 rials (8,261,120£.), of which 1,074,862,720 rials (8,220,745£.) were imports by the Anglo-Iranian Oil Company. The United Kingdom's share of the duty-free imports was 662,004,000 rials (5,063,129£.).

Total trade between Persia and United Kingdom (Board of Trade returns) for 5 years:—

|                                  | 1934      | 1935      | 1936      | 1937       | 1938      |
|----------------------------------|-----------|-----------|-----------|------------|-----------|
|                                  | £         | £         | £         | £          | £         |
| Imports from Persia to U.K. . .  | 7,870,213 | 7,359,918 | 7,667,985 | 10,486,506 | 9,071,112 |
| Exports to Persia from U.K. . .  | 1,780,863 | 2,642,704 | 2,705,990 | 3,278,293  | 5,480,460 |
| Re-exports to Persia from U.K. . | 26,203    | 53,679    | 39,856    | 54,790     | 97,074    |

### Communications.

Tonnage entered at Bushire, Lingah, Bandar Abbas, Khorramshahr, Bandar Shapour and other ports on the Persian Gulf in the year ending March 20, 1943, was 4,877,431 tons, of which 2,211,129 tons were British, 870,743 tons Norwegian, 840,395 tons U.S.A., 277,911 tons Dutch, 214,281 tons Panama, 44,008 tons Persian (the bulk being sailing vessels), 30,034 tons Swedish and 24,473 tons U.S.S.R.

Tonnage entered at Caspian ports was 213,975 tons, of which 195,633 tons (steam) were U.S.S.R., and 17,733 tons (steam) and 5,609 (sailing) Persian.

The Government continues its programme of road construction, and new roads are under construction and existing roads being improved. A tunnel of about 1,850 metres has been pierced through the top of the Khandovan Pass on the Chalus Road, bringing the highest altitude of the road down from 3,006 metres to 2,600 metres and reducing the length of the road by about ten miles. The Trans-Persian railway line was completed and inaugurated in August, 1938. A branch line of 314 kilometres, joining Shahrud with the northern section, at Garmsar, was carried on towards Meshed in May, 1941. Length of the Trans-Persian is 870 miles: Garmsar to Shahrud, 196 miles; Tabriz to Julfa, 85 miles; Sofian to Sharafkaneh, 30 miles. New lines are under construction from Tehran to Tabriz (on which rails have been laid) up to Mianeh (267 miles from Tehran), from Semnan to Meshed (line completed to Shahmd, 300 miles from Tehran), and from Qum to Yazd.

Navigation on the Lake of Urumiah, from Sharafkaneh to Golmankhaneh is served by some 5 tugs and 9 barges for the transport of goods and passengers. The service runs twice a week. On the River Karun likewise, from Khorramshahr to Ahwaz (Nasseri), an irregular service for cargo only both ways is run by the Iran Transport Co. and the Karun Navigation Co.,

of the centralised government. The highest authority, the chief priest of all, is the leading mujtahid, who resides at Najaf or Kerbela, near Baghdad, and some consider him the vicerent of the Prophet, the representative of the Imam. All mosques and shrines have some endowments (*awqaf*), which are now, by virtue of a recent law, administered entirely by the Ministry of Public Instruction, and devoted to charitable and educational institutions under the Ministry's supervision. The shrines of some favourite saints are so richly endowed as to be able to keep an immense staff of priests, servants, and dependants.

The Gregorian National Armenians form two dioceses, each under a bishop, the one residing at Tabriz, and the other at Isfahan. There are also a few thousand Roman Catholic Armenians in Persia who have a bishop of their own rite at Isfahan, the bishop of the Latin rite residing at Urmia. The Anglican Bishop in Persia resides at Isfahan, the headquarters of the Church Missionary Society.

### Education.

In recent years public instruction has made rapid strides; the old system of instruction, which was generally religious, has been entirely changed, and at present adequate education can be obtained in all branches of sciences and arts at the Tehran University under foreign instructors and native teachers who have studied abroad. In 1937 there were 4,989 schools of all categories, with 273,680 pupils, as compared with 612 schools, with 55,000 pupils, in 1921.

A law providing for the gradual establishment over a period of 10 years of compulsory, general, primary education was passed in July, 1943.

The Government pays the whole budget of Government schools and grants are paid to the public, private and foreign schools. Religious schools are maintained from endowments.

The foreign schools which were previously maintained by funds from abroad supplied by the American Presbyterian Mission, the Church Missionary Society, and the French Roman Catholic Mission, have for the most part been absorbed or liquidated by the Ministry of Education, by Government order. The schools of the Alliance Israélite, however, still continue, as they are not regarded as foreign; and it is possible that the other foreign schools may in future be re-opened. There is a primary school for children of Soviet nationality run by the Soviet Government. The American Presbyterian Mission also runs a primary school for boys and girls, and the Iraqi Government runs a similar establishment. The French Jeanne d'Arc School is a primary school for girls only. A community school for all nationalities is run by the American Presbyterian Mission in Tehran. Children who are Persian subjects may not now attend foreign primary schools. Of the 900 Persian pupils being educated abroad at the outbreak of the 1939 war, only a few remain, in England, Switzerland and America.

### Justice.

The judicial system of Persia is modelled on that of France. There are justices of the peace in villages and small towns, higher courts in the larger towns, police magistrates in all important places, courts of appeal in Tehran, Tabriz, Shiraz, Kermanshah, Isfahan, Meshed, Kerman and Ahwaz, and a court of cassation, or supreme court, in Tehran. The courts are supervised by the Ministry of Justice. New civil, criminal and commercial codes based on French and Swiss codes have been introduced into the Courts of Justice.

### Finance.

Budget estimates for recent years (ending March 20) were as follows:—

|             | 1940-41                  | 1941-42                  | 1942-43                  | 1943-44                  | 1944-45                   |
|-------------|--------------------------|--------------------------|--------------------------|--------------------------|---------------------------|
| Revenue     | 1,000 rials<br>3,094,338 | 1,000 rials<br>3,613,708 | 1,000 rials<br>3,137,866 | 1,000 rials<br>7,676,710 | 1,000 rials<br>18,326,800 |
| Expenditure | 3,370,973                | 4,323,911                | 3,137,695                | 9,194,388                | 10,324,000                |

The 1944-45 budget consists of two parts, (a) Ordinary Budget, and (b) Extraordinary Budget, which covers the industrial and trading enterprises of the Government. The Ordinary Budget shows an estimated revenue of 3,958 million rials and an estimated expenditure of 4,560 million rials. The Extraordinary Budget shows estimated revenue at 6,367 million rials and estimated expenditure at 5,745 million rials.

The main items of estimated revenue in the Ordinary Budget for 1944-45 are:—Direct taxation, 900 million rials; indirect taxation, 2,200 million rials, including the monopolies on sugar, tea, tobacco and opium; revenue from concessions, 460 million rials; Ministry of Posts and Telegraphs, 100 million rials. The main items of estimated expenditure in 1944-45 in the Ordinary Budget are:—Ministry of War, 1,000 million rials; Ministry of the Interior (including the cost of the gendarmerie and police), 500 million rials; Ministry of Finance (including tax administration), 306 million rials; Ministry of Health, 135 million rials; Ministry of Posts and Telegraphs, 140 million rials; Ministry of Education, 243 million rials.

On March 20, 1944, the foreign debt of Persia consisted of the 1911 Sterling Loan, the original amount of which was 1,250,000*l.*, the amount outstanding being 876,816*l.* On the same date the Government debt to the National Bank was 3,882 million rials and its total internal debt 4,440 million rials.

### Defence.

The Persian Army, Navy and Air Forces are in process of re-organisation and re-equipment. Future establishments have not yet been made public.

### Production and Industry.

Persia's chief products are: oil, wool, cotton, skins, casings, gum, opium, fruit, carpets, textiles and leather. Oil shipments in 1942-43 totalled 8,877,766 tons.

Reliable statistics of agricultural production are not available.

Wool comes principally from Khorrasan, Kermanshah, Mazandaran and Azerbaijan. The most popular carpets are manufactured in the environs of Tabriz, Kerman, Sultanabad and Hamadan. Factories making woollen and cotton cloth and yarns are centred mainly in Isfahan. Glass, small arms, ammunition and chemicals are manufactured in Tehran. Matches are made in Tabriz, Zenjan, Tehran and Isfahan. Silk textiles are manufactured at Chalous in Mazandaran. Persia has seven beet-sugar refineries, which in 1943 produced 21,417 tons. Tea production in northern Persia has risen from 240 tons in 1933 to 1,697 tons in 1943.

According to the Iranian Tobacco Monopoly, 8,590,643 pounds of leaf tobacco, 4,905,725 pounds of pipe-tobacco-type leaf and 2,163,559 pounds of leaf for water-pipe tobacco were utilised in the manufacture of tobacco and tobacco products during the fiscal year ended March 20, 1944. Production

and some native firms run daily trips by motor boat, for passengers and merchandises. By changing into lighter draught boats at Ahwaz both can be taken up to Shallili near Shushtar.

The telegraph system on March 20, 1943, was stated to extend 18,214 kilometres (11,335 miles), with about 31,488 kilometres (19,580 miles) of wire. In virtue of several conventions, dating from 1863, between the British and Persian Governments, the Indian Government constructed, and until March, 1931, maintained and worked with its own staffs; the Indo-European Telegraph Department line from Tehran-Qum-Kashan-Isfahan-Shiraz to Bushire, and thence to Fao and also Karachi; this line is 669 miles in length with 2,292 miles of wire and 7 stations; and the Central Persia Telegraphs from Tehran via Kashan-Yezd-Kerman-Bam to the Beluchistan frontier and thence to India with a mileage of 1,467 line and 4,188 wire and 10 stations. The Indo-European Telegraph Co. maintained communication between Tehran and Tabriz and on to Julfa, which connects with the European systems.

The Indo-European Telegraph Company, as well as the Indo-European Telegraph Department, relinquished all their telegraph lines in Persia on February 28, 1931; thenceforward all these lines came under the direct control of the Persian Telegraph Administration with the exception of the land-line between Jask and the Indian frontier near Gwadur, which is exploited by the Imperial and International Communications Company.

There are Government wireless stations at Tehran, Tabriz, Meshed, Kermanshah, Kerman, Khorramshahr, Bushire, Djask, Shiraz and Lingah. Tehran is in wireless communication with Europe via Tiflis and Beyrout.

The telephone system in practically the whole of Persia is run by the 'Société Générale Anonyme Iranienne des Téléphones.' Automatic telephones are now installed in Tehran.

In 1929, 6,199,800 letters and 256,700 post-cards were handled in the internal service; in the foreign service, 1,518,400 letters and 22,600 post-cards were received, and 1,197,400 letters and 124,200 post-cards despatched.

An air service has been established between Tehran, Baghdad and Cairo by the British Overseas Airways, and the Iranian State Airline runs between Tehran and Baghdad.

An airgraph postal service between Persia and the United Kingdom and Bire came into operation during 1943.

### Banking and Credit.

The following banks are established in Persia:—(1) The Imperial Bank of Iran, a British concern founded in 1889. The bank conceded its sole right of note issue to the Government in 1930. The Bank has branches in the principal towns in Persia, and at Baghdad and Basrah. (2) Banque Mellié Iran, founded in 1927 as the National Bank of Persia by the Government. Since 1930 the Banque Mellié Iran has the sole right to issue notes in Persia. The bank has branches all over Persia. (3) The Ottoman Bank has offices at Tehran and Kermanshah. (4) The Agricultural section of the Banque Mellié Iran was made a separate establishment with its own capital in 1938 and is now called the Agricultural and Industrial Bank of Iran. Branches are being opened at the principal agricultural centres in Persia. The bank gives assistance for the agricultural and industrial development of the country. (5) The Banque Sepah, under the direction of the Ministry of Finance, deals principally in inland exchange and army accounts. (6) The Russian Bank is mainly interested financing in Soviet-Persian trade.

(7) On January 15, 1939, the Majlis sanctioned the forming of a Mortgage Bank.

On May 9, 1939, a National Savings Bank was inaugurated.

By the Currency Law passed by the Majlis in November, 1942, the fiduciary issue is limited to 1,400 million rials, and all notes issued in excess of a total of 3,500 million rials must be covered as to 60 per cent. by gold, or by foreign exchange convertible into gold, and as to 40 per cent. by sterling or United States dollars, valued at the official rate of exchange.

The liabilities and assets of the National Bank of Persia on August 6, 1944, were as follows (in rials):—Liabilities: notes in circulation, 6,199,590,740; in banking department, 1,081,159,860; reserve, 931,745,084; total liabilities, 8,212,495,684. The assets were: gold, 8,741,723,078; silver, 418,231,651; foreign exchange, 1,331,594,288; crown jewels, up to 344,201,581; government liability secured by excess value of crown jewels, 1,400,000,000; deposit in banking department, 931,745,084; total assets, 8,212,695,684.

### Money, Weights and Measures.

Persia has a gold standard, the unit of which is the *rial*, containing 0.07822382 grammes of gold: one hundred *rials* make one *pahlavi*. The *rial* is sub-divided into 100 *dinars*.

The gold standard is not, however, in force, for, by a law passed on March 13, 1932, there is no obligation to pay out gold pending a return to more normal economic conditions.

The only coins in circulation are brass 50, 10, and 5 dinar pieces. There are also in circulation 5, 10, 20, 50, 100, 500 and 1,000 rial notes.

On March 1, 1936, Government control of foreign exchange was introduced.

By a law passed on January 8, 1933, the official weights and measures of Persia correspond to those of the metric system.

For the old Persian weights and measures, see THE STATESMAN'S YEAR-BOOK for 1933, p. 1191.

### Diplomatic Representatives.

#### 1. OF PERSIA IN GREAT BRITAIN.

*Ambassador*.—Sayyid Hassan Taqizadeh (presented letters of credence, January 21, 1942).

*Counsellor*.—Hassein Ghods.

*First Secretary (Honorary)*.—Seyed Fakhrod-din Shadman.

*Secretaries*.—G. Vahid Mazandran and Kasem Nia-rur.

*Attachs*.—Abbas Seyghal, Abdol Hossein Hamzavi and Mahmoud Sheyda.

*Air Attaché*.—Lt.-Col. Asadollah Bayendor.

*Honorary Commercial Attaché*.—Nubar Sarkis Gulbenkian.

*Honorary Financial Counsellor*.—Fathollah Noury-Esfandiary.

#### 2. OF GREAT BRITAIN IN PERSIA.

*Ambassador*.—Sir Reader William Bullard, K.C.B., K.C.M.G., C.I.E. (appointed December 6, 1939).

*Counsellors*.—D. W. Lascelles and Lt.-Col. E. H. Gastrell, O.B.E.

*Oriental Counsellor*.—H. R. D. Gybbon-Monypenny, O.B.E.

*Financial Counsellor.*—E. N. Trentham, C.M.G.  
*First Secretary.*—J. S. Somers Cocks.  
*Commercial Secretary.*—G. C. Pelham.  
*Director of Public Relations.*—Lt.-Col. D. P. S. Graham.  
*Military Attaché.*—Major General W. A. K. Fraser, C.B., C.B.E.,  
 D.S.O., M.V.O., M.C., and Col. G. D. Pybus, I.A.  
*Air Attaché.*—Air Commodore the Hon. W. L. Runciman, A.F.C.

There are Consular representatives at Ahwaz (C.-G.), Bunder Abbas (C.),  
 Bushire (C.-G.), Hamadan (V.-C.), Isfahan (C.), Kerman (C.), Kermanshah  
 (C.), Khorramshahr (C.), Meshed (C.-G.), Shiraz (C.), Tabriz (C.-G.),  
 Tehran (C.), Zabol (V.-C.), Zahidan (C.).

## PERU.

(REPUBLICA DEL PERÚ.)

### Constitution and Government.

THE Republic of Peru, formerly the most important of the Spanish Viceroyalties in South America, issued its declaration of independence on July 28, 1821; but it was not till after a war, protracted till 1824, that the country gained its actual freedom from Spanish rule.

The following table gives a list of Presidents from 1899 to 1939:—

|                                                                             |                                                                                   |
|-----------------------------------------------------------------------------|-----------------------------------------------------------------------------------|
| Don Eduardo Lopez de Romaña, Sept. 8, 1899—Sept. 8, 1903.                   | Don Augusto Bernardino Leguía, Oct. 12, 1919—Aug. 24, 1930.*                      |
| Don Manuel Candamo, Sept. 8, 1903—May 7, 1904.*                             | General Don Manuel Ponce (Acting), Aug. 24, 1930—Aug. 28, 1930.*                  |
| Don Serapio Calderón (Acting), May 7, 1904—Sept. 24, 1904.                  | Colonel Don Luis M. Sánchez Cerro (Acting), Aug. 28, 1930—March 1, 1931.*         |
| Don José Pardo y Barreda, Sept. 24, 1904—Sept. 24, 1908.                    | Don Ricardo Leoncio Elías (Acting), March 1, 1931—March 5, 1931.*                 |
| Don Augusto Bernardino Leguía, Sept. 24, 1908—Sept. 24, 1912.               | Colonel Don Gustavo Jimenez (Acting), March 5, 1931—March 10, 1931.*              |
| Dr. Don Guillermo Enrique Billinghurst, Sept. 24, 1912—Feb. 4, 1914.*       | Don David Samanes Ocampo (Acting), March 10, 1931—Dec. 8, 1931.                   |
| General Don Oscar Raimundo Benavides (Acting), Feb. 4, 1914—Sept. 24, 1915. | General Don Luis M. Sánchez Cerro (Constitutional), Dec. 8, 1931—April 30, 1933.* |
| Don José Pardo y Barreda, Sept. 24, 1915—Oct. 12, 1918.*                    | General Don Oscar Raimundo Benavides, April 30, 1933—December 8, 1939.            |

\* Died.

\* Deposed.

\* Resigned.

\* Assassinated.

According to the new Constitution of April 9, 1933, the legislative power is vested in a Senate and a Chamber of Deputies. Constitutional amendments approved by 88 per cent. of the electors (August, 1939) provide for a Senate of 40 and a Chamber of Deputies of 140 members elected for six years, one third renewable at general elections every two years. Elections for the Presidency and for Congress were held October 11, 1936, but the count was suspended and the elections declared void, Congress extending General

### Religion.

Religious liberty exists, but the Roman Catholic religion is protected by the State, and in 1929, a decree was issued permitting only Roman Catholic religious instruction in schools, State or private. There is a Roman Catholic archbishopric (Lima, dating from 1545), 18 bishops and vicars-general, 624 intermediate officials, 1,384 priests and 1,829 monks and nuns. The 1,296 churches, 2,750 chapels, 59 convents and 125 religious houses are the property of the State. The Junta of Government in October, 1930, decreed that all marriages must be civil, regardless of religion and preceded by medical examination; there are liberal divorce regulations, including divorce for 'absence without just cause for 50 days,' by mutual consent and for 'incompatibility of temperaments.' Divorcees may re-marry immediately.

### Education and Justice.

Elementary education is compulsory for both sexes between the ages of 7 and 14, and is free. The system is highly centralized; all teaching appointments are made by the Ministry of Education. In 1944, there were in Peru 7,647 elementary schools, both private and State-aided, with 13,084 teachers and about 500,000 pupils between ages of 6 and 14 years. There are 61 secondary State schools offering 5 years' courses to 12,474 students between ages of 12 and 17. Religious orders, etc., conduct about 100 secondary schools, with about 10,000 students. Budget appropriations for education in 1944, 43,007,954 soles. Seven rural schools for the Indians give instruction in agriculture and live-stock. There are also 7 normal schools with 649 students. Higher education is provided at the central university in Lima, called 'Universidad de San Marcos,' founded by Charles V in 1551. Students in 1943 numbered 6,241; teachers, 1,733. There are three other State universities at Arequipa (founded in 1827), with (1943) 387 students, Cuzco with 281 students, Trujillo, 916 students, while the Catholic University (Lima) had (1943) 458 students. The State maintains 6 commercial schools, 18 industrial, 1 music school, 1 for physical training.

Justice is administered in the Supreme Court at Lima composed of 11 judges and 5 fiscals, and in 18 Superior Courts composed of 103 judges and 24 fiscals throughout the Republic. There are 160 Courts of First Instance and 43 Minor Courts. The judges of the Supreme Court are chosen by Congress from lists of names presented by the Government; those of the Superior Courts and of the Minor Courts are chosen by the Government from lists of names presented by the Supreme and Superior Courts, respectively.

### Finance

The revenue and expenditure for 5 years were as follows in soles (about 15-38 cents, U.S.; see MONEY AND CREDIT section for average rates):—

|                   | 1941        | 1942        | 1943        | 1944 <sup>1</sup> | 1945 <sup>1</sup> |
|-------------------|-------------|-------------|-------------|-------------------|-------------------|
|                   | Soles       | Soles       | Soles       | Soles             | Soles             |
| Revenue . . .     | 229,411,816 | 274,990,317 | 346,281,259 | 459,619,000       | 546,546,666       |
| Expenditure . . . | 230,451,013 | 276,239,305 | 318,558,000 | 459,619,000       | 546,546,666       |

<sup>1</sup> Budget estimates.

Budget for 1945 included 20,101,709 soles for public works; 109,123,162 for commerce; education, 58,834,648; war, 64,383,014; navy, 20,719,472; aviation, 28,642,910; government and police, 68,285,522.

The total debt of Peru (December 31, 1943) amounted to 1,232,402,212

soles, of which the internal debt amounted to 198,034,727 soles, the floating debt to 436,484,887 soles, and the foreign debt to 597,882,598 soles. In May, 1931, Peru suspended interest and sinking fund payments on external debt until economic conditions improve; some loans have received partial service since then. British investments (1944) amounted to 28,769,244, of which some 20,446,900% was represented by the Peruvian Corporation. About 66 per cent. of the total was in default. American direct investments, 1940, totalled 81,597,000 dollars, compared with 123,742,000 dollars in 1929; American holdings of Peruvian dollar bonds, 1941, were 54,000,000 dollars, all in default.

### Defence.

#### ARMY.

Military service is compulsory and universal, though only a limited number of the annual quota of conscripts is called up for active duty with the colours. The term of service is 2 years in the active army, 5 years in the first reserve, 5 in the second reserve, and 20 years in the National Guard.

The country is divided into 7 military districts, each furnishing a complete division. The division is made up of 2 regiments of infantry of 2 battalions each, with 1 machine gun company; 1 topographical section, 1 medical section, 1 commissariat section, 1 or 2 regiments of cavalry (2 squadrons), 1 regiment of mountain artillery.

The Army in 1938 consisted of 9 regiments of infantry, 5 regiments of artillery, 5 regiments of cavalry, 4 battalions of sappers, 1 anti-aircraft battalion and 1 signalling battalion; the authorized establishment, 1940, was over 2,000 officers and over 80,000 other ranks. Rifle instruction is given in Peruvian schools and universities. There is a military academy and war college at Chorillos, near Lima.

The infantry is armed with the 1912 Peruvian model of the Mauser rifle, cavalry with carbine of the same type and model, artillery with the Schneider-Canet gun and machine gun battalion with Danish light machine guns, 'Maatsen.'

Police and gendarmerie amount to about 10,000, including civil guards and mounted police. The civil guard has been reorganised into 11 cavalry regiments, 1 infantry regiment of 4 battalions, 1 independent battalion and 1 machine gun battalion.

Aviation is controlled by a Director-General of Aviation, under the Ministry of Aviation. Fifty 'Lease-Lend' aeroplanes arrived from the United States in 1942.

Army, Navy and Aviation appropriations in the 1943 budget were: Army, 50,000,000 soles; Navy, 15,000,000 soles, and Aviation, 15,500,000 soles.

#### NAVY.

The Peruvian Navy consists of the following units:—2 obsolete cruisers, *Almirante Grau* and *Coronel Bolognesi*, 3,200 tons, 24 knots speed, each with 2 6-inch and 8 3-inch guns, built in 1906, but since re-boilered and adapted for oil fuel; 2 destroyers; 4 submarines; 6 river gunboats; 1 transport; 1 oiler and 8 motor launches. There is a naval school for cadets at La Punta and a submarine base on San Lorenzo Island, both being close to Callao.

### Agriculture and Industry.

The country may be divided into three zones: the coast strip, with an average width of 30 miles; the Sierra, or Uplands, lying between the coast

Benavides' term as President for 3 years until 1939. Voters are males, at least 21 years old, who are able to read and write; in 1936 the number of registered voters was 490,716, of whom 120,508 were in the Department of Lima. Voting is compulsory for all literate males between 21 and 60 years of age; women have the municipal franchise. Members of 'political parties of an international character' are disqualified from holding public office.

The executive power is entrusted to a President, elected for 6 years and not eligible for a consecutive term. He receives 30,000 soles a year, plus 12,000 soles for official expenses. Under the new Constitution he is advised by an Economic Advisory Council which (1935) had about 50 members who were specialists in various fields. April 1, 1936, the Constitution was amended to provide for First and Second Vice-Presidents to be elected simultaneously with the President.

*President.*—Dr. Manuel Prado y Ugarteche (elected November 13, 1939; assumed office December 8, 1939, for six years, terminating July 17, 1945, after elections scheduled for June 10, 1945).

The President exercises his executive functions through a Cabinet of nine ministers, holding office at his pleasure. Each minister receives 24,000 soles a year.

The 23 departments are divided into provinces (124 in all), and these are subdivided into 1,105 districts. Each department is administered by a Prefect, and each province by a Sub-Prefect. Municipal councillors are nominally elected by direct vote, and foreigners are eligible, but for some years municipal bodies have been selected without recourse to the popular vote.

Peru severed diplomatic relations with the Axis Powers on January 24, 1942, subscribed on February 8, 1945, to the Joint Declaration of the United Nations, and declared war on Germany and Japan on February 12, 1945.

### Area and Population.

Revised estimates in 1930, allowing for the cession of 43,970 square miles to Colombia (Salomon-Lozano Treaty, 1927), and of 7,679 square miles to Chile in 1928, put the present area at 482,258 square miles.

An official census taken on June 9, 1940, gives the population as 6,207,967 (or 7,023,111, inclusive of the population of forests and islands estimated as 815,144), of whom 3,288,360 were white, 29,054 Negroes, 2,847,196 Indian, 41,945 Asiatics, and 6,412 miscellaneous. There were 3,067,868 men and 3,140,099 women. Estimated population in 1942 was 7,271,654. The language is Spanish, but the Indian population has its own language, either Quechua or Aymara.

To promote the assimilation of the Indian population, estimated at 4,000,000, the Government in 1930 declared June 24 of each year to be a national holiday, 'day of the indigene,' to be celebrated with appropriate ceremonies. By a decree issued in 1927, the Indians were freed from the peonage system which existed in some regions.

The census population (1940) of Lima City is 522,526. The estimated population (1936) of Callao City was 75,000; of Arequipa 46,000; Cuzco 40,000; Iquitos 40,000; Chiclayo 35,000; Trujillo 30,000; Ica 20,000; Chincha 20,000; Huancayo 20,000; Ayacucho 20,000; Huaráz 20,000; Piura 20,000.

The areas of the 23 departments (and total area of the various islands)

are given below with the population, according to the official census of 1876, and that of 1940. The chief towns are shown in brackets:—

| Departments                 | Area:<br>English<br>square miles<br>1932 | Population       |                  | Pop. per<br>square mile,<br>1940 |
|-----------------------------|------------------------------------------|------------------|------------------|----------------------------------|
|                             |                                          | 1876<br>(census) | 1940<br>(census) |                                  |
| <i>Departments:</i>         |                                          |                  |                  |                                  |
| Amazonas (Chachapoyas)      | 18,948                                   | 24,384           | 65,187           | 4.7                              |
| Ancash (Huaráz)             | 14,709                                   | 284,850          | 424,975          | 28.9                             |
| Apurímac (Abancay)          | 8,187                                    | 118,525          | 258,094          | 31.5                             |

\* Created in 1912.

\* Including 83,225 of the former Department of Tarapaca, ceded to Chile.

\* Revised total, 7,023,111.

Marriages, 1941-42, 19,441; births, 165,840; deaths, 90,658.

The long-standing dispute with Chile over the provinces of Tacna and Arica (see THE STATESMAN'S YEAR-BOOK for 1928, page 1198) reached an amicable settlement on June 3, 1929, at Lima, Tacna going to Peru and Arica to Chile.

The frontier line between Bolivia and Peru was fixed from the mouth of the Heath to that of the Yaverija (1912), and is being finally demarcated by a joint commission. Regarding that with Ecuador (for the possession of over 100,000 square miles of land rich in rubber, timber, and probably gold, lying about the head waters of the Amazon) a protocol was signed at Rio de Janeiro on January 29, 1942, and the final notes exchanged on May 22, 1944, definitely fixing the boundary between the two countries (for map see THE STATESMAN'S YEAR-BOOK, 1942). The Salomon-Lozano Treaty, establishing the boundary between Peru and Colombia, was ratified by the former in 1927, and by Colombia in 1928, but on September 1, 1932, Peruvian civilians from Iquitos seized the Colombian town of Leticia, east of Iquitos, and demanded a revision of the treaty. A League of Nations Commission took over the administration of Leticia from June 23, 1933, until the dispute was amicably adjusted through negotiations at Rio de Janeiro, and the instruments of ratification were exchanged at Bogotá on September 27, 1935. A definite arrangement has been made with Brazil as to boundary, favourable, on the whole, to Peru, and this was finally demarcated in 1927 by a joint commission. The region north of the Marañon from the Pongo de Manseriche is claimed by Ecuador and Peru.

The distribution of the trade was mainly as follows:—

| Imports from      | 1942        | 1943        | Exports to        | 1942        | 1943        |
|-------------------|-------------|-------------|-------------------|-------------|-------------|
|                   | Soles       | Soles       |                   | Soles       | Soles       |
| United States . . | 189,263,355 | 258,558,000 | United States . . | 198,682,998 | 195,884,000 |
| Argentina . . .   | 42,261,763  | 62,679,100  | Bolivia . . . .   | 24,616,060  | 19,399,000  |
| United Kingdom .  | 18,611,394  | 26,902,000  | Chile . . . . .   | 182,721,916 | 103,019,000 |
| Chile . . . . .   | 17,076,794  | 28,595,000  | Argentina . . .   | 4,359,086   | 7,611,000   |
| Brazil . . . . .  | 18,068,000  | 35,655,000  | Australia . . .   | 20,193,000  | 24,692,000  |
| British India . . | 15,876,000  | 10,027,000  | United Kingdom    | 28,246,491  | 42,888,000  |

In 1943 the United Kingdom took 9.3 per cent. of exports, the United States 42.6 per cent., and Chile 22.3 per cent. Peru drew 56.5 per cent. of her imports from the United States, 14.0 per cent. from Argentina, and 6.0 per cent. from the United Kingdom.

Total trade between Peru and United Kingdom in thousands of pounds for 5 years (Board of Trade returns):—

|                                | 1934  | 1935  | 1936  | 1937  | 1938  |
|--------------------------------|-------|-------|-------|-------|-------|
| Imports from Peru to U.K. . .  | 4,879 | 3,785 | 4,541 | 5,139 | 5,432 |
| Exports to Peru from U.K. . .  | 1,101 | 1,030 | 1,183 | 1,163 | 1,053 |
| Re-Exports to Peru from U.K. . | 29    | 42    | 80    | 57    | 82    |

United Kingdom exports to Peru (Board of Trade returns) since 1938 have been: 1939, 749,000*l.*; 1940, 1,058,000*l.*; 1941, 488,000*l.*; 1942, 646,000*l.*; 1943, 788,000*l.*; 1944, 356,000*l.* Totals for the 3 years, 1939-41, included shipments of war supplies (if any) by Government departments.

### Shipping and Navigation

In 1943, 7,066 vessels of 4,477,215 tons entered, and 7,014 of 4,440,231 tons cleared the ports of the Republic, chief of which is Callao. Since December, 1928, the coasting trade has been largely reserved for Peruvian-owned vessels with Peruvian crews; coasting trade, 1943, handled 1,027,316 tons, valued at 179,163,218 soles.

### Communications.

There were in 1943, about 20,663 miles of road suitable for motor traffic. Toll roads were freed in May, 1936. The Central Highway over the Andes from Lima to Oroya was completed in 1935; the Callao-Huanuco-Pucallpa Highway, opened in 1943, opens up the rich eastern portion of Peru and makes possible a land and water journey (via the Ucayali and Amazon rivers) from the Pacific Ocean to the Atlantic Ocean. In 1944 the Lima-Pucallpa Highway, 522 miles in length, was completed, joining Lima with Iquitos.

In 1943 there were 16,229 motor cars, 10,226 motor lorries, 1,462 omnibuses in Peru, a total of 27,917 vehicles, of which 15,000 were in Lima and Callao districts.

In 1943 the total working length of the Peruvian railways was 2,758 miles, including 2,000 miles privately owned and over 600 miles retained by the State. These are standard gauge (4 ft. 8½ in.), with the exception of five small lines. Number of passengers carried in 1943, 81,419,502; goods, 3,271,440 metric tons; gross revenue (1942), 36,802,393 soles.

Since May 1, 1942, the administration of the posts, telegraphs, and

wireless services is in the hands of the Government. In 1942, there were 1,501 offices handling 48,075,703 pieces of inland and foreign mail. There were 436 telegraph and telephone stations and 36 radiotelegraph offices. Length of telegraph lines is 11,842 miles. The telephone system (1941) had 35,151 instruments. Three submarine telegraph cables connect Peru and Chile, and one connects Peru and the Republics to the north. There is a short-wave and long-wave national broadcasting station of modern type in Peru, and 15 private broadcasting stations (suspended in 1942). In 1943, 50,906 passengers used the commercial aviation routes, covering 2,698,135 miles with 151,580 kilos of mail and 807,641 kilos of cargo. Air mail and passenger service between Lima, New York, Buenos Aires, Rio de Janeiro and Santiago has been established.

### Money and Credit.

Peru's currency unit is the Peruvian gold *sol* (by law of April 18, 1931) equal to one-tenth of the old Peruvian *libra* or pound; the gold *sol* is not minted but contains, theoretically, 42.1264 centigrams of fine gold. Eventually gold 10-soles and 50-soles pieces are to be minted. The gold *sol* is worth 47.40 cents (U.S.), or 17.38 to the £ = 13 8d. Peru abandoned the gold standard on May 18, 1932, but refrained from attempting to control foreign exchange. The free exchange value of the *sol* in London averaged in 1939 24.09 soles to the £; since October, 1940, it has been 26.10. In New York, in 1942 and 1941, 6.50 soles = 1 dollar; in 1940, 6.17 soles; in 1939, 5.33 soles; in 1938, 4.46 soles; in 1937, 3.96; in 1936, 4.02; in 1935, 4.19; in 1934, 4.34 soles.

Silver is legal tender up to 10 per cent. of the amount. Silver coins are the *sol*, and half-*sol*, 5/10ths fine, but they became very scarce in 1935 and were replaced, the former by notes and the latter by non-silver coins. Copper coins are 2 and 1 cent; nickel-bronze coins of 50 cents, and nickel coins of 20, 10, and 5 cents. Peru has a paper currency issued by the Banco Central of Lp. 10, Lp. 5, Lp. 1 and 5 soles denomination which still circulate; the new notes are in denominations of 100 soles, 50, 10, 5, and 1 *sol*.

The Government bank of issue, known as the Banco Central de Reserva del Perú, was established March 9, 1922, and in September 1931, was re-organized, on the advice of the Kemmerer Financial Mission, as the Central Reserve Bank with a thirty year charter and authorised capital of 30,000,000 soles (reduced to 10,000,000 soles in May, 1932). It is bound to hold not less than 50 per cent. of cover in gold, first-class bankers' acceptances and silver (not more than one-fifth) for deposits, notes in circulation, and net foreign items in process of collection. Gold stock has risen steadily from 20,000,000 dollars (U.S.) in 1941 to 32,000,000 dollars in September, 1944. Note circulation on July 31, 1944, was 392,235,000 soles; gold and foreign exchange, 170,821,000 soles; deposits, 191,513,000 soles. A mining bank, with capital of 50,000,000 soles, authorized in 1940 to promote mining under native ownership, began operations in February, 1941.

Banks, domestic and foreign, are supervised by the Superintendent of Banks. On December 31, 1943, eight deposits in commercial banks amounted to 487,000,000 soles; capital and reserves were 76,284,000 soles.

### Weights and Measures.

The metric system of weights and measures was established by law in 1869, and is in general use. It came into force in Lima and Callao on September 1, 1916. Spanish measures are still in use.

range of mountains and the Andes proper; and the forest or wooded region, called the Montaña. Of the total arable area of 29,460,000 acres, only 3,600,000 are under active cultivation. In the arid coast region the government has brought under irrigation 62,400 acres during the last few years.

About 80 per cent. of the population is dependent on agriculture, mainly with the help of irrigation. The chief agricultural productions of Peru are, in the order named: cotton, sugar, wool, hides, skins, and coffee. Cotton acreage, 1943-44, 131,981 hectares; production (1943) was 155,498 metric tons of cotton (chiefly the famous Tanguis strain) from about 300,000 acres. Exports of ginned cotton in 1943 was 35,691 metric tons. Cotton textile industry with 133,694 spindles and 5,612 looms produced and consumed 9,941,115 kilos of yarn in 1942. The sugar industry is carried on chiefly by irrigation in the river valleys of the coast region and by sinking wells (1 lb. of sugar is estimated to require 500 gallons of water). Peru is a low-cost producer. About 50 large estates covering 180,060 acres raise 95 per cent. of the crop; production (1943), 389,790 metric tons, of which 180,417 were exported. The chief coffee-growing districts are those of Chanchamayo, Perené and Paucartambo in Central Peru, where the Peruvian Corporation has done much useful colonising work on about 2,750,000 acres. Exports, 1943, 1,000 metric tons, chiefly to United States. Cocoa cultivation is extending, especially in the Perené region. Wheat growing on the plateaus of the Andes is encouraged. Wheat production (1943) was 90,279 metric tons. Imports in recent years have been about 180,000 tons. Rice production varies considerably, between 47,000 tons and 100,000 tons a year. The gathering of wild rubber, once the most important industry in the Amazon region of Peru, is again being stimulated under pressure from the United States, which has agreed to take all surplus rubber for five years from 1942; exports of rubber, 1943, 969 metric tons. Exports of balata, quinine, quinoa, kapok and rotenone from this region are being pushed. Tobacco (in northern Peru), wines and spirits, olives, ramie, and maize are also produced. Silk culture is being tried in the coast region. Coca is grown for the Indian population, which chews the leaf, but cocaine is manufactured in Lima, Otuzco, and several other towns, principally for export; exported 1,199 kilos, 1943. In addition there are dyes, cinchona, and other medicinal plants. Exports of hides and skins, 1943, 669 tons. Output of sheep-wool in 1943 was 7,900 tons; of alpaca hair, 3,500 tons; of llama, huarizo and vicuña hair, 350 tons; total exports of wool and hair, 1943, 4,600 metric tons. Peru (1943) has 2,500,000 cattle, 490,000 horses and 13,750,000 sheep.

The guano deposits on Huanillos, Punta Lobos, and other islands, amounting to 40 or 50 thousand tons, which had been granted to the Peruvian Corporation, have now all reverted to the Peruvian Government. The 1943 production was 69,697 tons of rich, and 22,123 tons of weak, guano; only 8,444 tons were exported in 1941; exports ceased thereafter. There was increased production of 'cube' or 'barbasco,' a root used by the Indians, which is said to be valuable as an insecticide; export in 1943 was 1,457 metric tons.

Copper and petroleum are the chief minerals exploited. Petroleum output in 1943, 15,692,978 barrels or 2,056,656 metric tons; exports, 1943, including derivatives, 1,542,863 metric tons. The chief copper mine, the Cerro de Pasco, has been operated for three centuries; exports of copper bars, mainly to the United States, in 1943, were 40,318 metric tons. Exports of lead, 1943, 80,617 tons. Peru is one of the world's largest sources of vanadium; output, 1943, 1,573 tons. Production of antimony, 1943, was 3,703 metric tons; of

tungsten, 630 metric tons; of bismuth, 463 tons. Gold is widely found, but transport and labour difficulties hinder mining. Iron deposits (unworked) are large; the Government-owned field at Mareona has about 500,000,000 tons. Coal deposits lie near by. Coal exports in 1943, 23,580 tons, valued at 1,416,326 soles. An iron and steel plant is under construction.

The following table shows the mineral production for two years (value in soles, of which about 6·50 soles = 1 dollar (U.S.)) :—

|                  |             | 1942      |             | 1943      |             |
|------------------|-------------|-----------|-------------|-----------|-------------|
|                  |             | Quantity  | Value       | Quantity  | Value       |
|                  |             |           | Soles       |           | Soles       |
| Copper           | Metric tons | 35,352    | 59,711,080  | 33,407    | 55,139,626  |
| Petroleum, crude | " "         | 1,810,956 | 110,731,299 | 2,058,631 | 124,538,564 |
| Silver           | Kilos       | 493,745   | 39,954,462  | 455,969   | 42,641,858  |
| Gold             | " "         | 3,014     | 56,498,425  | 6,309     | 44,577,427  |
| Lead             | Metric tons | 44,881    | 40,061,425  | 47,870    | 44,212,529  |

<sup>1</sup> Production 1944, 1,946,524 metric tons.

Total mineral production (including combustibles), which is largely controlled by foreign interests, in 1942 was valued at 374,732,746 soles. Mine concessions, 1942, numbered 6,624, with 42,000 mine workers. Two smelters, both American-owned, and a Canadian-owned petroleum refinery are the largest industrial plants in Peru. There are two aeroplane construction plants at Lima, using imported engines; several firms make motor bodies; textile plants are increasing; there are 200 electric power plants.

### Commerce.

The value of the trade of Peru in five years (including the Department of Loreto) has been as follows (in soles, which weakened from 3·96 to 1 dollar (U.S.) in 1937 to 6·50 in 1941, i.e. worth 15·88 cents, U.S.) :—

|         | 1940        | 1941        | 1942        | 1943        | 1944        |
|---------|-------------|-------------|-------------|-------------|-------------|
|         | Soles       | Soles       | Soles       | Soles       | Soles       |
| Imports | 818,739,462 | 357,827,403 | 333,692,868 | 449,366,231 | 514,423,576 |
| Exports | 405,813,528 | 494,095,283 | 494,962,150 | 440,317,660 | 547,335,952 |

The values of the principal imports and exports for 2 years are shown in the following table (in thousands of soles; 6·50 soles = 1 dollar (U.S.)) :—

| Imports                | 1942       | 1943       | Exports                   | 1942       | 1943       |
|------------------------|------------|------------|---------------------------|------------|------------|
|                        | 1000 Soles | 1000 Soles |                           | 1000 Soles | 1000 Soles |
| Cotton goods           | 22,148     | 29,183     | Cotton                    | 52,868     | 60,441     |
| Woollen goods          | 7,800      | 13,152     | Flax and hemp             | 18,148     | 14,181     |
| Other textiles         | 17,922     | 10,958     | Copper bars               | 75,961     | 70,525     |
| Electrical goods       | 10,881     | 13,426     | Petroleum and derivatives | 114,898    | 104,092    |
| Pharmaceutical goods   | 25,971     | 54,268     | Sugar                     | 112,558    | 74,620     |
| Metals and jewels      | 22,851     | 45,487     | Wool                      | 11,084     | 16,026     |
| Arms & munitions       | 6,316      | 5,823      | Mineral concentrates      | 34,971     | 55,907     |
| Colours, dyes          | 28,591     | 28,608     | Gold bars                 | 22,273     | 23,678     |
| Machinery and vehicles | 61,592     | 75,581     | Bullion & specie          | 15,110     | 5,916      |
| Foodstuffs             | 46,829     | 53,471     |                           |            |            |

## Diplomatic Representatives.

### 1. OF PERU IN GREAT BRITAIN.

**Ambassador.**—Vacant (March, 1946).

**Counsellor.**—Fernando Berckemeyer.

**Secretaries.**—Felipe Benavides and Manuel G. Galdo.

**Military Attaché.**—General Jorge Vargas.

**Naval Attaché.**—Commander Alfredo Souza.

**Air Attaché.**—Ismael Merino Guineux.

**Consul-General (Liverpool).**—Fernandes Davila.

There are Consular representatives at Belfast, Cardiff, Glasgow, Southampton, and other places.

### 2. OF GREAT BRITAIN IN PERU.

**Ambassador.**—Sir Victor Courtenay Walter Forbes, K.C.M.G. (appointed February 11, 1934).

**Military Attaché.**—Lt.-Col. F. E. Kennard-Davis, R.F.

**Air Attaché.**—Wing Commander N. R. Dobree.

**Naval Attaché.**—Capt. A. C. W. Domville, R.N.

**Commercial Secretary.**—T. P. Kavanagh.

**Consul at Lima.**—C. A. G. de J. Meade.

There is a Consul at Iquitos, and Vice-Consuls at Lima, Callao, Arequipa, Mollendo, Paita, Pisco and Talara.

## POLAND.

(RZECZPOSPOLITA POLSKA.)

POLAND became a State by the union of a number of Slavonic tribes settled in the basins of the Vistula, the Warta and the Oder. The earliest chronicled history goes back to the latter half of the tenth century when Mieszko I, together with the whole nation, was converted to Christianity in A.D. 966. Poland reached the height of her power in the period between the fourteenth and the sixteenth centuries under the rule of the Jagiellon dynasty. On the extinction of that line, a system of elective successive kings was introduced and this, leading to an overgrowth of special rights granted to the nobility and gentry, led to the weakening of the central authority.

During the seventeenth century the position of Poland rapidly declined, and eventually, by the three partitions of 1773, 1793, and 1795, the Polish Commonwealth, as it was then called, was divided between Prussia, Russia and Austria.

In 1807, Napoleon formed a part of the Old Commonwealth into a semi-independent State under the title of the Duchy of Warsaw and endowed it with a very liberal constitution, but in 1815, at the Congress of Vienna, this was undone, and Poland was re-partitioned between Prussia, Austria and Russia, except the small district of Cracow, which was constituted an independent republic and remained such until 1848, when it was annexed by Austria, despite a guarantee of neutrality by Prussia, Austria and Russia.

During the Great War (1914-18) Russian Poland was invaded by the

Germans and Austrians, and by the end of 1915 the whole country was occupied by the Austro-German forces.

On November 5, 1916, the German and Austrian Emperors, in a joint manifesto, proclaimed the independence of Poland, but neither the boundaries nor the constitution of the State were defined. Shortly afterwards a Provisional Council of State, consisting of 25 members, all Poles, was summoned in order to draft the constitution of the new State, but this body did not exist for long. In September, 1917, a new Supreme Authority, the Regency Council, consisting of three members, was appointed, and under their auspices a Ministry was formed and a new Council of State summoned. It was composed partly of elected and partly of appointed members, 110 in all. In October, 1918, this Council of State was dissolved by the Regency Council and the convocation proclaimed a Constituent Assembly to determine the constitution of the Polish State and take over the supreme authority.

On November 9, 1918, the Independence of Poland was solemnly proclaimed. On November 10, Marshal Pilsudski returned to Poland, assumed Supreme Power and convoked the Constituent Assembly (*Sejm Ustawodawczy*), which confirmed him in his office. On June 28, 1919, the Treaty of Versailles recognised the Independence of Poland.

On September 1, 1939, Germany invaded Poland, and by September 16 had conquered the western provinces of the country. On September 17, 1939, Russian troops invaded eastern Poland, and by the end of the month practically the whole of Poland was in occupation of both the invaders. On September 29, 1939, the Germans and the Russians signed a treaty establishing the line of demarcation between the two occupations. This was the fourth partition of Poland. Exact statistics are not available, but estimates gave Germany 72,866 sq. miles of Poland (including Lodz, which the Germans call Litzmannstadt), with a population of about 22,140,000, and Russia 77,620 sq. miles, with a population of 13,199,000. This territory included portions of White Russia and Western Ukraine. In the German attack on Russia, launched on June 22, 1941, the Germans overran the Russian occupied portion of Poland, thus getting possession of the whole of Poland. But by March, 1945, the Russian armies had liberated the entire country.

Presidents since the establishment of the Republic were:—

|                                                            |                                                          |

<sup>1</sup> Assassinated.

### Government.

For the Constitution of the Polish Republic, see THE STATESMAN'S YEAR-BOOK for 1939, p. 1236.

*President of the Polish Republic.*—Wladyslaw Raczkiewicz.

On November 30, 1944, the Polish Government was appointed as follows:—

*Prime Minister and Minister of Labour and Social Welfare.*—Tomasz Arciszewski (Socialist).

*Minister for Foreign Affairs.*—Adam Tarnowski.

*Minister of Home Affairs.*—Zygmunt Berezowski (National Democrat).

*Minister of Industry.*—Jan Kwapiński (Socialist).

*Minister of Justice.*—Dr. Bronislaw Kucierz (Christian Democratic Labour).

*Minister of Information.*—Dr. Adam Pragier (Socialist).

*Minister of Preparatory Work Concerning the Peace Conference and Minister of Education.*—Dr. Wladyslaw Folkierski (National Democrat).

*Minister of Reconstruction of Public Administration.*—Stanislaw Sopicki (Christian Democratic Labour).

*Minister of National Defence.*—Lt.-Gen. Dr. Marian Kukiel, K.C.B.

The Government have their seat in London (since June 20, 1940).

In Lublin a Polish Committee of National Liberation is in existence. On December 31, 1944, this Committee resolved to become the 'Provisional Government of Liberated Democratic Poland,' with Boleslaw Bierut as President. A Cabinet was appointed of which M. Osobka-Morawski was Prime Minister and Minister of Foreign Affairs. The Provisional Government consists of 5 members of the Polish Socialist Party, 5 of the Polish Peasant Party, 4 of the Polish Workers' Party and 2 of the Democratic Party. The Lublin Provisional Government entered Warsaw on January 18, 1945.

At the Crimea Conference (February, 1945) the hope was expressed that the Provisional Government functioning in Poland should be re-organized on a broader basis to include democratic leaders in Poland itself and from Poles abroad, the new Government to be called the Polish Provisional Government of National Unity, which should hold free elections as soon as possible.

### Area and Population.<sup>1</sup>

The territory of Poland is made up of territories which after the three partitions of Poland in 1772, 1793 and 1795 belonged to Russia (262,232 sq. kilometres, or 101,258 sq. miles), to Prussia (46,176 sq. kilometres, or 17,830 sq. miles) and to Austria (80,226 sq. kilometres or 30,978 sq. miles). In September, 1938, Poland annexed from Czechoslovakia a territory of 1,086 sq. kilometres, or 419 sq. miles, with a population of 241,698.

The Republic comprised an area of 150,470 sq. miles, and an estimated total population of 34,775,698 (January 1, 1939).

Population of principal towns:—

|                       |           |                     |         |                           |        |
|-----------------------|-----------|---------------------|---------|---------------------------|--------|
| Warsaw . . . . .      | 1,289,000 | Katowice . . . . .  | 154,900 | Torun . . . . .           | 61,900 |
| Lodz . . . . .        | 672,000   | Sosnowiec . . . . . | 130,000 | Stanislawow . . . . .     | 60,000 |
| Lwow . . . . .        | 318,000   | Lublin . . . . .    | 122,000 | Kielce . . . . .          | 58,200 |
| Poznan . . . . .      | 272,000   | Gdynia . . . . .    | 120,000 | Wloclawek . . . . .       | 56,000 |
| Cracow . . . . .      | 259,000   | Chorzow . . . . .   | 110,000 | Grudziadz . . . . .       | 54,000 |
| Wilno . . . . .       | 209,000   | Bialystok . . . . . | 107,000 | Piotrkow . . . . .        | 51,300 |
| Bydgoszcz . . . . .   | 141,000   | Radom . . . . .     | 77,900  | Przemysl . . . . .        | 51,000 |
| Czestochowa . . . . . | 138,000   | Kalisz . . . . .    | 68,300  | Brzesc n/Bugiem . . . . . | 50,700 |

For the towns with over 100,000 inhabitants, population is estimated as at January 1, 1939; for the remainder the figure shown is that of the census on December 9, 1931.

Of the total population, 21,993,400 spoke Polish (68.9 per cent.), 3,222,000 Ukrainian (10.1 per cent.), 2,732,600 Yiddish and Hebrew (8.6 per cent.), 1,219,600 Ruthenian (3.8 per cent.), 989,900 White Ruthenian (3.1 per cent.), 741,000 German (2.3 per cent.), 138,700 Russian (0.4 per cent.), and 878,600 other languages as their mother tongue (2.8 per cent.).

### Religion.

According to the census on December 9, 1931, there were in Poland 20,670,100 (84.8 per cent.) Roman Catholics; 3,336,200 (10.4 per cent.) Greek Catholics; 3,782,500 (11.8 per cent.) Orthodox; 3,113,900 (9.8 per cent.) Jews; 835,200 (2.6 per cent.) Protestants; and other religious 197,900 (0.6 per cent.).

<sup>1</sup> The statistics that follow refer to the situation in Poland before the present war

### Education.

In the Republic of Poland education was free, while elementary education was compulsory. The figures for the whole of the republic for the year 1938-39 were as follows:—28,881 elementary schools, with 91,224 teachers and 4,953,000 pupils; 789 secondary schools, with 284,200 pupils; 74 teachers' colleges, with 8,600 pupils; 764 professional schools with 1,319 departments and 106,415 pupils; 641 continuation trades schools, with 5,526 teachers and 120,300 pupils; 169 lower agricultural schools, with 1,001 teachers and 6,679 pupils.

There were 5 universities in Poland and 28 other institutions of university rank, with 3,409 professors and 48,200 students (1937).

### Justice and Crime.

The judicial power of the Republic of Poland was vested in 1 Supreme Court, 7 High Courts of Appeal, 45 Circuit Courts and 550 District Courts. The total number of judges and public prosecutors was 3,551.

### Social Insurance.

A new comprehensive Act of Social Insurance of March 28, 1933, was in operation as from January 1, 1934.

The dues paid to social insurance institutions amounted in 1937 to 458·1 million zlotys, the total revenue to about 566·0 million zlotys, and the costs of benefits and allowances to 389·1 million zlotys.

### Finance.

Budget for five years, in millions of zlotys:—

|                       | 1935-36 | 1936-37 | 1937-38 | 1938-39 <sup>1</sup> | 1939-40 <sup>1</sup> |
|-----------------------|---------|---------|---------|----------------------|----------------------|
| Revenue . . . . .     | 2,080   | 2,217   | 2,482   | 2,475                | 2,526                |
| Expenditure . . . . . | 2,537   | 2,213   | 2,411   | 2,458                | 2,526                |

<sup>1</sup> Estimates.

On October 1, 1938, the total internal debt amounted to 2,458,000,000 zlotys, and the external debt to 2,515,000,000 zlotys. The external debt comprised (in zlotys): United States, 1,098,000,000; France, 366,000,000; Great Britain, 116,000,000. At the same date obligations due to the execution of the Protocol of Innsbruck amounted to 324,000,000 zlotys.

On August 9, 1940, the German authorities in Poland imposed a special tax on all Poles, amounting to 15 per cent. of income tax, for the special benefit of the German Exchequer.

### Defence.

Poles who have escaped from occupied territory have been organised into a Polish Army, Navy and Air Force. The Polish Army in Great Britain and the Middle East is over 100,000 strong.

The Polish Home Army was disbanded by order of the Government on February 8, 1945.

### NAVY.

The Polish fleet comprises 1 cruiser, 6 destroyers, 6 submarines and a number of smaller craft. With the exception of 3 submarines interned in Swedish ports, all ships have been operating in conjunction with the British Navy since September, 1939.

### Production and Industry.

*Agriculture.*—Poland is essentially an agricultural country. The following table shows the area and yield of the principal crops for two years:—

| Crops.               | Area (acres) |            | Yield (metric tons) |            |
|----------------------|--------------|------------|---------------------|------------|
|                      | 1936-37      | 1937-38    | 1936-37             | 1937-38    |
| Wheat . . . . .      | 4,188,669    | 4,335,000  | 1,926,190           | 2,171,900  |
| Rye . . . . .        | 14,187,698   | 14,566,900 | 5,637,820           | 7,258,400  |
| Barley . . . . .     | 8,045,527    | 2,910,400  | 1,368,410           | 1,871,800  |
| Oats . . . . .       | 5,669,326    | 5,826,800  | 2,342,880           | 2,656,500  |
| Potatoes . . . . .   | 7,364,990    | 7,487,000  | 40,223,970          | 84,568,208 |
| Sugar Beet . . . . . | 322,661      | 871,800    | 8,245,062           | 8,162,400  |

The forest area of Poland is 8,623,900 hectares (21,310,500 acres), of which 3,338,600 hectares (8,250,000 acres) belong to the State, and 5,285,300 hectares (13,060,500 acres) to private owners.

On June 30, 1938, Poland possessed 3,916,000 horses, 10,554,000 cattle, 3,411,000 sheep, 7,525,000 pigs and 420,000 goats.

*Industry.*—The principal industrial areas are: Silesia and Kielce (coalmines and iron and steel); Lodz, Bialystok and Bialsko (textiles); Warsaw, Lodz, Bydgoszcz and Poznan (metallurgical industry); the Carpathians (naphtha and oil-refining). In the textile industry on December 31, 1937, there were 1,925,600 spindles and 46,200 looms in the manufacture of cotton, and 326,200 spindles and 11,500 looms in the manufacture of wool. There were 1,554 saw-mills, employing 41,741 workpeople. In November, 1938, there were 27 refineries, employing 8,200 workmen. The production in 1936 amounted to (in thousands of tons):—Kerosene, 141; petrol, 141; gas-oil, 90, and paraffin-wax and candles, 23. There were in 1938-39, 61 sugar refineries in Poland, producing 491,300 tons of sugar.

The output of the iron and steel industry in 1938 was as follows in metric tons (1937 figures in parentheses):—pig iron, 877,811 (724,296); steel, 1,442,912 (1,450,939); rolled iron and welded, 1,077,502 (1,043,373).

*Mining.*—The following table shows the output of the more important minerals for four years (in metric tons):—

| Product                                  | 1935       | 1936       | 1937       | 1938       |
|------------------------------------------|------------|------------|------------|------------|
| Bituminous coal . . . . .                | 28,545,000 | 29,747,000 | 36,318,000 | 38,104,000 |
| Lignite . . . . .                        | 18,000     | 14,000     | 18,400     | 9,500      |
| Crude petroleum . . . . .                | 518,000    | 450,000    | 456,000    | 502,000    |
| Natural gas (in 1,000 cub. m.) . . . . . | 486,000    | 458,000    | 531,000    | 584,000    |
| Salt . . . . .                           | 515,000    | 552,000    | 553,000    | 644,000    |
| Potassium salts . . . . .                | 384,000    | 434,000    | 521,000    | 567,000    |
| Iron ore . . . . .                       | 532,000    | 468,000    | 792,000    | 873,000    |
| Zinc . . . . .                           | 138,000    | 93,000     | 107,000    | 108,000    |

### Commerce.

Trade for five years (in 1,000 zlotys):—

|                   | 1934    | 1935    | 1936      | 1937      | 1938      |
|-------------------|---------|---------|-----------|-----------|-----------|
| Imports . . . . . | 798,760 | 860,645 | 1,093,445 | 1,254,298 | 1,299,764 |
| Exports . . . . . | 975,342 | 925,040 | 1,026,346 | 1,195,488 | 1,184,712 |

Total trade between Poland (including Danzig) and the United Kingdom for five years (according to Board of Trade returns) was :—

|                                             | 1934      | 1935      | 1936      | 1937       | 1938      |
|---------------------------------------------|-----------|-----------|-----------|------------|-----------|
|                                             | £         | £         | £         | £          | £         |
| Imports from Poland into the United Kingdom | 7,438,308 | 7,281,356 | 9,855,575 | 10,634,231 | 9,543,921 |
| Exports to Poland from the United Kingdom   | 3,001,114 | 3,792,474 | 4,861,763 | 5,702,483  | 5,369,461 |
| Re-exports to Poland                        | 1,261,500 | 1,309,037 | 1,709,587 | 1,924,468  | 2,115,025 |

### Communications.

In 1938, Poland had 39,251 miles of public highways and 9,074 miles of inland waterways, including 3,884 miles of navigable waterways and 167 miles of canals. In 1937, there were 12,700 miles of railways open for traffic in the republic. Of this total, 11,379 miles were main lines, and 1,321 miles narrow-gauge lines. Operating revenue (1937) was 955,000,000 zloty, and expenses 851,000,000 zloty. Nearly all lines were the property of the State.

At the end of 1938 there were in Poland 5,086 post offices, including 2,854 postal agencies, 5,541 telegraph stations, 4,360 telephone exchanges, 5,396 public call stations and 225,000 instruments. The length of telegraph lines was 13,342 miles, of telegraph wire 46,823 miles, of telephone single local wires 660,578 miles, and of inter-urban telephone lines 45,536 miles.

### Shipping and Navigation.

In 1938, 6,498 vessels with a tonnage of 6,508,000 net registered tons and a cargo of 1,526,500 tons entered at the port of Gdynia (called by the Germans *Gotenhafen*), whilst the volume of goods exported through that port was 7,646,900 tons; 6,601 vessels with a tonnage of 4,768,800 net registered tons and a cargo of 1,564,000 tons entered at the port of Danzig, whilst the volume of goods exported by vessels clearing from that port was 5,563,200 tons.

On July 1, 1939, the Polish mercantile marine numbered 63 vessels with a tonnage of 121,630 gross tons.

### Currency and Banking.

The Polish national currency is the *zloty*, subdivided into 100 *grosz*.

The Bank of Poland, created by Act of Parliament, opened its doors on April 28, 1924.

The weights and measures are those of the metric system.

### Diplomatic and Consular Representatives.

#### 1. OF POLAND IN GREAT BRITAIN.

*Ambassador Extraordinary and Plenipotentiary*.—Count Edward Raczyński (appointed November 1, 1934).

*Counsellor*.—W. Kulski.

*Second Counsellor*.—Jozef Zaranski.

*First Secretaries*.—Michał Budny and Jozef Weyko.

*Military Attaché*.—General Bronisław Regulski, C.B.

*Naval Attaché*.—Commander Tadeusz Stoklasa, O.B.E.

*Air Attaché*.—Lt.-Col. Bogdan Jozef Kwieciński, C.B.E.

*Commercial Counsellor*.—Zygmunt Merdinger.

*Financial Counsellor*.—W. Mohl.

*Consul-General*.—Karol Poznanski.

There are consular representatives in Cardiff, Glasgow, Manchester and Southampton.

#### 2. OF GREAT BRITAIN TO THE POLISH GOVERNMENT.

*Ambassador*.—Sir Owen St Clair O'Malley, K.C.M.G. (appointed December 4, 1942).

*Counsellor*.—F. Savery, C.B.E.

In square miles the area of Portugal was:—Continental Portugal, 34,254; islands, 1,236; total, 35,490.

In 1930 the population consisted of 3,255,876 males and 3,570,007 females, or 109 females to every 100 males. Census population of December 1, 1940, 7,722,152 (3,711,748 males and 4,010,404 females). There were thus 108 females to every 100 males.

Estimated population, June 30, 1944, 8,043,315.

The Azores islands are divided into three widely separated groups, with clear channels between, San Miguel together with Santa Maria being in the most easterly. About 100 miles north-west of them lies the central cluster of Terceira, Graciosa, São Jorge, Pico, and Fayal. Still another 150 miles to the north-west are Flores and Corvo, the latter being most isolated and primitive of the islands. San Miguel, Terceira and Pico are the largest, the first measuring 41 miles in length and 9 in breadth, and containing over half the total population of the archipelago. For political and administrative purposes they are divided into three districts, each sending its representatives to the Chamber at Lisbon. The capitals of the three districts are the chief seaports, Ponta Delgada on San Miguel Island, with a population of about 18,000, Horta on Fayal Island, with a population of about 7,000, and Angra do Heroísmo on Terceira Island, with a population of about 11,000.

Vital statistics for three years:—

| Year | Births  | Marriages | Deaths  | Divorces |
|------|---------|-----------|---------|----------|
| 1941 | 184,336 | 55,181    | 134,937 | 686      |
| 1942 | 187,563 | 58,664    | 126,531 | 746      |
| 1943 | 198,101 | 58,455    | 121,887 | 958      |

In 1943 the births included 102,085 boys and 96,016 girls; the deaths, 61,891 males and 51,996 females; still births, 9,199; illegitimate births (1942) 26,206.

At the census of December 1, 1940, the population of Lisbon was 709,179; Oporto, 262,809; Funchal, 48,493; Coimbra, 35,487; Setúbal, 35,071; Braga, 29,875; Évora, 21,851; Ponta Delgada, 21,048; Faro, 19,695.

The number of emigrants in 1943 was 893, of whom 502 went to Brazil, 158 to North America and 233 to other countries.

### Religion.

There is freedom of worship in Portugal; the predominant faith is the Roman Catholic. Portuguese territory is divided into six ecclesiastical provinces, with their sees respectively at Lisbon, Braga, Évora, Luanda (Angola), Lourenço Marques (Mozambique) and Goa (Portuguese India). The Archbishop of Lisbon (Patriarch since 1716 and Cardinal since 1737) has the following suffragans: Guarda, Leiria and Portalegre on the continent; Angra do Heroísmo and Funchal in the adjacent islands, and Cabo Verde in Africa. The Archbishop of Braga (Primate of the Iberian Peninsula) has as suffragans the sees of Aveiro, Bragança, Coimbra, Lamego, Porto, Villa Real and Viseu. The Archbishop of Évora has two suffragans: Beja and Faro. Since the 16th century, Portugal has had the privilege of the Roman Catholic jurisdiction in the Orient (Padroado), at present reduced to Portuguese India possessions and a part of the British India territory. According to the last Concordat with the Holy See (April 15, 1928) the Archbishop of Bombay is alternately Portuguese or English.

On May 7, 1940, a new Concordat was signed between the Portuguese Government and the Vatican. The Concordat was ratified by the National Assembly on May 26, 1940. By the Concordat of 1940 the Metropolitan Church of Luanda (Angola) and Lourenço Marques (Mozambique) were created. The former has as suffragans, besides the see of S. Tomé, the two new dioceses of Nova Lisboa and Silva Porto; the second has as suffragans the two new dioceses of Beira and Nampula. The Archbishop of Goa and Damão (who also holds the titles of Archbishop of Cranganor, Primate of the East and Patriarch of Eastern India) has the privilege of complete jurisdiction over the dioceses of Goa, Cochim and S. Thomé de Meliapor and the semi-privilege (semi-padroado) of the Archbishop of Bombay and the dioceses of Trichinopoly, Mangalor and Quilon. The privilege of the Far East is constituted by the suffragan sees of Macau and Timor (the latter created by the new Concordat), and by the vicariats of Shiu-Hing, Singapore and Malacca.

### Education.

The latest census, 1940, show that 43.23 per cent. of the population could read and write; 49.03 per cent. are still unable to read or write. The remaining 7.74 per cent. corresponds to the infant population under 7 years. Compulsory education has been in force since 1911, and many new measures have been introduced in later years to decrease the number of illiterates. In 1941-42 there were 10,481 primary schools with 546,790 pupils and 13,882 teachers. In private elementary schools, during the last school term (1941-42), 45,086 pupils attended. There was, therefore, a grand total of 591,876 pupils receiving elementary education. Secondary

## PORTUGAL.

(REPÚBLICA PORTUGUESA.)

PORTUGAL has been an independent State since the twelfth century; until 1910 it was a monarchy. The last King was Manoel II. of the house of Braganza-Coburg, born November 15, 1889, younger son of King Carlos I. and Queen Mary Amélie, daughter of Philippe Count of Paris; he died July 2, 1932. On October 5, 1910, the republic was proclaimed, after a short revolution, and a provisional government established with Dr. Theophilo Braga as the Provisional President (October 5, 1910, to August 24, 1911). Thereafter there were duly elected Presidents, as follows:—

|                                                                                         |                                                                                       |
|-----------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
| Dr. Manoel de Arriaga, 24 Aug., 1911—29 May, 1915. <sup>1</sup>                         | Senhor João de Canto e Castro Silva Antunes, 16 Dec., 1918—5 Oct., 1919—5 Oct., 1923. |
| Dr. Joaquim Theophilo Braga, 29 May, 1915—5 Oct., 1915.                                 | Dr. Antonio José de Almeida, 5 Oct., 1919—5 Oct., 1923.                               |
| Dr. Bernardino Luiz Machado Guimarães, 5 Oct., 1915—11 Dec., 1917. <sup>2</sup>         | Senhor Manoel Teixeira Gomes, 5 Oct., 1923—11 Dec., 1925. <sup>1</sup>                |
| Dr. Sidonio Bernardino Cardoso da Silva Paes, 11 Dec., 1917—14 Dec., 1918. <sup>3</sup> | Dr. Bernardino Luiz Machado Guimarães, 11 Dec., 1925—1 June, 1926. <sup>1</sup>       |

A Provisional Government was in office from June 1-Nov. 29, 1926.

<sup>1</sup> Resigned.

<sup>2</sup> Deposed.

<sup>3</sup> Assassinated.

The Powers formally recognised the Republic on September 11, 1911.

On March 19, 1933, the *Estado Novo* constitution (providing for an authoritarian Republic on a corporative basis) was voted upon and adopted. This Constitution provides for a President, to be elected for 7 years by direct suffrage by male Portuguese citizens, of age or emancipated, able to read or write, and those unable to read or write being taxpayers to the State or administrative corporations for direct taxes, and Portuguese citizens, females, of age or emancipated, with a special, secondary school, or university

diploma; and for a National Assembly (one chamber) of 90 Deputies elected for 4 years by direct suffrage. In the two elections for the National Assembly (1934 and 1938) the only lists presented were those organised by the National Union, an association legally recognised, but without the character of a party, whose aim is to defend the principles contained in the Constitution. The electoral law permits, however, the presentation of more than one list of the deputies to be elected. A Privy Council of 10 members assists the President. A Corporative Chamber functions alongside the National Assembly. Capital punishment is abolished, except in the case of war with a foreign power, in the field of battle. Portuguese constitutional law is opposed to liberal or democratic principles.

*President of the Republic.*—General António Oscar de Fragoso Carmona, G.C.B.; born 1870 (elected November 29, 1926; re-elected, March 25, 1928, February 17, 1935, and February 8, 1942).

The Cabinet, which was formed on September 6, 1944, is as follows:—

*Prime Minister and Provisional Minister of Foreign Affairs.*—Dr. António de Oliveira Salazar.

*Minister of Finance.*—Dr. João Pinto da Costa Leite.

*Minister of the Interior.*—Colonel Julio Alves Dias Botelho Moniz.

*Minister of Marine.*—Captain Américo Deus Rodrigues Tomaz.

*Minister of Justice.*—Dr. Manuel Gonçalves Cavaleiro de Ferreira.

*Minister of War.*—Colonel Fernando dos Santos Costa.

*Minister of Public Works and Communications.*—Augusto Cancela de Abreu.

*Minister of Colonies.*—Dr. Marcelo José das Neves Alves Caetano.

*Minister of National Economy.*—Dr. Clotário Luiz Sapico Ribeiro Pinto.

## Area and Population.

Area and population at the census of December 1, 1930, and the census of 1940 are as follows (the Azores (3 districts) and Madeira (1 district), are regarded as an integral part of the republic):—

| Provinces and Districts      | Area in sq. km. | Population    |               | Per sq. km. 1940 |
|------------------------------|-----------------|---------------|---------------|------------------|
|                              |                 | 1930 (Census) | 1940 (Census) |                  |
| <b>Entre Minho e Douro:—</b> |                 |               |               |                  |
| Viana do Castelo . . . . .   | 2,108-38        | 240,261       | 258,596       | 122.7            |
| Braga . . . . .              | 2,730-20        | 414,784       | 482,914       | 176.8            |
| Pórtó . . . . .              | 1,281-88        | 810,253       | 988,288       | 411.2            |
|                              | 7,120-46        | 1,465,298     | 1,679,798     | 285.9            |
| <b>Tras-os-Montes:—</b>      |                 |               |               |                  |
| Vila Real . . . . .          | 4,238-20        | 253,904       | 289,114       | 68.2             |
| Bragança . . . . .           | 6,545-63        | 185,164       | 213,238       | 32.6             |
|                              | 10,783-83       | 439,158       | 502,347       | 46.5             |
| <b>Beiras:—</b>              |                 |               |               |                  |
| Aveiro . . . . .             | 2,703-20        | 381,694       | 429,870       | 158.7            |
| Viseu . . . . .              | 5,055-80        | 481,473       | 465,568       | 98.0             |
| Coimbra . . . . .            | 3,955-76        | 387,808       | 411,677       | 104.1            |
| Guarda . . . . .             | 5,496-16        | 267,614       | 294,166       | 53.5             |
| Castelo Branco . . . . .     | 6,703-68        | 265,578       | 299,670       | 44.7             |
|                              | 23,919-60       | 1,734,162     | 1,900,946     | 79.4             |

instruction is supplied in two types of schools: in the *liceus* and in schools of technical instruction. There were 43 *liceus*, with 15,344 pupils and 1,047 teachers. In private schools, during the last school term, 17,886 attended. Professional and technical secondary instruction is supplied in 59 schools of the State, with 35,492 pupils and 1,150 teachers. In private schools, 2,429 attended. Vocational education (commercial, industrial and agricultural) is supplied in 8 schools, with 1,724 pupils and 162 teachers. For higher education there are 3 universities: at Lisbon (founded in 1911), Coimbra (founded 1290) and Oporto (founded 1911). In 1940-41 the number of students and teachers at the universities was: Lisbon, 3,373 and 220; Coimbra, 1,611 and 136, and Oporto, 1,636 and 127. There is also the Technical University at Lisbon (founded in 1930), which in 1941-42 had 128 professors and 1,678 students. There are also special colleges for music and art (Lisbon, Coimbra and Oporto), commercial, industrial and agricultural schools (of secondary schools status) and a military school and a naval school (both at Lisbon). There is also one colonial high school, with 16 professors and 352 students in 1941-42.

In 1942 there were 518 newspapers and periodicals published in Portugal.

### Justice and Crime.

The republic is divided for judicial purposes into 157 'comarcas'; in every comarca there is a lower court. In the comarca of Lisbon there are 18 lower courts (9 for criminal procedure and 9 for civil or commercial cases); in the comarca of Oporto there are 11 lower courts (5 for criminal procedure and 6 for civil or commercial cases); at Braga, Coimbra, Setúbal, Aveiro and Funchal there are 2 courts. There are 8 courts of appeal (Tribunais de Relação) at Lisbon, Coimbra and Oporto, and a Supreme Court in Lisbon (Supremo Tribunal de Justiça). There are also 48 municipal courts. The municipal courts are also lower courts, similar to those of the comarcas; their service is, however, limited.

### Finance.

The revenue and expenditure for five years are shown as follows (in 1000 escudos):—

|                       | 1940      | 1941      | 1942      | 1943      | 1944 <sup>1</sup> |
|-----------------------|-----------|-----------|-----------|-----------|-------------------|
| Revenue . . . . .     | 2,598,778 | 3,015,465 | 3,081,577 | 4,847,390 | 3,768,251         |
| Expenditure . . . . . | 2,432,585 | 3,820,180 | 2,954,613 | 3,984,615 | 3,768,406         |

<sup>1</sup> Estimates.

The items of estimated revenue and expenditure for 1944 were as follows:—

| Revenue                                       | 1944          | Expenditure                                 | 1944          |
|-----------------------------------------------|---------------|---------------------------------------------|---------------|
|                                               | 1,000 Escudos |                                             | 1,000 Escudos |
| Ordinary:                                     |               | Ordinary:                                   |               |
| Direct taxes . . . . .                        | 969,450       | General charges—                            | 891,406       |
| Indirect taxes . . . . .                      | 863,010       | Public debt                                 |               |
| Industries under special tax régime . . . . . | 140,542       | Presidency, legislative bodies and pensions | 207,523       |

| Revenue                                                            | 1944          | Expenditure                                                                                    | 1944          |
|--------------------------------------------------------------------|---------------|------------------------------------------------------------------------------------------------|---------------|
|                                                                    | 1,000 Escudos |                                                                                                | 1,000 Escudos |
| Yields of various services . . . . .                               | 158,118       | Ministries—                                                                                    |               |
| State domain and industries and participation in profits . . . . . | 188,745       | Finance . . . . .                                                                              | 192,380       |
| Yield of capital, shares, etc. . . . .                             | 5,723         | Interior . . . . .                                                                             | 269,061       |
| Reimbursements, etc. . . . .                                       | 182,846       | Justice . . . . .                                                                              | 70,008        |
| Consignment of receipts . . . . .                                  | 115,818       | War . . . . .                                                                                  | 598,986       |
|                                                                    |               | Navy . . . . .                                                                                 | 228,588       |
|                                                                    |               | Foreign affairs . . . . .                                                                      | 46,757        |

On January 1, 1944, the public debt was as follows:—Consolidated debt: 2½ per cent. (1943), 356,478,000 escudos; 3 per cent. (1942), 1,832,095,000 escudos; 3½ per cent. (1941), 498,921,000 escudos; 3½ per cent. (1936), 650,329,000 escudos; 4 per cent. (1934), 482,471,000 escudos; 4 per cent. (1940) (centenários), 1,449,868,000 escudos; 4½ per cent. (1934), 669,873,000 escudos. Internal redeemable debt: titles, 755,389,000 escudos; Caixa Geral de Depósitos, 178,632,000 escudos; Bank of Portugal, 1,025,415,000 escudos; others, 290,000 escudos. External redeemable debt: 862,799,000 escudos; grand total, 8,760,420,000 escudos; settlements, 2,414,584,000 escudos; debt value, 6,345,936,000 escudos.

### Defence.

#### ARMY.

Military service is compulsory for every citizen from 20 years of age to 48. The terms of service are 6 years in the active troops, 16 years in the licenced troops, and 6 years in the territorial troops.

Portugal and the adjacent islands are divided into 4 military regions: Oporto, Coimbra, Tomar and Evora, and 3 military Governments: Lisbon, Azores and Madeira.

The total peace strength in January, 1940, was 3,200 officers and 26,800 other ranks, organised in 16 infantry regiments, 13 infantry independent battalions, 1 battalion of combat cars, 8 battalions of machine-guns, 8 artillery regiments, 5 artillery independent groups, 2 artillery independent batteries, 2 cavalry brigades, 3 cavalry regiments, 1 motorised regiment, etc. The overseas garrisons comprise 330 officers and 11,000 other ranks.

The Republican Guard consists of 5 infantry battalions and 1 cavalry regiment, with a total of 220 officers and 5,500 other ranks.

The Fiscal Guard consists of 8 battalions in the Continent and 4 independent companies in the islands, and its strength in January, 1940, was 100 officers and 5,000 other ranks.

The moral and physical preparation of youth is assured by an organisation named *Mocidade Portuguesa*, comprising all males from 7 to 20 years of age.

There is also a voluntary force named *Legião Portuguesa* with 3,400 officers and 49,000 other ranks.

Total trade between Portugal and the United Kingdom in thousands of pounds for five years (Board of Trade return):—

|                                  | 1934  | 1935  | 1936  | 1937  | 1938  |
|----------------------------------|-------|-------|-------|-------|-------|
| Imports from Portugal into U.K.  | 1,179 | 2,121 | 3,856 | 4,312 | 3,668 |
| Exports to Portugal from U.K.    | 3,629 | 4,174 | 2,777 | 3,068 | 2,957 |
| Re-exports to Portugal from U.K. | 157   | 229   | 354   | 597   | 271   |

### Shipping, Navigation and Communications.

In 1943, 5,782 vessels of 6,555,000 tons entered the ports of Portugal (continental and islands). Of those entering, 4,920 (4,560,969 tons) were Portuguese, 221 (612,483 tons) British, and 318 (858,331 tons) Spanish. In January, 1943, the merchant marine of Portugal consisted of 945 vessels of 315,534 tons.

Portugal has 824 miles of State-owned railway, 735 miles being normal gauge and 89 miles narrow gauge. According to an agreement dated March 11, 1927, the Companhia dos Caminhos de Ferro Portugueses, to which a number of private lines already belong, took over two sections of the State railways in return for an annual contribution of a fixed percentage of earnings. There are also six privately owned lines 1,177 miles in length, 882 miles normal and 295 miles narrow gauge. In 1943, total railway mileage was 2,224 miles (1,752 miles of broad gauge and 472 miles of narrow gauge). In 1943, 34,472,094 passengers were carried and 5,182,167 tons of merchandise transported. There were in 1943, 25,166 km. (15,602 miles) of road. Length of telegraph lines in 1942 was 13,530 km. (8,389 miles); number of offices, 887; of telegrams, 3,182,138 sent and 3,395,831 received. There were in 1940 32 wireless stations. The State owned 52,435 km. (32,541 miles) of telephone line in 1942, and the Anglo-Portuguese Telephone Co. Ltd. owned (1941) 139,047 km. (86,209 miles) of lines.

### Banking, Money, Weights and Measures.

The unit of currency is the escudo of 100 centavos, which contains 0.068567 grams of fine gold. It was stabilised on June 9, 1931, and the paper currency re-linked to gold when the notes of the Bank of Portugal became payable in gold or its equivalent in foreign currency. The mint par of the escudo with the British sovereign was fixed at 110 escudos = 1 sovereign, and when Great Britain suspended the gold-standard, in September 1931, Portugal fixed the value of the escudo at 110 escudos = 1 pound sterling.

At present there are: gold coins of 500 and 1,000 escudos (called the *dubrai* and half *dubrai*); silver coins of 10, 5, and 2½ escudos; Alpaca coins of 1 and ½ escudo (50 centavos); and bronze coins of 20, 10, and 5 centavos. New 20- and 10-centavo coins, issued in 1943, were made of an alloy of 95 per cent. copper, 3 per cent. zinc, and 2 per cent. tin, and were of a size, composition, and design entirely new in Portugal.

The one bank of issue for the mainland of the country and adjacent islands, is the Bank of Portugal, founded November 19, 1846. By decree of June 29, 1931, its constitution was modified and its privileges were prolonged until June 30, 1961. The capital of the Bank was fixed at 100,000,000 escudos. It is the treasury of the State and its reserve in gold or foreign gold securities must be not less than 80 per cent. of the amount of its notes in circulation,

and other eight liabilities. The limit of the note circulation, in accordance with this per cent. reserve, was fixed at 2,200 million escudos; nevertheless the Bank may issue notes above this limit provided the excess is entirely covered by gold coin or bullion. The Bank issues notes of 1,000, 500, 100, 50, and 20 escudos. The cash on hand of the bank on December 31, 1943, was: gold, 1,399,878,910 escudos. The notes in circulation amounted to 6,909,768,887 escudos.

There are 35 other banks registered on the mainland and 7 in the islands, with cash in hand on December 31, 1943, 4,151,171,000 escudos; bills, 2,180,098,000 escudos; deposits, 7,593,948,000 escudos. The deposits in the Savings Banks and General Deposit Bank (State) amounted to 5,822,516,000 escudos.

The metric system of weights and measures is the legal standard. The chief old measures still in use are:—

|                   |   |                 |                   |
|-------------------|---|-----------------|-------------------|
| The <i>Almude</i> | { | of Lisbon = 3.7 | imperial gallons. |
| „ <i>Alqueire</i> | „ | Oporto = 5.6    | „                 |
| „ <i>Alqueire</i> | „ | „ = 0.36        | „ bushel.         |
| „ <i>Moio</i>     | „ | „ = 2.78        | „ quarters.       |

### Diplomatic Representatives.

#### 1. OF PORTUGAL IN GREAT BRITAIN.

*Ambassador Extraordinary and Plenipotentiary.*—The Duke of Palmella (appointed September 14, 1943).

*Counsellor.*—Antonio de Faria.

*Military Attaché.*—Col. Artur Mendes de Magalhaes.

*Second Secretary.*—Henrique Caldeira Queiroz.

*Third Secretary.*—Antonio Potier.

*Commercial Counsellor and Consul-General.*—Vasco Pereira da Cunha.

There are Consular representatives at Cardiff, Newcastle, Liverpool, Glasgow, Aberdeen, Dundee, Leith, Glasgow, Hull, Southampton, Bristol, Dartmouth, Falmouth, Plymouth, Port Talbot, Swansea, Barrow-in-Furness, Manchester, Birmingham, Dover, Middlesbrough and Leeds.

#### 2. OF GREAT BRITAIN IN PORTUGAL.

*Ambassador.*—Rt. Hon. Sir Ronald Hugh Campbell, G.C.M.G. (appointed December 22, 1940).

*Minister.*—Henry Ashley Clarke.

*First Secretary.*—I. A. D. Wilson-Young.

*Second Secretary.*—J. N. O. Curle.

*Commercial Secretary.*—T. E. A. Muntz.

*Naval Attaché.*—Captain F. C. Bradley, R.N.

*Military Attaché.*—Brigadier A. R. Barter.

*Air Attaché.*—Wing-Commander J. S. Schreiber.

*Consul-General.*—S. H. Gudgeon, C.B.E.

There are Consular representatives at Portimao, Villa Real de San Antonio, Faro, Praia, Setubal, Oporto, Funchal (Madeira), St. Michael's (Azores), St. Vincent (Cape Verde), Fayal (Azores).

*Consul-General (Acting)* at Lourenço Marques.—F. J. Patron, O.B.E.

*Consul-General* at Louanda.—V. V. Cusden, O.B.E.

There are Consuls at New Goa (Panjim), Beira and Macao (China), and Vice-Consuls at Lobito, San Thomé and Mozambique.

## NAVY.

The Portuguese navy comprises:—6 aloops (*Afonso de Albuquerque, Bartolomeu Dias, Pedro Nunes, João de Lisboa, Gonçalo Velho and Gonçalves Zarco*, all but two built in England); 5 destroyers (*Vouga, Dão, Douro, Tejo* and *Lima*, 1,239 tons, all built in England, except two); 6 gunboats (*Diu, Ibo, Mandovi, Zaire*, 403 tons; *Faro, Lagos*, 300 tons); 3 submarines (813 tons); 1 sailing training ship (*Sagres*, 3,116 tons); 3 surveying vessels; 3 river gunboats; 1 oiler and 9 auxiliary service ships. An oiler and a number of fishery protection vessels are building at Lisbon. A naval air service was established in September, 1917. On December 31, 1941, there were 46 machines. The naval personnel on December 31, 1943, included 757 officers and 5,482 other ranks.

## Production and Industry.

The following figures show the area and yield of the chief crops in 1941 and 1942:—

| Crop         | 1941            |                     | 1942            |                     |
|--------------|-----------------|---------------------|-----------------|---------------------|
|              | Area (hectares) | Yield (metric tons) | Area (hectares) | Yield (metric tons) |
| Wheat . . .  | 555,384         | 448,830             | 577,936         | 524,252             |
| Maize . . .  | 360,124         | 386,764             | 376,957         | 382,382             |
| Oats . . .   | 169,946         | 84,887              | 213,527         | 156,236             |
| Barley . . . | 68,700          | 58,614              | 81,326          | 79,974              |
| Rye . . .    | 182,956         | 90,029              | 151,853         | 122,778             |
| Rice . . .   | 25,417          | 89,786              | 26,428          | 78,500              |

Other products in 1942 were:—Beans, 53,288 metric tons, and potatoes, 835,205 tons. Wine (8,334,775 hectolitres in 1942) and olive oil (417,894 hectolitres in 1942) were also produced.

Wool production in 1942 was 5,639 metric tons; in 1943, 6,306 tons.

In 1940 Portugal (continental and islands) possessed 85,040 horses, 122,832 mules, 245,448 asses, 973,226 oxen, 3,948,320 sheep, 1,243,890 goats and 1,252,975 pigs.

Cork is an important product; most of it is exported in the crude condition; in 1943 exports were 67,087 metric tons of unmanufactured cork and 9,601 tons of manufactured cork. The production of resin and turpentine is an important industry. The exports in 1943 were 29,103 and 3,775 metric tons respectively.

Portugal possesses considerable mineral wealth, but for want of electric power, valuable mines remain unworked. The mineral production in 1943 included coal, 498,808 metric tons; cupriferous pyrites, 109,994 metric tons; copper (precipitated), 278 metric tons; wolfram, 5,671 metric tons; kaolin, 2,145 metric tons; sulphur, 11,060 metric tons.

The fishing industry is of importance. In 1943 there were 39,974 men and boys employed, with 15,205 boats. In 1943, the sardine catch was 132,923 metric tons, valued at 310,684,000 escudos. Exports of tinned sardines amounted to 37,548 tons in 1943, valued at 756,422,000 escudos. The centre of the sardine industry is at Setúbal, about 10 miles south of Lisbon. It is the second principal industry in the country.

A characteristic industry of Portugal is the manufacture of *azulejos* or porcelain tiles. This was inherited from the Moors, and tiles are used extensively for interior and exterior decoration of public and private buildings. At Sacavem, near Lisbon, a large factory makes tiles and china-

ware. There are porcelain factories at Vista Alegre, Gaya and Coimbra. The output of cement in 1942 and 1943 was 243,635 and 246,799 tons respectively. In Peniche, an old fishing village on the north coast of Lisbon, there is a local pillow lace industry, also in Vila do Conde district of Oporto. Madeira is also famous for embroideries.

## Commerce.

Imports for consumption and exports (exclusive of coin and bullion and re-exports) for six years:—

| Year | Imports       | Exports       | Year | Imports       | Exports       |
|------|---------------|---------------|------|---------------|---------------|
|      | Escudos       | Escudos       |      | Escudos       | Escudos       |
| 1938 | 2,800,357,895 | 1,189,274,991 | 1941 | 2,468,268,098 | 2,972,414,733 |
| 1939 | 2,066,650,600 | 1,359,182,000 | 1942 | 2,476,523,630 | 3,938,866,153 |
| 1940 | 2,441,959,000 | 1,618,723,000 | 1943 | 3,941,383,269 | 4,034,902,298 |

The principal articles of import and export in 1942 and 1943 were:—

| Article                 | Imports       |               | Article          | Exports       |               |
|-------------------------|---------------|---------------|------------------|---------------|---------------|
|                         | 1942          | 1943          |                  | 1942          | 1943          |
|                         | 1,000 Escudos | 1,000 Escudos |                  | 1,000 Escudos | 1,000 Escudos |

According to the Colonial Act, published on July 8, 1930, and included in the Constitution approved by plebiscite on March 19, 1933, the Portuguese colonies are under control of the Metropolis. Each one has a Governor and enjoys financial and administrative autonomy. Their budgets are under approval of the Minister for the Colonies. The Portuguese colonies are not allowed to contract public loans in foreign countries. The Portuguese State defends and protects the natives and the ownership of the lands and cultivations. Forced labour of natives is forbidden, except for public service, punishments or payment of taxes.

The **Cape Verde Islands** consist of ten islands and five islets which are administered by a Governor, whose seat is at Praia, the capital. The islands are divided into two groups, named Barlavento (windward) and Sotavento (leeward); the prevailing wind being north-east. The former is constituted by the islands of São Vicente, Santo Antão, São Nicolau, Santa Luzia, Sal and Boa Vista, and the small islands named Branco and Raso. The latter is constituted by the islands of Sant' Iago, Maio, Fogo and Brava, and the small islands named Rei and Rombo. São Vicente is a coaling station which supplies all navigation to South America. The total area is 4,033 square kilometres (1,557 square miles). The population (census of December 1, 1940) was 181,286 (5,580 Europeans, 116,910 half-castes, 57,718 negroes, 167 other races and 911 unknown). There are 15 primary schools and one secondary school in the island of São Vicente. The chief products are castor oil, coffee, mustard, brandy, oranges and hides. Other products are maize, manioc, beans, tobacco, cane sugar, sweet potatoes. The coffee is of excellent quality; exports in 1942 were 51,378 kilos. The total number of animals in 1942 was 18,015 (8,321 goats, 3,561 oxen, 3,086 pigs and 3,025 asses). The estimated public revenue for 1944 is 26,205,000 escudos, and the expenditure 26,205,000 escudos. Public debt, 1943, 8,573,000 escudos. Imports in 1942, 68,642,614 escudos (special commerce); exports, 19,606,958 escudos (special commerce). The metric system of weights and measures is used. The currency is Portuguese. In 1943, 140 steamers of 267,604 tons (net) entered and 142 of 266,860 tons (net) cleared the ports of the colony. In the coasting trade, 720 steamers of 82,232 tons (net) entered and 735 of 86,246 tons (net) cleared.

*Governor.*—Commander João de Figueiredo.

**Portuguese Guinea**, on the coast of Guinea, was probably discovered in 1446 by Nuno Tristão. It became a separate colony in 1879. It is bounded

by the limits fixed by the convention of May 12, 1886, with France, and is entirely enclosed on the land side by French possessions. It includes the adjacent archipelago of Bijagoz, with the island of Bolama. The capital and principal port of the colony is, since 1942, Bissau. Area is 36,125 square km. (13,944 square miles); population (census, 1940), 351,089 (1,419 Europeans, 3 yellow races, 2,200 half-castes, 10 Indians and 347,547 negroes). There are 21 elementary schools. The chief commercial products are rice, wax, oil, seeds, hides. Estimated public revenue for 1944 is 41,150,000 escudos, and expenditure 41,150,000 escudos. Military force consists of 21 officers and 63 other ranks (European). Imports in 1943, 95,286,000 escudos; exports, 97,470,000 escudos (special commerce). The chief port is Bissau. Other ports: Bolama, Cacheu and Bubaque. In 1943, 65 steamers of 80,324 tons (net) entered and 65 of 80,324 tons (net) cleared the ports of the colony. There were 593 miles of telegraph lines and 1,863 miles of roads (1942).

*Governor.*—Captain Ricardo Vaz Monteiro.

The islands of **S. Tomé and Príncipe**, which are about 125 miles off the coast of Africa, in the Gulf of Guinea, were discovered in 1471, and now constitute a province under a Governor. Area of the islands 372 square miles. According to the census of 1940 the population of the two islands was 60,490, distributed as follows: 995 Europeans, 2,804 half-castes, 112 Indians and 56,666 negroes. The chief commercial products are cacao, coffee, coconut and copra, palm oil and cinchona. In 1941 there were 23,627 animals in the colony. Revenue, 1944, 13,170,000 escudos; expenditure, 13,170,000 escudos. Public debt, 1944, 2,926,000 escudos. Imports at S. Tomé and Príncipe (1943), 25,780,000 escudos; exports, 55,307,000 escudos (special commerce). On S. Tomé a railway of 10 miles is open for traffic. There are 28 miles in course of construction. There are 202 miles of roads (1942). In 1943, 69 steamers of 243,620 tons (net) entered and 69 of 243,620 tons (net) cleared the ports.

*Governor.*—Major Amadeu Gomes de Figueiredo.

**Angola (Portuguese West Africa)**, with a coast-line of over 1,000 miles, is separated from French Congo by the boundaries assigned by the convention of May 12, 1886; from the Belgian Congo by those fixed by the convention of July 22, 1927; from British South Africa in accordance with the convention of June 11, 1891, and from South-west Africa in accordance with that of December 30, 1886. The Congo region was discovered by the Portuguese in 1482, and the first colonising mission, composed of soldiers, missionaries and settlers, arrived there in 1491. Luanda was founded in 1575. It was taken by the Dutch artisans in 1641, and occupied by them until 1648. The area is 1,246,700 square km. (481,351 square miles). It is under a Governor-General, who resides at Luanda. By a decree of May, 1934, it is divided into 5 provinces with 14 administrative districts. The important towns are S. Paulo de Luanda (capital), founded in 1575, Benguela, Mossamedes, Lobito, Sá da Bandeira, Malange and Huambo (Nova Lisboa), the future capital. The population numbered 3,738,010 in 1940 (44,083 Europeans, 28,305 half-castes, 3,665,829 negroes and 63 other races).

For primary education there are 73 schools; for secondary education, 2 schools, viz. a Central College at Luanda and a National College at Sá da Bandeira (Huila). There are also 13 professional schools.

The military force is composed of 116 officers and 266 other ranks (Europeans).

By decree of July 22, 1939, only the escudo currency is in use in Portuguese East Africa.

The metric system is used. Certain English weights and measures are also in current use.

*Governor-General.*—General João Tristão de Bettencourt.

**Portuguese India** consists of **Gôa**, containing the capital, Nova-Gôa, or Pangim, together with the islands of Angediva, São Jorge and Morcegos, on the Malabar coast; Damão, with the territories of Dadará and Nagar-Aveli, on the Gulf of Cambaia; and Diu, with the continental territories of Gocola and Simbor, on the coast of Gujerat. The total area of the colony is 3,983 square km. (1,537 square miles), with a population in 1940 of 624,177. In 1938 there were 503 elementary schools, 12 secondary schools, also a medical school and a teachers' training college. There are 507 salt works employing 1,968 men, the production (1939) amounting to about 26,095 tons. In Damão there are 11 salt works, and in Diu 5. In 1906 deposits of manganese were discovered near Mormugão and 6 concerns with 21 mines are at work. The Mormugão railway (51 miles) connects this port with the lines of British India. The estimated revenue and expenditure in 1944 balanced at 46,650,000 escudos. The debt of the colony on January 1, 1944, was 13,624,000 escudos. The trade is largely transit. In 1940 the imports by sea and land amounted to 102,018,420 escudos, the exports to 19,910,940 escudos. Chief exports are: coconuts, fish (fresh and salted), spices, cashu-nuts, salt and copra. Roads, 730 miles. There are in Portuguese India 67 telegraph offices and 536 kilometres of telegraph line and 1,330 kilometres of telephone line. In 1940 there entered at the ports of this colony 2,852 ships of 698,414 tons, and cleared 2,908 vessels of 694,775 tons.

*Governor-General.*—Colonel José Ricardo Pereira Cabral.

**Macao**, in China, situated on an island of the same name at the mouth of the Canton River, which came into possession of the Portuguese in 1557, forms with the two small adjacent islands of Taipa and Colôane a province, the city being divided into two wards, one inhabited by Chinese and the other by non-Chinese, each having its own administrator. The boundaries have not yet been definitely agreed upon; at present Portugal holds the territory in virtue of the treaty with China of December 1, 1887. The area of the colony is 15 square kilometres (6 square miles). The population, according to the census of 1940, is 374,737 (8,989 Portuguese, 365,748 of various nationalities, 2,037 being Europeans, 419 Indians, 2,264 half-castes, 361 negroes and 369,716 of the yellow races). Estimated revenue and expenditure in 1944 balanced at 53,617,000 escudos. The debt of the colony in 1939 was 148,603 patacas. For education there are the Seminary of S. José, the Central College of Macao, and 22 elementary schools. The trade, mostly transit, is in the hands of Chinese. Imports in 1938, 15,723,585 patacas; exports, 9,143,627 patacas. The colony has 39 miles of telephone line, 3 telegraph stations and 2 wireless stations. It is served by various British, Japanese and Dutch steamship lines. In 1938, 6,104 steamers of 3,116,410 tons entered and 6,406 steamers of 3,117,571 tons cleared the port.

*Governor.*—Commander Gabriel Mauricio Teixeira.

**Portuguese Timor** consists of the eastern portion of the island of that name in the Malay Archipelago, with the territory of Ambeno and the neighbouring islands of Pulo Cambing and Pulo Jako, a total area of 7,830 square miles. By treaty of April, 1859, ratified August 18, 1860, the island was

divided between Portugal and Holland; by convention of October 1, 1904, ratified in 1908, a boundary arrangement was made between the two Governments, certain *enclaves* being exchanged and the possession of other territories settled. This possession, formerly administratively joined to Macao, was in 1896 (confirmed in 1926) made an independent province. Population in 1936, 463,796. There were (1938) 1 secondary school and 26 primary schools. Estimated public revenue and expenditure for 1944 balanced at 9,430,000 escudos. Public debt on December 31, 1943, was 32,183,000 escudos. Imports (1940), 3,880,000 escudos; exports, 4,154,000 escudos. Chief exports are: coffee, sandal-wood, sandal-root, copra and wax. The port is Dilly, the capital. In 1939, 197 ships of 91,215 tons entered and cleared the ports of the colony. There is a good road system of 677 miles, telephone lines of 1,656 miles and a wireless station at Dilly.

*Governor.*—Captain Manuel de Abreu Ferreira de Carvalho.

The ordinary budget for 1944 balanced at 831,424,000 angolares. The public debt of Angola on December 31, 1943, stood at 1,040,505,000 angolares. This included the colony's debt to Portugal amounting to 846,399,000 angolares.

The principal crops are coffee, maize, sugar, palm oil and palm kernels. Other crops are cotton, wheat, tobacco, cocoa and sisal. Wax is also an important product. The country possesses valuable diamond deposits. Copper and lignite exist but are not worked. Salt is also found.

Imports, 1942, 828,126,702 angolares; exports, 480,383,049 angolares. The chief imports of the province are textiles, coal, and foodstuffs, and the chief exports were coffee, maize, diamonds, sugar, wax and coconut. The trade is largely with Portugal. Exports to United Kingdom (Board of Trade figures), 38,764t. in 1937, 34,118t. in 1938; imports from United Kingdom, 127,016t. in 1937, 161,896t. in 1938. Re-exports to Angola from U.K. were 3,901t. in 1937 and 2,467t. in 1938.

The Portuguese National Navigation Company has most of the carrying trade to and from Europe. The length of railways open for traffic is 1,442 miles. The Benguela Railway runs from Lobito to the Belgian Congo border. The line then goes through the Belgian Congo and Rhodesia, ending at Beira in Mozambique. The total length of track, from Lobito to Beira, is 4,711 kilometres (2,920 miles). There is a further extension in the direction of Lourenço Marques; the line goes through Rhodesia, as far as Mafeking, and from thence to Komati Port, in the South African Union territory. There it connects with the Lourenço Marques Railway. The total length of railroad, from Lobito to Lourenço Marques, is 5,315 kilometres (3,295 miles). There are 23,350 miles of roads. Angola is connected by cable with East, West and South African telegraph systems. There are 5,635 miles of telegraph lines, 648 miles of telephone lines, 11 telephone stations, 110 telegraph stations and 13 wireless stations.

As from July 1, 1928, the Angolan escudo has been superseded by a new unit the 'angolar,' of 100 centavos, 80 angolares being the equivalent of 100 Angolan escudos. The angolar is equal to the Portuguese escudo. A new coin has also been introduced, called a 'macuta,' equal to 5 centavos.

*Governor-General.*—Commander Vasco Lopes Alves.

**Mozambique (Portuguese East Africa)** was discovered by Vasco da Gama's fleet on March 1, 1498, and was first colonized in 1505. It is separated from British Central and South Africa by the limits of the arrangement between Great Britain and Portugal in June, 1891. It is separated from Tanganyika Territory, according to agreements of October and December, 1886, and July, 1890, by a line running from Cape Delgado at 10° 40' S. lat. till it meets the course of the Rovuma, which it follows to the point of its confluence with the 'Msinje, the boundary thence to Lake Nyasa being the parallel of latitude of this point. In accordance with the Treaty of Versailles the Peace Conference on September 23, 1919, allotted to Portugal 'as the original and rightful owner' the territory south of the Rovuma, known as the 'Kionga Triangle' (formerly part of German East Africa).

Portuguese East Africa, with an area of 297,731 square miles, is now administered by the State, since July 19, 1942, when the State took over the territory of Manica and Sofala, which is to be incorporated as a fourth province of the colony, with Beira (population, 12,988) as its capital. The Companhia da Moçambique was then wound up on the expiration of its charter. Lourenço Marques (population 47,890 in 1936) is the capital of the colony. The colony is now divided into four provinces: Sul do Save, Manica and Sofala, Zambesia and Niassa. Sul do Save, comprising the

districts of Lourenço Marques and Inhambane, has been increased and now consists of all the territories of the colony south of the Save; the chief town is Lourenço Marques. The province of Manica and Sofala, comprising the districts of Beira and Tete, is 'limited to the south of the river Save, to the east by the Indian Ocean, the river Ghire (Shire), and the frontier of Nyasaland, to the west by the frontier of Southern Rhodesia, to the north-east by the river Zambeze, from the sea to the confluence of the Ghire, and to the north by the frontier of Northern Rhodesia.' The province of Zambesia has been reduced in size and now consists of the old district of Quelimane; the chief town is Quelimane. The old boundaries of the province of Niassa are maintained; the chief town is Nampula.

There is a Government Council composed of officials and elected representatives of the commercial, industrial and agricultural classes, and also an Executive Council. The population of the colony, according to the census of 1940, was 5,081,266, of which 27,438 were Europeans, 15,461 half-castes, 1,449 yellows, 9,147 Indians and 5,027,591 negroes. In 1942 there were 697 primary schools with 103,081 pupils, 1 high school with 614 pupils, and 48 professional schools with 3,232 pupils.

The military force of the Colony consists of 219 officers and 2,121 other ranks (Europeans).

Revenue and expenditure for 1944 balanced at 658,524,000 escudos. Public debt on December 31, 1943, was 5,000,000 escudos. The chief products of the province are sugar, maize, cotton, copra, sisal and mining products. In 1942 there were 502,713 oxen, 187,920 goats, 63,227 sheep and 40,185 pigs. The principal ports are: Lourenço Marques (791 vessels of 2,422,704 tons (net) entered in 1942, and 791 with 2,430,252 tons (net) cleared); Beira (466 vessels with 1,295,015 tons (net) entered in 1942, and 458 of 1,263,898 tons (net) cleared), and Mozambique (146 vessels of 226,741 tons (net) entered in 1942, and 144 of 226,805 tons (net) cleared). Imports in 1943 amounted to 561,798,000 escudos, and exports to 489,768,000 escudos. There were 2,145 kilometres of railway and 29,606 kilometres of roads (1941).

Trade with United Kingdom (Board of Trade figures): exports to United Kingdom, 207,521t. in 1937, 110,602t. in 1938; imports from United Kingdom, 1,531,536t. in 1937, 1,443,993t. in 1938; re-exports from United Kingdom, 24,280t. in 1937, 28,394t. in 1938. There are in the area administered by the Government 703 miles of railway owned by the State, and 13,879 miles of road, of which 2,839 are trunk roads.

The Delagoa Bay Railway has a length of 57 miles in Portuguese territory and is continued for 290 miles to Pretoria. The Beira Railway has a length of 200 miles in the territory formerly administered by the Mozambique Co., and links up at the frontier with the Rhodesian Railway system. The Trans-Zambesia Railway, 175 miles in length, from Dondo, on the Beira Junction Railway, to Murraça, on the southern bank of the Zambesi, was opened for traffic on July 1, 1922. On the northern bank of the Zambesi, the Central Africa Railway (61 miles long, of which 45 miles are in Portuguese territory) connects at Port Herald with the Shire Highlands Railway. With the opening of the Lower Zambesi Bridge on January 14, 1935 (12,064 feet, the longest bridge in the world), these three railways give a continuous connection between British Nyasaland and the port of Beira.

Beira is connected by telegraph with Salisbury in Mashonaland, and Lourenço Marques with the Transvaal system. Quelimane has telegraphic communication with Chiromo. In 1941 there were 12,284 kilometres of telegraph line and 225 telegraph stations. Telephone lines, 1941, 10,802 kilometres.

## ROME, SEE AND CHURCH OF.

(CITTÀ DEL VATICANO.)

For many centuries until Pius IX's reign, with some comparatively short breaks, the Popes or Roman Pontiffs bore temporal sway over a territory stretching across Mid-Italy from sea to sea and comprising an area of some 16,000 square miles, with a population finally of some 3,125,000 souls. Of this dominion the whole has been incorporated with the Italian Kingdom. Furthermore, by an Italian law dated May 13, 1871, there was guaranteed to His Holiness and his successors for ever, besides the use of the Vatican and Lateran palaces and the villa of Castel Gandolfo, a yearly income of 3,225,000 lire, but this allowance remained unclaimed and unpaid until February 11, 1929, when a settlement of the 'Roman question' was arrived at by three treaties between the Italian Government and the Vatican. On that day there was signed (1) a Political Treaty, which recognized the full and independent sovereignty of the Holy See in the city of the Vatican; (2) a Concordat, to regulate the condition of religion and of the Church in Italy; and (3) a Financial Convention, in accordance with which the Holy See shall receive 750,000,000 lire in cash and 1,000,000,000 lire in Italian 5 per cent. State bonds. This sum is to be a definitive settlement of all the financial claims of the Holy See against Italy in consequence of the loss of its temporal power in 1870. The treaty and concordat were ratified and the sum of 750,000,000 lire paid on June 7, 1929.

The Pope exercises the Sovereignty and has full legal, executive and judicial powers. A Governor, directly and exclusively responsible to the Pope, exercises executive powers. The Judicial power is delegated to a tribunal in first instance, to the *Sacra Romana Rota* in appeal and to the Supreme Tribunal of the *Segnatura*, which is the ultimate authority where there is an appeal.

In its diplomatic relations with foreign countries, Città del Vaticano is represented by the Segreteria di Stato del Sommo Pontefice. The Pope is, however, by the above mentioned treaty with the Italian Government, pledged to a perpetual neutrality in respect of political disputes between governments and to abstention from international congresses called to cope with them, unless his mediation is specifically requested by both parties to a dispute.

The principal method by which the Pope endeavours from time to time to exert an influence on the course of political developments is the issue of 'encyclicals' or circular letters addressed to Catholic Bishops throughout the world, laying down the principles by which Catholics should be guided with reference to the particular problem under discussion.

For the defence of the Church and its doctrines, and to further the practical application of these to the problems of the day, Pope Pius XI founded early in his reign the organisation known as 'Catholic Action': an organisation of the Catholic laity in all countries pledged to co-operate with the clergy in the furtherance of the above aims. Its control is under the local Bishops.

The area of the Vatican City is 44 hectares (108·7 acres). It includes the Piazza di San Pietro (St. Peter's Square), which is to remain normally open

to the public and subject to the powers of the Italian police. It has its own railway station (opened November, 1932), postal facilities, coins and radio. The official journal is the *Acta Apostolicae Sedis*. Thirteen buildings in Rome, although outside the Vatican City, enjoy extra-territorial rights. The new building of the Pontifical Gregorian University in Rome, under the direction of the Jesuits, was formally opened in November, 1930.

The census of the population of the Vatican City on December 31, 1932, showed 1,025 inhabitants, including: Italians, 853 (578 men and 275 women); Swiss, 121 (4 women).

**Supreme Pontiff.**—**Pius XII (Eugenio Pacelli)**, born at Rome, March 2, 1876; Nuncio in Munich, 1917–25; Cardinal, 1929; Papal Secretary of State, 1930–39; elected Supreme Pontiff, as successor of Pius XI, March 2, 1939; coronation, March 12, 1939.

**Secretary of State.**—Cardinal Luigi Maglione (appointed March 11, 1939).

The election of a Pope ordinarily is by *scrutiny*. Each Cardinal in conclave writes on a ticket his own name with that of the Cardinal whom he chooses. These tickets, folded and sealed, are laid in a chalice which stands on the conclave altar; and each elector approaching the altar repeats a prescribed form of oath. Thereupon the tickets are taken from the chalice by scrutators appointed *ad hoc* from the electing body; the tickets are compared with the number of Cardinals present, and when it is found that any Cardinal has two-thirds of the votes in his favour he is declared elected.

From the accession of Clement VIII, 233rd in the usual list of Roman Pontiffs, to Pius XII, 262nd, the Popes (all Italian) have been as follows:—

| Name and Family of Pontiff           | Year of Election | Name and Family of Pontiff          | Year of Election |
|--------------------------------------|------------------|-------------------------------------|------------------|
| Clement VIII ( <i>Aldobrandini</i> ) | 1592             | Clement XII ( <i>Corsini</i> )      | 1780             |
| Leo XI ( <i>Medici</i> )             | 1605             | Benedict XIV ( <i>Lambertini</i> )  | 1740             |
| Paul V ( <i>Borghese</i> )           | 1605             | Clement XIII ( <i>Rozzoni</i> )     | 1758             |
| Gregory XV ( <i>Ludovisi</i> )       | 1621             | Clement XIV ( <i>Ganganelli</i> )   | 1769             |
| Urban VIII ( <i>Barberini</i> )      | 1623             | Pius VI ( <i>Braschi</i> )          | 1775             |
| Innocent X ( <i>Pamphily</i> )       | 1644             | Pius VII ( <i>Chiaramonti</i> )     | 1800             |
| Alexander VII ( <i>Chigi</i> )       | 1655             | Leo XII ( <i>della Genga</i> )      | 1823             |
| Clement IX ( <i>Rospigliosi</i> )    | 1667             | Pius VIII ( <i>Castiglioni</i> )    | 1829             |
| Clement X ( <i>Altiery</i> )         | 1670             | Gregory XVI ( <i>Cappellari</i> )   | 1831             |
| Innocent XI ( <i>Odescalchi</i> )    | 1676             | Pius IX ( <i>Mastai-Ferretti</i> )  | 1846             |
| Alexander VIII ( <i>Ottoboni</i> )   | 1689             | Leo XIII ( <i>Pecci</i> )           | 1878             |
| Innocent XII ( <i>Pignatelli</i> )   | 1691             | Pius X ( <i>Sarto</i> )             | 1903             |
| Clement XI ( <i>Albani</i> )         | 1700             | Benedict XV ( <i>della Chiesa</i> ) | 1914             |
| Innocent XIII ( <i>Conti</i> )       | 1721             | Pius XI ( <i>Ratti</i> )            | 1922             |
| Benedict XIII ( <i>Orsini</i> )      | 1724             | Pius XII ( <i>Pacelli</i> )         | 1939             |

The Roman Pontiff (in orders a Bishop, but in jurisdiction held to be by divine right the centre of all Catholic unity, and consequently Pastor and Teacher of all Christians) has for advisers and coadjutors the Sacred College of Cardinals, consisting, when complete, of 70 members, namely, 6 Cardinal-Bishops (holders of the suburbicary sees), 50 Cardinal-Priests, and 14 Cardinal-Deacons. In practice, however, while the total number of Cardinals is never allowed to exceed 70, the number of Cardinal-Priests frequently exceeds 50, while there are usually many vacancies among the Cardinal-Deacons. In March, 1945, the Sacred College consisted of 3

Cardinal-Bishops, 32 Cardinal-Priests, and 6 Cardinal-Deacons.<sup>1</sup> The following list gives the names, dates, and offices of these 41 Cardinals:—

| Name                                   | Office or Dignity                                                                                              | Nationality | Year of Birth | Year of Creation |
|----------------------------------------|----------------------------------------------------------------------------------------------------------------|-------------|---------------|------------------|
| <b>Cardinal-Bishops:—</b>              |                                                                                                                |             |               |                  |
| Gennaro Granito Pignatelli di Belmonte | Bishop of Albano<br>Prefect of the Supreme Tribunal of the Apostolic Signatura                                 | Italian     | 1851          | 1911             |
| Enrico Gasparri                        | Archbishop of Selencia-in-Esauria, and Secretary of the Congregation of the Holy Office, Vicar-General of Rome | "           | 1871          | 1925             |
| Francesco Marchetti Selvaggiani        |                                                                                                                | "           | 1871          | 1930             |
| <b>Cardinal-Priests:—</b>              |                                                                                                                |             |               |                  |
| Alessio Ascalesi                       | Archbishop of Naples                                                                                           | Italian     | 1872          | 1916             |
| Adolph Bertram                         | Bishop of Breslau                                                                                              | German      | 1859          | 1919             |

<sup>1</sup> The terms Cardinal-Priest and Cardinal-Deacon have for centuries ceased to imply severally the particular orders of priest or deacon.

| Name                      | Office or Dignity                                                 | Nationality | Year of Birth | Year of Creation |
|---------------------------|-------------------------------------------------------------------|-------------|---------------|------------------|
| <b>Cardinal-Deacons:—</b> |                                                                   |             |               |                  |
| Camillo Caccia Dominioni  | —                                                                 | Italian     | 1877          | 1935             |

| Pietro Boetto             | Archbishop of Genoa                                               | "           | 1871          | 1935             |
| Giovanni Mercati          | Prefect of Vatican Library                                        | "           | 1866          | 1935             |

Though primarily belonging to the local Roman Church, the Cardinals, drawn from every nation of Christendom, are now regarded as Princes of the Church at large. Originally they were simply the parish rectors of Rome, or the deacons of Roman deaneries. In 1586 their number was finally settled by Sixtus V at seventy. The Cardinals compose the Pope's Senate or Council and the various Sacred Congregations, govern the Church while the Apostolic See is vacant, and elect the deceased Pontiff's successor. They received the distinction of the red hat under Innocent IV, during the first General Council of Lyons, in 1246; and the title of Eminence from Urban VIII, in 1630. In 1930 all Archbishops and Bishops of the Catholic Church had conferred upon them by the Pope the title of 'Excellency.'

The central administration of the Roman Catholic Church is carried on by a number of permanent committees called Sacred Congregations, composed of Cardinals, with Consultors and Officials. There are now twelve Sacred Congregations, viz., Holy Office, Consistorial, Discipline of the Sacraments, Council, Religious, Propaganda Fide, Rites, Ceremonial, Extraordinary Ecclesiastical Affairs, Seminaries and Universities, the Basilica of St. Peter's, and for the Oriental Church. Besides these there are several permanent Commissions, for example, one for Biblical Studies, another for Historical Studies, another for Preservation of the Faith in Rome, another for Codification of Canon Law. Furthermore, the Roman Curia contains three tribunals, to wit, the Apostolic Penitentiary, the Supreme Tribunal of the Apostolic Signature, and the Sacred Roman Rota; and, lastly, various offices, as the Apostolic Chancery, the Apostolic Datary, the Apostolic Chamber, the Secretariate of State, etc. The Pontifical Academy of Sciences was revived by Pius XI in 1936.

The States wherewith the Holy See maintains diplomatic relations are Belgium, China (1942), France, Germany, Hungary, Ireland, Italy (1929), Japan (1942), Monaco, Poland, Portugal, Rumania, Spain, the United Kingdom (1914) and Yugoslavia, together with most of the American Republics, except the United States and Mexico. A Concordat with Portugal was signed on May 7, 1940.

In December, 1930, the issue of Papal coinage was resumed, after a lapse of 60 years. The new coins are eight in number, and will have the same fineness and value as the corresponding Italian coins. Two are of bronze and worth 5 and 10 centesimi respectively. There are two other coins in nickel, worth 20 and 50 centesimi, and three silver coins worth respectively 1, 5 and 10 lire. In addition, there is a gold piece of 100 lire. A new series of coins was issued in June 1943. In virtue of a special convention between the Vatican City and the Italian Government (to remain in force for 10 years), each State allows the currency of the other to circulate in its

territory. The Vatican City has, however, given an undertaking that the total value of the bronze, nickel and silver coins issued by it in any year will not exceed 1,000,000 lire.

Within the British Empire the present number of Roman Catholic residential sees is 380, viz., 89 archbishoprics and 185 bishoprics, besides 75 apostolic vicariates (mostly held by Bishops of titular sees), and 31 apostolic prefectures: while the Roman Catholic population subject to King George VI is estimated at 19,823,771 souls, of whom 6,412,716 are in Europe; 4,142,255 in Asia; 2,494,998 in Africa; 5,121,569 in British America; and 1,652,238 in Australasia. In the United States (including possessions) there were in 1938 23,185,599 Roman Catholics. Throughout the world the Roman Catholic population is reckoned at 266,185,084 souls (*Catholic Directory*, London).

*Envoy and Minister to the Holy See.*—Sir Francis D'Arcy Godolphin Osborne, K.C.M.G. (appointed January 23, 1936).

*Honorary Secretary.*—H. E. L. Montgomery.

*First Secretary.*—P. Leigh Smith.

*Apostolic Delegate<sup>1</sup> in London.*—Mgr. William Godfrey, Titular Archbishop of Cius (appointed November 23, 1938).

<sup>1</sup> An apostolic delegate is an ecclesiastical official appointed to carry out certain ecclesiastical duties; he enjoys no diplomatic status or privileges. His appointment is a question for the Vatican alone. There has not hitherto been an apostolic delegate in Great Britain, but for some time past such delegates have been appointed to Canada, Australia, South Africa and India.

## RUMANIA.

(ROMÂNIA.)

## Reigning King.

**Mihai (Michael)**, born October 25, 1921, son of King Carol II and Queen Helen, daughter of the late Constantine, King of the Hellenes; proclaimed King in virtue of his father's renunciation of the succession on the death of his grandfather, King Ferdinand, July 20, 1927, under a Regency. Ceased to be King on his father's accession, June 8, 1930, when he received the title of Great Voivod of Alba Julia; proclaimed King again on his father's abdication on September 6, 1940.

On December 28, 1925, Prince Carol renounced his right of succession to the Throne; this was confirmed by Act of Parliament on January 4, 1926, when his son, Prince Mihai, was declared Heir to the Throne. On June 6, 1930, Prince Carol returned to Rumania and was proclaimed King in virtue of an Act of Parliament on June 8, 1930. On September 6, 1940, as a result of a coup organized by the Iron Guard, the Fascist organization of Rumania, under General Antonescu, King Carol was forced to abdicate and to leave the country.

*Aunts and uncle of the King*:—(1) Elisabeth, born October 11, 1894; married on February 27, 1921, to King George II of Greece; divorced July 6, 1935; (2) Marie, born January 8, 1900, married June 8, 1922, to Alexander, King of Yugoslavia, who was assassinated on October 9, 1934; (3) Nicholas, born August 18, 1903, lost his rights and titles on April 9, 1937, and took the name of Brava; (4) Ileana, born January 5, 1909, married July 26, 1931, to the Archduke Anton of Austria-Tuscany.

The union of the two Principalities of Wallachia and Moldavia was publicly proclaimed at Bucharest and Jassy on January 24, 1859, the present name being given to the united provinces. The first ruler of Rumania was Colonel Cuza, who had been elected 'Domn,' or Prince, of Wallachia and of Moldavia in 1859, and who assumed the government under the title of Prince Alexandru Ioan I. A conspiracy in February, 1866, forced Prince Alexandru Ioan to abdicate, and led to the election of Prince Carol I. The representatives of the people, assembled at Bucharest, went to war against the Turks, whom they defeated with Russia's help, and proclaimed Rumania's independence from Turkey, May 10, 1877, which was confirmed by Art. 43 of the Congress of Berlin, signed July 13, 1878. This Congress also recognised the annexation of the Dobruja, which was enlarged by an area of 3,320 sq. miles, having a population of 353,000 after the Peace of Bucharest of 1913. King Carol I of Hohenzollern-Sigmaringen reigned as Prince from 1866 to 1881, and as King from 1881 to 1914. On April 9, 1918, Bessarabia was joined to Rumania; the Bukovina on November 28, 1918; Transylvania and The Banat and Crisana-Maramuresh on December 1,

1918. These additions of territory were recognised in the Treaties of St. Germain, 1919, and Petit Trianon, 1920.

During 1940 Rumania was forced to restore some of this territory. On June 26, the U.S.S.R. presented an ultimatum to Rumania, demanding the satisfaction of her claims regarding Bessarabia and Northern Bukovina. The Rumanian Government accepted the demands of the U.S.S.R. and Soviet troops took over the ceded territories on June 28. Rumania thus lost about 19,800 square miles of territory (17 per cent. of its total area), and an estimated population of 3,500,000. From 1812 to 1918 Bessarabia was a part of the Russian Empire, but prior to that period it had been under Turkish administration. It included Kishineff, the second city of the Rumanian State, with a population in 1889 of about 112,500. North Bukovina was until the World War part of the old Austro-Hungarian Empire, having been ceded by Turkey to Austria in 1774. It included Czernowitz, the third city of Rumania, with a population (1940) of 110,357.

In the German attack on Russia which began on June 22, 1941, and in which Rumanian troops participated, the Rumanians not only re-took Bessarabia and Northern Bukovina, but also conquered Russian territories. On October 18, 1941, a decree was issued incorporating Odessa and an area beyond the Dniester into Rumania. The region was called Transnistria. By March, 1944, the Russian armies had reconquered the greater part of this territory, and on August 28, 1944, Rumania accepted the armistice terms offered by Soviet Russia. A National Government replaced the dictatorship of General Antonescu; Rumania became an ally of the United Nations and undertook to fight by their side against Germany and Hungary, and the Vienna award (see below) was made null and void. By the terms of the armistice, published on September 18, 1944, Rumania agreed to restore Bessarabia and North Bukovina to Russia and to pay an indemnity of 300 million dollars over six years.

The 1930 census showed for Bessarabia a population of 2,864,000, including 1,610,800 Rumanians, 351,900 Russians, 314,200 Ukrainians, 204,900 Jews, 163,700 Bulgarians and 81,000 Germans.

On August 30, 1940, by the award of Vienna, made by the Foreign Ministers of Germany and Italy, Rumania ceded to Hungary a territory in Southern Transylvania 17,370 sq. miles in extent, and including the town of Klausenburg (Cluj). By the terms of the armistice with Russia, Great Britain and the United States the return to Rumania of all or part of Transylvania was agreed. Subject to confirmation at the peace settlement, Northern Transylvania was restored to Rumania on March 10, 1945.

On September 8, 1940, by the Treaty of Craiova, Rumania ceded the Southern Dobruja to Bulgaria, an area of some 3,000 sq. miles.

### Constitution and Government.

The Constitution of Rumania was adopted on February 27, 1938. According to this Rumanian citizens, irrespective of racial origin and religion, are equal before the law. No Rumanian may advocate in speech or in writing a change in the form of Government, a change in the distribution of the wealth of others, exemption from taxes, or class trouble. The clergy may not use their ritual authority for political propaganda. All political associations based on religious pretexts are forbidden. The State guarantees to all religious denominations equal liberty and protection if their practice is not contrary to public order, good morals, and public security. Rumanians shall enjoy liberty of conscience, work, Press, assembly, and association.

The members of the Senate are nominated by the King, elected or are life members. The number of nominated members is equal to that of elected members. Life senators are: The Heir to the Throne, all the Princes of the Royal Family, the Patriarch and the Metropolitan, the Bishops of the Orthodox Church and those of the Greek-Catholic Church, the Heads of any other Church having at least 200,000 members, and the life senators already recognised as such. Election of a Senator is for nine years. Every three years one third of the elected members, chosen at random, is renewed by new elections. The Chamber of Deputies is elected for six years. All citizens (male and female) of 30 years, whose profession is agriculture, manual work, commerce, industry or intellectual work, are electors for the Chamber; Senators must be elected by citizens over 40 years of age and having one of the professions just enumerated. The King has a suspensive veto over all laws passed by the Chamber of Deputies and the Senate. The executive is vested in a council of Ministers. A Minister must be a Rumanian for the last three generations.

A new Cabinet was appointed on March 6, 1945:—

*Prime Minister.*—Petre Grozea.

*Deputy Prime Minister.*—George Tatarescu.

### LOCAL GOVERNMENT.

For purposes of local government Rumania was by decree of February 10, 1942, divided into 11 provinces, as follows:—Bucharest, Craiova, Pitesti, Buzen, Yassy, Galatz, Constantza, Temesvar, Prasov, Alba Julia and Sibiu.

In Rumania there are 71 districts and 8,947 communes (16 municipal, 163 urban, 71 suburban and 9,102 rural). In the rural communes there are 16,804 villages and hamlets. The appellations 'urban' and 'rural' do not depend on the number of inhabitants, but are given by law. The most important towns, called *municipii* ('municipalities') have autonomous communal organisations.

In September, 1940, the powers of all local authorities were taken over by the Minister of the Interior.

### Area and Population.

As a result of the Treaties of Peace of 1919 Rumania was enlarged, and the area and the estimated population of the new kingdom, on July 1, 1939, are shown as follows:—

| Department               | Area in sq. miles | Estimated population on July 1, 1939 |                   |                   |
|--------------------------|-------------------|--------------------------------------|-------------------|-------------------|
|                          |                   | Urban                                | Rural             | Total             |
| Olt . . . . .            | 10,898            | 198,056                              | 1,700,321         | 1,898,377         |
| Bucegi . . . . .         | 15,784            | 1,040,968                            | 2,807,416         | 3,848,384         |
| Mării . . . . .          | 8,387             | 196,463                              | 866,604           | 1,063,067         |
| Dunărea de Jos . . . . . | 14,651            | 437,837                              | 1,650,620         | 2,088,457         |
| Nistru . . . . .         | 8,628             | 203,962                              | 1,370,972         | 1,474,934         |
| Prut . . . . .           | 12,264            | 382,570                              | 2,014,528         | 2,397,098         |
| Suceava . . . . .        | 6,588             | 283,778                              | 1,317,184         | 1,600,962         |
| Mures . . . . .          | 11,694            | 230,003                              | 1,442,594         | 1,672,597         |
| Someş . . . . .          | 12,885            | 373,862                              | 1,808,218         | 2,182,080         |
| Timis . . . . .          | 12,605            | 274,167                              | 1,433,779         | 1,707,946         |
| <b>Total . . . . .</b>   | <b>113,884</b>    | <b>3,621,666</b>                     | <b>16,312,136</b> | <b>19,933,802</b> |

In 1930 the races in the country were returned as follows:—Romanians, 12,980,033 (72 per cent.); Magyars, 1,426,178 (8 per cent.); Germans, 740,169 (4 per cent.); Jews, 725,318 (4 per cent.); Ruthenians, 577,693; Russians, 416,217; Bulgarians, 361,058; Turks, 288,798, and Gypsies, 278,793.

As a result of the territorial changes made during 1940, the area of Rumania was reduced to 74,214 square miles, and her population to 13,291,000 (census figure of April 6, 1941). Estimated population on January 1, 1942, 16,800,000.

The number of births, deaths and marriages, with surplus of births over deaths, was as follows for four years:—

| Years | Births  | Deaths  | Marriages | Surplus of Births over Deaths |
|-------|---------|---------|-----------|-------------------------------|
| 1935  | 585,886 | 402,678 | 165,775   | 183,708                       |
| 1936  | 606,774 | 387,185 | 174,790   | 219,589                       |
| 1937  | 601,802 | 377,812 | 183,012   | 223,990                       |
| 1938  | 585,197 | 379,278 | 175,639   | 205,919                       |

In 1938 there were 13,223 divorces. The number of still-births in 1938 was 14,836.

The populations of the principal towns in Rumania are estimated as follows on January 1, 1939:—

|                     |         |                      |        |
|---------------------|---------|----------------------|--------|
| Bucharest . . . . . | 648,762 | Ploesti . . . . .    | 77,376 |
| Chisinau . . . . .  | 119,500 | Arad . . . . .       | 75,735 |
| Cernăuți . . . . .  | 109,648 | Brașov . . . . .     | 68,561 |
| Yassy . . . . .     | 104,471 | Brasov . . . . .     | 61,837 |
| Galatz . . . . .    | 102,232 | Constantza . . . . . | 61,412 |
| Cluj . . . . .      | 100,272 | Craiova . . . . .    | 55,442 |
| Timisoara . . . . . | 89,872  | Satu Mare . . . . .  | 51,708 |
| Oradea . . . . .    | 80,871  | Sibiu . . . . .      | 50,347 |

### Religion, Education, Justice, &c.

Of the total population of Rumania (in 1938) about 13,200,000 belonged to the Orthodox Church, 1,426,813 were Greek Catholics, 1,200,000 were Roman Catholics, 720,000 Reformists, 400,000 Lutherans, 75,000 Unitarians, about 1,500,000 Jews, 260,000 Moslems and 140,000 others. The National Orthodox Church of Rumania is administered by a Holy Synod to which belong all the Metropolitans (of Yassy, Chishin, Cernăuți, Craiova and Sibiu), all the Bishops (of Timisoara, Galatz, Constantza, Curtea de Arges, Buzău, Roman, Ismail, Cetatea Albă, Bălți, Arad, Maramures, Caransebeș, Oradea) and all the Archimandrites (one for each Metropolitan and Bishopric).

There is a Uniat (Greek-Catholic) Rumanian Metropolitan at Blaj, with diocesan bishops at Lugosh, Oradea and Baia-Mare. There is a Latin archbishop in Bucharest, with diocesan bishops at Alba Julia, Timisoara, Oradea, Satu-Mare and Yassy. There are Reformed bishops at Oradea and Satu-Mare; a German Lutheran bishop at Sibiu; a Magyar Lutheran superintendent at Arad; a vicarage of Bucovina, with the see in Cernăuți; an Apostolical Administration for the Catholic Armenians, with a see at Gherla; an Armenio-Gregorian bishopric, with see in Bucharest; a Yugoslavian vicarage in Timisoara for the Serbian Christian-Orthodox congregation from the Romanian Banat, and a Unitarian bishop at Cluj. There is a 'Ras-Muftiu' (religious head) of the Mohamedans of Dobrogea, with the see in Bucharest; it has under its supervision four muftiates (Constanta, Tulcea, Bazargic and Silistra). The Jews were organized by communities of

orthodox, western and Spanish rites, but are regarded as a sect, and while all sects are prohibited and their places of worship appropriated by the State (by a decree of January 3, 1943), the Jewish communities were placed under special laws. The clergy of the National Orthodox Church and of the Uniat Rumanian Church are paid by the State.

Education is free and compulsory. In 1938-39 there were 2,151 infant schools with 2,434 teachers and 120,516 pupils, and 15,668 elementary schools with 45,769 teachers and 2,360,378 pupils. There were also 176 private and confessional schools for children with 245 teachers and 8,922 pupils, and 1,405 confessional and private elementary schools with 3,824 teachers and 133,184 pupils. In the same year, 669,187 pupils attended the adult courses of the elementary public schools.

There were in 1937-38, 716 secondary public schools with 13,343 teachers and 168,331 pupils, and 209 secondary private and confessional schools with 3,784 teachers and 85,923 pupils.

There are 3 universities: in Bucharest, founded in 1864; in Yassy, founded in 1840; in Cernăuți (Czernowitz), in Bukovina, founded in 1919. The total number of students at the universities in 1937-38 was 30,771; of professors and teachers, 1,945. In 1944 none of the universities was carrying on its work.

Justice is administered by 12 appeal courts, 72 tribunals, and 431 justices of the peace, 11 labour-justices, and 12 criminal-courts. Assistance is given to the sick in 530 hospitals and *hospices* (departmental, communal, rural and private).

On February 7, 1941, new laws, probably the most severe ever introduced into any country, became effective. The death penalty can now be inflicted, *inter alia*, for the possession, use, or acquisition of firearms or explosives; for sedition, incitement or plundering; for writing, publishing, or distributing literature against the régime; for caricatures; sabotage or interference in any forms of communications. Life imprisonment is the penalty for membership of an organization or any association against the régime, whether political, religious, cultural, or social. All offenders will be sentenced to lose their civil rights and have their property confiscated. There are lesser but drastic punishments for all persons in any way assisting criminals. The laws apply to all persons over 15 years of age, and there are special punishments for professors, teachers and priests.

### Finance.

The following table shows (in thousands of lei) the estimated ordinary revenue and expenditure for years ending March 31:—

|             | 1937-38                | 1938-39                | 1939-40                | 1941-42                | 1942-43                |
|-------------|------------------------|------------------------|------------------------|------------------------|------------------------|
| Revenue     | 1000 Lei<br>25,948,155 | 1000 Lei<br>30,549,956 | 1000 Lei<br>32,228,900 | 1000 Lei<br>42,000,000 | 1000 Lei<br>71,800,000 |
| Expenditure | 25,948,155             | 30,549,956             | 22,228,900             | 44,000,000             | 72,700,000             |

The public debt of Rumania amounted on April 1, 1939, to 104,127,428,054 lei, of which 68,899,280,215 lei were external debt.

### Defence.

Military service in Rumania is compulsory and universal from the ages of 21 to 50. The normal terms of service are 2 years in the active army (excepting the Frontierguards, the gendarmery and the naval and air forces, where the service is 3 years), 15 years in the regular army reserve, and 9

years in the militia. Young men between 19 and 21 are under the orders of the Ministry of National Defence for pre-military training.

In 1939, the Army comprised 22 infantry divisions, each of three or four infantry regiments and two mixed artillery regiments; a mountain troops command, with three mixed mountain brigades, each brigade with one to two groups of light mountain infantry and a mountain artillery group; three cavalry divisions, each of six regiments of hussars and dragoons, a light infantry battalion and a mounted artillery group, and a fortification brigade.

The Air Force in 1939 was organised in 1 flying forces command, 8 commands of the air regions, 1 anti-aircraft defence command, air zones and under-zones commands, 4 co-operation air fleets, 3 fighter squadrons, 3 bombing squadrons, 1 reconnaissance squadron, 1 assault squadron, 1 hydro-aviation squadron, 2 aero-station groups, 8 anti-aircraft defence regiments. Effectives: 4,500 officers and non-commissioned officers and 40,000 men, with 1,000 aeroplanes.

The infantry is armed with 8-mm. French, Russian and Austrian rifles; the Rumanian artillery is still largely armed with guns of the Krupp type, and with Russian armament of 76.2, but a considerable number of batteries have the French type of 75-mm. field guns and Austrian, Rumanian and Russian howitzers of various types.

Early in 1943, there were 22 Rumanian divisions engaged on the Russian front, while a further 15 recently formed divisions were at home. Following the severe losses in Russia, especially the liquidation of the 7 divisions in the Crimea, the remainder of the forces that were extricated were reorganized as 10 divisions. These, together with the 15 more recent but more poorly equipped divisions, became available to assist the advance into Hungary after Rumania had changed sides.

In the Black Sea are 2 destroyers, 3 submarines, 3 old torpedo boats, 3 motor gunboats, a minelayer, a motor torpedo-boat and a depot ship (*Constanza*). The Danube force comprises 7 monitors (450-680 tons), armed with 4.7-in. guns, 2 vedettes and some small craft. The naval school is in Constantza. Naval aircraft comprised one group with a total effective of 350 officers and 5,580 men, with 80 planes.

### Production and Industry.

According to a statistical estimate, the distribution of the soil of Rumania in 1943 was as follows:—Ploughed land, 11,500,000 hectares; meadows and pasture, 3,480,000 hectares; vineyards and fruit trees, 554,063 hectares; forests, 4,860,000 hectares.

In 1943 2.7 million hectares were devoted to wheat; 4.12 million hectares to maize, and 1.15 million hectares to barley. Production (in millions of tons) in 1943 was:—Wheat, 3; maize, 4.76; barley, 1.

According to figures issued by the Ministry of Agriculture, Rumania possessed (in millions): cattle, 1940, 2.55; 1941, 3.4; 1942, 3.76; sheep, 1940, 7.92; 1941, 9.33; 1942, 9.78; pigs, 1940, 7.97; 1941, 9.33; 1942, 2.4.

The principal minerals are salt, lignite, iron and copper ores, petroleum and natural gas. Petroleum wells, both government and private, are worked at Prahova, Dambovitza, Bacau, and Buzau. The total output of crude oil in 1937 was 7,149,641 metric tons; in 1938, 6,810,000 metric tons; in 1939-40, 4,527,204 metric tons; in 1941, 4,750,000 metric tons; in 1942, 5,150,000 metric tons, and in 1943, 8,700,000 metric tons. The output of natural gas in 1942 was 1,545,000,000 cubic metres. The salt mines are situated in the region of the lower Carpathians, from Bukovina to the west of Oltenic, an area of over 250 square miles. Salt mining has been a State monopoly

since 1868 (production in 1937 was 310,959 metric tons, as compared with 285,139 metric tons in 1936). Output of lignite in 1937, 2,183,508 metric tons; iron ore, 129,060 metric tons in 1937; pyrites, 10,717 metric tons in 1937; other minerals in 1937 were, lead, 4,968 metric tons; zinc, 6,283 metric tons; copper, 582 metric tons. In 1937, 127,234 metric tons of pig iron were produced and 239,274 metric tons of steel.

Industries of some importance are flour milling, brewing and distilling. In 1937 there were 3,512 industrial establishments employing 278,919 workmen, with an invested capital of 46,275,399,000 lei.

### Commerce.

The values of the imports into and exports from Rumania exclusive of gold and silver (in 1000 lei) were:—

| Years | Imports    | Exports    | Years | Imports    | Exports    |
|-------|------------|------------|-------|------------|------------|
| 1935  | 10,847,530 | 16,756,223 | 1937  | 20,284,743 | 31,568,357 |
| 1936  | 12,637,698 | 21,703,391 | 1938  | 18,787,880 | 21,532,560 |

Imports in 1941, 391,883 tons, valued at 30,576,000 lei; in 1942, 701,195 tons, valued at 38,128,000 lei.

The trade in 1937 and 1938 was distributed as follows:—

| Country                  | Imports into Rumania |             | Exports from Rumania |             |
|--------------------------|----------------------|-------------|----------------------|-------------|
|                          | 1937                 | 1938        | 1937                 | 1938        |
|                          | Million lei          | Million lei | Million lei          | Million lei |
| United Kingdom . . . . . | 1,750                | 1,529       | 2,795                | 2,336       |
| Czechoslovakia . . . . . | 1,806                | 2,465       | 2,587                | 2,050       |
| France . . . . .         | 1,175                | 1,444       | 1,834                | 1,006       |
| Germany . . . . .        | 5,333                | 6,908       | 6,208                | 5,707       |
| Italy . . . . .          | 794                  | 930         | 2,285                | 1,340       |

Total trade between Rumania and United Kingdom for five years (Board of Trade returns) in sterling:—

|                                      | 1934      | 1935      | 1936      | 1937      | 1938      |
|--------------------------------------|-----------|-----------|-----------|-----------|-----------|
|                                      | £         | £         | £         | £         | £         |
| Imports from Rumania to U. Kingdom . | 3,420,526 | 3,218,332 | 6,232,941 | 4,532,610 | 3,827,286 |
| Exports to Rumania from U. Kingdom . | 2,679,189 | 1,213,324 | 1,120,365 | 1,814,280 | 1,343,200 |
| Re-exports to Rumania from U.K. .    | 80,207    | 53,637    | 45,224    | 44,353    | 53,991    |

### Shipping and Communications.

The European Commission of the Danube, called into being by the Treaty of Paris of March 30, 1856, consisted before the Great War of 8 delegates, one representing each of the following Powers: Austria-Hungary, France, Germany, Great Britain, Italy, Rumania, Russia, and Turkey. By the Convention of the Danube of July 23, 1921, as modified on March 2, 1929, it is composed of representatives of Great Britain, France, Italy and Rumania, and since March 1, 1939, also of Germany.

On September 5, 1940, Germany summoned a conference to Vienna for the purpose of re-regulating Danube shipping anew, and more particularly of eliminating Great Britain and France from membership of the Commission.

The Commission has its seat at Galatz. By the operations of the Commission the voyage from Sulina to Braila has been shortened by 21.9 kilometres; the minimum depth in the Sulina branch has been increased from 8 feet to 24 feet, and the minimum depth over the bar at Sulina has been raised from 9 feet to 24 feet. The income of the Commission is derived entirely from taxes levied on shipping leaving the river. The Commission has its own flag.

After the agreement of Sinaia of August 16, 1938, which came into force on May 13, 1939, all the ships belonging to the C.E.D. (European Commission of the Danube) became

the Rumanian State's property, under the style 'Direction of the Maritime Danube' (D.D.M.), and many of the powers of the Commission, including the control of Danube maritime navigation from Braila to the sea, passed over to the Rumanian State. The latter will pay annually to the Commission out of the receipts for navigation dues such sum as is required to meet the expenditure of the Commission.

On April 27, 1941, the seat of the Danube Commission was transferred to Orsova. Yugoslavia was expelled from the Commission, and it was decided that in future dues should be paid in Reichmarks instead of Swiss francs.

Rumanian tonnage on June 30, 1939, 35 vessels of 111,678 tons.

Railway history in Rumania commenced in 1860. All the main railway lines are owned and operated by the State. The length of Rumanian State Railways (4 ft. 8½ ins. gauge track) in 1940 was 9,505 miles. The State has a commercial navigation service on the Danube and Black Sea. There are 1,997 miles of pipe line in Rumania.

The Rumanian Airways Co (Liniiile Aeriene Romane Exploatate de Stat) (LARES) in 1942 flew 635,252 miles and carried 12,681 passengers and 691,926 pounds of freight.

Within Rumania there were 8,393 miles of national roads in 1938, 19,140 miles of departmental roads, 38,137 miles of commercial roads, making a total of 65,670 miles of roads.

The Post and Telegraph Administration was reorganised in June, 1938, as a general direction in the Ministry of Public Works and Communication. In 1938, 410,628,190 ordinary letters were handled by the post-office, of which 375,366,769 were inland letters and 35,261,421 foreign. In 1938 there were 48,708 miles of telegraph wire and cable. The number of telegrams sent was 3,848,648. In 1938 Rumania had 2,122 miles of urban system telephone lines in Bucharest only, and 91,083 miles of inter-urban system. The number of inter-urban telephone conversations was 7,671,670; number of international conversations, 340,765. A concession of the public telephone system for a minimum period of 20 years was granted to the International Telephone and Telegraph Corporation of New York in July, 1930, but a Rumanian company called S.A. de Telefoane was formed and took over the whole of the system on January 1, 1931.

Three radio stations at Baneasa, Bod and Chisinau were completed in 1929, 1933 and 1939 respectively.

### Banking, Money, Weights and Measures.

The National Bank of Rumania, on December 31, 1941, had notes in circulation to the value of 160,000,000,000 lei. Gold cover amounted to 59,600,000,000 lei. The privilege of the National Bank to issue currency notes was prolonged to December 31, 1960, according to a convention signed in May, 1925. The capital of the bank was at the same time raised to 600 million lei. A National Savings Institute was established in 1930. At the end of 1941 total deposits amounted to 5,400,000,000 lei. Other public credit institutions are a Deposit and Consignment Bank, an Agricultural Loan Bank, a Rural *Crédit Foncier*, 2 Urban *Crédit Foncier* (at Bucharest and Jassi), an Agricultural Bank, and a *Casa Rurala*, an institution whose purpose is to buy properties and sell them in lots to peasants. There are also three private banking institutions. On December 31, 1937, there were 841 banks in Rumania with a paid-up capital of 8,777 millions of lei. A unified paper currency came into use for the whole of Rumania on August 1, 1920.

The unit of the monetary system was made the *leu* (of 100 bani), equivalent to the franc. The value of the leu was fixed at 10 milligrammes gold (.900 fine). Coins in circulation are 1, 2, 5, 10, 20 and 50 lei. Those

of 50, 100, 200 and 500 lei contain some silver. There are 500 and 1,000 lei notes.

The metric system for weights and measures was introduced into Rumania in 1876.

## UNION OF SOVIET SOCIALIST REPUBLICS.

(RUSSIA.)

### Constitution and Government.

On March 12, 1917, a revolution broke out in Russia, as a result of which the Emperor Nicholas II abdicated. A Provisional Government under Prince George Lvov was set up by the Duma, which held office until May 16, 1917, when it was reorganised. On August 6, 1917, a new Cabinet under M. Alexander Kerensky was formed. This too was reorganised on October 8, 1917, and maintained itself until November 7, 1917, when the Military Revolutionary Committee of the Petrograd Soviet seized the government authority, and handed it over the next day to the All-Russian Congress of Soviets.

The Union of Soviet Socialist Republics was formed by the Union of the R.S.F.S.R., Ukrainian Soviet Socialist Republic, the Byelorussian Soviet Socialist Republic and Transcaucasian Soviet Socialist Republic, by agreement between the Soviet Governments of the four republics, and

the Treaty of Union was adopted by the First Soviet Congress of the U.S.S.R. on December 30, 1922. The treaty, including the Constitution of the Union, gave practical as well as theoretical equality to all the nationalities within the Union; it was adopted by the Central Executive Committee of the U.S.S.R. on July 6, 1923, and finally ratified on January 31, 1924. In May, 1925, the Uzbek and Turkomen Autonomous Soviet Socialist Republics, and in December, 1929, the Tadzhik Autonomous Soviet Socialist Republic, were declared Soviet Socialist Republics of the U.S.S.R. Later, the Transcaucasian Republic was split up into the Armenian Soviet Socialist Republic, the Azerbaijan Soviet Socialist Republic and the Georgian Soviet Socialist Republic, each of which became constituent republics of the Union.

At the 8th Congress of the Soviets, on December 5, 1936, a new Constitution of the U.S.S.R. was adopted, known widely as the Stalin Constitution. According to the new Constitution the U.S.S.R. consisted of eleven Republics:—

Russian Soviet Federal Socialist Republic.  
Ukrainian Soviet Socialist Republic.  
White Russian Soviet Socialist Republic.  
Azerbaijan Soviet Socialist Republic.  
Georgian Soviet Socialist Republic.

Armenian Soviet Socialist Republic.  
Turkmenian Soviet Socialist Republic.  
Uzbek Soviet Socialist Republic.  
Tadzhik Soviet Socialist Republic.  
Kazakh Soviet Socialist Republic.  
Kirghiz Soviet Socialist Republic.

In September, 1939, the Soviet Government decided to take under its protection the life and property of the population of the Western Ukraine and Western Byelorussia—inhabited mainly by Ukrainians and Byelorussians. This territory ethnographically and economically was part of the Soviet Republics of Ukraine and Byelorussia when it was seized by Poland in 1920. Western Ukraine and Byelorussia were subsequently incorporated into the Ukrainian Soviet Republic and part into the White Russian Soviet Republic respectively.

On March 31, 1940, the territory ceded by Finland was joined to that of the Autonomous S.S. Republic of Karelia, and admitted into the Union as the 12th Soviet Republic—the Karelo-Finnish Soviet Socialist Republic. The area is 196,000 sq. kilometres (75,656 sq. miles) and the population (in 1939) 469,145. The capital is Petrozavodsk. In 1941, the Republic had 819 elementary and secondary schools, with 100,000 pupils. Budget for 1941: revenue, 505,638,000 roubles; expenditure, 495,335,000 roubles.

On August 2, 1940, the Moldavian Soviet Socialist Republic was constituted as the 13th Soviet Republic. The new Republic consists of the former Moldavian Autonomous Soviet Republic and the greater part of Soviet Bessarabia. The area is 34,000 sq. kilometres (13,124 sq. miles); in August, 1940, the population was 2,200,000, of whom 70 per cent. were Moldavians, the rest Russians, Ukrainians, Bulgarians and Jews. In January, 1941, it had 1,896 schools, with 458,393 pupils. The budget for 1941 balanced at 447 million roubles.

The Bessarabian districts of Khotin, Akerman and Ismail, together with Northern Bukovina, were incorporated into the Ukrainian Soviet Republic.

On August 3, 1940, Estonia, Latvia and Lithuania were admitted into the Soviet Union as the 14th, 15th and 16th Soviet Republics.

According to the constitution which is declared to be the 'fundamental law' of the Union, the Soviet Union is a socialist state of workers and peasants, the political units of which are the Soviets or Council of Workers. All central and local authority is vested in these Soviets.

The following is a brief outline of the principal provisions of the

U.S.S.R. Certain of the commissariats mentioned above are the exclusive prerogative of the Union Government. Others exist both in the Union Government and in the individual republics, and a number exist only in the individual republics.

Until the establishment of the Supreme Council of the U.S.S.R., the highest governing body in the Soviet Union was the All-Union Congress of Soviets, and, in the interval between sessions of the Congress, supreme authority was exercised by the Central Executive Committee of the U.S.S.R.

The divisions of the Communist Party, which animates every organ of Government, correspond to the territorial divisions of the State.

Local Conferences of the Party Members elect delegates to Regional Conferences and the Regional Conferences send delegates to the Soviet Union Party Conference or Congress. The Congress is the supreme organ of the Party. Ordinary Congresses are convened not less than once in three years. The Congress elects the Central Committee of the Party, the Commission of Party Control and the Central Inspections Commission. In addition, in 1939, at the 18th Congress of the Communist Party, it was decided to summon not less than once a year an All-Union Party Conference consisting of representatives of the local organisations. The main purpose of these conferences is to discuss urgent problems of Party policy. The Central Committee holds a plenary session at least once in four months, and elects for the general management of its affairs a Secretariat consisting of 5 members, of which one is the General Secretary. This General Secretary is actually the leader of the Communist Party.

The Central Committee elects sub-committees (bureaux) which deal with the various aspects of Party work, e.g. Political Bureau (Politbureau), the Organization Bureau (Orgbureau) and other bureaux. The most important of the Sub-Committees of the Central Executive is the Politbureau. It consists of 9 members.

The local administration is carried on by the local Soviets, and in every locality there is also a Communist Group, which receives Party group instructions from the superior organs of the Party.

In every factory, in every *kolkhoz* (collective farm), there is a Communist cell which directs the technical administration of the factory or the *kolkhoz*, and which is in contact with the other organs of the Communist Party. In this way the members of the Party distributed over the whole mechanism of the State system represent the controlling power which drives the State machine in the direction required by the Central Committee of the Communist Party along the 'General Party Line.' The purity of the Party policy and strict discipline are maintained by means of thorough investigation of the political and social activities of each member.

*General Secretary of the Party.*—Joseph Vissarionovich Stalin (appointed Field-Marshal, March 7, 1943).

*Politbureau.*—J. V. Stalin, L. M. Kaganovitch, V. M. Molotov, K. E. Voroshilov, M. I. Kalinin, A. A. Andreyev, M. Zhdanov, A. I. Mikoyan and V. Khrushchev. Substitute members: M. Beriya and M. Shvernik.

The Communist International (the Comintern), founded on the initiative of the Russian Communist Party in 1919, was officially dissolved on June 10, 1943.

Soon after the adoption of the New Constitution by the All-Union Soviet Congress on December 5, 1936, all the constituent republics of the Union held their respective Soviet congresses, at which they adopted their own constitution based in all essentials on the constitution of the Union

described above, but adapting it where necessary to their own national and local requirements.

The autonomous republics are governed by their own Supreme Council and Council of People's Commissars: the regions and areas are governed by executive committees elected by the local Congress of Soviets, which are elected by the citizens for a term of 2 years.

On June 22, 1941, German forces invaded Russia, occupying a good deal of Russian territory, including the Ukraine; but by March, 1945, the Germans had been driven out of all Soviet territory, and Soviet forces had liberated Poland and invaded Germany.

### Area and Population.

#### PROGRESS AND PRESENT CONDITION.

The total area of the Soviet Union in 1938 was given as 8,173,550 square miles. According to the census of January 17, 1939, the population of the U.S.S.R. was shown as follows (capitals in brackets):—

| Constituent Republics of the Union | Area in Sq. Miles (Oct. 1, 1938) | Total Population (Jan. 17, 1939) |
|------------------------------------|----------------------------------|----------------------------------|
| R.S.F.S.R. (Moscow)                | 6,372,860                        | 109,279,000                      |
| Ukrainian S.S.R. (Kiev)            | 171,770                          | 30,960,321                       |
| White Russian S.S.R. (Minsk)       | 49,022                           | 5,567,976                        |
| Azerbaijan S.S.R. (Baku)           | 33,196                           | 3,209,727                        |
| Georgian S.S.R. (Tiflis)           | 27,020                           | 3,542,389                        |

| <b>Total</b>                       | <b>8,173,550</b>                 | <b>170,467,572</b>               |

Of the total, 81,665,000 were males and 88,802,000 females; 31,412,282 were children under 8; 55,900,000 were urban and 114,600,000 rural population.

During 1939 and 1940 the following additions to the area and population of the U.S.S.R. were made by the incorporation of new territory—from Finland, 16,173 square miles and a population of 500,000; from Poland, 77,703 square miles and a population of 12,775,000; from Rumania, 19,300 square miles and a population of 3,500,000; from Estonia, 18,353 square miles and a population of 1,126,413; from Latvia, 20,056 square miles and a population of 1,950,502; from Lithuania, 22,959 square miles and a population of 2,879,070. The total area of the U.S.S.R. is thus 8,348,004 square miles and the population 193,198,000.

The following table shows the growth of the population in Russia since 1897:—

| Year | Population  | Year          | Population  |
|------|-------------|---------------|-------------|
| 1897 | 106,432,300 | 1928          | 150,428,900 |
| 1914 | 139,812,700 | 1931          | 160,480,300 |
| 1918 | 142,579,900 | 1932          | 163,166,100 |
| 1926 | 147,027,900 | 1939 (census) | 170,467,186 |

**Constitution of the U.S.S.R.**—The economic foundation of the U.S.S.R. is the socialist system of economy and the socialist ownership in the means of production and the abolition of the exploitation of man by man in accordance with the principle, 'He who does not work, neither shall he eat.' There are two forms of socialist property in the U.S.S.R.: (1) State property (property of the whole people); (2) Co-operative and collective farm (*Kolkhoz*) property (property of individual collective farms and property of co-operative associations). The land, mineral deposits, waters, forests, mills, factories, mines, railways, water and air transport, banks, means of communication, large State-organised agricultural enterprises such as State farms (*Sovkhoz*), machine and tractor stations and the like, as well as municipal enterprises and the principal dwelling-house properties in the cities and industrial localities, are State property, that is, the property of the whole people; but the land occupied by collective farmers is secured to them in perpetuity so long as they use it in accordance with the laws of the country. The members of the *Kolkhozy* also have small plots of land attached to their dwellings for their own use. Peasants unwilling to enter a *Kolkhoz* may retain their individual farms, but they are not allowed to exploit hired labour. The right of personal property of citizens in their income from work and in their savings, in their dwelling-houses and auxiliary household economy, their domestic furniture and utensils and objects of personal use and comfort, as well as the right of inheritance of personal property of citizens, are protected by law. The constitution recognises the right of all citizens to work, rest, leisure, education and maintenance in old age, sickness or incapacity, without distinction of sex, race or nationality, and lays down that any direct or indirect restriction of the rights of, or conversely, the establishment of direct or indirect privileges for citizens on account of their race or nationality, as well as the advocacy of racial or national exclusiveness or hatred and contempt, is punishable by law. Military service in the Workers' and Peasants' Red Army is recognised as an honourable duty of the citizens of the U.S.S.R., and universal military service is the law of the land. The franchise is enjoyed by all citizens of the U.S.S.R. who have reached the age of 18, irrespective of sex, race or nationality, religion, standard of education, domicile, social origin, property status or past activities, with the exception of the insane and persons convicted by court of law to sentences including deprivation of rights. Citizens serving in the Red Army have the right to elect and be elected on equal terms with all other citizens. A member of any Soviet may be recalled by a decision of a majority of his or her electors if he or she fails to give satisfaction.

The highest organ of the State power of U.S.S.R. is the Supreme Council of the U.S.S.R., which exercises legislative power. It consists of two Chambers with equal legislative rights, elected for a term of 4 years: the Council of the Union and the Council of Nationalities.

The Council of the Union is elected by the citizens of the U.S.S.R. on the basis of one deputy for every 800,000 of the population.

The Council of Nationalities is elected by the citizens of the U.S.S.R. according to Union and autonomous republics, autonomous regions and national areas on the basis of twenty-five deputies from each Union republic, eleven deputies from each autonomous republic, five deputies from each autonomous region and one deputy from each national area.

The highest executive and administrative organ of State power of the Union of Soviet Socialist Republics is the Council of People's Commissars of the U.S.S.R.

The highest judicial organ is the Supreme Court of the U.S.S.R. The

Supreme Court and the Special Courts of the U.S.S.R. are elected by the Supreme Council of the U.S.S.R. for a term of five years.

Deputies are elected by the voters on the basis of universal, equal and direct suffrage by secret ballot. The only legal political party is the Communist Party. All non-members of the Communist Party are classed as non-party citizens. The elections are held on a one-front basis, the candidates having received a more or less general preliminary approval in their constituency. The first election under the Constitution was held on December 12, 1937, when 91,113,153 persons recorded their vote.

A modification of the 1936 Constitution was adopted by the Supreme Soviet on February 1, 1944, whereby each of the Constituent Republics of the Union is given the right to have separate Commissariats for Defence and for Foreign Affairs. The Republics may thus now have their own armies, which form constituent parts of the Red Army; and each Republic has the right to enter into relations with foreign States and to conclude treaties with them. The new military law transforms the People's Commissariat for Defence from an All-Union Commissariat to a Union-Republic Commissariat. Similarly, the All-Union Commissariat for Foreign Affairs was changed into a Union-Republic Commissariat. In matters concerning foreign affairs, the Commissariat for Foreign Affairs of the U.S.S.R. now deals with all questions concerning the interests of the Union as a whole. At the same time, it has a say in the general character of the foreign policy of the Constituent Republics. As in the 1923 Constitution, so also in 1936, the right of the Constituent Republics to withdraw from the Union was expressly recognized.

For the first Constitution of the U.S.S.R., see *THE STATESMAN'S YEAR-BOOK* for 1936, p. 1263.

*Chairman of the Presidium of the Supreme Soviet of the U.S.S.R.*—Mikhail Ivanovich Kalinin (Deputy from the Leningrad City District, R.S.F.S.R.).

Legislation by decree and executive authority is vested in the Union Council of People's Commissars, or Cabinet. The Council of the People's Commissars is responsible to the elected Parliament.

*Chairman of the Council of People's Commissars of the U.S.S.R.*—Field-Marshal Joseph Vissarionovich Stalin (May 7, 1941).

*Vice-Chairman of the Council of People's Commissars of the U.S.S.R. and People's Commissar of Foreign Affairs.*—Vyacheslav Mikhailovich Molotov.

During the war, a State Committee of Defence of the U.S.S.R. has been established for dealing with all matters relating to the conduct of the war. It consists of the following:—

*President.*—J. V. Stalin.

*Vice-President.*—V. M. Molotov.

N. A. Bulganin.

N. A. Voznesensky.

G. M. Malinkov.

L. M. Kaganovich.

L. P. Beriia.

A. J. Mikoyan.

Each of the constituent republics of the Union retains its own Supreme Soviet and Council of People's Commissars, the function of which in relation to the respective Union republics is the same as that of the Supreme Soviet and Council of People's Commissars of the U.S.S.R. respectively to the

The census of 1939 showed that the following were 36 large towns in the U.S.S.R.:-

|                        |           |                    |         |                    |         |
|------------------------|-----------|--------------------|---------|--------------------|---------|
| Moscow                 | 4,137,018 | Sverdlovsk         | 435,844 | Astrakhan          | 254,000 |
| Leningrad              | 2,191,804 | Kazan              | 402,000 | Ufa                | 245,883 |
| Kiev                   | 846,298   | Kuibyshev (Samara) | 390,000 | Irkutsk            | 245,000 |
| Kharkov                | 833,432   | Saratov            | 376,000 | Minak              | 229,000 |
| Baku                   | 809,347   | Voronezh           | 327,000 | Mariupol           | 222,000 |
| Gorky                  | 644,116   | Yaroslavl          | 298,000 | Kalinin            | 216,000 |
| Odesa                  | 604,223   | Zaporozhje         | 289,000 | Voroshilovgrad     | 218,000 |
| Tashkent               | 585,006   | Ivanovo-Voznesensk | 285,000 | (formerly Lugansk) | 206,000 |
| Tbilisi (Tiflis)       | 519,175   | Archangel          | 281,000 | Vladivostok        | 200,000 |
| Rostov-on-Don          | 510,253   | Omsk               | 281,000 | Erivan             | 200,000 |
| Dnepropetrovsk         | 500,662   | Cheliabinsk        | 275,127 | Magnitogorsk       | 145,900 |
| Stalino (Yuzovka)      | 462,000   | Tula               | 272,000 |                    |         |
| Stalingrad (Tsaritsyn) | 445,476   | Perm               | 255,196 |                    |         |

<sup>1</sup> The new designation of Petrograd (March, 1924).  
<sup>2</sup> Formerly Nizhni Novgorod. <sup>3</sup> Formerly Tver.

Other large towns of the U.S.S.R. with census population of over 50,000 inhabitants on January 17, 1939, were:-

|                       |         |                        |        |                       |        |
|-----------------------|---------|------------------------|--------|-----------------------|--------|
| Makeyevsk             | 240,145 | Orekhovo-Zuyevo        | 99,829 | Voroshilov            | 70,628 |

| Kirovograd (Ukrainian |         | Anshero-Sujensk        | 70,807 | Bukhara               |        |
| S.S.R.)               | 100,331 | Batumi                 | 70,807 |                       |        |
| Mogilev               | 99,440  | Komsomolsk             | 70,746 |                       |        |

During the period of the first and second five-year plans a number of new towns came into existence in the new industrial regions. These include (population in 1939) Magnitogorsk (145,870), Berezniki, Krasnouralsk (in the Urals), Novoye Zaporozhe (289,200) (in the Ukraine), Anjero-Sudjeansk, Stalingorsk, Prokopiysk, Kemerevo (in West Siberia) (133,000), Cherekhovo (65,900), Igarka (in East Siberia), Karaganda, Kaurad (in Kazakhstan), Kirovsk (formerly Khibinogorsk) (in the Leningrad region, in the arctic circle), Kandalaksha (in Karelia), Stalinogorsk (76,200) (in the Moscow region) and others.

### Religion.

By decree of January 23, 1918, the Soviet Government disestablished the Church and appropriated certain categories of its property. The congregations themselves have to maintain their churches, which they are permitted to use free of charge. From the time of the Revolution of March, 1917, all religions might be freely professed in the Union. This principle is safeguarded in the 1936 constitution of the U.S.S.R., in which Article 124 reads as follows: 'With the aim of ensuring freedom of conscience for the citizens, the church in the U.S.S.R. is separated from the State and the school from the church, and freedom of religious worship and anti-religious propaganda is permitted to all citizens.' Before the revolution the prevailing religion of the country was the Græco-Russian, officially called the Orthodox Faith. In 1940 there were over 30,000 independent religious communities of every kind, over 8,000 churches, and about 60,000 priests and ministers of religion. The Orthodox Church has the largest number of followers and is divided into two chief sections: 'The New Church' and 'The Old Church,' each of which has its own headquarters in Moscow. 'The New Church' is headed by the Metropolitan Vitali. 'The Old Church' was headed by the Metropolitan Sergius, who on September 8, 1943, was elected Patriarch of the Orthodox Church. The Holy Synod, consisting of the Patriarch and six Metropolitan, was elected at the same time. On the death of Sergius, May 15, 1944, Metropolitan Alexis of Leningrad and Novgorod assumed the function of *locum tenens* of the Patriarchal See of the Orthodox Church. He was elected Patriarch by the General Council of the Orthodox Church on February 2, 1945. On October 11, 1943, a council on the affairs of the Russian Orthodox Church was set up to maintain contact between the Government and the Patriarch of Moscow and all Russia on questions of the Russian Orthodox Church that require settlement by the U.S.S.R. Government. The council is to function under the Council of the People's Commissars of the U.S.S.R.

Of the dissenters in Russia, Roman Catholics are most numerous in the former Polish Provinces, Lutherans in those of the Baltic, and Mohammedans in Eastern and Southern Russia, while the Jews are almost entirely settled in the towns and larger villages of the western and south-western provinces. The Soviet authorities are now endeavouring to settle Jews on the land—particularly in the Crimea and in the Ukraine. For colonizing Jews in the Far East the Soviet Government in 1928 allotted an area of 36,490 sq. kilometres in the district of Biro-Bidjan (the Jewish Autonomous Region of the Far East). Population, 1935, 60,000.

### Education.

Education is obligatory, and certain classes of private schools (under State control) are permitted. In December, 1943, it was decided that as from September, 1944, universal compulsory education was to start from 7 years of age instead of 8 as hitherto. Co-education was the rule in all

schools until September 1, 1943, when separate schools for girls and boys were established in the urban areas. Since January, 1934, three types of schools are in existence—those with a four-year, a seven-year and a ten-year curriculum respectively.

At the beginning of 1936 there were in the Soviet Union 164,081 elementary schools, 1,797 factory schools, 2,572 technical schools, 716 workers' faculties, and 700 universities and technical colleges. Between 1936 and 1939, 9,593 new schools were established. About 6,000,000 children attended pre-school institutions and nearly 8,000,000 other persons were receiving some education outside the school. In 1943, special schools were opened for the children of service men and guerrillas, attended by over 15,000 children. On December 1, 1943, new Suvorov military schools for training officers for the Red Army were opened.

The number of children attending elementary and secondary schools in 1940 was nearly 35,000,000, and in 1941 the number was estimated to reach 36,200,000.

Before the Revolution there was a total of 91 higher educational institutions (with 112,000 students), including 10 universities (with about 40,000 students). In 1941 there were 781 universities and technical colleges of university status, and the students in these numbered over 657,000. Among the towns which at present have universities are: Moscow, Leningrad, Kharkov, Odessa, Dorpat, Kazan, Saratov, Tomsk, Kiev, Sverdlovsk, Tbilisi, Alma-Ata, Tashkent, Minsk, Gorky and Vladivostok. In 1944, 5,100 professors, 9,800 senior lecturers and 15,000 assistants and instructors were employed at the universities and the higher educational institutions.

There were also two conservatoires, 5 art and 4 theatrical schools of university status, as well as over 500 musical, art and theatrical schools (secondary). In all these there were some 120,000 students.

In 1941, there were 10,000 secondary schools for adults with an attendance of 1,500,000. Since 1942, special provision is made for the education of war invalids.

In 1943, 60,000 engineers, doctors, architects, chemists, geologists and other specialists graduated from Soviet institutions of higher education. The number of these institutions has considerably increased with the opening of new universities in Kuibyshev, Ulyanovsk and other cities.

At the beginning of 1939 there were 70,000 popular libraries with a total number of 126,600,000 books. In 1940, about 9,000 newspapers, published in 70 different languages, with a total circulation of over 38,000,000, appeared in the Soviet Union. The number of books published in 1940, was 44,000 in 111 languages, the total number of copies circulated being over 700,000,000. There were 2,100 reviews published, with a total issue of 700,000,000 copies in 48 languages. The number of theatres in 1940 was 825.

### Justice and Crime.

The basis of the Judiciary System is the same throughout the whole of the Soviet Union, but the Constituent Republics have the right to introduce modifications and to make their own rules for the application of the code of laws. The Supreme Court of the U.S.S.R. is the chief Court and supervising organ for all Constituent Republics and is elected by the Supreme Soviet of the U.S.S.R. for 5 years. Supreme Courts of the Union and Autonomous Republics are elected by the Supreme Soviets of these Republics, and Territorial, Regional and Area Courts, by the respective Soviets, each for a term of five years.

In all courts cases are tried with the assistance of People's Assessors except in cases specially provided for by law.

Court proceedings are conducted in the language of the Union republic, autonomous republic or autonomous region; persons not knowing this language are given an opportunity of acquainting themselves with the material pertaining to the case through an interpreter. They have the right to speak in court in their own language. In all courts of the U.S.S.R. cases are heard in public, unless otherwise provided for by law, and the accused is guaranteed the right of defence. Judges are independent, and subject only to the law.

In the main, there is very little difference between the code of laws and their application in the separate republics. The legal system of the R.S.F.S.R., therefore, can be taken as an example of that in force in all the other Republics of the Union.

The Law Courts of the R.S.F.S.R. are divided into People's Courts and Special Courts. The People's Courts consist of the People's Judge and two Assessors, and their function is to examine as the First Instance, most of the civil and criminal cases, except the more important ones, some of which are tried at the Regional Court, and those of the highest importance at the Supreme Court. The Regional Courts supervise the activities of the People's Courts and also act as Courts of Appeal from the decisions of the People's Court. The Supreme Court exercises supervision over all the Courts of the Republic, and forms an Appeal Court from the Regional Court.

People's Courts, the lowest judicial instance, are elected directly by the citizens of each district on the basis of general, direct and equal franchise with secret ballot for a term of three years. Should a judge be found not to perform his duties conscientiously and in accordance with the mandate of the people, he may be recalled.

The People's Assessors are called upon for duty for ten days in a year from lists of persons elected by the citizens of the rural districts, industrial enterprises, collective farms, army corps, etc. The People's Assessors for the Regional Court must have had at least two years' experience in public or trade union work. The list of Assessors for the Supreme Court is drawn up by the Supreme Soviet of the Republic.

In addition to the People's Courts there are the following Special Courts:— (1) the Labour Section of the People's Court, whose duty it is to supervise the regulations relating to the working conditions and the protection of labour as well as to give decisions on conflicts arising between employers and employees, or the violation of regulations; (2) Rural Commissions, which settle disputes concerning agrarian matters, such as claims relating to the use of the land, etc.; (3) Arbitration Committees, which settle disputes arising between separate State organs concerning property rights, with certain exceptions; (4) Military Tribunals, which deal with military offences, espionage, and other classes of crime, when there is no other Law Court on the spot but a military tribunal; (5) Disciplinary Courts, which deal with offences and neglect of official duties committed by members of the Central Executive Committee and similar State organs. The special courts of the U.S.S.R. are elected for a term of five years by the Supreme Soviet of the U.S.S.R.

The State Chief Prosecutor is appointed for seven years by the Supreme Soviet. All the Prosecutors of the Republics, Autonomous Republics, and Autonomous Regions, are appointed by the Procurator of the U.S.S.R. for a term of five years. The duties of the Public Prosecutors are the supervision of the correct application of the law by all State organs. The Prosecutors of the federated republics are subordinate to the Prosecutor of the U.S.S.R.,

The divisional composition has a considerable measure of flexibility, according to circumstance.

It was estimated early in 1945 that there were over 400 infantry divisions, as well as a very large number of independent tank brigades, available for offensive operations on the German front between the Baltic and the Danube—apart from the armies in the North, and the large garrison forces in the interior, the Balkans, and the Far East.

## II. NAVY.

According to the building programme announced in August, 1939, the Russian Navy was to have been entirely reconstructed and considerably strengthened by 1942-43. The canals were to have been widened to allow the passage of capital ships from the White Sea into the Gulf of Finland and the Black Sea. New construction in Leningrad comprised a 35,000 ton battleship, numerous destroyers, an aircraft carrier and a large number of submarines. Kronstadt as a naval base has been rebuilt. At Vladivostok there were stationed 60 submarines (30 ocean-going) and 30 fast motor torpedo-boats. The three old battleships, *Petropavlovsk*, *Gangut* and *Sevastopol*, have been refitted to a limited extent. A cruiser of 10,000 tons acquired from Germany early in 1940 may now be in service.

State dockyards are at Nevsky, New Admiralty and Galernyi Ostrov, Leningrad; Kronstadt, Sevastopol, Nikolaiev and Vladivostok. Guns are made at the Putiloff steel works; a considerable number of submarines and some cruisers and destroyers have been built at Leningrad, and a few ships have also been constructed at Nikolaiev.

Estimates in 1941 for the Navy, 12,000 million roubles.

The following table gives the principal ships in service in 1942. The former division into Baltic and Black Sea fleets may be considered to have lapsed, especially as the completion of a through canal system between the Baltic and White Seas and the opening of regular traffic via the North-East Passage have enabled the Soviet Government to transfer tonnage freely between the Baltic and Far East.

| Date of Launch      | Name                                                         | Displacement                 | Horse-power | Speed | Officers and Men | Main Armament           |
|---------------------|--------------------------------------------------------------|------------------------------|-------------|-------|------------------|-------------------------|
| <b>Battleships.</b> |                                                              |                              |             |       |                  |                         |

| 1910                | <i>Krasny Karkas</i>                                         | 8,080                        | 55,000      | 30    | 624              | 4.7-in.; 8 4-in. A.A.   |
| 1939                | <i>Rubyshev</i>                                              |                              |             |       |                  |                         |
| 1939                | <i>Orionskides</i>                                           |                              |             |       |                  |                         |
| 1936                | <i>Kirou</i>                                                 |                              |             |       |                  |                         |
| 1937                | <i>Maxim Gorki</i>                                           | 8,500                        | 100,000     | 35    | 650              | 6.7-in.; 4 4-in. A.A.   |
| 1939                | (ex-German)                                                  | 10,000                       | 80,000      | 32    | 880              | 12.7-in.; 12 4-in. A.A. |

There were over 50 destroyers, 350 submarines, 22 torpedo-boats, 180 motor torpedo-boats, several mine-layers and mine-sweeping trawlers, motor-boats, and surveying and training ships, including the ex-cruiser *Aurora*.

Admiral Kuznetsov (People's Commissar for the Navy) stated in Moscow on July 27, 1940, that in 1939 112 new surface ships had been added, and

in 1940 a further 168 surface ships would be completed. Three times the number of submarines existing in 1939 would be completed in 1940. The Soviet Navy was distributed in four fleets—Baltic, Black Sea, Pacific and Northern—and in several flotillas (Amur and Dnieper Rivers and the Caspian Sea). The number of submarines and warships (apart from small craft like motor torpedo-boats) in the Pacific fleet alone exceeded 100.

## Production and Industry.

The Soviet Union, not long since predominantly agricultural in character, has become an industrial-agricultural country. In 1913 industrial production was 42.1 per cent. of the total, and agricultural production 57.9 per cent. In 1937 industrial production was 77.4 per cent. and agricultural production 22.6 per cent.

Forest land occupies 950,000,000 hectares (44 per cent. of total territory); pasture, 241,084,000 hectares (11 per cent.); arable land, 197,611,000 hectares (9 per cent.); grassland, 46,415,000 hectares (2 per cent.); gardens and orchards, 11,461,000 hectares (0.5 per cent.); non-agricultural land, 675,000,000 hectares (31 per cent.).

The total area under cultivation (including single-owner peasant farms, State farms and collective farms) was 129,700,000 hectares in 1933, 151,000,000 hectares in 1940, and 157,000,000 hectares in 1941.

In 1941 there were in the Union 243,000 collective farms, 1,300,000 individual peasant owners, 3,961 State farms and 6,940 tractor stations. In 1941, about 70 per cent. of the power used in agriculture was mechanical, and in the collective and state farms about 480,000 tractors, 154,000 combine harvesters and 196,000 lorries were being utilised. There were 970,000 tractor drivers, 255,000 combine-harvester operators, 125,000 mechanics and 107,000 agronomists, as well as other agricultural experts.

The following table shows the extent of cultivated land in the U.S.S.R. (in million hectares):—

|                                       | 1936  | 1937  | 1938  |
|---------------------------------------|-------|-------|-------|
| Cereals . . . . .                     | 102.4 | 104.4 | 102.4 |
| Industrial plants . . . . .           | 10.8  | 11.2  | 11.0  |
| Garden plants . . . . .               | 9.8   | 9.0   | 9.4   |
| Feeding stuffs . . . . .              | 10.6  | 10.6  | 14.1  |
| Total (including all items) . . . . . | 133.8 | 135.3 | 136.9 |

The produce of the principal crops was (in million double cwt.) :—

|                             | 1936  | 1937   | 1938  |
|-----------------------------|-------|--------|-------|
| Wheat . . . . .             | 827.8 | 1202.9 | 949.9 |
| Cotton . . . . .            | 23.9  | 25.8   | 26.9  |
| Flax . . . . .              | 5.8   | 5.7    | 5.5   |
| Sugar beet . . . . .        | 168.3 | 218.6  | 168.8 |
| Oleaginous plants . . . . . | 42.3  | 51.1   | 46.6  |

In 1941, the total area under food grains was 111,000,000 hectares, and the area under technical plants, kitchen gardens and orchards was 23,000,000 hectares.

Grain crops (in million double cwts.):—1939, 1,050; 1940, 1,117; 1941, 1,270.

Tea production 1940, 23,500 tons; sugar production, 4.16 million cwts. (in 198 factories).

Of the total harvest raised, about 12 per cent. is produced by the State

whose duty it is to see that acts of all institutions of the U.S.S.R. are legal, that the law is correctly interpreted and uniformly applied, and who has to participate in important cases in the capacity of State Prosecutor.

### Finance.

The revenue and expenditure for five years are shown as follows (in millions of roubles):—

|             | 1940    | 1941 <sup>1</sup> | 1942 <sup>1</sup> | 1943 <sup>1</sup> | 1944 <sup>1</sup> |
|-------------|---------|-------------------|-------------------|-------------------|-------------------|
| Revenue     | 180,741 | 181,398           | 182,841           | 219,576           | 245,600           |
| Expenditure | 174,350 | 191,898           | 182,841           | 249,576           | 245,600           |

<sup>1</sup> Estimates.

In 1942 war expenditure amounted to 108.4 milliard roubles; in 1943, to 124.7 milliard roubles and the estimate for 1944 is 128.4 milliard roubles.

On September 1, 1917, the total indebtedness of Russia amounted to 22,300 million roubles, made up as follows:—Pre-war debt, 8,800 million roubles; seven internal war loans, 10,500 million roubles; loans contracted abroad, 8,000 million roubles; short-dated loans, 5,000 million roubles. According to an estimate made in 1924 the foreign loan was then reckoned at 15,858 million roubles. On March 31, 1933, the indebtedness of Russia to Great Britain was 1,058,973,000l. (including interest since December 31, 1918). All these debts were cancelled by decree of January 28, 1918. The debt to the United States was 800 million dollars.

On January 1, 1933, the internal debt was 30,088,900,000 roubles. The internal debt has been increasing annually.

### Defence.

#### I. ARMY.

At the Seventh Soviet Congress in 1935, it was officially stated that the numerical strength had been below 600,000 for many years, but that it would be raised to 940,000 by the end of 1935. By January, 1936, it was officially stated at the Central Executive Committee that the numbers were being raised that year to 1,300,000. At the Eighteenth Congress of the Bolshevik Party in March, 1939, Marshal Voroshilov stated that, putting the strength of the Red Army five years before at 100, by the time of the Congress it had been more than doubled. This would make its then strength over 1,900,000 men.

Elementary military training was given in all schools to children between the ages 12 and 15, two hours in every six days being devoted to such training. Pre-war military training of two hours every six days was given to older children (ages 15-18) of the secondary schools and in technical and factory training schools, attended by young people of corresponding ages. Students of higher technical educational establishments who had not served in the army also underwent similar pre-army military training.

With full mobilisation of Russia's resources, the total strength of the Red Army has been estimated at 20,000,000 men. The way that its strength has been maintained, despite immense losses, indicates the extent to which Russia has been able to tap and train additional man-power, and suggests that this may have been greater than was indicated on pre-war figures of population. Even more amazing is the way that equipment kept pace with this vast expansion under difficulties caused by the enemy's occupation of many of the most important pre-war industrial areas.

While extreme secrecy is maintained about the composition of the Red Army, it has been disclosed that a radical reorganisation was carried out in the winter of 1942-43, and to the results of this were attributed a considerable share of the credit for the successes of 1943. Among the important changes were a simplification of the supply system and a remodelling of the division on a handier pattern. It had formerly comprised over 17,000 men. Another notable feature of the Red Army's organisation is the absence of any intermediate headquarters between the division and the army. The latter handles direct, without the time-wasting interposition of an army corps headquarters, as many as nine divisions and sometimes more. Similarly, the higher commanders in charge of a 'front' control up to six or seven armies. This combination of smaller divisions, with fewer links in what is called the 'chain of command,' has gone far to amplify the possibilities of manoeuvre and to quicken the tempo of operations.

On October 10, 1943, the political commissars in the Army and Navy were abolished.

At the start of the German invasion, the numerical superiority of the Red Army was offset by various technical deficiencies, as well as by lack of experience. The decisive factor in the early battles was the German armoured forces. Their tanks were superior to the Russian in quality, and probably in quantity, while they were also superior in tactics. That advantage gradually disappeared as the German armoured forces were worn down in successive offensives, and as the Russians profited from time and experience. An important factor in the wearing down process was the superiority of the Russian artillery, an advantage which tended to grow with the adoption of a policy of increasingly centralised control. The Germans had an abundance of mortars, and a superiority in this weapon, but it did not compensate for their relative neglect of light field artillery. In contrast, it was the Russian artillery which became the main factor in checking the German armoured drives until the Russians had replaced their heavy initial losses by training and equipping adequate tank forces for counter-attack and the counter-offensive. The 28-ton T34 and the 42-ton KV are the principal types of machine employed in these new tank forces, which are formed in brigades, not in divisions—though the number of tanks in a Russian brigade is almost as high as in the reduced German armoured division. The wide tracks of the Russian tanks have given them a particular advantage for operating in snow and mud.

Previous to the war, horsed cavalry had continued to be kept up on a larger scale than in any other modern army. They were organised in army corps. While they found more scope in the wide spaces of the Eastern Front than they could have found elsewhere, they suffered from severe setbacks, and their limitations became increasingly evident. Commanders tended to use cavalry chiefly when armoured and motorised forces were lacking, and their functions shrank as a higher proportion of these modern style forces became available.

In the defensive stage of the war, the infantry, backed by the artillery, were the staple of Russia's resistance. Their losses were often unduly severe because their doctrine had carried to excess the dictum that 'attack is the best defence,' and they too often rushed into networks of fire that the enemy had created to trap them. But with hard experience they grew wiser, while their very shortage of tank support fostered a superior development of their own independent tactical qualities. They came to excel in marksmanship and semi-guerrilla tactics. These qualities continued to bear fruit when the changing balance of strength enabled the Russians to pass over to the offensive in general, as the wide front allowed room for infiltration.

farms, about 84 per cent. by the collective farms and 4 per cent. by the individual peasant farmers. Agriculture is being steadily electrified. In 1939, 4 per cent. of the Kolkhozy and 25-30 per cent. of the Sovkhozy had been electrified. In 1941, the work of electrification was being speeded up.

The number of animals (million heads) in the Soviet Union is shown as follows for five years:—

|                     | 1934 | 1935 | 1936 | 1937 | 1938  |
|---------------------|------|------|------|------|-------|
| Horses of all kinds | 15.6 | 15.8 | 16.6 | 16.7 | 17.5  |
| Cattle              | 42.4 | 49.2 | 56.5 | 57.0 | 63.2  |
| Sheep and Goats     | 51.0 | 61.0 | 72.3 | 81.3 | 102.5 |
| Pigs                | 17.4 | 22.5 | 30.4 | 22.8 | 30.6  |

In 1938 there were 347,000 livestock breeding farms; in 1939, 375,000, and in 1941, 618,000.

The U.S.S.R. contains a number of wild rubber plants, the best known, the Kok-sagyz, discovered in 1931, is now cultivated fairly extensively in various parts of the Union.

Silk is being more and more extensively cultivated, not only in Central Asia and Transcaucasia, but in a number of new areas—the Ukraine, Crimea, the Northern Caucasus and also in the Voronezh, Kursk and Stalingrad regions. The area under plantations for silk culture in 1940 was 51,000 hectares, and between 1941-47 it was planned to increase the area to 256,000.

Of the whole of the forest land of the U.S.S.R., a large portion is administered and worked by the State, and the other, about 72,900,000 acres in extent, is granted for use to the peasantry free of charge.

A large proportion of the forest lands of the U.S.S.R. lies in Asiatic Russia (some 300,000,000 acres in extent) where, owing to the absence of roads, it is not accessible for working. But the exploitation of the timber resources of the Asiatic parts of the U.S.S.R. has been commenced in recent years, and the output is increasing from year to year. The forests of the Caucasus, on the other hand, are capable of furnishing the world's market with an inexhaustible supply of many valuable varieties of timber. A total of 18,600,000 acres in the Caucasus is covered by forest lands.

The Soviet Union is rich in minerals. Soviet scientists claim that the U.S.S.R. contains 20 per cent. of the world's coal deposits, 58.7 per cent. of its oil, 53 per cent. of its iron ore, 76.7 per cent. of its apatite and 25 per cent. of all timber-land in the world. The U.S.S.R. has sufficient deposits of all kinds of non-ferrous and rare metals and chemical ores to cover the requirements of all branches of her industry for many decades. The output of some of the principal ores was as follows:—Iron, 1934, 21,700,000 metric tons; 1936, 28,200,000 metric tons; manganese, 1936, 2,800,000 metric tons; copper pyrites, 1934, 2,081,000 metric tons; 1933, 1,833,000 metric tons; gold, 1936, 7,850,000 fine ounces.

The total gross output of coal in 1934 was 93,600,000 metric tons; in 1938, 133,000,000 tons; in 1940, 164,600,000 tons. The output of pig-iron in 1937 was 14,292,000 metric tons; in 1938, 14,479,000 tons; of steel, 17,545,000 metric tons in 1937; 17,802,000 metric tons in 1938, and 18,400,000 metric tons in 1940.

The output of the State oil industry was as follows (in barrels):—1936, 199,634,921; 1937, 202,856,661; 1938, 206,125,000. In 1940 the output of oil was 34,200,000 tons.

The estimates for 1941 were: coal, 191,000,000 tons; pig iron, 18,000,000 tons; steel, 22,000,000 tons; oil, 38,000,000 tons.

The total length of pipe-line on January 1, 1939, was 4,212 kilometres, divided as follows: Baku-Batumi, 1,717 km.; Grozny-Makhach-Kala, 150 km.; Grozny-Armavir-Tuapse, 618 km.; Armavir-Trudovaya, 488 km.; Gurev-Orsk, 845 km., and other, 394 km.

The organization of industry in Soviet Russia is based on State ownership and control, and is administered in accordance with the Decree of April 10, 1923, and subsequent modifications, by State chief departments acting under the direction of the People's Commissariat concerned. The trusts in the large scale and middle sized State industries number over 600, but there are 291 big trusts and these cover about 80 per cent. of the total State industries. A small number of trusts, called monopoly trusts, combine all the enterprises of a given branch of industry in the whole Union. Such are, for instance, the Rubber Trust, Silk Trust, Urals Asbestos Trust, etc. In some industries there are several trusts. Thus the oil, cement and a few other industries have four trusts each, but in the vast majority of industries in the Soviet Union there are a number of separate trusts in the various parts of the Union.

On January 1, 1938, the U.S.S.R. possessed 574,064 industrial enterprises, which included 61,428 large enterprises. During the three years 1938-40, 2,900 new industrial enterprises (factories, mines, electrical plants, etc.) were set in operation.

During 1938-40, some 807,000 spindles and 8,150 looms were added to the textile industry of the U.S.S.R., and a number of new textile enterprises were set up. The output during this period was 10,870,000,000 metres of cotton, 335,000,000 metres of woollen, 175,000,000 metres of silk and 786,000,000 metres of linen material.

The number of workers engaged in the whole national economy of the Soviet Union exceeded 25 millions in 1938. In large-scale industry there were 7,065,000, in the building industry 2,203,000, in State farms and machine tractor stations 2,837,000. The number of technicians and engineers engaged in large-scale industry was 584,500. In 1941 the total numbers of manual and non-manual workers was 31,600,000.

The total value of the output of industry in 1938 was 95,500,000,000 roubles; in 1940, 137,500,000,000 roubles. Capital investments in industry during 1938-40, 108,000,000,000 roubles.

In 1941, a 15-year plan of economic development was being worked out.

Since the outbreak of war many new large industrial and transport enterprises have been launched in the Soviet Union, including the Magnitogorsk blast furnace no. 5, the Chussovaya blast furnace, the Chelyabinsk iron and steel works, the largest in Europe, new steel-smelting and pipe rolling works in the Urals, the open hearth department in Zlatoust, the aluminium works in Siberia, the tractor building works in the Altai Territory, tank building factories in Siberia, numerous aircraft factories, new turbines in the Chelyabinsk steam power station, new power stations in the Central Urals and Krasnogorsk, the North Pechora railway and new railways on the right bank of the Volga.

### Commerce.

The foreign trade of the U.S.S.R. is organized as a State monopoly. Importation and exportation of goods are effected by special licences issued by the Commissariat for Foreign Trade and its respective departments in pursuance of a plan annually sanctioned by the Government. The right of

purchasing goods for importation, and that of selling Russian exports abroad is vested in the Trade Delegations of the U.S.S.R. in foreign countries. By special decrees respective Government Departments select those State and co-operative organizations which are authorized, under the control of the Trade Delegation, to engage in foreign trade.

There are 15 export organizations, 4 import organizations, and 1 export and import organization. The Co-operative Organizations which are granted the right of 'exit to the foreign markets' are Centrosoyus (Central Union of Co-operative Societies), Selskosoyus and several other organizations.

The following table gives the value of imports and exports for five years:—

| Year | Imports                             |                             | Exports                             |                             |
|------|-------------------------------------|-----------------------------|-------------------------------------|-----------------------------|
|      | Quantity (thousands of metric tons) | Value (millions of roubles) | Quantity (thousands of metric tons) | Value (millions of roubles) |
| 1934 | 1,025                               | 1,018                       | 17,340                              | 1,832                       |
| 1935 | 1,259                               | 1,067                       | 17,180                              | 1,609                       |
| 1936 | 1,155                               | 1,553                       | 14,204                              | 1,359                       |
| 1937 | 1,286                               | 1,341                       | 12,969                              | 1,728                       |
| 1938 | 1,127                               | 1,422                       | 9,682                               | 1,331                       |

Soviet foreign trade in 1938 was distributed by countries as follows (in thousands of roubles):—

| Country                    | Imports | Exports | Country               | Imports | Exports |
|----------------------------|---------|---------|-----------------------|---------|---------|
| Afghanistan                | 18,716  | 14,763  | Iran                  | 63,772  | 57,984  |
| Argentina                  | 4,226   | 312     | Italy                 | 56      | —       |
| Australia                  | 50,555  | 7       | Japan                 | 17,597  | 6,986   |
| Belgium-Luxemburg          | 64,294  | 116,803 | Latvia                | 8,440   | 8,797   |
| Canada                     | 30,649  | 1,547   | Lithuania             | 12,095  | 11,646  |
| China (excluding Mongolia) | 68,461  | 44,148  | Mongolia              | 38,310  | 69,838  |
| Czecho-slovakia            | 19,422  | 13,231  | Netherlands           | 102,585 | 92,848  |
| Denmark                    | 5,148   | 27,482  | Norway                | 9,883   | 21,626  |
| Egypt                      | 279     | 12,074  | Poland                | 1,460   | 7,822   |
| Estonia                    | 7,080   | 7,090   | Spain                 | 26,307  | 52,450  |
| Finland                    | 3,441   | 10,815  | Sweden                | 27,390  | 13,453  |
| France                     | 39,896  | 59,745  | Switzerland           | 11,846  | 12,179  |
| Germany                    | 67,198  | 88,327  | Tannu-Tuva            | 12,671  | 5,893   |
| Great Britain              | 240,809 | 875,124 | Turkey                | 22,740  | 72,746  |
| Greece                     | 1,474   | 17,344  | Union of South Africa | 559     | 7,587   |
| India and Ceylon           | —       | 8,626   | United States         | 405,858 | 96,749  |

Total trade between Russia and the United Kingdom in thousands of pounds for 5 years (Board of Trade returns):—

|                                      | 1934   | 1935   | 1936   | 1937   | 1938   |
|--------------------------------------|--------|--------|--------|--------|--------|
| Imports from Russia into U. Kingdom  | 17,327 | 21,664 | 18,908 | 29,134 | 19,548 |
| Exports to Russia from U. Kingdom    | 3,640  | 3,483  | 3,507  | 3,085  | 6,430  |
| Re-exports to Russia from U. Kingdom | 3,905  | 6,244  | 9,838  | 16,420 | 10,986 |

### Shipping.

Merchant marine, July 1, 1939, 716 vessels; tonnage, 1,815,766 gross tons.

### Communications.

There are 110,000 kilometres of navigable inland waterway in the Soviet Union. In 1940, 70,200,000 passengers were carried by the Russian river fleet.

On January 1, 1935, there were 1,368,000 kilometres of constructed roads in the Soviet Union, of which 1,146,400 kilometres were natural gravel roads and 221,600 kilometres were built roads.

The length of exploited railways of the U.S.S.R. in 1922 was 81,000 kilometres; in 1935, 84,300 kilometres, and on January 1, 1940, 95,000 kilometres. At the end of 1939 the length of the electrified railways in the U.S.S.R. was 1,817 kilometres. During 1944, electrified sections totalling 250 miles were set into operation on the Kalinin, Kuibyshev, Southern Urals, Perm and Trans-Caucasian railways. The goods traffic on the Soviet railways was as follows: 1937, 517,300,000 tons; 1938, 568,000,000 tons; passenger traffic, 1937, 1,142,000,000; 1938, 1,230,000,000.

Civil aviation started in the U.S.S.R. in 1922. In 1938 the total length of the air lines in the U.S.S.R. was approximately 109,070 kilometres. The principal air lines were Moscow-Vladivostok and Moscow-Tiflis, the former, which is over 8,000 kilometres long, was the longest of all existing national land lines in the world, and was of international as well as all-Union importance as it linked Europe with the Pacific coast. The Central Asiatic airways in some instances provide the only means of communication across the desert and mountainous regions of the local republics. An 8,500 kilometre passenger goods and postal airline was opened in February, 1941, between Moscow and Anadyr (Eastern Siberia), running through Archangel, Igarka, Khatanga, Tixie Bay and Cape Schmidt, i.e. along the entire course of the Northern Sea Route. This line is in operation practically the whole year round. There are also other Arctic air lines, e.g. Igarka-Gulf of Kozhevnikov; Igarka-Dickson Island; Yakutsk-Bay of Tuksi; Yakutsk-Vilinsk; Yakutsk-Verkhoyansk.

In January 1941, the number of postal enterprises was 44,988.

The number of telegraph enterprises was 23,026 in 1939 and 24,499 in 1940; the total inter-town telegraph and telephone lines in 1939 was 1,518,000 kilometres; in 1940, 1,578,000 kilometres.

### Banking.

The State Bank began operations on November 16, 1921. Besides the State Bank (*Gosbank*) and the savings banks there is the Agricultural Bank (*Selkhozbank*), the Communal Bank and others. Keeping accounts with these banks is compulsory for industrial undertakings. Most of the financing of industry and agriculture is done through the State Bank and the Agricultural Bank. In 1939 the State Bank was partly reorganized, a number of territorial offices was newly established and at the Central Management new departments were organized. In addition there are certain specialised banks which provide long-term credit for groups of industries. There is Prombank for financing electrification and permanent industrial development; Selkhozbank for agriculture; Torgbank for co-operatives; Tzekombank for municipal and housing construction. All these institutions are State organizations.

On January 1, 1937, the value of gold was calculated at the rate of 5.6307 roubles for one gramme of pure metal; one pound sterling = 24.74 roubles; one American dollar = 5.04 roubles; and 100 French francs = 23.53 roubles.

The savings bank deposits on January 1, 1939, amounted to 6,500 million roubles. Number of depositors, 16,000,000. Number of savings banks, 26,362.

### Money, Weights and Measures.

#### MONEY.

The currency in circulation is (1) Chervontsi notes in denominations of 1, 2, 3, 5, 10, 25 and 50, issued by the State Bank against gold cover but inconvertible at present; (2) Treasury Notes in denominations of 1, 3 and 5 gold roubles; (3) silver coins: either bank silver (90 per cent. silver and 10 per cent. copper) in denominations of 1 rouble and 50 kopecks; or change silver (50 per cent. silver and 50 per cent. copper) in denominations of 20, 15 and 10 kopecks; (4) copper coins in denominations of 1, 2, 3 and 5 kopecks and half kopecks; (5) bronze coins in denominations of 1, 2, 3 and 5 kopecks. Owing to the scarcity of silver, nickel pieces (the first ever to be used in Russia) of 10, 15 and 20 kopecks were introduced in 1932.

#### WEIGHTS AND MEASURES.

The metric system of weights and measures has been in use since January 1, 1927.

The old Russian weights and measures were as follows:—

|                                                        |                                                          |
|--------------------------------------------------------|----------------------------------------------------------|
| 1 <i>Verst</i> (500 <i>sazhens</i> )                   | = 3,500 ft., or two-thirds of a statute mile (0.662879). |
| 1 <i>Sazhen</i> (3 <i>arshins</i> )                    | = 7 feet English.                                        |
| 1 <i>Arshin</i> (16 <i>vershoks</i> )                  | = 28 inches                                              |
| 1 <i>Square verst</i>                                  | = 0.439408 square mile = 281.221 acres.                  |
| 1 <i>Dessiatin</i>                                     | = 2.69972 English acres                                  |
| 1 <i>Pound</i> (96 <i>zolotniks</i> = 32 <i>lots</i> ) | = $\frac{1}{16}$ of a pound English (0.06283 lb.).       |
| 1 <i>Pood</i> (40 <i>pounds</i> )                      | = 36 lb. English.                                        |
|                                                        | = 0.82243578 cwt.                                        |
|                                                        | = 0.016121789 ton.                                       |
| 1 <i>Vedro</i> (10 <i>shloffs</i> )                    | = 2 $\frac{1}{2}$ imperial gallons (2.7056).             |
| 1 <i>Chetvert</i> (8 <i>chetveriks</i> )               | = 5.7719 imperial bushels.                               |

The Soviet Government issued a decree adopting the Gregorian Calendar as from February 14, 1918. A seven-day week (six working days and one holiday for all) was adopted on June 27, 1940.

### Diplomatic Representatives.

#### 1. OF THE SOVIET UNION IN GREAT BRITAIN.

**Ambassador.**—Feodor Tarasovitch Gousev (appointed August 13, 1943).  
**Minister Plenipotentiary and Counsellor.**—Arkadi Alexandrovich Sobolev.  
**Counsellors.**—G. F. Saksin, A. A. Rosh and Konstantino Koukin.  
**First Secretaries.**—B. M. Karavaev, A. Stetsenko, K. Koudrov and N. Koktomov.  
**Second Secretaries.**—Vassili Zonoff, N. V. Abramkine and D. Doroshenko.  
**Third Secretaries.**—Boris Krotov and V. Barkovsky.  
**Military and Air Attaché.**—Major-General Ivan Skliarov.  
**Head of the Soviet Military Mission.**—Major-General Adrian Vasiliev.  
**Acting Naval Attaché.**—Major-General of Aviation Constantine Stukalov.  
**Attaches.**—M. Svirin, M. Shishkin, P. D. Erzin, O. A. Troianovski and S. A. Nekrasov.  
**Trade Representative.**—Dmitri Borisenko.

#### 2. OF GREAT BRITAIN IN THE SOVIET UNION.

**Ambassador.**—Sir Archibald John Kerr Clark Kerr, G.C.M.G. (appointed January 16, 1942).

**Secretaries.**—P. D. Crosthwaite, S. L. Burdett, M.C., J. H. Watson, E. E. Tomkins and T. Brimelow.

**Commercial Secretary.**—C. H. P. Gifford.

South-Western section of this area is, however, comparatively densely populated, and specialises in the cultivation of flax and stock-breeding, particularly for the dairy industry. The northern Pechora railway, built during the war, now links the northern Dvina with the Pechora and the Arctic end of the Ural mountain range, while the Soroka-Plesetsk and the Konosha-Byelsk railways connect the Kola Peninsula with other parts of the European north of the U.S.S.R. A new, powerful coalmining centre which supplies the entire European north of the U.S.S.R. has been created in distant Vorkuta (about 120 miles west of the mouth of the river Ob), from which the new railway runs south-west to Kotlas, Byelsk and Konocha.

*The Western Area*, embracing the Smolensk and Kalinin regions, with a temperate, moist climate, has extensive valuable forest lands and large deposits of peat.

*The Volga Area* covers a huge part of the R.S.F.S.R., including both forest land and vast steppes. It contains deposits of shale, peat, salt and oil, and produces valuable timber, wheat and other grain crops, hemp, potatoes and sunflower. Among the flourishing industries are machinery, machine tools, tractor and locomotive construction, ship-building, motor-cars and trucks, chemical, woodworking, food, building materials, fishing. There are also extensive orchards and stock-breeding farms.

*The South Area* has a warm climate, deposits of iron ore, oil and cement clay. It includes: (1) the agricultural Kuban, which yields fine crops of wheat, maize, sunflower, as well as herds of livestock, and (2) the Black Sea Coast and the Crimea, with their orchards, vineries, tobacco, and their picturesque health resorts, as well as the Don and Salek steppes, with their grain fields and livestock breeding farms.

*The Urals Area* is extremely rich in minerals. Its oil deposits extend from the western and southern slopes of the Ural mountains and beyond the River Volga, covering over a million square kilometres, and it is known as the 'Second Baku.' In 1938 it was estimated that the oil reserves in this area amounted to about 2,700,000,000 tons. In addition, the Urals area has deposits of both ferrous and non-ferrous metals, huge industrial works, including the Magnitogorsk metallurgical plant, the Chelyabinsk tractor works, the Sverdlovsk machine construction works, Novotagilsk railway carriage and truck works. Of great importance to the Soviet war industry is the Chelyabinsk ferrous alloys plant which, covering 125 acres, was one of the first Soviet plants for the production of qualitative metallurgy. Recently a method was evolved for separating cobalt from the Urals deposits of copper pyrites, copper-nickel and silicate ores, all of which also contained cobalt, and in 1942-43 the construction of cobalt mines in the Urals was speeded up.

*For the Eastern and Western Siberian Areas and the Far Eastern Region,  
see below (p. 1264).*

To the Urals and other Eastern areas have been evacuated the industrial plants of the Ukraine and other areas of the U.S.S.R. overrun by the Germans in 1941 and 1942. Since the outbreak of the present war the industry and agriculture of these areas have been developed both intensively and extensively.

**Education.**—The number of children in elementary schools in 1940 was 10,200,000, and in secondary schools, 9,000,000. The number of schools in 1944 was 106,836. Expenditure on education in 1944 amounted to nearly

7,452,000,000 roubles, of which 5,155,000,000 roubles was allocated to the schools. Students in universities in 1941 numbered 182,000, and in technical schools and colleges, 387,000. In 1941, there were 470 higher educational institutions.

**Finance.**—Estimates for revenue and expenditure for three years:—

|                       | 1940            | 1941            | 1944            |
|-----------------------|-----------------|-----------------|-----------------|
|                       | Million roubles | Million roubles | Million roubles |
| Revenue . . . . .     | 24,205          | 25,129          | 24,740          |
| Expenditure . . . . . | 23,698          | 25,114          | 24,591          |

## UKRAINE.

(UKRAINIAN SOVIET SOCIALIST REPUBLIC.)

The Ukrainian Soviet Socialist Republic was proclaimed on December 27, 1917, that is, soon after the Soviet Revolution of November 7, 1917, and was finally established in December, 1919. In December, 1920, the Ukrainian Soviet Socialist Republic concluded a military and economic alliance with the Russian Soviet Federal Socialist Republic.

On July 6, 1923, the Ukrainian Soviet Socialist Republic formed, together with the other Soviet Socialist Republics in Russia, the Union of Soviet Socialist Republics.

The Ukrainian Soviet Socialist Republic consists of the following provinces: Vinnitsa, Dniepropetrovsk, Donetsk, Kiev, Odessa, Kharkov and Chernigov.

In 1941 the Germans overran the Ukraine, but they were expelled during 1944.

**Area and Population.**—The Ukrainian S.S.R. covers an area of 445,000 sq. kilometres (170,998 sq. miles).

The population of the Ukraine in 1939 was 30,960,221, of whom 80 per cent. were Ukrainians, 9·2 per cent. Russians, 5·4 per cent. Jews, and 5·4 per cent. of other origins. At the end of 1939 the Ukraine S.S.R. received an addition to its area of the Ukraine portion of Poland extending to nearly 100,000 sq. kilometres and nearly 7,000,000 new population. Northern Bukovina which, after being ceded to the U.S.S.R. in 1940 was added to the Ukraine, has an area of 6,000 sq. kilometres, and a population of over 500,000.

The principal towns (with their populations on January 17, 1939) are the capital, Kiev (population 846,293), Kharkov (833,432), Odessa (604,223), Dniepropetrovsk (500,662), Stalino (462,000) and Nikolaiev (141,400). The chief town of Northern Bukovina, Chernovitz, had a population of 109,821 in 1938. In 1930, it was decided to construct 14 new towns in the Donetsk Basin, among them Gorlovka. The cost of construction amounted to a total of nearly 650 million roubles.

The population of the Ukraine belongs to a variety of churches, the chief being the Orthodox Greek Church, and the Catholic church. There are also some Protestants, and adherents of other Christian Sects, as well as Jews and others.

**Education.**—In 1939 the number of pupils in the elementary and secondary schools was about 5,400,000. Number of children attending

#### RUSSIAN SOVIET FEDERAL SOCIALIST REPUBLIC (R.S.F.S.R.).

The greater part of the former Russian Empire now constitutes the Russian Soviet Federal Socialist Republic (R.S.F.S.R.). This contains (1) Territories: Altai, Kra-nodarsk, Ordzhonikidze, Primorsk, Krasnoyarsk, Khabarovsk; (2) Regions: Archangel, Voronezh, Vologod, Novosibirsk, Gorky, Orlov, Penza, Ivanovo, Irkutsk, Kalinin, Kirov, Kuibyshev, Kursk, Leningrad, Molotov, Ryazan, Rostov, Moscow, Omsk, Saratov, Sverdlovsk, Tambov, Smolensk, Stalingrad, Tula, Chelyabinsk, Chitinsk, Yaroslavl, Chkalov, Murmansk, Kemerevo (January 27, 1943) and Kurgansk (February 8, 1943); (3) Autonomous Soviet Socialist Republics: Tatar, Bashkir, Dagestan, Buryat-Mongolia, Kabardino-Balkaria, Kalmyck, Komi, Crimea, Marii, Mordovia, Volga German, North Osetia, Udmurt, Chechen-Ingush, Chuvash, Yakut, and (4) Autonomous Regions: Adygoi, Jewish, Karachayev, Oirat, Khakass, Cherkess.

The R.S.F.S.R. is the largest of the constituent republics of the Soviet Union. It was the first part of the Tsarist Empire over which the Soviets held sway. On November 7, 1917, a proclamation was issued in the name of the Military Revolutionary Committee, the organ of the Petrograd Soviet of Workers' and Soldiers' Deputies, establishing a revolutionary Government. The same day the Second All-Russian Congress of Soviets of Workers' and Soldiers' Deputies announced that it had assumed State power, and on November 8, 1917, the Congress promulgated a Decree forming a Workers' and Peasants' Government.

At the Third All-Russian Soviet Congress in January, 1918, a Declaration of Rights of the Workers was adopted, which was subsequently incorporated in the First Constitution of the R.S.F.S.R. and adopted on July 10, 1918. This constitution served as a model for the other Soviet Socialist Republics, which later joined with the R.S.F.S.R. to form the Soviet Union.

After the adoption of the Constitution of the U.S.S.R. in 1924, the R.S.F.S.R. adopted a new constitution in 1925 in harmony therewith.

The principles of the 1918 Declaration of Rights have been and are still the foundation of the Constitution of the U.S.S.R., as also of those of the constituent republics of the Union.

The R.S.F.S.R. adopted its present constitution at the 17th Extraordinary All-Russian Congress of Soviets in January, 1937. Since then slight alterations have been introduced in the constitution from time to time.

The R.S.F.S.R. occupies about 92.7 per cent. of the total area of the U.S.S.R., stretching from the Far North to the Black Sea in the south and from the Far East to Leningrad in the west. Its population is close on 110,000,000 (72,600,000 live in rural areas and 36,700,000 in urban areas), of whom four-fifths are Russians, the rest being made up of national minorities: Tatars, Jews, Moldavians, Chuvash, Bashkirs, Poles, Germans, Chechens. It contains a greater variety of nationalities than any of the other republics. The two principal towns are Moscow, the capital, with a population (January, 1939) of 4,137,018, and Leningrad, the second capital (3,191,304). Amongst other important large towns are Gorki (644,116), Rostov-on-Don (510,253), Stalingrad (445,476), Sverdlovsk (425,544), Kazan (401,665) and Kuibyshev (390,267).

The R.S.F.S.R. has a variety of climate (ranging from arctic to sub-tropical) and of geographical conditions (tundra, forest lands, steppes and rich agricultural soil). It also contains great mineral resources: iron ore in the Urals, the Kerch Peninsula and Siberia, coal in the Kuznetsk Basin, Eastern Siberia, Urals and the sub-Moscow Basin; oil in the Urals, Azov-Black Sea area and Bashkirs. It also has abundant deposits of gold, platinum, copper, zinc and lead.

The R.S.F.S.R. plays a major rôle in the national economy of the Soviet Union, producing about 70 per cent. of the total industrial and agricultural output of the latter.

The Black Earth Central Area, consisting of the Kursk, Orlov, Tambov, Voronezh regions, has a comparatively mild climate and fertile soil, and has made great economic progress since the Soviet revolution.

The Northern District covers about a third of the European part of the U.S.S.R. Among the most important industrial centres here are Archangel, at the mouth of the Northern Dvina, noted for its timber, saw-mills and timber exports, and Kirovsk, a new Socialist town, situated beyond the Polar circle near the abundant apatite deposits. A large part of the

secondary schools in 1940-41 was 2,000,000. The number of students in the technical schools, workers' faculties and higher educational institutions in 1939 was 375,000 (including 124,400 in the universities).

In 1940 schools were opened in Northern Bukovina in the Ukrainian, Moldavian, Russian, Yiddish and Polish languages. Also a teachers' training institute and Ukrainian and Jewish theatres.

Expenditure on education in 1941 was 3,860,000,000.

**Finance.**—The budget of the Ukrainian S.S.R. in 1940 balanced at 8,017,500,000 roubles. Estimates for 1941, 8,294,539,000 roubles.

**Agriculture.**—Before the war nine-tenths of the grain exported from Russia came from the Ukraine. The area under cultivation is about 27 million hectares, of which over 1 million hectares are under beet. Arable land extends to 70,408.8 thousand acres (64 per cent.); pastures to 4,712.4 thousand acres (4.3 per cent.); forests to 8,384.4 thousand acres (7.6 per cent.), and permanent meadows to 4,658 thousand acres (4.2 per cent.). In 1938, the collective farms cultivated 52,789,900 acres, and the State farms 5,755,900 acres. In 1938, the cultivated area was 68,262,100 acres (wheat, 25,324,200 acres; rye, 7,705,500 acres; barley, 6,922,000 acres; oats, 3,994,800 acres; millet, 1,033,900 acres; sugar beet, 1,991,000 acres). The census in 1938 showed 2,937,200 horses, 7,759,400 cows and other large cattle, 3,301,500 sheep and goats, and 7,720,700 pigs.

**Industry.**—Some of the industries of the Ukraine are amongst the most important in the whole of the U.S.S.R. Coal in the Donetsk field, (area of Donetsk basin, 10,000 sq. miles, stretching from Stalino to Rostov) estimated in 1938 to contain 60.8 per cent. of the bituminous and anthracite coal reserves of the Union, yielded an output in 1938 of 80,733,000 metric tons—about 60 per cent. of the Union production. The republic has also extensive peat beds, producing more than 2,000,000 tons in 1938.

Combining coal from the Donetsk field with the iron ore from the mines in Krivoi Rog—which accounted in 1938 for 16,070,000 tons, 59 per cent. of the Soviet Union total—has made possible the development of a large ferrous metallurgical industry in the Ukraine, which was started before the first World War and has been greatly expanded since 1928.

Manganese is also available at Nikopol; the mines there produced 957,000 tons of ore in 1937, of a total of 2,752,000 tons for the whole U.S.S.R.

Ukrainian blast furnaces turned out 8,800,000 tons of pig iron in 1937, and 8,467,000 tons of steel were also produced, out of Union totals of 14,487,000 and 17,730,000 tons respectively. On January 1, 1935, the latest year shown, there were 55 blast furnaces in the Ukraine, representing 55 per cent. of the capacity of the country, and 117 open hearth furnaces, representing 40 per cent.

In 1932 the construction of a dam across the Dnieper River at Alexandrovsk (now called Zaporozhye) was completed. This was destroyed by the Russian armies on August 28, 1941, in order that it might not fall into the hands of the German invaders. By the spring of 1945, this dam had been restored.

**Railways.**—The total length of railways of the Ukrainian S.S.R. on January 1, 1931, was 13,780 kilometres (over 7,000 miles), and the navigable rivers 2,851 kilometres (1,782 miles).

## WHITE RUSSIA.

### (BYELORUSSIAN SOVIET SOCIALIST REPUBLIC.)

The Byelorussian Soviet Socialist Republic was set up on January 1, 1919. It forms one of the constituent Republics of the U.S.S.R. Its constitution is similar to that of the R.S.F.S.R.

Byelorussia is situated along the Western Dvina and Dnieper, it is hilly with a general slope towards the south. It contains large tracts of marshland, particularly to the south-west. By comparison with Central European Russia it has a higher rainfall and a more equitable climate, being cooler in summer and much less cold in winter. It contains valuable forest land wooded with oak, elm, maple and white beech.

**Area and Population.**—In 1938, its territory covered 126,790 square kilometres (48,940 sq. miles), and consisted in 1941 of the Baranovichi, Byelostok, Brest, Vileika, Vitebsk, Gomel, Minak, Moghilev, Pinsk and Poleski regions. The capital is Minsk (population, January 1939, 238,772). Other important towns of White Russia are Vitebsk and Gomel. On January 17, 1939, the population numbered 5,567,976, of whom the urban population numbered 1,372,522. In 1939 the Western Byelorussian provinces were added to White Russia; the area added is over 108,000 sq. kilometres and the new population about 4,800,000. About 80 per cent. of the population are Byelorussians, 10 per cent. Jews living mainly in the urban areas, the rest being Russians, Ukrainians and Poles.

**Education.**—In 1936-37 there were about a million pupils in schools. There were 32 higher educational institutions, with 15,130 pupils; 130 technical high schools, with 32,200 pupils; 61 workers' faculties, with 15,760 pupils; 1,600 secondary schools, with 189,500 pupils; and 7,027 elementary

schools, with 750,000 pupils. There are also 39 scientific institutions and an Academy of Sciences. There are 3 institutions of university rank—the White Russian State University, the Communist University, and the Agricultural Academy with 4,418 students.

**Finance.**—The budget in 1941 amounted to 2,153,185,000 roubles.

**Agriculture.**—The area under cultivation (in hectares) in 1937 was 4,000,000, of which 2,519,000 hectares were under grain, 240,000 hectares under hemp and flax and 600,000 hectares under potatoes. The total number of heads of farm stock was 9,030,900 in peasant farms, including 1,091,800 horses, 2,096,200 cattle, 3,449,600 sheep and goats, and 2,293,300 pigs.

Byelorussia has large deposits of peat, and particular attention was paid to the development of the peat industry. There are also rich deposits of rock salt. In 1939, there were about 200,000 industrial workers. The Western Byelorussian industries were for the most part nationalised after 1939, when this area was incorporated in the Byelorussian Republic.

## AZERBAIJAN.

### (AZERBAIJAN SOVIET SOCIALIST REPUBLIC.)

The 'Mussavet' (Nationalist) party which dominated the National Council or Constituent Assembly of the Tartars, declared the independence of Azerbaijan on May 28, 1918, with a capital, first at Ganja (Elizavetopol) and later at Baku. On April 28, 1920, Azerbaijan was proclaimed a Soviet Socialist Republic. With Georgia and Armenia it formed the Trans-Caucasian Soviet Federal Socialist Republic. In 1936, it assumed the status of one of the Republics of the Union of Soviet Socialist Republics and adopted a constitution in conformity with that of the Union.

**Area and Population.**—Azerbaijan covers an area of 86,000 square kilometres (32,686 sq. miles) and has a population (1939) of 3,209,700, including 2,049,000 rural and 1,160,700 urban. Its capital is Baku, population 809,347 (1939). Azerbaijan includes the Nakhichevan Autonomous Soviet Socialist Republic and the Nagorno Karabakh Autonomous Province.

**Agriculture and Industry.**—Azerbaijan is an agricultural and industrial country. The chief products are grain, cotton, vine, kitchen and garden produce, and to some extent also tobacco and silk. In the mountain regions the occupation of the people is cattle-breeding.

The most important industry is the oil industry, especially in the Baku Region. The total output of oil was: in 1938, 22,100,000 tons; in 1939, 23,000,000 tons; in 1940, 25,000,000 tons. The largest producing area lies along the western shore of the Caspian Sea, north and south of Baku, where the largest refineries are located. Other wells lie west of Baku, and some have been drilled in the Caspian itself, off the Apsheron Peninsula. The northernmost coastal field is at Makhach Kala. West of this last is the large Grozny field, and still farther west is the Maikop field. Baku is connected by a double pipe line with Batumi on the Black Sea. Makhach Kala, Grozny, and Maikop pipe their product to Tumpse, on the Black Sea, or to Trudovaya in the Eastern Ukraine. All the oilfields have been electrified and are now connected with the town of Baku and, for the most part, with the new workers' settlements which have been

constructed more or less on the American type. Amongst the other industries in Azerbaijan are copper, salt, textiles, and fishing industries.

The budget for 1939 was fixed at 999,957,000 roubles, for 1940 at 1,036,700,000 roubles, and for 1941 at 1,058,000,000 roubles.

In 1941 there were 754,000 pupils in elementary and secondary schools, which had 2,620 teachers. There are 91 technical colleges with 17,200 students, 16 higher educational institutes with 11,600 students, 43 scientific research institutes. In the Baku Medical Institute in 1940, there were 2,500 students.

## GEORGIA.

### (GEORGIAN SOVIET SOCIALIST REPUBLIC.)

The independence of the Georgian Social Democratic Republic was declared at Tiflis on May 26, 1918, by the representative body, the National Council, elected by the National Assembly of Georgia on November 22, 1917. The Act of Independence of Georgia was confirmed on March 12, 1919, by the Constituent Assembly. On February 25, 1921, Georgia adopted a Soviet form of Government and was proclaimed the Georgian Soviet Socialist Republic. At the first Trans-Caucasian Soviet Congress, December 15, 1922, Georgia, together with Armenia and Azerbaijan, united to form the Trans-Caucasian Soviet Federal Socialist Republic, and a federal constitution was adopted and published January 16, 1923. In 1936, the Georgian Soviet Socialist Republic became one of the Constituent Republics of the Union of Soviet Socialist Republics, and like other Republics of the Union, adopted a new constitution in harmony with that of the U.S.S.R.

The Georgian Soviet Socialist Republic includes the Abkhazian A.S.S.R. (capital, Sukhumi), Adzharian A.S.S.R. (capital, Batoumi), South Ossetian Autonomous Province (capital, Staliner).

**Area and Population.**—Georgia occupies the whole of the western part of Trans-Caucasia and covers an area of 69,900 square kilometres. Its population on January 17, 1939, was 3,542,300 (2,475,700 rural and 1,066,600 urban).

Tbilisi (formerly Tiflis) (population 519,175 in 1939) is not only the capital of Georgia, it is also the capital of Trans-Caucasia. It is one of the oldest towns of Georgia, but has been to a certain extent rebuilt and modernized.

**Education.**—In 1938 there were 660,000 children in elementary and secondary schools; in the 21 higher educational institutions there were 20,000 students.

**Agriculture and Industry.**—There are three main agricultural areas:—(1) The moist sub-tropical area along the Black Sea Coast, where are cultivated tea, citrus fruits (lemons, oranges, mandarins, etc.), the tung tree (which yields special industrial oils), eucalyptus, bamboo, high quality tobacco (Abkhazia takes first place in the U.S.S.R. for the output of

Turkish tobacco); (2) Imeretia (the Kutais region), where the chief cultures are grapes and silk, and (3) Kakhetia, along the Alazani (a tributary of the Kura River). This district is famed for its orchards and wines. Over a million hectares are under cultivation; under tea (1941), 50,000 hectares.

Georgia is rich in forest lands where fine varieties of timber are grown.

The most important mining industry of Georgia is the exploitation of the manganese deposits, the richest of which lie in the Chiatura region. Manganese deposits in Georgia are calculated at 250,000,000 tons, distributed over an area of 140 square kilometres. There are also coal seams, the most important of which are at Tkvarcheli (deposits estimated at 250,000,000 tons), and Tkivbuli (deposits of 80,000,000 tons). The most powerful electric station in Trans-Caucasia is in Georgia on the River Kura, the Zemo-Avchal hydro-electric station of 36,000 h.p. The second most powerful station is the Abash hydro-electric station; a number of other stations are either in the course of construction or are to be constructed shortly. In 1933 the first section of the Krim hydro-electric power station of a capacity of 85,000 kw. was put into operation.

The railway system of Georgia extends to 570 miles. The trunk line leading from Batumi through Tiflis to Baku on the Caspian Sea has several narrow gauge branches on Georgian territory to the coal mines of Tkhibuli, to the port of Poti, to the manganese mines of Chiaturi, to the mineral springs of Borjomi and the health resort Bakuriani, to the towns Signakh and Telavi, in Kakhetia, and to the Armenian frontier, across the coal mine district of Alverdi. The last branch divides in Armenia, going on the one side to Tabriz in Persia, and on the other to Erzerum in Anatolia.

A railway line from Akhal-Senaki along the Black Sea coast, through Sukhum to Tuapse, is being constructed.

The budget for 1941 was fixed at 1,233,760,000 roubles, and for 1940 at 1,222,700,000 roubles.

### ARMENIA.

#### (ARMENIAN SOVIET SOCIALIST REPUBLIC.)

On November 29, 1920, Armenia was proclaimed a Soviet Socialist Republic. The Armenian Soviet Government, with the Russian Soviet Government, was a party to the Treaty of Kara (March, 1921) which confirmed the Turkish possession of the former Government of Kara and of the Surmali District of the Government of Erivan. From 1922 to 1936, it formed part of the Trans-Caucasian Soviet Federal Socialist Republic. In 1936, Armenia was proclaimed as a Constituent Republic of the U.S.S.R.

**Area and Population.**—Armenia (capital Erivan) covers an area of 80,948 square kilometres (11,945 sq. miles). On January 17, 1939, the

population was 1,281,600 (915,200 rural and 366,400 urban). The population of Erivan on January 17, 1939, was 200,000.

**Agriculture and Industry.**—In 1939 the total cultivated area of Armenia amounted to 439,000 hectares. A number of canals have been built, also irrigation systems, watering about 180,000 hectares of land, mostly under cotton crops. Irrigation works have been constructed to a total length of 350 kilometres (187 miles). The principal of these is the Shirak Lenin Canal, 22 kilometres (13 miles) long, commenced in 1922 and completed in 1925.

A number of large industrial enterprises have been erected, including several cotton-cleaning factories and hydro-electric stations.

**Finance.**—The budget for 1940 was fixed at 463,000,000 roubles, and for 1941 at 518,000,000 roubles.

**Education.**—In 1940 there were 1,161 schools for elementary education with 320,300 pupils. Secondary schools in 1941 numbered 317, with 181,000 pupils. In 1940 there were 9 higher educational institutions of university status, with a total number of 7,100 students. There are 45 technical schools and six workers' faculties with 9,432 students, 85 high schools, and numerous factory schools.

## THE BALTIC REPUBLICS.

### ESTONIA.

#### (ESTONIAN SOVIET SOCIALIST REPUBLIC.)

The Estonian Soviet Socialist Republic was admitted into the Soviet Union on August 3, 1940. In 1941, during the German war against Russia, Estonia was occupied by the Germans. In August and September, 1944, Russian forces drove the Germans from Estonia.

Area, 47,549 sq. kilometres or 18,353 sq. miles; population, 1,126,413 (census of March 1, 1934). Estimated population, 1940, 1,120,000. The capital is Tallinn.

**Education.**—In 1937-38, there were 1,224 elementary schools in Estonia. The number of middle schools for general education, gymnasiums, was 58, of which number 19 were private schools.

For higher education there was the Tartu (Dorpat) University (founded

in 1632); number of students (1938), 3,219 (2,210 men and 1,009 women); number of professors, 217.

In 1936 the former technical faculty at the University of Tartu was made an independent Technical University, situated in Tallinn. In 1938, the number of students was 513 (491 men, 22 women) and the number of professors 35.

**Finance.**—The budget for 1941 was fixed at 580,166,000 roubles.

**Production.**—Agriculture and dairy farming are the chief occupations. The total area is about 10,789,959 acres, divided as follows:—forest land, 2,314,141 acres (21.4 per cent.); fields, 2,683,259 acres (24.9 per cent.); meadows, 2,186,054 acres (20.3 per cent.); pastures, 1,774,697 acres (16.4 per cent.); untillable land, 1,502,368 acres (13.9 per cent.), including a peat bog of 329,440 acres.

In 1939, Estonia had 705,000 head of cattle, 694,700 sheep, 442,000 pigs, 218,500 horses and 1,991,030 poultry.

In 1938, there were in Estonia 277 dairy factories, of which 88.4 per cent. were co-operative. Butter is the chief article of export and already represents 24 per cent. of the total exports. Butter production in 1937, 15,893 metric tons; in 1938, 17,500 metric tons.

The most important industries of the country are; textile, paper, cement and oil shale industries, forestry, timber, flax and leather industries. Shale oil output in 1936 was 63,458 metric tons, in 1937 111,908 metric tons, and in 1938, 150,000 metric tons.

### LATVIA.

(LATVIAN SOVIET SOCIALIST REPUBLIC.)

The Latvian Soviet Socialist Republic was admitted into the Soviet Union on August 3, 1940. In 1941 Latvia was occupied by the Germans. In September and October, 1944, Russians forces drove the Germans from Latvia.

**Area and Population.**—Latvia has a total of about 20,056 square miles, or, including inland lakes, about 25,395 square miles. The total length of the frontier line of Latvia is 1,177 statute miles, with a coast line of 307 statute miles. Population, 1940, 1,950,000.

The chief town is Riga (the capital), population (1939) 393,211; population of other principal towns according to 1935 census, Liepāja (Libau) 57,098; Daugavpils (Dvinsk), 45,160; Jelgava (Mitau), 34,099; Ventpils (Windau), 15,671; Rēzekne (Rositten), 13,139; Cēsis (Wenden), 8,748; Valmiera (Wolmar), 8,482.

**Education.**—During the year 1938–39 there were 1,895 elementary schools in Latvia, with 229,825 pupils and 9,394 teachers. In the 114 secondary schools, 2,503 teachers taught 25,225 pupils.

The Riga Polytechnic was in 1919 raised to be the Latvian University. The number of students is (1938–39) 7,281, and of professors, 446. There are also 111 lower technical professional schools, with 9,793 pupils; 12 higher technical professional schools and institutes, with 1,165 pupils; a Musical Academy, with 284 students and 38 teachers; and an Academy of Art, with 200 students and 22 teachers. In 1941, 9 new schools, including kindergarten and creches, were in the course of construction.

**Finance.**—For 1941 the budget estimate was 894,000,000 roubles.

**Production and Industry.**—Latvia is mainly an agricultural country, but an increasing number of people are passing from agricultural to industrial life.

Yield of linseed, in 1938, 20,390 metric tons; in 1939, 20,050 metric tons.

Latvian forest lands, State and private (4,317,482 acres), produced in 1937–38, 3,439,256 cubic metres of timber (firewood, 2,188,076 cubic metres).

On December 31, 1938, there were 5,977 industrial enterprises in Latvia, employing 98,497 hands. The number of workers employed in the principal industries was as follows:—metallurgical, 16,893; chemical, 4,384; textile, 15,605; mineral working, 6,605; woodworking, 15,612; and foodstuffs, 12,968. In 1941, the total number of industrial workers was 280,000, and a further 43,000 were employed in agriculture in the Sovkhozy as tractor drivers and mechanics.

Live-stock (June 28, 1939): horses, 414,470; cattle, 1,271,730; sheep, 1,469,570; pigs, 891,470; poultry, 4,729,120; beehives, 222,460.

Latvia does not possess much mineral wealth.

## LITHUANIA.

(LITHUANIAN SOVIET SOCIALIST REPUBLIC.)

The Lithuanian Soviet Socialist Republic was admitted into the Soviet Union on August 3, 1940. In 1941 Lithuania was occupied by the Germans; on January 29, 1945, the Russian armies completed the liberation of Lithuania.

**Area and Population.**—The total area of Lithuania is 22,959 sq. miles, and the population (January 1, 1940) 2,879,070.

The capital of Lithuania is Vilnius (Vilna), with a population of 207,750 in 1931. Other large towns with their population at January 1, 1939, are: Kaunas (Kovno), 152,365; Siauliai (Shavli), 31,299, and Panevėžys (Ponėvij), 26,508.

**Education.**—In 1938-39 there were 2,335 primary schools with 5,578 teachers and 298,429 pupils, 27 secondary schools with 233 teachers and 2,633 pupils, 56 gymnasia (high schools) with 1,049 teachers and 16,906 pupils, and 5 teachers' training colleges with 88 teachers and 605 pupils. The University of Vytautas the Great, at Kovno, which was opened on February 16, 1922, had (1938) 292 professors and teachers and 3,041 students. On January 15, 1940, certain faculties of this university were transferred to Vilnius as an independent institution under the name of the University of Vilnius.

Between June, 1940, and January 1, 1941, 150 new schools were opened, also a number of higher schools and courses for adults, which some 55,000 workers attended in their spare time, 5 peoples' universities for 6,000 students and 2 workers' faculties with 450 students attached to existing universities. Early in 1941, a Lithuanian Academy of Science was opened.

**Finance.**—The budget for 1941 was estimated at 801,000,000 roubles.

**Production.**—Lithuania is an agricultural country, and preponderantly rural in character. Of the total population, 76.7 per cent. is engaged in agriculture, 10 per cent. in commerce, industry and communications. The resources of the country consist of timber and agricultural produce. Of the total area, 49.1 per cent. is arable land, 22.2 per cent. meadow and pasture land, 16.3 per cent. forests, and 12.4 per cent. unproductive lands. In 1938 in the agricultural territory of Lithuania, 2,742,630 hectares (about 6,574,296 acres), there were produced (in metric tons) rye, 623,729; wheat, 251,284; barley, 274,019; oats, 420,002; potatoes, 2,118,231; flax fibre, 25,784.

On June 30, 1939, the country possessed 520,710 horses, 1,103,550 cattle, 1,223,600 sheep, 1,117,080 pigs, 1,996,800 poultry, and 858,300 geese.

Forests cover 1,071,006 hectares (about 2,645,884 acres). 70 per cent. of the forests consist of needle-bearing trees, mostly pines, and the remainder of leaf-bearing trees.

In 1938 there were 1,441 industrial establishments (with not less than 5 employees) with 40,818 employees. The number of workers employed in industry in June, 1941, was 60,000.

## SOVIET CENTRAL ASIA.

Soviet Central Asia embraces the Kazakh Soviet Socialist Republic, the Uzbek Soviet Socialist Republic, the Turkmen Soviet Socialist Republic, the Tadzhik Soviet Socialist Republic, the Kara-Kalpak Autonomous Soviet Socialist Republic, and the Kirghiz Soviet Socialist Republic.

Turkestan was conquered by the Russians in the '60's of last century. In 1866 Tashkent was occupied and in 1868 Samarkand, and subsequently further territory was conquered and united with Russian Turkestan. In the '70's Bokhara was subjugated, the Emir, by the agreement of 1873 recognizing the suzerainty of Russia. In the same year Khiva became a Vassal State to Russia. Until 1917, Russian Central Asia was divided politically into the Khanate of Khiva, the Emirate of Bokhara, and the Governor-Generalship of Turkestan.

After the outbreak of the Revolution various political parties contended for power in Turkestan. In the summer of 1919 the authority of the Soviet Government became definitely established in these regions, and subsequently the native dynasties in Khiva and Bokhara were expelled. The Khan of Khiva was deposed in February, 1920, and a People's Soviet Republic was set up, the mediæval name of Khorezm being revived. In August, 1920, the Emir of Bokhara suffered the same fate, and a similar regime was set up in Bokhara. The former Governor-Generalship of Turkestan was formally constituted an Autonomous Soviet Socialist Republic within the R.S.F.S.R. on April 11, 1921.

In the autumn, 1924, a decision was accepted by the Congresses of the Soviets of Turkestan, Bokhara and Khiva Republics to redistribute the territories of these Republics on a national basis; at the same time Bokhara and Khiva became Socialist Republics. As a result of the redistribution completed in May, 1925, the New States of Uzbekistan, Turkmenistan and Tajikistan and several Autonomous Regions were established. The remaining districts of Turkestan populated by Kazakhs were reunited to Kazakhstan.

**KAZAKHSTAN.**

(THE KAZAKH SOVIET SOCIALIST REPUBLIC.)

The Kazakh Soviet Socialist Republic, comprising the Governments of Ural'sk, Turgai, Akmolinsk and Semipalatinsk, was made a state member of the U.S.S.R. on December 5, 1936. To this Republic were added the parts of the former Governorship of Turkestan inhabited by a majority of Kazakhs. It consists of the following provinces: Aktyubinsk, Alma-Ata, East Kazakhstan, West Kazakhstan, Karaganda, Kustanai, North Kazakhstan and South Kazakhstan. The area of the Kazakh S.S.R. is 2,714,500 sq. kilometres (1,047,797 sq. miles). Population (1939), 6,145,937. The capital is Alma Ata, formerly Verny; population, 1939, 230,528. Budget, 1941, 2,162,000,000 roubles.

The remaining parts of Russian Turkestan, with the territories of the old native states of Khiva and Bokhara and the Trans-Caspian Province, constitute the two Soviet Socialist Republics of Uzbekistan and Turkmenistan. In October, 1924, the Central Executive Committee of the U.S.S.R. decided to admit these two Republics to membership of the Union, a decision which was confirmed by the Third Union Congress of Soviets in May, 1925. In October 1929, Tadzhikistan was admitted to the Union as a Soviet Socialist Republic. Until then it had been an Autonomous Soviet Socialist Republic included in the Uzbekistan S.S.R.

One of the largest dams in the U.S.S.R. and a hydro-electric station were being built in 1944 in the Syr Darya river in the Kyzyl Orda region of Kazakhstan. The Kyzyl Orda dam will store water for the irrigation of 100,000 acres of rice plantations. Subsequently the giant dam will make it possible to increase the irrigated area in the Kyzyl Orda region to 375,000 acres.

The total area under grain in 1940 was 5,512,000 hectares, under industrial plants 348,000 hectares. In 1939, the area under cotton was 105,000 hectares (about 260,000 acres). In 1940, 15,000 hectares were under sugar beet. In 1939, the produce of raw cotton was 1,123,000 double cwt.; of sugar beet, 4,200,000 double cwt.; of rice, 793,000 double cwt.

Kazakhstan is noted for its livestock, particularly its sheep, which account for about half the total, and from which excellent quality wool is obtained. The Republic is rich in mineral resources, including coal, oil, lead, zinc, nickel, chromium, molybdenum and other metals.

In 1937, 390,000 children attended elementary and secondary schools.

The budget for 1941 balanced at 2,162,000,000 roubles.

On May 1, 1930, the completed line of the Turkestan-Siberian railway was opened. The railway is 906 miles long.

**TURKMENISTAN.**

(TURKMEN SOVIET SOCIALIST REPUBLIC.)

The Turkmen Soviet Socialist Republic was formed on October 27, 1924, and covers the territory of the former Trans-Caspian Region of Turkestan, the Charjiui vilayet of Bokhara, and a part of Khiva situated on the right bank of the Oxus. In May, 1925, the Turkmen Republic entered the Soviet Union as one of its Constituent Republics. It is bounded on the north by the Autonomous Kara-Kalpak Republic, a constituent of Uzbekistan, by Iran and Afghanistan on the south, by the Uzbek Republic on the east and the Caspian Sea on the west.

**Area and Population.**—The principal Turkmen tribes are the Tekkés of Merv, and the Tekkés of the Attok, the Ersaris, Yomuds and Goklans. All speak closely related varieties of a Turkoman language (of the South-Western group of Turkish), and they are Sunni Mohammedans. The country passed under Russian control in 1881, after the fall of the Turkoman stronghold of Gök-Tépé.

The area of Turkmenistan is 444,000 square kilometres (171,384 sq. miles), and its population on January 17, 1939, was 1,254,000.

The capital is Ashkhabad (Politoratsk), population January 17, 1939, 126,580; other large towns are Merv, Leninsk, Kerki, Tashauz.

**Production.**—The main occupation of the people is agriculture, based on irrigation. Turkmenistan produces cotton, wool, Astrakan fur, etc. It is also famous for its carpets, and produces a certain special breed of Turkoman horses. It is fairly rich in mineral resources, producing ozokerite, oil, sulphates, common salt, sulphur, etc.

Motor communication has been established between Ashkhabad and Meshed (Perstia), and an air line runs between Leninsk and Tashauz. Turkmenistan (particularly the territory along the railway line) is connected by telegraph with the rest of the Union.

The budget for 1940 was fixed at 520,600,000 roubles, and for 1941 at 544,180,000 roubles.

**Education.**—In 1941 the public educational system comprised 1,322 primary and secondary schools with 250,000 pupils and 18,000 teachers.

**UZBEKISTAN.**

(UZBEK SOVIET SOCIALIST REPUBLIC.)

The Uzbek Soviet Socialist Republic was formed on December 5, 1924, from lands formerly included in Turkestan, Bokhara and Khorezm. It includes a large part of the Samarkand region, the southern part of the Sir-Darya, Western Fergana, the Western Plains of Bokhara, the Kara-Kalpak A.S.S.R., and the Uzbek regions of Khorezm. In May, 1925, Uzbekistan, by the decision of the Congress of Soviets of the U.S.S.R., was accepted as one of the constituent Republics in the Soviet Union.

Uzbekistan is bordered on the north by the Kazakh Soviet Socialist Republic, on the east by the Kirghiz Soviet Socialist Republic and the Tadzhik Soviet Socialist Republic, on the south by Afghanistan, and on the west by the Turkmen Soviet Socialist Republic.

**Area and Population.**—The Uzbeks, who form the majority of the population over the area of the old States of Khiva and Bokhara, and the Provinces of Samarkand and Fergana, were the ruling race in Central Asia, until the arrival of the Russians during the third quarter of the nineteenth century. The several native States over which Uzbek dynasties formerly ruled were founded in the fifteenth century upon the ruins of Tamerlane's empire. The Uzbeks speak Jagatai Turkish, which is clearly related to Osmanli and Azerbaijan Turkish, and are Sunni Mohammedans.

The area of Uzbekistan is 172,000 square kilometres (66,392 sq. miles). The population on January 17, 1939, was 6,282,450, of whom 1,445,064 lived in towns. The capital of the Republic is Tashkent (population January 17, 1939, 585,005); other important cities are Bokhara, Khiva, Andijan, Kokand, Namangan, Samarkand.

**Production.**—Uzbekistan is a land of intensive farming, based on artificial irrigation. Cotton growing has been developed. Uzbekistan also produces fruits, wool and silk. Its industry consists of cotton spinning, oil and coal-mining. In addition, during recent years there have been built a large works for the manufacture of agricultural machinery (in Tashkent), a cement factory, a sulphur mine, an oxygen factory, a paper mill, a leather factory, a number of textile mills and clothing factories.

The budget for 1940 was fixed at 1,476,800,000 roubles, for 1941 at 1,604,000,000 roubles.

**Education.**—In 1939 there were in elementary and secondary schools 1,200,000 pupils. 28 higher educational establishments and 105 technical schools had a total of 40,264 students.

The total length of railway in 1930 was 1,789 kilometres, of which 734 kilometres (455 miles) form that part of the line which connects central Asia with Russia. From this main line branches lead to Karshe-Kitab, Kerki-Termex, Jalalabad, Namanchan, Andijan and other centres. The Great Uzbek Highway was completed in April, 1941, by the efforts of the Kolkhozy of Bukhara, and of the Surkhan Daria, Samarkand and Tashkent regions. On the territory of the Republic there are 118 postal telegraph institutions, an air-line which serves all of Central Asia, and this air-line is most developed in Uzbekistan.

## TADZHIKISTAN.

(TADZHIK SOVIET SOCIALIST REPUBLIC.)

The Tadjik Soviet Socialist Republic was formed from the former regions of Bokhara and Turkestan where the population consisted mainly of Tadjiks. It was admitted as a constituent Republic of the Soviet Union on December 5, 1929.

Tadjikistan is situated between 39° 40 and 36° 40 N. latitude and 67° 20 and 75° E. longitude, north of the Oxus. On the west and north it is bordered by Uzbekistan and by the Kirghiz Soviet Socialist Republic; on the east by Chinese Turkestan and on the south by Afghanistan. It includes the Gorno-Badakhshan Autonomous Region and also Stalin Peak (7,495 metres) and Lenin Peak (7,127 metres).

**Area and Population.**—The Tadjiks speak an Iranian dialect, little different from Persian, and they are considered to be the descendants of the original Aryan population of Turkestan. Unlike the Persians, the Tadjiks are mostly Sunnis.

The area of the territory is 143,900 square kilometres (55,545 sq. miles), and the population on January 17, 1939, was 1,485,090. The capital is Stalinabad (formerly Dushambe), with a population in 1939 of 82,500.

**Education.**—In 1941 there were 3,500 schools with 312,000 pupils.

**Production.**—The occupations of the population are mainly farming, horticulture and cattle-breeding. The mountainous regions contain ores, fuel and other minerals. There are rich deposits of brown coal, lead, zinc and oil (in the north of the Republic), rare elements, such as uranium, radium, arsenic and bismuth. Asbestos, mica, corundum and emery, lapis lazuli, potassium salts, sulphur and other minerals have been found in other parts of the Republic. Irrigation is being developed and cotton growing

extended by the latest technical methods. In 1941 the Republic possessed 578,000 head of cattle and 1,996,000 sheep and goats.

At the end of 1933 Tadjikistan had 12,000 kilometres of roads suitable for vehicular traffic, out of which 4,800 kilometres were automobile roads; a number of big motor roads have been built, such as the Osh-Khorog of 700 kilometres, Yausi-Bazar-Charm of 107 kilometres and others. A motor road, 557 metres long, was completed in 1940 between Stalinabad and Khorog in the Pamirs. Stalinabad is connected by air communication with the mountainous regions of the Republic. A railway line has been completed between Termex and Stalinabad (about 200 kilometres—124 miles). A steamship line on the Oxus runs between Termex Saraya and Jilikulam on the river Vakhsh. Stalinabad is connected by an air line with Termex and Kagan.

The budget for 1940 was fixed at 521,300,000 roubles, and for 1941 at 604,802,800 roubles.

## KIRGHIZIA.

(KIRGHIZIA SOVIET SOCIALIST REPUBLIC.)

After the establishment of the Soviet regime in Russia, Kirghizia was part of Soviet Turkestan which itself became an Autonomous Soviet Socialist Republic within the R.S.F.S.R., in April 1921. In 1924, when Central Asia was reorganised territorially on a national basis, Kirghizia was separated from Turkestan and formed into an autonomous region within the R.S.F.S.R. On February 1, 1926, the Government of the R.S.F.S.R. adopted a decision whereby Kirghizia was transformed into an Autonomous Soviet Socialist Republic within the R.S.F.S.R., and finally at the Eighth All-Union Extraordinary Soviet Congress, December 1936, which adopted the Stalin Constitution, Kirghizia was proclaimed one of the constituent Soviet Socialist Republics of the U.S.S.R. Its constitution is similar to those of the other Union Republics.

**Area and Population.**—The territory of Kirghizia covers 76,042 sq. miles and its population on January 7, 1939, was 1,459,801, of whom 1,188,714 lived in rural areas. Its capital is Frunze (formerly Pishpek); population, 1939, 92,659. Kirghizia is situated on the Tian-Shan mountains. It is bordered on the east by China, on the west by Kazakhstan and Uzbekistan, on the north by Kazakhstan and in the south by Tadjikistan.

**Production.**—Kirghizia is mainly famed for its livestock breeding, of which it forms an important base in the Eastern U.S.S.R. There are excellent pasture lands on the mountains and in 1941 there were some 3,000,000 sheep, goats, horses and cattle.

In the valleys and to a considerable extent also in the mountains, Kirghizia raises wheat sufficient for its own use and other grains and fodder, particularly lucerne. At great altitudes near the pastures, barley was sown for the first time in 1943. In recent years irrigation has been considerably extended. In 1937, about 450,000 hectares had been irrigated; in 1940, 752,000 hectares. In 1939–40 kolkhoz members constructed 25 irrigation canals; total length, 289 kilometres.

**Education.**—Kirghizia has 1,645 elementary and secondary schools, with 328,700 pupils. In September 1940, a new alphabet based on Russian was introduced in the Kirghiz schools. There are some 10,000 teachers.

## 1264 OTHER ASIATIC TERRITORY OF THE SOVIET UNION

There are also 6 higher educational institutions, 34 technical and teachers' training colleges, as well as music and art schools.

**Finance.**—The budget for 1940 balanced at 435,000,000 roubles; for 1941, at 480,420,000 roubles.

## OTHER ASIATIC TERRITORY OF THE SOVIET UNION.

The remainder of the Asiatic territory of the U.S.S.R. is divided as follows:—

| Region                            | Area in sq. miles | Population, Jan. 1939  | Region                                                    | Area in sq. miles | Population, Jan. 1939 |
|-----------------------------------|-------------------|------------------------|-----------------------------------------------------------|-------------------|-----------------------|
| Far Eastern Region                | 900,781           | 1,593,400 <sup>1</sup> | Western Siberian Region                                   | 503,65            | 3,767,200             |
| Yakutsk Autonomous Republic       | 1,454,884         | 400,544                | Eastern Siberian Region (exc. the Buriat-Mongol Republic) | 1,227,248         | 2,568,400             |
| Buriat-Mongol Autonomous Republic | 150,192           | 542,000                |                                                           |                   |                       |

<sup>1</sup> 1931.

The Far Eastern Region runs along the Pacific Ocean and stretches from Vladivostok to the Behring Straits. In the north it is bounded by the Arctic Ocean.

Khabarovsk (population 1939, 199,364) is the principal city of the Far Eastern Region. The Kamchatka region (the Peninsula) occupies an area of 180,600 sq. kilometres (69,711 sq. miles). The population of Kamchatka, which is very sparse, derives its income mainly from fishing and hunting. Agriculture and cattle-breeding are being developed in Kamchatka. There are three big State farms, with over a thousand head of cattle, and of an area of

## YAKUTSK AND BURIAT-MONGOL REPUBLICS—SIBERIA 1265

some hundreds of hectares, and collective farms have been organized. The majority of the population in the Vladivostok area is engaged in agriculture, industry and transport. The forests constitute one of the most important of the natural resources. The total forested area of the Far Eastern Region is 900,000 square kilometres, of which at least one-half can be exploited. The country is rich in fur-bearing animals of many varieties, and is an important fish-producing centre, being practically the only one in Siberia. Of the other industries of importance are wood-working and flour-milling. In addition to the vast mineral, timber, fur and fish resources, there is a comparatively good transport system, with a fairly well-developed railway system, and navigable rivers flowing into ice-free waters.

### YAKUTSK AUTONOMOUS SOVIET SOCIALIST REPUBLIC.

Population, 1939, 400,544, of whom 321,887 lived in rural areas. The two principal industries of the Yakutsk Republic are hunting and gold mining. The gold mining industry of the republic has shown steady development. The Soviet Trust Soyus-Zoloto and a number of individual prospectors are working the fields. Silver- and lead-bearing ores are worked, and coal. There is also some trade in salt. A severe climate and lack of railways are serious obstacles to the economic development of the republic. The Angara-Lena railway is nearing completion. There is an air service between Irkutsk and the town Yakutsk, the capital of the republic, which is being used to an increasing extent for the transportation of gold and valuable furs.

The budget for 1939 was fixed at 150,135,000 roubles.

In 1932 there were 442 schools, with 89,000 pupils. Number of schools in 1944, 540. There were also 50 higher schools, with about 9,000 pupils.

### BURIAT-MONGOL AUTONOMOUS SOVIET SOCIALIST REPUBLIC.

The Buriat-Mongol Republic, situated to the south of the Yakutsk Republic, adopted the Soviet system on March 1, 1920. Cattle breeding is the principal occupation of the population.

The budget for 1939 was fixed at 118,589,000 roubles.

In 1939, there were 485 schools with 85,454 pupils and 2,708 teachers. There are some 20 technical colleges and higher educational institutions.

### SIBERIAN REGIONS.

Siberia is now divided into the Western Siberian Region, with its capital at Novo-Sibirsk (population, 1939, 405,589), and the Eastern Siberian Region, with its capital at Irkutsk (population, 1939, 243,380). Other large cities in this area are Omsk with a population (on January 17, 1939) of 280,700; Krasnoyarsk, 190,000; Barnaul, 148,130; Tomsk, 141,200, and Buis, 80,000. The Siberian Region extends from the Arctic Ocean to the Mongolian border, and includes fertile agricultural districts and industrial sections in the south, while most of the northern territory is an unsettled forest and similar to the Yakutsk Republic. The Siberian Region possesses some of the largest coal resources known. The Kuznetsk Basin is estimated to contain 400,000 million metric tons. There are other rich coal areas in Siberia, particularly the Cheremkhov and Minusinsk Basins. Within the Kuznetsk Basin lie also the extensive iron ore deposits of Telbes. Siberia is rich in non-ferrous

**Finance.**—Revenue and expenditure for five years (2·5 colones = 1 dollar, U.S.):—

|                     | 1939 <sup>1</sup> | 1940       | 1941       | 1942       | 1943       |
|---------------------|-------------------|------------|------------|------------|------------|
|                     | Colones           | Colones    | Colones    | Colones    | Colones    |
| Revenue . . . .     | 9,995,200         | 17,876,780 | 19,493,129 | 18,886,885 | 24,308,634 |
| Expenditure . . . . | 10,102,611        | 20,106,791 | 19,843,098 | 20,291,754 | 21,449,365 |

<sup>1</sup> Final six months of the year.

For 1943 the principal items of revenue were (in colones):—import duties, 7,686,629; liquor taxes, 2,725,353; consular services, 1,615,166; direct taxes, 2,110,606; stamp taxes, 1,040,896; Treasury loans, 1,260,000. The most important items of expenditure were:—war, 3,376,627; interior, 2,985,047; education, 2,257,768; Treasury, 2,378,298; public credit, 1,411,209; development, 3,236,074; subventions and subsidies, 1,466,179; foreign relations, 802,200.

The total outstanding debt on April 30, 1943, was 52,162,000 colones, of which 46,919,000 colones were external funded debt, and 5,243,000 colones internal debt.

British capital invested in Salvador amounted, in 1944, to 1,355,240£, all in default. American direct investments, 1940, amounted to 11,204,000 dollars compared with 29,466,000 in 1929; American holdings of Salvadorean dollar bonds, 1941, were 4,100,000 dollars, all in default.

**Defence.**—The Army is organized in 5 divisions of 15 infantry, 2 cavalry and 3 artillery regiments. In case of war, military service is compulsory from 18 to 50 years of age. The permanent armed force for 1935 was 100 officers and 1,755 other ranks.

**Production.**—Salvador is predominantly agricultural; eighty per cent. of its total area is under cultivation. But it is a one-crop country, coffee alone furnishing, in value, about 80 per cent. of its exports. Two-thirds of the coffee is of the 'mild' variety. On July 28, 1933, a Coffee Defence Law placed the entire industry, from cultivation to marketing, under the protection of a Commission jointly controlled by the coffee growers and the Government. Coffee is sold in bags of 69 kilos, or 152 lb. Production of coffee in 1943–44, 1,035,000 bags; in 1944–45, about 920,000 bags. Export quota to the United States, 1943–44, was 790,932 bags. Coffee pays an export duty of 95 cents (U.S.) per 100 kilos in cash and a contribution in kind of 4 kilos to the Government's stock. Area devoted to coffee is about 265,000 acres, almost entirely owned by natives. Other agricultural products are maize (384,000 acres in 1942 produced about 4,588,000 quintals), cacao, tobacco, indigo, henequén (95,294 quintals of 46 kilos from 12,826 acres), and sugar cane (36,895 acres produced 46,844 metric tons). Livestock census of 1942, showed 206,598 horses, asses and mules, 742,705 cattle, 8,896 sheep, 23,944 goats and 518,237 pigs. A little rubber is exported. In the national forests are found dye woods and such hard woods as mahogany, cedar, and walnut. Balsam trees also abound; Salvador is the world's principal source of this medicinal gum; exports, 1942, 101 tons. The mineral wealth of the Republic includes gold (1943 production, 29,008 fine ounces, valued at 1,015,297 dollars, U.S.), silver (220,976 fine ounces), coal, copper, iron, lead, zinc, sulphur and mercury. Chief local industry is that of the single factory monopolising the supply of henequén bags for coffee.

**Commerce.**—The imports (including parcels post) and exports have been as follows in five years (2·5 colones = 1 dollar, U.S.):—

|                 | 1939       | 1940       | 1941       | 1942       | 1943       |
|-----------------|------------|------------|------------|------------|------------|
|                 | Colones    | Colones    | Colones    | Colones    | Colones    |
| Imports . . . . | 22,134,303 | 20,270,110 | 20,837,216 | 21,481,078 | 29,857,429 |
| Exports . . . . | 81,848,515 | 80,569,888 | 23,010,987 | 46,210,601 | 56,524,442 |

Exports in 1943 were 80,755 metric tons valued at 22,529,765 dollars, U.S.; coffee at 56,385 tons (806,427 bags) furnished 66 per cent. by weight and at 17,190,000 dollars, U.S., 76 per cent. by value. The United States took 80 per cent. of exports and furnished 67 per cent. of the imports. The chief imports are cottons, hardware, flour, drugs and chemical products. Customs receipts in 1940, 10,686,000 colones; in 1941, 10,267,000 colones.

Total trade between Salvador and the U.K. (Board of Trade returns) for 5 years:—

|                                    | 1934    | 1935    | 1936    | 1937    | 1938    |
|------------------------------------|---------|---------|---------|---------|---------|
|                                    | £       | £       | £       | £       | £       |
| Imports from Salvador to U.K. . .  | 2,140   | 5,224   | 2,071   | 2,954   | 3,804   |
| Exports to Salvador from U.K. . .  | 218,124 | 254,718 | 157,069 | 253,100 | 123,041 |
| Re-exports to Salvador from U.K. . | 971     | 770     | 807     | 940     | 954     |

United Kingdom exports to Salvador (Board of Trade returns) since 1938 have been: 1939, 129,000£; 1940, 145,000£; 1941, 71,000£; 1942, 95,000£; 1943, 75,000£, and 1944, 42,000£. Totals for the 3 years, 1939–41, include shipments of war supplies, if any, by Government departments.

**Shipping and Communications.**—The principal ports are: La Union, La Libertad and Acajutla. In 1943, 866 vessels entered these ports. A British-owned railway connects the port of Acajutla with Santa Ana, Sonsonate, and San Salvador, the capital. The American-owned International Railways of Central America runs from the eastern to the western boundary of Salvador, and extends into Guatemala to Guatemala City and Puerto Barrios on the north coast. Total length of railway open, about 384 miles, all of narrow gauge. There are 1,476 miles of national road in the Republic, including a fine highway completed in 1926 between San Salvador and La Libertad and one from Santa Ana to the Guatemalan frontier. Of these, 353 miles are suitable for motors. In 1942 a suspension bridge 1,350 feet long across the Lempa River at Puente Cascatan was opened.

Air traffic, mainly in American hands, is expanding slowly. In 1939, there were 225 post offices. In 1940 there were 257 telegraph offices and 2,778 miles of telegraph wires; 208 telephone-exchanges and 6,385 miles of telephone wires. There are 2,552 miles of private telephone and telegraph wires; and in all 4,920 telephone instruments. A radio transmitting and receiving station at San Salvador maintains communications with Latin America.

### Money, Weights and Measures.

#### MONEY.

There are 3 commercial banks, including the Banco Salvadoreño (paid up capital, 6,000,000 colones), and the Banco Occidental (paid-up capital, 8,800,000 colones). Note issues of these two banks are being withdrawn and cancelled. A third bank, the Banco Agricola Commercial (paid-up capital, 1,560,000 colones), was on May 13, 1933, taken over by the Govern-

## SPAIN.

(ESPAÑA.)

THE Second Republic was proclaimed in Spain on April 14, 1931. (The first Republic continued from 1873 to 1875.)

For a list of the sovereigns and rulers of Spain, with dates of their accession, since the foundation of the Spanish Monarchy by the union of the crowns of Aragon and Castile, see THE STATESMAN'S YEAR-BOOK, 1932, p. 1286.

### Government and Constitution.

#### I. CENTRAL GOVERNMENT.

For a short account of the Civil War in Spain, July 17, 1936, to March 29, 1939, see THE STATESMAN'S YEAR-BOOK, 1939, pp. 1325-1326.

On February 1, 1938, the first civil government was proclaimed, with General Franco, possessing dictatorial powers, at its head. On August 9, 1939, the second government of the New State was formed; it was re-constituted on May 20, 1941, and again on September 3, 1942, and is now composed as follows:—

*Leader (Caudillo) of the Empire, Chief of the State, Commander-in-Chief of the Armed Forces, Prime Minister, and Head of the Falange Party.*—General Francisco Franco Bahamonde (born December 4, 1892).

*Minister of Foreign Affairs.*—Don Jose Felix de Lequerica (August 11, 1944).

*Minister of War.*—General Carlos Asensio Cabanillas.

*Minister of Marine.*—Vice-Admiral Salvador Moreno Fernández.

*Minister of Air.*—General Juan Vigon Suerodiaz.

*Minister of Justice.*—Don Eduardo Aunós Perez (March 16, 1943).

*Minister of Finance.*—Don Joaquin Benjumea Burin.

*Minister of Industry and Commerce.*—Don Demetrio Carceller Segura.

*Minister of Agriculture.*—Don Miguel Primo de Rivera y Saenz de Heredia, Marques de Estella.

*Minister of Education.*—Don José Ibañez Martín.

*Minister of Public Works.*—Don Alfonso Peña Boeuf.

*Minister of Labour.*—Don José Giron de Velasco.

*Minister of Interior.*—Don Blas Perez Gonzalez.

*Minister without Portfolio.*—Don José Luis de Arrese.

The Minister without Portfolio is Secretary-General of the 'Movement.'

On April 19, 1937, the various political groups in the Nationalist Movement were united by General Franco into one single political party, under

the title *Falange Española Tradicionalista y de las J.O.N.S.* (generally named *F.E.T. y de las J.O.N.S.*, the last four letters signifying *Juventudes Ofensivas Nacionales Sindicalistas*), comprising the *falange española* or phalangists created on October 29, 1933, by José Antonio Primo de Rivera, eldest son of the General who was Dictator of Spain from 1923 to 1930, and the traditionalists with the remaining monarchical groups under Goicoechea. The followers of Gil Robles, the right leader of *Accion Popular*, who with his party 'C.E.D.A.' had taken such an active part in the affairs of the Republic, emerged into one or other of the above classifications.

This single party is ruled by a National Council composed of 100 members, or *Consejeros Nacionales*. The Government is further assisted by a *Junta Política*, presided over by the Chief Executive of the Movement.

The new administration embodies schemes of wide social range, chief among them are the Labour Charter (*Fuero del Trabajo*), proclaimed on March 9, 1938, for a better distribution and remuneration of the working classes, with uninterrupted Sunday and feast-day wages. The law of Family Subsidy (*Subsidio Familiar*), which came into force on March 1, 1939, makes it incumbent on all working people to contribute 1 per cent. of their earnings in a system of social insurance which entitles all families with from 2 to 12 children under 14 years of age to a proportional monthly allowance ranging from 40 to 1,080 pesetas, with an additional 200 pesetas for each child in excess of 12 (August 1, 1943). The Decree of February 22, 1941, established State loans on marriage to help large families, and the institution known as *Auxilio Social*, the funds of which are derived among other channels from a fortnightly public collection throughout the country for supplying food and clothing to needy persons and the maintenance of nurseries and infirmaries.

The reconstruction of devastated regions is under the care of the *Direccion General de Regiones Devastadas*, a Government Department under the Ministry of the Interior, assisted by the *Junta de Reconstruccion*, the *Instituto de la Vivienda* and by the *Instituto de Crédito para la Reconstruccion Nacional*, created by law of March 16, 1939, whose duty is to grant and administer loans approved for reconstructing buildings, industries, agriculture, commerce and mining. On October 7, 1939, a plan was approved authorising the Chief of the State to adopt towns, villages and other localities severely damaged by the war, under which the State is empowered with extraordinary faculties of expropriation.

The economic policy of the New State is centred on vertical syndicates, created under the Charter of Labour by the law of August 8, 1939, substituting the local and provincial syndicates of pre-war days. The law of June 23, 1941, classified these syndicates into 26 branches of production, each working within its own respective economic sphere, without interrupting their unity or formation. The individual is replaced by the producing concern as a whole, made up of the capitalists, managers, experts and all those rendering some sort of labour, whether intellectual or manual. The vertical syndicate is invested with authority and hierarchy. The appointments are made from top to bottom. At the top stands the National Delegate of Syndicates, who is responsible for his conduct to the Minister who appoints him. Production, wages, prices, and the distribution of domestic and foreign merchandise are controlled, and legislation has been adopted requiring Government permission for the establishment of new industries.

A law, proclaimed November 2, 1940, created the *Consejo de la Hispanidad*, whose mission is to promote on a sound basis the study and solution of spiritual and material intercourse common to countries of the

same origin. Spanish-American republics and the Philippines have been invited to elect corresponding members to this Council.

The law of July, 1942, re-established the Spanish Cortes (on Fascist lines) as the supreme organ of State for the preparation and enactment of laws. The new Cortes is composed of *Procuradores* (attorneys), either by election or by virtue of the State office or position held, as follows:—(1) The Cabinet Ministers, 13; (2) the Members of the National Council, 103; (3) the Presidents of the State Council, of the Supreme Court of Justice and of the High Court of Military Justice, 3; (4) the representatives of the National Syndicates, elected from among their bodies, not to exceed one third of the total number of attorneys in the Cortes, 142; (5) the *Alcaldes* or mayors of each of the 50 capitals of provinces, and a representative for the remaining municipalities of each province appointed by the respective Provincial Assembly or *Diputación Provincial*, 102; (6) the heads of the universities, 12; (7) the Presidents of the Institute of Spain and of each of the royal academies composing it, and the 'Chancellor of Hispania,' 6; (8) the President of the Institute of Civil Engineers, 1; (9) two barristers to represent the inns of court, and one representative each for the medical, pharmaceutical, veterinary and architectural professions, 6; and lastly (10) members appointed by the Chief of State, not to exceed 50 in number, among persons of high standing in the ecclesiastical, military, administrative or social life who have rendered eminent services to Spain, 50; making a total of 438.

## II. LOCAL GOVERNMENT.

The provinces are constituted by the association of Municipalities (9,254 in 1940). All Municipalities are autonomous in their respective spheres, and at their heads stands the *Ayuntamiento*, appointed by the Government, and he is authorized to determine the organisation most suitable for each municipality. The *Alcalde* or Mayor, together with the *Regidores* or Councillors (in Madrid and Barcelona, 34 in number), are likewise appointed by the Government. The *Diputaciones Provinciales* have entire jurisdiction over their own province and are their sole administrators. Each island of the Canaries has a corporation known as *Cabildo Insular*, to rule their special interests; the Balearic Islands may adopt a similar régime. Each province of Spain has its own Assembly, the *Diputación Provincial*.

## Area and Population.

Continental Spain has an area of 189,890 square miles, but including the Balearic and Canary Islands, the total area is 504,326 square kilometres (194,720 square miles). The growth of the population has been as follows:—

| Census year | Population | Increase  | Rate of annual increase |
|-------------|------------|-----------|-------------------------|
| 1857        | 15,495,212 |           | —                       |
| 1860        | 15,655,467 | 160,255   | 0·34                    |
| 1877        | 16,681,869 | 976,402   | 0·37                    |
| 1887        | 17,560,852 | 928,483   | 0·56                    |
| 1897        | 18,065,635 | 505,283   | 0·29                    |
| 1910        | 19,927,150 | 1,832,745 | 0·72                    |
| 1920        | 21,303,162 | 1,376,012 | 0·69                    |
| 1930        | 23,563,867 | 2,260,705 | 1·06                    |
| 1940        | 25,877,971 | 2,314,104 | 0·98                    |

## Area and population of the fifty provinces:—

| Province              | Area in square miles | Estimated Population, July 1, 1944 | Pop. per sq. mile | Province                          | Area in square miles | Estimated Population, July 1, 1944 | Pop. per sq. mile |
|-----------------------|----------------------|------------------------------------|-------------------|-----------------------------------|----------------------|------------------------------------|-------------------|

In the census of 1940, there were 12,414,490 males and 13,463,481 females.

On December 31, 1940, the population of the two principal towns in Spanish North Africa was: Melilla, 77,192, and Ceuta, 59,115.

By Decree of September 21, 1927, the islands which form the Canary Archipelago were divided into two provinces, under the name of their respective capitals: Santa Cruz de Tenerife and Las Palmas de Gran Canaria. The province of Santa Cruz de Tenerife is constituted by the islands of Tenerife, Palma, Gomera and Hierro; and that of Las Palmas by Gran Canaria, Lanzarote and Fuerteventura, with the small barren islands of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara y Lobos.

The following were the estimated populations of the principal towns on July 1, 1944, viz.:

| Town                  | Pop.      | Town                              | Pop.    | Town                    | Pop.   |
|-----------------------|-----------|-----------------------------------|---------|-------------------------|--------|
| Madrid                | 1,140,621 | La Coruña                         | 117,418 | Pamplona                | 69,561 |
| Barcelona             | 1,108,961 | San Sebastián                     | 114,762 | Lorca <sup>1</sup>      | 69,465 |
| Valencia              | 508,072   | Cartagena <sup>1</sup>            | 114,067 | El Ferrol <sup>1</sup>  | 62,401 |
| Sevilla               | 347,997   | Santander                         | 108,372 | Valladolid              | 62,101 |
| Zaragoza              | 266,448   | Alicante                          | 106,705 | Huelva                  | 61,139 |
| Málaga                | 258,598   | Gijón <sup>1</sup>                | 101,378 | J León                  | 61,048 |
| Murcia                | 210,617   | Cádiz                             | 92,400  | Badajoz                 | 60,872 |
| Bilbao                | 208,247   | Almería                           | 91,097  | Hospitalet <sup>1</sup> | 56,858 |

| Córdoba               | 146,998   | Oviedo                            | 85,181  | Mieres <sup>1</sup>     | 51,814 |
| Las Palmas (Canarias) | 138,728   | Salamanca                         | 83,475  | Logroño                 | 51,234 |
| Vigo <sup>1</sup>     | 126,429   | S. Cruz de Tenerife               | 76,340  | Santiago <sup>1</sup>   | 50,191 |
| Valladolid            | 126,278   | Albacete                          | 74,565  | Elche <sup>1</sup>      | 49,438 |
| Palma and Mallorca    | 125,279   | Chamartin de la R. <sup>1</sup>   | 69,793  | Badalona <sup>1</sup>   | 46,682 |
|                       |           | Burgos                            | 69,774  | Saladell <sup>1</sup>   | 46,118 |

<sup>1</sup> Estimate as on December 31, 1942.

The movement of population for 3 years was as follows:—

| Years | Marriages | Births  | Deaths  | Surplus or births |
|-------|-----------|---------|---------|-------------------|
| 1941  | 189,278   | 518,781 | 488,744 | 99,965            |
| 1942  | 187,040   | 584,128 | 584,749 | 149,374           |
| 1943  | 168,768   | 622,052 | 558,718 | 264,284           |

### Religion.

Under the new régime Catholicism is again established as the religion of the State. Religious bodies have recovered their legal status; confiscated property has been returned; allowances to clergy are again paid by the State; divorce is suppressed; cemeteries are brought back to ecclesiastical jurisdiction as before.

Within the Peninsula, apart from Portugal, there are 9 metropolitan sees, and 61 suffragan sees, the chief being Toledo, where the Primate resides.

### Education.

The latest census returns (1943) show that 4,270,370 males and 5,754,569 females (a total of 10,204,939, including 2,607,112 children under 5), or 42.35 per cent. of the population, could not read nor write.

Primary education is compulsory and free, and religious teaching has been brought back again to its former standing. Educational Administration is now controlled by the *Sindicato Español Universitario* (S.E.U.), under which all scholars are invited to syndicate. The *Frente de Juventudes* (Juvenile Front) is a new institution created by law of December 6, 1940, to which all schoolboys belong.

The country is divided into twelve educational districts, with the universities as centres.

The latest returns (1941-42) show that there are 44,572 public schools attended by 1,908,592 boys and 1,944,805 girls (total, 3,852,897), with 51,566 teachers (25,894 women). Secondary education is conducted in 'institutos,' or middle-class schools. There were, in 1942, 117 institutos with 170,782 pupils (82,407 girls). These schools prepare for the universities, of which there are twelve, attended by 34,669 students (4,716 women) with 2,066 professors. The universities are at Barcelona (1450), Granada (1526), Madrid (1508 and 1836), Murcia (1915), Oviedo (1317), Salamanca (1230), Santiago (1501), Sevilla (1502), Valencia (1245), Valladolid (1346), Zaragoza (1474) and La Laguna (Canaries). There is, besides, a medical and science faculty at Cádiz in connection with the University of Seville. There were also (1941) 58 training colleges for elementary teachers, with 11,877 students (5,276 women).

### Justice and Crime.

Justice is administered by *Tribunales* and *Juzgados* (Tribunals and Courts), which conjointly form the *Poder Judicial* (Judicial Power). Judges and Magistrates cannot be removed, suspended or transferred except as set forth by law.

The Judicature is composed (1939) of:—1 *Tribunal Supremo* (Supreme High Court); 15 *Audiencias Territoriales* (Divisional High Courts); 50 *Audiencias Provinciales* (Provincial High Courts); 490 (in 1942) *Juzgados de Primera Instancia* (Courts of First Instance); and 7,967 (in 1942) *Juzgados Municipales* (District Court, or Court of Lowest Jurisdiction held by Justices of the Peace).

The *Tribunal Supremo* consists of a President (appointed by the Government) and various Magistrates distributed among four Courts of Justice: one for trying civil matters, one for administrative purposes, one for criminal trials and lastly one for social matters. The court for trying

military cases is the *Tribunal Supremo de Justicia Militar*, under military jurisdiction. The *Tribunal Supremo* is empowered with disciplinary faculties; is Court of Cassation in civil and criminal trials; for administrative purposes decides in first and second instance disputes arising between private individuals and the State, and in social matters resolves in the last instance all the cases brought to their attention by the High Court of Labour.

The *Audiencias Territoriales* have power to try in second instance sentences passed by judges in civil matters, and in second instance all criminal trials of the province.

The *Audiencias Provinciales* are Courts competent to try and pass sentence in first instance on all cases filed for delinquency. The jury system is in operation excepting for military trials.

The *Juzgados Municipales* are constituted of a Judge and two Deputy Judges. This Court is competent to try small civil cases not exceeding 20,000 pesetas (£800) in value, and petty offences.

### Old Age Pensions and Social Insurance.

By a law dated February 27th, 1908, the *Instituto Nacional de Prevision* was founded for the purpose of granting Old Age Pensions, and administering a system of social insurance. The newly created family subsidy (*Subsidio Familiar*), described under 'Central Government' (page 1273), has been incorporated to this Institution. In 1942, 171,404,338 pesetas were paid out in old age pensions and 4,881,009 pesetas under maternity social insurance. Provision for sickness insurance was announced on January 17, 1944.

### Finance.

Revenue and expenditure for five years, in thousands of pesetas:—

|             | 1941          | 1942          | 1943          | 1944 <sup>1</sup> | 1945 <sup>1</sup> |
|-------------|---------------|---------------|---------------|-------------------|-------------------|
|             | 1,000 Pesetas | 1,000 Pesetas | 1,000 Pesetas | 1,000 Pesetas     | 1,000 Pesetas     |
| Revenue     | 6,931,100     | 8,168,674     | 10,069,900    | 10,330,288        | 10,544,225        |
| Expenditure | 6,318,268     | 7,318,209     | 9,015,460     | 13,294,680        | 13,148,722        |

<sup>1</sup> Estimates.

The budget for the fiscal year 1945 is made up as follows:—

| Revenue                   | Pesetas        | Expenditure                  | Pesetas        |
|---------------------------|----------------|------------------------------|----------------|
| Direct taxes              | 4,439,498,125  | Chief of State               | 2,986,579      |
| Indirect taxes            | 4,238,552,000  | Spanish Cortes               | 12,342,500     |
| Monopolies                | 1,147,682,750  | Falange Party                | 192,408,026    |
| State properties          | 216,161,500    | Public debt                  | 1,724,519,723  |
| Resources of the Treasury | 597,330,824    | Pensions                     | 575,777,080    |
|                           |                | High Court of Finance        | 2,115,444      |
|                           |                | Presidency of the Government | 70,363,812     |
|                           |                | Ministry of Foreign Affairs  | 104,609,839    |
|                           |                | " " Interior                 | 1,295,448,776  |
|                           |                | " " War                      | 2,087,178,795  |
|                           |                | " " Marine                   | 377,290,721    |
|                           |                | " " Air                      | 471,654,846    |
|                           |                | " " Justice                  | 384,760,663    |
|                           |                | " " Ind. & Commerce          | 109,085,129    |
|                           |                | " " Agriculture              | 94,873,961     |
|                           |                | " " Nat. Education           | 563,308,058    |
|                           |                | " " Public Works             | 903,023,994    |
|                           |                | " " Labour                   | 233,540,504    |
|                           |                | " " Finance                  | 128,779,576    |
|                           |                | Cost of collecting Revenue   | 514,165,570    |
|                           |                | Expenditure in Morocco       | 589,437,698    |
|                           |                | Special expenditures         | 167,412,034    |
|                           |                | Total ordinary               | 10,564,906,335 |
|                           |                | Total extraordinary          | 2,583,816,219  |
| Total                     | 10,544,225,199 | Grand total                  | 13,148,722,544 |

From July, 1936, to July, 1939, expenditure was approximately 12,000,000,000 pesetas and income about 3,700,000,000. The deficit was thus more than 8,000,000,000. The deficit covers the Bank of Spain's advances to the Treasury, which from the beginning of the civil war until April, 1939, amounted to 7,600,000,000 pesetas, and the utilization of credit balances at the Bank by Nationalist Spain.

The Spanish debt with Italy caused by the Civil War has now been totally amortized. Spanish debts to Germany have been totally repaid with exports of Spanish goods. The commercial balance is at present in favour of Spain.

The total State debt on January 1, 1944, was 84,967,346,554 pesetas, of which 6,210,828,692 pesetas were Treasury bonds.

## Defence.

### ARMY.

The Army was reorganized by a decree published on July 24, 1939, to be constituted by 8 army corps in the Peninsula and 2 in Morocco, in addition to the two *Comandancias Generales* in the Balearic and Canary Islands as heretofore. There will also be an independent cavalry division.

The army corps comprise the following divisions:—I, Madrid, 8 divisions; II, Sevilla, 3 divisions; III, Valencia, 2 divisions; IV, Barcelona, 3 divisions; V, Zaragoza, 2 divisions; VI, Burgos, 2 divisions; VII, Valladolid, 2 divisions; VIII, Coruña, two divisions; IX, Ceuta (Morocco), 3 divisions, and X, Melilla (Morocco), 2 divisions.

A further decree of August 30, 1939, created the High General Staff of the Army as the highest military authority.

On August 21, 1940, military service was made compulsory for 2 years.

On December 20, 1943, it was resolved to dissolve the Falangist Militia.

### NAVY.

| 1931      | Canarias            | 10,000            | 2          | 1       | 8 8-in. ; 8 4·7-in. A. A. | 12               | 90,000                   | 33                |

There are 16 destroyers, 4 sloops, 3 torpedo boats, 6 minelayers, 5 submarines and a number of vessels of less importance (including 6 trawlers). 9 destroyers, 8 sloops, 3 submarines and 7 minesweepers are in various stages of construction. Shipbuilding is mainly carried on at the dockyard at Ferrol.

There are naval wireless telegraphic stations at Cadiz, Barcelona, Mahon, Pontevedra, Cartagena and Ferrol.

### AIR FORCE.

The Air Force is organized as an independent service, dating from 1939. It consists of the Air Branch and the Air Infantry, the latter for ground duties, including aerodrome defence. The Air Branch includes specialist sections, including parachutists. Commands are regional, viz., the Centre, Straits, Levante, Pyrenees, Atlantic, Balearia, Canaries and West Africa, and the Morocco Zones. Equipment is chiefly of German and Italian types, with a few Russian aircraft left over from the civil war. There is a small aircraft industry.

The budget for 1944 provided 2,763,779,233 pesetas for the three defence ministries, being 26 per cent. of the total ordinary budget.

## Production and Industry.

Spain is a preponderantly agricultural country. The General Land Reform Bill, voted by the Republican Cortes on September 15, 1932, providing for expropriation of land on a large scale, is no longer in force; its main principles are being embodied in the newly formed *Instituto de Colonización*, for land development.

Of the total area of Spain (50,432,600 hectares, or 124,623,998 acres), in 1941, 7,219,514 hectares (17,700,151 acres) were devoted to cereals (14·31 per cent.); 1,314,180 hectares (3,257,470 acres) to vegetables (2·61 per cent.); 1,508,994 hectares (3,728,875 acres) to vineyards (2·99 per cent.); 2,161,128 hectares (5,340,363 acres) to olive culture; 4,798,503 hectares (11,857,581 acres) were fallow (9·51 per cent.); 640,123 hectares (1,531,808 acres) were devoted to root-crops (1·26 per cent.); 712,924 hectares (1,701,706 acres) to industrial crops (1·41 per cent.); 190,315 hectares (470,287 acres) to horticulture (0·38 per cent.); 516,097 hectares (1,275,327 acres) to fruit (1·03 per cent.); 363,832 hectares (899,065 acres) to artificial meadows and feeding crops (0·72 per cent.), and 24,551,000 hectares (61,667,976 acres) to pasture and mountains (48·68 per cent.).

The area under the principal crops and the yield (for 3 years) were as follows:—

|        | Area.     |           |           | Yield.     |            |            |
|--------|-----------|-----------|-----------|------------|------------|------------|
|        | 1940      | 1941      | 1942      | 1940       | 1941       | 1942       |
|        | Acres     | Acres     | Acres     | Cwts.      | Cwts.      | Cwts.      |
| Wheat  | 8,735,338 | 9,442,073 | 8,683,197 | 45,534,384 | 55,863,776 | 54,394,370 |
| Barley | 8,859,858 | 9,909,280 | 9,948,547 | 27,465,408 | 36,416,640 | 32,846,878 |
| Oats   | 1,506,381 | 1,660,579 | 1,813,291 | 9,336,192  | 11,587,584 | 11,900,704 |
| Rye    | 1,361,576 | 1,487,602 | 1,505,267 | 6,909,648  | 7,748,016  | 8,579,408  |
| Rice   | 138,439   | 64,249    | 116,337   | 5,289,934  | 4,161,008  | 4,139,364  |

In 1941, 3,447,184 acres were under vines and produced 52,822,188 cwts. of grapes and 37,272,564 imperial gallons of wine. Orange trees planted in 1942 covered an area of 201,889 acres, producing 15,572,784 cwts. In 1942, the production of cane-sugar amounted to 161,376 cwts. and that of beet-sugar 2,847,696 cwts. In 1941, 1,176,244 acres of potatoes planted yielded 76,829,784 cwts. In 1941, the area of onions planted was 59,306 acres, yielding 9,357,840 cwts. In 1942, olive trees planted covered an area of

4,878,940 acres, yielding 38,295,812 cwts. of olives and 4,668,856 cwts. of oil. Other products are esparto (91,320 metric tons in 1942), flax, hemp and pulse. Spain has important industries connected with the preparation of wine and fruits. Silk culture is carried on in Murcia, Alicante and other provinces (470 tons were produced in 1942). Spain produces yearly some 6,000 tons of honey and 1,200 tons of beeswax. In 1942, the total number of resinous pine-trees planted amounted to 7,462,000, rendering 2,786 tons of turpentine and 45,523 cubic metres of wood, valued at 2,868,900 pesetas. Alcohol factories in 1942 produced brandy and spirituous liquors to the extent of 45,864,000 litres. Beer factories in operation produced 52,120,000 litres in 1942.

The number of farm animals on July 1, 1940, was estimated as follows:—Horses, 592,223; mules, 1,138,795; asses, 851,375; cows, 3,013,542; sheep, 24,236,992; goats, 6,249,009; pigs, 5,612,854.

Spain is rich in minerals. The quantities and values of the more important minerals in 1943 were as follows:—

| Minerals             | Metric tons | Value, Pesetas | Minerals            | Metric tons | Value, Pesetas |
|----------------------|-------------|----------------|---------------------|-------------|----------------|
| Anthracite . . .     | 1,151,762   | 78,869,282     | Mercury ore . . .   | 26,944      | 41,435,465     |
| Coal . . . . .       | 8,438,816   | 540,812,317    | Potash ore . . . .  | 439,857     | 181,897,100    |
| Lignite . . . . .    | 1,112,016   | 142,841,192    | Rock salt . . . . . | 266,226     | 4,511,173      |
| Copper ore . . . .   | 866,462     | 5,946,969      | Sulphur ore . . . . | 41,845      | 1,697,531      |
| Iron ore . . . . .   | 2,185,442   | 82,737,795     | Tin ore . . . . .   | 501         | 9,578,134      |
| Iron pyrites . . . . | 514,748     | 14,636,291     | Zinc ore . . . . .  | 72,849      | 30,600,113     |
| Lead ore . . . . .   | 47,913      | 50,280,106     | Wolfram ore . . . . | 4,038       | 468,843,920    |
| Manganese ore . . .  | 26,150      | 7,857,385      |                     |             |                |

In 1943, 209,756 workers were employed in the mining industries. The total value of the mineral output was 3,554,575,571 pesetas.

Spain has considerable manufactures of cotton and woollen goods, principally in Catalonia. It is estimated that there are 2,180 factories in operation, with 76,698 looms and 2,385,531 spindles, employing 161,478 labourers (120,794 women), producing yearly 90,000 tons of manufactured articles. There are in Spain 175 paper mills, which produced in 1942 127,822 tons of writing, printing, packing and cigarette paper of the total value of 457,689,300 pesetas. The production of cork in 1940 was 1,239,750 cwts.

In the Spanish fisheries the most important catches are those of sardines, tunny fish and cod. The total production of the fishing industry amounted in 1943 to 445,005 tons, representing a value of 1,055,712,000 pesetas. In tinned fish there are 1,630 factories in operation, employing 40,000 workers.

### Commerce.

Imports and exports (in thousands of pesetas, gold):—

| Year | Imports | Exports | Year | Imports | Exports |
|------|---------|---------|------|---------|---------|
| 1934 | 854,820 | 610,998 | 1940 | 620,309 | 304,052 |
| 1935 | 875,778 | 583,446 | 1941 | 549,565 | 520,929 |
| 1936 | 505,708 | 453,808 | 1942 | 609,605 | 630,756 |
| 1937 | 844,259 | 192,745 | 1943 | 918,796 | 878,334 |

The trade for 1942 and 1943 was made up as follows:—

|                                                   | 1942               |                          |                    |                          | 1943               |                          |                    |                          |
|---------------------------------------------------|--------------------|--------------------------|--------------------|--------------------------|--------------------|--------------------------|--------------------|--------------------------|
|                                                   | Imports            |                          | Exports            |                          | Imports            |                          | Exports            |                          |

| Total . . . . .                                   | 1,999,349          | 609,605                  | 2,307,820          | 630,766                  | 2,165,788          | 913,796                  | 2,317,924          | 873,334                  |

In 1943 Spain exported oranges (metric tons) to Germany, 120,914; to Sweden, 21,863; to Switzerland, 21,714; to the United Kingdom, 19,541.

The quantity and value of wine imported into the United Kingdom from Spain were as follows for five years (Board of Trade returns):—

|                        | 1934      | 1935      | 1936      | 1937      | 1938      |
|------------------------|-----------|-----------|-----------|-----------|-----------|
| Quantity (gallons) . . | 8,462,130 | 8,857,779 | 4,623,874 | 4,798,077 | 8,329,968 |
| Value (£) . . . . .    | 1,118,090 | 1,806,594 | 1,533,382 | 1,615,727 | 1,880,672 |

According to Spanish returns the quantity and value of wine exported to the United Kingdom were: 1942, 163,613 gallons (1,096,423 $\frac{1}{2}$ ); 1941, 313,024 gallons (1,199,650 $\frac{1}{2}$ ); 1940, 4,222,004 gallons (18,750,324 $\frac{1}{2}$ ).

Total trade between Spain and the United Kingdom in thousands of pounds for five years (Board of Trade returns):—

|                                         | 1934   | 1935   | 1936   | 1937  | 1938  |
|-----------------------------------------|--------|--------|--------|-------|-------|
| Imports from Spain into U. Kingdom . .  | 11,263 | 11,119 | 10,515 | 8,510 | 5,733 |
| Exports to Spain from U. Kingdom . .    | 4,794  | 5,844  | 2,975  | 2,444 | 3,445 |
| Re-exports to Spain from U. Kingdom . . | 274    | 414    | 242    | 967   | 716   |

### Shipping and Navigation.

The merchant navy on January 1, 1943, contained 925 vessels of a gross tonnage of 1,019,884; of these 704 were steamships, 109 motor vessels and 85 sailing ships. In course of construction there are 213 vessels of 290,123 gross tons.

Barcelona, Bilbao, Seville and Cadiz are the chief of the 26 naval yards. The ships entered and cleared in the foreign trade in the last three years were as follows:—

| Year | Entered         |                    |                 | Cleared         |                    |                 |
|------|-----------------|--------------------|-----------------|-----------------|--------------------|-----------------|
|      | Number of ships | Tonnage registered | Tons discharged | Number of ships | Tonnage registered | Tons discharged |
| 1941 | 6,917           | 7,795,883          | 2,964,968       | 6,752           | 7,304,843          | 2,809,355       |
| 1942 | 7,398           | 6,612,520          | 2,201,319       | 7,075           | 6,206,005          | 2,107,109       |
| 1943 | 6,432           | 6,605,965          | 2,376,249       | 6,351           | 6,495,383          | 2,071,906       |

### Communications.

In 1941 the total length of highways and roads in Spain was 119,990 kilometres (77,574 miles).

The total length of the railways in Spain in 1942 was 17,428 kilometres (10,805 miles), of which 12,855 kilometres (7,970 miles) are of normal gauge (1·67 metres, or 5·48 feet), and 4,573 kilometres (2,835 miles) are of varying gauges, chiefly 1 metre (3·28 feet). There are 1,260 kilometres (781 miles) of lines electrified. On February 1, 1941, the Spanish railways, of normal gauge only, passed into State ownership, irrespective of the date of the expiration of the concession, and became controlled by a Government board known as the *Red Nacional de Ferrocarriles Españoles*. The official gauge of the principal Spanish railways has hitherto, for strategic reasons, been purposely kept different from that of France, and in consequence of this passengers are obliged to change trains at the frontier stations. The attempt made in 1882 to remedy this state of affairs was not successful.

There were 22 main lines of normal gauge and 55 of narrow gauge, the most important being those in the North, with 3,803 kilometres (2,362 miles); Madrid-Saragossa-Alicante (system Antigua and Catalana), 3,670 kilometres (2,279 miles); Andaluces, 1,644 kilometres (1,021 miles); Madrid-Caceres-Portugal and West, 1,587 kilometres (985 miles); South of Spain, 397 kilometres (245 miles); La Robla to Valmaseda and Luchana (narrow gauge), 312 kilometres (194 miles); and Calatayud-Teruel-Valencia (Central de Aragon), 299 kilometres (186 miles). Length of subways in Madrid (1940) was 26 kilometres (16 miles); in Barcelona 17 kilometres (10½ miles). In 1940 the Spanish railways carried 168 million passengers and 40,500,500 tons of freight.

The Post Office carried, in 1942, in the inland service, 574,348,558 pieces of correspondence of all classes; in the international service, 52,786,000 pieces of correspondence in general. There were 8,963 post-offices. Receipts, 161,462,000 pesetas; expenses, 133,560,000 pesetas.

The length of lines of telegraphs in Spain in 1942 was 42,492 kms. (26,345 miles); the total number of interior messages sent and received was 16,862,368. International messages 6,041,340. The number of telegraph offices was 2,086. Receipts from internal messages, 22,566,288 pesetas; from international messages, 10,993,455 pesetas.

In October, 1924, the entire telephone system of Spain was taken over by the 'International Telephone and Telegraph Corporation' of New York, and a Spanish Company constituted 'Compañía Telefonica Nacional de España', whose purpose is to provide an automatic service throughout the urban system. On December 29, 1926, this service was inaugurated in Madrid, and the system is now almost installed in all the country. In 1942 there were in service 3,385 exchanges, with 364,923 telephones. Number of interurban and international calls, 36,255,241.

The 'Compañía Nacional de Telegrafía sin Hilos' holds the Government concession for the Public Service with ships, and between the Peninsula and the Canary Islands, and the International Service with England, Italy, Austria, France, Switzerland, America and Germany, as well as various special Press Services. They have 10 wireless stations of the Marconi system.

### Banking and Credit.

On January 1, 1922, a contract between the Bank of Spain and the Government came into force, according to which the Government participates in the net profits of the Bank, up to certain limits. The note issue was prorogued for another 25 years, up to December 31, 1946. The capital of

the Bank was increased from 150,000,000 pesetas to 177,000,000 pesetas. The Bank is now authorized further to increase the capital, up to the limit of 250,000,000 pesetas. The law of March 13, 1942, regulates the balance of the Bank of Spain after the civil war, and provides for the issue of Treasury bonds amounting to 4,437,782,014 pesetas to offset liabilities of the war period entered by the Republican Government—notes in circulation and readjustment of current accounts among other matters. On September 30, 1943, the note circulation totalled 15,609,651,929 pesetas and the gold holdings of the Bank of Spain amounted to 259,096,892 pesetas (gold), valued in 926,789,583 pesetas (paper). The total silver holdings amounted to 626,360,918 pesetas (paper). A decree of July 11, 1941, established the voluntary nationalisation of foreign banks in Spain, and the transference and amalgamation of the business of national banks.

Savings bank deposits (Popular Savings Banks) in Spain, December 31, 1941, amounted to 8,189,900,000 pesetas, distributed over 5,267,182 accounts. Post Office Savings Banks, which were created under the law of June 4, 1909, were opened on March 12, 1916. By a decree of November 20, 1941, the Post Office Savings Bank is to open a savings-account with an initial entry of one peseta for every Spanish child born in future.

### Money, Weights and Measures.

The *Peseta* of 100 *Centimos* is of the nominal value of a pre-war franc, 94d., or 25·22 pesetas to the pound sterling. The exchange value of the peseta has not been restored to parity since the war.

Bank notes of 1,000, 500, 100, 50, 25, 5, 2 and 1 peseta value are in circulation. In February, 1941, new coins made of aluminium, tin and copper were put in circulation, consisting of 10 and 5 centime pieces. In October, 1944, 1 peseta coins made of copper (90 per cent.) and aluminium (10 per cent.) to the value of 150 million pesetas were put in circulation (50 centime and 2½ peseta pieces are to follow).

On January 1, 1859, the metric system of weights and measures was introduced in Spain. But, besides these, the old weights and measures are still largely used. They are:—The *Quintal* = 220·4 lbs. avoirdupois; the *Libra* = 1·014 lbs. avoirdupois; the *Arroba*, for wine = 3½ imperial gallons; or oil = 2½ imperial gallons; the *Square Vara* = 1·09 vara = 1 yard; the *fanega* = 1½ imperial bushel.

### Diplomatic and Consular Representatives.

#### 1. OF SPAIN IN GREAT BRITAIN.

*Ambassador*.—Vacant (April, 1945).

*Minister Plenipotentiary*.—Marqués de Santa Cruz.

*Secretaries*.—Margarita Salaverria de Arguelles, Ramon Garcia Trelles y

Dominguez, Juan de Tornos Espelius and Manuel Vitorro Somoza.

*Air Attaché*.—Col. Carlos Sartorius, Marqués de Marino.

*Military Attaché*.—Lt.-Col. Gonzalo Pena Munoz.

*Naval Attaché*.—Commander Mariano Urzaiz, Duke of Luna.

*Press Attaché*.—José J. Brugada Wood.

*Commercial Attachés*.—Mariano Yturralde and Santiago Arguelles y

Armada.

*Honorary Cultural Attaché*.—Prof. Antonio Pastor.

*Consul-General in London*.—Marqués de Barzanallana.

There are Consular representatives at Cardiff, Glasgow, Liverpool, Newcastle and Southampton, and Consular agents in all the principal towns.

metal ores, especially copper, the resources of which are estimated to exceed 100 million metric tons.

## SALVADOR.

(REPUBLICA DE EL SALVADOR.)

**Constitution and Government.**—In 1839 the Central American Federation, which had comprised the States of Guatemala, Salvador, Honduras, Nicaragua and Costa Rica, was dissolved, and Salvador became an independent Republic. A new Constitution, drafted to replace the one of 1886, was approved by a Constituent Assembly and promulgated January 20, 1939. It vests the legislative power in a single Chamber, the National Assembly, consisting of 3 Deputies for each department, elected for one year by universal suffrage. Large powers are vested in the President, whose term is for four years; normally he cannot succeed himself. He has a Cabinet of four members.

**President.**—Colonel Osmin Aguirre y Salinas (October 22, 1944).

The new President seized power and established a dictatorship on the fall of President Andres Menandez, who had himself seized power on May 9, 1944, when President Martinez resigned.

Salvador declared war against Japan on December 8, 1941, and against Germany and Italy on December 12, 1941.

**Area and Population.**—Salvador is the smallest and most densely populated of the Central American States. Its area is 34,128 square kilometres, or 13,176 square miles, with population density of about 139 people per square mile. It is divided into 14 departments, each under a governor appointed for 4 years. Population, estimated December 31, 1943, was 1,896,168, of which 63 per cent. were rural. Aboriginal and mixed races, Ladinos or Mestizos, constitute the bulk of the population. The language of the country is Spanish. The capital is San Salvador, with (1942) 105,193 inhabitants. Other towns are Santa Ana, population 46,348; New San Salvador (La Libertad), 23,755; San Miguel, 18,930; Ahuachapán, 13,305; San Vicente, 13,158; Zatecoluca, 10,822; Sonsonate, 17,232.

The number of marriages in 1943 was 6,156; number of births, 71,554 (including 42,804 illegitimate births); deaths, 38,366.

**Religion, Education and Justice.**—The dominant religion is Roman Catholicism. There is an archbishop in San Salvador and a bishop at Santa Ana and San Miguel respectively. Education is free and obligatory; in 1929 the State took over control of all schools, public and private. There were, in 1942, 1,300 primary schools (state, municipal and private), with 3,139 teachers and 90,663 pupils. There are 10 travelling teachers for the rural districts. Secondary education is given (1942) at 55 public, private and commercial schools in which there are 529 professors and 2,940 students. Four normal schools have 406 students and 47 professors. There is a National University with 468 students and 89 professors in 1942. Of the 12,932 persons married in 1942, 53 per cent. of the men and 63 per cent. of the women were illiterate.

Justice is administered by the Supreme Court of Justice, one court of third instance (in the capital) and several courts of first and second instance besides a number of minor courts. All judges of second and third instance are elected by the National Assembly for a term of 2 years, while the judges of first instance are appointed by the Supreme Court for a similar period.

## 2. OF GREAT BRITAIN IN SPAIN.

*Ambassador.*—Vacant (March, 1945).

*Counsellor.*—R. J. Bowker.

*First Secretary.*—C. Bramwell.

*Second Secretary.*—Hon. H. A. A. Hankey.

*Naval Attaché.*—Commander M. H. Scott, R.N.

*Military Attaché.*—Brigadier W. W. T. Torr, C.M.G., D.S.O., M.C.

*Air Attaché.*—Group-Captain E. S. Vincer.

*Commercial Secretaries.*—J. Walker, M.B.E., and A. R. Bruce.

*Consul-General at Barcelona.*—H. L. Farquhar, M.C.

There are Consular representatives at Bilbao, Cadiz, Coruña, Fernando Po, Seville, Malaga, Almeria, Valencia, Vigo and other places.

## Colonies.

The area and population of the colonial possessions of Spain are approximately as follows:—

| Colonial Possessions                                                                                      | Area: English square miles | Population          |
|-----------------------------------------------------------------------------------------------------------|----------------------------|---------------------|

<sup>1</sup> Exclusive of 31,000 nomads who, with their flocks, enter the Spanish Sahara after the rainy season.

The Canary Islands are two provinces of Spain (Las Palmas and Santa Cruz de Tenerife). The area of the islands is 7,496 square miles, and their population *de facto* (1940) 680,294.

The Spanish Sahara is a colony which includes two zones: Rio de Oro, 190,000 square kilometres (73,362 square miles in extent), and Sekia el Hamra, 83,000 square kilometres (32,047 square miles) in extent. It begins in Cabo Blanco, 20° 46' N. and 17° 3' W. The frontier line goes through the centre of the peninsula of the Cabo Blanco to the latitude 21° 20' N. which follows up to the meridian 15° 20' W. (Paris), according to the Treaty of 1900 with France. Then the line frontier describes a curve around the Adrar Tamar, leaving to France the Yfil salt mines. After

that it goes up to the Tropic of Cancer and to its intersection with the meridian 14° 20' W. (Paris), and to the north to the latitude 27° 40' N., which is the southern limit of the Spanish Southern Protectorate of Morocco. The chief towns are Villa Cisneros in Rio de Oro on the Atlantic, and Smara in Sekia el Hamra.

The Southern Protectorate of Morocco is situated between the Atlantic on the west, from the Cabo Juby to the Wad Nun or Draa on the north, the meridian 11° (Paris) on the east, and the latitude 27° 40' on the south, according to the Hispano-French Agreement of 1904. The area of the protectorate is 26,000 square kilometres (10,039 square miles), and the population about 12,000 inhabitants. The chief towns are Cabo Juby and Puerto Cansado.

The Spanish Territory of Ifni is situated on the Atlantic coast at 1,300 kilometres from Tetuan. It is bounded on the south by the Assaka river (called Nun by France). Its area is 1,920 square kilometres (741 square miles), the population 35,000 inhabitants, of which the capital is Sidi Ifni. Ifni was ceded to Spain by Morocco in 1860, but the occupation was purely nominal until April 6, 1934; on that date the Spanish flag was hoisted for the first time. The limits of the colony fixed by the treaty with France in 1912 were reduced by the French Government to an area of 1,920 square kilometres (approximately) in 1935. There is a politico-military government for Ifni and the Spanish Sahara which resides in Cabo Juby and depends from the High Commissioner of Morocco, who resides in Tetuan. There are two Sub-Governors, one for Ifni and the other for Cabo Juby, who have under their jurisdiction the territories of Rio de Oro and Sekia el Hamra.

Continental Guinea has an area of 26,000 square kilometres (10,040 square miles) and a population of 138,797 (955 whites). The chief town is Bata. The islands have an area of 2,105 square kilometres (813 square miles), with a population of 28,708 inhabitants (1,635 whites). The chief island is Fernando Pó, area 2,071 square kilometres (800 square miles), and 26,405 inhabitants, of which 15,064 reside in the district of Santa Isabel, the capital. The Governor of the whole colony resides in Santa Isabel. The other islands are Annobon (7 square miles), Corisco (5½ square miles), Little Elobey (22 acres) and Great Elobey (½ square mile). There is a Sub-Governor in Bata and another in Elobey.

In 1943, Guinea exported to Spain 128,349 metric quintals (252,655 cwts.) of cocoa valued at 17,376,315 pesetas (gold), 35,063 metric quintals of coffee valued at 9,973,062 pesetas (gold), 35,195 metric quintals of vegetables and fruits valued at 1,589,584 pesetas (gold), and 55,841 metric tons (54,762 long tons) of wood valued at 7,358,355 pesetas (gold).

According to a decree of April 16, 1935, the Spanish territory on the Gulf of Guinea is divided into two districts, Fernando Pó and Continental Guinea. The first includes the island of Fernando Pó; the second the continental zone. The first includes the island of Fernando Pó; the second the continental zone, together with the archipelago of islands from Great Elobey to Little Elobey and Corisco and the island of Annobon, the whole under a governor-general, assisted by a sub-governor and a secretary-general. Each of the districts (*demarcaciones*) into which the Colony is divided (three for Fernando Pó and ten for Continental Guinea), is under a 'territorial administrator,' who has at his disposal the colonial guard. The aborigines of Fernando Pó are called Bubia. Those of Elobey and Corisco are mostly of the Benga tribe, but like Bata the Pamwes are the principal tribe. There are Catholic and American Presbyterian missions at work among the natives.

## SWEDEN.

(SVERIGE.)

### Reigning King.

Gustaf V, born June 16, 1858. Succeeded to the throne on the death of his father, Oscar II, December 8, 1907. Married, September 20, 1881, to Princess Victoria, born August 7, 1862, died April 4, 1930, daughter of Friedrich, Grand Duke of Baden.

The second chamber, elected September 15, 1944, has: 115 Social-Democrats, 39 Conservatives, 35 of the Peasant Party, 26 of the People's Party and 15 Communists. The upper chamber is composed as follows for 1945: 88 Social-Democrats, 30 Conservatives, 21 of the Peasant Party, 14 of the People's Party and 2 Communists.

The provincial administration is entrusted in Stockholm to a Governor, and in each of the 24 counties to a prefect, who is nominated by the King. As executive officers of the prefects there are 410 sub-bailiffs. The right of the people to regulate their own local affairs is based on the municipal laws of June 6, 1930. Each rural parish, and each town, forms a commune or municipality in which all men and women over 21 years of age, and not under legal disability, who have paid the local taxes for at least one of the preceding three years, are entitled to vote. In small communes and towns the parish or town assembly may itself decide on all questions of administration, police and communal economy. It may, however, elect a parish or town council to decide on the questions, and all communes with more than 700 inhabitants have to do so. These councils are named *Kommunalfullmäktige* in the country, and *Stadsfullmäktige* in the towns. Ecclesiastical affairs are in all communes with more than 1,500 inhabitants, dealt with by councils, named *Kyrkofullmäktige*, and smaller communes may make the same arrangement. Each county has a county council (*Landsting*) elected by men and women who enjoy municipal suffrage. Towns having a population of at least 100,000 are in their right to separate from the 'Landstings'. Towns which are administered separately by their municipal councils are Stockholm, Göteborg, Malmö, Norrköping, Helsingborg and Gävle. As in elections for the Diet, so in the elections of municipal representatives, of members of the 'Landstings', etc., the method of election is proportional.

### Area and Population.

#### I. PROGRESS AND PRESENT CONDITION.

The first census took place in 1749, and it was repeated at first every third year, and subsequently, after 1775, every fifth year. Since 1860 a general census has been taken every ten years (but 1935-36 was a census year), besides which there are annual calculations of the people.

The area and population of Sweden, according to estimates for December 31, 1942 and 1943, are as follows:—

| Counties (Län)                       | Area: English square miles (land and inland water) | Population Dec. 31, 1942 | Population Dec. 31, 1943 | Pop. per square mile (land) 1943 |
|--------------------------------------|----------------------------------------------------|--------------------------|--------------------------|----------------------------------|
| Stockholm (city) . . . . .           | 55                                                 | 613,754                  | 634,179                  | 11,988.2                         |
| Stockholm (rural district) . . . . . | 2,986                                              | 295,137                  | 300,804                  | 105.5                            |
| Uppsala . . . . .                    | 2,059                                              | 189,255                  | 140,662                  | 71.1                             |
| Södermanland . . . . .               | 2,630                                              | 194,227                  | 195,924                  | 81.2                             |
| Östergötland . . . . .               | 4,266                                              | 323,022                  | 326,261                  | 84.7                             |
| Jönköping . . . . .                  | 4,449                                              | 245,458                  | 247,563                  | 60.4                             |
| Kronoberg . . . . .                  | 3,326                                              | 152,138                  | 152,500                  | 44.3                             |

| Total . . . . .                                     | 173,403                                            | 6,458,200                | 6,522,827                | 41.2                             |

On December 31, 1943, there were 3,240,631 males and 3,282,196 females. The growth of the population has been as follows:—

| Census year | Population | Intercensal increase per ct. per annum | Census year | Population | Intercensal increase per ct. per annum |
|-------------|------------|----------------------------------------|-------------|------------|----------------------------------------|
| 1920        | 5,904,489  | 0.47                                   | 1935        | 6,250,506  | 0.35                                   |
| 1930        | 6,142,191  | 0.39                                   | 1940        | 6,371,432  | 0.38                                   |

With the exception of 33,929 Finns, 6,481 Lapps, and some thousands others, the Swedish population (1930) is entirely of the Scandinavian branch of the Aryan family.

On December 31, 1930, there were 16,475 foreigners in Sweden, including subjects of Finland 3,427, Germany 3,188, Norway 2,420, Denmark 2,041, Russia 1,760, the United States 805, the United Kingdom 863, other states 2,471.

For statistics as to occupations of the population in 1930, see THE STATESMAN'S YEAR-BOOK, 1936, p. 1331.

#### MOVEMENT OF THE POPULATION.

##### 1. Births, Deaths and Marriages.

| Year              | Total living Births | Of which illegitimate | Stillborn | Marriages | Deaths exclusive of Stillborn | Surplus of Births over Deaths |
|-------------------|---------------------|-----------------------|-----------|-----------|-------------------------------|-------------------------------|
| 1939              | 97,880              | 12,055                | 2,724     | 61,373    | 72,876                        | 24,504                        |

| 1939 | 7,178      | 3,580           | 746                 | 1943 | 6,249      | 687             | 66                  |

## II. PRINCIPAL TOWNS.

In 1860 the town population numbered only 434,519, in 1900 1,103,951, and at the beginning of 1944, 2,687,037, showing an increase of from 11 per cent. of the whole population of Sweden (in 1860) to 40.4 per cent. (in 1944).

Towns over 10,000 inhabitants at the beginning of 1944:—

|                       |         |                        |        |                        |        |

## Religion and Education.

The mass of the population belong to the Lutheran Protestant Church, recognized as the State religion. There are 13 bishoprics (Uppsala being the metropolitan see) and 2,555 parishes at the beginning of 1944. At the census of 1930, 'Evangelical Lutherans' (the National Church) were more than 99 per cent. of the population. However, the Protestant Dissenters numbering, Baptists, 56,898, Methodists, 11,450, members of the 'Missions-förbundet', 101,171, and of the 'Filadelfia', 31,969, nearly all formerly belonged to the National Church. Of other creeds, there were 4,763 Roman Catholics (under a Vicar Apostolic resident at Stockholm), 6,653 Jews, and 911 others. A few civil disabilities attach to those not of the national religion. The clergy are chiefly supported from the parishes and the proceeds of the Church lands.

The kingdom has two universities, at Uppsala (founded in 1477) and Lund (founded in 1668), the former having 2,561 and the latter 2,468 students in the autumn of 1943. There are also a State faculty of medicine in Stockholm (founded in 1810), with 970 students, and private universities in Stockholm (founded in 1877), philosophical and law faculties, with 2,010 students, and Göteborg (founded in 1889), philosophical faculty, with 516 students. In Stockholm and Göteborg there are also academies of commerce. Near Uppsala there is an Academy of Agriculture. In 1943 there were 142 public secondary schools, with 55,104 pupils; 59 people's high schools, 6,301 pupils; 2 high and 11 elementary technical schools, about 4,908 pupils; military schools, navigation schools, agricultural schools, veterinary and other special schools; besides institutions and schools for the deaf mutes and the blind. Public elementary instruction is gratuitous and compulsory (since 1842), and children not attending schools under the supervision of the Government must furnish proofs of having been privately educated. The school age is 7 to 14 years. In 1941 there were in the elementary schools, 28,977 teachers and 538,304 pupils.

## Justice and Crime.

The administration of justice is entirely independent of the Government. Two functionaries, the Justitie-Kansler, or Chancellor of Justice, and the Justitie-Ombudsman, or Attorney-General, exercise a control over the admini-

stration. The former, appointed by the king, acts also as a counsel for the Crown; while the latter, who is appointed by the Diet, has to extend a general supervision over all the courts of law. Since 1915 there is a Militie-Ombudsman, also appointed by the Diet, exercising a control over the military laws. The kingdom, which possesses one Supreme Court of Judicature, is divided (beginning of 1944) into 4 high court districts and 186 district courts divisions, of which 71 are urban districts and 115 country districts.

In town these district courts (or courts of first instance) are held by the burgomaster and his assessors; in the country by a judge and 12 jurors—mostly peasant proprietors—the judge alone deciding, unless the jurors unanimously differ from him, when their decision prevails. In Sweden trial by jury exists only for affairs of the liberty of the Press.

## Finance.

Revenue and expenditure for six years are shown as follows (in thousands of kronor):—

| Year    | Revenue      | Expenditure  | Year                 | Revenue      | Expenditure  |
|---------|--------------|--------------|----------------------|--------------|--------------|
|         | 1,000 kronor | 1,000 kronor |                      | 1,000 kronor | 1,000 kronor |
| 1939-40 | 1,849,329    | 2,513,643    | 1942-43              | 2,704,104    | 4,087,250    |
| 1940-41 | 2,035,633    | 3,414,048    | 1943-44 <sup>1</sup> | 2,784,173    | 4,098,805    |
| 1941-42 | 2,267,638    | 3,603,323    | 1944-45 <sup>1</sup> | 3,186,449    | 4,416,061    |

<sup>1</sup> Estimates.

The ordinary working budget of revenue and expenditure for the financial year July 1, 1944, to June 30, 1945, was as follows:—

| REVENUE                                               |               | EXPENDITURE                                    |               |
|-------------------------------------------------------|---------------|------------------------------------------------|---------------|
| (a) Current Revenue                                   | Kronor        | (a) Current Expenditure                        | Kronor        |
| Taxes:                                                |               | Royal Household . . . . .                      | 1,814,400     |
| Tax on incomes and property, etc.                     | 1,278,100,000 | Justice . . . . .                              | 25,168,500    |
| Succession duty and other stamp duties . . . . .      | 70,000,000    | Foreign Affairs . . . . .                      | 11,809,500    |
| Motor-car duty . . . . .                              | 31,000,000    | Defence . . . . .                              | 1,968,844,800 |
| Customs . . . . .                                     | 110,000,000   | Interior . . . . .                             | 565,563,500   |
| Retail trade duty . . . . .                           | 300,000,000   | Communications . . . . .                       | 136,976,300   |
| Excise on spirits, malt, tobacco, etc.                | 520,500,000   | Finance . . . . .                              | 63,686,600    |
| Civil service fees, etc.                              | 58,932,000    | Education and Ecclesiastical Affairs . . . . . | 307,322,400   |
| Contributions to the Old Age Pensions Fund . . . . .  | 62,000,000    | Agriculture . . . . .                          | 249,520,100   |
| Miscellaneous . . . . .                               | 53,500,000    | Commerce . . . . .                             | 34,808,800    |
| (b) Net receipts from productive funds of the State:  |               | Supply . . . . .                               | 188,740,400   |
| Business of the State:                                |               | Pensions . . . . .                             | 83,658,100    |
| Railways . . . . .                                    | 120,000,000   | Expenses for the Diet, etc.                    | 3,334,100     |
| Posts, telegraphs and telephones . . . . .            | 106,000,000   | Unexpected expenses . . . . .                  | 1,000,000     |
| Waterfall works . . . . .                             | 33,000,000    | (b) Expenses for the State funds:              |               |
| Domains . . . . .                                     | 23,000,000    | Civil aviation fund . . . . .                  | 1,151,700     |
| Real estate funds . . . . .                           | 27,190,000    | National debt fund (interest, etc.) . . . . .  | 295,000,000   |
| Interest on State-owned shares . . . . .              | 16,601,000    | Losses on investments . . . . .                | 129,968,300   |
| Interest on outstanding loans . . . . .               | 25,832,700    | Budget of general preparedness . . . . .       | 542,200,000   |
| Other funds . . . . .                                 | 40,773,000    |                                                |               |
| (c) Shares in the profits of Bank of Sweden . . . . . | 10,000,000    |                                                |               |
| Total revenue                                         | 3,186,448,700 | Total expenditure                              | 4,416,061,000 |
| Deficit . . . . .                                     | 1,229,612,300 |                                                |               |
|                                                       | 4,416,061,000 |                                                |               |

*Children of the King.*

I. The Crown Prince *Gustaf Adolf*, Duke of Skåne, born November 11, 1882, married: 1. June 15, 1905, to Princess Margaret Victoria, born January 15, 1882, died May 1, 1920, daughter of Prince Arthur, Duke of Connaught; 2. November 3, 1923, to Louise, Princess of Battenberg, born July 18, 1889. Offspring (of the 1st marriage): Prince Gustaf Adolf, born April 22, 1906; married, October 19, 1932, to Sibylle, Princess of Saxe-Coburg-and-Gotha, born January 18, 1908; issue: Princess Margaretha Désirée Victoria, born October 31, 1934, Princess Birgitta Ingeborg Alice, born January 19, 1937, Princess Désirée Elisabeth Sibylla, born June 2, 1938, Princess Christina Louise Helena, born August 3, 1943; Princess Ingrid, born March 28, 1910; married, May 24, 1935, to Frederik, Crown Prince of Denmark and Iceland, born March 11, 1899; Prince Bertil, born February 28, 1912; Prince Carl Johan, born October 31, 1916.

II. Prince Wilhelm, Duke of Södermanland, born June 17, 1884, married, May 3, 1908, to Grand Duchess Maria Pavlovna, born April 19, 1890, daughter of Grand Duke Paul Alexandrovitch of Russia, divorced March 17, 1914.

*Brothers of the King.*

I. Prince *Oscar Bernadotte*, Count of Wisborg, born Nov. 15, 1859. Renounced his succession to the throne and married, March 15, 1888, Ebba Munck of Fulkila, born Oct. 24, 1858.

II. Prince *Carl*, Duke of Västergötland, born Feb. 27, 1861. Married August 27, 1897, to Princess Ingeborg, born Aug. 2, 1878, daughter of King Frederik VIII of Denmark. Issue, Princess Margaretha, born June 25, 1899, married May 22, 1919, to Prince Axel of Denmark; Princess Märtha, born March 28, 1901, married March 21, 1929, to the Crown Prince Olaf of Norway.

III. Prince *Eugen*, Duke of Närke, born Aug. 1, 1865.

King Gustaf V is the fifth sovereign of the House of Ponte Corvo and great-grandson of Marshal Bernadotte, Prince of Ponte Corvo, who was elected heir-apparent of the crown of Sweden by the Parliament of the Kingdom, August 21, 1810, and ascended the throne February 5, 1818, under the name of Carl XIV Johan. He was succeeded at his death, March 8, 1844, by his only son Oscar. The latter died July 8, 1859, and was succeeded by his eldest son Carl XV, at whose premature death without male children, the crown fell to his next surviving brother, the late king.

The royal family of Sweden have a civil list of 1,896,900 kronor. The sovereign, besides, has an annuity of 300,000 kronor, voted to King Carl XIV Johan and his successors on the throne of Sweden.

As to the dissolution of the Union with Norway, see under NORWAY.

The following is a list of the kings and queens of Sweden, with the dates of their accession, from the accession of the House of Vasa:—

| <i>House of Vasa.</i>     |      | <i>House of Hesse.</i>            |      |
|---------------------------|------|-----------------------------------|------|
| Gustaf I . . . . .        | 1523 | Fredrik I . . . . .               | 1720 |
| Eric XIV . . . . .        | 1560 | <i>House of Holstein-Gottorp.</i> |      |
| Johan III . . . . .       | 1568 | Adolf Fredrik . . . . .           | 1751 |
| Sigismund . . . . .       | 1592 | Gustaf III . . . . .              | 1771 |
| Carl IX . . . . .         | 1599 | Gustaf IV Adolf . . . . .         | 1792 |
| Gustaf II Adolf . . . . . | 1611 | Carl XIII . . . . .               | 1809 |
| Christina . . . . .       | 1632 | <i>House of Bernadotte.</i>       |      |
| <i>House of Pfaltz.</i>   |      | Carl XIV Johan . . . . .          | 1818 |
| Carl X . . . . .          | 1654 | Oscar I . . . . .                 | 1844 |
| Carl XI . . . . .         | 1660 | Carl XV . . . . .                 | 1859 |
| Carl XII . . . . .        | 1697 | Oscar II . . . . .                | 1872 |
| Ulrika Eleonora . . . . . | 1718 | Gustaf V . . . . .                | 1907 |

**Constitution and Government.**

The fundamental laws of the Kingdom of Sweden are:—1. The Constitution or *Regerings-formen* of June 6, 1809; 2. The amended regulations for the formation of the *Riksdag* (Diet) of June 22, 1866 (modified by Acts passed in 1909 and 1921); 3. The law of royal succession of September 26, 1810; and 4. The law on the liberty of the Press of July 16, 1812 (modified by Acts passed in 1941). The King must be a member of the Lutheran Church. His Constitutional power is exercised in conjunction with the Council of State or (in legislation) in concert with the Diet, and every new law must have the assent of the Crown. The right of imposing taxes is, however, vested in the Diet. This Diet, or Parliament of the realm, consists of two Chambers, both elected by the people. The First Chamber consists of 150 members. Their election takes place by the members of the 'Landstings,' or provincial representations, and the councillors of six towns, not represented in the 'Landstings.' The constituencies are 19, arranged in 8 groups, in one of which an election takes place in September every year. All members of the First Chamber, men or women, must be above 35 years of age, and must have the right to vote in municipal affairs. They are elected for the term of eight years. A candidate to the First Chamber may stand for election in any constituency. The Second Chamber consists of 230 members elected for 4 years by universal suffrage, every man and woman over 23 years of age, and not under legal disability, having the right to vote. The country is divided into 28 constituencies, in each of which one member is elected for every 230th part of the population of the kingdom it contains. All men and women who are entitled to vote and are above 25 years of age have the right to stand for election, but only in their own constituencies. The manner of election to both Chambers is proportional, and regulated by a special election law. The places to be given to the different groups of voters are decided according to the d'Hondt rule. The members of both Chambers obtain salaries for their services, at the rate of 750 kr. or 1,000 kr. per month for members living in or outside the capital, besides travelling expenses.

The executive power is in the hands of the King, who acts under the advice of a Council of State, the head of which is the Prime Minister. The Ministry (National Coalition Cabinet), appointed on December 12, 1939, and re-constituted in 1944, is composed as follows:—

*Prime Minister.*—Per Albin Hansson (Social-Democrat).

*Minister for Foreign Affairs.*—Christian Günther.

*Minister of Justice.*—Thorwald E. N. Bergquist (People's Party).

*Minister of Defence.*—P. Edvin Sköld (Social-Democrat).

*Minister for Social Affairs.*—F. Gustav Möller (Social-Democrat).

*Minister of Communications.*—J. Fritiof Domö (Conservative).

*Minister of Finance.*—Dr. Ernst J. Wigforss (Social-Democrat).

*Minister of Education and Ecclesiastical Affairs.*—Gösta Bagge (Conservative).

*Minister of Agriculture.*—Axel Pehrsson-Bramstorp (Peasant Party).

*Minister of Commerce.*—Bertil Ohlin (People's Party).

*Minister of Supply.*—Axel Gjöres (Social-Democrat).

*Ministers without Portfolio.*—Knut G. Ewerlöf (Conservative), Nils Y. E.

*Quensel* (People's Party), Axel L. Rubbestad (Peasant Party), Gunnar

*Danielson* (Social-Democrat) and Tage Erlander (Social-Democrat).

All the members of the Council of State are responsible for the acts of the Government.

gave it as 23,181,200 hectares, and the total amount of wood as 1,417 million cubic metres.

The following table shows the area and yield of the chief crops for 2 years:—

| Crop                          | Area (hectares) |           | Produce (tons) |           |
|-------------------------------|-----------------|-----------|----------------|-----------|
|                               | 1942            | 1943      | 1942           | 1943      |
| Wheat . . . .                 | 278,544         | 268,565   | 472,081        | 524,215   |
| Rye . . . . .                 | 249,499         | 219,937   | 448,089        | 404,753   |
| Barley . . . .                | 111,777         | 118,162   | 220,103        | 228,621   |
| Oats . . . . .                | 597,280         | 574,834   | 926,089        | 850,206   |
| Mixed corn . .                | 278,887         | 276,804   | 528,415        | 494,682   |
| Leguminous crops <sup>1</sup> | 86,883          | 89,104    | 52,542         | 52,518    |
| Potatoes . . .                | 142,096         | 147,807   | 1,840,136      | 2,171,118 |
| Sugar beet . .                | 53,288          | 50,385    | 1,733,861      | 1,888,266 |
| Fodder-roots .                | 67,982          | 64,666    | 2,295,802      | 2,267,856 |
| Hay . . . . .                 | 1,656,661       | 1,665,580 | 4,381,812      | 4,272,643 |

<sup>1</sup> Peas, beans and vetches.

Milk production dropped from 2,722,074 metric tons in 1941 to 2,515,837 in 1942. Butter production fell from 81,419 to 72,043 metric tons, cheese from 34,558 to 14,522 tons.

According to the live-stock census of June 1, 1943, the live-stock was returned as follows: Horses, 594,444; head of cattle, 2,789,780; sheep and lambs, 519,820; goats and kids, 32,601; pigs, 988,642.

### II. MINES AND MINERALS.

Mining has been from time immemorial the leading industry of Sweden, which was the biggest producer of iron in Europe until the use of coal for the manufacture of pig-iron revolutionized that industry. The lack of fossil fuel is the reason why at present mining in Lapland merely concerns itself with the raw products, though experiments made in recent years have carried the problem of electric production of iron ore a good step forward. There were raised in 1939, throughout the kingdom, 13,787,202 tons of iron ore. The pig-iron produced amounted in 1938 to 667,909 tons, and in 1939 to 644,038 tons. Of iron ore, in 1939, 13,650,000 tons, and of pig-iron, 118,412 tons were exported. There were also raised in 1939, 14,195 tons of silver and lead ore, 16,484 tons of copper ore, 68,828 tons of zinc ore, 6,685 tons of manganese ore, 242,280 tons of auriferous arsenic ore, and 191,787 tons of sulphur pyrites. The lead produced amounted to 4,000 kilograms, the copper to 11,838,080, the zinc to 141,000, the tin to 5,000. There are not inconsiderable veins of coal in the southern parts of Sweden, giving 443,695 tons of coal in 1939. The most important produce of the Swedish quarries is paving stone; the amount produced for sale in 1939 had a value of 6,923,818 kronor. In 1939 there were 63,784 workers (2,385 young people under 18) engaged in the mining and metallurgical industries.

### III. INDUSTRIES.

The industries of Sweden are spread fairly well over the whole country. The mining of iron ore has reached its highest development north of the Polar circle, and the most important sawmills are located along the shores of the Gulf of Bothnia. The production of iron and steel has taken place in central Sweden since the earliest times in Swedish history; pig iron is produced chiefly in Sandviken, Domnarvet, Uddeholm and Fagersta. Cream separators, ball-bearings, lighthouse apparatus, telephone supplies, motors, and many kinds of electrical machinery are among the highly

specialised products of the metallurgical industries. The porcelain factory of Gustavsberg and the glass factories of Kosta and Orrefors produce wares that have achieved a high reputation in the markets of the world. Innumerable factories for the production of finished products are scattered all over the countryside.

The timber and wood-work industries of Sweden are of great importance. The public forests have an area of 7,700,089 hectares, of which crown and ecclesiastical forests extend to 6,496,038 hectares. The latter yielded, in 1937, 6,188,000 cubic metres of timber. In 1941 there were in Sweden 1,301 sawmills and planing mills with 25,304 workers who turned out sawn or planed timber to the value of 270,524,000 kronor; 1,643 factories for joinery and furniture with 23,209 workers, the output for the year being valued at 192,399,000 kronor; 71 factories for wood-pulp with 13,710 workers, output 247,121,000 kronor; and 72 paper and pasteboard mills with 14,587 workers, output 213,838,000 kronor.

The following are some data for the most important Swedish industries:—

| Branch of Industry                               | No. of establishments |       | Average No. of workers |        | Value of output (1,000 Kronor) |           |
|--------------------------------------------------|-----------------------|-------|------------------------|--------|--------------------------------|-----------|
|                                                  | 1940                  | 1941  | 1940                   | 1941   | 1940                           | 1941      |
| Wood and paper industry . .                      | 4,058                 | 3,691 | 97,850                 | 90,066 | 1,124,668                      | 1,088,486 |
| Iron and steel works . . . .                     | 60                    | 58    | 29,275                 | 30,499 | 521,990                        | 560,910   |

The total number of industrial factories (including mines and quarries) was in 1940, 18,690, and in 1941, 18,757. The total power used in industry amounted to 6,386,000 effective h.p. in 1940, and 6,463,673 effective h.p. in 1941.

In 1941, 403,857 men, 100,456 women, 32,590 boys, and 18,562 girls (under 18 years of age) were employed in factories.

### IV. FISHERIES.

The total value of the Göteborg and Bohus fishing industry in 1942 was estimated at 57,006,000 kronor.

### Commerce.

The imports and exports of Sweden, unwrought gold and silver and coin not included, have been as follows (in 1000 kronor):—

|                   | 1940      | 1941      | 1942      | 1943      | 1944      |
|-------------------|-----------|-----------|-----------|-----------|-----------|
|                   | 1000 Kr   | 1000 Kr.  | 1000 Kr.  | 1000 Kr.  | 1000 Kr.  |
| Imports . . . . . | 2,004,462 | 1,674,149 | 1,780,244 | 1,814,168 | 1,664,000 |
| Exports . . . . . | 1,327,539 | 1,345,221 | 1,318,826 | 1,172,290 | 830,000   |

The following were the values of the leading imports and exports for two years (in 1,000 kronor):—

|                                                                                      | Imports |         | Exports |         |
|--------------------------------------------------------------------------------------|---------|---------|---------|---------|
|                                                                                      | 1942    | 1943    | 1942    | 1943    |
| Animal and vegetable products                                                        | 382,098 | 362,243 | 21,811  | 15,758  |
| Minerals and metals (including manufactures)                                         | 502,062 | 555,067 | 495,092 | 584,016 |
| Chemical products and pharmaceutical products, dyes, lacquers, soaps and fertilizers | 185,587 | 202,783 | 26,297  | 21,914  |
| Hides and skins, rubber, textile materials and products                              | 378,678 | 348,105 | 14,725  | 12,802  |
| Wood goods, pulp, paper and products thereof                                         | 33,190  | 37,032  | 538,000 | 407,674 |
| Machinery, transportation equipment, instruments                                     | 298,679 | 315,036 | 222,901 | 180,126 |

Principal import countries in 1943 were (in million of kronor): Germany, 898; Baltic countries, 137; Switzerland, 111; Balkan countries, 95; Italy, 79. Principal export countries, 1943, were: Germany, 532; Baltic countries, 194; Switzerland, 106; Balkan countries, 43; Italy, 45.

Total trade between Sweden and U.K. (in thousands of pounds sterling) for 5 years (Board of Trade returns):—

|                                | 1934   | 1935   | 1936   | 1937   | 1938   |
|--------------------------------|--------|--------|--------|--------|--------|
| Imports from Sweden to U.K.    | 17,926 | 17,010 | 20,629 | 26,191 | 24,552 |
| Exports to Sweden from U.K.    | 9,083  | 9,723  | 10,387 | 18,031 | 11,725 |
| Re-exports to Sweden from U.K. | 798    | 819    | 910    | 952    | 1,109  |

### Shipping and Navigation.

The Swedish mercantile marine consisted on July 1, 1944, of 2,107 vessels of 1,475,348 gross tons (only vessels of at least 20 net tons included).

The port of Göteborg had the largest tonnage in the beginning of 1943, namely, 239 vessels of 488,638 gross tons, and next to it came Stockholm, possessing 321 vessels of a total burthen of 454,884 gross tons.

Vessels entered from and cleared for foreign countries, with cargoes and in ballast, in 1943 (preliminary figures), as follows (only vessels of at least 10 net tons included):—with cargoes, 26,031 of 15,500,549 net tons; in ballast, 5,929 of 4,117,530 net tons; total, 31,960 of 19,618,079 net tons.

### Communications.

On January 1, 1943, there were 55,550 miles of roads in Sweden.

At the end of 1943 the total length of railways in Sweden was 16,716 kilometres, of which 10,842 kilometres belonged to the State. In 1939 legislation was passed to enable the state to take over all the lines in the country over a period of 5 years. The receipts of the State railways in 1943 were 547.0 million kronor (503.6 million in 1942), and expenses 354.5 million kronor (326.9 million in 1942). The total cost of construction for the State railways to the end of 1943 was 1,878 million kronor, and for private railways, to the end of 1942, 547 million kronor. The total number of passengers on the State railways was, in 1942, 76,217,000, and in 1941, 65,220,000; weight of goods, excluding Lapland ore, 21,597,000 tons in 1942, and 18,789,000 tons in 1941; private railways, 40,441,000 passengers in 1942, and 37,333,000 in 1941; goods, 21,904,000 tons in 1942, and 21,291,000 tons in 1941. Total electrified lines, 1943, 5,216 kilometres

(3,242 miles), of which 4,458 kilometres were State lines, being 41.1 per cent. of the State system.

The length of the circuits of the telegraph at the end of 1942 was 12,869 km., 7,740 km. of which belonged to the railways. The circuits of the telephone had a length of 2,153,064 km., 101,389 of which belonged to the railways. The number of taxed telegraph messages sent in the year 1942 was 5,437,000, including 146,000 in transit. At the end of 1942 there were 1,017,000 instruments employed in the telephone service (excluding those of the railway telephones). More than one-fourth of them were in Stockholm and surrounding districts.

The Swedish Post Office carried 1,236,120 letters, post-cards, journals, etc., in the year 1943. The number of post-offices at the end of the year was 4,258. The total receipts of the Post Office in 1943 amounted to 163,513,000 kronor, and the total expenditure to 120,187 kronor.

Commercial aviation is carried on by the A/B Aerotransport with the help of a government subsidy (600,000 kronor in 1943). A service is maintained in each direction, jointly with foreign companies, with Scotland, Berlin, Copenhagen, Abo, Helsingfors, etc.

### Banking and Credit.

The Riksbank, or National Bank of Sweden, belongs entirely to the State and is managed by directors elected for three years by the Diet, except one, the president, who is designated by the King. The Bank is under the guarantee of the Diet, its capital and reserve capital are fixed by its constitution, and its note circulation is limited by the value of its metallic stock and its assets in current accounts at home and abroad; but its actual circulation is kept far within this limit.

There are 25 commercial banks (December, 1943). On December 31, 1943, their total deposits amounted to 5,782 million kronor; loans to 4,714 million kronor. Since 1904, only the Riksbank has the right to issue notes. On December 31, 1943, its note circulation amounted to 2,266,000,000 kronor. Its combined gold and foreign exchange holdings on December 31, 1943, totalled 1,289,500,000 kronor, compared with 1,252,600,000 kronor on December 31, 1941.

The savings-banks statistics (exclusive of Post Office) are as follows:—

|                                              | 193           | 1940          | 1941          | 194           |
|----------------------------------------------|---------------|---------------|---------------|---------------|
| Number of depositors at end of year          | 3,701,026     | 3,767,128     | 3,904,026     | 4,064,654     |
| Deposits at end of year, kronor <sup>1</sup> | 3,679,119,308 | 3,593,805,771 | 3,807,498,672 | 4,187,034,067 |
| Capital and reserve funds, kronor            | 348,565,271   | 351,215,064   | 355,698,295   | 358,281,019   |

<sup>1</sup> Including interest.

At the end of 1942 the Post Office Savings Bank had 3,463,931 depositors and 908,368,000 kronor of deposits, and at the end of 1943, 3,591,993 depositors and 1,111,156,000 kronor of deposits.

The private and joint-stock banks also act as savings banks. Their statistics of depositors and deposits are as follows:—

|                                              | 1940        | 1941        | 1942        | 1943          |
|----------------------------------------------|-------------|-------------|-------------|---------------|
| Number of depositors at end of year          | 1,611,497   | 1,592,567   | 1,612,215   | 1,619,161     |
| Deposits at end of year, kronor <sup>1</sup> | 747,565,140 | 844,875,620 | 951,573,847 | 1,067,083,715 |

<sup>1</sup> Excluding interest.

## Money, Weights and Measures.

The Swedish krona, of 100 öre, was in 1941 of the value of approximately 17 kronor to the pound sterling.

Gold coins practically do not exist as a currency. National Bank notes for 5, 10, 50, 100, 1,000 and 10,000 kronor are legal means of payment, and the Bank is normally bound to exchange them for gold on presentation, but the obligation to redemption is for the present suspended.

The metric system of weights and measures is obligatory.

## Diplomatic Representatives.

### 1. OF SWEDEN IN GREAT BRITAIN.

*Envoy Extraordinary and Minister Plenipotentiary.*—Björn Gustaf Prytz (appointed November 26, 1937).

*Counsellors.*—C. O. Gisle and Oscar Constans Görgödt Lundquist.

*Secretaries.*—C. C. Carbonnier, Gösta af Petersens and Baron I. Karl Gustav E. Lagerfelt.

*Attachés.*—T. L. Finnmark, J. F. C. Killander and W. F. H. Petersens.

*Military Attaché.*—Lieutenant-Colonel Baron C. R. H. W. von Essen.

*Air Attaché.*—Major F. R. Cervell.

*Naval Attaché.*—Commander H. H. Prince Bertil, Duke of Halland.

*Agricultural Counsellor.*—W. M. F. de Wachenfelt.

*Press Attaché.*—V. Hammarling.

*Consul-General in London.*—O. C. G. Lundquist.

There are Consular representatives at the following places:—Aberdeen, Belfast, Birmingham, Bradford, Bristol, Cardiff, Cork, Dublin, Dundee, Glasgow, Hartlepool, Hull, Leith, Liverpool, Manchester, Newcastle, Plymouth, Portsmouth, Sheffield, Southampton, Sunderland, and many other places.

### 2. OF GREAT BRITAIN IN SWEDEN.

*Envoy Extraordinary and Minister Plenipotentiary.*—Sir Victor Alexander Louis Mallet, K.C.M.G., C.V.O. (appointed January 16, 1940).

*Secretaries.*—G. P. Labouchere and G. L. Clutton.

*Naval Attaché.*—Captain H. M. Denham.

*Military Attaché.*—Col. R. Sutton-Pratt, O.B.E.

*Air Attaché.*—Group Captain R. B. Maycock, O.B.E.

*Commercial Counsellor.*—H. L. Setchell, O.B.E.

*Consul General.*—K. J. M. White.

There are also Consular representatives at Borås, Gävle, Gothenburg, Helsingborg, Kalmar, Luleå, Malmö, Norrköping, Sundsvall, Visby, etc.

## Books of Reference concerning Sweden.

### 1. OFFICIAL PUBLICATIONS.

*Statistisk årsbok för Sverige* (Annuaire statistique de la Suède), published by Statistiska Centralbyrån. Annual. (First Year 1914.) Stockholm.

*Bidrag till Sveriges officiella statistik* See STATSMAN'S YEAR-BOOK for 1915. The series 'Bidrag' ends with the year 1910 (except the publication with the letter U, which ends with the year 1917. It has been replaced by the new 17,000, an 'riges officiella statistik' mentioned below). Stockholm, 1857-1920.

*Sveriges officiella statistik.* (Reports on Population, Agriculture, Industry, Commerce and Navigation, Social Statistics, Justice, etc.) Stockholm, 1911-1944.

*Statistiska mättdelen.* Stockholm, 1912-1944. Including: Occasional Statistical Investigations (a), not yet arranged for (b), Monthly Trade Statistics (suspended during the war) (c), Railway Statistical Returns (d), Banking Returns (e), Social Returns (f).

*The Swedish Economic Review.* Compiled by the Swedish Board of Trade. Published by the Swedish Foreign Office. Issued quarterly (now suspended). Stockholm, 1933-1940.

*Årsbok för Sveriges kommuner.* Published by Statistiska Centralbyrån. Annual. (First issue, 1918.) Stockholm. For distribution, as a rule, only within Scandinavia.)

*Statistisk tidskrift.* Published by Statistiska Centralbyrån. Stockholm, 1882-1918.

*Sveriges riksbank.* Published by the Bank of Sweden. Annual. (First issue, 1908.) Stockholm.

*The Swedish national debt office.* Report. Annual. (First issue 1920.) Stockholm.

*Sveriges statskalender.* Published by Vetenskapsakademien. Annual. Uppsala.

*Sweden, Historical and Statistical Handbook.* Issued by order of the Swedish Government. 2 vols. Stockholm, 1914.

*The Sweden Year-Book.* Edited and published with the assistance of public authorities. Stockholm, 1921-1938.

*Sweden: A War-time Survey.* Edited and published by the Press Bureau of the Royal Ministry for Foreign Affairs. Stockholm, 1942.

*Department of Overseas Trade Reports, Annual Series.* London.

*Social Work and Legislation in Sweden.* Survey published by order of the Swedish Government. Stockholm, 1938.

*The Northern Countries in World Economy.* Published by the Delegations for the Promotion of Economic Co-operation between the Northern Countries. Helsingfors, 1937.

### 2. NON-OFFICIAL PUBLICATIONS.

*Svensk industrikalender.* Swedish industrial directory. Published by the Federation of Swedish Industries. Stockholm, Annual.

*Svensk exportkalender.* Swedish export directory. Published by the General Export Association of Sweden. Stockholm, Annual.

*Sweden: Ancient and Modern.* A Guide for Tourists. Stockholm, 1938.

*Stockholm Economic Studies.* Published by writers connected with the Institute for Social Sciences of Stockholm University. Nos. 1-10. London (printed in Stockholm), 1929-41.

*Stockholm of To-day.* Published by the Statistical Office of the City of Stockholm. 1939.

*Nordland. Natur, befolkning och näringar.* Published by the Geographical Society of Stockholm and the Institute of Industrial Research. Stockholm, 1942.

*The Northern Countries in World Economy: Denmark, Finland, Iceland, Norway, Sweden.* Published by the Delegations for promotion of economic co-operation between the Northern Countries. Second revised ed. [Printed in] 1939.

*Cook's Traveller's Handbook to Norway, Sweden, Denmark, Finland, and Iceland.* Sixteenth edition. Completely revised by T. G. Barnan. London, 1939.

*Svenska orter.* Atlas över Sverige med ortbeskrivning. Utgiven av Generalstabens litografiska anstalt. Parts 1: 1-3, 2: 1-3. Stockholm, 1932-34.

*Sweden: A War-time Survey.* New York, 1943.

*Jonasson (O.), Höjer (E.) and Björkman (T.),* Agricultural atlas of Sweden. Stockholm, 1938.

*Jones (S. S.),* The Scandinavian States and the League of Nations. London, 1939.

The capital investments during the last six years amounted to: 1938-39, 229,316,000 kronor; 1939-40, 366,118,000 kronor; 1940-41, 464,396,000 kronor; 1941-42, 480,915,000 kronor; 1942-43, 466,070,000 kronor; 1943-44 (estimate), 917,498,000 kronor, and 1944-45, 433,156,000 kronor. Reserved from previous years for the purpose of investments was a sum of 925 million kronor on July 1, 1943.

The self-balancing revenue of the total business of the State (railways, Post Office, telegraphs, telephones, waterfall works, domains and bank) was in 1939, 689,293,000 kronor; 1940, 848,060,000 kronor; 1941, 968,093,000 kronor; 1942, 1,073,110,000 kronor, and 1943, 1,160,010,000 kronor.

On September 30, 1944, the national debt of Sweden amounted to 10,234,000,000 kronor, as compared with 9,324,000,000 kronor on September 30, 1943.

### Defence

A Commander-in-chief is, under the King, in command of the three services. He is assisted by the Defence Staff.

### ARMY.

The military forces are recruited on the principle of universal service, supplemented by a voluntarily enlisted personnel, which form the permanent cadres for training purposes.

Liability to service commences at the age of 20, and lasts till the end of the 47th year. From January 1, 1942, the period of training for recruits is 450 days. This duty is to be performed in a first period of training of 360 days, 2 regimental training periods and a refresher course of 30 days each time.

Sweden is divided into 7 territorial districts, each subordinated to a district commander. There are, in time of peace, 19 infantry (some of them with special organization), 3 cavalry, 4 tank, 9 artillery, 3 A.A. defence regiments and 4 A.A. defence corps.

In January, 1942, a five-year plan was introduced for the development of Sweden's defences. This provides for an increase of weapon-power rather than man-power, which had already been drawn upon to the fullest extent possible. The new plan was intended to equip the army with heavier tanks, heavy artillery, more anti-tank units, and render possible a large-scale motorization of the infantry.

### AIR FORCE.

The Air Force is being enlarged from 16 wings to 18, which represents the limit of equipment by home manufacture of aircraft. Equipment was earlier mainly German, British, American and Italian, but is now being replaced by Swedish.

### NAVY.

The Commander-in-Chief of the Royal Swedish Navy has at his disposal a naval staff under a special chief. The staff is organized in several divisions, and is responsible for the mobilization, organization and training of the fleet. Subordinate to the Commander-in-Chief of the navy are, among others, the inspector of the coast artillery, the chief of the coastal flotilla, the inspecting officer of submarines and the mine-sweeping flotilla. There is also a Technical and Financial Board.

The following is a list of the principal ships:—

| Launched     | Name                     | Displacement<br>(standard<br>tons) | Maximum<br>armour |            | Armament                           | Torpedo<br>tubes | Indicated<br>horse power | Maximum<br>speed knots |
|--------------|--------------------------|------------------------------------|-------------------|------------|------------------------------------|------------------|--------------------------|------------------------|
|              |                          |                                    | On<br>belt        | On<br>guns |                                    |                  |                          |                        |
| 1933<br>1908 | Cruisers                 |                                    |                   |            |                                    |                  |                          |                        |
|              | Gotland . . .            | 4,775                              | 2                 | 2          | 6 6-in.; 4 3-in. A.A.              | 6                | 33,000                   | 27                     |
|              | Fylgia . . .             | 4,310                              | 4                 | 5          | 8 6-in. . . . .                    | 2                | 18,000                   | 21.5                   |

| 1915         | Sverige . .              | 7,080                              |                   |            |                                    |                  | 20,000                   |                        |
| 1905         | Oscar II. . .            | 4,320                              | 6                 | 7½         | 2 8.3-in.; 8 6-in.                 | 2                | 9,000                    | 18                     |
| 1908         | Manligheten .            | 3,450                              | 7                 | 7½         | 2 8.3-in.; 6 6-in.                 | 2                | 7,400                    | 17                     |
| 1901         | Tapperheten .            | 3,415                              |                   |            |                                    |                  |                          |                        |
| 1901         | Äran . . .               | 3,415                              |                   |            |                                    |                  |                          |                        |

There are 21 destroyers, 6 torpedo-boats, 42 mine-sweepers, 28 submarines, 19 motor torpedo-boats and 2 mine-layers, besides depot ships, training ships and small craft. Building: 2 cruisers, *Göta Lejon* and *Tre Kronor*; 2 destroyers, and sundry smaller craft.

Warships are allotted between the sea-going fleet, local defence forces, and the reserve.

There are six naval districts under maritime command: those of the southern, eastern and western coasts, coast of Norrland, Gotland and Öresund. The three naval stations are situated at Karlskrona, Stockholm and Gothenburg (Göteborg).

The active personnel of the Navy comprise about 10,000 officers and men.

The Royal Coast Artillery is attached to the Navy. There is an Inspector of Coast Artillery (a general). The coast fortresses are those of Vaxholm (outside Stockholm), Karlskrona, Älvsborg (outside Gothenburg), Gotland and Hemsö (outside Härnösand). According to the new organisations the active personnel is to comprise about 140 officers, 220 warrant officers and 940 petty officers and men, in addition to conscripts and the reserve.

### Production and Industry.

#### I. AGRICULTURE.

Sweden has always been an agricultural country. In 1751 only 9.5 per cent. of the population depended for a livelihood on the various industries and commerce; in 1870 the percentage had advanced to 19.3, in 1900 to 38.2, in 1920 to 50.2 per cent., and in 1940 to 57.6 per cent.

According to the census of agriculture taken in the autumn of 1937, the number of farms in cultivation was 418,644; of these there were of 2 hectares and under, 111,325; 2 to 20 hectares, 271,461; 20 to 100 hectares, 33,564; above 100, 2,294. Of the total land area of Sweden (41,024,000 hectares), 3,731,000 hectares (except kitchen gardens and fruit gardens) were under cultivation, 1,019,000 hectares under natural meadows, and 22,356,000 hectares under forests, the products of which form a staple export. An estimation of the forest area, founded on sampling in 1923-29,

## SWITZERLAND.

(SCHWEIZ.—SUISSE.—SVIZZERA.)

### Constitution and Government.

#### I. CENTRAL.

ON August 1, 1291, the men of Uri, Schwyz, and Lower Unterwalden entered into a defensive League. In 1353 the League included eight members, and in 1513 thirteen. Various allied and subject territories were acquired either by single cantons or by several in common, and in 1648 the League became formally independent of the Holy Roman Empire, but no addition was made to the number of cantons till 1798. In that year, under the influence of France, the unified Helvetic Republic was formed. This failed to satisfy the Swiss, and in 1803 Napoleon Bonaparte, in the Act of Mediation, gave a new constitution and out of the lands formerly allied or subject increased the number of cantons to nineteen. In 1815 the perpetual neutrality of Switzerland and the inviolability of her territory were guaranteed by Austria, Great Britain, Portugal, Prussia, and Russia, and the Federal Pact which had been drawn up at Zürich, and which included three new cantons, was accepted by the Congress of Vienna. The Pact remained in force till 1848, when a new constitution, prepared without foreign interference, was accepted by general consent. This, in turn, was, on May 29, 1874, superseded by the constitution which is now in force.

The constitution of the Swiss Confederation may be revised either in the ordinary forms of Federal legislation with compulsory referendum, or by direct popular vote (*popular initiative*) a majority both of the citizens voting and of the cantons being required, and the latter method may be adopted on the demand of 50,000 citizens with the right to vote. The Federal Government (i.e., the Parliament and the Federal Council) is supreme in matters of peace, war, and treaties; it regulates the army, the railway, postal and telegraph systems, the coining of money, the issue and repayment of bank notes, and the weights and measures of the republic. The Federal Parliament legislates on matters of copyright, bankruptcy, patents, sanitary police in dangerous epidemics, and it may create and subsidise, besides the Polytechnic School at Zürich, a Federal University and other educational institutions. There has also been en-

trusted to it the authority to decide concerning public works for the whole or great part of Switzerland, such as those relating to rivers, forests, and the construction of railways. By referendum of November 13, 1898, it is also the authority in the entire sphere of common law.

The supreme legislative authority is vested in a parliament of two chambers, a 'Ständerat,' or Council of States, and a 'Nationalrat,' or National Council. The first is composed of forty-four members, chosen and paid by the twenty-two cantons of the Confederation, two for each canton. Their remuneration depends on the wealth and liberality of the cantons. The mode of their election and the term of membership depend entirely on the canton. Three of the cantons are politically divided—Basel into Stadt and Land; Appenzell into Ausser Rhoden and Inner Rhoden; and Unterwald into Obwald and Nidwald. Each of these parts of cantons sends one member to the State Council, so that there are two members to the divided as well as to the undivided cantons. The 'Nationalrat' consists (according to a law passed on September 25, 1942, based on the 1941 census), of 194 representatives of the Swiss people, chosen in direct election for 4 years, at the rate of one deputy for every 22,000 souls. The members are paid from Federal funds at the rate of 35 francs for each day on which they are present. The members are distributed amongst the various cantons as follows:—

| Canton <sup>1</sup>           | Number of Representatives | Canton <sup>1</sup>       | Number of Representatives |
|-------------------------------|---------------------------|---------------------------|---------------------------|
| Zürich (Zurich)               | 31                        | Schwyz                    | 3                         |
| Bern (Berne)                  | 33                        | Unterwald—Upper and Lower | 2                         |
| Luzern (Lucerne)              | 9                         | Glarus (Glarus)           | 2                         |
| Uri                           | 1                         | Aargau (Argovie)          | 12                        |
| Zug (Zoug)                    | 2                         | Thurgau (Thurgovie)       | 6                         |
| Fribourg (Freiburg)           | 7                         | Ticino (Tessin)           | 7                         |
| Solothurn (Soleure)           | 7                         | Vaud (Waadt)              | 16                        |
| Basel (Bâle)—town and country | 12                        | Valais (Wallis)           | 7                         |
| Schaffhausen (Schaffhouse)    | 2                         | Neuchâtel (Neuenburg)     | 5                         |
| Appenzell—Outer and Inner     | 3                         | Genève (Genf)             | 8                         |
| St. Gallen (St. Gall)         | 13                        | Total                     | 194                       |
| Graubünden (Grisons)          | 6                         |                           |                           |

<sup>1</sup> The name of the canton is given in German, French or Italian, according to the language most spoken in it, and the name in the other language is given in brackets.

At the elections held on October 31, 1943, the following parties were returned:—National Council: Social Democrats, 54; Radicals, 47; Catholic Conservatives, 43; Agrarians, 22; Liberals, 8; Democrats, 6; Landserung, 5; unattached, 9; total, 194.

Council of States (1943 election): Catholic Conservatives, 19; Radicals, 12; Socialists, 5; Peasant Party, 4; Liberal Conservatives, 2; Democrats, 2.

A general election of representatives takes place by ballot every four years. Every citizen of the republic who has entered on his twenty-first year is entitled to a vote; and any voter, not a clergyman, may be elected a deputy. Both chambers united are called the 'Bundes-Versammlung,' or Federal Assembly, and as such represent the supreme government of the Republic. Laws passed by the Federal Assembly may be vetoed

by the popular voice, which means in effect that 80,000 citizens or eight cantons may demand that the law in question should be submitted to the direct vote of the nation, which can say only 'Yes' or 'No.' For the decision of the question submitted a majority both of the cantons and of the voters is required. This principle, called the *referendum*, is frequently acted on.

The chief executive authority is deputed to a 'Bundesrat,' or Federal Council, consisting of seven members, elected for four years by the Federal Assembly. The members of this council must not hold any other office in the Confederation or cantons, nor engage in any calling or business. In the Federal Parliament legislation may be introduced either by a member, or by either House, or by the Federal Council (but not by the people). Every citizen who has a vote for the National Council is eligible for becoming a member of the executive.

The President of the Confederation and the Vice-President of the Federal Council are the first magistrates of the Confederation. Both are elected by the Federal Assembly in joint session of the National and State councils for the term of one year, January 1 to December 31, and are not re-eligible to the same offices till after the expiration of another year. The Vice-President, however, may be, and usually is, elected to succeed the outgoing President.

*President of the Confederation for 1945.*—Eduard von Steiger (Berne).

*Vice-President of the Federal Council for 1945.*—Karl Kobelt (St. Gallen).

The seven members of the Federal Council—each of whom has a salary of 1,600*l.* per annum, while the President has 1,720*l.*—act as ministers, or chiefs of the seven administrative departments of the republic. The city of Berne is the seat of the Federal Council and the central administrative authorities.

The Federal Council is composed as follows (March, 1945):—

*Foreign Affairs.*—Max Petitpierre.

*Interior.*—Philipp Etter (Zoug), Catholic Conservative.

*Justice and Police.*—Eduard von Steiger (Berne), Peasant and Middle Class Party.

*Military.*—Karl Kobelt (St. Gallen), Radical.

*Finance.*—Ernest Nobs (Zurich), Socialist.

*Agriculture and Industry.*—Walter Stampfli (Solothurn), Radical.

*Posts and Railways.*—Enrico Celio (Tessin), Catholic Conservative.

## II. LOCAL GOVERNMENT.

Each of the cantons and demi-cantons of Switzerland is sovereign, so far as its independence and legislative powers are not restricted by the federal constitution; each has its local government, different in its organisation in most instances, but all based on the principle of absolute sovereignty of the people. In a few of the smallest cantons the people exercise their powers direct, without the intervention of any parliamentary machinery, all male citizens of full age assembling together in the open air, at stated periods, making laws and appointing their administrators. Such assemblies, known as the *Landsgemeinden*, exist in Appenzell, Glarus and Unterwald. In all the larger cantons there is a body chosen by universal suffrage, usually called the *Grosse Rat*, or *Kantons Rat*, which exercises all the functions of the *Landsgemeinden*. In all the cantonal constitutions, however, except those of the cantons which have a *Landsgemeinde*, the *referendum* has a place. By this principle, where it is most fully developed, as in Zurich, all laws and concordats, or agreements with other cantons, and the chief matters of finance, as well as all revision of the constitution, must be submitted to the

popular vote. In all the cantons, the *popular initiative* for constitutional affairs, as well as for legislation, has been introduced, except in Lucerne, where the *initiative* exists only for constitutional affairs. The members of the cantonal councils, as well as most of the magistrates, are either honorary servants of their fellow-citizens, or receive a merely nominal salary. In most cantons there are districts (*Amtbezirke*) consisting of a number of communes grouped together, each district having a Prefect (*Regierungstatthalter*) representing the cantonal government. In the larger communes, for local affairs, there is an Assembly (legislative) and a Council (executive) with a president, maire or syndic, and not less than 4 other members. In the smaller communes there is a council only, with its proper officials.

## Area and Population.

### I. PROGRESS AND PRESENT CONDITION.

Area and population, according to the census held on December 1, 1930, and the census held on December 1, 1941, are shown in the following table. The cantons are given in the official order and the year of the entrance of each into the league or confederation is stated:—

| Canton                            | Area :<br>sq. miles | Population               |                          | Pop.<br>per square<br>mile, Dec.<br>1, 1941<br>(census) |
|-----------------------------------|---------------------|--------------------------|--------------------------|---------------------------------------------------------|

| Valais (Wallis) (1815)            | 2,021               | 136,394                  | 148,319                  | 73                                                      |
| Neuchâtel (Neuenburg) (1815)      | 309                 | 124,324                  | 117,900                  | 382                                                     |
| Genève (Genf) (1815)              | 109                 | 171,366                  | 174,855                  | 1,604                                                   |
| Total                             | 15,944              | 4,066,400                | 4,265,703                | 268                                                     |

The German language is spoken by the majority of inhabitants in 19 of the 25 cantons (French names given in brackets), the French in five (Fribourg,

Vaud, Valais, Neuchâtel and Genève, for which the German names are given in brackets), the Italian in one (Ticino), the Romansch in one (Graubünden). In 1930, 2,924,313 spoke German, 831,097 French, 242,034 Italian, 44,158 Romansch, and 24,798 other languages. On July 8, 1937, Romansch was made the fourth national language.

The number of foreigners resident in Switzerland in 1930 was 355,522. The number of Swiss resident outside Switzerland on January 1, 1943, was 267,330 (in France, 85,000; Germany, 50,700; the United States, 45,000; Great Britain, 17,000; Italy, 15,600).

## II. MOVEMENT OF POPULATION.

| Years | Total Births | Stillbirths | Marriages | Deaths and Stillbirths | Surplus of Births over Deaths |
|-------|--------------|-------------|-----------|------------------------|-------------------------------|
| 1930  | 65,253       | 1,416       | 31,513    | 50,900                 | 14,353                        |
| 1940  | 65,457       | 1,342       | 32,472    | 52,101                 | 13,356                        |
| 1941  | 73,382       | 1,356       | 36,130    | 48,692                 | 24,590                        |
| 1942  | 80,202       | 1,327       | 36,820    | 48,255                 | 31,947                        |
| 1943  | 84,444       | 1,305       | 35,604    | 48,804                 | 35,640                        |

In 1943 the illegitimate births numbered 2,669. The number of divorces was 3,211 in 1943.

The number of emigrants in five years was: 1939, 2,186; 1940, 1,111; 1941, 1,398; 1942, 326; 1943, 18.

Visitors to holiday resorts: 1942, 2,359,813 Swiss and 134,722 foreigners; 1943, 2,475,231 Swiss and 92,865 foreigners.

## III. PRINCIPAL TOWNS.

On December 1, 1941, the population of the principal towns was as follows (census figures):—Zürich, 336,395; Basel, 162,105; Berne, 130,331; Geneva, 124,431; Lausanne, 92,541; St. Gallen, 62,530; Winterthur, 58,883; Luzern, 54,716; Biel, 41,219; La Chaux-de-Fonds, 30,943; Fribourg, 26,045; Neuchâtel, 23,799; Schaffhausen, 22,498; Thun, 20,239; Chur, 17,060; Lugano, 17,030; Solothurn, 15,414; Olten, 15,287; Aarau, 12,900; Herisau, 12,789; Vevey, 12,598; Zug, 12,372; Le Locle, 11,336; Bellinzona, 10,948; Grenchen, 10,939; Yverdon, 10,865; Rorschach, 10,591.

## Religion.

There is complete and absolute liberty of conscience and of creed. No one is bound to pay taxes specially appropriated to defraying the expenses of a creed to which he does not belong. No bishoprics can be created on Swiss territory without the approbation of the Confederation. The order of Jesuits and its affiliated societies cannot be received in any part of Switzerland; all functions clerical and scholastic are forbidden to its members, and the interdiction can be extended to any other religious orders whose action is dangerous to the State, or interferes with the peace of different creeds. The foundation of new convents or religious orders is forbidden.

According to the census of December 1, 1930, the number of Protestants amounted to 2,230,303 (57 per cent. of the population), of Roman Catholics to 1,666,350 (41 per cent.), and of Jews to 17,973 (0.4 per cent.). Protestants are in a majority in twelve of the cantons, and Catholics in ten. Of the more populous cantons, Zürich, Berne, Vaud, Neuchâtel, and Basel (town and land) are mainly Protestant, while Luzern, Fribourg, Ticino,

Valais and the Forest Cantons are mainly Catholic. The Roman Catholic priests are much more numerous than the Protestant clergy, the former comprising more than 6,000 regular and secular priests. They are under five bishops, viz., of Basel and Lugano (resident at Solothurn), Chur, St. Gallen, Lausanne and Geneva (resident at Freiburg), and Sitten (Sion), all of them immediately subject to the Holy See.

## Education.

In the educational administration of Switzerland there is no centralization. Before the year 1848 most of the cantons had organised a system of primary schools, and since that year elementary education has steadily advanced. In 1874 it was made obligatory (the school age varying in the different cantons), and placed under the civil authority. In some cantons the cost falls almost entirely on the communes, in others it is divided between the canton and communes. In all the cantons primary instruction is free. In every district there are primary schools, and secondary schools for youths of from twelve to fifteen.

The following are the statistics of the various classes of educational institutions for 1942-43:—Primary schools with 13,433 teachers (8,309 men and 5,124 women, excluding women teachers for needlework), and 443,167 pupils; the secondary schools and lower middle schools (progymnasias included) had 39,613 boys and 33,774 girls, with 2,498 men and 379 women teachers. There are also cantonal schools, gymnasias, higher schools for girls, complementary schools, teachers' seminaries, commercial and administrative schools, trade schools, art schools, technical schools, schools for the instruction of girls in domestic economy and other subjects; agricultural schools, schools for horticulture, for viticulture, for arboriculture, and for dairy management. There are also institutions for the blind, the deaf and dumb, and the feeble-minded.

There are seven universities in Switzerland. These universities are organised on the model of those of Germany, governed by a rector and a senate, and divided into four 'faculties' of theology, jurisprudence, philosophy and medicine. There is a technical high school, maintained by the Federal Government, at Zürich, with 2,957 matriculated students in 1943-44. The academy of Neuchâtel was transformed into a university in May, 1909, but without the faculty of medicine. The following table shows the year of foundation of each university, the number of teaching staff and of matriculated students in the various branches of study in each of the seven universities in the winter of 1943-44:—

|                                                    | Theology | Law   | Medicine | Philosophy and Science | Total | Teaching Staff |
|----------------------------------------------------|----------|-------|----------|------------------------|-------|----------------|
| Basel (1460)                                       | 104      | 301   | 506      | 922                    | 1,833 | 214            |
| Zürich (1832)                                      | 110      | 888   | 874      | 970                    | 2,842 | 262            |
| Bern (1834)                                        | 102      | 1,075 | 679      | 557                    | 3,406 | 320            |
| Genève (1559 <sup>1</sup> & 1878 <sup>2</sup> )    | 73       | 618   | 342      | 622                    | 1,655 | 208            |
| Lausanne (1687 <sup>1</sup> & 1890 <sup>2</sup> )  | 31       | 405   | 355      | 685                    | 1,476 | 155            |
| Fribourg (1869)                                    | 271      | 332   | —        | 592                    | 1,195 | 106            |
| Neuchâtel (1866 <sup>1</sup> & 1909 <sup>2</sup> ) | 32       | 231   | —        | 165                    | 428   | 67             |

<sup>1</sup> As an academy.

<sup>2</sup> As a university.

These numbers are exclusive of 'visitors,' but inclusive of 1,716 women students.

A University Institute for International Studies was opened at Geneva in October, 1927.

### Justice and Crime.

The *Bundes-Gericht*, or Federal Tribunal, which sits at Lausanne, consists of 26-28 members, with 9 supplementary judges, appointed by the Federal Assembly for six years and are eligible for re-election; the President and Vice-President, as such, for two years and cannot be re-elected. The President has a salary of 27,000 francs a year, and the other members 25,000 francs. The Tribunal has three sections, to each of which is assigned the trial of suits in accordance with regulations framed by the Tribunal itself. It has original and final jurisdiction in suits between the Confederation and cantons; between cantons and cantons; between the Confederation or cantons and corporations or individuals, the value in dispute being not less than 4,000 francs; between parties who refer their case to it, the value in dispute being at least 4,000 francs; and also in such suits as the constitution or legislation of cantons places within its authority. There are also many classes of railway suits which it is called on to decide. It is a Court of Appeal against decisions of other Federal authorities, and of cantonal authorities applying Federal laws. The Tribunal also tries persons accused of treason or other offences against the Confederation. For this purpose it is divided into four chambers: the Chamber of Accusation, the Criminal Chamber (*Cour d'Assises*), the Federal Penal Court, and the Court of Cassation. The jurors who serve in the Assize Courts are elected by the people, and are paid 25 francs a day when serving.

On July 3, 1888, the Swiss electorate accepted by 358,400 votes to 312,000 a new Federal Penal Code, to take the place of the separate Cantonal Penal Codes. The new Code came into force on January 1, 1941.

On December 31, 1941, the prison population of Switzerland consisted of 4,105.

As from January 1, 1942, capital punishment was abolished in Switzerland.

### Social Insurance.

The Swiss Federal Insurance Law (insurance against illness and accident), as passed by both Chambers on June 13, 1911, was accepted by the electors of the Republic with a small majority. The total number of votes cast was 529,001, of which 267,585 were for and 241,418 against the measure.

All Swiss citizens are entitled to insurance against illness, and foreigners also may be admitted to the benefits of the law. Compulsory insurance against illness does not exist as yet, but cantons and communities are entitled under the act to declare obligatory insurance for certain classes or, in general, to establish public benefit (sick fund) associations, and to make employers responsible for the payment of the premiums of their employees.

Insurance against accident is compulsory for all officials, employees, and workmen of all the factories, trades, etc., which are under the Federal liability law. Every person above the age of 14 can insure voluntarily at the Federal insurance administration (or at any insurance corporation). The Swiss Accident Insurance Institution commenced operations on April 1, 1918. In 1942 the 1,147 societies insuring against illness had 2,264,780 members.

### Finance.

The entire net proceeds of the Federal alcohol monopoly (amounting to 14,014,540 francs from July 1, 1943, to June 30, 1944) are divided equally between the Confederation and the cantons, and they have to expend one-tenth of the amount received in combating alcoholism in its causes and effects. Of the proceeds of the tax for exemption from military service, levied through the cantons, one-half goes to the Confederation and the other to the cantons.

### Revenue and expenditure for six years:—

| Year | Revenue     | Expenditure | Year              | Revenue     | Expenditure |
|------|-------------|-------------|-------------------|-------------|-------------|
|      | Francs      | Francs      |                   | Francs      | Francs      |
| 1939 | 551,849,798 | 638,850,588 | 1942              | 574,573,001 | 666,136,567 |
| 1940 | 481,947,627 | 512,195,268 | 1943              | 584,262,211 | 507,958,302 |
| 1941 | 398,082,956 | 458,397,153 | 1944 <sup>1</sup> | 389,300,000 | 512,600,000 |

<sup>1</sup> Estimates.

The following table gives the budget estimates for 1944:—

| Source of Revenue                             | Francs      | Branch of Expenditure                         | Francs      |
|-----------------------------------------------|-------------|-----------------------------------------------|-------------|
| Capital invested . . . . .                    | 40,671,549  | Debt, Total Interest Charge                   | 62,947,700  |
| General administration . . . . .              | 664,400     | General administration . . . . .              | 6,423,882   |
| Departments:—                                 |             | Departments:—                                 |             |
| Political . . . . .                           | 500,000     | Political . . . . .                           | 10,378,211  |
| Interior . . . . .                            | 3,698,850   | Interior . . . . .                            | 44,096,110  |
| Justice and Police . . . . .                  | 3,848,900   | Justice and Police . . . . .                  | 11,698,950  |
| Military . . . . .                            | 870,422     | Military . . . . .                            | 171,787,387 |
| Finance and Customs . . . . .                 | 500,499,767 | Finance and Customs . . . . .                 | 116,646,751 |
| Commerce, Industry, and Agriculture . . . . . | 12,960,752  | Commerce, Industry, and Agriculture . . . . . | 81,702,839  |
| Posts and Railways . . . . .                  | 25,595,900  | Posts and Railways . . . . .                  | 6,915,170   |
| Total . . . . .                               | 389,300,000 | Total . . . . .                               | 512,600,000 |

The public debt of the Confederation (exclusive of the railway debt) amounted, on January 1, 1944, to 5,894,782,300 francs. The floating debt (January 1, 1944) was 279,831,785 francs. The total debt was thus 6,174,614,085 francs, or, including the railway debt, 8,343,805,385 francs.

### Defence.

There are fortifications on the south frontier for the defence of the St. Gothard pass; others have been constructed at St. Maurice and Martigny in the Rhone Valley.

Switzerland depends for defence upon a *national militia*. Service in this force is compulsory and universal, with few exemptions except for physical disability. Those excused or rejected pay certain taxes in lieu. Liability extends from the 18th to the end of the 60th year. The first 12 years are spent in the first line, called the 'Auszug,' or 'Elite'; the next 8 in the Landwehr; and the remaining 8 in the Landsturm. For cavalry, however, service is 11 years in the Auszug, and 12 in the Landwehr. The Landsturm only includes men who have undergone some training. The unarmed Landsturm comprises all other males between 20 and 50 whose services can be made available for non-combatant duties of any description.

The initial training of the Swiss militia soldier is carried out in recruits' schools, and the periods are 88 days for infantry, engineers, and artillery, and 102 days for cavalry. The subsequent trainings, called 'repetition courses,' are 11 days *annually*; but after going through seven courses (8 in the case of the cavalry) further attendance is excused for all under the rank of sergeant. The Landwehr men are called out only once for training, also for 11 days.

The country is divided into 6 divisional districts. There is a staff organisation for three army corps. There are the usual departmental troops, pontoon and railway corps, telegraph troops, and an air force of 21 squadrons

with 200 aeroplanes. The peace establishment normally under training is 46,200.

The fortress troops man the fortifications which close the St. Gothard Pass and the Rhone Valley to a possible invader from the south. They amount to about 21,000 men. The Landwehr is organised in 37 battalions and 36 squadrons. Altogether Switzerland can mobilise nearly 200,000 men (combatants), irrespective of the organised Landsturm, who may amount to another 60,000.

After the outbreak of war in Europe, the whole Swiss army was called up, and a total force of 650,000 men was mobilised. Subsequently, some of the older classes were demobilised, but the younger classes were called up at an earlier age than hitherto, with the result that a total force of some 525,000 men are under arms.

The administration of the Swiss army is partly in the hands of the Cantonal authorities, who promote officers up to the rank of captain. But the Federal Government is concerned with all general questions, and makes all the higher appointments.

The Swiss infantry are armed with the Swiss repeating rifle and with machine-guns and light machine-guns. Special infantry-guns and trench-mortars are to be introduced. The field artillery is armed with a Q.F. shielded Krupp 7.5 cm. and field howitzers of 12 cm. calibre. The heavy artillery is armed with guns of 12 cm. and howitzers of 15 cm. calibre.

Military expenditure (ordinary and extraordinary), 1943, 1,308,265,267 francs.

### Production and Industry.

About 20.8 per cent. of the population (503,769 men and 383,742 women; total, 887,511) are engaged in agricultural pursuits. There are 236,095 farms in the country with a total area of 1,446,447 hectares. Of the total area 931,180 hectares, or 2,301,027 acres, being 22.4 per cent., is unproductive; of the productive area 982,540 hectares, or 2,427,943 acres, being 23.8 per cent., is forest; and of the rest about 1,115,070 hectares, or 2,755,436 acres (27.0 per cent.) is under grass, and about 902,590 hectares, or 2,230,379 acres (21.9 per cent.) is pasturage.

In 1943, 216,489 hectares were planted with cereals, of which 100,206 hectares were wheat; potatoes, 82,846 hectares; sugar-beet, 4,773 hectares; vegetables, 17,053 hectares; tobacco, 940 hectares. Milk production (in million quintals): 1937, 26.1; 1938, 27.2; 1939, 26.9; 1940, 26.2; 1941, 24.7; 1942, 22.6; 1943, 22.0. Production of cheese, 1942-43, 11,300 metric tons.

The total fruit production in 1943 was 10,295,000 quintals, of which apples amounted to 6,500,000 quintals and pears to 3,200,000 quintals.

Wine is produced in eighteen of the cantons. In 1943 Swiss vineyards yielded 16,425,000 gallons of wine, valued at 98,675,000 francs. Tobacco is produced in nine cantons. On April 21, 1944 (last census), there were in Switzerland, 147,339 horses, 3,317 mules and donkeys, 209,075 sheep, 218,485 goats, 1,497,436 cattle (including 817,123 cows) and 599,521 pigs.

The Swiss Confederation has the right of supervision over the police of the forests, and of framing regulations for their maintenance. The entire public forest area of Switzerland on January 1, 1943, was 1,843,624 acres in extent (comprising 119,993 acres of cantonal forest and 1,723,631 acres belonging to municipalities). Of the total forest area (January 1, 1943), 1,520,448 acres (82 per cent.) is productive. In 1941, 3,444,000, in 1942, 3,652,000 cubic metres of timber were utilized.

Many industries flourish in Switzerland. The chief agricultural industries

are the manufacture of cheese and condensed milk. There are 2 salt-mining districts; that at Bex (Vaud) belongs to the Canton, but is worked by a private company, and those at Schweizerhalle, Rheinfelden and Ryburg are worked by a joint-stock company formed by the Cantons interested. The output of salt of all kinds in 1943 reached 766,860 quintals. In the province of St. Gall (Gonzen mine) iron ore and manganese ore are mined. In 1943 there were 9,082 factories in Switzerland, with 425,972 workpeople. Watch and clock making is an important branch of manufacture; number of factories in 1943, 875. In 1943, 59 breweries produced 22,394,000 gallons of beer (44,215,000 gallons in 1941).

In 1940 the Swiss embroidery establishments operated 850 shuttle-machines as against 849 in 1938, and 850 hand-embroidery machines as compared with 894 in 1938.

Total number of industrial establishments (including agricultural industries) in 1939, 244,000; number of workers, 1,285,419 (men, 856,444; women, 428,975).

### Commerce.

The special commerce, not including precious metals, was as follows for five years:—

|         | 1939                     | 1940                     | 1941                     | 1942                     | 1943                     |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Imports | 1000 Francs<br>1,889,358 | 1000 Francs<br>1,838,621 | 1000 Francs<br>2,024,800 | 1000 Francs<br>2,049,300 | 1000 Francs<br>1,777,100 |
| Exports | 1,297,577                | 1,315,690                | 1,463,600                | 1,571,700                | 1,623,900                |

The following table, in thousands of francs, shows the distribution of the special trade of Switzerland (including bullion but not coin) among the principal countries. Much of the trade with the frontier countries is really of the nature of transit trade:—

|                | Imports                 |                         | Exports                 |         |
|----------------|-------------------------|-------------------------|-------------------------|---------|
|                | 1938                    | 1939                    | 1938                    | 1939    |
| Germany        | 1,000 Francs<br>873,083 | 1,000 Francs<br>440,470 | 1,000 Francs<br>206,143 | 191,529 |
| France         | 229,182                 | 275,344                 | 121,406                 | 140,106 |
| Italy          | 116,669                 | 135,178                 | 91,199                  | 80,675  |
| United Kingdom | 95,021                  | 109,304                 | 148,088                 | 164,506 |
| United States  | 125,257                 | 132,685                 | 90,738                  | 129,678 |
| Argentina      | 58,407                  | 78,335                  | 35,821                  | 32,811  |
| Japan          | 12,041                  | 11,823                  | 32,891                  | 13,343  |
| Egypt          | —                       | 82,517                  | —                       | 13,160  |
| Rumania        | —                       | 28,964                  | —                       | 14,325  |

Customs receipts: 1942, 132,156,000 francs; 1943, 110,117,000 francs; 1940, 213,921,000 francs.

Total trade between Switzerland and the United Kingdom (in thousands of pounds) for five years (Board of Trade returns):—

|                                     | 1934  | 1935  | 1936  | 1937  | 1938  |
|-------------------------------------|-------|-------|-------|-------|-------|
| Imports from Switzerland into U.K.  | 5,467 | 5,400 | 6,234 | 7,317 | 7,378 |
| Exports to Switzerland from U.K.    | 4,648 | 4,077 | 3,911 | 4,663 | 3,467 |
| Re-exports to Switzerland from U.K. | 790   | 928   | 1,068 | 1,090 | 790   |

### Communications.

Railway history in Switzerland began in 1854. At present the railways (excluding tramways and funiculars) have a length of 3,245 miles. The net

operating receipts from traffic of the Swiss Federal railways amounted in 1942 to 468,327,000 francs and to 479,202,000 francs in 1943. Operating expenses in 1942 amounted to 298,898,000 francs, 315,574,000 francs in 1943. The State railways are gradually being electrified; by the beginning of 1940, 1,367 miles of electrified normal gauge lines were being operated by the Federal Railways. Traffic in 1942 was 22,406,000 metric tons and 153,792,000 passengers; 20,642,000 metric tons and 176,992,000 passengers in 1943.

There are about 10,200 miles of main road.

The Swiss merchant marine, with an initial fleet of 11 vessels, was created by a decree of the Swiss Government dated April 9, 1942, the place of registry of its vessels being Basel.

State aerial service is being gradually developed. In 1943 there were carried by civil aviation 5,841 passengers, 162,300 kilos of postal packets, freight and luggage, and flew 201,100 kilometres.

In 1943 there were in Switzerland 3,972 post-offices. By the internal service there were forwarded 288,300,000 letters, 75,600,000 post-cards, 224,600,000 packets of printed matter and samples, 421,854,000 newspapers. In the international service there were forwarded 8,800,000 letters, 3,300,000 post-cards, 7,200,000 packets of printed matter and samples, 1,333,000 newspapers. Internal post-office orders were sent to the value of 514,456,000 francs. Receipts, 1943, 168,619,000 francs; expenditure, 163,918,000 francs.

Switzerland has a very complete system of telegraphs and telephones, consisting (1943) of 1,864,681 miles of wire. There were transmitted 735,000 inland telegrams, 2,383,060 international (of which 1,017,000 were despatched and 1,119,000 were received), and 247,000 transit through Switzerland. Number of offices, 3,759. There were 567,517 telephones installed; conversations, 409,780,000. The telegraph and telephone gross receipts in 1943 amounted to 181,799,000 francs; the expenditure to 102,121,000 francs, the net profits to 19,356,000 francs.

Wireless communication is furnished by three main and one local stations.

### Banking and Credit.

On December 31, 1943, the coin minted in Switzerland was as follows:—23,192,000 gold coins of the nominal value of 489,804,000 francs; 134,123,000 silver coins of the nominal value of 245,875,000 francs; 312,484,000 nickel coins of the nominal value of 30,757,000 francs, and 226,657,000 bronze and zinc coins of the nominal value of 2,893,000 francs; total, 696,456,000 coins of the nominal value of 719,329,000 francs.

The National Bank, with headquarters divided between Bern and Zurich, opened its doors on June 20, 1907. It has the exclusive right to issue banknotes in Switzerland. On October 30, 1944, the condition of the bank was as follows:—

|                         | Francs        |                                | Francs        |
|-------------------------|---------------|--------------------------------|---------------|
| Gold . . . . .          | 4,450,540,501 | Securities . . . . .           | 64,181,367    |
| Gold exchange . . . . . | 107,088,228   | Notes in circulation . . . . . | 3,256,985,670 |
| Discounts . . . . .     | 107,298,097   | Deposits . . . . .             | 1,396,629,552 |
| Advances . . . . .      | 15,996,952    |                                |               |

On December 31, 1943, the total amount of saving deposits in Swiss banks was 6,715 millions francs, with 4,522,713 depositors.

### Money, Weights and Measures.

The international metric system is the sole legal standard of weights and measures in Switzerland. It was made compulsory in the country by the Federal law of July 3, 1875, and since January 1, 1887, no other units than the metric units have been legal. By the Federal law of June 24, 1909, the international electric units were also adopted. By that law, copies of the French standards, deposited at the International Office for Weights and Measures at Sèvres (France), were adopted as the legal standards for Switzerland.

The *Franc* of 100 *Rappen* or *Centimes*, is the monetary unit. By decision of the Swiss Federal Council of September 26, 1936, the content of fine gold of the franc was reduced from 290.3225 milligrams to a level of between 190 and 215 milligrams. This corresponds to an average devaluation of 30 per cent. Gold coins are the 20 and 10 franc pieces. Silver coins in circulation are 5, 2, 1 and  $\frac{1}{2}$  franc; nickel coins, 20, 10 and 5 centimes; bronze, 2 and 1 centime.

As a result of the dissolution of the Latin Monetary Union in 1926, the gold currencies of other countries of the Union are, after April 1, 1927, no longer legal tender in Switzerland, where they have circulated since 1860.

National Bank 20-franc notes are also in circulation (by law of July 30, 1914), 5-franc notes (August 3, 1914), and 25-franc notes (September 9, 1914).

The *Centner*, of 50 *Kilogrammes* and 100 *Pfund* = 110 lbs. avoirdupois. The *Quintal* = 100 *Kilogrammes* = 220 lbs. avoirdupois. The *Arpent* (Land) = 8.9ths of an acre.

The *Pfund*, or pound, chief unit of weight, is legally divided into decimal *Grammes*, but the people generally prefer the use of the old halves and quarters, named *Halbpfund* and *Viertelpfund*.

### Diplomatic and Consular Representatives.

#### 1. OF SWITZERLAND IN GREAT BRITAIN.

*Envoy and Minister*.—Paul Ruegger (appointed May 9, 1944).

*Counsellor*.—Alexandre Girardet.

*Secretaries*.—Jean de Rham, Eric Kessler and Egbert de Graffenried.

*Military and Air Attaché*.—Captain Charles Schlegel.

*Attachés*.—Roy Hunziker, Georges Perrin and Eric Barbey.

There are Consular representatives at Dublin, Liverpool and Manchester.

#### 2. OF GREAT BRITAIN IN SWITZERLAND.

*Envoy and Minister*.—Clifford John Norton, C.M.G., M.V.O. (appointed March 27, 1942).

*First Secretary*.—D. MacKillop.

*Commercial Secretary*.—W. J. Sullivan, C.B.E.

*Military Attaché*.—Lt.-Col. H. A. Cartwright, M.C.

*Air Attaché*.—Air Commodore F. M. F. West, V.C., M.C.

There are Consuls at Bâle (C.G.), Berne, Geneva, Lausanne and Zurich (C.G.); Vice-Consuls at Lucerne, Lugano, Montreux, Neuchâtel and St. Moritz.

### Statistical and Other Books of Reference concerning Switzerland.

#### 1. OFFICIAL PUBLICATIONS.

*Annuaire Statistique de la Suisse*. Bâle.

*Department of Overseas Trade Reports*. London.

## SYRIA AND LEBANON.

Syria and Lebanon were recognised as independent States to be placed under a Mandatory Power. By decision of the Supreme Council of the Allied Powers at San Remo (April 25, 1920), France was assigned the Mandate for Syria, which was confirmed by the League of Nations on July 24, 1922 (Declaration of London).

On June 8, 1941, Allied Forces marched into Syria, as a counter-stroke to German infiltration, and on July 16 the Vichy forces retired from the country and Syria and Lebanon passed under British and Free French control. On September 27 General Catroux, the Free French Commander-in-Chief, in the name of the Allies, proclaimed the independence of Syria at Damascus. Syria thus became an independent and sovereign State, but the Mandate is still juridically in existence.

The independence of Syria and Lebanon had been generally recognised.

*President of the Syrian Republic.*—Shukri Bey al-Quwatli (elected August 17, 1943).

Lebanon was likewise proclaimed an independent sovereign State at Beirut on November 26, 1941.

*President of the Republic of Lebanon.*—Beshara al-Khoury (elected September 21, 1943).

Elections to the Syrian Parliament were held in July, 1943, and to the Lebanese Parliament on August 30, 1943.

On December 27, 1943, an agreement was signed between representatives of the French National Committee of Liberation and of Syria and Lebanon, by which most of the powers and capacities exercised hitherto by France under mandate were transferred as from January 1, 1944, to the Syrian and Lebanese Governments.

Syria declared war on Germany and Japan on February 26, 1945.

**Area and Population.**—The territory formerly under the French Mandate is bounded by the Mediterranean on the west, by Palestine on the south, by Iraq on the east, and by Turkey on the north.

For details of the frontier between Syria and Iraq and Palestine, see THE STATESMAN'S YEAR-BOOK, 1928, p. 893. The frontier between Syria and Turkey (Nisibin-Jeziret ibn Omar) was settled by the Franco-Turkish agreement of June 22, 1929.

The country was originally organised into 5 territories (*diets*), but since January 1, 1925, two of these, viz. Damascus and Aleppo, were united to form the single State, now the Republic of Syria (Sanjaks of Hama, Homs, Damascus, Hauran, Aleppo, and Deir ez Zor, and the Autonomous Sanjak of Alexandretta, which was formed January 1, 1925). By agreement between France and Turkey in June, 1939, the Sanjak was ceded to Turkey and the territory was formally handed over on July 23, 1939. The territories of the Alawites (formerly Sanjaks of Latakia and Tartus) and of Jebel Druze (south-east of Hauran) were formally incorporated in the Syrian Republic on January 12, 1942, the territory of the Lebanon (Sanjaks of North Lebanon, Mount Lebanon, South Lebanon and Bekaa) forming a separate independent republic. The Lebanon is the south-west portion of geographical Syria, containing the ports of Beirut, Tripoli, Tyre and Sidon, the Lebanon and Anti-Lebanon Mountains, and the fertile Bekaa plain between them.

The total area of Syria and Lebanon may be estimated at 57,900 square miles. The total population of this area (1943) was 3,918,156. The

population of the 4 territories was as follows:—Syria, 2,860,411 (including Latakia, 432,507 and Jebel Druze, 80,128); Lebanon, 1,047,745. Arabic is the prevailing language, with many dialectical varieties. But there is a large influx of foreign elements, including Turks, Turkomans, Kurds, Circassians, Armenians, Persians, Jews, and a certain number of Europeans. The principal towns are Damascus, population 261,010; Aleppo, 257,337; Beirut, 233,970; Tripoli, 71,501; Hama, 64,940; Hama, 60,225; Latakia, 38,500; and Zahlah in Lebanon, 20,096. There are no statistics of births and deaths.

**Religion and Education.**—The population is composed mainly of Moslems, of whom there are 1,514,755. The majority are Sunni Moslems (1,075,816). The Druzes number about 86,125, the Alawiyya 227,930, and Ismailians 14,882. There have been Christians in Syria since the earliest times. They number at present 505,419, of whom 186,676 are Maronites, 66,762 Greek Catholics (Uniates), 7,305 Armenian Catholics (Uniate), 32,859 Armenians, 8,887 Protestants, 28,885 Melkites, and 151,326 belong to the Orthodox Church. There are also 18,526 Jews. There are now one Orthodox, one Gregorian Armenian, one Latin, and three Uniat Patriarchs (Melkite, Syrian and Maronite) of Antioch, none of whom reside in that city. Apart from this there are in French Mandated territory 9 Orthodox Dioceses, one Armenian Uniat Archbishop, six Melkite (Uniat) Archbishops and six Bishops, three Syrian (Uniat) Archbishops, five Maronite (Uniat) Archbishops and four Bishops, one Latin Apostolic Delegate, a Grand Mufti and a Grand Rabbi.

The number of schools in the Republic of Lebanon in 1942 was:—State schools, 267; Moslem schools, 149; Christian schools, 811; private schools, 26 (total, 986); together with 273 French schools, 36 American, 14 British, 1 Danish, 1 Swiss and 1 Greek. The total number of pupils at all these establishments is 138,318.

At Damascus there is a Syrian university (founded June 15, 1928), with (in 1938) a faculty of medicine (122 students), a faculty of law (166 students), pharmacy (10 students), dentistry (37 students), and midwifery (21 students). There is also an Arab Academy, founded in 1913, and amply endowed, and also agricultural colleges at Sélémié and Bekaa.

There are also two universities in Beirut, one French and one American. The American university contains a faculty of medicine and several schools, with a total of 800 students in 1943. The French university (the Catholic university of St. Joseph, founded in 1875) has a faculty of medicine with 226 students, and several schools, total students, 700 in 1943.

**Finance.**—The budget estimates for 1943 balanced at 58,100,500 Syrian pounds (36,680,500 Syrian pounds for Syria alone), as compared with 35,004,500 Syrian pounds in 1942 (22,500,000 Syrian pounds for Syria alone). For 1944 the estimates balance at 48,534,000 Syrian pounds.

**Defence.**—The gendarmeries, which had been increased in number, were in 1943 completely re-equipped with firearms, transport, uniforms and other items.

In the budget for 1945 the Syrian Government allotted 15 million Syrian pounds and the Lebanese Government 5 million Lebanese pounds for the Army.

**Production and Industry.**—Syria is essentially an agricultural country, the bulk of the population being engaged in the cultivation of the soil

and in cattle breeding. The acreage and production of the principal crops in Syria and Lebanon were estimated as follows in 1943:—

|                 | Area under cultivation | Production  |                                  | Area under cultivation | Production  |
|-----------------|------------------------|-------------|----------------------------------|------------------------|-------------|
|                 | Hectares               | Metric tons |                                  | Hectares               | Metric tons |
| Wheat . . .     | 682,022                | 624,280     | Cotton . . .                     | 15,991                 | 3,425       |
| Barley . . .    | 318,460                | 830,485     | Olives . . .                     | 89,763                 | 124,389     |
| Maize . . .     | 21,525                 | 22,482      | Apricots . . .                   | 6,477                  | 82,634      |
| Sorghum . . .   | 96,749                 | 44,246      | Grapes . . .                     | 63,197                 | 292,622     |
| Sesame . . .    | 5,919                  | 4,910       | Figs . . .                       | 11,783                 | 54,178      |
| Chickpeas . . . | 88,163                 | 19,193      | Olives, mandarin and lemon . . . | 5,585                  | 48,352      |
| Lentils . . .   | 60,545                 | 33,866      |                                  |                        |             |
| Hemp . . .      | 5,794                  | 5,936       |                                  |                        |             |

In 1943 there were 2,492,000 sheep, 1,573,000 goats, 54,000 camels, 490,000 cattle, and 287,000 asses.

Syria is poorer in minerals than in other resources, but this may be due to insufficient exploration. Northern Lebanon has been worked for iron in ancient and modern times. At Majerba the ore is rich, and the iron good. There is a comparatively rich mine of lignite in South Lebanon. There are indications of petroleum in various places. The work of laying a pipeline to Tripoli, begun in 1932, was completed on July 14, 1934. There are indications of phosphates, lead, copper, antimony, nickel, chrome; gypsum is widely distributed. There is abundance of marble and good building stone.

The industries of Syria are on a very small scale. Flour, oil, soap, and silk thread are the most important. The chief centres of the silk industry are Beirut, Aleppo, Tripoli, and Latakia. The production of cocoons in 1943 amounted to 1,019 metric tons.

**Commerce.**—The imports in 1943 amounted to 246,171,000 Syrian pounds and the exports to 168,065,000 Syrian pounds. The principal imports in 1943 were (in thousands of Syrian pounds):—food and drink, 81,763; textiles, 41,948; vegetable produce, 38,883; animal produce, 13,363; chemicals, 11,926; metals and metalwork, 2,895. Principal exports were:—textiles, 27,459; fruit and vegetables, 24,323; animal produce, 4,625.

The distribution of trade in 1943 was as follows (in thousands of Syrian pounds):—Imports from Turkey, 99,745; Great Britain, 17,337; United States, 8,705; Iran, 4,710; Japan, 830. Exports to United States, 64,207; Palestine, 28,806; Iraq, 23,968; Great Britain, 6,387; Egypt, 4,513.

According to Board of Trade returns the imports from Syria into Great Britain amounted to 300,030% in 1938, and 396,930% in 1937, while the exports to Syria amounted to 678,726% in 1938, and 838,139% in 1937. Re-exports to Syria from U. K. were 19,322% in 1938, and 20,417% in 1937.

**Communications.**—Most of the ports of Syria are visited regularly by the steamers of various shipping companies. In 1943, 387 vessels of 139,473 tons called at the port of Beirut.

In 1938, the number of postal packets handled on the international service was 32,063,320, and on the inland service, 9,731,300. In 1938 the number of inland telegrams handled was 72,881, of international, 3,062,100 (words). In 1938, there were 15,066 miles of telephone line.

Syria is comparatively well provided with railways, and new lines and

branches are proposed. The following railways are open:—standard gauge from Rayak to Aleppo, 206 miles; Aleppo to Meidan-Ekbes (Turkish frontier), 72 miles; Aleppo to Tel-Kotchek (Iraq frontier), 325 miles; Hama to Tripoli, 63 miles; narrow gauge Beirut to Damascus, 93 miles; Beirut to Mameltein, 11 miles; Damascus to El Hammé, 120 miles. A new railway between Haifa in Palestine and Beirut (148 miles) was opened in August, 1942, and extended to Tripoli (52 miles) in 1943. This makes possible through traffic between Syria and Egypt. There is an air service between Beirut and Cairo and Beirut and Cyprus, and local service (weekly) between Damascus and Bagdad.

**Currency, Banking, Weights and Measures.**—The official currency since May 1, 1920, is the Syrian bank note, issued by the Bank of Syria and the Lebanon. The monetary unit is the Syrian pound, divided into 100 piastres (1 piastre = 20 centimes). Under the Anglo-French Financial Agreement, concluded at Algiers in February 1944, the rate of the Syrian-Lebanese pound was fixed at 8·83 Syrian-Lebanese pounds to the pound sterling.

On April 15, 1943, the notes in circulation amounted to 161,750,000 Syrian pounds in Syria and 110,750,000 in Lebanon. Post and telegraph receipts, 1938, 6,528,200 francs; expenditure, 4,509,400 francs.

The Banque de Syrie et du Liban has the sole right of note issue. The concession is for 25 years by an agreement signed on May 29, 1937. Other banks in operation are the Crédit Foncier de Syrie, the Cie. Algérienne, and the Crédit Foncier d'Algérie et de Tunisie.

A decree dated August 22, 1935, makes the use of the metric system legal and obligatory throughout the whole of the mandated territory. In outlying districts the former weights and measures may still be in use. They are: 1 okiya = 0·47 lb.; 6 okiyas = 1 oke = 2·82 lb.; 2 okes = 1 rotol = 5·64 lb.; 200 okes = 1 kantar.

*British Envoy Extraordinary and Minister Plenipotentiary to Syria and Lebanon.*—Terence Allen Shone, C.M.G. (appointed December 12, 1944).

*Lebanese Minister in London.*—Camille Chamoun (appointed May 22, 1944).

*Syrian Minister in London.*—Dr. Najeel el-Armanazi (presented credentials on February 21, 1945).

## THAILAND.

(PRADIS THAI, OR MUANG-THAI.)

By a notification of the President of the Council of Ministers dated June 24, 1939, the words 'Siam' and 'Siamese' were officially changed to 'Thailand' and 'Thai' respectively. This action brought official nomenclature into conformity with popular usage as the inhabitants of the country, who have always been known as 'Thai' or 'The Free People,' preferred to call their country 'Muang Thai' rather than 'Sayam' or Siam.

## Reigning King.

Ananda Mahidol, born on September 20, 1925, succeeded to the throne on March 2, 1935, on the abdication of his uncle, Prajadhipok (died May 31, 1941).

During the King's minority a Council of Regency has been appointed consisting of Prince Aditya, a nephew of the ex-King; Chao Phya Bijayendra Yodhin, a former General in the Army, and Chao Phya Yomaraj, a former Minister of the Interior. The last-named died in 1938. His seat on the Council of Regency has remained vacant.

## Government.

Until June 24, 1932, the Constitution of Siam was an absolute monarchy. On the date mentioned a *coup d'état* was effected and a Siam Temporary Constitution Act was promulgated on June 27. The temporary constitution was later replaced by a permanent constitution, which was signed by the late King on December 10, 1932. Under this constitution supreme power belongs to the nation, and the King, who is the head of the nation, exercises the legislative power by and with the advice and consent of the Assembly of the People's Representatives, and the executive power through the State Council, which is composed of 14 to 24 members. The president and 14 members of this Council are selected from the Assembly. Of the Assembly one-half are nominated by the King and the other half elected by popular vote for four years. This system of election was to last for not more than ten years, after which all the members will be elected by the people. The last Assembly was dissolved in September, 1938, and the general elections took place in November, 1938. Men and women over 20 years of age enjoy the franchise.

The State Council, appointed by the King, is charged with the duty of conducting the government of the State. The Ministries are under the charge of State Councillors, appointed March 11, 1942.

*President of the State Council (Premier), Minister of Defence and Minister of Foreign Affairs.*—Field Marshal Luang Pibul Songgram.

There are 8 other Ministers with Portfolios and 14 Ministers without Portfolios.

For purposes of administration Thailand is divided into 70 *changwads* or provinces, each under the control of a Commissioner who is directly responsible to the Minister of the Interior. The *Changwads* are subdivided into 406 Districts (*Amphurs*) and 5,087 Communes (*Tambols*). Local legislative and executive bodies with limited powers are being established with functions, procedure, and method of election closely modelled on those of the central People's Assembly.

In November, 1936, Siam denounced all her existing treaties with foreign powers and new treaties were concluded and later ratified with those powers, namely, Switzerland, Belgium, Sweden, Denmark, United States of America, Norway, Great Britain, Italy, France, Japan, Germany, the Netherlands and Portugal. By these new treaties Siam regained her full juridical and fiscal autonomy.

On June 12, 1940, Thailand concluded a Non-Aggression Pact with Great Britain and with France at Bangkok. The Non-Aggression Pact between Thailand and Great Britain was ratified at Bangkok on July 2, 1940.

By a Peace Convention, signed at Tokyo on May 9, 1941, between Thailand and French Indo-China, the claims of the former were settled by the cession of Indo-Chinese territory to Thailand, including that part of the Laos Province west of the Mekong River, three-quarters of the Campong-Thom Province as well as territory in northern Cambodia, where the new border would run through Battambang and Siemreap.

On December 21, 1941, a ten-year Treaty of Alliance was signed at Bangkok between Thailand and Japan, by which Thailand agreed to assist Japan against the Allies. On January 25, 1942, Thailand declared war on Great Britain and the United States.

On July 5, 1943, Japan announced that it had ceded to Siam six of the States of Malaya (Perlis, Kedah, Kelantan and Trengganu) and Burma (two of the Shan States, Kentung and Mong Pan). The four Malay States were ceded to Britain by Siam in 1909. (See under UNFEDERATED MALAY STATES, p. 192.) Their combined area is 14,770 square miles, and their population 1,100,000. The area of the Shan States is 60,000 square miles, and their population (1941) 1,770,000.

## Area and Population.

The area of Thailand is 200,148 square miles, about 45,000 square miles being in the Malay Peninsula. The first detailed census was taken in 1905, but included only 12 of the circles or Monthons. The first census of the whole country was taken in 1909.

The census taken on May 23, 1937, gave a population of 14,464,489 (as compared with 11,506,207 at the census taken on July 15, 1929). Estimated population, March 31, 1940, 15,718,000.

From 1945 Bangkok, the present capital, will be the commercial capital; the new capital will be Saraburi, 108 miles north-east of Bangkok.

### Religion and Education.

The prevailing religion is Buddhism. In 1937 there were 13,752,091 Buddhists, 626,907 Mohammedans, 69,227 Christians and 15,880 others. In 1938-39, there were 18,416 Buddhist temples and 140,744 priests.

Primary education is compulsory and, in the local public and municipal schools, free.

On March 31, 1939, Government schools numbered 429, with 42,180 boys and 19,117 girls, and with 2,565 male and 1,061 female teachers. Local public schools numbered 10,768, with 714,521 boys and 611,370 girls, and with 28,607 male and 3,601 female teachers. Municipal schools numbered 304, with 30,410 boys and 28,182 girls, and with 1,054 male and 590 female teachers. Private schools numbered 1,308, with 78,037 boys and 43,928 girls, and with 3,277 male and 2,319 female teachers, including schools connected with American, French and English Missions. Over 77 per cent. of local schools and 23 per cent. of the Government schools are situated in the monasteries.

The Chulalankarana University was founded at Bangkok in 1917, and the University of Moral and Political Sciences in June, 1934.

The estimated expenditure for 1941 of the Education Department of the Ministry of Public Instruction amounts to 1,429,572.

### Finance.

Revenue and expenditure for four financial years (£1 = 11 ticals):—

| Year.                | Revenue.   | Expenditure.            | Year.                | Revenue.   | Expenditure.            |
|----------------------|------------|-------------------------|----------------------|------------|-------------------------|
|                      | £          | £                       |                      | £          | £                       |
| 1937-38 <sup>1</sup> | 9,947,319  | 9,239,382               | 1939-40 <sup>2</sup> | 11,278,249 | 11,278,059 <sup>4</sup> |
| 1938-39 <sup>3</sup> | 10,701,087 | 10,064,915 <sup>4</sup> | 1941 <sup>5</sup>    | 12,542,615 | 13,418,100 <sup>6</sup> |

<sup>1</sup> Years end on March 31.

<sup>2</sup> Budget Estimates, excluding capital expenditure, 2,139,698.

<sup>3</sup> Until 1939 the Thai financial year commenced on April 1 and ended March 31. In that year it was decided that for the future, the financial year should begin on October 1 and end September 30 following. Provision for the intervening six months (April to September inclusive) was made by a supplementary budget of a formal character based upon expenditure and revenue over the previous twelve months.

<sup>4</sup> Budget Estimates, excluding capital expenditure, 2,080,851.

<sup>5</sup> Year begins on January 1.

<sup>6</sup> Excluding estimated capital expenditure of 5,139,698.

On September 30, 1941, the National Debt was as follows:— 4½ per cent. Loan of 1907, 886,200/; 4 per cent. Loan of 1909, 1,950,388/; 4 per cent. Conversion Loan of 1936, 2,141,400/. Interval Loans amounted to 24,707,100 bahts.

### Defence.

Under the Military Service Act which came into force on June 1, 1937, every able-bodied man between the ages of 18 and 30 was liable to serve two years with the colours; seven years in the first reserve; ten years in the second reserve; six years in the third reserve.

The Army was organized in 26 infantry battalions, 4 cavalry regiments and 1 cavalry squadron, 1 anti-aircraft regiment (consisting of 3 battalions), 9 groups of artillery and 2 battalions of engineers.

The Air Force consisted of 5 wings.

The Thai Navy has been more than doubled in strength. It includes 2 sea gunboats, 4 coast defence gunboats, 3 sloops, 1 destroyer, 7 sea-going torpedo-boats, 3 small torpedo-boats, 8 motor torpedo-boats, 4 submarines, 2 minelayers and 11 transport vessels. Most of these vessels are quite

modern, the majority having been built in Italy or Japan. 2 cruisers of 4,200 tons, under construction at Trieste, were appropriated by the Germans in 1943. The personnel, which formerly numbered about 5,000 on the active list, has been increased to a corresponding extent.

At the mouth of the Ménam River are the Paknam forts. The bar prevents ships of more than 13 feet draught from ascending to Bangkok. A project for dredging the bar is now being put into operation. A dredger having been brought from Holland for this purpose, it was hoped to cut a channel which will eventually be 26 feet deep. The naval dockyard has recently been reconstructed and a large new graving dock is under consideration.

Expenditure on Defence for 1941 was budgeted at Ta.59,658,822.

### Production and Industry.

According to the 1937 census 83.35 per cent. of the occupied persons (6,028,795) were engaged in agriculture and in fishery, 1.90 per cent. in industrial pursuits.

The chief produce of the country is rice, which forms the national food and the staple article of export. The figures of the rice crop are as follows: 1939-40, area 8,659,711 acres, yield 4,560,463 tons; 1940-41, area 9,517,453 acres, yield 4,923,350 tons.

The harvested area and yield of certain other crops in 1937-38 was as follows:—coconuts, 123,806 acres, 160,094,599 nuts; tobacco, 30,836 acres, 153,008 piculs; pepper, 1,285 acres, 3,250 piculs; cotton, 19,242 acres, 118,047 piculs. The live-stock on March 31, 1938, consisted of 10,970 elephants, 335,565 horses and ponies, 5,711,720 bullocks, and 5,551,232 buffaloes.

Much of Upper Thailand is dense forest, and the cutting of teak is an important industry, almost entirely in British hands. Thai teak wood is mainly produced in the north of Thailand, the dry logs being floated by river to Bangkok during the rainy months of the year. In B.E. 2482 (1939-40) teak-wood exported through the port of Bangkok, mostly in converted form, together with that exported through the Me Khong river to French Indo-China and the Salween river to Lower Burma, all in the log form, amounted to 804,968/ in value.

Rubber-planting in Southern and Eastern Thailand continues to progress; in B.E. 2482 (1939-40), 42,181,193 kilogrammes of raw rubber, valued at 2,742,426/., were exported from Thailand; in B.E. 2483 (April to December, 1940), the exports were 30,024,148 kilogrammes, valued at 2,410,321/.

The mineral resources are extensive and varied, including cassiterite (tin ore), wolfram, scheelite, antimony, coal, copper, gold, iron, lead, manganese, molybdenum, rubies, sapphires, silver, zinc and zircons. By far the most important are tin and wolfram, which are now being mined on a commercial basis. The total output of metallic tin in 1936-37 was 221,532 piculs; in 1937-38, 265,020 piculs; in 1938-39, 244,737 piculs, and in 1939-40, 276,079 piculs.

### Commerce.

The foreign trade of the kingdom for four years is as follows:—

| Year.       | Imports.   | Exports.   | Year.       | Imports.   | Exports.   |
|-------------|------------|------------|-------------|------------|------------|
|             | £          | £          |             | £          | £          |
| 1936-37 . . | 10,065,968 | 16,760,105 | 1938-39 . . | 11,784,611 | 13,583,836 |
| 1937-38 . . | 10,165,662 | 15,408,437 | 1939-40 . . | 17,698,721 | 19,660,714 |

Total trade between Thailand and United Kingdom for 5 years (Board of Trade returns):—

|                                    | 1934      | 1935      | 1936      | 1937      | 1938      |
|------------------------------------|-----------|-----------|-----------|-----------|-----------|
|                                    | £         | £         | £         | £         | £         |
| Imports into United Kingdom . . .  | 153,548   | 112,891   | 317,105   | 339,955   | 371,506   |
| Exports from United Kingdom . . .  | 1,079,181 | 1,196,797 | 1,156,765 | 1,012,568 | 1,198,087 |
| Re-exports from United Kingdom . . | 6,865     | 7,998     | 7,871     | 11,462    | 15,014    |

### Shipping and Communications.

In 1939-40, 960 vessels of 1,425,989 tons entered, and 961 of 1,429,177 tons cleared the port of Bangkok. Of those entering 199 (278,699 tons) and of those clearing 199 (278,699 tons) were British.

On June 30, 1939, Thailand had 14 vessels of 9,186 tons.

On March 31, 1940, there were 3,100 kilometres (1,925 miles) of State Railways open to traffic and 181 kilometres (112 miles) were under construction. The Northern Line runs from Ban Paji to Chiangmai (410 miles), the extreme northern terminus. The Southern Line (615 miles) runs from Bangkok down the Peninsula to the frontier station of Padang Besar, where it connects with the Federated Malay States Railway from Penang, and to Singapore. Another line (134 miles) branching off from Haad Yai on the Southern Line runs along the East Coast of the Peninsula to Sungai Golok, where it connects with the Federated Malay States Line. There are branch lines (totalling 97.5 miles) to Songkhla, Nakorn-Sritamaraj and Kantang. The extension of the North-Eastern Line (164 miles) from Korat to Khonkaen has been completed and is open to traffic (115 miles). An extension of 75 miles from Khonkaen to Udorn was opened to traffic on June 24, 1941. The Korat-Ubol Line (194 miles) has now been completed and opened to traffic to Warindra, the station for Ubol, 357 miles distant from Bangkok. The extension from Krabinburi to Aranya Pradesa on the Cambodian frontier (58 miles) was completed in 1926, making a total length of 158 miles. The Northern and Southern Railway systems are linked together by means of a railway bridge over the Menam Chao Phya (opened January 1, 1927), and both systems terminate in the central railway station of Hua Lampong. All State Railways are under one management. Gross receipts of the State Railways in 1939-40 (April-March) were 17,831,254 ticals; working expenses, 8,199,470 ticals; contribution to Renovation Fund, 1,007,000 ticals, and net profits, 8,624,000 ticals (approx.). The number of passengers carried (1939-40) was 6,949,430, and the total amount of goods carried was 1,826,896 tons (not including package traffic).

On October 1, 1939, the length of highways open to traffic was 4,865 kilometres, of which 189 kilometres were first-class roads, 149 kilometres were second-class and 3,487 kilometres were third-class. In addition there were 1,090 kilometres of provincial highways, particularly in the North-Eastern provinces.

Two new air lines were inaugurated on June 24, 1940, by the Aerial Transport Company Limited, a company under Government control, viz. Chiangmai-Meh Sarieng (130 kilometres) and Bangkok-Puket (750 kilometres), shortening the usual time for journey from 7 and 3 day to 1 and 7 hours respectively.

In 1938 there were 792 post offices of which 346 were licensed or

contract post offices, and 323 railway station offices. The volume of mail matter dealt with during 1937-38 aggregated 42,147,966 pieces. The value of inland money orders issued was 13,143,720 baht; foreign money orders issued, 85,767 baht; foreign money orders paid, 93,668 baht.

There were (1938) 792 telegraph offices. Number of inland telegrams (1937-38) was 788,514; foreign messages sent, 83,478; foreign messages received, 113,408; length of line, 9,432 kilometres.

Three wireless stations on the Telefunken system have been erected, one at Bangkok, one at Songkhla, and one at Koh-Khan. The two last-named are under the control of the Thai naval authorities, the first under that of the Government Publicity Department.

A new high-powered station, also on the Telefunken system, has been erected at Bangkok, and was opened on January 15, 1929.

### Money, Weights and Measures.

In Bangkok there were, before the Japanese penetration, branches of the Hong Kong and Shanghai Banking Corporation, the Chartered Bank of India, Australia and China, the Banque de l'Indo-Chine, and the Mercantile Bank of India. A branch of the Yokohama Specie Bank was opened in Bangkok in 1936. A number of Chinese Banks have established branches here during recent years. There is also a branch of the Chartered Bank of India, Australia and China at Phuket. A Thai bank, with an American manager, was established under Royal Charter in 1906, with the name of the Siam Commercial Bank, Limited. This has now changed its name to the Thai Commercial Bank, Limited. A Bank of Asia for Industry and Commerce, Limited, was recently established, and the Government is now considering the foundation of a National Bank, a National Banking Bureau being already in the process of formation. It now has branches at Chiangmai and Nakorn Lampang in Northern Thailand.

On April 1, 1913, the Thai Government Savings Bank was opened with 529 depositors. By December 31, 1940, the number was 143,284, with a total deposit of 1,484,470.

Under the Currency Act of April, 1923, the unit of currency is the *baht*, divided into one hundred *satang*. The *baht* is equivalent to 0.66567 grammes of fine gold, corresponding to a rate of 11 *bahts* for 12 sterling. It is more generally referred to in English as the *tical*. Thailand departed from the gold standard on May 11, 1932, and the circulation medium is almost entirely paper. Other silver coins are 50 *satang* and 25 *satang* pieces. The 10 and 5 *satang* pieces are nickel, and the 1 *satang* piece, bronze. Notes and *baht* coins are legal tender without limit as to amount; 50 and 25 *satang* pieces are legal tender up to 5 *baht*, and nickel and bronze coins legal tender up to 1 *baht*. Half *satang* pieces were introduced in 1937.

The Government in 1902 began to issue currency notes (5, 10, 20, 100 and 1,000 bahts, and since October, 1918, 1 baht notes). On July 31, 1941, the net circulation (viz. total issue less notes held in Government treasuries) of notes was baht 225,709,717; against these there was a reserve of baht 250,192,580, composed as follows (in baht):—sterling securities, 41,046,170; cash at call and seven days, 111,277,757; gold bullion, 97,279,000; baht coin (bullion value), 589,653.

The metric system was made compulsory, by a law promulgated on December 17, 1923. The actual weights and measures prescribed by law are: units of weight:—1 *Standard Picul* = 60 kilograms; 1 *Standard Catty* (1/100 Picul) = 600 grammes; 1 *Standard Carat* = 20 centigrammes. Units of length:—1 *Sen* = 40 metres; 1 *Wah* (1/20 Sen)

= 2 metres; 1 *Sawk* (1/4 *Wah*) = 0.50 metre; 1 *Keup* (1/4 *Sawk*) = 0.25 metre. Units of square measure:—1 *Rai* (1 square *Sen*) = 1,600 sq. metres; 1 *Ngan* (1/4 *Rai*) = 400 sq. metres; 1 *Sq. Wah* (1/100 *Ngan*) = 4 sq. metres. Units of capacity:—1 *Standard Kwie* = 2,000 litres; 1 *Standard Ban* (1/2 *Kwie*) = 1,000 litres; 1 *Standard Sat* (1/50 *Ban*) = 20 litres; 1 *Standard Tanan* (1/20 *Sat*) = 1 litre.

Legislation passed in 1940 provided that the Thai calendar year shall coincide with the Christian year, and that the year of the Buddhist era 2484 shall begin on January 1, 1941. (The Thai New Year's Day was previously April 1.)

### Diplomatic and Consular Representatives.

On January 25, 1942, Thailand declared war on Great Britain; diplomatic relations between the two countries are accordingly severed.

## TURKEY.

(TÜRKİYE CUMHURİYETİ.)

In November, 1922, a change of capital importance took place in the internal economy of Turkey. Up to that time Constantinople (now called Istanbul) continued to be the residence of the Sultan, and a Government deriving its authority from him still existed there. This Government, however, exerted no effective power outside Constantinople, together with a small adjacent area and another small area adjoining Çanakkale on the Dardanelles. Except for the small areas mentioned above, the whole of Asia Minor was under the authority of the *de facto* Government set up at Angora (now called Ankara) in April, 1920, under the name of the 'Government of the Grand National Assembly of Turkey.' On November 1, 1922, the Grand National Assembly voted a resolution declaring that the office of Sultan had ceased to exist and providing that the office of Caliph, which had hitherto been vested in the person of the Sultan, should be filled by election from among the Princes of the House of Osman. Previous to this the Angora Government had made preparations not only to take delivery of Eastern Thrace from the Greek occupying authorities in accordance with the military Convention concluded at Mudanya on October 11, 1922, but also to take over the administration of Constantinople when- ever an opportunity offered. On November 4, 1922, the administration of Constantinople passed into the hands of the Angora Government. The same day the Grand Vizier, Tewfik Pasha, presented the resignation of the Constantinople Cabinet to the Sultan. The Sultan himself, on November 17, left Constantinople in secret. Nearly a whole year was, however, to elapse before the decisive step of proclaiming a Republic was taken. On October 29, 1923, the national leader, Gazi Mustafa Kemal Pasha, who had been born in 1881, was elected first President of the Turkish Republic, and at Salonica in 1881, was elected first President of the Turkish Republic, and the revolution was complete when, on March 2, 1924, the Grand National Assembly decided upon the abolition of the Turkish Caliphate, a decision which was immediately followed by the expulsion from Turkey of all the members of the House of Osman, at the same time depriving them of their Turkish citizenship. On November 1, 1927, Mustafa Kemal Pasha (Kemal Atatürk) was re-elected President of the Republic by the unanimous vote of the new Assembly which met on that day. On the death of Kemal Atatürk, on November 9, 1938, İsmet İnönü (born 1881), who had been Premier for 12 years, was nominated second President of the Turkish Republic.

*President of the Republic.*—General İsmet İnönü (elected November 11, 1938; re-elected March 8, 1943).

In December, 1934, a law was passed giving the first President of the Republic the family name of Atatürk. The titles Pasha, Bey, Effendi, Hazretleri (Excellency), etc., were abolished about the same time. Every Turkish citizen is now obliged by law to adopt a family name.

By a decision of the Grand National Assembly on October 13, 1923,

Ankara was declared to be the capital of Turkey. All central departments of state are now established there.

The Eastern (Saadabad) Pact which was signed on July 8, 1937, between Turkey, Persia, Afghanistan and Iraq, was automatically renewed to continue until June 25, 1948.

Turco-Russian relations are governed by the following acts: (1) the treaty of Neutrality, Non-Aggression, and International Co-operation which was signed on December 17, 1925, for 10 years and was later extended till 1946; this treaty was supplemented by the protocol signed on October 30, 1931, under which each of the two signatories undertook not to sign any political treaty with any country which was a neighbour of the other signatory, without previous consultation; (2) the Turco-Russian declaration of March 25, 1941, whereby the two countries, reaffirming their loyalty to the pact of non-aggression, pledged themselves, in case one of them were attacked, to maintain an attitude of complete neutrality; (3) the joint declaration made in August, 1941, by Britain and Russia to Turkey whereby they gave to this country solemn assurances to respect her territorial integrity.

On August 2, 1944, Turkey broke off diplomatic relations with Germany, and on January 3, 1945, with Japan. On February 23, 1945, she declared war on Germany and Japan.

### Constitution and Government.

For a list of the former sovereigns of Turkey and an account of the older constitutions of the country, see THE STATESMAN'S YEAR-BOOK for 1923, p. 1380.

The Grand National Assembly of Angora voted, on January 20, 1921, a Fundamental Law which introduced constitutional changes of the most radical kind. It declared that all sovereignty belonged to the people, and that all power, both executive and legislative, was vested in the Grand National Assembly as being the sole representative of the people. The old name 'Ottoman Empire' was discarded in favour of the designation 'Turkey.' No provision was made for a Senate. It was laid down that the members of the Grand National Assembly should be elected for a period of two years, and that the Assembly should delegate its executive powers to a certain number of Vekils or Commissioners. The mode of effecting this delegation of power varied somewhat, and ultimately at the beginning of 1924 circumstances necessitated a further revision of the Constitution. This was effected by the law of April 20, 1924, in the first articles of which the Turkish State was declared to be a Republic, the religion of which was Islam, the official language Turkish and the capital Ankara. The new law provided for the election of the Assembly every four years, while according to article 7 'the Assembly exercises the executive power through the President of the Republic elected by itself and through the Council of Ministers chosen by him,' with the proviso that the Assembly may at any time control the actions of the Government and at any time dismiss it.

On December 6, 1934, the Grand National Assembly in Ankara (the *Kamutay*) altered Articles X and XI of the Constitution so as to permit all Turkish men and women to vote in legislative elections at the age of 23 and to become Deputies at the age of 31.

The new law also provided that the President of the Republic should be chosen from among the deputies constituting the National Assembly, and that his term of office should be identical with the life of each Assembly.

On February 5, 1937, the *Kamutay* agreed to the establishment of the principles of the Republican People's Party—namely, nationalism, democracy,

evolutionism (dynamism or adaptation to circumstances), laicism (separation of State and religion), and 'statism' (State ownership or control of the principal means of communications, industries, mines and public utility services)—as part of the Constitution of the Republic. This virtually recognises only one party in the State and establishes a form of State Socialism.

The present Cabinet, formed on March 11, 1943, is constituted as follows:—

*President of the Council.*—Şükrü Saracoğlu.

*Minister of National Defence.*—General Ali Rıza Artunkal.

*Minister of Justice.*—Ali Rıza Türel.

*Minister of Interior.*—Hilmi Ural (May 20, 1943).

*Minister of Foreign Affairs.*—Hasan Saka (September 14, 1944).

*Minister of Finance.*—Nurallah Esat Sumar (September 14, 1944).

*Minister of Education.*—Hasan Ali Yucel.

*Minister of Communications.*—General Ali Fuat Cebesoy.

*Minister of Public Works.*—Sirri Day.

*Minister of Agriculture.*—Şevket Hatipoğlu.

*Minister of Public Health.*—Dr. Hulusi Alataş.

*Minister of Customs and Monopolies.*—Suat Hayri Urganlı.

*Minister of National Economy.*—Fuat Sirmen.

*Minister of Commerce.*—Celal Salt Siren.

The *Kamutay* which was elected on February 28, 1943, consists of 455 deputies, all members of the Popular Party.

### LOCAL GOVERNMENT.

The Fundamental Law, voted at Angora in January, 1921 (see above), altered the system in force up to 1920 by providing that the country should be divided into Vilâyet (now 63 in number), sub-divided into Kazas, sub-divided in their turn into Nahiyes. At the head of each Vilâyet is a Vali representing the Government. The system aimed at is one of centralisation. Each Vilâyet has an elective council of its own. The *Kaza* is regarded as a mere grouping of Nahiyes for certain purposes of general administration. The Nahiye or commune is an autonomous entity and possesses an elective council charged with the administration of such matters as are not reserved to the State.

According to the municipal law passed in 1930 Turkish women have the right to be electors and to be elected at municipal elections.

### Area and Population.

The Treaty of Peace between the Allied Powers and Turkey which was signed at Lausanne on July 24, 1923, defined the European frontier of the new Turkey and to some extent her Asiatic frontiers. This Treaty was ratified by the Grand National Assembly on August 23, 1923, and entered into force August 6, 1924, on its ratification by three of the four Allied Powers.

The Treaty of Lausanne and the Conventions attached to it provided for the demilitarisation of zones adjoining the European frontier, the Dardanelles and the Bosphorus, subject to the right to maintain a garrison at Constantinople, for the demilitarisation of Imbros, Tenedos and Rabbit Islands as well as the islands in the Sea of Marmara with one exception, and for a special administrative régime in Imbros and Tenedos.

On July 20, 1936, a new Straits Convention was signed at Montreux (ratified on November 9, 1936) to take the place of the 1923 Convention,

whereby Turkey obtained the right of re-militarizing the zone of the Straits, and this area was re-occupied by troops on July 21, 1936. The International Commission of the Straits ceased to function on September 30, 1936.

By an agreement between the Turkish and French governments concluded at Angora on June 23, 1939, the Sanjak of Alexandretta (the Hatay) was incorporated in the territory of the Turkish republic. Its population is 273,850.

The area of the Republic of Turkey was 767,119 square kilometres or 296,107 square miles.

Area of Turkey in Europe, 23,975 square kilometres; population, 1940, 1,516,005. Area of Turkey in Asia, 738,761 square kilometres; population, 1940, 16,304,074.

The population of Turkey is given as follows:—

| Census           | Males     | Females   | Total      | Increase per cent |
|------------------|-----------|-----------|------------|-------------------|
| October 28, 1927 | 6,568,879 | 7,084,391 | 13,648,270 | —                 |
| October 20, 1935 | 8,045,500 | 8,820,575 | 16,866,075 | 18.4              |
| October 20, 1940 | 8,898,912 | 8,922,088 | 17,820,950 | 10.6              |

As a result of several earthquake shocks in December, 1939, and January, 1940, it was estimated that 32,741 people lost their lives.

The population of the vilayets, at the census of October 20, 1940, was given as follows (revised figures):—

|                           |         |                           |         |                      |         |
|---------------------------|---------|---------------------------|---------|----------------------|---------|
| Afyon . . .               | 316,034 | Erzincan . . .            | 158,498 | Manisa . . .         | 455,812 |
| Agri (Karaköse) . . .     | 121,477 | Erzurum . . .             | 371,894 | Maras . . .          | 202,073 |
| Amasya . . .              | 136,029 | Eskişehir . . .           | 206,794 | Mardin . . .         | 252,505 |
| Ankara (Angora) . . .     | 602,965 | Gaziantep . . .           | 306,906 | Mugla . . .          | 211,445 |
| Antalya . . .             | 256,366 | Giresun . . .             | 279,238 | Muş . . .            | 73,939  |
| Aydın . . .               | 281,784 | Gümüşhane . . .           | 181,290 | Niğde . . .          | 275,443 |
| Balıkesir . . .           | 482,827 | Hakkari (Gölemerik) . . . | 36,446  | Ordu . . .           | 305,017 |
| Bilecik . . .             | 127,977 | Hatay (Antakya) . . .     | 246,188 | Rize . . .           | 172,764 |
| Bitlis . . .              | 68,825  | İcel (Mersin) . . .       | 257,709 | Samsun . . .         | 368,384 |
| Bingöl . . .              | 70,164  | Istanbul . . .            | 991,237 | Seyhan (Adana) . . . | 375,777 |
| Bolu . . .                | 257,393 | Izmir (Smyrna) . . .      | 640,107 | Siirt . . .          | 146,622 |
| Burdur . . .              | 119,498 | Isparta . . .             | 171,751 | Sinop . . .          | 190,844 |
| Bursa . . .               | 461,648 | Kars . . .                | 356,534 | Sivas . . .          | 468,243 |
| Canakkale . . .           | 804,588 | Kastamonu . . .           | 369,847 | Tekirdağ . . .       | 209,888 |
| Çankiri . . .             | 183,782 | Kayseri . . .             | 342,969 | Tokat . . .          | 317,919 |
| Çoruh (Artvin) . . .      | 153,273 | Kırklareli . . .          | 256,353 | Trabzon . . .        | 390,735 |
| Çorum . . .               | 302,745 | Kırşehir . . .            | 149,518 | Tunceli . . .        | 94,659  |
| Denizli . . .             | 285,225 | Kocaeli (İzmit) . . .     | 375,530 | Urfa . . .           | 245,598 |
| Diyarbakir . . .          | 357,821 | Konya . . .               | 620,936 | Van . . .            | 112,975 |
| Edirne (Adrianople) . . . | 251,378 | Kütahya . . .             | 359,890 | Yozgat . . .         | 276,611 |
| Elâzığ . . .              | 190,366 | Malatya . . .             | 418,373 | Zonguldak . . .      | 349,763 |

The populations of the principal towns was given as follows (census October 20, 1940):—

|                                 |         |                           |        |                           |        |
|---------------------------------|---------|---------------------------|--------|---------------------------|--------|
| Istanbul (Constantinople) . . . | 798,949 | Konya . . .               | 56,465 | Malatya . . .             | 36,292 |
| Izmir (Smyrna) . . .            | 183,762 | Kayseri . . .             | 52,467 | Urfa . . .                | 35,266 |
| Ankara (Angora) . . .           | 157,242 | Erzurum . . .             | 47,613 | Trabzon (Trebizond) . . . | 32,789 |
| Adana . . .                     | 88,119  | Edirne (Adrianople) . . . | 45,680 | Mersin . . .              | 30,007 |
| Bursa (Brusa) . . .             | 77,598  | Diyarbakir . . .          | 42,555 | Zonguldak . . .           | 27,972 |
| Eskişehir . . .                 | 60,742  | Sivas . . .               | 41,730 | Maras . . .               | 27,744 |
| Gaziantep . . .                 | 57,132  | Manisa . . .              | 37,623 |                           |        |
|                                 |         | Samsun . . .              | 37,216 |                           |        |

According to the census of 1935, the foreign population was as follows:—Albanian, 1,349; American, 396; Austrian, 1,057; Belgian, 205; British, 2,802; Bulgarian, 2,599; Czechoslovak, 723; Dutch, 246; Egyptian, 112; French, 2,017; German, 2,151; Greek, 17,642; Hedjaz, 18; Hungarian, 1,078; Iraqi, 67; Iranian, 4,083; Italian, 7,560; Palestinian, 28; Polish,

520; Rumanian, 729; Russian, 1,620; Serbian, 3,070; Spanish, 698; Swiss, 352; Syrian, 506; other nationalities, 599; undeclared, 1,324.

The Moslem population of Turkey has suffered greatly from the effects of the Great War. It comprises besides the Turks of Asia Minor a considerable number of Kurds in the Eastern provinces, Lazes in the Eastern section of the Pontic coast, and a few Circassians. There is a fairly considerable but diminishing Jewish element in the towns. There has of late been a considerable immigration of Turks from Rumania, Bulgaria and Yugoslavia, the majority of whom are being settled in Thrace.

## Religion.

Although Islam is no longer recognised as the religion of the State, Moslems form the vast majority of the population of the new Turkey. Turkish has been to some extent substituted for Arabic as the liturgical language in all mosques. Under the old imperial system the non-Moslem communities were recognised as organised communities or *millet*s, the heads of which exercised not only spiritual but civil functions. The scope of these civil functions varied. They were in some cases, and more especially in that of the Ecumenical Patriarch, of considerable importance. The Treaty of Lausanne has deprived the spiritual heads of the communities of their administrative prerogatives, and their authority is now purely ecclesiastical.

Istanbul is the seat of the Ecumenical Patriarchate, who is the head of the Orthodox Church in Turkey. The Armenian Church (Gregorian) is ruled by a Patriarch in Istanbul who is subordinate to the Katholikos of Etchmiadzin. The Uniat Armenian Church is ruled by the Patriarch of Cilicia. The Chaldeans (Nestorian Uniates) have one Bishop at Mardin. The Syrian Uniates have a See of Mardin and Amida, but it is united with their Patriarchate of Antioch, whose incumbent resides in Damascus. The Greek Uniates (Byzantine Rite) have as their Ordinary in Istanbul the Titular Bishop of Gratianopolis. The Latins have an Apostolic Delegate in Istanbul and an Archbishop in Smyrna, but their Patriarch of Istanbul is titular and non-resident. There is a Grand Rabbi (Hahambaşı) in Istanbul for the Jews, who are nearly all Sephardim.

According to the census of October 20, 1935, there were in Turkey 15,838,673 Moslems, 125,046 Orthodox, 78,730 Jews, 44,526 Gregorians, 32,155 Roman Catholics, 11,229 Armenians, 8,486 Protestants, 12,965 adherents of other religions, 559 without religion, and 356 undeclared.

On April 10, 1928, the Grand National Assembly passed a law amending the Organic Statute in such a way that Islam ceased to be the State religion of the Republic. An oath of allegiance to the Republic, taken by the President and Deputies, took the place of the former religious formula.

A law passed in December, 1934, forbids the wearing of clerical garb except in places of worship and during Divine service. An exception is made for one representative of each religion or sect. This law applies to foreigners as well as to Turkish citizens.

## Education.

According to the census of October 20, 1935, only 2,517,878 of the population were literate in Latin characters. Only 23.3 per cent. of the male population and 8.2 per cent. of the female population could read and write. In Turkey, elementary education is nominally obligatory for all children

of both sexes. According to the Provisional Law of October 6, 1918, all children from 7 to 16 are to receive primary instruction, which may, however, be given in State schools, schools maintained by communities, or private schools, or, subject to certain tests, at home. The State schools are under the direct control of the Ministry of Public Instruction. They include not only primary schools, but also secondary schools, 'preparatory' schools (for students intending to enter higher schools), and a certain number of lycées or secondary schools of a superior kind. There are also training schools for male and female teachers, and a certain number of higher technical schools, besides the University of Istanbul, founded in 1900 and completely reorganised in 1933. Number of students, 1941-42: men, 6,607; women, 2,106. Number of teachers, 1941-42, 316 (57 women). The important non-Moslem communities in Istanbul maintain their own schools, which, like all 'private' schools, are subject to the supervision of the Ministry of Public Instruction.

The following table gives statistics of education for 1941-42:—

|                                                            | Number | Teachers |        | Students |         |
|------------------------------------------------------------|--------|----------|--------|----------|---------|
|                                                            |        | Male     | Female | Male     | Female  |
| Primary Schools . . . . .                                  | 10,948 | 15,858   | 6,185  | 650,455  | 289,374 |
| Secondary Schools . . . . .                                | 152    | 2,345    | 1,555  | 68,555   | 26,087  |
| Lycées . . . . .                                           | 52     | 1,090    | 478    | 21,550   | 6,087   |
| Normal Schools . . . . .                                   | 80     | 316      | 161    | 8,094    | 2,813   |
| Professional Schools . . . . .                             | 81     | 807      | 370    | 9,122    | 3,666   |
| The University and Higher Education Institutions . . . . . | 30     | 738      | 108    | 11,779   | 3,009   |
| Total . . . . .                                            | 11,413 | 20,999   | 8,855  | 769,555  | 331,706 |

Total expenditure on education in 1941-42, £T41,046,894.

A general tendency had been manifested since 1926 to introduce the use of the Latin alphabet in Turkey. A Commission was formed to study the question, and on November 1, 1928, the Grand National Assembly voted a law for the adoption of Latin characters in Turkey. This law decreed the use of Latin characters obligatory in the case of all correspondence in Public Departments as well as all companies, societies and private offices, newspapers, cinemas and advertisements as from December 1, 1928. The publication of books in Arabic characters was forbidden after January 1, 1929, and the employment of the new alphabet became general throughout Turkey in 1930.

Previous to this important reform the Grand National Assembly had also adopted the bill introducing the numeral system as used in European countries.

### Justice.

Since the beginning of the work of secularisation some years ago, nothing now remains of the old Ottoman laws based on the religious principles. The Turkish Government began by suppressing the religious Courts (Sheri) in 1924, in order to obtain this result. The system which was thus unified consists of (1) *juges de paix* (single judges with limited but summary penal and civil jurisdiction); (2) *tribunaux de base* (a president and two assistant judges with wider powers); (3) *assize courts* (a president and four assistant judges who hear serious penal cases). Appeal has been abolished. The Court of Cassation sits at Ankara.

The laws applied by these Courts have been recently drawn up and

adopted. The Turkish Civil Code is, with the exception of a few modifications, a reproduction of the Swiss Civil Code, as also the Code of Obligations, and both entered into force towards the end of 1926. The new Penal Code is based in great measure upon the Italian Penal Code, and the Code of Civil Procedure, without being identical, nevertheless closely resembles that of the Canton of Neuchâtel. The new Commercial Code is based on the German.

On January 1, 1942, the prison population consisted of 39,811 men and 1,256 women awaiting trial, and 56,178 men and 5,096 women under sentence, a total of 108,886.

### Finance.

Revenue and expenditure for five financial years (June 1 to May 31) were as follows:—

|                         | 1940-41     | 1941-42     | 1942-43 <sup>1</sup> | 1943-44 <sup>1</sup> | 1944-45 <sup>1</sup> |
|-------------------------|-------------|-------------|----------------------|----------------------|----------------------|
|                         | £T          | £T          | £T                   | £T                   | £T                   |
| Revenue:                |             |             |                      |                      |                      |
| Ordinary . . . . .      | 316,259,000 | 384,452,000 | 391,323,340          | 436,720,500          | 570,425,500          |
| Extraordinary . . . . . | 238,950,000 | 268,666,000 | 120,000,000          | 120,000,000          | 331,075,500          |
| Total . . . . .         | 555,209,000 | 653,118,000 | 511,323,340          | 556,720,500          | 901,501,000          |
| Expenditure . . . . .   | 545,578,000 | 581,876,000 | 514,326,938          | 486,717,349          | 570,434,417          |

<sup>1</sup> Estimates.

Extraordinary expenditure for 1944-45 was estimated at £T382,000,000, of which £T376,000,000 was for defence.

On May 31, 1939 (latest available figures), the position of the public debt was as follows:—

|                       |                            | £T          |
|-----------------------|----------------------------|-------------|
| Consolidated Debt.    | Turkish currency . . . . . | 182,312,974 |
|                       | Foreign „ . . . . .        | 149,448,504 |
|                       |                            | 331,761,478 |
| Floating Debt.        | Turkish currency . . . . . | 213,277,019 |
|                       | Foreign „ . . . . .        | 74,847,184  |
|                       |                            | 288,124,203 |
| Grand total . . . . . |                            | 619,885,681 |

Since 1939, the floating of numerous loans, treasury advances, etc., to cover extraordinary expenditure, have increased the public debt very considerably, the total figure now being assessed at approximately £T1,300,000,000.

The National Defence vote, excluding allocations from extraordinary revenue, absorbs 24 per cent. of the total revenue during 1942-43, against 23 per cent. during 1941-42, and 26 per cent. during 1940-41, while that of the Public Debt absorbs 25 per cent., 27.5 per cent., and 25 per cent. during the corresponding periods.

The Ottoman Public Debt was redeemed on the date provided for—

May 25, 1944. For the history of this debt, see *THE STATESMAN'S YEAR-BOOK*, 1944, pp. 1339-40.

On October 22, 1940, the Turkish Government took over the liabilities of the Ottoman Debt Council (Unified Debt) set up in virtue of the Agreement of April 22, 1938. The Government's reasons were:—(1) Impossibility for members of the Council to arrange for a full meeting in conformity with the provisions of the Agreement; or to carry out the duties of the Council. (2) Of a total of 1,839,453 Ottoman Debt Bonds, 854,398 were found to be in possession of holders in France, United Kingdom, Belgium, Holland, Switzerland and Italy; 29,821 in Germany, and the balance, i.e. 865,692 to be held by Turks with 89,845 not due for issue until October 1, 1943. On the above showing the Government claimed the debt to have become an internal liability. It was further decided that Belgian, French, Dutch, Swiss and Italian bondholders would in future be paid on the same system as German and Turkish holders; and also in future British bondholders' annuities would be paid into a 'Special Account'. The method of transfer of these funds is to be decided later by the British and Turkish Governments. The Ottoman Bank was entrusted with the archives, duties and responsibilities of the former Debt Council, whose members were compensated on retirement.

For details of the apportionment of the pre-war debt of Turkey among the succession States, see *THE STATESMAN'S YEAR-BOOK* for 1936, p. 1364.

## Defence

### ARMY.

Under the law of January 22, 1942, military service is for 3 years, and naval service is likewise for 3 years. Men are called up at the age of 20, and liability for service lasts 26 years. The annual contingent of men liable to service is about 175,000, of whom about half are required to serve. The strength of the active army in 1938 was approximately 20,000 officers and 174,000 men. Since the outbreak of the war the Army has been maintained at approximately war strength by the inclusion of reservists and by the premature calling up of a new class and by calling up men previously exempted. It now consists of 11 army corps, comprising 23 divisions, an armoured brigade, 3 cavalry divisions and 7 fortress commands.

The total numbers that could be mobilized are estimated at nearly 2,000,000. The active formations would seem to provide for a war strength of about 500,000. Until recently, much of the military material dated from before the last war, but there have been increasing large purchases of anti-aircraft guns and anti-tank guns, so far as these could be obtained. Owing to scanty industrial resources, Turkey has been mainly dependent on arms from abroad.

The infantry is equipped mainly with Mauser rifles. The artillery with 75 mm. field guns and 10.5 and 12 c.m. howitzers of various foreign makes. The army estimates for 1942-43 amount to 72,189,327 pounds Turkish.

### NAVY.

The Turkish Navy includes the battle cruiser *Yavuz*, formerly the German *Goeben*, launched in 1911, displacing 23,100 tons, and armed with ten 11-inch guns; the cruisers *Hamidiye*, 3,830 tons, and *Mecidiye*, 3,300 tons, both dating from 1903; 2 gunboats, 8 minesweepers, 8 destroyers, 12 submarines, 3 motor torpedo boats, 5 minelayers, a surveying vessel, a depot ship, a fleet tug, a collier and an oiler.

A sum of 7,500,000*l.* was provisionally allocated to new construction in 1934. This included the cost of 4 destroyers and 4 submarines, which were built in England.

A new naval base at Golpuik in the Gulf of Izmit is in being and a scheme for enlarging and improving this base comprises the provision of docks and building-slips which will replace the former dockyard in the Golden Horn. Merchant ships only will then be built in the Golden Horn.

The future strength of the personnel does not appear to have been fixed, but no difficulty is anticipated in manning the ships at present ready for sea. Effective strength at present is about 800 officers and 4,000 men.

Naval estimates for 1942-43, £T7,642,049.

### AIR FORCE.

The Turkish Air Force comes under the direct control of the Turkish General Staff. The Air Force strength was, in 1940, approximately 370 first-line aircraft, and a total personnel of about 8,500. There were 3 air brigades, each of 2 air regiments of two squadrons. Equipment is chiefly of German, American and British types. Details of recent developments are not divulged. Air estimates, 1942-43, £T9,121,428.

## Production and Industry.

*Agriculture.*—Agriculture is primitive, but modern methods are now being adopted. Number of people engaged in agriculture is, according to the census of 1935, 10,546,846, being 65.2 per cent. of the total population. The soil for the most part is very fertile; the principal products are tobacco, cereals, figs, silk, olives and olive oil, dried fruits, licorice root, nuts and almonds, mohair, skins and hides, furs, wool, gums, canary seed, linseed, sesame and cotton. Opium is an important crop in Konya and Afyon Karahisar. Tobacco is grown both in European and Asiatic Turkey. The principal tobacco districts are Samsun (the most important), Bafra, Izmit, Charshamba and Izmir (Smyrna). In 1942, tobacco was grown on 198,880 acres. Estimated tobacco crop in 1942, 68,992,000 kilos. The principal centre for silk production is Bursa. The production of olive oil, mainly confined to the Vilayet of Aydin, is very important. The area under cultivation in 1942 was (in hectares):—cereals, 8,120,373; leguminous plants, 429,042; industrial plants, 730,535.

The following table gives the area and yield of the principal products for two years:—

| Product      | 1941             |                      | 1942             |                      |
|--------------|------------------|----------------------|------------------|----------------------|
|              | Area in hectares | Yield in metric tons | Area in hectares | Yield in metric tons |
| Wheat . . .  | 4,394,078        | 3,483,147            | 4,369,455        | 2,000,105            |
| Barley . . . | 2,037,103        | 1,758,246            | 1,931,576        | 902,095              |
| Oats . . .   | 366,995          | 263,496              | 349,266          | 182,718              |
| Maize . . .  | 502,210          | 647,464              | 631,132          | 860,019              |
| Rice . . .   | 41,206           | 55,824               | 26,499           | 55,095               |
| Peas . . .   | 72,875           | 247,909              | 93,076           | 278,739              |
| Potatoes . . | 327,538          | 193,697              | 326,687          | 212,694              |
| Cotton . . . |                  |                      |                  |                      |

On February 8, 1937, a new forest law was voted, providing for State control of all forests, including those under private ownership. It contains measures for planting, protection against fire, marauders and insects, and

lays down penalties for infringements of any of its clauses. About 9,169,859 hectares (22,924,647 acres) are under forest. The most-wooded vilâyet is Kastamonu, Aydin, Bursa, Bolu, Trabzon, Konya and Balikesir. Of the forest land, about 88 per cent. belongs to the State, 6 per cent. to private persons, and the rest to communes and bakufs (pious foundations).

At the end of 1943 there were in Turkey 16,124,884 sheep, 8,494,937 ordinary goats, 8,320,685 mohair goats, 7,170,930 cattle, 1,217,997 asses, 716,327 horses, 649,712 buffaloes, 90,409 camels and 70,215 mules.

The wool clip in 1942 was 30,539,060 kilos, the mohair clip, 7,552,000 kilos, and the hair-clip of ordinary goats, 6,800,000 kilos.

**Mining.**—The Turkish provinces, especially those in Asia, are reported rich in minerals, which are little worked. In 1936 the Government acquired the Zunguldak coal mines. Production of principal minerals in 1941 and 1942 was as follows:—

| Mineral              | 1941        | 1942        | Mineral                 | 1941        | 1942        |
|----------------------|-------------|-------------|-------------------------|-------------|-------------|
|                      | Metric tons | Metric tons |                         | Metric tons | Metric tons |
| Coal <sup>1</sup>    | 3,019,626   | 2,509,614   | Cement                  | 272,921     | 210,858     |
| Lignite              | 266,779     | 888,825     | Sulphur                 | 3,408       | 2,884       |
| Copper               | 2,779       | 12,278      | Meerschaum <sup>2</sup> | 238         | 269         |
| Chrome               | 150,303     | 180,053     | Manganese ore           | 1,809       | 8,818       |
| Antimony             | 13          | 1,449       | Magnetite               | 1,900       | 115         |
| Mercury <sup>3</sup> | 242         | 176         | Emery                   | 850         | 10,825      |

<sup>1</sup> The figures given for coal refer to unwashed and unscreened coal.

<sup>2</sup> Flasks.

<sup>3</sup> Cases.

**Industry.**—In 1934 there was inaugurated a five-year plan for the industrialisation of the country, with a view to making Turkey economically independent, and the following staple industries have been established: iron and steel, textile, mining, paper, glass, sugar and cement. In February, 1936, a second five-year plan was prepared, relating mainly to mines, mining industries and electrification, and it is estimated that a special credit of £T100,000,000 will be required to carry it through. An additional impetus has been given to mining by the grant of a credit of 10,000,000*l.* under the Anglo-Turkish Guarantee Agreement, as the interest and amortisation of these credits are to be paid for by the revenue derived from the sale of base metals on free markets.

In 1936 there were 65,245 industrial establishments in Turkey employing 256,855 hands.

The first blast furnace at the Karabuk iron and steel plant (180 tons capacity) was lit on August 9, 1939. Cost of construction approximates 3,000,000*l.* Estimated annual output (in metric tons):—pig iron, 219,000; slag, 70,000; coke, 229,000; rolled steel products, 150,000, and steel ingots, 171,900.

### Commerce.

Imports and exports for five years:—

|         | 1938        | 1939        | 1940        | 1942        | 1943        |
|---------|-------------|-------------|-------------|-------------|-------------|
|         | £T          | £T          | £T          | £T          | £T          |
| Imports | 149,836,689 | 118,248,934 | 68,922,708  | 147,000,000 | 208,000,000 |
| Exports | 144,946,511 | 127,388,997 | 111,446,486 | 165,000,000 | 247,000,000 |

Turkish trade for 2 years was distributed among the principal countries as follows:—

| Country        | Imports    |            | Exports    |            |
|----------------|------------|------------|------------|------------|
|                | 1939       | 1940       | 1939       | 1940       |
|                | £T         | £T         | £T         | £T         |
| United Kingdom | 7,388,263  | 9,665,280  | 7,801,575  | 11,550,935 |
| Italy          | 10,023,037 | 11,224,310 | 12,753,632 | 17,961,821 |
| Germany        | 60,142,005 | 8,083,286  | 67,504,458 | 9,686,581  |
| France         | 2,235,966  | 1,925,145  | 5,630,546  | 6,618,274  |
| United States  | 11,684,884 | 7,446,982  | 18,214,737 | 15,733,738 |
| Russia         | 3,451,798  | 958,552    | 3,978,047  | 259,116    |
| Japan          | 508,608    | 204,975    | 224,737    | 75,049     |

The value of the commercial intercourse between Turkey and Great Britain for five years (according to the Board of Trade returns) is shown in the following table:—

|                                      | 1934      | 1935      | 1936      | 1937      | 1938      |
|--------------------------------------|-----------|-----------|-----------|-----------|-----------|
|                                      | £         | £         | £         | £         | £         |
| Imports into U.K. from Turkey        | 925,851   | 992,056   | 1,297,680 | 1,613,321 | 973,425   |
| Exports of British produce to Turkey | 1,172,139 | 1,021,210 | 947,745   | 1,542,695 | 2,475,906 |
| Re-exports to Turkey from U.K.       | 57,514    | 27,354    | 21,576    | 25,597    | 36,613    |

### Shipping and Navigation.

On May 1, 1942, 168 vessels under the Turkish flag had a tonnage of 187,556 gross tons.

In 1942, 56,411 vessels of 9,198,236 tons entered and cleared the ports of Turkey, inclusive of those in transit (foreign vessels, 744 of 238,095 tons).

### Communications.

Turkey has (1939) 5,987 miles of good roads and 4,380 miles in need of repairs.

The total length of railway lines in exploitation on December 31, 1943, was 4,609 miles; of this total, 4,339 miles were state lines. Mileage operated by the Government consisted of 6,563 kilometres (4,069 miles) of standard, 312 kilometres (193 miles) of narrow, and 124 kilometres (76 miles) of broad gauge track. In the fiscal year ending May 31, 1942, total revenues for the railways amounted to £T86,441,558 (£T83,198,576 for passenger traffic, carrying 43,025,820 passengers, and £T42,655,535 for freight).

In 1941, 20,482,796 letters, 1,259,687 postcards and 15,939,524 printed papers were handled internally, 3,716,922 letters were received from and 4,251,549 letters sent abroad. In 1941 there were 18,015 miles of telegraph lines with 42,793 miles of wire; 1,329 offices, 8,539,718 internal telegrams and 500,255 foreign telegrams.

### Banking and Credit.

In January, 1927, the Turkish Government issued a Charter for a new National Bank, to be styled the Central Bank of the Turkish Republic (Merkez

Bank). Its capital is 15 million Turkish pounds, which has been fully subscribed. The future status of this bank was determined by a law passed by the Grand National Assembly on June 11, 1930. It began its activities on October 3, 1931, following the approval of the Statutes by the Government. The bank has a concession for thirty years, renewable during the last five years of this period, and is the sole bank of issue in the country. There are 7 other State controlled Banks: The Halk Bankasi (People's Bank), a popular savings bank; the Sümer Bank (industrial), capital £T150,000,000; the Ziraat Bank (agriculture); the Eti Bank (development of mines and marketing of minerals), capital £T100,000,000; the Emlak Bank (real property and mortgages); the Is Bankasi, capital, £T5,000,000, and the Municipal Bank, capital £T15,000,000. The principal foreign bank in Turkey is the Ottoman Bank, founded in 1863. It has a branch in every important town of Turkey. The concession of the Ottoman Bank, extended in August, 1925, by the Turkish Government, for a further period of 10 years, was prolonged (June 5, 1933) until March, 1952.

The total amount of paper currency in circulation June 24, 1944, was £T896,160,503; gold coin and bullion, £T283,059,581.

Savings deposits at the end of August 1943 amounted to £T182,000,000. Commercial and banking deposits on the same date were £T425,000,000.

### Money, Weights and Measures.

Since April 8, 1916, a gold standard, with the *piastre* as the unit, is general all over Turkey. The Turkish pound is divided into 100 piastres (*kurus*) and contains 6.15 grammes of fine gold. The piastre is equal to 40 para. The piastre pieces, as well as the half piastre (20 para) and quarter piastre (10 para) pieces, are of nickel. Silver coins are 25 and 50 piastres; and gold coins  $\frac{1}{2}$ ,  $\frac{1}{4}$ ,  $\frac{1}{8}$ ,  $\frac{1}{16}$  and 5 £T. Silver is legal tender up to 300 piastres, and nickel up to 50 piastres.

The only money in general circulation, apart from nickel coins for 10 and 20 paras and for 1 piastre and coins for 5, 10, 25, 50 and 100 piastres, is paper money. There are two kinds of paper money in circulation: notes of the Ottoman Bank, which since 1863 has enjoyed the right of issue; the amount in circulation on December 31, 1940, was £T340,001. There are also the notes of the Central Bank which include the notes issued by the State during the Great War, and taken on charge by the bank since October 3, 1931, as well as those subsequently issued and covered by gold and foreign exchange. The currency is depreciated, the Turkish gold *lira* at the end of 1943 being worth 38 paper liras. At the beginning of 1929 the Government stabilized the exchange at about 1,030 piastres to the £1 (sterling). In 1931 the Turkish Government pegged the *lira* to the French franc at 12.06 francs to the *lira*, and later pegged it to the franc-sterling-dollar rate. With the subsequent depreciation of the £ sterling the rate has been stabilized for the last year or so on the basis of 521 piastres to the £1.

The metric system of weights and measures came into force on January 1, 1934.

For the old weights and measures, see THE STATESMAN'S YEAR-BOOK for 1933, p. 1349.

On May 24, 1928, the Grand National Assembly passed a law making the employment of European numerals obligatory as from June 1, 1929.

On March 1, 1917, the Gregorian calendar was introduced into Turkey, to be used side by side with the Hegira calendar, while as from January 1, 1926, it was decided finally to adopt the Gregorian calendar alone, the Turkish civil year 1342 becoming 1926.

## Diplomatic and Consular Representatives.

### 1. OF TURKEY IN GREAT BRITAIN.

*Ambassador*.—Rushen Eshref Unaydin (appointed March 23, 1944).

*Counsellor*.—Siret Halun.

*Secretaries*.—Sureyya Herkem, Adil Derinsu, Sadi Eldem, Hicabi Ekinici and Rasim Fenmen.

*Military Attaché*.—Lt.-Col. Enver Aka.

*Naval Attaché*.—Captain Aziz Uluhan.

*Financial Attaché*.—Husevin Kunter.

*Commercial Counsellor*.—Fikri Diker.

*Educational Attaché*.—Turgut Erein.

*Consul-General*.—Nebil Sureyya Akcer.

There are Turkish Consuls at Birmingham, Bristol, Cardiff, Glasgow, Liverpool and Newcastle.

### 2. OF GREAT BRITAIN IN TURKEY.

*Ambassador*.—Sir Maurice Drummond Peterson, K.C.M.G. (appointed September 4, 1944).

*Counsellor*.—A. K. Helm, C.B.E.

*First Secretary*.—D. L. Busk.

*Second Secretaries*.—M. J. R. Talbot and J. L. Reed.

*Third Secretary*.—A. C. Maby.

*Naval Attaché*.—Rear-Admiral W. L. Jackson, D.S.O.

*Military Attaché*.—Major-General A. C. Arnold, C.B.E., M.C.

*Air Attaché*.—Vice-Marshal R. A. George, M.C., R.A.F.

*Commercial Counsellor*.—J. G. Lomax, C.M.G.

*Commercial Secretary*.—N. S. Roberts, M.B.E.

*Press Counsellor*.—L. Ashton.

*Press Attaché*.—W. Elmsley.

*Broadcasting Attaché*.—R. Tristram.

*Consul-General*.—(Istanbul) L. H. Hurst, (Smyrna) E. C. Hole, and Iskenderun.

There are Consuls at Trabzon (Trebizond) and Mersin (joint post), at Canakkale and Adana.

## Statistical and other Books of Reference.

*Treaty of Peace with Turkey and other Instruments signed at Lausanne on July 24, 1923, etc.* London, 1923.

### 2. NON-OFFICIAL PUBLICATIONS.

*Turquie 1938. Partie républicain du peuple. Quinzième anniversaire de la proclamation de la République Turque (29 octobre, 1938).* Istanbul, 1939.

*Abbot (G. F.). Turkey, Greece, and the Great Powers.* London, 1917.

*Allen (H. E.). The Turkish Transformation.* Chicago, 1935.

On February 23, 1942, President Baldomir dissolved both Houses and created a State Council of all parties (except the Communists and the *Herreristas*) to replace Parliament.

Uruguay severed diplomatic relations with Germany, Italy and Japan on January 25, 1942, and with Vichy France on May 12, 1943; she declared war on Germany and Japan on February 15, 1945.

The following is a list of the Presidents since 1899:—

|                                                |                                             |
|------------------------------------------------|---------------------------------------------|
| Don Juan Lindolfo Cuestas, March 1, 1899—1903. | Dr. Feliciano Viera, March 1, 1915—1919.    |
| Don José Batlle y Ordoñez, March 1, 1903—1907. | Dr. Baltasar Bruin, March 1, 1919—1923.     |
| Dr. Claudio Williman, March 1, 1907—1911.      | Don José Serrato, March 1, 1923—1927.       |
| Don José Batlle y Ordoñez, March 1, 1911—1915. | Dr. Juan Campisteguy, March 1, 1927—1931.   |
|                                                | Dr. Gabriel Terra, March 1, 1931—1938.      |
|                                                | Gen. Alfredo Baldomir, March 27, 1938—1943. |

*President of the Republic.*—Juan José de Amézaga (born 1882) (elected November 29, 1942, for the 4-year term beginning March 1, 1943; salary, 24,000 pesos per annum).

### Area and Population.

The following table shows the area and the estimated population of the 19 departments (capitals in brackets) on January 1, 1941:—

| Departments                     | Area, square miles | Population Jan. 1, 1941 | Pop. per square mile |
|---------------------------------|--------------------|-------------------------|----------------------|
| Artigas (Artigas)               | 4,394              | 55,748                  | 12.6                 |
| Canelones (Canelones)           | 1,834              | 199,332                 | 108.6                |
| Cerro Largo (Melo)              | 5,763              | 96,488                  | 16.7                 |
| Colonia (Colonia)               | 2,198              | 129,322                 | 58.9                 |
| Durazno (Durazno)               | 5,525              | 94,291                  | 17.0                 |
| Flores (Trinidad)               | 1,744              | 35,835                  | 20.5                 |
| Florida (Florida)               | 4,673              | 105,932                 | 22.6                 |
| Lavalleja (Minas)               | 4,819              | 115,181                 | 23.9                 |
| Maldonado (Maldonado)           | 1,587              | 66,539                  | 41.9                 |
| Montevideo (Montevideo City)    | 256                | 536,583                 | 2,095.8              |
| Paysandú (Paysandú)             | 5,115              | 55,490                  | 10.7                 |
| Rio Negro (Fray Bentos)         | 3,269              | 47,147                  | 14.4                 |
| Rivera (Rivera)                 | 3,798              | 74,746                  | 19.7                 |
| Rocha (Rocha)                   | 4,280              | 82,156                  | 19.1                 |
| Salto (Salto)                   | 4,865              | 99,754                  | 20.5                 |
| San José (San José)             | 2,688              | 97,301                  | 36.1                 |
| Soriano (Mercedes)              | 3,561              | 92,671                  | 26.0                 |
| Tacuarembó (Tacuarembó)         | 8,112              | 104,889                 | 12.9                 |
| Treinta y Tres (Treinta y Tres) | 3,682              | 58,371                  | 15.5                 |
| Total                           | 72,153             | 2,185,026               | 30.2                 |

Estimated population, 1944, 2,235,000.

The last census was taken in 1908, when the total population numbered 1,042,686, divided into 861,464 native-born and 181,222 immigrants.

The population of Montevideo City (the capital) on July 31, 1941, was estimated at 770,000. Other cities in 1937 had populations as follows: Paysandú, 81,000; Salto, 80,000; Mercedes, 24,000.

Births, deaths and marriages for three years:—

| Years | Living Births | Still-Births | Marriages | Deaths | Surplus of Living Births over Deaths |
|-------|---------------|--------------|-----------|--------|--------------------------------------|
| 1939  | 42,862        | 1,407        | 15,021    | 19,341 | 23,521                               |
| 1940  | 42,898        | 1,398        | 14,844    | 20,695 | 22,198                               |
| 1941  | 44,287        | 1,881        | 16,037    | 20,581 | 23,906                               |

Of the living births in 1941, 11,800 were illegitimate. Divorces: 822 in 1941. Immigration 1941, 250,369; emigration, 252,196. The language of the country is Spanish.

### Religion and Education.

State and church are separated; and there is complete religious liberty. The religion professed by the majority of the inhabitants is Roman Catholic. The archbishopric of Montevideo has 2 suffragan bishops in Salto and Melo. The 1908 census showed 430,095 Catholics, 12,232 Protestants, 45,470 unspecified and 126,425 Liberals.

Primary education is obligatory; both primary and superior education are free. In 1943 there were 1,592 public schools with 191,191 enrolled pupils and 4,981 teachers. Rural schools had 53,938 pupils. There are also evening courses for adults with 6,717 pupils. Budget estimates on education in 1944 amounted to 6,500,000 pesos.

The University of the Republic at Montevideo, inaugurated in 1849, had 19,197 students in 1937. There are five normal schools for males and females, and a college of arts and trades with 9,649 students in 1941. There are also many religious seminaries throughout the Republic with a considerable number of pupils, a school for the blind, two for the deaf and dumb, and a school of domestic science.

### Justice.

The Supreme Court of Justice consists of 5 judges elected by the two Chambers sitting as a National Assembly. The President is chosen annually by the members of the court from amongst themselves. This court has original jurisdiction in constitutional, international, and admiralty cases, and hears appeals from the appellate courts, of which there are 3 each with 3 judges. In Montevideo there are also 3 courts for ordinary civil cases, 7 for commercial cases, 2 for Government (*Juzgado de Hacienda*), as well as criminal and correctional courts. Each departmental capital has a departmental court, and each of the 220 judicial sections into which the Republic is divided has a justice of peace court; further, each section is divided into districts, in which deputy judges (*alcaldes*) try cases involving small amounts. In September, 1907, the death penalty was abolished, replaced by penal servitude for a period of 30 to 40 years.

### Finance.

The receipts and expenditure for recent years are stated as follows (at the new (1938) par 7.60 gold pesos = £1, or 1 peso = 31½d.; 1 gold peso = 1.03 dollars U.S.):—

|      | Receipts   | Expenditure |       | Receipts    | Expenditure |
|------|------------|-------------|-------|-------------|-------------|
|      | Gold pesos | Gold pesos  |       | Gold pesos  | Gold pesos  |
| 1939 | 91,219,736 | 90,439,600  | 1942  | 96,161,051  | 112,695,461 |
| 1940 | 94,851,438 | 101,878,081 | 1943* | 101,445,395 | 121,093,657 |
| 1941 | 94,899,981 | 107,313,214 | 1944* | 136,894,503 | 136,000,000 |

\* Preliminary.

\* Budget estimate.

The public debt of Uruguay on October 31, 1944, stood at 571,602,285 pesos, of which 138,178,684 was external. Floating debt on December 31, 1943, 31,807,217 pesos. British capital invested in Uruguay amounted, in 1944, to 44,085,608½, of which 38.2 per cent. (chiefly railway capital)

## URUGUAY.

(REPÚBLICA ORIENTAL DEL URUGUAY.)

### Constitution and Government.

THE Republic of Uruguay, formerly a part of the Spanish Viceroyalty of Rio de la Plata, and subsequently a province of Brazil, declared its independence August 25, 1825, which was recognised by the Treaty between Argentina, Brazil and Uruguay, signed at Rio de Janeiro August 27, 1828. The first Constitution was adopted July 18, 1830.

For description of the Constitution of 1919 and its overthrow in 1934, see THE STATESMAN'S YEAR-BOOK for 1934, p. 1359.

Under the new Constitution adopted at a general election on April 19, 1934, the system of a dual executive is abolished, and the executive power is discharged by the President of the Republic, assisted by a Council of Ministers. The President is elected by the legislature for a term of four years. The Council of Ministers is composed of nine members, chosen from the two political parties which have obtained the highest number of votes in Presidential elections, the majority party being represented on the Council by six members.

The Constitution of 1919 separated Church and State, and introduced universal and compulsory male suffrage for all over 18 years of age who are able to read and write. In 1934 the new Constitution granted votes to women. Three women have been elected to Parliament. Voting is secret, and the principle of proportional representation operated. Foreigners may become naturalized without losing their former citizenship.

Parliament now consists of two Houses, the Senate, whose 30 members are elected at large for four years, and the Chamber of Representatives of 99 members, elected from districts for four years. The 30 seats in the Senate are divided equally between the two political parties obtaining the highest number of votes, providing that the two together poll an absolute majority in presidential elections; failing this, proportional representation is granted.

were in default. American direct investments, 1940, were 10,918,000 dollars, compared with 27,904,000 in 1929; American holdings of Uruguayan dollar bonds, 1941, were 38,100,000 dollars, of which 5 per cent. were in default.

In October, 1941, an armament loan of 17,000,000 dollars was negotiated in the United States.

### Defence.

The Army of Uruguay consists of a small standing Army and the National Guard. Service in the standing Army is voluntary, lasting from 2 to 5 years, with re-engagement up to the age of 44. It consists of 19 line battalions, 4 rifle companies, 9 cavalry regiments, 3 field artillery regiments of 3 batteries each, a fortress artillery company and machine gun company, 1 engineers' battalion, and 1 bearer company with a peace strength in 1938 of 808 officers and 7,108 other ranks, and a nominal war strength of 50,000.

The National Guard is a militia, service in which is compulsory in the event of war. It is divided into three classes, or 'bans.' The first 'ban,' or 'mobile' national guard contains all the young men fit for military duty between the ages of 17 and 30, who would take the field with the standing army. Four classes, from 1921 to 1924 inclusive, were called up for training in 1943. The second ban, consisting of men fit for service between 30 and 45, is the 'departmental,' or provincial, national guard. Its units do not move out of their own departments, but the men can be drafted to make good the losses of the mobile units in time of war. The third ban, containing all the men between 19 and 45, is the 'territorial' force, and is only liable to garrison duty in its own districts. The total strength of the National Guard (all three bans) is, nominally, about 100,000 men and 120 guns.

There is also a police force, with an establishment of 5,000, and a force of mounted police ('Guardia Republicana') of 400. The fire brigade, which also undertakes police duties, numbers 360.

The infantry of the active army is armed with the Mauser rifle; the field batteries have either Schneider or Krupp 7.5 cm. guns. The National Guard is mainly armed with the Remington rifle and old de Bange guns.

The Military Aviation School possessed, in 1937, 45 machines in active service. The school has its own workshops and staff of mechanics, and an establishment of 8 instructors and 320 officers and men. A naval aeronautical service is also being organized; 3 flying boats were bought in Italy in 1930, but little progress has been made.

The fleet consists of the 30-year old *Uruguay*, 1,150 tons; the surveying vessel *Miranda*, of 500 tons, built in Spain in 1930; 3 patrol vessels of 150 tons built in Italy in 1935; 2 training ships; and a few craft of less importance.

### Production and Industry

Uruguay is primarily a pastoral country, 60 per cent. (27,573,919 acres) of the total area being devoted to the stock-raising industry, 20 per cent. (10,002,126 acres) to mixed farms and ranches, and only 7 per cent. (3,120,000 acres) to agriculture. The remaining 13 per cent. of the country's area is unproductive. Animals and animal products constitute 95 per cent. of the country's exports. In 1942 sheep numbered 22,000,000. A livestock census, 1937, showed 8,296,890 cattle, 17,931,327 sheep; provisional returns showed about 600,000 horses and 308,000 pigs. Cattle slaughtered at the frigorificos in 1942 totalled 979,511 head; sheep, 1,001,910; pigs, 57,198. Uruguay agreed to send to Great Britain in 1942, 29,500 tons of chilled beef and 4,000 tons of lamb. Wool output, 1941-42, was 52,880 tons (110,000 bales). Nutria skins are exported at the rate of 50,000 a year.

Agricultural products are raised chiefly in the Departments of Canelones,

Colonia, San José, Minas, and Florida. The average farm is about 250 acres. In 1937, 17.6 per cent. of the farms were run by managers, 39.9 per cent. by tenant farmers, and 42.5 per cent. by their proprietors. The principal crops and their yield were as follows:—1943-44: wheat, 238,001 tons; maize, 237,231 tons; linseed, 98,977 tons; oats, 73,028 tons.

Wine is produced chiefly in the departments of Montevideo, Canelones, Salto, Colonia and Paysandú. In 1943, 43,677 acres were planted with grapes, producing 121,726 tons of grapes and 77,293,641 litres of wine. The country has some 6 million fruit trees. Annual fruit crop, exclusive of grapes, about 153,000 tons, principally peaches, oranges and pears. Tobacco (692,000 kilos) is cultivated and 14,213,300 litres of beer manufactured.

In the northern departments silver, copper, lead, manganese, gold, iron and lignite coal are found, but are not greatly worked. The supply of electricity for light, power, and traction has been a State monopoly since 1912.

The industrial census taken in 1936 showed a total of 11,470 establishments, employing 90,128 workers and having a total capital of 247,272,000 pesos.

### Commerce.

The foreign trade (now officially stated in U.S. dollars, with the figure for imports based on the clearance permits granted and that for exports on export licences utilized) was as follows:—

|         | 1939 <sup>1</sup> | 1940         | 1941         | 1942         | 1943         |
|---------|-------------------|--------------|--------------|--------------|--------------|
|         | pesos             | U.S. dollars | U.S. dollars | U.S. dollars | U.S. dollars |
| Imports | 65,880,334        | 54,924,000   | 63,125,000   | 63,661,000   | 63,807,837   |
| Exports | 101,866,803       | 66,428,940   | 79,846,000   | 57,778,000   | 100,021,697  |

<sup>1</sup> Under the system then in use, imports were stated at their 'official values' (reported to be in many cases below their real values), while exports were stated at their market value. The controlled rate for the peso in 1939 was 65.83 cents, U.S.; the free rate was 36.79 cents.

Of the imports in 1943, the United States furnished 25 per cent., Brazil 17 per cent. and Great Britain 10 per cent.; of the exports, the United States took 54 per cent. and Great Britain 33 per cent.

The principal exports in 1943 were as follows (values in thousands of U.S. dollars):—Meat and dairy products, 46,514; wool, 39,270; sundry manufactures, 6,720; hides, bristles, 2,554; farm products, 2,643; mining products, 1,775. The cattle industry furnished, in value, about 88 per cent. total exports.

Imports in 1941 included:—Fuel oil, 248,391 tons; petrol, 131,536 tons; coal, 285,891 tons; cotton goods, 2,849,427 kilos; jute, 1,458,758 kilos; sugar (refined), 30,918 tons; constructional steel, 19,363 tons.

Total trade between Uruguay and the U.K. for 5 years (Board of Trade returns):—

|                                 | 1934      | 1935      | 1936      | 1937      | 1938      |
|---------------------------------|-----------|-----------|-----------|-----------|-----------|
|                                 | £         | £         | £         | £         | £         |
| Imports from Uruguay into U.K.  | 8,180,329 | 3,880,732 | 3,955,108 | 4,014,955 | 3,920,422 |
| Exports to Uruguay from U.K.    | 1,694,459 | 1,516,279 | 1,919,949 | 2,309,361 | 2,187,641 |
| Re-exports to Uruguay from U.K. | 25,263    | 42,440    | 35,924    | 40,910    | 60,176    |

United Kingdom exports to Uruguay (Board of Trade returns) since 1938 have been: 1939, 2,166,000£.; 1940, 2,810,000£.; 1941, 2,537,000£.; 1942, 1,818,000£.; 1943, 1,300,000£.; 1944, 579,000£. Totals for the 8 years,

1939-41, included shipments of war supplies, if any, by Government departments.

### Shipping and Communications.

In 1941, 6,925 vessels of 5,112,491 tons entered and cleared the ports of Uruguay.

On July 1, 1939, there were 247 vessels under the Uruguayan flag with a gross tonnage of 35,952.

The national roads of Uruguay have a total length of 2,611 miles, and there are about 5,903 miles of departmental roads, of which about 323 miles are macadamised. River transport is also very extensive.

The four principal railway systems are the Central (Combined System, 934 miles), the Midland (320 miles), North Western (113 miles), Northern (73 miles), all British owned. The East Coast Railway (78 miles) and 3 minor lines are controlled by the State. The total railway system open for traffic (1941) is 1,477 miles of standard gauge.

The telegraph lines in operation have a total length of 5,966 miles; in 1940, 176 offices handled 4,344,563 telegrams. The telephone system in Montevideo (completely reorganised in 1934) is controlled by the State; 36 companies in the interior have 168,631 miles of wire. Telephone instruments, 1939, numbered 46,656. Wireless telephone communications are established with United States, Spain, France and Great Britain. Uruguay has 48 long-wave and 5 short-wave broadcasting stations. Four cable companies connect Montevideo with the United States and Europe.

There are 1,277 post offices. The movement of mail in 1940 totalled 116,541,596 letters and packets. Air mail and passenger service connects Montevideo with all North and South America.

Carrasco is the most important air-port in Uruguay. Four air lines—American, Argentinian, Brazilian and Uruguayan—ply to and from Uruguay. The service of Pan-American Airways, linking Montevideo with 19 other American capital cities (which had been suspended for several years), was resumed on June 16, 1944, with six planes weekly each way.

### Banking and Credit.

The Bank of the Republic, whose president and directors are appointed by the Government, has a paid-up capital of 60,000,000 gold pesos. On June 30, 1944, note circulation was 135,255,000 pesos; stock of gold and silver in the issue department (similar to that of the Bank of England) amounted to 118,663,000 pesos, while the stock of gold and silver in the banking department was 100,171,000 pesos. Deposits were 225,039,000 pesos. The gold stock, which had fallen to 68 million dollars (U.S.) in 1939, had risen to 148 million in August, 1944.

In 1912 the Government created a National Insurance Bank (Banco de Seguros del Estado) with a monopoly of new insurance business of all kinds. The Post Office Savings Bank reported June 30, 1943, deposits of 32,644,942 pesos.

Of the 27 banks in Uruguay two are British: Bank of London and South America, and Royal Bank of Canada. All the banks reported June 30, 1943, paid-up capital and reserves of 137,532,540 pesos; deposits of 388,671,545 pesos and loans and discounts of 100,743,413 pesos.

### Money, Weights and Measures.

Save for a small issue of gold coins, weighing 8 grammes, 0.485 fine, issued in 1930 in commemoration of the centenary of the Uruguayan constitution,

there is no Uruguayan gold coin in circulation, but the monetary standard is gold, the theoretical gold coin being the *peso oro*, gold content of which was fixed January 12, 1938, at 0.585018 grammes, instead of, as previously, 0.70953 grammes. It is equal to 100 *centesimos*. The actual circulating medium consists of paper notes issued by the Bank of the Republic in denominations of 500, 100, 50, 10, 5, 1 pesos and 50 *centesimos*. Silver coins of 50 and 20 *centesimos* are largely withdrawn from circulation and replaced by copper coins of 10 *centesimos*; nickel coins of 5, 2 and 1 *centesimos* are also in circulation, but the smaller denominations are being less and less used. The 10 *centesimo* copper-aluminium coins ceased to be legal tender on March 14, 1943.

Foreign exchange is controlled by the Bank of the Republic, which since February, 1934, has maintained both official and free rates. In October, 1936, the currency was linked to the £ sterling and on January 18, 1938, the official rate was fixed at 7.60 pesos to the £ (1 peso = 31.625d.), corresponding to the average rate of the 'free' and the 'managed' exchange quotations. The free rate in London in 1940 ranged between 30.25d. and 21d. until free dealings were suspended in September. In New York the free rate, in cents, averaged 36.79 cents, U.S., in 1939; 37.60 in 1940; 43.38 in 1941; 52.72 in 1942; 52.85 in 1943, and 53.17 in 1944. The controlled rate, as high as 80.25 cents in 1935, has been pegged since 1939 at 65.83 cents.

The metric system of weights and measures was adopted in 1862, and its use is, officially, at least, obligatory.

### Diplomatic and Consular Representatives.

#### 1. OF URUGUAY IN GREAT BRITAIN.

*Ambassador*.—Dr. Roberto E. MacEachen (appointed October 27, 1943).

*Counsellor*.—Eduardo D. de Artaga.

*Secretary*.—Julio A. Lacarte.

There are Consular representatives at Cardiff, Glasgow, Liverpool, Southampton and Swansea.

#### 2. OF GREAT BRITAIN IN URUGUAY.

*Ambassador*.—George Gordon Medlicott Vereker (appointed August 18, 1943).

*First Secretary and Consul*.—D. F. H. Brickall, M.B.E.

*Military Attaché*.—Lt.-Col. K. R. Stirling-Wyllie.

*Naval Attaché*.—Commander S. H. Smiles, O.B.E., R.N.R.

*Air Attaché*.—Air Commodore A. A. Walser, M.C., D.F.C.

There is a Vice-Consul at Maldonado, Paysandu and Salto.

## VENEZUELA.

(ESTADOS UNIDOS DE VENEZUELA.)

### Constitution and Government.

THE Republic of Venezuela was formed in 1830 after amicable secession from the other members of the Republic of Colombia. The Constitution in force is that of July 11, 1936.

Congress consists of two chambers, the Senate of 40 members, and the Chamber of Deputies of 98 members, elected for 4 years. Senators, 2 for each State, must be Venezuelans by birth and over 30 years of age. Deputies must be native Venezuelans over 21 years of age; there is one for every 35,000 inhabitants, and one more for an excess of 15,000. A State with fewer than 35,000 of population has one deputy. The Territories, on reaching the population fixed by law, also elect deputies. Suffrage is confined to men 21 years of age or older.

The President is elected by Congress for 5 years, must be a Venezuelan by birth and over 30 years of age and cannot succeed himself. He exercises executive power in conjunction with the Cabinet Ministers through whom he acts.

The following is a list of Presidents since 1892:—

|                                 | Took Office.  |                                 | Took Office.   |
|---------------------------------|---------------|---------------------------------|----------------|
| General Joaquín Crespo          | Oct. 10, 1892 | Dr. Juan Bautista Pérez         | May 3, 1935    |
| General Ignacio Andrade         | Mar. 1, 1898  | Dr. Pedro Hriago Chacín         | June 24, 1931  |
| General Cipriano Castro         | Oct. 24, 1899 | General Juan Vicente Gómez      | July 13, 1931  |
| General Juan Vicente Gómez      | Dec. 19, 1908 | Dr. Arminio Borjas              | April 19, 1936 |
| Dr. Victorino Márquez Bustillos | May 8, 1915   | General Eleazar López Contreras | April 25, 1936 |
| General Juan Vicente Gómez      | May 8, 1922   |                                 |                |

<sup>1</sup> Deposed.

<sup>2</sup> Resigned.

<sup>3</sup> Provisional.

<sup>4</sup> Re-elected for period 1915-1922, but declined to take office, and as President-elect served as Commander-in-Chief while his successor acted as Provisional President; he was dictator to the time of his death in December, 1935, naming nominal Presidents but retaining complete power.

<sup>5</sup> Died December 17, 1935.

<sup>6</sup> Provisional President, quickly succeeded by President López Contreras.

*President of the Republic.*—General Isaias Medina Angarita (elected by the National Congress April 29, 1941; inaugurated May 6, 1941).

Venezuela severed diplomatic relations with Germany, Italy and Japan on December 31, 1941, and with Vichy France on November 26, 1943; she declared war on Germany and Japan on February 16, 1945.

The City of Caracas is the capital. The States are autonomous and politically equal. Each has a Legislative Assembly, whose members are chosen in accordance with their respective Constitutions, and an elected Governor. The States are divided into 151 districts and 629 municipalities. Each district has a municipal council, and each municipio a communal junta. The Federal District and the Territories are administered by the President of the Republic through Governors.

### Area and Population.

Venezuela is officially considered to embrace 912,050 square kilometres, or 352,143 square miles; it has frontiers with Colombia, Brazil and British Guiana extending for 2,972 miles. Bolívar, the largest state, has an area of 91,868 square miles; the other states are far smaller. The Federal District embraces 745 square miles. According to the preliminary census of December, 1941, the population is 3,863,067, including Indians and some 23,320 Venezuelans resident abroad. Foreigners, 1942, numbered 33,711. The language of the country is Spanish.

In April, 1941, Great Britain ceded to Venezuela the island of Patos, within 3 miles of the Venezuelan coast, and approximately 170 acres in area. The island has a military garrison.

The country is divided into a Federal District, 20 States and two Territories, with population according to the 1941 census as follows:—

| State         | Capital        | Pop. Census 1941 | State                | Capital         | Pop. Census 1941 |
|---------------|----------------|------------------|----------------------|-----------------|------------------|
| Anzoátegui    | Barcelona      | 155,746          | Portuguesa           | Guanare         | 87,151           |
| Apure         | San Fernando   | 70,560           | Sucre                | Cumaná          | 291,452          |
| Aragua        | Maracay        | 138,233          | Táchira              | San Cristóbal   | 245,722          |
| Barinas       | Barinas        | 62,959           | Trujillo             | Trujillo        | 264,270          |
| Bolívar       | Ciudad Bolívar | 94,522           | Yamouy               | San Felipe      | 127,030          |
| Carabobo      | Valencia       | 191,442          | Zulia                | Maracaibo       | 345,667          |
| Cojedes       | San Carlos     | 49,769           | Ter. Amazonas        | Puerto Ayacucho | 3,723            |
| Falcón        | Coro           | 232,044          | " Delta              |                 |                  |
| Guárico       | San Juan       | 135,089          | " Amacuro            | Tucupita        | 23,165           |
| Lara          | Barquisimeto   | 352,975          | Federal Dist.        | Caracas         | 380,099          |
| Mérida        | Mérida         | 192,994          | Federal Dependencies | —               | 552              |
| Miranda       | Los Teques     | 227,604          |                      |                 |                  |
| Monagas       | Maturín        | 127,901          |                      |                 |                  |
| Nueva Esparta | La Asunción    | 69,195           |                      |                 |                  |
|               |                |                  | Total                |                 | 3,850,771        |

<sup>1</sup> 1936 figure, subject to revision.

The 1941 census population of Caracas, the capital, was 269,030, and of Maracaibo, 132,547.

Vital statistics for 3 years:—

|      | Births  | Marriages | Deaths |
|------|---------|-----------|--------|
| 1941 | 184,884 | 15,873    | 62,362 |
| 1942 | 189,882 | 16,127    | 63,528 |
| 1943 | 145,829 | 16,842    | 64,131 |

### Religion and Education.

The Roman Catholic is the prevailing religion, but there is toleration of all others. There are two archbishops, one at Caracas, who is Primate of Venezuela, and one at Mérida. There are eight suffragan bishops. In the primary schools religious instruction is given only to those children whose parents expressly request it.

Elementary instruction is free, and from the age of 7 to the completion of the primary grade, compulsory. In 1943, Venezuela had 5,318 public primary schools, with 8,146 teachers (2,367 men and 5,779 women), and a total enrolment of 274,645 pupils (148,142 boys and 126,503 girls); there are 122

secondary or special schools, public and private, with 1,246 teachers and 11,645 pupils. For superior education there is the University of Los Andes at Mérida (727 students), and in Caracas the Central University (800 years old) with 2,817 students, which was rebuilt and modernized in 1944. There is also a School of Geology at Maracaibo.

### Justice.

The supreme tribunal is the 'Federal and Cassation Court,' whose 7 members are elected by Congress for 5 years, one for each of seven groups of States into which the Republic is divided for this purpose. They select their own President, Vice-President, and Chancellor. The Federal Procurator-General is appointed for 5 years. There are lower Federal courts.

The States have each a Supreme Court with 3 members called respectively President, Relator, and Chancellor. Each State has also a superior court, or superior tribunal, courts of first instance, district courts, and municipal courts. In the territories there are civil and military judges of first instance, and also judges in the municipios.

### Finance.

The revenue and expenditure for five fiscal years ending June 30 were as follows (at the old par 25.25 bolívares = £1; 1 bolívar = 19 cents, U.S.; in 1944, 3.35 bolívares = 1 dollar, U.S.):—

|             | 1939-40     | 1940-41     | 1941-42     | 1942-43     | 1943-44 <sup>1</sup> |
|-------------|-------------|-------------|-------------|-------------|----------------------|
|             | Bolívares   | Bolívares   | Bolívares   | Bolívares   | Bolívares            |
| Revenue     | 353,548,070 | 345,682,749 | 325,387,397 | 306,314,919 | 348,500,700          |
| Expenditure | 323,400,144 | 347,310,965 | 320,121,982 | 306,555,425 | 348,300,700          |

<sup>1</sup> Budget estimates.

The following table shows (in thousands of bolívares) the principal items of the budget for the fiscal year ending June 30, 1944:—

| Revenue                  | 1000 Bolívares | Expenditure               | 1000 Bolívares |
|--------------------------|----------------|---------------------------|----------------|
| Import duties            | 70,815         | Interior                  | 74,904         |
| Petroleum and mines      | 106,812        | Public Works              | 110,591        |
| Cigarette tax            | 25,000         | Agriculture               | 21,072         |
| Liquor tax               | 27,300         | War and Navy              | 37,875         |
| Stamp tax                | 21,500         | Finance                   | 21,059         |
|                          |                | Education                 | 22,830         |
|                          |                | Labour and Communications | 18,633         |
|                          |                | Health and Social Welfare | 20,870         |
| Total (incl. all others) | 348,500        | Total (all items)         | 348,500        |

On June 30, 1930, as a token of homage to Simon Bolívar, the Liberator, the external debt of 23,757,634 bolívares was completely paid off. The internal debt was paid off in 1935. The Government, on behalf of semi-governmental institutions, arranged in 1942 for credits of 25,000,000 dollars, U.S., from the Export-Import Bank, but this has not been utilized. Congress in 1943 authorized an internal loan of 24,000,000 bolívares.

The income tax was established in 1942; it realized 35,000,000 bolívares

in 1943. Under the Constitution, 12 per cent. of the federal revenue is assigned to the States and Territories from the appropriation of the Ministry of the Interior. A system of social insurance was authorized in 1940. British investments, 1944, were 18,325,447L., of which 55.0 per cent. were in default. American direct investments have risen from 232,538,000 dollars in 1929 to 262,376,000 dollars in 1940.

### Defence.

In July, 1942, a law was passed whereby all Venezuelans, 18 years of age, must serve in the active forces, as follows: voluntary, one year; those chosen by drawing lots, two years; and those reluctant to enlist, three years, all these remaining in the reserve until the age of 45. The active Army, with an establishment of 10,000 men of all ranks, consists of 8 infantry brigades, corps of artillery, engineers, cavalry, aviation and other services. Naval forces consist of several gunboats, auxiliary vessels and minor ships. The following institutes are all under the Ministry of War and Marine: military school, naval school, school of military aviation, infantry school, school for non-commissioned officers and classes, school of classes and sailors of the Navy, school of military bands and school of civil aviation (Miguel Rodríguez).

### Production and Industry.

The surface of Venezuela is divided into 3 distinct zones—the agricultural, the pastoral, and the forest zone. In the first are grown coffee, cocoa, sugar-cane, wheat (grown in the Andes), rice, tobacco, maize, cotton, beans, etc.; the second affords grazing for more than 4,000,000 cattle and numerous horses; and in the third, which covers a very large portion of the country, tropical products, such as caoutchouc, balatá (a gum resembling rubber), tonka beans, divi-divi, copaiba, vanilla, growing wild, are worked by the inhabitants. Forest resources have been barely tapped; 600 species of wood have been identified. Gathering of wild rubber was resumed in 1942. The coffee plantations number 62,673, covering 543,400 acres with 135,000,000 bushes. Output, about 1,300,500 bags (of 60 kilos). Exports, 1943, 484,875 bags, of which 465,257 went to the United States. Exports of cocoa (1943), 14,989 metric tons. The Venezuelan cocoa is considered to be of high quality; it is grown at a height of 3,000 feet, chiefly in Trujillo and Mérida and the coastal hills. Exports of coffee and cocoa are subsidised. There are 13,000 cocoa plantations and 18,000 sugar plantations. Production of sugar in 1943, 35,000 tons, and of cotton 4,500,000 kilos, virtually all locally consumed. A local fibre, *malva*, is being successfully used as a substitute for jute. Silk worm cultivation has begun on a small scale.

One-fifth of the population is engaged in agriculture. The live-stock in Venezuela is estimated as follows:—4,264,556 oxen, 107,803 sheep, 1,364,678 goats, 194,033 horses, 43,042 mules, 191,134 asses, 355,551 pigs. The Government has abolished the export monopoly which depressed the cattle industry for many years and is now improving the stock. Shipments of hides (1940) amounted to 2,714 metric tons.

Venezuela is rich in metals and other minerals and is to-day the third petroleum producing country in the world (furnishing 9 per cent. of the total); exports of crude oil in 1943 amounted to 22,646,738 metric tons and of refined products to 2,574,877 metric tons. A new petroleum law, approved in March, 1943, increased the country's revenue from the industry and provided for the eventual establishment of a refining industry. In 1943, the tax on the output of petrol produced a revenue of 55,729,628 bolívares; tax

cent. of their reserves against note issues in gold. Two small mortgage banks under quasi governmental auspices were started in 1929.

The official monetary unit is the *Bolivar* (now equivalent to 0.290323 gramme fine gold or 32.67 cents U.S.). It is divided into 100 *céntimos*. The bolivar formerly equalled at par 9½d. or 19.3 cents (U.S.) in old gold dollars and £1 = 25.25 bolivars, but prohibition of the export of gold in September, 1930, depreciated the bolivar from 5.17 to the (old) dollar (U.S.) to 7 (1932). Exchange control was established on December 12, 1936. Without legal devaluation of the currency, the Government in August, 1934, fixed the selling rate of the U.S. dollar at 3.93 bolivars and the buying rate at 3.90 bolivars. In April, 1937, the buying rate was fixed at 3.09 and the selling rate at 3.17 bolivars for sale to banks and 3.19 bolivars for sale to the public, equal to 31.34 cents, U.S. The following are the coins in current circulation: Gold, 100 (*pachanos*), 20 and 10 bolivars; silver, 5, 2.50, 2, 1, 0.50 (*real*) bolivars, and 0.25 (*medio*) bolivars; nickel, 0.125 (*locha*), 0.05 (*centavo*) bolivars.

The bank notes in circulation are as follows: 1,000, 800, 500, 100, 50, 20 and 10 bolivars. The circulation of foreign banknotes is forbidden.

Decrees of 1875 and 1912 provided that the official system of weights and measures shall be the metric system.

### Diplomatic and Consular Representatives.

#### 1. OF VENEZUELA IN GREAT BRITAIN.

*Ambassador*.—José Rafael Pocaterra (presented letters of credence, January 19, 1944).

*Secretary*.—Julio Pocaterra.

*Consul-General* (in Liverpool).—Alirio Parra Márquez.

There are Consular representatives at Cardiff, Glasgow, Hull, Newcastle-on-Tyne and Birmingham.

#### 2. OF GREAT BRITAIN IN VENEZUELA.

*Ambassador*.—Sir George A. D. Ogilvie-Forbes, K.C.M.G. (appointed June 10, 1944).

*First Secretary and Consul* (at Caracas).—A. D. Francis.

*Naval Attaché*.—Rear-Admiral Hector Boyes (serving as Captain), C.M.G., C.I.E., R.N.

*Military Attaché*.—Captain I. K. Higginbotham.

*Air Attaché*.—Wing-Commander H. G. F. Gaubert, D.F.C.

There are Vice-Consuls at Caracas, Maracaibo, La Guaira, Puerto Cabello, Irapa, Caripano, El Callao, Ciudad Bolívar, Las Piedras, Caripito, Guiria and Puerto La Cruz (Guanta).

## YUGOSLAVIA.

(KRALJEVINA YUGOSLAVIA.)

### King.

**Peter II**, born September 6, 1923, son of the late King Alexander I and Queen Mary, daughter of the late King Ferdinand of Rumania, born January 9, 1899, succeeded to the throne on October 9, 1934, after the assassination of his father, King Alexander I, at Marseilles on the same date; assumed royal power, March 27, 1941; married in London on March, 20, 1944, to Princess Alexandra of Greece.

By an amendment to the 1931 Constitution, dated May 17, 1941, the Royal Family of Yugoslavia was limited to the King and his consort, his living forbears in the direct line with their wives and issue, the younger brothers of the King with their wives and issue, and the use of the title 'Majesty' or 'Highness' was limited to these persons.

*Brothers of the King*.—Prince Tomislav, born January 19, 1928 (heir-apparent); Prince Andrey, born June 28, 1929.

*Uncle of the King*.—Prince George, born September 8, 1887; on March 27, 1909, he renounced his right of succession to the Throne.

*Aunt of the King*.—Princess Hélène, born November 4, 1884; married, September 9, 1911 to Prince Ivan Constantinovitch (died July 18, 1918), son of the Grand Duke Constantine Constantinovitch of Russia.

The founder of the dynasty was Kara-George (i.e. Black George) Petrovitch, who, in 1804, raised the first Serbian revolt against Turkish rule. He was murdered in 1817, leaving two sons—Alexis, born 1801, and Alexander, born 1806. In 1842 Alexander was chosen reigning Prince by the Skupastina or National Assembly, and the title was confirmed by the Porte, but the dignity was not hereditary. In 1858 Alexander had to abdicate and in 1885 he died in exile. King Peter Karageorgevitch was the third of his house who have ruled in Serbia. He succeeded to the throne on the murder of King Alexander of the Obrenovitch dynasty; was proclaimed King June 11, 1903, and assumed royal rights and duties on his arrival in Belgrade June 29, 1903. King Peter I was crowned September 21, 1904.

Yugoslavia is the result of the fusion, at the close of the 1914-1918 war, of the former kingdoms of Serbia and Montenegro, and of almost all Yugoslav territories which till 1918 were included in the Austro-Hungarian empire. These latter comprised the ancient kingdom of Croatia with Slavonia (but without Istria, Fiume (Rijeka), Zadar and the island of Lastovo, which eventually passed to Italy by the Treaty of Rapallo of 1920 and the Rome Agreement of January, 1924); Bosnia-Herzegovina; Dalmatia; the Slovene territories (excluding part of Koruska (Carinthia), north of the Karavanka mountains, which passed to Austria by plebiscite, and the main part of the county of Gorica (Gorizia), which was annexed to Italy); the Vojvodina; and two other small portions of former Hungarian territory (parts of the Banat and Baranja).

Prior to 1804 only the small principality of Montenegro had maintained independence, last recognized by the Montenegrin-Turkish Treaty of 1799. The remaining territories were partly in the Ottoman Empire, partly in the Hapsburg domains. In 1804 the first Serb revolt against Turkish rule, under which a large part of the Yugoslav lands lay, was made by Kara-George (i.e., Kara, or Swarthy George) Petrovitch. In 1866 the effective independence of the small Kingdom of Serbia was internationally recognized, and at the Congress of Berlin in 1878 this was further increased by the cession of other Serb territory by the Ottoman Empire. The Kingdom of Serbia was further enlarged in 1913, after the Balkan wars, to include (with the exception of some very small districts added after the 1914-1918 war, at the expense of Bulgaria) the whole of what is now Yugoslav Macedonia.

After the Revolution in Austria-Hungary, Slovenia, Croatia, Dalmatia, and Bosnia declared their independence, and their union with Serbia, together with that of Montenegro, which had been voted on November 25, 1918, was proclaimed on December 1, 1918, when the official name of the State was announced as being the Kingdom of the Serbs, Croats and Slovenes.

By the Treaty of Rapallo the boundaries of the new State on the side of Italy were definitely determined, except as regards Fiume, an agreement on which was not reached till January, 1924, when Fiume was awarded to Italy and Barosh to Yugoslavia. On December 5, 1923, Yugoslavia obtained from Greece a free zone in the harbour of Salenika, which by the end of 1923 covered an area of 351,000 square metres (198,000 square metres land and 158,000 square metres water).

By the law of October 3, 1929, the name of the State was changed to Kingdom of Yugoslavia.

On March 25, 1941, the then Prime Minister, M. Tsvetkovitch, signed the Three Power Pact in Vienna on behalf of Yugoslavia, but this course was so much in opposition to the general wish in that country that during the night of March 26 a bloodless revolution swept the government from office and proclaimed that the young king had assumed power.

German forces invaded Yugoslavia on April 6, 1941; on April 18 the old Yugoslav army capitulated. Partition of the country followed its occupation.

Portions of Yugoslav territory were annexed to Germany, Italy, Hungary, Bulgaria and the Italian protectorate of Albania. The Banat was placed under special German military rule. The remaining territory was divided between two puppet states, the so-called 'Independent State of Croatia' and 'Serbia.' In the former, authority was allegedly in the hands of the Ustaasha organization, a band of native Yugoslav Fascists specially trained during the pre-war days in Italy. The puppet Croat State was at first partly occupied by Italian forces, partly by German forces, but eventually not only through the Italian collapse, but also owing to the violent opposition of the population, all effective authority passed to the German military command. The alleged authority in occupied Serbia was a government created by the former Yugoslav General Neditch, supported by the Nationalist organization of *Chetniks*, which had become Fascist in character, but the German military were in control.

In the district of Lyublyana, the capital of Slovenia, at first under Italian control, a quiescent administration was set up under the pro-Fascist General Rupnik.

During 1944 Russian forces expelled the Germans from the greater part of Yugoslavia; Belgrade was re-taken on October 20, 1944, and by March, 1945, about four-fifths of the country was liberated.

### Constitution and Government.

Since the formation of the modern State, Yugoslavia has had two forms of constitution, while a third is at present in embryo. The first constitution (1921), known as the 'Vidovdan Constitution,' was centralist and unitary, though one of parliamentary democracy, with a certain degree of local government. It had, however, been passed in opposition to a considerable part of Yugoslav public opinion. In January, 1929, the constitution was abrogated by King Alexander, who instituted dictatorial personal rule. This period was ended by the dictated constitution of September 3, 1931, which remained in force *de jure* till the Agreement of November 1, 1944, signed in liberated Belgrade by the Yugoslav Premier, Dr. Ivan Subasitch, and Marshal Josip Broz (Tito), for the National Liberation Committee of Yugoslavia, recognized the provisional legislative powers of the Anti-Fascist National Liberation Council.

From the very first days of the Axis invasion of Yugoslavia, a resistance movement, with liberation and democratic aims, developed, known as the National Liberation Movement, under the leadership of the Communist Party of Yugoslavia.

First recognized as effective military leader of growing Yugoslav resistance by the British Government and Allied Military Command, Marshal Josip Broz (or Tito) rallied all progressive Yugoslav patriots. First in 1942, at Bihac, then in November 1943, at Jajce, provisional parliaments of popularly elected delegates met, and at the second session a new constitution for Yugoslavia was sketched, on the basis of the recognition of five peoples (Serbs, Montenegrins, Croats, Slovenes and Macedonians) and six federative units: Serbia (including the Vojvodina and 'Old Serbia'), Macedonia (approximating to the territory formerly known as South Serbia), Croatia-Slavonia (including Dalmatia, with separate local administration, and planning also to include the Peninsula of Istria, Fiume (Rijeka), Zadar and the island of Lastovo, hitherto, since the 1914-18 war, held by

Italy), Montenegro (corresponding to the old kingdom of Montenegro and including the Gulf of Kotor), and Slovenia (comprising Slovenia as hitherto known, but planned also to include Celovec, Klagenfurt and the surrounding Slovene-populated districts of Koruska (Carinthia) and the county of Gorica, east of the River Soca (Isanzo), inclusive of the city and port of Trieste).

On March 2, 1945, King Peter chose the members of the Regency Council as follows:—

Dr. Srdjan Budisavljevitich (Serb),  
Dr. Ante Manditch (Croat) and  
Dushan Sernetz (Slovene).

The Council is to act on the King's behalf and in the name of the people. The councillors were sworn in on March 5, 1945.

Following agreement between the Royal Yugoslav Government, with its seat in London, and the National Liberation Committee, or Government in Yugoslavia dependent on the Anti-Fascist National Liberation Council, a single Government was set up in Belgrade, on March 7, 1945, formed from the above two bodies and other leading Yugoslav political personalities. It consists of:—

*Prime Minister and Minister of National Defence.*—Marshal Josip Broz (Tito) (Communist Party).

*Vice-Premier.*—Dr. Milan Grol (Democrat Party).

*Deputy Prime Minister and Minister for Constituent Assembly.*—Edvard Kardelj (Communist Party).

*Minister for Foreign Affairs.*—Dr. Ivan Subasitch (Croat Peasant Party).

*Minister without Portfolio.*—Dr. Josip Smolaka (no party allegiance).

*Minister for the Interior.*—Vlado Zetchevitich (Independent Democrat Party).

*Minister of Justice.*—Frane Frol (Croat Peasant Party).

*Minister of Education.*—Vladislav Ribnikar (no party allegiance).

*Minister of Finance.*—Sreten Zujevitch (Communist Party).

*Minister without Portfolio.*—Dr. Juraj Sutej (Croat Peasant Party).

*Minister for Communications.*—Todor Vujasinovitch (Serb Agrarian Party).

*Minister for Industry.*—Andrija Hebrang (Communist Party).

*Minister for Commerce and Supplies.*—Nikola Petrovitch (Communist Party).

*Minister for Agriculture.*—Dr. Vasa Cubrilovitch (Serb Agrarian Party).

*Minister for Forestry.*—Sulejman Filipovitch (Bosnian Moslem Party).

*Minister for Mines.*—Bane Andrejev (Macedonian Movement).

*Minister for Internal Colonisation.*—Sreten Vukosavljevitich (Independent Democrat Party).

*Minister for Social Welfare.*—Dr. Anton Krzishnik (Slovene Liberal Party).

*Minister for National Health.*—Dr. Zlatan Sremetz (Croat Peasant Party).

*Minister of Posts, Telegraphs and Telephones.*—Dr. Drago Marusitch (Slovene Peasant Party).

*Minister of Public Works.*—Dr. Rade Pribichevitich (Independent Democrat Party).

*Minister of Information.*—Sava Kosanovitch (Independent Democrat Party).

*Minister for Serbia.*—Jasha Prodanovitch (Serb Republican Party).

*Minister for Croatia.*—Dr. Pavle Gregoritch (Communist Party).

*Minister for Slovenia.*—Edvard Kotzbeek (Slovene Populist Party).

*Minister for Bosnia and Herzegovina.*—Rodoljub Colakovitch (Communist Party).

*Minister for Macedonia.*—Emanuel Chutchkov.

*Minister for Montenegro.*—Milovan Djilas (Communist Party).

The Anti-Fascist National Liberation Council will serve as Provisional Parliament, and the present Government as Provisional Government, until, following complete liberation of Yugoslavia, a new elected Constituent Assembly meets. This Assembly will also determine the form of the State.

### Area and Population.

According to the census taken March 31, 1931, the area and population of Yugoslavia are shown as follows:—

| Banovinas | Capital    | Area in sq. miles | Males     | Females   | Total      | Per sq. mile |
|-----------|------------|-------------------|-----------|-----------|------------|--------------|
| Dravska   | Lyublyana  | 6,119             | 551,311   | 592,087   | 1,144,398  | 187.0        |
| Drinska   | Sarajevo   | 9,618             | 686,949   | 679,296   | 1,366,245  | 142.1        |
| Dunavska  | Novi Sad   | 11,617            | 1,187,816 | 1,185,387 | 2,373,203  | 203.0        |
| Hrvatska  | Zagreb     | 25,900            | 1,968,164 | 2,056,437 | 4,024,601  | 155.4        |
| Moravska  | Nish       | 9,532             | 706,126   | 729,458   | 1,435,584  | 146.0        |
| Vardarska | Skopje     | 14,159            | 785,902   | 788,841   | 1,574,743  | 111.2        |
| Vrbaska   | Banya Luka | 6,623             | 459,900   | 441,811   | 901,711    | 136.1        |
| Zetsa     | Tetinye    | 11,567            | 440,720   | 434,595   | 875,315    | 75.7         |
| Beograd   | —          | 146               | 154,839   | 184,099   | 338,938    | 1,979.0      |
| Total     |            | 95,576            | 6,891,627 | 7,042,411 | 13,934,038 | 145.8        |

Estimated population January 1, 1940, 15,703,000.

The principal towns with their latest census figures (March 31, 1931) are as follows:—

| Town               | Population | Town         | Population |
|--------------------|------------|--------------|------------|
| Belgrade (capital) | 366,849    | Bitolj       | 33,024     |
| Zagreb             | 185,581    | Petrovgrad   | 32,681     |
| Subotica           | 100,058    | Sombor       | 32,334     |
| Lyublyana          | 79,056     | Senta        | 31,969     |
| Sarajevo           | 78,173     | Vrchatz      | 29,411     |
| Skopje             | 64,787     | Vel. Kikinda | 28,400     |
| Novi Sad           | 63,985     | Kragonyevatz | 27,308     |
| Ossyak             | 40,837     | Banja Luka   | 22,165     |
| Nish               | 35,465     | Mostar       | 20,295     |
| Split              | 35,332     | Leskovatz    | 17,632     |
| Maribor            | 33,181     | Cetinje      | 6,366      |

Movement of population is shown as follows for 4 years:—

| Years | Births  | Marriages | Deaths  | Surplus of Births over Deaths |
|-------|---------|-----------|---------|-------------------------------|
| 1936  | 435,861 | 109,528   | 240,879 | 194,982                       |
| 1937  | 424,448 | 117,717   | 242,837 | 181,611                       |
| 1938  | 411,881 | 121,605   | 240,808 | 171,073                       |
| 1939  | 403,938 | 123,877   | 238,196 | 170,742                       |

on natural gas, 1,287,818 bolívares; consumers' tax on oil, 23,189,889 bolívares, and tax on the area of concessions, 16,521,808 bolívares; total, 96,729,143 bolívares, compared with 63,561,400 in 1942. Chief oil regions are the Lake Maracaibo basin (furnishing 70 per cent.) and eastern Venezuela. There are important gold mines in the region to the south-east of Ciudad Bolívar. Output, 1943, amounted to 82,643 fine ozs. Some copper ore has been produced. Coal of poor quality is worked at Coro, in Falcón State, and at Naricual. Salt mines are now worked by the Government; output about 33,838 tons. Iron, tin, asbestos and mica deposits are being exploited. Round the island of Margarita and neighbouring islets off the north coast of Venezuela, pearl fishing is carried on; production, 1943, 4,993,257 carats.

Venezuela has few industries, most manufactured materials required being imported. Wood-working industry is the largest. There are cotton mills at Valencia, Caracas, Maracay and Cumana, producing textiles in the cheaper qualities, cement factories at Valencia and Caracas and a glass factory at Caracas. Electric power is available in most of the larger towns.

### Commerce.

The value of the imports into and exports from Venezuela for 5 years was (at the old par 1 bolívar = 19 cents, U.S.; 25.25 bolívares = £1; official rate is about 3.85 bolívares = 1 dollar, U.S.):—

|         | 1939        | 1940        | 1941          | 1942        | 1943        |
|---------|-------------|-------------|---------------|-------------|-------------|
|         | Bolívares   | Bolívares   | Bolívares     | Bolívares   | Bolívares   |
| Imports | 328,643,047 | 311,169,243 | 287,825,392   | 215,691,215 | 222,059,810 |
| Exports | 953,387,086 | 860,908,683 | 1,061,564,661 | 710,346,329 | 862,083,143 |

Of the 1943 exports, crude petroleum was valued at 786,201,931 bolívares (91 per cent. of the total), coffee (1943) at 34,241,885 bolívares, cacao (1943) at 10,668,703 bolívares. Crude oil amounting to 88 per cent. of the total petroleum exports, goes to the islands of Aruba and Curaçao in the Netherlands West Indies for refining, but under pressure the oil companies in 1942 agreed to establish refineries capable of handling 192,000 barrels daily, making Venezuela the second largest refiner among oil exporting countries. Of the 1943 imports, 148,025,762 bolívares came from the United States and 14,648,567 bolívares from Great Britain.

Excluding imports and exports connected with the foreign-owned oil industry, net domestic imports, 1943, were 155,686 tons; domestic exports were 89,006 tons.

Total trade between Venezuela and the United Kingdom (according to the Board of Trade returns) for 5 years:—

|                                   | 1934      | 1935      | 1936      | 1937      | 1938      |
|-----------------------------------|-----------|-----------|-----------|-----------|-----------|
|                                   | £         | £         | £         | £         | £         |
| Imports from Venezuela to U.K.    | 125,362   | 475,004   | 693,605   | 1,062,427 | 1,257,578 |
| Exports to Venezuela from U.K.    | 1,097,176 | 1,107,792 | 1,207,653 | 1,777,521 | 1,446,699 |
| Re-exports to Venezuela from U.K. | 10,660    | 10,167    | 12,426    | 12,886    | 14,166    |

United Kingdom exports to Venezuela (Board of Trade returns) since 1938 have been: 1939, 1,494,000£; 1940, 1,786,000£; 1941, 1,519,000£; 1942, 1,400,000£; 1943, 1,060,000£, and 1944, 400,000£. Totals for the 8 years, 1939-41, included shipments of war supplies, if any, by Government departments.

### Shipping and Communications.

Foreign vessels are not permitted to engage in the coasting trade, except by special concessions or by contract with the Government. La Guaira and Puerto Cabello are the chief ports. On July 1, 1939, there were 54 vessels under the Venezuelan flag, with a gross tonnage of 7,322.

There are 3,829 miles of road fit for traffic the year round. The Venezuelan link in the Pan-American highway was opened for traffic in 1943. Motor vehicles, 1943, totalled 33,303.

In Venezuela there are 12 main lines of railway (10 national and 2 British, with a total length (1944) of 684 miles. In addition, the oil companies have about 62 miles of railroads. The Great Railway of Venezuela, established by German capital, is 112 miles in extent, running between Caracas and Valencia; the Government took it over in 1943. The Bolívar Railway, 136 miles, the oldest line in the country, with a gauge of only 2 feet, runs from the port of Tucucas to Barquisimeto. Completion in 1942 of the 35-mile El Palito-Palmasola line linked all the railways together. Railway passengers (1942), 1,241,624; omnibus passengers, 14,822,376. In Caracas electric tramways and the local telephone system are British owned.

In summer there are 51 rivers and 20 channels navigable for about 12,000 miles; about 4,460 miles are navigable for canoes and small launches. The Orinoco is navigable for ships of 12 feet draught for part of its length.

The telegraph system has a network (1943) of 8,530 miles with 368 telegraph offices. Number of telegrams, 1943; 3,235,739, of 70,960,954 words. It is supplemented by wireless telegraphy, with 33 stations, and by wireless telephony. There are 11 telephone systems in the principal towns, but not all are interconnected. There were 31,856 instruments in 1941. Daily air mail services, domestic and international, were established in 1930; 945 miles of air service fly the Venezuelan flag.

There are wireless stations at Caracas, Maracaibo, Maracay, Maiquetiá, San Cristóbal, Porlamar, Puerto Cabello, Maturín and Puerto Ayacucho. There are 24 long-wave and 33 short-wave broadcasting stations.

### Banking and Currency.

The Bank of Venezuela has paid-up capital of 18,000,000 bolívares and is at present the sole depository of government funds; power to control the circulation of the currency was granted in 1930. But in October, 1939, Congress authorised the establishment of a Central Bank, with a capital of 10,000,000 bolívares (one half by the Government and one half by the public) to regulate the currency and to act as fiscal agent for the Government. This was opened on January 1, 1941, with a gold stock equal to 29,000,000 dollars (U.S.), rising by August 31, 1944, to 110,000,000 dollars. On that date, against a gold stock of 338,108,000 bolívares and foreign exchange of 37,196,000 bolívares, the Central Bank had notes of its own in circulation of 267,603,000 bolívares, while notes of other national banks were 21,587,000 bolívares. The Bank of Caracas has a paid-up capital of 4,500,000 bolívares. There are 15 other banks, of which ten are Venezuelan (including the Bank of Maracaibo with a capital of 2,500,000 bolívares, and the Commercial Bank of Maracaibo with a capital of 2,000,000 bolívares), and four are foreign, namely, 2 British, 1 American and 1 Dutch. Issue of notes is restricted to six national banks which have power to issue, up to twice their paid-up capital, notes to bearer convertible on presentation. They must publish monthly balance sheets and keep 30 per

### Defence.

The old Yugoslav Army was estimated to number some 1,000,000 men. It was poorly equipped, and disintegrated under the onslaught of the armies of Germany, Italy, Hungary and Bulgaria, attacking along a land-front of over 1,000 miles.

The new Yugoslav Army has passed through three stages. At first consisting of numerous guerrilla or 'Partisan' groups, organized voluntarily and by localities, it became known in 1942 as the National Liberation Army and Partisan Detachments, the latter corresponding to the Home Guard in Great Britain, the former taking shape as a regular army, organized in 'brigades,' each bearing a local name.

Publicly recognized by the Allied Military Command in 1943, this National Liberation Army, together with the Partisan Detachments, on March 1, 1945, became the regular 'Yugoslav Army.' It numbers at present upwards of 800,000 men, a body built up on a voluntary basis, including about 10 per cent. of women.

The embryo Yugoslav Navy was dispersed and destroyed at the outset of the attack on Yugoslavia, but Yugoslav seamen have played a considerable part, in co-operation with the British Royal Navy, in naval operations in the Adriatic conducted by small craft.

The Air Force, consisting of some 600 mainly obsolete machines, was destroyed. New units, equipped with modern aircraft, are in process of formation.

### Production and Industry.

Yugoslavia, with a total area of 24,754,166 hectares (61,142,790 acres), had a cultivated area of 14,574,149 hectares (35,998,148 acres; 58.9 per cent.) in 1939.

In the year 1939, there were in Yugoslavia 1,273,359 horses, 19,475 mules, 123,071 asses, 4,224,595 head of cattle, 10,153,798 sheep, 3,503,454 pigs, 1,866,141 goats and 22,453,730 poultry.

The forest areas of Yugoslavia consist largely of beech, oak and fir, but are less profitable than, with proper management, they might be. The normal timber cut is about 530 million cubic feet per annum. Hemp is an important crop. The area under cultivation, in 1939, was 144,903 acres (142,855 in 1938), and the fibre yield 53,509 metric tons (55,399 metric tons in 1938).

The yield of fruit in 1939 was as follows (in metric tons): apples, 273,111; pears, 127,619; grapes, 777,754; plums, 1,223,104; walnuts, 52,467.

Yugoslavia has considerable mineral resources, including coal (chiefly brown coal), iron, copper ore, gold, lead, chrome, antimony and cement. The total output of coal and lignite was 6,068,088 metric tons in 1939. Brown coal accounted for 4,312,224, lignite for 1,809,748 and hard coal for 446,116 metric tons in 1939. The most important iron mines are at Vares and Lyubija in Bosnia and there are also considerable siderite and limonite iron ores between Priedor, Sanski Most and Topusko. In 1939 the output of iron ore was 666,863 metric tons; 606,884 metric tons in 1938. Copper ore is exploited chiefly at Bor (Serbia); output in 1939, 986,999 metric tons; in 1938, 762,066 metric tons. The principal lead mines are at Trepča and Medica; production of lead-zinc ore in 1939, 775,563 metric tons; in 1938, 882,892 metric tons. Chrome mines are found in the southern part of Serbia and more especially in the neighbourhood of Skopje; output of chrome ore in 1939, 44,097 metric tons; in 1938, 58,470 metric tons. There are 2 antimony mines in western Serbia (Podrinje) which pro-

duced 15,282 metric tons in 1938 (18,961 tons in 1939). Production of salt (excluding sea salt) in 1939, 75,184 metric tons; in 1940, 73,537 metric tons. Production of barite in 1939, 318,840 metric tons; in 1938, 406,368 metric tons; manganese, 5,656 metric tons in 1939; 3,759 metric tons in 1938; pyrites, in 1939, 127,039 metric tons; in 1938, 150,402 metric tons.

Yugoslav industry is unevenly developed at the present. The majority of industries are situated in the north-west part of the country. The southern and south-eastern provinces have preserved their agricultural character to a far higher degree than the north-western ones. The central portion of Yugoslavia (Bosnia) has a great mineral wealth, thus providing favourable conditions for industrial development. In addition, it possesses cheap labour owing to the dense population and its agricultural character. The north and north-east consist of a rich and fertile plain, where agriculture forms the chief occupation, but where different industries are similarly operating, such as the sugar, hemp, milling, and others.

The total number of industrial enterprises in the kingdom at the beginning of 1939 was 3,254, of which 906 were agricultural and food, 405 timber, 125 mining, 206 metallurgical, 188 chemical, 91 leather, 417 textile, 84 paper and printing, 271 electrical, 422 building and 189 miscellaneous.

### Commerce.

Commerce for 5 years:—

|          | 1936          | 1937          | 1938          | 1939          | 1940          |
|----------|---------------|---------------|---------------|---------------|---------------|

| Exports to Yugoslavia from U.K.    | 824,393 | 928,214   | 885,268   | 1,002,438 | 1,235,277 |
| Re-exports to Yugoslavia from U.K. | 17,215  | 25,622    | 58,618    | 80,465    | 131,431   |

### Shipping and Communications.

On June 30, 1939, Yugoslavia possessed a total of 190 vessels of 411,384 (gross) tons.

In 1939, 97,755 vessels of 18,416,514 net tons entered the ports of the kingdom, of these, 91,867 vessels of 14,590,717 tons were Yugoslav.

Yugoslavia has (1939) 6,655 miles of railway, of which 4,593 miles are of normal gauge, and 2,061 miles of narrow gauge. Of the whole length of railway 6,063 miles are under the State's administration.

Of highways there are (1939) 26,047 miles. According to a plan fixed in 1935 the first 621 miles of auto-roads have been built at a cost of about 600 million dinars. Total length of waterways, principally the Danube, the Save, the Drava, the Tisa, the Kupa, the Tamiš and 3 canals, is 1,282 miles. On these waterways there were in 1939, 490 steamships and motorships

engaged in river navigation. In 1939 passenger traffic amounted to 1,579,129 and freights to 3,025,946 tons.

There were (1939) 11,873 miles of telegraph line and 10,795 miles of telephone line.

In 1938 there were 4,098 post-offices, 2,156 telegraph offices, 1,540 central telephone stations, 18 central automatic telephone stations, with a total number of telephone subscribers of 45,172. There were also 1,671 public telephone call-offices.

### Banking and Credit

The principal bank is the National Bank of Yugoslavia, in Belgrade, with a capital of dinars 180,000,000 paid up. Notes in circulation on December 31, 1940, 13,833,892,200 dinars; note cover in gold and foreign exchange, 3,465,705,076 dinars. The Državna Hipotekarna Banka or State Mortgage Bank, the only large State institution of the kind in Yugoslavia, makes advances to a large amount on mortgages. Its deposits on December 31, 1940, amounted to 1,127,563,497 dinars. The Privileged Agrarian Bank was founded in 1929 with a capital of 700 million dinars for the benefit of farmers. Savings deposits at the banks totalled 10,425,000,000 dinars on January 1, 1941. Postal savings accounts numbered 574,238, with 926,277,000 dinars balance at the end of 1940.

### Money, Weights and Measures.

On May 8, 1931, a stabilisation loan was concluded in Paris to the amount of 1,025,000,000 francs for the purposes of the legal stabilisation of the dinar. On May 11 a law for the stabilisation of the dinar was promulgated to take effect on June 28. The dinar was stabilised at a value corresponding to 26.5 milligrams of pure gold, i.e., 11 dinars equals one gold dinar, or 100 dinars equal 9.13 Swiss francs (approximately 276 to the pound sterling).

As a result of the invasion and occupation of Yugoslavia, the country has been flooded with eight debased currencies.

The metric weights and measures have been in practical use since the commencement of 1883. The wagon of 10 metric tons is frequently used as a unit of measure for coal, roots and corn.

### Diplomatic and Consular Representatives.

#### 1. OF YUGOSLAVIA IN GREAT BRITAIN.

*Ambassador Extraordinary and Minister Plenipotentiary.*—Vacant (March, 1945).

*Counsellors.*—Dragoslav M. Protitch, Dr. Velyko Milenkovich and Milivoje Gavrilovich.

*Secretaries.*—B. Popovitch, K. Pavlovitch, Vojislav Bozitch, V. Primuz, Fuad N. Azabaghitch, D. Shepitch and V. Voutchkovitch.

*Military and Naval Attaché.*—Lieut.-Col. Danilo Zobenica.

*Air Attaché.*—Colonel Dragutin P. Savitch.

*Special Attaché.*—Dr. Dragutin P. Subotich.

There are Consular representatives in Bradford, Bristol, Cardiff, Glasgow Liverpool, Manchester and Newcastle-on-Tyne.

#### 2. OF GREAT BRITAIN TO THE GOVERNMENT OF YUGOSLAVIA.

*Ambassador Extraordinary and Minister Plenipotentiary.*—Ralph C. S. Stevenson, C.M.G. (appointed August 10, 1943).

### Statistical and other Books of Reference concerning Yugoslavia.

Three closely allied languages are recognized in the Yugoslav State: Slovene, Macedonian, and the language of the majority, variously known as Serb or Croat, hence often referred to as Serbo-Croat. Serbo-Croat serves as the *lingua franca* of the State, and is variously printed in Cyrillic or Latin characters. Macedonian is printed in the same Cyrillic characters as Serbo-Croat (the Cyrillic alphabets used for Bulgarian, Russian, Ukrainian and Belo-Russian are each slightly different from this), while Slovene is written exclusively in Latin character.

### Religion.

All religions recognised by law enjoy the same rights. According to the results of the census of March 31, 1931, there were of the total population:—Serbian-Orthodox, 6,785,501 (48.70 per cent.); Roman Catholics, 5,217,910 (37.45 per cent.); Greek Catholics, 44,671 (0.32 per cent.); Protestants, 231,169 (1.66 per cent.); Moslem, 1,561,166 (11.20 per cent.); Jews, 68,405 (0.49 per cent.); others, 18,006 (0.11 per cent.).

The Serb Orthodox, or Serb Pravoslav, Church is ruled by a Patriarch and a Holy Synod. On September 12, 1920, the Patriarchate of the Serbs, originally established by King Stephen VII Dushan on April 9, 1846, and suppressed by Sultan Mustafa III on September 13, 1766, was reconstituted. The Serb Orthodox (Pravoslav) Church is divided, according to its constitution, into 21 bishoprics. The bishops with sees at Cetinje, Skoplye, Sarajevo and Zagreb have the rank of Metropolitan. There are 3,021 parishes and 206 monasteries. According to the provisions of the Constitution of the Serbian Church, published in November, 1931, the Church is governed on an autonomous basis and has the right to organise its own life according to its needs.

The Roman Catholic Church in Yugoslavia is governed in its relations with the State by the Concordats of 1855 in the territories which used to form part of Austria or Hungary; of 1866 for Montenegro; of 1881 for Bosnia and Herzegovina; and of 1914 for Serbia. It is divided into three complete Provinces: of Belgrade with 2 Suffragan Sees, of Sarajevo with 2 Suffragan Sees and of Zagreb with 4 Suffragan Sees and jurisdiction over the Byzantine Uniat Bishop of Krizevce. In addition to these there is 1 Archbishopric at Bari and 7 Bishoprics which depend immediately upon the Holy See in Rome. There is an Apostolic Administrator for those parts of the diocese of Zara which are in Yugoslavia. The Church is organised in 1,971 parishes, and there are 349 monasteries and convents.

There also exists an Old Catholic Church, with one bishop and a Synodal Council at Zagreb, who together exercise control and supervision over all religious and educational activities of that Church.

The Protestants are chiefly in the territories which used to form part of Hungary. For the most part, they belong to the Calvinist and Lutheran creeds. From 1930, two independent Protestant Evangelical Churches of the Lutheran creed have been legally recognised: the German and the Slovak. The Baptists and Methodists Churches are less numerously represented.

The Moslem Religious Union has one Reis-ul-Ulema, who represents the unity of that religious organisation. His seat is Sarajevo. The administration and supervision over all Moslem religious, educational and cultural activities is exercised by the ulema-medjlissas: one at Sarajevo and one at Skoplye.

The Jewish religious organisation had one Grand Rabbi, with his seat at Belgrade.

### Education.

Elementary education is compulsory, and, in all the primary schools under the Ministry of Education, it is free. It lasts 8 years and the schools are divided into elementary and continuation schools of four years duration each. Children intending to continue their education in technical or similar schools are exempted from attendance in continuation schools. In the year 1938-39 there were 8,956 elementary schools with 32,144 teachers and 1,428,223 pupils. There were 2,519 teachers and 42,750 pupils in the middle-class schools. There were 205 secondary schools with 125,098 pupils and 5,607 teachers, and 34 training colleges for teachers, with 3,898 pupils and 503 teachers. There were 671 primary professional and industrial schools with 5,368 teachers and 60,856 pupils, and 85 secondary professional schools with 1,109 teachers and 16,048 pupils; 54 agricultural schools with 357 teachers and 2,657 pupils; and 23 theological colleges. The latter had 2,178 students and 245 teachers in 1938-39.

There are three universities in the kingdom: at Belgrade, founded in 1838; at Zagreb (Agram), founded in 1874, and at Lyublyana, founded in 1919. In 1938-39 the total number of students attending the universities was 17,734, with 1,271 professors. The University of Belgrade had two more sections: a law faculty in Subotica and an arts faculty in Skopljje.

### Justice and Crime.

The whole legal system is being reformed. Magistrates and judges are dependent for election on the new democratic administrative committees.

### Finance.

Estimates of receipts and expenditure for 6 years were as follows:—

| Year    | Revenue     | Expenditure | Year                 | Revenue     | Expenditure |
|---------|-------------|-------------|----------------------|-------------|-------------|
|         | 1000 dinars | 1000 dinars |                      | 1000 dinars | 1000 dinars |
| 1934-35 | 10,171,251  | 10,171,251  | 1937-38              | 11,937,000  | 11,068,000  |
| 1935-36 | 10,171,251  | 10,349,802  | 1938-39              | 12,357,000  | 11,814,000  |
| 1936-37 | 10,323,518  | 10,525,518  | 1939-40 <sup>1</sup> | 12,756,000  | 11,920,000  |

<sup>1</sup> Estimates.

On July 1, 1939, the public external debt of Yugoslavia comprised Tobacco Lottery Loan, 1888, 4,170,000 dinars; 4 per cent. Conversion Loan, 1895, 221,000,000 nominal francs, 17,760L, 25,500,000 dinars; 5 per cent. Loan, 1902, 38,465,500 nominal francs; 4½ per cent. Loan, 1906, 60,020,000 nominal francs; 4½ per cent. Loan, 1909, 74,849,500 nominal francs, 12,500,000 dinars; 5 per cent. Loan, 1913, 194,917,000 nominal francs; 4½ per cent. State Mortgage Bank Loan, 1910, 21,928,500 nominal francs; 4½ per cent. State Mortgage Bank Loan, 1911, 23,643,500 nominal francs; Serbian Red Cross Lottery Bonds, 16,700,000 nominal francs; 5 per cent. Montenegrin Loan, 1909, 152,500L; 5 per cent. Montenegrin Loan, 1913, 2,015,800 French francs; Debt to Austro-Hungarian State Railways (Steg), 5,587,263 French francs; Debt to Caisse Commune, 120,756,722 gold francs; Blair Loan, 1922, 8 per cent. and 7 per cent., 30,518,900 dollars; 5 per cent. Oriental Railways Loan, 7,500,000 French francs; 5 per cent. 380,000,000 French francs loan, 1924, and 3 per cent. Advance, 1931, 280,000,000 French francs; 7 per cent. Stabilisation Loan, 1931, 887,824,000 French francs; Debt for purchase of Southern Railways, 160,000,000 nominal francs; 5 per cent. Funding Loan, French, 1933 and 1935, 392,246,500 French francs; 5 per cent. Funding Loan, U.S.A., 1933 and 1935, 5,614,000 dollars. The internal debt on April 1, 1939, amounted to 8,618,000,000 dinars.
