## INDEX

. 1367

## II.—THE LEAGUE OF NATIONS.

*Acting-Secretary-General: Mr. Sean Lester.*

The League of Nations is an association of States which have pledged themselves, through signing the Covenant (i.e., the constitution of the League) (For the text of the Covenant, see THE STATESMAN'S YEAR-BOOK for 1921, page xxviii), not to go to war before submitting their disputes with each other or States not members of the League to arbitration or enquiry and a delay of from three to nine months. Furthermore, any State violating this pledge is automatically in a state of outlawry with the other States, which are bound to sever all economic and political relations with the defaulting member. The States Members of the League have pledged themselves to co-operate over a wide range of economic, social, humanitarian and labour questions.

The League of Nations formally came into existence on January 10, 1920, through the coming into force at that date of the Treaty of Versailles. The two official languages of the League are English and French. The seat of the League is Geneva, Switzerland.

## L MEMBERSHIP.

The following 44 States are members of the League (January 31, 1945):--

| 1945-1949            |                    | 1950-1954              |  | 1955-1959 |          |

<sup>1</sup> Made declarations of independence.

<sup>a</sup> Made declarations putting the protection of their national minorities under League auspices as a condition of their entry into the League.

Brazil on June 12, 1926, Spain on September 8, 1926, Japan on March 27, 1933, Germany on October 21, 1933, Paraguay on February 24, 1935, Guatemala on May 13, 1936, Honduras on June 22, 1936, Nicaragua on June 26, 1936, Italy on December 11, 1937, Chile on June 2, 1938, Venezuela on July 11, 1938, San Salvador on August 10, 1939, Peru on April 8, 1939, Hungary on April 11, 1939, Albania on April 14, 1939, Rumania on July 11, 1940, France on April 19, 1941, and Haiti on April 8, 1942, announced their withdrawal from the League; according to Art. 1, par. 8, of the Covenant, the notice of withdrawal from comes into force two years after it has been given. On April 16, 1943, General de Gaulle, in agreement with General Giraud, repudiated the Vichy Government's withdrawal from the League and asked that France should be considered still a member. On March 27, 1978, Spain received to continue a member of the League, but again gave notice of withdrawal on May 9, 1939.

The following 20 States are not members of the League:—United States, France, Chile, Costa Rica, Germany, Guatemala, Honduras, Japan, Nicaragua, Paraguay, Saudi Arabia, Salvador, Italy, U.S.S.R., Venezuela, Hungary, Peru, Rumania, Haiti and Siam. Costa Rica became a member of the League on December 16, 1920, but on December 24, 1924, she gave notice of her intention to withdraw, on the ground of the expense involved. The notice became effective on December 24, 1926.

## II. THE ORGANS OF THE LEAGUE.

The primary organs of the League are :—

1. The Council
2. The Assembly.
3. The Secretariat.
4. The International Labour Organisation.
5. The Permanent Court of International Justice (at The Hague).

## 1. THE COUNCIL

1. The Council.

The Council was originally composed of four permanent Members (the British Empire, France, Italy and Japan) and four non-permanent Members to be elected every year by a majority of the Assembly. The first non-permanent Members, appointed by the Peace Conference and named in the Covenant before the first Assembly met, were Belgium, Brazil, Greece and Spain. With the approval of the majority of the Assembly the Council may appoint new permanent and non-permanent Members. At the Assembly of September, 1926, Germany was admitted to the League and given a permanent seat on the Council. At the same time the number of non-permanent seats, already increased to six in 1922, was further increased to nine, the period of office to be three years. In 1927, was further increased to nine, the period of office to be three years. In order to institute the new system of rotation, three were elected for one year, three for two years, and three for three years, so that at all subsequent Assemblies three members retire instead of nine at once. Furthermore, the rule was established that a retiring member is ineligible for re-election for three years unless specially declared re-eligible. The number of members elected after being declared re-eligible may not exceed three. Hitherto the only States to secure a declaration of re-eligibility have been China, Poland and Spain, but in December, 1939, both China and Bolivia were exceptionally re-elected without such previous declaration. China re-entered the Council in 1936 as a result of such obtain the necessary majority. Spain applied for re-eligibility in 1937, but did not obtain the necessary majority. China re-entered the Council in 1936 as a result of such obtain the necessary majority. A tenth non-permanent seat was created for three practices unable to enter the Council, a tenth non-permanent seat was created for three years in 1933, and in 1936 this seat was continued in existence for another three years and an eleventh non-permanent seat created for three years (i.e. till 1939). Any Member of the League not represented on the Council shall be invited to send a representative to sit on it at any meetings at which matters especially affecting it are being discussed. A similar invitation may be extended to States not Members of the League.

A similar invitation may be extended to States not Members of the League.

The Council meets on the 3rd Monday in January, the 2nd Monday in May, and just before and after the Assembly in September.

At its session of December 14, 1930, the Council was composed as follows—

**PERMANENT MEMBERS.**

United Kingdom and Northern Ireland. France.

### NON-PERMANENT MEMBERS.

|                        |                     |             |
|------------------------|---------------------|-------------|
| Union of South Africa. | Dominican Republic. | Persia.     |
| R. Igium.              | Egypt.              | Peru.       |
| Bolivia.               | Finland.            | Yugoslavia. |
| China.                 | Greece.             |             |

Owing to the war, the Council has been unable to meet since December, 1939. See Appendix below.

## 2 THE ASSEMBLY.

**2. THE ASSEMBLY.**  
Every State Member of the League is entitled to be represented by a delegation to the Assembly composed of not more than three delegates and three substitute delegates, but it has only one vote. It meets at the seat of the League (Geneva) on the second or, in certain circumstances, the first Monday in September. It may meet at other places than Geneva, but hitherto it has never done so; extraordinary sessions may be called to deal with urgent matters. It meets at the first meeting of the session, and holds office for the

The President is elected at the first meeting of the session, and holds office for the duration of the session.

The Assembly divides itself into the following committees:

# INTRODUCTORY TABLES.

## I.—THE BRITISH COMMONWEALTH, 1943-44.

### SUMMARY OF AREA AND POPULATION

|                                              | Area, sq. miles | Estimated Population |
|----------------------------------------------|-----------------|----------------------|
| Great Britain and Northern Ireland . . . . . | 94,653          | 46,064,000           |
| Europe . . . . .                             | 27,124          | 3,295,000            |
| Asia . . . . .                               | 1,505,567       | 410,000,000          |
| Africa . . . . .                             | 5,828,293       | 85,735,000           |
| America . . . . .                            | 3,963,845       | 14,405,000           |
| Antarctica . . . . .                         | 3,282,665       | 10,777,000           |
| Total . . . . .                              | 12,502,127      | 560,095,000          |

\* Mandated territories.

<sup>1</sup> Year 1942-43.  
<sup>2</sup> Estimated.  
<sup>3</sup> Year 1940-41.

N.B.—Conversions into sterling have been made at the par of exchange.

of which every State Member of the League has the right to be represented by one delegate:

- I. Juridical.
- II. Technical Organisations.
- III. Disarmament.
- IV. Budget and Staff.
- V. Social Questions.
- VI. Political Questions and admission of new Members.
- VII. As an experiment, the General Committee of the 19th Assembly decided to set up a Seventh Committee to deal with questions of Health, Opium and Intellectual Co-operation.

The decisions of the Assembly must be voted unanimously, except where the Covenant or the Peace Treaties provide otherwise. As a general principle decisions on questions of procedure are voted by majority.

Owing to the war, neither Assembly nor Council have been able to meet since 1939. Authority for League activities has been vested by the Assembly, for the duration, in the Secretary-General and Supervisory Commission.

#### 3. THE SECRETARIAT.

The Secretariat is a permanent organ composed of the Secretary-General and a number of officials selected from among citizens of various nations. The post of Acting-Secretary-General, during the war, was accepted by Mr. Sean Lester, on the resignation of the Secretary-General, M. Avenol, in September, 1940. The other officials are appointed by the Secretary-General with the approval of the Council. During the war, personnel at Geneva has been rigorously cut down, but at the same time most members of the Economic and Financial Section and the Permanent Central Opium Board have been transferred to Princeton University and to Washington, U.S.A. There is a Branch Office in London (14a Portman Mansions, W.1).

#### 4. THE INTERNATIONAL LABOUR ORGANISATION.

This body was set up at the end of the World War in accordance with Part XIII of the Versailles Treaty. It concludes international agreements on minimum labour standards. All States Members of the League are members of the I.L.O.; also Brazil and the U.S.A. It consists of an Annual Conference, a Governing Body and an office at Geneva. As a result of the war, the majority of the (reduced) staff were established at McGill University, Montreal, Canada. The Acting-Director of the I.L.O. is Mr. E. J. Phelps, who succeeded Mr. J. G. Wisant, when the latter became U.S.A. Ambassador to Great Britain in 1941. A very small staff remains at Geneva.

#### 5. PERMANENT COURT OF INTERNATIONAL JUSTICE.

The revised Statutes adopted at the 10th Assembly provide for 15 Judges for the Court, and stipulate that the Court shall remain permanently in Session except for such holidays as it may decide. The Judges are elected jointly by the Council and the Assembly of the League for a term of 9 years. The German occupation of Holland in 1940 made it impossible for the Court to function there. The President and Registrar went to Geneva.

The Secondary Organs of the League are:—

##### (a) The Technical Organisations.

1. Economic and Financial.
2. Health.
3. Communications and Transit.

##### (b) Advisory Committees.

1. Military, Naval and Air Commission.
2. Commission of Enquiry for European Union.
3. Mandates Commission.
4. Opium Committee.
5. Social Committee.
6. Committee of Experts on Slavery.

##### (c) Supervisory Commission.

Responsible for League Budget, and vested by the Assembly with wide general authority, for duration of the war.

##### (d) Committee of Intellectual Co-operation.

##### (e) International Institute.

*Institute of Intellectual Co-operation. (Formerly in Paris.)*

## INTRODUCTORY TABLES

### III. BUDGET OF THE LEAGUE.

(1) Scale of allocation of the expenses of the League for 1945.

| Country            | Units | Country    | Units | Country     | Units |
|--------------------|-------|------------|-------|-------------|-------|
| Afghanistan        | 1     | Ecuador    | 1     | Netherlands | 2     |
| Albania            | 16    | Egypt      | 12    | New Zealand | 2     |
| Africa, South      | (1)   | Iran       | 10    | Norway      | 2     |
| Argentina          | 21    | Estonia    | (1)   | Panama      | 1     |
| Australia          | 25    | Ethiopia   | 1     | Poland      | 1     |
| Belgium            | 1     | Finland    | 5     | Portugal    | 8     |
| Bolivia            | 2     | France     | 1     | Sweden      | 19    |
| Britain, Great     | 108   | Greece     | 48    | Switzerland | 17    |
| Bulgaria           | 4     | India      | 5     | Thailand    | 5     |
| Canada             | 25    | Iran       | 3     | Turkey      | 10    |
| China              | 5     | Iraq       | (1)   | Uruguay     | 4     |
| Colombia           | 5     | Latvia     | 1     | Yugoslavia  | 1     |
| Cuba               | 1     | Liberia    | (1)   | Total       | 421   |
| Czechoslovakia     | (1)   | Lithuania  | 1     |             |       |
| Denmark            | 1     | Luxembourg | 11    |             |       |
| Dominican Republic | 1     | Mexico     | 11    |             |       |

NOTE.—Figures in brackets denote nominal units: the corresponding contribution is not counted in the total.

(2) General Budget for the twenty-seventh financial period (1945).

| Expenditure Budget.                                                 | Swiss Francs. |
|---------------------------------------------------------------------|---------------|
| Secretariat                                                         | 3,126,817     |
| International Labour Organisation                                   | 7,851,517     |
| Ditto (1944 advance)                                                | 681,499       |
| Permanent Court of International Justice                            | 471,326       |
| Permanent Central Opium Board                                       | 120,889       |

| Pensions                                                            | 1,365,550     |
| Partial Restoration to the Working Capital Fund of the 1942 deficit | 301,787       |
| Ditto (1943 deficit)                                                | 555,424       |
| Total                                                               | 14,868,409    |

Contributions payable in 1945 by the principal countries are (in gold francs):—United Kingdom, 2,097,825; India, 1,199,033; France, —; Canada, 874,295; Australia, 574,587; Argentina, 524,577; China, 524,577.

### IV. MANDATES.

The African and Pacific possessions of Germany and certain territories of the Ottoman Empire were ceded by these countries at the end of the war to the Allied and Associated Powers. The latter had inserted an article (Art. 22) in the Covenant of the League according to which the inhabitants of these territories should be put under the tutelage of 'advanced nations who by reason of their resources, their experience, or their geographical position, can best undertake this responsibility.' These nations should act as mandataries of the League, and exercise their powers on behalf of the League. They should act on the principle that the well-being and development of the peoples under their tutelage formed a 'sacred trust of civilisation,' and should render the Council an annual report on the territory committed to their charge.

Article 22 furthermore divides the mandated territories into three classes, according to the degree of civilisation of their inhabitants, economic and geographic circumstances and so forth. Class A is composed of the communities detached from the Ottoman Empire, declared to have 'reached a stage of development where their existence as independent nations can be provisionally recognised subject to the rendering of administrative advice and assistance by a Mandatory until such time as they are able to stand alone.'

**Employers' Group:**

Mr. Antoine (French)  
Mr. Chapa (Mexican)  
Mr. Brulker (Indian)  
Sir John Forbes Watson (British)  
Mr. Gemmill (South African)  
Mr. Harriman (United States)  
Mr. Joassart (Belgian)  
Mr. Morawetz (Czechoslovak)

**Workers' Group:**

Mr. Andersson (Swedish)  
Mr. Bengough (Canadian)  
Mr. Chu Hsueh-fan (Chinese)  
Mr. Hallsworth (British)  
Mr. Laurent (French)  
Mr. Lombardo Toledano (Mexican)  
Mr. Oldenbrook (Netherlands)  
Mr. Watt (United States)

The number of States Members of the International Labour Organisation is now 52. The Organisation has held twenty-six Sessions of the Conference, as shown below. At these Conferences the following Draft Conventions and Recommendations have been adopted:—

*First Session (Washington, 1919).*

Draft Convention limiting the hours of work in industrial undertakings to eight in the day and forty-eight in the week.  
Draft Convention concerning unemployment.  
Recommendation concerning unemployment.  
Recommendation concerning reciprocity of treatment of foreign workers.  
Draft Convention concerning the employment of women before and after childbirth.  
Draft Convention concerning employment of women during the night.  
Recommendation concerning the prevention of anthrax.  
Recommendation concerning the protection of women and children against lead poisoning.  
Recommendation concerning the establishment of Government health services.  
Draft Convention fixing the minimum age for admission of children to industrial employment.  
Draft Convention concerning the night work of young persons employed in industry.  
Recommendation concerning the application of the Berne Convention of 1906 on the prohibition of the use of white phosphorus in the manufacture of matches.

*Second Session (Genoa, 1920).*

Recommendation concerning the limitation of hours of work in the fishing industry.  
Recommendation concerning the limitation of hours of work in inland navigation.  
Recommendation concerning the establishment of national seamen's codes.  
Draft Convention fixing the minimum age for admission of children to employment at sea.  
Recommendation concerning unemployment insurance for seamen.  
Draft Convention concerning unemployment indemnity in case of loss or foundering of the ship.  
Draft Convention for establishing facilities for finding employment for seamen.

*Third Session (Geneva, 1921).*

Recommendation concerning the prevention of unemployment in agriculture.  
Recommendation concerning the protection, before and after childbirth, of women wage-earners in agriculture.  
Recommendation concerning night work of women in agriculture.  
Draft Convention concerning the age for admission of children to employment in agriculture.  
Recommendation concerning night work of children and young persons in agriculture.  
Recommendation concerning the development of technical agricultural education.  
Recommendation concerning living-in conditions of agricultural workers.  
Draft Convention concerning the rights of association and combination of agricultural workers.  
Draft Convention concerning workmen's compensation in agriculture.  
Recommendation concerning social insurance in agriculture.  
Draft Convention concerning the use of white lead in painting.  
Draft Convention concerning the application of the weekly rest in industrial undertakings.  
Recommendation concerning the application of the weekly rest in commercial establishments.  
Draft Convention fixing the minimum age for the admission of young persons to employment as trimmers or stokers.  
Draft Convention concerning the compulsory medical examination of children and young persons employed at sea.

## INTRODUCTORY TABLES

*Fourth Session (Geneva, 1922).*

Recommendation concerning communication to the International Labour Office of statistical and other information regarding emigration, immigration and the repatriation and transit of emigrants.

*Fifth Session (Geneva, 1923).*

Recommendation concerning the general principles for the organisation of systems of inspection to secure the enforcement of the laws and regulations for the protection of the workers.

*Sixth Session (Geneva, 1924).*

Recommendation concerning the development of facilities for the utilisation of workers' spare time.

*Seventh Session (Geneva, 1925).*

Draft Convention concerning workmen's compensation for accidents.  
Recommendation concerning the minimum scale of workmen's compensation.  
Recommendation concerning jurisdiction in disputes on workmen's compensation.  
Draft Convention concerning workmen's compensation for occupational diseases.  
Recommendation concerning workmen's compensation for occupational diseases.  
Draft Convention concerning equality of treatment for national and foreign workers as regards workmen's compensation for accidents.  
Recommendation concerning equality of treatment for national and foreign workers as regards workmen's compensation for accidents.  
Draft Convention concerning night work in bakeries.

*Eighth Session (Geneva, 1926).*

Draft Convention concerning the simplification of the inspection of emigrants on board ship.  
Recommendation concerning the protection of emigrant women and girls on board ship.

*Ninth Session (Geneva, 1926).*

Draft Convention concerning seamen's articles of agreement.  
Draft Convention concerning the repatriation of seamen.  
Recommendation concerning the repatriation of masters and apprentices.  
Recommendation concerning the general principles for the inspection of the conditions of work of seamen.

*Tenth Session (Geneva, 1927).*

Draft Convention concerning sickness insurance for workers in industry and commerce and domestic servants.  
Draft Convention concerning sickness insurance for agricultural workers.  
Recommendation concerning the general principles of sickness insurance.

*Eleventh Session (Geneva, 1928).*

Draft Convention concerning the creation of minimum wage fixing machinery.  
Recommendation concerning the application of minimum wage fixing machinery.

*Twelfth Session (Geneva, 1929).*

Draft Convention concerning the marking of the weight on heavy packages transported by vessels.  
Draft Convention concerning the protection against accidents of workers employed in loading or unloading ships.  
Recommendation concerning the prevention of industrial accidents.  
Recommendation concerning responsibility for the protection of power-driven machinery.  
Recommendation concerning reciprocity as regards protection against accidents of workers employed in loading or unloading ships.  
Recommendation concerning the consultation of workers' and employers' organisations in the drawing up of regulations dealing with the safety of workers employed in loading or unloading ships.

*Thirteenth Session (Geneva, 1929).*

(No Conventions or Recommendations.)

*Fourteenth Session (Geneva, 1930).*

Draft Convention concerning forced or compulsory labour.  
Draft Convention concerning the regulation of hours of work in commerce and offices.  
Recommendation concerning indirect compulsion to labour.  
Recommendation concerning the regulation of forced or compulsory labour.

Class B, consisting of the former German colonies in Central and East Africa, should be administered by the Mandatory under conditions which will guarantee freedom of conscience or religion, subject only to the maintenance of public order and morals, the prohibition of abuses such as the slave trade, the arms traffic and the liquor traffic, and the prevention of the establishment of fortifications or military or naval bases and of military training of the natives for other than police purposes and the defence of territory, and will also secure equal opportunities for the trade and commerce of other members of the League.

Class C (German South-West Africa and Pacific Islands possessions) is composed of territories which, owing to sparseness of population, small size, remoteness from centres of civilisation, or geographical contiguity to the territory of the Mandatory Power, 'can best be administered under the laws of the Mandatory as integral portions of its territory subject to the safeguards above mentioned in the interests of the indigenous population.'

The Supreme Council, as the organ of the Allied and Associated Powers, allocated the mandates for the territories ceded by Germany and Turkey, subject to the approval of the Council of the League. The mandates and mandatory powers, as determined by the Supreme Council, are:—

*A Mandates.*—Palestine attributed to Great Britain. Syria (including Lebanon), attributed to France.

*B Mandates.*—Togoland and Cameroon, attributed in part to Great Britain and in part to France.

The North-Western portion of former German East Africa, attributed to Belgium. The remainder of former German East Africa (now Tanganyika Colony), attributed to Great Britain.

*C Mandates.*—Former German South Pacific possessions (except Nauru and Samoa), attributed to Australia.

Samoa, attributed to New Zealand, and Nauru, attributed to the British Empire and administered by Australia.

Former German North Pacific possessions (Yap, etc.), attributed to Japan.  
Former German South-West Africa, attributed to the Union of South Africa.

## V. PUBLICATIONS OF THE LEAGUE.

Principal Publications issued by the Publications Department of the Secretariat of the League of Nations:—

- Covenant of the League.
- Official Journal (and Supplements).
- Treaty Series (Treaties and International Engagements registered by the Secretariat of the League).
- Records of the Meetings of the Assembly.
- Minutes of the Sessions of the Council of the League of Nations.
- Reports of the Secretary-General.
- Monthly List of Selected Articles.
- Ten Years of World Co-operation. Preface by Sir Eric Drummond.
- Essential Facts about the League of Nations.
- The Aims, Methods and Activity of the League of Nations.
- The Monthly Bulletin of Statistics.
- Statistical Year-Book of the League of Nations.
- World Economic Survey.
- Review of World Trade.
- Balances of Payments.
- International Trade Statistics.
- Money and Banking.
- Public Finance.
- World Production and Prices.
- Bulletin of the Health Organisation.
- Armaments Year Book.
- Statistical Year-Book on the Trade in Arms and Ammunition.
- Records and Reports of the Conference for the Reduction and Limitation of Armaments.
- Minutes of the Permanent Mandates Commission.
- Minutes of the Advisory Committee on Traffic in Opium.
- Estimated World Requirements of Dangerous Drugs.
- Reports of the Permanent Central Opium Board.
- Reports on the Work of the Advisory Committee on Social Questions.
- Annual Reports on Child Welfare.
- Reports of the League of Nations High Commissioner for Refugees.
- Handbook of International Organisations.

## INTRODUCTORY TABLES

Reports and special studies issued since 1940 include:  
Powers and Duties attributed to the League of Nations by International Treaties.  
Reports of the Economic and Financial Committees.

Europe's Trade.  
The Network of World Trade.  
Wartime Rationing and Consumption.  
Food Rationing and Supply, 1943-44.  
Commercial Policy in the Inter-War Period: International Proposals and National Policies.  
Economic Fluctuations in the United States and the United Kingdom, 1918-1932.  
Relief Deliveries and Relief Loans, 1918-1933.  
The Transition from War to Peace Economy.  
Trade Relations between Free-Market and Controlled Economies.  
Quantitative Trade Controls: Their Causes and Nature.  
Europe's Overseas Needs, 1918-1930, and how they were met.  
Agricultural Production in Continental Europe during the 1914-1918 War and the Reconstruction Period.  
The Future Population of Europe and the Soviet Union: Population Projections, 1940-1970.  
International Currency Experience: Lessons of the Inter-War Period.  
Pre-War Production and Distribution of Narcotic Drugs and their Raw Materials.  
Catalogues will be sent on request by the Publications Department of the League of Nations, Geneva, Switzerland, or by any of the authorised agents in various countries for League Publications. (Agents for the United Kingdom: Messrs. George Allen & Unwin, Ltd., London.)

## III.—INTERNATIONAL LABOUR ORGANISATION.

*Acting Director.*—Mr. E. J. Phelan.  
*Assistant Director.*—Mr. Lindsay Rogers, Mr. J. E. Bens and Mr. G. A. Johnston.  
The International Labour Organisation was constituted in 1919 as an autonomous organisation of the League of Nations. Its object is the establishment of social justice since 'the failure of any nation to adopt humane conditions of labour is an obstacle in the way of other nations which desire to improve the conditions in their own countries.' Membership of the League of Nations carries with it membership of the Organisation, which also includes certain States which do not or have ceased to belong to the League. The Organisation consists of the International Labour Conference, which meets at least once a year and the Governing Body are composed of representatives of governments, employers and workers. The decisions of the Conference take the form of Draft Conventions or Recommendations within whose competence the matter lies for the enactment of legislation or other action. If a Draft Convention obtains the assent of the competent authorities, the Member must communicate the formal ratification of it to the Secretary-General of the League of Nations. If the competent authority does not consent, no further obligation rests on the Member. The Members report annually to the International Labour Office on the measures which they have taken to give effect to the conventions which they have ratified. Machinery also exists for the case of complaints made against a Member that fails to give proper application to a Convention which it has ratified. In the case of a Recommendation the Members have to inform the Secretary-General of the League of the action taken. The functions of the International Labour Office are the preparation of the agenda of the Conference, the collection and distribution of information on all subjects relating to the international adjustment of industrial life and labour, the publication in various languages of periodicals and reports dealing with problems of industry and employment and any other duties assigned to it by the Conference.

### GOVERNING BODY OF THE INTERNATIONAL LABOUR OFFICE.

The Governing Body, under the control of which the International Labour Office works, is composed of sixteen Government representatives, eight employers' representatives, and eight workers' representatives.

Chairman: Mr. Carter Goodrich (United States of America).  
Vice-Chairmen: Sir John Forbes Watson and Mr. J. Hallsworth.

*Government Group:*  
United States of America  
Belgium  
Brazil  
Canada  
Chile  
China  
France  
Great Britain

Greece  
India  
Mexico  
Netherlands  
Norway  
Peru  
Poland  
Yugoslavia

Recommendation concerning the regulation of hours of work in hotels, restaurants, and similar establishments.

Recommendation concerning the regulation of hours of work in theatres and other places of public amusement.

Recommendation concerning the regulation of hours of work in establishments for the treatment or the care of the sick, infirm, destitute, or mentally unfit.

*Fifteenth Session (Geneva, 1931).*

Draft Convention limiting hours of work in coal mines.

*Sixteenth Session (Geneva, 1932).*

Draft Convention concerning the protection against accidents of workers employed in loading or unloading ships (revised 1932).

Recommendation for expediting reciprocity as provided for in the Convention, adopted in 1932, concerning the protection against accidents of workers employed in loading or unloading ships.

Draft Convention concerning the age for admission of children to non-industrial employment.

Recommendation concerning the age for admission of children to non-industrial employment.

*Seventeenth Session (Geneva, 1933).*

Draft Convention concerning fee-charging employment agencies.

Recommendation concerning employment agencies.

Draft Convention concerning compulsory invalidity insurance for persons employed in industrial or commercial undertakings, in the liberal professions, and for outworkers and domestic servants.

Draft Convention concerning compulsory invalidity insurance for persons employed in agricultural undertakings.

Draft Convention concerning compulsory old age insurance for persons employed in industrial or commercial undertakings, in the liberal professions, and for outworkers and domestic servants.

Draft Convention concerning compulsory old age insurance for persons employed in agricultural undertakings.

Draft Convention concerning compulsory widows' and orphans' insurance for persons employed in industrial or commercial undertakings, in the liberal professions, and for outworkers and domestic servants.

Draft Convention concerning compulsory widows' and orphans' insurance for persons employed in agricultural undertakings.

Recommendation concerning the general principles of invalidity, old age and widows' and orphans' insurance.

*Eighteenth Session (Geneva, 1934).*

Draft Convention concerning employment of women during the night (revised 1934).

Draft Convention concerning workmen's compensation for occupational diseases (revised 1934).

Draft Convention for the regulation of hours of work in automatic sheet-glass works.

Draft Convention ensuring benefit or allowances to the involuntarily unemployed.

Recommendation concerning unemployment insurance and various forms of relief for the unemployed.

*Nineteenth Session (Geneva, 1935).*

Draft Convention concerning the employment of women on underground work in mines of all kinds.

Draft Convention limiting hours of work in coal mines (revised 1935).

Draft Convention concerning the reduction of hours of work to forty a week.

Draft Convention concerning the establishment of an international scheme for the maintenance of rights under invalidity, old-age and widows' and orphans' insurance.

Draft Convention concerning the reduction of hours of work in glass-bottle works.

Recommendation concerning unemployment among young persons.

*Twentieth Session (Geneva, 1936).*

Draft Convention concerning the regulation of certain special systems of recruiting workers.

Draft Convention concerning the reduction of hours of work on public works.

Draft Convention concerning annual holidays with pay.

Recommendation concerning the progressive elimination of recruiting.

Recommendation concerning annual holidays with pay.

## INTRODUCTORY TABLES

*Twenty-First Session (Geneva, 1936).*

Draft Convention concerning the minimum requirement of professional capacity for masters and officers on board merchant ships.

Draft Convention concerning annual holidays with pay for seamen.

Draft Convention concerning the liability of the shipowner in case of sickness, injury or death of seamen.

Draft Convention concerning sickness insurance for seamen.

Draft Convention concerning hours of work on board ship and manning.

Recommendation concerning the promotion of seamen's welfare in ports.

Recommendation concerning hours of work on board ship and manning.

*Twenty-Second Session (Geneva, 1936).*

Draft Convention fixing the minimum age for the admission of children to employment at sea. (Revised 1936.)

*Twenty-Third Session (Geneva, 1937).*

Recommendation concerning international co-operation in respect of public works.

Recommendation concerning the national planning of children to industrial employment (revised 1937).

Draft Convention concerning the age for admission of children to non-industrial employment (revised 1937).

Recommendation concerning the minimum age for admission of children to industrial employment in family undertakings.

Draft Convention concerning the reduction of hours of work in the textile industry.

Draft Convention concerning safety provisions in the building industry.

Recommendation concerning safety provisions in the building industry.

Recommendation concerning co-operation in accident prevention in the building industry.

Recommendation concerning vocational education for the building industry.

*Twenty-Fourth Session (Geneva, 1938).*

Draft Convention concerning statistics of wages and hours of work in the principal mining and manufacturing industries, including building and construction, and in agriculture.

*Twenty-Fifth Session (Geneva, 1939).*

Recommendation concerning vocational training.

Draft Convention concerning the regulation of written contracts of employment of indigenous workers.

Recommendation concerning the maximum length of written contracts of employment of indigenous workers.

Draft Convention concerning penal sanctions for breaches of contracts of employment by indigenous workers.

Recommendation concerning labour inspectorates for indigenous workers.

Recommendation concerning apprenticeship.

Draft Convention concerning the recruitment, placing and conditions of labour of migrants for employment.

Recommendation concerning the recruitment, placing and conditions of labour of migrants for employment.

Recommendation concerning co-operation between States relating to the recruitment, placing and conditions of labour of migrants for employment.

Draft Convention concerning the regulation of hours of work and rest periods in road transport.

Recommendation concerning individual control books in road transport.

Recommendation concerning the regulation of night work in road transport.

Recommendation concerning the methods of regulating hours of work in road transport.

Recommendation concerning rest periods of professional drivers of private vehicles.

*Twenty-Sixth Session (Philadelphia, 1944).*

The Declaration of Philadelphia (The Philadelphia 'Labour Charter').

The period within which Draft Conventions and Recommendations have to be brought before the competent authorities is one year, or in exceptional circumstances eighteen months, from the closing of the Conference.

The total results obtained up to the end of February, 1945, in the ratification of the Conventions may be summarised as follows:—

Ratifications deposited with the Secretary-General of the League of Nations,..... 902 (excluding 24 ratifications of the Berne Convention prohibiting the use of white phosphorus in the manufacture of matches, which formed the subject of a Recommendation in 1913).

The following are some of the standing International Commissions and Committees set up to assist the Office in its work:—

*The Joint Maritime Commission.*  
*The Correspondence Committee on Social Insurance.*  
*The Permanent Agricultural Committee.*  
*The Correspondence Committee on Industrial Hygiene.*  
*The Committee of Experts on Native Labour.*  
*The Committee of Experts on the Application of Conventions.*  
*The Advisory Committee on Salaried Employees.*  
*The Correspondence Committee on Accident Prevention.*  
*The Correspondence Committee on Women's Work.*  
*The Committee of Statistical Experts.*  
*The Committee on Automatic Coupling.*  
*The Committee on Recreation.*  
*The Correspondence Committee on Unemployment Insurance and Placing.*  
*The International Tripartite Committee on the Textile Industry.*  
*The International Committee on Migration for Settlement.*

The most important publications of the Office are:—

*The International Labour Review* (monthly).  
*Report of the Director.*  
*Studies and Reports.*  
*Industrial Safety Survey* (bi-monthly).  
*The Legislative Series.*  
*The Documents of the International Labour Conference.*  
*Year-Book of Labour Statistics.*

The course of the war made it impossible to hold the Annual Conference in June, 1940; and in the autumn of 1940, owing to the difficulty of communication from Geneva, the principal services of the Office were transferred by the then Director (Mr. J. G. Winant) to Montreal, to premises provided by McGill University. The above publications are now prepared in and issued from Montreal. In February, 1941, Mr. Winant resigned the Directorship on appointment to be United States Ambassador in London; pending the election of a new Director by the Governing Body, Mr. E. J. Phelan became Acting-Director, and in November, 1941, the full powers and responsibilities were conferred upon him in that capacity.

At the ninety-fourth session of the Governing Body (London, January, 1943) it was decided to set up tripartite industrial committees for the following industries: Inland Transport, Coal Mining, Iron and Steel Production, Metal Trades, Textiles, Petroleum Production and Refining, Building, Public Works and Civil Engineering.

The twenty-sixth session of the International Labour Conference, held in Philadelphia on April 24, 1944, adopted the following recommendations:—

- (1) Future policy, programme and status of the International Labour Organisation.
- (2) Recommendations to the United Nations for present and post-war social policy.
- (3) The organisation of employment in the transition from war to peace.
- (4) Social security: Principles, and problems arising out of the war.
- (5) Minimum standards of social policy in dependent territories.

There is a Branch Office in London (Address: 38-39 Parliament Street, S.W.1) Acting Director: Mr. Clifton Robbins.

#### IV.—PERMANENT COURT OF INTERNATIONAL JUSTICE.

The Permanent Court of International Justice at The Hague was created by an international treaty, the Statute of the Court, drafted in 1920 by a Committee of Jurists appointed by the Council of the League of Nations, acting in accordance with Article 14 of the League Covenant.

The Statute was duly approved by the Council and the Assembly of the League and was

made available for acceptance by States by means of a Protocol (December 16, 1920) which has been ratified by forty-eight States.

The Statute was revised in 1929 and the amendments then made came into force in 1936. It provides that the Permanent Court of International Justice shall be composed of a body of independent judges, elected regardless of their nationality, from amongst persons of high moral character who possess the qualifications required in their respective countries for appointment to the highest judicial offices, or are jurists of recognised competence in international law (Article 2).

According to the terms of the Statute, the electors are to bear in mind that not only should all the persons appointed as members of the Court possess the qualifications required, but the whole body also should represent the main forms of civilisation and the principal legal systems of the world (Article 3).

There are fifteen judges, who are elected by the Assembly and the Council of the League of Nations sitting independently. The list of candidates for election is composed of persons nominated by the national groups which go to form the panel of arbitrators in the Permanent Court of Arbitration established by the Hague Conventions of 1899 and 1907 (Article 4).

The members of the Court may not exercise any political or administrative function, nor engage in any other occupation of a professional nature (Article 16). When engaged on the business of the Court, they enjoy diplomatic privileges and immunities (Article 19).

Judges are elected for nine years, at the end of which period a new election takes place, at which they may be re-elected. Before taking up his duties, every judge makes a solemn declaration in open Court that he will exercise his powers impartially and conscientiously (Article 20).

The Court elects its President and Vice-President every three years. The full Court of fifteen judges normally sits; but a quorum of nine judges is sufficient to constitute the Court (Article 21).

Provision is also made for a Chamber of Summary Procedure, a Chamber for Labour Cases and one for Transit and Communications cases, but up to the present, almost all cases have been brought before the full Court.

*Jurisdiction.*—Only States and not individuals can be parties in cases before the Court, but it is always possible that a State may take up the claim of an individual against another State and make it the subject of an international dispute.

As no State can be forced to submit to judicial proceedings against its will the long-established method by which States bring a dispute before an international tribunal is by the conclusion of a Special Agreement ("compromise") in which the two sides consent to submit their difference to a judge or arbitrator.

The Court's jurisdiction is, in its essence, not compulsory, and the above method is used to bring disputes before it. But by a clause in the Statute (Article 36), States may sign a declaration (the "Optional Clause") to the effect that they recognise the Court's jurisdiction as compulsory on terms of reciprocity, i.e. vis-à-vis any other State which accepts the same obligation. And it is open to any State that has accepted the Optional Clause to summon any other State that has accepted it before the Court. There are at present thirty-six States bound by this Clause.

There also exist a number of treaties between two or more States, some on political and some on technical matters, in which it is provided that States parties to the treaty agree to bring all disputes arising under it before the Court.

*The Court's Decisions.*—The Court held its first sessions in 1922, and since that date has delivered thirty-seven judgments and twenty-seven advisory opinions. These opinions are in many ways like judgments, but they are rendered to the Council or Assembly of the League of Nations on points of law on which one of these bodies consults the Court (Governor of the League, Article 14). The subject of such consultations may be a legal aspect of a question submitted to the Council or Assembly for a decision, or some question referred by an international body (such as the International Labour Office) to the Council with the request that the Court's opinion may be obtained.

At the end of 1943, the Court had dealt with 63 cases.

*Judges.*—The present Court was elected in 1930 for the period 1931-1933. Owing to the World Crisis, the League Assembly decided in December, 1933, that the election of judges for a new period should be postponed. Accordingly, the present judges remain in office (Statute, Art. 13) until replaced. They are:—

*President:* J. G. Guerrero (Salvadorian).

*Vice-President:* Sir Cecil James Barrington Hurst (British).

*Judges:* Count Michel Bostworowski (Polish), H. Fromageot (French), A. S. de Bustamante y Sirven (Cuban), R. Añastera y Gervás (Spanish), D. Anzilotti (Italian), F. J. Urrutia (Colombian), D. Nagulesco (Romanian), Jhr. W. J. M. van Eysinga (Dutch), H. Nagaoaka (Japanese), Chang Yen-Hsi (Chinese), M. O. Hudson (American), Ch. De Visser (Belgian), E. Erich (Finnish).

*Registrar:* J. López Ovejún (Spanish).

*Deputy-Registrar:* J. Jorstad (Norwegian).

Under the Representation of the People (Equal Franchise) Act, 1928, the qualifications for the franchise are the same for men and women. Electors, for inclusion in the register, must be of full age (twenty-one years), and have resided, or occupied business premises of an annual value of not less than ten pounds, in the same parliamentary borough or county, or one contiguous thereto, for the qualifying period of three months ending on December 1, 1928, and in Scotland, on December 15, 1928. There is also a university franchise, to be qualified for which a person must be twenty-one years of age, and must have taken a degree, or in the case of a woman, have fulfilled the conditions which would entitle a man to a degree.

Every registered elector is entitled to vote at an election, but no person may vote at a general election for more than two constituencies, for one of which there must be a residential qualification. The second vote must rest on a different qualification, and each vote must be recorded in a different constituency.

Disqualified for registration are (among others) peers, infants, aliens, bankrupts, lunatics and idiots. Receipt of poor relief or other alms does not count as a disqualification.

Two registers of electors must be prepared each year, one in the spring, and the other in the autumn, except in Ireland, where only one is required; and the authorised expenses are met by local and State funds in equal parts. University registers may be made up as the governing bodies decide, and a registration fee not exceeding 1*l.* may be charged. The preparation of registers has been suspended during the war, but in the Representation of the People Bill, introduced on December 12, 1944, provision is made for the publication of a register of electors on May 7, 1945.

In university constituencies returning two or more members the elections must be according to the principle of proportional representation, each elector having one transferable vote. At a general election all polls must be held on the same day, except in the case of Orkney and Shetland, and of university elections. Provision is made for absent electors to vote, in certain cases by proxy.

Under the same Act the seats in Great Britain were redistributed on the basis of one member of the House of Commons for every 70,000 of the population. By a separate Act, redistribution in Ireland was made on the basis of one for every 43,000 of the population. The total membership of the House of Commons was thereby raised from 670 (as established in 1885) to 707. In 1922 the number was reduced to 615 (including 18 from Northern Ireland), owing to the establishment of separate parliaments in Ireland.

On October 26, 1944, the Royal Assent was given to the House of Commons (Redistribution of Seats) Act. As a temporary plan of electoral reform, the Act provides for the splitting up of 20 constituencies which previously had more than 100,000 electors. This will temporarily increase the membership of the House of Commons from 615 to 641. Four permanent Boundary Commissions are to be appointed for England, Scotland, Wales and Northern Ireland respectively in order to ensure that the number of electors in constituencies do not exceed certain pre-cribed limits.

The electorate in 1935, in England and Wales, numbered 27,394,920 (12,912,339 males, 14,482,581 females), and in Scotland, 3,167,858 (1,498,616 males and 1,669,242 females). Under the provisions of the Representation of the People Act, 1928, it is estimated that about 5,000,000 new voters were added to the register in 1929.

The executive government is vested nominally in the Crown, but practically in a committee of Ministers, called the Cabinet, whose existence is dependent on the support of a majority in the House of Commons.

## CONSTITUTION AND GOVERNMENT

The head of the Ministry is the Prime Minister, a position first constitutionally recognised, and special precedence accorded to the holder, in 1905. His colleagues in the Ministry are appointed on his recommendation, and he dispenses the greater portion of the patronage of the Crown.

On March 24, 1937, a Bill was introduced in the House of Commons for the revision of Ministerial salaries. It passed its third reading on June 2, 1937.

1. The person who is Prime Minister and First Lord of the Treasury receives a salary of 10,000*l.* per annum. An ex-Prime Minister also receives a pension of 2,000*l.* a year.

2. The principal Cabinet offices are divided into three categories. Those in the first category carry with them an annual salary of 5,000*l.* per annum. They are:—

The Chancellor of the Exchequer.  
All the Secretaries of State.  
The First Lord of the Admiralty.  
The President of the Board of Trade.  
The Minister of Agriculture and Fisheries.  
The President of the Board of Education.  
The Minister of Health.

The Minister of Labour and National Service.  
The Minister of Transport.  
The Minister of Supply.  
The Minister of Information.<sup>1</sup>  
The Minister of Production.<sup>1</sup>  
The Minister of Reconstruction.<sup>1</sup>

3. The second category carry a salary of 3,000*l.* per annum. They are:—

The Lord President of the Council (5,000*l.* if in the Cabinet).  
The Lord Privy Seal (5,000*l.* if in the Cabinet).  
The Postmaster General.  
The First Commissioner of Works.

4. In the third category is the Minister of Pensions, whose salary is fixed at 2,000*l.* per annum.

5. In general, the salary of a Parliamentary Under-Secretary is 1,500*l.*, but the following exceptions are made:—

Parliamentary Secretary to the Treasury, 3,000*l.*  
Financial Secretary to the Treasury, Secretary for Mines, and Secretary of the Department of Overseas Trade, 2,000*l.* each.  
Assistant Postmaster-General, 1,500*l.*

6. The Bill also provides for five Junior Lords of the Treasury at an annual salary of 1,000*l.* each.

7. The Bill provides furthermore for a salary of 2,000*l.* per annum to be paid to the Leader of the Opposition. (In abeyance during the war period.)

8. The Bill also provides that not more than 14 of the 17 Ministers whose offices automatically carry a salary of 5,000*l.* and not more than 21 of the Parliamentary Under-Secretaries may sit and vote in the House of Commons. This means that at least three of the Ministers in the highest category and two Under-Secretaries must sit in the Upper House.

The present Government (appointed May 10, 1940; reconstructed in 1941, 1942 and 1943), consists of the following members:—

### (a) THE WAR CABINET.

1. *Prime Minister, First Lord of the Treasury, and Minister of Defence.*—Right Hon. Winston Churchill, C.H., born 1874. Present appointment, 1940. (Salary, 10,000*l.* per annum.)

2. *Lord President of the Council and Deputy Prime Minister.*—Right Hon. Clement R. Attlee, born 1883. Present appointment, 1943. (5,000*l.*)

3. *Chancellor of the Exchequer.*—Right Hon. Sir John Anderson, G.C.B., G.C.S.I., G.C.I.E., born 1882. Present appointment, 1943. (5,000*l.*)

4. *Secretary of State for Foreign Affairs and Leader of the House of Commons.*—Right Hon. Robert Anthony Eden, M.C., born 1897. Present appointment, 1940. (5,000*l.*)

5. *Minister of Production.*—Capt. the Right Hon. Oliver Lyttelton, born 1893. Present appointment, 1942. (5,000*l.*)

6. *Minister of Labour and Minister of National Service.*—Right Hon. Ernest Bevin, born 1881. Present appointment, 1940. (5,000*l.*)

7. *Secretary of State for Home Affairs, Minister for Home Security and Minister in Charge of Air Raid Precautions.*—Right Hon. Herbert Morrison, born 1888. Present appointment, 1940. (5,000*l.*)

<sup>1</sup> Added since 1939.

8. *Minister of Reconstruction*.—Right Hon. Lord Woolton, C.H., born 1883. Present appointment, 1943. (5,000*l.*)

(b) MINISTERS NOT IN THE WAR CABINET

9. *Lord Chancellor*.—Right Hon. Viscount Simon, G.C.S.I., G.C.V.O. O.B.E., K.C., born 1873. Present appointment, 1940. (10,000*l.*)

10. *Lord Privy Seal*.—Right Hon. Lord Beaverbrook, born 1879. Present appointment, 1943. (5,000*l.*)

11. *First Lord of the Admiralty*.—Right Hon. Albert V. Alexander, born 1887. Present appointment, 1940. (5,000*l.*)

12. *Secretary of State for War*.—Right Hon. Sir James Grigg, K.C.B., K.C.S.I., born 1890. Present appointment, 1942. (5,000*l.*)

13. *Secretary of State for Air*.—Right Hon. Sir Archibald Sinclair, Bt., C.M.G., born 1890. Present appointment, 1940. (5,000*l.*)

14. *Secretary of State for Dominion Affairs and Leader of the House of Lords*.—Right Hon. Viscount Cranborne, born 1893. Present appointment, 1943. (5,000*l.*)

15. *Secretary of State for the Colonies*.—Right Hon. Col. Oliver Stanley, born 1896. Present appointment, 1942. (5,000*l.*)

16. *Secretary of State for India and Burma*.—Right Hon. L. C. M. S. Amery, born 1873. Present appointment, 1940. (5,000*l.*)

17. *Chancellor of Duchy of Lancaster*.—Right Hon. Ernest Brown, M.C., born 1881. Present appointment, 1942. (2,000*l.*)

18. *Secretary of State for Scotland*.—Right Hon. Thomas Johnston, born 1882. Present appointment, 1941. (5,000*l.*)

19. *Minister for Aircraft Production*.—Right Hon. Sir Stafford Cripps, born 1889. Present appointment, 1942. (5,000*l.*)

20. *President of the Board of Trade*.—Right Hon. Hugh Dalton, born 1887. Present appointment, 1944. (5,000*l.*)

21. *Minister of Health*.—Right Hon. Henry Urmston Willink, M.C., K.C., born 1894. Present appointment, 1943. (5,000*l.*)

22. *Minister of Agriculture and Fisheries*.—Right Hon. Robert Hudson, born 1886. Present appointment, 1940. (5,000*l.*)

23. *Minister of Education*.—Right Hon. R. A. Butler, born 1902. Present appointment, 1941. (5,000*l.*)

24. *Minister of Supply*.—Right Hon. Sir Andrew Rae Duncan, born 1884. Present appointment, 1942. (5,000*l.*)

25. *Minister of War Transport*.—Right Hon. Lord Leathers, born 1883. Present appointment, 1941. (5,000*l.*)

26. *Minister of Information*.—Right Hon. Brendan Bracken, born 1901. Present appointment, 1941. (5,000*l.*)

27. *Minister of Town and Country Planning*.—Right Hon. W. S. Morrison, M.C., born 1893. Present appointment, 1943. (5,000*l.*)

28. *Minister of Food*.—Right Hon. Col. J. J. Llewellyn, born 1893. Present appointment, 1943. (5,000*l.*)

29. *Minister of National Insurance*.—Sir William A. Jowitt, K.C., born 1885. Present appointment, 1944. (5,000*l.*)

30. *Minister of Works and Buildings and First Commissioner of Works*.—Right Hon. Edwin Duncan Sandys, born 1908. Present appointment, 1944. (3,000*l.*)

31. *Minister of State*.—Right Hon. Richard Law, born 1901. Present appointment, 1943. (3,000*l.*)

32. *Postmaster-General*.—Right Hon. Captain H. F. C. Crookshank, born 1893. Present appointment, 1943. (3,000*l.*)

33. *Paymaster-General*.—Lord Cherwell. Present appointment, 1943. (2,000*l.*)

(c) OTHER MINISTERS.

*Attorney-General*.—Right Hon. Sir Donald B. Somervell, O.B.E., K.C., born 1889. (4,500*l.* and fees.)

*Solicitor-General*.—Major Sir David P. Maxwell Fyfe, K.C., born 1900. (4,000*l.* and fees.)

*Lord Advocate*.—Right Hon. James S. C. Reid, K.C., born 1890. (5,000*l.*)

*Solicitor-General for Scotland*.—Sir T. D. King Murray, K.C., born 1884. (2,000*l.*)

*Minister of Fuel and Power*.—Major the Right Hon. Gwilym Lloyd George, born 1895. Present appointment, 1942. (3,000*l.*)

*Minister for Civil Aviation*.—Right Hon. Viscount Swinton, born 1884. Present appointment, 1944. (5,000*l.*)

*Minister Resident in West Africa*.—Captain the Right Hon. Harold Balfour, born 1897. Present appointment, 1944. (5,000*l.*)

*Minister Resident at Allied Force Headquarters in Mediterranean Theatre*.—Right Hon. Harold Macmillan, born 1894. Present appointment, 1942. (3,000*l.*)

*Minister Resident in Middle East*.—Right Hon. Sir Edward Grigg, born 1879. Present appointment, 1944. (5,000*l.*)

*Minister Resident for Supply in Washington*.—Right Hon. Ben Smith. Present appointment, 1943. (3,000*l.*)

*Minister of Pensions*.—Sir W. J. Womersley, born 1878. (2,000*l.*)

Heads of the Administrations since 1902 (C. = Conservative, L. = Liberal, Lab. = Labour, Nat. = National).

| Heads of Administrations.      | Dates of Appointment. | Dates of Appointment.                |
|--------------------------------|-----------------------|--------------------------------------|

|                                |                       | W. S. Churchill (Nat.) May 10, 1940  |

The state of parties in the House of Commons after the general election of November, 1935, was as follows:—Government: Conservative, 387; Liberal National, 33; National Labour, 8; National, 3. Opposition: Labour, 154; Liberal, 17; Independent Liberal, 4; Independent Labour Party, 4; Independent, 4; Communist, 1; total, 615.

II. LOCAL GOVERNMENT.

*England and Wales*.—In each county the Crown is represented by H.M. Lieutenant. There is also a sheriff, who represents the executive of the County Council, an under-sheriff, a clerk of the peace and a clerk of the County Council, coroners, who are appointed and paid by the County Councils, and other officers. The licensing of persons to sell intoxicating liquors, and the administration of the criminal law—except that which deals with some of the graver offences—are in the hands of the magistrates.

For the purposes of local government England and Wales are divided primarily into sixty-two administrative counties, including the county of London, and eighty-three County Boroughs. The counties are administered by the justices and by a popularly-elected Council, called a County Council, who co-opt a prescribed number of aldermen, either from their own body or

from outside it. Aldermen are elected for six years, half of them retiring every third year. A councillor is elected for three years. The jurisdiction of the County Councils covers the administration of higher and (outside certain Boroughs and Urban Districts) elementary education; maintenance of main roads and bridges; work in relation to agriculture (diseases of animals, destructive insects and pests, land drainage, fertilisers and feeding stuffs, small holdings and allotments); provision of mental hospitals and other public health work (schemes for treatment of tuberculosis and venereal diseases, for maternity and child welfare, and for the welfare of the blind; accommodation and care of mental defectives; prevention of pollution of rivers; and supervision of milk and other food supplies). The control of the county police is vested in a standing joint committee composed of equal numbers of magistrates and of members of the County Council. The Metropolitan police are, however, under the control of the Home Secretary.

Secondly, the administrative counties, with the exception of the County of London are subdivided into 'County Districts' which are either 'Urban Districts' or 'Rural Districts.' Generally speaking, an urban district comprises a town or a small area more or less densely populated, and a rural district takes in several country parishes. County District Councils administer the Public Health and Highway Acts, and exercise powers under the Housing Acts. Urban Authorities may also take over the maintenance and repair of main roads from County Councils; provide burial grounds, allotments, baths and washhouses, libraries, open spaces, museums, isolation hospitals, etc.; establish and manage trading services (gas, electricity, water, trams, etc.). Councils of Boroughs which had over 10,000, and of Urban Districts which had over 20,000 people in 1901 are also usually the local authorities for elementary education. Rural District Councils may also make arrangements for an adequate water supply; and exercise any 'urban powers' conferred on them by the Minister of Health.

Under the Local Government Act, 1929, the functions of the Poor Law authorities were transferred to county and county borough councils. These functions include the organisation and management of indoor and outdoor relief, responsibility for collection of fundamental vital statistics and responsibility for the provision, maintenance and management of all public institutions for the cure of diseases. Provision was also made under the Act to secure for every county district council the services of a medical officer of health. Industrial and freight-transport hereditaments were derated to the extent of three-fourths and agricultural lands were completely derated. The Act provided for the abolition of most of the assigned revenue grants, of the grants under the Agricultural Rates Acts, and of the percentage grants paid in respect of health services and certain roads. In place of these a grant comprising the equivalent of the total loss to local authorities both of rates and of grants under the Act, together with a substantial amount of new money, are distributed as a 'block grant' fixed for five years at a time on a basis of local need and ascertained by means of a formula. To avoid the difficulties created by a sudden change in the revenues of local authorities the allocation of grant will not be entirely by the formula until 1947. The main central authority

The main central authority in London is the County Council, created by the Local Government Act of 1888. It has considerable powers in regard to public health, housing, bridges and ferries, asylums, street improvements, parks, main drainage, fire brigade, sanitary control, education, and numerous other matters. It is also the tramway authority for the county. The City Corporation has powers respecting sanitation, police, bridges, justice, etc., in the City of London. London comprises the ancient city with an area of one square mile, and an area of 118 square miles beyond the city, which is

divided into 28 metropolitan boroughs, under the London Government Act, 1899, each with a mayor, aldermen, and councillors (women are eligible). The Councils have powers in regard to public health, highways, rating, housing, education, etc., but they are not municipal boroughs in the statutory sense as in the rest of the Kingdom. The County Council has certain powers of control over them.

In all incorporated towns, local business is administered by a municipal Corporation. There are two kinds of municipal boroughs, County Boroughs and Non-County Boroughs. A number of the latter are small boroughs of special and generally ancient jurisdiction. Most of the County Boroughs and a number of the Non-County Boroughs have a separate Court of Quarter Sessions. The County Boroughs are outside the jurisdiction of the County Councils. A municipal Corporation consists of the mayor, aldermen, and burgesses, and acts through a Council elected by the burgesses—practically by the ratepayers. The councillors serve for three years (women are eligible), one-third retiring annually; the aldermen are elected by the Council, and the mayor, who serves for one year, also by the Council. A Town Council as an Urban Authority is invested with all the normal powers of an Urban District Council; and in addition certain powers, such as making byelaws or maintaining a separate police force, are conferred either upon all Town Councils or upon Councils of towns of certain sizes, or complying with other conditions, in virtue of their status as Councils of incorporated towns.

*Scotland.*—A Local Government Act was passed for Scotland in 1889 and followed in its main outlines the English Act of the previous year. The powers of local administration in counties formerly exercised by the Commissioners of Supply, the Justices and Road Trustees were either wholly or in part transferred to County Councils, which took over their duties and responsibilities in 1890. By the Local Government (Scotland) Act, 1894, a Local Government Board for Scotland was constituted, consisting of the Secretary for Scotland as President, the Solicitor-General for Scotland, the Under-Secretary for Scotland, and three other members nominated by the Crown. The latter Act provided that a Parish Council should be established in every parish to take the place of the Parochial Boards. Their principal functions was the administration of the Poor Laws, and in addition they exercised powers similar to those of the Parish Councils in England. There were 869 civil parishes in 1921. The powers and duties of the Local Government Board were by the Scottish Board of Health Act, 1919, transferred to the Scottish Board of Health, constituted as in that Act provided. Municipal bodies exist in the towns of Scotland, as in those of England. Each burgh has a Town Council consisting of a Provost or Lord Provost, Bailies and Councillors. The Provost is the head of the Scottish municipality and holds office for three years. Bailies are selected by the Councillors from among their own number; they act as magistrates and sit as such in police courts. There are in Scotland three principal kinds of burghs, numbering altogether 201 (1921 census): (1) Royal Burghs, *i.e.* burghs created by a Charter of the Crown; (2) Parliamentary Burghs, which possess statutory constitutions almost identical with those of the Royal Burghs; (3) Police Burghs, constituted under a general Police Act. All burghs of whatever class have new Town Councils and their administration is regulated by the Burghs (Scotland) and Town Councils (Scotland) Acts or corresponding local Acts. The Local Government (Scotland) Bill, 1929, made many drastic changes in the local government machinery so as to bring it in line as far as possible with that set up for England and Wales. The new units of local

# 12 THE BRITISH COMMONWEALTH:—GREAT BRITAIN

government are the county councils and burghs with a population of over 20,000. Only the four great cities are Poor Law authorities and parish councils are abolished.

## Area and Population.

### I. PROGRESS AND PRESENT CONDITION.

The population was thus distributed at the census, taken April 27, 1931:—

| Divisions                         | Area in sq. miles | Males      | Females    | Total Population on April 27, 1931 |
|-----------------------------------|-------------------|------------|------------|------------------------------------|
| England (including Monmouthshire) | 50,874            | 18,061,643 | 19,732,360 | 37,794,003                         |
| Wales                             | 7,464             | 1,071,867  | 1,087,007  | 2,158,874                          |
| Scotland                          | 30,406            | 2,325,523  | 2,517,457  | 4,842,980                          |
| Isle of Man                       | 221               | 22,443     | 26,565     | 49,008                             |
| Channel Islands                   | 75                | 44,099     | 49,106     | 93,205                             |
| Total                             | 89,041            | 21,525,419 | 23,412,025 | 44,937,444                         |

### Population at each of the four previous decennial censuses:—

| Divisions                              | 1891       | 1901       | 1911       | 1921       |
|----------------------------------------|------------|------------|------------|------------|
| England                                | 27,489,228 | 30,813,043 | 34,045,290 | 35,681,019 |
| Wales                                  | 1,513,297  | 1,714,800  | 2,025,202  | 2,205,680  |
| Scotland                               | 4,025,647  | 4,472,103  | 4,760,904  | 4,882,497  |
| Isle of Man                            | 55,608     | 54,752     | 52,016     | 60,234     |
| Channel Islands                        | 92,284     | 95,618     | 96,899     | 90,230     |
| Army, Navy, and Merchant Seamen abroad | 224,211    | 367,736    | 145,729    | 256,811    |
| Total                                  | 33,400,225 | 37,518,052 | 41,126,040 | 43,176,521 |

In 1931, in Wales and Monmouthshire 197,932 persons 3 years of age and upwards, were able to speak Welsh only, and 811,329, able to speak Welsh and English. In Scotland in 1931, 6,716 persons 3 years of age and upwards could speak Gaelic only, and 129,419 could speak Gaelic and English.

At the census of 1931, in England and Wales, there were 10,235,139 private families (population, 38,042,464), occupying 9,123,279 dwellings, including 7,187,342 dwellings in urban areas and 1,985,937 dwellings in rural areas. The total number of families per occupied dwelling was 1.12 (urban 1.15, rural 1.02).

The age distribution in 1931 of the population of England and Wales and Scotland was as follows:—

| Age-group      | Numbers in thousands |          |               |
|----------------|----------------------|----------|---------------|
|                | England and Wales    | Scotland | Great Britain |
| Under 5        | 2,909                | 423      | 3,413         |
| 5 and under 10 | 3,823                | 456      | 4,279         |

## AREA AND POPULATION

13

Estimated population (in thousands) of Great Britain and its divisions (exclusive of army, navy and merchant seamen abroad) at the end of June:—

| Year (30 June)    | England and Wales | Scotland  | Total of Great Britain |
|-------------------|-------------------|-----------|------------------------|
| 1935              | 40,645,000        | 4,953,000 | 45,598,000             |
| 1936              | 40,839,000        | 4,966,000 | 45,805,000             |
| 1937              | 41,031,000        | 4,979,500 | 46,010,500             |
| 1938 <sup>1</sup> | 41,215,000        | 4,993,100 | 46,208,100             |
| 1939 <sup>1</sup> | 41,480,000        | 5,006,700 | 46,486,700             |

<sup>1</sup> Provisional figures.

### 1. England and Wales.

The census population of England and Wales 1801 to 1931:—

| Date of Enumeration | Population | Pop. per sq. mile | Date of Enumeration | Population | Pop. per sq. mile |
|---------------------|------------|-------------------|---------------------|------------|-------------------|
| 1801                | 8,892,536  | 152               | 1871                | 22,712,266 | 389               |
| 1811                | 10,164,256 | 174               | 1881                | 25,974,439 | 445               |
| 1821                | 12,000,236 | 206               | 1891                | 29,002,525 | 497               |
| 1831                | 13,896,797 | 238               | 1901                | 32,527,843 | 558               |
| 1841                | 15,914,148 | 273               | 1911                | 36,070,492 | 618               |
| 1851                | 17,927,609 | 307               | 1921                | 37,886,699 | 649               |
| 1861                | 20,066,224 | 344               | 1931                | 39,952,377 | 685               |

Population of England and Wales and of the Administrative Counties and County Boroughs in 1911, 1921 and 1931 (for areas of administrative counties, etc., 1921, see THE STATESMAN'S YEAR-BOOK for 1931, p. 12):—

|                 | Area in Statute Acres, 1931 (Land and Inland Water). Counties, including County Boroughs | Census Population |           |           | Administrative Counties only |
|-----------------|------------------------------------------------------------------------------------------|-------------------|-----------|-----------|------------------------------|
|                 |                                                                                          | 1911              | 1921      | 1931      |                              |
| ENGLAND.        | 302,942                                                                                  | 194,588           | 206,462   | 220,525   | 220,525                      |

## AREA AND POPULATION

17

The following table shows the distribution of the urban and rural population of England and Wales in 1901, 1911, 1921, and 1931:—

|      | Population        |                              |                              | Percentage of population |                    |
|------|-------------------|------------------------------|------------------------------|--------------------------|--------------------|
|      | England and Wales | Urban Districts <sup>a</sup> | Rural Districts <sup>a</sup> | Urban <sup>a</sup>       | Rural <sup>a</sup> |
| 1911 | 36,070,492        | 28,162,986                   | 7,907,556                    | 78.1                     | 21.9               |
| 1921 | 37,886,699        | 30,035,417                   | 7,851,282                    | 79.3                     | 20.7               |
| 1931 | 39,952,377        | 31,951,918                   | 8,000,459                    | 80.0                     | 20.0               |

<sup>a</sup> As existing at each census.

The municipal and parliamentary City of London, coinciding with the registration City of London, has an area of 675 acres. The registration County of London (the London for purposes of the census, the registration of births, deaths, and marriages, and for poor law purposes), coinciding with the administrative county, has an area of 74,850 acres, and nearly coincides with the collective area of the London parliamentary boroughs. The population of registration London, of the 'Outer Ring,' and of 'Greater London' (the area covered by the City and Metropolitan police), was:—

|                               | 1911      | 1921      | 1931 <sup>a</sup> | 1938 <sup>a</sup> |
|-------------------------------|-----------|-----------|-------------------|-------------------|
| Registration London.          | 4,521,685 | 4,484,523 | 4,397,003         | 4,062,800         |
| 'Outer Ring'                  | 2,729,673 | 2,995,678 | 3,806,939         | 4,637,200         |
| 'Greater London' <sup>1</sup> | 7,251,358 | 7,480,201 | 8,203,942         | 8,700,000         |

<sup>1</sup> Area 443,455 acres.<sup>2</sup> Revised census figures.<sup>a</sup> Estimated.

## 2. Scotland.

Area 29,796 square miles, including its islands, 186 in number, but excluding inland water 609 square miles.

Population (including military in the barracks and seamen on board vessels in the harbours) at the dates of the several censuses:—

| Date of Enumeration | Population | Pop. per sq. mile | Date of Enumeration | Population | Pop. per sq. mile |
|---------------------|------------|-------------------|---------------------|------------|-------------------|
| 1801                | 1,608,420  | 54                | 1871                | 3,860,018  | 113               |
| 1811                | 1,805,864  | 60                | 1881                | 3,735,573  | 125               |
| 1821                | 2,091,521  | 70                | 1891                | 4,025,647  | 135               |
| 1831                | 2,384,386  | 79                | 1901                | 4,472,103  | 150               |
| 1841                | 2,620,184  | 88                | 1911                | 4,760,904  | 160               |
| 1851                | 2,888,742  | 97                | 1921                | 4,882,497  | 164               |
| 1861                | 3,062,294  | 100               | 1931                | 4,842,554  | 163               |

The number of married persons in 1931 was 1,762,673 (874,194 males and 888,479 females), and widowed, 297,137 (93,668 males and 203,469 females).

\* The boundaries of the administrative county have changed since the date of the 1921 census. In every case the acreage and the 1921 population shown in the table relate to the area constituted at the date of the 1921 census.

The area and population of the County Boroughs, and more important other Boroughs, are given in the following table. The County Boroughs are designated by the letters C.B.

|                                    | Area in<br>Statute<br>Acres, 1931 | Census Population |           | Estimated<br>Population<br>mid-1937 |

\* Including summer visitors.

\* Including the entire Burgh of Aberdeen, part of which is in Kincardine County.

The birthplaces of the 1931 population were: Scotland, 4,496,028; England, 164,249; Wales, 4,341; Ireland, 124,296; British Colonies, etc., 24,681; foreign countries, 28,116 (including 18,009 aliens).

The 'urban' population of Scotland in 1931 is defined as the population of localities containing over 1,000 persons, and are burghs, special scavenging districts, or special lighting districts. On this basis the 'urban' population was 3,879,970 or 80.1 per cent. of the total, and the 'rural' population 983,010 or 19.9 per cent. Population of the principal burghs:—

## II. MOVEMENT OF THE POPULATION.

### 1. Births, Deaths and Marriages.

#### England and Wales.

| Year | Estimated<br>Population<br>at 30th June | Total Live<br>Births | Illegitimate<br>Births | Deaths  | Marriages |
|------|-----------------------------------------|----------------------|------------------------|---------|-----------|
| 1940 | 41,862,000                              | 590,120              | 25,633                 | 581,537 | 470,549   |
| 1941 | —                                       | 587,228              | 30,931                 | 535,180 | 388,921   |
| 1942 | —                                       | 654,039              | 36,194                 | 480,137 | 368,252   |
| 1943 | —                                       | 683,213              | 43,216                 | 501,412 | 295,414   |
| 1944 | —                                       | 745,318              | 52,385                 | 492,278 | 302,046   |

In 1944 the proportion of male to female births was 1,062 male to 1,000 female. In 1944 the live birth rate was 18.0 and the death rate 11.9 per thousand of the population.

#### Scotland.

| Year | Estimated<br>Population<br>at 30th June | Total Births | Illegitimate<br>Births | Deaths | Marriages |
|------|-----------------------------------------|--------------|------------------------|--------|-----------|
| 1939 | 5,006,700                               | 86,899       | 5,192                  | 64,413 | 46,236    |
| 1940 | 4,641,200 <sup>1</sup>                  | 86,403       | 5,091                  | 72,775 | 53,522    |
| 1941 | 4,819,400 <sup>1</sup>                  | 89,743       | 5,904                  | 72,558 | 47,620    |
| 1942 | 4,751,000 <sup>1</sup>                  | 90,697       | 6,455                  | 64,963 | 47,402    |
| 1943 | 4,661,600 <sup>1</sup>                  | 94,682       | 7,173                  | 66,733 | 38,271    |

<sup>1</sup> Civilian population.

Proportion of male to female births in 1942 was 1,048 to 1,000. In 1942 the birth rate was 17.6 and the civilian death rate 13.8 per thousand.

## 2. Divorces.

| Year | England and Wales | Scotland | Total  |
|------|-------------------|----------|--------|
| 1940 | 7,755             | 740      | 8,495  |
| 1941 | 6,388             | 768      | 7,156  |
| 1942 | 7,645             | 1,021    | 8,666  |
| 1943 | 9,999             | 1,315    | 11,314 |
| 1944 | 12,312            | —        | —      |

## 3. Emigration and Immigration.

In the thirty-eight years 1815-1852, the total number of emigrants from the United Kingdom was 3,463,592. Up to 1852 the emigration returns made no distinction between British subjects and foreigners. From 1853 to 1938 inclusive, the number of emigrant passengers of British origin, to places out of Europe, was 16,710,072. Figures of the passenger traffic to and from non-European countries in recent years are given as follows:—

| Year | Outward          |        |         | Inward           |        |         | Balance inward |
|------|------------------|--------|---------|------------------|--------|---------|----------------|
|      | British subjects | Aliens | Total   | British subjects | Aliens | Total   |                |
| 1934 | 186,626          | 53,762 | 240,388 | 199,199          | 50,071 | 249,270 | 8,882          |
| 1935 | 182,888          | 82,008 | 244,896 | 198,986          | 58,408 | 257,394 | 7,497          |
| 1936 | 196,182          | 80,083 | 276,265 | 207,968          | 78,724 | 286,692 | 3,427          |
| 1937 | 142,660          | 93,008 | 235,668 | 197,593          | 80,144 | 277,737 | 43,069         |
| 1938 | 184,511          | 79,267 | 263,778 | 181,777          | 62,064 | 243,841 | 19,937         |

The number of British emigrants (excluding persons only temporarily absent) to places out of Europe was 31,764 in 1937, 34,144 in 1938, and the immigrants of British nationality into Great Britain was 42,628 in 1937, 40,611 in 1938.

Included in the totals of the above table are the following numbers of passengers who were carried on pleasure cruises to places out of Europe and not within the Mediterranean Sea: 1938, inward, 22,145; outward, 22,729.

1 Balance outward.

The destinations of British subjects leaving the United Kingdom to take up permanent residence in non-European countries in 1938 were mainly the United States, 1,992 (2,428 in 1937); British North America, 3,367 (2,850 in 1937); Australia, 5,427 (4,122 in 1937); New Zealand, 2,425 (1,981 in 1937); British South Africa, 6,003 (5,577 in 1937); India and Ceylon, 5,540 (5,632 in 1937). The male emigrants included 1,253 agricultural workers, 3,359 workers in skilled trades, 3,284 commercial and 2,247 professional workers.

## Religion.

## 1. England and Wales.

The Established Church of England is Protestant Episcopal. Civil disabilities on account of religion do not attach to any class of British subjects. Under the Welsh Church Acts, 1914 and 1919, the Church in Wales and Monmouthshire was disestablished as from March 31, 1920, and the Church in Wales, and a sum of 1,000,000<sup>l</sup>. provided by Parliament, were assigned to a temporary body not exceeding three persons, called the Welsh Commissioners, for distribution to a body representing the Church

(called the Representative Body), and to certain other authorities including the University of Wales.

The King is by law the supreme governor of the Church of England, possessing the right, regulated by statute, to nominate to the vacant archbishoprics and bishoprics. The King, and the First Lord of the Treasury in his name, also appoint to such deaneries, prebendaries, and canonries as are in the gift of the Crown, while a large number of livings and also some canonries are in the gift of the Lord Chancellor.

There are two archbishops (at the head of the two 'provinces' of Canterbury and York) and 41 bishops, and about 40 suffragan bishops in England. Each archbishop has also his own particular diocese, wherein he exercises episcopal, as in his province he exercises archiepiscopal, jurisdiction. In the Church are 29 deans (including Westminster, Windsor, St. Albans and Truro), 108 archdeacons and 15 Provosts of Parish Church Cathedrals. Under the Church of England Assembly (Powers) Act, 1919, there is an Assembly called 'the Church Assembly,' in England, consisting of a House of Bishops, a House of Clergy, and a House of Laity, which has power to frame legislation regarding Church matters. The first two Houses consist of the members of the Convocations of Canterbury and York, each of which consists of the diocesan bishops (forming an Upper House), and the archdeacons, deans and provosts, and a certain number of proctors, as the representatives of the inferior clergy, together with, in the case of Canterbury Convocation, representatives of the Universities of Oxford, Cambridge and London (forming the Lower House). The House of Laity is elected by the lay members of the Diocesan Conferences. Parochial affairs are managed by Parochial Church Meetings and Church Councils. Every Measure passed by the Church Assembly must be submitted to the Ecclesiastical Committee, consisting of fifteen members of the House of Lords nominated by the Lord Chancellor, and fifteen members of the House of Commons nominated by the Speaker. This Committee reports on each Measure to Parliament, and the measure becomes law if each House of Parliament passes a resolution to that effect.

The number of civil parishes (districts for which a separate poor rate is or can be made) at the census of 1931 was 14,209. These, however, in many cases, do not coincide with ecclesiastical parishes, which have, from the civil point of view, lost their old importance. Of such parishes there were (1938) 12,683, inclusive of the Isle of Man and the Channel Islands, but excluding Wales. Each parish has its church, presided over by an incumbent or minister, who must be in priest's orders, and who is known as rector, vicar, or perpetual curate, according to his relation to the temporalities of his parish. Private persons possess the right of presentation to about 7,000 benefices; the patronage of the others belongs mainly to the King, the bishops and cathedrals, the Lord Chancellor, and the universities of Oxford and Cambridge. In 1940 there were about 12,556 beneficed clergy, and, in 1939, 4,555 assistant curacies. Voluntary offerings raised and administered parochially amounted in 1940 to 5,426,580<sup>l</sup>., exclusive of very large sums contributed to central and diocesan societies and institutions and administered by such organisations.

Of 37,452 churches and chapels registered for the solemnisation of marriage at the end of 1934, 16,515 belonged to the Established Church and the Church in Wales and 20,937 to other religious denominations. Of the marriages celebrated in 1934, 53.5 per cent. were in the Established Church and the Church in Wales, 6.5 per cent. in the Roman Catholic Church, 10.9 per cent. were Nonconformist marriages, 0.04 per cent. were Quaker marriages, 0.7 per cent. Jewish, and 28.4 per cent. civil marriages in a Registrar's Office.

Act the division of education into two fields, elementary and higher, came to an end. The system of public education is organised as a continuous process and the local education authorities are responsible for all types of education.

The following is a summary of the main changes incorporated in the New Education Bill:—

1. The reconstruction of the national system of education into primary, secondary and further stages.
2. The provision of nursery schools or classes wherever they are needed.
3. The raising of the school leaving age, without exemptions, first to 15, and later to 16.
4. The completion of the reorganization of the present elementary schools so that well designed and equipped primary schools and secondary schools, of a variety of types, are available without tuition fees to all children.
5. The amendment of the law so as (1) to emphasize the position of religious instruction as an essential element of education, and (2) to enable the schools provided by voluntary bodies to play their part in the proposed developments.
6. The introduction of a system of compulsory part-time education in working hours for young persons up to the age of 18.
7. The provision of adequate and properly co-ordinated facilities for technical and adult education.
8. The extension of the existing facilities for securing the health and physical well-being of children and young persons.
9. The provision of better and more varied facilities for the education of handicapped children.
10. The inspection and registration of all independent schools.

In addition, the Act gives the Minister for the first time effective power to secure the development of a national policy in education. Two Central Advisory Councils, one for England and one for Wales, will be established to advise him on educational theory and practice.

*Scotland.*—In 1942–43 there were 2,143 schools with primary divisions, and the average number on the registers was 381,926.

On July 31, 1943, there were 39 special day schools, 27 residential and special classes attached to 88 ordinary schools, and the number of defective children under instruction was 7,657, of which 3,424 were physically defective and 4,233 were mentally defective. There were also 4 residential schools for blind children, 6 for deaf children and 2 for both combined, the total number of children under instruction being 845 (190 blind and 655 deaf). There were 39 nursery schools with a total enrolment of 1,653. At June 30, 1943, there were 24 approved schools with a total of 2,148 (1,798 boys, 350 girls).

As at March 31, 1943, there were 11,258 recognised certificated teachers in schools with primary divisions, including 3,155 university graduates.

The total ordinary expenditure of education authorities during 1943–44 was 16,308,154*l.* (subject to correction on audit), and the expenditure for 1944–45 was estimated at 17,276,156*l.*

### The Administration of Justice.

#### England and Wales.

The legal system of England and Wales has at the head of the superior courts as the ultimate court of appeal the House of Lords, which hears each year a number of appeals in civil matters, including a certain number from Scotland and very occasionally an appeal in a criminal case. In order that civil cases may go from the Court of Appeal to the House of Lords, it is necessary to obtain the leave of either the Court of Appeal or the House itself, and before an appeal can be brought from a decision of the Court of Criminal Appeal a certificate of the Attorney-General is indispensable, certifying that the decision involves a point of law of 'exceptional public importance' and that it is desirable in the public interest that a further

appeal should be brought. Since the institution of the Court of Criminal Appeal in 1907, three murder appeals have reached the Lords, the last in 1941. As a judicial body the House of Lords consists of the Lord Chancellor, the Lords of Appeal in Ordinary, commonly called Law Lords, and such other members of the House as have held high judicial office. The final court of appeal for India and certain of the Dominions is the Judicial Committee of the Privy Council, constituted on nearly parallel lines with the House of Lords.

On the civil side there is in England and Wales below the House of Lords the Supreme Court of Judicature, divided into two parts, the Court of Appeal (with the Lord Chancellor as nominal head and the Lords Justices of Appeal), and the High Court of Justice. The High Court has three Divisions: (1) the Chancery Division, concerned with the construction of wills and settlements, trusts, mortgages, etc.; (2) the King's Bench Division, whose primary function is the administration of the Common Law, and (3) the Probate, Divorce and Admiralty Division, comprising courts deriving from the old Civil Law. The King's Bench Division, in addition to original jurisdiction, has certain appellate powers. Thus two or more judges, forming a Divisional Court, deal with cases stated for their opinion by lay justices or stipendiary or metropolitan magistrates and the Revenue Judge, nominally a Divisional Court, with cases stated by the Inland Revenue Commissioners. King's Bench judges, in addition to their main work in London, deal on circuit with a large amount of civil business, including the trial of certain categories of divorce cases, at the larger assize towns.

Below the House of Lords on the criminal side is the Court of Criminal Appeal, corresponding to the Court of Appeal on the civil side, and hearing appeals from King's Bench judges exercising criminal jurisdiction at Assizes and from the Central Criminal Court. It is drawn from the Lord Chief Justice and eight King's Bench judges appointed by him for the purpose, with the consent of the Lord Chancellor, the court consisting of an uneven number of such judges, normally three. In greater London the Central Criminal Court, more commonly known as the Old Bailey, is, in effect, a substitute for both Assizes and Quarter Sessions. In it sit, in addition to King's Bench judges (for whom are reserved the more serious cases, and, in particular, those crimes involving capital punishment), the Recorder of London and the Common Serjeant. Nominally all the judges are appointed by the King, but in practice the Lord Chancellor (who is a Minister, a member of the Cabinet, *ex-officio* president of the House of Lords and goes out with the Ministry), the Lord Chief Justice, the Lords of Appeal in Ordinary and the Lords Justices of Appeal are appointed on the recommendation of the Prime Minister, and the other judges on the recommendation of the Lord Chancellor. The Recorder of London and the Common Serjeant are appointed by the City of London, subject to approval by the Crown.

The superior courts referred to above form only a relatively small part of the legal system so far as number of proceedings is concerned. On the civil side more than half a million cases yearly are in normal times brought before courts less than 100 years old, divided into some 50 circuits covering the whole country and somewhat misleadingly called county courts. These are presided over by legally qualified judges, charged with duties in such responsible and difficult matters as bankruptcy, rent restriction and workmen's compensation, etc. They have a general jurisdiction, subject to certain rights of transfer to the High Court given to defendants, to determine all actions founded on contract or tort involving sums of not more than 200*l.*, but certain matters, such as, *e.g.*, libel and slander, are entirely

reserved for the High Court. Each court has one or more registrars, who may hear any proceedings other than actions and, given certain conditions, actions involving not more than 10*l*. From County Courts an appeal lies to the Court of Appeal. Finally, there survive a few ancient local courts with civil jurisdiction, and, although the primary function of the justice of the peace is criminal, a not inconsiderable volume of civil work now falls on justices. Part of this work is done in separate courts for domestic proceedings, which determine matrimonial disputes, those relating to bastardy and guardianship of infants, etc. One of the presiding justices in such cases must be a woman.

On the criminal side the position as to the inferior courts is more complicated. At the base are the lay justices, who, outside the large towns, try the great bulk of minor offenders, or, according to fairly recent statistics, 98·9 per cent. of persons found guilty of offences of all kinds. Exercising summary jurisdiction in petty sessions, justices have power to pass sentences of imprisonment up to, in general, six months, and to impose fines up to, in general, 50*l*. A number of the so-called crimes with which they deal at the present time are relatively venial, such as traffic offences and breaches of such statutes as those dealing with food and drugs, hours of work, etc. One of their most important functions is to examine prisoners charged with graver categories of offences and to commit them for trial at a higher court, *viz.* Assizes or Quarter Sessions. Certain persons are, *ex-officio*, justices, but the vast majority are placed upon the Commission of the Peace by the Lord Chancellor on the recommendation of the Lords Lieutenants of the counties, who, in turn, are assisted by advisory committees. Women are now eligible to act as justices, and the numbers holding the Commission are estimated to be at the present time in the neighbourhood of 2,600. In certain larger provincial towns and in London the corresponding work is done by legally qualified and remunerated persons, called respectively stipendiary and metropolitan police magistrates, who sit alone. Above the petty sessional courts are courts of Quarter Sessions, having a more extensive original jurisdiction and power also to hear appeals from petty sessions. These consist in general of lay justices; some boroughs, however, have separate Quarter Sessions with a legally qualified and remunerated chairman called a Recorder. Further, since 1938, legally qualified and remunerated chairmen and deputy-chairmen may be appointed with official approval, in which case the court has more extensive jurisdiction than it would otherwise have. From Quarter Sessions appeals lie to the Assize courts presided over by King's Bench judges and thence to the Court of Criminal Appeal and the House of Lords (*see above*). There remains as a last resort an invocation of the Royal Prerogative exercised on the advice of the Home Secretary after consultation with the judges concerned. By this means a very small number of death sentences are each year commuted for terms of imprisonment or detention.

All criminal trials, except those which come before courts of summary jurisdiction or the House of Lords, are tried by a judge and a jury consisting normally of twelve members, reduced by the Administration of Justice (Emergency Provisions) Act of 1939 to not more than seven, save in murder or treason or in any case where the court, by reason of the gravity of the issues, directs that the full number be empanelled. The same Act prohibits juries in all civil cases, whether in the High Court or inferior courts, unless the court is of opinion that the question ought to be tried with a jury and so orders; in such case the general limitation to seven applies.

Important features of the English legal system are the Poor Persons Procedure, supplemented in the case of the Forces by a special legal aid

scheme, and Poor Prisoners' Defence. In the case of the Poor Persons Procedure, under which in 1942 2,791 cases were entered, 96 per cent. of them matrimonial, would-be litigants with incomes under certain limits are provided with the services of counsel and solicitor on the payment of the solicitor's out-of-pocket expenses. Under the Poor Prisoners' Defence, any person committed for trial for an indictable offence whose means appear insufficient to enable him to obtain legal assistance in the ordinary way, may, on being granted a 'defence certificate,' have free legal aid and have counsel and solicitor assigned to him for his defence. In charges of murder a defence certificate must in such circumstances be granted. Persons charged before the justices may similarly be granted a 'legal aid certificate,' entitling them to the services of a solicitor.

The authorised strength of the police force in England and Wales on September 29, 1939, was 63,228 (including 19,358 Metropolitan police), and in addition there were 162,490 special constables. Total police expenditure in England and Wales for 1937-38 was 24,270,758*l*.

#### Scotland.

The High Court of Justiciary is the supreme criminal court in Scotland. It consists of all the judges of the Court of Session, and sits more or less frequently, as the number of cases before it may require, in Edinburgh or in the circuit towns. One judge can, and usually does, try cases, but two or more preside in cases of difficulty or importance. It is the only competent court in cases of treason, murder, robbery, rape, fire-raising, deforcement of messengers, and generally in all cases in which a higher punishment than imprisonment is by statute directed to be inflicted; and it has moreover an inherent jurisdiction to punish all criminal acts, both those already established by common law or statute, and such as have never previously come before the courts and are not within any statute.

The sheriff of each county is the proper criminal judge in all crimes occurring within the county which infer only an arbitrary punishment, and if the case is tried with a jury the High Court has no power of review on the merits. Even in cases indicted to the High Court the accused is, under the Criminal Procedure (Scotland) Act of 1887, regularly asked to plead in the sheriff court, and minor objections to the indictment can be wholly or in part disposed of there. Borough magistrates and justices of the peace have jurisdiction in petty cases occurring within the burgh or county, and in a number of minor offences under various statutes.

The Court of Session, presided over by the Lord President, and divided into an Inner and an Outer House, exercises the highest civil jurisdiction in Scotland, with the House of Lords as a Court of Appeal.

The police forces in Scotland at the end of 1939 had an authorised strength of 7,129. The estimated expenditure on police, borne by the Government, was 1,237,515*l*. for 1938-39.

#### CIVIL JUDICIAL STATISTICS—ENGLAND AND WALES.

<sup>a</sup> Comprising 376 university professors and readers, and 908 'recognised teachers.'  
<sup>b</sup> Including 489 women.

<sup>c</sup> Internal students, 1944-45. In addition, there were (1944-45) 14,837 external students, i.e., matriculated students, not being internal students, who are registered as preparing for an examination of the university.

<sup>d</sup> Including 1,288 evening students.

<sup>e</sup> Including 892 women.

At most of the universities and university colleges women students are admitted on equal terms with men. There are, however, several colleges exclusively for female students (figures for 1944-45): Bedford (74 teachers, etc., 515 students), Royal Holloway (83 teachers, 172 students) and Westfield Colleges (22 teachers, etc., 147 students) in London; Newnham, founded 1875 (14 teachers, etc., 265 students) and Girton, founded 1869 (17 teachers, etc., 316 students), Lady Margaret Hall, founded 1878 (9 teachers, etc., 166 students), Somerville College, founded 1879 (11 teachers, etc., 158 students), St. Hugh's College, founded 1886 (9 tutors, 228 students), St. Hilda's College, founded 1893 (8 teachers, 138 students), in Oxford. The Society of Oxford Home-Students (St. Anne's Society), founded 1879, numbered 8 teachers and 152 students. Women were first admitted to membership of Oxford University, and to take degrees, in October, 1920.

#### Secondary and Technical Education, etc.

England and Wales.—The latest available statistics for secondary schools are as follows:—

|         | Total Efficient Schools | Schools on Grant List | Total Pupils in Efficient Schools |         |         | Full-Time Teachers (Grant List) |
|---------|-------------------------|-----------------------|-----------------------------------|---------|---------|---------------------------------|
|         |                         |                       | Boys                              | Girls   | Total   |                                 |
| 1934-35 | 2,094                   | 1,380                 | 293,649                           | 253,857 | 547,506 | 24,105                          |
| 1935-36 | 2,116                   | 1,399                 | 309,738                           | 258,495 | 568,233 | 25,920                          |
| 1936-37 | 2,134                   | 1,393                 | 302,472                           | 260,812 | 563,284 | 24,451                          |
| 1937-38 | 2,156                   | 1,398                 | 304,504                           | 264,585 | 569,089 | 25,089                          |

Included among the grant-receiving schools on March 31, 1939, were 785 council schools, 93 Roman Catholic schools, 427 foundation and other schools, and 103 Welsh intermediate schools. On October 1, 1938, there were 351 preparatory schools not on the grant list, with 24,227 pupils.

In the year ending July 31, 1938, there were 81 technical colleges providing advanced courses with 9,143 full-time students and 1,972 part-time students, and 208 institutions at which technical day classes were held, attended by 34,159 students, of whom 4,584 were full-time students. In addition there were 6,124 evening schools giving part-time technical and other instruction to 1,178,863 students, and 39 separate day continuation schools with 19,629 students. Among other institutions providing technical, commercial and other instruction were 224 junior technical and housewifery schools with 28,169 students, and 6 nautical schools with 867 students.

There was in 1938-39 a total of 186 art schools with 63,734 students, and 84 art classes with 6,723 students. In the same year there were 106 training institutions for teachers with 15,523 students (1,285 students in training colleges for domestic subjects).

The number of students receiving instruction in full-time courses of higher education for blind, deaf, defective and epileptic students during 1938-39 was 1,709, and of these 1,059 were blind. There were also two schools providing secondary education for blind children (43 boys and 39 girls).

The total net expenditure by local authorities on higher education in 1938-39 was 22,649,012*l.* and in 1939-40 (estimates), 23,724,843*l.*

Scotland.—In 1943 there were 986 schools with secondary divisions (782 three-year, 204 five-year), the average number of scholars on the registers being 357,964 (220,240 three-year, 137,724 five-year). The number of students attending central institutions in 1942-43 was 8,757 day students and 8,060 evening students. Centres for continuation classes numbered 558 and 1,942-43 with a total attendance of 112,038 students. In addition, courses in 1942-43 with a total attendance of 112,038 students. In addition, courses of demonstrations in war-time cookery were given at 202 centres with a total attendance of 5,862. Adult education classes were conducted at 72 total attendance of 6,140 students. The number of teachers in centres and were attended by 6,140 students. The number of teachers in schools with secondary divisions at March 31, 1943, was 13,615, including 7,282 university graduates. In 1943-44 there were 1,330 students training for the Teacher's General Certificate, including 228 graduates, in 4 training centres and 2 training colleges.

#### Elementary Education.

England and Wales.—In the year 1937-38 the number of schools (public elementary, special, nursery, and certified efficient) for elementary education was 21,678. In 1938 there were 10,363 council schools and 10,553 voluntary schools; total public elementary schools (maintained by local education authorities), 20,916. The total number of departments on March 31, 1938, was 29,224. The average attendance for the year 1937-38 at these schools was 4,526,701 (3,151,893 at council schools and 1,374,808 at voluntary schools). The number of scholars on the registers in 1939 was: 169,558 aged under 5; 3,632,211 aged 5 and under 12; 1,169,558 aged 12 and over. The number of teachers, 1937-38, was 166,674 (43,687 men and 117,987 women), of whom 131,941 were certificated, 24,058 were uncertificated and 4,905 were supplementary.

There were 609 'special' schools in 1938-39, comprising 73 for the blind, with accommodation for 4,644 pupils; 45 for the deaf, with accommodation for 4,517 pupils; 154 for the mentally defective, accommodation 16,385; 331 for the physically defective, accommodation 33,616; and 6 for epileptic children with accommodation for 606 pupils. There were also 19 Poor Law schools, 115 nursery schools and 357 play centres.

The number of meals, including milk meals, provided free in 1938-39 for necessitous undernourished public elementary school children was 141,780,290 as compared with 120,358,557 in 1938-39, and the total number of children in public elementary schools who were medically examined in 1938 was 3,240,925, and there were 2,182,157 re-inspections.

The total number of school clinics on December 31, 1938, was 2,318 (2,221 on December 31, 1937). There were 2,583 medical officers, 1,009 dentists and 6,149 nurses, including dental attendants, employed for whole or part time.

The total net expenditure of local authorities for elementary education in 1938-39 was 72,976,554*l.*, and in 1939-40 (estimates) 74,970,611*l.*

A new Education Act came into force on April 1, 1945. Under the new

<sup>1</sup> Included in total.

(a) Including those discharged without trial.

(b) Including cases in which charge was proved and an order made without conviction.

(c) Including those afterwards ordered by Crown Counsel to be disposed of summarily.

(d) Total number for indictable and non-indictable offences.

**National Insurance. Pensions. Assistance.**

Under the National Health Insurance Acts 1936–41, the Unemployment Insurance Acts 1935–40, the Old Age Pensions Act 1936, and the Widows', Orphans' and Old Age Contributory Pensions Acts 1936–41, provision is made for insurance against loss of health, for prevention and cure of sickness, compulsory insurance against unemployment, and for pensions for widows, orphans and aged persons.

*National Health Insurance.*—This is administered by the Ministry of Health in England and Wales, and the Department of Health for Scotland in Scotland; by specially constituted authorities known as Approved Societies (certain friendly societies and trade unions are included) and Insurance Committees.

Subject to specific exceptions, persons who are compulsorily brought under the National Health Insurance Act, known as *employed contributors*, comprise all persons of the age of 16 years or over who are employed under contract of service, written or implied, whether by time or piece. Aliens are subject to compulsory insurance equally with British subjects. Among persons excluded are those employed in non-manual work at a rate of remuneration exceeding £201. a year. Young persons under 16 who take up insurable employment after reaching school-leaving age are brought into the scheme as *juvenile contributors* and are entitled to free medical treatment. Insured persons who do not become members of an approved society within a certain time become *deposit contributors*; their benefits are limited. Certain persons not compulsorily insured may become *voluntary contributors*. The rates of contributions are given below. The ordinary benefits are (a) free medical treatment; (b) payments during sickness (not exceeding 26 weeks), amounting to 18s. a week for men and 15s. for unmarried women and widows, 13s. for married women, after 104 contributions; 12s. (men), 10s. 6d. (women) after 26 contributions; (c) disablement benefit after 26 weeks sickness benefit, 10s. 6d. a week for men, 9s. a week for unmarried women and widows; 8s. a week for married women; (d) maternity benefit of 40s. payable to insured women and the wives of insured men. Approved societies may also give additional benefits where they have a disposable surplus at the quinquennial valuation. Deposit contributors receive sickness and disablement benefits at rates slightly less than the above. The rates of sickness and disablement benefit shown operate as from January 5, 1942, when they were increased by 8s. a week above those previously in force.

*Widows', Orphans' and Old Age Pensions Scheme.*—This scheme applies compulsorily, like National Health Insurance, to the employed population as a whole. Its purpose is to provide old age pensions for insured persons and for the wives of insured men who have already qualified for their own pension, and pensions (with allowances for children) for widows of insured men, and orphans' pensions. Contributions under the scheme for employed contributors are payable jointly with the health insurance contributions. Persons who have been in employment subject to compulsory insurance for at least two years and cease to be employed, may then become voluntary contributors. For persons who have become voluntary contributors since January 3, 1938, health insurance and pensions insurance are distinct and independent of each other, and contributions payable under one scheme are payable separately from contributions under the other. The Approved Societies remain responsible for the administration of voluntary health insurance, but voluntary pensions insurance is administered by the Central Departments. The Pensions Act of 1937 extended the right to insure for pensions (not health

insurance) on a voluntary basis to certain persons who had not hitherto been eligible for insurance. To be eligible to join this scheme an applicant must be under the age of 40, his total income must be not more than 400*l.* a year (250*l.* in the case of women) of which not more than 200*l.* (125*l.* in the case of women) may be unearned income, and he must have been resident in the United Kingdom throughout the ten years preceding the date of his application. Persons admitted to this scheme are known as 'special voluntary contributors.' Subject to certain conditions, the following pensions are payable, free from any restrictions as to means. *Widows' pensions* of 10*s.* a week to the widows of insured men, together with *allowances* for children at 5*s.* a week for the eldest and 3*s.* for the younger children. The children's allowances continue payable up to age 14 (or as long as school instruction continues, but not beyond 31st July following the 16th birthday). On remarriage the widow's pension ceases, but children's allowances continue. The widow of a man who died or reached the age of 70 before the scheme began on January 4, 1926, but who would have been insured for pensions purposes, may receive a similar pension at age 55. *Orphans' pensions* are 7*s.* 6*d.* a week, the period of the continuance being the same as for children's allowances. *Contributory old age pensions* of 10*s.* a week at age 65 for insured men and, since July 1, 1940, at the age of 60 for insured women, and the wives of old age pensioners. The pension age of women who are special voluntary contributors, and for the wives of such contributors, is 65. Old age pensioners, and widows in receipt of widows' pensions, who have attained the age of 60 or to whom allowances for children are payable as part of their pensions, may obtain supplementary pensions on proof of need.

Widows and contributory old age pensions normally continue to age 70 and are then replaced by pensions under the Old Age Pensions Act, 1936, free from the means and other conditions which that Act imposes. The normal weekly contributions payable for National Health and Pensions Insurance from January 5, 1942, are: Men, 2*s.* (1*s.* recoverable from the employee); Women, 1*s.* 7*d.* (10*d.* recoverable from the employee).

In the case of workers aged over 65 (men) or over 60 (women), contributions of 1*s.* for men and 9*d.* for women are paid by the employer only. The weekly contribution for juvenile contributors is 4*d.*, of which 2*d.* may be recovered from the worker.

The total amount paid in Great Britain in respect of widows' and orphans' pensions for the year ending March 31, 1943, was approximately 25,533,000*l.*; the beneficiaries for the year ending December 31, 1942, were 883,000 widows and 243,000 children (including orphans). The total number and cost of pensions paid under the contributory old age pensions scheme (persons between ages 60 and 70) for the periods referred to above was 1,299,000 (33,100,000*l.*).

*Great War Pensions.*—The number of Great War pensions or allowances in payment as at March 31, 1943, was 763,750 approximately; the expenditure of the Ministry of Pensions for 1942-43 was 53,403,031*l.*, and the estimated expenditure for 1943-44 is 32,477,000*l.* (inclusive of administration expenses), and for 1944-45 is 32,401,000*l.*

*Unemployment Insurance.*—This is administered by the Ministry of Labour and National Service through the employment exchanges, and by certain trades unions and associations of employed persons. There are also special schemes in operation for the banking and insurance industries. The scheme is compulsory in its operation, and with the main exception of private indoor domestic servants, substantially all persons covered by the Health Insurance Scheme are required to be insured against unemployment.

Certain employees of Government Departments, public or local authorities, railways and public utility undertakings, and persons with rights under statutory superannuation schemes may also be excepted by their employers under certificates granted to the employers in cases where the Minister of Labour and National Service is satisfied that the employment is permanent in character, that the employees have completed three years' continuous service in that employment, and that the other circumstances of the employment are such as to make it unnecessary that they should be insured under the Unemployment Insurance Acts. (During the war, no new certificates can be granted nor further exceptions allowed under existing certificates.) *Rates of Contributions.*—The rates of weekly contributions are as follows: (a) Contributions at ordinary rates for employment under the general unemployment insurance scheme: man (aged 21 but under 65), from employer 10*d.*, from employee 10*d.*; woman (aged 21 but under 60), from employer 9*d.*, from employee 9*d.*; young man (aged 18 but under 21), from employer 9*d.*, from employee 9*d.*; young woman (aged 18 but under 21), from employer 8*d.*, from employee 8*d.*; boy (aged 16 but under 18), from employer 5*d.*, from employee 5*d.*; girl (aged 16 but under 18), from employer 4½*d.*, from employee 4½*d.*; boy or girl under 16, from employer 2*d.*, from employee 2*d.* (b) Contributions at ordinary rates for employment under the agricultural unemployment insurance scheme: man (aged 21 but under 65), from employer 3½*d.*, from employee 3½*d.*; woman (aged 21 but under 60), from employer 3*d.*, from employee 3*d.*; young man (aged 18 but under 21), from employer 3*d.*, from employee 3*d.*; young woman (aged 18 but under 21), from employer 2½*d.*, from employee 2½*d.*; boy (aged 16 but under 18), from employer 2*d.*, from employee 2*d.*; girl (aged 16 but under 18), from employer 1½*d.*, from employee 1½*d.*; boy (under 16), from employer 1½*d.*, from employee 1½*d.*; girl (under 16), from employer 1*d.*, from employee 1*d.* (c) In the case of an exempt person, the employer's share only of a contribution is payable. No part of this contribution can be recovered from the exempt person. (d) Contributions in respect of persons of the age of 65 and over (men), 60 and over (women), are payable by employers only at the following rates: for employment under the general unemployment insurance scheme: man 10*d.*; woman 9*d.* For employment under the agriculture unemployment insurance scheme: man 3½*d.*; woman 3*d.* The ordinary State contribution is a sum equivalent to one-half of the joint contributions of employers and employed persons. *Rates of Benefit.*—(a) Under the General Scheme the weekly rates of benefit payable are: men (aged 21 but under 65), 24*s.*; women (aged 21 but under 60), 22*s.*; young men (aged 18 but under 21), 19*s.*; young women (aged 18 but under 21), 17*s.*; boys (aged 17 but under 18), 12*s.*; girls (aged 17 but under 18), 10*s.* 6*d.*; boys (aged 16 but under 17), 7*s.*; girls (aged 16 but under 17), 6*s.* Additional benefits at the rate of 16*s.* a week in respect of an adult dependant and 5*s.* a week in respect of each of the first two dependent children and 4*s.* in respect of each other dependent child are payable in respect of certain classes of dependants. Benefit may be drawn subject to the conditions and disqualifications for 180 days in a benefit year. (b) Under the Agricultural Scheme the weekly rates of benefit payable are: men (aged 21 and under 65), 22*s.*; women (aged 21 and under 60), 18*s.*; young men (aged 18 and under 21), 18*s.*; young women (aged 16 and under 21), 15*s.*; boys (aged 17 and under 18), 10*s.* 6*d.*; girls (aged 17 and under 18), 9*s.*; boys (aged 16 and under 17), 6*s.*; girls (aged 16 and under 17), 5*s.* Additional benefit at the rate of 14*s.* a week is payable in respect of an adult dependant and at the rate of 5*s.* a week for each of the first two dependent

Total number of unions in 1942, 976, with a membership of 7,781,000 (males, 6,113,000; females, 1,668,000). This total includes 33,000 members in branches in Eire and 69,000 in other overseas branches in certain unions. The following table is a statistical summary relating to trade disputes for 1943 and 1944:—

|                                         | Number of Disputes |       | No. of Workers involved |             | Aggregate duration in working days |               |

### Relief of the Poor.

The numbers of persons in receipt of poor relief are as follows:—

#### England and Wales.

| January 1 | Indoor <sup>1</sup> | Outdoor <sup>1</sup> | Patients in Mental Hospitals <sup>2</sup> | Casuals | Net total of persons relieved |
|-----------|---------------------|----------------------|-------------------------------------------|---------|-------------------------------|
| 1935      | 177,551             | 1,282,581            | 116,165                                   | 12,759  | 1,589,056                     |
| 1936      | 169,049             | 1,307,424            | 117,998                                   | 11,247  | 1,505,718                     |
| 1937      | 160,868             | 1,110,884            | 119,867                                   | 10,364  | 1,407,483                     |
| 1938      | 154,030             | 925,292              | 122,076                                   | 10,285  | 1,211,633                     |
| 1939      | 148,805             | 940,204              | 123,903                                   | 10,541  | 1,222,953                     |

<sup>1</sup> Excluding casuals and rate-aided patients in Mental Hospitals.

<sup>2</sup> Rate-aided.

The average number of persons in receipt of institutional and domiciliary poor relief in 1943-44 was 540,699, excluding persons in receipt of domiciliary medical relief only; in 1942-43 the number was 570,295.

#### Scotland.

| Jan. 15 | Poor relieved (Excluding Vagrants)  |            | Vagrants                            |            | Total   |

| 1940    | 238,346                             | 92,586     | 246                                 | 14         | 338,592 |
| 1941    | 157,787                             | 62,061     | 188                                 | 18         | 217,975 |
| 1942    | 185,444                             | 49,027     | 199                                 | 10         | 234,648 |
| 1943    | 126,966                             | 44,602     | 497                                 | 13         | 172,468 |

Statistics giving the amount expended in poor-relief for year, ended in March for England and Wales, and May 15 for Scotland, are as follows:—

| Year    | England & Wales | Scotland  | Total Great Britain |
|---------|-----------------|-----------|---------------------|
|         | £               | £         | £                   |
| 1937-38 | 41,791,215      | 7,075,248 | 48,866,463          |
| 1938-39 | 43,808,725      | 7,292,528 | 50,601,253          |
| 1939-40 | 43,653,841      | 7,431,376 | 51,085,217          |
| 1940-41 | 40,118,046      | 7,136,000 | 47,254,046          |
| 1941-42 | —               | 6,973,000 | —                   |
| 1942-43 | —               | 6,008,542 | —                   |

The expenditure on institutional relief in England and Wales in 1940-41 was 21,154,228£ (20,726,137£ in 1939-40). Expenditure on domiciliary relief in 1940-41 was 15,926,100£. In Scotland, 1942-43, indoor relief amounted to 567,342£; outdoor relief, 2,668,603£; administration, etc., 936,017£; lunatic poor, 1,785,246£.

Towards the total expenditure of 40,118,046£ on poor relief in 1940-41 in England and Wales the Poor Law authorities received specific income amounting to 3,852,860£. The balance of the expenditure, amounting to 36,265,186£, was defrayed mainly out of monies derived from rates and the block grants under the Local Government Act, 1929; and for Scotland the total expenditure was 6,461,571£ in 1940-41 and 6,008,542£ in 1942-43; the amount received by Poor Law authorities was 338,895£ in 1942-43. The balance of the expenditure amounting to 5,669,647£ (1942-43) was defrayed mainly out of monies derived from rates and the block grants under the Local Government (Scotland) Act, 1929.

The total cost in money and kind of out-relief in England and Wales was 10,014,000£ for 1941-42, 9,195,000£ for 1942-43, and 9,108,000£ for 1943-44.

The decrease in the cost of out-relief since 1939-40 is mainly due to the provisions of the Old Age and Widows' Pensions Act, 1940, under which supplementary pensions became payable as from August, 1940.

<sup>1</sup> That is, revenue actually paid into the Exchequer during the financial year.  
<sup>2</sup> On property of persons dying after August 1, 1934.  
<sup>3</sup> Total ordinary revenue. The total self-balancing revenue for Post Office and Broadcasting for 1945-46 is 114,100,000

children and &c. in respect of each other dependent child. These increases are, however, limited to the extent that the rate of agricultural benefit may in no circumstances exceed 9s. a day or 54s. a week. Benefit may be drawn, subject to the conditions and disqualifications, for 90 days in a benefit year. *Approximate* particulars of receipts and payments on the General and Agricultural Accounts combined for the calendar year 1944 are as follows: Contributions, employers and employees, 48,030,000l.; Exchequer 'equal thirds,' 24,015,000l.; income from investments and other receipts, 5,496,000l.; total receipts, 77,541,000l.; Unemployment benefit: 2,953,000l.; administration, 2,667,000l.; other payments, 273,000l.; total payments, 3,893,000l. The balance standing to the credit of the general account of the Unemployment Fund at the end of 1944 was 295,013,055l.

**Unemployment Assistance.**—The Unemployment Act of 1934 directed the creation of a Board called the Unemployment Assistance Board, for the administration of unemployment assistance and other purposes connected with Part II of the Act. The Board consists of a Chairman, a Deputy Chairman and not more than four members; its staff are civil servants. On the extension of the Board's duties in 1940 to include the administration of the new supplementary pensions scheme, the name of the Board was then changed to Assistance Board. The Minister of National Insurance answers for the Board in Parliament in all matters concerning the Board's statutory duties.

Part II of the Unemployment Act of 1934 provides for the assistance of those who are in need of work, the promotion of their welfare, the improvement and re-establishment of their condition, and the grant and issue of unemployment allowances to such persons, provided that they satisfy the conditions laid down in the Act. The conditions are, that they are between the ages of 16 and 65, are normally in insurable employment under the Widows', Orphans' and Old Age Contributory Pensions Acts, 1925 to 1932, or but for local industrial conditions would have been in such employment, and are capable of and available for work.

Unemployment allowances are usually regular weekly payments ordinarily paid at the Employment Exchange at which the person is registered for work. Subject to a test of need the allowances provide for the maintenance of the recipient and his dependants in accordance with Regulations made under the Act and approved by Parliament. The Regulations lay down general standards but leave the Assistance Board's officers discretion to adjust individual allowances to meet special circumstances.

The Act provides that anyone who is dissatisfied with the results of his application to the Board for unemployment assistance can ask to have the matter brought before the local Appeal Tribunal. Each tribunal has a Chairman, appointed by the Minister of National Insurance, a representative of the Board, and a work-people's representative from a panel nominated by the Minister of National Insurance. The decisions of the Tribunal are final in the circumstances before them. For the purpose of securing the advice and assistance of persons having local knowledge and experience in matters affecting the functions of the Board, local Advisory Committees have been established throughout Great Britain in accordance with the provisions of the Act.

On the outbreak of war the Unemployment Act was extended by the Unemployment Assistance (Emergency Powers) Act, 1939, to include persons who did not satisfy the conditions for unemployment assistance but who were in distress as a result of the war. This extension of the Act was implemented by the Prevention and Relief of Distress Regulations, 1939

and 1941, made under the Emergency Powers Act of 1939, and is generally known as the P.R.D. scheme.

During the year 1944 the total expenditure on Unemployment and P.R.D. allowances was approximately 2,048,000l. and the cost of administration was about 243,000l.

**Supplementary Pensions.**—The Old Age and Widows' Pensions Act (1940) introduced the scheme of supplementary pensions, for old age pensioners and widow pensioners of sixty or more years of age, for which the Unemployment Assistance Board under the changed name of the Assistance Board became responsible. The scheme was extended in 1943, by the Pensions and Determination of Needs Act, to include widows under sixty years of age who have an allowance for a dependant child included in their pension.

Supplementary pensions are ordinarily regular weekly payments paid at the Post Office concurrently with the main pension, and subject to a test of need are designed to bring the income of the pensioner and his or her dependants up to standards laid down in Regulations made under the Acts and approved by Parliament. As with unemployment assistance the Regulations lay down general standards, but leave the Board's officers discretion to adjust individual supplements to meet special circumstances. Any pensioner who is dissatisfied with the amount of the supplementary pension granted to him can ask to have the matter brought before the local Appeal Tribunal.

During the year 1944 the approximate total expenditure on supplementary pensions was 54,822,000l. and the cost of administration was about 1,977,000l. At the end of December, 1944, the number of supplementary pensioners in payment was approximately 1,387,000, which, as man and wife are normally dealt with as one, represented provision for approximately 1,616,000 pensioners.

\* Token vote.

\* Excluding value of supplies from the United States under the Lend-lease Act.

The Exchequer issues shown above are those with which the various departments were supplied to meet all requirements, whether original or supplementary.

In addition to the ordinary expenditure above given, there were in 1944-45 issues to meet capital expenditure under the Post Office and Telegraph (Money) Act, 1937, amounting to 6,750,000*l.* (9,050,000*l.* in 1943-44). Issues under the Defence Loans Act, 1937, amounted to 19,663,583*l.* (20,108,271*l.* in 1943-44), and under the Overseas Trade Guarantees Act, 1939, to 283,804*l.* (275,325*l.* in 1943-44). The money raised by National Savings Certificates in 1943-44 was 303,350,000*l.*, by Treasury Bills, 13,894,762,000*l.*, and by 3 per cent. Defence Bonds, 118,545,017*l.*, while Treasury Bills paid off amounted to 13,584,775,000*l.* The total amount of issues for redemption of Unfunded Debt was 16,640,533,654*l.* The balance in the Exchequer on April 1, 1945, was 2,500,847*l.*

The following were the principal items of the original estimates for Grant Services for the years 1943-44, 1944-45 and 1945-46:—

|                                                                                   | 1943-44 | 1944-45 | 1945-46 |

## II. TAXATION.

The net receipts from the principal branches of taxation, Great Britain and Northern Ireland (reserved taxes), were as follows in the years shown:—

| Year ended<br>March 31 | Customs <sup>1</sup> | Excise <sup>1</sup> | Estate,<br>&c.<br>Duties <sup>1</sup> | Stamps <sup>1</sup> | Income<br>Tax | Sur-<br>Tax |
|------------------------|----------------------|---------------------|---------------------------------------|---------------------|---------------|-------------|
|                        | Thous. £             | Thous. £            | Thous. £                              | Thous. £            | Thous. £      | Thous. £    |
| 1940-41                | 308,062              | 224,720             | 81,581                                | 13,009              | 530,765       | 76,772      |
| 1941-42                | 378,861              | 325,656             | 90,870                                | 14,133              | 769,657       | 74,937      |
| 1942-43                | 459,489              | 425,300             | 93,336                                | 15,230              | 1,006,828     | 75,358      |
| 1943-44                | 560,832              | 482,200             | 99,466                                | 17,740              | 1,183,583     | 76,042      |
| 1944-45                | 579,323              | 496,900             | 110,888                               | 17,010              | 1,316,329     | 73,585      |

<sup>1</sup> The principal items included in these branches of revenue are shown on pages 37-39 above. The excise receipts include receipts from Motor Vehicle Duties.

*Income Tax.*—The gross amount of income brought under the review of the Inland Revenue Department in the year ended April 5, 1938, in Great Britain and Northern Ireland, was 3,990,338,614*l.*; in 1938-39 it was estimated to be approximately 4,160,000,000*l.* The income on which tax was actually received in 1937-38, after allowing for exemptions and reliefs, was 1,437,434,008*l.*, and the estimated amount for 1938-39 was 1,495,000,000*l.* The estimated number of incomes in Great Britain and Northern Ireland above the effective exemption limit in 1938-39 was 9,800,000 (9,700,000 for 1937-38): the number actually chargeable with tax in 1938-39 was estimated at 3,800,000 (3,700,000 for 1937-38). The number chargeable rose to 12,500,000 for 1942-43.

By the War Budget of September, 1939, the standard rate of tax was raised by 1*s.* 6*d.* to 7*s.* in the £. The supplementary Budget of 1940-41 raised the standard rate to 8*s.* 6*d.*, and for 1941-42, 1942-43 and 1943-44 the standard rate was further increased to 10*s.* Allowances for children, dependent relatives, etc., together with certain other reliefs, are granted to all taxpayers irrespective of the amount of their total income. In 1940-41

## 42 THE BRITISH COMMONWEALTH:—GREAT BRITAIN

incomes not exceeding 120*l.* were exempt from tax and for 1941–42 the exemption limit was reduced to 110*l.* The relief for earned income in 1940–41 was one-sixth of such income (with a maximum allowance of 250*l.*); for 1941–42 and later years it is one tenth of such income (with a maximum allowance of 150*l.*). For 1940–41 the personal allowance for married persons was 170*l.*, and for other persons, 100*l.*; from 1941–42 the allowances were reduced to 140*l.* and 80*l.* respectively. Children's allowances remain at 50*l.* for each child. The net receipt of income tax was 386,052,324*l.* in 1938–39 and 1,316,839,000*l.* for 1944–45.

**Sur-tax.**—Sur-tax is payable by persons with incomes exceeding 2,000*l.* per year (prior to 1914–15, 5,000*l.* per year; from 1914–15 to 1917–18, 3,000*l.* per year, and in 1918–19 and 1919–20, 2,500*l.* per year).

As part of a general scheme for the simplification of the Income Tax, the Finance Act, 1927, merged the Super-tax into one tax with the Income Tax having the same basis of assessment and payable, under the name of Sur-tax, as a deferred instalment of Income Tax on the 1st January in the year following the year of assessment. The Sur-tax was payable for the first time in respect of the year 1928–29 on January 1, 1930. The number of persons assessed for Sur-tax for 1937–38 was 102,022, with a total assessed income of 521,471,169*l.* Net receipt from Sur-tax in 1944–45 was 73,535,000*l.*

**National Defence Contribution.**—Imposed by the Finance Act, 1937, the National Defence Contribution applies, with certain exceptions, to trades and businesses (including agricultural businesses) which are carried on in the United Kingdom, or carried on abroad by persons ordinarily resident in the United Kingdom. The principal exceptions are water, gas, electricity, railway and other public utility undertakings. The tax was imposed for a period of five years from April 1, 1937, since extended by the Finance Act, 1942, and is chargeable by reference to profits. The rate at which tax is charged is 5 per cent. if the business is carried on by a company and 4 per cent. if carried on by an individual or a firm. No contribution is payable where the profits during an accounting period of twelve months do not exceed 2,000*l.*, and in cases where the profits do not exceed 12,000*l.* an abatement is allowed of one-fifth of the amount by which the profits fall short of 12,000*l.*

Interest on borrowed money and other annual payments are allowed as deductions.

The number of assessments, made in the year 1938–39 for Great Britain and Northern Ireland was 30,856 and the tax assessed amounted to 24,838,838*l.*

The Exchequer receipts were 33,446,000*l.* in 1943–44 and 33,804,000*l.* in 1944–45.

**Excess Profits Tax.**—This tax was imposed from April 1, 1939, by the Finance (No. 2) Act, 1939, and is charged on the amount by which the profits arising in the chargeable period exceed the standard profits. It applies generally to trades and businesses carried on in the United Kingdom or carried on abroad by persons ordinarily resident in the United Kingdom. The tax was levied at the rate of 60 per cent. on excess profits arising from April 1, 1939, and later increased to 100 per cent. in respect of excess profits arising from April 1, 1940. It is not additional to the National Defence Contribution, but alternative to it, only the higher of the two taxes being payable.

The standard profits are normally based on the profits of the years 1935,

1936 and 1937 with various options as to the years which the business could select. There was also provision for a minimum standard in certain cases. Profits of the standard period were also adjustable by reference to the variation in the capital employed in the business as between the standard period and the chargeable period.

The Exchequer receipts were 466,668,000*l.* in 1943–44 and 477,134,000*l.* in 1944–45.

It was estimated that national taxation per head of population amounted in 1938–39 to 19*l.* 7*s.* 8*d.* (16*l.* 7*s.* 1*d.* in 1931–32).

The net national income of the United Kingdom was estimated to be 8,172,000,000*l.* in 1943. Private income (excluding transfer payments) amounted to 8,075,000,000*l.*, and income from public property, trading, etc., received by the central Government and local authorities amounted to 97,000,000*l.*

## III. NATIONAL DEBT.

Borrowing by the State on the security of taxes was practised in Norman times, but the National Debt really dates from the time of William III. The acknowledged debt in 1689 was about 664,000*l.*, on which the annual charge for interest and management was only 40,000*l.* At various subsequent dates the amounts were as follows (including the Irish debt throughout):—

| Year                                             | Debt <sup>1</sup><br>Million £ | Annual<br>charge, includ-<br>ing annuities<br>Million £ | Annuities only<br>(included in pre-<br>vious column)<br>Million £ |

<sup>1</sup> These amounts do not include the capital value of terminable annuities.

<sup>2</sup> Including Interest, Management and New Sinking Fund.

The following statement shows the total amount of the Gross Liabilities and the Assets of the State on March 31, 1944:—

Beyond these reserve forces was the Officers' Training Corps, formed of a Senior and Junior Division, the units of which were raised in the universities and public schools respectively.

The Territorial Army was the main citizen force. It was the direct heir of the Volunteer Force, formed in 1859, which had been developed by Mr. Haldane in 1907 into a comprehensively organized Territorial Force of 14 infantry divisions and 14 cavalry brigades. This force was enlisted for home defence, and in 1914 could be sent out of the country only in so far as its individual members were willing to volunteer—as most of them did. When the Territorial Army was constituted after that war, every man joining it had to undertake a liability to serve overseas in time of war. Service was based on a four years' engagement, with the option of extending it; the training comprised a fortnight's annual camp, together with a minimum of 40 'drills' (hourly periods of instruction) during the first year, and 20 in subsequent years.

The structure remained broadly the same as before the last war, save that the cavalry were reduced to 14 regiments; of the other 89 yeomanry regiments, 8 were converted into armoured car units and the remainder into extra artillery units. The establishment was 175,000 men, but the actual strength had dwindled to 130,000 in 1935. Then a turn of the tide came—with a belated realization of the growth of danger abroad, and an overdue improvement in the conditions of service. By 1937 the strength rose to 166,000 on an establishment which had been raised to 200,000, and, by the end of 1938, to 205,000 on an establishment of 224,000.

The increase in the establishment was chiefly due to meet the growing demands of the anti-aircraft defence of Great Britain—a duty which had been entrusted to the Territorial Army since 1935. The 2 anti-aircraft divisions originally formed, by converting infantry units, were increased to 5 in 1938, with a total establishment of 87,000 officers and men. In the autumn of 1938 the reorganization of the field army side of the citizen force was undertaken—with a view to producing 9 infantry divisions (of the new nine-battalion pattern), 3 motorized divisions (of six infantry battalions and one motor-cyclist battalion), and the component parts of an armoured division. Numerous other reforms were initiated under Mr. Horne-Belisha's regime to develop the opportunities of, and state of training in, the Territorial Army.

#### *The development of the Army since 1939.*

Until 1937, the Regular Army at home available for field service retained its pre-1914 pattern, consisting of 5 infantry divisions each of 12 battalions and the elements of 1 cavalry division. The only significant addition was a solitary tank brigade, formed in 1934. The re-equipment of this force was so backward that, if war had come in September, 1938, only two fairly well equipped divisions could have been placed in the field, together with a single battalion of light tanks, and a single company of infantry-tanks.

A mechanised mobile division had been created in 1937 to replace the former cavalry division; in 1938 this was developed into an armoured division, while a further armoured division was extemporized out of the mechanized units available in Egypt. The infantry divisions were re-organized on a 9-battalion model like those of continental armies—with an increase of artillery support as well as of their own fire-power, while their transport was completely motorized. The battalions comprised 4 companies, each of 3 platoons, each of 3 sections. The armament of each platoon included a light mortar, while every section was given a Bren-gun. To every battalion was added, also, a platoon of armoured carriers mounting Bren-guns. The heavy machine-guns were transferred to, and grouped in, separate battalions. The artillery was reorganized in 12-gun instead of 6-gun batteries.

When the new Army Estimates were presented in March, 1939, it was announced that the armoured division at home was to be expanded into two—so that the Regular Expeditionary Force would comprise 2 armoured and 4 infantry divisions. Another significant, if long expected step, was the fusion of the mechanised cavalry regiments with the Royal Tank Corps: the new body being entitled the Royal Armoured Corps. The Territorial anti-aircraft divisions for the defence of Great Britain were to be further increased, from five to seven.

The German occupation of Bohemia, and threat to Poland, led almost immediately to a decision to double the scale of the field portion of the Territorial Army—thus providing a potential 26 divisions to reinforce the Regular Expeditionary Force. This expansion had hardly begun when, at the end of April, 1939, the further decision was taken by the Government to introduce compulsory military service—starting at the age of twenty. In the few months that remained before the war began, the calling up of men for this new Militia, as it was described, hindered rather than helped the preparation of the Army—owing to the additional demands it imposed on the limited supply of instructors and equipment. And the intensified application of conscription after the outbreak of war, in September, 1939, was one of the factors which adversely affected the rate of armament production during the first winter of the war; the output of aircraft actually fell much below the pre-war level, which it did not regain until shortly before the spring campaign of 1940 opened.

In September, 1939, 2 army corps (composed of 4 regular infantry divisions) were immediately dispatched to France, where they occupied a sector along the Franco-Belgian frontier north and east of Lille. A fifth infantry division followed shortly afterwards. The commander of the British Expeditionary Force, Lord Gort, had the status of an army commander; his army formed part of the group of armies commanded by General Billotte, who in turn came under General Georges, the commander-in-chief of the forces along the northern frontiers of France, who in turn came under General Gamelin, the Allied generalissimo.

When the German offensive opened on May 10, 1940, the British Expeditionary Force, under Lord Gort's command, had been increased to 18 divisions, including 8 Territorial divisions which were without artillery and divisions were employed to guard the communications. The solitary British armoured division which was available at that time had, unfortunately, not been sent out. It did not arrive on the scene until the German armoured forces had reached the Channel coast and cut off the armies in Belgium. In the successful withdrawal of these by sea from Dunkirk, 215,000 British troops (as well as 120,000 French) were brought away safely, although most of their equipment had to be abandoned. The casualties suffered, including prisoners, amounted to 30,000.

In January, 1941, the Prime Minister stated that the intended scale of the Army had been settled just after the outbreak of war, and had been altered since only to the extent of providing for the equipment of 10 more divisions. He also mentioned that Britain had about 4,000,000 men under arms, including the Home Guard (the strength of which has been given as 1,700,000).

During 1941, the proportion of armoured divisions was gradually increased, though they were not grouped in armoured army corps as had been done in the German Army since early in the war. The customary practice was to attach one armoured division to each infantry corps, whereas the Germans often adopted the opposite method of attaching a motorised infantry division to an armoured corps. The British Army, however, followed the German in halving the tank strength of the armoured divisions,

<sup>a</sup> Royal New Zealand Navy.<sup>a</sup> Royal Canadian Navy.

The destroyers of the British Fleet are of the following classes: flotilla leaders (1,390–1,540 tons, 34–36·5 knots), 11 (including 1 Australian and 1 Canadian); R and S classes (900–905 tons), 8; V and W classes (1,090–1,140 tons), 43 (including 1 Australian); 'Flush deck' (ex-American) type, 34 (including 6 Canadian); A class (1,170–1,350 tons), 7 (including 1 Canadian); B class (1,360 tons), 8; C, D, E and F classes (1,350–1,375 tons), 10 (including 6 Canadian); G, H and I classes (1,335–1,370 tons), 12 (including 2 Canadian); Tribal class (1,870 tons), 13 (including 3 Australian and 5 Canadian); Javelin class, 9 (including 3 Australian); 'Hunt' classes, 58; L and M classes, 4; various other war-built classes, over 100 (including 2 Australian and 2 Canadian).

The submarines are of seven successive classes. H class (410 tons surface displacement), 7; L class (760 tons), 3; O class (1,311–1,475 tons), 4; Proteus class (1,475 tons), 3; Sealion class (640–670 tons), 18; Severn class (1,805–1,850 tons), 2; Porpoise class (minelaying, 1,500–1,520 tons), 2; Ureola class (640 tons), 20; Trident class (1,090 tons), 18; others, of various types, 3 or more.

A number of destroyers, submarines and corvettes have been transferred to Allied Navies.

In 1944, land under the plough amounted to 19·4 million acres (crops and fallow, 14·6 million acres; temporary grassland, 4·8 million acres). Permanent grassland amounted to 11·7 million acres.

Livestock in the United Kingdom as at June in each year shown (in thousands):—

|               | 1940   | 1941   | 1942   | 1943   | 1944   |
|---------------|--------|--------|--------|--------|--------|
| Cattle . . .  | 9,093  | 8,940  | 9,075  | 9,250  | 9,545  |
| Sheep . . .   | 26,819 | 22,257 | 21,506 | 20,383 | 20,340 |
| Pigs . . .    | 4,106  | 2,558  | 2,143  | 1,379  | 1,875  |
| Horses . . .  | 1,080  | 1,084  | 1,006  | 967    | 918    |
| Poultry . . . | 71,243 | 62,059 | 57,813 | 50,729 | 55,906 |

Details of the principal crops are given in the following table for the United Kingdom as at June in each year:—

| Year                               | Wheat | Barley | Oats  | Beans | Pean | Potatoes | Turnips and Swedes | Mangold | Sugar Beet |
|------------------------------------|-------|--------|-------|-------|------|----------|--------------------|---------|------------|
| ACREAGE (THOUSANDS OF ACRES).      |       |        |       |       |      |          |                    |         |            |
| 1940                               | 1,809 | 1,389  | 2,399 | 91    | 88   | 832      | 746                | 281     | 329        |
| 1941                               | 2,365 | 1,475  | 2,951 | 194   | 64   | 1,123    | 837                | 267     | 351        |
| 1942                               | 2,516 | 1,523  | 4,133 | 223   | 69   | 1,504    | 858                | 260     | 425        |
| 1943                               | 3,461 | 1,784  | 3,678 | 249   | 64   | 1,891    | 830                | 286     | 417        |

| 1943                               | 3,449 | 1,641  | 3,133 | —     | —    | 9,822    | —                  | —       | 3,760      |

For the quantities of cereals and live stock imported see under COMMERCE.

The number of holdings in Great Britain (exceeding 1 acre) is given as follows:—

| Size of Holdings          | England and Wales (1939) | Scotland (1939) | Great Britain (1939) |
|---------------------------|--------------------------|-----------------|----------------------|
| Above 1 and under 5 acres | 61,384                   | 16,389          | 77,773               |
| " 5 " 50 "                | 161,035                  | 82,942          | 193,977              |
| " 50 " 800 "              | 127,890                  | 22,589          | 149,969              |
| Over 800 acres            | 11,864                   | 2,871           | 14,235               |
| Total                     | 361,663                  | 74,291          | 435,954              |

## II. FISHERIES.

Quantity and value of fish of British taking landed in Great Britain (excluding salmon, except that figures for England and Wales include sea-caught salmon and sea-trout):—

|                              | 1943       | 1935       | 1936       | 1937       | 1938       |
|------------------------------|------------|------------|------------|------------|------------|
|                              | Tons       | Tons       | Tons       | Tons       | Tons       |
| England and Wales . . . .    | 678,890    | 717,550    | 790,804    | 851,786    | 776,625    |
| Scotland . . . . .           | 252,675    | 275,324    | 253,239    | 235,083    | 269,023    |
| G.B. (excluding shell-fish). | 931,565    | 992,874    | 1,044,043  | 1,086,819  | 1,045,648  |
|                              | £          | £          | £          | £          | £          |
| England and Wales . . . .    | 11,985,551 | 11,987,429 | 11,961,156 | 11,932,690 | 12,233,209 |
| Scotland . . . . .           | 3,544,211  | 3,852,112  | 3,788,007  | 3,422,178  | 3,826,671  |
| G.B. (excluding shell-fish). | 15,529,762 | 15,839,541 | 15,749,163 | 15,354,868 | 16,059,880 |
| Value of shell-fish . . . .  | 489,879    | 494,413    | 523,593    | 534,297    | 483,490    |

Landings of fish of British taking in 1941 amounted to 4,904,000 cwts. ; in 1942, 6,091,000 cwts. ; in 1943, 6,175,000 cwts.

## III. MINING AND METALS.

General summary of the mineral production of Great Britain and the Isle of Man in 1937 and 1938:—

| Description of Mineral                        | 1937        |                                 | 1938        |                                 |
|-----------------------------------------------|-------------|---------------------------------|-------------|---------------------------------|
|                                               | Quantity    | Value at the Mines and Quarries | Quantity    | Value at the Mines and Quarries |
|                                               | Tons        | £                               | Tons        | £                               |
| Arsenic (white) and arsenic                   | 95          | 1,023                           | 65          | 742                             |
| soot . . . . .                                | 73,308      | 137,315                         | 76,318      | 130,591                         |

| Zinc ore (dressed) . . .                       | 13,083     | 84,353                          | 19,144     | 74,504                          |
| Total (including minerals not specified) . . . | —          | 208,578,736                     | —          | 214,978,531                     |

The metals obtainable from the ores produced in 1938 were:—Copper, 36 tons, value 1,641£; iron, 3,557,757 tons, 21,399,104£; lead, 28,257 tons, 431,390£; silver, 107,985 ozs., 8,788£; gold, 2,428 ozs., 17,805£; tin, 1,999 tons, 379,019£; zinc, 8,959 tons, 125,351£; total value, 22,362,598£.

The total number of persons (including clerks and salaried persons) ordinarily employed at all mines in Great Britain under the Coal and Metalliferous Mines Regulation Acts in 1938 was 814,900. The number of mines at work was 2,409; 630,591 persons (males) worked underground, and 181,069 males and 3,240 females (including clerks and salaried persons) above ground. The average number employed at quarries under the Quarries Act in 1938 was 76,128, of whom 49,543 worked inside the quarries, and 26,585 outside. The number of quarries at work was 5,099.

Professor H. S. Jevons estimated the resources of British coal in 1915, within 4,000 feet of the surface, at 197,000 million tons.

Saleable coal produced and the number of producing mines: 1939, 231,337,900 tons, 1,955 mines; 1940, 224,293,000 tons, 1,868 mines; 1941, 206,344,300 tons, 1,845 mines; 1942, 203,633,400 tons, 1,733 mines; 1943, 194,493,000 tons, 1,692 mines.

In the year 1943, the coal available for consumption at home is estimated to have been 188,500,000 tons, some of the principal uses being: railways, for locomotive purposes, 14,100,000 tons; gas works, 20,900,000 tons; coke ovens (coal carbonised), 20,900,000 tons; iron works, manufacture of pig iron and steel, 11,300,000 tons; collieries (engine-fuel), 11,600,000 tons; electricity generating stations, 22,600,000 tons; general manufacturing and all other purposes, including domestic use and coastwise bunkers, 81,400,000 tons.

The average number of wage-earners (excluding clerks) in collieries in 1943 was 707,800 (709,300 in 1942).

## Iron ore produced in and imported into Great Britain:—

| Year | Iron ore produced |           | Iron ore imported and retained |           |
|------|-------------------|-----------|--------------------------------|-----------|
|      | Weight            | Value     | Weight                         | Value     |
|      | Tons              | £         | Tons                           | £         |
| 1936 | 12,701,000        | 2,838,000 | 5,961,000                      | 5,290,000 |
| 1937 | 14,215,000        | 3,504,000 | 7,039,000                      | 8,077,000 |
| 1938 | 11,859,000        | 3,395,000 | 5,164,000                      | 7,291,000 |

Iron ore produced in 1941 amounted to 18,974,000 tons, in 1942 to 19,540,000 tons and in 1943 to 18,487,000 tons.

The exports of British iron ore are insignificant.

Statistics of blast furnaces in operation:—

| Year | Furnaces in Blast† | Ore Smelted | Pig-iron made | Coal used   | Coke used   | Pig Iron Exported |
|------|--------------------|-------------|---------------|-------------|-------------|-------------------|
|      |                    | Thous. Tons | Thous. Tons   | Thous. Tons | Thous. Tons | Thous. Tons       |
| 1936 | 110½               | 18,615      | 7,721         | 83          | 8,610       | 100               |
| 1937 | 124½               | 20,136      | 8,493         | 96          | 9,664       | 94                |
| 1938 | 98½                | —           | 6,761         | —           | —           | —                 |

† The average number of furnaces in blast for the year.

Pig iron produced in 1941 amounted to 7,392,000 tons, in 1942 to 7,604,000 tons and in 1943 to 7,187,000 tons.

Total number of open hearth furnaces in 1937, 442, of total capacity per heat, 29,086 tons.

The total output of steel ingots and castings in 1938 amounted to 10,393,800 tons, in 1941 to 12,312,000 tons, in 1942 to 12,764,000 tons and in 1943 to 13,031,000 tons.

The total output of finished steel products in 1938 was 7,491,400 tons (9,642,800 tons in 1937). Total iron and steel and manufactures thereof exported in 1938, was 1,917,639 tons, valued at 41,598,968£; in 1937, 2,574,079 tons, valued at 48,870,349£.

Statistics of the shale oil industry are as follows: Output of shale in 1938 was 1,551,000 tons, valued at 564,000£. About 33,000,000 gallons of crude oil and crude naphtha, and 25,200 tons of sulphate of ammonia were produced.

In 1938 oil refineries in Great Britain treated 629,830,000 gallons of crude oils and produced 455,696,000 gallons of refined oils and spirits (including 92,779,000 gallons of motor spirit, 233,037,000 gallons of fuel and Diesel oil), and 619,103 tons of solid products (asphalt and pitch, wax and

petroleum coke). The approximate quantity of the principal petroleum product available for consumption in the United Kingdom was, in 1937, 2,732·9 million gallons; in 1938, 2,890·9 million gallons.

## IV. INDUSTRIES.

The following table summarises, for Great Britain and Northern Ireland, the preliminary statistics relating to the Census of Production, 1935, for the principal industries:—

| Industry                              | Gross output         | Cost of materials    | No. of persons employed (average) | Mechanical power available <sup>1</sup> |
|---------------------------------------|----------------------|----------------------|-----------------------------------|-----------------------------------------|
|                                       | £'000                | £'000                |                                   | Thous. H.P.                             |
| Iron and steel . . . . .              | 430,874 <sup>a</sup> | 257,068 <sup>a</sup> | 635,651 <sup>a</sup>              | 3,151·2                                 |
| Engineering, shipbuilding & vehicles  | 473,639              | 229,646              | 1,061,871                         | 2,025·1                                 |
| Non-ferrous metals . . . . .          | 104,767              | 74,842               | 119,257                           | 326·0                                   |
| Textiles . . . . .                    | 516,769 <sup>a</sup> | 840,181 <sup>a</sup> | 1,075,555 <sup>a</sup>            | 2,772·4                                 |
| Leather . . . . .                     | 33,238               | 22,468               | 48,294                            | 78·2                                    |
| Clothing . . . . .                    | 171,997              | 91,698               | 515,700                           | 123·7                                   |
| Food, drink and tobacco . . . . .     | 652,563              | 396,329              | 505,621                           | 745·8                                   |
| Chemicals, etc. . . . .               | 191,792              | 101,517              | 191,080                           | 852·3                                   |
| Paper, printing, etc. . . . .         | 181,060              | 69,007               | 400,736                           | 778·6                                   |
| Timber . . . . .                      | 68,722               | 36,175               | 167,850                           | 379·8                                   |
| Clay and building materials . . . . . | 33,522               | 29,795               | 245,792                           | 575·7                                   |
| Building and contracting . . . . .    | 187,661              | 101,078              | 484,374                           | 223·3                                   |

<sup>a</sup> 1930 census.<sup>a</sup> 1937 census.

## V. POWER (WATER, GAS AND ELECTRICITY).

The available water-power resources of Great Britain are estimated to be 850,000 B.H.P., of which 250,000 B.H.P. are developed (1927).

Gas manufactured (millions of cubic feet): 1943, coal gas, 298,424; water gas, 41,289; other gas, 8,123. Gas bought from coke ovens, 46,992. Total gas available, 394,843 (387,700 in 1942). In 1943, coke used for gas production was 20,852,000 tons; gas oil used for gas production, 52,700,000 gallons.

Electricity generated (authorised undertakings), less the amount consumed by the undertakings, amounted to 36,942 million units in 1943 (35,654 million units in 1942). Number of consumers was 10,101,000 in 1938, 10,510,000 in 1942 and 10,520,000 in 1943.

## Commerce.

Value of the imports and exports of merchandise (excluding bullion and specie and foreign merchandise transhipped under bond) of the United Kingdom for six years:—

| Year              | Total Imports | Exports of British Produce | Exports of Foreign and Colonial Produce | Total Exports |
|-------------------|---------------|----------------------------|-----------------------------------------|---------------|
|                   | £             | £                          | £                                       | £             |
| 1939              | 885,512,502   | 439,535,710                | 46,033,592                              | 485,569,302   |
| 1940 <sup>1</sup> | 1,099,868,877 | 411,160,762                | 26,188,957                              | 437,349,719   |
| 1941 <sup>1</sup> | 1,145,000,000 | 365,378,757                | 12,700,000                              | —             |
| 1942 <sup>1</sup> | 1,003,100,000 | 269,500,000 <sup>2</sup>   | 4,600,000 <sup>2</sup>                  | 270,866,000   |
| 1943 <sup>1</sup> | 1,216,800,000 | 232,200,000 <sup>2</sup>   | 5,400,000 <sup>2</sup>                  | 232,778,000   |
| 1944 <sup>1</sup> | —             | —                          | —                                       | 258,052,000   |

<sup>1</sup> Provisional figures.<sup>2</sup> Excluding munitions, i.e. shipments by Government Departments of aircraft and other vehicles, and arms, ammunition and military and naval stores.

The value of goods imported is generally taken to be that at the port and time of entry, including all incidental expenses (cost, insurance, and freight) up to the landing on the quay. For goods consigned for sale, the market value in this country is required and recorded in the returns. This is ascertained from the declaration made by the importers, and is checked by the expert knowledge available in the Customs Department, with the help of current price-lists and market reports. For exports, the value at the port of shipment (including the charges of reports. For exports, the value at the port of shipment (including the charges of delivering the goods on board) is taken. Imports are entered as from the country whence the goods were consigned to the United Kingdom, which may, or may not, be the country whence the goods were last shipped. Exports are credited to the country of ultimate destination as declared by the exporters.

Included in the exports for 1943 were: iron and steel manufactures, 134,000 tons (338,000 tons in 1942); cotton piece goods, 374 million square yards (485 million square yards in 1942); rayon piece goods, 76 million square yards (116 square yards in 1942); cotton yarn, 171,000 cwts. (167,040 cwts. in 1942).

Trade according to countries for the years 1937 and 1938:—

| Countries                       | Value of Merchandise consigned from Countries in first column |                   | Exports of Merchandise consigned to Countries in first column |                   |                              |          |
|---------------------------------|---------------------------------------------------------------|-------------------|---------------------------------------------------------------|-------------------|------------------------------|----------|

<sup>1</sup> Provisional figures.

**Dominion Navies.**—The Royal Indian Navy's effective strength in 1943 included 10 sloop, 1 corvette, 16 fleet minesweepers, 39 trawlers and a surveying vessel, besides numerous auxiliaries.

The Royal Australian Navy, in addition to the 4 cruisers named in the list above, has 1 flotilla leader, 10 destroyers, 2 sloops, 53 fleet minesweepers, several frigates and sundry other craft. Other vessels are under construction.

The Royal New Zealand Navy, in addition to the cruisers *Gambia*, *Achilles* and *Leander*, has 4 corvettes, 19 trawlers and a number of auxiliaries.

The Royal Canadian Navy has, in addition to the cruiser *Uganda*, 23 destroyers, 69 frigates, 114 corvettes, 67 fleet minesweepers and many smaller vessels, such as trawlers, motor launches and auxiliaries, the total exceeding 550. Two destroyers and various other vessels are being built, and another cruiser is to be acquired. Two escort aircraft carriers are manned by the Royal Canadian Navy, except for flying personnel.

Newfoundland has 10 vessels suitable for use as transports or patrol craft.

### III. AIR FORCE.

In May, 1912, the Royal Flying Corps first came into existence. On January 2, 1918, an Air Ministry was formed, and the control of the air force was vested in an Air Council analogous to the Army Council. The Air Minister was given the status of a Secretary of State and became President of the Council. In April, 1918, the Royal Flying Corps and the Royal Naval Air Service were amalgamated, under the Air Ministry, as the Royal Air Force.

The force consists of the Royal Air Force, the Air Force Reserve, the Auxiliary Air Force, the Air Training Corps and the Women's Auxiliary Air Force. The establishment of the Royal Air Force for the year 1939-40 was 118,000, exclusive of those serving in India, who are paid for by the Government of India. On March 1, 1939, the strength of the Metropolitan Air Force was 157 regular, 19 auxiliary squadrons and 47 balloon squadrons. 80 squadrons were serving overseas. The first line strength of the Metropolitan Air Force on April 1, 1939, was 1,750 aircraft. In 1939, 3 squadrons were added to the Middle East Area. In 1937 the Fleet Air Arm was transferred to the Royal Navy. Present strengths are not divulged.

The Royal Air Force is organised into commands as follows:—

I. United Kingdom: (a) Bomber command; (b) Fighter command; (c) Coastal command; (d) Training command; (e) Maintenance command; (f) Air Transport command; (g) Flying Training command; (h) Technical Training command; (i) Ferry command. Bomber command now includes a Base command, and Tactical Air Force command now includes some fighter squadrons.

II. Overseas: (a) Middle East commands, (b) Iraq, (c) India, (d) Mediterranean, (e) Palestine, (f) Far East.

Commands are subdivided into groups and wings, a certain number of squadrons being allotted to each group or wing. Squadrons are subdivided into flights. The estimates for 1939-40 provided for a further programme of expansion, bringing the Metropolitan Air Force up to 190 squadrons, of which 20 were non-regular, with a total of 2,150 first line aircraft. Subsequent increases have not been divulged.

There were training squadrons at many universities.

**Empire Air Training Plan.**—The British Empire Air Training Plan, announced on December 10, 1939, provided for the training of 20,000 pilots a year, besides men for ground duties. Personnel from Great Britain, Australia, New Zealand and other parts of the Empire were trained in Canada under this plan. The Empire Air Training Plan became the Combined Training Organization. Its work being completed, the scheme came to an end on March 31, 1945.

For 1939-40 the net sum allotted to Civil Aviation was 4,797,000l. This sum was to provide a further expansion of and improved equipment for the Empire Mail Service, and the establishment of an inter-island service in the West Indies. It was proposed to expand the air port at Heston and provide a new London air port at Fairlop, and then close the Croydon air port for re-construction. The sum of 40,000l. was provided for subsidies to light aeroplane clubs and a sum of 5,000l. for the development of gliding.

## Production and Industry.

<sup>1</sup> Provisional figures.

During the war period, the number and tonnage of merchant shipping was:

|                           | Numbers | Thousand Gross Tons |
|---------------------------|---------|---------------------|
| 1939, September–December. | 56      | 243                 |
| 1940                      | 182     | 810                 |
| 1941                      | 236     | 1,168               |
| 1942                      | 259     | 1,303               |
| 1943                      | 287     | 1,304               |

The tonnage of merchant vessels launched in the four 1915–18 was 3,770,170, whereas in the four years 1940–43 the tonnage was 4,415,668.

Total shipping of the United Kingdom employed in the home and foreign trade (excluding fishing vessels employed on rivers, and yachts):—

| Years<br>(June 15th) | Sailing Vessels |              |                  | Steam and Motor Vessels |              |                  | Total Tonnage (gross) |
|----------------------|-----------------|--------------|------------------|-------------------------|--------------|------------------|-----------------------|
|                      | Number          | Tons (gross) | Persons employed | Number                  | Tons (gross) | Persons employed |                       |
| 1936                 | 222             | 19,555       | 502              | 3,596                   | 13,213,610   | 148,539          | 13,233,165            |
| 1937                 | 194             | 17,308       | 482              | 3,815                   | 14,312,685   | 160,716          | 14,330,993            |
| 1938                 | 186             | 16,345       | 401              | 3,695                   | 14,091,928   | 158,912          | 14,108,269            |

Total net tonnage of sailing, steam and motor vessels on foreign trade, including their repeated voyages, that entered and cleared, with cargoes and in ballast, at ports in the United Kingdom:—

| Year | Entered   |           |           | Cleared   |           |           | Total     |           |           |

Total arrivals (net tonnage), with cargo and in ballast: foreign trade, 1938, 131,711,000 tons; 1937, 123,280,841 tons; coastwise, 1938, 65,071,000 tons; 1937, 65,431,904 tons. Total departures: foreign trade, 1938, 118,555,429 tons; 1937, 123,610,339 tons; coastwise, 1938, 62,692,000 tons; 1937, 63,166,849 tons.

The total net tonnage of vessels in the foreign and coasting trades that arrived in the Port of London with cargoes and in ballast in 1938 was 30,776,918 tons; departures amounted to 31,103,638 tons.

## Communications.

### I. RAILWAYS, TRAMWAYS, AVIATION AND HIGHWAYS.

Under the Railways Act, 1921, the railways of Great Britain are grouped, as from January 1, 1923, into four systems, namely: London, Midland and Scottish (6,940 miles); London and North-Eastern (6,380 miles); Great Western (3,793 miles); Southern (2,185 miles); total, 19,299 miles of route.

The following table gives the latest railway statistics available for Great Britain:—

| Year | Length of road open at end of year | Issued Capital* | Number of Passengers originating (excluding season-ticket holders)* | Weight of goods and mineral traffic originating | Railway & Auxiliary Businesses |               |
|------|------------------------------------|-----------------|---------------------------------------------------------------------|-------------------------------------------------|--------------------------------|---------------|
|      |                                    |                 |                                                                     |                                                 | Gross receipts.*               | Expenditure.* |
|      | Miles                              | Million £       | Millions                                                            | Million tons                                    | Million £                      | Million £     |
| 1935 | 20,152                             | 1,127.1         | 856.2                                                               | 370.9                                           | 179.2                          | 146.3         |
| 1936 | 20,121                             | 1,127.1         | 875.7                                                               | 380.7                                           | 181.7                          | 148.1         |
| 1937 | 20,060                             | 1,127.0         | 906.0                                                               | 397.2                                           | —                              | —             |

\* At December 31, including nominal additions and deductions, but excluding duplications in respect of capital raised for the purpose of subscribing to other railway companies.

\* Excluding London Railways, the equivalent number of annual tickets representing season ticket holders in 1936 was 626,000, and in 1937 was 640,000.

\* The gross receipts from railway working only in 1937, 171,391,606£ gross, 35,256,021£ net.

\* The expenditure on railway working was in 1937, 136,135,587£.

The receipts on railway and ancillary businesses in 1938 were: from passenger traffic, 194,638,000£; from goods traffic, 136,066,000£; other receipts, 3,656,000£; total, 334,360,000£. Total expenditure, 301,167,000£. Net profit (after deducting 3,937,000£ for various deficits), 90,356,000£.

In 1943 the number of passengers carried amounted to 1,268 millions (including 263 million season-ticket holders; in 1942, 1,161 millions (269 million season-ticket holders). Total freight carried: 1943, 397.2 million tons (including 81 million tons merchandise, 154.8 million tons coke, coal and patent fuel); in 1942, 291.4 million tons (including 70.2 million tons merchandise, 160.7 million tons coal, coke and patent fuel).

The net revenues of the four railway systems for 2 years are shown as follows:—

|          | 1942       | 1943       | 1942   | 1943      |
|----------|------------|------------|--------|-----------|
|          | £          | £          | £      | £         |

The London Passenger Transport Board owns 487 miles of railway lines open for traffic. Capital expenditure at June 3, 1938, amounted to 131,281,061*l*. Total railway passenger receipts for 1937-1938 amounted to 19,612,895*l*., and number of passenger journeys was 487,749,023. Expenditure on railway working in 1937-1938 was 3,673,935*l*.

**Tramways.**—In 1937 there were in Great Britain 1,114 miles of tramways and light railways open for public traffic, excluding the Local Authority and Company Undertakings transferred to the London Passenger Transport Board on July 1, 1933. The paid-up capital amounted to 71,503,000*l*., and net capital liability to 27,943,000*l*. Tramway receipts amounted, in 1937, to 13,522,000*l*., and expenditure to 10,845,000*l*. The total number of passengers carried in 1937 was 2,475,081,000.

Receipts in 1937-1938 from trams and trolley-buses (London Passenger Transport Board) amounted to 6,370,637*l*., and number of passenger journeys 1,068,597,193. Expenditure amounted to 5,219,129*l*.

**Civil Aviation.**—In 1938 there were 18 regular air services (excluding those of Imperial Airways, Ltd.) operated within the United Kingdom, or between the United Kingdom and the Continent, with a total route mileage of 10,262 miles. The number of aircraft miles flown were 5,373,000, and 170,875 passengers with a cargo of 3,150 tons were carried. In 1938 the number of aircraft miles flown on the regular services operated by all United Kingdom companies (including internal services, services to the Continent, and on the England-Africa, England-Malay States and Hong Kong, and Bermuda-New York air routes) was 14,331,000 (10,773,000 miles in 1937); approximate number of paying passengers carried, 222,200 (244,000 in 1937); weight of cargo (including company's stores), 5,980 tons (3,961 tons in 1937). British aircraft, in 1938, made 14,221 flights between the United Kingdom and the Continent (excluding Channel Islands), carrying 69,565 passengers over each stage (about 200 miles), and foreign aircraft made 15,152 flights, carrying 99,955 passengers.

During 1943 British Overseas Airways flying-boats and landplanes flew 12,481,485 miles, carrying 65,667 passengers, 1,271 tons of mails and 3,975 tons of freight.

In addition, six air companies operating in Great Britain flew, in 1943, 1,572,754 miles, carrying 64,660 passengers and 1,530,696 tons of mail and freight.

**Highways.**—The public highways in Great Britain in December, 1937-38, had a total length of 179,630 miles (England and Wales, 153,757 miles; Scotland 25,873 miles), of which 27,259 miles were Class I, and 17,037 miles were Class II.

## II. CANALS AND NAVIGATIONS.

The total length of canals in the United Kingdom in 1905 was 4,673 miles, of which 3,641 miles were in England and Wales, 184 in Scotland, and 848 in Ireland.

The total tonnages originating on the principal canals in Great Britain in 1937 were: Railway-owned canals, 1,663,280 tons; other than railway-owned, 16,906,841 tons, including Birmingham, 2,447,040 tons; Grand Union, 2,118,723 tons; Leeds and Liverpool, 1,513,386 tons; Bridgewater, 1,085,638 tons, and Aire and Calder, 2,813,432 tons. Tonnage carried on the River Thames (above Teddington) was 335,418.

There is a scheme for modernisation of the Grand Union Canal.

Manchester, one of the leading ports in the United Kingdom, was opened to maritime traffic in 1894 by the construction of the Manchester Ship Canal, which is 35½ miles in length. Between Eastham and Stanlow Oil Docks the waterway has been excavated to a depth of 30 ft.; from Stanlow Oil Docks to Manchester to 28 ft. The general excavated bottom where the canal at the depth of 28 ft. is 120 ft., except for ½ mile near Latchford, where it is 90 ft.

The maximum width of the locks is 65 ft., with the exception of the entrance lock, which is 80 ft. wide. The canal is in direct communication with all the principal railway systems and barge canals of the Kingdom. The total issued capital of the company at December 31, 1940, was 19,184,300*l*. The net receipts of the canal in 1944, including the Bridgewater department and the railways, amounted to 1,455,019*l*. (1,455,871*l*. in 1943).

## III. POST, TELEGRAPHS AND TELEPHONES.

(Great Britain and Northern Ireland.)

Number of Post Offices at March 31, 1944, approximately 24,800; number of road and pillar letter boxes other than at Post Offices, about 64,000; staff employed January 1, 1945, 300,656 persons (159,731 males, 140,925 females).

Letters, etc., delivered:—

| Average amount due to each<br>Depositor in Active Accounts | 45l. 14s. 5d. | 71l. 12s. 2d.        | 51l. 8s. 2d. | 65l. 17s. 8d.                    | 70l. 8s. 4d.  |

<sup>1</sup> Excluding accounts with balances of less than 1l. which have been inactive for five years or more. The average balance in these accounts is 1s. 10d.

<sup>2</sup> Including accounts opened prior to 1923 in territory which is now Eire.

<sup>3</sup> The amount due to depositors on January 1, 1945, was approximately 1,492,146,000l.

<sup>4</sup> Provisional figures.

N.B.—The amount shown as due to depositors is exclusive of Government stock held on the Post Office Register. The latter amounted to 656,382,298l. at the end of 1942, and 783,889,355l. at the end of 1943.

The receipts and payments include purchases and sales of Government stock for investors on the Post Office Register, but the amount shown as due to depositors is exclusive of the stock held. The latter amounted to 165,697,265l. at the end of 1938 and 189,612,504l. at the end of 1939.

## Money, Weights and Measures.

The sovereign weighs 123·274 grains, or 7·98805 grammes, ·916 (or eleven-twelfths) fine, and consequently it contains 118·001 grains or 7·32288 grammes of fine gold. The shilling weighs 87·27 grains or 5·6552 grammes, and down to 1920 was ·925 (or thirty-seven fortieths) fine, thus containing 80·727 grains or 5·231 grammes of fine silver, but under the Coinage Act, 1920, the fineness was reduced to ·500 (one half). Bronze coins consist of a mixture of copper, tin and zinc. The penny weighs 145·83 grains, or 9·45 grammes. Threepenny pieces of nickel-brass were issued in 1937; they are legal tender up to 2s. The standard of value is gold. According to the Coinage Act of 1870, silver is legal tender up to 40 shillings; bronze (pennies, half pennies and farthings) up to 12d. Bank of England notes of 5l. (since May 1, 1945) are legal tender in England and Wales, but not by the Bank itself (3 & 4 Will. 4, cap. 98 and 8 and 9 Vict., cap. 37 and 38). Bank of England notes of 1l. and 10s., issued under the Currency and Bank Notes Act 1928, are legal tender in Scotland and Northern Ireland also, and for the payment of any amount, including payments by the Bank itself. The Gold Standard Act 1925 decreed that bank notes were not redeemable in legal coin, but the Bank of England were obliged to sell gold at a fixed price in the form of bars. This latter provision was suspended by the Gold Standard (Amendment) Act 1931. The total amount of notes issued at March 28, 1945, was 1,250,241,718l., of which 1,235,788,297l. were in the hands of the public and 14,453,421l. in the Banking Department of the Bank of England.

Standard units are: of length the standard yard, of weight the standard pound of 7,000 grains (the pound troy having 5,760 grains), of capacity the standard gallon containing 10 pounds avoirdupois of distilled water at 62° F., the barometer at 30 inches. On these units all other legal weights and measures are based.

## NORTHERN IRELAND.

## Constitution.

UNDER the Government of Ireland Act, 1920, as amended by the Irish Free State (Consequential Provisions) Act, 1922 (13 Geo. V, Ch. 2, Session 2), a separate parliament and executive government were established for Northern Ireland, which comprises the parliamentary counties of Antrim, Armagh, Down, Fermanagh, Londonderry and Tyrone, and the parliamentary boroughs of Belfast and Londonderry. The Parliament consists of a Senate of 2 *ex-officio* and 24 elected persons and a House of Commons of 52 elected members. An allowance for expenses is made in the case of those members of both Houses who are not in receipt of salaries as members of the Government or as officers of Parliament, amounting to (a) 2l. 5s. a day to members of the Senate for attendance at meetings of the Senate or committees, but the total allowance to each may not exceed 90l. in any one year, unless under a declaration of insufficiency of means when an additional 100l. per annum is paid irrespective of attendance, and to (b) 210l. a year to members of the House of Commons and 2l. 2s. a day for attendance at Committees. The Parliament has power to legislate for its own area except in regard to (1) matters of Imperial concern (the Crown, making of peace or war, military, naval, and air forces, treaties, titles of honour, treason, naturalisation, domicile, external trade, submarine cables, wireless telegraphy, aerial navigation, lighthouses, etc., coinage, etc.), and (2) certain matters 'reserved' to the Imperial Parliament (postal service, Post Office and Trustee savings banks, designs for stamps, registration of deeds). The executive power is vested in the Governor on behalf of His Majesty the King: he holds office for six years and is advised by ministers responsible to Parliament. Senators hold office for a fixed term of years: the House of Commons is to continue for five years, unless sooner dissolved. The qualifications for membership of the Parliament are similar to those for membership of the Imperial House of Commons. By the Representation of the People Act (Northern Ireland), 1928, the franchise was conferred upon women upon the same terms as it had hitherto been enjoyed by men; and by the House of Commons (Method of Voting and Redistribution of Seats) Act (Northern Ireland), 1929, the system of Proportional Representation (under which the Parliaments which met in 1921 and in 1925 had been elected) was abolished, and Parliamentary Representation, except for the constituency of Queen's University of Belfast, was based upon single-member constituencies. Northern Ireland continues to return 13 members to the Imperial House of Commons.

Two Acts of the Imperial Parliament, passed in 1928 and 1932 modified, in minor details, restrictions placed on the powers of the Northern Irish Parliament by the Act of 1920. The legislative and administrative powers relating to Railways, Fisheries, and the Contagious Diseases of Animals (originally intended for a Council of Ireland), were, under the Ireland (Confirmation of Agreement) Act, 1925, transferred to, and became, as from April 1, 1926, powers of the Parliament and Government of Northern Ireland. The general subject matter of the Land Purchase Acts was 'reserved' by the Act of 1920, but the Imperial Government's land purchase scheme has been practically completed, the Land Purchase Commission for Northern Ireland being closed on April 1, 1937. The Northern Irish Parliament met for the first time in June, 1921. At

## Postal orders issued in the United Kingdom :—

| Year ended March 31 | Number      | Amount<br>£             | Year ended March 31 | Number      | Amount<br>£ |
|---------------------|-------------|-------------------------|---------------------|-------------|-------------|
| 1939                | 418,520,000 | 101,957,000             | 1943                | 194,710,000 | 68,168,000  |
| 1940                | 194,187,000 | 56,836,000 <sup>1</sup> | 1943                | 192,170,000 | 65,720,000  |
| 1941                | 204,376,000 | 68,422,000              | 1944                | 194,870,000 | 67,870,000  |

<sup>1</sup> The decrease in 1940 was due mainly to the use of postal orders as legal tender from September 4 to December 20, 1939, and to the decrease in football pool business.

The telegraphs were transferred to the State on February 5, 1870.

The total number of telegraph offices open on March 31, 1944 (including Railway and Cable Companies' Offices, etc., which transact public telegraph business) was approximately 14,000.

On March 31, 1944, the London local exchange system had 247 exchanges, 11,049 call offices and 1,159,950 telephones. The Provincial local exchange system had 5,520 exchanges, 49,486 call offices and 2,603,612 telephones. The approximate number of originated effective calls in 1943-44 was 2,151 millions. For private wires, the rentals in 1943-44 amounted to 9,741,484d.

The income and expenditure of the Post Office as shown in the Commercial Accounts were as follows :—

|                                  | 1938-39    | 1942-43    | 1943-44    |
|----------------------------------|------------|------------|------------|
|                                  | £          | £          | £          |
| Total Postal Income <sup>1</sup> | 52,846,493 | 75,457,000 | 80,568,000 |
| " " Expenditure <sup>1</sup>     | 42,088,234 | 53,751,000 | 61,761,000 |
| Net Postal Surplus               | 10,808,259 | 19,706,000 | 18,741,000 |
| Total Telegraph Income           | 3,988,361  | 6,994,008  | 7,185,000  |
| " " Expenditure                  | 4,761,681  | 7,106,000  | 7,884,000  |
| Net Telegraph Deficit            | 823,320    | 112,000    | 199,000    |
| Total Telephone Income           | 34,620,756 | 69,716,000 | 81,590,000 |
| " " Expenditure                  | 34,351,117 | 49,620,600 | 55,323,000 |
| Net Telephone Surplus            | 269,639    | 19,896,000 | 26,268,000 |
| Net Surplus                      | 10,254,578 | 39,490,560 | 44,810,000 |

<sup>1</sup> Including the cost of Post Office Savings Bank work under Expenditure, and the amount recovered from National Debt Commissioners in respect thereof under Income.

## Banking and Credit.

Value of money issued from the Royal Mint for 6 years :—

| Year | Gold Money issued | Silver Money issued | Bronze Money issued | Year | Gold Money issued | Silver Money issued | Bronze Money issued |
|------|-------------------|---------------------|---------------------|------|-------------------|---------------------|---------------------|
| 1939 | £                 | £                   | £                   | 1942 | £                 | £                   | £                   |
| 1940 | nil               | 6,072,761           | 384,185             | 1943 | nil               | 10,671,578          | 1,482,720           |
| 1941 | nil               | 5,727,052           | 394,965             | 1944 | nil               | 6,723,220           | 1,404,265           |
|      |                   | 6,068,181           | 870,980             |      |                   | 6,840,486           | 875,750             |

The returns for imports and exports of coins are not now available.

During the year ended December 31, 1944, the Mint produced 494,372,922 coins, of which 328,751,206 were Imperial coins to the value of 8,000,092l. The Imperial coins included 15,255,165 half-crowns, 27,560,005 two-shilling pieces, 22,576,918 shillings, 37,952,600 sixpences, 69,760,000 nickel-brass threepenny pieces, 81,840,000 halfpennies and 25,137,600 farthings.

There is no State bank. The Bank of England is the Government's banker and the 'bankers' bank.' On behalf of the Government it manages the National Debt, administers the Exchange Control Regulations and manages the Note Issue. Though a private corporation under Royal Charter, the bank has withdrawn from new commercial banking business; the dividend—12 per cent. per annum less Income Tax—has remained unchanged for many years.

The Statutory Return is published weekly; end-December figures for the past five years :—

| Year | Issue Department |            |                       | Banking Department |          |            |                        |                       |
|------|------------------|------------|-----------------------|--------------------|----------|------------|------------------------|-----------------------|
|      | Notes issued     | Securities | Gold Coin and Bullion | Capital and 'Rest' | Deposits | Securities | Notes in the 'Reserve' | Coin in the 'Reserve' |
|      | £1,000           | £1,000     | £1,000                | £1,000             | £1,000   | £1,000     | £1,000                 | £1,000                |
| 1940 | 630,242          | 630,000    | 242                   | 17,885             | 251,462  | 254,060    | 14,386                 | 900                   |
| 1941 | 780,242          | 780,000    | 242                   | 17,850             | 285,164  | 275,202    | 28,516                 | 297                   |
| 1942 | 950,242          | 950,000    | 242                   | 17,862             | 281,233  | 271,412    | 26,812                 | 871                   |
| 1943 | 1,100,242        | 1,100,000  | 242                   | 17,860             | 304,968  | 310,354    | 11,560                 | 914                   |
| 1944 | 1,250,242        | 1,260,000  | 242                   | 17,834             | 318,108  | 322,478    | 11,598                 | 1,866                 |

The proportion of reserves to deposit liabilities, December 31, 1944, was 4½ per cent.

Between December 31, 1939, and December 31, 1944, the Fiduciary Note Issue rose from 580 million pounds to 1,250 million pounds. All the profits of the Note Issue are passed on to the Exchequer.

Bank Clearings (excluding Provincial Clearings), 1944, total, 62,644,564,000l., compared with 57,107,109,000l. in 1943.

The following statistics relate to the eleven London clearing banks for the year ending December, 1944 (monthly averages in £ millions): deposits, etc., 4,153 (3,677 in 1943); cash in hand and at the Bank of deposits, etc., 1,165 (1,147 in 1943); advances, 750 (747 in 1943); bills investments, 1,165 (1,147 in 1943); Treasury deposit receipts, 1,387 (1,002 in 1943).

In 1944 the 'Big Seven' clearing banks had a total of net profits of 9,094,725l.; dividends amounted to 5,235,455l.; reserves to 1,400,000, and contingencies, 1,660,000l.

*Trustee Savings Bank.*—The number of depositors and stockholders in these banks on November 20, 1944, was 5,346,661, and the amounts due to them were: in the General or Ordinary Departments, 410,984,411l. cash, and 64,758,954l. (face value) stock; in the Special Investment Department, 115,818,940l.; due to depositors and stockholders, 591,562,305l.; total combined surplus funds, 14,595,639l.; total funds, 606,157,944l. Total number of banks, 88, with 741 offices.

## 74 THE BRITISH COMMONWEALTH:—NORTHERN IRELAND

the election on February 9, 1938, there were returned 39 Unionists, 8 Nationalists, 2 Independent Unionists, 1 Labour, 1 Independent, and 1 Independent Labour.

The Parliament of Northern Ireland, whose statutory term should have ended in February, 1943, had its life extended (on February 6, 1945) to 1946.

**Governor.**—The Duke of Abercorn, appointed for a term of 6 years from December 8, 1922; the appointment has thrice been extended for a similar period. Salary, 8,000*l.* per year, payable from Imperial Revenues (2,000*l.* being recoverable from Northern Ireland Revenues).

The Ministry, reconstituted on May 6, 1943, is composed as follows:—

**Prims Minister**—Rt. Hon. Sir Basil S. Brooks, Bart.

**Minister of Finance.**—Major the Rt. Hon. J. M. Sinclair.

**Minister of Home Affairs.**—Rt. Hon. John Edmund Warnock, K.C. (November 6, 1944).

**Minister of Health and Local Government.**—Rt. Hon. William Grant (June 1, 1944).

**Minister of Labour.**—Rt. Hon. H. C. Midgley (June 1, 1944).

**Minister of Education.**—Lieutenant-Colonel S. H. Hall-Thompson. (March 21, 1944).

**Minister of Agriculture.**—Rev. the Rt. Hon. Robert Moore.

**Minister of Commerce.**—Senator Sir Roland Nugent (February 15, 1945).

All the members of the Cabinet belong to the Unionist Party with the exception of the Minister of Labour, who is Chairman of the Commonwealth Labour Party (Northern Ireland).

The Prime Minister receives a salary of 2,850*l.* per annum, the other members 1,716*l.* each.

The usual channel of communication between the Government of Northern Ireland and the Imperial Government is the Home Office.

### Local Government.

In the two chief cities, the County Boroughs of Belfast and Londonderry, local administration is vested in Corporations, who are responsible for roads, public health, rating, housing, lighting, etc.

In each of the six counties there is a County Council responsible for the construction and maintenance of roads and other public works, collection of rates, supervision of the arrangements for dealing with tuberculosis and special diseases; also of public mental hospitals, county infirmaries and county fever hospitals.

The counties are divided into thirty-two rural districts, in each of which is a Rural District Council, which is the sanitary authority for the district, and is also responsible for such matters as provision of labourers' cottages, burial grounds, etc. There are also under Municipal Government five Boroughs and twenty-eight Urban Districts, as well as three towns which are not Urban Districts.

The administration of poor relief and dispensary medical relief is vested in Boards of Guardians, who are the Rural District Councillors, with representatives from the Urban Districts. In some cases the area administered by a Board of Guardians extends into other counties.

### Area and Population.

A census of Northern Ireland was taken on February 28, 1937. The area and population of the country at that date were as follows:—

## RELIGION—EDUCATION—JUSTICE

75

| Counties and County Boroughs | Area in statute acres (exclusive of water) | Males   | Females | Total     |
|------------------------------|--------------------------------------------|---------|---------|-----------|
| Antrim . . . . .             | 702,900                                    | 96,003  | 101,263 | 197,266   |
| Armagh . . . . .             | 812,767                                    | 54,271  | 54,844  | 109,115   |
| Belfast C.B. . . . .         | 15,289                                     | 205,538 | 232,548 | 438,086   |
| Down . . . . .               | 609,037                                    | 102,585 | 108,152 | 210,737   |
| Fermanagh . . . . .          | 417,912                                    | 28,856  | 26,718  | 55,574    |
| Londonderry Co. . . . .      | 512,580                                    | 47,929  | 46,994  | 94,923    |
| Londonderry C.B. . . . .     | 2,198                                      | 22,344  | 26,469  | 48,813    |
| Tyrone . . . . .             | 779,548                                    | 65,678  | 61,908  | 127,586   |
| Northern Ireland . . . . .   | 3,352,251                                  | 623,154 | 666,591 | 1,279,745 |

### Vital statistics for 4 years:—

| Year | Marriages | Births | Deaths | Year | Marriages | Births | Deaths |
|------|-----------|--------|--------|------|-----------|--------|--------|
| 1940 | 9,795     | 25,363 | 18,941 | 1942 | 11,673    | 29,645 | 17,256 |
| 1941 | 11,966    | 26,867 | 19,640 | 1943 | 10,140    | 31,621 | 17,497 |

Immigration, 1933 (latest available figures), 1,102; emigration, 844.

### Religion.

The religious professions in Northern Ireland, as recorded at the census of 1937, were: Roman Catholics, 428,290; Presbyterians, 890,931; Church of Ireland, 345,474; Methodists, 55,135; Other professions, 59,915; Total, 1,279,745.

### Education.

The following are the latest available statistics:—

**University:** The Queen's University of Belfast (founded in 1849 as a College of the Queen's University of Ireland, and reconstituted a separate university in 1909), 130 professors, readers, lecturers, assistants and demonstrators, and 1,789 students in the session 1943–44.

**Secondary Education:** 75 schools with 17,585 pupils. **Technical Instruction:** 61 technical schools and 39 other centres with 22,435 (school year, 1942–43) students.

**Elementary Education:** 1,667 public elementary schools with 185,542 pupils on rolls.

### Justice.

Under the Government of Ireland Act, 1920, a Supreme Court of Judicature of Northern Ireland has been established, consisting of the Court of Appeal in Northern Ireland and the High Court of Justice in Northern Ireland. An appeal lies direct, in certain conditions, from the former to the House of Lords. A Court of Criminal Appeal was established in 1930.

A system of County or Civil Bill Courts deals with civil disputes generally where the sum at issue does not exceed 100*l.*, but possesses wider jurisdiction in certain cases.

According to the Summary Jurisdiction and Criminal Justice Act (N.I.), 1935, which received the Royal Assent on July 16, 1935, Justices of the Peace were relieved generally of their judicial functions which are now vested in permanent judicial officers known as Resident Magistrates. The administrative functions of the Justices of the Peace are preserved to them and they are permitted to hear and determine cases of drunkenness and vagrancy, but only when sitting out of Petty Sessions.

The Police Force consists of (a) the Royal Ulster Constabulary, with a statutory maximum strength of 3,000; and (b) the Special Constabulary, a part-time force.

### Finance.

The bulk of the taxation of Northern Ireland is imposed and collected by the Imperial authorities, who make certain deductions and remit the balance to the Northern Ireland Exchequer. The exact share of the latter in the proceeds of such taxation is determined by the Joint Exchequer Board, a special body consisting of one representative of the Imperial Treasury, one of the Northern Ireland Treasury, and a chairman appointed by the King. The deductions made by the Imperial Treasury represent a contribution towards Imperial liabilities and expenditure, and the net cost to the Imperial Exchequer of Northern Ireland services 'reserved' to the Imperial Parliament.

The Northern Ireland Parliament has limited powers of taxation, the powers excluded relating to customs duties, excise duties on articles manufactured and produced, excess profits tax, income tax, including surtax, or any tax on profits or a general tax on capital, or any tax substantially the same in character as any of these duties or taxes. The Government of Northern Ireland also raises money from time to time for capital purposes by means of Stock, Savings Certificates and Treasury Bills.

The revenue and expenditure of the Northern Ireland Exchequer for the last four years were as follows:—

|                              | 1941-42    | 1942-43    | 1943-44    | 1944-45<br>(estimated) |
|------------------------------|------------|------------|------------|------------------------|
|                              | £          | £          | £          | £                      |
| Revenue <sup>1</sup> . . . . | 16,263,092 | 17,273,086 | 16,953,175 | 16,630,000             |
| Expenditure . . .            | 16,220,618 | 17,211,969 | 16,823,637 | 16,594,000             |
| Contribution . . .           | 17,600,000 | 29,750,000 | 35,000,000 | 35,000,000             |

<sup>1</sup> Net, after deduction of estimated cost of 'Reserved' Services and contribution to Imperial Services. An adjustment is made when the true Residuary Share has been finally ascertained.

The public debt at March 31, 1944, consisted of 3,232,700*l.* Northern Ireland 3½% Stock, 1950-54, 17,395,100*l.* Ulster Savings Certificates and 2,702,800*l.* advances from the Government Loans Fund. The proceeds of Savings Certificates are now re-lent to the Imperial Government for war purposes, the amount so invested at March 31, 1944, being 14,825,000*l.*

In October, 1925, a Government Loans Fund was established from which loans are made to the Exchequer and to local authorities and others for public utility services. This has been financed by issues amounting to 4,000,000*l.* Ulster Loans 4½% Stock, 1945-75, 2,000,000*l.* Ulster Loans 5% Stock, 1950-60, and 2,000,000*l.* Northern Ireland 3% Loans Stock, 1956-61.

### Production.

**Agriculture.**—Agriculture is the largest single industry in Northern Ireland. Farms are small, there being about 90,000 holdings. Most of the farmers are in process of completing the purchase of their farms under the Land Purchase Acts.

The acreage under crops in Northern Ireland in 1938 was as follows:—Wheat, 5,521; oats, 296,526; barley, 3,430; potatoes, 123,483; flax, 20,532; turnips, 26,345; hay, 430,736.

Yields in 1938 were (in tons): oats, 289,704; potatoes, 711,369; turnips, 820,497; flax, 4,036; hay, 824,989.

Livestock numbers at January 1, 1939, were: cattle, 700,564; sheep, 551,262; pigs, 565,726; poultry, 6,038,001.

**Mining.**—The mineral output in 1939 (the latest available figures) for Northern Ireland was (in tons):—Chalk, 224,029; clay, 258,997; gravel and sand, 82,979; granite, 33,548; igneous rock, 463,888; limestone, 61,307; sandstone, 210,820.

The number of persons employed, inclusive of those employed at coal mines, was: 1938, 1,941; 1939, 1,869.

**Manufactures.**—The two principal industries are linen and ship-building, both centred in Belfast. In peace time the former provides employment for approximately 70,000 persons (excluding those engaged in growing the fibre), 874,000 spindles, and 28,000 looms. The value of linens exported from the United Kingdom during 1939 was 6,339,000*l.*, practically the whole of which came from Northern Ireland. The Belfast shipyards normally employ approximately 15,000 persons, and possess an output capacity exceeding 200,000 tons a year. Other important manufactures are aircraft, ropes and twines, tobacco, soaps, aerated waters, biscuits, furniture, ready-made clothing, hosiery and underwear.

### National Insurance.

**Sickness and Unemployment Insurance and Pensions.**—Unemployment Insurance, Health Insurance, and schemes of Old Age and Widows' and Orphans' Pensions operate in Northern Ireland in the same way as in Great Britain. The contributions, benefits and pensions are identical with those of Great Britain, and contributions paid in one area are valid in the other.

A general outline of the insurance and pensions provisions is set out in the paragraph dealing with 'National Insurance' in Great Britain.

Agreements, confirmed by Acts of the Parliaments of the United Kingdom and of Northern Ireland have been in force since October 1, 1925, for assimilating the burdens on the Exchequers of the United Kingdom and of Northern Ireland in respect of unemployment. The latest agreement on the subject was made statutory by the Unemployment (Northern Ireland Agreement) Act, 1936, and by the corresponding Act passed in the same year by the Northern Ireland Parliament.

**Contributory Pensions.**—The number of pensioners in Northern Ireland in receipt of pensions under the Contributory Acts is approximately 74,500.

**Non-contributory Pensions.**—Old Age Pensions (non-contributory) are granted to individuals who are not eligible for contributory pensions provided they have reached the age of 70 (40 in the case of blind persons), and comply with certain conditions as regards British nationality and residence in the U.K.

The number of persons in Northern Ireland in receipt of non-contributory pensions is approximately 28,500.

### Communications.

The total first track railway mileage of Northern Ireland amounts to 672 miles. There are also about 157 miles of inland waterways, including canals. Total length of roads is 13,043 miles; road expenditure for year ending March 31, 1942, was 920,056*l.*

Under the provisions of the Road and Railway Transport Act (Northern Ireland), 1935, which came into force in July, 1935, a Northern Ireland Road Transport Board was established and, with certain exceptions, took over all existing road motor undertakings, both passenger and goods. It has power to fix such fares, rates and charges, as it may think fit, but interested parties possess a right of appeal to a tribunal for a revision of any fares, rates and charges made by the Board.

The Electricity Board for Northern Ireland was created in 1931. During the year 1939 the sales of the Board, which during 1932 amounted to 2,617,592, had reached 46,566,127 units. By the end of 1939 the Board was supplying electricity to 125 towns and villages over an area comprising more than half Northern Ireland. The Electricity Board takes its electricity in bulk from selected generating stations.

Certain Statutory Undertakings continue to supply parts of Northern Ireland not covered by the Board. The electricity to those parts of Northern Ireland as a whole is shown in the following figures of sales, 1931, 75,454,582 units; 1938, 216,808,581 units.

### ISLE OF MAN.<sup>1</sup>

The Isle of Man is administered in accordance with its own laws by the Court of Tynwald, consisting of the Governor, appointed by the Crown; the Legislative Council, composed of the Lord Bishop of Sodor and Man; two Deemsters, the Attorney-General, two members appointed by the Governor, and four members elected by the House of Keys, total 11 members, including the Governor; and the House of Keys, a representative assembly of 24 members chosen on adult suffrage with six-months residence for 5 years by the 6 'headings' or local sub-divisions, and the 4 municipalities. Women have the franchise as well as men. Number of voters 1939-40, 39,536. The island is not bound by Acts of the Imperial Parliament unless specially mentioned in them.

On April 25, 1944, at a special session of the Manx Legislature both branches of the Legislature reached general agreement on a proposal to establish an Executive Committee to act with the Governor on all matters of government.

*Lieut.-Governor.*—Vice-Admiral the Right Hon. the Earl Granville, C.B., D.S.O., R.N. (term of office began October 1, 1937).

The population (national registration, 1939) numbered 50,829 (22,475 males, 28,354 females).

The principal towns are Douglas (population, 20,012), Ramsey (4,240), Peel (2,523), Castletown (1,742). Births (1943), 788; deaths, 783. On March 31, 1944, there were 32 elementary schools (39 departments), 29 being provided schools. The enrolled pupils numbered 5,398, and the average attendance 4,654. The gross expenditure of the Education Authority on elementary education for the year 1943-44 amounted to 83,447. There are 5 secondary schools, 3 provided by the Education Authority (996 registered pupils), 2 direct grant schools (382 registered pupils) and 7 evening institutes (460 registered pupils). The gross expenditure of the Education Authority on higher education for 1943-44 was 37,029. The police force numbers 83; in the year 1943 there were 1,123 persons convicted.

Revenue is derived partly from Customs duties and partly from Income tax. In 1943-44 the revenue from Customs duties, etc., amounted to 1,089,948, and 408,369. from Income Tax and Surtax. Expenditure totalled 998,953.

The principal agricultural produce of the island consists of oats, wheat, barley, turnips and potatoes, and grasses. The total area of the island, excluding water, is 145,325 acres; the total area under crops in 1943 was 75,407 acres and of rough grazings, 42,855 acres. The total acreage under corn crops in 1943 was 21,127 acres, including 14,540 under oats,

<sup>1</sup> Area and population, see p. 12.

4,824 under wheat, and 491 under barley or bere. There were also 4,613 acres under turnips and swedes, 2,224 under potatoes, 9,212 under hay and 23,681 under grass following rotational cropping. The live stock in 1943 consisted of 2,849 horses, 21,500 cattle, 71,115 sheep and 4,956 pigs.

The registered shipping (1943) comprised 52 vessels of 10,118 net tons; also 169 fishing vessels. The tonnage of vessels arrived at ports of the island in 1943 was 386,935 tons (365,769 tons coastwise), and departed 372,474 net tons (364,892 tons coastwise). The railways have a length of 46½ miles, and there are 25 miles of electric railway.

### CHANNEL ISLANDS.<sup>1</sup>

The Channel Islands are situated off the north-west coast of France, and are the only portions of the 'Dukedom of Normandy' now belonging to the Crown of England, to which they have been attached since the Conquest. The islands are administered according to their own laws and customs. Jersey has a separate legal existence; it is administered by a Lieutenant-Governor appointed by the Crown, and a Bailiff also appointed by the Crown. The Lieutenant-Governor has a veto on certain forms of legislation. He and the Crown officers may address the States but not vote. The Bailiff is the Chief Magistrate and President of the States Assembly. The Royal Court consists of a tribunal of first instance and an appeal court. The States (or Parliament) for deliberation and legislation consist of 12 jurats, 12 rectors, 12 constables (who are the mayors of the parishes), 17 deputies, and 2 Crown officers. Guernsey, Alderney and Sark are under one Lieutenant-Governor, but Guernsey and Alderney have a government of their own, and Sark is a dependency of Guernsey and under its jurisdiction. On May 10, 1905, a law was passed for the Island of Guernsey requiring the approval of the Lieut.-Governor and of the Royal Court of the Island previously to the acquisition, or leasing, or occupation of immovable property by aliens or alien companies, registration and liability to local rates, etc., being also provided for. The Channel Islands are not bound by Acts of the Imperial Parliament unless specially named in them.

On June 30, 1940, German forces occupied the Islands. Births, 1938:—Jersey, 984; Guernsey, 827; deaths:—Jersey, 790; Guernsey, 614.

*Finance.*—Jersey (financial year ended January 31, 1939): revenue, 520,022; expenditure, 533,873; public debt, 1,271,190. Guernsey, etc. (January 31, 1938): revenue, 433,659; expenditure, 425,242; public debt, 1,514,514.

Jersey (1938) exports, 130,504 tons; imports, 181,721 tons. The imports from Guernsey into the United Kingdom in 1937 were:—granite, 100,162 tons; tomatoes, 31,629 tons; potatoes, 1,498 tons; fruit, 810 tons; flowers, 4,091 tons.

Guernsey registered shipping (1937), 33 vessels, 2,978 tons (net). The only communications of Sark and Alderney were with Guernsey, which has, in St. Peter Port, the most useful harbour of all the islands.

## EUROPE.

### GIBRALTAR.

*Governor and Commander-in-Chief*.—Lieut-General Sir Thomas Ralph Eastwood, K.C.B., D.S.O., M.C. (salary 5,000l., with 500l. allowances; appointed February 16, 1944).

*Colonial Secretary*.—R. C. S. Stanley (October 12, 1944).

The Rock of Gibraltar was settled by Moors in 711; they named it after their chief, 'the Rock of Tarik.' In the 15th century it was joined to the Kingdom of Granada. It was captured by Admiral Sir George Rooke on August 3, 1704, and ceded to Great Britain by the Treaty of Utrecht, 1713. It is a Crown colony, situated in 30° 7' N. latitude and 5° 21' W. longitude, in the Province of Andalusia, in Spain, commanding the entrance to the Mediterranean. The average rainfall at Gibraltar is 35 ins. The rainy season is from September to May.

The Governor, who is also Commander-in-Chief, is assisted by an Executive Council, established by Letters Patent in September, 1922. It is composed of the Combatant Military Officer next in seniority after the Governor, the Colonial Secretary, the Attorney-General, the Financial Secretary, and three unofficial members, selected by the Governor. An Advisory Council was instituted on December 29, 1944. Area, 1½ square miles. Population, including port and harbour (census 1931), civil, 17,613 (7,986 males and 9,627 females); military, 3,218 (2,544 males and 674 females); naval, 541 (397 males and 144 females); total, 21,372 (10,927 males and 10,445 females). Estimated fixed civil population, January 1, 1939, 20,339. The population are mostly descendants of Spanish and Italian settlers. Civil population births (1938), 354; marriages, 257; deaths, 252. Birthrate per 1,000 of fixed civil population, 20.48; death-rate, 14.54. Religion of fixed population mostly Roman Catholic; one Protestant cathedral and four Roman Catholic churches; annual subsidy to each communion, 500l. Education is compulsory between ages 5 and 14 years. Government aided elementary schools, 13 (11 Roman Catholic). Pupils, 2,714 in 1938; average attendance, 2,313. There are 4 secondary schools. Government grant, 10,278l. One police court and a supreme court. In 1938 there were 911 summary convictions.

Revenue and expenditure for 5 years:—

|                       | 1939    | 1940    | 1941    | 1942    | 1943    |
|-----------------------|---------|---------|---------|---------|---------|
|                       | £       | £       | £       | £       | £       |
| Revenue . . . . .     | 203,973 | 328,436 | 376,481 | 410,767 | 505,603 |
| Expenditure . . . . . | 275,055 | 274,730 | 167,614 | 192,543 | 213,316 |

Industries unimportant. The trade of the port is chiefly transit trade, and the supply of coal to ships. There are import duties on malt liquors, wine, spirits, tobacco, motor spirits, and perfumery.

Government savings-bank, with 7,628 depositors, had 443,785l. deposits at the end of 1943.

Gibraltar is a naval base and position of great strategic importance. There is a deep Admiralty harbour of 440 acres. Vessels entered, 1938, 4,752; tonnage, 13,772,321; cleared, 4,944; tonnage, 13,748,978. An automatic telephone system exists in the town, and Cable and Wireless Ltd., have a station. Mails arrive by P & O liners (direct and via Marseilles)

## THE BRITISH COMMONWEALTH OF NATIONS.

In the following pages the various sections of the British Commonwealth of Nations outside Great Britain and Northern Ireland are arranged as follows:—British Colonies and Protectorates, as well as India and Burma, in alphabetical order under the divisions of the world to which they belong:—1, Europe; 2, Asia; 3, Africa; 4, America; 5, Australasia and Oceania. Then follow the Dominions, which may be described as sovereign and independent nations, associated with Great Britain and its Empire in the British Commonwealth of Nations. They are Canada, Australia, New Zealand, South Africa and Eire (formerly the Irish Free State).

The term 'Dominion' is used officially as a convenient abbreviation of the complete designation 'self-governing Dominion.'

The Imperial Conference of 1926 defined the Dominions as 'autonomous Communities within the British Empire, equal in status, in no way subordinate one to another in any aspect of their domestic or foreign affairs, though united by a common allegiance to the Crown, and freely associated as members of the British Commonwealth of Nations.' The Conference further laid down that, as a consequence of this equality of status, the Governor-General of a Dominion 'is the representative of the Crown, holding in all essential respects the same position in relation to the administration of public affairs in the Dominion as is held by His Majesty the King in Great Britain,' and that 'it is the right of the Government of each Dominion to advise the Crown in all matters relating to its own affairs.' The Conference also recognised certain treaty-making rights as appertaining to the Dominions.

On December 11, 1931, the Statute of Westminster, which by legal enactment recognises the status of the Dominions, defined at the Imperial Conference of 1926, became law. The Dominions had in their turn also in 1931 approved the passage of the Statute of Westminster.

The term 'Colony' is an abbreviation of the official designation 'Colony not possessing responsible Government,' and includes all such Colonies whether or not they possess an elective Legislature. In addition to the Colonies proper, the British Colonial Empire includes a number of Protectorates, Protected States and Mandated Territories.

Up to July, 1925, all sections of the British Empire outside of the United Kingdom and India were dealt with by the Colonial Office. In that month a new Secretaryship of State, for Dominion Affairs, was created, and as a result the Dominions Office was set up, to take over from the Colonial Office business connected with the self-governing Dominions, including the Irish Free State (Eire), Newfoundland, the self-governing Colony of Southern Rhodesia, and the South African territories (Basutoland, Bechuanaland Protectorate, and Swaziland), and business relating to the Imperial Conference.

The Colonial Office now deals with the administrative work of the Colonies, Protectorates, and Mandated Territories other than those for which Dominion Governments are responsible and those which are dealt with by the Dominions Office, namely Basutoland, the Bechuanaland Protectorate, and Swaziland. Its Departmental organisation is as follows:—I. *General Division.* (a) General Department: General questions relating to the Colonies other than those dealt with in Departments at (b) to (g) following, and those classed as personnel or economic. The list of subjects dealt with includes international and inter-imperial relations (other than commercial relations), mandates, League of Nations matters, nationality and naturalization, refugees, surveys, liquor traffic, legal and judicial matters. (b) Communications Department: Aviation (other than military), motor transport, merchant shipping, postal matters, telecommunications, broadcasting, meteorology. (c) Defence Department: Questions of defence, including Colonial Naval, Military and Air Forces, A.R.P. and Civil Defence, conscription, aliens, passports and visas, immigration and emigration, Prize work. (d) Prisoners of War, Civilian Internees and Casualties Department: Prisoners of war and civilian internees; casualties to Germans, officials and members of local forces. (e) Social Service Department: Education, medical and public health, traffic in women and children, films, penal and prison matters, labour, slavery, drugs, census, national security, social hygiene, nutrition. (f) Welfare Department: Wel-

and also via Tangier. Letters and post-cards in 1938, 2,430,000; newspapers, book packets, etc., 227,000. There is cable communication with the Continent, Tangier, the Mediterranean Eastern ports, and England, via the lines of Cable and Wireless, Ltd.

The legal currency is that of Great Britain. Since the outbreak of the Great War in 1914 there are also currency notes issued by the local Government. The amount in circulation at end of 1943 was 852,3297. There are five private banks.

### MALTA.

*Governor and Commander-in-Chief.*—Lieut.-General Sir Edmond C. A. Schreiber, K.C.B., D.S.O. (appointed September 15, 1944).  
*Lieut.-Governor.*—D. O. Campbell, C.M.G. (February 12, 1943).

Malta was held in turn by Phoenicians, Greeks, Carthaginians and Romans, and was conquered by Arabs in 870. From 1090 it was joined to Sicily until 1530, when it was handed over to the Knights of St. John, who ruled until dispersed by Napoleon in 1798. The Maltese rose in rebellion against the French and the island was subsequently blockaded by the British Fleet, aided by the Maltese, from 1798 to 1800, and with the free will of the Maltese was finally annexed to the British Crown by the Treaty of Paris in 1814. It is one of the most important ports of call in the world, and is the base and resort for repair and refitment of the British fleet in the Mediterranean.

On April 17, 1942, in recognition of the steadfastness and fortitude of the people of Malta during the present war, King George VI awarded the George Cross to the island.

**Constitution.**—On February 26, 1939, the Governor promulgated the Letters Patent of February 14, 1939, which grant Malta a new Constitution. Under this there is to be a Council of Government composed of five *ex officio* members (the Lieut.-Governor, the Legal Secretary, the Attorney General, the Treasurer and the Secretary to Government) and three official members, two unofficial members nominated by the Governor, and ten elected members. The Governor presides over the Council with a casting vote, but no original vote, and has the right to speak as if a member. Ecclesiastics are precluded from membership. Full liberty of conscience and the free exercise of religious worship are secured.

On July 7, 1943, it was announced in the House of Commons that after the war responsible government would be restored in Malta.

The English language, as the language of the British Empire, and the

Maltese language, as the language of the people of Malta, are the official languages of Malta.

The English language is the official language of administration and the Maltese language is the official language in all the Courts of Law in Malta. Facilities have been provided by ordinance for the use of the English language in any proceedings before any court where any party or any accused person is a person who does not speak Maltese as the principal language to which he is accustomed. Where the proceedings are in a language not known to the party or parties, or to the accused, they are translated. In 1934 Maltese was substituted for Italian as the principal language of the Courts of Law.

**Area and Population.**—Malta is 17.4 miles long; area, 95 square miles; and the neighbouring island, Gozo, 26 square miles; total area (with Comino), 122 square miles. Population, Census April 26, 1931, 241,621; civil population on December 31, 1943, 272,121. Births (1943), 8,452; deaths, 5,578; number of marriages, 2,653. Chief town and port, Valletta.

**Education.**—At the beginning of the scholastic year 1944-45 there are 94 primary schools with approximately 35,000 pupils, and 130 night schools; 4 secondary school for girls with about 660 students, and a lyceum with 700 boys. There are also a preparatory secondary school for boys and girls with 490 children (including a Montessori school), and one technical school with 120 pupils. There is also the Royal University, with an average of 250 students. There are 60 private schools, of which 12 are State aided, with about 10,000 pupils.

**Justice.**—In 1943-44, 892 persons were committed to prison; 362 persons were convicted of serious crime and 11,790 summarily. Police numbered 698 officers and men and 932 officers and men special constables on March 31, 1944. Police reservists numbered 421.

**Finance.**—The revenue and expenditure in 5 years were:—

|               | 1930-40   | 1940-41                | 1941-42                | 1942-43                | 1943-44                |
|---------------|-----------|------------------------|------------------------|------------------------|------------------------|
| Revenue .     | 1,431,938 | 2,164,113 <sup>1</sup> | 2,831,970 <sup>2</sup> | 3,523,530 <sup>3</sup> | 4,026,373 <sup>4</sup> |
| Expenditure . | 1,412,748 | 2,019,112              | 2,727,746              | 2,665,607              | 3,731,831              |

- <sup>1</sup> Includes an Imperial grant in aid of £50,000.
- <sup>2</sup> Includes an Imperial grant in aid of £1,350,000.
- <sup>3</sup> Includes an Imperial grant in aid of £3,350,000.
- <sup>4</sup> Includes an Imperial grant in aid of £1,350,000.

Savings bank, March 31, 1944, had 23,906 depositors, and deposits, 7,026,6987.

**Production.**—Chief products: wheat, barley, potatoes, onions, beans, cumin, vegetables, tomatoes, forages, grapes and other fruits, cotton. Total value of agricultural produce during the agricultural year 1937-38, 667,1107. (1936-37, 675,8267.). Area cultivated 1937-38, 43,160 acres (1936-37, 43,236) in about 11,000 holdings, on leases of 4 to 8 years. Cotton is grown: 51 acres in 1937, 46 acres in 1938; production, 11,060 lbs. in 1937, 10,400 lbs. in 1938. Manufactures: lace, cotton, filigree, beer, cigarettes, wine, tomato-canning, butter and pipes. Chief industry, farming; on December 31, 1938, horses, mules and asses numbered 8,799; horned cattle, 4,540; sheep, 15,936; goats, 34,470; pigs, 6,707. The fishing industry occupied 700 boats and about 1,800 persons in 1938. The catch was approximately 1,080 tons, valued at 68,0007. wholesale.

## Commerce.—Imports and exports for five years:—

|                      | 1935        | 1936        | 1937        | 1938        | 1939        |
|----------------------|-------------|-------------|-------------|-------------|-------------|
| Imports <sup>1</sup> | £ 3,770,483 | £ 3,466,217 | £ 4,019,569 | £ 3,869,606 | £ 4,140,049 |
| Exports <sup>1</sup> | 548,324     | 647,645     | 669,897     | 690,191     | 659,642     |

<sup>1</sup> Including bullion and specie.

Of the total imports in 1938, 1,081,259*l.* came from the U.K., 361,351*l.* from British possessions, and 2,424,863*l.* from foreign countries. Of the total exports 117,383*l.* went to U.K. and 11,571*l.* to the Colonies.

Vessels entered, 1938, 2,512 of 4,488,153 tons, including 871 British of 2,183,694 tons. Belonging to the port of Valletta on December 31, 1938, were 9 sailing vessels of a gross tonnage of 1,093, 16 steamers of 5,136 tons gross, and 22 motor vessels of 696 tons gross.

**Communications, &c.**—Every town and village is served by motor omnibuses, of which there are 300 running on all the principal roads. There is a ferry service running between Malta and Gozo on which cars can be transported.

There is a Government system of telephones on modern lines with exchanges at Malta and Gozo. There are at present 2,669 exchange lines with 3,478 stations.

The Post-office traffic in 1943-44 was: Inland letters and postcards, 1,714,440; newspapers, 1,367,418; parcels, 4,129; foreign correspondence received: letters and postcards, 661,336; newspapers, 163,332; dispatched, letters and postcards, 456,690; newspapers, 7,475; parcels received, 58,903; dispatched, 3,009.

**Money.**—British coins, Bank of England notes and, since 1940, Government of Malta currency notes are in circulation. The amount of local notes in circulation on December 31, 1944, was 10,584,240*l.*; that of Bank of England notes was estimated at 1,000,000*l.* on the same date.

*Trade Commissioner in London.*—Lt.-Col. A. V. Agius, M.C., T.D., Malta House, 89 St. James's Street, S.W. 1.

*Commissioner for Malta in Australia.*—Capt. H. C. Curmi, O.B.E., Vaughan House, 108 Queen Street, Melbourne.

## ASIA.

## ADEN, PERIM, SOQOTRA AND KURIA MURIA ISLANDS.

Aden is a volcanic peninsula on the Arabian coast, about 100 miles east of Bab-al-Mandeb. It forms an important bunkering station on the highway to the East, and is fortified. The Colony includes Little Aden, a peninsula very similar to Aden itself, and the settlement and town of Shaikh Othman on the mainland, with the villages of Imad and Hiswa and Perim Island.

Under the provisions of the Aden Colony Order, 1936, Aden became the Colony of Aden on April 1, 1937.

Area 75 square miles; including the Protectorate and the Hadhramaut about 112,000 square miles; of Perim, 5 square miles. Population of Aden and Perim in 1931, 48,338 (29,358 males and 18,980 females), against 54,923 in 1921.

During 1943 there were 65 schools, with a total of 3,790 pupils. These schools are classified, in respect of management and degree of Government control, as Government, Aided, Recognised and Unrecognised, and in respect of academic standard and nature of instruction as Indigenous, Primary, Secondary and Vocational. Five main languages are used as media of instruction, English, Arabic, Gujarati, Urdu and Hebrew. In the Government schools and in most other vernacular schools English is not taught during the primary course, which is normally of four years' duration.

Indigenous schools proper are private schools of a primitive nature which concentrate mainly on religious teaching. In 1943 there were two aided and 33 unrecognised indigenous schools with a total of 1,236 boys and 133 girls. The number of primary schools for boys in 1943 was 4 Government, 5 aided and 3 unrecognised with a total number of 1,466 boys and 79 girls. The number of primary schools for girls was 2 Government, 4 aided and 1 unrecognised with a total of 17 boys and 563 girls. The number of secondary schools in 1943 was 1 Government, 5 aided and 3 unrecognised for boys with a total number of 555 pupils, and 3 aided schools for girls with a total number of 70 pupils.

The only Government revenue is from duties on liquor, tobacco, motor spirit, opium, and salt, and from income tax, excess profits tax, court fees and judicial fines; local taxes go to the Aden Settlement Fund. There is a Port Trust. The total revenue during the year 1943-44 amounted to Rs. 116,23,347, and the expenditure to Rs. 46,95,466. Imports (1939), by sea, Rs. 6,23,12,746; by land, Rs. 20,85,805; treasure (sea and land), Rs. 42,18,336; total imports, Rs. 6,85,66,887 (total, 1938, Rs. 8,31,70,441). Chief imports: Fuel oil, petrol, kerosene, cotton piece goods, grain, gums, hides and skins, tobacco, coal, coffee, sugar, fruits, vegetables and other provisions. Exports, by sea, Rs. 3,43,41,168; by land, Rs. 22,02,286; treasure (sea and land), Rs. 25,52,465; total exports, Rs. 3,90,95,919 (total, 1938, Rs. 4,29,91,994). Chief exports: Salt, coffee, gums, hides and skins, cotton piece goods, tobacco, grain, sugar and other provisions. These statistics are exclusive of Government stores and treasure. In 1939, 2,004 merchant vessels of 8,005,764 tons (net) entered the port of Aden, of which 1,300 were British; in the same year 1,455 country (local) craft of 76,963 tons entered. The harbour of Perim was closed for shipping from November, 1936. Aden itself produces little, its chief industries being the manufacture of salt and cigarettes, and building of dhows. The trade is largely a transhipment.

The Aden Protectorate (area about 112,000 square miles) lies to the east, west and north of the colony of Aden and consists of the territories and dependencies of Arab Chiefs in protective treaty relations with His Majesty's Government. It is bounded on the east by the Qara country, which is part of the dominions of the Sultan of Muscat and Oman, and on the north and west by the Great Desert and the Kingdom of Yemen, whose southern boundary was temporarily fixed by Article III of the Treaty of Sana' (February, 1934), by which His Majesty's Government and the Yemen Government agreed to

1906. *Lucas* (C. P.), *Historical Geography of the British Colonies*. 2nd ed. Vol. I. London, 1906.

North Borneo occupies the northern part of the island of Borneo. The interior is mountainous, Mount Kinabalu being 13,455 feet high.

The territory is a British Protected State administered by the British North Borneo Company under Royal Charter granted in 1881. The Governor of the State (whose appointment is subject to the approval of the Secretary of State for the Colonies) is responsible to the Court of Directors in London, and is assisted by a Civil Service of about 60 European officers. For administrative purposes the whole country is divided into two Residencies, which are sub-divided into Districts.

Since December 17, 1941, North Borneo has been in the occupation of the Japanese.

Area, about 29,500 square miles, with a coast-line of over 900 miles. Population (1931 census) 270,223, consisting mainly of Mohammedan settlers on the coast and aboriginal tribes inland. The Europeans numbered 840; Eurasians, 236; Chinese, 47,799; natives of Malay Archipelago, 11,494. The number of natives of Borneo was 205,218. The most numerous are the Dusuns, 97,862; the Bajans, 31,640; and the Muruts, 14,959. Chief towns, Sandakan (population 13,826), on the east coast, and Jesselton, on the west coast.

There are Protestant and Catholic missions. The laws are based on the Indian Penal, Criminal, and Civil Procedure Codes, and local Ordinances. There are Native Courts for Native and Mohammedan law and custom. Native and Indian constabulary, 550 men under 5 European officers.

## 1 including treasure and transshipment trade.

- Apelt (F.)*, Eine Kolonialgeographische und Kolonialpolitische Studie. Grossehain, 1929.
- Forbes (H. O.)*, The Natural History of Sokatra and Abd-el-Kuri. Liverpool, 1905.
- Ingrams (W. H.)*, A Report on the Social, Economic, and Political Condition of the Hadhramaut. (Colonial Office Report.) London, 1906.

Sources of revenue: Customs and Excise duties, court fees, stamp duties, licences, royalties, land rents, etc. No public debt.

Most of the trade is carried on through Singapore and Hong Kong with Great Britain and the colonies. The chief products are rubber, timber, copra and coconuts, dried fish and salt fish, cutch, tobacco, manila hemp, sago, rice, damar, iron, manganese and tin, exist, but have not yet been worked commercially. The exports comprise the products mentioned, with birds' nests, seed pearls, bêche-de-mer, etc. Merchant shipping (men-of-war and Government vessels excluded): 1939, entered 355,485 tons; cleared 348,822 tons; 1938, entered 324,132 tons; cleared 326,254 tons.

A railway, 127 miles, runs from Jesselton on the coast to the interior, with a branch from Beaufort to Weston on Brunei Bay. At Jesselton and Sandakan there are agencies of the Hong Kong and Shanghai Banking Corporation, the Chartered Bank of India, Australia and

China, and the Bank of Taiwan. There is a State Bank, with head office in Sandakan and an agency at Jesselton.

The Government issues its own copper coinage (cents and half-cents), nickel coinage of 1, 2½ and 5 cents, and silver coinage of 25 cents; also notes of one, five, ten, and twenty-five dollars, and of 25 and 50 cents. Accounts are kept in dollar currency (one dollar = 2s. 4d.).

**Brunei.**—A State on the north-west coast of Borneo, lying between latitude 4° 2' and 5° 8' N. and longitude 114° 4' and 115° 22' E. It is bounded on all sides by Sarawak territory, an intrusion of which splits the State into two separate parts. Area about 2,226 square miles with a coast line of about 100 miles. Population, 1931 census, 30,135 (Europeans, 60; Malays and Bornean races, 26,972; Chinese, 2,683; Indians, 877; others, 43). Capital is Brunei (population about 12,000), on Brunei river 9 miles from its mouth, distant 758 nautical miles from Singapore. Climate is of tropical marine type, hot and moist, with cool nights.

In 1847 the Sultan of Brunei entered into a treaty with Great Britain for the furtherance of commercial relations and the suppression of piracy, and in 1888, by a further treaty, the State was placed under the protection of Great Britain. In 1906, by treaty, the general administration of the State was entrusted to a British Resident. The present Sultan is His Highness Ahmed Tajudin Akhazul Khairi Wad-din, C.M.G. (succeeded in 1924). The supreme authority in the State is vested in the Sultan in Council, which at present consists of nine members, including the British Resident, with His Highness the Sultan as President.

The Resident is an officer of the Malayan Civil Service, and he is assisted in the administration by an Assistant Resident, also of the Malayan Civil Service. The heads of the Police, Agriculture, Forest, Medical and Public Works Departments are European Officers of the respective services in Malaya.

The principal products are crude oil, cutch (mangrove extract), rubber, elutong and sago. Native industries include boat building, cloth-weaving, and the manufacture of brass and silver ware. Most of the interior is under forest, containing large potential supplies of serviceable timber.

Revenue, 1940, 181,574*l.* (including Customs, 46,468*l.*; monopolies, 9,511*l.*; licences, 5,236*l.*; lands revenue, including oil royalties, 92,463*l.*; expenditure, 170,587*l.*, including 51,380*l.* appropriated to General Reserve Fund. There is no public debt.

Imports, 1940, total, 453,502*l.* Exports, total, 1,122,680*l.*

Free vernacular education in the Malay language is provided by the State. There were 23 vernacular schools in 1940, with 1,708 pupils. In addition there were five Chinese vernacular schools with 472 pupils, and four private English schools with 160 pupils.

The Police Force consists of 87 non-commissioned officers and men under the Chief Police Officer, a chief inspector on deputation from the Straits Settlements Police.

There are six Post Offices in the State, and 213,412 postal articles were dealt with in 1940.

There is a central wireless station at Brunei, and a subsidiary station at Labuan which enables telegraphic communication to be maintained with Singapore and Europe by cable from the latter station. There are also two subsidiary wireless stations at Belait and Temburong for internal traffic. Communication by small Straits Steamship Company's vessels and by launches is regularly maintained with Labuan, distant about 43 miles from Brunei.

The currency is the Straits Settlements dollar, with a par value of 2s. 4d.

**Sarawak.**—Area about 50,000 square miles, coast line 450 miles, many rivers navigable. The government of part of the present territory was obtained on September 24, 1841, by Sir James Brooke from the Sultan of Brunei. Various accessions were made between 1861 and 1905. Under an agreement of 1888 Sarawak is recognised as an independent State under the protection of Great Britain. The present Rajah, H.H. Sir Charles Vyner Brooke, G.C.M.G. (born September 26, 1874), succeeded his father, H.H. Sir Charles Johnson Brooke, G.C.M.G., in 1917. Heir presumptive, Bertram Brooke (H.H. the Tuan Muda), born August 8, 1876.

On September 24, 1941, the Rajah began to rule through a Constitution. Since 1855 the Rajah was supported by a Supreme Council, which was the sole legislative authority and the chief judicial tribunal. The Council of Negri, or State Council, was the other council in the State. Both councils survive in the new Constitution, the Supreme Council as the Rajah's executive council, and the Council of Negri as the sole legislative authority.

Population estimated at about 490,585, Malays, Dayaks, Milanans, Kayans, Kenyahs, Muruts, and other minor tribes, with Chinese and other settlers. The chief towns are the capital, Kuching, about 20 miles inland, on the Sarawak River, Sibu, 60 miles up the Rejang River, which is navigable by large steamers, and Miri, the headquarters of the Sarawak Oilfields, Ltd. In the State are Church of England, Catholic, American Methodist, Seventh Day Adventist, and Borneo Evangelical missions with schools. The revenue is derived chiefly from Customs, the Government monopoly, gambling, arrack and pawn farms, royalty on oil, land and opium monopoly, timber royalty, exemption tax payable by Malays, and from revenue, Dayak and Kayan revenue. The revenue in 1939 was 4,762,532 dollars; expenditure, 4,200,269 dollars. Public debt, nil.

Coal exists in large quantities. A considerable oil field is being developed at Miri and Bakong in the Baram district. Foreign trade, 1939: imports, 26,173,420 dollars; exports, 34,379,748 dollars. The trade is mostly with Singapore. Shipping entered in the foreign trade, 1939, 974,543 tons. There is a constabulary consisting of about 1,000 men, principally Dayaks and Malays, under European officers. There are no arterial roads or rail-ways. Round Kuching are about 84 miles of roads, besides bridle paths. There are 34 post offices. The Government offices have a telephone system extending over Kuching and Upper Sarawak, and there is communication by wireless with Singapore, etc. There are also wireless stations at Kuching, Miri, Sibu, Lundu, Mukah, Simanggang, Bintulu, Sarikei, Meluan, Kapit, Limbang, Baram, Saratok, Matu, Belingian, Selalang, Tatau, Lawas and Kanowit. Distance from London, 8,700 miles; transit, 25 to 30 days. Telegrams are sent by wireless from Singapore.

Sarawak and Straits Settlements currency, 1 dollar = 2s. 4d.

The rainfall during 1939 in Kuching was 163 ins.; at Bau, in the south-west, 88-93 ins.; at Sibu, roughly in the middle of the country, 90-27 ins.; and at Trusan, in the extreme north-east, 89-22 ins.

There is a Special Commissioner for Sarawak as well as a Government Agent in England whose offices are at Millbank House, Westminster, London, S.W.1. There is also a Sarawak Pilgrim Officer at Jeddah.

Since December 17, 1941, Sarawak has been in the occupation of the Japanese.

## Justice, Crime and Pauperism.

Roman-Dutch law modified by local enactments is administered in the Maritime Provinces, while Kandyan laws and customs, now partly codified, are administered in the Kandyan Provinces. The Tamils of the Jaffna District are governed by a special code of laws relating to persons and property, and is known as the Thesawalamai. The Muslim inhabitants are governed by their religious law in matters such as inheritance, marriage and divorce.

District courts and Courts of Requests administer justice on the civil side. The Supreme Court exercises only an appellate jurisdiction in civil matters, excepting in divorce cases instituted under the Indian and Colonial Divorce Jurisdiction Act, 1926. On the criminal side Magistrates' courts, District courts and the Supreme Court exercise an original jurisdiction. The Supreme Court exercises an appellate jurisdiction in cases decided by Magistrates' courts and District courts. A Court of Criminal Appeal exercises an appellate jurisdiction in cases tried by the Supreme Court in its original criminal jurisdiction. Village Tribunals exercise a criminal and civil jurisdiction in rural areas in respect of petty crimes and civil disputes. In 1943 the number of cases instituted in the Magistrates' courts and Municipal courts was 137,317. 10,001 convicted persons were sent to prison. Police force, December 31, 1943, was 4,834 of all ranks.

The Ordinance relating to the relief of the poor was brought into operation on January 1, 1940. Its provisions have been applied in the first instance to the Municipal towns of Colombo, Kandy and Galle, where the local authority is responsible for financing and administering poor relief, and Public Assistance Committees have been appointed in this connection. In other areas the administration of poor relief is a commitment of the central Government and is undertaken by Revenue Officers with the assistance of Advisory Committees. Where recognized charitable agencies function in urban areas, grants are given to such agencies for the administration of relief. The maximum monthly rate of assistance has been increased from Rs. 5 to Rs. 10, with effect from February 1, 1944. The relief of widespread distress due to floods, epidemics, failure of crops, etc., is undertaken by Government whenever circumstances demand it, such relief being generally given in employment on works of public utility in the case of failure of crops, and in cash or kind during floods or epidemics. Money grants up to a maximum of Rs. 150 are also paid for rebuilding houses destroyed by floods, fire and other exceptional causes.

## Finance.

15 rupees = £1.

<sup>1</sup> 12 months ended September 30.<sup>2</sup> Exclusive of Railway Revenue, which amounted to 1,140,497l. in 1939-40; to 1,239,328l. in 1940-41; to 1,886,829l. in 1941-42, and to 2,646,264l. in 1942-43.<sup>3</sup> Exclusive of Railway Expenditure, which amounted to 1,410,490l. in 1939-40; to 1,514,780l. in 1940-41; to 1,629,289l. in 1941-42, and to 1,925,380l. in 1942-43.<sup>4</sup> Budget estimates.

The principal sources of revenue in 1942-43: Customs, 5,195,003l.; port, harbour, wharf, warehouse and other dues, 432,286l.; arrack, rum and toddy licences, 843,908l.; stamps, 343,977l.; post and telegraph, 722,071l.; income tax, 2,256,338l.; estate duties, 74,471l.; salt, 214,029l., and land sales, 11,599l.

The principal items of expenditure in 1942-43: pensions and retired allowances, 894,201l.; interest and sinking fund on loans, 839,075l.; post and telegraph, 563,063l.; department of medical and sanitary services, 1,044,121l.; education, 1,560,960l.; on public works (annually recurrent), 404,237l.

The net public debt on September 30, 1943, incurred entirely for public works, was 9,408,775l. and Rs. 103,270,000. The accumulated sinking funds for their redemption were valued at 2,700,971l. and Rs. 3,804,560 respectively.

## Production and Industry.

The area of the island is 16,212,400 acres, of which it is estimated that about 3,647,300 acres are under cultivation, and about 456,000 acres pasture land. The approximate areas under the principal products in 1943 were: paddy, 850,000 acres; other grain, 105,000 acres; cacao, 34,000 acres; rubber, 26,000 acres; tea, 549,571 acres; coconuts, 1,238,000 acres; rubber, 637,739 acres. In 1942, 1,094 acres of crown land were granted and sold by the Revenue Officers. The live stock in 1942 was reported to amount to 1,501 horses, 1,700,061 horned cattle, 58,086 sheep, 35,280 swine and 285,990 goats. There is a Government dairy at Narahenpita, Colombo, possessing 302 heads of cattle. There were 199 plumbago mines reported to be working at the end of 1943. Phologopite mica of high dielectric strength exists in economically workable deposits and six small mines were working at the end of 1943. Ilmenite, monazite and zircon are found in quantities of commercial importance in beach sands. There are some hundreds of gem pits, from which sapphires, rubies, aquamarine, moonstone, topaz, chrysoberyl (cats-eye), zircons, spinels, tourmalins and other gems are obtained. Among the other mineral resources of the island are deposits of kaolin, iron-ore, and glass sands. There has been considerable activity in industrial development in recent years furthered by the Department of Commerce and Industries, which was set up in 1938. There are about 3,264 tea and rubber factories, mills, etc.; 3,236 cardamom, cinnamon, citronella, coconut, fibre, oil, etc., factories, etc.; 19 saw mills and 32 aerated water, ice, etc., factories. The following factories have been established by the Department of Commerce and Industries recently: Acetic acid, ceramic, coir, glass, hat, leather, paper, plywood, quinine and steel rolling. Steps are being taken to establish caffeine and shark liver oil factories.

## Commerce.

The values of the imports and exports for six years are given in the following table (rate of conversion: 1l. = Rs. 15):—

| Years | Imports <sup>1</sup> | Exports <sup>1</sup> | Years | Imports <sup>1</sup> | Exports <sup>1</sup> |
|-------|----------------------|----------------------|-------|----------------------|----------------------|
|       | £                    | £                    |       | £                    | £                    |
| 1935  | 15,166,002           | 16,876,081           | 1938  | 15,751,658           | 19,995,552           |
| 1936  | 14,295,631           | 17,906,142           | 1939  | 16,072,257           | 21,876,189           |
| 1937  | 16,209,055           | 22,141,128           | 1940  | 18,673,325           | 25,899,676           |

## CEYLON.

### Constitution and Government.

Ceylon, the ancient Taprobane (Tamraparni, the island of 'dusky leaves'), is an island in the Indian Ocean, by the south of India, lying between 5° 55' and 9° 50' N. lat., and 79° 42' and 81° 53' E. long. Its area is 25,332 square miles. The average annual rainfall varies from 40 ins. in the north-west to over 200 ins. south-east and some parts of the interior. Annual average for Colombo is 91 ins., and for Kandy 87 ins.

In 1505 the Portuguese formed settlements on the west and south, which were taken from them about the middle of the next century by the Dutch. In 1796 the British Government annexed the foreign settlements to the Presidency of Madras; in 1802 Ceylon was separated from India and formed into a Crown colony.

According to the terms of the Constitution established in 1833, modified on various occasions, and now embodied in the Order in Council dated March 20, 1931, the administration is in the hands of a Governor, aided by a State Council which deals with administrative as well as legislative matters and therefore sits in executive as well as legislative session; the control of departments is decentralised and the old Colonial Secretariat is replaced by groups of departments in charge of seven Ministers elected among the members of the Council, and three Officers of State, namely the Chief (formerly Colonial) Secretary, the Legal Secretary, and the Financial Secretary. In the administration of his department each of the seven elected Ministers is associated with a Standing Executive Committee of the State Council. Communal representation has been abolished. The territorial franchise, which was limited to adult males possessing certain literary and property qualifications, has been extended—subject to certain specified qualifications—to adults of both sexes. The State Council is composed of 50 members elected on a territorial basis, with 8 Nominated Unofficial Members, and the 3 Officers of State.

*Governor.*—Sir Henry Monck-Mason Moore, G.C.M.G. (appointed September 19, 1944; salary 8,000*l.*, including entertainment allowance of 1,600*l.*).

*Chief Secretary.*—Sir Robert H. Drayton, C.M.G. (July 7, 1942).

For purposes of general administration, the island is divided into nine provinces, each presided over by a Government Agent, with assistants and subordinate headmen. There are three municipalities, with twenty-seven urban councils and one local board, mainly for sanitary purposes.

### Area and Population.

The population of Ceylon (exclusive of the military and the shipping) at the partial census held on February 26, 1931, showed an increase of 18·0 per cent. since 1921. The distribution by provinces, and the average number

of persons per square mile in each province, are given in the following table:—

| Provinces     | Area: English sq. miles | Population, 1931 |              | Provinces     | Area: English sq. miles | Population, 1931 |              |
|---------------|-------------------------|------------------|--------------|---------------|-------------------------|------------------|--------------|
|               |                         | Total            | Per sq. mile |               |                         | Total            | Per sq. mile |
| Western       | 1,432                   | 1,445,084        | 1,009        | Uva . . . .   | 8,277                   | 303,243          | 92           |
| Central       | 2,390                   | 953,888          | 416          | Sebaragamuwa  | 1,993                   | 576,966          | 306          |
| Southern      | 2,146                   | 771,204          | 359          | Total . .     | 35,332                  | 5,306,863        | 208          |
| Northern      | 3,429                   | 396,874          | 111          | Military . .  | —                       | 1,887            | —            |
| Eastern       | 3,840                   | 212,421          | 55           | Shipping . .  | —                       | 4,290            | —            |
| North-Western | 8,016                   | 546,966          | 181          | Miscellaneous | —                       | 8                | —            |
| Central       | 4,009                   | 97,365           | 24           | Grand Total . | —                       | 5,312,548        | —            |

The Sinhalese numbered 3,500,000. The population on the principal estates, mainly consisting of immigrant Tamils from Southern India, numbered, at the census of 1931, 790,376, and formed 14·9 per cent. of the total population. The Indian Tamils on estates numbered 692,540. There were also 825,000 Moors; about 85,000 Burghers (Dutch and Portuguese mixed with native strains) and 10,000 Europeans.

The estimated population of the island in 1948 was 6,197,000.

Marriages registered, 1943, 43,957 (exclusive of 6,234 Muslim marriages); births registered, 248,820 (126,343 males and 122,477 females); deaths registered, 131,061 (68,654 males and 62,407 females).

The urban population is 13·5 per cent. of the total population. The principal towns and their population (exclusive of the military, shipping, and estates), according to the census of 1931, are:—Colombo, 284,155; Jaffna, 45,708; Galle, 38,424; Kandy, 36,541.

### Religion and Education.

Buddhism was introduced from India in the third century B.C., and is still the religion of the majority of the inhabitants, especially in the southern part of the island.

Education is free in Sinhalese and Tamil schools, but fees are charged in English schools.

The number of Sinhalese and Tamil schools in 1943 was: Government schools, 2,172 (attendance, 143,462 boys and 99,537 girls); aided schools, 1,916 (attendance, 129,065 boys and 113,741 girls). There were also 394 English and bilingual schools, attended by 52,039 boys and 24,321 girls.

The total sum spent by Government on Sinhalese and Tamil education in 1942-43 was 16,819,270 rupees.

The Royal College and the Government Training College with the English school (Royal Preparatory) attached to it are Government institutions, situated in Colombo. In the rural areas, there are 12 Government English schools, and all the other English schools are assisted schools, the total grants to which in 1942-43 amounted to 2,301,142 rupees. The University of Ceylon was established on July 1, 1942, by the incorporation of the Ceylon Medical College (founded 1870) and the Ceylon University College (founded 1921). In 1944-45 it had 996 students. The Ceylon Technical College provides a series of courses in engineering, commerce and arts-crafts. In 1941 the college was recognised for the London B.Sc. Engineering degree. In 1942-43 session 2,823 students were enrolled. There are 142 industrial schools.

## CYPRUS.

**Governor.**—Sir Charles Campbell Woolley, K.C.M.G., O.B.E., M.C. (appointed September 20, 1941; salary, 3,600*l.*, of which amount 600*l.* is payable to the officer from time to time administering the Government).

**Constitution and Government.**—Cyprus is 40 miles from the coast of Asia Minor and 60 from the coast of Syria. At a very early date important Greek and Phœnician colonies were established in Cyprus and later it formed part of the Persian and Roman Empires. Its government frequently changed hands until 1571, when the Turks conquered the island from the Venetians, and retained possession of it until its cession to England for administrative purposes under a convention concluded with the Sultan at Constantinople, June 4, 1878. On the outbreak of hostilities with Turkey on November 5, 1914, the island was annexed. On May 1, 1925, the island was given the status of a colony by Letters Patent, and the High Commissioner became Governor. There is an Executive Council, consisting, at present, of the Colonial Secretary, the Attorney-General, the Treasurer, together with one other official and two non-official members. On November 13, 1931, under Letters Patent, the Legislative Council, which had first been constituted in 1882, ceased to exist, and power to make laws was granted to the Governor. Municipal corporations exist in 15 principal towns. Since April, 1943, members of the councils are elected by all male residents 21 years old or over. Since December 1, 1931, the appointment of the mukhtars (headmen) of villages has been vested in the Governor. In October of 1933 an Advisory Council, on an informal basis, was established in order that there might be a channel through which to obtain the views of the community on questions of legislation and other matters of importance affecting the relations of the Government and the people. The Council consists of members of the Executive Council, of which the present composition is four officials and two unofficials, together with other members to be annually selected from the unofficial community. The present composition of the unofficial members is five Christians and two Moslems.

**Area and Population.**—Area 3,572 square miles; about 140 miles is greatest length from east to west, and about 60 miles is greatest breadth from north to south. Average rainfall for the past 10 years, 21.74 inches. Most of the rain falls between October and March. Population at 1931 census:—Moslems (Ottoman Turks), 64,238; Christians (Orthodox of the Autocephalous Church of Cyprus under the Orthodox Archbishop of Cyprus resides in the Lebanon; Armenians under a Uniat Archbishop of Cyprus, who in Cyprus; and Anglicans under the Bishop in Jerusalem), 283,562; others, 159; total, 347,959. Population at 1921 census: 310,715; at 1911 census: 274,108. Estimated population in 1943, 393,249. Inhabitants per square mile, 110.09. Births registered, 1943, 21,405; deaths registered, 1943, 5,155. The principal towns are Nicosia (the capital), population, 29,875; Limassol, 17,834; Larnaca, 14,430; Famagusta, 13,631; Paphos, 5,004, and Kyrenia, 2,417. There are six administrative districts named after these towns.

**Education.**—There is a separate educational system for each religion. Elementary schools are under the control of the Government, assisted by an advisory Board of Education for each religious community. In 1943-44 there were 479 Greek, 203 Turkish and 5 Maronite schools, with 976,298

and 7 teachers, and 43,076, 9,971 and 246 pupils respectively; also 7 Armenian and 4 Latin schools under independent management.

Secondary schools (subject to State control) included:—Greek: 6 gymnasiums (1 for boys, 1 for girls, 4 mixed), 4 commercial schools, 7 village high schools, 8 private girls' schools. Turkish: a lycée for boys and a high school for girls. Armenian: an orphanage with training college and trade school. Undenominational: a Government boys' school and 2 American school. There is a Government training college and rural central school. academies. There is a Government expenditure on education in 1943 was

The total Government-controlled expenditure on education in 1943 was 280,122*l.*, of which 246,124*l.* was from Colonial Revenue. Greek, Turkish and English are the official languages. English is spread- ing rapidly. There are 2 English, 3 Turkish and 16 Greek newspapers.

**Justice.**—A complete revision of the judicial system was effected by the Courts of Justice Law, 1935, which came into operation on January 1, 1936. This law divided the Colony into six judicial districts, viz., Nicosia, Kyrenia, Famagusta, Larnaca, Limassol and Paphos. It also provides for (1) a Supreme Court with appellate jurisdiction, both civil and criminal, over the decisions of all other courts, and original jurisdiction as a Colonial Court of Admiralty under the Imperial Act of 1890 and in matrimonial causes, with powers in such causes similar to those of the High Court in England; (2) six assize courts, having unlimited criminal jurisdiction; (3) six district courts, having unlimited civil jurisdiction, and summary jurisdiction in criminal cases. There are also three *Shari* Courts, for Moslems only, which administer the Moslem *Shari* or religious law, and an appeal lies from their decisions to the Supreme Court. In the year 1943 the number of offences was 18,526, excluding 11,199 offences under the Emergency Powers (Defence) Act, 1939, and the number of persons committed to prison was 2,367. Strength of police force and prisons staff, December 31, 1943, 25 officers (including 1 bandmaster) and 856 men; total, 881.

**Finance.**—The revenue and expenditure for five years, exclusive of Grant-in-Aid, share of the Turkish debt charge, and Colonial Development Fund grants and expenditure were:—

|             | 1940      | 1941      | 1942      | 1943      | 1944 <sup>1</sup> |
|-------------|-----------|-----------|-----------|-----------|-------------------|
| Revenue     | 940,387   | 1,096,655 | 1,492,851 | 2,183,596 | 2,095,989         |
| Expenditure | 1,135,091 | 1,332,381 | 1,685,018 | 2,056,423 | 2,557,564         |

<sup>1</sup> Budget estimates.

Chief sources of revenue, 1943: customs duties and port dues, etc., 453,051*l.*; excise duties, property and animal taxes, Nicosia stamp duties, etc., 981,640*l.*; court receipts and payments for specific services, etc., 133,856*l.*; railway revenue, 82,000*l.*; forest revenue, 181,031*l.*; and miscellaneous receipts, 259,728*l.*. Annual grants from Imperial funds (not included above), 92,800*l.*

The expenditure for 1943 includes railway expenditure, 71,324*l.*. The share of Cyprus in the Turkish debt charge, not included in the above expenditure, amounts to 92,000*l.* annually; public debt, on December 31, 1943, amounted to 1,327,753*l.*

Since 1928 Cyprus contributes 10,000*l.* annually to Imperial defence.

**Production.**—Chief agricultural products in 1943: wheat, 1,922,944 bushels; barley, 1,782,130 bushels; oats, 179,499 bushels; vetches, 368,096

Imports, 1942, 414,458,000 rupees; exports, 537,640,000 rupees.

Principal exports in 1940: Cacao, 126,620*l.*; cinnamon, 93,226*l.*; coir (and manufactures), 170,298*l.*; copra, 659,471*l.*; coconut oil, 450,836*l.*; tea, 13,860,876*l.*; plumbago, 382,610*l.*; coconuts, fresh, 19,414*l.*; coconuts, desiccated, 182,555*l.*; arcanuts, 92,640*l.*; rubber, 7,540,046*l.*; citronella oil, 78,989*l.*

Principal imports in 1940: Cotton manufactures, 1,257,308*l.*; rice and paddy (in the husk and not in the husk), 4,400,440*l.*; coal and coke, 874,753*l.*; spirits (brandy, gin, and whisky), 120,762*l.*; sugar (refined, unrefined, and jaggery), 873,085*l.*; manures, 801,430*l.*; bullion and specie, 10,211*l.*

In 1938 (British Board of Trade returns) the value of tea imported into the United Kingdom from Ceylon was 10,433,685*l.* (quantity, 167,070,690 lb.), in 1937, 9,852,530*l.* (141,164,350 lb.). Among the imports from Ceylon in 1938 were: rubber, 886,153*l.* (27,133,000 lb.); coconut oil (unrefined), 393,428*l.*; coconut, desiccated, 297,028*l.* The principal exports of United Kingdom to Ceylon in 1938 were: cotton piece goods, 401,754*l.*; iron and steel goods, 471,178*l.*; machinery, 257,362*l.* Total imports into United Kingdom, 1938, 12,398,930*l.*; 1937, 11,609,038*l.*; total exports of British produce to Ceylon, 1938, 3,494,513*l.*; 1937, 3,921,685*l.*

### Shipping and Communications.

On December 31, 1943, 95 sailing vessels of 4,927 nett tons, 2 motor vessels of 19 nett tons, and 6 steam vessels of 1,257 nett tons remained on the ships' register of the ports in Ceylon.

913 miles of railway were open at the end of 1943.

On September 30, 1942, there were 959 offices of various classes open for postal business; money order offices, 460; telegraph offices, 348; letters, postcards and printed matter, samples, etc., passed through the post office, 80,876,600 (exclusive of parcels, 573,925); 10,240 miles of telegraph wire; telegrams dealt with, 1,947,400.

### Money and Credit.

Eleven banks have establishments in Ceylon: the Mercantile Bank of India, Ltd., the Imperial Bank of India, the National Bank of India, Ltd., the Hong Kong and Shanghai Banking Corporation, the Chartered Bank of India, Australia and China, the Eastern Bank, Ltd., Grindlay & Co., Ltd., the Bank of Uva, Ltd., the Bank of Ceylon, the Oriental Bank of Malaya, Ltd., and the Hatton Bank, Ltd. The Ceylon Savings Bank on December 31, 1943, had 88,931 depositors, and deposits amounting to Rs. 26,475,923; and the Post Office Savings Banks 734,190 depositors, and deposits, Rs. 21,516,305. The loans granted by the Ceylon State Mortgage Bank as at September 30, 1943, amounted to Rs. 12,431,351.

The Imperial weights and measures of the United Kingdom are established as the standard weights and measures of the island. Local and customary weights and measures are still in force in various parts of the country. The Currency Ordinance No. 21 of 1941 provides for a Ceylon Rupee as the unit of currency, without a coin of corresponding value, but dependent for its international value on the obligation placed on the Currency Board administering the Ordinance to exchange Ceylon currency for Indian currency and *vice versa*. Currency notes are issued in the denominations of Re. 1, Rs. 2, 5, 10, 50, 100, 500 and 1,000, and subsidiary currency notes in the following denominations: 50, 25 and 10 cents. The

following subsidiary coins were legal tender on December 31, 1943: (1) nickel brass, 50 and 25 cents; (2) cupro-nickel and nickel brass, 5 cents; (3) copper, 1 cent and  $\frac{1}{2}$  cent. The note circulation stood at Rs. 204,443,920 on December 31, 1943, and the estimated liability of the Currency Board in respect of the circulation of subsidiary notes and coin at Rs. 10,296,692/90 on the same day. The exchange rate between Ceylon and the United Kingdom is subject to fluctuation, within narrow limits; it has remained close to 1*l.* 6*d.* per rupee throughout 1943.

### Dependency.

The Maldivé Islands, 400 miles south-west of Ceylon, are a group of 13 coral islets (atolls), richly clothed with coconut palms, and yielding millet, fruit, and edible nuts. The old form of government was abolished in 1932, and a new Constitution was introduced. The Sultan, Hassan Nuruddin Iskander II, K.C.M.G., was elected on March 12, 1935, and the ceremony of his Assumption of the Sword of State took place on July 21, 1935. According to the modified Constitution there is a People's Assembly consisting of 33 members, of whom 28 are elected and 5 are nominated, and a Cabinet of 4 ministers. The Prime Minister is selected by the Sultan from the members of the People's Assembly and he selects his colleagues who form the Cabinet.

Population over 93,000 Muslims at the 1941 census. The people are civilised, and are great navigators and traders.

Christmas Island. See STRAITS SETTLEMENTS.

bushels; olives, 4,268 tons; carobs, 47,488 tons; potatoes, 18,778 tons; raisins, 5,075 tons; cotton, 898 tons; cheese, 10,565 cwt.; linseed, 2,760 cwt.; flax, 1,200 cwt.; hemp, 1,820 cwt.; cocoons, 2,287 cwt.; wines, 4,289,796 gallons; olive-oil, 880 tons.

In 1948 there were 85,856 cattle; horses and mules, 14,051; donkeys, 55,464; sheep, 802,821; goats, 208,002, and 40,173 pigs. Over one-third of cultivable land is under cultivation, about 129,899 acres being under vineyard cultivation.

The Forest Department has done much for the preservation and development of the forests existing at the time of the British occupation, and for the re-afforestation of denuded districts. The area of delimited forest is 622 square miles. Sponge fishing is usually carried on from June to October. Cupreous pyrites is the principal mineral product, and 29,964 tons of cupreous concentrates and 12,987 tons of iron pyrites were exported in 1948. 1,311 tons of asbestos and 7,860 tons of chrome concentrates were also exported during the year. Gypsum and terra-umbra are found in abundance.

**Commerce.**—The commerce, and the shipping, exclusive of coasting trade, for five calendar years were:—

|                                     | 1939           | 1940         | 1941         | 1942         | 1943         |

Chief civil imports, 1943:—Butter (including butter substitutes), 10,886L; coffee, raw, 25,607L; barley, 137,132L; wheat, 62,737L; fish, dried, salted or pickled, 28,938L; milk, preserved, 18,271L; rice, 18,468L; sugar, 72,688L; tobacco, unmanufactured, 22,892L; hides and skins, raw, 12,176L; dom and ivory nuts, 66,524L; crude petroleum, 105,686L; bees' wax, 14,560L; bottles and demijohns, 21,040L; glass and glassware, 17,047; iron and steel and manufactures thereof, 14,306L; machinery, 19,361L; cotton yarn, 83,000L; cotton finished thread, 30,289L; cotton piece goods, 306,997L; cotton manufactures (except apparel), 23,593L; sacks, empty, 56,180L; artificial silk piece goods, 29,366L; woollen piece goods, 29,697L; woollen manufactures (except apparel), 31,210L; cotton hosiery, 28,134L; chemicals, 36,036L; drugs, medicines and medicinal preparations, 30,382L; dyes and dyestuffs, 16,608L; lubricating oils, 27,281L; petrol and benzine, 142,545L; petroleum 'kerosene,' 74,214L; leather, dressed, 30,682L; leather, sole, 67,707L; paper and paper goods (except stationery), 9,826L; motor cars, 19,200L; tyres and tubes for motor cars, 29,993L; cement, 14,700L; manure, chemical, 208,018L; matches, 15,210L; perfumery, 9,731L.

Chief exports, 1943:—Carobs, whole, 14,266L; carobs, kibbled, 243,991L; carob seed, 74,875L; carob gum, 45,139L; cheese, 25,448L; barley, 21,755L; almonds, 29,621L; raisins, 168,201L; carob juice, 11,375L; brandy, 237,339L; spirits, other than brandy, 86,574L; tobacco, yellow leaf, 10,381L; tomato paste, 12,056L; potatoes, 151,994L; wine, ordinary, 161,435L; hides and skins, raw, 22,796L; asbestos, 21,975L; chromium ore, 37,577L; cupreous concentrates, 222,113L; gold ore, 14,300L; gold-silver

precipitates, 21,829L; iron pyrites, 13,888L; silk, raw, 35,000L; linseed, 16,558L; sumac, 11,288L; timber, 32,508L; artificial teeth, 16,843L; buttons, 226,273L.

Imports from United Kingdom (Board of Trade returns) 1938, 658,277L; 1937, 584,709L. Exports to United Kingdom, 1938, 795,488L; 1937, 696,269L.

**Communications, &c.**—The primary system of arterial or main roads totals 362 miles, of which 660 miles have an asphalt treated surface. The secondary system of feeder or village roads totals 1,692 miles. There are 364 miles of telegraph lines; cable connects with Alexandria and Haifa. A narrow-gauge Government railway runs from Famagusta Harbour to Kalokhorio (71 miles). Total number of letters, postcards, newspapers, book-packets, and parcels delivered in Cyprus, 1943: local, 3,163,878; received from abroad, 677,509; posted for abroad, 557,520. Telephones are extensively used for the conduct of Government business. Total length of telephone lines, 1,753 miles.

**Money, &c.**—The Ottoman Bank, the Ionian Bank, Barclays Bank (D. C. and O.) and the Bank of Athens have establishments in the island, in addition to which there are various local banks. Moneys of account are pounds, shillings and Cyprus piastres. 180 Cyprus piastres or 20 shillings = one pound, which is equivalent to the pound sterling. Government currency notes of 5L, 1L, 10s, 5s, 2s, 1s and 3p. are in circulation, the value at December 31, 1943, being 4,209,846L. Coins current—Silver, 45, 18, 9, 4½ and 3 Cyprus piastres; bronze and nickel, 1, ½ and ¼ Cyprus piastres. Weights and measures are as follows:—Length: 1 Cyprus Pic = ¾ yard; Weight: 1 Oke = 2.8 lb.; Capacity: 1 Kilé = 8 Imperial gallons.

### HONG KONG.

#### Constitution and Government.

The Crown Colony of Hong Kong was ceded by China to Great Britain in January, 1841; the cession was confirmed by the treaty of Nanking in August, 1842; and the charter bears date April 5, 1843. Hong Kong is a great centre of world commerce with China and other countries in the Far East, and a military and naval station of first-class importance.

The administration was in the hands of a Governor, aided by an Executive Council, composed of the General Officer Commanding the Troops, the Commodore of His Majesty's Dockyard (special appointment), the Colonial Secretary, the Attorney-General, the Secretary for Chinese Affairs, the Financial Secretary, the Director of Medical Services (the last being a special appointment), and four unofficial members. There is also a Legislative Council, presided over by the Governor, and composed of the General Officer Commanding the Troops, the Colonial Secretary, the Attorney-General, the Secretary for Chinese Affairs, the Financial Secretary, the Director of Medical Services, the Director of Public Works, and eight unofficial members.

On December 7, 1941, Japan attacked United States and British bases in the Pacific, and on December 8, Great Britain and the United States declared war on Japan. The garrison at Hong Kong surrendered on December 25, and the Japanese are in occupation of the colony.

*Japanese Governor.*—Lieutenant-General Renauka Isogai.

### Area and Population.

Hong Kong is situated at the mouth of the Canton River, about 90 miles south of Canton. The island is an irregular and broken ridge, stretching nearly east and west about 11 miles, its breadth from 2 to 5 miles, and its area rather more than 32 square miles; separated from the mainland by a narrow strait, the Lyeemoon Pass, about a quarter of a mile in width. The opposite peninsula of Kowloon, on the mainland, was ceded to Great Britain by treaty in October 1860, and now forms part of Hong Kong. The city of Victoria extends for upwards of five miles along the southern shore of the extensive harbour. By a convention signed at Peking on June 9, 1898, there was leased to Great Britain for 99 years a portion of Chinese territory, mainly agricultural, together with the waters of Mirs Bay and Deep Bay and the island of Lan-tao. Its area is about 356 square miles, including islands, with about 104,473 inhabitants, including a number of Europeans. Area of Old Kowloon is 3 square miles. Large areas have also recently been reclaimed at Kowloon Bay, Wanchai, and North Point. Total area of colony, 391 square miles. The climate of Hong Kong is sub-tropical, the winter being cool and dry and the summer hot and humid. The average rainfall is 84.26 ins., May to September being the wettest months.

Estimated population of Hong Kong, excluding the military and naval establishments, at middle of 1940, was as follows:—Island of Hong Kong: Non-Chinese civil population, 9,920; Chinese civil population, 456,450; Kowloon Peninsula: Non-Chinese civil population, 12,309; Chinese civil population, 379,816; New Territories: Non-Chinese civil population, 524; Chinese civil population, 111,502; Maritime: Non-Chinese civil population, 1,372; Chinese civil population, 100,000. Total Non-Chinese civil population, 24,125; total Chinese civil population, 1,047,768; grand total of populations, 1,071,893. The population figures do not include refugees from China, whose number is estimated at about 750,000.

The registered births and deaths for five years were as follows:—

| Year       | Births | Deaths | Births per 1,000 | Deaths per 1,000 |
|------------|--------|--------|------------------|------------------|
| 1935 . . . | 25,037 | 22,159 | 25.91            | 22.93            |
| 1936 . . . | 27,111 | 26,356 | 27.4             | 26.6             |
| 1937 . . . | 32,303 | 34,635 | 32.1             | 34.4             |
| 1938 . . . | 35,893 | 38,818 | 34.9             | 37.7             |
| 1939 . . . | 46,675 | 48,283 | 44.4             | 46.0             |

In 1938, the number of Chinese emigrants was 110,887, and the number of immigrants 88,620; 1939, 71,285 and 62,655, and in 1940, 72,096 and 90,224 respectively.

### Education.

Education is not compulsory, but all schools are required to be registered with the Education Department and are inspected by its officers to ensure a minimum standard as regards hygiene conditions. Of the 4 Government schools for children of British parentage, only 1 with an average attendance of 8 remained open after the evacuation of British families from the Colony in July, 1940; later another opened under private arrangements and had an attendance of 16 at the end of the year. The figures which follow are in respect of the fifteen months January 1, 1940, to March 31, 1941. There were 13 Government schools for Chinese boys and 2 for Chinese girls, with a total average attendance of 3,869, and 1 Government school for Indians, with an average attendance of 153. There were 19 schools (average attendance, 9,117; 2 temporarily amalgamated) in receipt of grants, and 279 schools (average attendance 24,952) in receipt of subsidies. There was an average attendance of 42 teachers-in-training at the Northcote Training College, and 844 students at the various courses of the Evening Institute. The total number of schools at the end of the year was 1,273, with an enrolment of 116,280. Government's total expenditure on education was 2,807,269 dollars.

In 1940 the University of Hong Kong had 572 full-time undergraduates (458 men, 114 women), of whom 477 were Chinese and 95 were non-Chinese. They were divided into faculties as follows: medicine 274, engineering 112, arts 155, and science 31. In addition there were 5 part-time external students attending classes, of whom 1 was a woman.

### Justice and Crime.

There is a Supreme Court, having Original, Summary, Criminal, Probate, Divorce and Admiralty, Prize Jurisdiction, and Courts of Appeal, five police magistrates' courts, and a marine magistrate's court. In 1940, 7,544 were committed to Hong Kong prisons for criminal offences; in 1939, 6,289. The daily average of prisoners in gaol was 3,003 in 1939 and 2,874 in 1940. There is a police force in the colony numbering in 1941, 2,817 men, of whom 295 are British Europeans, 801 Indians, and 1,221 Chinese. In addition there is a force of Special Guards for anti-piracy work, consisting of 217 men, of whom 23 are Russians, 74 Indians and 120 Chinese.

### Finance.

The public revenue and expenditure of the colony were as follows in recent years:—

| Year | Revenue dollars | Expenditure dollars | Year                 | Revenue dollars | Expenditure dollars |
|------|-----------------|---------------------|----------------------|-----------------|---------------------|
| 1937 | 33,196,868      | 32,111,322          | 1939                 | 41,478,052      | 37,949,116          |
| 1938 | 36,736,855      | 37,175,898          | 1940-41 <sup>1</sup> | 70,175,115      | 64,787,557          |

<sup>1</sup> Period of fifteen months, i.e. from January 1, 1940, to March 31, 1941. The financial year of the Colony now begins on April 1 and ends on March 31.

The revenue is derived chiefly from land-taxes, licences, quarry rent, liquor, tobacco and motor-spirit duties, an opium monopoly, and war taxation.

The outstanding public debt consists of 4,838,000 dollars 4 per cent. Conversion Loan (1933), 10,640,000 dollars 3½ per cent. Dollar Loan (1934), and 11,790,000 dollars 3½ per cent. Dollar Loan (1940). The Conversion Loan is redeemable in 1953 by means of a Sinking Fund. The Dollar Loans are redeemable by annual drawings over a period of 25 years. On March 31, 1941, the general revenue balance was 22,420,828 dollars.

### Industry, Commerce, Shipping and Communications.

The chief industries are sugar refining, ship-building and repairing, rope-making, tin refining, tobacco manufacture, the manufacture of cement, the manufacture of knit and woven goods, canvas shoes with rubber soles, flash-light torches. The refining of lard is also an important local industry. Deep-sea fishing is important, especially for the New Territories.

The commerce of Hong Kong was chiefly with Great Britain, India, Burma, Ceylon, Straits Settlements and F.M.S., Australia, United States, China, Dutch East Indies, Japan, Indo-China, Siam, Philippines, and British West Indies. Hong Kong was a free port (except as regards the importation of intoxicating liquor, and other spirituous liquor, tobacco, proprietary medicine and toilet preparations, and hydrocarbon oils). Under the Ottawa Conference Agreements, a registration fee of 15 per cent. of their value was charged on non-British motor vehicles. Preference was also extended to Empire brandy and tobacco and tobacco manufactures. Principal articles of trade were sugar and flour, rice, cotton yarn and thread, and cotton and woollen piece goods and made-up goods, silk and silk piece goods and made-up goods, hemp, leather, tin, wolframite, mild steel, machinery and engines, bulk and case oil (kerosene), oils and fats, Chinese medicines, fertilisers, fish and fishery products, tea, coal, cement, condensed milk, matches, paper. Hong Kong was a port of call for steamship lines operating across the Pacific; it was also in direct communication with Europe, South Africa, Australia and the two Americas, via the Pacific sea-board, the Panama Canal and the Suez and Atlantic routes.

The trade of Hong Kong and the United Kingdom (Board of Trade returns) for five years is given as follows:—

|                                                              | 1934      | 1935      | 1936      | 1937      | 1938 1    |
|--------------------------------------------------------------|-----------|-----------|-----------|-----------|-----------|
| Imports (consignments) into Gt. Britain from Hong Kong . . . | 420,910   | 704,017   | 754,021   | 985,861   | 982,339   |
| Exports of British produce to Hong Kong . . .                | 2,612,001 | 2,409,987 | 2,105,842 | 3,891,716 | 3,987,515 |
| Exports of Foreign and Colonial produce . . .                | 48,766    | 44,600    | 46,010    | 52,679    | 65,990    |

1 Provisional figures.

Imports, 1940, into Hong Kong from British Empire (excluding Great Britain), 4,786,013*l.*; exports to British Empire (excluding Great Britain), 7,503,908*l.*; imports from foreign countries, 38,903,596*l.*; exports to foreign countries, 28,535,291*l.*

In 1940, 28,943 vessels (including 15,929 junks and 765 steamships under 80 tons), representing altogether 21,908,850 tons, entered and cleared in the foreign trade. Of these, 3,123 with a tonnage of 6,567,586 were British ocean-going steamers.

On August 28, 1940, the Colony had 384 miles of roads, distributed as follows: Hong Kong Island, 173; Kowloon and New Kowloon districts, 106; New Territories, 105.

There is an electric tramway of 10½ miles, and a cable tramway connecting The Peak district with the lower levels of Victoria. There is a 4' 8½" gauge Government railway on the mainland, connecting Kowloon with Hankow, of which 21½ miles are in British territory and 771 miles in Chinese. All through services with China are at present suspended owing to the Sino-Japanese War. The receipts for the British section in 1940 were 1,110,373 dollars, and operating expenses 1,025,434 dollars.

There were 12 post offices in Hong Kong in 1940; revenue (1940-41) postal,

4,885,305 dollars; telegraphic, 870,358 dollars; expenditure, postal, 979,584 dollars; telegraphic, 648,996 dollars. Telegraph and telephone routes, including cables, in 1940, 1,257 miles; telephone wires, excluding military lines, 102,262 miles. There is a wireless telegraph service under the control of the Post Office which provides for marine, meteorological and aeronautical communications, as well as a broadcasting service with facilities for medium and short wave transmissions of European and Chinese programmes. Commercial wireless services are under the control of Cable and Wireless Ltd. There are also military and naval wireless stations.

### Money, Weights and Measures.

The British banking institutions in the Colony are the Hong Kong and Shanghai Banking Corporation, whose head office is at Hong Kong, the Chartered Bank of India, Australia and China, and the Mercantile Bank of India, Ltd. Note circulation of the three banks, end of 1940, 230,273,159 dollars. There are also several Chinese and foreign banks.

The currency of the Colony consists of the notes of the above-mentioned banks, and of Hong Kong Government dollar notes, besides subsidiary coins, 10 cent pieces and 5 cent pieces of nickel and 1 cent copper pieces of 115.75 grains of copper or mixed metal. A new 1 cent copper coin of 62.5 grains was put into circulation on December 1, 1931. All silver coin in circulation was called in under the Currency Order No. 54 of 1935 and an Exchange Fund was established to control the exchange value of the Hong Kong dollar. Cupro-nickel coins were withdrawn from circulation in 1939. As a temporary measure Hong Kong Government 1 cent currency notes were introduced in 1941.

Weights and measures are:

The *Tael* = 1½ oz. avoirdupois; the *Picul* = 133½ lb.; the *Catty* = 1½ lb. avoirdupois; the *Chak* = 14½ inches; the *Chung* = 12½ feet.

Besides the above weights and measures of China, those of Great Britain are in general use in the Colony.

### INDIA AND DEPENDENCIES.

India, as defined by Parliament (26 Geo. V, c. 2), comprises all that part of the great Indian Peninsula which is directly or indirectly under British rule or protection. In a popular sense it includes also certain countries which are beyond that area, but whose relations with India are a concern of the External Affairs Department of the Government, whose envoy resides in the country concerned. These countries will be found included in the

third part of the YEAR-BOOK among Foreign Countries. The term British India includes only the districts subject to British law, and does not include Indian States. The term is so used, unless otherwise stated, in the tables, etc., that follow.

### Government and Constitution.

The present form of government of the Indian Empire is established by an Act of Parliament, viz. the Government of India Act, 1935. All the territories originally under the government of the East India Company are vested in His Majesty, and all its powers are exercised in his name. Under the Royal Titles Act, 1876, the King of Great Britain and Ireland has the additional title of Emperor of India.

It is the declared policy of Parliament, as stated in the preamble of the Act of 1919, implementing the Declaration of August 20, 1917, to provide for 'the increasing association of Indians in every branch of the administration and the gradual development of self-governing institutions with a view to the progressive realisation of responsible government in British India as an integral part of the British Empire.'

For particulars of the Simon Commission and the Conferences held to consider its report, see THE STATESMAN'S YEAR-BOOK, 1935, pp. 116-117, and for the 1933 White Paper, which resulted in the Act of 1935, see THE STATESMAN'S YEAR-BOOK, 1939, p. 107.

The Government of India Act of 1935 provides for the establishment of a Federation consisting of the Governors' Provinces, the Chief Commissioners' Provinces, and those Indian States who accede to it. The Federation will be constituted by Royal Proclamation when two conditions are fulfilled—

(1) An address in that behalf must have been presented to the King by each House of Parliament. (2) Rulers of States representing not less than half the aggregate population of the States and entitled to not less than half the seats to be allotted to the States in the Federal Upper Chamber must have acceded to the Federation. The executive authority of the Federation will be exercised on behalf of His Majesty by the Governor-General, who will have special responsibilities. He will have a Council of Ministers, responsible to the Federal Legislature, to aid and advise him in the exercise of his functions except in so far as he is required to exercise them in his discretion. The Federal Legislature will consist of His Majesty, represented by the Governor-General, and two Chambers (the Council of State and the House of Assembly). The provisions for the establishment of Provincial Autonomy came into force on April 1, 1937. Two new Provinces were created under the Act on April 1, 1936—(1) *Sind*, was separated from the Presidency of Bombay, and (2) *Orissa*, which, with other areas specified in an Order in Council was separated from the Province of Bihar and Orissa. *Burma* was separated from India on April 1, 1937, with a Constitution on lines similar to that of the Provinces, with the necessary changes. *Aden* ceased to be part of India on that date.

The Act of 1935 also vested the functions of the Crown in its relations with Indian States in a separate authority briefly designated the 'Crown Representative.' In practice this office is held by the same person as the Governor-General.

Part II of the Government of India Act, 1935, relating to federation has not yet been brought into force. Meanwhile the Central Government is being carried on under the provisions relating to the transitional period. It is intended that after the conclusion of the war a body representative of the principal elements in India's national life should be set up in order to devise the framework of a new constitution.

The following are Chief Commissioners' Provinces—*British Baluchistan, Delhi, Ajmer-Merwara, Coorg, the Andaman and Nicobar Islands*, and the area known as *Panth Piploda*. Other Chief Commissioners' Provinces may be created under the Act. A Chief Commissioner's Province is administered by the Governor-General acting through a Chief Commissioner appointed by him in his discretion. The Act contains provisions with respect to the distribution of powers as between the Federal Legislature and the Provincial Legislatures; the administrative relations between the Federation, the Provinces and the Indian States; the setting-up of a Federal Railway Authority and a Railway Tribunal; the constitution of a Federal Court; the constitution of the Federal Legislature and Provincial Legislatures, and the franchise. The representatives of British India in the Federal Council of State are to be chosen by the communities, indirect election being retained for the representatives of the Anglo-Indian, European and Indian Christian communities. The representatives of the States in the Federal Council of State are to be appointed by the Rulers of the States concerned, on the principle that the allocation of seats among the States should take account of the relative rank and importance of the State as indicated by the dynastic salute and other factors. The Federal House of Assembly is to be, in the main, elected by the Provincial Assemblies. Representation in the Provincial Legislative Assemblies is based mainly on the allocation of seats to various communities and to specified interests. The total electorate of the Governors' Provinces (elections, 1937) was 30,137,914, including 4,254,704 women (12 per cent. of the population of British India).

*Government in England.*—As from April 1, 1937, the Council of India has been dissolved. Under the Government of India Act, 1935, the Governor-General, whether acting with his Council or in his discretion (this includes his power of direction and control over Provincial Governors in matters in which they act in their discretion or exercise their individual judgment) is during the transitional period under the direction and control of the Secretary of State. After the establishment of Federation, the Secretary of State's powers of direction and control will be confined to matters in which the Governor-General acts in his discretion or exercises his individual judgment. The Secretary of State has also certain functions assigned to him by the Act. He is assisted by a body of persons appointed by him of not more than twelve, nor less than eight in number during the transitional period, to advise him on any matter relating to India on which he may desire their advice. At least one-half of the Advisers must have held office for at least ten years under the Crown in India, and have not ceased to perform in India official duties under the Crown more than two years before the date of their respective appointments as Advisers. On the establishment of the Federation the body of Advisers will consist of not less than three nor more than six in number.

*Central Indian Government.*—During the transitional period, i.e. until the establishment of Federation, the constitution of the Central Government will be as prescribed in Part XIII of the Government of India Act, 1935, read with the Ninth Schedule thereto. Under these provisions, the executive authority in respect of subjects enumerated in Schedule VII to the Act will be exercised by the Governor-General in Council on behalf of His Majesty. The Governor-General is appointed by the Crown, and usually holds office for five years. The Governor-General is assisted by a Council, each member of which is responsible for a special department of the administration and is appointed by the Crown. No limit of time is specified for their tenure of office, but custom has fixed it for five years.

110

## THE BRITISH COMMONWEALTH OF INDIA

The capital of India and the seat of government were moved from Calcutta to Delhi in 1912, the latter being formed into a separate territory under a Chief Commissioner. The creation of the new capital at New Delhi was completed in December, 1920, by the entry of the Viceroy into his new residence 'The Viceroy's House', planned by Sir Edwin Lutyens, R.A. The formal opening took place in February, 1931. The summer seat of the Government is at Simla (April to October).

**Relation of the Crown with Indian States.**—As from April 1, 1937, the Governor-General in Council ceased to perform any functions of the Crown in its relations with Indian States. All such functions are now vested in His Majesty's Representative for the exercise of the functions of the Crown in its relations with Indian States (short designation, the Crown Representative), who is appointed by His Majesty. The office of Crown Representative is held by the same person who holds the office of Governor-General.

**Viceroy and Governor-General of India.**—His Excellency Field-Marshal Viscount Wavell, P.C., G.C.B., G.M.S.I., G.M.I.E., C.M.G., M.C. (October 20, 1943). Salary, Rs. 2,50,800 per annum.

The following is a list of the past Governors-General of India, with the year of their assumption of office:—

|                                     |      |                                       |      |
|-------------------------------------|------|---------------------------------------|------|
| Warren Hastings                     | 1774 | Sir John (Lord) Lawrence              | 1864 |
| Sir John Macpherson                 | 1785 | Earl of Mayo                          | 1869 |
| Earl (Marquis) Cornwallis           | 1786 | Lord (Earl of) Northbrook             | 1872 |
| Sir John Shore (Lord Teignmouth)    | 1798 | Lord (Earl) Lytton                    | 1876 |
| Marquis Wellesley                   | 1798 | Marquis of Ripon                      | 1880 |
| Marquis Cornwallis                  | 1805 | Earl (Marquis) of Dufferin            | 1884 |
| Sir Geo. H. Barlow                  | 1805 | Marquis of Lansdowne                  | 1888 |
| Earl of Minto                       | 1807 | Earl of Elgin                         | 1894 |
| Earl of Minto (Marquis of Hastings) | 1818 | Lord (Marquis) Curzon of Kedleston    | 1899 |
| Earl Amberst                        | 1823 | Earl of Minto                         | 1906 |
| Lord W. C. Bentinck                 | 1828 | Lord (Viscount) Hardinge of Penshurst | 1910 |
| Sir G. T. (Baron) Metcalfe          | 1835 | Lord (Viscount) Chelmsford            | 1916 |
| Lord Auckland                       | 1836 | Earl (Marquis) of Reading             | 1921 |
| Lord Ellenborough                   | 1842 | Lord (Baron) Irwin                    | 1920 |
| Sir H. (Lord) Hardinge              | 1844 | Earl (Marquis) of Willingdon          | 1931 |
| Earl (Marquis) of Dalhousie         | 1848 | Marquess of Linlithgow                | 1936 |
| Lord Canning                        | 1856 |                                       |      |
| Earl of Elgin                       | 1862 |                                       |      |

Until 1834 these were Governors-General of Fort William in Bengal, not of India.

There is an Indian Legislature consisting of the Governor-General and two Chambers, the Council of State and the Legislative Assembly (opened 1921). The Council of State consists of 58 members, of whom 32 are elected and 26 nominated, including officials. The Legislative Assembly contains 141 members, 39 nominated, of whom 26 are officials, and 102 elected. The life of the Council of State is five years, and of the Assembly three years, but dissolution may occur sooner, or the period may be specially extended by the Governor-General. Joint sittings of the two Chambers may be held for the settlement of differences between them. The Legislative Assembly was presided over for the first four years by a President appointed by the Governor-General; thereafter he is to be elected. This Legislature has power, subject to certain restrictions, to make laws for all persons within British India, for all British subjects within other parts of India, and for all Indian subjects of the King in any part of the world. The Governor-General with the assent of His Majesty signified, after copies of the proposed enactments have been laid before both Houses of the British Parliament, may enact measures essential for the safety, tranquillity, or interests of British India or any part thereof, against the wish of the Council or Assembly.

The Members of the Governor-General's Executive Council are appointed by the Crown: three must have had ten years' service in India, and one must be a barrister or pleader of not less than ten years' standing. As a result of the increased pressure of work in connection with the war it was decided to enlarge the Executive Council and the following is the present composition of the Council and the portfolios held by the Members:—

**War.**—General Sir Claude J. E. Auchinleck, G.C.I.E., C.B., C.S.I., D.S.O., O.B.E., A.D.C. (June 20, 1943).

**Home.**—Sir Robert Francis Mudie, K.C.I.E., C.S.I., O.B.E., I.C.S. (April 4, 1944).

**Finance.**—Sir Archibald Rowlands, K.C.B., M.R.E. (May 5, 1945).

**Education, Health and Lands.**—Sardar Sir Jogendra Singh (July 9, 1942).

**Law.**—Sir Asoka Kumar Roy (May 1, 1943).

**Commerce, Industries and Civil Supplies.**—Khan Bahadur Sir Muhammad Azizul Haque, C.I.E. (May 1, 1943).

**Posts and Air.**—Khan Bahadur Sir Mohammad Usman, K.C.I.E. (July 9, 1942).

**Supply.**—Diwan Bahadur Sir Ramaswami Mudaliar, K.C.S.I. (May 1, 1943).

**Information and Broadcasting.**—Sir Sultan Ahmed, K.C.S.I. (May 1, 1943).

**Food.**—Sir Jwala Prasad Srivastava, K.B.E. (July 9, 1942).

**Commonwealth Relations.**—Doctor N. B. Khare (May 1, 1943).

**Labour.**—Doctor B. R. Ambedkar (July 9, 1942).

**War Transport and Railways.**—Sir Edward C. Benthall (July 9, 1942).

**Planning and Development.**—Sir Ardesahir Dalal (August 1, 1944).

**Defence.**—Malik Sir Firoz Khan Noon, K.C.S.I., K.C.I.E. (August 9, 1941).

The salary of each member is Rs. 66,000 per annum, with the exception of the War Member, who is also the Commander-in-Chief, and receives Rs. 1,00,000 per annum.

At the same time it was announced that approval had also been given to the establishment of a National Defence Council, consisting of about thirty members, which include representatives of the Indian States as well as of the Provinces and of other elements in the national life of British India in its relation to the war effort.

The External Affairs Department is directly under the Governor-General and the Political Department is under the Crown Representative. At the head of each Department (except the Railway Department, which is under the Chief Commissioner of Railways) is one of the Secretaries of the Government of India.

British India is now divided into seventeen administrations. Madras, Bombay, Bengal, the United Provinces, the Punjab, Bihar, the Central Provinces and Berar, Assam, the North-West Frontier Province, Orissa, and Sind are each under a Governor; and British Baluchistan, Delhi, Ajmer-Merwara, Coorg, the Andaman and Nicobar Islands, and Panth Piploda are each under a Chief Commissioner.

**High Commissioner for India in the United Kingdom.**—Sir Samuel Runganadhan (appointed May 1, 1943), India House, Aldwych, London.

**Agent-General for India in the United States.**—Sir Girja Shankar Bajpai, K.C.S.I., K.B.E., C.I.E., I.C.S. (appointed 1941).

*United States Representative in India.*—George R. Merrell (February 19, 1945).

*Agent-General for India in China.*—K. P. S. Menon, C.I.E. (September 17, 1943).

*Chinese Commissioner to India.*—S. H. Shen (April 9, 1942).

*Representative of Government of India in Ceylon.*—M. S. Aney (August 28, 1943).

*Alid Supreme Commander-in-Chief, South-East Asia Command.*—Admiral Lord Louis Mountbatten, G.C.V.O., D.S.O.

**Provincial Governments.**—According to Part III of the Government of India Act, 1935, which came into force on April 1, 1937, the executive authority of a Governor's Province is exercised on behalf of His Majesty by the Governor, and extends to matters with respect to which the Legislature of the Province has power to make laws. The Governor has a Council of Ministers to aid and advise him in the exercise of his functions, except in so far as he is by or under the Act required to exercise his functions or any of them in his discretion. The Ministers are chosen from members of the Provincial Legislature. The Governor has special responsibilities. In so far as the Governor of a Province is by the Act required to act in his discretion or to exercise his individual judgment, he is under the general control of, and must comply with such particular directions, if any, as may from time to time be given to him by the Governor-General in his discretion. For every Governor's Province there is a Provincial Legislature, consisting of His Majesty, represented by the Governor, and (a) in the Provinces of Madras, Bombay, Bengal, the United Provinces, Bihar and Assam, two Chambers; (b) in the Punjab, Central Provinces and Berar, North-West Frontier Province, Orissa and Sind, one Chamber. For the composition of the Chamber or Chambers of the Legislature of the Provinces, see pp. 139-163. The Legislative Assembly of every Province, unless sooner dissolved, continues for five years. An Act was, however, passed on October 2, 1941, to continue the life of the present Assemblies until twelve months after the end of the war period. The Legislative Councils are permanent bodies not subject to dissolution, but as near as may be one-third of the members are to retire in every third year in accordance with the provisions of the Act. Subject to the special provisions of the Act with respect to financial Bills, a Bill may originate in either Chamber of the Legislature of a Province which has a Legislative Council. The Governor may either assent to, or withhold his assent from a Bill which has been passed by the Legislative Assembly, or in the case of a Province having a Legislative Council has been passed by both Chambers, or reserve it for the consideration of the Governor-General. An annual statement of the estimated receipts and expenditure is laid before the Chamber or Chambers. The Governor has power to promulgate Ordinances during the recess of the Legislature if he is satisfied that circumstances exist which render it necessary for him to take immediate action, and to promulgate Ordinances at any time with respect to certain subjects, and in certain cases to enact Acts. He has power to issue Proclamations if he is satisfied that a situation has arisen in which the Government cannot be carried on in accordance with the provisions of the Act. In each of the three years beginning with 1940-41, half of the net proceeds of taxes on income other than agricultural income, levied and collected by the Central Government, less Rs. 45,00,000, will be distributed among the Provinces on a percentage division:—Madras 15, Bombay 20, Bengal 20, United Provinces 15, Punjab 8, Bihar 10, Central Provinces 5, Assam 2, North-West Frontier Province 1, Orissa 2, and Sind 2. The jute-

growing Provinces receive 62½ per cent. of the jute export duty. The United Provinces, Assam, the North-West Frontier Province, Orissa and Sind receive grants-in-aid from the Central Government.

The provinces are usually formed into divisions under Commissioners, and then divided into districts, which are the units of administration. At the head of each district is an executive officer (collector and magistrate, or deputy-commissioner), who has entire control of the district, subject to the control of his official superior. There are 230 of such districts in British India.

**Relations with Indian States.**—The control which the Crown exercises over the Indian States varies considerably in degree. Except in matters which affect India as a whole, such as Posts and Telegraphs, Customs and in nearly all cases Currency, it does not ordinarily interfere with the administration of the States. The Princes have no right to make war or peace, or to send ambassadors to each other or to external States; they maintain military forces within certain limits; the sanction of the Crown is required before Europeans of certain classes can be employed; and the Crown Representative exercises control in case of misgovernment. Some of the States, but not all, make fixed annual payments to His Majesty, which are placed at the disposal of the Central Government.

#### LOCAL SELF-GOVERNMENT.

There were at the end of 1939-40, 756 municipalities, with a population of 22 million. The total number of members of the municipal bodies was 12,687, of whom 12,321 were non-official. The municipal bodies have the care and lighting of the roads, water supply, drainage, sanitation, medical relief, vaccination, and education, particularly primary education; they impose taxes, enact bye-laws, make improvements, and spend money, with the sanction of the Provincial Government. Their aggregate income in 1939-40 was Rs. 13,71,43,374, exclusive of loans, sales of securities, and other extraordinary receipts amounting to Rs. 30,59,98,794. The aggregate expenditure was Rs. 19,15,85,500, excluding extraordinary debt expenditure of Rs. 25,12,60,774. By the Local Self-Government Acts of 1883-84, the elective principle was introduced, in a large or small measure, all over India; and has since been further extended by recent legislation. In all larger towns, and in many of the smaller towns, the majority of the members of committees are elected by the ratepayers; everywhere the majority of town committees consists of Indians, and in many committees all the members are Indians. In many municipalities women have the right to vote, and in a few they are eligible for election. For rural tracts there were 409 district and sub-district Boards or Councils, and 353 Union Panchayats in Madras, with 14,567 members in 1939-40, 12,551 being elected. These Boards are in charge of roads, district schools, markets, public health institutions, etc. Their aggregate income in 1939-40 was Rs. 16,70,86,205, and expenditure Rs. 16,93,28,693.

#### Area and Population.

##### I. PROGRESS OF THE POPULATION.

| Total . . . . .                       | 34                | 34                | 24                | 23                |

<sup>1</sup> Per 1,000 of estimated population, June 30, 1938.

<sup>2</sup> Per 1,000 of estimated population, June 30, 1939.

The registered deaths in 1939 numbered 6,165,234, of which cholera accounted for 111,324; plague, 27,830; small-pox, 55,662; fever, 3,618,017; dysentery and diarrhoea, 250,479; and respiratory diseases, 500,958 (approximately). The births registered during 1939 were 9,346,145 (4,865,309 males and 4,480,836 females).

Under the Indian Emigration Act, 1922 (VII of 1922), emigration is lawful to Ceylon, Malaya and Burma for the purpose of unskilled work and to all countries for the purpose of skilled work, subject to certain safeguards. 'Assisted' emigration to Malaya for unskilled work was, however,

#### Communities.

The table below gives the distribution of population by communities according to the 1941 census, while at the past censuses the distribution was by religions:—

|                                        | Hindus      | Muslims    | Christians | Sikhs     | Jains     | Parsees | Buddhists | Jews   | Tribes     | Others  |
|----------------------------------------|-------------|------------|------------|-----------|-----------|---------|-----------|--------|------------|---------|

## AREA AND POPULATION

The following table shows the figures of previous decades:—

| Census of | Population  | Variation per cent. since previous census | Census of | Population  | Variation per cent. since previous census |
|-----------|-------------|-------------------------------------------|-----------|-------------|-------------------------------------------|
| 1891      | 279,446,348 | + 12.2                                    | 1921      | 305,698,063 | + 0.9                                     |
| 1901      | 323,972,859 | + 1.6                                     | 1931      | 338,119,154 | + 10.6                                    |
| 1911      | 306,012,598 | + 6.7                                     | 1941      | 388,997,955 | + 15.0                                    |

The following table, in millions, applies to India, British territory and Indian States, in 1931 (the latest figures) —

|         | Unmarried | Married | Widowed | Total |
|---------|-----------|---------|---------|-------|
| Males   | 86.3      | 84.2    | 9.6     | 180.1 |
| Females | 59.6      | 83.6    | 26.2    | 169.4 |

## II. POPULATION ACCORDING TO LANGUAGE, &amp;c.

The following are the languages spoken in India in 1931 (the latest figures), with the numbers (in thousands) of people who speak them:—

| Language                              | No. of speakers ('000's omitted) 1931 | Language                         | No. of speakers ('000's omitted) 1931 | Language                 | No. of speakers ('000's omitted) 1931 |
|---------------------------------------|---------------------------------------|----------------------------------|---------------------------------------|--------------------------|---------------------------------------|
| Indian Languages                      | 849,883 <sup>1</sup>                  | (a) Tamil                        | 20,411                                | (c) Hindustani Languages | 121,254                               |
| 1. Mon-khmer & Malay Languages        | 733                                   | (b) Malayalam                    | 9,137                                 | (f) Pahari Languages     | 2,752                                 |
| 2. Munda Languages                    | 4,605                                 | (c) Kanarese                     | 11,206                                | (g) Oriya                | 11,194                                |

<sup>1</sup> Excludes 2,808,221 persons for whom details by language are not available, as the figures were not obtained by individual enumeration.

## III. OCCUPATIONS OF THE POPULATION.

Distribution of the total population of India according to the occupations by which they were supported in 1931 (no later figures):—

stopped in June, 1938. Recruitment of labour for Ceylon for unskilled work was also not permitted during the year.

## V. PRINCIPAL TOWNS.

The urban population of India (excluding Aden) in 1931 was as follows:—

| Towns with     | No.   | Population |
|----------------|-------|------------|
| Over 100,000   | 38    | 9,674,032  |
| 50,000—100,000 | 65    | 4,572,118  |
| 20,000—50,000  | 238   | 8,061,388  |
| 10,000—20,000  | 543   | 7,446,402  |
| 5,000—10,000   | 967   | 6,982,832  |
| Under 5,000    | 674   | 3,205,760  |
| Total          | 2,575 | 38,936,437 |

Population (1941) of cities (towns with a population of 100,000 and over) in India was as follows:—

|                       |           |                   |         |
|-----------------------|-----------|-------------------|---------|
| Calcutta <sup>1</sup> | 2,108,891 | Surat             | 171,448 |
| Bombay                | 1,489,883 | Meerut            | 169,290 |
| Madras                | 777,481   | Trichinopoly      | 159,566 |
| Hyderabad             | 789,159   | Bangalore         | 158,426 |
| Lahore                | 671,659   | Baroda            | 153,301 |
| Ahmedabad             | 591,257   | Mysore            | 150,540 |
| Delhi <sup>2</sup>    | 524,849   | Jamshedpur        | 148,711 |
| Cawnpore              | 487,324   | Ajmer             | 147,258 |
| Amritsar              | 391,010   | Multan            | 142,743 |
| Lucknow               | 387,177   | Moradabad         | 142,414 |
| Howrah                | 379,292   | Sialkot           | 138,848 |
| Karachi               | 359,492   | Jullundur         | 135,383 |
| Nagpur                | 301,957   | Kolar Gold Fields | 133,859 |
| Agra                  | 284,149   | Peshawar          | 130,367 |
| Benares               | 263,100   | Coimbatore        | 130,348 |
| Allahabad             | 260,680   | Salem             | 129,702 |
| Poona                 | 258,197   | Trivandrum        | 128,365 |
| Bangalore             | 248,384   | Hyderabad         | 127,521 |
| Madura                | 239,144   | Bikaner           | 127,226 |
| Dacca                 | 218,218   | Jodhpur           | 126,842 |
| Sholapur              | 212,620   | Calicut           | 126,352 |
| Srinagar              | 207,787   | Bhatpara          | 117,044 |
| Indore                | 208,695   | Aligarh           | 112,655 |
| Bareilly              | 192,688   | Ludhiana          | 111,639 |
| Lashkar               | 182,492   | Shahjahanpur      | 110,163 |
| Rawalpindi            | 181,169   | Saharanpur        | 108,263 |
| Jubbulpore            | 178,339   | Gaya              | 105,223 |
| Jaipur                | 175,810   | Jhansi            | 103,254 |
| Patna                 | 175,706   | Bhavnagar         | 102,851 |

<sup>1</sup> With Suburbs and Howrah.

<sup>2</sup> Delhi includes Shahdara, New Delhi and Cantonment.

Of the Christians the following are the chief sub-divisions (1921 census):—

| Denomination                 | Persons   | Denomination         | Persons |
|------------------------------|-----------|----------------------|---------|
| Roman Catholics <sup>1</sup> | 2,118,659 | Methodists           | 908,185 |
| Anglicans                    | 538,180   | Congregationalists   | 123,016 |
| Presbyterians                | 254,888   | Salvationists        | 68,923  |
| Baptists                     | 444,479   | Syrian (Romo-Syrian) | 664,989 |
| Lutheran                     | 240,816   | Syrian (others)      | 535,607 |

<sup>1</sup> 1931 census figure.

## Education.

The following statistics are those of the census of 1931:—

|         | Able to read and write | Unable to read and write | Total                    |
|---------|------------------------|--------------------------|--------------------------|
| Males   | 28,969,751             | 129,808,571              | 158,778,322              |
| Females | 4,169,105              | 188,354,143              | 142,523,248              |
|         | 28,188,856             | 268,162,714              | 296,351,570 <sup>1</sup> |

<sup>1</sup> Excluding that part of the population aged 0-5 years and 1,078,460 persons not enumerated by literacy.

The extent of literacy by sex and religion is thus shown:—

| Religion      | Numbers per thousand who are literate for all ages, 5 and over |       |         |         |       |         |         |       |         |
|---------------|----------------------------------------------------------------|-------|---------|---------|-------|---------|---------|-------|---------|
|               | 1931                                                           |       |         | 1921    |       |         | 1911    |       |         |
|               | Persons                                                        | Males | Females | Persons | Males | Females | Persons | Males | Females |
| All Religions | 95                                                             | 156   | 29      | 82      | 139   | 21      | 69      | 122   | 12      |
| Hindu         | 84                                                             | 144   | 21      | 75      | 130   | 16      | 64      | 116   | 9       |
| Sikh          | 91                                                             | 138   | 39      | 68      | 107   | 16      | 77      | 121   | 16      |
| Muslim        | 64                                                             | 107   | 15      | 58      | 93    | 9       | 44      | 80    | 5       |
| Christian     | 279                                                            | 352   | 208     | 235     | 355   | 210     | 253     | 380   | 189     |

In 1941 the percentage of literacy for All-India was 12·2 (as against 6·9 in 1931); for British India, 12·5 (7·1 in 1931), and for States and Agencies, 11·1 (6·6 in 1931).

The persons with a knowledge of English numbered 3·6 millions.

Educational institutions in India are of two classes:—(a) those in which the course of study conforms to the standards prescribed by the Department of Public Instruction or by the Universities or Boards of Secondary and Intermediate Education, and either undergo inspection by the Department, or regularly present pupils at the public examinations held by the Department, Universities or the Boards. These institutions are called 'Recognised,' but may be under public or private management. (b) Those that do not fulfil these conditions. These are called 'Unrecognised.' As regards recognised institutions, the system of education operates, in general, through (i) the Primary Schools, which aim at teaching, through the vernacular languages, reading, writing, and other elementary knowledge; (ii) the Secondary Schools, in which the instruction does not go beyond the matriculation or school-leaving certificate standard. The schools are divided into English or vernacular, and also into high and middle schools; (iii) the Intermediate Colleges; and (iv) the Colleges. The colleges are affiliated to nine federal universities—Calcutta (1857), Madras (1857), Bombay (1857), Punjab (1882), Patna (1917), Nagpur (1923), Andhra (1926), Agra (1927), and Utkal (1943). There are also five unitary teaching and residential universities—Allahabad (1887), Lucknow (1920), Dacca (1921), Delhi (1922), and Annamalai (1929); two denominational universities—the Hindu University at Benares (1916), and the Muslim University at Aligarh (1920); and three universities in Indian States—Mysore (1916), Hyderabad (Osmanis) (1918), and Travancore (1937). At all the universities, except that at Hyderabad, it is teaching is mostly in English; at the Osmania University, Hyderabad, it is in Urdu. In some provinces, secondary or secondary and intermediate education is controlled by Boards. The number of Boards operating in India, including Indian States, in 1941-42 was six.

There are in addition, various institutions of a special character, such

as technical schools teaching arts and industries, agriculture, engineering, etc.; law schools; medical schools and colleges; and training colleges and normal schools for the training of teachers, schools for adults, defectives, criminal and hill tribes, labourers and factory children; and reformatory schools for juvenile offenders. There are also special Anglo-Indian and 'European' schools, which are primarily intended for the children of the Anglo-Indian and domiciled European community in India. The military authorities maintain separate schools for the education of soldiers' children.

The following table gives the number of institutions and scholars in 1941-42 in British India, including Ajmer-Merwara, British Baluchistan, the Civil and Military Station of Bangalore, and the administered areas in Indian States:—

| Type of Institution        | Institutions |             | Scholars                  |                             |
|----------------------------|--------------|-------------|---------------------------|-----------------------------|
|                            | For Males    | For Females | In Institutions for Males | In Institutions for Females |
| <b>General Education:</b>  |              |             |                           |                             |
| Universities               | 15           | —           | 12,582                    | —                           |
| Arts and science colleges  | 291          | 47          | 114,572                   | 5,159                       |
| Secondary schools          | 18,867       | 1,880       | 2,434,767                 | 250,022                     |
| Primary schools            | 157,827      | 24,141      | 10,495,787                | 1,519,939                   |
| Total                      | 171,500      | 26,018      | 18,061,658                | 1,875,120                   |
| <b>Special Education:</b>  |              |             |                           |                             |
| Professional colleges      | 82           | 11          | 26,078                    | 913                         |
| Training schools           | 373          | 289         | 22,856                    | 9,265                       |
| Special schools            | 11,163       | 528         | 423,468                   | 22,874                      |
| Total                      | 11,618       | 778         | 477,397                   | 33,002                      |
| <b>Indigenous schools:</b> |              |             |                           |                             |
| Unrecognised institutions  | 14,270       | 3,869       | 450,558                   | 101,152                     |
|                            | 197,386      | 30,665      | 18,983,913                | 2,009,274                   |
| <b>Grand Total</b>         | 228,068      | 36,953      | 19,998,187                | 2,107,496                   |

Six Boards of Secondary or Intermediate Education in British India are not included in this table.

The scholars shown against 'Universities' represent the number of research students in the affiliating universities and the number of students under the direct control of teaching and unitary universities.

There were in 1941-42, in British India, 209,914 'recognised' institutions with 15,441,177 scholars, and 18,189 'unrecognised' with 552,010 scholars.

The following was the educational expenditure for recognised institutions in recent years from fees, provincial resources, local rates, municipal funds, endowments, etc.:—

| Year    | Rs.          | Year    | Rs.          |
|---------|--------------|---------|--------------|
| 1936-37 | 28,05,69,374 | 1939-40 | 29,07,69,866 |
| 1937-38 | 26,96,22,482 | 1940-41 | 29,83,71,866 |
| 1938-39 | 27,81,99,492 | 1941-42 | 30,85,79,543 |

A system of State scholarships exists by which it is possible for a boy to pass from the village school to the university. There are also State scholarships, awarded by Provincial Governments and the Government of India, to enable the holders to study in the United Kingdom for two or more years. During the year 1944-45 the Central Government sanctioned a number of scholarships for students of the scheduled castes to enable them to pursue scientific and technical studies.

At the end of 1942 the following newspapers and periodicals were in existence: in Bengal, 927; United Provinces, 543; Madras, 686; Punjab, 850; Bombay, 464; Delhi, 190<sup>1</sup>; Sind, 152; Bihar, 109; Assam, 86<sup>1</sup>; Central Provinces and Berar, 83; Orissa, 40; North-West Frontier Province, 42; Coorg, 3.

<sup>1</sup> Figures for 1941.

### Justice and Crime.

The Federal Court of India is the highest supreme Court in respect of constitutional matters. The Provinces of Madras, Bombay, Bengal, Agra, Bihar, the province of the Punjab, and the Central Provinces and Berar have each a high court, with 14, 11, 18, 11, 10, 11 and 6 judges, respectively, in 1942. There is appeal to the Privy Council in England. Oudh and Sind have a chief court. For Orissa the high court of Patna is the highest judicial authority. The North-West Frontier Province, Coorg, Ajmer-Merwara, and Baluchistan have judicial commissioners. For Assam the high court of Calcutta is the highest judicial authority. For Delhi the High Court of Lahore is the highest judicial authority. Below these courts are, for criminal cases, Courts of Session, and below these, Courts of Magistrates (first, second, and third class). The inferior civil courts are determined by special acts or regulations in each province. The most extensive system consists of the sessions judge acting as a 'District Judge'; subordinate judges; and below them 'Munsifs.' There are also numerous special courts to try small causes. Side by side with the civil courts there are revenue courts, presided over by officers charged with the duty of settling and collecting the land revenue. The number of civil suits instituted in 1939 was 1,866,532, and of persons under trial in criminal cases 8,118,983.

Nearly all the civil judges, and the great majority of the magistrates, in the courts of original jurisdiction are Indians; in Bengal, Madras, and Bombay the proportion of Indians in the appellate court is considerable.

The civil police in 1939 were 188,931 in strength, varying from 3.8 per 10,000 of the population in Bihar to 30.4 per 10,000 in the North-West Frontier Province.

### Finance.<sup>1</sup>

(Rs. 13½ = £1.)

Revenue and expenditure of the Central Government for 6 years:—

| Years ending March 31 | Revenue. | Expenditure. | Years ending March 31 | Revenue. | Expenditure. |
|-----------------------|----------|--------------|-----------------------|----------|--------------|
|                       | £1,000   | £1,000       |                       | £1,000   | £1,000       |
| 1941                  | 108,845  | 113,711      | 1944 <sup>2</sup>     | 231,885  | 301,209      |
| 1942                  | 180,273  | 189,795      | 1945 <sup>3</sup>     | 267,660  | 284,490      |
| 1943                  | 176,523  | 260,356      | 1946 <sup>3</sup>     | 266,060  | 358,220      |

<sup>1</sup> Definite sources of revenue are allocated to Provincial Governments. Hence the accounts and estimates of the Government of India embrace only the transactions of the Central Government. With the introduction of provincial autonomy from April 1 1937, the balances of the Provincial Governments have been separated from those of the Central Government. From April 1, 1936, Orissa and Sind have been constituted into Governor's provinces. From April 1, 1937, grants of varying magnitude are paid to certain Provincial Governments from the resources of the Central Government. A share of net receipts from taxes on income other than Central emoluments and surtax on companies is paid to Provincial Governments. A share of the net duty on jute export is also paid to the Provincial Governments in whose territory jute is produced.

<sup>2</sup> Revised estimates.

<sup>3</sup> Estimates.

The following table shows the items of revenue and expenditure charged to revenue of the Central Government for 1944-45 (Budget estimates):—

| REVENUE                                        |                        | EXPENDITURE                                         |                     |
|------------------------------------------------|------------------------|-----------------------------------------------------|---------------------|
| Heads of Revenue.                              | 1944-1945              | Heads of Expenditure.                               | 1944-1945           |
| Customs                                        | Thous. Rs.<br>24,00.00 | Customs                                             | Thous. Rs.<br>95.53 |
| Central Excise Duties                          | 40,90.50               | Central Excise Duties                               | 2,01.40             |
| Corporation Tax                                | 81,61.00               | Corporation Tax                                     | 45.12               |
| Taxes on Income other than Corporation Tax     | 77,90.00               | Taxes on Income other than Corporation Tax          | 54.92               |
| Salt                                           | 9,25.00                | Salt                                                | 1,42.12             |
| Opium                                          | 80.00                  | Opium                                               | 1,84.84             |
| Land Revenue                                   | 24.76                  | Land Revenue                                        | 10.56               |
| Provincial Excise                              | 45.12                  | Provincial Excise                                   | 4.42                |
| Stamps                                         | 68.88                  | Stamps                                              | 42.05               |
| Forests                                        | 6.85                   | Forests                                             | 16.56               |

| Receipts under Motor Vehicles Taxation Act | 1,56.58                | Salt                                              | 12                    |
| Other Taxes and Duties                     | 12,78.09               |                                                   |                       |
| Customs                                    | 1,55.60                |                                                   |                       |
| Tax on Income other than Corporation Tax   | 19,20.54               |                                                   |                       |
| Total                                      | 158,15.09              | Total                                             | 157,35.59             |

The estimated capital expenditure of the Central Government on State railways in 1944-45 is Rs. 28,70,02,000. The project estimate for the new capital at Delhi was closed with effect from April 1, 1932, but was reopened in 1933. A provision of Rs. 8,27,000 has been made for this purpose in the estimates for 1944-45.

The following table shows the receipts of both the Central and Provincial Governments from the most important sources of revenue in recent years:—

| Year ended March 31 | Land <sup>1</sup> | Opium  | Salt <sup>2</sup> | Stamps | Excise <sup>3</sup> | Customs <sup>4</sup> | Taxes on Income | Railways (net receipts) | Irrigation |
|---------------------|-------------------|--------|-------------------|--------|---------------------|----------------------|-----------------|-------------------------|------------|
| 1936-37             | £1,000            | £1,000 | £1,000            | £1,000 | £1,000              | £1,000               | £1,000          | £1,000                  | £1,000     |
| 1937-38             | 30,096            | 857    | 6,417             | 8,482  | 10,743              | 38,585               | 11,529          | 28,638                  | 7,176      |
| 1938-39             | 19,444            | 381    | 6,298             | 8,294  | 10,960              | 40,067               | 11,878          | 24,507                  | 7,001      |
| 1939-40             | 19,619            | 342    | 6,090             | 7,646  | 10,363              | 38,764               | 12,961          | 25,484                  | 6,891      |
| 1940-41             | 20,190            | 366    | 6,750             | 7,625  | 9,017               | 39,266               | 13,488          | 24,889                  | 8,009      |
| 1940-41*            | 20,806            | 358    | 6,150             | 7,709  | 8,720               | 34,875               | 17,109          | 28,863                  | 7,658      |

<sup>1</sup> Exclusive of Portion of Land Revenue due to irrigation.

<sup>2</sup> The salt duty was raised in 1933, and reduced to previous level in 1934. A temporary surcharge of 25 per cent. was imposed in 1931. An additional duty was also levied in 1931 on imported foreign salt. About 1/3 of this additional duty is paid to Provincial Governments. This additional duty lapsed on April 30, 1938.

<sup>3</sup> The Excise revenue is derived from intoxicating liquors, hemp drugs, and opium consumed in the country. The bulk of the revenue comes from indigenous spirits. The excise systems and rates of duty vary from province to province.

<sup>4</sup> Liquors, oils, motor cars and cycles, machinery, sugar, tobacco, cotton and silk yarns, fabrics and manufactures, metals (including silver bullion, coin, etc.), manufactured articles and articles of food and drink are the chief items from which the customs revenue is derived. Under this head are also included the proceeds of export duties on rice and on jute (imposed in 1916); and of excise duties on motor spirit (imposed in 1917), on silver (imposed in March, 1939), on kerosene (imposed in 1923), on steel ingots (imposed in 1934), on sugar and matches (imposed in March, 1934), and on tyres (April, 1941). The import of silver bullion and coin except under licence has been prohibited since October, 1939. The various import, export and excise duties levied by Government will be found in the Indian Tariff Act, 1934, and the Indian Finance Acts.

\* Revised estimates.

<sup>5</sup> Budget Estimates.

**Land Revenue.**—This is levied according to an assessment on estates or holdings. In the greater part of Bengal, Bihar, Orissa, and in some districts of Madras, and the United Provinces of Agra and Oudh, the assessment was fixed permanently at the end of the 18th century; while it is fixed periodically at intervals of from twelve to forty years over the rest of India. For details as to the nature of the different tenures of land that prevail in India see THE STATESMAN'S YEAR-BOOK for 1886, p. 799. See also under AGRICULTURE.

The land revenue was contributed in 1942-43 as follows:—

| Administrations  | Thous. Rs. | Administrations             | Thous. Rs. |
|------------------|------------|-----------------------------|------------|
| India, General   | 20.42      | Central Provinces and Berar | 2,51.05    |
| Madras           | 5,19.70    | Assam                       | 1,58.89    |
| Bombay           | 4,06.68    | N.W. Frontier Province      | 23.05      |
| Bengal           | 3,61.29    | Orissa                      | 51.65      |
| United Provinces | 6,51.29    | Sind                        | 48.59      |
| Punjab           | 8,21.46    | Coorg                       | 4.12       |
| Bihar            | 1,87.40    |                             |            |

**Opium.**—In British territory the cultivation of the poppy for the production of opium is confined to the United Provinces, and the area under poppy cultivation in that Province has been drastically reduced, and in 1940-41 (year ending September 30, 1941) was 8,657 bighas, against 8,651 bighas in 1939-40. Owing to war requirements, the sanctioned poppy

area in the United Provinces has been increased from 8,700 bighas in 1940-41 to 27,000 bighas in 1941-42, to 43,500 bighas in 1942-43 and to 65,000 bighas in 1943-44. It is proposed to increase this area for the 1944-45 season to a still higher figure. Opium is also grown in many of the Indian States of Central and Northern India. The question of suppressing poppy cultivation in these States has been investigated by a Committee, which started work in November, 1927. After giving careful consideration to the report submitted by the Committee, the Government of India entered into fresh contracts with the States for the supply of crude opium to Government on a quota system, with an assurance that these quotas would not be reduced except *part passu* with the diminution of production in British India. These agreements remained in force for a period of four years ending on June 30, 1936, during which period the States submitted to effective restriction or prohibition of cultivation otherwise than for the Government of India. These agreements have been renewed for the 1943-44 seasons with successive increases in the quota in view of Allied war requirements. In order to secure greater control over production of opium in Indian States, the Government of India have made certain amendments in the terms of agreements between the Government of India and the producing States; it has been stipulated that the States (with 2 or 3 exceptions) will permit no poppy cultivation except for supply to the Government and that they will purchase from the Government stock the hard opium required for internal consumption. The question of introducing an effective control over poppy cultivation in the Simla Hill States and of the suppression of illicit export of opium from these States was carefully considered by the Government, but as it was not found possible to suppress cultivation, certain neighbouring British-Indian provinces and Indian States have agreed to take steps to improve the effectiveness of their preventive establishment. Public auctions at Calcutta were discontinued from April, 1926. Export to China was prohibited in 1913; and, as announced by the Government of India in June, 1926, exports of opium from India, except for strictly medical and scientific purposes, have ceased with effect from the beginning of 1936, barring, however, small exports to the French and Portuguese Settlements in India and to Nepal, Zauzibar and Pemba, which are made in accordance with long standing practice and are subject, of course, to arrangements which confine the amounts of such exports to the quantities approved by the Governments of those territories. Export of opium is also allowed to Aden and Burma at cost price for purposes other than medical and scientific, for the reason that the policy announced in 1926 did not contemplate the cessation of supplies to any territories which were part of India at the time it was announced. In order to meet the demands arising as the result of the war, export of opium for medicinal and scientific purposes is also being allowed to Eastern Group countries, the United Kingdom, U.S.A. and Australia.

**Defence Expenditure.**—The net expenditure in recent years on defence services is given as follows:—

| Year ended March 31 | Rs. Crores | Year ended March 31 | Rs. Crores |
|---------------------|------------|---------------------|------------|
| 1938                | 47.35      | 1942                | 103.93     |
| 1939                | 46.18      | 1943                | 214.62     |
| 1940                | 49.64      | 1944 <sup>1</sup>   | 262.64     |
| 1941                | 78.61      | 1945 <sup>1</sup>   | 276.61     |

<sup>1</sup> Estimates.

**Debt.**—On March 31, 1945, the estimated interest-bearing obligations of the Government of India are estimated to amount to Rs. 18.85 crores.

**Finance of Separate Governments, and Local Finance.**—The revenue and expenditure of each Government, Central and Provincial, in 1942-43 (omitting 000) were as follows:—

| Government             | Revenue    | Expenditure |
|------------------------|------------|-------------|
|                        | Thous. Rs. | Thous. Rs.  |
| India, General         | 2,35,36,40 | 3,47,14,11  |
| Madras                 | 21,92,19   | 20,66,68    |
| Bombay                 | 19,70,32   | 17,78,78    |
| Bengal                 | 16,46,42   | 16,79,18    |
| United Provinces       | 20,45,61   | 20,44,01    |
| Punjab                 | 18,45,70   | 15,18,16    |
| Bihar                  | 7,51,50    | 6,62,78     |
| Central Provinces      | 6,08,78    | 6,47,11     |
| Assam                  | 8,86,76    | 8,54,70     |
| N.W. Frontier Province | 2,35,04    | 2,38,25     |
| Orissa                 | 2,24,45    | 2,17,35     |
| Sind                   | 6,64,99    | 6,51,57     |
| Coorg                  | 15,66      | 12,89       |

**Local Funds.**—The above excludes the revenue and expenditure of municipalities and of district and local boards. The income of the former is derived mainly from rates, octroi, taxes on houses, lands, vehicles and animals, tolls, and assessed taxes; and of the latter from cesses on land. The gross income for 1937-38 of all municipalities was Rs.38,86,00,337. The gross expenditure was Rs.38,68,86,239. The income of district and local boards was Rs.16,24,75,258, and the expenditure Rs.16,13,42,497.

### Defence.

The peace-time defence forces in India have for a long time been divided into three sections, based on their functions—the frontier covering forces (which include very few British troops), the Field Army (of four divisions), and the troops required to maintain internal security.

The Indian State Forces are raised and maintained by Indian States, and are trained under the supervision of British officers, who act in an advisory capacity. The war has brought about an enormous expansion in their forces; and there are now more than 100,000 officers and men serving in Indian States Forces, of which 30,000 are serving outside their States in theatres of war and British India. Training schools and centres have also been established in British India and in States to cater for the training of officers and men of all arms serving ex-State. States maintain these forces at their own expense. Financial assistance is being given, when required, to defray the difference between Indian Army and State rates of pay for units serving ex-State, and for the maintenance of training centres raised during the war.

In 1937, the forces in India comprised 57,000 officers and men of the British Regular Army, 169,000 of the Indian Army, 19,000 of the Indian frontier forces, 23,000 of the Auxiliary Force (British), and 18,000 of the Indian Territorial Force. As a result of the reorganization then initiated, the British Regular troops were reduced to 47,000 in 1939. The aim of this reorganization was not only to release part of the British troops for employment elsewhere but to convert part of the forces in India into a strategic reserve for the Middle and Far East. It was sought, also, to

develop the potentialities of India as a source of war supplies for those regions.

Soon after the outbreak of war, the British Government provided £24,000,000 (a quarter of it as a loan) to meet the capital costs of modernising the forces in India as recommended by the Chatfield Committee. In the summer of 1940 the Indian Government introduced a scheme for expanding the Indian Army by new formations which would increase its scale by 75,000 men, enlarging the Territorial Force, and for quadrupling the Air Force. At the same time steps were hastened towards developing India's own manufacture of arms and equipment. In the summer of 1941 a Central Provision Office was established in India, in conjunction with a Supply Council, to meet the needs of all the Imperial Forces situated in any of the countries of the Middle East and Far East. All units of the Indian Army have been thrown open to Indian commissioned officers, and to accelerate the output the cadets' course at Dehra Dun was shortened from 2½ years to 9 months, while new training schools for Indian army officers were opened at Mhow, Bangalore and Belgaum.

By the beginning of 1942, the strength of the Indian Army had increased to nearly 1,000,000. This expansion was achieved partly by converting units of the Indian Territorial Force into regulars, but mainly by an increase in recruiting, which early in 1942 was bringing in an average of 60,000 men a month. A number of additional units were created, including parachute units. The three main Commands into which the forces in India had been divided were reorganized on an operational basis as the Eastern, Southern and North-Western Armies. Later, Central Command came into being largely on an operational basis.

The Indian Military Academy, Dehra Dun, was opened in October, 1932, to train Indians to become Indian commissioned officers in His Majesty's Indian land forces.

During 1943-44 the strength of India's armed forces rose to nearly 2,000,000 men, all of them volunteers, and to date almost half a million have been on service overseas. Indian formations have been engaged in the fighting in Italy, as well as in the Burma campaign. A significant aspect of the expansion is that there are now 9,000 Indian officers holding the King's commission, compared with only 400 in 1939.

While the growth of India's war industry has been outstripped by the Army's vast expansion of numbers, she has become almost self-supporting in many of the lighter forms of equipment, and the repair facilities for aircraft, tanks and motor transport have been much increased. In November, 1943, the direction of operations against the Japanese was separated from the sphere of the Commander-in-Chief in India and placed under a newly created South-East Asia Command.

The Air Force consists of two branches—the R.A.F. units in India and the Royal Indian Air Force. The R.I.A.F. has been expanded from two to nine squadrons. Flying training schools have been established at Ambala, Jodhpur and Begumpet, and technical training for ground personnel is carried out at several centres.

The Indian Air Training Corps Scheme has been put into operation at 10 universities. This scheme gives undergraduates a 3 months' course in elementary Air Force training, and at its conclusion suitable candidates are selected for General Duties commissions in the R.I.A.F.

The Royal Indian Navy, India's senior fighting service, traces its history in an unbroken line from the formation in 1612 of the Hon. East India Company's Marine. Better known in the early years of this century as the

Royal Indian Marine, the service was reorganized in the late 1920's on a combatant basis. In 1928 it hoisted the White Ensign for the first time, and in 1934, after the passage of the Indian Naval Discipline Act, was re-designated the Royal Indian Navy.

During the present war, the strength of the Royal Indian Navy has increased many-fold. Starting from a strength in September, 1939, of about 150 officers and 1,200 ratings, the R.I.N. has grown in 5 years to a strength of 2,600 officers and 24,000 ratings (May, 1944). Recruits are drawn from almost all communities in India, and the R.I.N. is unique in the fact that it is the only service where men from all over India live and eat together, irrespective of race, caste or creed. The R.I.N. now has also its own Naval Wing of the Women's Auxiliary Corps (India), numbering (in May, 1944) 72 officers and 362 auxiliaries.

Ships of the R.I.N. have in the present war served in nearly every part of the world, from the North Atlantic to the Java Seas. Sea-going units of the R.I.N. include six modern sloops (*Jumna, Sulej, Narbada, Godavari, Kistna and Cauvery*), four old sloops and a number of Bathurst and Bangor fleet minesweepers and Basset trawlers. There are also a number of auxiliary vessels. The R.I.N.'s coastal forces include several flotillas of motor-launches, which have been active throughout 1943 on the Burma coast.

The largest development of all has taken place in training establishments. The R.I.N. to-day possesses in H.M.I.S. *Himalaya* (Gunners School, Karachi), H.M.I.S. *Machimar* (Anti-Submarine School, Versova), H.M.I.S. *Valsura* (Torpedo School, Jamnagar), H.M.I.S. *Shivaji* (Mechanical Training Establishment, Lonavla), H.M.I.S. *Akbar* (Seamen's Training Establishment, Kolahet), H.M.I.S. *Bahadur* and H.M.I.S. *Dilawar* (Boys' Training Establishments, Karachi) a number of modern training schools, equipped with the most up-to-date apparatus. H.M.I.S. *Feroze*, the R.I.N.'s first Officers' Training School, was opened in Bombay in 1943.

Since 1939 the R.I.N. Dockyard, Bombay, has been greatly expanded. The labour force employed has risen from 1,800 to over 10,000. New modern machinery has been installed, and much excellent work in repair and arming merchant ships and fitting out specialized types of craft.

### Agriculture and Industry.

*Agriculture, Land Tenure, &c.*—The chief industry of India has always been agriculture. The total number of the population supported by agriculture, including forestry and raising of livestock, and excluding non-work-culture, including dependents, was, according to the census of 1931, about 110 millions out of a total population of 353 millions. In most of the provinces there is a Department of Land Records, and in every province a Department of Agriculture. There are staffs of experts in the provinces; an Imperial staff of experts with a fully equipped central station, Research Institute and College for post-graduate training of private students and of those who have completed the Agricultural Course in provincial colleges; a Civil Veterinary Department for the prevention and cure of cattle diseases; an Imperial Veterinary Research Institute for the preparation of sera and anti-toxins, and an Imperial Dairy Research Institute. Following the recommendations made by the Royal Commission on Agriculture, an Imperial Council of Agricultural Research has been established by the Government of India with

The following table, so far as returns can be obtained, shows, in acres, according to provinces, the net area, and the classification of areas of British India that were in 1941-42 cultivated and uncultivated, and the areas under forests and irrigation.

| Administrations              | Net Area according to Survey excluding Indian States | Cultivated             |                 | Uncultivated                                       |                               | Forests    | Area Irrigated |
|------------------------------|------------------------------------------------------|------------------------|-----------------|----------------------------------------------------|-------------------------------|------------|----------------|
|                              |                                                      | Net Area actually Sown | Current Fallows | Other Uncultivated Land, excluding Current Fallows | Not available for Cultivation |            |                |
|                              |                                                      |                        |                 |                                                    |                               |            |                |
| Ajmer-Merwara                | 1,561,330                                            | 380,113                | 249,208         | 256,270                                            | 628,758                       | 46,981     | 120,246        |
| Assam                        | 35,484,800                                           | 6,363,994              | 1,961,628       | 18,275,093                                         | 4,577,400                     | 4,306,685  | 718,250        |
| Bengal                       | 50,373,332                                           | 25,488,300             | 4,618,072       | 6,052,987                                          | 9,601,141                     | 4,612,832  | 1,894,567      |
| Bihar                        | 44,327,205                                           | 17,975,600             | 6,868,887       | 6,361,684                                          | 6,514,536                     | 6,606,998  | 5,310,489      |
| Bombay                       | 48,709,134                                           | 28,736,436             | 5,030,804       | 886,650                                            | 5,748,487                     | 8,306,757  | 1,167,809      |
| Central Provinces and Berar  | 63,087,360                                           | 24,816,532             | 3,543,745       | 18,995,311                                         | 4,882,284                     | 15,835,674 | 1,519,988      |
| Coorg                        | 1,012,264                                            | 153,923                | 161,747         | 16,025                                             | 389,474                       | 381,095    | 4,746          |
| Delhi                        | 388,717                                              | 204,802                | 19,062          | 63,091                                             | 81,762                        | —          | 81,824         |

the object of promoting, guiding and co-ordinating agriculture and veterinary research throughout India. The production and introduction into general cultivation of improved strains of crops still forms the most prominent feature of the work of agricultural departments, although progress in other directions is now substantial. The ascertained area under improved crops in British India in 1938-39 is placed at 23·8 million acres. The natural spread of improved varieties is impossible to estimate. In the case of sugar-cane, the area under improved varieties is now 3,468,959 acres, and the area under improved strains of cotton is now known to be 6,155,851 acres.

In provinces where the *zamindari* tenure prevails (i.e., where single proprietors or proprietary brotherhoods possess large estates of several hundreds or thousands of acres), the State land revenue is assessed at an aliquot part (considerably less than one half) of the ascertained or assumed rental, this aliquot part being itself the land tax. The revenue is payable on each estate as a whole, the assessment remaining unchanged for the period of settlement. In the greater part of Bengal, Bihar, and Orissa, and in parts of the United Provinces and Madras the settlement is a permanent one and not liable to revision. In provinces where the *raiyatwari* (or *ryotwari*) tenure prevails (i.e., where each petty proprietor holds directly from the State, and has no landlord between himself and the Government), the revenue is separately assessed on each holding, and land revenue becomes payable at once (or after a short term of grace in the case of uncleared lands) on all extensions of cultivation. The *raiyatwari* proprietor may throw up his holding, or any portion of it, at the beginning of any year after reasonable notice, whereas the *zamindar* or large proprietor engages to pay the revenue assessed upon him throughout the term of the settlement.

The following table shows in 1940-41 the returns of the land surveyed under the two types of tenure, and the land revenue assessed:—

| Province                            | Zamindari and Village Communities |                             |             | Raiyatwari, etc.     |                             |             |

(a) Included under Raiyatwari, etc. (b) Included under Zamindari.

(c) Not yet available.

\* Includes 12,441,066 acres of Government forest.

† Excluding 1,223,820 acres, for which details by tenures are not available.

The following table shows the total acreage in all India under the chief crops and the production in three years:—

| Name of crops             | 1939-40            |               | 1940-41            |               | 1941-42            |               |

<sup>1</sup> Yield of tea, coffee and rubber in lb.; of cotton and jute in bales of 400 lb.

Estimated wheat area, 1943-44, was 33,631,000 acres; yield, 9,851,000 tons.

Other crops in 1941-42: maize, 6,211,000 acres, 2,015,000 tons; barley, 6,522,000 acres, 1,991,000 tons; tobacco, 1,331,000 acres, 491,000 tons; indigo, 53,000 acres, 7,809 cwt. of dye.

**Livestock Census**, in British India (exclusive of United Provinces and Orissa), 1940: oxen, 87,674,765; buffaloes, 22,415,493; sheep, 25,183,062; goats, 30,212,044; horses and ponies, 1,000,965; mules, 40,270; donkeys, 1,157,459; camels, 428,563; pigs, 1,955,000; poultry, 61,128,000.

**Forests**.—The lands under the control of the Provincial Forest Departments are classified as 'Reserved Forests' (forests intended to be permanently maintained for the supply of timber, etc., or for the protection of water supply, etc.), 'Protected Forests,' and 'Unclassed' forest land. The following table shows the extent of these areas in 1941-42:—

| Province                           | Reserved Forests<br>Sq. miles | Protected Forests<br>Sq. miles | Unclassed<br>Sq. miles | Total<br>Sq. miles |

<sup>1</sup> 1940-41 figures.

Owing to the exigencies of war the above totals are not strictly accurate, as for the Punjab and Bihar the latest figures received are those of 1940-41. The net revenue for the State forests in 1941-42, excluding the above two areas, was Rs. 1,75,61,294. The net revenue of the Punjab and Bihar for 1941 was Rs. 18,08,479. All figures exclude Burma.

**Industries**.—The most important indigenous industry, after agriculture, is the weaving of cotton cloths. Other important indigenous industries are silk rearing and weaving, shawl and carpet weaving, wood-carving and metal-working. One of the most important industries connected with agriculture is the tea industry, the average number of persons employed daily being about 877,100. The area under tea in 1940 was about 737,579 acres, distributed as follows: Assam, 439,800; Bengal, 201,900; Bihar, 4,000; United Provinces, 6,600; Punjab, 9,500; Madras, 77,000; Coorg, 100; Tripura (Bengal), 10,500; Travancore, 77,700; Mysore, 4,400; the Cochin State, 1,700; and the Mandi State (Punjab), 300. The production was, in 1940, 452½ million lb. The exports of Indian tea by sea from India (including the State of Travancore) in 1941-42 were: to United Kingdom, 288,222,000 lb.; Canada, 30,544,000 lb.; United States, 23,581,000 lb.; Australia, 7,950,000 lb.; Ceylon, 5,579,000 lb., and to Egypt, 4,040,000 lb. The total exports were 335,011,000 lb. in 1937-38; 348,962,000 lb. in 1938-39; 359,547,000 lb. in 1939-40; 349,507,000 lb. in 1940-41, and 381,951,000 lb. in 1941-42.

Some statistics for 1940 of mills, factories, etc., subject to the Indian Factories Act, are given as follows for British India (excluding Indian States and Government factories):—

| Class of Industry                           | No. of Establishments | No. of Workers | Class of Industry                                     | No. of Establishments | No. of Workers |
|---------------------------------------------|-----------------------|----------------|-------------------------------------------------------|-----------------------|----------------|
| Cotton spinning and weaving mills . . .     | 819                   | 488,884        | Tea factories . . .                                   | 1,064                 | 67,374         |
| Jute mills . . .                            | 106                   | 308,777        | Foundries . . .                                       | 105                   | 6,840          |
| Cotton ginning and pressing factories . . . | 1,861                 | 128,987        | Iron and steel smelting and steel rolling mills . . . | 24                    | 47,617         |

| Tanneries and leather works . . .           | 64                    | 17,385         | Oil mills . . .                                       | 291                   | 16,650         |
| Jute presses . . .                          | 60                    | 11,781         | Kerosene tinning and packing works . . .              | 36                    | 5,732          |
| Tile and brick factories . . .              | 168                   | 18,196         | Motor works and coach building . . .                  | 117                   | 8,114          |
| Shipbuilding and engineering . . .          | 16                    | 30,516         | Tobacco factories . . .                               | 174                   | 22,540         |
|                                             |                       |                | Paper mills . . .                                     | 17                    | 13,082         |
|                                             |                       |                | Lac factories . . .                                   | 22                    | 2,835          |
|                                             |                       |                | Silk mills . . .                                      | 112                   | 5,557          |

With regard to cotton spinning and weaving, the number of spindles in all India in 1941-42 was 10,059,467, and of looms, 200,967. The production of yarn in 1941-42 was 1,577 million lb. and of woven goods, 1,098 million lb.

**Companies**.—On March 31, 1941, there were 11,617 joint stock companies incorporated in British India and in the Indian States of Mysore, Baroda, Gwalior, Indore, Hyderabad, Travancore and Cochin, and in operation, with paid-up capital (excluding that of the Indian States) of Rs. 2,86,17,26,681.

**Co-operative Societies**.—In 1940-41, there were in British India and the Indian States 123,976 agricultural co-operative societies with a membership of 4,446,452.

**Mineral Production.**—The quantity and value of the minerals produced in India (exclusive of Burma) in 1938 were as follows (£1 = Rs. 13.3) :—

| Items                      | Quantity | Value      | Items        | Quantity     | Value  |        |          |
|----------------------------|----------|------------|--------------|--------------|--------|--------|----------|
|                            |          | Rupees     |              |              | Rupees |        |          |
| Coal                       | tons     | 28,342,906 | 10,64,23,835 | Chromite     | tons   | 44,149 | 6,82,502 |
| Manganese ore <sup>1</sup> | do.      | 967,929    | 3,92,94,762  | Monazite     | do.    | 5,321  | 2,33,700 |
| Gold                       | ounces   | 321,188    | 3,04,75,397  | Magnetite    | do.    | 25,611 | 1,00,593 |
| Petroleum                  | gals.    | 87,082,371 | 1,65,48,142  | Diamonds     | carats | 1,729  | 68,813   |
| Salt                       | tons     | 1,539,668  | 95,18,848    | Zircon       | tons   | 1,450  | 40,787   |
| Iron ore                   | do.      | 2,748,675  | 45,56,974    | Silver       | ounces | 22,295 | 29,877   |

| Copper ore                 | tons     | 288,127    | 32,40,741    | Tungsten ore | do.    | 10     | 9,600    |
| Ilmenite                   | do.      | 262,230    | 15,46,486    | Sapphires    | carats | 4,892  | 150      |
| Saltpetre <sup>3</sup>     | cwts.    | 148,824    | 11,68,446    |              |        |        |          |

<sup>1</sup> Export f.o.b. value. For the year ending March 31, 1943, the figure was 1,90,62,000 rupees; for the year ending March 31, 1942, 2,46,32,000 rupees.

<sup>2</sup> Figures relate to dressed mica only and value figure is incomplete.

<sup>3</sup> Export figures.

The average number of persons employed daily in the coal mining industry in 1938 was 226,887, and the output per head employed was 125 tons.

### Commerce.

The following table applies to the sea-borne external trade of India :—

| Years   | Imports        |             | Exports and Re-Exports |              |
|---------|----------------|-------------|------------------------|--------------|
|         | Merchandise    | Treasure    | Merchandise            | Treasure     |
|         | Rupees         | Rupees      | Rupees                 | Rupees       |
| 1938-39 | 1,55,55,32,005 | 3,24,36,026 | 1,69,33,11,805         | 15,19,54,275 |
| 1939-40 | 1,68,95,60,040 | 6,64,41,915 | 2,15,95,10,828         | 40,79,57,074 |
| 1940-41 | 1,56,96,88,235 | —           | 2,00,42,90,208         | —            |
| 1941-42 | 1,78,14,89,114 | —           | 2,54,44,42,676         | —            |
| 1942-43 | 1,10,44,88,000 | —           | 1,87,00,11,000         | —            |

The distribution of commerce by countries was as follows (private merchandise alone) in years ending March 31, 1941 and 1942 :—

| Countries                                        | Imports into India from |              | Exports of Indian Produce to |              |
|--------------------------------------------------|-------------------------|--------------|------------------------------|--------------|
|                                                  | 1940-41                 | 1941-42      | 1940-41                      | 1941-42      |
|                                                  | Ra.                     | Ra.          | Ra.                          | Ra.          |

The trade between India and the United Kingdom (British Board of Trade returns) is as follows:—

|                                             | 1935       | 1936       | 1937       | 1938 <sup>1</sup> |
|---------------------------------------------|------------|------------|------------|-------------------|
| Imports (Consignments) into U.K. from India | 41,168,438 | 51,918,214 | 64,693,252 | 55,944,423        |
| Exports to India—                           |            |            |            |                   |
| British produce                             | 87,849,092 | 84,121,978 | 80,091,578 | 86,426,383        |
| Foreign and colonial                        | 628,143    | 486,285    | 580,580    | 557,721           |

<sup>1</sup> Provisional.

The total imports and exports including re-exports of the largest ports in private merchandise only in 1940-41 were, in rupees: Bombay, 107·7 crores; Calcutta, 145·4 crores; Karachi, 88·2 crores; Madras, 26·2 crores; Chittagong, 10·0 crores; Tuticorin, 5·5 crores.

### Shipping and Navigation.

The tonnage of vessels which entered with cargoes in the interportal trade was 13,764,794 tons in 1939-40 and cleared 13,517,582 tons.

The number and tonnage of vessels built or first registered at Indian ports for five years:—

|            | 1935-36 |         | 1936-37 |         | 1937-38 |         | 1938-39 |         | 1939-40 |         |
|------------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|
|            | No.     | Tonnage | No.     | Tonnage | No.     | Tonnage | No.     | Tonnage | No.     | Tonnage |
| Built      | 50      | 1,816   | 55      | 2,418   | 41      | 1,614   | 85      | 1,747   | 87      | 1,401   |
| Registered | 60      | 4,907   | 72      | 14,343  | 52      | 9,552   | 33      | 4,965   | 47      | 2,303   |

### Communications.

#### I. RAILWAYS.

|         | Miles open | Miles open | Miles open | Miles open |        |         |        |
|---------|------------|------------|------------|------------|--------|---------|--------|
| 1935-36 | 43,118     | 1937-38    | 41,076     | 1939-40    | 41,156 | 1941-42 | 40,477 |
| 1936-37 | 43,128     | 1938-39    | 41,184     | 1940-41    | 41,052 | 1942-43 | 40,525 |

The railways open on March 31, 1943, included 29,388 miles of Imperial State lines and 7,250 miles of Indian State lines. There were 150 miles of minor extensions made in 1942-43.

The gauges of the Indian railways in 1942-43 were: (1) the standard, or 5 ft. 6 in. (20,682 miles); (2) the metre, or 3 ft. 3½ in. (15,983 miles); and (3) the special gauges of 2 ft. 6 in. and 2 ft. (3,860 miles).

The total capital at charge on railways to end of 1942-43, including lines under construction and survey, etc., was Rs. 8,49,92,19,000. From 1924-25 railway finance has been separated from the general finances of the Government of India. The Delhi-Umballa-Kalka Railway was purchased by the State in April, 1926, the Southern Punjab Railway on January 1, 1930, the Amritsar-Patti Railway on January 1, 1936, and the Bezvada-Masulipatana Railway on February 4, 1938. With effect from April 1, 1937, the Jorhat Railway became the property of the Central Government under the Government of India Act, 1935. On January 1, 1943, the Government also took over the Bengal-North Western and the Robilkund-Kumaon Railways.

Passengers carried in 1942-43, 622,333,100; aggregate tonnage of goods and live stock, 26,253,000; gross earnings on railways, Rs. 1,67,87,56,000;

The following table shows for five years the number and tonnage of vessels engaged in the foreign trade which entered and cleared at ports in British India:—

| Nationality of Vessels    | 1935-36 |            | 1936-37 |            | 1937-38 |            | 1938-39 |            | 1939-40 |            |
|---------------------------|---------|------------|---------|------------|---------|------------|---------|------------|---------|------------|
|                           | No.     | Tons       | No.     | Tons       | No.     | Tons       | No.     | Tons       | No.     | Tons       |

| Total entered and cleared | 7,199   | 18,319,331 | 7,484   | 18,967,887 | 8,525   | 21,603,828 | 8,739   | 22,096,542 | 9,224   | 20,936,550 |

working expenses, Rs. 86,51,50,000 ; net earnings, Rs. 81,36,06,000 ; average return on the capital at charge 9.57 per cent. The net gain to the State, after meeting all charges for interest, etc., was Rs. 45.07 crores. The railway staff at the close of 1942-43 numbered 1,833 Europeans and 824,213 Indians ; total, 826,046.

India and Ceylon are connected by rail and steamer ferry combined, the steamers plying between Dhanushkodi Point on Rameswaram Island and Talaimannar in Ceylon.

As with effect from April 1, 1937, Burma separated from India, the figures for 1937-38 onwards do not include results in respect of the Burma Railways.

## II. POSTS, TELEGRAPHS AND TELEPHONES.

On March 31, 1943, there were 25,671 permanent post-offices and 55,218 letter-boxes.

In the year 1942-43, the number of letters, post-cards, and money-orders passing through the post-offices was 1,224,332,000, of newspapers 82,162,000, of parcels 13,655,000, and of packets 101,482,000, being a total of 1,421,631,000.

There were 9,715 telegraph offices open for paid traffic in India on March 31, 1943. The department at the end of the year was maintaining 105,321 miles of line, including cables, and 674,400 miles of wire, including conductors.

During the year 1942-43, all arrangements were complete for the acquisition of the Bombay, Calcutta and Madras telephone systems from April 1, 1943, and the Karachi and Ahmedabad systems from September 1, 1943, in accordance with the terms of the licences granted to the respective private telephone companies which had been maintaining them. On March 31, 1943, there were 29 exchanges and 1,842 sub-exchanges with 66,265 telephones (excluding 2,765 non-exchange telephones), established by the licensed companies, and 645 exchanges with 39,691 telephones (excluding 1,070 non-exchange telephones) established by the department.

## Money and Credit.

The value of money coined at the Calcutta, Bombay and Lahore Mints in five years was as follows :—

| Year ended<br>March 31 | Silver       | Nickel      | Bronze    | Total        |
|------------------------|--------------|-------------|-----------|--------------|
|                        | Ra.          | Ra.         | Ra.       | Ra.          |
| 1939                   | 37,65,207    | 36,85,299   | 17,95,741 | 92,46,247    |
| 1940                   | 126,82,172   | 90,89,290   | 30,12,709 | 247,84,171   |
| 1941                   | 13,34,43,792 | 2,40,92,104 | 37,08,021 | 16,12,43,917 |
| 1942                   | 28,14,29,042 | 1,58,21,463 | 22,35,300 | 29,94,85,805 |
| 1943                   | 28,32,18,582 | 4,82,89,157 | 5,68,100  | 33,20,75,839 |

A branch of the Royal Mint was established at Bombay at the end of 1917, but since April, 1919, the branch mint has been closed. A new mint was opened in Lahore in 1943.

The rupee is the standard monetary unit of British India. Its parity exchange value is 1s. 6d. sterling.

An Act to constitute a Reserve Bank to operate the currency and credit system of the country was passed on February 16, 1934. The bank started functioning on April 1, 1935, bringing India into line with other important

countries where the currency and credit system is controlled by Central Banks of Issue. It is a shareholders' bank with a majority of elected members on the directorate. The Government account is kept with it ; and its functions include the management of the note issue and of the Public Debt. In view of its altered position, an Act amending the original Imperial Bank of India Act was also passed during 1934, removing some of the limitations imposed on it, such as the prohibition of dealings in foreign exchange. An agreement has been concluded between the Reserve Bank and the Imperial Bank under which the latter will be the sole agent of the Reserve Bank in places in British India where there were branches of the Imperial Bank on March 6, 1934, and there is no branch of the Banking Department of the Reserve Bank. The net profits of the Reserve Bank of India for the year ended June 30, 1943, amounted to 76,981,000 rupees.

Since 1835, rupees have been coined as required to meet public demands. There has been no coinage from purchased silver since 1921-22. Reserve Bank notes and Government of India currency notes are legal tender at any place in British India. According to the published accounts of the Reserve Bank of India, the total value of notes in circulation on August 4, 1944, was Rs. 9,27,86,56,000, and that of notes held in the Banking Department Rs. 16,95,48,000.

The following table shows the 'Capital,' 'Reserve,' 'Public and other Deposits,' at the Imperial Bank of India on December 31 of three years :—

|                 | 1941           | 1942          | 1943          |
|-----------------|----------------|---------------|---------------|
|                 | Ra.            | Ra.           | Ra.           |
| Paid-up Capital | 5,62,50,000    | 5,62,50,000   | 5,62,50,000   |
| Reserve         | 5,62,50,000    | 5,70,00,000   | 5,75,00,000   |
| Deposits        | 1,06,91,90,000 | 168,17,04,000 | 212,78,47,000 |

At the end of 1941 there were 64 scheduled banks in India and Burma and 2,074 offices and branches of banks, of which 390 belonged to the Imperial Bank, 101 to the exchange banks, and 857 to the scheduled banks. The number of nonscheduled banks increased in 1940 from 673 to 715. The number of Post Office savings banks for five years :—

|         | Depositors | Balance at end of<br>Year, in Rupees |
|---------|------------|--------------------------------------|
| 1938-39 | 4,241,000  | 81,86,03,000                         |
| 1939-40 | 4,583,000  | 78,31,57,000                         |
| 1940-41 | 2,844,321  | 59,50,81,000                         |
| 1941-42 | 2,755,968  | 52,07,36,000                         |
| 1942-43 | 2,563,578  | 52,22,14,000                         |

## Currency, Weights and Measures.

The monetary unit is the Indian Rupee, the sterling equivalent of which is 1s. 6d.

The coins in circulation are: silver, 1 rupee, which equals 16 annas and weighs one tola or 180 grains troy ;  $\frac{1}{2}$  rupee or 8 anna piece ;  $\frac{1}{4}$  rupee or 4 anna piece ; nickel,  $\frac{1}{2}$ , 1, 2 and 4 anna pieces ; bronze, 1 pice =  $\frac{1}{4}$  anna ;  $\frac{1}{2}$  pice =  $\frac{1}{2}$  anna ; 1 pie =  $\frac{1}{4}$  anna or  $\frac{1}{8}$  pice. The fineness of the silver coin has, since February, 1940, been reduced from eleven twelfths to one half.

The paper currency consists of Reserve Bank notes in denominations of Rs. 2, 5, 10, 50, 100, 500, 1000 and 10,000. Government of India currency notes are also in circulation, but, with the exception of the Rs. 1 note, are being withdrawn.

A special issue of Government of India Rs. 1 notes was introduced in July, 1940, to supplement the circulation of silver rupees. They are, for all purposes, equivalent to silver rupees.

A hundred thousand rupees is called 1 lakh and is written thus: Rs. 1,00,000; and one hundred lakhs is called 1 crore and is written thus: Rs. 1,00,00,000. A lakh of rupees when the rupee is 1s. 6d. is equivalent to 7,500l.

According to the Standards of Weight Act, 1939, weights and measures are as follows:—

|                                |                                     |
|--------------------------------|-------------------------------------|
| The standard maund of 40 seers | = 82 lb. 4 oza. 9 dra. avoirdupois. |
| The standard tola              | = 180 gr. troy.                     |
| The standard seer of 80 tolas  | = 2·057 lb.                         |

The standard pound (7,000 standard grains), ounce, cwt. and ton are also standard weights side by side with the above.

### Statistical and other Books of Reference concerning India.

*Special works relating to Provinces and States are shown under their separate headings.*

**ASSAM.**

**Constitution and Government.**—Assam first became a British Protectorate at the close of the first Burmese War in 1826. In 1832 Cachar was annexed; in 1885 the Jaintia Hills were included in the East India Company's dominions, and in 1839 Upper Assam was annexed to Bengal. In 1877 Assam was detached from the Administration of the Lieut.-Governor of Bengal, and made a separate Chief Commissionership. On the partition of Bengal in 1905, it was united to the Eastern Districts of Bengal under a Lieut.-Governor. From 1912 the Chief Commissionership of Assam was revived; and from 1921 a Governorship was created. It was constituted an autonomous Province on April 1, 1937, with a Legislature of two Chambers (the Legislative Council and the Legislative Assembly). The Legislative Council consists of not more than 22 members, of whom not more than 4 are to be nominated by the Governor. The Legislative Assembly consists of 108 elected members. On December 25, 1941, the Governor took over administration of the Province by proclamation. This, however, was revoked on August 25, 1942, when ministerial government was resumed. There are 19 Local Boards, 18 Municipalities and 10 Town Committees. The areas comprising the North-East Frontier (Sadiya, Balipara and Lakhimpur) tracts, the Naga Hills, Lushai Hills and the North Cachar Hills sub-division of the Cachar district are excluded areas. The Garo Hills district, the Mikir Hills in the Nowgong and Sibsagar districts, and the British portion of the Khasi and Jaintia Hills district, other than the

Governor.—H.E. Sir Andrew Gourlay Clow, K.C.S.I., C.I.E., I.C.S.  
(appointed May 4, 1942; salary Rs. 66,000 per annum).

**Instruction.**—There were 14 arts colleges, including the Government Sanskrit College, Sylhet, and four colleges for women with an enrolment of 2,475 students on March 31, 1943. In the B.T. classes attached to the St. Edmunds' Arts College for men and the St. Mary's College for women, Shillong, there were 23 and 8 students respectively under training. The Karle Law College, at Gauhati, founded in 1914, has been placed on a permanent footing since July 1943. It had 40 students on its roll. The number of secondary schools for boys was 784 with 91,920 pupils, and that of primary schools for boys was 7,331 with 327,239 pupils on March 31, 1943. The number of girls at all kinds of institutions was 121,448. There were 19,786 pupils in 457 tea garden schools of 'A', 'B' and 'C' classes.

**Justice and Crime.**—The Province (Manipur State and the hill and frontier areas, other than the areas within the Municipality and Cantonment of Shillong in respect of criminal cases, excepted) is under the jurisdiction of the High Court of Calcutta. For criminal work there were, in 1942, 2 Sessions Judges and 121 other officers. In 1942, 27,248 criminal cases were brought to trial, and 24,607 civil suits were instituted. The Assam Rifles, with 5 battalions—formerly known as the Military Police—supply garrisons for the frontier. There is a Police Force of 4,658 under an Inspector-General.

**Finance.**—The gross revenue for 1942-43 was 387 lakhs of rupees, to which Land Revenue contributed 159 lakhs, Excise 21 lakhs, Forests 37 lakhs, and Stamps 14 lakhs. The total expenditure in 1942-43 was 355 lakhs. General Administration cost 37 lakhs, Education 44 lakhs, Police 44 lakhs, Land Revenue Administration 17 lakhs, Public Works 40 lakhs, and Forests 25 lakhs.

**Production and Industry.**—The cultivation and manufacture of tea is the principal industry in Assam. Agriculture employs nearly 89 per cent. of the population. Sericulture and hand-loom weaving, both silk and cotton, are the most important home industries. The coal and cement industries are also important. At the end of 1941 there were 1,128 tea gardens with 439,926 acres under tea. The area of tea plucked in 1941 was 401,808 acres; the total out-turn was 286,808,141 lb. of black and 1,884,167 lb. of green tea, and the daily average number of persons employed was 540,157. All-India statistics regarding the tea industry are given on p. 180. In 1940-41 there were 6,726 sq. miles of reserved forests. Assam contains important oil-fields. In 1940, 66,205,171 gallons of crude oil were extracted from the oil-fields of the province.

## BRITISH PROVINCES.

Information concerning the Provinces in British India is given below, in alphabetical order.

### AJMER-MERWARA.

An agency subordinate to the factory at Surat was established at Ajmer early in the 17th century. The British received the tract by cession from the Maharaja of Gwalior after the Pindari War in 1818. This small province of Ajmer-Merwara consists of one district with three sub-divisions, Ajmer, Kekri and Merwara, with an area of 2,400 sq. miles and a population of 583,693. The Province is administered by the Governor-General acting through a Chief Commissioner, who resides at Ajmer. The city of Ajmer has a population of 147,258. The income of the province was Rs. 23.49 lakhs in 1943-44, and the expenditure Rs. 29.33 lakhs. In 1943-44 there were 23,310 scholars in 277 recognised educational institutions for males; and 6,338 in 87 similar institutions for females. The Government College at Ajmer had 400 students in 1944-45 session.

*Chief Commissioner*.—H. R. Shirdasani, O.B.E., I.C.S. (the second Indian to hold this office) (salary, Rs. 25,800 per annum).

Administration Report. Annual. Delhi.

### ANDAMAN AND NICOBAR ISLANDS.

The Andaman Islands lie in the Bay of Bengal, 120 miles from Cape Negrais in Burma, the nearest point on the mainland. Five large islands closely grouped together are called the Great Andaman, and to the south is the island of Little Andaman. There are some 204 islets, the two principal groups being the Ritchie Archipelago and the Labyrinth Islands. The total area is 2,508 square miles. The Great Andaman group is about 219 miles long and, at the widest, 32 miles broad. The group, densely wooded, contains many valuable trees, the best known of which is the *padak* or Andaman red-mangrove. The islands possess a number of harbours and safe anchorages, notably Port Blair, Port Cornwallis, and Bonington. The aborigines, 62 (25 males and 37 females) in 1941, live in small groups over the islands; some are savages of a low Negrito type. The total population of the Andaman Islands (excluding the aborigines) on April 1, 1941, was 21,483 (15,049 males and 6,434 females). In 1939-40 the forest receipts amounted to Rs. 12,79,818. The coconut and rubber are successfully cultivated. On April 1, 1941, there were 9,907 head of cattle and 5,283 goats. There is wireless telegraphy with Burma and Madras. Mail steamer connects Port Blair with Calcutta, Rangoon, and Madras. The islands have been used since 1858 by the Government of India as a penal settlement for life and long-term convicts, but the practice is being discontinued, the islands being left to develop on free lines. The settlement possesses about 11,284 acres of cleared land. There were, on April 1, 1941, 6,165 convicts in the place, of whom 1,207 were on ticket-of-leave in the settlement supporting

**Communications.**—In 1942-43 there were 647·5 miles of metalled, 1448·5 of gravelled, 443·8 of earthen and 2210·7 miles of bridle roads. The open mileage of railways was 1,302 miles.

### BALUCHISTAN

**Government.**—After the Afghan War, 1878-81, the districts of Pishin, Shorard, Duki, Sibi, and Shahrig were assigned to the British and in November, 1887, were formally constituted as British Baluchistan. In 1883, the districts of Quetta and Bolan were made over by the Khan to the British on an annual quit-rent of Rs. 25,000 and Rs. 30,000 respectively. In 1886, the Bori valley, in which is now the cantonment of Loralai, was occupied. In 1887, the Khetran country, now known as the Barkhan tahsil, was brought under British control; in 1889 British authority was established in the Zhob valley and Kakar Khurasan; in 1896 Chagai and Western Sinjrani were included in administered territory; in 1899, the Nushki Niabat was made over by the Khan of Kalat on an annual quit-rent of Rs. 9,000; and in 1903 the Nasirabad tahsil was acquired from the Khan on an annual quit-rent of Rs. 117,500. The area of British and administered territory, including tribal areas, is 54,456 sq. miles, and the population (1941) 501,631. The chief town is Quetta, with a population (1941) of 64,478 (town proper 36,460, and cantonment 28,016). It is the only municipality. The head of the civil administration is the Agent to the Governor-General, Resident and Chief Commissioner in Baluchistan. The area under his direct administration is divided as follows: Quetta-Pishin, Sibi, Zhob, Loralai, Chagai districts and Bolan Sub-division. The revenue administration of the Province is entrusted to an officer who is styled the Revenue and Judicial Commissioner.

Regular troops are cantoned at Quetta, Chaman, Fort Sandeman, and Loralai, and detachments are stationed at different places, principally in the Zhob and Loralai Districts, for the preservation of law and order. There is also a police force, supplemented by levies. The Indian Staff College was opened in Quetta in 1907.

*Agent to the Governor-General, Resident and Chief Commissioner in Baluchistan.*—The Hon. Lt.-Col. W. R. Hay, C.S.I., C.I.E. (salary, Rs. 48,000 per annum).

**Area and Population.**—Area, 134,002 square miles; population (1941 census), 857,835. The main divisions are: (1) British Baluchistan proper, with an area of about 9,084 square miles, consisting of tracts assigned to the British Government by treaty in 1879; (2) Baluchistan leased areas and Baluchistan tribal areas, with an area of about 45,872 square miles, composed of tracts which have from time to time been acquired by lease, or otherwise brought under control, and placed directly under British officers; and (3) the States of Kalat, Las Bela and Kharan, with an area of about 79,546 sq. miles. Kalat State consisting of a confederation of tribes under the Khan of Kalat, and stretching westwards to Iran, while Las Bela occupies the alluvial valley between the Pab and Hala ranges from the sea to Bela, and

the Kharan State (formerly a part of the Kalat State) occupies the part of the hilly tract to the S.E. of the Chagai District, and touches the borders of Iran and Mekran.

**Religion and Education.**—The religion of the population is either Musalman, in general of the Sunni sect, or Hindu. The Mussalmans numbered (1941 census) 785,181; Hindus, 54,394; Christians, 6,056; Sikhs, 12,044; others, 160. On March 31, 1944, there were 97 public schools and 11 private schools, of which 6 and 5 respectively were girls' schools. There was also 1 European school for boys and girls. Of the 12,557 pupils 2,082 were girls.

**Justice.**—Almost all cases in which local men are concerned are referred to 'councils of elders' (locally called *jirga*) for settlement along the well-tried lines of the ancient customary and tribal law.

**Finance.**—In the directly administered territory the chief items of revenue are: land revenue, grazing tax, excise, stamps and forest. In some places the land revenue is levied in money in accordance with a fixed assessment, but generally it is levied in kind. The revenue from all sources in 1942-43 was Rs. 28 lakhs, and the expenditure Rs. 112·25 lakhs.

**Production and Industry.**—The country consists largely of barren mountains, deserts and stony plains; its climate is subject to the extremes of heat and cold, and the rainfall is uncertain and scanty. The agricultural products are wheat, barley, millet, lucerne, rice, maize, and potatoes; while grapes, apricots, peaches, apples, pears and melons are grown in abundance. Mekran is famous for its dates.

**Commerce and Communications.**—Registration of trade was discontinued from April, 1925. There are approximately 2,806 miles of motorable roads, of which 2,190 miles are continuously maintained and 616 miles are passable in fair weather only.

The North-Western railway, gauge 5 ft. 6 in., enters Baluchistan near Jhatpat and crosses the Kachhi plain to Sibi, where it bifurcates, one branch going via Harnai to Khost (83 miles), and the other via Quetta to Chaman (271 miles). In addition, a 5 ft. 6 in. gauge line, 440 miles long, runs from Spezand Junction, 16 miles south of Quetta, via Nushki, Dalbandin and Nok-Kundi to Zahidan in Iran. A narrow gauge line also runs from Bostan Junction, 21 miles north of Quetta on the Chaman line, to Fort Sandeman, a distance of 184 miles.

There is a complete and frequent postal service in British and administered territory, extending to Kalat and through Nok Kundi to Zahedan, Seistan and Meshed.

A network of telegraph wires covers the north-eastern portion of the Province and extends to Kalat, and westwards via Nushki to Nok-Kundi, while a land line, formerly part of the Indo-European system but now worked by the Indian Department of Posts and Telegraphs, connects Karachi with the Gulf Ports Las Bela-Panjgur-Gwadar. Wireless telegraph stations have been installed at Ormara and Panai.

## BENGAL.

**Constitution and Government.**—The British first came to the shores of Bengal in 1683, when the first factories were established. A new centre of trade was fixed by Job Charnock at Calcutta in 1690. In 1699 Bengal was constituted a separate Presidency, and there were Presidents and Governors of Fort William from 1700 to 1774, the last being Warren Hastings. There were Governors-General of Fort William from 1774 to 1834, who were given powers of superintendence and control over the Presidencies of Fort St. George (Madras) and Bombay. In 1834 the Bengal Presidency was divided into two, 'Agra' and 'Fort William in Bengal,' and the title of Governor was changed to that of Governor of the Presidency of Fort William in Bengal and Governor-General of India. In 1854 the Governor-General was relieved of his responsibilities as Governor of Bengal, a Lieutenant-Governor of Bengal being appointed. In 1874 the Bengal Province was reduced to Bengal proper, Bihar and Orissa. In 1905 a portion of Bengal proper together with Assam went to form a new Province, Eastern Bengal and Assam. In 1910 the Government of the remainder of Bengal with Bihar and Orissa was constituted into a Lieutenant-Governorship with an Executive Council consisting of three Members. A new Presidency of Bengal, reuniting all the Bengali-speaking districts, was established in 1912 under a Governor in Council (three Members). From 1921 till April 1, 1937, in accordance with the Government of India Act of 1919, the administration consisted of the Governor with four Executive Councillors (two being Indians) for the 'reserved' subjects and of the Governor with three Indian Ministers for the 'transferred' subjects. On that date it was constituted an autonomous Province, with a Legislature of two Chambers: viz. the Legislative Council and the Legislative Assembly. The Legislative Council consists of not less than 63 and not more than 65 members, 30 elected by constituencies, 27 elected by Members of the Legislative Assembly, and not less than 6 nor more than 8 chosen by the Governor. The Legislative Assembly consists of 250 elected Members. On March 30, 1945, the Governor himself took over the administration of the Province, under section 93 of the Government of India Act. The hot weather capital is Darjeeling. For administrative purposes there are five divisions, under which there are 27 districts, exclusive of Calcutta. For the purposes of Local Self-Government there are 26 District Boards, all except one (Darjeeling) with non-official Chairmen; 12 Local Boards (1943-44), and 5,140 (1941-42) smaller units called Union Boards. There are 119 Municipalities. The Calcutta Corporation was reconstituted by an Act of 1923 with a Mayor, Chief Executive Officer and other officials; there are 93 Councillors and 5 Aldermen.

**Governor.**—H.E. the Rt. Hon. Richard Gardiner Casey, C.H., D.S.O., M.C. (appointed January 22, 1944; salary, Rs.120,000 per annum).

**Area, Population and Religion.**—Bengal in its present form, as reconstituted in 1912, covers 82,876 square miles, of which 77,442 square miles are British territory. The population (1941) is 60·3 million in British territory and 1,153,852 in two Indian States. Calcutta with its suburbs accounts for 2,108,891; the urban population of the remainder of the Province is only 6·3 per cent. of the whole. Howrah has a population of 379,292, and Dacca of 213,218. Mohammedans constitute 54 per cent., and Hindus 42 per cent. Of the 167,026 Christians, 111,426 are Indian Christians and 31,620 Anglo-Indians. Bengali is the mother tongue of

92 per cent. of the total population, though altogether 78 different languages are found spoken in Bengal.

**Education.**—Recognised educational institutions in 1942-43 numbered 52,282, and unrecognised 1,722. The number of pupils in all classes of institutions was 3,845,382. The Calcutta University is both an affiliating and a teaching university, dating from 1857. Dacca University is a teaching university, founded in 1921. Art colleges for males number 61 with 28,314 students; of these 11 were maintained by Government. There were 3,582 secondary schools for Indian boys. The primary schools for boys numbered 36,075. Of the total number of pupils in primary stage 55·6 per cent. were Muhammadans and 43·6 per cent. Hindus. There were 138 institutions for the training of teachers. There were 388 students in engineering in 5 institutions. There were 8,544 institutions of all kinds for Indian girls. For children of Europeans and Anglo-Indians there were 65 institutions.

**Justice and Crime.**—The High Court, Calcutta, in 1942 consisted of a Chief Justice and 23 Judges. For Criminal and Civil justice there were, in 1939, 34 District and Sessions Judges (including Additional Judges). For criminal justice there were 412 stipendiary and 361 honorary Magistrates and for civil justice 49 Subordinate Judges and 205 Munsifs (Civil Judges of the first instance), 2 provincial Small Cause Court Judges exercising also the powers of a Subordinate Judge, and 6 Judges in the Court of Small Causes at Calcutta. There were 240,382 criminal cases brought to trial in 1942; and outside Calcutta, 609,257 civil suits were instituted. The strength of the Bengal Police was 31,032 under an Inspector-General. The Calcutta Police is a separate force under a Commissioner of Police who is directly under Government.

**Finance.**—The Revenue collected in 1943-44 was 2,381½ lakhs of rupees. To this sum Land Revenue furnished the largest contribution, nearly 409½ lakhs; next Excise, 408½ lakhs; stamps, 340½ lakhs, and then Customs (share of proceeds from Jute Export Duty), 116½ lakhs. Taxes on Income (share of of proceeds from Jute Export Duty), other taxes and duties, 289½ lakhs; registration fees, 61 lakhs, and the Bengal Forests, 55 lakhs. On the expenditure side Police cost 326½ lakhs; Education, 190½ lakhs; the total was 3,001 lakhs. Agriculture, 155½ lakhs; Medical Department, 62½ lakhs, and Jails, 126½ lakhs. The Administration of Justice cost 107½ lakhs. Forests gave a surplus of income over expenditure of 17½ lakhs.

**Production and Industry.**—At the close of 1943 there were 2,050 registered factories of all kinds. There were 95 jute mills with a daily average of 270,919 operatives. Cotton mills numbered 42 with 40,401 operatives. The coal mining industry in Bengal had, in 1941, 225 mines, employing 63,930 operatives, with an output of 7,936,803 tons.

**Commerce and Communications and Works.**—The foreign trade of Bengal in 1940-41 amounted to 52·61 crores of rupees of imports and 100·83 crores of exports (excluding treasure, re-exports, and government stores). Cotton goods accounted for 5·87 per cent. of the imports. Of the exports, jute manufactures and raw jute accounted for 52·49 per cent. The United Kingdom sent 27·05 per cent. of the imports, and received 36·52 per cent. of the exports of private merchandise.

In March, 1943, the length of metalled roads was 8,171 miles and of unmetalled roads 86,237 miles. Bengal possesses 2,269 miles of navigable canals. The length of railways within the province on March 31, 1941, was 3,463 miles.

**BIHAR.**

Bihar has a bicameral Legislature, the Upper House being known as the Bihar Legislative Council and the Lower House as the Bihar Legislative Assembly. The Legislative Council consists of 30 members, of whom 4 are nominated by the Governor in his discretion. Twelve members of the Legislative Council are elected by the members of the Legislative Assembly and the rest by direct election. The Legislative Assembly consists of 152 elected Members, including 4 women. Since the resignation of the Congress Ministry on November 3, 1939, the Governor has by proclamation under Section 93 of the Government of India Act, 1935, declared that all his functions under the Act shall be exercised by him, and he has assumed to himself all powers vested in the Provincial Legislature.

*Governor.*—H.E. Sir Thomas George *Rutherford*, K.C.S.I., K.C.I.E., I.C.S. (assumed office, May, 1944; salary, Rs. 100,000 per annum).

**Area, Population and Religion.**—The Province covers 69,745 square miles, with a population of 36,340,151. The four principal towns are Patna, the capital, Gaya, Bhagalpur and Jamshehpur. The hot weather seat of the Government is at Ranchi. Hindus form the great majority of the population.

**Education.**—At the census of 1941 the proportion of literates was only 9·1 per cent, as compared with 18·0 for the rest of India. The percentage of Indian boys attending school reached 6·8 in 1941-42. The percentage of Patna constituted in 1917 is an affiliating university. All university teaching is carried on in 16 arts and science colleges, one law college, one engineering college, one medical college and one training college. There is also a veterinary college not affiliated to the university. There are 60 technical institutions including those at Jamshedpur, Ranchi and Muzaffarpur, and a medical school at Darbhanga. A Board of Secondary Education was constituted in 1922. In 1941-42 there were 6,497 students in arts and science colleges. There were 238,563 pupils in 1,554 secondary schools, and 907,970 pupils in 22,276 primary schools.

**Justice and Crime.**—There is a High Court (constituted in 1916) at Patna with a Chief Justice, 8 Judges and 2 additional Judges. The High Court at Patna has also jurisdiction over the Province of Orissa. On the Criminal side there are Sessions Judges, Stipendiary and Honorary Magistrates. For the administration of Civil Justice there are District Judges, Subordinate Judges, and Munsiffs (Courts of first instance). The Police Force is under an Inspector-General; there is one policeman to 2,625 of the population and to 5·6 square miles of the area of the Province, the combined proportion being less than in any other Province of India.

**Finance.**—The revenue in 1941-42 was Rs. 655½ lakhs, including Rs. 121 lakhs from Excise, Rs. 134 lakhs from Land Revenue, Rs. 106 lakhs from Stamps, and Rs. 10½ lakhs from the Forest Department. The expenditure charged to revenue was Rs. 600 lakhs. The chief items were: Police Rs. 86½ lakhs, Education Rs. 79 lakhs, and General Administration Rs. 65 lakhs. Budget, 1942-43: Revenue, 648 lakhs; expenditure, 580 lakhs.

**Production and Industry.**—In Bihar the total area cropped during 1941-42 was 22,568,800 acres, which included 4,593,200 acres cropped more than once. Of this the principal crop, rice, covered 8,869,700 acres; maize, 1,461,200 acres; oilseeds, 1,470,200 acres; gram, 1,448,600 acres; barley, 1,284,800 acres; wheat, 1,300,000 acres; murga, 584,500 acres; sugar-cane, 383,900 acres; fibres (cotton, jute, etc.), 294,200 acres; indigo, 1,900 acres; tea, 4,100 acres; tobacco, 111,200 acres; fruits and vegetables, including root crops, 387,600 acres. The remaining area was distributed under miscellaneous food and non food crops of minor importance. The principal coal area of Bihar lies in the Manbhum and Hazaribagh districts. The total output was over 15 million tons in 1940. The districts of Hazaribagh, Monghyr and Gaya form the most important source of mica in the world. Iron ore is mainly raised in the district of Singhbhum, the total output of which in 1940 was over 1½ million tons. The total number of persons employed in coal, mica and iron ore mines was about 153,965. Of this, the Tata Iron and Steel Works, situated at Jamshedpur in Singhbhum district, employed daily about 19,961 persons, excluding contractors' labour during 1938-39. In 1942 there were 8,815 co-operative societies, with 242,961 members and a working capital of Rs. 1,82,76,311. The reserved forests covered an area of 1,632 square miles on March 31, 1941.

**Communications.**—The total mileage of metalled roads is 4,239 and of unmetalled roads 26,895. The length of canals open for navigation is 197 miles. The East Indian, Oudh and Tirhut, Bengal Nagpur and Bengal and Assam Railways continue to traverse the province. There has not been any increase in the open mileage of light railways.

**BOMBAY.**

**Constitutional Government.**—The English obtained a factory at Surat in 1616. Bombay was acquired by the Portuguese in 1530, and given in 1661 to Charles II as part of the dowry of Catherine of Braganza. In 1668 the king granted the Island of Bombay to the East India Company for the small annual rent of £10; it was placed under the control of the President of the factory at Surat. The headquarters of the Bombay Governor were transferred from Surat to Bombay in 1708. The early summer seat of Government is at Poona; for the hottest months the Governor resides at Mahableswar. The division of Sind was separated from the Presidency in 1936 and constituted a separate Province. The Presidency was constituted an autonomous Province on April 1, 1937. Bombay has a bicameral Legislature, the Upper House being known as the Legislative Council and the Lower House as the Legislative Assembly. The former consists of not less than 29 and

## 152 THE BRITISH COMMONWEALTH:—CENTRAL PROVINCES

Local Boards in the Central Provinces, 4 District Councils and one Independent Local Board in Berar, and 82 Municipalities.

The seat of Government is at Nagpur, but in April it is transferred to Pachmarhi for a period of three months.

*Governor.*—H. E. Sir Henry J. Twynnam, K.C.S.I., C.I.E., I.C.S. (assumed office October 2, 1940; salary, Rs. 72,000 per annum).

**Area, Population and Religion.**—The total area and population of the Central Provinces and Berar (which no longer includes the former Central Provinces States, now included in the Eastern States or in the Central India Agency) are 98,574 sq. miles and (1941) 16,822,584, respectively. The area and population (1941) of the Central Provinces only were 80,766 sq. miles and 13,217,718, and of Berar 17,808 sq. miles and 3,604,866. The urban population is 124.46 per mile. The chief towns and their population are Nagpur, the capital, 301,957; Jubbulpore, 178,339; Amraoti, 74,309; Saugor, 63,933; Raipur, 63,465, and Akola, 62,564. The Hindus in 1941 numbered 14,938,849 (including 3,051,413 of the scheduled castes and 2,103,482 aboriginal tribes); the aboriginals professing tribal religions, 887,219; the Muslims, 785,838; the Jains, 84,596; the Christians, 58,717; the Sikhs, 14,996, and others, 2,639. The aboriginals in all numbered 2,990,701.

**Education.**—The Nagpur University was established in 1923: to this the colleges at Nagpur, Jubbulpore, Wardha, Amraoti, Raipur and Akola are affiliated. There were 4,000 collegiate students in 1942-43. There is a High School Education Board for regulating and supervising high school education. There were 124,269 pupils in secondary schools for males in 1942-43. Under the head of primary education there were 4,650 recognised institutions for boys with 330,536 pupils, and 500 similar institutions for girls with 42,491 pupils. For technical education there is an engineering school at Nagpur managed by Government with 156 students. The agricultural college at Nagpur had 166 students in 1942-43. There is also an institute at Amraoti called the Victoria Technical Institute, managed by the Berar Victoria Memorial Society, with 42 students in 1942-43. The Laxminarayan Institute of Technology, started in August 1942 by the Nagpur University, has 9 students on its rolls.

**Justice and Crime.**—The High Court of Judicature at Nagpur having a Chief Justice and five Puisne Judges continues to be the highest Criminal and Civil Court of the Province. There were in 1942, 9 District and Sessions Judges, with 426 Magistrates for trial of criminal cases, and 103 Subordinate Judges for trial of civil cases. There were 55,783 criminal cases tried and 60,617 civil suits were instituted.

**Finance.**—The revenue for 1942-43 was Rs. 669 lakhs. Towards this total Land Revenue contributed Rs. 251 lakhs, Excise Rs. 78 lakhs, Stamp Duties Rs. 41 lakhs, and Forests Rs. 143 lakhs. On the expenditure side the total was Rs. 647 lakhs: General Administration cost Rs. 71 lakhs; Police, Rs. 73 lakhs; Education, Rs. 54 lakhs; Civil Works, Rs. 50 lakhs, including Rs. 2 lakhs from the Road Development account; Superannuation allowances and pensions, Rs. 53 lakhs, and Forests, Rs. 87 lakhs.

**Production and Industry.**—The principal crops are cotton, rice, wheat and juar. During the year ended March 31, 1941, the exports were rice, 3,670,869 maunds, wheat, 1,128,691 maunds, and juar and bajra, 724,637 maunds. 6,014,318 maunds of rice were exported in the previous

year. Cotton is grown chiefly in Berar and the west, rice in the east, and wheat in the north. The area irrigated from State works in 1942-43 was 713,047 acres. The Forest Department controls 19,432 sq. miles of forests. In 1942-43 the forests yielded a surplus revenue of Rs. 56 lakhs. Nagpur is the centre of the cotton-spinning and weaving industry. There were 1,165 factories of all kinds in the Central Provinces and Berar during the year 1941, with a daily average of 76,461 employees. There are 3 cement factories in the Jubbulpore district, and they exported 3,507,585 maunds of cement during the year ending March 31, 1941. In 1940 the number of mines working was 133, namely 31 coal mines, 74 manganese mines, and 25 mines for other minerals. The coal output in 1940 was 1,806,313 tons, and the manganese output, 652,755 tons. The Central Provinces produce 65 per cent. of India's output of manganese. There is a *biri* making industry in the province, which gives employment to over 50,000 workers.

**Communications.**—In 1942-43 the mileage of professionally aligned roads was 5,664, metalled and unmetalled 3,068. The mileage of forest roads during the year ending March 31, 1943, was 10,676. The railway mileage is 2,594, of which 1,741 miles are broad gauge and 853 narrow and metre gauge.

## COORG.

This Province came under British control in 1834, when, at the wish of the inhabitants, the reigning Raja, a cruel tyrant, was deposed. At first there was a Superintendent of Coorg, acting under the Commissioner of Mysore and Coorg. In 1881 the Resident in Mysore became the Chief Commissioner of Coorg, but with effect from July 1, 1940, a separate Chief Commissioner of Coorg has been appointed with headquarters at Mercara (the capital of the Province). A Legislative Council of 20 was created in 1924. The area is 1,593 sq. miles; and the population (1941) is 168,725. Kanarese is the chief language: Kodagu (Coorg language) is a dialect of old Kanarese. In 1944-45 the estimated revenue is Rs. 17.46 lakhs and the expenditure Rs. 17.36 lakhs. There were, in 1943-44, 1,349 boys in high schools and 7,908 in primary schools, and 675 girls in high schools and 4,409 in primary schools. There are 41,026 acres under coffee.

*Chief Commissioner.*—Dewan Bahadur K. Chengappa.  
*Administration Report.* Annual. Mercara.

## DELHI.

The Delhi Province, with an area of 574 sq. miles, was part of the Punjab Province before October, 1912, when the enclave was created into a separate province under a Chief Commissioner. In 1915 a tract of land in the United Provinces comprising 65 villages was added to the Delhi Province, and is included in the above-mentioned area. The population is 917,939 (1941); the population in Delhi town itself is 521,849. The new Capital Project, which was closed in 1932, was reopened and total expenditure of Rs. 18.77 lakhs incurred up to March 31, 1943. Accommodation is required for a population of about 73,653.

The University of Delhi, intended to be a unitary, teaching and residential institution, was founded in 1922. There are four Arts Colleges affiliated. There is also the All-India Lady Hardinge Medical College for the Medical Education of Indian Women (opened 1916). A Board of Secondary Education was established in 1926.

The revenue of the Province in 1942-43 (estimate) was Rs. 81.58 lakhs; and the expenditure (estimate) Rs. 195.39 lakhs.

*Chief Commissioner.*—A. V. Askwith, C.I.E., I.C.S. (appointed July 1, 1940; salary, Rs. 36,000 per annum).

### MADRAS.

**Constitution and Government.**—The first trading establishment made by the British in the Madras Presidency was at Peddapali (now Nizampatam) in 1611 and then at Masulipatam. In 1639 the English were permitted to make a settlement at the place which is now Madras; and Fort St. George was founded. By 1801 the whole of the country from the Northern Circars to Cape Comorin (with the exception of certain French and Danish settlements) had been brought under British rule. The Presidency was constituted an autonomous Province on April 1, 1937. Until October 30, 1939, the administration was in the hands of the Governor, who had a Council of Ministers to aid and advise him in the exercise of his functions. The Ministry having resigned on October 30, 1939, and a situation having arisen in which the Government of the Province could not be carried on in accordance with the provisions of the Government of India Act, 1935, H.E. the Governor, in exercise of the powers conferred by Section 93 of the Act, by a proclamation dated October 30, 1939, declared that all his functions under the Act shall be exercised by him in his discretion. He is now aided and advised in the discharge of his functions by 4 official advisers. The Legislature consists of an Upper House (Legislative Council) and a Lower House (Legislative Assembly). The former consists of not less than 54 and not more than 56 Members, of whom not less than 8 and not more than 10 are chosen by the Governor, the rest are elected. The Legislative Assembly consists of 215 elected Members, including 8 women. There are 25 Districts each under a District Collector, who is also the District Magistrate except in the District of Madras. Under the head of local administration there are 24 District Boards, one Agency District Board (under an official President), 82 Municipal Councils, and the Corporation of Madras. The summer capital is Ootacamund.

*Governor.*—H.E. Captain the Hon. Sir Arthur Hope, G.C.I.E., M.C. (assumed office March 12, 1940; salary Rs. 120,000 per annum).

**Area, Population and Religion.**—Area, 142,277 sq. miles. There are also five Indian States which are separately described (p. 174). Population (1941), 49.3 millions. Principal languages, Tamil, Telugu, Malayalam and Kannada. The first two account for 78 per cent. of the population. The principal towns are, Madras with 777,481 inhabitants, Madurai with 229,144, Trichinopoly with 159,566, and Salem with 129,702. Hindus formed 80 per cent., Mohammedans 14 per cent. and Christians 5 per cent. of the population in 1941.

**Education.**—There are three universities, the Madras University, the Andhra University, and the Annamalai University. The first of these, founded in 1857, is an affiliating University and since 1923 has been discharging teaching functions to a limited extent. The Andhra University, founded in 1926, was only an affiliating university in the earlier stages, but has since undertaken teaching work in certain subjects. The Annamalai University, founded in 1929, is the first attempt in South India at organising a unitary residential type of university. The number of colleges affiliated to or recognised by the two affiliating universities in 1942 was as follows:—Madras 46, of which 17 were maintained by the Government of Madras; Andhra 15 (8 maintained by Government). On March 31, 1943, male arts students numbered 17,703, and women arts students numbered 1,929. Public educational institutions numbered 38,621, with 3,391,748 scholars. There were 82,801 public elementary and 559 secondary schools for Indian boys, and 4,245 elementary and 119 secondary schools for Indian girls. Public funds contributed 62.5 per cent. of the total expenditure on education in 1942-43.

**Justice and Crime.**—There is a High Court with a Chief Justice and 15 Judges. There were in 1942 in all 1,102 Criminal Courts; and 551,228 criminal cases were instituted. The Police Force in 1942 numbered 35,762, under an Inspector-General, while there was a force of 2,762 for Madras City. The total number of civil suits instituted in the Courts, including village and panchayat Courts, was 362,335 in 1942.

**Finance.**—The revenue of the Government of Madras was Rs. 2,192 lakhs in 1942-43, the chief contributions being Rs. 753 lakhs from Land Revenue (including the portion due to Irrigation), Rs. 467 lakhs from Excise, Rs. 218 lakhs from Stamps, Rs. 72 lakhs from Forests, Rs. 65 lakhs from receipts under Motor Vehicles Acts and Rs. 145 lakhs from other taxes and duties. The expenditure in 1942-43 was Rs. 2,067 lakhs. General Administration accounted for Rs. 283 lakhs, Administration of Justice for Rs. 96 lakhs, Police for Rs. 194 lakhs, Charges on account of Motor Vehicles Acts for Rs. 62 lakhs, Education for Rs. 299 lakhs, Medical for Rs. 111 lakhs, Civil Works for Rs. 162 lakhs, Pensions for Rs. 116 lakhs and Civil Defence for Rs. 108 lakhs.

**Production and Industry.**—Agriculture engages 71 per cent. of the population. There were in 1942-43, 60 cotton mills with about 80,000 workers. The total number of factories working in 1942 was 2,379 with 249,155 operatives. The Madras Government in 1942-43 treated at the Government quinine factory about 1,149,140 lb. of cinchona bark. The area irrigated in 1942-43 was 9,083,396 acres: productive irrigation works showed a return of 8.09 per cent. on the capital outlay. The output of timber by the Forest Department was 103,940 tons in 1942-43. The total generating plant of all electricity supply undertakings in the Presidency amounted to 156,516 k.v.a. by the end of 1942-43, of which the Madras Electric Supply Corporation and the Government-owned power stations have nearly 95 per cent. The total electric energy generated by all public utilities in the Presidency in 1942-43 was about 324 million units.

**Communications and Commerce.**—In 1942-43, Madras Presidency had 25,563 miles of metalled roads, and 15,373 miles of unmetalled roads, as well as 1,420 miles of navigable canals. There were 4,961 miles of railway, in addition to 136 miles of District Board lines. The imports of private merchandise under the head of Seaborne Foreign Trade were valued in 1939-40 at Rs. 26.82 crores, and the exports at Rs. 35.76 crores. Trade

not more than 80 members, of whom not less than 8, or not more than 4, are chosen by the Governor. The rest of the Members of the Upper House are elected. The Legislative Assembly consists of 175 elected Members, of whom 6 are women. The constitutional machinery provided by the Government of India Act having partially failed, the Governor has temporarily suspended the legislature and assumed to himself the requisite powers to carry on the administration. There are, in addition to Bombay City, 3 administrative Divisions—Northern, Central and Southern—under which are 19 Districts. In 1940-41 there were 181 Municipalities and 20 District Local Boards, in addition to the Municipal Corporation of Bombay.

**Governor.**—H.E. Col. Sir David John Colville, P.C., G.C.I.E. (assumed office March 17, 1943; salary, Rs. 120,000 per annum).

**Area, Population and Religion.**—The British Province now stretches along the west coast of India, from Gujarat in the north to Kanara in the south. It has an area of 76,443 sq. miles: population (1941), 20·85 millions, mainly Hindus. All Indian States in the Bombay Province are now under the control of the Government of India. Parsis number 86,270 of the population in British territory. The chief languages are Gujarati, Marathi, and Kannada in the South. The principal towns are Bombay (1,489,888), Ahmedabad (591,267), Poona (258,197), and Sholapur (212,620).

**Education.**—The Bombay University founded in 1857 is an affiliating university. Under the university, in addition to the University School of Economics and Sociology and a Department of Chemical Technology, are 19 arts colleges and 14 professional colleges, for engineering, medicine, agriculture, commerce, and law. In 1940-41 the number of students in the arts colleges was 14,195 (British Districts), and in the professional colleges 5,036. Recognised and unrecognised educational institutions numbered, in 1940-41, 22,149, with 1,882,892 scholars. Secondary schools numbered 820, with 181,753 pupils, and primary schools 19,779, with 1,560,094 pupils. To the total expenditure on education Government contributed 41·5 per cent., local authorities 16·8 per cent., fees 28·7 per cent., and other sources 13·0 per cent.

**Justice and Crime.**—The High Court of Bombay has 10 permanent Judges, including the Chief Justice. Criminal justice is administered by the High Court, 27 Sessions Judges, 819 Stipendiary Magistrates, 115 Sanitary Committees and Sanitary Boards, and 804 village Panchayats. The number of persons tried was 430,462, of whom 284,070 were convicted in 1940.

**Finance.**—The estimated revenue of the Government of Bombay for 1942-43 is Rs. 15,18·16 lakhs, the chief contributions being Rs. 822·89 lakhs from Land Revenue, Rs. 242·92 lakhs from Excise, Rs. 139 lakhs from Stamps, and Rs. 54·8 lakhs from Forests. The estimated expenditure for 1942-43 is Rs. 15,28·6 lakhs. General Administration was estimated to cost Rs. 87·17 lakhs, Education Rs. 207·65 lakhs, and Police Rs. 176·88 lakhs.

**Production and Industry.**—Sixty-four per cent. of the population are dependent on agriculture. The textile trade is dominant in production. The number of looms in 1940 in Bombay Island was 65,177, and in the rest of the Bombay Province, 72,924. The number of factories of all kinds was 3,818 in 1940, and the number of operatives in all industries was 480,604, including 70,898 women, 3,443 adolescents and 770 children. There are about 18,000 sq. miles of reserved forests.

**Irrigation.**—In the Province 626,920 acres were irrigable in 1940-41.

**Communications and Commerce.**—In 1940-41 Bombay had 10,801 miles of metalled roads and 10,074 miles of unmetalled roads. In 1940-41 the total length of railway open in the Province was 2,519 miles (excluding Indian States).

The total foreign trade in 1940-41 was Rs. 109·39 crores, and the total coasting trade was Rs. 38·56 crores. Bombay had Rs. 69·06 crores of imports and Rs. 38·79 crores of exports.

## CENTRAL PROVINCES AND BERAR

**Constitution and Government.**—In 1853 the Maratha Raja of Nagpur died, and the territories of the Kingdom of Nagpur were declared by Lord Dalhousie to have lapsed to the Paramount Power. This area was at first administered as the Nagpur Province by a Commissioner under the Government of India, but in 1861, in the administrative readjustments which followed the Mutiny, it was united to the Sangor and Nerbudda territories, and the whole area was named 'the Central Provinces' and placed under a Chief Commissioner. In 1858 the inability of the Hyderabad State to maintain the Hyderabad contingent led to a treaty by which, in return for their upkeep of the contingent, the districts called 'the Hyderabad Assigned Districts,' which comprised the area now known as Berar, were assigned to the British. These Districts constituted a separate administrative unit until 1902, when the Treaty of Assignment was superseded by a perpetual lease of Berar to the Government of India on an annual rent of 25 lakhs of rupees. The administration of Berar was thereupon transferred to the Chief Commissioner of the Central Provinces. In accordance with an agreement concluded with the Nizam on October 24, 1936, which recognised and affirmed his sovereignty over Berar, the Central Provinces and Berar are now administered as one Governor's Province. The Nizam and his successors will henceforth hold the dynastic title of 'His Exalted Highness the Nizam of Hyderabad and Berar,' and the Heir Apparent of the Nizam and his successors, the title of 'His Highness the Prince of Berar.'

In 1920 a Governorship was created. It was constituted an autonomous Province on April 1, 1937. The Province has a unicameral Legislature—the Legislative Assembly consisting of 112 elected Members, including 3 women. Since the resignation of the Congress Ministry in November, 1939, the Governor has, by a proclamation under Section 93 of the Government of India Act, 1935, declared that all his functions under the Act shall be exercised by him and has assumed all power vested in the Provincial Legislature. There are four main administrative divisions in charge of Commissioners, and 19 districts, each under a Deputy Commissioner. For local self-government there are 18 District Councils and 2 independent

## 156 BRITISH COMMONWEALTH :—LACCADIVE ISLANDS, ETC.

to the United Kingdom represented 34·8 per cent. of the total trade of the Presidency in 1939-40. In 1939-40 the Madras Port accounted for 39·87 per cent. of the total trade; its imports and exports amounted to Rs. 16·00 and 16·53 crores respectively in 1939-40. Cochin is the chief of the other ports. It has been declared a major port and its administration taken over by the Government of India from August 1, 1936. The administration of the Port of Madras has also been taken over by the Government of India with effect from April 1, 1937.

## LACCADIVE ISLANDS.

(ATTACHED TO MADRAS PROVINCE.)

A group of 14 islands (9 inhabited), about 200 miles off the west of Malabar coast of the Madras Province. The northern portion is called the Amindivis and is attached to the collectorate of South Kanara, the remainder to the administrative district of Malabar. Population (1941) 18,393, nearly all Mohammedans. The language is Malayalam, but the language in Minicoy, which is considerably to the south of the other islands, is Mahl. The staple products are coconut husk fibre (coir) and coconuts.

## NORTH-WEST FRONTIER PROVINCE.

The area of the entire Province is 39,270 square miles, of which 14,290 square miles represent the settled districts as opposed to Agencies and tribal areas. The former comprises the Province proper under a Governor, who is Agent to the Governor-General for the latter. The frontier districts of Hazara, Peshawar, Kohat, Bannu and Dera Ismail Khan were separated in 1901 from the Punjab under the name of the North-West Frontier Province. Mardan has since been divided from Peshawar as a separate district. The Province was constituted an autonomous province on April 1, 1937. It has a unicameral Legislature (Legislative Assembly), consisting of 50 members. After the resignation of the Congress Ministry in November, 1939, the Governor, by proclamation under Section 93 of the Government of India Act, 1935, declared that all his functions under the Act shall be exercised by him in his discretion and he assumed all powers vested in the Provincial Legislature. The proclamation of 1939 was, however, revoked on May 25, 1943, when ministerial government was resumed in the Province.

The Province has a population of 3,038,067 (1941). About 91 per cent. are Mohammedans. Peshawar, the capital, had in 1941 a population of 178,420. The chief language is Pushtu. The Chief Court is that of the Judicial Commissioner, which consists of two Judges. There are five Sessions Judges. In 1943 the total number of offences reported was 58,832. The total number of civil suits instituted was 14,505. The gross revenue in 1943-44 was Rs. 255·73 lakhs (including a subvention of Rs. 100 lakhs from the Central Government). Of this Rs. 23·22 lakhs was Land Revenue, 14 lakhs from Excise, 10·5 lakhs from Stamps. The

gross expenditure in 1943-44 was Rs. 235·36 lakhs; Rs. 47·26 lakhs being expenditure on Police, Rs. 32·44 lakhs on Civil Works, and Rs. 23·33 lakhs on Education. In 1942-43 there were 1,016 recognised educational institutions for males, with 93,000 scholars, and 208 similar institutions for females, with 20,429 scholars. The percentage of scholars to the total population is 5·6 for males and 1·6 for females. The expenditure on Education was Rs. 33·83 lakhs, of which 66·9 per cent. came from Government funds and the remainder from local bodies and other sources. Wheat covered 35 per cent. of the total acreage sown in 1940-41. The irrigated area was 370,700 acres. The railway line through the Khyber, 27 miles long, with 84 tunnels, from Jamrud to the frontier of Afghanistan, was opened in November 1925.

Governor (and Agent to the Governor-General in respect of tribal areas) North-West Frontier Province (April 18, 1932).—H. E. Sir George Cunningham, K.C.S.I., K.O.I.E., O.B.E., I.C.S. (assumed office March 2, 1937; salary, Rs. 66,000 per annum).

## ORISSA.

**Constitution and Government.**—Orissa, ceded to the Marhattas by Alivardi Khan in 1751, was conquered by the British in 1803. In 1804, a Board of two Commissioners was appointed to administer the province, but in the following year it was designated the District of Cuttack, and was placed in charge of a Collector, Judge and Magistrate. In 1823 it was split up into three regulation districts of Cuttack, Balasore and Puri, and the non-regulation Tributary States which were administered by their own Chiefs under the aegis of the British Government. Angul, one of these tributary States, was annexed in 1847, and with the Khondmals, ceded in 1835 by the Tributary Chief of the Baudh State, constituted a separate non-regulation district. Sambalpur was transferred from the Central Provinces to Orissa in 1905. These districts formed an outlying tract of the Bengal Presidency till 1912, when they were transferred to Bihar, constituting one of its divisions under a Commissioner. Natural Orissa, considered as a linguistic and cultural whole, had long been divided between Bihar, the Central Provinces and Madras. It was constituted a separate Province on April 1, 1936, some portions of the Central Provinces and Madras being transferred to Orissa division. At present it consists of 6 districts, Balasore, the old Orissa division. The district of Angul was split up and the headquarters subdivision was attached to the Cuttack district and the Khondmals to the Ganjam district. Orissa has the status of a full-fledged autonomous Province, administered by the Governor with a Council of Ministers and a uni-cameral Legislature consisting of 60 members, designated as Orissa Legislative Assembly. On the resignation of the Congress Ministry in November, 1939, the Governor by a proclamation dated November 6, 1939, under Section 93 of the Government of India Act, 1935, declared that all his functions under the Act shall be exercised by him in his discretion and assumed to himself all powers vested in the Provincial Legislature. Ministerial government was resumed after the issue by the Governor on November 25, 1941 of a Proclamation revoking the Proclama-

tion of 1939. On June 30, 1944, however, the Governor again assumed these powers by a further Proclamation.

**Governor.**—H.E. Sir William Hawthorne Lewis, K.C.S.I., K.C.I.E., I.C.S. (appointed April 1, 1941; salary, Rs. 66,000 per annum).

**Area, Population and Religion.**—The area of the Province according to the latest available figures is 32,198 sq. miles, with a total population of 8,728,544 (census 1941). The figures of the classification of the population by community are: Hindus (excluding scheduled castes), 5,594,535; scheduled castes, 1,238,171; Muslims, 146,301; Christians (including Anglo-Indians and Europeans), 27,690; Buddhists, 454; Sikhs, 232; Jains, 139; Parsees, 13; Jews, 8; and tribes, 1,721,006.

**Education.**—The Province has a university of its own. The schools and colleges, which were hitherto affiliated to the Patna and the Andhra Universities, are now affiliated to the Utkal University, which came into being on November 27, 1943. There are 5 colleges in the Province, viz. the Ravenshaw College at Cuttack, the Maharaja's College at Parlakimedi, the Training College at Cuttack, the Intermediate Arts Classes attached to the Ravenshaw Girls' School at Cuttack and the Khallikote College at Berhampur. Ravenshaw College, Training College and the Intermediate Arts Classes attached to the Ravenshaw Girls' School and the colleges at Balasore, Sambalpur and Puri are maintained by Government, and the other colleges are maintained by private agencies. The total number of scholars in all the colleges on March 31, 1944, was 1,484 (1,398 men and 86 women). The total number of recognised schools in the Province, March 31, 1943, was 7,398 (7,241 general and 157 special schools). The schools for general education included 57 high schools (52 for boys and 5 for girls), 230 middle schools (218 for boys and 12 for girls), and 6,799 primary schools (6,534 for boys and 265 for girls). The special schools consisted of 1 medical school, 1 engineering school, 18 training schools (15 for men and 3 for women), 9 industrial schools (7 for men and 2 for women), 4 commercial schools, 1 school for defectives, 2 schools for adults and 121 schools for Oriental studies. The total number of pupils in all the schools for general education on March 31, 1944, was 296,918 (203,864 boys and 13,854 girls), and in special schools 3,670 males and 88 females. Besides, there were 704 unrecognised schools (698 for males and 6 for females) with a total strength of 14,616 scholars (14,468 males and 148 females).

**Justice and Crime.**—The Province of Orissa is under the jurisdiction of the High Court of Patna. The number of criminal cases brought to trial and the number of civil suits instituted in the province during the year 1941 was 24,867 and 18,242 respectively.

**Finance.**—The figures in this paragraph relate to the revised estimates for 1943-44. The total gross revenue is estimated to be 243.69 lakhs of rupees, including a subvention of 40 lakhs from the Government of India. The estimates under the principal heads of revenue are: land revenue, 52.07 lakhs; excise, 39.76 lakhs; stamps, 22.76 lakhs; forest, 22.52 lakhs. The principal heads of expenditure are: general administration, 35.04 lakhs; police, 28.82 lakhs; education, 29.03 lakhs; civil works, 24.51 lakhs, and civil defence, 18.46 lakhs.

**Production and Industry.**—The cultivation of rice is the principal occupation of nearly 80 per cent. of the population. A small quantity of jute is produced, and cereals and sugar-cane are grown for local consumption.

Turmeric is extensively cultivated in the uplands of the district of Ganjam, and practically the whole of it is exported. In the coastal areas fish abound and there is a large fish export trade to Calcutta, particularly from the Chilka lake. There are a number of rice mills, a few oil and flour mills, a soap factory and 3 sugar mills. There are cottage and small-scale industries in the Province, e.g. handloom weaving and the manufacture of baskets, wooden articles, heats and nets.

**Communications.**—The total mileage of the roads in the Province maintained by the Public Works Department is 1,542, metalled 1,002 and unmetalled 540 miles respectively. The open mileage of railway in the Province is 501 miles, broad gauge (5' 5") 467 miles, and narrow gauge (2' 6") 34 miles.

Masumdar (B. C.), Orissa in the Making. Calcutta, 1925.

## PUNJAB.

**Government and Constitution.**—Punjab denotes the land of the five rivers, viz. Jhelum, Chenab, Ravi, Beas and Sutlej. British power in the Punjab began with the disipation by the successors of Ranjit Singh of the power consolidated by him. In 1849 the country was annexed, and the power consolidated by him. In 1853 it was placed under a Board of Administration, and by 1859 the Punjab and the Delhi Territory constituted the charge of a Lieut.-Governor. The N.W. Frontier area was separated in 1901, and the Delhi province in 1911. The Punjab was constituted an autonomous Province on April 1, 1937. The Governor has a Council of Ministers to aid and advise him in the exercise of his functions. The Legislature (Legislative Assembly) consists of 175 members, including 5 women. There are 29 districts grouped for administrative purposes under five Commissioners. The system of election has been introduced in the membership of all the District Boards, except Simla. The Deputy Commissioner, Simla, constitutes the Simla District Board. There are 123 Municipalities. Lahore is the capital, but from May to October the Government Offices are transferred to Simla, where the Governor's residence is known as Barnes Court.

**Governor.**—H.E. Sir Bertrand Glancy, G.C.I.E., K.C.S.I., I.C.S. (assumed office, April 1, 1941; salary Rs. 100,000 per annum).

**Area, Population and Religion.**—The Punjab proper has an area of 99,089 sq. miles and a population of 28.41 millions (1941). Its Indian States, 34 in number, have an area of 39,016 sq. miles and a population of 5.89 million. Of the population 57.06 per cent. is Moslem, 26.56 per cent. Hindu and 12 per cent. Sikh. The leading towns are: Lahore, the capital (632,136), Amritsar (389,581), Multan (133,266), Sialkot (118,968), and Rawalpindi (118,175).

**Education.**—Since its inception, in 1882, as an examining body, the Punjab University has progressed rapidly. In addition to the affiliated colleges in the Faculties of Arts, Science, Medicine, Agriculture, Oriental Learning, Engineering and Dentistry, it maintains an Oriental College, a Law College and a College of Commerce. Its well equipped chemical laboratories have made considerable contribution to the industrial development of the Province. It also maintains an astronomical observatory. In 1941-42 there were 16,270 male students in arts colleges, 607,211

in secondary schools, and 396,752 in primary schools. The total expenditure on education in 1941-42 was Rs. 355 lakhs, of which sum Rs. 170 lakhs were provided by Government, Rs. 101 lakhs by fees, and the balance from other private sources.

**Justice and Crime.**—The Chief Court of two Judges created in 1866 was converted in 1919 into a High Court at Lahore, which at present consists of a Chief Justice, 10 Puisne Judges and two additional judges. There are 27 District and Sessions Judges, including two employed in the North-West Frontier Province and one employed at Delhi. In 1942 the number of criminal cases brought to trial was 207,291, and the number of civil suits instituted was 69,713. The Provincial Police Force consists of nearly 35,937 officers and men and is under the command of an Inspector-General.

**Finance.**—The revenue in 1942-43 was Rs. 1,846 lakhs, to which the receipts from Irrigation Works contributed Rs. 773 lakhs, Land Revenue Rs. 321 lakhs, Stamps Rs. 90 lakhs, and Excise Rs. 141 lakhs. The expenditure was Rs. 1,513 lakhs. The chief items of expenditure were: Education Rs. 170 lakhs, Police Rs. 190 lakhs, and General Administration Rs. 124 lakhs. The net profit earned by the Irrigation Department has been :—

|                   | Lakhs   |                   | Lakhs   |
|-------------------|---------|-------------------|---------|
| 1935-36 . . . . . | Rs. 293 | 1939-40 . . . . . | Rs. 351 |
| 1936-37 . . . . . | Rs. 305 | 1940-41 . . . . . | Rs. 372 |
| 1937-38 . . . . . | Rs. 333 | 1941-42 . . . . . | Rs. 393 |
| 1938-39 . . . . . | Rs. 301 | 1942-43 . . . . . | Rs. 485 |

**Production and Industry.**—Agriculture affords subsistence to 65 per cent. of the population of the Punjab (including Punjab States). On March 31, 1943, there were 3,600,787 acres of forests under the Forest Department. The total receipts of the Department from 1869 to 1942-43 amount to Rs. 1,351 lakhs, and the expenditure to Rs. 1,090 lakhs. Agricultural prosperity is mainly due to irrigation: the canal-irrigated area rose from 3 million acres in 1893 to 16.1 million acres in 1940-41, out of which 12.8 million acres are in British territory and 3.2 million acres in the Indian States.

Although the Punjab does not yet rank with the industrially advanced provinces of India, steady progress has been maintained in the establishment of new factories during the last decade. The number of registered factories has increased from 1,032 in 1941 to 1,101 in 1942, including a large number of cotton ginning and pressing factories located all over the province, and several modern cotton spinning and weaving mills at Amritsar, Lahore, Lyallpur and Okara. In raw wool pressing and baling, the Punjab occupies an important position; it is a large scale exporter of raw wool, and has large scale wool spinning and weaving mills at Amritsar and one at Dhariwal. Other industrial concerns of note are a ribbons and trimming mill; two absorbent cotton and antiseptic dressings factories; several carpet factories and silk weaving factories at Amritsar; a paper products factory, stationery and drawing materials factories and metal foundries at Lahore; a turpentine and rosin factory at Jallo; a pulp and paper mill, a starch factory and a sugar mill at Abdullapur; two ply-wood factories, one at Shahdara and the other at Ludhiana; a factory for the hydrogenation of vegetable oils at Lyallpur; several sports gear and rubber factories at Sialkot; cement tile factories and steel re-rolling mills at Lahore and Amritsar; a cement factory at Wah; tanneries at Wazirabad, Sialkot and

Jullundur; hosiery factories at Ludhiana and Lahore; factories for the dehydration of foodstuffs at Lahore, Ludhiana, Ambala, Sialkot and Amritsar; for the manufacture of electrical and scientific apparatus at Amritsar; for the manufacture of chemical and pharmaceutical products Lahore, Amritsar and Ambala; for chemical and pharmaceutical products Lahore, Amritsar, Rawalpindi and Lahore, and two glue factories, one at Amritsar and the other at Ambala. The Punjab has three promising oil-fields at Khaur, Dhulian and Chharat. The Attock Oil Company is engaged in extracting and refining mineral oils in western Punjab and Rawalpindi districts.

Handloom weaving is one of the most important industries in the Punjab; blankets and woollen rugs are produced in considerable quantities and much hosiery work is done on cottage lines. Other cottage industries of commercial importance are iron safes at Gujranwala; veterinary and surgical instruments and hospital furniture at Sialkot, Lahore and Multan; ivory carving at Amritsar and Leiah; copper and glue industry at Rewari; brass utensils at Jagadhri, Gujranwala and Rewari, and cutlery at Nizambad and Wazirabad. Workers in gold and silver are fairly numerous. The sericulture industry is expanding gradually and a large number of agriculturists in submontane tracts are taking an increasing interest in silk worm rearing and reeling operations. There is a Punjab arts and crafts depot at Lahore which provides a market for artistic wares of craftsmen and helps to secure improvement in design and workmanship.

**Communications.**—The Punjab possesses an extensive system of railway communications, and is entirely served by the North-Western Railway system, some 4,312 miles of which lie within the Punjab. The total length of metalled and unmetalled roads maintained by the Punjab Public Works Department on March 31, 1943, was 4,586 and 1,574 miles respectively. The Punjab has also 163 miles of navigable canals.

## SIND.

The Division of Sind, annexed in 1843, was transferred from the Presidency of Bombay on April 1, 1936, and constituted an autonomous Province on April 1, 1937. The Legislative Assembly consists of 60 members, including 2 women. The Governor has a Council of Ministers to aid and advise him in the exercise of his functions.

**Governor.**—H. E. Sir Hugh Dow, K.C.S.I., C.I.E., I.C.S. (assumed office, April 1, 1941; salary, Rs. 66,000 per annum).

**Area, Population and Religion.**—Sind (excluding Khairpur State) has an area of 48,186 sq. miles and a population of 4,635,008. Muslims number 3,208,325; Hindus (including scheduled castes), 1,239,926; Sikhs, 81,011; Christians, 20,209; Parsis, 3,888; Jains, 3,687, and Jews, 1,082. Only 10 per cent. are literate. The chief language is Sindhi. The principal town is Karachi (886,655).

**Education.**—On March 31, 1943, educational institutions of all kinds numbered 3,568, of which 492 were for girls. There are six colleges in the Province with 2,484 students. The number of secondary schools for boys was 181 with 22,957 pupils, and 29 for girls with 5,479 pupils. There were 2,272 primary schools for boys with 141,672 pupils, and 396 for girls with 84,139 pupils.

**Justice and Crime.**—There is a Chief Court of Sind with a Chief Judge and three judges. In 1943 there were 34,027 civil and 51,455 criminal cases decided. The strength of the police force, under an Inspector-General, was 8,008 at the end of 1943.

**Production and Industry.**—According to the Census Report for 1941, 62 per cent. of the population is engaged in the production of raw materials from land (excluding fisheries), industry employing about 8 per cent. Woollen and other cottage industries, especially cotton weaving, have made great strides. Two factories for dehydrating vegetables and fish have been established; a glass factory is about to start production and a factory has started manufacturing bolts, nuts and horse-shoe nails. A coconut-oil mill produces 3,000 tins of edible oil per day. Salt is one of the most important industries of Karachi and considerable quantities are normally exported from that port. Considerable quantities of raw hides and skins, wheat and wheat flour are also exported. The principal imports are machinery and millwork, cotton manufactures, chemicals and drugs.

**Irrigation.**—In British territory in India, the Province of Sind is situated beyond the influence of the south-west and north-east monsoons, and in consequence its rainfall is very scanty. In normal years, nine-tenths of the area cultivated depends on irrigation by canals. From the point of view of irrigation, Sind may be divided into two distinct spheres:—  
(a) Area which falls under the command of the Lloyd Barrage Canals,  
(b) area served by the inundation canals.

The Lloyd Barrage and Canal Construction Scheme, which consists of a barrage across the river Indus at Sukkur and 7 canals—4 on the left and 3 on the right bank—is the largest irrigation scheme undertaken in any part of India. The project is designed to provide an assured supply of water to an area of about 1·83 million acres in British territory which has hitherto received an indifferent supply from inundation canals. It also brings under irrigation a further area of 3·62 million acres in Sind, the Khairpur State,

and the Nadirbad Tahsil in Baluchistan, which was previously without facilities for irrigation. The project thus provides for an annual cultivation of 5·45 million acres on final development, which is expected to be reached in 1962–63. Irrigation from the new canals commenced from 1932. The area irrigated in Sind by the barrage canals and other capital work was, during 1941–42, 5·35 million acres.

As a result of the construction of the Lloyd Barrage and Canals Systems in Sind, the cultivation under cotton has increased from 258,232 acres in the pre-barrage period to 937,783 acres in 1941–42. The area under wheat increased from 480,000 in pre-barrage period to 1,165,000 acres in 1941–42. In addition, an area of 1,862,186 acres is grown under rice in Sind.

**Communications.**—The Hyderabad–Jodhpur metre-gauge line connects the frontier with the Jodhpur railway, thus linking Sind at Hyderabad with Rajputana, Northern and Central India and Gujarat.

Abbott (J.), Sind. Bombay, 1924.

## UNITED PROVINCES OF AGRA AND OUDH.

This territory grew out of various cessions and acquisitions. In 1833 the then Bengal Presidency was divided into two parts, one of which became the Presidency of Agra. In 1835 the Agra area was styled the North-West Province and placed under a Lieut.-Governor. Oudh was annexed in 1856. The two provinces of Agra and Oudh were placed, in 1877, under one administrator, styled Lieut.-Governor of the North-West Province and Chief Commissioner of Oudh. In 1902 the name was changed to 'United Provinces of Agra and Oudh,' under a Lieut.-Governor, and the Lieut.-Governorship was altered to a Governorship in 1921. The United Provinces have since April 1, 1937, an autonomous system of Government. The Legislative Council consists of not less than 58 and not more than 60 members, of whom not less than 6 and not more than 8 are chosen by the Governor, the rest being elected. The Legislative Assembly consists of 228 members, including the 6 seats exclusively set apart for women, but since the resignation of the Congress Ministry in November, 1939, the Governor has by proclamation under Section 93 of the Government of India Act, 1935, declared that all his functions under the Act shall be exercised by him in his discretion and vested in himself all powers of the Legislature. There are 10 administrative divisions, covering 48 districts, the average size of which is 2,218 square miles and the average population just over a million. The number of Municipalities is 86, and that of District Boards 48. There are three Indian States, one of which, Benares, came into existence in 1911.

**Governor.**—H. E. Sir Maurice Garnier Hallett, G.C.I.E., K.C.S.I., I.C.S. (assumed office December 7, 1939; salary, Rs. 120,000 per annum).

**Area, Population and Religion.**—The area of the British districts is 108,247 square miles: population (1941) 55,020,617; 1,325,839 are in the 6,276 square miles of three Indian States. The population is rural to the extent of 87·4 per cent. Cawnpore (487,324 in 1941) is now the largest city: the second place is taken by Lucknow (387,177). The other big cities in order of their population are Agra (284,149), Benares (263,100), Allahabad (260,630), Bareilly (192,688), Meerut (169,290), Moradabad (142,414), Aligarh (112,655), Shahjahanpur (110,163), Saharanpur (108,268), and Jhansi (108,254).

Hindus form 83·3 per cent. of the population, while the Muslims form 15·3 per cent.

**Education.**—The University of Allahabad, first constituted as an affiliating university in 1887, was reorganized in 1921 as a unitary teaching and residential university; at the same time it exercised control over the affiliated colleges. Since July, 1927, these colleges have been transferred to the new Agra University, which is a purely affiliating and examining university. The Benares Hindu University was constituted in 1916; Lucknow University in 1920, and the Aligarh Muslim University in 1920, all being unitary teaching and residential universities. The five universities had altogether 16,241 students in 1942-43, including students of intermediate classes in the Benares Hindu and Aligarh Muslim Universities. Government maintains Medical Colleges at Lucknow and Agra, an Engineering College at Roorkee and an Agricultural College and a Technological Institute, a Sugar Institute and a Textile Institute at Cawnpore, besides four training colleges for teachers at Allahabad, Lucknow and Agra, including the Government Basic Training College at Allahabad, i.e. 2 at Allahabad, 1 at Lucknow and 1 at Agra. Educational institutions of all kinds numbered 25,020 in 1942-43. For secondary education there were 1,827 institutions with 334,793 scholars and for primary education 19,627 schools with 1,314,612 scholars. On March 31, 1943, technical and industrial schools of all kinds numbered 78 and had 3,194 students on their rolls. There were 2,277 institutions for Indian girls with 165,519 scholars, and compulsory primary education for boys in 36 municipalities, and in 357 rural areas of 25 districts (1,224 villages), Government supplying two-thirds of the extra cost involved. The percentage of scholars to the population is 5·28 for males and 1·03 for females. Government contributed 50·2 per cent. of the total cost of education in 1942-43.

**Justice and Crime.**—There is a High Court of the Agra Province with a Chief Justice and 10 permanent Judges, sitting at Allahabad; also a Chief Court of Oudh, with a Chief Judge and 3 Judges, at Lucknow. There are 19 Sessions divisions in Agra and 8 in Oudh. The total number of persons under trial was 302,179 in the Agra Province and 89,685 in Oudh in the year 1943. The police force, consisting of 36,225 officers and men and 43,609 village chaukidars, is administered by an inspector-general with five deputy inspectors-general, including two temporary officers, and one deputy inspector-general now known as D.I.G. Headquarters and Railways, and two assistants, 47 district superintendents, 41 assistant superintendents and 71 deputy superintendents. There is a police training college at Moradabad under a superintendent of police as principal. There is a C.I.D. forming a separate department with an assistant inspector-general in charge and a Government railway police under the charge of a superintendent. A military police section, with a total strength of 1,620 officers and men, under the command of superintendent of police, assisted by one adjutant and four military police staff officers, has been added to the provincial police force.

**Finance.**—The revenue of the United Provinces in 1942-43 was 2,046 lakhs of rupees. To this total the main contributions were: 651 lakhs from Land Revenue, 156 lakhs from Stamps, 206 lakhs from Provincial Excise, 113 lakhs from Forests, 219 lakhs from Irrigation and 163 lakhs from the Government of India on account of the provincial share in the income tax receipts. On the expenditure side the total for 1942-43 was 2,044 lakhs. On Education were spent 224 lakhs; on Police 266 lakhs, and on General

Administration 153 lakhs. No less than 115 lakhs were spent on the interest on debt on Irrigation works for which capital accounts are kept, and 205 lakhs were transferred to the Revenue Reserve Fund, which was created to meet expenditure on civil defence and post-war reconstruction. Provision of 59 lakhs was also made for reduction and avoidance of debt. On the construction of new irrigation and hydro-electric works, 18 lakhs in capital expenditure was incurred in 1942-43, and 61 lakhs on provincial schemes connected with the war.

**Production and Industry.**—Agriculture absorbs 76 per cent. of the population; 36·59 million acres were under cultivation in 1943-44, 5·41 million acres were irrigated from wells and 5·84 million acres from canals and tube wells. The productive canals and tube wells gave a net revenue of 10·08 per cent. on the total capital outlay. In 1943 there were 934 registered factories in the United Provinces.

**Communications.**—There were, up to March 31, 1944, 4,320 miles of metalled and 965 miles of unmetalled roads, maintained by the Public Works Department of Government. 4,288 miles of metalled roads and 23,008 miles of unmetalled roads were maintained by district boards in 1942-43.

## INDIAN STATES AND AGENCIES.

Within the limitations described on p. 113, the Indian States are governed by their rulers, with or without the aid of Ministers and Councils. The system of Government is in theory autocracy, but the practice varies greatly. During recent years constitutional reforms have been introduced in a number of States.

In 1921 a Chamber of Princes was established as a permanent consultative body to discuss matters relating to affairs of Imperial or common concern, so far as they affect the States.

In 1935 the Government of India Act provided for the establishment of a Federation of India as soon as Indian Rulers, representing one half of the population of the Indian States and being entitled to choose not less than 52 members of the Upper House of the proposed legislature, accede to Federation. This accession is by a formal document called or known as the 'Instrument of Accession,' which must be accepted by His Majesty.

In 1937, at the request of the Viceroy, each of the Indian States submitted a form of Instrument of Accession. In January, 1939, in reply to these proposals, he circulated a proposed form of Instrument. After this had been considered by the rulers at a meeting in June, 1939, a resolution was passed stating that the Instrument submitted by the Viceroy was 'fundamentally unsatisfactory,' and the time for acceptance of his form was extended. In September the Viceroy announced that although the work of preparation was well advanced, the outbreak of war had left H. M. Government no choice but to suspend these preparations; that Federation, however, would remain their objective.

The proposals made by His Majesty's Government in March, 1942, but subsequently rejected by the main British Indian parties, envisaged the

are Hindus. Baroda City, the capital, has a population of 153,801. The receipts in 1988-89 were Rs. 221.54 lakhs. Primary education is compulsory. There were 2,612 educational institutions with 286,710 pupils, including Baroda College with 1,182 students. There is a High Court of Justice with a well organised subordinate service. There were 1,244 co-operative societies of all kinds, with 60,379 members and a working capital of Rs. 92.92 lakhs. There is an Executive Council of 5 or more members according to the Maharaja's discretion, and a Legislative Council made up as follows: 37 elected members, 14 nominated from the public, 8 nominated officials and 5 members of the Executive Council who sit ex-officio.

**Cambay.**—This State has an area of 892 square miles, a population of 96,692, and an annual revenue of about Rs. 13 lakhs. The founder of the ruling family was Mirza Jafar Najamud-Daulah Mominkhan I, the last but one of the Muhammadan Governors of Gujarat. The present ruler is H.H. Mirza Hussain Yavar Khan Saheb. He was born on May 16, 1911, succeeded to the gadi on January 21, 1915, and was invested with ruling powers on December 13, 1930. His Highness is a member of the Chamber of Princes, and enjoys a dynastic salute of 11 guns.

**Chhota Udepur.**—This State has an area of 890·84 square miles, a population of 160,122, and an annual revenue of about Rs. 12 lakhs. The ruling family belongs to the Khichi Chavan Rajput clan, and claims descent from the last Patai Raja of Pawagadh or Champaner, the State being founded shortly after the fall of that fortress in 1484. The name of the present ruler is Maharawal Shri Natwarsinhji. He was born on November 16, 1906, and succeeded to the gadi on August 29, 1923, on the death of his father. He is a member of the Chamber of Princes, and enjoys a dynastic salute of 9 guns.

*Baroda.*—This State claims to be one of the most important, if not the leading State in India, north of Bombay. It includes all the territories of H. H. the Gaekwar. The province of Gujarat was at one time included in the Mughal Empire, but, in the early part of the 18th century, the Mahrattas, under the leadership of Damaji Gaekwar, and afterwards of his nephew, Pilaji, succeeded in wresting all powers out of the hands of the Mughal officers. From that time Baroda has remained continuously under the sway of the Gaekwar family, who held it in the first instance under the Peshwa, subject to a tributary payment, but afterwards threw off their allegiance and became feudatory to the British Government under the guarantee of a treaty executed in the year 1817. The Gaekwar, Malhar Rao, installed in 1870, was deposed in 1875, and on May 27, 1875, the widow of Khande Rao, his brother, adopted as heir the late ruler H. H. Sir Sayaji Rao Gaekwar III, a descendant of the founder of the family, who was invested with full ruling powers in 1881, and who died on February 6, 1930. The present ruler is H. H. Farzand-i-Khas-i-Daulat-i-Inglish-i-a Maharaja Pratap Singh Gaekwar Sena Khas Khel Shamsher Bahadur, G. C. I. E., born 1908; succeeded February 7, 1939; salute of 21 guns. The area of the State is 8,164 square miles; the population, 2,854,035, the great majority of whom

*Jawhar*.—This State is situated to the north of the Thana District of the Bombay Presidency on a plateau above the Konkan plain. It has an area of 308 square miles, a population of 65,126, and an average annual revenue of about Rs. 3½ lakhs. Up to 1923, the period of the first Mahomedan invasion of the Deccan, Jawhar was held by a Varli, not a Koli Chief. The first Koli Chief obtained his footing in Jawhar by a device similar to that of Dido when he asked for and received as much land as the hide of a bull would cover. The Koli Chief cut a hide into strips, and thus enclosed the territory of the State. The present Chief, Raja Patangsha, alias Yeshwantrao Vikranasha, was born on December 11, 1917; succeeded to the gadi, December 10, 1927, and was invested with ruling powers January 16, 1938. The Raja is a member of the Chamber of Princes, and enjoys a dynastic salute of 9 guns.

**Lunawada.**—This State has an area of 388 square miles, a population of 106,818, and an annual revenue of about Rs. 5½ lakhs. The rulers of Lunawada belong to the historic Solanki clan of Rajputs, claiming their descent from the famous Siddhraj Jaysinh of Anhilwad (Gujarat). Besides having fine patches of good agricultural land, the State contains a considerable forest area yielding rich timber. The present Raja, Lieut. Maharana Shri Virbhadrasinghji, was invested with full powers on October 2, 1930. He is a member of the Chamber of Princes, and enjoys a dynastic salute of 9 guns.

**Rajpipla.**—This important State lies to the south of the Narbada. It has an area of 1,517½ square miles, a population of 240,032, and an average annual revenue of about Rs. 25 lakhs. The lands are rich and very fertile, and, except for a few forest-clad hills, are suitable and available for cultivation in large quantities in the south-east talukas. The family of the Maharaja of Rajpipla, Major H. H. Maharana Shri Sir Vijaysinhji, K.C.S.I., G.B.E., is said to derive its origin from a Rajput of the Gohel clan. Cotton is the most important crop in the State. In the hills there are valuable teak forests. The capital is Rajpipla, which is connected with Ankleshwar by railway built by the State. His Highness is a member of the Chamber of Princes, and enjoys a dynastic salute of 13 guns.

**Sachin.**—This State has an area of 49 square miles, a population of 26,231, and an annual revenue of about Rs. 5 lakhs. The ancestors of the Nawab of Sachin were the rulers of Janjira. The founder of the Sachin family was Abdul Karim Yakut Khan, commonly called Balu Miyan. In 1784, on the death of his father Abdul Karim (Nawab of Janjira), the Chiefship was seized by Sidi Jawhar, and Balu Miyan fled to Poona, where he sought the protection of Nana Furnavis, who managed to secure for him a tract of land near Surat, then estimated to yield Rs. 75,000 a year. Balu Miyan was granted the hereditary title of Nawab by the Emperor of Delhi. The present ruler is Nawab Mohamed Hyder Khan, who was born on September 11, 1909, and succeeded to the gadi in November, 1930. He is a member of the Chamber of Princes, and enjoys a dynastic salute of 9 guns.

**Sant.**—This State has an area of 394 square miles, a population of 94,257, and an annual revenue of about Rs. 5 lakhs. The ruling family belongs to the Mahipavat branch of the Puvar or Parmar Rajputs. The rulers used to pay Rs. 5,384-9-10 to Scindia. This amount is now paid by the State to the British Government. The present ruler, Maharana Shri Jorawarsinghji Pratapsinhji, was born on March 24, 1881, and succeeded to the gadi in 1896. He is a member of the Chamber of Princes, and enjoys a dynastic salute of 9 guns. Kadana State, with a population of 19,790, has been merged with the Sant State.

**Rewa Kantha Agency, including the Surgana State and the Danga.**—This Agency is a subordinate Political Agency of the Gujarat States Agency. It is comprised of all the non-salute States and Estates of the old Rewa Kantha Agency, the State of Surgana, previously in the Nasik Agency, and the petty States known as the Danga, previously in the Surat Agency. Rewa Kantha means the district or province situated on the banks of the river Rewa or Narmada or Narbada. This river is held in high veneration among the Hindus, especially in the Bombay Presidency. All the States comprised in the Province of Rewa Kantha are not on the banks of the Narbada, for some of the Northern States, i.e. Kadana, and the States in Pandu Mewas are on the banks of the Mahi River. In fact, the Rewa Kantha Agency comprises territories watered both by the Rewa and Mahi Rivers. The population consists of the following main classes: Hindus, Jains, Muhammadans, Animistic (Bhils, Dhankas, Kolis and Naikdas). Surgana is situated on the

borders of the Nasik District. The Danga consist of a tract of country between the Sahyadris and the Surat District which is parcelled out among 14 petty chiefs. Of these 13 are Bhils and 1 is a Kokani. The headquarters of the Agency which is situated at the Baroda Residency in view of the fact that the Secretary to the Resident for Baroda and the Gujarat States is also *ex-officio* Political Agent of this Agency.

Many of the States and Estates are small and only a few enjoy restricted jurisdictional powers. The five Chiefs of Bhaderwa, Surgana, Saajeli, Jambaghoda and Umeta are, however, larger and more important, the first two named being included in the list of electorates for representative members of the Chamber of Princes.

The following eleven States conduct their relations through the special officer of the Baroda State for attached areas:—

| Name of the State  | Area in Sq. Miles | Population | Revenue<br>Rs. |
|--------------------|-------------------|------------|----------------|
| Agar . . . . .     | 17                | 2,984      | 25,000         |
| Bhaderwa . . . . . | 27                | 13,520     | 98,000         |
| Chhaller . . . . . | 11                | 3,611      | 19,000         |
| Mandwa . . . . .   | 16-50             | 7,091      | 94,000         |
| Naswadi . . . . .  | 19-50             | 6,991      | 42,000         |
| Palasni . . . . .  | 12                | 3,119      | 32,000         |
| Sihora . . . . .   | 18-50             | 4,966      | 23,000         |
| Shamnor . . . . .  | 11-25             | 2,245      | 80,000         |
| Uchad . . . . .    | 8-50              | 3,508      | 53,000         |
| Umeta . . . . .    | 24                | 6,676      | 70,000         |
| Vajiria . . . . .  | 21                | 6,882      | 52,000         |

All these States were in the old Rewa Kantha Agency except Surgana, which was in the Nasik Agency.

The remaining Talukas and Estates of the old Rewa Kantha Agency (40 in number) are grouped in two Thana Circles known as the Sankheda Mewas and the Pandu Mewas with headquarters at Wadia and Pandu respectively. The jurisdiction and administration of these Estates are exercised for them, by the Thanadars concerned under the control of the special officer of the Baroda State.

## SANKHEDA MEWAS (WADIA).

| Name of the State               | Area in Sq. Miles | Population | Revenue<br>Rs. |
|---------------------------------|-------------------|------------|----------------|
| Alwa . . . . .                  | 5                 | 2,126      | 9,000          |
| Bhilodia . . . . .              | 9                 | 2,558      | 20,000         |
| Bihora . . . . .                | 1-75              | 293        | 2,000          |
| Choranga . . . . .              | 16                | 3,203      | 15,000         |
| Chudeshwar . . . . .            | 2-50              | 732        | 3,000          |
| Dudhpur . . . . .               | 1-75              | 166        | 600            |
| Jiral Kamsoli . . . . .         | 5                 | 1,495      | 10,000         |
| Nalia . . . . .                 | 1                 | 218        | 1,000          |
| Nangan . . . . .                | 3                 | 755        | 2,000          |
| Pantalavdi . . . . .            | 5                 | 1,079      | 6,000          |
| Rampura . . . . .               | 4-50              | 2,304      | 11,000         |
| Rangan . . . . .                | 4                 | 687        | 4,000          |
| Sindhapura . . . . .            | 4                 | 1,062      | 6,000          |
| Vanmala alias Dhamaia . . . . . | 10-50             | 3,051      | 22,000         |
| Vasan-Sewada . . . . .          | 12-50             | 1,751      | 5,000          |
| Vasan-Virpur . . . . .          | 12-50             | 5,034      | 28,000         |
| Virampura . . . . .             | 1                 | 135        | 1,000          |
| Vora . . . . .                  | 5                 | 1,479      | 11,000         |

## PANDU MEWAS (PANDU).

| Name of the State                  | Area in Sq. Miles | Population | Revenue |
|------------------------------------|-------------------|------------|---------|
|                                    |                   |            | Rs.     |
| Amrapur . . . . .                  | 2                 | 441        | 1,000   |
| Angad . . . . .                    | 4-25              | 4,877      | 12,000  |
| Dhari . . . . .                    | 3-75              | 1,575      | 6,000   |
| Dodka . . . . .                    | 3                 | 1,074      | 6,000   |
| Gotardi . . . . .                  | 3                 | 560        | 1,000   |
| Gothda (or Litar Gothda) . . . . . | 4                 | 1,873      | 7,000   |
| Itwad (or Etwar) . . . . .         | 6                 | 2,033      | 3,000   |
| Jesar . . . . .                    | 1-5               | 688        | 3,000   |
| Jumkha . . . . .                   | 1                 | 295        | 1,000   |
| Kanoda . . . . .                   | 3-75              | 1,756      | 4,000   |
| Kasia-pagi nu-Muvadu . . . . .     | 1                 | 231        | 800     |
| Mevli . . . . .                    | 5                 | 1,918      | 3,000   |
| Moka-pagi nu-Muvadu . . . . .      | 1                 | 215        | 1,000   |
| Nabara . . . . .                   | 3                 | 566        | 95      |
| Pandu . . . . .                    | 9                 | 2,398      | 3,000   |
| Polcha . . . . .                   | 3-75              | 1,347      | 3,000   |
| Raika . . . . .                    | 3                 | 580        | 6,000   |
| Rajpur . . . . .                   | 1-50              | 155        | 2,000   |

**Gwalior.**—The State is the premier Mahratta State in Central India. The founder of the dynasty, Ranoji Scindia, held military rank under Shri Chhatrapati Shahu Maharaj (1720), the paramount ruler of the Maratha Empire, and established his headquarters at Ujjain. In 1782, Maharaja Mahadji Scindia was recognised by Warren Hastings as an independent ruler. In 1886, Gwalior Fort was restored to Maharaja Scindia by Lord Dufferin.

The area of the State is 26,397 sq. miles, the population 4,006,159 (1941). Hindus form the bulk of the population, and Hindi is the principal

## GWALIOR RESIDENCY

173

language of the State. The estimated revenue for 1943-44 was Rs. 262-16 lakhs.

In 1941-42 there were 2,189 educational institutions with 116,128 pupils. These institutions include 3 colleges, viz. Victoria College, Gwalior; Madhav College, Ujjain, and Kamla Raja Girls' Intermediate College, Gwalior, and 8 State high schools, 7 for boys and 1 for girls, and 5 aided high schools. Besides these there are 37 middle schools, 79 for boys and 8 for girls. The Scindia School on the Gwalior Fort is a special institution preparing students for the matriculation and Cambridge examinations. There is also a Technical Institute at Gwalior, with a branch at Chanderi providing facilities for technical education. Besides there are special institutions, viz. Madhav Sangit Vidyalaya, Ayurvedic Vidyalaya and Sanskrit College at Gwalior, providing facilities for Sangit, Ayurvedic Science of Medicine and Sanskrit education.

There were 52 municipalities and town committees, 3,391 co-operative societies with 80,651 members and a working capital of Rs. 1,28,98,426. Up to the end of 1941-42 the capital outlay on Gwalior State Railways was Rs. 28,991,111. The length of the metalled roads maintained by the State is about 2,384 miles. A seaplane base named Madhav Maridrome has been established at the Tigrs Reservoir for the Empire Air Route, and a colony with buildings for accommodation of the staff has been constructed there by the State Government at a cost of over 4½ lakhs of rupees. Important archaeological monuments in the State are at Badoh, Bagh, Bhilsa, Chanderi, Gwalior, Gyaspur, Kadwaha, Mandasaur, Pawaya, Raod, Suhania, Surways, Terahi, Udaygiri, Udaypur and Ujjain.

The total number of dispensaries and other medical institutions in the State is 146, and the Budget expenditure on these was Rs. 83,73,350, and for village sanitation Rs. 68,964 in 1942-43. The irrigation works within the State number 867. The total cultivated area in 1941-42 was 9,208,492 bighas. There is a well-equipped engineering workshop in Gwalior, the capital of the State, also an electric power station, a leather factory, and tannery and pottery works. There are cotton mills in Gwalior and Ujjain. The State has its own railway. The portion of the G.I.P. Railway which passes through a major portion of the State territories is owned by the Gwalior Durbar.

The ruler is Major His Highness Maharaja Sir Jiwaji Rao Scindia, Alijah Bahadur, G.C.I.E.; born on June 26, 1916; succeeded on September 27, 1925; married Princess Lekha Divyeshwari Devi, of Nepal, on February 21, 1941; salute of 21 guns. The State is in direct relation with the Crown Representative through a Resident at the Gwalior Residency.

The State has a Legislature consisting of the *Praja Sabha* (Lower House) of 90 members, of whom 55 are elected, and the *Raj Sabha* (Upper House) of 40 members, of whom 20 are elected. The Constitution of 1939 was amended by proclamation on September 30, 1941.

Administration Report. Lashkar. Annual.

**Gwalior Residency.**—Two States, Benares and Rampur, are in political relation with the Crown Representative through the Resident at Gwalior and Political Agent for the States of Rampur and Benares. The Ruler of Rampur is Major H. H. Nawab Sir Saiyid Muhammad Raza Ali Khan Bahadur, Mustaid Jung, K.C.S.I.; born November 17, 1906; succeeded June 20, 1930; salute of 15 guns. The Rampur State covers 893 sq. miles, with a population of 464,919 (1931); the approximate revenue is 51 lakhs.

The Family Domains of the Maharaja of Benares were constituted in 1911

creation, after the war, of an Indian Union under a constitution framed by a body of representatives elected by the legislatures of British India, with representatives of the States.

The Chamber of Princes, in April, 1942, expressed the willingness of the States to co-operate in every reasonable manner compatible with their sovereignty and integrity, in framing a new constitution.

*Chancellor.*—H.H. Colonel the Maharaja Jam Sahab of *Nasomagar*, G.C.I.E., K.C.S.I.

Information is given below regarding the leading States and Agencies, arranged in alphabetical order.

**Assam States.**—The only feudatory States with which the Assam Administration has political relations are Manipur and the petty States in the Khasi Hills. Manipur has an area of 8,638 square miles and a population (1941) of 512,069. About one-third are animistic tribes. For the last 5 years the average annual revenue has been rather over Rs. 10 lakhs. The ruler is H.H. Maharaja Bodh Chandra Singh, born 1908; succeeded 1941; salute of 11 guns. Capital, Imphal. The State Administration is under a Darbar consisting of a President (whose services are lent by the Government) and six Members.

**Baluchistan States.**—There are three States—Kalat, Lasbela and Kharan. Their relations with the Resident for Baluchistan, who is also the Agent to the Governor-General in Baluchistan and resides at Quetta, are conducted through the Political Agent in Kalat. The present Khan, Major His Highness Beglar Begi Mir Sir Ahmad Yar Khan, G.C.I.E., was born in 1904 and succeeded in 1933. He has a permanent salute of 19 guns. The area of the State is 78,278 square miles, and the population 260,211 (1941). The revenue, including the subsidies and rents paid by the British Government for the leased areas, amounts to nearly Rs. 15.9 lakhs annually.

The present ruling chief of Lasbela is Jam Mir Ghulam Qadir Khan, who was born in 1920 and succeeded in 1937. He was formally installed on March 21, 1939, and was given full ruling powers. The area of the State is 7,182 square miles; population, 68,972 (1941), and revenue about Rs. 4.6 lakhs. The State is under the formal suzerainty of Kalat.

The ruling chief of Kharan is Nawab Habibullah Khan Nansherwani, who was born in 1897 and succeeded in 1911. The area of the State is 14,210 square miles; population 33,763 (1941), and revenue about 1 lakh. Since 1940 Kharan is considered to be a separate State under the formal suzerainty of Kalat.

**Central India Agency.**—This Agency, covering 51,651 sq. miles, with a population of 7,534,661, includes 28 Salute States and 60 Minor States and Guaranteed Estates. The bulk of the population is Hindu. The Resident for Central India, whose headquarters are at Indore, is assisted by Political Agents in Bhopal, Bundelkhand, and in Malwa. The territories of the different States are much divided and intermingled, and their political relations with the Indian Government and with one another are very varied.

Indore has an area of 9,934 sq. miles, a population of 1,513,966, and an approximate revenue of Rs. 1,35,18,000. The ruler is H.H. Maharajadhiraja Raj Rajeshwar Sawai Shri Yeshwant Rao Holkar Bahadur, G.C.I.E.; born September 8, 1908; succeeded February 26, 1926, and was granted ruling powers on May 9, 1930; permanent salute of 19 guns.

Bhopal has an area of 6,924 sq. miles, a population of 785,322, and an approximate revenue of over Rs. 1 crore. The ruler is Air Commodore

## EASTERN STATES—BARODA, WESTERN INDIA AND GUJARAT 167

H.H. Sikandar Sanlat Iftikharul Mulk Nawab Haji Muhammad Hamidullah Khan Bahadur, G.O.S.I., G.C.I.E., C.V.O., permanent salute of 19 guns. In 1927 the King Emperor recognised the right of a daughter of a Ruler to succeed in the absence of a son; and a Legislative Council was established.

Rewa has an area of 18,000 sq. miles, a population of 1,820,445, and an approximate revenue of Rs. 51 lakhs. The ruler is H.H. Maharajadhiraja Sir Gulab Singh Bahadur, G.C.I.E., K.C.S.I.; born March 12, 1908; succeeded October 31, 1918, and was granted ruling powers on October 31, 1922; salute of 17 guns.

*Resident.*—Lt.-Col. W. F. Campbell.

**Eastern States.**—The 42 States in the Eastern States Agency are in direct relations with the Crown Representative through a Resident stationed at Calcutta. He is assisted by 2 Political Agents posted at Sambalpur and Raipur respectively, while his Secretary at Calcutta assists him in his relations with the Cooch Behar, Tripura and Mayurbhanj States.

The area of Cooch Behar is 1,318 square miles; population (1941) 639,898. The approximate annual revenue is 42 lakhs of rupees. The ruler is Capt. H.H. Maharaja Sir Jagaddipendra Narayan Bhup Bahadur, K.C.I.E.; born 1915, succeeded 1936; hereditary salute of 13 guns.

Tripura State covers 4,116 square miles; the population (1941) 513,952; the approximate revenue Rs. 34 lakhs (inclusive of the revenue of the landed properties owned by the State in British India). The ruler is Major H.H. Maharaja Manikya Sir Bir Bikram Kishore Deb Barman Bahadur, K.C.S.I.; born 1908, succeeded 1923; hereditary salute of 13 guns. He was formally invested with the powers of a Ruling Chief by the Governor of Bengal in August, 1927. The State has an era of its own from 590 A.D.

Mayurbhanj State, area 4,243 square miles, population (1941) 990,977, has an annual revenue of about Rs. 44 lakhs. The ruler is Flight-Lieut. H.H. Maharaja Sir Pratap Chandra Bhanj Deo, K.C.I.E., born 1901, succeeded 1928.

The total population of the States is 9,089,099, and the total area 66,989 square miles. These States pay Rs. 3,23,713 a year to Government. Their total income is Rs. 3,45,48,209. Hereditary salute of 9 guns.

*Resident.*—L. G. Coke-Wallis.

**Baroda, Western India and Gujarat States.**—As from November 11, 1944, the Western India and Gujarat States Agencies have been amalgamated; and all the full-powered states except Baroda have been placed in the charge of the Gujarat States Agency (headquarters, Bulsar). The charge of this new Agency has been added to the charge of the Resident at Baroda, who is now known as the Resident at Baroda and for the States of Western India and Gujarat. The Political Agencies included in this charge are the Rewa Kantha Agency, the Kaira Agency, the Surat Agency, the Nasik Agency, and the Thana Agency.

The following are the full-powered salute States now in direct political relations with the Crown Representative through the Resident for Baroda and the Gujarat States:—

Belasinor (old Rewa Kantha Agency).  
Banada (old Surat Agency).  
Baria (old Rewa Kantha Agency).  
Baroda.  
Cambay (old Kaira Agency).  
Chhota Udepur (old Rewa Kantha Agency).

Dharampur (old Surat Agency).  
Jawhar (old Thana Agency).  
Lunawada (old Rewa Kantha Agency).  
Rajpiple (old Rewa Kantha Agency).  
Sachin (old Surat Agency).  
Sant (old Rewa Kantha Agency).

The headquarters of the Agency are at Baroda.

*Resident at Baroda and for the States of Western India and Gujarat.*—Lt.-Col. O. P. Hancock, C.I.E., O.B.E., M.C.

the Senior Maharani, the Minor Maharaja has been named H.H. Shri Shivaji (VI) Chhatrapati Maharaj. At present the State administration is run by a Regency Council with the Senior Maharani as Regent, and the Prime Minister, Revenue Minister, Judicial Minister and Education Minister as members of council.

On June 30, 1942, the Kolhapur State Government announced the constitution of a Legislative Assembly consisting of 51 members, of whom 4 are *ex officio* members of the Executive Council of Kolhapur, 6 nominated officials and 7 nominated non-officials. There are 9 other nominated members and 25 elected members.

Other salute States are: Janjira, area 379 sq. miles; population 103,600; revenue Rs. 8½ lakhs. Sawantwadi, area 930 sq. miles; population 252,200; revenue Rs. 6½ lakhs. Sangli, area 1,136 sq. miles; population 293,500; revenue Rs. 16 lakhs. Mudhol, area 368 sq. miles; population 72,600; revenue Rs. 8½ lakhs. Bhor, area 910 sq. miles; population 156,100; revenue Rs. 8 lakhs.

*Resident for Kolhapur and the Deccan States.*—J. H. Thompson, I.C.S.

**Madras States.**—The States of Travancore, Cochin and Pudukkottai are in relation with the Crown Representative through a Resident with his headquarters at Trivandrum. Travancore has an area of 7,662 sq. miles and a population of 6,070,018 (1941). Hindus form three-fifths of the population and Christians nearly one-third. The ruler is H.H. Maharaja Sri Sir Bala Rama Varma, G.C.I.E.; born 1912; succeeded 1924; invested with ruling powers on November 6, 1931; salute of 19 guns. There are two Legislative Chambers. The approximate revenue is Rs. 5·83 crores. The University of Travancore was established on October 31, 1937.

Cochin has an area of 1,480 sq. miles, and a population of 1,422,875 (1941). The ruler is H.H. Maharaja Ravi Varma, who was born in 1865 and succeeded in 1943; salute of 17 guns. The approximate revenue is Rs. 2·18 crores.

The present ruler of Pudukkottai is H.H. Sri Brihadamba Das Raja Rajagopala Tondaiman Bahadur, born 1922 and installed October 24, 1928; invested with ruling powers on January 17, 1944; salute of 11 guns. The area is 1,179 sq. miles and the population 438,348 (1941). The approximate revenue is Rs. 27·72 lakhs.

*Resident.*—H. J. Todd, C.I.E.

Administration Report, Travancore. Trivandrum. Annual.

Davies (F. S.), Cochin, British and Indian. London, 1923.

Hatch (Emily), Travancore. A Guide Book. 2nd ed. London, 1939.

**Mysore.**—According to tradition the ancestors of the present dynasty came to Mysore in 1399, and established themselves in Hadinad, a few miles from the present capital of the State. By successive conquests, the family extended the kingdom till it reached a position of eminence during the seventeenth century. In the latter part of the eighteenth century the real power passed into the hands of Hyder Ali. Under him and his son, Tippu Sultan, the territories of Mysore were largely extended. On the defeat of Tippu in 1799, the territories were partitioned and the Mysore State, in its present shape, was handed back to the old Hindu dynasty, in the person of H.H. Krishnaraja Wadiyar III. As a result of an inquiry made by a Committee into the administration, Lord William Bentinck assumed direct administration of the State in 1831; and for fifty years Mysore was administered by Commissioners. In 1865, the present ruler's grandfather was adopted as heir by the Maharaja, and in 1881 he was placed on the throne of Mysore, and invested with

powers under an Instrument of Transfer. In 1913 this was replaced by a treaty. In 1927, the Government of India announced the remission from the financial year 1928 in perpetuity Rs. 10½ lakhs of the annual subsidy, which had till that time amounted to Rs. 35 lakhs. In 1942-43 the subsidy paid amounted to Rs. 19·36 lakhs.

The area is 29,458 sq. miles, and the population 7,328,896 (1941). Mysore is famous for its picturesque and diversified scenery and for its temperate and healthy climate. The administration is carried on under H.H. the Maharaja by the Dewan (Prime Minister) and four Ministers, of whom two are chosen by H.H. the Maharaja from among the elected members of the Representative Assembly and the Legislative Council. There is a Representative Assembly of 320 members and a Legislative Council of 66 members. The Crown is represented by a Resident at Bangalore. In 1943-44, there were besides the High Court, 72 criminal and 45 civil courts, excluding six Courts of Justice of the Peace. There were 2,410 co-operative societies with 190,000 members. The University of Mysore had 10 constituent colleges, an engineering school and a medical school with a total strength of 5,606 students. The number of recognised educational institutions on March 31, 1943, was 7,986, with 411,528 scholars. The total revenue in 1943-44 was Rs. 807·42 lakhs and the expenditure chargeable to revenue was Rs. 804·97 lakhs. The State forests cover 4,384 sq. miles. The mines in the Kolar Gold Field area produced 221,976 ounces of fine gold during 1943-44.

The Ruler is H.H. Maharaja Sri Sir Jaya Chamaraja Wadiyar Bahadur, G.C.S.I., born 1919; married Princess Satya Premakumari, sister of H.H. the Maharaja of Charkhari, in May, 1938; succeeded September 8, 1940; salute of 21 guns.

*Resident in Mysore.*—Hon. Lt.-Col. P. Gaisford, C.I.E.

**North-West Frontier Agencies and Tribal Areas.**—Between the settled districts of the N.W. Frontier Province and the Afghan frontier is Tribal Territory. This region is divided into five Political Agencies: Malakand (Dir, Swat and Chitral), Khyber, Kurram, North Waziristan and South Waziristan. There are further areas known as Tribal Areas under the political control of the Deputy Commissioners of the six districts of the N.W. Frontier Province. There are five States in the Agencies and Tribal Areas—three in the Malakand Agency (Dir, Swat and Chitral States) and two in the Tribal Areas adjoining Hazara district (Amb and Phulera States). Chitral is ruled over by H.H. Shahzada Muzaffar-ul-Mulk, Mehtar; Dir by Nawab Sir Shah Jehan Khan, K.B.E.; Swat by Sir Abdul Wadud, K.B.E.; Amb and Phulera by a Nawab and Khan respectively. The gross revenue from all Agencies and Tribal Areas in 1943-44 was Rs. 9·13 lakhs. The total expenditure in 1943-44 was Rs. 230·75 lakhs, Rs. 65·39 lakhs being on political expenditure and Rs. 165·36 lakhs on Frontier Watch and Ward. The area of this tribal territory is 24,986 sq. miles, with an estimated population of 2,378,000.

**Punjab States.**—There are 45 States and Estates in the Punjab which are in political relations with the Crown Representative, through the Resident for the Punjab States, whose headquarters are at Lahore.

## 174 THE BRITISH COMMONWEALTH:—INDIAN STATES

as an Indian State. The Ruler is H.H. Maharaja Vibhanti Narain Singh Bahadur; born 1927; succeeded 1939; salute of 13 guns permanent, and 15 local. The Benares State has an area of 875 sq. miles, a population of 391,165 (1931); the approximate revenue is 19 lakhs. The present Maharaja being a minor, the State is administered by a Council of Administration until he attains his majority.

*Resident.*—C. G. Herbert, C.S.I., C.I.E.

**Hyderabad.**—The territory of this State, the largest (next to Kashmir, which, however, contains vast areas of almost uninhabited land), and most populous of Indian States, had become a province of the Moghul Empire in 1687. In 1713 the Emperor appointed Mir Kamruddin Ali Khan, otherwise known as Chin Kilij Khan, of Turkoman descent, as Subadar or Viceroy of the Deccan with the title of Nizam-ul-Mulk (administrator of the land). Nizam-ul-Mulk founded the present dynasty of the Nizam in 1724; and Hyderabad, founded in 1689 by a descendant of the Golconda dynasty which gave way to the Moghuls, became the capital. The present ruler is a direct descendant of the original Nizam-ul-Mulk.

The area is 82,698 sq. miles, and the population, 16,338,534 (1941). Most of the people are Hindus. The administration is carried on, subject to the orders of H.E.H. the Nizam, by an Executive Council. There is a Legislative Council of 20 members, in addition to the President. Of these 12 are official, 6 non-official and 2 extraordinary members. H.E. the Crown Representative is represented by a Resident whose headquarters are at Hyderabad. Besides the Hyderabad Municipality, there are 17 District and 108 Sub-district Boards. There are regular troops, including Imperial Service troops.

There are 1 Chief Justice and 12 Puisne Judges. In 1941 there were 296 officers administering criminal and civil justice, including 4 Sessions Judges and 4 Honorary Magistrates. In 1941, 79,626 criminal cases were instituted and 56,225 civil suits. The District and City Police numbered 15,466. The number of public educational institutions in 1941 was 5,502, with 408,462 pupils. There were 7 arts colleges, including 1 for women, and 3 professional colleges. The Omania University, in which teaching is in Urdu, was founded in 1918. The total expenditure on public instruction amounted to Rs. 97.38 lakhs. The revenue for 1943-44 was Rs. 1,582.59 lakhs (Service receipts) and Service expenditure Rs. 1,283.28 lakhs. The number of co-operative credit societies was 4,251 in 1941. Under industries there were 6 cotton mills, 357 pressing, ginning, decorticating, rice and oil factories. The number of factories working in 1941 was 629, of which 90 were flour mills, 306 ginning factories, 153 oil and rice mills, 90 decorticators and 3 distilleries. There were 40 joint-stock companies registered with a total paid-up capital of Rs. 42.72 lakhs. Trade covered Rs. 1,662.28 lakhs imports and Rs. 1,770.79 lakhs exports in 1941. The State has its own currency.

The ruler is General H.E.H. Sir Mir Usman Ali Khan, Faithful Ally of the British Government, G.C.S.I., G.B.E., Nizam of Hyderabad and Berar; born 1886; succeeded 1911; salute of 21 guns.

*Resident at Hyderabad.*—Sir Arthur Lothian, K.C.I.E., C.S.I.

*Administration Report, Hyderabad. Annual. McAliffe (R. F.).* The Nizam, the origin and future of the Hyderabad State. London, 1904.

**Jammu and Kashmir.**—The State of Kashmir, which had been under Hindu rulers and Mohammedan Sultans, became part of the Moghul Empire under Akbar from 1586. After a period of Afghan rule from 1756

it was annexed to the Sikh Kingdom of the Punjab in 1819. In 1820 Ranjit Singh made over the territory of Jammu to Gulab Singh. After the decisive battle of Sobraon in 1846 Kashmir also was made over to Gulab Singh under the Treaty of Amritsar. British supremacy was recognised. The bulk of the population are Mohammedans, though the ruling race is Hindu. The area is 84,471 sq. miles; the population according to the 1941 census is 4,021,616. Geographically the State may be divided into (1) the Tibetan and semi-Tibetan tracts which contain the districts of Ladakh and Gilgit; (2) the Jhelum valley, within which is situated the lovely and world-famous 'Happy Valley' of Kashmir; and (3) the submontane and semi-mountainous tract which includes Jammu, the winter capital of the State.

The Government of India is represented by a Resident, who resides at Srinagar. In 1942-43 there were in addition to the High Court 158 Criminal Courts, and offences involving 79,031 persons were tried. There were also 68 Civil Courts in which 27,373 civil suits were dealt with (including 9,588 suits under the Agriculturists' Relief Act), and of these 21,301 were disposed of. The trade in 1942-43 was: Imports, Rs. 345.50 lakhs; Exports, Rs. 139.49 lakhs. The revenue of the State in 1942-43 was Rs. 313.85 lakhs. In April, 1944, there were 1,989 educational institutions, including three arts colleges, an oriental college and 1,126 primary schools. There were in all 1,989 educational institutions with about 202,000 pupils. Primary education for boys is compulsory in the cities and important towns.

In addition to agriculture the chief industry is sericulture, which dates back to the 15th century. Forests cover about one-eighth of the total area of the State and are estimated to provide a revenue of Rs. 114 lakhs during 1944-45.

The Jammu and Kashmir State Forces (including auxiliary service) number 10,163, comprising Dogras, Gurkhas, Kangra Rajputs and Punjabi Jat-Sikhs. The expenditure on the Army during 1944-45 is estimated at about Rs. 90 lakhs.

Kashmir is linked with the railway system of India by two motor roads, the Jhelum Valley Road, 132 miles of which traverse through the State territory and the Banihal Cart Road, which is over 200 miles long and connects Srinagar, the summer capital, with Jammu, the winter capital.

The present ruler is Lieut.-General H.H. Raj Rajeshwar Maharajadhiraj Maharaja Shri Harisinghji Bahadur, G.C.S.I., G.C.I.E., K.C.V.O., LL.D., Maharaja of Jammu and Kashmir; born 1895; succeeded 1925; salute of 21 guns; heir apparent: Lieut. Yuvraj Karansinghji Bahadur, born 1931.

The Praja Sabha, or State Assembly, with 40 elected and 35 nominated members, holds two sessions every year.

*Resident in Kashmir.*—Hon. J. G. Acheson, C.I.E.

*Administration Reports of Jammu and Kashmir. Annual.*

**Kolhapur and Deccan States.**—In political relations with the Crown Representative through the Resident for Kolhapur and the Deccan States. Headquarters, Kolhapur. Consists of 6 salute and 11 non-salute States and one Estate. The premier State is Kolhapur, with an area of 3,217 sq. miles, a population (1941) of 1,092,000, and a revenue approximately of Rs. 50 lakhs. The succession of Shri Pratapsingh, second son of Nanasaheb Shantarrao Bhonsale of the Chaurkar collateral branch (descended from Sharaji, uncle of Shivaji the Great), to the Kolhapur Gadi has been recognised by His Majesty the King Emperor. After his adoption by H.H.

## BURMA

**Constitution and Government.**—As far back as 1612 the East India Company had agents and factories at Syriam (near Rangoon), Promé and Ava. From 1796 there was a Resident at Rangoon. The first Burma War gave in 1826 Arakan and Tenasserim to the British; in 1852 Pegu was annexed by Lord Dalhousie; in 1862 the Provinces in Burma were amalgamated under a Chief Commissioner; and in 1886 Upper Burma was annexed. In 1897 the charge was changed to a Lieut.-Governorship. In 1923 the Province was constituted a Governor's Province under the Government of India Act of 1919. It was separated from India on April 1, 1937. In the hot weather season the Government moves from Rangoon to Maymyo. The

executive authority of Burma is exercised on behalf of His Majesty by the Governor, who has a Council of Ministers not exceeding 10 in number to aid and advise him in the exercise of his functions, except in so far as he is required to exercise them or any of them in his discretion. So far as these latter functions are concerned, the Governor may appoint Counsellors, not exceeding 3 in number, to assist him. There are seven administrative Divisions, exclusive of the Shan States (four Lower Burma, three Upper Burma) under Commissioners, and under these again 37 Deputy Commissioners of Districts. The Northern and Southern Shan States, which form part of British Burma, are administered by their Chiefs under the supervision of the Commissioner of the Federated Shan States; These groups were federated in 1922; and since 1923 there has been a Council of Chiefs. In 1930 the unadministered area between the Lushai Hills District, the Chin Hills District, the Akyab District, and the Hill District of Arakan, was absorbed into the Chin Hills District and the newly constituted Arakan Hill Tracts, and also taken under administration, the Chin Hills Regulation being applied to it. The newly constituted Arakan Hill Tracts are administered by a Superintendent who is under the control of the Commissioner, Arakan Division, and is drawn from the cadre of the Burma Frontier Service. The first step towards direct administration in the Triangle and Hukawng Valley was taken in 1930 by the application of the Kachin Hill Tribes Regulation, with slight modifications.

The Legislature consists of two Chambers, known respectively as the Senate and the House of Representatives. The former consists of 36 Members, of whom 18 are elected by the House of Representatives, in accordance with the system of proportional representation by means of the single transferable vote; the rest are chosen by the Governor. The House of Representatives consists of 132 elected Members.

Japanese forces occupied Rangoon on March 8, 1942. By March, 1945, much of northern Burma had been recovered and Mandalay entered by British and Indian troops.

*Governor*.—H.E. the Rt. Hon. Sir Reginald Hugh Dorman-Smith, P.C., G.B.E. (assumed office May 6, 1941; salary, Rs. 120,000 per annum).

The Japanese on August 1, 1942, set up a form of Government in Burma, which is a joint Japanese and Burmese administration under Dr. Ba Maw, and granted Burma 'independence.' The supreme power, however, is in the hands of the Japanese Commander-in-Chief. The Burma parliament has disappeared under the new scheme.

Officials of the Burma Government, working closely with the military command, have taken over the administration of the reoccupied areas of Burma.

**Area, Population and Religion.**—The area of Burma is 261,610 sq. miles. Burma proper, inclusive of the Chin Hills and Kachin Hill Tracts, covers 192,158 sq. miles. The Shan States cover 62,335 sq. miles; and there are 7,117 sq. miles of unadministered territory. The total population (1931) was 14,667,146, including 9,000,000 Burmans, 1,200,000 Shans, 300,000 Chins and 150,000 Kachins. Of the non-indigenous races the Chinese (150,000), the Indo-Burmans (120,000), Europeans (8,000), and the Anglo-Indians (17,000) are the most important. The leading towns are Rangoon, the capital (400,415), Mandalay (147,932), and Moulmein (65,506). The proportion of religions per 1,000 in 1931 was: Buddhists, 843; Animists, 52; Mohammedans, 40; Hindus, 39; Christians, 23; and others, 3. The Burmans belong to the

States Agency.—The Western India States Agency

**Western India States Agency.**—The Western India States Agency was created in 1924, but as from November 11, 1944, it was amalgamated with the Gujarat Agency (*see* p. 167). There are 16 salute States in the Agency. The Cutch State is in direct political relations with the Agency. The States of Western India; the States of Junagadh, the Resident for the States of Western India; Dhrol and Rajkot with the Nawanager, Porbandar, Gondal, Jafrabad, Dhrol and Rajkot with the Nawanager, Western Kathiawar Agency, and the States of Bhavnagar, Political Agent, Radhanpur, Morvi, Wankaner, Palitana, Limbdi and Dhrangadhra, Western Kathiawar Agency, Eastern Kathiawar Agency. Rajkot is the headquarters of the Resident and the Political Agents. Except certain Matadari estates comprising the Vatrak Kantha Thana, all non-salute States, Talukas and estates which were formerly in direct relations with the Agency have been attached to bigger States, which include Baroda and Idar. The Western India States Agency covers an area of 36,091 square

## 184 THE BRITISH COMMONWEALTH:—STRAITS SETTLEMENTS

administered by their own Chiefs under the advice of the Commissioner of the Federated Shan States through his representative, an Assistant Political Officer, who resided at Loikaw.

## MALAYA.

## THE STRAITS SETTLEMENTS.

## Constitution and Government.

The Straits Settlements, a Crown Colony, comprised the Settlements of Singapore (including the Cocos Islands and Christmas Island), Penang (including Province Wellesley), Malacca and Labuan. Malacca, one of the oldest European settlements in the East, was occupied by the Portuguese under Albuquerque in 1511, and held by them till 1641, when it passed into the possession of the Dutch, remaining in the hands of the Dutch till 1795 when it was captured by the English. It was restored (under the Treaty of Vienna) to the Dutch in 1818, being finally retroceded to the East India Company in 1824.

Penang (Prince of Wales' Island) was the first British Settlement in the Malay Peninsula, being ceded by the Sultan of Kedah to the East India Company in 1786, Province Wellesley being added in 1800.

The early history of Singapore is obscure; in the thirteenth and fourteenth centuries it occupied a position of independence and importance till destroyed by the Javanese about 1365, after which date it remained almost uninhabited until 1819, when Sir Stamford Raffles founded the trading settlement which is now the free port and city of Singapore. The original lease of the site of a factory to Raffles, on behalf of the East India Company, by the Sultan of Johore, and the Temenggong, Chief of Singapore, was followed in 1824 by a Treaty ceding the entire Island in perpetuity to the Company. In 1826, the three Settlements were incorporated under one Government as an Indian Presidency with headquarters at Penang. In 1830, the Settlements were incorporated under the Presidency of Bengal, headquarters being transferred in 1836 to Singapore. On April 1, 1867, the Settlements were transferred from the control of the Indian Government to that of the Secretary of State for the Colonies. The Cocos Islands in 1886, Christmas Island in 1889, and the former Colony of Labuan in 1905, were brought under the control of the Governor of the Straits Settlements, being incorporated in the Colony, in the Settlement of Singapore in 1903, 1900 and 1907 respectively.

Labuan was constituted a separate settlement in 1912.

The administration of the Colony was in the hands of a Governor, aided by an Executive Council. There was also a Legislative Council.

The Governor of the Straits Settlements was also *High Commissioner* for the Malay States and the Bornean States of Brunei and *British Agent* for the States of North Borneo and Sarawak.

The above information (and indeed throughout this section) refers to the period before the Japanese invasion which culminated with the surrender of Singapore on February 16, 1942. Since then the administration of Malaya has been in the hands of Japanese; the States of the Federation are treated as separate entities both administratively and financially. The existing Malayan dollar is legal tender side by side with the Japanese military currency notes.

## Area and Population.

The total area of the Colony, with dependencies, is 1,356 sq. miles. Singapore is an island about twenty-six miles long by fourteen wide,

with an area of 220 square miles, separated from the southern extremity of the Malay Peninsula by a strait three-quarters of a mile in width. A number of small islands adjacent form part of the Settlement. The seat of government was the town of Singapore, at the south-eastern point of the island. Penang is an island of 110 square miles, off the west coast of the Malay Peninsula, at the northern entrance of the Straits of Malacca. On the opposite shore of the mainland, distant about two miles, is Province Wellesley, a strip of territory forming part of the Settlement of Penang, averaging eleven miles in width, and extending thirty-one miles along the coast, including ten miles of territory to the south of the Krian; total area 290 square miles. The capital of Penang is George Town. The Settlement of Malacca, with a capital town of the same name, is on the west coast of the peninsula between Singapore and Penang—about 154 miles by road from the former and 347 miles by road from the latter; it is a strip of territory 43 miles in length, and 26 miles in breadth, with an area of 640 square miles. Population of Malacca town (mid-1940) was 45,010.

The population of the Straits Settlements, according to the census of 1931, inclusive of the garrison, was 1,114,015 (671,080 males and 442,935 females).

The population as estimated at June 30, 1941, was as follows:—

| Settlement or Province    | Malaya  | Europeans | Eurasians | Chinese | Indians | Others | Total     |
|---------------------------|---------|-----------|-----------|---------|---------|--------|-----------|
| Singapore Island          | 77,281  | 14,585    | 8,321     | 599,659 | 59,838  | 9,582  | 769,216   |
| Penang Island             | 41,853  | 2,464     | 2,874     | 166,974 | 81,916  | 1,879  | 247,460   |
| Province Wellesley        | 78,060  | 869       | 808       | 63,705  | 28,587  | 558    | 171,587   |
| Malacca                   | 111,907 | 599       | 2,481     | 92,125  | 28,282  | 693    | 236,087   |
| Labuan                    | 5,842   | 34        | 55        | 3,319   | 154     | 59     | 8,963     |
| Christmas Island          | 149     | 27        | 1         | 1,192   | 71      | —      | 1,440     |
| Cocos Island              | 1,087   | 28        | —         | 29      | 3       | —      | 1,142     |
| Total—Straits Settlements | 315,629 | 18,101    | 13,540    | 927,003 | 148,851 | 12,771 | 1,485,895 |

\* Estimated population as at December 31, 1940, plus excess of births over deaths for the first half-year ending June 30, 1941.

\* Actual population as at census, 1931.

## Births and deaths for 1940:—

|        | Singapore Island | Penang Island | Province Wellesley | Malacca | Labuan | Christmas Island | Total  |
|--------|------------------|---------------|--------------------|---------|--------|------------------|--------|
| Births | 33,795           | 8,242         | 6,383              | 9,247   | 365    | 23               | 58,055 |
| Deaths | 13,765           | 5,046         | 3,258              | 5,524   | 262    | 8                | 29,808 |

## Education.

The numbers of schools and scholars in 1940 were as follows:—

|                                                  | No. of Schools | Enrolment | Attendance |
|--------------------------------------------------|----------------|-----------|------------|
| Government English schools (boys and girls)      | 26             | 10,716    | 10,348     |
| Grant-in-aid English schools (boys and girls)    | 34             | 16,975    | 16,289     |
| Government Vernacular schools (boys and girls)   | 224            | 27,888    | 26,049     |
| Grant-in-aid Vernacular schools (boys and girls) | 156            | 27,499    | 26,374     |
| Total                                            | 420            | 83,078    | 79,060     |

**Tibetan group.** Occupations connected with cultivation were returned at the 1931 census by 4,197,772 persons as their principal occupation, and by 116,725 persons as a subsidiary occupation.

**Education.**—The number of pupils in the 8,270 recognised colleges and schools was 639,359 in 1939-40; and 212,663 in the 13,745 unrecognised institutions. Higher education is controlled by the university, Anglo-vernacular and English schools by Government, and vernacular education by local bodies. In almost every village there is a Buddhist monastery, where the three R's are taught. There were in 1939-40, 557,326 pupils in upper and lower primary stages, 44,955 in the middle and 15,312 in the high and 2,466 in the collegiate stages. The teaching University of Rangoon was constituted in 1920, with two Arts Colleges; and there is an Intermediate College at Mandalay. The Medical College and the Teachers Training College, which were opened in 1929 and 1931 respectively, are constituent colleges of the Rangoon University. The Agricultural College at Mandalay, which resumed teaching during the year, was recognised by the University of Rangoon as a constituent college. There is also a Forest School at Pyinmana, and a Technical Institute and a Veterinary College at Insein (near Rangoon).

**Justice and Crime.**—There is a High Court at Rangoon (constituted 1922) for the control of the administration of Civil and Criminal Justice; there are a Chief Justice and 9 Judges. Besides Sessions Judges there were 552 Stipendiary Magistrates in 1939; 130,159 criminal cases were brought to trial in 1939. The number of civil suits instituted was 32,756 in 1939. In 1938 there was a Civil Police Force of 13,427 officers and men under an Inspector-General; a Rangoon Town Police Force of 1,670 under a Commissioner of Police, and—the special feature of Burma—three battalions of Military Police, the strength of which was 4,196 men.

**Finance.**—The revenue receipts (actual) of 1939-40 were Rs. 1,714 lakhs, to which Land Revenue contributed Rs. 510 lakhs, Customs Rs. 398 lakhs, Taxes on Income Rs. 184 lakhs, Excise Duties Rs. 173 lakhs, Forests Rs. 144 lakhs, Excise Rs. 98 lakhs, Stamps Rs. 33 lakhs, other heads Rs. 174 lakhs. The expenditure charged to revenue totalled Rs. 1,568 lakhs, the largest item being Defence Services, Rs. 167 lakhs; Police, Rs. 158 lakhs; next, Superannuation Allowances and Pensions, Rs. 148 lakhs; Civil Works, Rs. 121 lakhs; General Administration, Rs. 118 lakhs.

Estimates 1941-42, revenue, Rs. 17.13 crores; expenditure, Rs. 18.28 crores.

**Production and Industry.**—The area of reserved Forests at the end of 1939-40 was 31,637 sq. miles. The out-turn of teak by lessees was 307,997 tons.

Principal crops, 1939-40:—rice, 12,990,000 acres producing 4,565,000 tons; sesamum, 1,451,000 acres, 52,000 tons; ground nuts, 760,000 acres, 186,000 tons; cotton, 350,000 acres, 99,000 bales; maize, 244,000 acres, 44,000 tons; tobacco, 142,000 acres, 63,000 tons.

In 1938 the output of tin was, in the Tenasserim area, 4,479 tons, and in the Yamethin District, Mandalay Division, 39 tons; of tungsten ore, 8,849 tons; of silver, entirely from the mines of the Burma Corporation, Ltd., in the Northern Shan States, 5,920,000 troy ounces. The total provincial output of petroleum (1938) was 263,823,265 gallons. The quantities of minerals produced in Burma in 1937 were:—petroleum 274,664,365 gallons; lead, 76,500 tons; tin concentrates, 6,623 tons; tungsten concen-

trates, 4,998 tons; silver, 6,180,000 ounces; zinc concentrates, 73,552 tons; building materials, 3,126,587 tons; copper mate, 7,750 tons; nickel speiss, 4,020 tons; salt, 53,813 tons; antimonial lead, 1,150 tons; jadeite, 2,952 cwts.; iron-ore, 25,426 tons; ruby and sapphire, 161,700 carats; gold, 1,004 ounces; clays, 18,092 tons, and amber, 38.7 cwts. Their value was estimated at 9,276,364l.

The total number of factories of all kinds was 1,019 in 1938; and the total number of persons employed in factories was 86,383.

**Commerce and Communications.**—In 1938-39 the whole sea-borne foreign trade of Burma was Rs. 69.28 crores. Customs duty realised Rs. 364.02 lakhs. The total value of export trade was Rs. 48.52 crores, of which rice accounted for 20.69 crores. The estimated out-turn of rice was 5.36 million tons, out of which 2.93 million was exported. The proportions in both tons and value are remarkable. The length of metalled roads was 3,760 miles, and there were 6,770 miles of unmetalled roads. Burma had also 60 miles of navigable canals. Its great river, the Irrawaddy, is navigable up to Bhamo, and its tributary, the Chindwin, is navigable for 900 miles from the sea; and its tributary, the Salween, is navigable for 300 miles. Consequent on the separation of Burma from India, the railways were taken over by the Government of Burma with effect from April 1, 1937. The open mileage for the year 1939-40 was 2,266 miles. The system extends from Rangoon to Myittha, 742 miles to the north; to Lashio, 560 miles to the north-east; to Ye-U, 515 miles to the north-west; to Ye, 267 miles to the south-east, and to Bassein, 191 miles, and Kyaukse, 174 miles to the west. A new line of communication has been constructed between Lashio (Burma) and Kunming (Yunnan, China), a distance of about 800 miles, replacing the old mule routes for land communication between the two countries. (For a map of the Burma-China road, see STATESMAN'S YEAR-BOOK for 1939.) Gross earnings of Government owned railway system, 1929-40, 3,92,10,844 rupees; operating expenses, 2,68,67,358 rupees.

## BURMA STATES.

The 6 Northern and the 28 Southern Shan States, federated since 1922, are not States on the same footing as States in the Indian Empire, but are an integral part of British Burma, forming, as they did, part of the old Burmese Kingdom. They do not, however, fall within the ambit of the Burma Legislature or Ministers, but are specially administered. The total area is 57,816 sq. miles, with a population of 1,615,765.

To the south of the Southern Shan States are the three Karen-ni States, with an area of 4,519 sq. miles and a population of 58,761. They form a group of Feudatory States, and are not part of British Burma. They were

The Board of Commissioners of Currency Malaya, constituted under the Currency Ordinance, 1938, was the issuing authority for currency notes and coins for the whole of Malaya. The Malayan monetary unit was the dollar of one hundred cents. Malayan currency notes were of unlimited legal tender. The smaller denominations of notes were \$1, \$5 and \$10 and the larger denominations \$50, \$100, \$1000 and \$10,000.

The silver dollars are of limited legal tender up to 10 dollars, and silver, nickel and copper coins representing fractional parts of the dollar are legal tender up to 2 dollars.

The value of currency notes in circulation on December 31, 1940, was 164,578,896 dollars.

The standard measures recognised by the laws of the Colony are as follows: (a) Standard of length, the imperial yard; (b) standard of weight, the imperial pound; (c) standard of capacity, the imperial gallon.

Among the Asiatic commercial and trading classes, Chinese steel-yards (called 'liteng' and 'daching') of various sizes are generally employed for weighing purposes.

The undermentioned are the principal local measures of weight and capacity used, with their relation to English standards:—

|                       |              |
|-----------------------|--------------|
| The chupak            | = 1 quart.   |
| The gantang           | = 1 gallon.  |
| The tahil             | = 1½ ozs.    |
| The kati (16 tahils)  | = 1½ lb.     |
| The picul (100 katis) | = 133½ lb.   |
| The koyan (40 piculs) | = 5,333½ lb. |

The more common local measures of length in use are:—

|                   |                                     |
|-------------------|-------------------------------------|
| 2 jengkals        | = 1 hasta.                          |
| 2 hastas          | = 1 ela.                            |
| 2 elas            | = 1 depa (1 fathom or 6 feet).      |
| 4 square depas    | = 1 square jamba (144 square feet). |
| 400 square jembas | = 1 square orlong (1½ acres).       |

**The Cocos or Keeling Islands**, a group of about twenty small coral islands. Latitude 12° S. and Longitude 96° 50' E., 581 miles distant from Java Head (S. 56° W.), and 1,161 miles from Singapore (S. 30° W.). The largest is 5 miles by ½ mile. They were declared a British Possession in 1857, were placed by Letters Patent of October 13, 1878, under the control of the Governor of Ceylon, and by Letters Patent of February 1st, 1886, under the Governor of the Straits Settlements. In 1903 they were annexed to the Straits Settlements and incorporated with the Settlement of Singapore. Population on April 1, 1931, 1,142 (males, 608; females, 534). The principal cultivation consists of coconuts, and copra, coconut-oil and nuts are exported. In 1902 a station on the Cape-Australia cable route was established on Direction Island in the north-eastern part of the group.

**Christmas Island**.—In the Indian Ocean. Latitude 10° 30' S. and Longitude 105° 40' E. It lies 223 miles S. 8° E. of Java Head, and 529 miles N. 79° E. from the Cocos Island. It is of irregular shape, about 11 miles long (at the longest point), and about 4½ miles wide (at the narrowest point). Area about 60 square miles. The climate is healthy. The Island was formally annexed on June 6, 1888, placed under the administration of the Governor of the Straits Settlements in 1889, and incorporated with the Settlement of Singapore in 1900. The Island is

administered by a District Officer of the Malayan Civil Service. There is a small force of Sikh Police drafted from the Straits Settlements Police Force. All the employed inhabitants (mainly Chinese and Malays) were employed by the Christmas Island Phosphate Company, Limited, registered in London, which worked the large natural deposits of phosphate of lime to which the Island owes its importance. In 1923 a wireless station was installed, and the Island is in direct communication with Singapore. A school was established in 1931, and a teacher supplied by the Government. Population, December 31, 1940, 1,431 (adult males, 1,113; adult females, 145; children 178). Expenditure of District Office in 1940, 81,086 dollars. Imports, 1940, chiefly iron, steel manufactures, building materials, oil and foodstuffs; exports in 1940 consisted solely of phosphate of lime, 238,006 tons. Shipping: 90,510 tons entered in 1939, and 85,527 tons cleared.

Japanese forces occupied Christmas Island on April 10, 1942.

Labuan is an island, 35 square miles in area, lying six miles off the north-west coast of Borneo, and distant about 72½ miles from Singapore. It has a fine port, Victoria Harbour, safe and easy of access. The Settlement comprises seven smaller islands, some of which are under cultivation. It was ceded to Great Britain by the Sultan of Brunei in 1846 and was governed as a separate Crown Colony until the end of 1889, after which the Administration was incorporated with that of British North Borneo. At the end of 1905, the Governor of the Straits Settlements was appointed also Governor of Labuan, the island still remaining a separate Colony. In 1907 it was annexed to the Straits Settlements and declared part of the Settlement of Singapore; and in 1912 it was constituted a separate Settlement (mid 1941) was 8,963, including 34 Europeans, 5,342 Malays and 3,319 Chinese. Capital, Victoria, which had 2,022 inhabitants (census, 1931). Revenue (1940), 85,113 dollars; expenditure (1940), 178,578 dollars. Shipping entered and cleared, 1939, 272,927 tons. Gross trade (1940), 3,150,901 dollars, including foreign trade, 1,606,460 dollars.

## THE FEDERATED MALAY STATES.

**Constitution and Government.**—The Federated Malay States of Perak, Selangor, Negri Sembilan and Pahang, in the Malay Peninsula, were under British protection. The Governor of the Straits Settlements was *ex officio* H.M. a High Commissioner for these States and for the other Malay States in the British sphere (Johore, Kedah, Kelantan, Trengganu and Perlis).

The following are the Rulers of the four States:—

**Ruler of Perak.**—H.H. Paduka Sri Sultan Abdul Aziz Al-Muktassim Bil'lah Shah, K.C.M.G., K.B.E.

**Ruler of Selangor.**—H.H. Sultan Hisamud-din Alam Shah, K.C.M.G., ibni Al-Marhum Sultan Ala'idin Sulaiman Shah.

**Ruler of Negri Sembilan.**—H.H. Tuanku Abdulrahman, K.C.M.G., ibni Al-Marhum Tuanku Muhammad, Yang Di-Pertuan Besar.

**Ruler of Pahang.**—H.H. Al-Sultan Abu Bakar Ri'ayatu'd-din Al-Mu'ad-dzam Shah, K.C.M.G., ibni Al-Marhum Al-Mu'tasim Bil'lah Al-Sultan Abdullah.

In the period 1874–1895, the four States of Perak, Selangor, Negri Sembilan (which is itself a federation of small states) and Pahang entered into treaty relations with Great Britain by which they sought and obtained British protection and the assistance each of a Resident to advise the

# 190 BRITISH COMMONWEALTH:—FEDERATED MALAY STATES

Ruler, and of other British officers to assist in the administration. In July, 1895, these four states agreed to form a federation and to maintain a contingent of troops. In 1909 a Federal Council was constituted to pass laws concerning such matters as it was thought desirable should be regulated by the federal government.

In each state there was also a State Council presided over by the Ruler and consisting besides of various Malay chiefs, official and unofficial members nominated by the Ruler. The Negri Sembilan State Council had an Upper and Lower Chamber.

**Area.**—The areas of these States are approximately:—Perak (including Dindings), 7,980 sq. miles; Selangor, 3,160 sq. miles; Negri Sembilan, 2,580 sq. miles; Pahang, 13,820 square miles; total, 27,540 sq. miles.

**Population.**—Estimated, June 30, 1941: Perak (including Dindings), 992,691; Selangor, 701,552; Negri Sembilan, 296,009; Pahang, 221,800; total 2,212,052. The population consisted of 11 149 Europeans, 5,286 Eurasians, 722,626 Malays, 989,635 Chinese, 466,056 Indians, and 17,800 others. Births, 1940, 86,174; deaths, 40,367. The largest town is Kuala Lumpur (in Selangor) with 138,425 inhabitants (1939).

**Education.**—In 1940 there were 49 English schools (85 for boys and 14 for girls), with an average enrolment of 13,564 boys and 5,341 girls. Of the vernacular schools, there were for the Malays 582 schools with an average enrolment of 63,688; for the Chinese 572 registered schools with 58,227 pupils; and for the Tamils 17 Government, 463 aided, and 100 non-aided schools, with a total enrolment of 23,527 pupils. Expenditure on education was 437,796*l.* in 1940.

**Justice and Crime.**—The Courts in the Federated Malay States are:—(1) The Supreme Court which is a Federal Court with unlimited civil and criminal jurisdiction, presided over by the Chief Justice and consisting of Courts of a Judge and the Court of Appeal; (2) Courts of Magistrates of the First Class; (3) Courts of Magistrates of the Second Class; (4) Courts of Penghulus, and (5) Courts of Kathis. The Court of a Penghulu has a very limited jurisdiction defined in each case by the 'kuasa' of the individual Penghulu. The Court of a Kathi has powers, also defined in the 'kuasa' of each individual Kathi, in respect of certain matters concerning Muhammadan law, and appeals from the decisions of a Kathi go to the Ruler in State Council. There is a final right of appeal from the Supreme Court to the Privy Council.

The number of cases of serious crime (murder, gang-robbery and robbery) reported in 1940 was 84.

**Finance.**—The revenue of the States in 1940 was 11,493,060*l.*, inclusive of 213,514*l.* excess war duty levied on liquors, tobacco and excise. Expenditure was 9,166,303*l.*, inclusive of 1,159,409*l.* extraordinary expenditure. Public debt on December 31, 1940, amounted to 9,850,000*l.*

**Production.**—Agriculture shares with mining the position of primary importance in the economy of the Federated Malay States. In addition to rubber, of which there are 1,699,459 acres, there are several other agricultural products, such as coconuts, 251,960 acres; rice, 186,310 acres; oil palms, 40,629 acres, besides smaller areas under such crops as tapioca, pineapple, tea, coffee, fruits, arecanuts and tobacco. Mining is carried on extensively, and the output of tin in 1940 was 35,689 tons; gold, 31,633 ounces; tungsten, 20 tons, and of coal, 781,608 tons. The labour force

engaged in mining numbered 91,145. The forests produce many excellent timbers, which, before the war, were finding an increasing market in Europe, besides guttapercha, guma, oils, resins and canes. The out-turn of timber, firewood and charcoal, expressed in hundreds of cubic feet solid, amounted to 352,400 (round measurement) in 1940.

**Commerce.**—The trade (excluding bullion and specie) was as follows in 1940, with total for 1939:—

|                               | Perak        | Selangor     | Negri Sembilan | Pahang      | Total 1940   | Total 1939   |
|-------------------------------|--------------|--------------|----------------|-------------|--------------|--------------|
| Imports                       | £ 5,499,734  | £ 10,191,343 | £ 1,805,978    | £ 577,565   | £ 17,577,610 | £ 13,985,929 |
| Exports, including Re-exports | £ 28,783,711 | £ 18,580,388 | £ 6,152,728    | £ 1,916,474 | £ 50,432,246 | £ 29,168,379 |

Trade with United Kingdom: imports, 1940, 3,174,726*l.* Exports and re-exports, 1940, 7,236,832*l.*

**Communications.**—The total mileage of metalled roads on December 31, 1940, was 3,108 miles, of which 2,379 miles or 76 per cent. were bituminously treated. In addition, there were 198 miles of unmetalled roads and 1,565 miles of bridle-paths.

The Government had made, purchased or leased the railway systems of the whole peninsula south of the Thailand boundary, including the railway on Singapore Island. It had leased the Johore State Railway (121 miles) extending from Johore Bahru at the southern extremity of the Peninsula and opposite Singapore, to Gemas on the boundary between Johore and the Federated Malay States. At Gemas the line branches into the West Coast and the East Coast Lines; the West Coast Line runs north-north-west through Negri Sembilan, Malacca, Selangor, Perak and Province Wellesley to Prai—the port opposite Penang Harbour—488 miles from Singapore. From Bukit Mertajam near Prai the line proceeds northwards through the Unfederated States of Kedah and Perlis, to the Thailand frontier station of Padang Besar 580 miles from Singapore. Through traffic with the Thai State Railways was opened on July 1, 1918, the distance between Singapore and Bangkok being 1,195 miles. Through services were in operation between Penang and Bangkok, the journey occupying 27 hours compared with a sea journey of 4 days.

The East Coast Line proceeds northward from Gemas through Negri Sembilan, Pahang and Kelantan to Tumpat on the north-east coast of the Unfederated Malay State of Kelantan, 328 miles from Gemas.

Through working between the Federated Malay States and Kelantan via the Thai State Railways commenced on November 1, 1921, and via the East Coast Railway on September 5, 1931.

An extension from Pasir Mas in Kelantan runs in a westerly direction for 11½ miles to the Golok River at the Thailand boundary, where it joins the Thailand line running to Haad Yai Junction, on the main Bangkok-Penang line. Branch lines connect the main line with the ports on the west coast at Malacca, Port Dickson, Port Swettenham, Teluk Anson Wharf and Port Weld.

A causeway carrying two lines of rails and a roadway has been built across the Johore Strait, connecting the island of Singapore with the Peninsula. The line is of metre gauge. The total route mileage open for traffic was 1,068 miles.

For postal information, see under STRAITS SETTLEMENTS.

**Money &c.**—The currency, weights and measures are the same as those in use in the Straits Settlements.

### THE UNFEDERATED MALAY STATES.

The Unfederated Malay States are five in number, namely, Johore, Kedah, Perlis, Kelantan and Trengganu.

The relations of Johore with Great Britain are defined by a treaty dated December 11, 1885; and, by an amendment to this treaty made on May 12, 1914, the Sultan agreed to accept, and to act upon the advice of, a British officer called the General Adviser. The Sultan is assisted in the administration of the State by an Executive Council, and by a Legislative Council consisting of official and unofficial members.

The rights of suzerainty, protection, administration and control of the other four States were transferred from Siam to Great Britain by the Anglo-Siamese treaty of March 10, 1909.

In these States the currency, weights and measures are the same as in the Straits Settlements and the Federated Malay States. Their trade is almost entirely carried on with the Straits Settlements.

The religion of the Malays is Islam.

**Johore** (area 7,380 square miles; estimated mean population in 1940, 787,590, of whom 809,520 were Malaysians, 348,590 Chinese, and 76,230 Indians) lies at the extreme south of the Malay Peninsula. The interior of the country is in great part covered with jungle and is less mountainous than any other part of the Peninsula. In 1940, the birth rate was 48.82, the death rate 19.77, and the infantile mortality rate 147.

Revenue (1940), 24,787,983 dollars (from Customs, 11,080,421 dollars; licences, 4,012,727 dollars; lands, 8,644,825 dollars). Expenditure, 23,548,568 dollars. Imports (1940), 57,975,959 dollars (animals, food, drink and tobacco, 27,158,820 dollars; raw materials and articles mainly unmanufactured, 2,669,615 dollars; articles wholly or mainly manufactured, 26,785,262 dollars; parcel post, 616,463 dollars; coin and bullion, 46,800 dollars). Exports, 138,914,062 dollars (rubber, 117,434,870 dollars and 205,211 tons). Re-exports, 1,938,979 dollars.

At the end of 1940, a total length of 929 miles of metalled roads were maintained by Government. The railway from Penang to Singapore traverses Johore for a distance of 121 miles. The Johore section had been leased to the Federated Malay States Government for a term of years. Rubber estates are situated on either side along practically the whole length, and thus, with the help of roads and navigable rivers, good communication is available. A causeway across the Straits of Johore, and connecting Johore with the island of Singapore, was opened to railway traffic in October, 1923, and to vehicular traffic in June, 1924.

An efficient medical service and public hospitals were maintained by the Government.

**Ruler.**—His Highness Sir Ibrahim, G.C.M.G., G.B.E.

**Kedah**, on the west coast of the Peninsula, and north of Province Wellesley and Perak, has an area of 8,660 square miles. The population (estimated mid-year 1940) was 515,758, of whom 334,054 are Malays, 106,049 Chinese, 60,850 Indians, 783 Europeans, and 14,022 other races. The capital is Alor Star on the Kedah River, about 70 miles from Penang by sea, and 59 by rail or road. The police force had a strength (January, 1941) of 821 men (principally Malays). There were English schools for boys at Alor Star and Sungai Patani, 118 Malay vernacular schools (14,191 pupils), and 20 post-offices. A telephone system extends throughout the State. The railway connecting the Federated Malay States and Thailand passes through the State. A metalled road (26 miles) connects Alor Star with Perlis, and (29 miles) with the Senggora frontier (Thailand), and a metalled road (44 miles) connects it with Province Wellesley. Another metalled road (7 miles) connects Baling with Upper Perak in one direction and with Province Wellesley in the opposite direction. The total mileage of metalled road (1941) was 423. 174 miles of canal were maintained. The revenue of the State for the year 1940-41 (Mohammedan year A.H. 1359) was 1,124,108, including Customs, 570,084; lands, 148,346, and opium monopoly, 114,146; and the expenditure, 969,417. Public debt, January, 1941, nil. The principal produce of North Kedah is rice. There are rubber (export, 1940, 62,179 tons), coconut and tapioca estates in South Kedah. Several steamers ply between Penang and the various ports of Kedah. Kedah trade (1940-41): imports, 3,310,333; exports, 6,925,188. Postal and telegraph revenue, 1940-41,

26,010; expenditure, 28,769. Postal articles dealt with numbered 3,452,280 (excluding registered articles, 145,250; parcels, 16,416).

**Ruler.**—H.H. Sultan Sir Abdul Hamid Halim Shah, K.C.M.G., Ibni Almerhum Sultan Ahmad Tajudin Mukarram Shah (succeeded in 1891)

**Regent and Raja Muda.**—H.H. Tunku Sir Badlishah, K.B.E., C.M.G.

**Perlis**, on the west coast of the Malay Peninsula and north of Kedah, has an area of about 810 square miles and a population (estimated at the middle of 1940) of 57,776. Malays numbered 46,138 of the population, Chinese 8,482, Indians 1,178 and other races 2,083. Police force (1940) 106 officers and men. 25 boys' and 4 girls' vernacular schools were maintained, with total enrolments of 2,547 and 442 respectively. The principal products are rubber, rice, tin and coconuts, and guano deposits abound. There are 85 miles of metalled and asphalted roads, 11 miles of metalled and gravelled roads, 24 miles of gravelled roads and 18 miles of earth roads in the State.

Kangar is the headquarters of the State and Arau is the residence of His Highness the Raja.

The revenue for A.H. 1358 (1940-41) was 1,021,746 dollars (customs 671,756 dollars), and the expenditure was 829,269 dollars. Public debt, nil.

**Ruler.**—H.H. Tuan Syed Alwi Jamalullail, K.B.E., C.M.G.

**Kelantan**, on the east coast of the Malay Peninsula, has an area estimated at 5,720 square miles and a population (estimated for 1940) of 390,332, of whom 333,922 were Malays and 56,410 Indians, and 173 Europeans. Kota Bharu, the capital, had a population of 14,848 (1931). There were 61 vernacular boys' schools, 2 vernacular girls' school, 1 English boys' school and 1 English girls' school in the State. The High Court, the Central Court, and the Penggawa's Court are at Kota Bharu, and there are District Courts at Kuala Krai, Pasir Puteh, Pasir Mas, Bachok and Tumpat respectively. Police force, 1940, 372. The revenue of the State in 1940 amounted to 455,948 (customs, 100,000; excise and marine, 248,506; land revenue, 56,553; municipal, 23,172), and the expenditure to 392,246. Public debt (1940), 590,916.

The chief industry is agriculture. Chief products: rice (146,000 acres), coconuts (60,000 acres), rubber (94,710 acres), arecanut (4,362 acres), oil palm (7.0 acres). Ground-nuts, water melons, yams, colocasia, sweet potatoes, sugar cane, pineapples, bananas, sirih (moss), chillies, tapioca, and maize are grown in smaller quantities for local consumption. The jungle, which covers a large part of the State, produces serviceable timber, resin, rattan and bamboos. The State supported Malayan buffaloes (39,172 in 1940); agriculture oxen (97,915 in 1940); sheep (15,801 in 1940); goats (28,957 in 1940), and poultry. Numerous estates are owned by British companies. Mineral resources comprise gold, manganese, tin and iron-ore; 528 ounces of gold-ore, 11,516 tons of manganese-ore, 18 tons of tin-ore and 226,241 tons of iron-ore were exported in 1940. The principal manufacturing industries are sarong-weaving, batik sarong-printing, boat-building, rice-milling, rubber-milling, saw-milling, match, brick, tile, and silverware-making. In 1940, total exports, including re-exports, were 1,689,786, and total imports, 1,037,386 (1939, 1,062,330, and 886,464, respectively). Chief imports, 1940: textiles, 120,245; tobacco, 95,330; petroleum, 29,248; benzene, 66,496; tinned milk, 25,925; drugs and medicines, 17,696; sugar, 35,180; motor vehicles, 52,084; wheat, 18,100. Chief exports, 1940: rubber, 1,372,743; copra, 16,410; betel-nuts, 12,452; flour, 18,100. Chief exports, 1940: rubber, 1,372,743; copra, 16,410; betel-nuts, 12,452; jungle produce, 4,438; fish, 5,266; cattle, 12,370; gold and gold-ore, 3,285; manganese-ore, 16,510; tin-ore, 3,245; iron-ore, 105,410; textile, 16,318.

The tonnage of steamers calling at the various ports of the State during 1939 was 308,424 tons, as against 266,228 in 1938, and that of sailing vessels 15,274 tons, as against 17,492 tons in 1938. The total road mileage at the end of 1940 was 336. The Federated Malay States Railway Administration maintains a railway line between Tumpat, the chief port of the State, and Gua Musang, near the Pahang border, a distance of 126 miles. By rail the State has been for some years connected with Bangkok, and also with Penang, through lower Thailand and Kedah. Since the opening in 1931 of the East Coast Railways, there has been direct communication with Singapore through Pahang. There are now two well equipped mail trains, twice weekly, between Singapore and Kota Bharu. There were (1940) 6 post offices and 15 postal agencies in the State.

**Ruler.**—H.H. Sultan Sir Ismail Ibni Almarhum Sultan Mohamed IV, K.C.M.G.

**Trengganu**, with an area of about 3,050 square miles, and an estimated mid-year population for 1941 of 211,041, lies on the east coast of Malaya between Pahang and Kelantan. The capital is Kuala Trengganu, with a population of approximately 16,000. Roughly 3,000 of the 20,000 Malay children of school age attended the 35 vernacular schools. Trengganu had one Government English school. There were, in addition, 11 Chinese, 2 Indian and 2 private English schools in the State. Police force in 1941, 849. The State possessed about 291 miles of roads kept by the Public Works Department and some subsidiary roads upkept by the Land Offices. There were 6 post offices and 9 postal agencies in the State. There is telegraphic communication with other parts of

(*Va'ad Leumi*) administers the affairs of the community according to the resolutions of the Assembly, and represents the Jewish community in its relations with Government. It maintains a Hebrew education system, and controls certain Jewish health services. There are also local committees set up where not less than 30 Jews live. A number of Jews have opted out of the community.

The Jewish Agency for Palestine, consisting of Zionists and non-Zionists, is recognised by the British and Palestine Governments as an agency for the Jewish people in all matters pertaining to the upbuilding of the Jewish National Home. It supervises Jewish immigration.

Moslem religious affairs are controlled by the Moslem Supreme Council, which is also responsible for the Moslem *Waqfs* (religious endowments) and Sharia Courts.

In 1943 there were 24 municipalities. Election to Municipal Councils is regulated by the Municipal Corporations Ordinance, 1934. The Municipal Corporations are responsible for the carrying out of the general requirements, and may do so independently since local autonomy is encouraged, and much has been done by them in town planning, construction and maintenance of streets, drainage, etc. They are also responsible for their own finances, the annual budget being subject to approval by the District Commissioners. In rural areas local affairs are administered by local councils (81 in 1943). Taxes cannot be levied nor loans raised without the approval of the High Commissioner. Bye-laws are issued with the approval of the District Commissioner. Grants-in-aid are set aside by Government as contributions towards the cost of executing major schemes.

The official languages of the country are English, Arabic and Hebrew.

**Area and Population.**—The area of Palestine is 27,009 sq. km. (10,429 square miles), comprising 26,305 sq. km. (10,157 square miles) of land area and 704 sq. km. (272 square miles) of water area. The principal river is the Jordan. It rises near Banias at a height of about 914 metres (3,000 ft.) above sea level, and enters Lake Hula (Waters of Merom) 70 metres (229 ft.) above sea level. Between Lake Hula and Lake Tiberias (Sea of Galilee) the river drops 279 metres (915 ft.) in a distance of 18 km. (11 miles) and becomes a turbulent stream. Lake Tiberias is 209 metres (686 ft.) below sea level and is liable to sudden storms. Between Lake Tiberias and the Dead Sea the Jordan falls 180 metres (591 ft.). The largest lake is the Dead Sea (only half of which is in Palestine), the area being 1,050 sq. km. (405 square miles), and is 392 metres (1,286 ft.) below sea level. It is 82 km. (51 miles) long and 17 km. (10½ miles) in breadth. Its maximum depth is 399 metres (1,310 ft.). It receives the waters of the Jordan as well as of 6 other rivers and has no outlet, the surplus being carried off by evaporation. The water contains an extraordinarily high concentration of mineral substances. The other principal rivers of Palestine are the Yarmuq, Ajja and Qishon. The highest mountain peak is Jebel Jarman, 1,208 metres (3,963 ft.) above sea level, situated in the Safad sub-district.

The first census of Palestine under the British Mandate was taken in October 1922, the population being 752,048, excluding members of H.M. Forces. The second census was taken in November 1931; the total population enumerated (excluding H.M. Forces) was 1,033,314, of whom 66,563 were nomads. The estimated population on December 31, 1943, was 1,676,571 (excluding H.M. Forces); of whom 1,028,715 were Moslems, 502,912 were Jews and 181,281 were Christians. Of this population 769,807 or 45.9 per cent. lived in large and small towns. The density of the settled population on June 30, 1943, was 154 to the square mile.

The estimated population of the capital, Jerusalem, on December 31, 1943, was 149,300. The estimated populations of the other principal towns were (1943): Tel-Aviv (municipal area, all Jews), 148,100; Haifa, 120,800; Jaffa, 90,400; Gaza, 29,300; Nablus, 23,000; Hebron, 22,400; Petah Tiqva, 18,300; Lydda, 170,00; Ramle, 14,400; Nazareth, 12,100; Tiberias, 11,700; Safad, 11,500; Acre, 10,300; Bethlehem, 8,600. Total recorded immigrants (1943), 9,867, of whom 8,507 were Jews.

From the time of the 1922 census up till the end of 1943 the estimated increase in population was 924,523, the estimated increase among Jews being 419,122, among Moslems 439,538, and among Christians 59,817. Four-fifths of the increase in the Jewish population has been contributed by immigration. Jewish immigrants in 1943 numbered 8,507. The increase in the Arab population is due to natural increase resulting from the high birthrate. The principal towns inhabited by Jews are: Jerusalem (97,000 Jews), Tel Aviv (173,000 Jews, including adjoining Jewish quarters of Jaffa), and Haifa (60,000 Jews).

The occupational structure of the Jewish population was as follows:—Of the (Jewish) earners, 53 per cent. were engaged in agriculture, manufacture, construction and transport; 8 per cent. in professions, 11 per cent. in commerce, 9 per cent. in clerical service, 5 per cent. in Government service, and the rest in various occupations.

There are some 750 Arab villages and a considerable number of Arab tribes.

Births and deaths for recent years are given in the following table:—

| Year | Estimated <sup>1</sup> Population (end of year) | No. of Births | No. of Deaths | Infantile Mortality (per 1,000 live births) |
|------|-------------------------------------------------|---------------|---------------|---------------------------------------------|
| 1939 | 1,501,698                                       | 53,353        | 19,529        | 107.5                                       |
| 1940 | 1,544,530                                       | 56,571        | 27,019        | 127.2                                       |
| 1941 | 1,585,500                                       | 57,879        | 24,485        | 110.8                                       |
| 1942 | 1,620,005                                       | 56,415        | 24,164        | 122.88                                      |
| 1943 | 1,676,571                                       | 63,820        | 23,521        | 96.41                                       |

<sup>1</sup> Excludes His Majesty's Forces.

The proportion of male to female births in 1943 was 1,070 male births to 1,000 female births.

The Palestine Citizenship Orders 1925 to 1939 permit the naturalisation of foreigners. The qualification for naturalisation are two years residence in Palestine out of the three years immediately preceding the date of application, adequate knowledge of one of the three official languages, good character and the intention to reside in Palestine. The number of persons so naturalised in 1943 was 5,999. Of these 5,881 were Jews.

The celebration of marriages in Palestine, together with the granting of divorces, is governed by the law of the religious community to which the parties belong. Every marriage celebrated and every divorce granted must be registered by the religious authority, and copies of all such registrations must be sent to the District Commissioner of the District. Marriage of British subjects is conducted under the Foreign Marriages Act, the District Commissioners being the Marriage Officers. In 1943 the number of marriages celebrated was 19,942; 13,895 by Moslems, 5,244 by Jews and 679 by Christians.

The number of divorces granted was 3,320; 1,990 to Moslems, 1,321 to Jews and 3 to Christians.

**Religion.**—Jerusalem, being a Holy City for three Faiths, is the seat of a number of Prelates and religious bodies.

The office of President of the Moslem Supreme Council, previously held by the Mufti of Jerusalem, is at present vacant.

The Jews have two joint Chief Rabbis, one for the Sephardim (Oriental Jews); the other for the Ashkenasim (Western Jews). In Nablus there is a Samaritan High Priest.

The various Christian bodies are represented as follows:—(1) The Orthodox, Latin and Armenian Communities are headed by Patriarchs. The Vatican is represented by an Apostolic Delegate. (2) The Syrian Orthodox and Coptic Communities are headed by Bishops. (3) The Uniat Communities, namely: the Greek Catholic (Melkite), the Armenian Catholic, the Syrian Catholic and the Maronite are represented in Jerusalem by Patriarchal Vicars. (4) The Abyssinian Community is headed by an Abbot. (5) The Anglican Community is headed by a Bishop. (6) The Presbyterian Community is organized under a Presbytery and has churches in Jerusalem, Tiberias, Haifa and Jaffa, and a mission in Safad.

**Education.**—Education in Palestine is not compulsory, and is by no means universal, but schools and teachers are required by law to be registered. In 1942-43 there were 1,530 schools, 7,866 teachers and 188,779 pupils.

Since 1920 a dual system of education, Arab and Hebrew, has developed, based on the medium of instruction, and all schools, except some of those maintained by foreign bodies, fall into one or other of these two systems, which are again divided into public and non-public schools. The public system comprises Government schools on the Arab side and, on the Jewish side, the schools administered by the Council of the Jewish Community (*Va'ad Leumi*), subject to the inspection and control of Government.

In 1942-43 there were 403 Government schools under the Arab public system of education with 58,825 pupils, the great majority of whom were Moslems.

There is a demand for education of Moslem girls, and 59 Government schools now provide facilities for their education, handicrafts and domestic science being the principal subjects taught. 12,722 Moslem girls attended those schools during the year under review.

Law classes are held in Jerusalem. There were 144 students during the year 1941-42, of whom 10 were licensed.

There were also 161 private Moslem schools, most of them of the 'Kuttab' type (religious), with 14,567 pupils.

The Hebrew public school system of the *Va'ad Leumi* consisted in 1942-43 of 488 schools with 66,317 pupils. These included 26 secondary schools with 8,020 pupils, 5 teachers' training colleges with 576 students, 7 trade and vocational schools with 826 pupils and 2 agricultural schools with 312 pupils.

There were also in 1942-43 297 Jewish private schools with 23,662 pupils. The Hebrew Technical Institute at Haifa was attended by 181 students.

The various Christian communities supervise schools of their respective churches and provide to a very large extent for the education of their children. During the year under review these numbered 181, with 25,908 pupils. The 2 agricultural schools had 46 pupils.

Through the bequest of the late Sir Ellis Kadoorie, Government established two agricultural schools, one for Arabs at Tulkarm, the other for Jews at Mount Tabor; the former had 45 pupils, the latter 49 pupils.

The total recurrent expenditure by the Department of Education and by

the Public Works Department on schools of the Arab public system during the school year 1942-43 amounted to £2802,548.

The total expenditure on all schools of the Hebrew public system in the school year 1942-43 was estimated at roughly £2600,000, of which £256,900 was provided by Government.

The Hebrew University on Mount Scopus, Jerusalem, was inaugurated on April 1, 1925, and had (1943-44) 149 teachers and 560 students. Hebrew is the medium of instruction. The Jewish national and university library houses some 453,000 volumes. The estimated expenditure of the university in 1943-44 was £2195,000.

**Antiquities.**—An Antiquities Ordinance was passed in 1929, and further Regulations in 1930-32, to give better effect to the provisions of the Mandate as regards excavation and preservation of antiquities. The Department of Antiquities is housed in a building known as the Palestine Archaeological Museum, the construction and equipment of which were made possible by funds contributed by Mr. John D. Rockefeller (2,000,000 dollars).

**Justice.**—The courts in Palestine are either civil or religious courts. The former have jurisdiction over all matters save those of personal status and *Waqfs* or charitable endowments, subject to the provisions mentioned below.

There is a Magistrate's Court in each sub-district, and in the larger towns such as Jerusalem, Jaffa, Haifa, Tel-Aviv and Nablus, two or more such courts.

There are five District Courts, each composed of a British President or Relieving President and two Palestinian Judges sitting at Jerusalem, Jaffa, Haifa, Tel-Aviv and Nablus respectively. They go on circuit within the area of their jurisdiction. A District Court has jurisdiction in first instance over all crimes except those punishable with death, and civil cases outside the jurisdiction of a magistrate in and for that district; it also hears appeals, subject to certain restrictions, from the decisions of magistrates both in civil and in criminal cases. Crimes punishable with death are tried by the Court of Criminal Assize, which consists of the Chief Justice or British Judge of the Supreme Court sitting with the President or Relieving President and a Palestinian Judge of the District Court. The accused may elect to be tried by a British Judge of the Supreme Court sitting alone.

The Supreme Court of Palestine is composed of the Chief Justice and three other British judges and four Palestinian judges.

The Court of Appeal is composed of two Judges, but the Chief Justice may by warrant under his hand constitute a court of either three or five Judges, while the High Court may not sit with less than two Judges. In each capacity a British Judge presides.

Benchets of honorary magistrates have been established in certain towns to try contraventions for which the maximum penalty does not exceed £25 fine or 15 days imprisonment or both penalties.

Special arrangements exist in the Beersheba sub-district, where minor cases are disposed of according to tribal custom by the Court of Sheikhs. An appeal lies from this court to the Tribal Court of Appeal, which is constituted of the District Officer of Beersheba as President and two sheikhs, chosen by the District Officer, who have not sat in the Tribal Court as members.

All matters of personal status affecting Moslems are within the jurisdiction of the Sharia Courts. A Sharia Court consists of a Qadi, and appeals from his decision lie to the Moslem Court of Appeal, which is composed of a President and two members.

Jewish Religious Courts have exclusive jurisdiction in certain matters of

In Singapore are Raffles College, formally opened in 1929, giving a higher education of a university standard in arts and science, and King Edward VII College of Medicine. It is proposed to fuse these two institutions to form a University College of Malaya.

### Justice and Crime.

The law in force was contained in local ordinances and in such of the English common law and such Acts and Orders in Council as were applicable to the colony. The Penal Code closely followed the Indian Penal Code.

There was a Supreme Court which was a Court of record and consisted of (a) the High Court which exercised original criminal and civil jurisdiction and appellate criminal and civil jurisdiction in appeals from subordinate Courts; (b) the Court of Appeal, which exercised appellate civil jurisdiction in appeals from the High Court. The Supreme Court was composed of a Chief Justice, one or more Judges of Appeal, and three or more Puisne Judges. An appeal lay from the Supreme Court to the Privy Council.

### Finance.

Public revenue and expenditure for six years (1 dollar = 2s. 4d.) :—

| Years | Revenue   | Expenditure | Years             | Revenue   | Expenditure |
|-------|-----------|-------------|-------------------|-----------|-------------|
|       | £         | £           |                   | £         | £           |
| 1937  | 4,357,811 | 4,904,489   | 1940              | 5,734,303 | 6,924,656   |
| 1938  | 8,161,448 | 4,748,118   | 1941 <sup>1</sup> | 5,561,790 | 7,053,729   |
| 1939  | 4,507,404 | 5,917,254   | 1942 <sup>1</sup> | 5,969,793 | 6,804,633   |

<sup>1</sup> Estimates.

The debt on December 31, 1940, amounted to 55,000,000 dollars (i.e., Straits Settlements 3 per cent. Local Loan, 1932-72, 30,000,000 dollars; Straits Settlements 3 per cent. Local War Loan, 1932-59, 25,000,000 dollars).

### Defence.

Singapore was the chief British naval base and defended harbour in the Far East.

### Commerce.

The following shows the total values of Malayan trade in merchandise for three years :—

| Yrs. | Imports   |                    |                        |        | Exports (including re-exports) |                  |                      |         |
|------|-----------|--------------------|------------------------|--------|--------------------------------|------------------|----------------------|---------|
|      | From U.K. | From Colonies, &c. | From Foreign Countries | Total  | To U.K.                        | To Colonies, &c. | To Foreign Countries | Total   |
|      | £1,000    | £1,000             | £1,000                 | £1,000 | £1,000                         | £1,000           | £1,000               | £1,000  |
| 1935 | 11,897    | 11,532             | 40,342                 | 63,771 | 9,456                          | 11,492           | 45,471               | 66,420  |
| 1939 | 10,598    | 14,256             | 47,557                 | 72,406 | 8,321                          | 14,670           | 62,432               | 85,923  |
| 1940 | 13,161    | 20,130             | 62,865                 | 96,146 | 18,983                         | 19,338           | 92,991               | 131,257 |

The following figures are taken from the British Board of Trade returns the imports including produce from Borneo, Sarawak, and other eastern places, transhipped at Singapore, which is thus entered as the place of export :—

|                                                        | 1934      | 1935      | 1936      | 1937      | 1938 <sup>1</sup> |
|--------------------------------------------------------|-----------|-----------|-----------|-----------|-------------------|
|                                                        | £         | £         | £         | £         | £                 |
| Imports (consignments) into U.K. from the Straits      | 9,099,384 | 7,374,133 | 4,214,708 | 7,341,114 | 6,706,290         |
| Exports of British produce to the Straits              | 5,723,094 | 5,874,962 | 6,334,076 | 8,551,798 | 7,716,997         |
| Exports of foreign and Colonial produce to the Straits | 114,497   | 125,972   | 97,045    | 135,288   | 112,506           |

<sup>1</sup> Provisional figures.

### Shipping and Navigation.

The total net tonnage of merchant vessels, with cargo and in ballast, which entered into and cleared from Malayan waters during January-September, 1939 was 26,095,401.

### Communications.

The Straits Settlements at the end of 1940 had 1,073 miles of metalled roads and 133 miles of gravel roads, natural roads and hill-paths. There is a railway from Singapore to Johore Bahru passing across the Johore Causeway. The Federated Malay States Railway extends from Parit Buntar in Krian to Prai in Province Wellesley, whence are steam ferries to Penang. There is a railway from Malacca to Tampin in Negri Sembilan. All the railways have a gauge of one metre, and form a part of the Federated Malay States Railway system. A continuation through Johore was opened in 1909, and the east coast section connecting Pahang with Kelantan and Thailand was opened on September 5, 1931.

In 1940, <sup>1</sup> full postal facilities were provided at 156 post offices, which also operated telegraph services. In addition, there were 89 postal agencies which performed restricted postal services, of which 71 accepted telegrams. During the year 89,545,158 postal articles, including 2,992,952 registered articles and 549,400 parcels, were either posted, delivered or transmitted.

The number of depositors in the Straits Settlements and Federated Malay States Post Office Savings Banks on December 31, 1940, was 160,866, and the amount standing to their credit was 27,856,225 dollars.

Telegraph and telephone communication exists throughout Malaya, and an overland telegraph service is maintained with Thailand. In 1940, there were 8,643 miles of telegraph and telephone lines, and 33,618 miles of overhead wire. In addition there were 321 miles of underground cables containing 30,427 miles of single wire.

In the Straits Settlements there are wireless stations at Singapore and in Province Wellesley, the latter serving Penang. Each station consists of a transmitting station remotely controlled from a separate receiving station, and a direction finding station for aircraft services.

There is also a station in Labuan owned and operated by the Government of Brunei for communication with Brunei, and another in Christmas Island owned and operated by the Christmas Island Phosphate Company.

In the Federated Malay States there are wireless stations at Kuala Lumpur, Kuantan, Kuala Lipis, Temerloh, Sungai Lembing and Grik.

### Money, Weights and Measures.

There were thirty-two banks (including a Post Office Savings Bank) in the Colony.

<sup>1</sup> This covers the Federated Malay States also.

personal status of Palestinian Jews, and jurisdiction by consent with regard to other nationals except in matters of dissolution of marriage. An appeal from the decision of the Jewish Religious Courts lies to the Rabbinical Council.

The different Christian communities (such as the Orthodox and the Latin), have similar jurisdiction to that of the Jewish Courts. They also have jurisdiction to hear and determine appeals lawfully brought under the law of any country other than Palestine, whether the parties to the appeal are Palestinian citizens or foreigners.

The Juvenile Offenders Ordinance came into operation in 1938. In 1942, 2,216 cases of young offenders were dealt with by the Courts, of whom 1,759 were Moslems, 341 were Jews and 116 were Christians. In 1942, 189 boys were sent to the Government Reformatory School and 431 placed on probation for periods ranging from 1 to 3 years.

Questions as to whether a case is one of personal status within the exclusive jurisdiction of a Religious Court shall be referred to a Special Tribunal composed of two British Judges of the Supreme Court and the President of the highest court of the religious community concerned in Palestine.

The Ottoman Code was superseded by the new Criminal Code, based on English law, which came into force on January 1, 1937.

The police establishment at December 31, 1943, was: officers, 102 (85 British Christians, 9 Palestinian Christians, 4 Moslems and 4 Jews); other ranks, 5,605 (2,976 British Christians, 317 Palestinian Christians, 1,548 Moslems, 751 Jews, 18 others). Prisons: officers, 5; other ranks, 488.

#### Finance.—Revenue and expenditure for 5 years :—

|             | 1938-39   | 1939-40   | 1940-41   | 1941-42   | 1942-43    |
|-------------|-----------|-----------|-----------|-----------|------------|
|             | £P        | £P        | £P        | £P        | £P         |
| Revenue     | 5,937,280 | 6,768,852 | 8,441,899 | 8,325,558 | 8,851,879  |
| Expenditure | 5,692,671 | 6,004,788 | 7,450,855 | 7,463,602 | 10,258,283 |

The main heads of revenue for 1942-43 were: customs, £P2,316,574; grants-in-aid, £P691,669; licences, taxes, etc., £P2,872,543; fees of court or office, etc., £P1,201,278; posts and telegraphs, £P834,319; port and marine, £P82,989; interest, £234,271; miscellaneous, £P184,287; revenue from Government, £P85,344; land sales, £P15,490; payment of loans from Public Funds, £P281,102.

The main heads of expenditure for 1942-43 were: public debt charges, £P173,246; customs, excise and trade, £P545,881; Department of Health, £P362,877; Department of Education, £P415,743; Department of Agriculture, £P177,749; police and prisons, £P2,277,441; Transjordan Frontier Force, £P42,797; posts and telegraphs, £P564,975; public works, recurrent, £P337,673; public works, extraordinary, £P521,914; Public Works Department, £P133,802; miscellaneous, £P2,333,529.

The surplus balances on April 1, 1943, amounted to £P3,935,348.

The external debt of Palestine, which up to November 1, 1942, amounted to £P4,475,000, has since been partly redeemed (£P2,724,505) and partly converted (£P1,750,495). The funds for redemption were made available in the following manner: £P868,230 from the accumulated 5 per cent. Stock Sinking Fund, £P1,849,505 from the proceeds of cash issue of a new loan, the Palestine Government Guaranteed 3 per cent. Stock 1962-67, the balance, amounting to £P6,770, was contributed by the Palestine Government for this purpose. The outstanding external debt of the Government

on March 31, 1943, amounted to £P3,600,000, 3 per cent. Palestine Government Guaranteed Stock; £P1,750,495 of this 3 per cent. stock have been handed over to holders of the 5 per cent. Palestine Government Guaranteed Stock 1942-67 and the balance of £P1,849,505 has been issued at par and the proceeds used for the repayment of holders of 5 per cent. Palestine Government Guaranteed Stock.

**Production and Industry.**—Agriculture continues to be Palestine's principal industry. The maritime plain, the Emek Valley of Israel or Esdraelon, and the northern Jordan valley are intensively cultivated. Since the war began there has been a marked expansion in every branch of farming and substantial areas have been converted from rain to irrigated crops. Citrus cultivation, chiefly confined to the maritime plain, yields the main export crop, but the trade has been seriously disorganized by the war. In 1938-39 exports were 13 million cases of oranges and 2 million cases of grapefruit; in 1939-40 total exports were 7½ million cases; in 1941-42 they were negligible, being confined to Middle East requirements, but in 1943-44 there was some recovery with an export of 1,035,000 cases, of which 508,000 went to the United Kingdom, plus bulk exports to neighbouring territories equivalent to 1,390,000 cases. Meanwhile there have been considerable developments in the manufacture of citrus by-products, particularly concentrated juices, squash and essential oils. The total area under citrus has decreased since 1939 from 293,000 dunums to 267,000 dunums, much of the uprooted area being devoted to vegetables and green fodder.

Olives, mostly cultivated in the hills areas, form the next most important crop with an average annual production of 7,000 tons of oils. Vegetables are grown extensively in the plains under irrigation and to some extent in the hills as rain crops; cultivation has been greatly expanded since the war. Vines and figs are produced on a large scale in the hill country, while increasingly large crops of almonds and deciduous fruits of good quality such as apples, pears, plums, almonds and apricots are being grown in the hills and on the plains. Bananas and dates, and other sub-tropical fruits are grown in the Jordan Valley, where new varieties have been successfully introduced.

The dairy industry has made rapid strides in the last few years with an increase in the milk yield on Jewish farms from 32.6 million litres in 1938 to 56 million litres in 1943; the total annual production is some 120 million litres. The poultry and bee-keeping industries have also rapidly developed in recent years. Tobacco cultivation, which is carried out mainly in the hill areas of Acre and Galilee, has decreased owing to over-production in former years. Turkish varieties are principally grown. In 1941 there were 13 licensed factories with an annual output of 995 tons of cigarettes, tobacco, tobacc, snuff and cigars, and the special type of tobacco preferred by Arab cultivators known as 'heishah.'

The total area of land in Jewish possession at the end of 1943 amounted to 1,675,000 metric dunums (410,000 acres), which figure includes 162,000 dunums (40,000 acres) of land and water granted by the Government as concession to Jewish agricultural and industrial enterprises. Of this area 44 per cent.—682,000 dunums (163,000 acres)—were purchased by the Jewish National Fund (*Keren Kayemeth LeIsrael*), which acquires land as inalienable property of the Jewish people and leases it on a perpetual basis to the settlers. Of the settlements, 174 are located on Jewish National Fund land. Practically all the settlements are located in the Maritime Plain, the Plain of Esdraelon and in Lower and Upper Galilee.

## 202 MANDATED TERRITORY IN AREA:—PALESTINE

35 of the settlements were established since the outbreak of the war (September, 1939–December, 1943), 10 of them being located in the Upper Galilee and another 10 in the Gaza and Beersheba sub-districts. There are three types of settlements: villages, smallholders who farm their own holdings, and co-operative groups, the land being held and farmed 'by a group' on a co-operative basis. A number of settlements have been established by the Palestine Jewish Colonisation Association (P.I.C.A.) out of funds set up by the late Baron Edmond de Rothschild.

140 of the settlements have been financed by the Jewish Agency out of funds provided by the *Keren Hayesod* (Palestine Foundation Fund). The money for both funds is subscribed voluntarily by Jews all over the world. The expenditure of the Jewish Agency during the past twenty-two years (to September 30, 1942) amounted to the sum of over £P26 millions, of which £P10·1 millions were spent on the acquisition of land and agricultural settlement, £P5·1 millions on education, £P3·1 millions on health and social welfare services, £P2 millions on industry and urban settlement, £P1·4 millions on immigration, £P1·4 millions on labour and housing, the rest on miscellaneous. The expenditure during the year ending September 30, 1942, amounted to £P1,872,000.

The yields of the major crops in 1943 were:—Wheat, 63,895 tons; barley, 56,026 tons; durrah and maize, 26,366 tons; leguminous crops (lentils, beans, peas, etc.), 17,458 tons; fresh fruit (including melons, but not citrus), 280,053 tons; vegetables (including onions), 213,767 tons; potatoes, 30,739 tons.

Livestock enumerated in 1943 were: 242,945 cattle, 244,062 sheep, 325,376 goats, 4,972 buffaloes, 12,145 pigs, 29,736 camels, 19,021 horses, 9,862 mules and 107,786 donkeys.

There is a serious shortage of forests, hedgerow trees and shrubs in Palestine. A proportion of the uncultivated land has been declared as 'forest reserves'; up to March 31, 1944, 71,774 dunums of the forest reserves have been closed for forestry, while, as yet, the remaining 588,242 dunums supply free grazing and scanty firewood to the rural population. 14 Government forest nurseries are maintained for the production of hardy trees; in 1943–44 725,706 plants were used in Government plantations, while 403,844 were issued to the public, free of charge, for use in forests, windbreaks, gardens, etc.

Small but thriving plantations are to be found around monasteries and settlements of various Christian communities. A special 'tree fund' is maintained under Jewish auspices, and fine plantations have been established. On March 31, 1944, there were 1,144 private plantations with a total area of 24,848 dunums.

The catch of fish in 1943 was 3,149 tons. There are 2,250 licensed fishermen, mostly Arabs, and 530 boats are engaged.

The mineral resources of Palestine capable of commercial exploitation are very restricted. The hill country is composed principally of limestone, which provides excellent building stone of various types and colours. Calcareous sandstone abounds along the coast and was used by the Crusaders for their maritime forts and castles (Athlit and Acre).

The Dead Sea contains many valuable dissolved salts, including carnallite, magnesium chloride, bromides, and common salt. A concession for the exploitation of these minerals was granted to Palestine Potash Ltd. in January, 1930. The value of potash exported in 1939 was £P381,162, of bromine £P46,528, and of magnesium chloride £P668.

Petroleum and bitumen exudations are found around the southern part of the Dead Sea. This region and the area westward as far as the Mediter-

anean Sea is being explored by companies who have been granted oil prospecting licences under the Oil Mining Ordinance, 1938.

The only non-metallic minerals at present being exploited are gypsum, sulphur and rock salt. Gypsum is quarried at Menahemiya near Tiberias, the production for 1943 being 5,990 metric tons. Salt is produced from sea-water at Athlit; 17,995 metric tons were produced during 1943. Rock salt is obtained from Jebel Udum salt mountain at the south end of the Dead Sea, the production for 1943 being 1,812 metric tons.

There are hot springs of medicinal value at Tiberias and at El Hamme, where bathing establishments on modern lines have been erected for the treatment of patients and, in addition, at El Hamme, large baths for pleasure bathing in water of varying tepid temperatures have been provided.

While Palestine is essentially an agricultural country there has been a very substantial industrial development during the past fifteen years. The chief articles of industrial export are Dead Sea chemicals, polished diamonds, petroleum products, artificial teeth and soap.

The refineries of the Iraq Petroleum Company have now been constructed and storage tanks erected at the Haifa terminus of the pipe line from the Mosul oil-fields.

Commerce — Trade for 4 calendar years was as follows:—

| Year ended December 31       | 1938                       | 1939                       | 1941                       | 1942          |
|------------------------------|----------------------------|----------------------------|----------------------------|---------------|
| Imports for Consumption      | £P 11,856,963 <sup>1</sup> | £P 14,632,822 <sup>1</sup> | £P 12,038,280 <sup>1</sup> | £P 19,504,108 |
| Imports of Specie            | 469,907                    | 681,278                    | —                          | —             |
| Exports of Palestine produce | 5,020,368                  | 5,117,769                  | 1,361,895                  | 3,061,828     |
| Exports of Specie            | 866,712                    | 230,393                    | —                          | —             |
| Re-Exports of Foreign Goods  | 663,217                    | 248,682                    | 647,811                    | 569,858       |
| Goods in Transit             | 671,915                    | 549,872                    | 918,889                    | 3,046,728     |

<sup>1</sup> The imports statistics for 1938 to 1942 do not include figures for military and N.A.A.F.I. stores. Moreover, the statistics for 1941 and 1942 do not include figures for petroleum products, Dead Sea chemicals and certain other commodities.

The trade was distributed as follows in 1942:—

| Countries           | Imports <sup>1</sup> | Exports <sup>1</sup> | Countries      | Imports <sup>1</sup> | Exports <sup>1</sup> |

<sup>1</sup> The trade statistics for 1942 do not include figures for military and N.A.A.F.I. stores, petroleum products, Dead Sea chemicals and certain other commodities.

The principal articles of import in 1942 were: rice, £P63,937; wheat, £P1,752,299; wheat flour, £P714,577; cattle, £P393,644; sugar, £P471,443; sheep and goats, £P270,132; coffee beans, £P157,901; tea, £P171,753; tinned plates, £P277,362; cotton yarn, £P589,456; cotton piece goods, £P1,874,747; woollen tissues, £P643,358; wearing apparel, £P185,490; motor cars and tractors, £P232,570; rubber tyres, £P188,095.

The principal articles of export in 1942 were: citrus fruits, £P58,696;

chocolate, £P64,248; edible olive oil, £P3,044; fruit juice and syrup, £P92,906; sulphur, £P8,656; polished diamonds, £P947,144; wearing apparel, £P588,836; drugs and medicines, £P71,450; soap, £P27,459; artificial teeth, £P61,379; biscuits and cakes, £P61,472.

Exports to the United Kingdom (including Transjordan) (Board of Trade returns), 1938, 3,305,563*l.*; 1937, 3,119,475*l.*; imports from the United Kingdom, 1938, 1,535,417*l.*; 1937, 1,898,619*l.*

**Shipping and Communications.**—The ports of Palestine are Haifa, a modern harbour, with a depth of 30 ft. alongside the main quay; Jaffa, including a small craft harbour at Jaffa and a lighter harbour at Tel Aviv; Gaza, open roadstead; and Acre, where anchorage for small vessels is provided within reef. At Jaffa and Tel Aviv large vessels anchor at open roadstead. For the calendar year 1939, 1,857 steamers, totalling 4,370,085 tons, and 1,063 sailing vessels, totalling 41,546 tons, entered in foreign trade at Palestinian ports.

The railway system of Palestine comprises three main sections: (a) The standard gauge Palestine railway, running from Haifa to Rafah on the Egyptian border, and with branches from Lydda to Jerusalem and Jaffa. A short branch to Petah Tiqva is partly owned by that colony. The total length of this system is 314 kilometres. (b) The Sinai railway (Kantara-Rafah line) crossing the Sinai province of Egypt, owned by His Majesty's Government and worked by the Government of Palestine, connects Palestine with the Egyptian railway system at Kantara on the Suez Canal. Its length is 203 kilometres. (c) The narrow gauge Hejaz railway, including Hama-Acre, Haifa-Samakh and Tulkarm-Nablus sections in Palestine and the Nassis-Amman-Ma'an section in Transjordan, the last section being used by the Transjordan Government, though operated by the Palestine Government. The length of the line in Palestine is 112 kilometres, and in Transjordan 323 kilometres. The total length of the railways operated within the territory of Palestine is 334 kilometres of standard gauge and 112 kilometres of narrow gauge (105 cm.). Goods handled by the Palestine railway during the year ended March 31, 1942, was 2,044,930 tons, and passengers carried 2,244,367. The gross revenue was £P1,667,638 and working expenses £P1,328,560, excluding debt charges.

Motor transport is of considerable importance as a means of communication. In 1942 there were 1,805 kilometres of all-weather roads (mostly asphalted) and 1,543 kilometres of seasonal tracks.

**Air Services.**—Under war conditions, the only civil airports in Palestine are at Lydda (near Jaffa), Haifa and Kallia (for marine aircraft).

**Posts and Telegraphs.**—There were 57 post offices and 25 postal agencies in the country in 1943. Motor mail connections are afforded in areas not served by the railway and air mail services to certain other countries are regular. In 1943-44 the total revenue amounted to £P1,081,844 and the expenditure to £P691,373. In 1943, 22,706,400 letters, postcards, printed matter and samples were handled. Inland postal and money orders issued amounted to £P1,438,896, and foreign orders amounted to £P102,690. Through the extension to Haifa of the Cyprus cable of the Cable and Wireless, Ltd., Palestine has direct access to the cable systems of the world. The number of telegrams despatched and received in 1943 was 796,783. At the end of 1943 the length of telegraph and telephone trunk lines was 38,316 km. and 120,760 km. local lines. The number of telephone subscribers was 12,525, and the number of telephone instruments was 20,838.

The Broadcast Transmitting Station was built at Ramallah, near Jerusalem, in 1936. The studios are in Jerusalem, and programmes are arranged in the three official languages. The number of licences in force at the end of 1943 was 55,769.

**Banking and Currency.**—According to the Banking Ordinance, local banks may operate only if their paid-up capital is not less than £P25,000. Foreign banks may not operate in this country unless their paid-up capital amounts to not less than £P100,000. All banks must submit to the Financial Secretary returns of their assets and liabilities as at the end of each month.

The two largest banks, having branches in the principal towns, are Barclays Bank (D.C. & O.) and the Anglo-Palestine Bank, Ltd. There are three other foreign banks. On August 31, 1944, there were 25 banks (20 local and 5 foreign). The capital of the local banks on that date amounted to £P3,001,608. Total deposits with all banks amounted to £P59,875,735 (excluding £P3,541,780 balances held by banks for co-operative societies which were hitherto included). Total credit granted by these banks in the form of bills discounted and advances to customers outstanding at the same date, aggregated £P14,377,102.

In addition to banks, there were on August 31, 1944, 85 Jewish co-operative societies (52 rural and 33 urban) reporting to the Registrar of Co-operative Societies regularly every month. Their share capital amounted to £P274,396. Total deposits with all credit societies amounted to £P5,674,203.

The standard of currency from November 1, 1927, is the Palestine pound (£P), divided into 1,000 mils and equivalent in value to the pound sterling. Palestinian notes, consisting of £P $\frac{1}{2}$ , £P1, £P5, £P10, £P50, £P100 notes, are legal tender for any amount. Silver coins, 720 fine, of 100 and 50 mils, weighing 180 and 90 grains respectively, nickel and bronze of 20, 10 and 5 mils, and bronze of 2 and 1 mils are used. Gold coins are not being issued for the time being. On September 30, 1944, currency in circulation amounted to £P40,679,878 (notes £P39,072,212 and coins £P1,607,666).

**Weights and Measures, etc.**—The metric system is adopted by Government, and is regulated by Ordinance, but local weights and measures are commonly employed.

1 dunum = 919 sq. metres or 0.23 acre (has now been replaced by the metric dunum = 1,000 sq. metres).

1 rotl (south) = 2.88 kilogrammes or 6.34 lbs.

1 rotl (north) = 2.56 kilogrammes or 5.64 lbs.

The rotl is also used in measuring liquids.

The time adopted in Palestine is the Eastern European time, which is two hours fast on Greenwich mean time.

Different calendars are used by the various communities. The Christian communities have two, the Gregorian and the Julian, the latter used by the Eastern churches. The Jewish calendar follows the lunar system, and is adjusted to the solar system by the adding of five months in every 18 years. The Moslem calendar strictly follows the lunar system.

**Transjordan.**—This territory, which roughly corresponds to the area of the old Seljuk Kingdom of Kerak and of the Lordship of Montreal or Oultrejordain in the Latin Kingdom of Jerusalem, is governed by a

## AFRICA.

### BRITISH EAST AFRICA.

British East Africa consists of a large area on the mainland, together with the Islands of Zanzibar and Pemba. For details as to international agreements, etc., with regard to the British sphere in East Africa, see *THE STATESMAN'S YEAR-BOOK* for 1907, pp. 216 and 217.

### KENYA COLONY AND PROTECTORATE.

**Government.**—The Kenya Colony and Protectorate extend, on the Indian Ocean, from the Umba River to Dick's Head, and inland as far as Lake Victoria and Uganda. The Protectorate consists of the mainland dominions of the Sultan of Zanzibar, viz., a coastal strip of territory ten miles wide, to the northern branch of the Tana River; also Kau, Kipini, and the Island of

Lamu, and all adjacent islands between Rivers Umba and Tana, these territories having been leased to Great Britain in 1895 for an annual rent of 10,000*l*. The colony and protectorate were formerly known as the East Africa Protectorate. On April 1, 1905, this was transferred from the authority of the Foreign Office to that of the Colonial Office, and in November, 1906, the Protectorate was placed under the control of a Governor and Commander-in-Chief and (except the Sultan of Zanzibar's dominions) was annexed to the Crown as from July 23, 1920, under the name of 'The Colony of Kenya,' thus becoming a 'Crown Colony.' The territories on the coast rented from the Sultan of Zanzibar were proclaimed as the Kenya Protectorate.

A treaty was signed (July 15, 1924) with Italy under which Great Britain ceded to Italy the Juba River and a strip from 50 to 100 miles wide on the British side of the river. Following on ratification of the treaty, cession took place on June 29, 1925.

The Executive Council consists of 8 members, in addition to the Governor, while the Legislative Council consists of 11 elected European members, 5 elected Indian members, 1 elected Arab Member, 2 nominated unofficial members to represent the interests of the African community, 11 *ex-officio* official members, and nominated official members not exceeding nine in number (one of whom is specially appointed to represent Arab interests), with the Governor as President. The constituencies for Europeans, Indians and Arabs are separated from one another (i.e. communal franchise). Legislation is by Ordinances made by the Governor with the advice and consent of the Legislative Council. In 1908 foreign consular jurisdiction in the Zanzibar strip of coast was transferred to the British Crown.

There are 4 provinces, which are as follows: Coast (capital Mombasa), Central (capital Nairobi), Rift Valley (capital Nakuru), and Nyanza (capital Kisumu). There are also 3 extra-provincial districts, i.e. Northern Frontier, Turkana and Masai.

**Area and Population.**—The territory has an area of 224,960 square miles; population in 1943 estimated at 3,698,416, including 30,765 Europeans, 55,795 Asiatics, and 17,640 Arabs and 3,591,624 natives. On the coast the Arabs and Swahilis predominate; further inland are races speaking Bantu languages, and non-Bantu tribes such as the Nilotic Kavirondo, the Nandi, the Lumbwa, the Masai, the Somali, and the Galla. Mombasa harbour is situated on the eastern side of an island of the same name, and is the terminus of the Kenya and Uganda Railway. Kilindini harbour on the south-western side of the island is the finest land-locked and sheltered harbour on the east coast of Africa and is accessible to vessels of deep draught. The principal river in the North is the Tana, which flows into the Indian Ocean. It is navigable for about 400 miles by shallow-draught steamers. Nairobi is the capital and the headquarters of the administration. Land under European cultivation in Kenya, according to the 1940 agricultural census, included 53,568 acres of wheat, 93,517 acres of maize, 21,087 acres of pyrethrum, 17,811 acres of sugar cane, 193,437 acres of sisal, 81,873 acres of coffee, 13,901 acres of tea, 3,098 acres of flax.

**Religion, Education, Justice.**—The prevailing religious beliefs are Pagau; but on the coast Mohammedanism has made great progress. There are many Christian mission societies, British, French, Swedish, and American, several being Roman Catholic. There were 46 Government schools (11 European schools, 14 Indian schools, 7 Arab and Somali schools, and 14 African schools) in operation in 1944, and 2,729 non-

# MANDATED TERRITORY IN ASIA:—TRANSJORDAN

**Local Area Administration under His Highness the Amir Abdullah Ibn Husayn, C.O.M.G., C.B.E.**, born in Mecca, 1882, second son of the late King Husayn of the Hijaz and elder brother of the late King Feisal of Iraq, who became its ruler in April, 1921, and is assisted by a Council of Ministers, which was set up on August 6, 1939. The country is covered by the Palestine Mandate, but the clauses relating to the establishment of a national home for the Jews are expressly excluded from operation therein. In April, 1928, a Declaration was made that subject to the approval of the League of Nations, His Majesty's Government would recognise the existence of an Independent Government in Transjordan, under the rule of His Highness the Amir Abdullah, provided such government was constitutional and placed His Britannic Majesty's Government in a position to fulfil its international obligations in respect of the territory by means of an Agreement to be concluded between the two Governments. This agreement was signed in Jerusalem on February 20, 1928, and having been accepted by the Legislative Assembly set up under Article 11 was ratified by the High Contracting Parties on October 31, 1929. The Organic Law has been published, and the Legislative Council assembled for the first time in April, 1939. In 1928 a separate commission was issued to the High Commissioner for Palestine appointing him High Commissioner for Transjordan; he is thus High Commissioner for both areas. For the frontiers of Transjordan, see THE STATESMAN'S YEAR-BOOK, 1929, pp. 191-2.

Area, 34,740 sq. miles; population probably about 400,000. Of these, 330,000 are Arab Moslems, 50,000 Arab Christians; the remaining 20,000 are Caucasian elements (chiefly Circassian) settled by the Turks in Transjordan some 50 years ago following the Turco-Russian war. The country is divided into the Desert Area, and 4 districts, viz., Ajlun, Belqa, Karak and Maan. Government schools (1938-39), 74; others, 117; total, 191. Number of pupils, 13,854. Number of teachers, 400. Budget provision for education in 1938-39 is 27,874. The Arab Legion, which comprises Gendarmerie, Police and Prisons, and a specially recruited Desert Patrol, had an establishment in 1939-40 of 47 officers and 1,577 men. Detachments of the Royal Air Force are located at Amman, and there is a military force of some 700 men raised in Palestine and Transjordan, but officered largely by British officers stationed in the country. This force is known as the Transjordan Frontier Force. The country to the east of the Hedjaz Railway line is largely desert, but to the west of this line is potentially of high agricultural value. The resources of the country are agricultural and pastoral products; hillside are being terraced, fruit-trees planted, irrigation planned. Irbid, which lies on the new road from Haifa to Baghdad, is rapidly shaping to be the largest town in Transjordan. Several antiquity sites, of which the most notable are Amman, Jerash, Karak and Petra, are becoming an essential part of the itinerary of Eastern tourists. There are also phosphate deposits now under development. Potash is found in the Dead Sea, and possibly there is oil in the southern area. A metalled road, fit for motor traffic, connects Amman with Jerusalem, while unmetalled roads have been constructed, making motor traffic possible from Amman to all the chief towns in the country. The road running from Amman to Maan has been continued to Aqaba, and, from this main road, branches run to Madeba, Karak, Tafleh and Wady Musa (Petra). The towns of Jerash, Irbid, Ajloun, Kufriji, Remte and Deraa, the last named being in Syrian territory, are joined by good roads to Amman. From Irbid a branch runs to Jisr Mejamie and Jisr Sheikh Hussein on the Palestine boundary. An alternative route from Amman to Deraa may be taken, the road running via Zerka and

Mafrak. From this latter, a branch road runs to Remte, El Hoen and Irbid. The oasis of Azrak may be reached by motor car from Mafrak, Zerka or Amman, and from Azrak cars can pass across the desert via Kutba to Baghdad. A regular mail service has been established by motor car between Palestine and Iraq across Transjordan. Total length of roads available for motor traffic (1938), approximately 2,000 kilometres. The Hedjaz Railway from Deraa to Kalaat Mudawara runs, with the exception of the first few miles, through Transjordan territory. South of Maan, however, the railway is in disrepair. The Cairo-Baghdad air route traverses the country from west to east, and there is an aerodrome with a Royal Air Force detachment at Amman. The revenue of the country in 1939-40 was £P513,971, including a grant-in-aid from the Imperial Government; expenditure, £P510,293. On December 31, 1939, the public debt amounted to £P155,107. Great Britain is represented by a British Resident subordinate to, and the agent of, the High Commissioner for Transjordan. The official language of the country is Arabic.

Government schools, of which 2,682 were African schools. The Supreme Court is at Nairobi, and sessions are held at Mombasa, Nakuru, Eldoret, Kisumu, and other places. District Courts presided over by magistrates are held in each district. In native cases local ideas and customs are considered. The legal status of slavery has been abolished throughout East Africa.

| 1938 | 8,776,030 | 8,876,162   | 1941 | 8,848,888 | 4,511,375   |
| 1939 | 8,811,778 | 8,908,079   | 1942 | 8,593,023 | 5,341,551   |
| 1940 | 4,111,412 | 4,064,466   | 1943 | 6,801,880 | 6,782,466   |

Of the revenue for 1943, customs and excise accounted for 1,780,359l.; licences, duties, taxes, etc., 2,027,543l.; posts and telegraphs, 452,270l.; fees, etc., 169,623l.; earnings of Government departments, 212,165l.; sale of Government property, 171,270l.; revenue from Government property, 92,774l.; miscellaneous receipts, 55,875l.; Forest Department, 140,501l.; reimbursements, 467,808l., and land sales, 18,820l. Public debt, December 1943, 24,827,051l.: Colony, 11,575,243l.; railways and harbours, 13,251,808l.

**Agriculture and Mining.**—As the pursuit of agriculture is possible from sea level to altitudes of over 9,000 feet, climatic conditions are extremely varied, and tropical, sub-tropical and temperate crops are grown. The main producing areas are in the highlands where flax, coffee, maize, wheat, sisal, tea and pyrethrum are crops of major importance. At lower altitudes where conditions are tropical, maize, sisal, sugar, coconuts and cotton are crops of principal importance. The dairy and wool industries are important, and considerable quantities of hides are exported annually. In addition to the above, groundnuts, simsim, potatoes, beans, essential oils, cashew nuts, and other miscellaneous crops are grown according to elevation and rainfall both for export and home consumption. In February, 1940 (the last completed agricultural census), livestock in the possession of Europeans numbered: 328,658 cattle of all descriptions, 262,470 wool-bearing sheep and 15,405 pigs.

The merchantable forest area extends over 1,800 square miles. At the coast are found mangroves, ebony, copal and other trees, but 95 per cent. of the forests are in the Highlands. They are mainly coniferous (juniper and podocarpus), but also contain valuable hardwoods such as camphor and olive. Pencil cedar is abundant.

The mineral resources are not yet fully explored. Production for 1943 was: soda ash and other soda products, 68,575 tons (value 388,719l.); salt, 15,075 tons (value 59,645l.); silver, 16,365 ounces (value 1,554l.). In addition to the foregoing, considerable quantities of limestone, building stone, marble, etc., were produced for internal consumption.

**Commerce and Shipping.**—There is a uniform Customs tariff in Kenya, Uganda and Tanganyika. The Colony and Protectorate of Kenya and Uganda Protectorate are one administrative unit for Customs purposes, and complete freedom of trade exists between the two territories and Tanganyika, Customs Revenue being allocated to the consuming territory.

Imports into Kenya and Uganda (excluding Government stores and Government bullion and specie), the domestic exports of Kenya and Uganda,

and the tonnage entered and cleared—Colony and Protectorate of Kenya—were :—

| Year | Trade Imports | Domestic Exports | Customs Revenue | Tonnage registered of vessels entered and cleared |
|------|---------------|------------------|-----------------|---------------------------------------------------|
|      | £             | £                | £               |                                                   |
| 1938 | 7,661,020     | 8,132,523        | 1,310,580       | 4,465,549                                         |
| 1940 | 10,456,690    | 9,247,561        | 1,376,679       | 4,701,671                                         |
| 1941 | 13,887,581    | 10,449,586       | 1,938,998       | 5,834,997                                         |
| 1942 | 12,995,961    | 9,706,743        | 1,395,614       | 5,996,523                                         |
| 1943 | 12,904,974    | 9,898,453        | 1,631,677       | 4,481,132                                         |

In 1943 the main imports were: grain and flour, 126,363l.; cigarettes, cigars and tobacco, 292,802l.; coal, 687,316l.; cement, 103,332l. (including clinker); tools and implements, 90,864l.; electrical goods and apparatus, 124,467l.; machinery, 556,870l.; cotton piece goods and manufactures, 8,095,014l.; woollen and worsted yarns and manufactures, 39,182l.; silk and artificial silk tissues and manufactures, 52,568l.; jute bags and sacks, 183,430l.; haberdashery and wearing apparel, 281,531l.; chemicals, drugs, dyes, paints and colours, 373,516l.; fuel oil, 1,470,058l.; lubricating oils and greases, 236,771l.; motor spirit, 1,046,252l.; mineral oil, illuminating or burning, 230,640l.; stationery and other paper manufactures, 269,105l.; motor cars, parts and accessories, 78,308l.; motor lorries, tractors, parts and accessories, 555,224l.; tyres and tubes for vehicles, 248,097l.

The principal countries of origin were: United Kingdom, 17.6 per cent.; India, 26 per cent.; other British Possessions, 24.2 per cent. (total British Empire, 67.8 per cent.); Persia, 18 per cent.; United States of America, 12.2 per cent.; other foreign countries, 2.0 per cent. (total foreign countries, 32.2 per cent.).

The principal domestic exports of Kenya and Uganda during 1943 were: coffee, 1,720,988l.; sugar, 200,418l.; tea, 585,319l.; cigarettes, 442,802l.; tin ore, 67,820l. (Uganda); cotton and cotton seed, 3,395,361l. (mainly Uganda); sisal, fibre and tow, 585,859l.; hides and skins, 483,906l.; wattle bark and extract, 174,888l.; sodium carbonate, 312,773l.; pyrethrum, 467,867l.; wool, 27,445l.; gold bullion, 479,422l.

The chief countries of destination were: United Kingdom, 31 per cent.; British Possessions, 48 per cent. (total British Empire, 79 per cent.); United States of America, 8 per cent.; other foreign countries, 13 per cent. (total foreign countries, 21 per cent.).

1943 Kenya and Uganda domestic exports to the United Kingdom, 3,110,378l.; imports from the United Kingdom, 2,566,554l.

1938 exports to the United Kingdom (Board of Trade returns), 2,170,334l.; imports from the United Kingdom, 2,689,445l.; re-exports, 46,372l.

**Communications.**—The Kenya and Uganda Railways and Harbours are State owned; the railway, which is metre gauge, consists of: main line, Mombasa island to Kampala, in Uganda, 879 miles, other lines in Kenya are: the Nakuru-Kisumu line, 134 miles; the Voi-Kahe Branch, 92 miles, with running powers over the Tanga line (Tanganyika Territory) between Kahe Junction and Moshi; the Magadi Branch, 91 miles; the Thika-Nyngi-Nanyuki line, 145 miles; the Solai Branch, 27 miles; the Kitale Branch, 41 miles, the Thomson's Falls Branch, 48 miles, and the Kisumu-Butere Branch, 43 miles. In Uganda,

Mbulamuti-Namasagali line, 19 miles; Port Bell-Kampala Railway, 6 miles; Tororo-Soroti Line, 100 miles. Traffic receipts, 1943, 3,679,412.

The harbours comprise the following: the Port of Mombasa, which includes Kilindini Harbour, Mombasa Old Port, Ports Reits and Tudor; and the Ports of Lamu, Malindi and Kilifi. Kilindini Harbour possesses 7 deep-water quay berths, a bulk oil jetty and a lightering berth.

The Kenya and Uganda Railways and Harbours also operate steamer services on Lakes Victoria, Kioga, Albert, and on the River Nile; and a motor transport service, 75 miles, between Masindi Port on Lake Kioga, and Butiaba, on Lake Albert.

During the year ending December 31, 1943, 2,024,238 tons of public goods and 2,745,229 passengers were carried by the railway, and the total tonnages, imports and exports, handled at Kilindini Harbour were, 1,878,991 tons; revenue, gross, 4,440,358/-; expenditure, gross, 2,873,991/-. Telegraphic communications exist along all lines of rail. The country is fairly well provided with roads and tracks. There is a motor road from Nairobi, across Uganda, to Mongalla in the Sudan.

The postal department of the Colony and Protectorate received and despatched 17,837,000 letters, packets, etc., exclusive of parcels, and 638,000 inland and 463,300 external telegrams during 1943. The telegraph and telephone system has 26,517 miles of wire (exclusive of Uganda). A cable connects Mombasa with Zanzibar. As from January 1, 1933, the postal and telegraph services of Kenya and Uganda were amalgamated with those of Tanganyika.

A short-wave wireless station, owned by Cable and Wireless, Ltd., is established at Nairobi and provides communication between the Colony and Protectorate and Great Britain, and the company also maintains a local broadcasting service.

**Money.**—The currency of the Colony and Protectorate, which is the same as that of the Uganda Protectorate, Tanganyika Territory and Zanzibar, is controlled by the East African Currency Board domiciled at 4 Millbank, London, S.W. 1, who maintain a stable rate of sterling exchange. The standard coin is the East Africa shilling of one hundred cents, introduced as from January 1, 1922, which is legal tender to any amount. Twenty East African shillings equal one East African pound. The subsidiary coins consist of 50 cent (silver), 10 cent, 5 cent and 1 cent (bronze). The paper currency consists of notes of the following denominations: 5, 10, 20, 100, 200, 1,000 and 10,000 shillings. Three banks operate in the colony.

*Governor and Commander-in-Chief.*—Major-General Sir Philip Mitchell, K.C.M.G., M.C. (appointed September 19, 1944; salary, with allowances, 8,500*l.*).

*Chief Secretary.*—G. McC. Rennie, C.M.G., M.C. (appointed March 23, 1939).

**THE UGANDA PROTECTORATE.**

The territories now comprised within this Protectorate came under British influence in 1890, and a portion of them was for a time administered by the Imperial British East African Company. In 1894 a British Protectorate was declared over the kingdom of Buganda and some of the adjoining territories. The present limits are approximately as follows :—On the north, the Anglo-Egyptian Sudan boundary ; on the east, a line drawn from Mt. Zulia on the Sudan boundary along the Turkana escarpment over the top of Mt. Elgon.

and along the west boundary of the Colony of Kenya to the eastern shores of Lake Victoria; on the south by the Tanganyika Territory (formerly German East Africa); and on the west by the eastern boundary of the Belgian Congo. Within these boundaries lie part of the Victoria Nyanza, part of Lake Edward, the whole of Lake George, half of Lake Albert, the whole of Lake Kioga, the whole of Lake Salisbury, and the course of the Nile from its exit from Lake Victoria to Nimule, where the Anglo-Egyptian Sudan commences. Total area 93,981 square miles, including 13,680 square miles of water. For administrative purposes it is divided into 3 provinces: (1) the Eastern Province, comprising the districts of Busoga, Teso, Karamoja and Mbale; (2) the Western Province, comprising the districts of Bunyoro, Lango, Acholi, West Nile, Toro, Ankoole, and Kigeri; and (3) Buganda Province, with islands in Lake Victoria, comprising the districts of Mengo, Masaka and Mubende.

**Government.**—The province of Buganda is recognised as a native kingdom under a 'Kabaka,' with the title of 'His Highness.' He is assisted in the government by three native ministers and a Lukiko, or native assembly. In Buganda, and in Bunyoro, Ankole and Toro, also ruled over by native 'kings,' purely native matters are dealt with by the various Lukikos. The remainder of the Protectorate is under a direct administration, but the native chiefs and councils are encouraged to conduct their own affairs. The principal British representative is the Governor, who is assisted by a Legislative Council and an Executive Council in carrying out the functions of Government. The headquarters of the British Administration is at Entebbe; the commercial centre is Kampala.

**Population and Education.**—The total population of Uganda is estimated to be 3,930,724, composed as follows: African, 3,301,440; Asiatic, 26,537; European, 2,747. Among the Africans approximately 910,000 are Baganda, the tribe from which the Protectorate takes its name, and which was the most powerful and civilised at the time when the first explorers visited the country. Until 1925 educational work was entirely in the hands of the various missionary societies, which still receive grants. Total grants, 1943, 121,209£. For the last 20 years the efforts of the missions have been supplemented by a Government educational scheme. A Higher College was established by Government at Makerere (Kampala) in 1925, and reconstituted in 1939 under the management of a Council, representing the various East African territories, from which the student body is recruited; 1,907 pupils were enrolled in 1943 in the 23 African secondary schools and 71,372 in primary schools. Total expenditure of public funds on education in 1943, 182,515£. About 2,400,000 Africans speak Bantu languages; there are a few Congo pygmies living near the Semliki river; the rest of the Africans belong to the Hamitic, Nilotic and Sudanese groups.

**Justice.**—The High Court, presided over by the Chief Justice and two Puisne Judges, exercises original and appellate jurisdiction, civil and criminal, throughout the Protectorate, and District Courts presided over by Magistrates exercise limited and criminal jurisdiction in each District. The Court of Appeal for Eastern Africa, presided over by a bench selected from the Judiciary of all East African territories, hears appeals from the High Court. Native Courts of varying limited jurisdiction deal with cases, both civil and criminal, involving Africans only, but certain classes of cases are reserved to the Protectorate Courts. Such Native Courts are supervised, in Buganda by a qualified Judicial Adviser, and elsewhere by the Adminis-

**British Resident.** The Legislative Council consists of four *ex-officio* and four official members. There are six unofficial nominated members, representing various communities.

**Population, Religion, Education, &c.**—The population of Zanzibar and Pemba, estimated from the census of 1931, was 250,000 (Zanzibar, 150,000; Pemba, 100,000). The Arabs are the principal landlords and employers of labour. The African population is composed of the indigenous Watumbatu, Wahadimu and Wapemba, and also the Waswahili composed of representatives of almost every mainland tribe. According to the 1931 census there were 48,962 non-native inhabitants, including 278 Europeans, most of whom are English, and about 14,000 British Indian subjects, through whose hands almost the whole trade of East Africa passes, and 33,400 Arabs. Zanzibar town has a population of 45,276.

Most of the natives are Mohammedans (Sunnis of the Shafi school); the Sultan and the principal Arabs are of the Ibadhi sect. There are 3 Christian Missions: the Universities Mission to Central Africa (Church of England), the Mission of the Holy Ghost (Roman Catholic), and the Friends' Industrial Mission.

Primary education is free. There are Government schools mainly for Moslems; a few mission schools; Indian schools supported by different communities for the children of their sects; a few private schools and a non-sectarian school. The total number of children attending these schools in 1943 was approximately 13,623. There is a Government rural boarding school and a teachers' training school for Arabs and African boys. A Government secondary school is attended by boys of all races. Two Government girls' schools in Zanzibar town were attended by 433 Arab and African pupils in 1943, of whom 43 were boarders. In addition there is a teachers' training class with 17 girls undergoing instruction. There were also 4 small rural schools for girls.

**Justice.**—In cases in which persons subject to the Zanzibar Order-in-Council, 1924, are concerned, justice is administered by His Britannic Majesty's High Court and the Courts subordinate to it, and in other cases by H. H. the Sultan's Court for Zanzibar and the Courts subordinate to that Court. Subordinate Courts are held by Resident Magistrates, Administrative Officers and Arab Kathis, and an appeal lies from those Courts to the British or Zanzibar Court as may be required. In addition, there are native District Courts, presided over by Arabs. An appeal lies from the British Court and from the Zanzibar Court in the exercise of their original civil and criminal jurisdiction to His Majesty's Court of Appeal for Eastern Africa and thence to the Privy Council.

Capitulations for French subjects in Zanzibar were abolished as from January 1, 1938.

**Finance.**—The revenue and expenditure for 6 years were as follows:—

| Year | Revenue from Customs (gross) <sup>1</sup> | Total Revenue (excluding loans) | Expenditure | Year              | Revenue from Customs (gross) | Total Revenue (excluding loans) | Expenditure |
|------|-------------------------------------------|---------------------------------|-------------|-------------------|------------------------------|---------------------------------|-------------|
| 1939 | £ 804,590                                 | £ 499,397                       | £ 452,216   | 1942              | £ 278,277                    | £ 548,436                       | £ 482,765   |
| 1940 | 270,190                                   | 465,260                         | 528,927     | 1943              | 254,585                      | 533,771                         | 499,085     |
| 1941 | 340,216                                   | 564,943                         | 480,370     | 1944 <sup>2</sup> | 241,550                      | 477,412                         | 526,789     |

<sup>1</sup> Includes duties on imports and clove export duty.

<sup>2</sup> Estimated.

Besides Customs, the chief sources of revenue in 1943 were: interest on loan to Kenya and other investments, 21,717*l.*; electricity department, 22,057*l.*; agriculture, 10,061*l.*; court fees, etc., 110,293*l.*; rent of Mainland Territory, 10,000*l.*; rent of Government property, land and houses, 9,525*l.*. The chief heads of expenditure in 1943 were: public works, electricity and wireless department, 62,711*l.*; customs, port and marine, 65,501*l.*; police and prisons, 33,936*l.*; agriculture, 29,078*l.*; provincial administration, 18,282*l.*; medical, 50,586*l.*; education, 35,302*l.*; municipality, Zanzibar Town, and Land Office, 14,741*l.*; miscellaneous, 18,107*l.*, and pensions, 5,831*l.*

**Production and Industry.**—The clove industry is by far the most important in the Protectorate, the Islands of Zanzibar and Pemba yielding the bulk of the world's supply. It is estimated that there are in both islands about 48,000 acres under cloves and over 3 million trees in bearing, the average output of the last 35 seasons being about 20 million lbs. The exports in 1942 were 218,362 cwts. The large plantations are chiefly owned by Arabs, but many natives possess small holdings. The coconut industry ranks next in importance after cloves. It is estimated that there are about 55,000 acres under cultivation and about 3½ million trees in both islands. The export of copra amounted in 1942 to 12,912 tons.

The manufactures are pottery, clove oil, coir fibre and rope, soap, oil (coconut and simsim), jewellery and mats. There are no mines in the Protectorate.

**Commerce.**—The total imports, exports, and shipping for 5 years were:—

| Years | Imports (Including bullion and specie) | Exports (Including bullion and specie) | Shipping entered (gross tonnage) |
|-------|----------------------------------------|----------------------------------------|----------------------------------|
|       | £                                      | £                                      | Tons                             |
| 1939  | 835,776                                | 1,167,028                              | 2,537,549                        |
| 1940  | 875,697                                | 1,153,474                              | 1,294,940                        |
| 1941  | 1,041,374                              | 1,551,208                              | 877,326                          |
| 1942  | 1,043,074                              | 1,355,363                              | 651,626                          |
| 1943  | 1,216,232                              | 1,137,321                              | 324,664                          |

The principal articles of import and export in 1943 were:—Imports: rice and grain, 128,072*l.*; cotton piece goods, 167,625*l.*; motor spirit and petrol, 54,430*l.*; sugar, 63,124*l.*; wheat flour, 35,825*l.*; tobacco, cigars and cigarettes, 35,903*l.*; ivory, 90,841*l.*. Exports: copra, 167,820*l.*; cloves, 531,120*l.*; ivory, 71,674*l.*

The trade between Zanzibar and the United Kingdom (Board of Trade returns) for four years is given as follows:—

|                                                       | 1935     | 1936     | 1937     | 1938 <sup>1</sup> |
|-------------------------------------------------------|----------|----------|----------|-------------------|
| Imports (consignments) into Gt. Britain from Zanzibar | £ 35,988 | £ 41,509 | £ 61,953 | £ 43,249          |
| Exports of British produce to Zanzibar                | 124,657  | 89,966   | 111,269  | 109,681           |
| Exports of Foreign and Colonial produce               | 1,708    | 1,270    | 1,944    | 1,919             |

<sup>1</sup> Provisional.

**Shipping and Communications, &c.**—Several British and foreign Steamship Companies have regular services to Zanzibar and all the important ports on the coast of East Africa. The Zanzibar Government steamers

trative Staff, the High Court having appellate powers in such cases in Uganda and exercising revisional jurisdiction over such Courts elsewhere. There is an armed constabulary force under a British Commissioner of Police and British officers, in addition to Native Government police forces.

**Revenue and Expenditure.**—The revenue and expenditure (exclusive of loan disbursements) for 6 years were:—

| Year | Revenue   | Expenditure | Year | Revenue   | Expenditure |
|------|-----------|-------------|------|-----------|-------------|
|      | £         | £           |      | £         | £           |
| 1938 | 1,863,864 | 2,019,655   | 1941 | 2,178,988 | 1,997,926   |
| 1939 | 1,717,987 | 2,259,976   | 1942 | 2,190,065 | 2,068,528   |
| 1940 | 1,870,915 | 2,056,548   | 1943 | 2,428,668 | 2,136,554   |

In 1943 the native poll-tax amounted to 566,026*l.*, customs and excise to 881,902*l.*, and cotton tax 69,465*l.* Debt, 158,976*l.*

**Production and Trade.**—Cotton is the principal product, and is grown almost entirely by Africans. The area under cotton in the 1943–44 season was estimated at about 1,233,801 acres. Other products are coffee, chillies, oil-seeds, tin ore, hides, ivory, sugar and tobacco. There are valuable forests.

Total exports in 1943, 5,659,721*l.*; cotton, 3,237,822*l.*; coffee, 1,143,165*l.*; ivory, 14,999*l.*; hides and skins, 151,433*l.*; tin ore, 67,820*l.*; sugar, 178,099*l.*; rubber, 71,689*l.*; tea, 73,173*l.*; cigarettes and tobacco, 489,511*l.* The total value of imports for consumption in 1943 was 2,765,027*l.*, consisting mainly of cotton fabrics and manufactures. The trade is chiefly with Great Britain, the United States and India. There is a uniform Customs tariff in Kenya, Uganda and Tanganyika.

**Communications.**—There are steamer services on Lakes Victoria, Kioga and Albert. The steamers on Lake Albert descend the Nile to Nimule, on the Sudan boundary, whence there is a motor road (about 100 miles) round the rapids extending to Juba, the terminus of the Nile steamers from Khartum. The main line of the Kenya and Uganda Railway extends to Kampala by way of Nakuru, Eldoret, Turbo, Tororo and Jinja. There is a railway from Port Bell to Kampala, 7½ miles in length.

Mail services by motor and relays of runners radiate from all main centres. The Sudan-Egyptian telegraph and telephone system is established to Rejaf. The Uganda telegraph line connects with the Belgian Congo via Fort Portal and the Semliki. The length of telegraph and telephone line in the Protectorate is (1944) 7,139 miles. There is a wireless station, used mainly for messages in connexion with the aeroplane services and the meteorological service, at Entebbe. The twice-weekly air mail service connects Uganda with the United Kingdom and South Africa.

**Currency and Banking.**—The currency unit is the shilling, introduced in 1921 and standardized, with subsidiary coinage of silver 50 cent pieces, and bronze 10 cent, 5 cent and 1 cent pieces. East African Currency Board notes of shillings 10,000, 1,000, 200, 100, 20, 10, 5 and 1 are also in circulation. The Savings Bank had a balance of 261,847*l.* on December 31, 1943. The National Bank of India (Limited) has branches at Entebbe, Kampala and Jinja, and the Standard Bank of South Africa and Barclays

Bank (Dominions, Colonial and Overseas) have branches at Kampala and Jinja.

**Governor and Commander-in-Chief.**—Sir John Hathorn Hall, K.C.M.G., D.S.O., O.B.E., M.C. (appointed September 19, 1944).

**Chief Secretary.**—J. E. S. Merrick, C.M.G., O.B.E.

## ZANZIBAR

The Island of Zanzibar is situated in 6° S. latitude, and is separated from the mainland by a channel 22½ miles across at its narrowest part. It is the largest coralline island on the African coast, being 50 miles long by 24 broad, and having an area of 640 square miles. To the north-east, at a distance of some 25 miles, lies the Island of Pemba in 5° S. latitude, 42 miles long by 14 broad, having an area of 380 square miles. The normal annual rainfall amounts in Zanzibar to 58·59 inches, and in Pemba to 73·25 inches.

In the sixteenth century the Arabs of the East Coast sought the assistance of the Imams of Muscat to drive out the Portuguese. The subsequent allegiance to Muscat, however, was of a more or less nominal character until Seyyid Said transferred his capital to Zanzibar in 1832. On his death in 1856 the African possessions were, under an arbitration by Lord Canning (then Governor-General of India), declared independent of the parent State. In 1890 the supremacy of the British interests in the Islands of Zanzibar and Pemba was recognised by France and Germany, and they were declared a British Protectorate in accordance with conventions by which Great Britain waived all claims to Madagascar in favour of France and ceded Heligoland to Germany. In the same year the mainland possessions, which extended over the coast from Warsheikh in 3° N. latitude to Tunghi Bay in 10° 42' S. latitude, were ceded to Italy, Great Britain, and Germany, respectively, Great Britain and Italy paying rent for the territories under their protection, while Germany acquired the Sultan's rights by the payment of a sum of 200,000*l.* At a later date Italy also acquired similar rights by payment of a sum of 144,000*l.* The British-ruled territories on the mainland were included in the East Africa Protectorate, and now form the Protectorate of Kenya (see above under Kenya). Thus the Zanzibar Protectorate is confined for administrative purposes to Zanzibar, Pemba, and adjacent small islands. In 1891, a regular Government was formed for the Protectorate with a British representative as first minister. In 1906 the Imperial Government assumed more direct control over the Protectorate and reorganised the Government. On July 1, 1913, the control of the Protectorate was transferred from the Foreign Office to the Colonial Office, legal effect being given to the change in the following year.

**Constitution and Government.**—The Sultan, Seyyid Sir Khalifa bin Harub, G.C.M.G., G.B.E. (born 1879), succeeded on the abdication of his brother-in-law, Ali bin Hamoud bin Mahomed, December 9, 1911. The Government is administered by a British Resident, who is appointed by command in His Majesty's Sign Manual and Signet, and exercises his functions under the Zanzibar Order-in-Council, 1924, as amended by the Zanzibar Order-in-Council, 1925.

Legislation consists of Decrees of His Highness the Sultan, which are binding on all persons when countersigned by the British Resident under the Order-in-Council.

In 1926 Executive and Legislative Councils were established. The former is presided over by His Highness the Sultan, and the latter by the

**Area, Population, &c.**

Mauritius, in the Indian Ocean, 500 miles east of Madagascar, has an area of about 720 square miles. According to the census of 1931, the population of the island was 393,238. The estimated population of Mauritius at the end of 1941 was 408,392 (males, 205,289; females, 203,103), and that of the Dependencies was 18,024.

Births, 1941, 18,430 (38.0 per 1,000); marriages, 4,741 (33.3 per 1,000); deaths, 10,436 (25.6 per 1,000). Population of Port Louis, the capital, with its suburbs, 57,028 (1941).

In 1931 there were 126,153 Roman Catholics, 4,466 Protestants (Church of England and Church of Scotland). State aid is granted to the Churches, amounting yearly to Rs. 202,931; the Indians are mostly Hindus.

**Education, &c.**

Primary education is free but not compulsory. At the end of 1941 there were 51 Government and 74 aided schools. Average attendance at Government schools, 1941, 11,336 (15,667 on roll); at State-aided schools, 16,571 (24,899 on roll, of whom three-fourths were in Roman Catholic schools). For secondary education there is a Royal College and a school with (1941) 438 pupils. There were also in 1941 nine aided secondary schools for boys and girls. The total Government actual expenditure in 1940-41 on education was Rs. 1,430,614; the estimated expenditure for 1942-43 is Rs. 1,592,771.

**Finance.**

| Years ended<br>June 30 | 1937-38 <sup>1</sup> | 1938-39 <sup>2</sup> | 1939-40 <sup>3</sup> | 1940-41 <sup>4</sup> | 1941-42 <sup>5</sup> |

<sup>1</sup> Excluding value of Sugar Quota certificates, which in the years 1938 and 1939 may be estimated at Rs. 4,900,000, in 1940 at Rs. 4,750,000, and in 1941 at Rs. 4,900,000.

Staple exports, sugar, 363,203,147<sup>1</sup> kilos, value, Rs. 55,833,848 in 1941; copra and poonac, Rs. 58,613; aloe fibre, Rs. 99,958. The trade was chiefly with the United Kingdom, Australia, India, Union of South Africa, Chile, Dutch E. Indies and the United States. The sugar crop in 1940-41 was 316,250 metric tons, and in 1941-42 was 323,680 metric tons.

Imports into the United Kingdom from Mauritius (British Board of Trade returns) 1937, 3,826,961<sup>1</sup>; 1938, 3,594,864<sup>1</sup>. British exports to Mauritius, 1937, 713,731<sup>1</sup>; 1938, 726,268<sup>1</sup>.

**Shipping and Communications.**

The registered shipping January 1, 1941, consisted of 7 sailing vessels of 562 tons, 3 steamers of 2,346 tons, and 1 motor vessel of 176 tons; total, 11 vessels of 3,084 tons. Vessels entered in 1941, 137 of 379,224 tons.

There are 106.25 miles of railway of 4 ft. 8½ in. gauge, and 13.66 miles narrow gauge of 75 cm. The Railway Department is run on a commercial basis. Its receipts are excluded from the general revenue of the Colony. Gross earnings, Rs. 1,919,775; working expenditure, Rs. 1,692,257 for 1940-41.

Of telegraphs and telephones there were (1941) 285 and 4,608 miles of line respectively; there is a cable communication with Zanzibar, Australia, Réunion, Madagascar, and Durban. In 1941 the Post Office dealt with 829,972 letters, 53,996 postcards, 1,527,932 newspapers, 14,533 parcels and 51,288 telegrams.

**Money, Weights and Measures.**

On June 30, 1942, the Government Savings Bank held deposits amounting to Rs. 6,972,194.88 (estimated), belonging to 44,382 depositors.

The currency consists of: (i) The Government note issue of Rs. 1,000, Rs. 10, Rs. 5 and Re. 1 and 50 and 25 cents; (ii) the Mauritius silver rupees and its silver sub-divisions; half rupees (50 cents), quarter rupees (25 cents), 20 cents and 10 cents; (iii) bronze coins of 5, 2 and 1 cent. All accounts are kept in rupees and cents. The note circulation as at June 30, 1942, was Rs. 10,984,970. The metric system is in force.

**Dependencies.**

Rodrigues (under a Magistrate) is about 350 miles north-east of Mauritius, 18 miles long, 7 broad. Area, 42 square miles. Population (census 1931, 8,202) on December 31, 1941, 11,424. Actual revenue (1941-42), Rs. 40,955 (exclusive of revenue collected in Mauritius) and actual expenditure, Rs. 162,419 (exclusive of expenditure incurred in Mauritius); imports (1941), Rs. 548,634; exports, Rs. 1,063,280. There is one Government and two aided schools.

The Lesser Dependencies are Diego Garcia, Six Islands, Peros Banhos, Solomon Islands, Agalega, St. Brandon Group, Trois Frères. The nearest island is 230 miles from Mauritius, and the most remote about 1,200 miles. Total population of the lesser dependencies, census 1931, 1,457 (806 males, 651 females). Estimated population on December 31, 1941, 1,600.

Diego Garcia (the most important of the Oil Islands Group), in 7° 20' S. lat., 72° 28' E. long., is 12½ miles long, 6½ miles wide, with 445 inhabitants (census 1931), a large proportion are labourers from Mauritius. 8,603 litres of coconut oil were exported in 1941 from the Lesser Dependencies. Other exports are coconuts, copra, guano and salted fish.

## NYASALAND PROTECTORATE (BRITISH).

The Nyasaland (until 1907 British Central Africa) Protectorate, constituted on May 14 1891, lies along the southern and western shores of Lake Nyasa (the third largest lake in Africa, about 360 miles in length and from 10 to 55 miles wide), and extends towards the Zambezi. It is administered under the Colonial Office by the Governor and Commander-in-Chief, assisted by an Executive and a Legislative Council, both consisting of nominated members, the Governor having the right of veto (Order in Council of September 4, 1907). The Laws consist of local Ordinances duly enacted, with such British Acts as are of general application.

Land area, 37,374 square miles, divided into two Provinces, each in charge of a Provincial Commissioner, and nineteen districts, each administered by a District Commissioner. Population on December 31, 1940, 1,738 Europeans (mostly in the Shire Highlands), 1,851 Asiatics, and 1,682,466 natives. The chief settlements are Blantyre and Limbe in the Shire Highlands, with about 600 European inhabitants: others are Zomba (the seat of Government), Cholo, Lilongwe, and Mlanje; on Lake Nyasa are Salima, Fort Johnston, Kota-Kota, Bandawe, Chintechi, Nkata, Likoma, and Karonga. There are good motor roads in all directions and life and property are safe. Education is controlled by the Education Department. Grants in aid are paid to mission societies for native education and there are four elementary schools for European children, which are maintained as private establishments and receive grants from Government. The Government has established a training centre for native teachers and has financed the establishment of two secondary schools for Africans. Eleven Christian missions are at work; in 1943 there were 4,070 native schools with a total roll of 183,242 pupils and an average attendance of 128,729. The total grant in aid paid by Government to missionary societies in 1943 was 17,343*l.* in respect of native education. The grant in aid to the two secondary schools was 2,716*l.* The grant in aid for European education was 988*l.*, plus 1,429*l.* in bursaries to Nyasaland children attending S. Rhodesian schools. A further grant, under the Colonial Development and Welfare Act, of 345,000*l.* was made in October, 1944, for a 5-year plan of educational development.

Justice is administered in the High Court, which has jurisdiction in civil and criminal matters, and also as a Court of Admiralty. Subordinate courts are held by magistrates and assistant magistrates in the various districts. Appeals from decisions of the High Court are heard in H.B.M.'s Court of Appeal for Eastern Africa.

Agriculture is directed to the production of crops generally and to the

conservation of the natural resources of the Protectorate. With the exceptions of sugar and wheaten flour, the country is self-supporting in all agricultural products and great efforts have been made both to accumulate reserves of essential food crops and to stimulate the production of food and economic crops for export. Climatic conditions during the 1943 season were generally unfavourable and production suffered correspondingly. Nevertheless the tobacco crop was the largest on record, though of inferior quality. Tea yields were adversely affected by the accumulated effect of three years of drought or semi-drought conditions. The acreage under tung oil continued to increase, and plans are advanced for the cultivation of this crop by Africans in selected areas in the Northern Province. There is only one sisal and one rubber estate in Nyasaland and both worked to full capacity during the year. Considerable quantities of wild rubber were also collected by natives. Pyrethrum was introduced as an economic crop for the first time and will be grown by natives under European control. Cotton production was the lowest in recent years due, in part, to the counter attraction of tobacco, but more particularly to the fact that the incidence of pests and disease was unusually high. Soil conservation schemes are being carried out in various parts of the Protectorate with considerable success.

Tobacco forms a very large proportion of the total exports from the Protectorate. In 1941, 17,780,556 lbs. were exported, and in 1942 18,722,626 lbs. The cultivation of tea is centred round Mlanje and Cholo; acreage in 1942 was 19,100 acres; exports in 1942 amounted to 12,382,404 lbs. Acreage under coffee was 63 acres in 1942; exports in 1942 were 10,049 lbs. Cotton exports were 1,250,620 lbs. in 1941, and 3,737,116 lbs. in 1942. Livestock in the Protectorate (1942): goats, 187,772; horned cattle, 264,102; sheep, 38,566; pigs, 55,255; asses and mules, 107; horses, 59.

The trade ports are Port Herald (Lower Shire), Chileka (Blantyre), Limbe, Kota-Kota, Fort Manning, Karonga, and Fort Johnston (Lake Nyasa).

|                      | 1939    | 1940      | 1941      | 1942      | 1943      |
|----------------------|---------|-----------|-----------|-----------|-----------|
|                      | £       | £         | £         | £         | £         |
| Imports <sup>1</sup> | 774,590 | 837,961   | 1,003,800 | 895,550   | 1,276,322 |
| Exports              | 823,823 | 1,042,310 | 1,296,847 | 1,897,286 | 1,379,401 |

<sup>1</sup> Excluding specie and goods in transit.

Estimated revenue for 1944, 693,115*l.*; expenditure, 692,635*l.*

Direct imports from Great Britain and British Possessions, 1942, 77.2 per cent. of total; direct exports to the United Kingdom, 1942, 55.6 per cent. of total.

The Ordinary Revenue in 1943 was derived from Customs, 178,416*l.*; Native Poll Tax, 179,081*l.*; Income Tax and Non-Native Poll Tax, 242,335*l.*; Licences and Excise, 34,668*l.*; Fees of Court, 27,397*l.*; Posts and Telegraphs, 34,667*l.*; Rents, 4,104*l.*; Interest, 2,891*l.*; Miscellaneous, 40,890*l.*; Widows and Orphans Pension Fund Contributions, 6,466*l.*

Public debt, December 31, 1943, 3,780,393*l.*

There are military, volunteer reserve, and civil police forces.

There is a Marine Transport Department on Lake Nyasa, operated by Nyasaland Railways, Ltd. Lake transport registered in Nyasaland consists of 1 motor vessel, 4 steamers, and about 60 dhows and lighters.

There are 45 post offices through which, in 1943, about 4,000,000 postal

packets passed. The postal savings bank had 5,845 depositors at end of 1943; deposits, 182,096*l*. There is a 3 ft. 6 in. gauge railway system extending from the Port of Beira, in Portuguese East Africa, to Chileka on Lake Nyasa (496 miles) crossing the Zambezi at Sena (199 miles) by the Lower Zambezi Bridge and passing through Blantyre (353 miles). The road system of the Protectorate comprises 3,783 miles and serves all the principal centres of production, European and native. Good motor road communication with South Africa exists and the extension northwards links Nyasaland with the Great North Road through Northern Rhodesia, Tanganyika Territory, and Kenya Colony. Several aerodromes, landing grounds, and emergency landing grounds have been constructed, and the principal centres of Chileka, Zomba and Lilongwe are full sized and suitable for all types of aircraft. Regular services for mails and passengers fly between Chileka and Salisbury, Beira, Fort Jameson. There is a telegraph line through the Protectorate connecting southwards with Cape Town and northwards with Tanganyika, Kenya and Uganda. Telegraphs are controlled by the Government. Electric light and power plants have been installed at Zomba, Blantyre and Limbe.

At Blantyre, Zomba, and other centres there are branches of the Standard Bank of South Africa and at Blantyre and Limbe there are branches of Barclays (Dominion, Colonial and Overseas) Bank. The currency consists of British coin, gold, silver, and bronze, and Rhodesian bank-notes silver and cupro-nickel coin.

The rainy season in Nyasaland lasts from November to April.

*Governor and Commander-in-Chief.*—Sir Edmund Richards, K.C.M.G. (appointed June 5, 1942).

*Chief Secretary.*—C. J. J. T. Barton, C.M.G., O.B.E. (appointed September 19, 1941).

#### ST. HELENA.

*Governor.*—Major William Bain Gray, C.B.E. (appointed March 18, 1941).

*Government Secretary.*—(Vacant.)

St. Helena, of volcanic origin, is 1,200 miles from the west coast of Africa. Area, 47 square miles, with a cultivable area of 8,600 acres. It is administered by an Executive Council consisting of the Governor and five official members. The Governor is also assisted by an Advisory Council consisting of six unofficial members chosen to represent as far as possible all unofficial sections of the community. Population (1940, estimated), 4,710. Births (living), 1940, 158; deaths, 47. There are 4 Episcopal, 4 Baptist, 1 Roman Catholic chapels. Education: 9 elementary schools controlled by

Government, with 984 pupils in 1940. Police force 10; cases dealt with by the Supreme Court, 6; by police magistrate, 80 in 1940. A garrison is stationed on the island. The port of the island is called Jamestown.

The following table gives statistics for St. Helena:—

|                      | 1936   | 1937   | 1938   | 1939   | 1940   |
|----------------------|--------|--------|--------|--------|--------|
|                      | £      | £      | £      | £      | £      |
| Revenue <sup>1</sup> | 23,198 | 41,486 | 26,912 | 15,096 | 33,720 |
| Expenditure          | 19,569 | 22,191 | 29,930 | 33,363 | 33,865 |
| Exports <sup>2</sup> | 17,866 | 25,943 | 6,781  | 16,294 | 29,673 |
| Imports <sup>3</sup> | 32,836 | 37,628 | 37,613 | 37,466 | 50,982 |

<sup>1</sup> Including 1 imperial grants (£3,000*l*. in 1936).

<sup>2</sup> Including specie. <sup>3</sup> Including specie, but excluding Government stores.

The revenue from customs in 1938, was 6,251*l*.; in 1939, 5,667*l*.

Public debt, nil; the Colony's assets at December 31, 1940, exceeded the liabilities by 4,857*l*.

The principal exports are fibre, tow, rope and twine.

Savings-bank deposits on December 31, 1940, 32,607*l*., belonging to 270 depositors.

Fruit trees, Norfolk pines, eucalyptus, and cedars flourish in St. Helena. Cattle do well, but there is no outside market for the meat. The flax (*phormium*) industry is established at a Government mill and 8 private mills. The area of land under flax was estimated at 3,250 acres in 1934. A lace-making industry was started in 1907. The number of vessels that called at the Island was 59 in 1940. Total tonnage entered and cleared was 276,778 in 1940.

The Cable and Wireless Ltd. cable connects St. Helena with Cape Town and with St. Vincent. There are telephone lines, with 80 miles of wire.

Ascension is a small island of volcanic origin, of 34 square miles, in the South Atlantic, 700 miles N.W. of St. Helena. From 24 to November, 1922, it was under the control and jurisdiction of the Lords Commissioners of the Admiralty, but it was then transferred to the administration of the Colonial Office and annexed to the colony of St. Helena. There are 10 acres under cultivation providing vegetables and fruit. Population, December 31, 1940, was 169.

The island is the resort of the sea turtle, which come to lay their eggs in the sand annually between January and May. Rabbits, wild goats, and partridges are more or less numerous on the island, which is, besides, the breeding ground of the sooty tern or 'wideawake,' those birds coming in vast numbers to lay their eggs about every eighth month. The island is included in the Postal Union.

*Resident Magistrate.*—S. H. Cardwell.

Tristan da Cunha, a small group of islands in the Atlantic, half-way between the Cape and S. America, in 37° 6' S. lat. 12° 1' W. long. Besides Tristan da Cunha and Gough's Island, there are Inaccessible and Nightingale Islands, the former two and the latter one mile long, and a number of rocks. Tristan consists of an extinct volcano rising to a height of 8,000 feet, with a circumference at its base of 21 miles. The habitable area is a small plateau on the north-west side of about 12 square miles, 100 feet above sea-level. The staple food appears to be the potato. There are apple and peach trees;

bullocks, sheep and geese are reared, and fish are plentiful. Besides being inhospitable, the island is extremely lonely. Since 1900 the annual visits of a warship have been discontinued. Despite these disadvantages, the community is a growing one. In 1880 it numbered 109, in 1944, 222. The characteristics of the people are longevity, good health, and a certain shyness of disposition. The original inhabitants were shipwrecked sailors and soldiers who remained behind when the garrison from St. Helena was withdrawn in 1817. Many attempts have been made to induce the inhabitants to leave. The lack of educational facilities for their children was the sole argument which carried weight in the eyes of the inhabitants. In 1932, the Rev. A. G. Partridge who visited the island at the request of the Colonial Office, set up, before he left, a Chief of the islanders and 3 officers to work under him. The Chief is chairman of the Island Council. The Chief's mother was also appointed Head Woman and chairman of the Women's Council, a body which is concerned with the welfare of women and children.

As from January 12, 1938, the islands of Tristan da Cunha, Gough, Nightingale, and Inaccessible, in the South Atlantic, are Dependencies of the Island of St. Helena.

## SEYCHELLES.

Seychelles and its Dependencies consist of 92 islands and islets with a total estimated area of 156½ square miles. The principal island is Mahé (55½ square miles), smaller islands of the group being Praslin, Silhouette, La Digue, Curieuse and Félicité. Among dependent islands are the Amirantes, Alphonse Island, Bijoutier Island, St. François, St. Pierre, the Cosmoledo Group, Astove Island, Assumption Island, the Aldabra Islands, Providence Island, Coetivy, Farquhar Islands and Flat Island.

The islands were first colonised by the French in the middle of the eighteenth century, the object being to establish plantations of spices to compete with the lucrative Dutch monopoly. They were captured by the English in 1794 and incorporated as a dependency of Mauritius in 1810. In 1888 the office of Administrator was created, an Executive Council of 2 *ex-officio* members and 1 nominated member was appointed, with a Legislative Council of 3 official and 3 unofficial members, the Administrator being president of both Councils and having an original and casting vote in the Legislative Council. In 1897 the Administrator was given full powers as Governor, and in November, 1903, he was raised to the rank of Governor. In 1931 the constitution of the Executive Council was altered by the addition of an 'unofficial' member.

Governor and Commander-in-Chief.—Sir William M. Logan, K.B.E., O.M.G. (appointed January 5, 1942).

The population at December 31, 1943, was estimated to be 33,621 (16,595 males and 17,096 females). The number of births in 1943 was 854; deaths, 405; marriages, 141. The capital is Victoria, which has a good harbour. Education is not compulsory. There were in 1943, 26 grant-in-aid schools (20 Roman Catholic and 6 Anglican) and 3 other primary schools (2 Roman Catholic and 1 Anglican). In addition, there are 2 secondary schools, 1 for boys and 1 for girls, with a total of 85 pupils. Total number of children attending school in 1943 was 3,700; average attendance, 75 per cent. In 1943, 2,833 cases were brought before the Supreme Court (criminal side). The police force numbered 85 of all ranks (1943).

Revenue, expenditure and debt for five years:—

| Year. | Revenue.  | Expenditure. | Debt. |
|-------|-----------|--------------|-------|
|       | Rs.       | Rs.          | £     |
| 1939  | 833,018   | 903,901      | Nil.  |
| 1940  | 694,029   | 711,781      | Nil.  |
| 1941  | 833,387   | 689,353      | Nil.  |
| 1942  | 931,698   | 747,410      | Nil.  |
| 1943  | 1,150,584 | 1,047,866    | Nil.  |

Chief items of revenue, 1943: Customs, Rs. 548,470; port and marine, Rs. 19,192; licences, taxes, etc., Rs. 315,182; fees of court, Rs. 44,897; Post Office, Rs. 73,628; Crown lands, Rs. 56,498; interest, Rs. 5,319; miscellaneous, Rs. 63,958; Seychelles Agricultural Bank, Rs. 23,489.

Chief products, coconuts (over 28,300 acres under cultivation and this area is being extended in the outlying islands) and cinnamon, patchouli and other essential oils. Efforts are being made to develop the essential oil industry by improving methods of distillation and cultivation of other essential oil plants. On some islands mangrove-bark and the yolk of birds' eggs are collected and phosphate deposits worked. Live-stock at end of 1943: Cattle, 3,277; goats, 1,000; horses, 15; asses, 100; pigs, 8,533. Fishing is actively pursued, chiefly for local supply.

Imports and exports for 4 years:—

| Year. | Imports.  | Exports.  | Year. | Imports.  | Exports.  |
|-------|-----------|-----------|-------|-----------|-----------|
|       | Rs.       | Rs.       |       | Rs.       | Rs.       |
| 1937  | 1,263,351 | 1,503,510 | 1939  | 1,160,211 | 1,384,130 |
| 1938  | 1,187,134 | 944,008   | 1940  | 1,690,076 | 1,180,895 |

Principal imports, 1940: rice, 2,586 tons, Rs. 315,133; cotton piece goods, 518,087 yards, Rs. 95,832; sugar, 620 tons, Rs. 114,140; flour, 320 tons, Rs. 42,390; motor cars and cycles, 39, Rs. 13,981; cigarettes, 2,569,500, Rs. 13,413; dholl and lentils, 100 tons, Rs. 15,200; butter and cheese, 4,920 kilos, Rs. 9,277; gunny bags, 48,400, Rs. 22,616; coffee, 30,706 kilos, Rs. 10,654; motor spirit, 130,640 litres, Rs. 10,588; salt, 324 tons, Rs. 12,720; onions, 73,400 kilos, Rs. 4,637; potatoes, 26,504 kilos, Rs. 2,878.

Principal exports, 1940: copra, 4,640 tons, Rs. 540,430; guano, 14,613 tons, Rs. 146,122; cinnamon leaf oil, 90,591 kilos, Rs. 339,735; patchouli oil, 1,748 kilos, Rs. 40,812; vanilla, 4,340 kilos, Rs. 89,565; tortoise-shell, 19 kilos, Rs. 100; calipee, 2,379 kilos, Rs. 4,469; birds' egg yolk, 5,900 kilos, Rs. 2,240.

Imports in 1940: from United Kingdom, Rs. 260,853; India, Rs. 242,050;

maintain regular fortnightly connection with Pemba, as well as making calls at Dar-es-Salaam.

Ocean-going shipping dealt with in 1943, 19,423 tons net (61 vessels); coastwise, 68,513 tons (196 vessels); dhows, 47,719 tons entered and 48,881 tons cleared. Excellent water supplied at 3.5 tons per minute is available for shipping.

There is cable communication with Europe either via Aden or via Durban.

There are 242 miles of roads throughout the Islands of Zanzibar and Pemba suitable for motor traffic.

The Government maintains wireless stations in Zanzibar and Pemba, and a telephone system in the town of Zanzibar, which is connected with the District and Agricultural stations in the country. A telephone service also exists in the Island of Pemba, connecting the three main townships, i.e., Wete, Chake Chake and Mkoani. There are four post offices in the two islands. The Government Savings Bank at the end of 1943 had 8,144 depositors, with 96,116l. on deposit.

Since January 1, 1936, the East African Currency Board shilling (20=1l.) has been the unit of currency in Zanzibar with subsidiary coinage of 50 cents (silver), and 10 cents, 5 cents, and 1 cent (bronze). Notes issued by the East African Currency Board are also legal tender in the Protectorate.

The rupee of British India and Seyyidieh copper piece ceased to be legal tender after April 6, 1936. Notes of the Zanzibar Currency Board may be redeemed for East African currency on presentation to the Chief Accountant.

The value of East African currency in circulation in the Protectorate on December 31, 1943, was: coin, 253,117l.; notes, 418,618l. Zanzibar currency notes unredeemed on December 31, 1943, amounted to 1,629l.

An important local unit of weight is the *frasila* (or *frasila*) = 35 lb. av.

*British Resident.*—Sir Henry Guy Pilling, K.C.M.G. (appointed July 17, 1941).

*Chief Secretary.*—Major E. A. T. Dutton, C.B.E. (June 8, 1942).

### MAURITIUS.

Mauritius was known to Arab navigators at an early date, probably not later than the tenth century. It was no doubt visited by Malays in the fifteenth century, and was discovered by the Portuguese between 1507 and 1512, but the Dutch were the first settlers (1598). In 1710 they abandoned the island and it was occupied by the French under the name of Isle de France (1715). The British occupied the island in 1810, and it was formally ceded to Great Britain by the Treaty of Paris of 1814.

The Island is of volcanic origin. The climate is free from extremes of weather, except for tropical cyclones at times. Yearly rainfall varies from 30 inches on parts of the coast to 150 inches in the uplands.

**Constitution and Government.**—Under Letters Patent of 1885-1889, partially representative institutions have been established. The government of the Colony, with its dependencies, Rodrigues, the Oil Islands, etc., is vested in a Governor, aided by an Executive Council, consisting of the senior officer in command of His Majesty's troops, the Colonial Secretary, the Procurer and Advocate-General, the Financial Secretary, and Secretary, the Procurer and Advocate-General, through instructions from the Secretary of State, may from time to time appoint, usually two unofficial members. There is also a Council of Government, consisting of the Governor and twenty-seven members, ten being elected under a moderate franchise, eight *ex-officio*, and nine nominated by the Governor. Two-thirds of the nominated members are unofficial, and have a free vote on all occasions, but the Governor is given power to enact legislation considered by him to be essential in the interests of good government.

*Governor of Mauritius.*—Sir Henry C. D. C. MacKenzie-Kennedy, K.C.M.G. (appointed July 6, 1942).

*Colonial Secretary.*—S. Moody, C.M.G., O.B.E. (appointed November 21, 1939).

**Commerce.**—The following are the total values of imports and exports by traders during recent years :—

|             | 1938    | 1939    | 1940    | 1941    | 1942      |
|-------------|---------|---------|---------|---------|-----------|
|             | £       | £       | £       | £       | £         |
| Imports . . | 749,126 | 866,403 | 875,280 | 992,924 | 1,033,328 |
| Exports . . | 401,512 | 405,517 | 461,666 | 531,447 | 459,509   |

Principal imports are blankets, ploughs, clothing, tin ware, and other native requirements ; and principal exports in 1942 were wool (7,978,122 lb., value 233,817*l.*), mohair (1,353,267 lb., value 54,599*l.*), wheat and wheat meal (51,379 bags, value 55,253*l.*), sorghum (49,245 bags, value 51,930*l.*), and cattle (3,122 units, value 68,025*l.*).

**Communications.**—A railway built by the South African Railways, 16 miles, connects Maseru with the Bloemfontein-Natal line at Marseilles station. There is a main road running along the western border of Basutoland, with outlets to the border ports of exit. Internal communications of Basutoland consist mainly of paths suitable for pack animal transport only. Regular motor services of the South African Railways now operate between railheads at Zastron and Fouriesburg (Orange Free State) and the Government stations of Quthing, Moleles Hoek and Butha Butha.

**Currency.**—British (except silver) and Union of South Africa coins and South African Reserve Bank notes are legal tender in Basutoland.

*Resident Commissioner.*—Lieut.-Col. C. N. Arden *Clarke*, C.M.G. (appointed August, 1942).

### BECHUANALAND PROTECTORATE.

The Bechuanaland Protectorate comprises the territory lying between the Molopo River on the south and the Zambezi on the north, and extending from the Transvaal Province and Southern Rhodesia on the east to South-West Africa. The climate is on the whole sub-tropical, and the atmosphere throughout the year is very dry. Area about 275,000 square miles; population, according to the census of 1936: Europeans, 1,899; Asiatics and coloured, 3,793; native, 260,064. The most important tribes are the Bamangwato (101,481), under the Chief Tshekedi (acting as regent during the minority of Seretse, the son of Sekgoma, who died in November, 1925), whose capital is Serowe (population about 28,987), 32 miles west of the railway line at Palapye; the Bakgatla (13,855), under a tribal council; the Bakwena (26,439), under a tribal council; the Bangwaketse (23,584), under Chief Bathoen, the eldest son of the late Chief Seepapitso; the Batawana (42,158), under Chief Moremi; the Bamaletse (5,902), under Chief Ikaneng, acting during the minority of Mokgosi Mokgosi; and the Batlokwa (1,563), under Chief Matlala.

In 1885, the territory was declared to be within the British sphere ; in 1889 it was included in the sphere of the British South Africa Company, but was never administered by the company ; in 1890 a Resident Commissioner was appointed, and in 1895, on the annexation of the Crown Colony of British Bechuanaland to the Cape of Good Hope, new arrangements were made for the administration of the Protectorate, and special agreements were made in view of the extension of the railway northwards from Mafeking. Each of the chiefs rules his own people as formerly, under the protection of the King, who is represented by a Resident Commissioner, acting under the High Commissioner. The headquarters of the Administration is in Mafeking, in the Cape Province, where there is a reserve for Imperial purposes.

The Territory is divided for administrative purposes into 10 districts, each under a District Commissioner. There is a tax of 2*s.* on every male native in the territory, and under the Native Treasuries scheme, 35 per cent. of the tax collected in each Native Reserve is transferred to the Native Treasury of the tribe concerned, which manages expenditure upon such items as education, tribal stock improvement, and native tribunals. Licences for the sale of spirits are, as a rule, granted only at certain railway stations and hotels. The police force consists of 52 European officers and other ranks, 126 Native Mounted Police, 100 Police Messengers.

Education is provided (there were 12 European, 3 coloured, and 128 native schools, 1943). The European schools were assisted financially by the Government to the extent of 3,506*l.* in 1943-44. The native schools are now mainly financed by the Native Treasuries, the charge to which for 1943-44 was 22,392*l.*, of which the Native Treasuries provided 14,622*l.* Under the Director of Education, the schools are controlled in most of the Reserves by School Committees on which the various missionary bodies are, together with natives, represented.

Cattle-rearing and dairying are the chief industries, but the country is more a pastoral than an agricultural one, crops depending entirely upon the rainfall. According to the most recent estimates the number of cattle is 836,843 ; sheep and goats, 551,091.

Gold and silver to the total value of 101,525*l.* were mined in 1943.

Revenue and expenditure for six years :—

| Year    | Revenue | Expenditure | Year    | Revenue | Expenditure |
|---------|---------|-------------|---------|---------|-------------|
|         | £       | £           |         | £       | £           |
| 1938-39 | 261,743 | 267,973     | 1941-42 | 263,549 | 244,797     |
| 1939-40 | 264,537 | 271,549     | 1942-43 | 303,403 | 260,398     |
| 1940-41 | 237,007 | 240,059     | 1943-44 | 361,138 | 293,490     |

Chief items of revenue, 1943-44 : income tax and poll tax, 129,265*l.* ; customs, 53,893*l.* ; 'native' tax, 75,920*l.* ; licences, 10,318*l.* ; posts, 24,686*l.* Chief items of expenditure, 1943-44 : Resident Commissioner and Government Headquarters, 14,250*l.* ; district administration, 17,299*l.* ; posts, 8,081*l.* ; police, 34,214*l.* ; administration of justice, 7,048*l.* ; public works (extraordinary and recurrent), 32,988*l.* ; medical, 31,411*l.* ; veterinary, 31,455*l.* ; agriculture, 13,867*l.* ; excess of assets over liabilities on April 1, 1944, 167,529*l.*

When the Union of South Africa was established, an agreement was made with the Union Government under which duty on all dutiable articles imported into the Protectorate is collected by the Union Customs Department and paid into the Union Treasury, a lump sum representing a certain portion of the annual Customs Revenue of the Union being paid over to the Pro-

## 234 THE BRITISH COMMONWEALTH:—SWAZILAND

tutorate. Under this arrangement full figures relating to imports and exports of the Protectorate are not available.

The telegraph from the Cape of Good Hope to Rhodesia passes through the Protectorate. Similarly the railway extending northwards from the Cape of Good Hope traverses the Protectorate. It is the property of the Rhodesia Railways Limited. In the Protectorate are 30 post offices; receipts, in 1943-44, 24,686*l.*; expenditure, 8,081*l.* In 1943-44, 31,523*l.* was deposited in the Savings Bank and 10,429*l.* withdrawn.

The currency is British. There is no bank in the Protectorate.

*Resident Commissioner.*—A. D. Forsyth Thompson, C.M.G., C.B.E.

## SWAZILAND.

Swaziland lies at the south-eastern corner of the Transvaal. On June 25, 1903, an Order in Council was issued conferring on the Governor of the Transvaal authority over Swaziland. By Order in Council of December 20, 1934, this authority was invested in the High Commissioner for Basutoland, the Bechuanaland Protectorate and Swaziland.

The seat of the administration is at Mbabane; altitude 3,800 feet. Area, 6,705 square miles. Population, census 1936: 156,715, including Europeans, 2,740; natives (Bantu), 153,270; coloured, 705.

During 1943, 9 schools for Europeans were maintained or aided from general revenue, providing primary education for 344 children and secondary education (at 2 of these schools) for 55 children. There were 3 schools for Eurasian children, 2 of which received Government assistance; the enrolment was 165 in 1943. There were 226 schools of all types for primary native education; enrolment in 1943, 8,830. Of these schools, 103 were mission, tribal and united schools, aided and maintained by the Government, 3 national schools and 120 private mission schools.

A High Court, having the full jurisdiction of a Superior Court, and District Commissioners' Courts have been established. A local Swaziland police force was created in 1907. Authorised strength (1942) 25 Europeans and 109 natives. During 1942, there were 3,906 summary convictions, and 9 convictions in the High Court. Native chiefs continue to exercise jurisdiction according to native law and customs in all civil matters between natives subject to a final appeal to the High Court of Swaziland.

|                       | 1938-39   | 1939-40   | 1940-41   | 1941-42   | 1942-43   |
|-----------------------|-----------|-----------|-----------|-----------|-----------|
| Revenue . . . . .     | £ 114,878 | £ 109,756 | £ 117,086 | £ 156,721 | £ 210,229 |
| Expenditure . . . . . | 160,786   | 159,812   | 161,651   | 162,492   | 179,898   |

Chief items of revenue, 1942-43: Native tax, 48,212*l.*; customs, 26,746*l.*; posts and telegraphs, 16,586*l.*; licences, 9,059*l.*; income tax, 66,554*l.*; base metal royalty, 12,583*l.* Chief items of expenditure, 1942-43:

Headquarters, 10,685*l.*; district administration, 9,066*l.*; police, 17,840*l.*; justice, 10,008*l.*; public works, 30,267*l.*; medical, 19,923*l.*; education, 17,225*l.*; veterinary, agriculture and forestry, 32,182*l.*; pensions and gratuities, 10,278*l.*

The public debt of Swaziland amounts (1943) to 91,198*l.*

Gold is subject to a tax of 10 per cent. on profits; base metals to a royalty of 2½ per cent. on output, in addition to any rentals now payable.

The agricultural and grazing rights of natives are safeguarded, and delimited. The agricultural products are cotton, tobacco, maize (the staple product), millet, pumpkins, ground-nuts, beans, and sweet potatoes. During normal years it is necessary for the territory to import from the Union of South Africa approximately 20,000 to 30,000 bags of maize annually. Stock numbers approximately (1943): cattle, 462,850, of which 79,605 were owned by Europeans; native sheep, 231,583; goats, 115,815, and pigs, 5,990. About 200,000 sheep are brought into Swaziland from the Transvaal each year for winter grazing. The territory is reported to be rich in minerals, but it has not yet been systematically prospected. Alluvial tin is being mined and shipped.

By agreement (dated June 29, 1910) with the Union of South Africa, Swaziland is treated for Customs purposes as part of the Union and receives a *pro rata* share of the Customs dues collected. The chief exports, 1943, were: live cattle, 13,291 head, valued at 199,363*l.*; hides and skins, 167,211 lb., valued at 4,876*l.*; butter, 431,000 lb., valued at 32,000*l.*; tobacco, 522,000 lb., valued at 27,640*l.*

There is daily (except Sundays) communication by railway motor buses between Bremersdorp, Mbabane and Breyten, 4 days per week between Piet Retief and Hlatikulu, and bi-weekly services between Goedgedun and Hluti; Bremersdorp and Stegi and Goba; Bremersdorp and Gollel. Post offices working in 1942, 26. There are telegraph and telephone offices at Mbabane, Pigg's Peak, Bremersdorp, Ezulwini, Hlatikulu, Dwaleni, Mahamba, Stegi, Nsoko, Emlembe, Goedgedun, Hluti and Gollel. Post Office Savings Banks deposits, 26,856*l.* during 1943 by 11,960 depositors.

The currency is British and Union of South Africa coin, also coins of the late South African Republic, which are of similar denomination to the British. The Barclays Bank (Dominion, Colonial and Overseas) has branches at Mbabane, Bremersdorp and Stegi, and the Standard Bank of South Africa Ltd., at Bremersdorp and Stegi.

*Resident Commissioner.*—E. K. Featherstone, C.M.G. (appointed September 30, 1942).

## SOUTHERN RHODESIA.

Rhodesia includes the whole of the region extending from the Transvaal Province northwards to the borders of the Belgian Congo and Tanganyika Territory, bounded on the east by Portuguese East Africa, Nyasaland, and the Tanganyika Territory, and on the west by the Belgian Congo, Portuguese West Africa, and Bechuanaland. The region south of the Zambezi (Matabeleland and Mashonaland) is called Southern Rhodesia; that north of the Zambezi is known as Northern Rhodesia.

Prior to October, 1923, Southern Rhodesia, like Northern Rhodesia, was under the administration of the British South Africa Company. In October, 1922, Southern Rhodesia voted in favour of responsible government.

| Year              | Europeans |         |        | Asiatic and Coloured Total | Native Total (estimated) | Total Population (estimated) |

| Total Expenditure  | 4,508,415 | 4,828,645 | 5,779,782 | 13,278,000 | 13,500,000 |

Unaudited receipts from customs and excise duties during the year ended March 31, 1948, were 8,345,000L; income tax, 4,577,000L; native tax, 449,500L; posts, telegraphs and telephones, 844,600L; mining revenue, 593,100L (from royalties, mining fees and gold premium tax); stamps and licences, 155,000L. Principal items of expenditure from revenue funds (unaudited) were as follows:—ordinary expenditure, 925 645L for debt services,

## 238 THE BRITISH COMMONWEALTH:—SOUTHERN RHODESIA

471,698*l.* for education, 452,354*l.* for police and defence, 349,779*l.* for public works and roads, and 255,915*l.* for agriculture and lands (including irrigation); war expenditure, 1,998,907*l.* for military forces, 1,428,240*l.* for air training, and 12,701*l.* for the internment camps.

The net amount of the Public Debt outstanding was, at March 31, 1944, 2,750,000*l.*

**Production and Industries.**—When responsible Government was granted to the Colony the British South Africa Company relinquished all rights and interests in the land in Southern Rhodesia, except in the estates which it was already developing and working on July 10, 1923, but was recognised by the Crown as the owner of the mineral rights throughout both Southern and Northern Rhodesia. In 1933 the mineral rights in Southern Rhodesia were purchased by the Government for the sum of 2,000,000*l.* Land amounting to 21,127,040 acres has been set apart for tribal settlements ('native reserves'). A further 7,359,942 acres has been set aside as native purchase areas, while the area of surveyed and unsurveyed Crown land remaining unalienated and unassigned and available for sale and settlement is 33,488,588 acres. The country is well adapted for agriculture and European settlers. Live stock (1942): cattle, 2,647,164; sheep, 285,773; and pigs, 150,411. Acreage under crops, Europeans only (season 1942-43), maize, 282,151; tobacco, 68,289; tea, 740. Tobacco crop, 1942-43, 34,188,743 lb.; 1943-44, 34,464,449 lb. Large fruit orchards have been planted, and nearly all fruit trees thrive, the cultivation of oranges and lemons constituting an expanding industry. The sale of citrus fruit amounted to 147,535 cases in 1942. The sale of dairy produce is a profitable industry. In 1943, 3,839,064 gallons of milk were sold, and 1,439,361 lb. of butter and 542,948 lb. of cheese were available for sale.

The 1942 census of industries (preliminary figures) showed the value of gross output of industries covered as 11,761,000*l.* The value of materials and fuel purchased was 5,707,000*l.*, and the net output was 6,055,000*l.* Numbers employed were 38,172, including 5,243 Europeans, and total salaries and wages paid amounted to 3,024,000*l.*

**Mining.**—The country contains gold and other minerals. The gold output in 1942 was 760,030 ozs., valued at 6,384,256*l.*; in 1943, gold output was 656,684 ozs., valued at 5,516,146*l.* The total mineral output for 1943 was valued at 8,864,041*l.*; for 1942 at 9,377,166*l.* The value of the base minerals produced in 1943 was 3,336,211*l.*

**Commerce.**—The value of principal imports and exports for 5 years are shown as follows:—

|          | 1936      | 1937       | 1938      | 1939       | 1940       |
|----------|-----------|------------|-----------|------------|------------|
|          | £         | £          | £         | £          | £          |
| Imports. | 7,026,688 | 8,568,685  | 9,758,809 | 9,054,359  | 9,550,791  |
| Exports. | 7,081,528 | 10,704,679 | 9,368,476 | 10,168,132 | 13,399,357 |

Total imports of merchandise from the United Kingdom in 1940 amounted to 3,685,594*l.*; from the Union of South Africa, 2,156,295*l.*; from the United States, 1,028,439*l.* Domestic exports to the United Kingdom were 10,288,832*l.*; to the United States, 953,800*l.*; to Northern Rhodesia, 2,086,246*l.*, and to the Union of South Africa, 462,856*l.*

**Communications.**—Before the outbreak of war all first-class mail to and from the United Kingdom and Southern Rhodesia was carried by the Empire flying boats of Imperial Airways between Southampton and Beira. From Beira the mail was conveyed to Northern and Southern Rhodesia by the

Rhodesian and Nyasaland Airways. During the war, however, all mails to and from the United Kingdom and Southern Rhodesia are conveyed by the mail steamers of the Union Castle Company between Southampton and Cape Town, and conveyed thence by rail to Bulawayo and Salisbury.

The British South Africa Company has a controlling interest in the Rhodesian railway system, the total mileage of which (including the Beira Railway) at September 30, 1943, was 2,710. The system begins at Vryburg in the Cape Colony, and extends through the Bechuanaland Protectorate and Southern and Northern Rhodesia to the Belgian Congo and Portuguese East Africa. In conjunction with the railways of the Union of South Africa it provides through communication from Cape Town to the Congo border (2,154 miles), and (by a line from Bulawayo via Salisbury) to the port of Beira on the Indian Ocean (2,020 miles). There are also several branch lines in Southern Rhodesia. The total length of line operated in Southern Rhodesia is 1,360 miles. A system of road motor services has been organised, having in September, 1943, a total route mileage of 1,658 miles.

On December 31, 1942, there were in Southern Rhodesia 267 post offices, 53 of which are savings bank offices. During the year 1942, 24,719,318 letters and post-cards were received and despatched; 17,245,488 newspapers, books and parcels, and 619,762 registered articles. The postal revenue for the year 1942 was 418,274*l.* and the expenditure 299,677*l.* There is an extensive telephone system in operation with automatic telephone exchanges at Salisbury, Umtali, Bulawayo and Gwelo.

On January 1, 1906, a Post Office Savings Bank was established, and on December 31, 1942, the deposits amounted to 2,455,153*l.*

Currency circulation on March 31, 1943, amounted to 4,629,600*l.*; the reserve of the Currency Board was valued at 467,200*l.*

*Secretary at the Southern Rhodesian Office in London.*—W. C. Robertson (appointed July 8, 1941).

## NORTHERN RHODESIA.

By an Order in Council, dated May 4, 1911, the two provinces of North-eastern and North-western Rhodesia were amalgamated under the title of Northern Rhodesia, the amalgamation taking effect as from August 17, 1911. The limits of the territory, as defined by the Order in Council, are 'the parts of Africa bounded by Southern Rhodesia, German South-west Africa (now South-west Africa), Portuguese West Africa, the Congo Free State (now the Belgian Congo), German East Africa (now Tanganyika Territory), Nyasaland, and Portuguese East Africa.'

An Administrator was appointed by the British South Africa Company with the approval of the Secretary of State, and had, for consultative purposes, an Advisory Council of five members, chosen by the white settlers.

By an Order in Council dated February 20, 1924, the office of Governor was created, an Executive Council constituted and provision made for the institution of a Legislative Council. This latter Council has, since 1945, an unofficial majority. On April 1, 1924, the British South Africa Company was relieved of the administration of the Territory by the Crown, from which date the Order in Council of February 20, 1924, took effect.

Northern Rhodesia has an area of 290,320 square miles, and consists for the most part of high plateau country, covered with thin forest. Some of the country is suitable for farming and contains areas carrying good arable and grazing land. The European population at December 31, 1943, was estimated at 18,745; the native population was 1,366,641. The territory is divided into seven provinces. The seat of Government is now

## WEST AFRICA.

These Possessions are the Colony and Protectorate of Nigeria; the Gambia Colony and Protectorate; the Gold Coast Colony with Ashanti and Northern Territories; and the Sierra Leone Colony and Protectorate. Parts of Togoland and the Cameroons are also included as mandated territories.

**NIGERIA.**

**NIGERIA.**

[illegible]

## THE BRITISH COMMONWEALTH:—NIGERIA

Number of children in Nigeria of 'school age,' i.e. between 7 and 14 years, 3,000,000; number of children attending primary schools, 415,000. Some 6,000 children attend secondary schools and there is one post-secondary institution, Yabę Higher College, with 65 students.

The number of institutions directly maintained by Government comprises 1 post-secondary college, 5 secondary schools, 31 primary schools and 9 teachers' training colleges.

The estimated expenditure on education by Government for the current financial year is roughly 500,000.

**Finance.**—Revenue, expenditure, and public debt (including the Cameroons territory under British Mandate):—

| Year (ending March 31) | Revenue     | Expenditure | Public Debt |
|------------------------|-------------|-------------|-------------|
| 1939-40 <sup>1</sup>   | £ 6,113,126 | £ 6,498,566 | 24,986,599  |
| 1941-42 <sup>1</sup>   | 7,934,154   | 6,998,795   | 1,888,289   |

<sup>1</sup> Not including figures for Nigerian Railway.

<sup>2</sup> Budget.

**Production and Industry.**—The principal products (1940) are palm-oil (exports, 132,723 tons); palm kernels (exports, 235,521 tons); cotton lint (exports, 209,023 cwt. of 100 lb.); cocoa (exports, 89,737 tons); mahogany (exports, 371,809 cub. ft.); tin ore (exports, 14,843 tons); gold (raw ore) (exports, 25,400 oz.); ground nuts (exports, 169,486 tons); hides and skins tanned (exports, 473 cwt.); hides and skins untanned (exports, 148,037 cwt.); bananas (exports, 1,172,503 cwt.); rubber (exports, 6,501,886 lb.); benniseed (exports, 8,070 tons); coal (exports, 54,995 tons); gum arabic (exports, 1,366,782 lb.). The natives have worked iron, lead and tin for centuries. There are also deposits of silver, galena, manganese ore, lignite and monazite (which contains thorium).

Mining rights are vested in the Government, but under an agreement made with the Royal Niger Company at the date of the revocation of the charter, that Company receives half the gross profits derived from royalties on minerals won between the main stream of the Niger on the west and a line running direct from Yola to Zinder on the east, for a period of 99 years with effect from January 1, 1900.

**Commerce.**—The principal ports are Lagos, Warri, Burutu, Sapele, Koko, Degema, Port Harcourt, Opobo, Calabar, Tiko, and Victoria. Numerous rivers and creeks form the chief routes for transport, and there are many well-made roads.

Considerable trade is carried on in the Northern Provinces. There is also a large trade by caravans which, coming from Salaga in the west, the Sahara in the north, and Lake Chad and Wadai in the east, make use of Kano as an emporium.

The trade and shipping of Nigeria are shown as follows (bullion and specie are included):—

| Year | Trade      |            | Shipping, net-tonnage and cleared |              |
|------|------------|------------|-----------------------------------|--------------|
|      | Imports    | Exports    | Total                             | British only |
|      | £          | £          | Tons                              | Tons         |
| 1936 | 12,665,772 | 15,557,256 | 4,139,696                         | 2,608,536    |
| 1937 | 18,567,673 | 19,575,665 | 4,508,953                         | 2,187,301    |
| 1938 | 11,567,104 | 14,390,700 | 4,013,149                         | 1,999,397    |
| 1939 | 8,626,112  | 14,150,510 | 3,584,557                         | 1,941,680    |
| 1940 | 10,822,241 | 18,052,916 | 2,862,731                         | 2,061,311    |

The chief imports (1940) were: cotton piece goods, 2,234,292½; iron and steel manufactures, 472,509½; fish, 257,127½; salt, 327,117½. The chief exports (1940) were: palm oil, 1,099,038½; palm kernels, 1,499,738½; cocoa, 1,583,128½; ground-nuts, 1,476,310½; hides and skins, 640,972½. Imports from the British Empire, 1940, 9,199,134½, and from U.S.A., 596,024½.

**Communications.**—The railway system comprises (1) a Western line from Lagos to Kano (700 miles), crossing the Niger by bridge at Jebba, with an extension from Kano to N'Guru (143 miles), and branches from Minna to Baro (111 miles), from Zaria to Jos (133 miles, light railway); from Zaria to Kaura Namoda (137 miles); and from Ifo Junction to Idogo (27 miles). (2) An Eastern line (569 miles) from Port Harcourt, crossing the Benue River at Makurdi, and joining the Western Railway at Kaduna junction with a branch line connecting Kafanchan (458 miles) with Jos (62½ miles). The total capital expenditure on the Nigerian railway, up to March 31, 1944, amounted to 21,632,599½; figures for 1943-44 were as follows:—Interest charges to 21,632,599½; gross receipts, 4,476,057½; working expenditure (payable, 949,521½; gross receipts, 1,954,836½; net operating surplus including interest and depreciation), 2,521,221½; depreciation or (applied to interest charges and depreciation), 5,242,355, and goods and minerals renewals, 430,000½; passengers carried, 5,242,355, and goods and minerals transported, 1,238,965 tons.

48,275 miles of road are to be built to link Nigeria with the All-Africa Highway system from the Cape to Algiers.

The Post Office maintains wireless stations at Lagos, Badagry, Okitipupa, Buea, Mamfe and Bamenda for internal communications, and at the aerodromes at Apapa, Oshogbo, Kaduna, Kano and Maiduguri for communication with aircraft and for exchange of meteorological information. Direction finders are being installed at Kano and Lagos.

On March 31, 1944, there were 378 post offices in Nigeria and the Cameroons under British Mandate. The Savings Bank on December 31, 1943, had 71,397 depositors, with 895,890½ to their credit.

**Currency.**—Currency is controlled by the West African Currency Board, and is of a special pattern which is common to the four British West African Colonies. The denominations are:—notes, 1½ and 10s.; alloy coins, 2s., 1s., 6d., and 3d.; nickel coins, penny, half-penny, and tenth of a penny. On June 30, 1944, the circulation amounted to 28,378,126½ and consisted of 918,028 in silver coin, 17,446,262½ in alloy coin, 2,116,468½ in nickel-bronze coin, and 5,897,367 in notes.

The Bank of British West Africa, Ltd., and Barclays (Dominion, Colonial and Overseas) Bank, Ltd., have branches in the larger towns.

was amalgamated with the Protectorate of Northern Nigeria to form the 'Colony and Protectorate of Nigeria,' under a Governor.

Lagos is the seat of the Central Government, and the Protectorate is for administrative purposes divided into three groups of Provinces, each under a Chief Commissioner subject to the final control and authority of the Governor: the Northern Provinces (headquarters Kaduna), the Western Provinces (headquarters Ibadan), and the Eastern Provinces (headquarters Enugu). The Colony area is administered by the Governor, with the Commissioner of the Colony as chief executive officer.

The British mandated territory of the Cameroons is attached to Nigeria for administrative purposes.

The Executive Council of the Colony was made, from January 1, 1914, the Executive Council of the Protectorate also. It consists of a few of the senior officials, and since October 1, 1942, of three unofficial members serving in their personal capacity. There is a Legislative Council, created by Order in Council in November, 1922, consisting of the Governor, the members of the Executive Council, and other official members (total official membership not exceeding 30); three members elected by the ratepayers of Lagos; one member elected by the ratepayers of Calabar; five members selected respectively by the Chambers of Commerce of Lagos, Port Harcourt, Calabar and Kano, and the local Chamber of Mines; two members to represent respectively banking and shipping interests; and ten members to represent African interests in those parts of the Colony and Eastern and Western Provinces which do not return elected representatives. This Council legislates for the Colony and the Eastern and Western Provinces of the Protectorate, laws affecting the Northern Provinces being enacted by the Governor as heretofore.

*Governor of Nigeria.*—Sir Arthur Frederick Richards, G.C.M.G. (sworn in December 18, 1943).

*Chief Secretary to the Government.*—G. Beresford Stooke, C.M.G. (appointed December 30, 1944).

There are altogether 28 provinces, including the Cameroons under British Mandate, each under the immediate control of a Resident. Much local administration is carried out by native chiefs and councils who have statutory powers.

Most of the rain falls between April and September in the north, and March and November in the south. During the dry season the Harmattan blows from the north-east bringing with it a haze of dust. The rainfall is highest on the south-east coast, with an average of 150.99 ins. at Bonny and 145 ins. at Forcados. At Lagos there were 81.82 ins. in 1937. In the middle of the country Kaduna has an average of 43.55 ins., and in the north Katsina has 28 ins. and Sokoto 25.45 ins. In the British Mandated Cameroons the rainfall varies from 355 ins. on Cameroons Mountain on the coast to 25 ins. at Dikwa, near Lake Chad.

**Area and Population.**—Area approximately 372,674 square miles including the Cameroons under British Mandate; population 1943, 21,329,328. Northern Provinces: 281,703 square miles, 12,368,538 population. Eastern Provinces: 45,443 square miles, 4,790,645 population. Western Provinces: 44,147 square miles, 3,831,801 population. Colony: 1,381 square miles, 338,344 population.

The populations of eleven large towns in 1939 were: Ibadan, 318,320 (including farming suburbs); Lagos, 167,000; Kano, 80,634; Abokuta, 69,500; Oyo, 63,170; Iwo, 44,176; Ogbomoso, 64,680; Ilorin, 44,882; Iseyin, 40,488; Ede, 36,836; Oshogbo, 30,680.

**Justice.**—The Chief Justice is the president of the Supreme Court of Nigeria. There are four Puisne Judges, two of whom are stationed in Lagos and two in the Protectorate. The High Court of the Protectorate consists of the Chief Justice of the Supreme Court as its Chief Judge with the Puisne Judges of the Supreme Court as Judges, four Judges of the High Court and four Assistant Judges. These are stationed at Calabar, Kaduna, Ibadan, Warri, Onitsha, Enugu and Aba. Summary jurisdiction is exercised in the Colony area by Commissioners of the Supreme Court (known in Lagos as Police Magistrates), and in the Protectorate by Magistrates. Legislation has been enacted and will shortly be brought into force to provide for a single Supreme Court and a unified system of Magistrates' Courts for the whole of Nigeria. Administrative officers exercise magisterial powers in places where there is not sufficient work for a whole-time magistrate. Native Courts exist throughout the Protectorate and in some parts of the Colony. The number of persons brought before the Supreme Court, the Courts of the Police Magistrates and Commissioners of the Supreme Court in the Colony, and before the High Court and Magistrates Courts of the Protectorate (January to December, 1943) was 56,622, of whom 32,840 were convicted.

**Religion and Education.**—No reliable statistics are available. Speaking generally the more primitive peoples retain their ancestral animistic religions but, in so far as they become progressive, they tend to embrace either Christianity or Islam. The Christian and Moslem religions show a strongly proselytizing character and, although the missionary endeavours of the Moslems are less organised, they are not the less powerful. In the most Moslem areas of Nigeria, Islam is the dominant religion. In the Western northerly regions of Nigeria, there are very many Moslems. There is, on the other hand, an interesting difference between the Northern and the Southern Moslems. Islam in the North still has a mediaeval character and a conservative attitude, while in the South its adherents show a much greater readiness to adopt European customs and ideas. In the Eastern Provinces, Islam has made remarkably little headway. Generally speaking the people are either animists or Christians.

The main Christian missionary societies represent the Roman Catholic, Anglican, Scottish, Methodist and Baptist Churches. In addition there are several inter-denominational Protestant societies such as the Sudan Interior Mission, the Sudan United Mission and the Qua Iboe Mission. Africans play a large and increasing part in Church affairs, both as clerics and laymen. There is a considerable number of independent African Christian communities which, for the most part, have split off from one or other of the parent Churches. On the whole these have a nebulous character and a 'Protestant' nomenclature, which make it very difficult to assess their work and influence. In the past there has been a broad difference in the attitude of Christians and Moslems with regard to secular education. The Christian missions, with their Western provenance, have generally regarded the provision of secular schooling as a normal part of their work. The Moslems' view of education, on the other hand, has been restricted to studies in the religion and law of Islam. Thus, although Moslem local authorities in Northern Nigeria have provided schools offering secular subjects, they have mostly done this at the instigation of Government. There are recent signs, nevertheless, that the Northern Moslem is beginning to feel the need of a general education. In the Western Provinces the position is somewhat difficult. Here, although the Moslems have lagged behind the Christians, there is now an unmistakable keenness to open schools and a good deal of voluntary effort has been aroused.

**Education.**—In the Colony, Ashanti, the Northern Territories and Togoland under British Mandate there were, in 1943–44, 20 Government schools and 505 assisted schools (including 4 secondary schools and 9 training colleges). Of these, 15 are Native Administration schools, and 5 are managed by undenominational bodies; the remainder are under the control of the various Missions and the Prince of Wales College at Achimota. There are also 1 Government technical school and 3 middle boarding schools which are at present under the control of the military authorities. The total number of pupils on the roll of Government and assisted schools and colleges was 70,243, of whom 17,808 were girls and 588 were teachers in training. The average daily attendance of these schools was 66,999. There are in addition (according to the latest records) 736 non-assisted schools, most of which are supported by the various religious bodies. The total enrolment of these schools was 44,452, of whom 7,764 were girls: figures for average attendance are not available. (Government expenditure on education in 1943–44 (excluding Achimota) was 286,226*l*.)

*Revenue and Expenditure:—*

<sup>a</sup> Year ending March 31.

<sup>b</sup> Estimates.

Chief items of revenue, 1943–44: customs and excise, 2,652,951*l*.; licences, 291,224*l*.; fees of court, etc., 817,371*l*.; railway, 1,652,827*l*.; Takoradi Harbour, 337,412*l*.; railway electricity supply, 71,877*l*.; posts and telegraphs, 212,449*l*.; special receipts, 104,945*l*.

Chief items of expenditure, 1943–44: extraordinary and special, 761,827*l*.; public debt charges, 616,451*l*. (includes 381,896*l*. borne by railway, 154,348*l*. by Takoradi Harbour and 7,161*l*. by railway electricity supply); Public Works Department, 374,613*l*.; public works annually recurrent, 401,873*l*.; medical and health, 444,358*l*.; education, 336,750*l*. (includes 54,000*l*. endowment and 2,539*l*. special grant for agricultural education at Achimota college); agriculture and forestry, 198,178*l*.; animal health, 33,676*l*.; railway, 1,648,753*l*. (includes 3,676*l*. capital work); Takoradi Harbour, 352,972*l*. (includes 15,246*l*. capital works) and railway electricity supply, 72,083*l*. (includes 200*l*. capital works).

Public Debt, March 31, 1944, 10,400,000*l*.; Colony's General Revenue Balance Account and Reserve Fund, 2,210,514*l*. and 1,500,000*l*. respectively; Railway Renewals Fund, 1,470,332*l*.; Railway Electricity Supply Renewals Fund, 117,854*l*.; Takoradi Harbour Renewals Fund, 416,827*l*.; Sinking Fund (Supplementary) Reserve, 1,036,507*l*., and Sinking Fund for the Amortization of the Funded Debt of the Colony, 2,124,916*l*.

Staple products and exports, cocoa, gold, manganese, diamonds, kola nuts, mahogany, palm kernels, rubber, copra, and palm oil.

**Trade.**—In 1941 the imports amounted to 8,600,000*l*., and the exports to 12,200,000*l*. The principal imports were: cotton goods, 997,678*l*.; oils, 506,590*l*.; machinery, 489,403*l*.; tobacco, 346,910*l*. The principal exports were: gold, 6,850,942*l*.; cocoa, 4,006,839*l*.; manganese ore, 1,014,797*l*.

Imports (1941) valued at 3,739,084*l*. came from the United Kingdom, from Dutch West Indies, 659,777*l*., and 698,826*l*. from the U.S.A. Exports

to the value of 4,297,377*l*. were sent to the United Kingdom, 1,893,878*l*. the U.S.A., and 6,680,941*l*. to South Africa (including S.W. Africa).

The shipping entered and cleared in the foreign trade in 1941 was 3,145,018 tons, of which 2,086,426 tons were British. The harbour of Takoradi, opened in March, 1928, and appointed as a port on December 8, 1928, is the only complete shelter for ships of over 30 ft. draught between Sierra Leone and Nigeria.

**Communications.**—Railway communication consists of a main line running from Takoradi to Kumasi thence to Accra, a distance of 365 miles, with branches, Takoradi Junction to Sekondi (8 miles), Tarkwa to Prestea (19 miles), Aboso to Cinnamon Bippo (4 miles), and Huni Valley to Kade (99 miles). The main line and branches are 3 ft. 6 in. gauge. The railway gross earnings for the year 1943–44 were 1,643,509*l*., and the working expenditure, including provision for renewals (148,941*l*.) and pensions, was 940,134*l*. The total number of miles open for traffic on March 31, 1944, was 490, and the capital cost, 8,581,102*l*.

There are 6,610 miles of motorable roads in the Gold Coast, Ashanti, and the Northern Territories, 2,394 maintained by Public Works Department. There were in the Colony, March 31, 1944, 5,160 miles of telegraph trunks and 10,949 telephone trunks and 307 offices, and there are 154 telephone exchanges with 3,659 telephones in use, and over 6,122 miles of wire in the exchange areas. The telephone trunk system connects up all the main towns in the Colony. Telegrams in 1943–44: 976,799. There are internal wireless telegraph stations at Takoradi, Accra, Kumasi, Hohoe, Bibiani, Wiawso, Bawku, Lawra, Kpandu and Yendi. The number of letters, packets, etc., handled in the postal service in 1943–44 was estimated to be 12,850,000. In 1942–44 the savings bank had 124,878 depositors with 1,112,681*l*. to their credit.

The Bank of British West Africa, Ltd. and Barclays Bank (Dominion, Colonial and Overseas) operate in the Colony and Ashanti. For currency, see under NIGERIA, p. 245.

Ashanti was placed under British protection on August 27, 1896, and an Order of the King in Council, dated September 26, 1901, defined the boundaries of Ashanti and annexed it to His Majesty's Dominions, and provided for its administration under the Governor of the Gold Coast Colony. By a subsequent Order in Council, dated October 22, 1906, the boundaries between the Gold Coast Colony and Ashanti, and between Ashanti and the Protectorate of the Northern Territories, were readjusted and defined, with due regard to tribal land and natural features. By a further Order in Council (November 9) of 1934, the limits of Ashanti were further defined, and the Governor vested with full power for its administration, the making of laws and the appointment of a Chief Commissioner, Judges, Commissioners, Justices of the Peace and other necessary officers therefor. By the same Order Ashanti was brought under the constitution, and by Additional Instructions, dated November 23, 1934, the Chief Commissioner was made a member of the Executive Council of the Gold Coast.

Ashanti is administered by a Chief Commissioner, acting on behalf of the Governor, with an Assistant Chief Commissioner as relieving officer, and a staff of eighteen District and Assistant District Commissioners. In January, 1935, the Confederation of Ashanti, which was broken up and had remained inoperative for 35 years, was re-established with Otunfuo Sir Osei Agyemem Prempeh II, K. B. E., a nephew of the late Nana Prempeh, at its head.

The area is 24,379 square miles, with a population (census of 1931) of 578,702 (including non-Africans, 624). Kumasi, the chief town, has about

The revenue in 1943 from Customs was 904,089l.; railway, 311,517l.; licences, 38,329l.; court fees, 177,027l.; post office, 41,086l.; light dues, 52,023l.; taxes, 421,812l.

Net public debt, December 31, 1943, 1,369,684l.

Principal imports, 1941: beer and ale, stout and porter, 482,321 gallons, 130,683l.; rice, 49,781 cwt., 33,287l.; flour (wheaten), 43,148 cwt., 39,213l.; meats (all kinds), 5,726 cwt., 33,672l.; sugar, 30,413 cwt., 36,723l.; tobacco (unmanufactured), 956,980 lbs., 55,241l.; tobacco (manufactured), 216,934 lbs., 73,687l.; wine, 161,899 gallons, 68,678l.; coal, 322,185 tons, 1,101,644l.; apparel (all kinds), 184,239l.; cotton manufactures, 468,865l.; artificial silk manufactures, 158,281 lbs., 40,536l.; metals, iron and steel manufactures, other kinds, not elsewhere specified, 33,919l.; medicines and drugs, 37,057l.; petroleum, 1,694,710 gallons, 107,349l. Principal exports, 1941: kola nuts, 865 tons, 29,191l.; ginger, 1,753 tons, 48,459l.; piassava, 1,653 tons, 35,868l.; iron ore, 762,506l.; other ores (chrome ore), 53,498l.; palm kernels, 37,154 tons, 236,783l.; gold, 169,728l.

Imports (Board of Trade returns) from United Kingdom in 1938, 1,076,559l.; 1937, 1,034,096l. Exports thereto, 1938, 565,753l.; 1937, 555,812l.

A Government railway, a single line of 2ft. 6in. gauge, is open from Freetown to Pendembu, near the Liberian frontier, a length of 227½ miles. From Bauya Junction, 64½ miles from Freetown, a branch line runs to Makeni, a distance of 83 miles. Total line open, 1943, was 337 miles, including sidings. Total receipts, 1943, 311,517l.; gross expenditure, 365,885l. There are over 2,769 miles of telegraph and telephone, including electric-train-staff lines. In 1943, 2,764,100 postal packets were dealt with in the Colony; money order transactions amounted to 162,016l. There were (1943) 2,769 miles of combined telegraph and telephone wires in operation. There are 70 post offices and postal agencies. At the end of 1943 there were 30,961 depositors in the savings bank with 669,196l. (inclusive of interest) to their credit. The West African Silver Currency was introduced in 1913 (see under NIGERIA, p. 245), and in 1920 West African Alloy Coinage was put into circulation; but British coins are still used. Currency notes of the West African Currency Board are in circulation (1,019,596l. at the end of 1943). The Bank of British West Africa and Barclays Bank (D.C. and O.) have their headquarters at Freetown.

**The Protectorate.**—The Protectorate was proclaimed August 21, 1896. On March 7, 1913, an Order in Council was issued providing for its administration; this was revoked and replaced by an Order in Council of January 16, 1924. The Order applies to the territories, not being portions of the Colony of Sierra Leone, lying between the sixth and tenth degrees of north latitude and the tenth and fourteenth degrees of west longitude, references to the actual common boundaries between the Protectorate and Liberia and between the Protectorate and French Guinea being made in the order. The Protectorate extends inland about 180 miles.

The Governor and Commander-in-Chief for the time being of the Colony of Sierra Leone is also the Governor of the Protectorate.

The Protectorate, including those portions of Colony administered as Protectorate, has an area of 27,669 square miles, and a population, according to the census of 1931, of 1,672,000. The whole territory has been divided into four divisions, each of which is placed under a European commissioner and under whom are varying numbers of British commissioners. Circuit courts are held at the chief centres

of population. There are also district commissioners' courts, chiefs' courts for purely native cases (not serious crime), and combined courts (a chief and a non-native) for small debts and trivial misdemeanours (assaults, abusive language) arising between native and non-native. The chief articles of imports are cotton goods, spirits, hardware and tobacco; the chief exports are palm kernels, kola nuts, palm oil, and ginger. Diamonds and gold are now being mined in considerable quantities. Two large hematite deposits have been discovered and exploitation of one deposit is being proceeded with. Deposits of chromite of commercial value have been found at a short distance from the Government Railway. In the Protectorate in 1943 Government maintained 1 secondary school with an average attendance of 41 and 3 primary schools with average attendance of 381. There were also 5 Native Administration and 162 other non-Government schools, conducted by various missionary societies. Of these 89 received grant amounting to 6,070l. Average attendance was 6,078. There were 3 teacher training institutions, one conducted by Government, one by the Roman Catholic Mission and one by the Protestant Missions, with an aggregate roll of 48.

**Governor.**—Sir Hubert Craddock Stevenson, K.C.M.G., O.B.E., M.C. appointed July 5, 1941).

**Colonial Secretary.**—R. O. Ramage, C.M.G.

## CONDOMINIUM. ANGLO-EGYPTIAN SUDAN.

### Government.

The rule of Egypt in the Sudan, after having gradually extended during the course of 60 years, was interrupted in 1882 by the revolt of the Mahdi, who, with his successor, the Khalifa, held the country from 1885 for about 18 years under a desolating tyranny. In 1896 an Anglo-Egyptian army commenced operations for the recovery of the lost provinces, and on September 2, 1898, the overthrow of the Khalifa was completed. In November, 1899, he was finally defeated and killed by General Wingate's forces near Gedid.

A convention between the British and Egyptian Governments, signed at Cairo, January 19, 1899, provides for the administration of the territory south of the 22nd parallel of latitude by a Governor-General, appointed by Egypt with the assent of Great Britain, and declares the general principles in accordance with which the administration shall be carried on. This Status of the Sudan as a Condominium on the above lines was re-affirmed in the Anglo-Egyptian Treaty of 1936. The British and Egyptian flags shall be used together; no duties shall be levied on imports from Egypt, and duties on imports from other countries, via the Red Sea, shall not exceed those levied in Egypt; the import and export of slaves is prohibited, and special attention shall be paid to the Brussels Act of 1890 respecting the import and export of arms, ammunition and spirits.

The Sudan is divided into eight Provinces under Governors who may be advised on matters concerning the internal administration of their province by statutory Councils consisting chiefly of Sudanese. Administration is carried out through District Commissioners, one or more of whom are appointed to each of the districts into which the provinces are subdivided. Sudanese administrative officers are employed under the District Commissioners. Local administration is now largely in the hands of statutory Local Government authorities, which in tribal areas are the Sheikhs and Chiefs, and in urban or advanced rural district are councils. Courts of Sheikhs and Chiefs have varying powers of limited jurisdiction over their territories in accordance with native custom throughout the country.

In 1910 a Governor-General's Council was created to assist the Governor-General in the discharge of his executive and legislative powers. All ordinances, laws and regulations are now made by the Governor-General in Council.

In 1943 an Advisory Council for the Northern Sudan was constituted, which enable the Governor-General to consult representative persons and to explain Government policy.

### Area and Population.

Extending southwards from the frontier of Egypt to Uganda and the Belgian Congo (approximately N. lat. 5°), a distance of about 1,650 miles, and stretching from the Red Sea to the confines of Wadai in Central Africa, the subject territory has an area of 967,500 square miles. The population of the Sudan, according to the most recent estimates, is 6,590,996, including natives of the Sudan, 1,611,526 men, 1,944,363 women, 2,990,611 children, total 6,546,500; non-natives, 44,496. (As so great a proportion of the people are nomads, the numbers are difficult to assess with any degree of accuracy, and the figures of the native population

must be taken as approximations only.) The Eritrea-Sudan frontier and the frontier with French Equatorial Africa have been delimited and demarcated, as also has the greater part of the frontier with Abyssinia. The chief towns are: Khartoum, population 44,950, the capital; Omdurman (the old Dervish capital), population 116,196; Khartoum North and Rural District, population 91,580; Wadi Halfa, Merowé, El Damer, Atbara, Port Sudan, Suakin, Kassala, Ed Dueim, Kosti, El Obeid, En Nahud, Wad Medani, Singa and El Fasher.

### Education.

The education system of the country falls into two spheres, the Northern and the Southern. The Northern comprises the provinces of Blue Nile, Darfur, Kassala, Khartoum, Kordofan and Northern. The Southern sphere consists of the Equatoria and Upper Nile Provinces. Higher education is represented by the Kitchener School of Medicine and by the Gordon Memorial College, comprising the School of Science and Arts (including law, engineering, agriculture and administration) with a total of some 200 students in all. The Government secondary school in Omdurman, attended by 514 boys, is designed to supply a sound general secondary education for natives of the Sudan. Two junior secondary schools were established in 1942. They are designed to give a vocational training in commerce and agriculture; 85 pupils are attending them. Government intermediate schools prepare boys for entry into the secondary schools or for direct appointment to minor Government posts; they also provide post-elementary education for a portion of the general public. Pupils attending these schools number 1,800. Nearly 19,000 boys attend the 115 elementary schools, from which a few boys pass to the intermediate schools; their main object is to provide suitable education for the people. There are 60 girls' elementary schools attended by over 6,000 girls, and a training college for elementary schools with 92 students. The one intermediate school for girls is attended by 118 pupils. At Bakhter Ruda, in the Blue Nile Province, is the Elementary Teachers' Training College (boys) with 122 students in attendance. There is a technical school in Omdurman and another in Atbara. The output of the Atbara technical school goes to the Sudan railways. In 1944 250 boys were under instruction in these two schools. Certain non-Government schools, managed by Europeans and other communities, are concerned with the education of the children of Europeans, Sudanese-Egyptian population and other nationalities. Eight of mixed Sudanese-Egyptian population and a few elementary schools are managed independent intermediate schools and a few elementary schools are managed by and for natives of the Sudan. In 1944 the number of non-Government schools of all grades in the Northern sphere was 45 with an attendance of 6,453 boys and 8,072 girls. There is also a large number of sub-grade schools and 'Khalwas,' or indigenous K-ranic schools, subsidised by the Government, providing a varying standard of sub-grade elementary education to some 22,000 boys. In the Southern sphere, apart from 2 newly started Government schools, education is given in mission schools, subsidised and inspected by the Government. Attendance at the mission schools in 1944 was as follows:—256 at intermediate schools, 225 boys at 3 trades schools, 3,000 boys at 37 elementary 7 central schools, 88 boys at 270 village schools. Eighty girls attended 7 schools, and 6,000 boys attended 13 elementary schools. There is as yet no higher or secondary education, but certain outstanding pupils go to Uganda for further education after leaving the intermediate schools.

### Justice.

The High Court of Justice comprises the Court of Appeal and courts of original jurisdiction under the general supervision of the Chief Justice. In addition to the Chief Justice there are 5 Judges of the High Court.

The Court of Appeal which exercises jurisdiction only on the civil side is constituted by 8 or more judges of the High Court sitting together and is usually presided over by the Chief Justice. An appeal lies of right from a decree of a Judge of the High Court or a Province Judge if the relief claimed is more than £E50. When there is no appeal as of right the Court of Appeal exercises wide power of revision.

On the Civil side the High Court Judge sitting singly exercises general original jurisdiction. One High Court Judge is stationed in each of the five central provinces, namely Khartoum, Northern, Kassala, Blue Nile and Kordofan Province. In provinces in which no Judge of the High Court is stationed general civil jurisdiction is exercised by a Province Judge.

Subordinate to the Judge of the High Court or Province Judge are the District Judges of the 1st, 2nd or 3rd Grade within the Province in which he is stationed. There are 8 specially appointed District Judges of the 1st grade all natives and 8 specially appointed District Judges of the 2nd grade likewise all natives stationed in the 5 central provinces. The Judge of the High Court or Province Judge exercises power of revision from decrees of District Judges.

Criminal justice is administered in accordance with the Sudan Penal Code (which is an adaptation of the Indian Penal Code) either by courts of 3 magistrates (Major or Minor Courts) by single magistrate or by benches of magistrates. Decisions of certain non-summary cases require confirmation, by the Governor-General in the case of Major Courts and by the Judge of the High Court or the Governor in other cases. Rights of Appeal to the confirming authority also exist.

On the criminal side the Judges of the High Court have each been appointed Circuit Judge over the whole or part of the Province in which they are stationed. As Circuit Judges they constitute and preside over the Major Courts held within the circuit for the trial of serious crimes. They also confirm judgments of Minor Courts and hear appeals from magistrates courts held within the circuit.

Outside Circuit areas the constitution of Major Courts is in the hands of the Governor of the Province who also confirms and hears appeals from judgments of lesser criminal courts.

The Mohammedan Law Courts administer the Moslem religious law in cases between Mohammedans relating to succession on death, marriage, divorce, and family relations generally, and also Mohammedan charitable endowments.

Apart from the Civil, Criminal and Sharia Courts above-mentioned there is throughout the country a large number of Native Courts with various degrees of powers who try civil, criminal and Sharia cases in accordance with native law and custom. The powers of the larger courts may amount to £E100 fine and 3 years imprisonment. These courts are under the administrative authorities and appeal lies to the Governor or District Commissioners.

### Defence.

Egyptian troops were evacuated in 1924, and a new Sudan Defence Force, owing allegiance to the Governor-General, has been created.

### Finance.

The revenue and expenditure of the Sudan are as follows (£E1 = £1 0s. 6d.):—

| Year     | Revenue<br>£E | Expenditure<br>£E | Year     | Revenue<br>£E | Expenditure<br>£E |
|----------|---------------|-------------------|----------|---------------|-------------------|
| 1938 . . | 5,131,635     | 4,857,784         | 1941 . . | 5,379,377     | 5,047,160         |
| 1939 . . | 5,053,765     | 4,890,871         | 1942 . . | 5,614,165     | 5,337,991         |
| 1940 . . | 4,632,351     | 4,543,790         | 1943 . . | 5,861,944     | 5,601,790         |

The main sources of revenue in 1943 were: Direct Taxation (£E422,347); Royalties (£E177,348); Customs (£E1,129,441); Railways net profit (£E495,000); Posts and Telegraphs (£E258,347).

These figures do not include the revenue and expenditure of local authorities.

### Production and Commerce.

The Sudan is the chief source of the world's supply of gum arabic, exports of which in 1938 amounted to 23,989 tons, valued at £E662,658. Egyptian cotton has been well established, and increasing quantities, which compare favourably with corresponding varieties grown in Egypt, are being produced annually. In 1937-38 the area of cotton on the Gezira Irrigation Scheme (put into operation in 1925) was 206,653 acres and a crop of 946,976 kantars of 315 lb. seed cotton was harvested. The areas of cotton grown on the Gash and Baraka Deltas were 31,850 and 20,000 acres respectively and produced 62,534 and 28,116 kantars of 315 lb. seed cotton. In addition, considerable quantities of high-grade, long-staple American cotton are produced in the Northern Province under irrigation, and as a rain crop in the Kordofan, Upper Nile, and Equatorial Provinces. The total area under cotton in the 1941-42 season was 401,546 acres, and the total crop was 295,107 bales of 400 lbs.

Other products of the Sudan include sesame, senna leaves and pods, ground-nuts, dates, hides and skins, mahogany, dam nuts (vegetable ivory), chillies, semn (ghee), melon-seed, beans, maize, trochus and mother-of-pearl shell, shea nut, salt, ivory and gold. The principal grain crops are dura (great millet), the staple food of the people in the Sudan and used as cattle and poultry food outside the Sudan, and dukhn (bulrush millet). The cattle and sheep trade of the Sudan is capable of great development.

In 1944 there were in the Sudan approximately 23,000 horses; 75,000 asses; 850 mules; 3,195,000 cattle; 4,803,000 sheep; 3,991,000 goats, and 1,109,000 camels. Pigs are kept by the Nubas only—about 3,500.

The forests which line the Blue Nile River banks, rich in fibres and tanning material, extend to the frontier of Abyssinia. The forests of the Southern Sudan contain valuable trees, the mahogany and the acacia arabica being the most important. The finest gum forests are in Kordofan, Blue Nile and Kassala. The sudd area in the upper reaches of the White Nile is composed of an inexhaustible quantity of papyrus.

Gold is being successfully exploited in the Sudan, mines being worked at Gabait and other places in the Red Sea Hills. Salt pans at Port Sudan supply the whole needs of the country, and considerable quantities are exported annually. In 1935 the exports of salt totalled 24,764 tons out of a total production of 26,534 tons.

trade in spirits, usury, and security of labour. The interests of natives are safeguarded.

Under an Order in Council, dated July 22, 1920, the Territory is administered by a Governor, who is assisted by an Executive Council, comprising 3 ex-officio members, 3 official members and 4 unofficial members, all of whom are nominated. A Legislative Council has been constituted as from October 1, 1926, consisting of 18 official members and not more than 10 non-official members. Rights in or in relation to any public lands vest in the Governor, but the Secretary of State for the Colonies may appoint, if he sees fit, another trustee or trustees to exercise such right.

**Area and Population.**—The Territory extends from the Umba River on the north to the Rovuma River on the south, the coast-line being about 500 miles in length, and includes the adjacent islands. The northern boundary runs approximately north-west to Lake Victoria at the intersection of the first parallel of southern latitude with the eastern shore (Mohuru Point). The boundary on the west follows the Kagera River (the eastern frontier of Ruanda), thence the eastern boundary of Urundi to Lake Tanganyika. The western boundary then follows the middle of Lake Tanganyika to its southern end at Kasanga (formerly Bismarckburg), whence it goes south-east to the northern end of Lake Nyasa. Rather less than half-way down the lake the boundary turns east and joins the Rovuma River, whose course it follows to the sea. The total area is about 360,000 square miles, which includes about 20,000 square miles of water. Dar-es-Salaam is the capital and chief port, population, 74,036. Other towns are Tanga and the inland towns of Arusha, Bukoba, Dodoma, Iringa, Kigoma, Moshi Mwanza and Tabora (native population, 30,000). Arusha and Moshi are situated on the Tanga railway in the farm country around Mount Meru and Mount Kilimanjaro. Dodoma, Tabora and Kigoma are all important trading towns and shipping towns on the Central Railway, the latter town being located on Lake Tanganyika and serving as the western terminus.

In 1943 the European population was estimated at 16,709, the Asiatic population at 45,099, and the native population at 5,355,786. European population, 1931 census: 5,236 males, 2,981 females; total, 8,217. Asiatic population, 1931 census: 20,462 males, 12,225 females; total, 32,687. Native population, 1931 census: 2,428,216 males, 2,594,424 females; total, 5,022,640. According to German law every native born after 1905 was free, but a mild serfdom was continued under German rule. Legislation for the abolition of slavery was enacted in 1922.

The native population of Tanganyika is made up of members of more than 100 tribes, each with a distinctive dialect and varying customs. Most of the tribes are of Bantu origin, although some are Bushman. Swahili, the language of Zanzibar, is generally spoken and understood throughout Tanganyika, particularly along the trade routes which originally radiated out from Zanzibar.

**Education.**—*European Education*.—Three schools are maintained by Government for the education of European children, at Dar-es-Salaam, Arusha and Mbeya (the last two being boarding schools). A correspondence course, which also serves Kenya and Uganda, for children in the more remote districts, is conducted from Dar-es-Salaam. Assistance is given to 8 schools, viz., 1 English, 2 Afrikaans, 2 Greek, 1 Goan (400 children) and 2 kindergarten schools. The total enrolment is 1,203.

*Indian Education*.—There are 80 Indian schools with a total enrolment of 7,288. Grants-in-aid are paid in respect of staff, buildings and

equipment. 78 schools are on the grant-earning list. Instruction in the lower standards is conducted in Gujarati or Urdu, and in English in the higher standards. At the Government school in Dar-es-Salaam and at 2 other schools the curriculum is designed to take pupils to the Cambridge School Certificate Examination.

*African Education*.—Schools for Africans are provided by Government, the native administrations and missions societies, the two latter being subsidised by a grant-in-aid system controlled by the Education Department. 164 schools are maintained by Government or the native authorities, including 5 secondary schools, 2 teacher training centres and 10 girls' schools. The total enrolment is 17,036. Assistance is given to 312 schools run by various mission authorities, with a total roll of 36,372. The secondary schools, in which instruction is given in English, provide pre-vocational education for entry into Government departments and are linked up with Makerere College, Uganda. The teacher training centres train vernacular speaking teachers for the village schools. Stress is placed on the improvement of rural economy, and nearly every school has its garden. Industrial sections teach carpentry, masonry, smithing and tailoring. A printing press is attached to the Dar-es-Salaam school. A clerical course of two years, subject to the junior secondary course, is undertaken at Tabora secondary school, in which boys designed for the local civil service are taught office routine, accountancy, typewriting and shorthand.

The total expenditure on Education in 1943 was 155,182*l.*, exclusive of further sums contributed by the native authorities and missions.

**Finance.**—The revenue and expenditure for 5 years were:—

|             | 1940      | 1941      | 1942      | 1943      | 1944 <sup>1</sup> |
|-------------|-----------|-----------|-----------|-----------|-------------------|
|             | £         | £         | £         | £         | £                 |
| Revenue     | 2,308,108 | 2,674,558 | 3,146,939 | 3,729,766 | 3,553,000         |
| Expenditure | 2,255,915 | 2,550,190 | 3,182,026 | 3,725,042 | 3,906,255         |

<sup>1</sup> Estimates.

The chief items of revenue in 1943 were: licences, taxes, etc., 1,367,166*l.*; customs, 1,049,267*l.*; fees of court or office, 177,502*l.*; miscellaneous, 128,851*l.*; posts and telegraphs, 120,476*l.*; revenue from Government property, 181,756*l.* The chief items of expenditure were: public debt, 134,888*l.*; pensions and gratuities, 159,803*l.*; provincial administrations, 206,242*l.*; police and prisons, 190,051*l.*; medical, 276,788*l.*; education, 155,182*l.*; miscellaneous services, 332,248*l.*; posts and telegraphs, 93,250*l.*; agriculture, 94,841*l.*; public works, 58,020*l.*; veterinary, 81,106*l.*

Loans were received from the Imperial Government in the years 1920–21 to 1925–26, amounting to 3,135,446*l.* for capital improvements and developments and were expended upon railway works, 1,288,983*l.*; other works, 770,955*l.*; restoration of war damage, 177,909*l.*, and to meet deficit upon recurrent account, 897,599*l.* Interest at 5 per cent. and sinking fund at 1 per cent. is being paid on the loan for railway and other works. The repayment of the balance of 1,075,508*l.* representing the loan to meet deficit on current account and repair of war damage has been remitted. Other loans: Guaranteed Loan, 1948–68, 2,070,000*l.*, of which 1,916,214*l.* are allocated to railway works; Guaranteed Loan, 1951–71, 3,000,000*l.*, of

42,000 inhabitants. In 1945-46 there were 1,542 children in the Government schools and 24,037 in the mission schools. In the western parts of the Dependency are rich forests of mahogany, cedar, etc., and trees yielding fruits, oil, rubber, and gum copal; this area has been opened up by a trunk motor road from Kumasi to Pannu (120 miles) on the western frontier, via Sunyani (80 miles from Kumasi), with branch feeder roads from small villages. On the eastern side the forests are sparser, though timber and oil trees are common and game fairly plentiful; the products there are chiefly maize, yams, coco-yams, bananas, plantains, ground-nuts, and (in the south) coconuts.

The Northern Territories lying to the north of the parallel of 8° N. lat., bounded on the west and north by the French possessions and on the east by Togoland, were placed under British protection in 1901. They are administered, under the Governor, by a Chief Commissioner, an Assistant Chief Commissioner and 15 administrative officers. The country is divided into six districts:—Mamprai, Dagomba, Gonja, Wa, Lawra Tumu and Krachi, with the headquarters of the Protectorate at Tamale, 237 miles north of Kumasi. Estimated population (1931), 717,275; non-Africans (1931), 107. Chief towns, Tamale, 12,941; Wa, 5,223; Salaga, 4,826; Bawku, 3,752. Area of the Protectorate, 30,486 square miles; Mandated Territory is about 13,041 square miles in addition with a population at the last census of 168,142. Police force (1938-39), 1 European officer and 271 other ranks. The Mohammedans have substantial mosques; there are Roman Catholic and other missions. For the purposes of education the Northern Territories are regarded as a part of the Gold Coast under the administration of the Director of Education, but having a separate Ordinance and Rules. At Tamale there is a Government Senior School which is fed by selected pupils from the Native Administration Schools at Gambaga, Kpembe (Salaga), Wa, Bawku, Lawra, Sandema, Yendi, Yeji, Krachi, Chiana and Zvarungu. Pupils in 1943, 1,829. There are also a few Mission schools. There are 2,158 miles of permanent motorable roads in the dry season. The chief crops grown are yams, guinea corn, millet, maize, rice, and tobacco. Live-stock, 1935: cattle, 170,000; sheep and goats, 455,000; donkeys, 16,000; horses, 6,000; pigs, 1,500. The Department of Animal Health has its headquarters at Pong Tamale, where there is a laboratory and an experimental farm, and where Africans are trained in veterinary work and animal husbandry. Eighteen native administration livestock farms are established throughout the Territory for the development of the livestock industry. Medical officers are stationed at Tamale, Gambaga, Bawku, Navrongo, Lawra and Wa; they have charge of the hospitals in these places and of the Native Administration dispensaries, sixteen in all, in the areas under their respective control. The control of imported livestock is effected by five quarantine stations on the frontier. Gold-bearing quartz and alluvial deposits, and mica, exist.

Governor of the Gold Coast.—Sir Alan Burns (October 1, 1941).

Colonial Secretary of the Gold Coast.—H. L. G. Gurney, C.M.G. (June 22, 1944).

Chief Commissioner of Ashanti.—E. G. Hawkscorrh, C.M.G., M.C.

Chief Commissioner of the Northern Territories.—Lt.-Colonel G. H. Gibbs, C.M.G., M.C.

### SIERRA LEONE

The Colony of Sierra Leone originated in the sale and cession, in 1788, by a native King to English settlers, of a piece of land intended as a home

for natives of Africa who were waifs in London; and later it was used as a settlement for Africans rescued from slave-ships. The present combined Colony and Protectorate are bounded on the north-west, north and north-east by French Guinea, on the south-east by Liberia and on the south-west by the Atlantic Ocean. The Colony including those portions administered as Protectorate lies along the coast, extending from the boundary of French Guinea to the north of the mouth of the Scarcies River to the boundary of Liberia at the mouth of the Mano River, an approximate distance of 210 miles. Inland it extends to a distance varying from  $\frac{1}{2}$  to 20 miles and includes the Yelibuya and other islands towards the north, as well as Sherbro and several smaller islands to the south, but the Isles de Los were ceded to France under the Convention of 1904. Sierra Leone proper consists of a Peninsula about 28 miles long and 9 miles wide of which Cape Sierra Leone is the north-west point. There are for the Colony and Protectorate a nominated Executive Council and a Legislative Council consisting of the Governor, twelve official members, three elected unofficial members, and seven nominated unofficial members, of whom three are paramount chiefs of the Protectorate. Elected members must be 25 years of age, and hold their seats for five years. The franchise is confined to males.

The area of the Colony including those portions administered as Protectorate is 2,500 square miles approximately. Those portions of the Colony which are administered strictly as Colony (viz. the Sierra Leone Peninsula, Tasso Island, Banana Islands, the township of Bonthe on Sherbro Island and York Island) cover areas of approximately 271 square miles; population (estimated 1940), 121,100. Europeans, 1931, numbered 420. Chief town, Freetown, 86,000 inhabitants (February, 1944).

In the Colony area there were, in 1943, 40 primary schools belonging to Christian bodies, 3 to Mohammedan organisations, and 2 Government primary schools. In all these schools teachers' salaries are paid and equipment and materials provided from public funds. The average attendance in these 45 schools and in the primary classes attached to secondary schools was 5,749. Salaries paid to African teachers in assisted schools, including grants to 5 European teachers at Roman Catholic schools, amounted to 14,401. There were 1 Government and 2 assisted secondary schools (5 for boys and 4 for girls) with an average attendance of 978. Besides these there were 15 unassisted primary schools with an average attendance of 1,912.

Fourah Bay College, an institution of which the Church Missionary Society is the proprietor, is affiliated to the University of Durham and provides courses in theology and arts and a training course for primary teachers.

Police force at end of 1942 had an authorised strength of 313, including 12 European officers. In 1942, 74 persons were convicted in the Supreme Court, and 27 in the Circuit Court.

## CAMEROONS UNDER BRITISH MANDATE.

The Cameroons, lying between British Nigeria and the French Equatorial Africa, marches with the eastern boundary of Nigeria north-eastwards from the coast to Lake Chad. It was captured from the Germans in February, 1916, and was divided between the British and French under a Declaration signed at London July 10, 1919. The British portion is a strip stretching the whole length, save for one short break, of the Nigerian boundary. Area 84,081 sq. miles and population estimated at 868,637 (1939). Bantu negroes live near the coast, Sudan negroes inland. The country is administered under a mandate conferred on July 20, 1922, containing provisions directed against slavery, forced labour (except for essential public services) and abuses of the traffic in arms and spirituous liquors. The northern part is attached to the Provinces of Bornu, Benue and Adamawa in Nigeria, and the southern part, known as the Cameroons Province, to the Eastern Provinces of Nigeria. There are 5 Government schools in the Cameroons Province and a number of schools controlled by native authorities and missions. There is also an elementary teachers' training centre.

There are graduated direct taxes for natives and Europeans. The revenue and expenditure are incorporated in the accounts for Nigeria. Government revenue for 1939, 109,264*l.* (including customs, 66,897*l.*; direct taxes, 23,471*l.*; expenditure, 183,912*l.* (including provincial administration, 27,049*l.*; medical, 22,789*l.*; education, 14,419*l.*; police, 18,853*l.*).

The soil in the coast region is fertile, and this area is heavily forested. Near the coast are a number of plantations controlled by European firms. Their chief products are palm oil, palm kernels, cocoa, rubber and bananas.

Imports into the Cameroons under British mandate in 1939, 225,907*l.*; exports, 424,871*l.* Chief exports: bananas (fresh), 61,833 tons; palm kernels, 1,139 tons; and cocoa, 2,659 tons. Chief imports: textiles, salt, bags and sacks, cement, kerosene, fish, rice, tobacco, cigarettes and motor spirit. In 1939, 120 vessels, having a total tonnage of 311,685 entered and cleared the port of Victoria, and 241 vessels (199,005 tons) entered and cleared the port of Tiko.

The currency is British, similar to that in use in Nigeria.

*Administrator of British Zone.*—The Governor of Nigeria.

## TOGOLAND.

Togoland, between the Gold Coast Colony on the west and French Dahomey on the east, was surrendered unconditionally by the Germans to

British and French forces in August, 1914. On September 30th, 1920, the country was divided between France and Britain in accordance with the Franco-British declaration of July 10th, 1919. The boundary between the two spheres extends from the north-west corner in a general direction south-east and south, terminating not far from the port of Lome, but so that no part of the British sphere reaches the coast. (See map in the STATESMAN'S YEAR-BOOK for 1920.) The area allotted to Great Britain is 13,041 square miles, and for administrative purposes it is attached to adjacent provinces and districts of the Gold Coast Colony and Northern Territories. The population (estimated at midyear, 1940) was 391,473.

For purposes of education Togoland under British mandate is considered as part of the Gold Coast.

In the British mandated area the Ewe Mission has 135 schools with 7,162 pupils, and an average daily attendance of 7,000; the Roman Catholic Mission has 59 schools with 3,708 pupils, and an average daily attendance of 3,600; the First Century Gospel Mission has 2 schools with 81 pupils, and an average daily attendance of 73, and Balemi has 2 schools with 180 pupils.

The revenue and expenditure of the area are now included in the figures for the Gold Coast. Expenditure still greatly exceeds revenue.

Separate figures for imports and exports are no longer available, being included in the general total for the Gold Coast.

The principal imports are cotton goods, salt and tobacco. Principal exports are palm oil, palm kernels, cocoa, kola nuts, raw cotton and raw coffee.

*Administrator of British Area.*—The Governor of the Gold Coast.

## AMERICA.

## BERMUDA.

A Colony, with representative government, consisting of a group of 360 small islands (about 20 inhabited), 580 miles east of North Carolina and 677 miles from New York, noted for its climate and scenery; a favourite winter resort for Americans, and now an important British and American naval and air base. The civil population (i.e. excluding British and American military, naval and air force personnel) at December, 1943, was estimated at 33,428.

The Spaniards visited the islands in 1515, but they had previously been discovered (the exact date is unknown) by Juan de Bermudez, after whom they were named. No settlement was made, and they were uninhabited until a party of colonists under Sir George Somers was wrecked there in 1609. A company was formed for the 'Plantation of the Somers' Islands, as they were called at first, and in 1684 the Crown took over the Government.

*Governor.*—Lieut.-Colonel the Lord Burghley. K.C.M.G., appointed August 24, 1943 (8,500*l.* salary, 1,500*l.* entertainment), assisted by an Executive Council of 7 members (four official) appointed by the Crown, a Legislative Council of 9 members (three official), also appointed by the

which 1,980,268*l.* are allocated to railway work; Guaranteed Loan, 1952-72, 500,000*l.*, of which 81,975*l.* are allocated to railway work.

**Defence.**—Before the war there were garrisons at Dar-es-Salaam, Moshi and Iringa.

**Production and Industry.**—Tanganyika has three natural regions—the coastal lowlands, the high plateau and the high mountain slopes around Mount Kilimanjaro in the north and the Livingstone mountains in the south. About 1,000 square miles of the coastal plain are covered by mangrove forests. The total area under forest other than savannah forest is approximately 4,666 square miles, of which 89·6 per cent. is Government forest reserves, 6·7 per cent. awaits reservation, and 3·7 per cent. is valuable forest in private ownership. These forests contain some good merchantable timbers in varying quantity, among which camphor, mvule and certain African mahoganies are the most important. In addition, valuable species of hard woods occur as single trees or in groups widely scattered throughout the large areas of savannah forest, chief being muingu and African blackwood. The mangrove woods are valuable as a source of tanning bark and also of poles which are carried by Arab dhows to the Persian Gulf. The possible output of the Territory's forests far exceeds the present local consumption. The approximate production of timber and fuel wood in 1941 was 744,926 and 9,139,350 cubic feet respectively.

Agriculture is the chief occupation. Among the agricultural exports, one commodity—sisal—now constitutes in value about one-third of all exports and nearly one-half of the agricultural exports. Tanganyika is the world's leading producer of sisal. In 1938 the Territory exported slightly more than 100,000 tons—approximately one-third of the world's supply of this important commodity. The only other important producers are Mexico, the Netherlands Indies and Kenya. Other agricultural exports are cotton, coffee and hides and skins, also some rice, peanuts, ghee, rubber, copra, tea, sesame (sim sim), sugar, tobacco and pyrethrum. Among the products collected from the forests, the most important exports are beeswax and mangrove bark.

In 1948 there were 5,944,436 cattle, 2,203,329 sheep and 2,851,851 goats in the territory.

The value of minerals produced in 1939 was: diamonds, 12,255*l.*; gold (bullion), 1,023,963*l.*; salt, 55,178*l.*; mica, 15,408*l.*; tin, 50,646*l.*; building minerals, 1,410*l.*; phosphates, 1,962*l.*; red ochre, 186*l.*; talc, 143*l.*; tungsten, 102*l.*

**Trade and Shipping.**—There is a uniform Customs tariff in Tanganyika, Kenya, and Uganda. Total imports, 1939, 3,039,478*l.*; 1940, 3,000,989*l.*; total exports, 1939, 4,585,658*l.*; 1940, 5,641,520*l.*

Chief exports, 1939: sisal (98,110 tons), 1,223,477*l.*; cotton (260,500 cwt.), 557,358*l.*; coffee (16,500 tons), 466,026*l.*; ground-nuts (4,406 tons), 41,767*l.*; hides (3,521 tons), 188,761*l.*; skins, sheep and goat (1,147,439), 44,686*l.*; copra (6,378 tons), 50,457*l.*; grain (441,979 cwt.), 162,152*l.*; sesame (4,639 tons), 48,081*l.*; beeswax (456 tons), 43,344*l.*; ghee (17,926 cwt.), 57,701*l.*; diamonds (3,445 carats), 12,555*l.*; gold (187,254 oz. troy), 980,346*l.* Chief imports, 1939: cotton piece-goods, 614,841*l.*; iron and steel manufactures, 125,276*l.*; foodstuffs, 294,597*l.*; machinery, 175,889*l.*; building materials (including cement and galvanised iron sheets), 114,580*l.*; kerosene and motor spirits, 197,625*l.*; sugar, 53,005*l.*; spirits, 31,830*l.*; cigarettes, 98,584*l.*

In 1939, 460 steamers (exclusive of coastal boats) of 2,161,270 tons, and

2,280 dhows of 53,900 tons entered, and 456 steamers of 2,153,528 tons and 2,278 dhows of 53,843 tons cleared the various coast ports from places beyond the Territory.

The chief seaports are Dar-es-Salaam, Tanga, Lindi, Mikindani and Kilwa.

**Communications.**—Light motor traffic is now possible over 22,617 miles of road during the dry season.

There are two railways of metre gauge in the territory. The Tanga Railway from Tanga to Arusha via Moshi (273 miles), and the Central Railway from Dar-es-Salaam to Kigoma (774½ miles), with a branch line from Tabora to Mwanza (236 miles) and a branch line from Manyoni to Kinyangiri (93 miles) via Singida. There are steamers on Lakes Victoria, Nyasa and Tanganyika.

The 1943 annual financial statement of the Tanganyika Railways showed total revenue derived from railways and ports of 1,260,000*l.* and expenditures of 1,412,000*l.*

Dar-es-Salaam is in telegraphic communication with many inland centres and with the adjoining territories Nyasaland, Kenya, Uganda and Northern Rhodesia. Cable communication exists between Dar-es-Salaam and Zanzibar. A wireless station exists at Dar-es-Salaam for communication with shipping, and stations for dealing with aircraft are installed at Lindi, Mbeya, Dodoma and Moshi. There are 185 post offices and postal agencies (132 of which have telegraphic facilities). Telegraph money order and savings bank business is conducted at 25 head offices, and postal order and ordinary money order business at 16 sub-offices. Telephone exchanges are established and trunk telephone communication is in operation between various centres in the Territory and also with Mombasa and Nairobi.

East African currency is in use, consisting of a silver shilling, the equivalent of 100 cents; a 50 cent silver piece; copper and bronze 10 cent, 5 cent, and 1 cent pieces. There are currency notes in denominations ranging from 5 to 1000 shillings. Four banks, the National Bank of India, the Standard Bank of South Africa, Barclays Bank (Dominion, Colonial and Overseas) and the Banque du Congo Belge, have branches in the country.

**Governor.**—Sir William Denis Battershill (appointed September 19, 1944).

**Chief Secretary.**—G. R. Sandford, C.M.G., O.B.E. (appointed January 21, 1944).

## GUIANA, BRITISH.

*Governor.*—Sir Gordon James Latham, K.C.M.G. (appointed July 4, 1941; salary 4,125*l.* and 1,625*l.* allowances).

*Colonial Secretary.*—W. L. Heape, C.M.G. (appointed December 7, 1943; salary 1,650*l.*).

This territory, including the counties of Demerara, Essequibo, and Berbice, named from the three rivers, was first partially settled by the Dutch West India Company about 1620. The Dutch retained their hold until 1796, when it was captured by the English, and was finally ceded to Great Britain in 1814. The colony is situated on the north-east coast of South America on the Atlantic Ocean, with Surinam on the east, Venezuela on the west, and Brazil on the south and west.

*Constitution and Government.*—The British Guiana (Constitution) Orders in Council, 1928 and 1935, provide for the Government of the Colony and for the Constitution of a Legislative Council. The present constitution came into operation on July 18, 1928. The Legislative Council consists of the Governor as President, and since March, 1942, the Colonial Secretary, the Attorney General and the Treasurer as official members, 7 nominated unofficial members and 14 elected members. Executive and administrative functions are exercised by the Governor and Executive Council. The law of the Colony, both civil and criminal, is based on the common and statute law of England, save that, with certain exceptions, the English law of personal property applies to both movable and immovable property, and the principles of the Roman-Dutch law have been retained in respect of the registration, conveyance and mortgaging of land. There is absolute equality of males and females before the law as regards divorce, property, succession and all other matters. Appeals lie to the Full Court of the Supreme Court and to the West Indian Court of Appeal, and from these Courts to the Judicial Committee of the Privy Council.

In November, 1940, a site on the bank of the Demarara River, about 25 miles from the sea, was leased to the United States as a military or naval base.

*Area, Population, etc.*—Area, 89,480 square miles. Population at census 1931, 310,933 (excluding about 7,379 aborigines). Estimated population, 1943, 364,694. Births (1943), 12,204 (33.5 per 1,000); deaths, 8,991 (24.7 per 1,000). Capital, Georgetown, 73,171. Total East Indians (1943), 159,249. 189 schools (and 59 in remote and sparsely populated districts) received Government grant (140,584*l.*) in 1943; 60,021 pupils; average daily attendance, 44,552; teachers, 1,620. Secondary education is provided for both boys and girls.

Paupers (1939) receiving out-door relief, 3,784.

*Finance.*—Revenue and expenditure for 5 years:—

|             | 1940 <sup>1</sup> | 1941 <sup>1</sup> | 1942 <sup>1</sup> | 1943 <sup>1</sup> | 1944 <sup>2</sup> |
|-------------|-------------------|-------------------|-------------------|-------------------|-------------------|
|             | £                 | £                 | £                 | £                 | £                 |
| Revenue     | 1,451,058         | 1,777,005         | 2,095,854         | 2,600,717         | 1,968,347         |
| Expenditure | 1,408,043         | 1,473,504         | 1,675,413         | 2,288,802         | 2,144,293         |

<sup>1</sup> These figures are exclusive of special receipts from the Colonial Development Fund and the related expenditure.  
<sup>2</sup> Estimates.

Crown, and an elected House of Assembly of 36 members; 2,691 electors. Women received the vote by a Bill passed by the Legislative Council on May 12, 1944.

Area, 19·3 square miles (12,360 acres, 1,400 under cultivation). In 1943 the birth-rate was 25·9 per 1,000 (16·7 white, 31·4 coloured), and the death-rate 10·8 per 1,000 (9·6 white, 10·7 coloured); there were 230 marriages. Chief town, Hamilton; population, 1939, 2,978. Bermuda is an important naval base on the America and West Indies Station, with dockyard, victualling establishment, etc. In 1940 sites on the island were leased to the United States as air and naval bases. In January 1941, Tucker and Morgan Islands, situated in the Great Sound, were leased to the United States for 99 years for use as a flying-boat base.

Police force, 1943, 91.

Education is compulsory between the ages of 7 and 13, and Government assistance is given by the payment of grants, and, where necessary, of school fees, but there are no Government schools. In 1943, 28 aided schools, with 5,160 pupils, received in Government grants 78,499*l*. There is 1 garrison school and 1 naval school, and about 14 other primary schools receiving no Government grant.

<sup>1</sup> Excluding Government stores from imports.

<sup>a</sup> Excluding 1,987,712*l*. value of diamonds imported and subsequently exported.

Imports (excluding Government stores) from United Kingdom in 1943, 309,844*l*.; Canada, 385,848*l*.; British West Indies, 48,042*l*.; United States, 1,790,037*l*.; other countries, 48,485*l*.

Food supplies are mostly imported from the United States and Canada. The principal imports in 1943 were: food, 841,411*l*.; clothing, 481,657*l*.; alcoholic beverages, 258,066*l*.; fuel, 125,524*l*.; building material, 109,936*l*.; agricultural supplies, 107,546*l*.; house furnishings, 48,372*l*.; non-alcoholic beverages, 40,885*l*.; cigars, cigarettes and tobacco, 34,721*l*.

The registered shipping consisted (1938) of 10 steam vessels of 4,681 tons net, 20 sailing vessels of 2,125 tons net, and 27 motor vessels of 203 tons net; total net tonnage, 7,864. In 1938 the total tonnage of vessels entered and cleared was 6,441,284 tons, of which 5,297,210 were British.

There is a private telephone company, with over 11,600 miles of wire. Cables connect the islands with Halifax, Nova Scotia, Turks Island, and Jamaica. There were (1943) 14 post offices; number of letters and post cards dealt with in 1943 was 2,061,127; newspapers, book packets and circulars, 655,550; parcels, 29,963. Post office revenue was 63,832*l*., and expenditure, 45,843*l*. Savings bank deposits on December 31, 1943, were 125,363*l*. to the credit of 7,091 depositors.

There are two banks in the island, the Bank of Bermuda, Ltd., and the Bank of N. T. Butterfield and Son, Ltd., both local. Bills of exchange issued by the Treasury Chest Office in the Colony form the basis of exchange with the outside world.

The currency, weights and measures are British. There were 5*l*., 1*l*., 10*s*. and 5*s*. Bermuda Government notes to the value of 865,421*l*. in circulation on December 31, 1943. A considerable quantity of American paper is also in circulation.

## FALKLAND ISLANDS AND DEPENDENCIES.

**Governor.**—Sir Allan Wellesley Cardinal, K.B.E., C.M.G. (appointed February 8, 1941; salary 1,500*l*. and 350*l*. duty per annum).

The government is administered by the Governor, assisted by an Executive Council and a Legislative Council of 4 official and 2 unofficial members.

Crown colony situated in South Atlantic, 300 miles E. of Magellan Straits. East Falkland, 2,580 square miles; West Falkland, 2,038 square miles, including in each case the adjacent small islands; total, 4,618 square miles; besides South Georgia, 1,000 square miles (estimated). Among other Dependencies are the South Shetlands, the South Orkneys, the Sandwich Group, and Graham's Land. The Dependencies include all islands and territories between 20° and 50° W. longitude, south of 50° S. latitude, and between 50° and 80° W. longitude, south of 58° S. latitude. Population: Falkland Islands, estimated 1943, 2,444 (1,340 males and 1,104 females), exclusive of the Whaling Settlement in South Georgia (estimated population in 1943, 860, including 7 females). Chief town, Stanley (1940), 1,246 inhabitants.

Education is compulsory. In 1943 there was 1 Government school in Stanley, with 232 pupils on the roll; in the country districts full-time schools were maintained by the Falkland Islands Company at Darwin (12 pupils) and North Arm (6 pupils), and the Government supported a part-time school at San Carlos (8 pupils). The rest of the country children, about 125 in all, were taught in their homes for periods of a few weeks every few months by

## HONDURAS, BRITISH.

*Governor and Commander-in-Chief*—Sir John Adams Hunter, K.C.M.G. (appointed November 18, 1939; salary 8,720 dollars, duty allowance 1,000 dollars), assisted by an Executive Council of seven members, and a Legislative Council consisting of five official and eight unofficial members (2 nominated and 6 elected).

*Colonial Secretary*.—Arthur Norman Wolfsohn, O.B.E. (February 8, 1944).

British Honduras is a Crown Colony on the Caribbean Sea, south of Yucatan, and 600 miles west from Jamaica. Its early settlement was probably effected by woodcutters from Jamaica about 1638, and from that date to 1798, in spite of opposition from the Spaniards, settlers held their own and prospered. In 1786 the Home Government appointed a Superintendent, and in 1862 the settlement was declared a Colony, subordinate to Jamaica. It became an independent colony in 1884.

*Area and Population*.—Area, 8,867 sq. miles. The climate is tropical, with an average rainfall for the past four years of 81.96 ins. The wet season lasts from the middle of May to the middle of February.

Population, census 1931, 51,847 (25,524 males, and 25,823 females). Estimated population at December 31, 1943 62,512 persons (30,797 males and 31,715 females). The birth-rate per 1,000 (1943) was 30.8, and the death-rate 18.2. In 1943 there were 469 marriages. Aided primary schools (1943), 78; children enrolled, 10,151; average attendance, 8,184; Government grant (expended), 99,011 dollars. There are 5 secondary schools, with a total of 531 pupils; they first received Government aid in 1936. All schools, both primary and secondary, except for 9 unaided primary schools, are under denominational management. The total school roll, including unaided schools, was 18,829, and attendance 9,981. The police force contained, December, 1943) 3 officers, 173 non-commissioned officers and men. Chief town: Belize; population, census of 1931: 16,637 (7,668 males and 9,019 females).

## Finance.—

|             | 1939      | 1940      | 1941      | 1942      | 1943      |
|-------------|-----------|-----------|-----------|-----------|-----------|
|             | Dollars   | Dollars   | Dollars   | Dollars   | Dollars   |
| Revenue     | 1,967,662 | 1,756,523 | 1,576,244 | 1,649,941 | 1,877,843 |
| Expenditure | 1,967,842 | 1,684,139 | 1,523,997 | 1,636,880 | 1,838,829 |

Debt, December 31, 1943, 2,291,161 dollars.

*Commerce*.—In 1943, total imports amounted to 5,686,070 dollars; total exports, 3,745,326 dollars.

Domestic exports, 1943, in dollars, to: United Kingdom, 12,443; Canada, 260,389; United States of America, 1,368,544.

Imports, 1942, in dollars, from United Kingdom, 206,473; Canada, 146,100; United States of America, 1,970,784.

Besides the staple products, mahogany and logwood, there are bananas, chiclé, citrus fruits, cacao, plantains, etc.

*Shipping and Communications*.—Tonnage entered, 1943, 86,497 tons. Registered shipping, 1943, 105 sailing vessels, 715 tons, and 88 motor vessels, 2,431 tons. In 1943, 479,071 letters and post-cards, and 210,300 books, newspapers and parcels passed through the post office. Telegraph and telephone lines connect Belize with Corozal and Consejo on the coast, Orange Walk on New River, San Antonio on the Rio Hondo, and other stations in the north, El Cayo and Benque Viejo in the west, Stann Creek and Punta Gorda in the south. Telegraph line (1935), 395 miles. In 1942, 8,042 radio telegrams were transmitted.

*Money and Credit*.—The Royal Bank of Canada took over the business of the local bank in 1912. There are 6 Government savings banks; depositors, 4,961, deposits 1,034,949 dollars on December 31, 1943. The British Honduras dollar is equivalent to the dollar of the United States of America. There are (December 31, 1943) a paper currency of 555,189 dollars in Government notes and a subsidiary silver coinage of 197,873 dollars in circulation. There is also a subsidiary mixed metal coinage of one-cent and five-cent pieces whose issues amount to 22,588 dollars.

## NEWFOUNDLAND AND LABRADOR.

Newfoundland was discovered by John Cabot in 1497. It was soon frequented by the Portuguese, Spanish and French for its fisheries. Guy, Calvert and others made unsuccessful attempts to colonise the island, but in the 17th century English colonists established themselves there. A French station also existed on the island, and there were constant disputes as to fishing rights. Although exclusive British sovereignty was ceded in 1713 by the Treaty of Utrecht, these disputes were not finally settled till 1904.

The coast is rugged, especially on the south-west, where the coast range reaches an elevation of nearly 2,000 feet. The hills attain their summit within a few miles of the salt water, and then spread out into an undulating country, consisting largely of barrens and marshes, and intersected by numerous rivers and lakes. On the borders of the lakes and water-courses good land is generally found, and in some cases, as about the Exploits, the Gander and the Humber, it is heavily timbered.

*Constitution and Government*.—Prior to February 15, 1934, the Governor was assisted by an Executive Council (not exceeding 12 members),

a Legislative Council (not exceeding 24 members), and an elected House of Assembly consisting of 27 representatives. Members of the Legislative Council received 250 dollars per session; members of the Legislative Assembly received 1,000 dollars per session. For electoral purposes the whole colony was divided into 24 districts or constituencies. Women were enfranchised by an Act of the Legislature passed in 1925.

A Royal Commission appointed in 1933 to examine into the future of Newfoundland and to report on the financial situation, recommended that the existing Legislature and Executive Council should, for the time being, be suspended. It was also recommended that until such time as Newfoundland may become self-supporting again there should be constituted a form of Government under which the full legislative power and executive power should be vested in the Governor acting on the advice of a specially created Commission, consisting of six members (three from Newfoundland and three from the United Kingdom), exclusive of the Governor, over which the Governor would preside. The Governor-in-Commission would be responsible to the Secretary of State for Dominion Affairs in the United Kingdom for the good government of the Island. The Government of the United Kingdom would assume general responsibility for the finances of the Island during the period of reconstruction.

These recommendations, which denoted a suspension of the Constitution of Newfoundland, were incorporated in the Newfoundland Bill, which was passed by the British Legislature on December 21, 1933.

*Governor and Commander-in-Chief.*—Vice-Admiral Sir Humphrey Thomas Walwyn, K.C.S.I., K.C.M.G., C.B., D.S.O. (appointed October, 1935; salary 15,000 dollars).

*Commissioners.*—Newfoundland: Hon. Sir John Charles Puddister; Hon. Albert J. Walsh, K.C.; Hon. H. A. Winter, K.O. United Kingdom: Hon. Sir George E. London, K.B.E., C.M.G.; Hon. I. Wild, O.B.E.; Hon. P. D. H. Dunn, O.B.E.

*Secretary of the Commission.*—W. J. Carew, C.B.E.

**Area and Population.**—Area, 42,734 sq. miles. The estimated population at the end of December, 1940, was 300,000. Dependent on Newfoundland is Labrador, the most easterly part of the American continent. The boundary between the said Dependency and the Province of Quebec, which had, for many years, been in dispute, was defined by the Judicial Committee of the Privy Council in March, 1927, as being, in effect, the watershed of the rivers flowing into the Atlantic Ocean, the coastal boundaries being from Blanc Sablon, on the South, to Cape Chidley, on the North. As a result of this decision an estimated area of some 110,000 sq. miles, formerly in dispute, was confirmed as under the jurisdiction of Newfoundland. The population of Labrador in 1935 was 4,716 (2,522 males, 2,194 females). Of the total Newfoundland and Labrador population in 1935, 85,018 were engaged in the cod fishery, 4,226 farmers, 4,471 loggers, 1,135 miners, 2,071 carpenters, 1,447 salesmen and 7,862 labourers and unskilled workmen. Capital, St. John's, 43,000 inhabitants (1940); other towns (1940), Corner Brook, 6,500; Grand Falls, 4,500; Bonavista, 4,200; Carbonear, 3,400; Twillingate, 3,400, and Harbour Grace, 2,300. The birth rate in 1933 was 24.8 and the death rate 12.1 per 1,000. Immigrants (1941), 26,386; emigrants (1941), 22,481.

**Religion and Education.**—Of the total population of Newfoundland and Labrador in 1935, 92,709 belonged to the Church of England, 93,925 were Roman Catholics, 76,134 United Church, 1,460 Presbyterians, 18,054 Salvation Army, 7,806 other denominations.

The number of schools of all kinds in 1943-44 was 1,158, with a total of 1,944 class-rooms. The enrolment was 67,424. The Memorial University College, doing the first two years of university work (in the case of engineering the first three years) and teacher training, had in 1943-44 an enrolment of 254. Total expenditure for education by Government in 1942-43 was 1,895,002 dollars, and in 1943-44, 2,370,757 dollars.

#### Revenue and Expenditure in five years ended June 30:—

|             | 1940-41 <sup>a</sup> | 1941-42 <sup>a</sup> | 1942-43 <sup>a</sup> | 1943-44 <sup>a</sup> | 1944-45 <sup>a</sup> |
|-------------|----------------------|----------------------|----------------------|----------------------|----------------------|
|             | Dollars.             | Dollars.             | Dollars.             | Dollars.             | Dollars.             |
| Revenue     | 16,196,482           | 22,313,740           | 19,539,948           | 22,179,400           | 24,424,000           |
| Expenditure | 15,830,700           | 16,096,197           | 15,860,148           | 20,512,300           | 24,355,800           |

<sup>a</sup> Estimates.

<sup>a</sup> Nine months ended March 31.

<sup>a</sup> Year ended June 30.

<sup>a</sup> Year ended March 31.

Public debt (June 30, 1941), 99,650,000 dollars. Public debt (March 31, 1943), 19,929,812<sup>1</sup> and 4,657,547 dollars.

**Production, &c.**—The total value of all crops harvested in 1943 was 5,900,000 dollars. In 1944 there were in Newfoundland 17,000 horses, 25,000 cattle, 95,000 sheep, 12,000 swine, 15,000 goats and 400,000 poultry. The total value of live-stock was 7,000,000 dollars. Pine forests exist to the north, and large saw mills have been established. The mineral resources of Newfoundland are considerable. Large beds of iron ore have been found on Bell Island in Conception Bay, on the east coast, and other rich deposits have been discovered on the west coast. The total deposits are estimated at about 3,600 million tons. Copper ore and pyrites are worked. Coal is found near St. George's Bay on the west coast, and in the Grand Lake district. In the eastern part of the island gold-bearing quartz rock and extensive deposits of silver and lead ore have been found. Extensive paper and pulp mills have been erected at Grand Falls, Bishop's Falls and Corner Brook.

#### Imports and Exports, including bullion and specie, for five years:—

| Years ended June | 1939-40   | 1940-41   | 1941-42    | 1942-43    | 1943-44    |
|------------------|-----------|-----------|------------|------------|------------|
|                  | £         | £         | £          | £          | £          |
| Imports          | 5,848,126 | 7,988,831 | 14,448,622 | 11,717,424 | 13,979,563 |
| Exports          | 6,871,161 | 8,351,189 | 8,814,237  | 6,919,061  | 9,942,868  |

The chief imports in 1943-44 were: Apparel, 4,605,327<sup>1</sup>; flour, 2,221,551<sup>1</sup>; coal, 2,780,319<sup>1</sup>; the chief exports: fishery products, 18,486,226<sup>1</sup>; mineral products, 8,029,416<sup>1</sup>; forestry products, 1,915,514<sup>1</sup>.

Of the imports (1943-44) the value of 2,039,041 dollars came from the United Kingdom; 41,483,171 from Canada; 18,110,312 from the United States. Of the exports the value of 11,460,594 dollars went to the United Kingdom; 8,516,044 dollars to Canada; 14,002,689 dollars to United States; 2,200,844 dollars to Portugal; 30,010 dollars to Brazil; 1,921,257 dollars to British West Indies; 508,143 dollars to Argentina; 321,661 dollars to French West Indies, and 2,822,867 dollars to Spain.

**Shipping.**—Total tonnage of vessels entered in 1943-44, 2,414,672 tons, of which 1,438,311 tons were British. Vessels registered December 31, 1943, 1,578 sailing vessels of 65,088 tons, 63 steam vessels of 23,470

## 276 THE BRITISH COMMONWEALTH:—NEWFOUNDLAND, ETC.

tons, and 745 motor vessels of 28,540 tons; total, 2,385 vessels of 117,098 tons.

**Fishing** is the principal occupation of the population. The principal fish are cod, salmon, halibut, lobster, herring, caplin and seal.

By the Anglo-French Convention of 1904, France renounced her exclusive fishing rights under the treaty of Utrecht, but retained the right to fish in territorial waters from St. John's Cape northwards to Cape Ray for all sorts of fish, including bait and crustacea. An award of The Hague court in 1910 secured the right of Great Britain to make fishing regulations without the consent of the United States, subject to any limitations imposed by treaty. It also confirmed Great Britain's contention that the whole extent of a bay from headland to headland is comprised within territorial waters.

During 1942, 4,698 seals, valued at 11,886 dollars, were caught; 2 steamers and 285 men were engaged in the seal fishery.

**Communications, &c.**—Railways open 1943: 705 miles of Government line with a gauge of 3 ft. 6 in., and 56 miles of private line. Communication between various points on the coast and between the island and the continent is maintained by a fleet of first-class steamers; each of which connects with some central point on the railway. There were in 1943 (excluding 58 Labrador stations) 491 post offices, and 167 wireless and land line offices. Letters and cards dealt with in 1943, 12,520,000; also 7,184,000 newspapers, circulars and packages, and 580,400 parcels. The postal and telegraph revenue, 1942-43, was 1,081,012 dollars; 1943-44, 1,780,665 dollars; the expenditure, 1942-43, 1,021,047 dollars; 1943-44, 1,246,460 dollars. Telegraph line open (1943), 3,254 miles of wire; about 1,298 miles of telephone wire.

In December, 1937, the Newfoundland Savings Bank held 3,146,267 dollars standing to the credit of 4,020 depositors; this is in addition to the amount of 20,876,598 dollars held by the Savings Departments of the four banks doing business in St. John's.

The legal coin of the colony is the gold dollar, normally equivalent to 4s. 1½d of British money.

In January, 1941, sites on Newfoundland were leased to the United States for naval or military bases.

## WEST INDIES.

The British West Indian Possessions fall into six groups, which are noticed separately. The groups are—(1) Bahamas, (2) Barbados, (3) Jamaica with Turks Islands, (4) Leeward Islands, (5) Trinidad with Tobago, (6) Windward Islands.

Currency, weights and measures throughout the islands are those of Great Britain, though in several of them various American coins are current.

## BAHAMAS.

**Governor and Commander-in-Chief.**—W. L. Murphy, C.M.G. (assumed his duties, April 30, 1945) (3,000L.), assisted by an Executive Council of 8, a Legislative Council of 9, and a representative Assembly of 29 members, electors requiring to have a small property qualification.

**Colonial Secretary.**—Duncan George Stewart (February 22, 1944).

Bahamas consists of a group of twenty inhabited and many uninhabited islands and rocks off the S.E. coast of Florida. They are the surface protuberances of two oceanic banks, the Little Bahama Bank and the Great Bahama Bank. Of the group, about 700 areas might be classified as islands or keys; the rest only as rocks.

Area, 4,404 square miles. Rainy season from June to October. Average winter temperature about 70° F.; summer temperature, 80° to 90° F. Total rainfall (New Providence) in 1941 was 62.80 ins. Principal islands with population in 1931—New Providence (pop. 19,756, containing capital

## 270 THE BRITISH COMMONWEALTH:—GUYANA, BRITISH

Chief items of revenue (1943): customs, 1,005,029*l.*; excise and licences, 410,305*l.*; income tax, 440,480*l.*; excess profits tax, 274,018*l.* Expenditure on general administration, 79,628*l.*; treasury, 11,801*l.*; customs, 24,895*l.*; lands and mines, 19,815*l.*; agriculture and forests, 52,855*l.*; judicial and legal, 40,006*l.*; police, 123,758*l.*; prisons, 20,393*l.*; charity, 44,334*l.*; medical, 240,766*l.*; education, 180,567*l.*; post and telegraphs, 103,821*l.*; pensions and gratuities, 94,769*l.*; subventions and miscellaneous, 116,626*l.*; public debt charges, 214,705*l.*; public works, 258,441*l.*; colonial emergency measures, 448,822*l.*; surplus at December 31, 1943, 1,242,780*l.*; public debt (funded), December 31, 1943, 4,038,603*l.*

**Production.**—British Guyana can be divided roughly into three regions: (1) A low coastal region varying in width up to about 30 miles and constituting the agricultural area; (2) an intermediate area about 100 miles wide, of slightly higher, undulating land containing the chief mineral and forest resources of the country; and (3) a hinterland of several mountain ranges and extensive savannahs. Under cultivation, 192,738 acres; 68,115 acres in sugar canes (sugar output, 166,422 tons from 62,635 acres in 1943); 67,851 acres under rice (output 1943, 87,632 tons of paddy, equal to approximately 52,579 tons of rice); coconuts, 82,231 acres; coffee, 3,485 acres; cacao, 231 acres; rubber, 467 acres; ground provisions, 22,591 acres; citrus and other fruit, 6,858 acres. Livestock (1943) estimated at: cattle, 159,496; horses, 2,678; sheep, 35,581; goats, 12,940; swine, 41,766; donkeys, 7,559; buffaloes, 228. British Guyana is rich in gold. Mining commenced in 1884, and from 1884 to December 31, 1939, the output of gold was 2,956,924 ozs., valued at 11,191,141*l.*; in the year 1939, 39,507 ozs., valued at 226,918*l.*, were produced. In the period 1901–2 to 1939 the diamonds won amounted to 2,168,324 carats, valued at 8,148,180*l.*; in the year 1939, 33,390 carats, valued at 88,622*l.* Deposits of manganese-ore and mica have been found, and oil is also believed to exist. There are huge deposits of bauxite (the ore of aluminium), 476,013 tons being exported during 1939; 64,780 square miles of forests and 12,552 square miles of undeveloped land are still available for exploration and exploitation.

There are two wet seasons, one from the middle of April to the middle of August, the other from the middle of November to the end of January.

### Commerce.—Imports and exports for five years:—

|                            | 1939      | 1940      | 1941      | 1942      | 1943      |
|----------------------------|-----------|-----------|-----------|-----------|-----------|
| Imports . . .              | 2,290,389 | 2,990,368 | 3,581,602 | 3,825,659 | 5,138,319 |
| Exports <sup>1</sup> . . . | 3,068,141 | 3,169,213 | 4,022,754 | 4,022,296 | 4,879,733 |

<sup>1</sup> Including bullion and specie. Transit trade, amounted to 47,010*l.* in 1939, 68,845*l.* in 1940, 104,280*l.* in 1941, 86,529*l.* in 1942, and 86,529*l.* in 1943.

Chief imports (1943): machinery, 405,532*l.*; cotton manufactures, 641,481*l.*; metal manufactures, 184,383*l.*; oils (other than edible), 189,131*l.*; flour, 369,706*l.*; manures, 41,829*l.*; railway and tramway, 184,039*l.*; fresh vegetables, 68,381*l.*; artificial silk manufactures, 131,975*l.*; boots and shoes, 122,250*l.*; paper manufactures, 131,756*l.*; fish (dried), 44,784*l.*; pickled meats, 122,640*l.*; bags and sacks (empty), 250,931*l.*; medicines and drugs, 102,532*l.*; milk (condensed), 124,504*l.*; electrical apparatus, 38,260*l.*; butter, 90,244*l.*; wood and timber, 9,665*l.* Chief domestic exports (1943): sugar (raw) (131,187 tons), 1,566,477*l.*; rum (1,472,208 proof gallons), 197,848*l.*; rice

(17,180 tons), 354,159*l.*; timber (203,958 cub. ft.), 37,040*l.*; charcoal (838 tons), 5,391*l.*; firewood (741 tons), 788*l.*; matches (43,230 gross boxes), 6,881*l.*

Imports (exclusive of transshipments) from United Kingdom (1943), 866,889*l.*; from Canada, 1,908,844*l.*; from United States, 1,385,209*l.* Exports (exclusive of transshipments) to United Kingdom, 598,776*l.*; to Canada, 1,882,785*l.*; to United States, 595,662*l.*

**Shipping.**—In 1943, 3,109 vessels, with a total tonnage of 2,971,198, entered and cleared (in 1942, 2,872 vessels of 1,934,162 tons), mainly British, American and Panamanian. The registered vessels in 1943 were 9 steamers of 1,276 tons, 24 sailing vessels of 1,603 tons, and 6 motor vessels of 609 tons.

**Communications.**—There are 450 miles of river navigation; 39 miles of canals; 500 miles of driving or motor road, 177 miles of forest road from Bartica at the junction of the Essequibo and Mazaruni Rivers to the Potaro Gold Mining District (including branches to the Upper Potaro River at Kangaruma on the route to Kaieteur, to Issano on the Mazaruni River above the long range of falls and rapids and to the lower Potaro River at a point beneath the large fall of Tumatumari), 17 miles of bridge road and 497 miles of trails (including a Government cattle trail of 182 miles, from Takama on the Berbice River to Annai on the Rupununi Savannah).

On December 31, 1944, there were 107 post-offices and postal agencies (including travelling post-offices and agencies), of which 54 are telegraph offices and radio stations. There are 415 miles of telegraph lines. There are main telephone exchanges in Georgetown and New Amsterdam with 11 country sub-exchanges and 86 private branch exchanges carrying from 3 to 80 lines each. There are 5,001 conductor miles of telephone lines (which includes 1,701 miles contained in 16½ miles of aerial cable) and 120 miles of railway telephone lines. The number of telephone instruments in use at December 31, 1944, was 2,800.

The Demerara radio station, controlled by Cable and Wireless (West Indies), Ltd., communicates with ships and carries out a direction finding service. A Government station in Georgetown communicates with six service. A Government station in the interior. The Pan American Airways, Inc., maintain and operate an aeronautical radio station licensed by Government. The British Guyana United Broadcasting Co., Ltd., operates a broadcasting station on 6,000 k.c.

**Money.**—Accounts are kept in dollars and cents (1 dollar = 4s. 2d.). In circulation are British silver and bronze coin, with some silver 'bits'—fourpenny pieces—local coins. Notes are issued by Barclays Bank (D.C. & O.) and the Royal Bank of Canada in denominations of 5, 20, and 100 dollars, and there are Government currency notes of one, two, five and ten dollars. The face value of the latter in circulation at December 31, 1942, was 778,883*l.*

Nassau), Abaco (4,233), Harbour Island (793), Grand Bahama (2,941), Cat Island (8,999), Long Island (3,233), Mayaguana (518), Eleuthera (5,153), Exuma (3,774), San Salvador or Watlings Island (675), Acklin's Island (1,765), Crooked Island (1,329), Great Inagua (667), Andros Island (7,071).

Total estimated population, whole Colony, in 1942, 73,317 (about 85 per cent. are coloured). Births in 1942, 2,589 (34.2 per 1,000); deaths in 1942, 1,141 (16.5 per 1,000). Primary education is compulsory from ages 6 to 16. In Government schools the number of pupils was, in 1942, 10,731 (in board schools, 8,249, and in grant-in-aid schools, 2,482); Government grant, 1942, 24,444. In 1942 there were in Church of England schools, 723 enrolled pupils; in Roman Catholic schools, 1,936 enrolled pupils; in private schools, 340 enrolled pupils; Seventh Day Adventist school, 110 enrolled pupils. In 1942 there were 3 private secondary schools connected with religious bodies, 394 pupils, and a Government secondary school with 62 pupils. In 1942, 3,008 persons were convicted summarily, and 69 in superior courts. Police force, 1942, was 6 officers, 150 other ranks. Turtle fisheries are carried on, and shells, pearls and ambergris are also obtained.

The following figures are for the 12 months period, January 1 to December 31, 1942: revenue, 497,178L; expenditure, 457,281L; customs, 247,482L. Estimates for 1943: revenue, 415,935L; expenditure, 568,196L. Tourist traffic is an important source of revenue.

Public debt, December 31, 1942, 245,000L.

Tomatoes are being exported in increasing quantities. Sponge and sisal have in the past been the mainstay of the Colony, but in recent years the export of sisal has greatly diminished, and sponge has in the last few years suffered from a severe mortality, which has brought the industry almost to a standstill.

Imports and exports (excluding specie) for six years :—

| Calendar Year | Imports   | Exports | Calendar Year | Imports   | Exports |
|---------------|-----------|---------|---------------|-----------|---------|
|               | \$        | \$      |               | \$        | \$      |
| 1937          | 1,313,544 | 209,110 | 1940          | 1,377,921 | 199,478 |
| 1938          | 1,138,889 | 318,185 | 1941          | 1,500,929 | 226,361 |
| 1939          | 1,094,170 | 180,381 | 1942          | 1,826,656 | 302,777 |

Principal imports (1942) were: spirits and wines, 44,590L; iron and steel manufactures, 49,250L; cotton manufactures, 59,173L; lumber and shingles, 34,515L.

Imports from United Kingdom (1942) were valued at 37,178L; from United States, 829,920L; from Canada, 230,957L.

Principal exports (1942) were: sisal, 20,276L; sponge, 12,800L. Exports to the United Kingdom were: 10,146L; United States, 218,349L; Canada, 44,816L; Bermuda, 4,382L; Cuba, 5,666L.

Shipping 1942: entered 995 vessels of 138,939 tons (701 British of 94,789 tons); cleared, 1,006 vessels of 138,952 tons (718 British of 95,670 tons).

In 1942 the total number of postal packets, exclusive of parcels, received and dispatched, was 1,568,500. In the island of New Providence an automatic telephone system of the latest type is in operation, together with an extensive system of underground cables. The total number of telephones in use at the end of December, 1942, was 2,410. An overseas radio telephone link to the U.S.A. provides service from the subscribers' telephone to any part of the world. All the important islands are connected with

Nassau by means of radio telegraphy, and in several cases radio telephony is also available. Connection through Nassau to the U.S.A., Canada and Central America can be provided. Radio telegraph services to Jamaica and Hialeah, Florida, provide for external communications, and ship-shore services are also available. 77,929 messages were sent and received during 1942. There are no railroads in the Bahamas.

The Royal Bank of Canada has a branch at Nassau; deposits, November 30, 1942, 2,607,117L. British silver and bronze coins are legal tender. Silver coins of U.K. ceased, with effect from November 1, 1936, to be legal tender in the colony for payment of an amount exceeding 40s. British Treasury and local currency notes are in circulation, and American gold and silver certificates of 5 dollars upwards, though not legal tender, are accepted. Post Office Savings Bank, June 30, 1942, depositors, 10,836; balance due, 93,290L.

## BARBADOS.

*Governor.*—Sir H. Grattan Bushe, K.C.M.G., C.B. (appointed October, 1941; salary, 3,000L + 500L duty allowance). The Governor has an Executive Council, Executive Committee, Legislative Council of 10 Members (appointed by the King), and House of Assembly of 24 members, elected biennially by the people; in 1943, there were 7,394 registered electors. At the election held on December 8, 1944, 15 out of the 24 members of the House of Assembly belonged to the Labour Party.

In 1943 the franchise was extended and women were given the vote.

Barbados lies to the East of the Windward Islands. It was occupied by the English in 1627; unlike most of the neighbouring islands, it has never changed hands. The hot and rainy season lasts from June to December, and the average rainfall is 61 ins. a year.

Area, 166 square miles; population (census of 1921), 156,312. Estimated population, December 31, 1943, 202,588. Bridgetown is the principal city. Births, 5,877; deaths, 3,104. Education is controlled by a Government department. In 1943 there were 126 primary schools, 29,695 pupils on roll and 22,594 in average attendance; 8 second-grade schools (3 for girls), with 1,288 pupils; 2 first-grade schools for boys, with an attendance of 460 and 209 respectively, and 1 first-grade school for girls with 295 pupils. Codrington College, affiliated to Durham University, had 16 students. Government votes on education in 1943—44, 115,794L, and 19,120L for supply milk and biscuits to elementary school children, and 700L for medical, visual and dental treatment. There are three weekly newspapers, one bi-weekly and one daily.

There is a Supreme Court; Grand Sessions once in every 4 months, with additional sittings under special commissions; 7 police magistrates. In 1943, 105 summary convictions in superior courts.

Of the total area of 106,470 acres, about 68,000 are under arable cultivation; the staple produce is sugar. In 1943, about acres 37,545 were under sugar-cane, which produced 133,273 tons of sugar. Exports in 1943, 115,902 tons of sugar and 4,363,548 wine gallons of molasses. There are 100 sugar and molasses plants and 3 rum distilleries. Rum produced in 1943, 1,536,925 wine gallons. The cotton exported in 1943 was 56,640 lb. In the fishing industry about 371 sail boats, 65 large and about 100 small row boats, and 1,200 men and 600 to 700 women are employed during the flying-fish season. The majority of these boats are laid up from July to October.

|                                  | 1939-40   | 1940-41 | 1941-42 | 1942-43   | 1943-44   |

| Public debt . . . . .            | 449,170   | 449,170 | 449,170 | 609,710   | 605,260   |
| Imports <sup>2</sup> . . . . .   | 2,445,758 | —       | —       | 2,007,237 | 2,88,849  |
| Exports <sup>2</sup> . . . . .   | 2,028,991 | —       | —       | 1,362,084 | 2,238,436 |

<sup>1</sup> Excluding bullion and specie, and the exports include bunker coal and ship's stores (12,600L. in 1943).

<sup>2</sup> Calendar years, 1939-40.

The principal imports (1943) were: Cotton manufactures, 342,248L.; flour, 147,832L.; lumber and shingles, staves and shooks, wood manufactures, 144,102L.; pork, salted, 130,050L.; copra, 92,970L.; butter, 92,554L.; manures and fertilisers, 72,106L.; cornmeal, 68,137L.; iron and steel manufactures, 65,006L.; motor spirit, 56,548L.; fish, dried, etc., 54,005L.; rice, 52,828L.; apparel, other kinds, 52,076L.; machinery for sugar 39,637L.; condensed milk, 39,436L.; oilmeal and oilcake, 30,303L. The principal exports (1943) were: Sugar, 1,498,093L.; molasses, 358,482L.; rum, 168,751L.; tamarinds, 5,894L.

The imports in 1943 from United Kingdom totalled 651,719L.; from Canada, 883,985L.; other parts of the British Empire, 534,432L., and from the United States, 471,480L.; and exports to United Kingdom, 568,327L.; to Canada, 1,276,827L.; to United States, 18,916L.

Three banks operate in Barbados:—Barclays Bank (Dominion, Colonial and Overseas), the Royal Bank of Canada, and the Canadian Bank of Commerce. The Government Savings Bank on December 31, 1943, had 24,329 depositors, with 1,406,060L. to their credit. English gold, silver and bronze coins are legal tender, and five dollar notes of the Colonial Bank, Royal Bank and Canadian Bank, and one dollar, two dollar and five dollar Government currency notes are in circulation. Post office 1943: letters, etc., and parcels inwards, 748,329; outwards, 575,648. Internal letters and parcels, 1,419,839.

Registered shipping 1943: 9 sailing vessels (net tonnage, 1,653), 11 steam and motor vessels (net tonnage, 894 tons). The total tonnage of shipping entered and cleared at the Port of Bridgetown during the year 1943 was 290,299, of which 249,978 tons represented British tonnage. There are 545 miles of roads, 272 main roads and 273 secondary roads. There are 10,650 miles of telephone line in the island belonging to one private company. The telephone system has been reconstructed with a new central automatic exchange in the city and other branch exchanges. There are approximately 2,777 telephones. External telegraph communication is provided by both cable and wireless. There is also a wire broadcasting (re-distributing) service for Bridgetown and the suburbs.

There is a landing ground for aircraft at Seawell, Christ Church, opened for use in February, 1939.

## JAMAICA.

*Captain-General and Governor-in-Chief.*—Sir John Huggins, K.C.M.G., M.C. (appointed July 7, 1943; salary, 4,500L.; duty allowance, 1,000L.).

*Colonial Secretary.*—Hugh Mackintosh Foot (appointed April 4, 1945).

Jamaica was discovered by Columbus in 1494, and remained in the possession of the Spaniards until it was taken by the English in 1655, and their possession was confirmed by the Treaty of Madrid, 1670.

There is a great diversity of climate, the temperature ranging from 80° to 86° F. on the sea-coast to 40° in the mountains, with a dry atmosphere.

**Constitution and Government.**—According to the Constitution which came into force on November 20, 1944, the Governor is assisted by a House of Representatives of 32 elected members: a Legislative Council—the Upper House—of 15 members, and an Executive Council of 10 members (5 to be appointed by the House of Representatives and 5 to be nominated by the Governor). Every person over 21 years of age has the right to vote.

At the election held on December 15, 1944, Labour secured 22 seats out of the total of 32.

In November, 1940, various sites in the island were leased to the United States for military purposes.

**Area and Population.**—Attached to Jamaica are Turks and Caicos Islands, Cayman Islands, Morant Cays, and Pedro Cays. Area of Jamaica, 4,404 square miles; Turks and Caicos Islands, etc., 224 square miles. Population of Jamaica (census, 1943): total, 1,237,063 (males, 598,267; females, 638,796). According to the 1943 census there were: white, 14,793; coloured, 216,250; black, 965,944; East Indian, 21,396; Chinese, 6,894. Capital, Kingston (census, 1943), 109,056. Other towns (census, 1943), Spanish Town, 12,007; Montego Bay, 11,547; Port Antonio, 5,482; Savanna-la-Town, 4,046; Port Maria, 3,187; St. Ann's Bay, 3,133; Falmouth, 2,561. Mar. 4, 046; Port Maria, 3,187; St. Ann's Bay, 3,133; Falmouth, 2,561. Births (1943), 89,371 (31.51 per 1,000); deaths (1943), 17,558 (14.05 per 1,000); marriages (1943), 5,539 (4.4 per 1,000).

**Religion.**—There is no Established Church. The churches and chapels in 1937 were as follows:—Church of England, 248; Presbyterian, 103; Roman Catholic, 85; Wesleyan Methodist, 146; Baptist, 219; Moravian, 84; Christian Church, 31; Congregational, 37; Salvation Army, 60; Seventh Day Adventists, 100; Jewish, 4; Friends Church, 16. No accurate statistics of members.

**Education.**—In 1943-44 there were 668 public elementary schools, 163,556 children enrolled, average attendance 107,598. Government grants, 311,369L. There are three vocational schools for boys and one for girls. There are three training colleges for women and one for men, and two secondary schools largely supported by Government. There are secondary and high schools, some endowed, others not endowed, in receipt of grants-in-aid from the Government, and 7 industrial schools. Total expenditure for education, 1943-44, 790,663L.

**Justice, &c.**—There is a high court of justice, circuit courts, and a resident magistrate in each parish. Total summary convictions (1943-44), 22,644; before superior courts, 16,159. Prisoners in gaol (police lock-ups) 22,644; before superior courts, 16,159. In 1943-44 there was a serving short sentences of 33 officers and 1,800 sub-officers and men, and 1,229 constabulary force of 33 officers and 1,800 sub-officers and men, and 1,229 district constables.

There is a garrison of regular troops and a local militia comprising artillery, engineer and infantry corps.

THE BRITISH VIRGIN ISLANDS consist of a group of islands numbering about 30, situated between the Greater and Lesser Antilles. Area 58 square miles; population (estimated 1943), 7,129. The chief islands of the group are Tortola, Virgin Gorda, Anegada and Jost Van Dyke. There is a nominated Executive Council. Road Town, on the south-east of Tortola, the only town and capital, is a port of entry; population about 900, with some 1,800 scattered on the hills at the back of the town. Fruit, ground provisions and charcoal are produced. A fair trade in livestock and poultry is carried on. Revenue (1943), 17,755*l.*; expenditure (1943), 18,873*l.*; imports (1943), 30,026*l.*; exports, 37,146*l.* Savings bank (1943), 253 depositors; deposits, 7,561*l.* Shipping (1943) amounted to 22,927 tons.

*Acting Commissioner.*—His Hon. W. S. G. Barnes.

### TRINIDAD.

Trinidad, which lies immediately north of the mouth of the Orinoco, and includes Tobago administratively, was discovered by Columbus in 1498 and colonised by the Spaniards in the 16th century. About the period of the Revolution a large number of French families settled in the island, where the French element is still preponderant. In 1797, Great Britain being at war with Spain, Trinidad was occupied by the British, and ceded to Great Britain by the Treaty of Amiens in 1802.

The climate is tropical, with an average rainfall of 1 to 3 ins. per month in the dry season (January to May) and 7 to 10 ins. per month in the rainy season (June to December).

*Governor.*—Captain Sir Bede Edmund Clifford, G.C.M.G., C.B., M.V.O. (appointed March 25, 1942; salary 26,400 dollars; allowance in lieu of exemption from customs duty, 960 dollars).

There is an Executive Council consisting of the Governor, as President, the Colonial Secretary, Attorney-General and Financial Secretary and such other persons, not being *ex-officio* members, as may from time to time be appointed; there is also a Legislative Council with the Governor as President, composed of the Colonial Secretary, the Attorney-General and the Financial Secretary, *ex-officio*, 6 nominated unofficial and 9 elected members. Women over thirty years of age have the franchise.

Area: Trinidad, 1,864 square miles; Tobago 116. Population: census 1931, 412,783 (206,619 males and 206,164 females) (Trinidad, 387,425, Tobago, 25,358). Estimated population, end of 1943, 535,499. Capital, Trinidad, Port of Spain, 103,155. The white population is chiefly composed of English, French, Spanish and Portuguese. The large majority of the inhabitants are natives of the West Indies, of African descent, the balance being made up of East Indians, estimated at 180,509, and a small number of Chinese. English is spoken generally throughout the Colony. Births, 1943, 20,210; deaths, 8,689; marriages, 4,190.

*Education.*—At the close of 1943 there were 291 primary and intermediate schools in the Colony, 46 being Government and 245 assisted schools. There were 257 schools in Trinidad and 34 in Tobago. Of the 245 assisted schools, 94 were Roman Catholic, 60 Church of England, 67 Canadian Presbyterian Mission, 11 Methodist, 11 Moravian, 1 Baptist and 1 African Methodist Episcopal. There were 2 Government and 5 assisted intermediate schools. The following colleges afford facilities for the higher education of boys: Queen's Royal College (428 pupils in 1943) and its affiliated institutions, St. Mary's College in Port-of-Spain (386 pupils),

and Naparima College (424 pupils), and St. Benedict's College in San Fernando (207 pupils). St. Joseph's Convent (479 pupils) and Bishop's High School in Port-of-Spain (351 pupils) and Naparima Girls' High School (388 pupils), and St. Joseph's Convent High School in San Fernando (205 pupils), which are also affiliated to Queen's Royal College, provide similar education for girls. The Bishop's High School in Tobago (149 pupils) provides education for both boys and girls. The affiliated institutions work under the same curriculum as Queen's Royal College, and receive a Government grant-in-aid.

Financial and commercial statistics for 5 years:—

|                           | 1939       | 1940       | 1941       | 1942       | 1943       |
|---------------------------|------------|------------|------------|------------|------------|
|                           | Dollars    | Dollars    | Dollars    | Dollars    | Dollars    |
| Revenue                   | 15,421,444 | 15,516,257 | 18,929,896 | 22,414,908 | 29,165,680 |

| Exports                   | 37,359,476 | 46,192,077 | 47,295,874 | 47,129,138 | 42,030,774 |
| Transshipments            | 7,039,524  | 5,823,902  | 5,253,821  | 4,989,408  | 10,285,206 |
| Ships' stores and bunkers | 9,018,531  | 21,827,349 | 31,010,020 | 36,289,189 | 38,787,891 |

Besides Customs and Excise, the principal items of revenue during 1943 were: Licences, etc. 2,321,901 dollars; fees and payments for specific services, 639,935 dollars; tax on incomes, 6,850,065 dollars; reimbursements, 733,625 dollars; post office, 710,730 dollars; forests, lands and mines, 1,595,440 dollars; emergency taxation, 2,791,938 dollars.

Imports during 1943 were: food, drink and tobacco, 21,096,801 dollars (flour, wheat, 3,308,758 dollars; milk, condensed or otherwise preserved, 2,626,777 dollars; meat and meat products, 1,839,149 dollars; animals, living, for food, 1,784,862 dollars; rice, 1,470,943 dollars; raw materials and articles mainly unmanufactured, 6,589,804 (coal, 3,809,495 dollars; wood and timber, 1,468,307 dollars); articles wholly or mainly manufactured, 32,033,713 dollars (iron and steel and manufactures thereof, 3,875,243 dollars; cotton piece goods, 2,932,399 dollars; machinery, 2,185,572 dollars; apparel, 1,853,260 dollars; boots and shoes, 1,882,903 dollars); animals not for food, 68,461 dollars.

The principal domestic exports, exclusive of petroleum products, during 1943 were: sugar, 3,562,772 dollars; cocoa, 971,212 dollars; asphalt and asphalt cement, 728,600 dollars; rum and bitters, 683,136 dollars; lime oil, 276,426 dollars; tonca beans, 224,862 dollars.

The chief countries of origin of imports were: U.S.A. (33 per cent.), Canada (31 per cent.) and Great Britain and Northern Ireland (14 per cent.). Exports were shipped chiefly to Great Britain and Northern Ireland (34 per cent.), U.S.A. (23 per cent.) and British West Indies (7 per cent.).

Of the total area of 1,267,352 acres (Trinidad, 1,192,960 acres, and Tobago, 74,392 acres), about 643,831 acres have been alienated. About 389,000 acres are under cultivation (1943). Sugar production in 1943 amounted to 70,920 tons. Petroleum and asphalt are also produced.

There are 1,067 miles of main and 770 miles of local roads. Government railway: 123 miles of 4 ft. 8½ in. gauge: 119 miles of telegraph and 24,860 miles of telephone. Cable: Communication by cable with the United Kingdom, Europe, North America, and other parts of the world is maintained by the Cable and Wireless (West Indies), Ltd.

Three wireless stations are maintained by the Trinidad Government.

Number of post offices, 132; of telegraph offices, 44. There are four

private banks. British currency is legal tender. There is no Colonial coinage, but Government 1, 2, 5, 10 and 20-dollar notes are issued. Government savings-banks are established in 43 districts, with a Head Office in Port-of-Spain, the amount of deposits at the end of 1943 being 6,392,122 dollars and the total number of depositors 70,627.

Under the published United States Bases Agreement concluded between the Governments of the United Kingdom and the United States of America on March 27, 1941, and the concomitant Trinidad-United States Bases Lease of April 22, 1941, defence bases have been leased to the United States Government for a period of 99 years. Construction of United States Defence bases in the areas concerned has proceeded in accordance with the Agreement, under which all rights, power and authority within the leased areas necessary for the establishment, use, operation and defence of the bases, is granted to the United States Government for the above-mentioned period of 99 years, on the basis of mutual adjustment and reconciliation between the jurisdiction of the United States Government and the jurisdiction of the Colonial Government in a spirit of good neighbourliness.

TOBAGO is situated about 21 miles north-east of Trinidad, and has an area of 116 square miles.

The total value of the exports in 1943 was 738,559 dollars, of which cocoa amounted to 209,542 dollars, live-stock and poultry to 87,779 dollars, copra to 111,982 dollars and fresh vegetables to 165,561 dollars.

Virgin Islands. See LEeward ISLANDS.

### WINDWARD ISLANDS.

Consist of Grenada, St. Vincent, the Grenadines (half under St. Vincent, half under Grenada), St. Lucia and Dominica, and form the eastern barrier to the Caribbean Sea between Martinique and Trinidad.

*Governor and Commander-in-Chief.*—Sir Arthur Francis Grimble, K.C.M.G. (appointed November 19, 1941; salary, 2,100*l.*; 400*l.* duty allowance and 500*l.* travelling allowance; resident at St. George's, Grenada).

Each island has its own institutions; there is no common legislature, laws, revenue, or tariff; but colonies unite for certain other common purposes (West Indian Court of Appeal). The legal currency is British sterling and Trinidad Government currency notes. Barclays Bank and the Royal Bank of Canada issue 5-dollar notes.

**GRENADEA.**—*Colonial Secretary*, C. H. V. Talbot, who, in the absence of the Governor from the Colony, becomes Administrator of Grenada. There is a Legislative Council, consisting of the Governor, with 3 other official and 4 unofficial members nominated by the Crown and 7 elected members. Each district has a semi-elective Board for local affairs. Area 133 square miles; population, census 1921, 66,302. Births, 1939, 2,606; deaths, 1,141. Estimated population, December 31, 1939, 90,085. There were (1939) 11 Government and 42 Government-aided elementary schools, with 16,086 pupils and average attendance 10,665 (Government grant (1939) 14,571*l.*), and 1 secondary school for boys; grants of 525*l.* per year are made for secondary education to the two girls' schools, and 50*l.* to a girls' model school. In 1939 there were 1,689 convictions.

In 1939 the revenue was 158,307*l.*; the expenditure, 173,685*l.* Public debt, 1939, 857,837*l.*; the reserves and surplus funds amount to 70,188*l.*

Total value of imports, 1939, 283,088*l.*; of exports, 310,837*l.* Chief exports, 1939: cocoa (71,846 cwt.), 106,877*l.*; nutmegs (38,319 cwt.), 73,933*l.*; (mace 6,876 cwt.), 49,467*l.*; cotton, raw (2,003 cwt.), 3,677*l.*; lime oil (6,600 lbs.), 4,332*l.*; bananas (108,493 bunches), 10,641*l.* Value of imports, 1939: United Kingdom, 117,340*l.*; United States of America, 31,289*l.*; Canada, 48,777*l.* Value of exports to United Kingdom, 112,465*l.*; to United States of America, 79,530*l.*; Canada, 43,772*l.* Total shipping entered, 1939, 804,776 tons, nearly all British.

There were (1938) about 67,000 acres under cultivation. Sugar sufficient to meet local needs is produced by a modern factory erected in 1935; rum is produced locally, 42,931 proof gallons in 1939.

In 1939, 3,642 depositors in savings banks; balance (December 31) 46,939*l.* There are 6,584 miles of telephone line including trunk line and connexions, but no inland telegraph service. There is a wireless station in St. George's which communicates with Barbados, but it is not being operated at the present time. Telegraphic communication with the outside world is maintained by the cables of Cable and Wireless (West Indies) Ltd.

The largest of the *Grenadines* attached to Grenada is Carriacou; area, 6,913 acres; population, census 1921, 7,104. A government wireless station communicating with Grenada has been installed.

**ST. VINCENT.** *Administrator.*—R. H. Garvey (December 23, 1943). The Legislative Council consists of the Governor, three ex-officio members, three nominated members, and five elected members. Area, 150.3 square miles; population, census of April 26 1931, 47,961 (white, 2,173; negroes, 33,257; coloured, 11,292; other, 1,239). Capital, Kingstown, population, 4,269 (1931 census). Births, 1942, 2,174; deaths, 1,068; marriages, 240. Education, 1942: 36 primary schools; scholars, 10,911, average attendance, 6,826; Government grant, 10,485*l.* There is also a secondary school for boys (100 pupils) and one for girls (98 pupils). Strength of police force, 1942, 69 (including 2 officers). 19 convictions in the Supreme Court, and 2,955 in the Inferior Courts during 1941.

Revenue, 1943, 185,200*l.* (22,780*l.* from Colonial Development and Welfare and Relief Schemes), of which 68,563*l.* was from Customs; expenditure, 159,855*l.* (18,823*l.* expended on Colonial Development and Welfare and Relief Schemes). Public debt at end of 1943, 85,805*l.* Imports, 1942, 197,168*l.*; exports, 229,630*l.* Value of imports from United Kingdom, 48,811*l.*; of exports to United Kingdom, 89,158*l.* Total shipping (1942), 199,365 tons.

Arrowroot, cotton, copra, sugar, molasses, rum, cocoa, peanuts, cassava, fruit, vegetables and spices are produced. The Sea Island cotton grown is the best in the British Empire, if not the world. Sea Island cotton, export (1942) 547,562 lb., valued at 57,116*l.* St. Vincent in addition is famed for the excellence of its arrowroot (exports, 1942, 7,868,304 lb., valued at 109,271*l.*). Much of the cultivated land is in a few hands, but a peasant proprietary has been established under Government auspices, and many small holdings in the high mountain lands have been sold and let by the Crown. About 20,000 acres (one-fourth of area) under cultivation. Besides the postal service, there is a telephone system with 500 miles of line with 303 subscribers. Kingstown and its environs are lighted by electricity by a modern Diesel plant of 265 kilowatts capacity generating at 230-400 volts A.C. three phase 50 cycles.

**ST. LUCIA.** *Administrator.*—Edward Francis Twining (February 10, 1944), with a nominated Executive and a partly nominated and partly elected Legislative Council. Area, 233 square miles; population, 1942, 73,770.

## Finance and Commerce.—Statistics for 5 years:—

|                      | 1939-40     | 1940-41     | 1941-42     | 1942-43     | 1943-44     |

<sup>1</sup> Includes Customs Revenue.<sup>2</sup> Calendar years 1939 to 1942

For 1944-45 the estimated revenue is 5,490,537 $\frac{1}{2}$ ., and expenditure, 6,319,116 $\frac{1}{2}$ .

Principal imports in 1943: Flour, 650,748 $\frac{1}{2}$ .; cotton goods, 1,143,561 $\frac{1}{2}$ .; fish, 506,464 $\frac{1}{2}$ .; boots and shoes, 293,830 $\frac{1}{2}$ .; artificial silk piece goods, 281,199 $\frac{1}{2}$ .; paper (all kinds), 292,883 $\frac{1}{2}$ .; lumber (dressed and undressed), 89,750 $\frac{1}{2}$ .; coal, 48,966 $\frac{1}{2}$ .; medicines and drugs, 158,563 $\frac{1}{2}$ .; glass and glassware, 106,085 $\frac{1}{2}$ .; milk, condensed, 128,267 $\frac{1}{2}$ .; gasoline, 64,481 $\frac{1}{2}$ ., and hardware, 128,704 $\frac{1}{2}$ . Principal exports in 1943: Sugar, 1,831,614 $\frac{1}{2}$ .; rum, 462,871 $\frac{1}{2}$ .; citrus pulp, 286,487 $\frac{1}{2}$ .; bananas, 47,278 $\frac{1}{2}$ .; pimento, 236,500 $\frac{1}{2}$ .; coffee, 118,081 $\frac{1}{2}$ .; ginger, 124,885 $\frac{1}{2}$ .; cocoa, 109,382 $\frac{1}{2}$ .; and coconuts, 177,907 $\frac{1}{2}$ .

In 1943 the imports from the United Kingdom were valued at 2,566,802 $\frac{1}{2}$ ., and from United States of America, 1,388,169 $\frac{1}{2}$ .; the exports to the United Kingdom, 788,688 $\frac{1}{2}$ ., and to the United States of America, 872,511 $\frac{1}{2}$ .

Registered shipping of Kingston, 1943: 17 sailing vessels of 1,434 tons, 5 steam of 14,894 tons, and 8 motor of 8,809 tons. Shipping, 1943: entered, 352 vessels of 257,053 tons; cleared, 840 vessels of 257,276 tons.

**Production.**—Acres under cultivation and care, 1933-34, 204,795; sugar-cane, 40,091; coffee, 6,265; bananas, 72,909; coconuts, 40,074; cocoa, 984; ground provisions, 17,774; mixed cultivation, 23,122; guinea grass, 132,731; commons and pimento, 4,187; corn and pasture, 463,988. Sugar production, 1942-43, 185,549 short tons. Live-stock, 1940-41: Cattle, 128,270; sheep, 10,890; horses, mules and asses, 24,312.

**Communications.**—Jamaica has 212 $\frac{1}{2}$  miles of railway open of 4 ft. 8 $\frac{1}{2}$  in. gauge; receipts, in year ended March 31, 1943-44, 511,621 $\frac{1}{2}$ .; expenses (excluding debt charges), 1943-44, 730,598 $\frac{1}{2}$ .; 2,525 miles of main roads; 2,581 miles of telegraph, including railway telegraph lines; 2,819 miles of telephone line (military lines not included); 26 $\frac{1}{2}$  miles of electric and 60 of steam tramways; 51 miles mule tramways; 6,336 feet rope-ways. Telegraph messages (1943-44), 644,348; telephone toll calls, 179,263; receipts, 41,018 $\frac{1}{2}$ . Letters and post-cards in 1943-44, inland service, 13,883,070; international service, 8,453,280. Total receipts, 1943-44, 210,420 $\frac{1}{2}$ .; expenditure, 258,533 $\frac{1}{2}$ ., including telegraph and telephone (Government) expenditure. There are 308 post offices and 8 postal agencies.

**Money and Credit.**—On March 31, 1944, there were 237,942 depositors in the Government Savings Bank, the balance at credit amounting to

1,858,026 $\frac{1}{2}$ . The legal coinage is that of Great Britain. Notes of Barclays Bank (formerly the Colonial Bank), the Bank of Nova Scotia, the Royal Bank of Canada, and the Canadian Bank of Commerce are current; their circulation on March 31, 1944, was 66,971 $\frac{1}{2}$ ., 69,078 $\frac{1}{2}$ ., 23,206 $\frac{1}{2}$ ., and 16,638 $\frac{1}{2}$ ., respectively. Government of Jamaica currency notes are legal tender. The total circulation on March 31, 1944, was 1,926,999 $\frac{1}{2}$ .

**CAYMAN ISLANDS**, a Dependency of Jamaica, consist of Grand Cayman, Little Cayman, and Cayman Brac. Situated in the Caribbean Sea, about 200 miles N.W. of Jamaica, the islands were discovered by Columbus on May 10, 1508; area 204 square miles. Census population of 1943, 6,670. Grand Cayman (population 5,311), 23 miles long, 4 to 8 broad; capital: Georgetown, population 1,462. Little Cayman, 10 miles long, 3 miles broad; population, 62. Cayman Brac, 12 miles long and 1 $\frac{1}{2}$  miles wide; population, 1,296; principal industries, turtle fishing, shark fishing, ship-building, rope making. In 1942 there were 18 Government primary schools with 840 pupils enrolled and 682 average attendance, and 7 small private schools. Revenue, 1942-43, 18,925 $\frac{1}{2}$ .; expenditure, 12,708 $\frac{1}{2}$ . Public debt at December 31, 1943, 8,310 $\frac{1}{2}$ .; Reserve Fund, 11,150 $\frac{1}{2}$ . Exports—Grand Cayman: green turtles, shark skins, thatch rope, hides, turtle shell, log-wood, cattle and ponies; Little Cayman and Cayman Brac: turtle shell. Total value of imports, 1943, 55,078 $\frac{1}{2}$ .; exports, 9,762 $\frac{1}{2}$ . Shipping registered at Georgetown, 1,729 net tons (1943). The government is administered by a Commissioner; Justices of the Peace (31) are appointed by the Governor of Jamaica.

Commissioner: J. P. Jones, O.B.E.

The MORANT CAYS and PEDRO CAYS (Guano Islands) are also attached to Jamaica.

**TURKS AND CAICOS ISLANDS**, a Dependency under the government of Jamaica, are geographically a portion of the Bahamas, of which they form the two south-eastern groups. The government is administered by a Commissioner, assisted by a Legislative Board of five members, all of whom are appointed by the Crown. The Governor of Jamaica has a supervising power over the local government. There are upwards of thirty small cays; area 165 $\frac{1}{2}$  miles. Only eight are inhabited; the largest, Grand Caicos, is 25 miles long by 12 broad. The seat of government is at Grand Turk, 7 miles long by 2 broad; about 1,570 inhabitants. Population (1921 census), 5,612, of whom 160 were white; estimated population at end of 1940, 5,300. Births (1940), 226; deaths, 109; marriages, 58.

Education is compulsory and free in the Government schools; 11 Government and 3 private elementary schools; average number on rolls in 1940, 973; average attendance, 706. The secondary school had an average attendance of 15 $\frac{1}{2}$ .

Revenue in 1940, 14,491 $\frac{1}{2}$ ., of which 5,127 $\frac{1}{2}$  was from customs, and 2,865 $\frac{1}{2}$  from royalty on salt; expenditure, 13,991 $\frac{1}{2}$ . Public debt, nil.

Total imports (1940), 30,183 $\frac{1}{2}$ .; total exports, 38,213 $\frac{1}{2}$ . Principal imports: Flour, 2,206 $\frac{1}{2}$ .; cotton goods, 2,346 $\frac{1}{2}$ . Principal exports: Salt, 85,663 $\frac{1}{2}$ . Imports from United Kingdom, 1,770 $\frac{1}{2}$ .

The total shipping entered in 1940 amounted to 62,137 tons.

The most important industry is salt raking. Sponge, fibre and lobster-canning industries are also carried on. The cable station is at Grand Turk. Savings bank deposits (1940), 11,206 $\frac{1}{2}$ ., depositors, 1,012.

The current coins are British gold, silver and copper.

Commissioner.—E. P. Arrowsmith.

*Governor of Fiji and High Commissioner for the Western Pacific.*—Alexander William George Herder *Grantham*, C.M.G. (appointed September 19, 1944) Salary 2,500*l.*, a duty allowance of 750*l.* as Governor of Fiji, 1,100*l.* and a duty allowance of 800*l.* as High Commissioner for the Western Pacific, and an allowance of 150*l.* as Consul General.

*Colonial Secretary, Fiji.*—John Fearn Nicoll (appointed January 23, 1944).

The Constitution is regulated by Letters Patent of April 2, 1937. The Executive Council consists of the Governor, the Colonial Secretary, the Attorney-General, the Financial Secretary and Treasurer, the Secretary for Indian Affairs, the Adviser on Native Affairs, and two unofficial members nominated by the Governor.

The Legislative Council consists of the Governor and sixteen official members, five European members (three elected and two nominated), five Fijian members (selected by the Governor from a panel submitted by the Great Council of Chiefs), and five Indian members (three elected and two nominated).

The Fijians have always retained a large share of self-government. The Colony is divided up into administrative units called *tikina*, each controlled by a Native Chief or *Buli*, who is assisted by a council which meets monthly. *Tikina* (districts) vary in size and in the main correspond to the areas which before cession owed direct allegiance to one chief and whose inhabitants are usually connected by ties of blood. Several *tikina* are grouped together to form a *yasana* (province) which is governed by a High Chief or *Roko*, assisted by a Provincial Council which meets yearly. There are 19 *yasana* and 184 *tikina*. Both District and Provincial Councils are empowered to pass by-laws regarding the welfare and good government of the Fijians, which may have the force of law when sanctioned by the Governor. A Native Regulation Board, which meets in Suva, makes regulations affecting all Fijians. Such regulations require the sanction of the Legislative Council. Two grades of Native Court administer these regulations and by-laws the lower or District Court, consisting of one Native Magistrate, and the higher or Provincial Court, consisting of one Native Magistrate and one Administrative Officer. Each province has its own Treasury, and the Provincial Council imposes its own rates, which vary from 1*l.* 6*s.* to 2*l.* 10*s.* per annum for every male adult. Fijians pay no other direct taxation. In some cases, a province has no *Roko* and his functions are in part performed by the Administrative Officer. Administrative Officers in any case exercise general supervision over all native local authorities. The Great Council of Chiefs, consisting of *Rokos*, High Chiefs and representatives from each province, meets every two years under the Governor's presidency, and advises Government generally on Fijian affairs.

Recent legislation has been passed, though is not yet in effect, which is designed to give not only more complete financial control to the various provinces—up to now the Colonial Government has imposed a tax on the provinces and provided the salaries of many of the native officials—but also to place greater responsibilities in the hands of the Fijians. The directing body is to be the newly constituted Fijian Affairs Board, which will retain the legislative powers of the present Native Regulations Board, and will also have administrative powers in this respect, functioning as a committee of the Great Council of Chiefs. The direct authority of Administrative Officers will devolve in increasing measure on *Rokos*, more of whom are to be appointed.

The Fijian Military Forces, little bigger than an auxiliary Police Force in peace time, have been vastly expanded and many units have seen action in the Solomon Islands, where they have made a name for themselves as adepts at jungle warfare. In addition to infantry, Fijians have manned coastal defence batteries, and have provided labour battalions and a small naval force.

There is a police force consisting of Fijians and Indians, with European and some Indian and Fijian officers. The Fiji military forces consists of Europeans, Euro-Asians, Fijians and Indians. Strength of police force in 1944, 382.

### Area and Population.

Fiji comprises a group of about 250 islands (about 80 inhabited) lying between 15° and 22° south latitude and 177° east and 178° west longitude. The largest is Viti Levu, area 4,053 square miles; next is Vanua Levu, area 2,130 square miles. The island of Rotuma, between 12° and 15° of south latitude, and 175° and 180° east longitude was added to the colony in 1880. Total area, including Rotuma, 7,083 square miles.

At the date of the census, April 26, 1936, the total population was 198,379.

At December 31, 1943, the population of the Colony, including Rotuma, was estimated at 240,641; Europeans, 5,245 (3,242 males, 2,003 females); Fijians, 111,346 (56,637 males, 54,709 females); Indians, 109,498 (60,314 males, 49,174 females); Chinese, 2,851 (1,868 males, 483 females); persons of mixed European and native descent, 5,605 (2,865 males, 2,740 females); Rotumans, 3,320 (1,685 males, 1,635 females); Polynesians, Melanesians and Micronesians, 1,847 (1,127 males, 720 females); others, 1,439 (741 males, 698 females).

Suva, the capital, is on the south coast of Viti Levu; the European population (census of April 26, 1936), 1,509, suburbs, 354, total, 1,863. Total population of Suva (1936), 8,394; suburbs, 7,128; total, 15,522.

### Religion and Instruction.

Attending at Methodist churches in 1943, 93,577; Roman Catholic Mission, 20,005. The Methodist Church in Fiji comprises European ministers, 12; Fijian ministers, 132; Indian minister, 1; lay missionaries, 3; European mission sisters, 20; European members, 71; Fijian and Rotuman members, 47,260; Indian members, 448; Fijian Catechists, 459; Indian Catechists, 4; lay preachers, 4,377; class leaders, 5,869; churches and other preaching places, 1,103. Attending at Seventh Day Adventist Churches in 1943, 2,230 and 47 Europeans; Seventh Day Adventist Churches, 54. The Catholic Mission has 33 European priests, 1 Indian priest, 4 Fijian priests, 21 European teaching brothers, 104 European sisters, 75 churches and chapels, 5 native training institutions, 217 Catechists, 26 native brothers, and 81 native sisters; total Catholic members, 20,005.

In 1944 there were 384 schools, of which 23 were controlled by Government, 266 aided from Government funds and 95 unassisted. The total enrolment was 30,396, of whom 1,339 were Europeans, 20,547 Fijians (including Rotumans and Melanesians), and 8,508 Indians and other Asiatics. Expenditure by the Education Department from Colonial Revenue amounted to £F56,754, of which £F5,594 was expended on European, £F27,149 on Fijian, and £F23,011 on Indian education.

Chief town, Castries. Births, 1942, 2,847; deaths, 1,842; marriages, 482. Education (December 31, 1942): 45 schools (39 Roman Catholic, 8 Anglican, 2 Methodist), with 11,184 pupils on roll; Government grant, 1942, 8,060. Primary education is free and compulsory. Secondary education is carried on in 2 other schools which are in receipt of a Government grant of 625. per annum. There is also an intermediate school, which is run mainly as a private institution.

Revenue in 1942 (including Parliamentary Grants 121. and Subscription to War Funds, 650.) was 175,677. of which 86,505. was from Customs. Expenditure, 185,623. including 121. from Parliamentary Grants, 8,550. from Subscription to War Funds and 7,624. from Development and Welfare Schemes. Public debt, 1942, 101,916. Value of imports (1942), 379,987. (coal, 45,158.); of exports, 1942, 168,809. including 57,751. for bunker coal, 7,778. for cocoa, 280. for bananas and 56,292. for sugar. Value of imports from United Kingdom, 145,508.; foreign countries, 65,088.; other British countries, 169,891. Total shipping, 812,441 tons, of which 361,633 tons were British.

Sugar, cocoa, lime juice, molasses and syrup, lime oil, bay oil, bay rum, honey, hides, rum, coconuts, copra, bananas and fruits are the chief products. Savings bank (end of 1942), 1,392 depositors, 39,917. deposits. Letters and post-cards despatched in 1942, 85,609; parcels, 894. There are 550 miles of telephone line, of which 116 miles are trunk lines and 434 branch lines. The island has 338 miles of main and secondary roads.

Currency: British gold, British silver and copper coins, notes of Barclays Bank (D.C. & O.), and currency notes of the Government of Trinidad and Tobago of one, two, five, ten and twenty dollar denominations.

Port Castries is an important coaling station.

In November, 1940, a site at Gros Islet Bay was leased to the United States as a naval air base, and a United States military base and army aerodrome base is being established at Vieux Fort.

DOMINICA.—After being governed by a nominated Council of 12 members since 1898, Dominica in 1925 reverted to the elective system. A new Constitution, providing for an unofficial majority in the Legislative Council with certain reserve powers vested in the Governor of the Leeward Islands Colony, was introduced under the Constitution Ordinance, No. 8, of 1936. On January, 1, 1940, the island was transferred to the Windward Islands group, and has since then been governed as a separate colony. Chief town, Roseau (population, 9,000); estimated population of island, 1943, 58,899. Revenue, 1943, 149,259. (including 15,000. Imperial Grant and 27,912. from Colonial Development Fund); expenditure, 127,075. (including 20,289. from Colonial Development Fund); funded public debt, 6,000. Imports, 1943, 244,428. (from U.K., 42,374.; Canada, 79,851.; U.S.A., 62,332.); exports, 1943, 144,458. (to U.K., 10,373.; to Canada, 8,245.; to U.S.A., 76,169.). Chief products: Limes, lime juice, bananas, bay oil, lime oils, oranges, cocoa, coconuts, copra, vanilla, fruit and rum. Exports of coconuts, 1943, 359,046; bananas, 4,223 bunches. Savings bank (1943), 782 depositors, with 86,594. deposits. Telephone lines, 585 miles. Dominica contains a Carib settlement with a population of about 400, the majority being of mixed Negro blood, but about 100 apparently pure Caribs.

Administrator.—His Honour J. S. Neill, C.M.G. (appointed 1937).

## AUSTRALASIA AND OCEANIA.

The British Territories in Australasia comprise the Commonwealth of Australia; the Australian Dependencies of Papua and Norfolk Island, Ashmore and Cartier Islands, Australian Antarctic Territory, the Dominion of New Zealand and adjacent islands, and the Crown Colony of Fiji. The British possessions in Oceania include the Solomon and Tonga Islands, and many other groups of islands and islets scattered over the Pacific. There are also the mandatory territories of New Guinea, Western Samoa, and Nauru.

### FIJI.

#### Constitution and Government.

The Fiji Islands were discovered by Tasman in 1643 and visited by Captain Cook in 1769. The sovereignty was ceded to Great Britain on October 10, 1874.

Commission at Suva, Fiji, are met from the funds of the Gilbert and Ellice Islands Colony and the British Solomon Islands Protectorate, but a contribution is paid from Imperial funds in respect of work in connection with Tonga and the New Hebrides.

The Chief Justice of Fiji, and every other Judge for the time being of the Supreme Court of Fiji, is by virtue of his office a Judicial Commissioner.

Deputy Commissioners are appointed by the High Commissioner on behalf of His Majesty.

The High Commissioner's Court consists of the High Commissioner, the Judicial Commissioners, and the Deputy Commissioners, and in it is vested all His Majesty's civil and criminal jurisdiction exercisable in the Western Pacific Islands.

The Court of a Judicial Commissioner has powers similar to those of the Superior Courts of England, and the Deputy Commissioners have civil jurisdiction in Common Law, Equity and Bankruptcy, with a limited jurisdiction in Probate, and have a criminal jurisdiction in respect of offences not punishable with seven years' penal servitude or upwards.

With some few exceptions all decisions of the High Commissioner's Court may be appealed against to the Supreme Court of Fiji.

In addition to the other means of preserving order the High Commissioner has certain special powers for the deportation of persons whose proceedings endanger the peace of the Islands.

The principal groups under the High Commissioner are :—(1) The Gilbert and Ellice Islands Colony; (2) The British Solomon Islands Protectorate; (3) Tonga; (4) The New Hebrides, and (5) Pitcairn Island.

#### GILBERT AND ELLICE ISLANDS COLONY.

**Gilbert and Ellice Islands Colony.** The islands in these groups were proclaimed as a Protectorate in 1892 and annexed (at the request of the native Governments) as the Gilbert and Ellice Islands Colony, on November 10, 1915. The Colony includes several groups of islands, all of which, save Ocean Island, are coral atolls. (1) The *Ellice Islands*, between 5° 30' and 11° 20' S. lat., and 176° and 180° E. long. (population December 31, 1940, 4,613, including 2 Europeans). The islands are Funafuti, Nukufetau, Vaitupu, Nui, Niutao, Nanumanga, Nanumea, Nukulaelae and Niulakita; area of group, 14 sq. miles. (2) *Fanning Island*, 3° 50' N., 159° W., area 15 sq. miles (population, December 31, 1942, 255, including 42 Europeans); *Washington Island*, 4° 40' N., 160° 20' W., area 6 sq. miles (population, December 31, 1942, 99, including 1 European); and *Ocean Island* (population, December 31, 1938, 2,744, including 140 Europeans and 684 Asiatics). This is the Colony headquarters. The British flag was raised there in 1901, and the island was formally annexed to the Colony in 1916. It is situated 0° 52' S., 169° 35' E., and is six miles in circumference. The island is exceedingly rich in high-grade phosphate, which is worked by the British Phosphate Commissioners, who purchased the rights of the Pacific Phosphate Company in 1921. (3) *Christmas Island*, situated roughly 2° N. lat., and 157° W. long., discovered by Cook in 1777, annexed by Great Britain in 1888, and included in the Colony in November, 1919, is the largest atoll in the Pacific, being over 100 miles in circumference; its population in 1940 was 11. (4) The *Phoenix Group*, between 3° and 5° S. lat., and 170° and 175° W. long., is comprised of the following islands—Birnie, McKean, Canton, Enderbury, Phoenix, Hull, Sydney and Gardner. Area of group 16 sq. miles. Population estimated at 850, consisting of recent colonists from the Southern

Gilberts (on Hull, Gardner and Sydney Islands). The Phoenix Group was included as part of the Colony by Order in Council of March 18, 1937. Early in March, 1938, the United States also claimed sovereignty over Canton and Enderbury. On August 10, 1938, it was announced that successful negotiations between the two governments had been concluded whereby equal facilities for each country had been agreed to in the field of international aviation and communications. The two countries had agreed to leave in abeyance 'for a protracted period of time' the question of title, concerning themselves only with that of use. (5) The *Gilbert Islands*, on the equator (population, December 31, 1940, 26,180, including 88 Europeans and 30 Asiatics). The group comprises the islands of Little Makin, Butaritari, Marakei, Ahaia, Tarawa, Maiana, Kuria, Aranuka, Abemama, Nonouti, Tabiteuea, Berni, Nukunau, Onotoa, Tamau and Arorae. Area, 166 sq. miles. The Gilbertese are classed as Micronesians, and speak a language having Polynesian and Melanesian affinities. The Ellice Islanders are Polynesians, speaking a Samoan dialect. Population (census 1931), Europeans, 249; aliens, 959; Micronesians, 28,496; Polynesians, 3,668; total, 33,572. During the year 1940, 1,108 births and 665 deaths were recorded. The Administration maintains two native boys' schools—the King George V School at Tarawa, Gilbert Islands, with 40 pupils, and a school at Vaitupu, Ellice Islands, with 40 pupils. A school for native boys on Ocean Island, with 50 pupils, has been maintained since 1920 out of Banaban phosphate royalties. Village schools for native boys and girls throughout the Gilbert and Ellice Groups are kept up by the London Missionary Society and the Society of the Sacred Heart, assisted by grants in aid from Government. Revenue of the Colony for the year ended June 30, 1943, 51,604L., of which the principal items were: post office, 15,955L.; Imperial grant, 24,938L. The expenditure for the same period amounted to 70,458L., including defence expenditure of 20,863L. The trade in imports in 1938–39 amounted to 178,767L. (provisions, 60,274L.; liquors, 3,779L.; tobacco, 7,089L.; machinery, 16,090L.; coal, 5,001L.; oils (mineral), 13,361L.; cotton piece goods, 6,902L.; building materials, 1,790L.); and in exports to 279,438L. Principal crops: pandanus fruit and coconuts. In each island of the Gilbert and Ellice groups (except Niulakita), and in Hull and Sydney Islands, there is a native government under an appointed native magistrate whose court administers a code of native laws. Currency is Australian. The Colony is administered by the High Commissioner through a Resident Commissioner.

*Resident Commissioner.*—Colonel V. Fox-Strangways.

#### BRITISH SOLOMON ISLANDS PROTECTORATE.

**British Solomon Islands Protectorate** is comprised in the approximate area enclosed by 5° to 12° 30' S., and 155° 30' to 169° 45' E. The Solomon Islands were first discovered in 1568 by Alvaro de Mendaña, on a voyage of discovery from Peru. The Group includes the islands of Guadalcanal, Malaita, San Cristoval, New Georgia, Ysabel, Choiseul, Shortland, Mono (or Treasury), Vella Lavella, Ronongo, Gizo, Rendova, Russell, Florida, Rennell, and numerous small islands, including the Lord Howe Group or Ontong Java, the Santa Cruz Islands, Ticopia and Mitre Islands, and the Duff, or Wilson Group. The four first named were placed under British protection in 1893; the other islands were added to the Protectorate in 1898 and 1899. The land area of the Protectorate is estimated at 12,400 square miles; the larger

| Year | Revenue | Expenditure | Year | Revenue   | Expenditure |
|------|---------|-------------|------|-----------|-------------|
|      | £       | £           |      | £         | £           |
| 1938 | 889,514 | 966,957     | 1941 | 1,124,210 | 1,089,046   |
| 1939 | 930,866 | 1,095,928   | 1942 | 1,272,842 | 1,152,545   |
| 1940 | 988,282 | 947,721     | 1943 | 1,819,591 | 1,510,888   |

The principal sources of revenue in 1943 were:—Customs, 830,082*l.*; wharf and shipping dues, 14,398*l.*; native taxes, 11,089*l.*; licences, excise, etc., 594,078*l.*; war taxation, 70,469*l.*; fees of court, etc., 95,120*l.*; post office, 40,107*l.*; rent of Government property, 17,178*l.*; interest, 39,865*l.*; miscellaneous, 107,641*l.* The expenditure on public works extraordinary was 15,359*l.* The public debt on December 31, 1943, was 1,844,516*l.*

## Production, Industry and Commerce.

The total forest area amounts to 2,366,000 acres, producing both hard woods and soft woods. There are 6 mills with an estimated production of 4,000,000 sup. feet.

There are 5 sugar mills, 1 tea factory, 68 rice mills, 2 butter factories, 100 copra dryers, 2 oil mills, 1 biscuit factory and 11 butcheries. In 1942-43 there were under cultivation by European, Fijian and Indian settlers:—Bananas, 2,000 acres; coconuts, 130,700 acres; sugar-cane, 50,000 acres; rice, 28,000 acres; pineapples, 150 acres. In 1942-43 there were approximately 16,800 horses, asses and mules, 80,000 cattle, 200 sheep, 30,000 goats and 10,000 pigs.

| Year              | Imports                  |                      |           | Exports                |                    |           |
|-------------------|--------------------------|----------------------|-----------|------------------------|--------------------|-----------|
|                   | From British Possessions | From other Countries | Total     | To British Possessions | To other Countries | Total     |
|                   | £                        | £                    | £         | £                      | £                  | £         |
| 1940 <sup>1</sup> | 1,493,902                | 330,591              | 1,824,493 | 1,520,357              | 129,146            | 1,649,503 |
| 1941 <sup>1</sup> | 1,762,795                | 365,769              | 2,128,564 | 1,156,129              | 1,196,139          | 2,352,258 |
| 1942              | 1,910,640                | 324,630              | 2,235,270 | 2,049,251              | 1,058,597          | 3,107,848 |
| 1943              | 2,355,993                | 283,264              | 2,639,257 | 1,014,240              | 804,814            | 1,819,054 |

<sup>1</sup> All import values for 1940, 1941 and 1942 are C.I.F. All previous years are F.O.B.

Imports from the United Kingdom in 1942 were 283,320*l.*: Australia, 946,821*l.*; Canada, 108,738*l.*; India, 162,874*l.*; New Zealand, 274,592*l.*; Japan, 630*l.*; Netherlands East Indies, 27,881*l.*; United States, 257,081*l.*

Exports to the United Kingdom in 1942 were 80*l.*: Australia, 552,208*l.*; Canada, 451,225*l.*; New Zealand, 1,021,883*l.*; Mexico, nil; United States, 939,965*l.*

## Communications.

There is a complete road round Viti Levu, the distance to Lautoka via Ra, Tavua and Ba (King's Road) being 168 miles and the distance to Lautoka via Navua and Sigatoka (Queen's Road) being 152 miles.

There is a private small-gauge railway of 120 miles from Tavua to Sigatoka belonging to the Colonial Sugar Refining Company.

Wireless telegraph stations have been erected at Suva, Levuka, Labasa, Waiyevo (Taveuni), Rotumā, Savusavu and Lautoka. There is direct cable communication with Canada, Australia and New Zealand, and direct wireless communication with Australia.

The Government Savings Bank had, at the end of 1943, deposits amounting to 696,498*l.* The headquarters are at the General Post Office, Suva, and there are twenty-two branches throughout the Colony.

The Bank of New South Wales has three branches and the Bank of New Zealand has one in the Colony. The currency in circulation consists of Fiji Government notes and Fiji coins containing 181·181818 oz. fine silver in each 100*l.* face value. The currency notes in circulation on December 31, 1943, amounted to 1,615,018*l.*, and the Fiji coins 228,758*l.* The securities forming the investment portion of the Note Security Fund amounted to 1,187,760*l.*

Money, weights, and measures are the same as in the United Kingdom. The Fiji pound is linked to sterling by law at the fixed rate of £F111 = 100*l.* sterling.

## PACIFIC ISLANDS.

The Office of High Commissioner in, over, and for the Western Pacific Islands, was created by an Order in Council, cited as the Western Pacific Order in Council, 1877.

*High Commissioner and Consul-General for the Western Pacific (also Governor of Fiji).*—A. W. G. H. Grantham, C.M.G.

The jurisdiction of the High Commissioner extends over all islands in the Western Pacific not being within the limits of the territories administered by His Majesty's Governments in the Commonwealth of Australia, and in New Zealand or the Colony of Fiji, and not being within the jurisdiction of any other civilised Power. In 1893 a new Order in Council was issued, known as the Pacific Order in Council, 1893, in accordance with which the High Commissioner's jurisdiction is extended to foreigners and (in most cases) to natives residing in British settlements or protectorates within the limits of the Order. Under the provisions of the New Hebrides Order in Council, 1922, the jurisdiction of the High Commissioner extends also to the islands in the Pacific Ocean known as the New Hebrides, and all the islands known as the Banks Islands and Torres Islands. The expenses of the High

to £A116,180, and the expenditure to £A99,375. Native produce consists almost entirely of copra and bananas; the export of copra in 1942 amounted to 8,161 tons, valued at £A91,317, 56,301 cases of bananas, valued at £A36,043, were shipped during the year to New Zealand. Total imports, 1942, £A144,110 (including tinned meats, £A38,562; flour, £A19,215; drapery, £A16,413); total exports, £A119,849. Regular steamer communication is maintained with New Zealand, and cargo steamers visit the group from time to time for shipments of copra.

Since 1906 British and Australian coin has been legal tender. By an Act passed in 1935 the exchange standard system was adopted based on Australian currency. There is a Government note issue. The weights and measures are the same as Great Britain. Accounts are kept in pounds, shillings and pence. The kingdom has its own issue of postage stamps.

*Agent and Consul, Tonga.*—C. W. T. Johnson, O.B.E.

#### PITCAIRN ISLAND.

Pitcairn Island (2 sq. m.) is situated in the Pacific Ocean, nearly equidistant from Australia and America (25° 3' S. lat., 130° 8' E. long.). It was discovered by Carteret in 1767, but remained uninhabited until 1790, when it was occupied by the mutineers of H.M.S. *Bounty*, with some women from Otaheite. Nothing was known of their existence until the island was visited in 1808. No regular government was established, but assistance of various kinds was given on the subsequent visits of English vessels. In 1856, the population having become too large for the island's resources, the inhabitants (192 in number) were, at their own request, removed with all their possessions, to Norfolk Island; but 40 of them soon returned. The population (at June 30, 1943) numbers 177 persons. It is a British Colony by settlement, and was brought within the jurisdiction of the High Commissioner for the Western Pacific in 1898 under s. 6 of the Pacific Order in Council, 1893.

The Government is now administered under the High Commissioner, by a Council consisting of a Chief Magistrate, two Assessors, a Secretary and a Chairman of the Internal Committee. These officers are elected annually by the people. Oranges and pineapples are exported, and flour, sugar and other foodstuffs imported.

The islands of Henderson, Ducie and Oeno were annexed in 1902, and are included in the district of Pitcairn.

*Chief Magistrate.*—F. M. Christian.

Starbuck Island, 5° 35' S. lat., 155° 52' W. long.; area 1 sq. m., uninhabited. Malden Island, 4° S. lat., 155° W. long.; area 35 sq. m., containing deposits of guano of doubtful value, uninhabited. Flint Island, 11° 26' S. lat., 151° 48' W. long. Caroline Island, 10° S. lat., 150° 14' W. long., and Vostock Island, 10° 06' S. lat., 152° 23' W. long., are planted with coconut palms.

#### THE DOMINIONS IN THE BRITISH COMMONWEALTH OF NATIONS

The Dominions in the British Commonwealth of Nations are given here in the following order: 1, Canada; 2, Australia; 3, New Zealand; 4, South Africa, and 5, Eire (Ireland).

islands are mountainous and forest-clad. The largest island is Guadalcanal (estimated 2,500 sq. miles) and the most populous is Malaita (estimated 40,000 inhabitants). Rainfall at Tulagi during the year ended March 31, 1942, was 122 inches. Malaria is prevalent. The population at the census of 1931 was: Europeans, 497; Asiatics, 193; natives, 93,415; of the natives, about 4,000 (in Rennel, Ontong Java, Ticopia, etc.) are Polynesians, the remainder Melaneseans. There are no native states and social order is primitive. Education is entirely in the hands of the five missions. Revenue for the year ended March 31, 1942, 41,357*l.* (including Customs revenue, 22,199*l.*); expenditure, 68,995*l.* Coconuts, rubber, sweet potatoes, pine-apples and bananas are grown. The value of exports in 1940-41 was 131,988*l.*, including copra, 12,991 tons, 100,889*l.*; timber, 2,021,745 super ft., 11,807*l.*; gold, 963 fine ozs., 10,150*l.*; trocas shell, 147 tons, 7,157*l.* Australian notes and silver are the medium of exchange. No gold is in circulation. There is a Resident Commissioner, whose headquarters are at Tulagi, a small island off the south coast of Florida. A nominated Advisory Council assists in the administration. (For part of the Solomon Islands formerly owned by Germany and now administered by Australia, see section on NEW GUINEA, p. 480.)

*Resident Commissioner.*—Col. O. C. Noel, O.B.E. (appointed August 31, 1943).

#### NEW HEBRIDES CONDOMINIUM.

The New Hebrides Group lies roughly 500 miles west of Fiji and 250 miles N.E. of New Caledonia. Estimated area 5,700 square miles. The group is under joint administration of English and French officials, as provided for by Anglo-French Convention of February 1906, ratified October 20, 1906, and a Protocol signed at London on August 6, 1914, and ratified on March 18, 1922. The interests of British, French, and natives, respectively, are guaranteed; the conditions of land-holding in the islands fixed; and the regulation of the recruitment of native labour provided for. Within the islands Great Britain and France are represented by High Commissioners, who delegate their powers to Resident Commissioners stationed in the group.

The larger islands of the group are Espiritu Santo, Malekula, Epi, Ambrym, Efate or Sandwich, Erromanga, Tanna and Anietyum. There are three active volcanoes, on Tanna, Ambrym and Lopevi, respectively. Earth tremors are of common occurrence. Rainfall at Vila for the year ended September 30, 1940, was 95.32 inches. The native population of the group is about 40,000. On Malekula, Santo and Pentecost cannibalism is still practised. White population, 1942: British 144, French 710. Foreigners, including Asiatics, who have opted for British regime, 26, and for French regime, 30. There are also 2,098 Tonkinese coolies under indenture to the French. There are numerous Presbyterian and Catholic mission native schools; one French Government school and two Catholic mission schools for whites. Condominium revenue at school and two Catholic mission schools for whites, 1942, 31,048*l.*; expenditure, 20,061*l.*; British service revenue, year ended March 31, 1942, 391*l.*; expenditure, 12,801*l.*

Bananas, sugar cane, oranges and all tropical fruits grow well. Kauri pine is found on Anietyum. There are several British and French trading companies operating in the group. Settlers and speculating companies have acquired large areas of land within the islands, the ownership of which is generally disputed, and which in consequence remains undeveloped pending adjudication by an arbitral tribunal. Imports, 1941: value 88,800*l.* (from U.K., 185*l.*; Australia, 54,190*l.*; Dutch East Indies, 17,805*l.*; U.S.A., 9,700*l.*; China, 1,390*l.*). Exports, 1941: value 107,688*l.*

The trade is mostly with Australia and New Caledonia. Principal imports are: Provisions and food-stuffs, clothing, metal-work and furniture. Principal exports, 1941: Cocoa, 46,846*l.*; copra, 41,014*l.*; coffee, clean, 4,061*l.*; coffee, cherry, 3,644*l.*; cotton, 1,226*l.*; kauri logs, 7,737*l.* Import of arms, ammunition, wines and spirits is prohibited except under special permit. There is frequent communication with New Caledonia and Australia. Malaria is prevalent in the group.

*British High Commissioner.*—Sir Philip Mitchell, K.C.M.G.

*French High Commissioner.*—Mons. Laignel.

*British Resident Commissioner.*—R. D. Blandy, O.B.E.

*French Resident Commissioner.*—R. Kuter.

#### TONGA.

(FRIENDLY ISLANDS.)

The Tonga or Friendly Islands, an independent Polynesian kingdom since 1845, continued up to 1899 to be a neutral region in accordance with the Declaration of Berlin, April 6, 1886. By the Anglo-German Agreement of November 14, 1899, subsequently accepted by the United States, the Tonga Islands were left under the Protectorate of Great Britain. A Protectorate was proclaimed on May 18, 1900, and a British Agent appointed. British and foreign nationals charged with any offence against the laws of Tonga, not including crimes punishable by death or by imprisonment exceeding two years, are subject to the jurisdiction of the Tongan courts. In other respects they are subject to the jurisdiction of the Court of the High Commissioner.

*Queen.*—Her Majesty Salote Tubou, D.B.E., succeeded on the death of her father, George II, on April 12, 1918.

There is a Legislative Assembly which meets annually, composed of seven nobles elected by their peers, seven elected representatives of the people, and the Ministers of the Crown, numbering seven, or twenty-two members including the Speaker. The elections are held triennially.

The kingdom consists of 3 groups of islands, called respectively Tonga-tabu, Haapai (which are low-lying groups of coral formation), and Vavau (which is high and mountainous), together with the outlying islands of Niuafofua, Tafahi, and Niuafo'ou, and lies between 15° and 28° 30' south, and 173° and 177° west, its western boundary being the eastern boundary of Fiji. The main group was discovered by Tasman in 1643. The climate is mild and healthy, malaria being unknown. The temperature during seven months of the year, from May to November, rarely exceeds 84° F. in the shade, and seldom, even in the hottest part of summer, exceeds 90° F. Total area, approximately 250 square miles; capital, Nukualofa on Tonga-tabu; estimated population in 1942, 37,996 Tongans, 300 Europeans, 460 half-castes, 350 Pacific islanders and 55 others; total, 39,191, of whom almost half inhabit Tonga-tabu. The natives are Christian, there being about 21,400 adherents of the Wesleyan Church, 7,060 of the Free Church of Tonga, 4,000 of the Church of Tonga, 1,700 of other Protestant Churches and 5,000 Roman Catholics. The native Tongans enjoy free education, free medical attendance and dental treatment. At the end of 1942 there were 67 Government and 61 denominational primary schools, with an average daily attendance of 5,125 pupils. At Tonga College there were 6 teachers, 1 European and 5 Tongans, and the number of pupils on the roll was 60. The revenue in the year ended June 30, 1943, amounted

## CANADA.

## Constitution and Government.

The territories which now constitute the Dominion of Canada came under British power at various times by settlement, conquest, or cession. Nova Scotia was temporarily occupied in 1628 by settlement at Port Royal, was ceded back to France in 1632, and was finally ceded by France in 1713, by the Treaty of Utrecht; the Hudson's Bay Company's charter, conferring rights over all the territory draining into Hudson Bay, was granted in 1670; Canada, with all its dependencies, including New Brunswick and Prince Edward Island, was formally ceded to Great Britain by France in 1763; Vancouver Island was acknowledged to be British by the Oregon Boundary Treaty of 1846, and British Columbia was established as a separate colony in 1858. As originally constituted, the Dominion was composed of the provinces of Canada—Upper and Lower Canada, now Ontario and Quebec—Nova Scotia, and New Brunswick. They were united under the provisions of an Act of the Imperial Parliament known as 'The British North America Act, 1867,' which came into operation on July 1, 1867, by royal proclamation. The Act provides that the Constitution of the Dominion shall be 'similar in principle to that of the United Kingdom'; that the executive authority shall be vested in the Sovereign of Great Britain and Ireland, and carried on in his name by a Governor-General and Privy Council; and that the legislative power shall be exercised by a Parliament of two Houses, called the 'Senate' and the 'House of Commons.' The present position of Canada in the British Commonwealth of Nations was defined at the Imperial Conference of 1926: 'The self-governing Dominions are autonomous Communities within the British Empire, equal in status, though united by a common allegiance to the Crown.' The Dominion has its own representatives in the United States, Great Britain, Belgium, the Netherlands, and other countries, and was elected a member of the Council of the League of Nations in 1927. Provision was made in the British North America Act for the admission of British Columbia, Prince Edward Island, the North-West Territories, and Newfoundland into the Dominion; Newfoundland alone has not availed itself of such provision. In 1869 Rupert's Land, or the North-West Territories, were purchased from the Hudson's Bay Company; the province of Manitoba was erected from this territory, and admitted into the confederation on July 15, 1870. On July 20, 1871, the province of British Columbia was admitted, and Prince Edward Island on July 1, 1873. The provinces of Alberta and Saskatchewan were formed from the provisional districts of Alberta, Athabasca, Assiniboia, and Saskatchewan, and admitted on September 1, 1905.

The following is a list of Governors-General of Canada:—

|                                   |           |                                        |           |
|-----------------------------------|-----------|----------------------------------------|-----------|
| Viscount Monck . . . . .          | 1867-1869 | Earl Grey . . . . .                    | 1904-1911 |
| Lord Ligonier . . . . .           | 1869-1873 | H.R.H. the Duke of Connaught . . . . . | 1911-1916 |

In February, 1931, the Government of Norway formally recognised the Canadian title to the Sverdrup group of Arctic islands. Canada thus holds sovereignty in the whole Arctic sector north of the Canadian mainland.

On June 30, 1931, the House of Commons approved the enactment of the

proposed Statute of Westminster emancipating the Provinces as well as the Dominion from the operation of the Colonial Laws Validity Act, and thus removing what legal limitations existed as regards Canada's legislative autonomy. The Statute received the Royal Assent on December 12, 1931.

The members of the Senate are nominated for life by summons of the Governor-General under the Great Seal of Canada. By the Amendment of the British North America Act, 1867 (May, 1915), which came into effect in 1917, the Senate consists of 96 senators—namely, 24 from Ontario, 24 from Quebec, 10 from Nova Scotia, 10 from New Brunswick, 4 from Prince Edward Island, 6 from Manitoba, 6 from British Columbia, 6 from Alberta, and 6 from Saskatchewan. The total number may not exceed 104. Each senator must be at least 30 years of age, a born or naturalised British subject, and must reside in, and be possessed of property, real or personal, to the value of 4,000 dollars within the province for which he is appointed. The House of Commons is elected by the people, for five years, unless sooner dissolved. The British North America Act provided that while Canadian Confederation lasts the province of Quebec shall have, in the Canadian Parliament, a fixed representation of 65 seats and all other provinces shall be represented proportionately according to their population, at each decennial census. The nineteenth Parliament, elected on March 26, 1940, comprised 245 members, in accordance with the Representation Act of 1933 which, as the result of the census of 1931, fixed the representation as follows: 82 for Ontario, 65 for Quebec, 12 for Nova Scotia, 10 for New Brunswick, 17 for Manitoba, 16 for British Columbia, 4 for Prince Edward Island, 21 for Saskatchewan, 17 for Alberta, and 1 for the Yukon Territory. Voting is by ballot. Women have the vote and are eligible for election to the Dominion Parliament.

State of the Parties (January, 1941) in the nineteenth Parliament, elected on March 26, 1940: Liberals, 170; Progressive Conservatives, 39; Social Credit Party, 10; Co-operative Commonwealth Federation (Canadian Socialist Party), 11; smaller parties, 15; total, 245.

The Speaker of the Senate and the Speaker of the House of Commons receive salary and allowances of 10,000 dollars per annum. The Deputy Speaker of the House of Commons receives salary and allowances of 5,500 dollars and these three officers receive in addition the sessional indemnity of 4,000 dollars paid to all Senators and members of the House of Commons.

*Governor-General.*—The Earl of Athlone, K.G., G.C.B., G.C.M.G., G.C.V.O. (appointed April 3, 1940; installed June 21, 1940; salary, 10,000l. per annum).

He is assisted in his functions, under the provisions of the Act of 1867 by a Privy Council composed of Cabinet Ministers.

The following is the list of the Cabinet as at November, 1944, in order of precedence, which in Canada attaches generally rather to the person than to the office:—

*Prime Minister, President of the Privy Council, Secretary of State for External Affairs.*—Rt. Hon. William Lyon Mackenzie King, C.M.G.

*Minister of Mines and Resources.*—Hon. Thomas Alexander Crerar.

*Minister of National Defence.*—General McNaughton (appointed November 2, 1944)

*Minister of Veteran Affairs.*—Hon. Ian Alastair Mackenzie, K.C. (appointed October 15, 1944).

*Minister of Finance.*—Hon. James Lorimer *Haley*, K.C.  
*Minister of Transport.*—Hon. Joseph Enoil *Michaud*, K.C.  
*Ministry of Reconstruction.*—Hon. Clarence Decatur *Howe* (appointed October 15, 1944).  
*Minister of Agriculture.*—Hon. James Garfield *Gardiner*.  
*Secretary of State.*—Hon. Norman Alexander *McLarty*, K.C.  
*Minister of Trade and Commerce.*—Hon. James Angus *MacKinnon*.  
*Postmaster-General.*—Hon. William Pate *Mallock*, K.C.  
*Minister of National Revenue.*—Hon. Colin William George *Gibson*, K.C., M.C., V.D.  
*Minister of National Defence for Naval Services.*—Hon. Angus Lewis *MacDonald*, K.C.  
*Minister of Justice and Attorney-General of Canada.*—Hon. Louis Stephen *St. Laurent*, K.C.  
*Minister of Labour.*—Hon. Humphrey *Mitchell*.  
*Minister without Portfolio.*—Hon. James H. *King* (Senator).  
*Minister of Public Works.*—Hon. Alphonse *Fournier*, K.C.  
*Minister of Fisheries.*—Hon. Ernest *Bertrand*, K.C.  
*Minister of National War Services.*—Major-General the Hon. Leo R. *Lafliche*, D.S.O.  
*Minister of National Health and Welfare.*—Hon. Brooke *Claxton* (appointed October 15, 1944).

Each minister with portfolio has a salary of 10,000 dollars a year, and the Prime Minister 15,000 dollars, in addition to the 4,000 dollars sessional allowance. The Leader of the Opposition receives a salary of 10,000 dollars, in addition to the sessional allowance.

*High Commissioner for Canada in the United Kingdom.*—Rt. Hon. Vincent *Massey*, P.C. (appointed November 8, 1935), Canada House, Trafalgar Square, London, S.W.1.

*High Commissioner for the United Kingdom in Canada.*—Rt. Hon. Malcolm *MacDonald*, M.P. (appointed April 2, 1941).

*High Commissioner for Canada in Australia.*—T. C. *Davis* (December 1, 1942).

*High Commissioner for the Commonwealth of Australia in Canada.*—Lt.-Col. W. R. *Hodgson*.

*High Commissioner for Canada in New Zealand.*—Dr. Walter A. *Riddell* (appointed February 1, 1940).

*High Commissioner for New Zealand in Canada.*—Hon. David *Wilson*, (appointed March 30, 1944).

*High Commissioner for Canada in South Africa.*—Charles J. *Burchell*, K.C. (appointed February 15, 1944).

*Acting High Commissioner for South Africa in Canada.*—Robert *Jones*.  
*High Commissioner for Canada in Eire.*—J. D. *Kearney*, K.C. (appointed July 31, 1941).

*High Commissioner for Eire in Canada.*—Hon. J. J. *Hearne* (appointed August 18, 1939).

*High Commissioner for Canada in Newfoundland.*—J. S. *Macdonald* (appointed May 4, 1944).

*Canadian Ambassador in the United States.*—Lester B. *Pearson* (appointed December 17, 1944).  
*United States Ambassador in Canada.*—Ray *Atherton* (appointed August 3, 1943).

*Canadian Ambassador in France.*—Brigadier George P. *Vanier* (appointed January 1, 1944).

*French Ambassador in Canada.*—Jean de *Haute-Cloque* (appointed November 18, 1944).

*Canadian Ambassador in China.*—Major-General Victor W. *Odlum* (appointed December 1, 1942).

*Chinese Ambassador in Canada.*—Liu *Shih Shun* (appointed February 26, 1942).

*Canadian Ambassador in Belgium.*—W. F. A. *Turgeon* (appointed November 19, 1944).

*Belgian Ambassador in Canada.*—Paternotte de la *Vaillée*.  
*Netherlands Minister in Canada.*—Jonkheer J. W. M. *Snouk Hurgronje* (appointed April 18, 1944).

*Canadian Ambassador in Brazil.*—Hon. Jean *Désy* (appointed July 23, 1941).

*Brazilian Ambassador in Canada.*—Cyro de *Freitas-Valle* (appointed April 6, 1944).

*Turkish Minister in Canada.*—Sevki *Athan* (appointed February 1944).

*Argentinian Minister in Canada.*—Dr. Eduardo *Pirot* (appointed August 26, 1943).

*Canadian Minister in Chile.*—Warwick F. *Chipman*, K.C. (appointed November 4, 1944).

*Chilian Minister in Canada.*—Dr. Eduardo *Grove* (appointed September 15, 1942).

*Canadian Ambassador in Mexico.*—Dr. Hugh *Keenleyside* (appointed November 19, 1944).

*Mexican Ambassador in Canada.*—Dr. Francisco del Rio y *Canedo* (appointed May 6, 1944).

*Canadian Ambassador in U.S.S.R.*—L. Dana *Wilgress* (appointed November 4, 1942).

*U.S.S.R. Ambassador in Canada.*—Georgi Nikolayevich *Zaroubin* (appointed March 24, 1944).

*Swedish Minister in Canada.*—Per. *Wijkman* (appointed August 14, 1943).

*Polish Minister in Canada.*—Wacław *Babinski* (appointed August 25, 1944).

*Norwegian Minister in Canada.*—Daniel *Steen* (appointed April 2, 1942).

*Czechoslovak Minister in Canada.*—Dr. Frantisek *Paulasek* (appointed August 14, 1942).

#### PROVINCIAL GOVERNMENT.

The nine provinces have each a separate parliament and administration, with a Lieutenant-Governor appointed by the Governor-General in Council at the head of the executive. They have full powers to regulate their own local affairs and dispose of their revenues, provided only they do not interfere with the action and policy of the central administration. Among the subjects assigned exclusively to the provincial legislatures are: the amendment of the provincial constitution, except as regards the office of the Lieutenant-Governor; property and civil rights; direct taxation for revenue purposes; borrowing; management and sale of crown lands; provincial hospitals, reformatories, etc.; shop, saloon, tavern, auctioneer, and other licences for local or provincial purposes; local works and undertakings, except lines

## Immigrant arrivals in Canada during 4 years:—

| French and Belgians     | 161                                                         | 129   | 67    | 185   |
| Italians                | 95                                                          | 2     | —     | 2     |
| Jews                    | 229                                                         | 132   | 41    | 44    |
| Russians and Finlanders | 12                                                          | 13    | 7     | 5     |
| Other Nationalities     | 498                                                         | 128   | 61    | 62    |
| Total                   | 11,824                                                      | 9,829 | 7,576 | 8,504 |

## Religion.

The number of members of each religious creed was as follows in 1941:—

|                 |           |                                 |            |
|-----------------|-----------|---------------------------------|------------|
| Roman Catholics | 4,800,895 | Greek Catholics                 | 185,657    |
| United Church   | 2,204,875 | Jews                            | 168,367    |
| Anglicans       | 1,751,188 | Greek Orthodox                  | 139,629    |
| Presbyterians   | 829,147   | Others, and religion not stated | 542,152    |
| Baptists        | 488,592   |                                 |            |
| Lutherans       | 401,153   |                                 |            |
|                 |           | Total                           | 11,506,655 |

The numbers of the leading denominations in the provinces, 1941:—

| Province             | Roman Catholic <sup>1</sup> | United Church | Anglican | Presbyterian | Baptist |
|----------------------|-----------------------------|---------------|----------|--------------|---------|
| Prince Edward Island | 42,748                      | 24,065        | 5,739    | 14,724       | 5,443   |
| Nova Scotia          | 188,944                     | 124,301       | 103,393  | 47,415       | 89,272  |
| New Brunswick        | 220,454                     | 63,268        | 55,155   | 15,382       | 88,766  |
| Quebec               | 2,894,621                   | 100,194       | 162,056  | 56,086       | 12,303  |
| Ontario              | 882,369                     | 1,073,425     | 815,413  | 433,708      | 192,915 |
| Manitoba             | 203,259                     | 194,001       | 125,076  | 43,073       | 13,267  |
| Saskatchewan         | 219,734                     | 230,495       | 117,674  | 54,856       | 19,460  |
| Alberta              | 191,343                     | 193,604       | 113,279  | 68,910       | 32,268  |
| British Columbia     | 113,242                     | 200,817       | 245,531  | 94,300       | 29,780  |
| Yukon                | 742                         | 404           | 2,545    | 422          | 75      |
| N. W. Territories    | 5,061                       | 299           | 5,827    | 271          | 43      |

<sup>1</sup> Includes Greek Catholic.

## Education.

By the British North America Act the Provincial Governments have control in educational matters. In all provinces except Quebec the number of private schools is small, so that elementary and secondary education in Canada is almost entirely State-controlled. Primary schools—i.e. element-

ary schools in all provinces, except Quebec, are free, and the same is true of secondary education in most provinces. In Quebec (except in certain municipalities) a fee is collected for primary education for every child of school age without reference to school attendance. In the same province Catholic and Protestant schools are under one Department of Public Instruction and are supported by a common system of taxation, but are administered independently. In Alberta, Ontario and Saskatchewan minority elementary schools, whether Protestant or Catholic, are called Separate Schools, and are under the same provincial administration as majority schools. Secondary education in these three provinces is non-sectarian.

There are 6 State-controlled universities in Canada, and 12 independent of provincial control. These, together with colleges of higher education, had an enrolment of 103,696 students in 1942, of whom 48,067 were of post-matriculation grade.

The following statistics give information respecting the State-controlled schools, exclusive of universities, in all provinces and including all primary schools in Quebec:—

| Provinces        | Year Ended    | Schools | Teachers | Pupils    | Expenditure |
|------------------|---------------|---------|----------|-----------|-------------|
|                  |               |         |          |           | Dollars     |
| Ontario          | June 30, 1942 | 7,503   | 21,824   | 660,199   | 49,305,810  |
| Quebec           | June 30, 1942 | 9,855   | 30,971   | 639,292   | 37,570,261  |
| Nova Scotia      | July 31, 1943 | 1,743   | 4,006    | 114,813   | 5,564,854   |
| New Brunswick    | June 30, 1943 | 2,705   | 2,927    | 81,152    | 4,020,577   |
| Manitoba         | June 30, 1942 | 2,089   | 4,402    | 123,080   | 8,703,648   |
| British Columbia | June 30, 1943 | 1,079   | 4,055    | 115,447   | 10,904,838  |
| P. E. Island     | June 30, 1942 | 478     | 673      | 18,007    | 680,994     |
| Alberta          | June 30, 1943 | 3,277   | 6,490    | 157,506   | 11,545,680  |
| Saskatchewan     | June 30, 1943 | 5,186   | 6,695    | 210,599   | 10,231,698  |
| Total            |               | 33,910  | 82,043   | 2,120,086 | 128,427,295 |

<sup>1</sup> Where possible the number of school-houses is given, and elsewhere the number of school districts with schools in operation.

The aboriginal Indian population numbered 118,316 in 1941; and of these about 110,000 live on the Indian Reserves. The Dominion Government provides a special school system for the Indian youth, of whom 16,876 were enrolled in its schools in 1943.

## Justice and Crime.

There is a Supreme Court in Ottawa, having appellate, civil and criminal jurisdiction in and throughout Canada. There is an exchequer court, which is also a court of admiralty. There is a Superior Court in each province, and county courts, with limited jurisdiction, in most of the provinces; all the judges in these courts being appointed by the Governor-General. Police magistrates and justices of the peace are appointed by the Provincial Governments.

For the year ended September 30, 1942, total convictions for indictable offences were 39,309; total convictions for all offences amounted to 620,673. These figures are for convictions of adults only.

## Social Insurance.

The Canadian Unemployment Insurance Act came into operation on July 1, 1941. At first no person who received more than 2,000 dollars per year was covered, but by an amendment to the Unemployment Insurance Act, which came into effect on September 1, 1943, all employees paid on

a contractual basis of an hourly, daily, weekly or piece rate (including a mileage rate) are now included in insurable employment regardless of the amount of their earnings, together with all other employees who receive 2,400 dollars or less per year.

From July 1, 1941, to March 31, 1943, employers and employees paid 23,870,914 dollars into the Fund and the Dominion added 16,774,183 dollars.

### Finance.

The following relates to the Consolidated Fund, i.e., general revenue and expenditure:—

| Years ended March 31 | Ordinary revenue | Total expenditure |
|----------------------|------------------|-------------------|
|                      | Dollars          | Dollars           |
| 1940-41              | 859,754,928      | 1,349,601,446     |
| 1941-42 <sup>1</sup> | 1,468,824,000    | 1,982,606,000     |
| 1942-43 <sup>1</sup> | 2,182,799,000    | 4,387,194,000     |
| 1943-44 <sup>1</sup> | 2,578,677,000    | 5,360,132,000     |
| 1944-45 <sup>1</sup> | 2,697,000,000    | 5,152,000,000     |

<sup>1</sup> Estimates.

### Consolidated Fund revenue, 1943-44<sup>1</sup>:—

|                                   | Dollars     |                           | Dollars       |
|-----------------------------------|-------------|---------------------------|---------------|
| Customs . . . . .                 | 167,882,000 | War Tax Revenue . . . . . | 2,281,806,000 |
| Excise . . . . .                  | 142,194,000 | Various . . . . .         | 26,642,000    |
| Interest on Investments . . . . . | 52,152,000  |                           |               |
| Post Office . . . . .             | 61,071,000  | Total . . . . .           | 2,781,677,000 |

<sup>1</sup> Estimated.

### Detailed estimates of the expenditure for the year ended March 31, 1945:—

| Department                                          | Dollars     | Department                               | Dollars                  |
|-----------------------------------------------------|-------------|------------------------------------------|--------------------------|
| Agriculture . . . . .                               | 17,623,062  | Public Works . . . . .                   | 18,681,126               |
| Auditor-General's Office . . . . .                  | 865,690     | Royal Canadian Mounted Police . . . . .  | 6,928,336                |
| Chief Electoral Office . . . . .                    | 50,572      | Secretary of State . . . . .             | 888,106                  |
| Civil Service Commission . . . . .                  | 497,823     | Soldier Settlement of Canada . . . . .   | 1,455,290                |
| External Affairs . . . . .                          | 2,126,808   | Trade and Commerce . . . . .             | 2,122,788                |
| Finance . . . . .                                   | 446,487,772 | Transport . . . . .                      | 18,090,066               |
| Fisheries . . . . .                                 | 8,096,850   | Transport-Capital . . . . .              | 5,444,800                |
| Governor-General and Lieutenant-Governors . . . . . | 232,390     | Total Expenditure . . . . .              | 700,877,657              |
| Insurance . . . . .                                 | 192,485     |                                          |                          |
| Justice . . . . .                                   | 5,936,989   | Chargeable to Ordinary Account . . . . . | 686,887,057              |
| Labour . . . . .                                    | 22,068,404  | Chargeable to Capital Account . . . . .  | 5,444,800                |
| Legislation . . . . .                               | 2,635,920   | Chargeable to Special Account . . . . .  | 8,546,800                |
| Mines and Resources . . . . .                       | 11,899,965  |                                          |                          |
| Munitions and Supply . . . . .                      | 4,987,120   | Government Owned Enterprises . . . . .   | 1,491,408                |
| National Defence . . . . .                          | 56,010      | Grand Total Expenditure . . . . .        | 702,369,060 <sup>1</sup> |
| National Revenue . . . . .                          | 19,496,142  |                                          |                          |
| National War Services . . . . .                     | 768,756     |                                          |                          |
| Pensions & National Health . . . . .                | 56,323,771  |                                          |                          |
| Post Office . . . . .                               | 51,983,578  |                                          |                          |
| Prime Minister's Office . . . . .                   | 69,765      |                                          |                          |
| Privy Council Office . . . . .                      | 85,402      |                                          |                          |
| Public Archives . . . . .                           | 127,555     |                                          |                          |
| Public Printing and Stationery . . . . .            | 197,575     |                                          |                          |

<sup>1</sup> Not including War Expenditure of 4,450,000,000 dollars.

On March 31, 1944, the net debt was estimated at 8,842,270,000 dollars.

**Foreign Debt.**—The amount of Greek debt to Canada outstanding is 6,525,000 dollars; the original Rumanian debt has been funded and with interest aggregates 24,329,262 dollars.

### Defence.

The National Defence Act, 1922, which came into force January 1, 1923, provided for a Department of National Defence presided over by the Minister of National Defence.

**Militia.**—Before the war the forces in Canada were organised in 11 military districts, each under a Commander and his District Staff.

The militia of Canada was classified as active and reserve, and the active was sub-divided into permanent and non-permanent forces. The permanent force in peace time consisted of 14 units of all arms of the service, with an authorised establishment limited to 10,000, but the strength in 1939 was about 4,500. The non-permanent active militia was made up of cavalry (horsed and armoured car), artillery, engineers, signals, infantry (rifle, machine-gun and tank), army service corps, medical corps, ordnance corps, postal corps, veterinary corps, and chaplain services.

The reserve of the active militia consisted of (1) reserve of officers (general list), (2) reserve regimental depôts, (3) corps reserve and corps reserve list of officers of the N.P.A.M., (4) the special reserve list of technical officers.

The above organisations were supplemented by numerous cadet corps and rifle associations.

The Royal Military College at Kingston, Ontario, provides both a military and a general education for about 200 cadets. The course extended over four years. Each year there were available for graduates a number of commissions in the Canadian Permanent Force and the Royal Canadian Air Force, also in the British Army and the Royal Air Force. In 1942 the training of cadets was discontinued, and thereafter the college was used exclusively for staff courses, intelligence courses and other officers courses.

At the outbreak of war in September, 1939, the Canadian Army numbered only about 54,500 men, of whom 4,500 were members of the Permanent Force. By October, 1944, the Army had grown to 764,000 men, of whom more than 280,000 were on overseas service. The Overseas Army comprises two corps and ancillary troops. All members of the Canadian Overseas Army are volunteers as also are a large proportion of those on service in Canada and adjacent territories. Under the National Resources Mobilisation Act, men in required age groups are called up for compulsory military service, but men so called up may at any time volunteer for general service. At the end of 1944, over 390,000 had volunteered for overseas service.

975,000 men had entered the fighting services by November, 1944. Of these, the intake into the Canadian Navy had been over 93,000, while its actual strength was 85,000. The Royal Canadian Air Force had enlisted 231,000 men altogether, and its actual strength was 188,000. The Army had enlisted 660,000, and its actual strength was 455,000. To make up deficiencies in the forces overseas, steps were taken to draft 16,000 conscripted men for such duty—a decision which evoked an internal controversy.

Advance units of the First Canadian Division disembarked in the United Kingdom on December 17, 1939. In the Dieppe raid on August 19, 1942, Canadians formed five-sixths of the attacking force. Canadian Army formations have also participated in raids on Europe such as that conducted

at Spitzbergen. In the amphibious landings on Sicily and Italy during the summer and autumn of 1943, the Canadian First Division and other units served as part of the British 8th Army. Two Canadian battalions were sent to Hong Kong in November, 1941. A Canadian brigade also formed part of the combined United States-Canadian force which occupied Kiska in the Aleutians during the summer of 1943. The Third Canadian Division and Second Canadian Armoured Brigade formed part of the assault force that landed in Northern France in June, 1944. Later, Second Canadian Division and Fourth Canadian Armoured Division landed in France and took their place in the First Canadian Army, which comprised an All Canadian Corps and a Corps of Allied Forces. Other Canadian units were moved to France as general headquarters and line of communication troops. In addition to the five divisions overseas, there were three divisions (6th, 7th and 8th) as well as static coast and anti-aircraft artillery units engaged in the defence of Canada. Canadian troops are also employed on garrison duties in Newfoundland, Bermuda and the British West Indies. Towards the end of 1943, when defence requirements became less imperative, reorganisation of the Army was effected and only one division was retained for service in Canada.

The First Canadian Army was formed in 1942, in England, with a view to the invasion of the Continent, but then the 1st Division was sent to the Mediterranean for the successive invasions of Sicily and Italy, and subsequently the Canadian forces in Italy were increased to the scale of an army corps. A British corps filled its place in the First Canadian Army, which thus became an army of mixed composition, though commanded by a Canadian general. This Army played a prominent part in the second phase of the operations in Normandy, where it operated in the Caen sector on the eastern flank, and subsequently formed the left wing of the advance towards Belgium. It was responsible for clearing the Channel ports, and then carried out the operations which evicted the Germans from their positions on either side of the Scheldt estuary, where for a time they blocked the supply route to Antwerp.

Canadian casualties up to the end of January, 1945, totalled 87,609, of which 32,155 were dead, 43,000 wounded, and 12,000 prisoners or missing.

In August, 1941, the Canadian Women's Army Corps was organised and in October, 1943, numbered over 13,000, of whom more than 1,200 were on overseas service. The Veterans Guard of Canada, a special force composed of the veterans of the war of 1914-18, was raised to undertake internal security duties and the guarding of prisoners of war in Canada. The Dominion also maintains a Reserve Army of more than 90,000 men who receive part-time training while continuing their normal civilian occupation. Training in the Dominion is organised to provide every phase of the soldier's initial training for each arm of the service. Facilities also exist for specialist and trades training for all ranks. Certain specialist training has also been undertaken in collaboration with the United States Army. The 1st Canadian Parachute Battalion was trained at Fort Benning, New Georgia, in 1942-43, prior to the establishment in Canada of the requisite facilities for parachute training. This battalion arrived in the United Kingdom in 1943, and commenced training with similar British units and, as part of a British formation, participated in the invasion of Northern France early on June 6, 1944. The First Canadian Special Service Battalion, the Canadian component of the Canadian-United States Special Service Force, trained in Montana in 1942-43 and participated in the combined operations when Canadian-United States Forces occupied

Kiska in 1943. This special service force co-operating with the Fifth United States Army landed in Italy late in 1943 and were in action at Cassino and Anzio. Later this force, as part of the Seventh United States Army, took part in the combined landings in Southern France during the summer of 1944.

**Navy.**—The Royal Canadian Navy was established in 1910, and comprises the Royal Canadian Navy (Permanent Force), the Royal Canadian Naval Reserve, the Royal Canadian Naval Volunteer Reserve and the Women's Royal Canadian Naval Service. In 1939 authority was also granted for the establishment of the Royal Canadian Fleet Reserve, to be composed of ex ratings of the Royal Canadian Navy (Permanent Force). The Royal Canadian Navy is composed of over 500 vessels of all types, including the cruiser *Uganda*, the escort aircraft carriers *Nabob* and *Puncher* (transferred to the Royal Canadian Navy for manning purposes), 23 destroyers, 150 frigates, and over 60 minesweepers. Two modern cruisers were taken over from the Royal Navy in 1944-45. Permanent dockyards are located at Halifax and Esquimalt. Naval depots are maintained at both bases and, together with the main training establishments at Deep Brook, Nova Scotia, and St. Hyacinthe, they are used as training headquarters for the personnel of the R.C.N., which, on December 31, 1944, totalled more than 90,000, of whom approximately 5,000 were W.R.C.N.S. personnel.

**Royal Canadian Air Force.**—The Royal Canadian Air Force (formed April 1, 1924), now comprises the following components: (a) Regular; (b) Auxiliary; (c) Reserve; (d) Women's Division; (e) University Air Squadrons; (f) Air Cadets. The first four components are on continuous general service during the present emergency and have a combined strength in excess of 200,000. There are two operational and four training commands in Canada. In addition, North-West Air Command (formed in June, 1944) controls the series of aerodromes and aircraft control facilities known as the North-West Staging Route. The Force administers the British Commonwealth Air Training Plan, under which more than 100,000 aircrew personnel have been trained in the Dominion. In February, 1944, 42 R.C.A.F. squadrons were operating in the Western European, Mediterranean and Italian theatres of war. Certain squadrons of the western hemisphere establishment participated with the U.S.A.A.F. in the Alaskan operations of 1942-43. During 1943, units based on the Atlantic and Pacific coasts flew 10,000,000 nautical miles on escorts to surface shipping, anti-submarine patrols, etc. Aircrew personnel of the R.C.A.F. are serving in large numbers with units of the R.A.F.

**Royal Canadian Mounted Police.**—The Royal Canadian Mounted Police is a constabulary maintained by the Dominion Government. It was organized in 1873, and was known as the North West Mounted Police, whose duties were confined to what was then known as the Northwest Territories. In 1904, its name was changed to Royal North West Mounted Police. In 1905, when Alberta and Saskatchewan were constituted provinces, an arrangement was made whereby the Force continued to discharge its duties as formerly, each province making a contribution towards defraying the cost. This was continued until 1917. In 1920, the name of the Force was changed to the Royal Canadian Mounted Police.

At the present time, the R.C.M. Police is responsible throughout Canada for the enforcement of the laws against smuggling by land, sea, and air. It enforces the provisions of the Excise Act, is responsible for the suppress-

Dominion at large is mainly a subsidiary of mixed farming. The following table shows the numbers of live stock by provinces in 1943:—

| Provinces            | Horses    | Milch Cows | Other Cattle | Sheep     | Swine     | Poultry    |
|----------------------|-----------|------------|--------------|-----------|-----------|------------|
| Pr. Ed. Island . . . | 27,240    | 46,200     | 54,200       | 56,000    | 65,000    | 1,096,200  |
| Nova Scotia . . .    | 25,700    | 104,200    | 106,200      | 161,600   | 55,500    | 1,635,700  |
| New Brunswick . .    | 47,500    | 118,500    | 107,400      | 107,000   | 91,400    | 1,597,000  |
| Quebec . . .         | 229,500   | 1,018,900  | 886,200      | 574,500   | 978,000   | 9,831,500  |
| Ontario . . .        | 522,200   | 1,169,700  | 1,524,000    | 737,500   | 1,885,000 | 26,692,800 |
| Manitoba . . .       | 298,500   | 870,000    | 557,500      | 327,000   | 877,000   | 8,784,800  |
| Saskatchewan . . .   | 224,400   | 502,400    | 1,099,600    | 463,000   | 1,754,600 | 15,920,200 |
| Alberta . . .        | 627,900   | 876,000    | 1,251,000    | 960,000   | 2,337,700 | 10,005,400 |
| British Columbia . . | 62,170    | 93,700     | 282,300      | 122,000   | 89,800    | 3,626,700  |
| Total: 1943 . . .    | 2,775,210 | 3,794,700  | 5,870,500    | 3,458,600 | 8,148,500 | 79,124,000 |
| Total: 1942 . . .    | 2,816,080 | 3,680,500  | 5,264,200    | 3,196,900 | 7,125,200 | 72,189,700 |

Wool production, 1942, 17,596,000 lb.; 1943, 18,965,000 lb.

**Dairying.**—The dairying industry of the Dominion is carried on most extensively in Ontario and Quebec, although there are dairy factories in all of the provinces. The total number of creameries in Canada in 1942 was 1,141; of cheese factories, 977; of combined butter and cheese factories, 260; of condenseries, 26; and the total value of all products of dairy factories, 236,098,998 dollars. Creamery butter produced in 1942 was 284,591,872 lb., and factory cheese, 206,935,464 lb. Total milk production, 1943, 17,516,918,000 lb.

**Fruit Farming.**—The value of fruit production by provinces in 1943 was (in dollars): British Columbia, 12,852,000; Ontario, 10,498,400; Nova Scotia, 4,406,800; Quebec, 2,415,200; New Brunswick, 678,200; total, 30,840,600 dollars. The production of apples in 1943 was (in barrels): British Columbia, 1,337,800; Nova Scotia, 1,614,100; Ontario, 755,000; Quebec, 290,000; New Brunswick, 105,000; total, 4,102,600 (total 1942, 4,155,600 barrels).

**Miscellaneous.**—The total shorn wool production in 1943 was estimated at 13,929,000 lb. The production in 1943 of tobacco, which is practically confined to Ontario and Quebec, was estimated at 62,844,700 lb. from 71,600 acres. The total production of farm eggs (for 1943), 315,027,000 dozens, valued at 100,806,000 dollars, and the 1944 value of maple products 9,055,800 dollars.

**Forestry.**—The total area of land covered by forests is officially estimated at 1,220,405 square miles. Of this 770,565 square miles are productive and accessible. Lumber production, 1943, 4,640 million feet; estimate for 1944, 4,350 million feet.

**Fisheries.**—In the calendar year 1941 the capital invested in vessels, gear, canneries, etc. (including working capital and stocks on hand) was 62,632,045 dollars. The total value of the produce of the fisheries of Canada in 1942 was 75,116,933 dollars. The principal kinds of fish marketed in 1942 were (in dollars): salmon, 22,926,861; herring, 10,931,097; cod, 9,962,312; lobsters, 5,084,558; whitefish, 3,055,373; halibut, 2,455,970; sardines, 2,143,623; pilchards, 2,016,607; haddock, 1,734,410; pickerel, 1,440,774. The number of persons employed in 1942 was 77,084, including fishermen and those employed in canning and curing establishments. The number of factories and canneries in operation in 1942 was 493.

**Mining.**—(Preliminary figures.)—Nova Scotia, British Columbia, Quebec, N. and W. Ontario, Alberta, and Yukon Territory are the chief mining

districts. The total value of the mineral produce in 1943 was 523,940,810 dollars (566,768,672 dollars in 1942). The principal metals and minerals produced in 1943 were as follows:—

| Product                                                                                                              | 1943 <sup>1</sup> |                     |
|----------------------------------------------------------------------------------------------------------------------|-------------------|---------------------|
|                                                                                                                      | Quantity          | Value               |

| Non-ferrous metals       | 590                      | 612,518,064   | 90,937    | 146,690,366        | 505,122,844       | 901,569,437             |
| Non-metallic minerals    | 782                      | 829,401,812   | 30,707    | 48,702,880         | 191,143,787       | 358,075,414             |
| Chemicals                | 928                      | 471,679,779   | 92,080    | 184,845,942        | 238,886,894       | 501,656,128             |
| Miscellaneous industries | 657                      | 105,556,242   | 22,474    | 27,202,456         | 49,292,782        | 97,437,944              |
| Totals                   | 27,862                   | 5,488,785,545 | 1,162,091 | 1,682,804,842      | 4,087,102,725     | 7,553,794,972           |

**The Fur Trade.** (Preliminary figures.)—In 1942-43 (year ended June 30), 7,855,304 pelts, valued at 27,694,164 dollars, were taken. Fur auctions are now held on a large scale at Montreal and Winnipeg. The more important animals raised on fur farms are fox, muskrat, beaver, mink, racoon, marten, and fisher. The value of animals and pelts sold from the farms during the year 1942 was 7,156,017 dollars. There were in 1942, 7,834 fur farms in Canada, of which 5,768 reported fox.

**Water Power.**—Canada is richly endowed with water power resources; on January 1, 1944, the available horse-power at ordinary six months' flow was 39,511,700; on January 1, 1944, turbine installation amounted to 10,214,513 horse-power. The Central Electric Station industry, which generates 98 p.c. of the total electrical output, had a gross production of power valued at 208,914,608 dollars in 1942. The number of power plants was then 616 and the capital invested 1,747,891,798 dollars.

## Commerce.

The customs tariff of Canada is protective, but there is a preferential tariff in favour of the United Kingdom and of the Dominions, and of a number of the Crown Colonies. At the Imperial Economic Conference of 1932, held in Ottawa, the United Kingdom developed further the policy of preferential tariffs to the Dominions and on the part of the latter there was a general lowering of the existing tariffs against certain lines of United Kingdom manufactures. The Conference provided an opportunity for the revision of the trade agreements recently made with Australia and New Zealand, as well as the conclusion of one with the Union of South Africa.

Imports and exports entered for home consumption in the Dominion (merchandise only):—

| Year ended December 31 | Imports for Home Consumption | Total Exports | Year ended December 31 | Imports for Home Consumption | Total Exports |
|------------------------|------------------------------|---------------|------------------------|------------------------------|---------------|
|                        | Dollars                      | Dollars       |                        | Dollars                      | Dollars       |

| Aluminium                | 25,142,045  | Notes, tops, waste wool  | 7,293,523  |
| Woollen goods, carpets   | 23,761,329  | Hides and skins          | 6,349,456  |
| Rubber products          | 22,920,967  | Leather                  | 6,311,822  |
| Farm implements, etc.    | 20,228,541  | Paints and varnishes     | 6,281,162  |
| Petroleum, refined       | 19,691,646  | Wood, manufactured       | 6,031,626  |
| Books and printed matter | 17,961,897  | Wood, unmanufactured     | 5,589,231  |
| Flax, hemp and jute      | 16,196,131  | Beverages, alcoholic     | 4,560,595  |
| Vegetables               | 14,121,096  |                          |            |

## Principal exports (Canadian produce) for calendar year, 1943:—

| Commodity                | Value       | Commodity                                          | Value      |
|--------------------------|-------------|----------------------------------------------------|------------|
|                          | Dollars     |                                                    | Dollars    |
| Automobiles              | 240,799,660 | Pulpwood                                           | 18,565,265 |
| Wheat                    | 234,487,747 | Fertilizers                                        | 18,142,629 |
| Automobile parts         | 213,942,868 | Abrasives                                          | 17,872,431 |
| Newsprint                | 144,707,065 | Whisky                                             | 11,770,081 |
| Meats                    | 130,790,199 | Farm implements                                    | 10,283,789 |
| Wood pulp                | 100,012,775 | Machinery, except farm                             | 10,043,206 |
| Planks and boards        | 74,125,488  | Cattle, all kinds                                  | 9,803,488  |
| Wheat flour              | 65,273,692  | Platinum or platinum metals, in concentrates, etc. | 7,717,142  |
| Fish                     | 56,902,467  | Shingles, wood                                     | 6,210,665  |
| Cheese                   | 36,811,113  | Tyres and tubes, rubber                            | 4,626,311  |
| Furs, raw                | 35,584,189  |                                                    |            |
| Iron: pigs, ingots, etc. | 22,693,642  |                                                    |            |

The following figures are from the British Board of Trade returns:—

|                                              | 1934          | 1935          | 1936          | 1937          | 1938 <sup>1</sup> |
|----------------------------------------------|---------------|---------------|---------------|---------------|-------------------|
| Imports (consignments) into U.K. from Canada | \$ 50,300,335 | \$ 56,010,400 | \$ 75,128,150 | \$ 88,747,684 | \$ 78,564,459     |
| Exports to Canada                            | 19,726,285    | 31,352,663    | 23,242,807    | 27,551,348    | 22,532,812        |
| British produce                              | 1,388,375     | 1,176,671     | 1,084,658     | 1,238,340     | 1,038,761         |
| Foreign and Colonial produce                 |               |               |               |               |                   |

<sup>1</sup> Provisional.

### Shipping and Navigation.

The registered shipping on December 31, 1940, including vessels for inland navigation, totalled 8,396, with a total net tonnage of 1,292,692. The seagoing and coasting vessels that entered Canadian ports during the year ending December 31, 1943, were as follows:—Foreign service, no., 22,901; tons, 26 853,626. Coasting service, no., 65,066; tons, 40,300,778. Total, no., 87,967; tons, 66,654 404.

### Communications.

Canada has a system of canal, river, and lake navigation over 2,700 miles in length, and vessels drawing up to 14 ft. from the lake ports may reach the Atlantic without breaking bulk. Total expenditure on canals from their inception to March 31, 1943, was 348,655,098 dollars, and total revenues 32,001,107 dollars. Of the expenditure 243,799,500 dollars was on capital account, 20,360,466 dollars on major repairs and alterations, 48,001,097 dollars on operation (staff) and 86,494,034 on maintenance. The heavy expenditures in recent years have been due to the construction of the Welland Ship Canal on which 131,896,686 dollars had been spent to March 31, 1943. The canal was opened on April 20, 1931. Vessels 850 ft. long, 25 ft. draft, allowed through as from April 1932. In 1943, 23,472 vessels, of 23,960,262 tons, passed through the Canadian canals, carrying 21,476,194 tons of freight, chiefly grain, petroleum products, iron ore and coal.

The total single-track mileage of steam railways in Canada on December 31, 1942, was 42,339. The total mileage, including second track, yard track and sidings, was 56,564.

The lines built or acquired by the Canadian Government are now consolidated in one system, known as the Canadian National Railways, covering about one-half of the single track mileage, including two transcontinental lines with termini in Canada at Saint John, Halifax, Vancouver and Prince Rupert, and with termini at Portland, Maine, U.S.A., and Chicago.

The mileage in private ownership is mainly that of the Canadian Pacific Railway, 17,088 in 1943. The main line of this road from Vancouver, B.C., to Saint John, New Brunswick, is 3,367 miles.

Statistics of the Canadian steam railways for 1943: passengers, 57.2 millions; freight revenue, 177,000,000 dollars; gross receipts, 779,000,000 dollars; net receipts, 218,000,000 dollars.

Electric railways in 1942, 33: mileage, 1,505; passengers during the year, 996,208,535; tons of freight carried, 3,711,468. The gross earnings in 1942 reached an aggregate of 69,034,130 dollars. Operating expenses amounted to 43,473,516 dollars. Stocks and funded debt 189,139,680 dollars.

**Civil Aviation.**—The Division of the Controller of Civil Aviation is under the jurisdiction of the Director of Air Services Branch of the Department of Transport, and is responsible for the administration of the air

regulations, airways and airports, aeronautical engineering, and the supervision of flying clubs. The branch is divided into three divisions, namely, Civil Aviation, Radio and Meteorological. On December 31, 1943, there were in force 242 private and 520 commercial pilots' licences, and 983 air engineers' licences and 214 private and commercial aircraft and 90 airports were registered.

In 1943, there were carried by air, 299,279<sup>1</sup> paying and 3,225 non-paying passengers, 13,484,197<sup>1</sup> lb. freight (exclusive of mails) and 7,393,812 lb. of mail.

Established by Act of Parliament in April, 1937, the Trans-Canada Air Lines system, Canada's national air service, now spans the continent from Newfoundland to Vancouver Island, operates between Toronto and New York, between Toronto, London and Windsor, and between Lethbridge, Calgary and Edmonton. Its routes total 5,296 miles and its aircraft fly annually between nine and ten million revenue miles.

Estimates for 1944 indicate a total of 9,776,747 revenue miles, and traffic amounting to 4,136,584 lb. of air mail, 1,183,113 lb. of air express and 169,734 passengers.

On March 31, 1944, there were 12,234 post offices. Net revenue, 61,070,919 dollars; expenditure, 48,485,009 dollars. At March 31, 1944, there were 4,844 rural mail delivery routes, on which were erected 295,776 boxes.

Money order offices on March 31, 1944, 7,362; orders issued, 19,554,760: value 262,297,381 dollars. The total amount of Ocean Mail subsidies and steamship subventions, including administration, for the fiscal year 1944 amounted to 799,652 dollars. Administration charges were 11,236 dollars, so that the subsidies and subventions alone were 788,416 dollars.

There were 51,858 miles (8,778 being federal Government) of telegraph lines in Canada in 1943, and 384,350 miles of wire (exclusive of 689,621 miles of multiple channels), with 4,908 offices. There were 6,014,596 miles of telephone wire on December 31, 1942, and 1,627,775 telephones (14.0 per 100 population).

**Wireless Communications.**—There were 1,731,641 licences in force at March 31, 1943, of which 1,728,880 were for private receiving stations. Of the remaining 2,761, ship stations numbered 640, leaving 2,121 coast and land stations, 102 of which were broadcasting stations.

The ship and shore wireless traffic for the twelve months ended March 31, 1943, amounted to 423,398 messages and 12,688,642 words.

Wireless 'beam' stations are operated at Montreal for direct communication with Great Britain and Australia, and a station at Louisburg, N.S., provides a long distance service to ships.

### Money and Credit.

The British North America Act confers the jurisdiction over currency and banking to the Dominion Government. Commercial banks in Canada are known as chartered banks and are incorporated under the terms of the Bank Act which imposes strict conditions as to capital, notes in circulation, returns to the Dominion Government, types of lending operations and other matters. There are now in operation ten chartered banks incorporated under the provisions of the Bank Act, with 3,084 branches and sub-agencies in Canada and 138 branches in other countries. The Bank Act is subject to

<sup>1</sup> Includes traffic between foreign stations over Canadian routes, 17,990 passengers and 662,592 lb. of revenue freight.

revision by Parliament every ten years, the last revision having taken place in 1944. Bank charters expire every ten years and are renewed at each decennial revision of the Bank Act. The chartered banks make detailed monthly and yearly returns to the Minister of Finance and are subject to periodic inspection by the Inspector-General of Banks, an official appointed by the Government.

The following are some particulars (in dollars) of the ten chartered banks in 1943: capital paid up, 145,500,000 dollars; reserve fund, 136,750,000 dollars; notes in circulation, 50,230,204 dollars; total on deposit in Canada, 8,483,585,436 dollars; elsewhere, 587,499,673 dollars; liabilities to the public, 4,849,222,532 dollars; total assets, 5,148,458,722 dollars. Bank debits in the clearing-house centres of Canada for 1943 amounted to 53,796,714,727 dollars, against 45,526,254,202 dollars in 1942. Of the transactions of 1943, Toronto had 24.33 per cent., Montreal 25.58 per cent., Winnipeg 10.40 per cent., Ottawa 13.09 per cent., and Vancouver 4.9 per cent.

Government post-office savings-banks have been in operation since 1868. The post-office savings-banks had on December 31, 1943, deposits amounting to 25,964,696 dollars.

The deposits in the Quebec savings banks, incorporated under the terms of a special Dominion Act, amounted to 103,276,757 dollars on March 31, 1944.

The Bank of Canada Act, passed on July 3, 1934, provided for the establishment of a central bank for the Dominion. This Bank commenced operations on March 11, 1935, with a paid-up capital of 5,000,000 dollars. By reason of certain changes introduced into the composition of stockholders of the Bank (for which see THE STATESMAN'S YEAR-BOOK, 1944, pp. 322-23), the Minister of Finance on behalf of the Dominion of Canada is the sole registered owner of the capital stock of the Bank. The chartered banks are required to maintain, in the form of deposits with and notes of the Bank of Canada, a reserve of not less than 5 per cent. of their deposit liabilities in Canada. The Bank of Canada is required to maintain a reserve in gold coin or bullion not less than 25 per cent. of its note and deposit liabilities. All gold held in Canada by the chartered banks was transferred to the Bank of Canada along with the gold held by the Government as reserve against Dominion notes outstanding at the time of the commencement of operations of the Bank of Canada. The liability of the Dominion notes outstanding at the commencement of business of the Bank of Canada was assumed by the Bank. The following are some of the particulars of the Bank of Canada as at December 31, 1943: notes in circulation, 874,395,312 dollars; chartered bank deposits, 340,195,800 dollars; securities, 1,260,875,252 dollars.

The Bank of Canada's gold reserves have been placed at the disposal of the exchange equalization authorities as from April 30, 1940.

In August, 1944, the Industrial Development Bank, a subsidiary of the Bank of Canada, was set up for the purpose of providing credit in the post-war period to small industrial establishments.

### Currency, Weights and Measures.

The denominations of money in the currency of Canada are dollars and cents. The cent is one-hundredth part of a dollar. Subsidiary coins of the denominations of 1 cent, 5 cents, 10 cents, 25 cents, 50 cents, and 1 dollar are in use. The monetary unit is the gold dollar, equivalent to 25.8 grains of gold, nine-tenths fine. The Currency Act provides for gold coins in the denominations of \$2.50, \$5.00, \$10.00 and \$20.00, which are

legal tender. The British and United States gold coins are also legal tender, but only at the par rate of exchange. The legal equivalent of the British sovereign is 4.863 dollars. The privilege of issuing notes is restricted to the Bank of Canada and the chartered banks. It is intended that by 1950 the Bank of Canada will have the sole right to issue notes, and the latest revision of the Bank Act provides for a gradual withdrawal of the right of note issue by the chartered banks.

The Bank of Canada issues notes, which are legal tender, in denominations of \$1, \$2, \$5, \$10, \$20, \$25, \$50, \$100, \$500, and \$1,000. They may be issued in any amount, so long as the Bank maintains a reserve in gold coin or bullion of at least 25 per cent. of its note and deposit liability. Under the terms of the Bank of Canada Act, the Bank is required to sell gold in bars of 400 ounces to any person tendering legal tender. This obligation is at the present time suspended by Order-in-Council. The exportation of gold from Canada is prohibited except by licence issued by the Minister of Finance to the Bank of Canada or a chartered bank.

The Ottawa Mint was established in 1908 as a branch of the Royal Mint, in pursuance of The Ottawa Mint Act, 1901. In December, 1931, control of the Mint was passed over to the Canadian Government, and since that time has operated as the Royal Canadian Mint. The Mint issues silver, nickel and copper coins for circulation in Canada, and for a time coined \$5 and \$10 Canadian gold coins and British sovereigns. No gold coins have been struck since 1919. In 1935, on the occasion of His Majesty's Silver Jubilee, the Royal Canadian Mint issued a silver dollar bearing the effigy of King George V. Standard silver dollars were issued in 1936-38, and in 1939 a special issue was made to commemorate the visit of King George VI and Queen Elizabeth to Canada. Gold refining is one of the principal activities of the Mint.

In 1943, 3,616,959 fine oz. of gold were received for treatment, and 3,645,740 fine oz. of bullion were issued. Coin issued: bronze, 881,300 dollars; tombac, 1,238,000 dollars; nickel, nil; silver, 7,044,000 dollars.

The legal weights and measures are the Imperial yard, pound avoirdupois, gallon, and bushel; but the hundredweight is declared to be 100 pounds and the ton 2,000 pounds avoirdupois, as in the United States.

### Statistical and other Books of Reference concerning Canada.

#### 1. OFFICIAL PUBLICATIONS.

Official publications are issued by the several Government departments and branches concerned.

Canada, Official Handbook. Dominion Bureau of Statistics. Ottawa. Annual.  
The Canada Year Book—official statistical annual of the resources, history, institutions and social and economic conditions of the Dominion.—Dominion Bureau of Statistics. Ottawa. Annual.

Canadian Annual Review of Public Affairs. Toronto. Annual.  
Monthly Review of Business Statistics. Dominion Bureau of Statistics. Ottawa.  
Atlas of the Agriculture, Climate and Population of the Prairie Provinces of Canada.—Dominion Bureau of Statistics. Ottawa, 1932.

#### 2. NON-OFFICIAL PUBLICATIONS.

The Canadian catalogue of books published in Canada, about Canada, as well as those written by Canadians, with imprint of 1943. No. 22. Toronto Public Libraries. Toronto, 1944.

Social Planning for Canada. By the Research Committee of the League for Social Reconstruction. London, 1935.

Cambridge History of the British Empire. Vol. VI. Canada and Newfoundland. Cambridge, 1930.

## CANADIAN PROVINCES.

## ALBERTA

**Constitution and Government.**—The Constitution of Alberta is contained in the British North America Act of 1867, and amending Acts; also in the Alberta Act of 1905, passed by the Parliament of the Dominion of Canada, creating the province. In the British North America Act, provision was made for the admission of the new provinces from time to time, including the then North-West Territories, of which the present province of Alberta formed a large portion. Upon the granting of autonomy to the North-West Territories, Alberta and Saskatchewan were erected into provinces, and all the provisions of the British North America Act, except those with respect to schools, lands, and the public domain, were made to apply to Alberta as they apply to the older provinces of Canada. On October 1, 1930, the natural resources were transferred from the Dominion to Provincial Government control. The province is represented by 6 members in the Senate and 17 in the House of Commons of Canada.

The executive is vested nominally in the Lieutenant-Governor, who is appointed by the Federal Government, but actually in the Executive Council or the Cabinet of the Legislature. Legislative power is vested in the Assembly in the name of the King.

Members of the Legislative Assembly are elected by the direct vote of the people. Women suffrage has been established in the province.

There are 57 members in the Legislature (elected August 8, 1944)—51 Social Credit, 3 Independents, 2 Co-operative Commonwealth Federationists, 1 Veterans' Representative.

**Lieutenant-Governor.**—His Honour J. C. Bowen.

The members of the Ministry appointed June, 1943, are as follows:—

**Premier and Provincial Treasurer.**—Hon. E. C. Manning.

**Attorney-General.**—Hon. Lucien Maynard.

**Provincial Secretary.**—Hon. A. J. Hooke.

**Minister of Agriculture.**—Hon. D. B. MacMillan.

*Minister of Lands and Mines.*—Hon. N. E. Tanner.

*Minister of Public Works, Railways and Telephones.*—Hon. W. A. Fallow.

*Minister of Public Health.*—Hon. Dr. W. W. Cross.

*Minister of Education.*—Hon. R. E. Ansley.

*Minister for Municipalities and of Trade and Industry.*—Hon. C. E. Gerhart.

**Local Government.**—Municipal Districts, formerly known as Local Improvement Districts, comprise the area within the limits of nine townships, i.e. 18 miles square (324 square miles), or as near to this as natural features will allow. Each Municipal District is a body corporate and governed in most cases by an elected council of six members, the chairman of whom is called the Reeve. The councillors are elected by a vote of all persons who are assessed for property within the Municipal District, together with the vote of the wife, husband, son, daughter, father or mother of such assessed persons, provided these relatives reside on the land of the assessed person.

Towns operate under the Town Act, 1927, except one which carries on under special charter. Villages are erected by Order of the Minister of Municipal Affairs, and are governed by the Village Act. The town council consists of a Mayor and six councillors elected by those whose names appear on the last revised assessment roll. These must be twenty-one years of age, and assessed for property of the value of one hundred dollars and upwards. The village council consists of three members elected annually, the Chairman being Mayor of the village.

There are seven cities in Alberta, namely: Edmonton, Calgary, Lethbridge, Wetaskiwin, Red Deer, Medicine Hat, and Drumheller. These cities operate under special charters granted by the North-West Territorial Assembly, and later confirmed by the Legislative Assembly of the Province of Alberta. The governing body consists of a Mayor and a council of from six to ten members, according to the size of the city.

**Area and Population.**—The area of the province is 255,285 square miles, 248,800 sq. miles being land area and 6,485 sq. miles water area. The population (census, 1941) was 706,169; in 1921, 538,454, and in 1901, 73,022. In 1941 the rural population numbered 489,583, and the urban 306,586. There were 12,569 Indians in 1941, or 1.58 per cent. of the total population. Population of the principal cities (1941):—Edmonton, 93,817; Calgary, 88,904; Lethbridge, 14,612; Medicine Hat, 10,571; Red Deer, 2,924; Drumheller, 2,748; Wetaskiwin, 2,318.

The vital statistics for 5 years are given as follows:—

|            | Births | Marriages | Deaths | Excess of Births |
|------------|--------|-----------|--------|------------------|
| 1939 . . . | 16,470 | 7,838     | 5,788  | 10,682           |
| 1940 . . . | 17,359 | 8,782     | 6,203  | 11,156           |
| 1941 . . . | 17,808 | 8,470     | 6,385  | 10,923           |
| 1942 . . . | 18,817 | 9,034     | 6,091  | 12,228           |
| 1943 . . . | 19,288 | 7,709     | 6,501  | 12,787           |

**Education.**—Schools of all grades are included under the term of public school. The same boards of trustees control the schools from the kindergarten to entrance to the university. All schools are supported by taxes levied by the local board, supplemented by Government grants, which are distributed to encourage elementary, secondary, and technical education and agricultural training. In 1943 there were 3,277 school districts in operation, which included 43 consolidated schools and 7 rural high schools,

with 157,506 pupils. There are normal schools at Calgary and Edmonton for the training of teachers. The attendance during 1943 was 591. The University of Alberta, organised in 1907, had, in 1943-44, 2,023 students.

**Justice and Crime.**—Judicial power of the province is vested in the Supreme Court, consisting of two divisions, the appellate and trial divisions. The judges are appointed by the Dominion Government, and hold office for life unless impeached by Parliament. There are also minor Courts of Civil and Criminal Jurisdiction. The district courts have full jurisdiction over all matters up to 600 dollars. By the Small Debts Act of 1918, as amended in 1924, magistrates have jurisdiction over matters up to 100 dollars. There are also Juvenile Courts having power to try boys under 16 and girls under 18 years of age.

The system of procedure in civil and criminal cases conforms as nearly as possible to the English system.

**Finance.**—The revenue of the province is derived from the following sources:—(1) Dominion subsidies; (2) School lands; and (3) Provincial sources.

|                 | 1940       | 1941       | 1942       | 1943       | 1944       |
|-----------------|------------|------------|------------|------------|------------|
|                 | Dollars    | Dollars    | Dollars    | Dollars    | Dollars    |
| Revenue . . .   | 24,410,040 | 24,921,669 | 27,215,546 | 27,961,198 | 28,786,038 |
| Expenditure . . | 21,922,189 | 20,570,676 | 19,965,125 | 21,588,134 | 23,095,502 |

The gross bonded debt of the province March 31, 1944, amounted to 155,664,578 dollars, including sinking funds, 16,075,517 dollars. The net bonded debt was 139,589,061 dollars. Of this amount 24,967,619 dollars represent assets which are self-supporting, leaving net general bonded debt of 114,621,442 dollars. To this should be added the net unfunded debt of 2,814,740 dollars, making a total of 117,436,182 dollars, net general debt.

**Production and Industry.**—Alberta is pre-eminently an agricultural province. Within the surveyed area of the province, which comprises about 85,000,000 acres, there are approximately 70,000,000 acres which may be classed as lands capable of agricultural development. Up to the present, however, little more than one-fourth of this area has been brought under cultivation.

For particulars of agricultural production and live-stock, see under CANADA above. The wool clip for 1943 was approximately 3,799,000 lb.

Grain elevators (1942), 1,729, with a capacity of 111,728,853 bushels.

A coal survey of Alberta by the Geological Survey of Canada places the coal area at 16,588 square miles containing 1,035,629 million tons (approx.), 80,000 million being lignite. The output in 1943 was 7,677,982 tons, valued at 24,035,121 dollars. Natural gas is found abundantly in numerous localities. In 1943, 34,161,548 cubic feet, valued at 6,405,290 dollars, were consumed. High grade gasoline is profitably extracted from the gas in Turner Valley. 9,674,548 barrels of oil were produced in the Province in 1943. Immense deposits of bituminous sand containing on an average 15 to 18 per cent. bitumen are situated in the McMurray district in northern Alberta. Value of total mineral production in 1943, 48,578,388 dollars.

Alberta has 12,393,500 acres of forest reserves.

The lakes of the province abound in whitefish, pickerel, pike and trout,

but the industry is not developed to any great extent. Value of fish marketed, 1943, 814,964 dollars.

Manufacturing in the province: Flour, oatmeal, cement, and linseed oil mills, pork and beef packing houses, clay, brass and iron, glass, wood, clothing, canning, biscuit and macaroni factories, large railway repair shops and oil refineries.

Statistics of manufactures for 1942: number of industrial establishments, 1,115; capital, 101,401,133 dollars; number of employees, 18,397; salaries and wages, 23,992,618 dollars; cost of materials, 117,617,490 dollars; value of products, 178,103,011 dollars.

**Commerce and Communications.**—The principal exports of the province consist of grain, live-stock, meat and meat products, wool, fish, butter, eggs, mining and timber products.

Length of railway lines 5,818 miles in the year 1943. Alberta's modern telephone system is owned and operated by the Provincial Government, except in the town of Banff and city of Edmonton. The total mileage of wire in all the telephone systems in the province is 264,000. There are over 60,000 telephones installed, of which over 16,000 are in the rural areas.

### BRITISH COLUMBIA.

**Constitution and Government.**—British Columbia (then known as New Caledonia) and Vancouver Island originally formed part of the Hudson's Bay Company's concession. In 1849 Vancouver Island, and in 1858 British Columbia, were constituted Crown Colonies, and in 1866 the two Colonies were united. On July 20th, 1871, British Columbia entered the Canadian Confederation, and is represented by 6 members in the Senate, and 16 in the House of Commons of Canada.

The Provincial Government is administered by a Lieutenant-Governor and a Legislative Assembly of 48 members on the system of executive administration known as 'responsible government.' The Assembly is elected for five years, every adult, male or female (British subjects), having resided six months in the Province, duly registered, being entitled to vote. At the elections held on October 21, 1941, there were returned 21 Liberals, 14 Co-operative Commonwealth Federationists, 12 Conservatives, 1 Labour.

**Lieutenant-Governor.**—His Honour W. C. Woodward (1941).

The members of the Ministry (assumed office in December, 1941) are as follows:—

**Premier and Minister of Finance and Acting Minister of Lands.**—Hon. John Hart (Liberal).

**Provincial Secretary and Minister of Labour and Commissioner of Fisheries.**—Hon. G. S. Pearson (Liberal).

**Attorney-General.**—Hon. R. L. Mailland, K.C. (Conservative).

**Minister of Agriculture.**—Hon. K. C. Macdonald (Liberal).

**Minister of Mines and Minister of Trade and Industry.**—Hon. E. C. Carson (Conservative).

**Minister of Public Works and Railways and Acting Minister of Municipal Affairs.**—Hon. H. Ascomb (Conservative).

**Minister of Education.**—Hon. H. G. Perry (Liberal).

**Agent-General in London.**—W. A. McAdam, British Columbia House, 1/3 Regent Street, S.W.1.

**Area and Population.**—British Columbia, Canada's Pacific Coast Province, has an area of 366,255 square miles, of which 359,279 square miles are land area, and 6,976 square miles water area, but exclusive of territorial seas. It lies between latitudes 49 degrees and 60 degrees north. Vancouver Island has an area of about 12,408 square miles.

The last census (1941) places the population at 817,861; in 1921 the population was 524,582; and in 1931 it was 694,263. Vancouver Island, 121,933.

Some of the principal cities and towns and their approximate populations are: Greater Victoria (the capital), population 61,216; Greater Vancouver, 290,816; New Westminster 20,500; Trail, 9,600; Nanaimo, 6,745; Prince Rupert, 6,351; Kamloops, 6,167; Nelson, 5,992; Kelowna, 4,655; Prince George, 2,479.

The movement of the population for five years was as follows:—

|      | Births | Marriages | Deaths | Excess of Births |
|------|--------|-----------|--------|------------------|
| 1935 | 10,018 | 5,034     | 6,857  | 3,156            |
| 1936 | 10,571 | 5,451     | 7,222  | 3,349            |
| 1937 | 11,279 | 6,191     | 7,973  | 3,306            |
| 1938 | 12,488 | 6,189     | 7,458  | 4,980            |
| 1939 | 13,176 | 7,897     | 7,626  | 5,550            |

**Education.**—A complete system of free and non-sectarian education was established by Act in 1872. Attendance is compulsory from the age of seven to fifteen.

There were 118 high schools, with 91,119 enrolled pupils and 854 teachers and 45 junior high schools with 14,842 pupils, 519 teachers in 1942-43. The number of elementary schools was 878, with 2,563 teachers and 78,241 pupils. There were 38 superior schools with 3,245 pupils and 119 teachers. The Provincial University was founded by Act in 1908. It began operations as a teaching institution in 1915, and in 1942-43 there were 2,609 students, with 264 more at Victoria College. There are 2 normal schools, with 219 students in attendance in 1942-43.

In addition, 4,988 students took advantage of the winter programme of evening continuation classes, and 2,671 students studied under the system of high school and elementary correspondence courses designed for those unable to obtain instruction in the public schools.

**Finance.—Revenue and expenditure:—**

|                      | Revenue<br>Dollars | Expenditure<br>Dollars |                      | Revenue<br>Dollars | Expenditure<br>Dollars |
|----------------------|--------------------|------------------------|----------------------|--------------------|------------------------|
| 1939-40              | 28,820,641         | 28,765,457             | 1942-43 <sup>1</sup> | 33,155,058         | 33,094,292             |
| 1940-41              | 36,253,936         | 28,876,742             | 1943-44 <sup>1</sup> | 31,987,536         | 31,792,445             |
| 1941-42 <sup>1</sup> | 31,957,891         | 29,947,207             | 1944-45 <sup>1</sup> | 34,600,000         | 34,500,000             |

<sup>1</sup> Estimates.

On February 22, 1944, the net debt totalled 135,000,000 dollars.

**Production and Industry.**—British Columbia produced, in 1943, minerals to the estimated value of 65,892,395 dollars; fish, 32,500,000 dollars; agricultural produce, 77,500,000 dollars, and forest production, 118,434,000 dollars.

Fruit crop in 1944: apples, 6,479,920 boxes; pears, 492,580 boxes; grapes, 2,770,100 lb.; peaches, 1,350,100 twenty-pound packages.

In 1943 gold produced was valued at 9,260,000 dollars; copper, lead, zinc and nickel, 34,708,000 dollars; coal, 7,399,000 dollars.

Particulars of the agricultural output and numbers of live-stock are given under CANADA above.

British Columbia's industrial payroll for 1943 was estimated at 331,000,000 dollars, in which shipbuilding played an important part.

**Communications and Shipping.**—The Canadian Pacific and the Canadian National lines are at present the principal railways in the Province. The C.P.R. has three main lines, the Canadian Pacific Railway, the Crow's Nest Pass Railway, the Kettle Valley Railway, and several branches connecting with United States railway systems, also steamboat connections on the inland lakes, besides a large fleet of ocean-going and coasting steamers. The Canadian National has two main lines, diverging in Yellowhead Pass, Mount Robson Park, one with ocean terminus at Prince Rupert and the other at Vancouver, besides steamship lines. The Pacific Great Eastern Rly., owned and operated by the Province, runs north and south through the heart of the country. The railway mileage in 1942 was 3,849 (not including logging, mining and industrial railways).

In the year ending March 31, 1942, a total of 49,328 sea-going vessels, with a net tonnage of 23,308,889 tons, entered British Columbia.

**Banking.**—Bank debits for three years:—1941, 2,427,144,584 dollars; 1942, 2,840,882,813 dollars; 1943, 3,297,405,107 dollars.

**MANITOBA.**

**Constitution and Government.**—Manitoba was known as the Red River Settlement before its entry into the Dominion in 1870. The Provincial Government is administered by a Lieutenant-Governor and a Legislative Assembly of 55 members elected for five years. Women have been enfranchised. Proportional representation has been adopted for the 10 seats in the City of Winnipeg, and the transferable vote for all other constituencies. The province is represented by 6 members in the Senate and 17 in the House of Commons of Canada. The Crown lands and other natural resources of the Province, formerly in the hands of the Dominion Government, were transferred to the Province as from July 15, 1930.

**Lieutenant-Governor.**—His Honour R. F. McWilliams, K.C. (November, 1940).

The members of the Ministry (November, 1944) are as follows:—

**Premier and President of the Council, and Minister of Dominion-Provincial Relations, Provincial Treasurer.**—Hon. S. S. Garson, K.C.

**Minister of Industry and Commerce, Mines and Natural Resources, and Provincial Secretary.**—Hon. J. S. McDiarmid

**Minister of Public Works.**—Hon. Errick F. Willis (Leader of the Conservative Party).

**Attorney-General and Minister of Labour.**—Hon. James McLennan, K.C. (Cons.)

**Minister of Agriculture and Immigration and Minister of Provincial Hydro.**—Hon. D. L. Campbell.

**Minister of Education.**—Hon. John C. Dryden.

**Municipal Commissioner and Minister of Telephones and Telegraphs.**—Hon. William Morton.

**Minister of Health and Public Welfare.**—Hon. Ivan Schultz.

**Members of the Executive Council without portfolio.**—Hon. A. R. Welch (Cons.), Hon. N. L. Turnbull (S.C.) and Hon. S. Marcoux.

State of parties in Legislative Assembly (April 24, 1941): Progressive Liberal (Government), 26; Conservative, 15; Labour, 3; Social Credit, 3; Independent, 7; Workers Party, 1.

**Area and Population.**—The area of the Province is 246,512 square miles (219,723 sq. miles land and 26,789 sq. miles water). In 1912 its boundaries were extended to the shores of Hudson Bay. (See map, STATESMAN'S YEAR-BOOK, 1912.) The population (census, 1941) was 729,744. The rural population in 1941 was 407,871. Population of the principal cities:—Winnipeg (capital), 221,960 (census, 1941); St. Boniface, 18,157; Brandon, 17,383; Portage la Prairie, 7,189.

## Vital statistics for 4 years:—

| Year | Births | Marriages | Deaths | Year | Births | Marriages | Deaths |
|------|--------|-----------|--------|------|--------|-----------|--------|
| 1940 | 14,771 | 8,849     | 6,359  | 1942 | 15,662 | 6,396     | 8,374  |
| 1941 | 14,812 | 8,305     | 6,495  | 1943 | 16,412 | 6,901     | 7,007  |

**Education.**—Education is locally controlled, as in all the provinces, and is supported by local taxation and Government grants. The University of Manitoba, founded in 1877 in Winnipeg, had (in 1943-44) 2,480 regular course students in all courses. There were (1942-43) 4,402 teachers and 123,080 pupils in the 4,259 public schoolrooms. There are 137 schools, having one room for high school work, 58 two-room high schools, 20 junior high schools, 20 collegiate departments and 29 collegiate institutes.

**Finance.**—Revenue and expenditure for six years:—

| Year. | Revenue.   | Expenditure. | Year. | Revenue.   | Expenditure. |
|-------|------------|--------------|-------|------------|--------------|
|       | Dollars.   | Dollars.     |       | Dollars.   | Dollars.     |
| 1939  | 16,960,854 | 16,960,854   | 1942  | 19,920,812 | 18,151,988   |
| 1940  | 18,052,640 | 18,052,640   | 1943  | 20,749,490 | 18,567,398   |
| 1941  | 18,845,607 | 17,982,274   | 1944  | 21,012,974 | 18,815,818   |

**Production and Industry.**—The southern part of Manitoba is rich agricultural land, while the northern two-thirds of the province form part of the Canadian shield, an area underlain by pre-Cambrian rocks which have been proved to be rich in mineral deposits in other parts of Canada. For particulars of agricultural production and number of live-stock, see under CANADA above.

Total value of minerals, 1942, 14,345,046 dollars. Gold in the Rice Lake area and large copper-zinc-gold-silver deposits in northern Manitoba are now being operated. The numerous lakes in Manitoba furnish large quantities of excellent fish. Total quantity taken, 1942-43, 33,678,800 lb., value to fishermen 2,959,921 dollars; value marketed 3,843,381 dollars. Forest reserves in Manitoba (including Riding Mountain National Park), 3,173,875 acres. Value of pelts in 1942-48 taken from the wild 2,012,746 dollars; from ranch-bred animals, 1,111,187 dollars. Water power (1943) developed 420,700 horse-power. Value of power produced (1943), 10,620,319 dollars.

Statistics of manufactures for 1942: 1,287 industrial establishments, with a capital of 175,902,477 dollars; employees, 37,519; wages and salaries, 51,605,000 dollars; cost of materials used, 159,248,000 dollars, and gross value of products, 259,554,000 dollars.

**Communications.**—In the year 1943, the Province had approximately 5,000 miles of railway, not including industrial track, yards and sidings. There are (1944) 81,064 miles of open telephone wire in Manitoba, and 92,031 telephones (subscribers), which includes 3,774 of municipal and privately owned systems.

**NEW BRUNSWICK.**

**Constitution and Government.**—New Brunswick was discovered by Jacques Cartier in 1534. It was acquired by the English under the Treaty of Utrecht in 1713, and was settled by the English as early as 1761. In 1784 it was separated from Nova Scotia. The Government is at present vested in a Lieutenant-Governor and a Legislative Assembly of 48 members elected for five years. Franchise—any male or female British subject of full age, after six months' residence. Last election, August 28, 1944:—Liberals 36, Progressive Conservatives 12. The province is represented by 10 members of the Senate and 10 in the Canadian House of Commons.

**Lieutenant-Governor.**—Hon. William George Clarke (appointed March 6, 1940).

The members of the Ministry are as follows (September 27, 1944):—

**Premier, Attorney-General and President of the Executive Council.**—Hon. J. B. McNair, K.C., M.L.A.  
**Provincial Secretary-Treasurer.**—Hon. J. J. Hayes Doone, M.L.A.  
**Minister of Public Works.**—Hon. W. S. Anderson, M.L.A.  
**Minister of Lands and Mines.**—Hon. F. W. Pirie, M.L.A.  
**Minister of Agriculture.**—Hon. A. C. Taylor, M.L.A.  
**Minister of Health and Social Services.**—Hon. F. A. McGrand, M.D., M.L.A.  
**Minister of Labour.**—Hon. Samuel E. Mooers, M.L.A.  
**Minister of Education and Minister of Federal and Municipal Relations.**—Hon. C. H. Blakeney, M.L.A.  
**Minister of Industry and Reconstruction.**—Hon. J. André Doucet, M.L.A.  
**Minister without Portfolio and Chairman of the New Brunswick Electric Power Commission.**—Hon. J. Gaspard Boucher, M.L.A.

**Area and Population.**—The area of the Province is 27,985 square miles, of which 27,473 square miles are land area. There are 7½ million acres of Crown lands, principally lumber lands. The population (census, 1941) was 457,401; in 1931, 408,219. The rural population in 1941 was 318,978. Population of the principal cities (1941):—Saint John, 51,741; Moncton, 22,763; Fredericton (capital), 10,062.

**Education.**—Public education is free and non-sectarian. There are five universities. The University of New Brunswick, at Fredericton, is supported by the Province. It was founded in 1800, and had 365 students in 1942-43; the Mount Allison University at Sackville had 424 students. The other three are St. Joseph's College at Memramcook (214 students), St. Thomas at Chatham (79 students) and Sacred Heart at Bathurst (348 students). There were (1942-43) 82,007 pupils and 2,881 teachers in the 1,610 public schools.

**Finance.**—The finance for recent years is shown as follows (years ended October 31):—

| Year | Ordinary Revenue | Ordinary Expenditure | Year              | Ordinary Revenue | Ordinary Expenditure |
|------|------------------|----------------------|-------------------|------------------|----------------------|
|      | Dollars          | Dollars              |                   | Dollars          | Dollars              |
| 1933 | 8,609,192        | 8,549,782            | 1941 <sup>1</sup> | 10,189,855       | 10,108,554           |
| 1939 | 8,475,068        | 9,850,135            | 1942 <sup>1</sup> | 11,500,460       | 10,641,229           |
| 1940 | 10,802,143       | 9,764,000            | 1943 <sup>1</sup> | 12,230,737       | 10,487,777           |

<sup>1</sup> Estimates.

Bonded debt (exclusive of Treasury Bills), October 31, 1943, 103,834,573 dollars.

**Production and Industry.**—New Brunswick is productive in agricultural manufacture, mining, fishing, and forest products. The total area under field crops in 1943 was 984,500 acres. For particulars of agricultural production and live-stock see under CANADA.

The Crown lands held by the province include 7,500,000 acres out of the total land area of 18,000,000 acres. About 14,000,000 acres are covered with productive forest, of which the Crown owns about one half. In 1941 the gross value of forest production was 56,634,000 dollars, which was equal to more than 49 per cent. of the total production of all primary industries. The capital invested in pulp and paper mills, sawmills, logging and driving equipment, etc., is placed at 48,000,000 dollars, and wages in forest industries amount to approximately 8,000,000 dollars annually.

A considerable variety of minerals is known to exist in the Province, such as iron, copper, antimony, lead, zinc, tungsten, manganese, bituminous coal, gypsum, oil shale, salt, diatomite. The chief active mining in the year 1942 was in coal and gypsum. Quantities of good limestone exist in the southern part of the Province, and are quarried for lime, the pulp industry and as a fertilizing agent. Various granites are quarried and manufactured at St. George, and pulpstones may be obtained at Quarryville. Natural gas and oil are produced near Moncton. Coal output, 1943, 380,000 net tons.

In 1941 there were 791 industrial establishments, with a capital of 97,952,799 dollars, employing 19,600 persons; salaries and wages, 21,718,407 dollars; cost of materials, 59,234,107 dollars; gross value of products, 123,839,475 dollars.

The total value of fisheries in 1942 was 7,088,302 dollars, and in 1941, 6,484,831 dollars.

**Commerce and Communications.**—The exports of the Province in 1942 amounted to 373,969,931 dollars; the imports for consumption to 35,018,410 dollars.

The Province had in 1943, 12,373 miles of highway, including 11,354 miles of gravel roads and 1,019 miles of bituminous surface.

There were 1,836 miles of steam railway operating in 1941. In 1941 there were 80,872 miles of telephone wire and 38,863 telephones.

#### Books of Reference.

Reports of various Government Departments.  
Bulletin: Sixth Census of Canada. Ottawa, 1921.  
New Brunswick: Its Natural Resources. Ottawa, 1930.  
Thomas (L. O.), The Province of New Brunswick, Canada. Ottawa, 1930.  
See also under CANADA.

#### NOVA SCOTIA.

The first permanent settlement was made by the French early in the seventeenth century, and the province was called Acadia until finally ceded to the British by the Treaty of Utrecht in 1713.

**Constitution and Government.**—Under the 'British North America Act' of 1867 the Legislature of Nova Scotia may exclusively make laws in relation to local matters, including direct taxation within the Province, and the administration of justice. The Legislature of Nova Scotia consists of a Lieutenant-Governor, appointed and paid by the Federal Government, and holding office for five years; and a House of Assembly of 30 members, chosen by popular vote every five years. The province is represented in the Dominion Senate by 10 members, and in the House of Commons by 12.

The franchise and eligibility to the Legislature are granted to every person, whether male or female, if of full age (21 years), a British subject, and a resident for one year in the Province and two months before the date of the writ of election in the county or electoral district of which the polling district forms part, and if not by law otherwise disqualified, or in receipt of aid as a pauper.

At the election held in October, 1941, there were returned 23 Liberals, 4 Conservatives and 3 Co-operative Commonwealth Federation.

**Lieutenant-Governor.**—Lieut.-Col. The Hon. Henry Ernest Kendall, M.D. (appointed November 30, 1942).

The members of the Ministry are as follows (appointed September 5, 1933; re-elected June 29, 1937, and October 28, 1941):—

**Premier, Provincial Secretary and Treasurer.**—Hon. Alexander Stirling MacMillan (July 10, 1940).

**Minister of Agriculture and Marketing.**—Hon. John A. McDonald.  
**Attorney-General, Minister of Lands and Forests and Minister of Municipal Affairs.**—Hon. Josiah H. MacQuarrie, K.C.

**Minister of Mines and Minister of Labour.**—Hon. L. D. Currie, K.C.  
**Minister of Public Health, Minister of Public Welfare and Registrar-General.**—Hon. Frank Roy Davis, M.D., C.M.

**Minister of Highways and Public Works.**—Hon. J. D. McKenzie (February 24, 1941).

**Minister of Industry and Publicity.**—Hon. Harold Connolly (February 24, 1941).

**Minister without Portfolio.**—Hon. Joseph Willie Comeau.

**Area and Population.**—The area of the Province is 21,068 square miles, of which 20,073 square miles are land area, and 325 square miles fresh water area. The population (census, 1941) was 577,962.

Population of the principal cities and towns (1941):—Halifax, 70,488; Sydney, 28,305; Glace Bay, 25,147; Dartmouth 10,847; Truro, 10,272; New Glasgow, 9,210; Amherst, 8,620; Sydney Mines, 8,198; Yarmouth, 7,790.

The vital statistics for three years are as follows:—

| Calendar Year | Births | Marriages | Deaths | Excess of births |
|---------------|--------|-----------|--------|------------------|
| 1940          | 12,856 | 6,401     | 6,239  | 6,617            |
| 1941          | 13,903 | 6,596     | 6,914  | 6,989            |
| 1942          | 15,306 | 6,874     | 6,385  | 8,921            |

elected for five years by a general franchise. It is the Executive Council that really carries on the government, and it remains in power as long as it retains the confidence of the Legislature. Women have the vote and can be elected to the chamber.

At the elections for the Provincial Legislature held on August 4, 1943, the following parties were returned:—Progressive Conservatives, 39; Co-operative Commonwealth Federation Party, 34; Liberals, 14; Labour, 2; Independent Liberal, 1; total, 90.

*Lieutenant-Governor.*—The Hon. Albert Matthews.

The members of the Progressive Conservative Ministry (sworn on August 17, 1943) are as follows:—

*Premier and Minister of Education.*—Lt.-Col. the Hon. G. A. Drew, K.C.

*Provincial Treasurer and Minister of Mines.*—Hon. L. M. Frost, K.C.

*Minister of Agriculture.*—Brig.-Gen. Hon. T. L. Kennedy.

*Attorney-General.*—Hon. Leslie E. Blackwell, K.C.

*Minister of Health and Public Welfare.*—Dr. the Hon. R. P. Vivian.

*Minister of Highways and Public Works.*—Hon. G. H. Doucet.

*Minister of Lands and Forests.*—Hon. W. G. Thompson.

*Minister of Labour.*—Hon. C. Daley.

*Provincial Secretary and Minister of Municipal Affairs.*—Hon. G. H. Dunbar.

*Minister of Planning and Development.*—Hon. Dana H. Porter.

*Minister without Portfolio.*—Hon. G. H. Chaffee.

**Area and Population.**—The total area is 412,582 square miles (363,282 sq. miles land area and 49,300 water). The Province is roughly divided into two sections by a line running westward from Mattawa on the Ottawa River to Georgian Bay—southern (or old) Ontario, the older settled portion, with an area of about 77,000 square miles, and northern (or new) Ontario, with an area of about 330,000 square miles, of which 146,400 square miles, the district of Patricia, were added in 1912.

The population of the Province (census, June 2, 1941) was 3,787,655. The Indian population of the Province in 1941 was 30,339. Population of the principal cities (1943):—Toronto (capital), 674,285; Hamilton, 174,222; Ottawa, 163,929; Windsor, 117,031; London, 81,158.

Vital statistics, 1942:—births, 77,638; marriages, 45,499; deaths, 40,835.

**Education.**—There is a complete State system of elementary and secondary schools. The University of Toronto, founded in 1827, has (1944) 991 professors and lecturers, and 7,129 students (3,863 men and 2,920 women). The other universities are Queen's at Kingston, Western Ontario at London, McMaster at Hamilton, and Ottawa in Ottawa, which are private foundations. The first two are now undenominational and are aided by the State. The Royal Military College at Kingston is maintained by the Dominion Government. There were, in 1944, 7,359 day and evening schools of all grades with over 668,322 pupils enrolled. There were 21,594 certificated teachers engaged in these elementary and secondary schools. The total expenditure by the Government of Ontario on education for the fiscal year 1942-43 was 14,956,000 dollars.

**Finance.**—The net revenue and expenditure in recent years were as follows:—

| Year     | Revenue     | Expenditure | Year     | Revenue     | Expenditure |
|----------|-------------|-------------|----------|-------------|-------------|
| March 31 | Dollars     | Dollars     | March 31 | Dollars     | Dollars     |
| 1938-39  | 86,848,271  | 86,520,775  | 1941-42  | 111,496,170 | 96,837,016  |
| 1939-40  | 88,172,952  | 91,407,048  | 1942-43  | 108,314,063 | 92,264,245  |
| 1940-41  | 103,802,020 | 89,867,589  | 1943-44  | 118,051,335 | 106,785,867 |

The public gross debt on March 31, 1944, was 666,527,963 dollars.

**Production and Industry.**—The Province is rich in agricultural and mineral resources. There are 17,000,000 acres of cleared land, of which 8,822,500 acres are under field crops (1942). Beyond the cultivated portion it is estimated that northern Ontario alone contains some 20,000,000 acres of alluvial soil, not including the vast stretches of agricultural land south and west of James Bay. The gross value of agricultural production in 1943 amounted to 572,322,000 dollars. The principal farm products were obtained in 1943 from 8,005,100 acres. For particulars of agricultural production and live-stock see under CANADA above.

The mineral production in 1943 included gold, 2,117,218 ozs.; silver, 2,671,320 ozs. The total value of the mineral production of Ontario in 1943 was 229,760,526 dollars.

Total area of productive forest is about 170,000 square miles; chief timber is spruce, pine, birch and poplar.

In 1942 Ontario had 10,711 manufacturing establishments, with a capital investment of 2,632,519,471 dollars, employing 542,958 persons. Total salaries and wages paid, 840,783,705 dollars; cost of materials used, 2,056,746,983 dollars; gross value of production, 3,817,396,404 dollars.

**Communications.**—There were in 1942, 73,089 miles of public road with a capital expenditure during 1942 of 40,454,411 dollars. In 1941 there were 10,476 miles of steam railway in Ontario. There were 730,124 telephones in 1942.

*Agent General for Ontario in London.*—Major J. S. P. Armstrong.

### Books of Reference.

Reports of various Government Departments.

Guillet (E. C.), *Early Life in Upper Canada*. Toronto, 1933.

London (F.), *Western Ontario and the American Frontier*. New Haven, 1941.

### PRINCE EDWARD ISLAND.

This island was discovered by Sebastian Cabot in 1497; it was first settled by the French, but was taken from them in 1758. It was annexed to Nova Scotia in 1763, and constituted a separate colony in 1769.

**Constitution and Government.**—Prince Edward Island entered the Confederation on July 1, 1873. The Provincial Government is administered by a Lieutenant-Governor and a Legislative Assembly of 30 members, who are elected for 5 years, half by real property holders and the remainder by universal male and female suffrage. Women can also be elected to the Assembly. State of Parties (elected September 15, 1943): Liberals, 20; Progressive Conservatives, 10; total, 30.

*Lieutenant-Governor.*—Hon. Bradford William Le Page.

**Education.**—Education in Nova Scotia is free, compulsory, and undenominational. Besides the elementary schools and high schools, there are in Halifax Maritime Provinces schools for the blind and for the deaf. A large Provincial Agricultural College is established at Truro; also a Normal College for the training of teachers. The Provincial Technical College grants degrees in civil, mining, chemical and electrical engineering. It also conducts correspondence courses in numerous subjects. Besides this central institution there are, working under its supervision, coal mining schools near all the collieries, and engineering and technical schools of various kinds in the industrial centres.

The total expenditure on education for the year ending June 30, 1943, was 5,564,854 dollars. The Province has 9 universities and colleges; 3,451 departments operated in 1,743 school sections, with 4,006 teachers and 114,813 pupils, of whom 23,258 were in junior high school and 8,590 were in senior high school grades.

**Justice and Crime.**—Justice in Nova Scotia is administered by the following courts: Courts for the collection of small debts; county courts; inferior courts in criminal cases; courts of superior jurisdiction; a divorce court and probate courts. The supreme court of appeal is composed of a chief justice and six judges. There are also courts for the revision of assessment rolls and voters lists, and a court for juvenile delinquents.

For the year ended November 30, 1943, 3,325 persons were imprisoned for various crimes and misdemeanours.

**Finance.**—The revenue is raised from Dominion subsidies, royalty on coal and minerals, succession duties, special fees or taxes on partnerships, automobiles and other statutory fees, a tax on gasoline, theatres, telephones and, until the year 1941, special taxes on banks, insurance, loan, trust, finance, telegraph and cable, telephone, gas, electric, express and railway companies and on incorporated companies. Under an agreement with the Dominion Government the Province has vacated the fields of personal income and corporation taxes (which include such last mentioned companies) for the duration of the agreement which is for the period of the present war and one year thereafter. The Dominion is to pay to the Province as compensation a sum agreed on as necessary to service the debt of the Province with an additional amount representing the loss the Province has sustained over and above such debt service. For purposes of determining the amount due the financial statement of the Province for the fiscal year of the Province ending on November 30, 1940, has been taken.

Revenue, expenditure and debt for five years:—

| Year    | Revenue    | Expenditure | Debt        |
|---------|------------|-------------|-------------|
|         | Dollars    | Dollars     | Dollars     |
| 1939-40 | 13,591,066 | 12,109,567  | 105,122,646 |
| 1940-41 | 15,071,598 | 13,578,434  | 108,186,780 |
| 1941-42 | 17,108,001 | 13,744,723  | 100,910,683 |
| 1942-43 | 17,566,089 | 14,045,544  | 100,920,683 |
| 1943-44 | 16,539,004 | 14,998,683  | —           |

Sinking Fund investments totalled 11,441,919 dollars. Revenue producing assets were: advances to Nova Scotia Power Commission, 13,608,115 dollars; other revenue producing assets, including balance at credit of Province with Federal Government, 4,063,237 dollars; totalling 17,671,352 dollars.

**Production and Industry.**—Nova Scotia is a province of many industries. Agriculture, coal-mining, fishing, and steel manufacturing are the most important. Dairying, poultry raising, and orcharding are the most important branches of agriculture. The production of apples in 1943 was 1,750,000 barrels. For particulars of agricultural production and livestock, see under CANADA above. The wool clip for 1943 was 526,000 lb.

Principal minerals are (November 30, 1943): coal output, 6,044,806 short tons; coal sales, 5,525,923 short tons; coke, 503,720 short tons; tar, 8,129,263 imperial gallons; gold, 4,763 ozs.; gypsum, crude, 190,223 calcined, 4,080 short tons; salt, 44,606 short tons.

The known coal fields embrace 1,000 square miles. The gold districts cover about 10,250 square miles.

The estimated forest area of Nova Scotia is over 15,000 square miles. The principal trees are spruce, fir, hemlock, pine, birch, oak and maple.

The fisheries of the Province in 1943 had a value of 12,473,472 dollars, including cod fishery, 4,660,994 dollars, and lobster fishery, 3,094,565 dollars. In 1942, 15,057,001 dollars were invested in this industry, and about 17,104 men were employed.

The number of manufacturing establishments was (in 1942) 1,332, with a capital invested of 152,668,789 dollars, employing 31,318 wage-earners; wages and salaries, 41,273,942 dollars; gross value of products, 155,931,264 dollars.

**Commerce and Communications.**—The imports entered for consumption during the calendar year ending December 31, 1940, were 38,139,572 dollars; the exports, 108,327,074 dollars.

The country is covered with a network of railways, 1,420 miles in extent. There are 15,023 miles of highways; 1,615 trunk (931 paved), 13,408 county highways. The figures are exclusive of highways within cities and towns. Besides this, subsidised boats ply round the shores, making regular calls at all the important ports.

### ONTARIO.

**Constitution and Government.**—From 1791 to 1867 Ontario was called Upper Canada. The Provincial Government is administered by a Lieutenant-Governor, a cabinet, and one chamber with according to the provisions of The Representation Act, 1933, 90 members. The latter are

*Minister of Lands and Forests.*—Lieut.-Col. the Hon. John S. Bourque, M.L.A.

*Minister of Health.*—Dr. the Hon. J. H. Albiny Paquette, M.L.A.

*Minister of Municipal Affairs.*—Hon. Bona Dussault, M.L.A.

*Government Leader in the Legislative Council.*—Hon. Sir Thomas Chapais, M.L.C.

*Minister of Roads.*—Hon. Antonio Talbot, M.L.A.

*Minister of Public Works.*—Hon. Roméo Lorrain, M.L.A.

*Minister of Mines.*—Hon. Jonathan Robinson, K.C., M.L.A.

*Minister of Colonization.*—Hon. J. D. Bégin, M.L.A.

*Minister of Game and Fisheries.*—Dr. the Hon. Camille E. Pouliot, M.L.A.

*Minister of Labour.*—Hon. J. Antonio Barrette, M.L.A.

*Minister of Trade and Commerce.*—Hon. Paul Beaulieu, M.L.A.

*Minister of Agriculture.*—Hon. Laurent Barre, M.L.A.

*Provincial Secretary.*—Hon. Omer Côté, M.L.A.

*Ministers without Portfolio.*—Hon. Antonio Elie, M.L.A.; Hon. Taucrède L'Abbé, M.L.A.; Dr. the Hon. Marc Trudel, M.L.A.; Hon. Patrice Tardif, M.L.A.; Hon. J. T. Larochelle, M.L.A.; Hon. J. M. Delisle, M.L.A.

**Area and Population.**—The area of Quebec (as amended by the Labrador Boundary Award) is 594,534 sq. miles (523,534 sq. miles land area and 71,000 sq. miles water). Of this extent, 351,780 sq. miles represent the Territory of Ungava, annexed in 1912 under the Quebec Boundaries Extension Act. The population (census, 1941) was 3,331,882. Of the 1941 population 91,857 were British born and 3,107,939 Canadian born. The rural population in 1941 was 1,222,198, and the urban population 2,109,684. According to religious beliefs, in 1941, 2,894,621 were Roman Catholics, 162,056 Anglicans, 100,196 United Church, 65,683 Jews and 4,228 Protestants. Population of the principal cities, 1941 :—Montreal, 903,007; Quebec (capital), 150,757; Verdun, 67,349; Three Rivers, 42,007; Sherbrooke, 35,965; Hull, 32,947.

**Education.**—The province has four universities: McGill (Montreal, Protestant) founded in 1821, with 5,144 students in 1941-42; Lennoxville, also Protestant, founded in 1845, with 141 students in 1941-42; Laval (Quebec), founded in 1852, and University of Montreal (Montreal), the centre of higher education for the Catholic population of the province, with 5,900 students in Quebec in 1941-42, and 15,982 in Montreal (comprises enrolment in affiliated institutions). Quebec had, in 1941-42, 9,851 schools of all kinds, with 722,906 pupils and 31,495 teachers. All the schools are sectarian, i.e., are either Catholic or Protestant. The total expenditure on education was 43,500,000 dollars in 1941-42.

**Finance.**—The ordinary revenue and expenditure for 6 years :—

| Years ended<br>June 30 | Revenue    | Ordinary<br>Expenditure <sup>1</sup> | Years ended<br>June 30 | Revenue    | Ordinary<br>Expenditure <sup>1</sup> |

<sup>1</sup> Inclusive of amounts shown as extraordinary expenditure in Public Accounts, 1936-37 to 1939-40.

<sup>2</sup> 9 months ended March 31.

The total public debt at March 31, 1944, was 334,566,099 dollars, and the net funded debt 318,945,911 dollars.

**Production and Industry.**—Agriculture is the basic industry of the Province. According to the agricultural statistics for 1943, the total area under cultivation in the Province, was 6,750,700 acres and the value of the crops 148,317,000 dollars. The principal varieties cultivated are wheat, oats, barley, rye, peas, buckwheat, mixed grains, flaxseed, corn, potatoes, turnips, hay, clover and alfalfa.

The value of the wool clip for 1943 was estimated at 618,000 dollars.

There are about 262,300 sq. miles of forests, made up as follows: private forests, 26,580 sq. miles; wood lots under location tickets, 1,000 sq. miles; forests leased, 75,293 sq. miles; township forest reserves, 2,169 sq. miles; and timber lands not leased, 154,479 sq. miles. Quebec leads the Canadian Provinces in pulpwood production, having over half of the Canadian estimated total. In 1943, 2,617,403 tons of pulp and 1,986,865 tons of paper were produced, valued at 117,928,840 dollars.

The principal fish are cod, mackerel, lobsters, salmon, and herring.

The value of the mineral production of the province was 104,404,146 dollars in 1942 and 100,830,007 dollars in 1943. Production of metallic minerals (copper, chromium, molybdenum, selenium, tellurium, zinc, titaniferous iron ore and others), valued at 61,084,000 dollars. Gold, 1,090,659 ounces, valued at 22,545,922 dollars at standard rate. Among non-metallic minerals produced are feldspar, asbestos, lime, mica and quartz.

The number of fur farms in the Province in 1942 was 2,341, with landed property and buildings valued at 1,361,087 dollars and animals in captivity estimated at over 1,658,501 dollars. Of all the wild animals, the fox has proved the most adaptable to breeding. The total value of fur production for the season 1942-43 (pelts taken by trappers and p-its sold from fur farms) was over 4,562,354 dollars. The royalties collected on pelts taken during the same year netted to the Government the sum of 117,668 dollars.

In 1942 there were 9,342 industrial establishments in the province, with a capital of 1,883,353,668 dollars; employees, 399,017; salaries and wages, 536,329,170 dollars; cost of materials, 1,193,445,432 dollars; gross value of products, 2,333,303,012 dollars. Among the leading industries are pulp and paper, non-ferrous metal smelting and refining, chemical products, cotton and its products, cigars and cigarettes, railway rolling stock, shipbuilding, aircraft, butter and cheese, flour and its products, boots and shoes, saw mills, slaughtering and meat packing, breweries and rubber goods.

**Commerce and Communications.**—Total imports for consumption in 1942 amounted to 507,546,376 dollars; total exports to 607,803,232 dollars.

Quebec had 5,203 miles of railway and 422 miles of tramway in 1942. There were 364,837 telephones and 2,612 post offices, as well as 906 telegraph offices in 1942. It is estimated that there are 38,907 miles of roads in the Province, of which 22,165 are improved.

The members of the Executive Council are as follows (September, 1944):—  
*Premier, President of the Executive Council and Minister of Education.*—Hon. J. Walter Jones.  
*Attorney and Advocate-General.*—Hon. Frederic Alfred Large.  
*Provincial Secretary-Treasurer and Minister of Public Welfare.*—Hon. William Hughes.  
*Minister of Public Works and Highways.*—Hon. George H. Barbour.  
*Minister of Agriculture.*—Hon. W. F. Alan Stewart.  
*Ministers without Portfolio.*—Hon. Horace Wright, Hon. John A. Campbell, Hon. Marin Gallant, Hon. T. William L. Prowse.

**Area and Population.**—The province, which is the smallest in the Dominion, lies at the mouth of the Gulf of St. Lawrence, and is separated from the mainland of New Brunswick and Nova Scotia by Northumberland Strait. The area of the island is 2,184 sq. miles. The total population (census, June 2, 1941) was 95,047. Population of the principal cities (1941):—Charlottetown (capital), 14,460; Summerside, 4,978.

**Religion and Education.**—The population of the Province at the census of 1941 was divided among the different creeds as follows:—Roman Catholic, 42,743; United Church, 24,005; Presbyterian, 14,724; Anglican, 5,789; Baptist, 5,443; other, 2,393. There were (1943) 454 schools, 659 teachers, 17,179 pupils. This is exclusive of 2 Roman Catholic convent schools at Charlottetown and Summerside, with 617 pupils. There are two colleges, Prince of Wales College, head of the provincial school system, and St. Dunstan's University, a Roman Catholic institution, both in Charlottetown. Total expenditure on Government education in 1943-44 was 764,160 dollars for the fifteen-month period ending March 31, 1944.

**Finance.**—Revenue and expenditure for five years:—

|                       | 1939      | 1940      | 1941      | 1942      | 1943-44 <sup>1</sup> |
|-----------------------|-----------|-----------|-----------|-----------|----------------------|
|                       | Dollars   | Dollars   | Dollars   | Dollars   | Dollars              |
| Revenue . . . . .     | 2,042,050 | 2,080,865 | 2,304,168 | 2,538,462 | 3,072,460            |
| Expenditure . . . . . | 2,196,717 | 2,152,108 | 2,194,810 | 2,335,914 | 3,048,820            |

<sup>1</sup> The financial year was changed from December 31 to March 31. The figures for 1943-44 are for fifteen months, from January 1, 1943, to March 31, 1944.

Total sinking funds on March 31, 1943, amounted to 2,593,669 dollars. The total liabilities of the Province amounted on March 31, 1944, to 9,123,613 dollars.

**Production and Industry.**—The farm land occupied in 1943 was 1,334,400 acres. Field crops in 1943 covered about 472,000 acres, and were valued at 14,753,000 dollars. The land in natural forest covers 725 square miles, and in pasture 398,400 acres. For particulars of agricultural production and live-stock, see under CANADA above.

Silver fox breeding is extensively carried on. Breeding foxes are exported. Since 1940, due to the war, the chief market has been with the United States. In 1942 the value of the pelts sold was 735,142 dollars.

The fisheries of the Province in 1943 had a landed value of 1,869,266 dollars, and a market value of 2,860,073. Oysters abound in Richmond Bay, the home of the famous 'Malpeques,' where the beds, under scientific cultivation, extend to upwards of 20,000 acres. The Dominion Government has possession and control of the oyster areas surrounding the Province.

In 1942 there were 243 industrial establishments, with a capital of

3,367,368 dollars, employing 1,261 persons; salaries and wages, 842,061 dollars; cost of materials, 4,789,315 dollars; gross value of products, 6,855,844 dollars.

**Commerce and Communications.**—The trade of Prince Edward Island is chiefly with the other provinces of Canada and this inter-provincial trade does not appear in the trade statistics. The gross value of the production of its various industries for the year 1943 is estimated at 34,000,000 dollars. In 1943 the province had 286 miles of railway—part of the Canadian National Railway system. Two ferries operate between Prince Edward Island and the mainland. One, a railway and automobile ferry steamer of great power, connects the lines of the Canadian National Railway on Prince Edward Island with those on the mainland, making several trips daily throughout the year. The other, an automobile ferry steamer, operates during the summer season between the island and the Province of Nova Scotia. Daily steamship communication with the mainland has been maintained, without interruption, since 1917. There is a four-times-a-day air schedule for passengers, mails and express, both ways, between the province and the mainland, connecting with the airways of the continent. In 1943 there were 10,951 miles of telephone wires and 6,075 telephones.

#### QUEBEC.

Quebec was formerly known as New France or Canada from 1535 to 1763; as the Province of Quebec from 1763 to 1790; as Lower Canada from 1791 to 1846; as Canada East from 1846 to 1867; and when, by the union of the four original provinces, the Confederation of the Dominion of Canada was formed, it again became known as the Province of Quebec.

The Quebec Act, passed by the British Parliament in 1774, guaranteed to the people of the newly conquered French territory in North America security in their religion and language, their customs and tenures, under their own civil laws.

**Constitution and Government.**—The Provincial Government is modelled on that of the Dominion organization and is in the hands of a Lieutenant-Governor and a responsible Ministry, assisted by a Legislative Council of 24 members, appointed for life by the Lieutenant-Governor, and a Legislative Assembly of 91 members elected for 5 years. Members of both Houses receive 3,000 dollars per session. Women were enfranchised by the Women's Franchise Bill, April 1940. Last election, August 8, 1944: Union Nationale, 48; Liberals, 37; Bloc Populaire, 4; Co-operative Commonwealth Federation, 1; Independent, 1.

*Lieutenant-Governor.*—Sir Eugene Fiset (appointed December 30, 1939).

The members of the Ministry (appointed August 30, 1944) are as follows:—

*Premier and Attorney-General.*—Hon. Maurice L. Dup'essis, K.C., M.L.A.  
*Provincial Treasurer.*—Hon. Onésime Gagnon, K.C., M.L.A.

## YUKON.

**Constitution and Government.**—The Yukon Territory was constituted a separate political unit in 1898. It is governed by a Controller and a Territorial Council of 3 elected members.

*Controller and Registrar.*—G. A. Jeckell.

*Territorial Treasurer.*—P. Powell.

**Area and Population.**—The area of the Territory is 207,076 sq. miles (206,427 sq. miles land area and 649 sq. miles water area). The population in 1941 was 4,914. The rural population in 1921 was 2,851 (18,077 in 1901). Population of the principal cities (1941): Dawson (capital), 1,039; White Horse, 540.

**Instruction.**—The Territory had (1941) 4 public schools with 9 teachers, and 1 Roman Catholic school with 1 teacher, and about 250 pupils.

**Finance.**—The Territorial revenue and expenditure for 6 years:—

| Year ending March 31 | Revenue | Expenditure | Year ending March 31 | Revenue | Expenditure |
|----------------------|---------|-------------|----------------------|---------|-------------|
|                      | Dollars | Dollars     |                      | Dollars | Dollars     |
| 1089                 | 224,134 | 214,922     | 1942                 | 224,163 | 235,077     |
| 1940                 | 203,486 | 205,699     | 1943                 | 245,813 | 225,581     |
| 1941                 | 232,074 | 225,085     | 1944                 | 273,056 | 276,647     |

**Production and Industry.**—Mining is the principal occupation of the people. Silver, lead, gold are the chief minerals. The output of gold in the year ending March 31, 1937, inclusive, was 62,635½ ozs. Output of silver in year 1936–37 was 621,718 ozs.

The principal forest trees are white and black spruce, balsam, poplar, cottonwood and birch.

The country abounds with big game, such as the moose, caribou, mountain sheep, bears, and fur-bearing animals.

**Communications.**—There are 58 miles of railway. In 1932 there were 155 telephones and 566 miles of wire. The Yukon river 1,437 miles long, is the great channel of communication from the coast to the interior. It is spanned by one bridge only, a foot-bridge at White Horse. There were 324 miles of waggon road, and 978 miles of sled roads and trails in the Territory in 1935.

## THE NORTHWEST TERRITORIES.

**Constitution and Government.**—The Northwest Territories comprise the Territories formerly known as Rupert's Land and the North-western Territory, except such portions thereof as form the Provinces of Manitoba, Saskatchewan and Alberta, and the Yukon Territory, together with all British territories and possessions in North America and all islands adjacent thereto, not included within any province, except the Dominion of Newfoundland and its dependencies.

For administrative purposes the Territories were subdivided into three Provisional Districts, namely, Mackenzie (527,490 sq. miles), Keewatin (228,160 sq. miles), Franklin (554,032 sq. miles), by Order in Council of March 16, 1918.

The Northwest Territories are governed by the Commissioner, the Deputy Commissioner and five Councillors appointed by the Governor-General in Council. The Commissioner in Council has power to make ordinances for the Government of the Territories under instructions from the Governor-General in Council or the Minister of Mines and Resources, subject to any Act of the Parliament of Canada applying to the Territories, respecting such matters as direct taxation within the Territories in order to raise revenue, establishment and tenure of territorial offices, maintenance of municipal institutions, administration of justice, issue of licences, education, public health, property and civil rights, and generally all matters of local nature.

*Commissioner of the Northwest Territories.*—Charles Camsell, C.M.G.

*Deputy Commissioner.*—Roy Alexander Gibson.

**Area and Population.**—The area of the Territories is 1,309,682 sq. miles. The population (census, 1941) is 12,028.

## SASKATCHEWAN.

**Constitution and Government.**—The province receives its name from the Saskatchewan River (Saskatchewan is Indian expression for 'rapid river'), which flows across its southern part. It comprises the old territorial districts of Assiniboia East, Assiniboia West (part), Saskatchewan, and the eastern portion of Athabaska. Saskatchewan was made a province by the Saskatchewan Act, passed by the Canadian parliament, which came into force on September 1, 1905, before which it was part of the Northwest Territories. The Provincial Government is vested in a Lieutenant-Governor and a Legislative Assembly of 52 members, elected for 5 years. Women were given the franchise in 1916, and are also eligible for election to the Legislature. State of parties (election June 15, 1944):—Co-operative Commonwealth Federation (Socialist Party), 47; Liberals, 5.

**Lieutenant-Governor.**—The Hon. Thomas Miller (appointed February 28, 1945).

The members of the Ministry formed on June 16, 1944, are as follows:—

**Premier, President of the Council and Minister of Public Health.**—Hon. Thomas C. Douglas, M.L.A.

**Provincial Treasurer.**—Hon. Clarence M. Fines, M.L.M.

**Attorney-General.**—Hon. J. W. Corman, K.C., M.L.A.

**Minister of Agriculture.**—Hon. Geo. H. Williams, M.L.A.

**Minister of Municipal Affairs.**—Hon. J. H. Brockelbank, M.L.A.

**Provincial Secretary.**—Hon. O. W. Valleau, M.L.A.

**Minister of Natural Resources.**—Hon. Jos. L. Phelps, M.L.A.

**Minister of Highways and Transportation.**—Hon. John T. Douglas, M.L.A.

**Minister of Education.**—Hon. Woodrow S. Lloyd, M.L.A.

**Minister of Reconstruction, Labour and Public Welfare.**—Hon. John H. Sturdy, M.L.A.

**Minister of Public Works.**—Hon. Lachlan F. McIntosh, M.L.A.

**Minister of Telephones.**—Hon. Chas. C. Williams, M.L.A.

**Area and Population.**—The province stretches along the Canada-United States boundary for 393 miles east of the 110th meridian, and extends north for 761 miles. Its northern width is 227 miles. The area of the province is 251,700 sq. miles (243,808 sq. miles land area and 8,892 sq. miles water). The population (census, 1941) was 895,992, and in 1931 was 921,785. Population of principal cities (1936): Regina, 56,520 in 1941 census (capital); Saskatoon, 41,606; Moose Jaw, 19,782; Prince Albert, 11,050; North Battleford, 4,986; Weyburn, 5,325; Swift Current, 5,296; Yorkton, 5,027.

**Education.**—The province has one university, the University of Saskatchewan at Saskatoon, established April 3, 1907. In 1939-40 it had 111 professors and 2,066 students. The right to legislate on matters relating to education is left to the province. In 1942 there were operating under the School Act 5,185 school districts with an enrolment of 161,646 pupils of elementary school grade and 35,385 pupils of high school grade. Of the public

school districts, 24 are Roman Catholic Separate and 8 are Protestant Separate. For the training of teachers there are 8 normal schools at Regina, Saskatoon and Moose Jaw.

**Finance.**—Revenue and expenditure for 6 years (ending April 30):—

|         | Revenue    | Expenditure |                      | Revenue    | Expenditure |
|---------|------------|-------------|----------------------|------------|-------------|
|         | Dollars    | Dollars     |                      | Dollars    | Dollars     |
| 1939-40 | 22,967,002 | 23,012,322  | 1942-43              | 27,275,474 | 26,727,355  |
| 1940-41 | 25,756,411 | 25,762,485  | 1943-44 <sup>1</sup> | 27,247,393 | 27,164,997  |
| 1941-42 | 28,440,367 | 28,180,818  | 1944-45 <sup>1</sup> | 30,494,503 | 30,326,130  |

<sup>1</sup> Estimates.

Net public debt, December 31, 1943, was 197,477,976 dollars.

**Production and Industry.**—Wheat production in 1943 was 156,848,700 bushels from 10,260,000 acres; oats, 210,769,750 bushels from 6,482,000 acres; barley, 82,296,440 bushels from 3,316,000 acres, and flax, 12,398,309 bushels for 2,084,400 acres. Total value of all farm products in 1942, 480,452,000 dollars.

Mineral production was valued at 26,531,000 dollars in 1943. This included 165,000 pounds of cadmium, 85,466,000 pounds of copper, 175,000 ounces of gold, 52,000 pounds of selenium, 2,657,000 ounces of silver, 7,000 pounds of tellurium, 96,916,000 pounds of zinc, 1,778,000 tons of coal, 111,000,000 cubic feet of natural gas, 160,000 tons of phosphate, 87,000 tons of sodium sulphate, 956,000 tons of sand and gravel, and clay products valued at 293,000 dollars.

The total value of the catch of the commercial fisheries during 1942-43 was 1,070,293 dollars.

In 1940, Saskatchewan had 814 industrial establishments, with a total capital of 40,698,082 dollars, employing 7,415 persons; gross value of products, 76,284,332 dollars; cost of materials, 48,654,473 dollars; wages paid, 8,412,580 dollars.

**Communications.**—There were, in 1942, 9,011 miles of steam railway in operation in the province. There are 8,046 miles of provincial highways. In 1942 there were 91,106 telephones; wire mileage (1942), 51,215 miles. 2,800,125 long distance messages originated in the province during the fiscal year ending April 30, 1943.

There were 1,517 post offices operating during 1942. Six radio broadcasting stations were in operation during 1943.

<sup>1</sup> Excluding full blood aboriginals. These are estimated to number about 48,000. The nomadic habits of the tribes in the wild state render close computation difficult. Half-castes numbered 25,191 in 1941.

The number of occupied dwellings in Australia (in 1933 census) was 1,547,376. In New South Wales, 599,750; Victoria, 432,872; Queensland, 216,122; South Australia, 139,274; Western Australia, 103,578; Tasmania, 52,484; Northern Territory, 1,301; Australian Capital Territory, 1,995. There were also 68,772 unoccupied dwellings, and 2,352 being built.

Marriages, births and deaths in 1943:—

| States and Territories       | Marriages | Births  | Deaths | Surplus of Births |
|------------------------------|-----------|---------|--------|-------------------|
| New South Wales              | 24,302    | 57,265  | 23,670 | 28,395            |
| Victoria                     | 18,856    | 39,117  | 21,327 | 17,790            |
| Queensland                   | 9,070     | 23,234  | 10,576 | 12,658            |
| South Australia              | 6,268     | 13,145  | 6,482  | 6,663             |
| Western Australia            | 4,528     | 10,481  | 4,587  | 5,894             |
| Tasmania                     | 2,102     | 5,597   | 2,527  | 3,070             |
| Northern Territory           | 46        | 80      | 49     | 31                |

| Total                        | 67,678    | 149,295 | 74,486 | 74,809            |

## Pensions and Social Benefits.

The Invalid and Old Age Pension Acts provide for the payment of invalid and old age pensions at such rates as the Commissioner deciding the question deems sufficient, but so that the amount shall not exceed 70% a year, nor the pensioner's whole income (including the pension) exceed 102% 14s. a year. By special provision, made in 1942, a permanently blind person may receive a total income equal to the Federal basic wage. Old age pensions are granted upon application to persons who are at least 65 years of age and have lived in Australia or Australian territory at least 20 years. In the case of women, however, and of men subject to certain disability, the pension may be paid from age 60. Invalid pensions are granted to persons who have lived at least 5 years in Australia, have there become totally incapacitated, and have no other sufficient means of support. At June 30, 1944, there were 257,186 old age and 57,942 invalid pensioners, the payments to whom for 1943-44 amounted to 21,699,100%. At June 30, 1944, Australian War pensioners numbered 244,452, to whom 10,348,609% was paid in 1943-44.

January 1, 1901. An Order in Council, February 7, 1933, placed under the authority of the Commonwealth of Australia the Antarctic territories, comprising all the islands and territory, other than Adélie Land, situated south of 60° S. latitude, and lying between 160° E. longitude and 45° E. longitude.

The following is a list of Governors-General of the Commonwealth :—

|                            |         |                                         |         |
|----------------------------|---------|-----------------------------------------|---------|
| Earl of Hopetoun . . . . . | 1901-2  | Lord Stonehaven . . . . .               | 1923-30 |
| Lord Tennyson . . . . .    | 1902-4  | Lord Somers (Acting) . . . . .          | 1930-31 |
| Lord Northcote . . . . .   | 1904-8  | Sir Alfred Isaacs . . . . .             | 1931-36 |
| Lord Dudley . . . . .      | 1908-11 | Lord Gowrie . . . . .                   | 1936-44 |
| Lord Denman . . . . .      | 1911-14 | Sir Winston Dugan (Acting) . . . . .    | 1944-45 |
| Viscount Novar . . . . .   | 1914-20 | H.R.H. the Duke of Gloucester . . . . . | 1945    |
| Lord Forster . . . . .     | 1920-25 |                                         |         |

On September 1, 1906, the administration of Papua was transferred to the Commonwealth (see PAPUA).

Legislative power is vested in a Federal Parliament, consisting of the King, represented by a Governor-General, a Senate, and a House of Representatives. There must be a session of Parliament at least once every year. The Senate consists of 36 Senators (at least six for each of the Original States voting as one electorate) chosen for six years. In general, the Senate is renewed to the extent of one-half every three years, but in case of prolonged disagreement with the House of Representatives, it may be dissolved, and an entirely new Senate elected. The House of Representatives consists, as nearly as may be, of twice as many members as there are Senators, the numbers chosen in the several States being in proportion to population (excluding aborigines) as shown by the latest statistics, but not less than five for any original State. Number in 1944, 74. The Northern Territory, by virtue of an Act passed in 1922, elects a member who is not entitled to vote, except on a motion for the disallowance of any ordinance of the Territory or on any amendment of any such motion, but may take part in any debate in the House. The House of Representatives continues for three years from the date of its first meeting, unless sooner dissolved. Every Senator or Member of the House of Representatives must be a natural-born subject of the King, or have been for five years a naturalised subject under a law of the United Kingdom or of a State of Australia. He or she must be of full age, must possess electoral qualification, and have resided for three years within Australia. The franchise for both Chambers is the same and is based on universal adult (male and female) suffrage. If a member elected to the Federal Parliament holds a seat in a State Parliament, he must relinquish it before entering the Federal Parliament.

The legislative powers of the Federal Parliament embrace commerce, shipping, etc.; finance, banking, currency, etc.; defence; external affairs; postal, telegraph, and like services; census and statistics; weights and measures; copyright; railways; conciliation and arbitration in industrial disputes extending beyond the limits of any one State; and other matters. The Senate may not originate or amend money bills; and disagreement with the House of Representatives may result in dissolution, or, in the last resort, a joint sitting of the two Houses. No religion may be established. The Federal Parliament is a government of limited and enumerated powers, the several State Parliaments retaining the residuary power of government over their respective territories. If a State law is inconsistent with a Commonwealth law, the latter prevails.

The Constitution also provides for the admission or creation of new States. Proposed laws for the alteration of the Constitution must be sub-

mitted to the electors, and they can be enacted only if approved by a majority of the States and by a majority of all the electors voting.

In 1911 the Commonwealth acquired from the State of New South Wales the Yass-Canberra site for the Australian capital, with an area of 911 square miles. Building operations were begun in 1923 and Parliament was opened at Canberra on May 9, 1927, by H.R.H. the Duke of York (now His Majesty King George VI). A further area of 28 square miles at Jervis Bay was acquired in 1917 for purposes of a Naval College, with the right to construct a railway from the capital thereto. (For further information concerning Canberra, see below, section AUSTRALIAN CAPITAL TERRITORY.)

Last election for the House of Representatives was held on August 21, 1943, with the following results: Federal Labour Party, 49; United Australia Party, 14; Country Party, 9; Independent, 2. Total number of members, 74.

*Senate.*—As a result of the elections held on August 21, 1943, the Labour Party, as from July 1, 1944, had 22 seats and the Opposition 14 seats (United Australian Party, 11; Country Party, 3).

The executive power, vested in the King, is exercised by the Governor-General, assisted by an Executive Council of nineteen responsible Ministers of State.

The Cabinet Fund, divided among Ministers, amounts to 22,750*l.*, and ordinary members of Parliament receive 1,000*l.* per annum.

*Governor-General.*—H.R.H. the Duke of Gloucester, K.G., P.C., K.T., K.P., Commander-in-Chief of the Commonwealth of Australia and its Dependencies (appointed November 16, 1943; assumed office on January 30, 1945).

The Labour Cabinet (appointed October, 7, 1941, and re-appointed on September 21, 1943) is as follows (the State from which each member comes is added in brackets) :—

*Prime Minister and Minister for Defence.*—Rt. Hon. J. Curtin, M.P. (W.A.). (Born 1885.)

*Minister for the Army.*—Rt. Hon. F. M. Forde, M.P. (Q.).

*Treasurer.*—Hon. J. B. Chifley, M.P. (N.S.W.).

*Attorney-General and Minister for External Affairs.*—Rt. Hon. H. V. Evall, K.C., M.P. (N.S.W.).

*Vice-President of the Executive Council.*—Hon. J. A. Beasley, M.P. (N.S.W.).

*Minister for the Interior.*—Senator the Hon. J. S. Collings (Q.).

*Minister for the Navy and Minister for Munitions.*—Hon. N. J. O. Makin, M.P. (S.A.).

*Minister for Social Services and Minister for Health.*—Senator the Hon. J. M. Fraser (W.A.).

*Minister for Trade and Customs and Leader of the Government in the Senate.*—Senator the Hon. R. V. Keane (V.).

*Minister for Air and Minister for Civil Aviation.*—Hon. A. S. Drakeford, M.P. (V.).

*Minister for Commerce and Agriculture.*—Hon. W. J. Scully, M.P. (N.S.W.).

*Minister for Supply and Shipping.*—Senator the Hon. W. P. Ashley (N.S.W.).

Provision was made in 1935-36 for the payment of service pensions to (a) aged ex-members of the forces, (b) to those permanently unemployable, (c) those suffering from tuberculosis and in certain cases to dependants of ex-soldiers. The number of pensioners (dependants stated in brackets) in each class at June 30, 1948 were:—(a) 4,270; (b) 3,695 (4,221); (c) 452 (646). The total payments in 1943-44 were 652,535*l*.

On October 10, 1912, a Maternity Act was passed providing for the payment, subject to a means test, of an allowance of 5*l*. in respect of every viable child born (alive or dead) in Australia. The sum was reduced by Financial Emergency Legislation in 1931. Under new provisions operating from July 1, 1943, the means test was abolished and the rates increased as follows:—where there are no other children, 4*l*. 10*s*. to 5*l*.; where there are one or two other children, 5*l*. to 6*l*.; where there are three or more other children, 7*l*. 10*s*., unchanged, in addition to 1*l*. 5*s*. for each of the four weeks immediately before and after the birth of the child. To June 30, 1943, 3,537,000 claims were paid, and the aggregate expenditure totalled 19,091,944*l*., of which 2,286,999*l*. was paid in 1943-44.

A Child Endowment Act came into operation on July 1, 1941. Payments of 5*s*. per week are made in respect of each child in excess of one under 16 years. At the end of 1943-44 there were 503,140 claims in force, and the number of endowed children was 903,577. During 1943-44 12,256,976*l*. was paid in endowment.

A Widows' Pensions Act was introduced in 1942, and operated first during 1942-43. Subject to certain conditions, it provides for the payment of 1*l*. 10*s*. per week to widows maintaining one or more children, and of 1*l*. 5*s*. per week to widows 50 years and over not maintaining children. A special allowance of 1*l*. 5*s*. per week, for not more than 26 weeks, is also provided for widows under 50 years not maintaining children. At June 30, 1944, there were 42,212 pensions current, and pensions paid during 1943-44 amounted to 2,800,701*l*.

### Justice.

The judicial power of the Commonwealth is vested in a Federal Supreme Court (the High Court of Australia), consisting of a Chief Justice and five Justices, appointed by the Governor-General in Council. The High Court has original jurisdiction in all matters arising under treaties, between States of the Commonwealth, or affecting representatives of other countries, as well as in other matters as empowered by the Parliament. It may also hear and determine appeals from judgments of its own Justices exercising original jurisdiction, and from judgments of any other Federal Court, or of the Supreme Court of any State, subject to certain rights of final appeal to the King in Council. The Commonwealth Court of Conciliation and Arbitration consists of a Chief Judge and two other Judges and a Conciliation Commissioner. The Federal Court of Bankruptcy is presided over by a Judge.

### Finance

Actual revenue and expenditure for 1940-41 to 1943-44 are given in the following table. Under the 'Surplus Revenue Act, 1910,' the amount payable by the Commonwealth to each State was a sum equivalent to 25 shillings per head of the population as estimated by the Commonwealth Statistician at 31st December in each year. In 1927 the States Grants Act abolished the *per capita* payments as from June 30, 1927. In 1929 in accordance with a Commonwealth Referendum, the Commonwealth took over all State Debts existing on June 30, 1927, and will pay 7,584,912*l*.

a year for 58 years towards the interest charges thereon, and will make substantial contributions towards a sinking fund to extinguish existing debts in 58 years and future debts in 58 years. The Commonwealth Government will arrange all future borrowing for both Commonwealth and States through a Loan Council consisting of representatives of Commonwealth and State Governments.

|                                                               | 1940-41            | 1941-42            | 1942-43                | 1943-44            |

| From Loans <sup>4</sup> . . . . .                             | 1,724,716          | 756,227            | 206,162                | 223,459            |
| Relief to Primary Producers . . . . .                         | 3,022,624          | 4,063,155          | 1,708,543 <sup>5</sup> | 1,940,481          |

<sup>1</sup> Excludes interest payable on States' Debts (recoverable from States).

<sup>2</sup> Net expenditure on war, works, etc.

<sup>3</sup> Includes new works.

<sup>4</sup> Includes Farmers' Debt Adjustment and Drought Relief.

<sup>5</sup> In addition, 8,084,817*l*. was provided under War Services during 1942-43 and 12,321,820*l*. during 1943-44.

War and defence expenditure for the year ended June 30, 1944, was £4545,000,000. The revenue provided £4168,000,000 and the balance of £4377,000,000 from loans.

The estimated receipts, excluding loan, for 1944-45 amount to £A359,000,000 and the expenditure for purposes other than war, £A181,000,000. The estimated war expenditure in 1944-45 is £A505,000,000, of which £A452,000,000 is for expenditure in Australia and £A53,000,000 overseas.

The following table shows the Public Debt of the Commonwealth and the States at June 30, 1944:—

| Maturing in     | Currency           | Commonwealth | States  | Total     |
|-----------------|--------------------|--------------|---------|-----------|
| London . . .    | £'000 Stg.         | 161,229      | 575,504 | 534,733   |
| New York . . .  | £'000 <sup>1</sup> | 15,790       | 25,416  | 41,206    |
| Australia . . . | £'000 Aust.        | 1,299,079    | 491,840 | 1,790,919 |
| Total . . .     | £'000 <sup>2</sup> | 1,476,098    | 890,760 | 2,366,858 |

<sup>1</sup> Payable in terms of dollars which have been converted on the basis of 4·8645 dollars to £1 stg.

<sup>2</sup> 'Face' or 'book' value, leaving out of account currency changes since the loans were floated.

The nominal annual interest payable (taking no account of exchange) was 70,190,456*l.*, an average rate of 3*l.* 1*s.* 7*d.* per cent. The nominal amount of interest payable in London amounted to 17,588,088*l.* (excluding suspended interest on war debt due to British Government) and in New York to 2,084,716*l.*

Before the 1931 Conversion Loan, the average rate of interest on internal debt was about 5·35 per cent. At June 30, 1944, the average had fallen to 2·83 per cent.

Debt per head of population at June 30, 1944, was 324*l.* 1*s.*, while the annual interest charge, exclusive of exchange, and suspended interest of 3,919,774*l.* on War Debt due to British Government, amounted to 9·61*l.* per head.

### Defence.

The functions of the Department of Defence relate to the machinery for the higher direction of the war, the Prime Minister being the Minister for Defence.

### ARMY.

The military forces of Australia are administered by a Military Board, consisting of the Minister for the Army (President), the Chief of the General Staff, the Adjutant-General, the Quartermaster-General, the Master-General of the Ordnance, a Finance Member and a Secretary. The military forces consist of the Permanent Forces and the Militia Forces. From November, 1929, the Militia Forces were raised by voluntary enlistment. In November, 1938, authority was given to raise the training strength of the Militia to 75,000. This strength was attained in March, 1939.

The Permanent Forces are organised in such a way as to enable them to carry out administrative and instructional duties in times of peace, to carry out preparations for defence, and to form the nucleus of the technical services. The Commonwealth of Australia is divided into 6 military districts, generally corresponding with the boundaries of the 6 states.

The organisation is territorial, and the divisions are based upon infantry units. There are 53 battalions, forming 14 brigades. The administration

of the military forces is organised in 4 commands—Northern, Eastern, Southern and Western, with headquarters at Brisbane, Sydney, Melbourne and Perth—and one independent district with headquarters at Darwin.

By the summer of 1943 the total strength of the Australian armed forces had risen to over 800,000, of whom 70 per cent. had volunteered to fight overseas. The increase in the strength of the Australian Imperial Force since the outbreak of war with Japan had been approximately 160,000. Up to January, 1944, the total enlistments in the Australian Imperial Force were 425,000, and in the Citizen Military Forces 270,000. Out of a total male population over 14 years of age of 2,830,000, no less than 2,530,000 were in the forces, in war-work or engaged in other essential services. Shortage of labour in various essential services, particularly food production, led to a reallocation of man-power in 1944 under which 45,000 men were to be released from the forces by the end of June, 1945. The total casualties up to August 31, 1943, from the start of the war, were 61,000, of whom 14,000 were dead, 15,000 wounded, 20,000 prisoners and 12,000 missing.

### NAVY.

Since the establishment in 1911 of the Royal Australian Navy, a squadron, commanded by a commodore, has been provided and maintained by the Commonwealth. The policy has been to maintain a force as an active unit in the scheme of Empire Naval Defence. The Naval Board, which is responsible for administration and control, consists of the Minister for the Navy with three Naval Members, one Finance Member and one Civil Member, the seat of administration being at Melbourne. The personnel is now almost entirely Australian recruited and trained, but in order to ensure close co-operation with the Royal Navy a system of exchange of ships and officers is normally followed. Fleet units in December, 1944, included the 10,000 ton cruisers *Australia* and *Shropshire*, the 7,000 ton cruiser *Hobart*, and the older cruiser *Adelaide* (5,100 tons), 10 destroyers, 2 sloops, 54 fleet minesweepers, a number of frigates, a depot ship, a surveying vessel, 35 motor launches, 3 boom defence vessels, and a fleet oiler. More destroyers are building. The main repair base and store depot are at Sydney, while training establishments are centred at Flinders Naval Depot, Westernport, near Melbourne. The R.A.N. College, for the training of naval cadets, is also at Westernport. Total personnel (January, 1944), over 33,000. Period of first engagement for ratings is 12 years.

### AIR FORCE.

\* The Royal Australian Air Force is administered by the Air Board which consists of four service members (the Chief of the Air Staff, the Air Member for Personnel, the Air Member for Engineering and Maintenance and the Air Member for Supply and Equipment) and two civilian members (the Finance Member and the Business Member). In September, 1939, the Royal Australian Air Force consisted of 12 squadrons and associated ancillary units, with a strength of 3,489 personnel. This strength has been multiplied more than 30 times.

### SUPPLY AND SHIPPING.

The Department is charged with the supply of articles other than munitions and food-stuffs, e.g. clothing and other personal equipment and stores, for the Defence Services, with which is associated a control over the

The following table shows for 5 years the value of the imports and exports of merchandise in British currency values :—

| Years   | Imports     | Exports <sup>1</sup> |               | Total                    |
|---------|-------------|----------------------|---------------|--------------------------|
|         |             | Australian Produce   | Other Produce |                          |
|         | £           | £                    | £             | £                        |
| 1939-40 | 115,675,505 | 117,280,891          | 1,481,231     | 118,762,122 <sup>2</sup> |
| 1940-41 | 108,650,056 | 106,015,055          | 1,559,857     | 107,574,912 <sup>2</sup> |
| 1941-42 | 149,355,797 | 125,714,550          | 1,493,831     | 127,208,381 <sup>2</sup> |
| 1942-43 | 212,106,701 | 96,085,180           | 2,160,276     | 98,245,456 <sup>2</sup>  |
| 1943-44 | 210,028,921 | 113,787,208          | 3,316,092     | 117,103,300 <sup>2</sup> |

<sup>1</sup> Excluding ships' stores.

<sup>2</sup> The actual recorded value (in Australian currency) for 1939-40, 148,749,558<sup>1</sup>; for 1940-41, 134,737,577<sup>1</sup>; for 1941-42, 159,328,498<sup>1</sup>; for 1942-43, 125,652,435<sup>1</sup>, and for 1943-44, 146,671,894<sup>1</sup>.

The Customs Tariff of 1933-39 provides for preference to goods produced in and shipped from the United Kingdom to Australia, and for reciprocal tariff agreements with other countries. A trade agreement signed at the closing session of the Imperial Economic Conference at Ottawa, Canada, on August 20, 1932, provides for increased preference between the United Kingdom and the Commonwealth of Australia. On September 1, 1922, a reciprocal tariff agreement, revised between 1922 and 1940, came into operation between Australia and New Zealand. The agreement made with Canada on October 1, 1925, was considerably extended by the Customs Tariff (Canadian Preference) Acts, 1934-1939.

Principal commodities imported and exported—Australia 1943-44 :—

| Imports                                   | Value (Sterling) | Exports <sup>1</sup>       | Value (Australian Currency) |
|-------------------------------------------|------------------|----------------------------|-----------------------------|
|                                           | £                |                            | £                           |
| Tea                                       | 3,287,509        | Butter                     | 6,900,415                   |
| Tobacco and preparations thereof          | 4,263,600        | Cheese                     | 1,958,958                   |
| Whisky                                    | 101,328          | Eggs                       | 376,493                     |

<sup>1</sup> The capital indebtedness has been reduced during the past sixteen years, following amounts: Victoria, 25,685,000l.; Queensland, 28,000,000l.; South 8,089,000l.; Tasmania, 4,788,000l.

<sup>2</sup> Includes proportion of cost of Brisbane-Grafton standard gauge line not apportioned to States.

production and supply of similar articles for civilian requirements, e.g. clothing and textiles, footwear, rubber products, etc.; the establishment or extension of industries for the supply of goods, including the production of flax and strategic minerals; the control of the importation, sale and use of imported liquid fuels and other petroleum products and the production and the development of substitutes therefor such as natural oil, shale oil, power alcohol, benzole, producer gas, etc.; control of coal production and distribution; control of shipping, including the utilization of the Australian coastal fleet, the chartering of ships, the manning of ships, control of stevedoring labour and operations, delivery of cargo to and from ships, including wharf clearances and storage of cargo, handling of hazardous and dangerous cargoes, and the operation of salvage ships and control of salvage operations; the control and maintenance of coastal lights and navigation aids and the administration of navigation services and matters connected with marine navigation; the disposal of all surplus and obsolete goods, the property of the Commonwealth, and the co-ordination, in conjunction with the New Zealand authorities, of the supply of the essential programmed requirements of the Pacific Islands.

### Production.

At December 31, 1941, 776,009,178 acres, representing 40·8 per cent. of the total area of Australia, were either unoccupied or occupied by the Crown; only 7·3 per cent. had been actually alienated (138,400,088 acres); 2·3 per cent. (44,564,518 acres) was in process of alienation; and 49·6 per cent. (944,758,321 acres) was held under the various forms of leases and licences.

The area of crops (distinguishing the principal crops) in Australia and the yield in 1942-43 were as follows:—

| Crops                       | Total Acreage | Total Yield   | Yield per Acre |
|-----------------------------|---------------|---------------|----------------|

\* Beets worked. The sugar manufactured was 678 tons.

\* Tons per acre of productive crops.

\* Including 116,412 tons for wine from 49,866 acres of productive vines.

\* Gallons per acre of productive vines. † Malting: other, 15·88.

\* Ordinary: sweet potatoes, 8,006 acres, 9,966 tons, 3·22 tons per acre.

† Year 1941-42.

The total area of all crops in 1942-43 was 17,419,717 acres. The total value of agricultural production in the year 1941-42 was 94,451,119£. For the year 1943-44 the estimated area under wheat was 7,860,511 acres, and the estimated yield as 109,533,363 bushels. The total forest area necessary to provide for the future requirements of Australia has been estimated at

24,500,000 acres, of which 18,712,000 acres have been permanently dedicated for timber.

At the end of March, 1944, there were in Australia 1,449,119 horses, 14,142,400 cattle, 1,746,721 pigs and 123,174,000 sheep. Estimated wool production, 1943-44, 1,161 million lb.

The production of wool in 1942-43 amounted to 1,151,166,507 lb., and the exports (Australian produce) of greasy were valued at £A47,831,643, and scoured and tops, etc., at £A10,209,258. Of the total production of wool in 1942-43 1,082,129,027 lb. consisted of wool shorn, 92,433,120 lb. were made up of dead and fell-mounged wool, and 26,604,360 lb. were contained on skins exported. The estimated amount of butter produced in the year 1943-44 was 157,498 tons; cheese, 35,853 tons; bacon and hams, 45,600 tons (estimated).

The mineral output was valued as follows in 1941 and 1942:—

| Mineral         | 1941       | 1942       | Mineral        | 1941       | 1942       |
|-----------------|------------|------------|----------------|------------|------------|
|                 | £          | £          |                | £          | £          |
| Gold†           | 15,990,550 | 12,060,166 | Coal           | 10,371,870 | 12,622,786 |
| Silver and Lead | 6,285,860  | 5,623,665  | Other Minerals | 5,632,229  | 5,593,668  |
| Copper          | 1,505,200  | 1,645,879  |                |            |            |
| Tin             | 1,001,179  | 896,017    | Total          | 41,256,888 | 38,462,181 |

† Australian currency.

The total mineral production up to the end of 1942 was valued at 1,543,627,576£; of this amount 760,186,822£ was the value of gold. Mineral output, 1942, 38,462,181£. Gold production, 1941, 1,496,698 fine oz. (£A15,990,550); 1942, 1,153,787 fine oz. (£A12,060,166), and 1943, 751,279 fine oz. (£A7,850,864).

Statistics of the manufacturing industries in Australia in 1942-43 are given as follows: Number of establishments, 26,414; workers employed, 759,044; salaries and wages paid, 208,866,843£; value of plant and machinery, land and buildings, 344,559,273£; value of materials used, 472,720,078£; value of production, 352,002,056£; value of output, 850,343,656£.

The estimated net value of the products of Australia in recent years was:—

| Products*                                   | 1928-29  | 1939-40  | 1940-41  | 1941-42  |
|---------------------------------------------|----------|----------|----------|----------|
|                                             | Thous. £ | Thous. £ | Thous. £ | Thous. £ |
| Agriculture . . . . .                       | 41,679   | 60,909   | 41,432   | 60,705   |
| Pastoral . . . . .                          | 68,821   | 81,368   | 83,962   | 85,858   |

| Manufacturing . . . . .                     | 203,416  | 221,295  | 257,914  | 316,292  |
| Total . . . . .                             | 388,355  | 449,968  | 472,526  | 554,791  |

### Commerce.

Throughout Australia there are uniform customs duties, and trade between the States is free. For 1943-44, the gross revenue collected from customs duties amounted to 21,790,194£, and from excise to 47,281,953£. The total net revenue from Customs and Excise for 1943-44, after allowing for drawbacks and repayments, was 67,290,392£.

held in reserve comprising gold and English sterling on that date was 49,300,000L., representing 25·81 per cent. of the liability. Private bank notes ceased to circulate after 1911.

Since February 4, 1942, United States notes or coinage are permitted to be used in Australia in payment for goods or services.

**NORFOLK ISLAND.** 29° S. latitude, 168° E. longitude, area 18 square miles, population (June 30, 1939) 983 (518 males and 470 females). The island was formerly part of the Colony of New South Wales and then of Van Diemen's Land. It has been a distinct settlement since 1856, and under an Order-in-Council of 1900 was governed by the Governor of New South Wales; but from July 1, 1914 the affairs of the island have been administered by the Commonwealth Government. The island, which is very picturesque and possesses a delightful climate, coupled with a fertile soil, is especially suitable for the cultivation of citrus fruits, bananas, and coffee. In 1938-39 the imports (mostly from the Commonwealth) were valued at 27,590L., and the exports, 16,970L.

## Books of Reference concerning the Commonwealth of Australia.

### 1. OFFICIAL PUBLICATIONS.

Each of the States publishes an Annual Year-Book or Statistical Register, as well as Annual Reports of the various administrative, industrial, educational, and other departments, and Statistical Publications dealing with Australia are issued by the Commonwealth Statistician.

Annual Catalogue of Australian Publications. (Commonwealth National Library) Canberra, No. 1, 1936 to date. (This includes a complete list of official publications of the Commonwealth and all States for each year.)

Select list of representative works dealing with Australia. (Commonwealth National Library.) Canberra, 1934 to date.

Biographical handbook and record of elections for the Parliament of the Commonwealth. Library Committee of the Parliament. Canberra.

The Acts of the Parliament of the Commonwealth of Australia passed from 1901 to 1935, and in force on January 1, 1936 to which is prefixed the Commonwealth of Australia Constitution Act, 4 vols. Canberra, 1936. With annual supplement, 1937 to date.

Bean (C. E. W.) (editor), Official History of Australia in the War of 1914-18. 12 vols. Sydney, 1921 to 1948.

Reports on Economic and Financial Situation. London (Department of Overseas Trade). Annual.

Statistical Abstract for the British Self-governing Dominions, Crown Colonies, &c. Annual. (Board of Trade.) London.

Historical Records of Australia. Library Committee of the Commonwealth Parliament. Watson (Dr. F.) (editor). Sydney, 1914-1926.

Royal Commission on the Constitution of the Commonwealth Report. Canberra, 1929.

Convention of Representatives of the Commonwealth and State Parliaments on proposed alteration of the Commonwealth Constitution, Canberra, November 24 to December 3, 1942. Record of proceedings. Canberra, 1942.

Private railways in Australia, open for general traffic, 1941–42, 721 miles. The construction of a trans-continental railway from north to south was provided for in the 'Northern Territory Acceptance Act, 1910.' The terminus of the North Australia Railway is at Birdum (316 miles from Darwin), while the Central Australia Railway extends as far north as Alice Springs. The State railway gauge is: In New South Wales, 4ft. 8½in.; in Victoria, 5ft. 3in. (122 miles, 2ft. 6in.); in Queensland, 3ft. 6in. (69 miles, 4ft. 8½in. and 30 miles, 2ft. 0in.); in South Australia, 5ft. 3in. for 1,480 miles, the rest, 8ft. 6in.; in W. Australia, 3ft. 6in.; and in Tasmania, 3ft. 6in. Of the Commonwealth lines, the gauge of the Trans-Australian and Australian Capital Territory is 4ft. 8½in., and that of the Central Australia and North Australia is 3ft. 6in. In March, 1944, it was announced that a uniform gauge of 4ft. 8½in. would be adopted on the entire Australian railway system.

## POSTS AND TELEGRAPHS.

Postal and telegraph business, year ended June 30, 1943: number of Post and Receiving Offices, 8,203. In 1942–43, letters, post-cards and packets posted in each State or received from overseas, 888,000,000; newspapers, 164,000,000; parcels received and dispatched, 16,000,000; registered articles, 14,000,000. Telegrams dispatched, 30,000,000, and cablegrams received and dispatched, 3,000,000; coastal radio-telegraph messages, 38,000; total words transmitted to and received from overseas via beam wireless, 38,000,000. Earnings, 1942–43: postal, 10,540,000£; telegraphs, 3,208,000£; radio, 646,000£; telephone, 11,190,000£; total revenue, 25,579,000£. Working expenses: postal, 7,564,000£; telegraph, 2,144,000£; radio, 660,000£; telephone, 7,208,000£; total, 17,576,000£.

At June 30, 1943, 6,371 telephone exchanges with 540,261 lines and 766,846 instruments connected were in operation.

## CIVIL AVIATION.

Civil flying in the Commonwealth and Territories is subject to legislative control by the Commonwealth Government. The administration of the Air Navigation Act and Regulations is a function of the Civil Aviation Department under the Minister of Civil Aviation. The permanent head of the Department is the Director-General of Civil Aviation.

At June 30, 1943, there were 24,395 route miles of contract and other regular air services in Australia. The average regular mileage flown weekly is 134,000 miles.

The total mileage flown by all civil aircraft in Australia during 1941–42 was about 8,000,000 miles.

Civil Aviation expenditure for the year 1942–43 was 703,811£ (including 354,140£ on new works).

At June 30, 1943, there were 207 licensed public aerodromes under the control of local authorities. The total number of recognised civil landing grounds in Australia at June 30, 1942, was 372.

## MOTOR VEHICLES.

At June 30, 1942–43, 776,000 motor vehicles, including 471,800 motor cars, 48,300 motor cycles, and 255,900 commercial vehicles were registered in Australia. The revenue derived from registration fees and motor tax for the year was 4,982,600£, drivers' and riders' licences, 439,500£, and miscellaneous, 267,400£. The registrations were equivalent to 107·3 vehicles per 1,000 of population.

## WIRELESS BROADCASTING.

Wireless broadcasting stations are in operation in all the State capitals and in certain other places. 1,454,302 wireless broadcast listeners' licences had been issued at June 30, 1944. The National Broadcasting Service controlled by the Australian Broadcasting Commission and the Postmaster-General's Department now operates thirty broadcasting stations. In addition ninety-eight other stations were licensed at June 30, 1943. Two beam stations have been erected, one for direct communication with London, and the other for direct communication with North America direct beam wireless service with London was established on April 8, 1927, and with North America on June 16, 1928.

## Money and Credit.

On January 20, 1913, the Commonwealth Bank was opened at Sydney. Average deposits for June quarter 1944 (General Bank) were 143,100,000£, of which 60,600,000£ represented non-interest bearing deposits. The deposits of the savings bank which was created a separate department on June 9, 1928, aggregated 299,300,000£ at June 30, 1944. The Savings Bank business in the States of New South Wales, Queensland, and Western Australia is wholly with the Commonwealth Savings Bank. The Commonwealth Bank started without capital, and began to make profits in 1913–14. At June 30, 1944, the capital was 4,000,000£, excluding 2,000,000£ in respect of the Credits Department, and 1,360,420£ in respect of the newly created Mortgage Bank Department. The profits for the year ended June 30, 1944, including all branches except the Note Issue, were 1,508,500£. Aggregate net profits to June 30, 1944, exclusive of Note Issue Branch, amounted to 20,640,000£, and the Reserve Fund of all branches except the Note Issue to 8,326,000£.

There are, besides, 16 other banks, including 2 State Government institutions, trading in Australia. The total Shareholders' funds at June 30, 1943, of the 11 Australian Joint Stock banks aggregated 71,240,000£, including paid-up capital, 38,045,000£, and reserves, 30,920,000£.

The total liabilities, excluding capital, of all cheque-paying banks trading in Australia in the quarter ended June 30, 1944, were 913,800,000£, and the deposits, excluding Savings Bank deposits in the Commonwealth Bank were 694,530,000£. Assets amounted to 921,600,000£, of which advances totalled 270,900,000£, Government and Municipal securities, 399,100,000£, and special war-time deposits with the Commonwealth Bank, 179,500,000£.

The total Savings Banks deposits in Australia on June 30, 1943, was 471,500,000£ (64·6£ per head of population).

There are 2 mints in Australia, at Melbourne (opened 1872), and Perth (1899). They issue gold bullion, partly for the use of local manufacturers (jewellers and dentists), and partly for export. Since 1916 silver and bronze coins have been minted at the Sydney and Melbourne Mints on behalf of the Commonwealth Treasury. Since 1931 the minting of gold coins has ceased. The Sydney Mint was closed at the end of 1926.

The gold issues during 1942 at the Perth mint amounted to 3,607,914£, and at Melbourne to 1,173,192£ (all bullion). The total issues of gold coin and bullion to the end of 1942 were 404,198,000£ and 86,289,000£ respectively.

Silver coinage to the value of 5,035,000£ was issued during the year ended June 1943.

On June 30, 1944, notes issued by the Commonwealth Bank (Note Issue Department) and unredeemed amounted to 191,000,000£. The amount

## AUSTRALIAN CAPITAL TERRITORY.

### Government.

The area which is now the Australian Capital Territory was first visited by white men in 1820 and settlement commenced in 1824 or 1825. Until its selection as the Seat of Government it was a quiet pastoral and agricultural community with a few large holdings and a sprinkling of smaller settlers.

The Constitution of the Commonwealth provided (Sec. 125) that the Seat of Government should be selected by Parliament and that it should be within New South Wales but at least 100 miles from Sydney. After prolonged discussion, during which the claims of a great number of sites were put forward, the Canberra site was adopted by the Seat of Government Act, 1908. The present site, together with an area for a port at Jervis Bay, was surrendered by the State and accepted by the Commonwealth in 1909, and by subsequent proclamation the Territory became vested in the Commonwealth from January 1, 1911. Preliminary surveys were put in hand as soon as the site was selected, and in 1911 an international competition was held for the city plan. The plan chosen, that of W. Burley Griffin, of Chicago, has been the basis of all subsequent development. Construction was delayed by the Great War of 1914-18, and it was not until 1927 that, with the transfer of Parliament and of the central staffs of certain departments, Canberra became in fact the Seat of Government. Development has continued since, with a halt during the depression, and all major departments, with the exception of the War Departments and the Post Office have now their headquarters in Canberra.

The general administration of the Territory is in the hands of the Minister for the Interior, but certain specific services are undertaken by the Departments of Health and the Attorney-General. The Minister is advised on matters of local concern by an Advisory Council, consisting of four official and three elected members.

### Area and Population.

The area of the Australian Capital Territory is 911 square miles, of which 170 square miles in the Cotter River Catchment area are reserved from occupation for water supply purposes. The area vested in the Commonwealth at Jervis Bay is 28 square miles of land and water.

Census population on June 30, 1938: Australian Capital Territory, 11,290; Jervis Bay, 272; total, 11,562. Estimated population June 30, 1943 (Commonwealth Statistician), 14,115.

Population at recent censuses, with distribution by sex:—

|          | Males | Females | Total |          | Males | Females | Total  |
|----------|-------|---------|-------|----------|-------|---------|--------|
| 1911 . . | 992   | 722     | 1,714 | 1933 . . | 4,805 | 4,142   | 8,947  |
| 1921 . . | 1,567 | 1,005   | 2,572 | 1938 . . | 6,286 | 5,276   | 11,562 |

### Education.

State education in the Australian Capital Territory is administered by the New South Wales Education Department, the cost being refunded annually to that State. There are 11 public schools in the Australian Capital Territory and two in the Jervis Bay Territory. Secondary education is provided at the Canberra High School with accommodation for 550 pupils. The Canberra Technical College provides training in a wide range of trades, as well as training aircraftmen for the R.A.A.F. and other war workers under the Commonwealth Training Scheme. There are also four private (denominational) schools in the Territory, of which three provide primary and secondary education, and one sub-primary and primary. University education is provided by the Canberra University College which is at present connected with the University of Melbourne.

### Finance.

The revenue of the Territory is derived in part from rent and rates, public utilities transport and housing and various other fees and services, and partly from Parliamentary appropriation.

Local revenue and expenditure for six years ended June 30:—

|            | Revenue   | Expenditure |             |           |           |
|------------|-----------|-------------|-------------|-----------|-----------|
|            |           | Capital     | Maintenance | Other     | Total     |
|            | £         | £           | £           | £         | £         |
| 1938 . . . | 955,666   | 471,013     | 155,556     | 1,127,957 | 1,754,526 |
| 1939 . . . | 1,280,780 | 488,397     | 158,972     | 1,465,961 | 2,118,330 |
| 1940 . . . | 872,604   | 524,625     | 162,341     | 1,045,849 | 1,732,815 |
| 1941 . . . | 871,545   | 595,715     | 161,486     | 1,039,884 | 1,797,086 |
| 1942 . . . | 864,458   | 370,611     | 181,259     | 977,941   | 1,529,811 |
| 1943 . . . | 767,761   | 284,695     | 155,519     | 922,210   | 1,312,424 |

Total revenue and expenditure to June 30, 1942:—12,907,537l.

### Productions and Industry.

The Territory is predominantly pastoral. Livestock at March 31, 1943, were: horses 1,143; cattle, 6,967; sheep, 250,344; pigs, 779. A considerable amount of re-afforestation has been undertaken, the total area of plantations at June 30, 1942, being 12,800 acres. There is no secondary industry of any importance.

## NEW SOUTH WALES.

### Constitution and Government.

New South Wales became a British Possession in 1770; the first settlement was established at Port Jackson in 1788; a partially elective Legislative Council was established in 1842, and responsible government in 1856. New South Wales federated with the other Australian States to form the Commonwealth of Australia in 1901. The legislative power of the State is vested in a Parliament of two Houses, the Legislative Council and the Legislative Assembly. The Legislative Council consists of 60 members, elected at joint sittings of both Houses of Parliament, for a term of twelve years. Fifteen members retire in rotation every three years. Members receive no remuneration but are allowed free travel on the Government railways and tramways. The Legislative Assembly has 90 members. British subjects above 21 years of age, having resided six months in the Commonwealth, three months in the State, and one month in the electorate, are eligible for enrolment as electors, and voting is compulsory. Members of the Legislative Assembly are paid an annual salary at the rate of 875l. per annum, and they are allowed to travel free on Government railways and tramways. The Premier receives an annual salary of 2,445l.; the Attorney-General, 2,095l.; the Vice-President of the Executive Council, 1,375l.; and a sum of 17,505l. is divided among the remainder of the Cabinet. The leader of the Opposition receives an allowance of 250l. per annum in addition to his salary as member. The duration of a Parliament is limited to three years.

## NEW SOUTH WALES.

## Constitution and Government.

New South Wales became a British Possession in 1770; the first settlement was established at Port Jackson in 1788; a partially elective Legislative Council was established in 1842, and responsible government in 1856. New South Wales federated with the other Australian States to form the Commonwealth of Australia in 1901. The legislative power of the State is vested in a Parliament of two Houses, the Legislative Council and the Legislative Assembly. The Legislative Council consists of 60 members, elected at joint sittings of both Houses of Parliament, for a term of twelve years. Fifteen members retire in rotation every three years. Members receive no remuneration but are allowed free travel on the Government railways and tramways. The Legislative Assembly has 90 members. British subjects above 21 years of age, having resided six months in the Commonwealth, three months in the State, and one month in the electorate, are eligible for enrolment as electors, and voting is compulsory. Members of the Legislative Assembly are paid an annual salary at the rate of 875*l.* per annum, and they are allowed to travel free on Government railways and tramways. The Premier receives an annual salary of 2,445*l.*; the Attorney-General, 2,095*l.*; the Vice-President of the Executive Council, 1,375*l.*; and a sum of 17,505*l.* is divided among the remainder of the Cabinet. The leader of the Opposition receives an allowance of 250*l.* per annum in addition to his salary as member. The duration of a Parliament is limited to three years.

The Women's Legal Status Act, 1918, gives women the same political rights as men.

The Legislative Assembly, elected on May 27, 1944, consists of the following Parties: Labour Party, 56; Democratic Party, 12; United Country Party, 11; Independents, 11.

The executive is in the hands of a Governor, appointed by the Imperial Government, and an Executive Council consisting of members of the Cabinet.

*Governor.*—Capt. The Right Hon. Lord Wakehurst, K.C.M.G. (assumed office April 8, 1937; on January 13, 1943, term of office extended to April 8, 1944; on January 10, 1944, to April 8, 1945, and on March 14, 1945, to January, 8, 1946).

The Governor is advised by a Cabinet consisting of the following members:—

*Premier and Colonial Treasurer.*—Hon. William John McKell, M.L.A.  
*Deputy Premier, Colonial Secretary, Minister for Mines and Minister for National Emergency Services.*—Hon. J. M. Baddley, M.L.A.  
*Minister for Education.*—Hon. R. J. Heffron, M.L.A.  
*Attorney-General.*—Capt. the Hon. C. E. Martin, M.L.A.

*Minister for Agriculture.*—Hon. E. H. Graham, M.L.A.  
*Assistant Ministers.*—Hon. C. R. Evatt, M.L.A., Hon. W. E. Dickson, M.L.C.

*Agent-General, London.*—Vacant (March, 1945).

*Acting Official Secretary in Charge of the Office.*—A. W. Sutton.

#### LOCAL GOVERNMENT.

A system of Local Government extends over the whole of the State except the Western Land Division, where, however, a few municipalities are incorporated. There are 151 municipalities, and 137 corporate bodies called shires. A number of the municipalities and shires have combined to form county councils, of which there are 13, to administer electricity or water supply undertakings or to render services of common benefit.

#### Area and Population.

New South Wales is situated almost entirely between the 29th and 36th parallels of S. lat. and 141st and 154th meridians of E. long., and comprises an area of 309,433 sq. miles, inclusive of Lord Howe Island, 5 sq. miles, but exclusive of the Australian Capital Territory (911 sq. miles at Canberra and 28 at Jervis Bay).

#### AREA AND POPULATION

The population (excluding aboriginals) at recent censuses was:—

| Year              | Males     | Females   | Total     | Pop. per square mile | Average annual increase per cent. since previous census. |
|-------------------|-----------|-----------|-----------|----------------------|----------------------------------------------------------|
| 1881              | 410,211   | 339,614   | 749,825   | 2.42                 | 4.07                                                     |
| 1891              | 609,686   | 517,471   | 1,127,157 | 3.68                 | 4.16                                                     |
| 1901              | 710,264   | 645,091   | 1,355,355 | 4.87                 | 1.86                                                     |
| 1911              | 857,698   | 789,086   | 1,646,784 | 5.32                 | 1.97                                                     |
| 1921              | 1,071,501 | 1,028,870 | 2,100,371 | 6.79                 | 2.46                                                     |
| 1933              | 1,318,471 | 1,282,376 | 2,600,847 | 8.41                 | 1.76                                                     |
| 1942 <sup>1</sup> | 1,425,608 | 1,427,824 | 2,852,932 | 9.22                 | 0.88                                                     |

<sup>1</sup> December 31 (estimated).

At the end of 1942 the population of Sydney, and suburbs, excluding shipping, was 1,884,380. The chief country municipalities, with their populations at the end of 1941, were as follows:—Greater Newcastle, 126,500; Broken Hill, 26,590; Lithgow, 21,930; Wollongong, 19,600; Goulburn, 15,480; Wagga Wagga, 14,230; Cessnock, 13,900; Lismore, 13,400; Albury, 12,940; Maitland, E. and W., 12,490; Bathurst, 12,040; Tamworth, 11,700; Orange, 11,560; Grafton and South Grafton, 10,620; Katoomba (excluding summer tourists), 9,500; Dubbo, 9,290; Liverpool, 7,920; Armidale, 7,320; Parkes, 6,910; Inverell, 6,180; Casino, 5,760.

The following table shows the births, deaths, and marriages for five years:—

| Year | Marriages | Births | Deaths              | Excess of Births | Infantile Mortality Deaths under one year per 1000 births |
|------|-----------|--------|---------------------|------------------|-----------------------------------------------------------|
| 1939 | 25,471    | 48,003 | 25,815              | 21,188           | 41.0                                                      |
| 1940 | 30,364    | 49,382 | 26,743              | 23,239           | 39.0                                                      |
| 1941 | 29,983    | 51,729 | 27,300              | 24,429           | 43.8                                                      |
| 1942 | 34,535    | 52,647 | 29,219 <sup>1</sup> | 23,428           | 40.2                                                      |
| 1943 | 26,302    | 57,265 | 28,870 <sup>1</sup> | 28,395           | 36.0                                                      |

<sup>1</sup> Civilians only.

The annual rates per 1,000 of the population in 1943 were: births, 20.15, deaths, 10.16; marriages, 9.25.

The following table shows the movement of population during the past five years:—

| Year | Arrivals   |          |         | Departures |          |         |
|------|------------|----------|---------|------------|----------|---------|
|      | Interstate | Overseas | Total   | Interstate | Overseas | Total   |
| 1939 | 142,400    | 49,119   | 191,519 | 142,206    | 43,407   | 185,613 |
| 1940 | 115,607    | 27,320   | 142,927 | 125,747    | 20,217   | 145,964 |
| 1941 | 118,269    | 16,942   | 135,211 | 126,429    | 14,188   | 140,617 |
| 1942 | 196,642    | 4,669    | 141,381 | 126,859    | 3,994    | 130,853 |
| 1943 | 133,774    | 2,720    | 136,494 | 131,279    | 2,699    | 133,978 |

The estimated population of Greater Melbourne (capital city) on December 31, 1942, was 1,152,000, or 58 per cent. of the population of the State. The other cities are Geelong, 41,200; Ballarat, 39,500; Bendigo, 30,800; Warrnambool, 9,350, and Mildura, 7,500; and the principal towns Wonthaggi, 6,350; Shepparton, 6,250; Hamilton, 6,100; Maryborough, 5,900; Castlemaine, 5,800; Colac, 5,650; Horsham, 5,600; Wangaratta, 5,400; Ararat, 5,050; Stawell, 4,900; Sale, 4,600, and Echuca, 4,460.

### Religion.

There is no established church in New South Wales, and freedom of worship is accorded to all.

The following table shows the statistics of the religious denominations in New South Wales at the census of 1933 and of ministers of religion in 1944:—

| Denomination        | Ministers of Religion <sup>1</sup> 1944 | Adherents 1933 (Census) | Denomination            | Ministers of Religion <sup>1</sup> 1944 | Adherents 1933 (Census) |
|---------------------|-----------------------------------------|-------------------------|-------------------------|-----------------------------------------|-------------------------|
| Church of England . | 689                                     | 1,143,493               | Jews . . . . .          | 13                                      | 10,805                  |
| Roman Catholic .    | 861                                     | 556,106 <sup>2</sup>    | Salvation Army .        | 88                                      | 9,610                   |
| Presbyterian . . .  | 326                                     | 257,522                 | Church of Christ .      | 41                                      | 8,658                   |
| Methodists . . . .  | 517                                     | 298,042                 | Seventh Day Adventist . | 85                                      | 5,912                   |
| Congregational . .  | 82                                      | 20,274                  | Others . . . . .        | 90                                      | 349,988 <sup>3</sup>    |
| Baptist . . . . .   | 125                                     | 29,981                  |                         |                                         |                         |
| Lutheran . . . . .  | 21                                      | 5,956                   | Total . . . . .         | 2,738                                   | 2,600,847               |

<sup>1</sup> Registered for the celebration of marriages in New South Wales, January, 1944.

<sup>2</sup> Includes 66,943 'Catholics undefined.'

<sup>3</sup> Includes 297,034 'religion not stated' and 4,376, 'no religion.'

### Education.

The State maintains a system of national education, and attendance at school is compulsory from 6 to 15 years of age. In all State schools education is free. There is a large number of private schools subject to State inspection.

There were at the end of 1943, 2,741 State schools, including 55 high schools; 1,821 public primary schools; 27 evening continuation schools and a correspondence school. During December term, 1943, there were 355,754 children enrolled. The average attendance during the year was 285,873. The estimated number of teachers at December 31, 1943, including 959 training students, was 12,187, excluding 1,553 on military service. The pupils receiving kindergarten instruction at Government schools numbered 19,510. The total expenditure of the Department of Education (excluding technical education) during the year 1943 was 5,315,210*l*.

At the end of 1943 there were 718 private schools (with 108,119 pupils and 5,049 teachers), of which 557 were Roman Catholic denominational schools, having 3,720 teachers and 90,859 scholars. The Church of England denominational schools numbered 40 with 479 teachers and 6,290 scholars; other denominational schools 29, teachers 367, pupils 4,603. The undenominational private schools numbered 92, the teachers 483 and scholars 6,367.

The University of Sydney, founded in 1850, had (1942) 3,232 individual students (including 1,084 women) with 410 professors, lecturers and demonstrators. There are 5 denominational colleges, Church of England, Roman Catholic (one for men and one for women), Presbyterian and Methodist, and an undenominational college for women, affiliated to the university. A Government training college for teachers is situated in the university grounds and another at Armidale, where there is also a University College affiliated with Sydney University. The Sydney Technical College, with

branch schools, had a total enrolment of 39,381 individual students in 1942.

### Widows' Pensions and Family Allowances.

The Commonwealth Government makes provision for social benefits (*see under AUSTRALIA*), such as old age and invalid pensions, widows' pensions, child endowment and maternity allowances. State systems of family endowment and widows' pensions were discontinued when the Commonwealth systems were introduced on July 1, 1941, and June 30, 1942, respectively, but the State makes supplementary payments, in the nature of allowances for children, to widows whose Commonwealth pension is less than the amount which would have been payable under the Widows' Pension Act of New South Wales. 4,312 widows were receiving such allowances for 8,890 children as at June 30, 1944. During the year 1943-44, the amount paid to widows by the State was 167,271*l*. Commonwealth widows' pensions current in New South Wales at June 30, 1944, numbered 16,380, and the annual liability was 1,181,453*l*. The number of old age and invalid pensions current in New South Wales on June 30, 1944, was: old age, 104,414 (males, 88,876; females, 65,538); invalid, 26,234 (males, 11,597; females, 14,637).

The number of claims in force in New South Wales under the family endowment system at June 30, 1944, was 198,651, and endowed children in family units numbered 859,373 at that date. Endowment was paid also for 5,324 children in institutions. The annual liability as at June 30, 1944, was 4,671,849*l*.

### • Social Aid Service.

To relieve distress caused by unemployment and other causes, social welfare bureaux are conducted in various districts under the supervision of welfare officers, who are assisted by medical officers and nurses. Social aid such as food, clothing, medical and dental treatment are provided for persons whose family income does not exceed a certain limit, which varies according to the size of the family to be maintained. On assessing income appropriate exemption is allowed in respect of earnings. The income limit is 25*s*. per fortnight in the case of single adults, 40*s*. for married couples, 50*s*. and 60*s*. for married couples with one and two children respectively, and it rises by 5*s*. per child up to five children and by 10*s*. for each additional child. The cash payments for food are 34*s*. per fortnight for adults, 58*s*. for married couples, married couples with one child receive 71*s*., and with two children 74*s*., with three children 83*s*., with four children 92*s*., and 10*s*. per fortnight is paid for each additional child. Supplementary special foods are provided for mothers, young children and invalids.

### Justice and Crime.

In New South Wales legal processes may be grouped within the Lower or Magistrates Courts, or the Higher Courts presided over by Judges. There is also an appellate jurisdiction. Prisoners charged with capital crimes must be tried before the Supreme Court.

Children's Courts have been established with the object of removing children as far as possible from the atmosphere of a public court. There are

The following statement shows the estimated mean population, the births, deaths, and marriages in the State for five years :—

| Year           | Marriages | Births | Deaths | Excess of Births |
|----------------|-----------|--------|--------|------------------|
| 1938 . . . . . | 17,113    | 80,844 | 18,955 | 11,389           |
| 1939 . . . . . | 17,368    | 80,493 | 20,169 | 10,324           |
| 1940 . . . . . | 22,299    | 81,962 | 20,293 | 11,669           |
| 1941 . . . . . | 20,897    | 84,406 | 20,425 | 13,981           |
| 1942 . . . . . | 23,636    | 85,927 | 21,973 | 13,954           |

The annual rates per 1,000 of the population in 1942 were as follows : marriages, 12·02; births, 18·27; deaths, 11·18; infantile deaths, 41·64 per 1,000 births.

The recorded immigration into and emigration from the State of Victoria by sea were as follows in recent years :—

| Year | Immigration (by sea) | Emigration (by sea) | Year | Immigration (by sea) | Emigration (by sea) |
|------|----------------------|---------------------|------|----------------------|---------------------|
| 1936 | 75,500               | 74,675              | 1939 | 82,559               | 78,082              |
| 1937 | 77,796               | 78,379              | 1940 | 57,408               | 51,302              |
| 1938 | 84,661               | 81,586              | 1941 | 48,788               | 39,090              |

### Religion.

There is no State Church in Victoria, and no State assistance has been given to religion since 1875. At the date of the census of 1933, the following were the enumerated numbers of each of the principal religions : Christian: Roman Catholic, 315,516; Catholic (undefined), 26,619; Church of England, 626,172; Methodist, 193,096; Presbyterian, 276,699; Protestant (undefined), 25,231; other Christian, 104,010. Non-Christian: Hebrew, 9,500; other, 565; indefinite, 3,752; no religion, 3,585; unspecified, 235,566; total, 1,820,261.

### Education.

Educational establishments in Victoria are of four kinds, viz., the university, established under a special Act and opened in 1855, State schools (primary and secondary), technical schools or colleges, and registered schools.

Affiliated to the university are five residential colleges: Trinity, Ormond, Queen's and Newman in connection with the Church of England, Presbyterian, Methodist and Roman Catholic Churches respectively, and the University Women's College which is not a Church foundation. In 1942 the students who matriculated numbered 732, the new graduates numbered 484, and there were 4,209 students attending lectures. In addition there were 405 students receiving tuition by correspondence.

Primary education of children of the ages of 6 to 14 years inclusive is free, secular and compulsory. The compulsory provisions of the Education Act are rigidly enforced. At December 31, 1941, there were 2,542 State primary schools with 7,627 teachers, a total enrolment of 211,434 scholars, and an average attendance of 150,517, or 71 per cent. of the numbers on the roll. There were also 155 State intermediate and secondary schools, comprising

30 central schools, 48 higher elementary schools, 13 domestic art schools, 27 junior technical schools, and 37 high schools. At these schools there were 1,368 teachers, a total enrolment of 45,836 scholars, and an average attendance of 36,799, or about 80 per cent. of the total on the roll. In addition to those before mentioned, there were 30 senior technical schools with a staff of the before mentioned, and a total enrolment of 30,276 senior students. The total cost to the State of public instruction, including grants to the University of Melbourne, was 3,490,464*l.* in 1941-42 (exclusive of interest on loans).

*Schools not receiving Government aid.*—There were, in 1941, 518 registered schools in Victoria with 2,744 teachers and a net enrolment of 76,305 scholars. Approximately 61 per cent. of these schools were connected with the Roman Catholic denomination, the members of which do not as a rule avail themselves of the free primary education provided by the State. Some are under the control of the larger Protestant denominations, namely, the Church of England, the Presbyterian and the Methodist Churches, whilst a few are managed by private persons or companies.

### Pensions, &c.

Victoria was the first State of the Commonwealth to make statutory provision for the payment of Old Age Pensions. The Act providing for the payment of such pensions came into operation on January 18, 1901, and continued until July 1, 1939, when the Federal Invalid and Old Age Pension Act came into force. The provisions of the Federal Act relating to invalid pensions did not operate until December 15, 1910 (*see under AUSTRALIA*). On June 30, 1943, there were 72,102 old age and 11,938 invalid pensioners in Victoria, and the amount paid in pensions during 1942-43 was 5,715,065*l.*

The number of war pensions in force in Victoria on June 30, 1943, was 96,155, and the amount paid during 1942-43 by the Commonwealth Government in connexion therewith was 2,882,186*l.*

An Act was passed by the Commonwealth Parliament in October, 1912, providing for the payment, on application, of a maternity allowance (*see under AUSTRALIA*). During the year ended June 30, 1943, the allowance was granted to 11,874 mothers in the State of Victoria, the total payment being 63,635*l.*

The Commonwealth Child Endowment Act, 1941, which came into operation on April 7, 1941, provides payment under certain conditions in respect of children in excess of one, under the age of 16 years, maintained by claimant. The number of endowments in force in Victoria at June 30, 1943, was 124,986, representing 218,511 endowable children. In addition, endowment was being paid in respect of 4,875 children who were being maintained in institutions.

### Justice and Crime.

There is a Supreme Court with a Chief Justice and five puisne judges. There are courts of general and petty sessions, county courts, courts of mines, court of licensing, and children's courts.

The following are the criminal statistics for 1941 :—77,003 cases (22,334 cases and 54,669 summons cases); summarily convicted, 67,520; arrest cases and 1,400.

There are 4 gaols, 1 prison camp and 5 reformatory prisons in Victoria. At the end of 1941 there were confined in these prisons 949 males and 41 females.

|                           | 1939               | 1940    | 1941    | 1942    | 1943    |
|---------------------------|--------------------|---------|---------|---------|---------|
| Mileage open for Traffic  | 4,767              | 4,767   | 4,767   | 4,773   | 4,795   |
| Total Capital Expenditure | (1,600£) 51,519    | 51,185  | 51,125  | 51,241  | 51,167  |
| Passengers carried        | (1,000) 148,548    | 151,280 | 160,650 | 169,775 | 206,186 |
| Goods carried             | (1,000 tons) 9,990 | 9,201   | 6,639   | 7,520   | 8,759   |
| Gross Receipts            | (1,000£) 9,360     | 9,942   | 11,386  | 14,615  | 17,120  |
| Expenditure and Interest  | (1,000£) 10,812    | 10,859  | 11,865  | 13,996  | 16,858  |

The figures shown above include particulars relating to 7·60 miles of electric tramway and certain road motor services under the control of the Railway Commissioners.

### Money and Credit

A branch of the Royal Mint was opened at Melbourne on June 12, 1872. Up to December 31, 1942, 46,167,461 oz. of gold, valued at 175,795,855£., was received at the mint, and gold coin and bullion issued of the value of 175,804,168£. The minting of silver coin was commenced in January, 1916, and bronze coin in 1919, and the total issues to the end of 1942 were: silver, 11,725,300£.; bronze, 505,574£. The issues of coin in 1942 were: gold, nil; silver, 2,182,400£.; and bronze, 12,090£.

On June 30, 1943, the State Savings Bank of Victoria had 224 branches and 379 agencies in the State. The total balance to the credit of depositors amounted to 97,517,228£. Of this amount 94,874,320£. was deposited to the credit of 1,634,350 ordinary accounts, 295,710£. to 207,902 School Bank accounts, and 2,347,198£. was held in Deposit Stock.

In the Commonwealth Savings Bank in Victoria there were, on June 30, 1943, 297,564 operative accounts with 23,731,435£. at credit.

During the June quarter of 1943 there were 13 trading banks in Victoria (including the Commonwealth Bank of Australia). Particulars regarding their liabilities and assets are given as follows:—notes in circulation, 88,749£.; deposits, 212,595,826£.; bills in circulation, 1,382,301£.; balances due to other banks, 12,002,958£.; special war-time deposits with Commonwealth Bank, 57,601,746£.; the total liabilities being 283,671,580£.; gold and silver, coined and in bars, and Australian notes and cash with Commonwealth Bank, 14,842,769£.; property, 3,192,374£.; Government and municipal securities, 203,387,887£.; special war-time deposits with Commonwealth Bank, 57,601,746£.; other assets, 3,731,325£.; advances, etc., 97,829,731£.; total assets, 380,585,332£.

## QUEENSLAND.

### Constitution and Government.

Queensland, formerly a portion of New South Wales, was formed into a separate colony in 1859, and responsible government was conferred. The power of making laws and imposing taxes is vested in a Parliament

of one House—the Legislative Assembly, which comprises 62 members, returned from 62 electoral districts for three years, elected by ballot. Members of the Assembly are entitled to payment of 650£. per annum, with travelling expenses, and an allowance for stationery and postage. At the General Election of April, 1944, there were 655,984 persons registered as qualified to vote under the 'Elections Acts Amendment Act of 1932.' This provides for male and female adult franchise, a three months' continuous residence in the State, six months' residence in the Commonwealth, and one month in the electoral district, being the only qualifications.

The Legislative Assembly, elected on April 15, 1944, was composed of the following parties: Labour Party, 37; Country Party, 12; Queensland Peoples' Party, 8; Independent Labour Party, 4; Communist 1.

*Governor of Queensland.*—Col. The Right Honourable Sir Lealie Orme Wilson, G.C.S.I., G.C.M.G., G.C.I.E., D.S.O. (appointed June, 1932; re-appointed June, 1937; in January, 1944, term of office was extended to June 18, 1946; salary, 3,000£.).

The Executive Council of Ministers, re-organized on April 27, 1944, consists of the following members:—

*Premier, Chief Secretary and Vice-President of the Executive Council.*—Hon. Frank Arthur Cooper, M.L.A.

*Treasurer.*—Hon. Edward Michael Hanlon, M.L.A.

*Secretary for Health and for Home Affairs.*—Hon. Thomas Andrew Foley, M.L.A.

*Secretary for Public Works.*—Hon. Henry Adam Bruce, M.L.A.

*Secretary for Public Lands.*—Hon. Arthur Jones, M.L.A.

*Attorney-General.*—Hon. David Alexander Gledson, M.L.A.

*Secretary for Public Instruction.*—Hon. James Larcombe, M.L.A.

*Minister for Transport.*—Hon. Edward Joseph Walsh, M.L.A.

*Minister for Labour and Employment and Secretary for Mines.*—Hon. Vincent Clair Gair, M.L.A.

*Secretary for Agriculture and Stock.*—Hon. T. L. Williams, M.L.A.

Each Minister has a salary of 1,150£.; the Vice-President of the Executive Council receives 300£. in addition.

*Agent-General for Queensland in Great Britain.*—L. H. Pike (office, 409 Strand, London).

Provision is made for Local Government by the subdivision of the State into areas denominated respectively cities, towns and shires. These are under the management of aldermen and councillors, who are elected by the Parliamentary electors and are charged with the control of all matters of a parochial nature, more especially the construction and maintenance of roads and bridges within their allotted areas. Shires for the most part consist of purely rural districts.

The number and area of these subdivisions, together with the receipts and expenditure (including receipts and expenditure from loans) for the year ended June 30, 1940, were:—

|                  | No. | Area in square miles | Receipts  | Expenditure | Rateable Value. |
|------------------|-----|----------------------|-----------|-------------|-----------------|
|                  |     |                      | £         | £           | £               |
| City of Brisbane | 1   | 885                  | 1,788,157 | 1,718,754   | 21,134,173      |
| Other Cities     | 11  | 231                  | 1,458,406 | 1,451,128   | 6,233,750       |
| Towns            | 11  | 178                  | 508,840   | 196,911     | 1,462,818       |
| Shires           | 121 | 669,089              | 2,451,102 | 2,400,798   | 43,961,488      |
| Totals           | 144 | 669,888              | 5,851,605 | 5,767,591   | 72,842,218      |

## Finance.

The revenue and expenditure of the State in the years shown were :—

| Year ended<br>June 30 | Revenue<br>£ | Expenditure<br>£ | Year ended<br>June 30 | Revenue<br>£ | Expenditure<br>£ |
|-----------------------|--------------|------------------|-----------------------|--------------|------------------|
| 1939                  | 28,354,711   | 29,141,953       | 1942                  | 34,111,835   | 33,314,585       |
| 1940                  | 29,480,781   | 29,474,520       | 1943                  | 37,244,562   | 36,490,231       |
| 1941                  | 30,458,071   | 30,316,771       | 1944 <sup>1</sup>     | 35,918,450   | 35,862,450       |

<sup>1</sup> Estimated.

The principal items of State revenue during 1942-43 were:—taxation (including motor taxation), 12,300,195*l.*; railways, 16,829,288*l.*; Commonwealth payment to State, 2,127,159*l.*, and territorial revenue (including interest on land settlement), 1,098,650*l.* The principal heads of expenditure were: interest and public debt charges, 8,374,804*l.*; railways, 16,091,466*l.* (including interest and pensions), and education (excluding interest but including pensions), 3,471,877*l.*

The amount raised by taxation (exclusive of taxes collected by Commonwealth, as shown in the above paragraph, was 12,300,195*l.*, which was approximately 6*l.* 4*s.* 9*d.* per head of population.

The public debt of Victoria on June 30, 1943, was 175,934,652*l.* An amount of 222,082,770*l.* has been expended from loan funds. Of this amount 78,776,494*l.* was spent on railways; 31,654,652*l.* on waterworks; 41,570,934*l.* on land settlement; 12,202,354*l.* on country roads; 17,839,277*l.* on electricity supply; 13,138,896*l.* on unemployment relief, and 26,900,163*l.* for all other purposes.

## Production and Industry.

## I. AGRICULTURE.

Of the total area of Victoria about 34,240,139 acres at the end of 1941 were either alienated or in process of alienation. Of the remainder about 158,228 acres are at present suitable for agriculture; 5,673,161 acres for pastoral purposes; 85,557 acres are held under perpetual lease; 3,870 acres are held under other leases; 4,386,416 acres are mallee lands; State forests, timber, water, and other reserves, 6,412,506 acres; auriferous land, 454,724 acres; roads, 1,794,218 acres; all other lands, 4,036,941 acres.

The total number of holdings in 1941-42 was 72,027.

The following table shows the areas under the principal crops and the produce of each for five seasons :—

| Season  | Total Area Cultivated | Wheat |         | Oats  |         | Barley |         | Potatoes |       | Hay   |       |
|---------|-----------------------|-------|---------|-------|---------|--------|---------|----------|-------|-------|-------|
|         |                       | Acres | Bushels | Acres | Bushels | Acres  | Bushels | Acres    | Tons  | Acres | Tons  |
| 1939-39 | 1,000                 | 1,000 | 1,000   | 1,000 | 1,000   | 1,000  | 1,000   | 1,000    | 1,000 | 1,000 | 1,000 |
|         | 7,560                 | 2,748 | 18,104  | 668   | 2,909   | 176    | 1,672   | 34       | 181   | 1,105 | 893   |
| 1939-40 | 7,380                 | 2,827 | 45,055  | 440   | 8,281   | 204    | 3,788   | 32       | 83    | 1,205 | 1,821 |
| 1940-41 | 6,354                 | 2,673 | 13,521  | 559   | 2,624   | 188    | 1,187   | 44       | 216   | 678   | 580   |
| 1941-42 | 6,840                 | 2,777 | 46,954  | 422   | 8,149   | 204    | 4,792   | 33       | 118   | 1,008 | 1,443 |
| 1942-43 | 5,489                 | 2,145 | 41,808  | 428   | 6,638   | 78     | 1,274   | 52       | 195   | 789   | 1,050 |

In 1942-43 there were 42,634 acres of vines, yielding 1,381,936 gallons of wine and 55,059 tons of raisins and currants.

Green forage covered 108,598 acres, and vegetable area and orchards occupied an extent of 129,058 acres in 1942-43.

At March, 1943, there were in the State 292,584 horses, 2,022,892 head of cattle, 19,614,040 sheep, and 307,929 pigs. The wool produced in the season 1936-37 amounted to 163,048,510 lb., valued at 11,133,757*l.*; in 1937-38 to 178,890,131 lb., valued at 9,517,061*l.*; in 1938-39 to 165,829,182 lb., valued at 7,315,016*l.*; in 1939-40 to 179,125,526 lb., valued at 10,497,141*l.*; in 1940-41 to 187,831,364 lb., valued at 11,120,160*l.*, and in 1941-42 to 212,919,041 lb., valued at 12,593,512*l.* The quantity of butter produced in 1941-42 was 140,816,692 lb.

At the end of 1941 the area of State forests in Victoria was 5,057,015 acres.

The gross value of Victorian production in 1941-42 was as follows:—agriculture, 25,794,748*l.*; pastoral, 23,498,063*l.*; dairying, 15,567,176*l.*; poultry and bees, 5,036,181*l.*; trapping, 2,197,815*l.*; forestry, 2,122,463*l.*; fisheries, 463,724*l.*; mining, 2,987,990*l.*; manufacturing—value added during process, 110,937,614*l.*, total 188,605,774*l.*

## II. MINING.

The subjoined statement gives, from official returns, the recorded production of all metals and minerals raised in Victoria for the year 1941:—Gold, 149,769 fine oz., value 1,600,407*l.* (1942, 101,497 fine oz., value 1,060,868*l.*); coal, black, 326,441 tons, value 303,761*l.*; coal, brown, 4,565,638 tons, value 422,993*l.*; gypsum, 15,760 tons, value 8,033*l.*; kaolin, 5,641 tons, value 9,033*l.*; diatomaceous earth, 335 tons, value 914*l.*

## III. MANUFACTURES.

The total number of manufactories, works, etc., in 1941-42, was 8,918, of which 757 used steam, oil or gas engines and 7,770 electric power; the aggregate horse-power used was 1,167,102; the number of hands employed was 258,400, and the lands, buildings, machinery and plant were valued at 98,157,370*l.* The value of materials used was 136,058,186*l.*, and of articles produced or work done, 257,281,080*l.* The wages paid amounted to 67,158,618*l.* The manufactures are almost entirely for home consumption.

## Commerce and Communications.

The commerce of Victoria, exclusive of inter-State trade, is included in the statement of the commerce of the Commonwealth of Australia.

The total value of the imports and exports of Victoria, excluding inter-State trade, in recent years, was :—

| Years   | Total Overseas Imports <sup>1</sup> | Total Overseas Exports <sup>2</sup> | Years   | Total Overseas Imports <sup>1</sup> | Total Overseas Exports <sup>2</sup> |
|---------|-------------------------------------|-------------------------------------|---------|-------------------------------------|-------------------------------------|
|         | £ Stg.                              | £ A                                 |         | £ Stg.                              | £ A                                 |
| 1935-36 | 30,616,131                          | 34,982,544                          | 1938-39 | 35,455,386                          | 30,819,012                          |
| 1936-37 | 32,593,726                          | 43,587,646                          | 1939-40 | 41,902,342                          | 36,431,975                          |
| 1937-38 | 39,222,998                          | 41,243,667                          | 1940-41 | 45,529,633                          | 36,652,783                          |

<sup>1</sup> British currency values.

<sup>2</sup> Including 'Bullion and Specie,' the value of which was 1,354,407*l.* in 1935-36, 1,949,258*l.* in 1936-37, 2,091,559*l.* in 1937-38, and 2,431,548 in 1938-39.

<sup>3</sup> Excluding bullion and specie.

The chief exports are wool, wheat, flour, butter, fruits, meats, hides and skins, milk and cream, cheese, eggs and tallow.

All the railways, with the exception of 25 miles privately owned, are the property of the State and are under the management of three commissioners appointed by the Government. The following are some State railway statistics (for years ending June 30) :—

### Area and Population.

Queensland comprises the whole north-eastern portion of the Australian continent, including the adjacent islands in the Pacific Ocean and in the Gulf of Carpentaria. Estimated area 670,600 English square miles, with a seaboard of 3,236 miles. In 1824 a branch penal settlement was made at Moreton Bay; in 1842 free settlers were admitted to the country, and during the next twenty years great progress was apparent.

The increase in the population at different periods since 1900 has been as follows :—

| Years             | Population at December 31 |         |           | Increase during 10 Years |           |
|-------------------|---------------------------|---------|-----------|--------------------------|-----------|
|                   | Males                     | Females | Total     | Numerical                | Per Cent. |
| 1900              | 274,684                   | 219,163 | 493,847   | 101,781                  | 25.9      |
| 1910              | 325,618                   | 273,503 | 599,016   | 105,169                  | 21.3      |
| 1920              | 396,555                   | 354,069 | 750,624   | 151,608                  | 25.8      |
| 1930              | 481,559                   | 435,177 | 916,736   | 164,112                  | 22.1      |
| 1940              | 586,775                   | 492,898 | 1,079,673 | 112,877                  | 12.3      |
| 1941              | 598,416                   | 498,414 | 1,096,830 | —                        | —         |
| 1942              | 587,584                   | 502,952 | 1,090,536 | —                        | —         |
| 1943 <sup>1</sup> | 544,000                   | 510,000 | 1,054,000 | —                        | —         |

<sup>1</sup> Preliminary figures.

The total number of aborigines according to the census June 30, 1941, was 8,977 full bloods and 6,451 half-castes. The number of Torres Strait Islanders was 3,675 full bloods and 120 half-castes.

Of the total population, in 1933, 786,125 persons (exclusive of aborigines) were born in Australia; 120,280 in the British Isles; 126,371 in other parts of Europe; 4,843 in Asia; 898 in Africa; 1,810 in America; 591 in Polynesia.

The following table shows the births, deaths, and marriages for five years :—

| Years | Total Births | Illegitimate Births | Deaths <sup>1</sup> | Excess of Births | Marriages |
|-------|--------------|---------------------|---------------------|------------------|-----------|
| 1939  | 20,348       | 1,005               | 9,530               | 10,818           | 9,108     |
| 1940  | 20,412       | 955                 | 9,203               | 11,209           | 10,287    |
| 1941  | 21,518       | 1,061               | 9,530               | 11,988           | 9,885     |
| 1942  | 21,166       | 999                 | 9,622               | 11,544           | 11,722    |
| 1943  | 23,234       | 1,514               | 10,576              | 12,658           | 9,979     |

<sup>1</sup> Civilians only.

The immigration and emigration, including arrivals and departures by sea and by rail across the border, but excluding troop movements :— Immigration, 1940, 47,617; 1941, 47,682; 1942, 61,861; 1943, 82,109. Emigration, 1940, 47,690; 1941, 52,454; 1942, 72,610; 1943, 81,250.

Brisbane, the capital, with an area of 385 square miles, had on December 31, 1943, a population of 370,000. The estimated population of the chief towns at the same date was: Townsville, 34,500; Rockhampton, 33,500; Toowoomba, 32,000; Ipswich, 25,000; Maryborough, 14,500; Bundaberg, 14,000; Cairns, 13,000; Mackay, 12,000; Gympie, 8,000; Southport, 7,500; Warwick, 7,000; Charters Towers, 6,000.

### Religion.

There is no State Church. Previous to 1861 valuable grants of land had been made to the principal religious denominations, which they still retain. The following were the numbers in 1933 :—Church of England, 331,972; Roman Catholic; 185,889; Catholic (not further defined), 20,675; Presbyterian, 106,813; Methodist, 87,909; Lutheran, 18,890; Baptist, 14,991; Congregational, 8,669; other Christian sects, 35,864; Hebrew, 1,041; all other (including no religion), 134,821.

### Education.

Primary secular education is free and compulsory. The public expenditure on account of education, science and art for the year 1942-43 was 1,818,452. At the end of 1942 there were 1,571 State primary schools (including 53 provisional schools, 28 rural schools, 2 intermediate schools, 8 special schools and 1 correspondence school), with 4,808 teachers, and net enrolment of 131,752 scholars. Secondary education was provided during 1942 by 18 State high schools and 14 high 'top' departments attached to State primary schools, with 312 teachers, the net enrolment being 5,698 scholars, and by 8 subsidised grammar schools (5 for boys and 3 for girls), with 80 teachers and a net enrolment of 1,642 students. There were, in addition, 210 private schools, with 1,265 teachers and a net enrolment of 27,272 children. The Government grants annually a considerable number of scholarships (5,400 in 1941 and 5,135 in 1942), tenable for two years, to the various secondary schools. There were 13 technical schools with 6,785 enrolled students. The Queensland University (established in 1911) in Brisbane had, at the end of 1941, 22 professors, and 221 lecturers and demonstrators, with 1,718 students on the roll.

### Justice and Crime.

Justice is administered by Supreme Courts, Magistrates' Courts, and Courts of Petty Sessions. In these last, Justices of the Peace sit, except in the more important centres when the Court is constituted by a stipendiary magistrate. The Supreme Court consists of a Chief Justice and six puisne judges. The total number of persons convicted of serious offences by the Superior Courts in 1943-44 was 200, and the summary convictions at petty sessions in the same year numbered 21,594 (including cases of bail estreated). Including penal establishments, there were, at the end of 1943, 8 prisons, with 335 male and 21 female prisoners. The total police force, including women police and native troopers, was 1,733 in 1942-43.

### Charities, Pensions, etc.

Charitable institutions and hospitals are maintained by public subscription, supplemented by State endowment; benevolent asylums, an institution for the blind, deaf, and dumb, refuges and homes are also maintained by the Government or receive State assistance. Old Age and Invalid Pensions are payable by the Commonwealth. The number of Old Age Pensioners in the State at June 30, 1943, 34,834 and of Invalid Pensioners, 8,815. The number of War Pensioners at the same date was 24,429 (including dependants), and 25,339 in 1943. Maternity allowance was paid to 12,113 mothers during 1941-42, and 19,651 during 1942-43.

**Finance.**

The following table shows the net revenue and expenditure of the Consolidated Revenue Fund of Queensland during five years ending June 30 :—

|             | 1940-41    | 1941-42    | 1942-43    | 1943-44    | 1944-45 <sup>1</sup> |
|-------------|------------|------------|------------|------------|----------------------|
| Revenue     | 21,539,749 | 23,662,947 | 29,284,072 | 28,968,146 | 25,879,665           |
| Expenditure | 21,511,313 | 23,599,175 | 29,182,050 | 28,854,422 | 25,850,604           |

<sup>1</sup> Estimates.

The gross income from or expenditure on account of Departments under the control of the Commonwealth is not included.

The gross public debt of the State amounted, on June 30, 1943, to 128,563,475*l*. The debt was domiciled as follows in 1943 :—Australia, 60,509,860*l*; Great Britain, 62,788,171*l*; United States of America, 5,270,944*l*. Interest paid on the public debt amounted to 4,917,727*l*. for the year.

The gross national income of Queensland has been estimated at 170,000,000*l*. in 1941-42.

**Defence.**

For Defence, see under COMMONWEALTH OF AUSTRALIA.

**Production and Industry.**

Of the total area of the State, 21,780,313 acres have been alienated: in process of alienation, under deferred payment system, are 6,034,376, leaving 401,805,311 acres still the property of the Crown, or about 93·60 per cent. of the total area. The receipts from the sale of land up to the end of 1943 amounted to 14,130,782*l*.

A large proportion of the area is leased in squatting runs for pastoral purposes, amounting to 244,050,880 acres in 1943, besides 83,080,187 acres in grazing selections, and 9,144,880 acres under occupation licence. Perpetual leases, 6,332,918 acres; prickly pear leases, 23,960. Live-stock on farms and stations at March 31, 1944, numbered 387,000 horses, 6,525,000 cattle, 23,256,000 sheep, and 450,000 pigs. The total area under crop during 1943-44 was 1,755,831 acres. 60,961 acres were irrigated in 1940, the principal crops so watered being sugar cane, fruit and vegetables, fodder crops and tobacco. The wool production, expressed as greasy, was in 1936-37, 153,766,368 lb., valued at 9,155,506*l*; 1937-38, 174,751,280 lb., valued at 10,390,420*l*; 1938-39, 179,459,000 lb., valued at 8,195,000*l*; 1939-40, 195,770,277 lb., valued at 10,033,226*l*; 1940-41, 197,700,768, valued at 10,771,397*l*; 1941-42, 204,119,026 lb., valued at 11,634,784*l*; 1942-43, 213,966,182 lb., valued at 13,607,732*l*.

A considerable area consists of natural forest, eucalyptus, pine and cedar being the timbers mostly in evidence, although a large quantity of more ornamental woods are utilised by cabinet makers. The amount of native timber cut in the various saw mills in 1942-43 was (in superficial feet) :—pine, 79,987,000; hardwood, 77,256,000; other, mostly cabinet timber, 19,432,000; number of railway sleepers, 347,114; total value, 3,018,258*l*. The plywood industry is important; 12,508,000 superficial feet solid plywood were produced, the value being set down at 628,179*l*. In addition, 892,000 sup. ft. solid of veneer, valued at 54,332*l*., was produced from cabinet woods of the north. Forest and timber reservations total 6,391,952 acres (1943); areas for National Parks 677,786 acres.

The crops, etc., in two years were as follows :—

| Crop                    | Acres   |                     | Yield      |                             |
|-------------------------|---------|---------------------|------------|-----------------------------|
|                         | 1942-43 | 1943-44             | 1942-43    | 1943-44                     |
| Sugar cane, crushed     | 231,256 | 220,652             | 4,333,488  | 3,807,617 tons              |
| Wheat                   | 284,785 | 281,808             | 5,005,065  | 4,988,492 bushels           |
| Maize                   | 173,816 | 172,722             | 3,794,073  | 511,754 "                   |
| Barley                  | 8,266   | 12,911              | 164,529    | 250,234 "                   |
| Oats                    | 19,103  | 22,04               | 276,744    | 389,076 "                   |
| Potatoes (English)      | 9,885   | 14,609              | 22,438     | 30,717 tons                 |
| Pumpkins (table)        | 14,201  | 18,050              | 33,590     | 37,184 "                    |

<sup>1</sup> Bearing area only

<sup>2</sup> Estimated.

Total value of all crops, 1942-43, £A20,376,000.

There are several coal mines in the State, the produce of which amounted to 1,113,426 tons in 1938, valued at 958,884*l*. Gold-fields were discovered in 1858; and from the commencement of gold mining to the end of 1938 the production amounted to 20,881,214 fine ounces. In 1938, 151,432 ozs. of gold were produced, valued at 1,334,788*l*; 3,533,490 ozs. of silver, valued at 298,589*l*; copper, 4,459 tons, valued at 203,967*l*; lead, 41,196 tons, valued at 628,025*l*; zinc, 23,735 tons, valued at 329,464*l*; total value of all minerals, 3,966,119*l*.

A large proportion of the secondary industries of the State are works for processing primary products, the most important being sugar mills, butter factories, saw mills, and meat works. There are 23 cane crushing mills, 2 sugar refineries, 21 meat works (including bacon factories) producing largely for export, and many saw mills of various sizes. Other industries are railway workshops, rubber mills, and the production of various items of food and clothing, chiefly for local use. In 1942-43, there were 2,577 factories, employing 49,458 males and 13,967 females, and making goods worth 84,359,141*l*. The value of production (value added in manufacture) was 28,111,694*l*. In addition, there were 43 electricity stations and 16 gasworks.

The gross value of Queensland primary production during 1942-43 amounted to 67,232,000*l*., which includes agriculture, 20,376,000*l*.; dairying, 12,731,000*l*.; pastoral, 25,681,000*l*.; poultry and bee-keeping, 1,081,000*l*.; mining, 4,282,000*l*.; forestry, 2,708,000*l*.; fisheries, 302,000*l*.; wild animals, 71,000*l*. Manufacturing, including production of light, heat and power, was 29,045,000*l*. (net value).

In the western portion of the State water is comparatively easily found by sinking artesian bores. At April 30, 1943, 2,005 such bores had been drilled, of which 1,309 were flowing.

**Commerce and Shipping.**

The overseas commerce of Queensland is included in the Statement of the commerce of the Commonwealth of Australia.

The departments of the Public Service are controlled by the following Ministers (as at June 30, 1944):—

*Premier, Treasurer, and Minister of Immigration.*—Hon. Thomas Playford, M.P.  
*Chief Secretary, Minister for Mines and Minister for Health.*—Hon. Alexander L. McEwin, M.L.C.  
*Attorney-General and Minister for Education, Industry and Employment.*—Hon. C. L. Abbott, K.C., M.P.  
*Minister for Works, Railways, Marine and Local Government.*—Hon. M. McIntosh, M.P.  
*Minister for Agriculture and Afforestation.*—Hon. G. F. Jenkins, M.P.  
*Minister for Lands, Repatriation, Immigration.*—Hon. R. J. Rudall, M.L.C.

The provision for the payment of Ministers is 7,750*l*. They are jointly and individually responsible to the Legislature for all their official acts, as in the United Kingdom.

*Agent-General for South Australia in London.*—Sir Charles McCann (appointed September 21, 1934).

### Area.

The total area of South Australia is 380,070 square miles. The settled part of the State is divided into counties, hundreds, municipalities, and district councils, the last being the most general, as they cover most of the settled districts. There are 49 counties proclaimed, covering 56,008,960 acres. This area covers the settled portion of the State, 47,787,167 acres being in occupation. Outside this area there are three extensive pastoral districts—the western, northern, and north-eastern, covering 187,235,840 acres, 100,000,000 being under pastoral leases, with a population of less than 5,000. There are 34 municipalities and 108 district councils.

### Population.

Population (exclusive of aborigines) at six consecutive censuses was:—

| Date of Census Enumeration | Population |         |         | On previous Census |                    |
|----------------------------|------------|---------|---------|--------------------|--------------------|
|                            | Males      | Females | Total   | Numerical Increase | Increase per cent. |
| 1876 . . .                 | 109,841    | 102,689 | 212,538 | 27,108             | 14.6               |
| 1891 . . .                 | 162,241    | 158,292 | 320,533 | 39,119             | 14.2               |
| 1901 . . .                 | 180,435    | 177,861 | 358,296 | 42,815             | 13.6               |
| 1911 . . .                 | 207,358    | 201,200 | 408,558 | 50,212             | 14.0               |
| 1921 . . .                 | 248,267    | 246,493 | 494,760 | 86,002             | 21.2               |
| 1933 . . .                 | 290,962    | 289,987 | 580,949 | 85,789             | 17.2               |

Population of the city of Adelaide and suburbs, 1943, 360,000. Population of the State, 1944, 620,000.

The number of full-blooded aborigines in the State has been estimated at 2,700. Living in a wild state beyond the reach of civilization there are many more.

The following are the statistics of births, deaths and marriages for five years:—

| Year | Births | Marriages | Deaths | Excess of Births |
|------|--------|-----------|--------|------------------|
| 1939 | 9,618  | 5,670     | 5,789  | 3,879            |
| 1940 | 10,017 | 6,950     | 5,708  | 4,309            |
| 1941 | 10,965 | 6,855     | 6,288  | 4,677            |
| 1942 | 11,278 | 8,129     | 6,712  | 4,566            |
| 1943 | 13,145 | 6,283     | 6,482  | 6,663            |

Of the total number of births in 1943, 494 were illegitimate.

### Religion.

The aggregate number of churches and chapels in the State is approximately 2,000. At the census of 1933 the numbers belonging to the leading denominations were as follows:—Church of England, 164,631; Roman Catholic, 69,445; Methodists, 127,978; Lutherans, 26,027; Baptists, 19,081; Presbyterians, 25,060; Congregationalists, 18,836; Church of Christ, 15,262; Salvation Army, 4,585; other Christians, 16,437; Jews, 528; Mohammedans, 267; Confucians, 8; Buddhist, 46; Theosophist, 56; other non-Christian, 44; indefinite, 1,386; no religion, 761; not stated, 95,611; total 580,949. No aid from the State is given for religious purposes.

### Education.

Education is secular and compulsory to the age of 14 and free. In 1943 there were 896 schools, 32 being high schools, 17 higher primary schools and 13 junior technical schools, the number of children under instruction was 76,693. There is a training college for teachers. The University of Adelaide was incorporated in 1874. There are several denominational secondary schools. There were 172 private schools, with 20,690 pupils in 1943. There is a school of mines and industries in Adelaide, and technical schools in large country centres, 1 school of arts and crafts, apprentice classes, agricultural college, domestic art and woodwork centres, and free kindergarten schools. State expenditure on education in 1943, 1,142,587*l*.

### Justice and Crime.

There is one supreme court, a court of vice-admiralty, and over 100 local courts and police magistrates' courts. There are circuit courts held at several places. Bankruptcy jurisdiction is vested in the Commonwealth Court of Insolvency with Courts at Adelaide and seven country centres. For the twelve month ending December 31, 1943, there were 22 sequestrations, 34 deeds of assignment and 37 schemes under the Bankruptcy Act. There were 208 convictions for felonies and misdemeanours in the Higher Courts and 23,149 in the Magistrates' Courts, in 1943. The total number of persons in gaols at the end of 1943 was 239.

### Pensions.

Old Age, Invalidity and War Pensions are paid by the Commonwealth Government. The number of pensioners in South Australia at June 30, 1943, was: Old Age, 23,125; Invalid, 4,298; War, 16,333; a total annual liability of 2,400,000*l*. There has been a scheme for Maternity Allowances since 1912, a scheme for Childhood Endowment commenced on July 1, 1941, and one for Widows from July 1, 1942.

For Defence, see under COMMONWEALTH OF AUSTRALIA.

**Finance.**

Revenue and expenditure for six years :—

| Years ended<br>June 30 | Revenue    | Expenditure | Years ended<br>June 30 | Revenue    | Expenditure |
|------------------------|------------|-------------|------------------------|------------|-------------|
|                        | £          | £           |                        | £          | £           |
| 1939 . .               | 12,808,598 | 12,700,921  | 1942 . .               | 15,002,080 | 13,712,354  |
| 1940 . .               | 12,755,648 | 12,918,876  | 1943 . .               | 15,192,521 | 14,959,668  |
| 1941 . .               | 12,925,000 | 13,008,000  | 1944 . .               | 15,545,000 | 15,580,000  |

The public debt of the State amounted, on June 30, 1944, to 108,305,239*l.*, representing 174*l.* per head of the population. The public debt has been spent on railways, waterworks, irrigation, harbours, roads, buildings and advances to semi-public bodies, etc.

**Production and Industry.**

Of the total area of South Australia (243,244,800 acres), 15,000,000 acres were alienated and in process of alienation under systems of deferred payments on December 31, 1943. Altogether nearly 100,000,000 acres are unoccupied. The freehold and leasehold land in South Australia amounts to 146,000,000 acres, of which 6,000,000 acres are under cultivation each year.

Value of production, 1942-43:—Crops 15,814,000*l.*; pastoral, 8,458,000*l.*; minerals, 3,413,000*l.*; dairying, 3,817,000*l.*; fisheries and game, poultry, forestry, etc., 2,937,000*l.* Total gross value of primary products 34,419,000*l.*, local value (i.e. less marketing costs) 31,026,000*l.*; net value (i.e. less materials used) 25,391,000*l.*; factories, net value 28,366,000*l.*; total net value 53,755,000*l.*

The chief crops in two years were :—

|            | Acres<br>(1942-43) | Quantities<br>(1942-43)                                        | Acres<br>(1943-44) | Quantities<br>(1943-44)                                        |
|------------|--------------------|----------------------------------------------------------------|--------------------|----------------------------------------------------------------|
| Wheat . .  | 2,009,027          | 36,525,549 bushels                                             | 1,533,816          | 20,690,471 bushels                                             |

| Oats . .   | 262,590            | 3,865,025 "                                                    | 224,454            | 2,294,359 "                                                    |
| Hay . .    | 425,505            | 568,529 tons                                                   | 317,777            | 407,08 tons                                                    |
| Vines . .  | 58,202             | { 15,182,072 gallons <sup>1</sup><br>490,823 cwt. <sup>2</sup> | 60,835             | { 14,084,574 gallons <sup>1</sup><br>600,000 cwt. <sup>2</sup> |

<sup>1</sup> Of wine.

<sup>2</sup> Of dried vine fruits.

Fruit culture is extensively carried on, and annually about 500,000 cwt. of dried fruit, 3,000,000 cases of fresh fruit, and 13,500,000 gallons of wine are produced. Other products, in addition to all kinds of root crops and vegetables, are tobacco, eucalyptus oil, olive oil, gums and chicory. The live-stock in March, 1944, consisted of 151,000 horses, 415,000 cattle, 10,360,000 sheep, and 186,000 pigs. An area of over 150,000 square miles is held under pastoral leases. In 1943-44, 115,000,000 lb. of wool were produced.

The value of minerals produced in 1943 was 3,385,485*l.* Over 33,000,000*l.* of copper has been produced since the foundation of the State. The principal minerals produced are iron, gypsum, salt, copper, gold, opals, etc.

In 1943 there were 2,134 factories in the State, employing 72,751 hands. Wages and salaries amounted to 19,733,923*l.* Gross value of output, 67,580,501*l.*; machinery, land and buildings, etc., valued at 35,321,607*l.*

**Commerce, Shipping and Communication.**

The Commerce of South Australia, exclusive of inter-State trade, is comprised in the statement of the Commerce of Australia given under the heading of the Commonwealth.

Oversea imports and exports (year ending June 30) :—

| Years   | Imports   | Exports    | Years   | Imports   | Exports    |
|---------|-----------|------------|---------|-----------|------------|
|         | £ Stg.    | £ A        |         | £ Stg.    | £ A        |
| 1938-39 | 5,849,192 | 14,822,329 | 1941-42 | 7,462,235 | 14,812,216 |
| 1939-40 | 6,717,619 | 15,957,920 | 1942-43 | 6,858,877 | 9,423,375  |
| 1940-41 | 5,462,008 | 13,196,561 | 1943-44 | 4,780,980 | 15,585,236 |

The chief exports of the State are wool, wheat, wheat-flour, barley, iron ore, concentrates and other minerals, meats, butter, eggs, honey, wine, fruits (fresh and dried), skins and hides, tallow, leather, manures and sandalwood.

In 1938-39, 1,502 vessels of 5,761,318 tons entered. Nationality :—British, 4,830,702 tons; foreign, 930,616 tons.

The State possesses over 50,000 miles of roads. There were (1944) 3,861 miles of railway in the State, including the Transcontinental Railway which has been built from Port Pirie in South Australia to Kalgoorlie in Western Australia, and which, in connection with various State lines, completes a through rail connection between Brisbane, on the north-east coast, and Fremantle on the west coast. It also includes the South Australian portion of the Commonwealth Railway from Port Augusta to the Northern Territory.

There are several good harbours, and the river Murray is navigable for six months of the year for 250 miles within the State. A passenger and mail air service is maintained with the other States, and facilities are available for air transport between the capital city and country centres and other states.

Postal, telephone and telegraph facilities are afforded at 920 offices. Telephones connected total to 70,600. There are nine wireless broadcasting stations, and 156,000 wireless listeners' licences have been issued.

**Banks.**

There are 10 banking associations including the Commonwealth and State Government Banks. In June quarter, 1944, their average deposits were 50,110,616*l.* and average advances 15,664,056*l.*

The Savings Banks on June 30, 1944, had 801,026 deposits amounting to 48,591,868*l.*, or over 78*l.* per head of population, of whom approximately 90 per cent. have one or more accounts. Over 65 per cent. of the population have insurance policies, averaging 135*l.* per policy.

## WESTERN AUSTRALIA.

## Constitution and Government.

In 1791 Vancouver, in the *Discovery*, took formal possession of the country about King George Sound. In 1826 the Government of New South Wales sent 20 convicts and a detachment of soldiers to King George Sound and formed a settlement then called Fredericks Town. In 1827 Captain James (afterwards Sir James) Stirling surveyed the coast from King George Sound to the Swan River, and in May, 1829, Captain (afterwards Sir Charles) Fremantle, took possession of the territory. In June, 1829, Captain Stirling founded the Swan River Settlement, now the Commonwealth State of Western Australia, and the towns of Perth and Fremantle, and was appointed Lieutenant-Governor.

Large grants of land were made to the early settlers, and agricultural and pastoral occupations were pursued by a small population with varying success, until, in 1850, the State was in a languishing condition, and the inhabitants' petition that it might be made a penal settlement was acceded to. Between 1850 and 1868, when transportation ceased, 9,718 convicts were sent out. The Imperial convict establishment was transferred to the Colonial Government on March 31, 1866.

In 1870 partially representative government was instituted and in 1890 the administration was vested in the Governor, a Legislative Council, and a Legislative Assembly. The Legislative Council was, in the first instance, nominated by the Governor, but it was provided that in the event of the population of the Colony reaching 60,000, it should be elective. In 1893 this limit of population being reached, as set forth in a proclamation dated July 18, of that year, the Colonial Parliament passed an Act (57 Vict. No. 14) amending the constitution.

By the Constitution Acts Amendment Act, 1899, further amended by the Constitution Acts Amendment Act, 1911, it is provided that the Legislative Council shall consist of 30 members representing 10 electoral provinces and holding their seats for six years. Members must be 30 years of age, resident in the State for two years, and either be natural-born British subjects or naturalized for 5 years and resident in the State for 5 years. Every elector must have resided in the State for 6 months, and must possess within the province freehold estate of the clear value of £50, or be a householder occupying a dwelling-house of the clear annual value of £17, or holder of a lease of the value of £17 per annum, or the holder of a lease or licence from the Crown of the annual rental of £10, or have his name on the electoral list of a Municipality or Roads Board in respect of property in the province of the annual rateable value of £17. The Legislative Assembly consists of 50 members, each representing one electorate, and elected for 3 years. Members must be 21 years of age, be either natural-born subjects of the Crown and have resided in Western Australia for twelve months, or naturalized for 5 years and have resided therein for 2 years. Electors must be 21 years of age, natural-born or naturalized subjects of the Crown, and must have resided in the State for 6 months, and must be resident in the district for at least one month when making their claims. Members of and electors for both Houses may be of either sex. Enrolment for the Legislative Assembly is compulsory. No person can be registered as a voter in more than one district or more than once in each Province for which he holds a sufficient qualification. Members of the Legislature are paid 600*l.* a year and travel free on all Government railways. The entire management and control of the unalienated lands of the Crown in Western Australia is vested in the Legislature of the State.

State of political parties (elected November 20, 1943):—Legislative Assembly: Labour Party, 30; Country Party, 10; Nationalist Party, 8; Independent, 2.

Governor.—(Vacant, March 1945.)

Lieutenant-Governor.—Sir James Mitchell, K.C.M.G. (appointed July, 1933).

The salary provided for the Governor is 4,000*l.* per annum. He is assisted in his functions by a cabinet of responsible ministers, as follows (elected December 9, 1943):—

Premier, Treasurer and Minister for Housing.—Hon. John Collings Willcock, M.L.A.

Deputy Premier and Minister for Lands and Agriculture.—Hon. Frank Joseph Scott Wise, M.L.A.

Minister for Works, Water Supplies and Industrial Development.—Hon. Albert Redvers George Hawke, M.L.A.

Chief Secretary and Minister for Police.—Hon. William Henry Kison, M.L.C.

Minister for Mines, Civil Defence and Health.—Hon. Alexander Hugh Panton, M.L.A.

Minister for Justice and Railways.—Hon. Emil Nulsen, M.L.A.

Minister for the North-West and Forests.—Hon. Aubrey Augustus Michael Coverley, M.L.A.

Minister of Social Service and Education.—Hon. John Tonkin, M.L.A.

Honorary Minister.—Hon. Edmund Harry Gray, M.L.C.

Agent-General in London.—Hon. Michael Francis Troy. Offices—Savoy House, Strand, London, W.C. 2.

## Area and Population.

Western Australia includes all that portion of the continent situated to the westward of 129° E. longitude, together with the adjacent islands. The total estimated area of the State is 975,920 English square miles, or 624,588,800 acres. It is divided into 148 Local Government areas.

The enumerated population at the date of each census was as follows:—

| Census Year | Males   | Females | Total   |
|-------------|---------|---------|---------|
| 1881        | 17,062  | 12,646  | 29,708  |
| 1891        | 29,807  | 19,975  | 49,782  |
| 1901        | 112,875 | 71,249  | 184,124 |
| 1911        | 161,565 | 120,549 | 282,114 |
| 1921        | 177,278 | 155,454 | 332,732 |
| 1933        | 233,937 | 204,915 | 438,852 |

There were enumerated, in 1933, 3,444 half-caste aborigines. The estimated full-blood aboriginal population in the State on June 30, 1941, was 21,700.

Of the total population in 1933, 328,292 were returned as born in Australia. The number of married persons was 169,305 (86,422 males and 82,883 females); widowers, 6,468; widows, 13,808; divorced, 781 males and 648 females; unmarried, 138,395 males and 107,058 females. The conjugal condition of the remaining 2,389 persons was not stated. The number of males under 21 was 85,756, and of females 82,489. The estimated population

The total value of the direct overseas imports and exports of Queensland in recent years is given in the following table:—

| Years   | Imports    | Exports    | Years   | Imports    | Exports    |
|---------|------------|------------|---------|------------|------------|
| 1938-39 | 9,966,862  | 28,651,842 | 1941-42 | 8,851,154  | 21,296,900 |
| 1939-40 | 10,966,825 | 32,195,326 | 1942-43 | 9,454,549  | 18,623,507 |
| 1940-41 | 7,939,455  | 25,247,887 | 1943-44 | 16,118,895 | 17,889,204 |

In above table both imports and exports are valued in Australian currency.

In 1941-42, interstate exports totalled 22,870,170*l.* and imports 25,228,128*l.*

The chief exports overseas are meat (preserved or frozen), wool, butter, sugar and lead.

Practically all the railways are owned by the State Government, and their mileage, 6,667 miles at June 30, 1941, is the greatest of any of the State systems. In 1942-43, 33,362,752 passengers, and 6,896,881 tons of goods were carried. There are 42,539 miles of constructed roads, of which 8,735 miles are surfaced with concrete, bitumen or macadam, while 82,556 miles of unconstructed roads were open for traffic in 1939-40.

For Shipping, Railways, Posts and Telegraphs see also under COMMONWEALTH OF AUSTRALIA.

### Banks.

There are 10 banks established in Queensland with 330 branches and 93 agencies (excluding the Commonwealth Bank), of which the following are the statistics as at June 30, 1943:—Deposits, 60,351,125*l.*; total liabilities, 62,566,809*l.*; coin and bullion, 219,840*l.*; advances, 30,475,719*l.*; landed property, 1,401,511*l.*; total assets, 45,112,614*l.* The Commonwealth Bank had in Queensland at June 30, 1943, assets to the amount of 24,471,847*l.*, and liabilities, 41,326,171*l.* The Savings Bank Branch had at June 30, 1943, assets to the amount of 44,971,797*l.*, and liabilities, 45,223,809*l.*; depositors' balances, 45,197,149*l.*; number of operative accounts, 587,221; average per inhabitant, 43*l.* 3*s.* 7*d.*

THURSDAY ISLAND (longitude 142°, latitude 11°), with an area of 900 acres, is the smallest of the Prince of Wales group of Islands. It is situated in Torres Straits, about 30 miles to the north-west of Cape York, on the northernmost point of the Queensland coast, and is some 1,430 miles by sea from Brisbane, the capital city.

Thursday Island is the headquarters of the pearl-shell, bêche-de-mer and other fisheries of the Torres Straits, and is in regular and frequent communication by steamer with the other Australian States. The picturesque Albany Passage is passed through on the way from Cooktown to Thursday Island.

The population is a mixed one and numbered 1,047 at the census on June 30, 1933.

## SOUTH AUSTRALIA.

### Constitution and Government.

South Australia was formed into a British Province by Letters Patent of February, 1836, and a partially elective Legislative Council was established in 1851. The present Constitution bears date October 24, 1856. It vests the legislative power in a Parliament elected by the people. The Parliament consists of a Legislative Council and a House of Assembly. The former is composed of twenty members. Every three years half the members retire, and their places are supplied by new members elected from each of the five districts into which the State is divided for this purpose. The executive has no power to dissolve this body. The qualifications of an elector to the Legislative Council are, to be twenty-one years of age, a natural born or naturalised subject of His Majesty, and have been on the electoral roll six months, besides having a freehold of 50*l.* value, or a leasehold of 20*l.* annual value, or occupying a dwelling-house the rent of which is not less than 17*l.* per annum, or a registered proprietor of a Crown lease with improvements to the value of at least 50*l.*, the property of the elector; head teacher of a college or school residing on premises; postmaster or postmistress residing in the building; railway stationmaster resident on premises; member of police force in charge of a station; officiating minister of religion. By the Constitution Amendment Act, 1894, the franchise was extended to women, who voted for the first time at the General Election of April 25, 1896. There were 142,314 registered electors in 1944. The qualification for a member of Council is merely that he must have attained the age of thirty, be a natural born or naturalised subject and a resident in the State for three years. Judges and ministers of religion are ineligible for election as members. Each member of the Council and also of the House of Assembly receives 400*l.* per annum and a free pass over Government railways.

The House of Assembly consists of 39 members elected for 3 years, representing single electorates. The qualifications for an elector are that of having been on the electoral roll for 6 months, and of having arrived at 21 years of age; and the qualifications for a member are the same. There were 401,763 registered electors in 1943. The election of members of both houses takes place by ballot.

The House of Assembly, elected on April 29, 1944, consists of the following parties: Liberal-Country Party, 20; Labour Party, 16; Independents, 3.

The executive is vested in a Governor appointed by the Crown and an Executive Council, consisting of 6 responsible Ministers and the Chief Justice of the Supreme Court.

Governor of South Australia.—Lieutenant-General Sir Charles W. Loughby Moke Norrie, K.C., M.C. (appointed August 10, 1944; salary, 5,000*l.* per annum).

of the State on December 31, 1943, was: males, 251,418; females, 231,163; total, 482,581.

Perth, the capital, had an estimated population on December 31, 1943, within the 10-mile radius area of the Metropolitan district, of 230,000. This, however, includes the chief port of the State, Fremantle, with its suburbs, the population of which, as at October 31, 1943, was 28,552. The principal municipalities outside the Metropolitan area, with population as at October 31, 1943, are:—Kalgoorlie, 10,500; Bunbury, 5,700; Boulder, 5,450; Geraldton, 5,150; Northam, 5,400; Albany, 4,200; Collie, 3,724; Narrogin, 2,500.

Certain population and vital statistics, covering a 5 year period, are set out hereunder:—

| Year | Marriages | Births | Deaths | Arrivals <sup>1</sup> | Departures <sup>2</sup> |
|------|-----------|--------|--------|-----------------------|-------------------------|
| 1939 | 4,195     | 9,036  | 4,336  | 21,195                | 20,980                  |
| 1940 | 5,234     | 9,121  | 4,486  | 14,285                | 17,985                  |
| 1941 | 5,074     | 10,118 | 4,769  | 12,489                | 19,065                  |
| 1942 | 5,441     | 9,901  | 5,076  | 11,442                | 12,555                  |
| 1943 | 4,528     | 10,481 | 4,528  | —                     | —                       |

<sup>1</sup> Includes arrivals from other Commonwealth States.

<sup>2</sup> Includes departures for other Commonwealth States.

Ex-nuptial births:—1939, 333; 1940, 326; 1941, 356; 1942, 340; 1943, 434.

### Religion.

The religious division of the population was as follows at the census of 1933:—Church of England, 188,457; Roman Catholics, 74,354; Methodists, 44,521; Presbyterians, 32,694; Congregationalists, 5,961; Baptists, 5,601; Salvation Army, 2,633; other Christians, 22,943; Jews, 2,105; Mohammedans, 333; Buddhists, 221; other non-Christians, 270; indefinite, 1,172; no religion, 801; not stated, 56,786.

### Education.

Primary education is compulsory. Government primary schools in 1943 numbered 676 with 52,920 pupils. Private schools, 1942, 150 with 15,859 pupils.

Education is free throughout from the kindergarten to the university and comprises ample provision also for secondary education, technical schools, scholarships, etc. During the financial year ended June 30, 1944, the total sum spent on education was 969,078*l.* from consolidated revenue, including a grant of 48,768*l.* to the University of Western Australia.

### Justice and Crime.

The following table gives the number of apprehensions and convictions for five years:—

|                                             | 1938                | 1939                | 1940                | 1941                | 1942                |
|---------------------------------------------|---------------------|---------------------|---------------------|---------------------|---------------------|
| Apprehensions or Summonses                  | 24,322 <sup>1</sup> | 24,111 <sup>1</sup> | 23,095 <sup>1</sup> | 21,667 <sup>1</sup> | 24,091 <sup>1</sup> |
| Summary Convictions                         | 23,184 <sup>2</sup> | 22,539 <sup>2</sup> | 21,705 <sup>2</sup> | 20,485 <sup>2</sup> | 22,924 <sup>2</sup> |
| Convictions in Superior Courts <sup>3</sup> | 90                  | 71                  | 84                  | 65                  | 61                  |

<sup>1</sup> In the case of concurrent offences each offence is included.

<sup>2</sup> Included 12,055 convictions for traffic offences in 1938; 10,812 in 1939; 10,535 in 1940; 8,977 in 1941, and 7,882 in 1942.

<sup>3</sup> Distinct persons convicted.

The total number of persons committed to prison for penal imprisonment in the year ended June 30, 1943, was 1,791; the number of commitments totalled 2,484 (males, 2,216; females, 218).

All the above figures are exclusive of aboriginal crime.

### Social Welfare.

There are two Government institutions for the aged and infirm, one situated at Claremont and one at Guildford, with 522 inmates on June 30, 1944. Twenty Government hospitals, a Government sanatorium for consumptive patients, and 5 mental hospitals are maintained by public funds, whilst 59 other hospitals are assisted therefrom. In addition, numerous private hospitals are situated in Perth and other centres of population. There is a leprosarium at Derby for the accommodation and treatment of native lepers diagnosed as such in the north-west areas of the State. In addition there are native hospitals at Port Hedland, Broome, Derby and Wyndham. Native hospitals are also located at Moore River Native Settlement, Mogumber, on the Midland Railway, and Carrolup Native Settlement, Katanning, Great Southern Railway; all native hospitals are staffed with fully qualified nurses.

Ten Protestant and 7 Roman Catholic orphanages, industrial and farm schools are supported partly by private subscriptions and partly out of public money. There are two Government native cattle stations, namely, Moola Bulla Station, Hall's Creek, East Kimberley, and Munja Station, situated at Walcott Inlet on the coast between Derby and Wyndham; both stations are equipped with clinics for the treatment of minor ailments, the object of the establishment of these stations being the care and welfare of natives generally. There are four departmental native depôts, and in addition, many other rationing centres where natives may receive assistance as required. Seventeen native institutions have been established for the education and welfare of natives generally, and are controlled by various religious organisations.

There is also a Government receiving depôt for all State children who are afterwards sent to various institutions. On June 30, 1944, 403 adults and 943 children, totalling 1,346 persons, were in receipt of monetary assistance, payment being met from State revenue.

Old Age, Invalidity and War Pensions are paid by the Commonwealth Government. The number of pensioners in Western Australia at June 30, 1944, was: Old Age, 18,109; Invalid, 3,443; Widows, 2,796, and War Pensioners and dependents, 23,888.

### Finance.

The revenue and expenditure of Western Australia in six years, ended June 30, are given as follows:—

| Year ended June 30 | Revenue    | Expenditure | Year ended June 30 | Revenue    | Expenditure |
|--------------------|------------|-------------|--------------------|------------|-------------|
|                    | £          | £           |                    | £          | £           |
| 1940               | 11,119,943 | 11,266,768  | 1943               | 13,151,678 | 13,127,242  |
| 1941               | 11,432,068 | 11,420,957  | 1944               | 13,589,176 | 13,551,154  |
| 1942               | 11,940,149 | 11,938,381  | 1945 <sup>1</sup>  | 13,584,371 | 13,588,198  |

<sup>1</sup> Estimates.

Approximately one-third of the public income is derived from railways and tramways (4,934,878*l.* for the year ended June 30, 1944), and the rest mainly from various forms of taxation (3,420,908*l.*), lands, timber and

mining (849,859*l.*), business and trading concerns (1,997,045*l.*), from Commonwealth Funds (1,323,430*l.*) and from other sources (1,543,056*l.*). Western Australia had a public debt of 96,478,295*l.* on June 30, 1944, the charge for the year which was 4,565,688*l.* (inclusive of exchange).

For Defence, see under COMMONWEALTH OF AUSTRALIA.

### Production and Industry.

Up to June 30, 1944, of the entire acreage of the State, 18,945,832 acres had been alienated; on that date 12,676,129 acres were in process of alienation; the area alienated and in process of alienation thus amounting to 31,621,961 acres. At the same date there were in force leases comprising an area of 212,696,861 acres, of which 207,657,215 acres were pastoral, 2,690,380 acres were timber, 59,765 acres mining leases, and 30,828 acres Miners' Homestead leases, and 2,258,723 reserves and special leases.

The chief crops for two recent seasons were as follows:—

| Crops                               | 1942-43   | 1943-44   | 1942-43                | 1943-44                |
|-------------------------------------|-----------|-----------|------------------------|------------------------|
|                                     | Acres     | Acres     | Bushels                | Bushels                |
| Wheat . . . .                       | 1,753,178 | 1,567,016 | 30,600,000             | 18,550,000             |
| Oats . . . .                        | 342,809   | 358,129   | 3,611,991              | 3,964,082              |
| Barley . . . .                      | 49,502    | 61,400    | 533,430                | 723,984                |
| Hay . . . .                         | 258,150   | 281,234   | Tons                   | Tons                   |
| Potatoes . . . .                    | 6,390     | 7,375     | 277,957                | 313,864                |
|                                     |           |           | 32,246                 | 30,532                 |
| Tobacco . . . .                     | 1,347     | 1,611     | Cwt.                   | Cwt.                   |
| Orchards (including Apples) . . . . | 21,266    | 21,154    | 11,936                 | 10,112                 |
| Vines . . . .                       | 10,126    | 10,583    | 2,126,936 <sup>1</sup> | 1,719,147 <sup>1</sup> |
|                                     |           |           | Grapes Tons            | Grapes Tons            |
|                                     |           |           | 3,003                  | 22,866                 |

<sup>1</sup> Bushels of apples.

The forecast of the 1944-45 wheat crop is 13,000,000 bushels from 1,450,000 acres.

The area of State forests and timber reserves on June 30, 1944, was 5,171,142 acres; the number of super feet sawn and hewn was (1942-43) 128,877,656.

The live-stock on March 31, 1944, consisted of 106,743 horses; 870,939 cattle; 11,012,936 sheep, and 163,876 pigs.

The wool clip in 1942 was 97,635,000 lb.; the exports for 1943-44 (expressed as greasy wool), 72,467,600 lb., valued at 5,492,950*l.*

Gold was first obtained in Western Australia in 1885. The sensational gold finds at Coolgardie and Kalgoorlie in 1892 and 1893 gave an impetus to Western Australian gold mining, which, in a few years' time, placed this State at the head of all the Australian States as regards gold output. The aggregate output to the end of December, 1943, was 49,283,132 fine ozs., valued in Australian currency at 266,386,137*l.* There were in the State, in 1943, 1,268 gold-mining leases; men employed in the mines, 5,048, viz., 2,547 above and 2,591 underground; output of gold, 1943, 546,576 fine ozs., value in Australian currency, 5,710,669*l.*

The total value of the mineral output of the State in 1942 was 9,487,858*l.*, and in 1943, 6,385,542*l.* Principal minerals in 1943, other than gold, were: coal, 531,746 tons, value 489,721*l.*; antimony, 1,127

tons, value 41,676*l.*; arsenic, 2,283 tons, value 47,943*l.*; silver, 118,803 fine oz., value 15,375*l.*; beryl, 548 tons, value 16,009*l.*

There were, for the year ended June 30, 1943, a total of 1,799 industrial establishments in the State, employing either machinery or at least four workers. The average number of persons employed by them over the year was 25,813, as against 23,980 in 1941-42. The gross output of these establishments for the year ended June 30, 1943, was computed at 26,737,549*l.*, while the net output, i.e. the value added in the course of manufacture, was 11,453,149*l.*

The estimated gross value of Western Australian primary production during 1942-43 was as follows: agricultural, 7,637,000*l.*; pastoral, 8,172,499*l.*; dairy, poultry and bee-farming, 3,831,973*l.*; forestry and fisheries, 1,766,056*l.*; mining, 19,487,594*l.*

### Commerce and Communications.

The external commerce of Western Australia, exclusive of inter-State trade, is comprised in the statement of the commerce of Australia given under the heading of the Commonwealth.

The total value of the imports and exports, including inter-State trade, in 5 years (June 30) is as follows:—

|                              | 1937-38    | 1938-39    | 1939-40    | 1940-41    | 1941-42    |
|------------------------------|------------|------------|------------|------------|------------|
|                              | £          | £          | £          | £          | £          |
| Imports . . . .              | 20,932,599 | 19,394,166 | 20,615,054 | 19,083,215 | 18,751,869 |
| Exports <sup>1</sup> . . . . | 19,834,013 | 18,048,238 | 19,237,022 | 18,018,476 | 17,612,479 |
|                              | 23,100,537 | 23,006,410 | 24,576,754 | 24,839,479 | 25,351,484 |

<sup>1</sup> Australian currency values.

<sup>2</sup> Recorded values.

The more important exports of local products for 1941-42, with Australian currency values, were: wheat (2,010,536*l.*) and flour (842,687*l.*), wool (4,823,874*l.*), gold, uncoined (10,386,588*l.*), timber (699,661*l.*), pearl-shell and pearls (73,478*l.*), hides and skins (386,009*l.*), beef (163,331*l.*), mutton and lamb (217,309*l.*), butter (216,753*l.*), fresh fruit (122,565*l.*).

There were on the Western Australian register on December 31, 1942, 75 steamers of 6,129 tons, and 272 sailing vessels of 7,625 tons; total, 847 vessels of 13,814 tons.

For the year ended June 30, 1944, the State had 4,381 miles of State Government railway; 277 miles of privately owned line and 450 miles of Commonwealth line, the latter being the western portion of the Trans-Australian line (Kalgoorlie-Port Augusta), which links the State Railway System to those of the other States of the Commonwealth.

### Money and Credit.

A branch of the Royal Mint was opened at Perth in 1899. The issues of Imperial coin to the end of December, 1943, were: gold, 106,751,535*l.*; silver, 15,600*l.*; bronze, 116,590*l.*

There are eight cheque paying banks in Western Australia including the Commonwealth Bank. In June quarter, 1944, their average deposits were 36,725,237*l.* and average advances 15,962,026*l.*

The Commonwealth Savings Bank was opened in this State at the beginning of 1913, and on November 1, 1931, absorbed the State Savings Bank. On June 30, 1944, 25,790,714*l.* stood to the credit of 301,225 depositors.

## TASMANIA.

### Constitution and Government.

Abel Janszoon Tasman discovered Van Diemen's Land (Tasmania) on November 24, 1642. The island became a British settlement in 1803 as a dependency of New South Wales; in 1825 its connection with New South Wales was terminated; in 1851 a partially elective Legislative Council was established, and in 1856 responsible government came into operation. On January 1, 1901, Tasmania was federated with the other Australian States into the Commonwealth of Australia.

Parliament consists of a Legislative Council and a House of Assembly. The Council has 18 members, elected on a property qualification of 10l. freehold or 30l. a year leasehold. Certain professional men and all 'returned soldiers' are also electors. Members sit for 6 years, and 3 retire annually in rotation. There is no power to dissolve the Council. The House of Assembly has 30 members, elected for 5 years by adults with six months' residence in the State. Members of both Houses are paid according to the district represented. The amounts vary from 370l. (Buckingham) to 500l. (Darwin) a year. Women received the right to vote in 1903. Proportional representation was adopted in 1907, the method being the single transferable vote in 6-member constituencies. By-elections are superseded (from 1919) by a recount of the votes at the preceding General Election.

At the election on December 13, 1941, for the House of Assembly 20 Labour and 10 Nationalist members were returned.

*Governor.*—Sir Erheat Clark, G.C.M.G., K.C.B., C.B.E. (term: August 5, 1933, to August 5, 1938; term extended from August 5, 1938, to August 5, 1945).

The Cabinet (appointed December 18, 1939) is composed as follows:—

*Premier and Minister for Education.*—Hon. Robert Cosgrove.

*Treasurer.*—Hon. Edmund Dwyer-Gray.

*Attorney-General and Assistant Minister for Education.*—Hon. J. McDonald, M.L.C.

*Chief Secretary and Minister of Transport.*—Hon. C. E. Culley.

*Minister for Lands and Works.*—Hon. Edward Brooker.

*Minister for Agriculture.*—Hon. John L. Madden.

*Hon. Ministers.*—Hon. W. P. Taylor, M.C., Minister for Forests; Hon. H. T. Lane, Minister for Mines; Hon. E. R. A. Howroyd, Minister for Health.

A minister must have a seat in one of the two Houses.

Each of the ministers has a salary of 1,250l. per annum. The Premier has an additional 250l. a year.

*Agent-General in London.*—Sir Claude James.

*Official Secretary.*—R. J. Garrad, Australia House, Strand, London, W.C.2.

### Area and Population.

Area, with Macquarie Island (89 square miles), 26,304 square miles or about 16,834,600 acres, of which 15,571,500 acres form the area of Tasmania Proper, the rest constituting that of a number of small islands, in two main groups, the north-east and north-west.

The population at six consecutive censuses was:—

| Year | Population | Increase per cent. per Annum | Year | Population | Increase per cent. per Annum |
|------|------------|------------------------------|------|------------|------------------------------|
| 1881 | 115,705    | 1.38                         | 1911 | 191,211    | 1.04                         |
| 1891 | 146,667    | 2.36                         | 1921 | 213,780    | 1.12                         |
| 1901 | 172,475    | 1.64                         | 1933 | 227,599    | 0.51                         |

In 1933 there were 115,097 males and 112,502 females. Of the total population in 1933, 4.20 per cent. were natives of the British Isles, 0.30 per cent. natives of other European countries, and 94.93 per cent. natives of Australia and New Zealand. The pure aboriginal is extinct.

The population at March 31, 1943, was 121,810 males and 119,520 females.

The births, deaths and marriages for five years were as follows:—

| Year | Births | Marriages | Deaths | Excess of Births |
|------|--------|-----------|--------|------------------|
| 1939 | 5,004  | 2,264     | 2,426  | 2,578            |
| 1940 | 4,994  | 2,476     | 2,387  | 2,607            |
| 1941 | 5,206  | 2,150     | 2,575  | 2,631            |
| 1942 | 5,305  | 2,431     | 2,430  | 2,875            |
| 1943 | 5,517  | 2,102     | 2,527  | 3,070            |

Population of the capital, Hobart, and suburbs (December 31, 1943), 70,838, of Launceston and suburbs, 35,785.

### Religion.

In 1933, belonging to the Church of England, 105,228; Roman Catholics, 30,219; Catholics (undefined), 2,970; Methodists, 26,470; Presbyterians, 13,194; Baptists, 4,666; Congregationalists, 3,963; others, 8,543.

### Education.

Primary education is free and secular, and compulsory between the ages of 7 and 14. Nine-tenths of the primary teaching is at State schools. There are 373 State primary schools, with an average daily attendance of 24,462 scholars. Secondary education is about equally divided between the 24,462 scholars. Secondary education is about equally divided between the new State high schools and the older endowed schools. The 7 State high schools in 1942 had an average attendance of 1,779. There are 6 technical schools, and 3 junior technical schools, with an average attendance of 2,322.

The University of Tasmania, established 1890, had 353 students taking courses for degrees in 1942. University expenditure in 1942 (exclusive of capital expenditure) was about 26,884.

### Justice and Crime.

There are a Supreme Court, courts of petty sessions and general sessions, the latter presided over by a stipendiary magistrate, assisted by justices of the peace. The Supreme Court is both a court of first instance and a Court of Appeal in all jurisdiction, civil and criminal. The State is also divided into four districts with local civil courts presided over by Commissioners who are also police magistrates, and petty sessions have all the powers of two justices of the peace. Petty offences and a limited number of civil claims are dealt with in petty sessions and in general sessions by justices of the peace. During the year 1942, 5,817 persons were summarily convicted, and 49 persons were committed for trial. The total police force on June 30, 1943, was 308. There was 1 gaol, with 43 inmates at the end of June, 1943.

### Old Age Pensions.

Old Age and Invalidity Pensions are paid by the Commonwealth Government. The number of pensioners in Tasmania on June 30, 1943, was: Old Age, 10,822; Invalid, 2,649; War, 10,452.

### Revenue and Expenditure.

The revenue is derived chiefly from taxation (income, land, death duties and lottery taxation), and from the rental and sale of Crown lands. The customs and excise duties are in the hands of the Commonwealth, which Government makes a special grant to Tasmania and contributes a fixed amount per annum towards interest on the State's public debt.

|                 | 1939-40     | 1940-41     | 1941-42     | 1942-43     | 1943-44     |
|-----------------|-------------|-------------|-------------|-------------|-------------|
| Revenue . . .   | £ 3,055,310 | £ 2,921,573 | £ 3,358,707 | £ 3,290,070 | £ 3,498,740 |
| Expenditure . . | 3,052,909   | 3,103,204   | 3,357,122   | 3,399,550   | 3,468,545   |

The public debt of Tasmania amounted, June 30, 1944, to 30,083,802.

In 1942-43 State taxation amounted to 6l. 15s. 11d. per head, of which income and special tax provides 3l. 19s. 9d.; lotteries, 1l. 3s. 11d.; land tax, 7s. 8d.; death duties, 10s. 8d.

### Defence.

For Defence, see under COMMONWEALTH OF AUSTRALIA.

### Production and Industry.

The total area of Tasmania is 16,778,000 acres, including 1,206,500 acres islands and lakes. Unalienated land, chiefly rugged mountain country, much of it mineral-bearing, amounts to about 10,417,000 acres. Of this unalienated land about 2,750,125 acres are leased.

The net value in 1942-43 of agricultural and pastoral products was 6,787,000l.; of manufactures, 8,075,000l. (output less raw material, fuel, etc.), and of mining products, 2,540,000l.

### Agricultural production for 1942-43:—

|                 | 1942-43 |                 |              | 1941-42 |                      |
|-----------------|---------|-----------------|--------------|---------|----------------------|
|                 | Acres   | Yield (bushels) |              | Acres   | Yield (bushels)      |
| Wheat . . .     | 4,128   | 72,820          | Potatoes . . | 40,424  | 185,891 <sup>1</sup> |
| Oats . . .      | 18,189  | 392,059         | Hay . . .    | 82,602  | 109,986 <sup>1</sup> |
| Peas (blue) . . | 27,155  | 402,751         | Apples . . . | 21,965  | 5,104,706            |
| Peas (grey) . . | 2,898   | 81,592          |              |         |                      |

<sup>1</sup> Tons.

Production of butter, 1942-43, 10,091,476 lb.; of cheese, 2,389,122 lb.; value of dairy produce, 1,044,480l.

Live-stock at March 31, 1943: Horses, 27,077; cattle, 244,681; sheep, 2,227,000; pigs, 49,251.

Wool production, 17,256,000 pounds, valued at 1,370,500l., in 1942-43.

Forests cover a considerable part of the island. 132 million super. feet of timber were sawn in mills during the year 1942-43.

Chief mineral products for the year ended December, 1941 (latest figures available for publication):—

| Mineral               | Quantity  | Value   | Mineral             | Quantity | Value     |
|-----------------------|-----------|---------|---------------------|----------|-----------|
|                       |           | £       |                     |          | £         |
| Copper . . . tons     | 11,645    | 721,985 | Coal . . . tons     | 109,714  | 85,311    |
| Tin . . . tons        | 1,256     | 828,340 | Gold . . . fine oz. | 19,908   | 212,710   |
| Silver . . . fine oz. | 1,326,788 | 139,806 | Zinc . . . tons     | 24,468   | 666,768   |
| Lead . . . tons       | 11,753    | 293,837 | All minerals . .    | —        | 2,650,371 |
| Osmeridium . . oz.    | 207       | 4,212   |                     |          |           |

**Manufactures.**—The two important manufactures for export are metal extraction and fruit-preserving. The electrolytic-zinc works at Risdon near Hobart are using large quantities of ore imported from Broken Hill, the output being zinc, cadmium and other by-products. Other manufactures that have an output beyond local requirements are wool, confectionery, paper pulp and cement. The carbide works at North-West Bay are able to supply the needs of all Australia. In 1942-43, the number of industrial establishments was 992; value of output, 18,703,930l.; salaries and wages paid, 4,645,088l.

### Commerce, Shipping, &c.

Principal imports, 1941-42 (latest figures available): Food, drink and tobacco, £A3,890,086; apparel, textiles and manufactured fibres, £A1,836,986; metals and metal manufactures, £A3,605,191; stones and minerals, £A822,802. Principal exports, 1942-43: Butter and Total imports, £A14,381,987. Principal exports, 1942-43: Butter and cheese, £A814,614; fruit, fresh, £A522,622; fruit, dried, preserved or pulped, £A708,905; hops, £A195,620; jams and jellies, £A712,291; copper, £A1,109,491; peas, £A198,993; potatoes, £A956,205; wool, £A687,845; hides and skins, £A471,064; zinc bars and blocks, £A1,421,255; timber, £A841,998; woollen manufactures, £A2,390,674. Total exports, £A16,225,847.

Direct overseas imports and exports were 9 per cent. and 5 per cent. respectively of total imports and exports.

The registered shipping in 1943 consisted of 58 motor (including

auxiliary) vessels of 1,751 tons, 62 sailing vessels of 2,247 tons, and 39 steamers of 3,901 tons. Total, 160 vessels, 8,281 tons.

For shipping, railways, posts and telegraphs, *see* under COMMONWEALTH OF AUSTRALIA.

### Savings Banks.

The deposits in Savings Banks, including the Commonwealth Savings Bank, was 14,213,000*l.*, or 57*l.* 8*s.* per head of population as at June 30, 1944.

## THE NORTHERN TERRITORY OF AUSTRALIA.

### Government.

The Northern Territory, after forming part of New South Wales, was annexed in 1863 to South Australia, and in 1901 entered the Commonwealth as a corporate part of South Australia. The Commonwealth Constitution Act of 1900 made provision for the surrender to the Commonwealth of any territory by any State, and under this provision an agreement was entered into on December 7, 1907, for the transfer of the Northern Territory to the Commonwealth, and it formally passed under the control of the Commonwealth Government on January 1, 1911.

On March 1, 1927, the Northern Territory was divided for administrative purposes into two Territories, North Australia and Central Australia, the dividing line between the two Territories being the twentieth parallel of south latitude. Each Territory was under a Government Resident, with headquarters at Darwin and Stuart (now Alice Springs) respectively. This division was effected under the authority of the Northern Australia Act, 1926, which also provided for the appointment of a North Australia Commission, the powers of which extended to matters relating to the development of North Australia, and also to the administration of Crown Lands throughout North Australia and Central Australia. The Northern Australia Act, 1926, was repealed as from June 12, 1931, by the Northern Territory (Administration) Act, 1931. The North Australia Commission was abolished, and the whole of the Northern Territory was placed under the control of an Administrator. The Administrator is charged with the general administration of Crown lands in the Northern Territory.

Administrator (at Alice Springs).—The Hon. C. L. A. Abbott.

Government Secretary (at Alice Springs).—L. H. A. Giles.

District Officer (at Alice Springs).—V. G. Carrington.

### Area and Population.

The Northern Territory is bounded by the 26th parallel of south latitude and the 129th and 138th degrees of east longitude. Its area is

523,620 square miles. The area alienated on June 30, 1942, amounted to 746 square miles absolutely; 208,685 square miles were held under leases and licences; reserved for aboriginal defence and public requirements, 69,243 square miles, and the remainder, 244,946 square miles, was unoccupied. The coast line is about 1,040 miles in length. The Territory possesses many fine rivers and several good harbours, the principal being Port Darwin. The greater part of the interior consists of a table-land rising gradually from the coast to a height of about 1,700 feet. On this tableland there are large areas of excellent pasturage. The southern part of the Territory is generally sandy with a small rainfall, but it can be watered by means of sub-artesian bores. The climate is tropical, but varies considerably over the whole Territory. The proximity of the sea in the north keeps it fairly equable in the coastal region, but further south the climate is of a continental type, showing a great variation between the hottest and coldest months.

The population, excluding aborigines, has varied as follows:—

| Year                     | Europeans | Others | Totals |
|--------------------------|-----------|--------|--------|
| 1881 . . . . .           | 667       | 2,751  | 3,418  |
| 1901 . . . . .           | 782       | 3,112  | 3,894  |
| 1911 (Census) . . . . .  | 1,418     | 1,892  | 3,310  |
| 1921 (Census) . . . . .  | 2,459     | 1,408  | 3,867  |
| 1933 (Census) . . . . .  | 3,186     | 803    | 3,989  |
| 1940 (June 30) . . . . . | 6,820     | 701    | 7,521  |

The estimated population at June 30, 1943, was 5,144 (males 4,053 and females 1,091).

The estimated number of aborigines (including half-castes) on June 30, 1943, was 14,500.

### Finance.

The revenue and expenditure (Central Australia Railway Revenue and Expenditure omitted) for 6 years were as follows:—

| Year    | Revenue | Expenditure | Year    | Revenue   | Expenditure |
|---------|---------|-------------|---------|-----------|-------------|
|         | £       | £           |         | £         | £           |
| 1937-38 | 135,217 | 682,568     | 1940-41 | 491,599   | 1,168,961   |
| 1938-39 | 156,020 | 868,460     | 1941-42 | 608,676   | 1,253,579   |
| 1939-40 | 216,726 | 846,117     | 1942-43 | 1,033,031 | 900,673     |

The chief sources of revenue for the year ended June 30, 1943, were Railways, 791,000*l.*<sup>1</sup>; Lands revenue, 36,800*l.*, and Postal revenue, 130,400*l.* The chief items of expenditure (excluding interest, loans, etc.) were Administrative Staff, 75,926*l.*, and Railways, 317,100*l.*<sup>1</sup> The total expenditure from loan, including that on account of debt taken over from South Australia, to June 30, 1944, was 10,360,000*l.*

### Production and Industry.

The soils of the Territory differ greatly, but most products suitable to the tropical and semi-tropical zones can be grown successfully. At present, however, agriculture is insignificant. The peanut is the only crop which is marketed for export. 80 tons were grown during the

<sup>1</sup> The figures in respect of Railways are for North Australia Railways only.

A Government Anthropologist is supported from this fund with a view to assisting the Government to understand the native point of view. A family bonus is paid to native mothers of four or more children under 16 years of age at the rate of 5s. for four and 1s. for each child over the four. In 1940-41, 6,309*l.* was spent from the fund on medical work among the natives.

| Years ended 30 June | Local Revenue | Expenditure | Imports | Exports | Tonnage entered and cleared |
|---------------------|---------------|-------------|---------|---------|-----------------------------|
|                     | £             | £           | £       | £       | Tons                        |
| 1937                | 171,791       | 171,959     | 452,056 | 524,001 | 356,476                     |
| 1938                | 182,808       | 183,408     | 631,497 | 435,593 | 482,981                     |
| 1939                | 165,823       | 166,688     | 514,808 | 490,158 | 461,199                     |
| 1940                | 177,918       | 178,234     | 826,412 | 510,672 | 489,970                     |
| 1941                | 189,518       | 189,297     | 539,152 | 492,775 | 489,469                     |

Revenue is mainly from customs duties. An annual subsidy is given by the Australian Government. The subsidy for 1940-41 was 42,500*l.*

Gold, silver and osmiridium are the only minerals exported. There are 10 proclaimed mineral fields, nine of which are also gold-fields. Gold is obtained in the Louisiade Islands, on the mainland, and on Woodlark Island. A large area near Port Moresby with promising copper deposits has been proclaimed a mineral field, but it is not being worked owing to the low price of copper. A railway from the field to the coast was constructed and smelters erected. The whole field was abandoned in 1927 owing to the low price of copper. Indications of petroleum have been found over an area of 1,000 sq. miles. Large sums of money are now being spent by oil companies in an intensive search for oil. In 1940-41 the gold output was valued at £A133,341. Bullion produced and exported contains a fairly high percentage of silver. The trade is principally with Queensland and New South Wales. The chief imports are food-stuffs, tobacco, drapery and hardware; exports 1940-41, copra (8,936½ tons, 59,062*l.*), gold (14,056½ ozs., 183,341*l.*), rubber (1,273 tons, 172,099*l.*), desiccated coconut (1,749½ tons, 59,523*l.*).

A steamer trades between Sydney, Port Moresby and Samarai every 3 weeks, and small coastal vessels run at frequent intervals between the various inter-territorial ports. There is a twice-weekly airmail service from Australia, which arrives in Port Moresby en route to Territory of New Guinea on Friday, and departs on return journey on Saturday. Ocean-going shipping entered and cleared 1940-41, British, 325,961 tons; foreign, 163,508 tons. There are wireless telegraph stations at Port Moresby and Samarai.

There are branches of the Bank of New South Wales at Port Moresby and Samarai. The currency and its legal tender are the same as in the Commonwealth of Australia.

### NEW ZEALAND.

New Zealand was first discovered in 1642 by Tasman, and the coast was explored by Captain Cook in 1769, and in subsequent years it became a resort for whalers and traders, chiefly from Australia. By the Treaty of Waitangi, in 1840, between the pioneer British settlers and the representatives of the Maori race, the native chiefs ceded the sovereignty to the British Crown and the islands became a British Colony.

The aborigines, called Maoris, are a branch of the Polynesian race, having emigrated from the Eastern Pacific prior to the fourteenth century. Between 1845 and 1848, and again between 1860 and 1870, a large proportion of them were in revolt against British rule, but peace was permanently established in 1871.

### Government and Constitution.

By Order in Council, the designation of the Colony of New Zealand was changed to the Dominion of New Zealand, on and from September 26, 1907. The present form of government was established by Statute 15 & 16 Vict., cap. 72, passed in 1852. The Colony was divided into six provinces and later into nine. By an Act of the Colonial Legislature, 39 Vict., No. xxi, passed in 1875, the provinces and the provincial system of government were abolished, and the powers previously exercised by superintendents and provincial officers were exercised by the Governor (Governor-General from June, 1917) or by local boards. The legislative power is vested in the Governor-General and a 'General Assembly' consisting of two Chambers—a Legislative Council and a House of Representatives. The Governor-General has the power of assenting to or withholding consent from bills, or he may reserve them for His Majesty's pleasure. He summons, prorogues, and dissolves the Parliament. He can send drafts of bills to either House for consideration but in case of appropriations of public money must first recommend the House of Representatives to make provision accordingly before any appropriations can become law. He can return bills for amendment to either House.

The following is a list of Governors-General:—

|                                   |         |                            |         |
|-----------------------------------|---------|----------------------------|---------|
| Earl of Liverpool . . . . .       | 1917-20 | Lord Bledisloe . . . . .   | 1930-35 |
| Viscount Jellicoe . . . . .       | 1920-24 | Viscount Galway . . . . .  | 1935-41 |
| Sir Charles Ferguson, Bt. . . . . | 1924-30 | Sir Cyril Newall . . . . . | 1941-   |

Definition was given the status of New Zealand (with other Dominions) by the (Imperial) Statute of Westminster of December, 1931, which had received the antecedent approval of the New Zealand Parliament in July, 1931.

1940-41 season. In most parts the natural grasses are extremely rich in nutriment, and provide food for cattle, horses, sheep, and other stock. The numbers of stock on December 31, 1943, were:—Cattle, 978,869; horses, 30,134; goats, 13,805; pigs, 191; sheep, 25,575; camels, 295; mules, 361; donkeys, 1,385.

The Territory is rich in mineral resources, though these have been little developed until recent years. There is considerable activity in gold mining at the present time. The value of the chief minerals produced in the year ended June 30, 1942, was as follows:—Gold bullion, 172,894*l.*; tin concentrates, 4,594*l.*; mica, 20,855*l.*; wolfram, 54,852*l.*; copper ore, 3,126*l.*; ochre, 2,151*l.*; grand total (all minerals), 254,872*l.*

### Commerce.

The overseas imports and exports are given as follows:—

| Year    | Imports | Exports | Year    | Imports | Exports |
|---------|---------|---------|---------|---------|---------|
|         | £       | £       |         | £       | £       |
| 1936-37 | 58,120  | 26,645  | 1939-40 | 61,691  | 12,514  |
| 1937-38 | 44,703  | 6,058   | 1940-41 | 84,694  | 24,866  |
| 1938-39 | 29,406  | 12,729  | 1941-42 | 189,889 | 13,314  |

## TERRITORIES OF THE AUSTRALIAN COMMONWEALTH: TERRITORY OF PAPUA (BRITISH NEW GUINEA).

Papua is the south-eastern part of the island of New Guinea, with the islands of the d'Entrecasteaux and Louisiade groups and all islands between 8° and 12° S. latitude, and 141° and 155° E. longitude. Area 90,540 square miles, of which about 87,786 are on the mainland of New Guinea, and 2,754 on the islands above mentioned. On June 30, 1940, the population was as follows:—European, 1,322; Papuans (estimated), 337,000. (For the part of New Guinea formerly possessed by Germany and now administered by Australia, see below.)

To prevent that portion of the island of New Guinea not claimed by Holland from passing into the hands of a foreign power, the Government of

Queensland annexed it in 1883. This step was not sanctioned by the Imperial Government, but on November 6, 1884, a British Protectorate was proclaimed over the Southern portion of the Eastern half of New Guinea, and in 1887 Queensland, New South Wales and Victoria undertook to defray the cost of administration, and the territory was annexed to the Crown the following year. The Federal Government took over the control in 1901; the political transfer was completed by the *Papua Act* of the Federal Parliament in November, 1905, and on September 1, 1906, a proclamation was issued by the Governor-General of Australia declaring that British New Guinea was to be known henceforth as the Territory of Papua. There is an executive council composed of not more than 9 and not less than 5 members, and one of whom is chosen from the non-official members of the Legislative Council. The official members are officers of the Territory, and a legislative council composed of the executive councillors and 5 non-official members, nominated by the Administrator and appointed by the Governor-General of Australia, one of whom represents the interests of the Christian Missions in the Territory.

Japanese forces invaded Papua in December, 1941. By the capture of Buna by the Allies on December 14, 1942, the Japanese were cleared out of the country and Papua was in Allied hands again.

Administrator.—H. L. Murray, C.B.E. (appointed February 4, 1941).  
Government Secretary.—Herbert William Champion, C.B.E.

Tribes have in large areas settled down to peaceful habits. Eight missionary bodies are at work; many hundreds of natives are being taught by these bodies. 279,258 acres of land have been leased, chiefly by planters, the principal cultures being coconuts (44,583 acres at December 31, 1939) and rubber (18,262 acres). On December 31, 1940, there were 63,609 acres under cultivation. A preferential tariff is granted by the Commonwealth on certain raw material from Papua, and a bonus for 10 years on other products imported into Australia. Freehold alienation is prohibited, but leases may be obtained at low rentals for long terms. Indigenous sago is plentiful in the western portion of the Territory, and there are considerable numbers of native-owned coconut trees. A regulation, which is strictly enforced, requires that each native shall plant coconut trees or other economic trees or plants if his land is suitable, or the natives may, in lieu of paying a tax in money, establish communal plantations under the direction of European instructors.

The ports of entry are—Port Moresby, Samarai, Kulumadan and Daru. There are 8 magisterial districts, each in charge of a resident magistrate. There are also 19 assistant resident magistrates, and 13 patrol officers. There is a Supreme Court at Port Moresby, but it holds sittings wherever and whenever necessary. For native government some simple regulations have been passed. There were (1941) 1,223 village policemen; armed native constabulary, 397.

Throughout the Territory there are numerous schools belonging to the various Christian missions: the attendance of native children is compulsory if English is taught. There is a tax not exceeding 10*s.* per head on indentured native labourers, and not exceeding 20*s.* per head on other natives. After expenses of collection are paid the balance is devoted, first, to native education, and, secondly, to other purposes having for their object the direct benefit of the natives. The education is undertaken by the missions aided by grants from the taxation fund. 4,216*l.* was spent on education in 1940-41. The expenses of the plantation instructors to develop native agriculture are borne by the Education Fund, 1,082*l.* being expended in 1939-40.

The Act also makes provision for medical attention by private practitioners, as well as in hospitals and mental hospitals, and also free maternity treatment in public or private maternity hospitals or at the patient's home.

**Financial Contributions.**—The contributions consist of a registration fee and a charge on salaries, wages, and other income for all persons over sixteen years of age.

Total receipts of the Social Security Fund for the year ended March 31, 1944, amounted to 17,492,084*l.*, made up as follows: registration fee, 551,064*l.*; charge on salaries and wages, 8,561,578*l.*; charge on other income, 4,234,530*l.*; grant from Consolidated Fund, 4,100,000*l.*; other receipts, 44,912*l.*

**War Pensions.**—Provision is made for the payment of pensions and allowances, on certain conditions, to members, or dependants of disabled, deceased or missing members, of the New Zealand Forces who served in the South African War, the war of 1914–18, or the present war, or to members of the New Zealand Mercantile Marine during the present war. Members of the Emergency Reserve Corps during the present war are also provided for. Such pensions are not a charge on the Social Security Fund, but are paid from the Consolidated Fund.

#### Social Security Benefits and War Pensions.—

<sup>1</sup> Not including payments outside New Zealand (about 102,000*l.* per annum).

#### Finance.

The following table of revenue relates to the Consolidated Fund and is exclusive of sales of land and of receipts paid into various other accounts and funds:—

#### FINANCE

| Year ended March 31 | Customs and Excise | Sales-tax <sup>1</sup> | Interest <sup>2</sup> | Land Tax  | Income Tax | Total <sup>3</sup> (including others) |
|---------------------|--------------------|------------------------|-----------------------|-----------|------------|---------------------------------------|
|                     | £                  | £                      | £                     | £         | £          | £                                     |
| 1940                | 11,895,857         | 8,510,180              | 2,908,745             | 1,019,084 | 10,271,552 | 37,974,159                            |
| 1941                | 10,379,787         | 8,502,538              | 3,284,846             | 959,418   | 15,720,490 | 40,487,927                            |
| 1942                | 9,788,290          | 8,548,220              | 3,464,364             | 1,009,288 | 16,511,548 | 41,240,959                            |
| 1943                | 8,831,322          | 8,600,626              | 4,133,277             | 975,824   | 19,146,606 | 42,361,000                            |
| 1944                | 9,713,844          | 8,762,406              | 4,281,922             | 987,707   | 23,498,851 | 48,828,274                            |

<sup>1</sup> Ordinary revenue purposes only. See also War Expenses Account.

<sup>2</sup> The total shown for interest covers interest on the Public Debt Redemption Fund and on other public moneys, together with interest on railway capital liability and on post and telegraph capital liability. Railway and post and telegraph revenue and expenditure have been removed from the operations of the consolidated Fund, these two undertakings, however, paying interest on their capital liability. From 1931–32 profits of the Post and Telegraph Department are included in the Consolidated Fund. Railway revenue in 1943–44 was 15,325,506*l.* and post and telegraph receipts, 6,251,247*l.*

<sup>3</sup> Excludes social security and war taxation.

The following expenditure table of the Consolidated Fund is exclusive of sums paid to the Public Works Account:—

| Year ended March 31 | Public Debt Charges | Pensions <sup>1</sup> | Education | Health and Hospitals | Police  | Total (including others) |
|---------------------|---------------------|-----------------------|-----------|----------------------|---------|--------------------------|
|                     | £                   | £                     | £         | £                    | £       | £                        |
| 1940                | 10,188,072          | 2,016,811             | 4,471,809 | 1,822,892            | 627,502 | 37,654,820               |
| 1941                | 11,984,222          | 1,957,217             | 4,199,767 | 1,649,280            | 649,715 | 38,711,508               |
| 1942                | 10,985,104          | 2,093,790             | 4,508,118 | 2,419,734            | 677,353 | 39,568,497               |
| 1943                | 12,259,040          | 2,882,358             | 4,670,639 | 2,457,480            | 716,125 | 38,206,431               |

<sup>1</sup> Exclusive of Social Security benefits.

Total expenditure shown in the foregoing table includes accounts transferred to the Social Security Fund and War Expense Account. In 1943–44, these amounted to 4,100,000*l.* and 7,500,000*l.* respectively, while in addition an amount of 4,200,000*l.* was allocated to the War Expenses Account out of surplus funds.

Particulars of receipts and payments of the War Expenses Account for 1943–44 are shown in the following table:—

| Receipts—                                  | £           | Payments—                                   | £           |
|--------------------------------------------|-------------|---------------------------------------------|-------------|
| Loans . . . . .                            | 72,754,812  | Navy . . . . .                              | 8,247,620   |

| Total . . . . .             | 108,410   | 756,226                                                          | 735,258 | 1,491,484 | 82,326                                                 |

At the census of 1936, 677,087 lived in the rural districts; 892,024 in cities and boroughs. The balance of 4,699 were migratory on census night. These figures are inclusive of Maoris.

Maori population of New Zealand :—1896, 42,113; 1901, 45,549; 1936, 82,326.

Population (including Maoris), June 30, 1944, 1,653,757 (796,969 males and 856,788 females), excluding members of the armed forces overseas and of members of forces of overseas countries who may be in New Zealand.

The estimated populations (including Maoris) of the chief centres of New Zealand as at April 1, 1941, were as follows :—Auckland, 223,700; Wellington, 160,500; Christchurch, 135,500; Dunedin, 82,200; Invercargill, 26,400; Wanganui, 26,000; Palmerston North, 25,500; Hamilton, 20,900; Napier, 19,400; New Plymouth, 19,400; Timaru, 19,200; Hastings, 19,000; Gisborne, 16,200; Nelson, 13,800.

#### VITAL STATISTICS (EXCLUDING MAORIS).

| Years | Total Live Births | Illegitimate Births | Deaths | Marriages | Excess of Births over Deaths |
|-------|-------------------|---------------------|--------|-----------|------------------------------|
| 1939  | 28,833            | 1,133               | 14,158 | 17,115    | 14,675                       |
| 1940  | 32,771            | 1,284               | 14,282 | 17,448    | 18,489                       |
| 1941  | 35,100            | 1,281               | 15,146 | 18,313    | 19,854                       |
| 1942  | 33,574            | 1,339               | 16,385 | 12,219    | 17,189                       |
| 1943  | 30,311            | 1,467               | 15,447 | 11,579    | 14,864                       |

Birth-rate, 1943, 19.70 per 1,000; death-rate, 10.04 per 1,000; marriage rate, 7.53 per 1,000; infant mortality, 31.37 per 1,000 live births.

#### EXTERNAL MIGRATION.

| Year ended March 31 | Arrivals | Departures | Excess of Arrivals over Departures |
|---------------------|----------|------------|------------------------------------|
| 1940                | 31,432   | 25,404     | + 6,028                            |
| 1941                | 13,814   | 13,100     | + 714                              |
| 1942                | 7,102    | 6,893      | + 209                              |
| 1943                | 3,133    | 2,592      | + 541                              |
| 1944                | 3,747    | 3,640      | + 107                              |

#### Religion.

No direct State aid is given to any form of religion. For the Church of England the Dominion is divided into seven dioceses, with a separate bishopric (Aotearoa) for the Maoris. The present Bishop of Christchurch is Primate and Archbishop of New Zealand. The Roman Catholic Church is under an Archbishop residing at Wellington, and three bishops.

| Religious Denomination          | Number of Clergy, January, 1944 | Members or adherents (Census 1936) |                     |
|---------------------------------|---------------------------------|------------------------------------|---------------------|
|                                 |                                 | Number                             | Percentage of total |
| Church of England . . . . .     | 498                             | 625,618                            | 39.75               |

#### Education.

The University of New Zealand consists of the Otago University at Dunedin, with 24 professors; the Canterbury University College at Christchurch, with 14 professors; the Auckland University College, with 16 professors; and the Victoria University College at Wellington, with 16 professors; students on registers of the four constituent colleges (1943), 5,692. The university colleges are all endowed with lands, but are also dependent on Government grants. The Canterbury Agricultural College and the Massey Agricultural College (at Palmerston North) are recognised schools of agriculture attached to the university, and had, in 1943, a total of 261 students. There are 4 training colleges available to students who desire to enter the teaching profession, and at the end of 1943 there were 1,833 students in training.

At the end of 1943 there were 46 secondary or combined schools, with 772 (excluding part-time) teachers and 17,675 pupils. There are also 98 district high schools with 261 teachers and 5,181 scholars in the secondary division, and 21 technical high and technical day schools with 444 teachers and 8,436 pupils. Of private secondary and endowed schools there were 63 registered, with 6,684 pupils. Eight secondary schools for Maoris had 371 pupils.

For primary schools there is an Education Department (which also exercises certain functions in regard to both university and secondary schools). There are 9 Local Education Boards. At the end of 1943 there were 2,090 public primary schools, with 204,060 scholars on the rolls; average attendance (1943), 176,258. The number of teachers at the end of 1940 was 6,586. Education is compulsory between the ages of 7 and 15, but at the age of 5 a child may enter either a State or private primary school.

Taxation receipts in 1943-44 for all purposes amounted to 100,839,484*l.*, giving an average of 6*l.* 1*l.* 7*d.* per head of mean population.

The gross public debt at March 31, 1944, amounted to £NZ566,494,017; of which outstanding indebtedness on account of war and defence represented 247,827,046*l.* Most of the rest of the debt represents reproductive expenditure or investments.

From the start of the war to March 31, 1944, war expenditure amounted to 323,592,941*l.*, consisting of 24,433,044*l.* for the New Zealand Navy, 219,347,237*l.* for the Army, and 79,812,659*l.* for the Air Force.

Budget estimate for 1944-45: Revenue, 51,500,000*l.*; Expenditure, 51,500,000*l.*

### Defence.

A War Cabinet of six members is responsible for controlling the Dominion's war effort, while the Minister of Defence controls and administers the three fighting services through the medium of the Department of Defence, which is divided for the purpose into—(a) the Naval Department, (b) the Army Department, (c) the Air Department.

The Army Board is responsible for the command, training, and administration of the military forces. The Dominion is divided into three military districts: the Northern, Central, and Southern, each being under the command of a senior officer of the Regular Force. Immediately on the outbreak of war in September, 1939, the necessary expansion of military activities was instituted. In addition to the formation of an Expeditionary Force, the home defence forces were reorganised and strengthened. Voluntary enlistment was suspended on July 22, 1940, and from that date service was made compulsory.

The first contingent of the Expeditionary Force was sent to Egypt early in 1940, and was subsequently reinforced from New Zealand and by a contingent which had been sent to Great Britain about the middle of 1940. Three contingents were formed in the Second New Zealand Division, which played an important part in the Greek campaign, in the heroic defence of Crete, and in the offensive in Libya at the end of 1941, heavy casualties being suffered in these campaigns. The division, as a unit of the Eighth Army, also took a prominent part in the final phases of the North African campaign and is at present serving in Italy.

Immediately on the entry of Japan into the war, the Territorial Force was mobilized and placed on a war footing, and garrisons in the Pacific Islands were strengthened. The Home Guard, which was instituted as a civil organization, was constituted a part of the defence forces in July, 1941, as a second line of defence to the Territorial Force. In October, 1942, the New Zealand Women's Auxiliary Army Corps was set up as a branch of the forces, enlistment being made for service both in New Zealand and overseas.

Consisting mainly of the troops who had been sent to various parts of the Pacific in the earlier stages of the war for garrison duty, the Third New Zealand Division took part in the recapture of the Solomon Islands and other operations against Japan in the South-west Pacific, but have since been withdrawn from that area.

At the peak of New Zealand's mobilization 157,000 men were serving full-time with the armed forces, while the part-time Home Guard numbered 124,000, and a further 160,000 were enrolled in the civil defence organi-

zation. By May, 1944, the total number sent overseas since the beginning of the war was 110,000—nearly one-third of the whole male population of military age. Casualties were the highest of any nation in the British Commonwealth in proportion to population, having reached the figure of 29,850, of which 7,300 were killed, 13,400 wounded, 7,300 prisoners and 1,850 missing. Shortage of man-power and the demand for increased food-production, to meet the needs of Great Britain and of the American forces in the South-West Pacific, led to a decision that New Zealand could no longer maintain two divisions overseas. The Second New Zealand Division was to remain overseas until the conclusion of the campaign in Italy, and was to be kept up to strength with personnel from the Third New Zealand Division, which had fought in the Pacific.

Prior to the outbreak of war the Royal New Zealand Air Force, which is administered by the Air Board under the Air Department, consisted of the Regular Air Force, the Air Force Reserve, and the Territorial Air Force, while a Civil Reserve had also been established. Immediately war was declared the Air Force was mobilized, the Territorial and Air Force Reserves, and a number of personnel of the Civil Reserve being called up. Steps were also taken to implement an existing agreement with the United Kingdom Government for the training of pilots, air gunners, and observers for the Royal Air Force. A later agreement brought the Empire Air Training Scheme into being. Under this scheme, New Zealand agreed to set up an organization capable of training the following personnel each year: 800 fully trained pilots, 520 pilots trained to elementary standard, 546 observers (initial training only), and 936 air gunners (initial training only). The latter three classes were to complete their training in Canada. This scheme came to an end on March 31, 1945.

A number of New Zealand units, including bomber squadrons, fighter squadrons, and torpedo bomber squadrons are operating with the Royal Air Force, while a New Zealand fighter squadron and the New Zealand Aerodrome Construction Squadron took part in war operations in Malaya. New Zealand bomber, reconnaissance, and fighter squadrons have been sent to many parts of the Pacific battle area, and have been engaged in active operations against the Japanese.

During 1941 the Women's Auxiliary Air Force was established, and October, 1941, saw the formation of the Air Training Corps for the preliminary training of youths, between the ages of 15 and 18½ years who are desirous of joining the Royal New Zealand Air Force.

The Naval Defence Act, 1913, provided for the establishment of the force which has since become the Royal New Zealand Navy. The Royal New Zealand Naval Reserve and the Royal Naval Reserve were mobilized on September 4, 1939. H.M. ships were brought up to war complement by the draft of reserve officers and ratings, and the various port services established and expanded by the same means. Officers and men of the Reserve, not required for service in New Zealand, have been transferred for the duration of the war to the Royal Navy. In addition a considerable number of personnel, recruited since the outbreak of war, are serving with the Royal Navy, including the Fleet Air Arm.

In time of war the Royal New Zealand Navy (including vessels acquired for defence purposes) is at the disposal of the British Government. The present strength includes the 8,000-ton cruiser *Gambia*, the 7,000-ton cruisers *Leander* and *Achilles* (all 3 lent by the Admiralty), the corvettes *Arabis*, *Arbutus*, *Kiwi* and *Tui*, and a number of mine-sweeping trawlers, several of which were built in New Zealand. New Zealand ships have recently been operating under Admiral W. F. Halsey, United

States Navy, Commander, South Pacific Area, with headquarters at Auckland.

A Women's Naval Service, which is regarded as part of the Royal New Zealand Navy, was formed in July, 1942.

## Production and Industry.

### I. AGRICULTURE.

Two-thirds of the surface of New Zealand is suitable for agriculture and grazing. About 12,600,000 acres are still under forest. The total area under cultivation in 1944 was 19,829,999 acres (including 17,744,469 acres in sown grasses and 110,000 in fallow). The area of Crown lands (other than reserves) leased under various tenures at March 31, 1943, was 16,232,611 acres, and 1,980,531 acres (the greater part unsuitable for settlement) were available for future disposal.

The largest freehold estates are held in the South Island. The extent of occupied holdings of or over one acre in 1941 (exclusive of holdings within borough boundaries) was as follows:—

| Size of Holdings (Acres) | Number of Holdings | Acres      | Size of Holdings (Acres) | Number of Holdings | Acres      |
|--------------------------|--------------------|------------|--------------------------|--------------------|------------|
| 1 and under 10           | 11,285             | 52,525     | 5,000 & under 10,000     | 544                | 3,707,175  |
| 10 " " 50                | 14,585             | 374,084    | 10,000 " " 20,000        | 294                | 4,133,400  |
| 50 " " 100               | 12,739             | 925,678    | 20,000 " " 50,000        | 145                | 4,406,409  |
| 100 " " 200              | 16,646             | 2,330,867  | 50,000 acres and over    | 55                 | 5,042,198  |
| 200 " " 320              | 9,861              | 2,476,204  |                          |                    |            |
| 320 " " 640              | 10,202             | 4,614,325  |                          |                    |            |
| 640 " " 1,000            | 4,154              | 3,307,731  |                          |                    |            |
| 1,000 " " 5,000          | 5,848              | 11,517,582 | Total . . .              | 86,373             | 42,888,337 |

The acreage and produce for each of the principal crops are given as follows (area and yield for threshing only, not including that grown for chaff, hay, ensilage, etc.):—

| Crop Years | Wheat   |               |                  | Oats   |               |                  | Barley |               |                  |
|------------|---------|---------------|------------------|--------|---------------|------------------|--------|---------------|------------------|
|            | Acres   | 1,000 Bushels | Average per acre | Acres  | 1,000 Bushels | Average per acre | Acres  | 1,000 Bushels | Average per acre |
| 1940       | 257,592 | 8,010         | 31.10            | 49,571 | 2,031         | 41.83            | 25,262 | 916           | 36.25            |
| 1941       | 245,197 | 8,306         | 34.15            | 71,758 | 3,115         | 43.41            | 32,025 | 1,066         | 33.30            |
| 1942       | 258,002 | 8,671         | 33.61            | 70,796 | 3,445         | 48.66            | 36,026 | 1,297         | 35.99            |
| 1943       | 286,998 | 9,819         | 34.21            | 56,291 | 2,809         | 49.90            | 28,657 | 1,058         | 36.91            |
| 1944       | 233,786 | 7,203         | 30.88            | 39,652 | 1,834         | 46.26            | 28,241 | 833           | 29.49            |

Live-stock in 1944: 225,823 horses, 4,439,253 cattle, 33,083,318 sheep and 573,362 pigs. The total number of dairy cows in milk in 1944 was 1,647,920, and the total butter-fat production in 1943-44 was 387,800,000 lb. Butter exported, 1943-44, was 2,069,737 cwt.; cheese exported, 1,600,330 cwt. Total number of poultry (1936), 4,019,076. Estimated production of wool for the twelve months ended June 30, 1944, 330,000,000 lb. (greasy basis). Exports of all wool (June year) on a greasy basis, 1943-44, was 281,000,000 lb.

### II. MANUFACTURES.

Statistics of the leading manufactories (excluding mines and quarries):—

| Years                | Number of Manufactories and Works | Persons engaged | Value of Land, Buildings, &c. | Value of Products |
|----------------------|-----------------------------------|-----------------|-------------------------------|-------------------|
| 1938-39 <sup>1</sup> | 6,146                             | 102,535         | 76,497,802                    | 114,447,426       |
| 1939-40              | 6,342                             | 108,722         | 80,573,475                    | 129,061,826       |
| 1940-41              | 6,395                             | 113,999         | 83,755,137                    | 147,153,559       |
| 1941-42              | 6,367                             | 117,214         | 87,127,932                    | 155,566,195       |
| 1942-43              | 6,127                             | 114,590         | 88,253,772                    | 165,936,284       |

The following is a statement of the value of the products (including repairs) of the principal industries for the year 1942-43:—

| Manufactories, Works, &c.                                | Value of Products | Manufactories, Works, &c.                                                 | Value of Products |
|----------------------------------------------------------|-------------------|---------------------------------------------------------------------------|-------------------|
| Total value of production in 1942-43 . . . . .           | £ 165,936,284     | Tinned-plate and sheet metal working . . . . .                            | 2,914,458         |
| <i>Principal Industries.</i>                             |                   | General engineering, iron and brass founding, boiler-making, etc. . . . . | 6,698,637         |
| Meat freezing and preserving . . . . .                   | 29,662,483        | Radio apparatus making and assembling . . . . .                           | 566,472           |
| Ham and bacon curing . . . . .                           | 2,243,410         | Printing and bookbinding . . . . .                                        | 4,877,132         |
| Butter, cheese, and condensed milk manufacture . . . . . | 29,489,630        | Agricultural and dairying machinery and implement making . . . . .        | 1,115,788         |
| Grain milling . . . . .                                  | 2,957,747         | Electrical engineering . . . . .                                          | 1,130,837         |
| Biscuit and confectionery manufacture . . . . .          | 3,635,828         | Rangemaking . . . . .                                                     | 532,216           |
| Fruit preserving and jam making . . . . .                | 1,259,271         | Coschbuilding, motor and cycle engineering . . . . .                      | 4,366,081         |
| Brewing and malting . . . . .                            | 2,473,518         | Tanning . . . . .                                                         | 1,454,303         |
| Tobacco preparing and cigarette making . . . . .         | 2,575,405         | Fellmongering and wool-scouring . . . . .                                 | 3,803,505         |
| Soap and candle making . . . . .                         | 1,062,411         | Ship and boat-building . . . . .                                          | 887,046           |
| Boiling down and manure making . . . . .                 | 807,186           | Furniture and cabinet making . . . . .                                    | 1,898,690         |
| Coopering and casemaking . . . . .                       | 929,694           | Paint and varnish manufacture . . . . .                                   | 1,052,038         |
| Sawmilling, sash and door-making . . . . .               | 6,610,345         | Chemicals and patent medicines manufacture . . . . .                      | 1,512,167         |
| Woodware and turnery manufacture . . . . .               | 2,126,326         | Superphosphates and chemical fertilisers . . . . .                        | 1,586,480         |
| Paper bag and box making . . . . .                       | 942,609           | Woolen milling . . . . .                                                  | 2,892,906         |
| Gas making and supply . . . . .                          | 1,758,727         | Boot and shoe making . . . . .                                            | 3,308,681         |
| Electricity generation and supply . . . . .              | 8,398,731         | Hosiery and knitted goods manufacture . . . . .                           | 1,849,855         |
| Lime crushing and cement making . . . . .                | 1,414,633         | Clothing manufacture . . . . .                                            | 6,794,845         |
| Brick, tile and pottery making . . . . .                 | 1,613,624         | Sail, tent and oilskin making . . . . .                                   | 929,190           |

### III. MINES AND MINERALS.

New Zealand's production of minerals in 1943 included 149,150 ounces of gold, 280,786 ounces of silver, 5 ounces of platinum, 8 tons of arsenic, 62 tons of talc, 187 tons of asbestos, 110 tons of scheelite, 124 tons of fuller's earth, 128 tons of diatomaceous earth, 171 tons of magnesite, 232 tons of bentonite and 510 tons of manganese ore. Among the larger tonnages were 2,523 tons of valuable non-brickmaking clays, 4,988 tons of iron ore, 19,747 tons of silica sand, 3,571 tons of dolomite, 3,422 tons of pumice, 9,241 tons of phosphate, 61,645 tons of serpentine and 2,787,868 tons of coal.

The following figures are from the British Board of Trade returns:—

|                                              | 1936         | 1937         | 1938         | 1939         |
|----------------------------------------------|--------------|--------------|--------------|--------------|
| Imports into United Kingdom from New Zealand | £ 43,553,463 | £ 49,884,823 | £ 46,865,368 | £ 41,773,326 |
| Exports to New Zealand:                      |              |              |              |              |
| British Produce                              | 17,297,278   | 20,237,310   | 19,205,093   | 15,990,530   |
| Foreign and Colonial                         | 347,236      | 315,696      | 291,647      | 230,108      |

### Shipping and Communications.

At the end of 1943 the registered vessels were 45 sailing vessels of 3,553 tons (net), 130 steamers of 62,264 tons, 280 motor vessels of 18,342 tons; total 455 vessels of 84,159 tons (net).

Shipping inwards and outwards for five years (excluding coastwise shipping):—

| Year | Vessels Inwards |           |         |         | Vessels Outwards |           |         |         |
|------|-----------------|-----------|---------|---------|------------------|-----------|---------|---------|
|      | British         |           | Foreign |         | British          |           | Foreign |         |
|      | No.             | Tons      | No.     | Tons    | No.              | Tons      | No.     | Tons    |
| 1938 | 545             | 2,382,847 | 115     | 701,858 | 542              | 2,404,197 | 114     | 697,860 |
| 1939 | 537             | 2,324,351 | 97      | 640,586 | 544              | 2,342,396 | 105     | 677,263 |
| 1940 | 458             | 2,036,926 | 133     | 764,759 | 469              | 2,061,034 | 132     | 763,133 |
| 1941 | 343             | 1,404,124 | 163     | 913,004 | 349              | 1,409,314 | 159     | 900,000 |
| 1942 | 338             | 1,421,926 | 180     | 876,213 | 339              | 1,425,324 | 178     | 864,137 |

### RAILWAYS.

On March 31, 1944, there were 1,684 miles of Government railways in the North Island, and 1,820 in the South Island, besides approximately 180 miles of private lines—3,684 miles in all. Operating earnings from Government railways, 1943–44, 13,464,979*l.*, operating expenses, 11,365,917*l.*; net operating earnings, 2,099,062*l.* The capital cost of construction of all Government lines, open and unopen, to March 31, 1944, 74,289,351*l.* In 1943–44 the tonnage of goods carried was 9,026,626, and the passengers numbered 38,611,267.

### POSTS AND TELEGRAPHS.

Receipts of Post and Telegraph Department for year ended March 31, 1944, 6,251,242*l.*; working expenses, 4,412,502*l.*, excluding interest on capital liability, 693,480*l.* Number of money orders issued during year, 786,511, value, 5,500,687*l.*; postal notes, 2,215,572, value, 945,293*l.* The officials numbered 17,221 (including 5,159 serving with the armed forces but excluding 1,611 country postmasters, etc., who are not classed as officers of the department) on March 31, 1944.

The telegraph and telephone systems are Governmental. Number of telegrams and toll messages forwarded during the year 1943–44, 25,455,436; number of telephone subscribers, 181,717. The telegraph and telephone receipts for the year 1943–44 were 3,542,286*l.* Number of radio receiving licenses at March 31, 1944, was 375,455.

### CIVIL AVIATION.

Internal services during the twelve months ended June, 1944:—hours flown, 7,072; miles flown, 921,366; passengers carried, 43,236; mail, 256,591 lb.; freight, 210,583 lb.

Overseas services during the twelve months ended June, 1944:—hours flown, 1,816; miles flown, 277,380; passengers carried, 3,665; mail, 96,923 lb.; freight, 51,848 lb.

### Money and Credit.

New Zealand has its own distinctive silver and bronze coinage, the denominations being similar to those in use in the United Kingdom. Prior to the issue of the New Zealand coinage (1933 for silver, and 1939 for bronze) the United Kingdom coinage was legal tender.

The constituents of the New Zealand banking system are a Reserve Bank, and six trading banks; and of the latter, two are New Zealand institutions, the other four being primarily Australian concerns. As originally constituted the Reserve Bank had private shareholders, but these were repaid under the Reserve Bank Amendment Act, 1936, and the Bank was in effect nationalised. By the Reserve Bank Amendment Act of 1939, Governmental control was extended, the Act directing the Bank to give effect to any representations made to it by the Minister of Finance. Bank-notes of the Reserve Bank, which has the sole right to issue bank-notes, are legal tender. At the end of 1943 the amount on deposit at trading banks was 113,264,178*l.*, while advances were 44,740,889*l.*, exclusive of holdings of Government securities amounting to 36,141,940*l.* The value of bank-notes in circulation at the end of 1943 was 33,357,144*l.*, and the average note circulation for the year was 27,650,000*l.*

There are the Post Office Savings Bank and 5 trustee savings banks. The Post Office Savings Bank had March 31, 1944, 930 branches; number of accounts, 1,128,936; amount deposited during year, 47,648,754*l.*; withdrawn, 35,580,165*l.*; amount on deposit at end of year, 98,614,198*l.* At March 31, 1944, 20,913,748*l.* was on deposit in trustee savings banks to the credit of 307,224 depositors. In addition deposits in National Savings Accounts as at March 31, 1944, amounted to 13,017,859*l.*, and the amount invested in National Savings Bonds to 7,749,711*l.* Deposits to credit of scholars in school savings banks at March 31, 1944, amounted to 142,368*l.* Deposits held by building and investment societies amounted to 5,132,214*l.* and with trading companies to 5,105,579*l.*

**Outlying Islands.**—The outlying islands (total area, 307 square miles) included within the geographical boundaries of New Zealand as proclaimed in 1847 are the following: Three Kings Islands, Auckland Islands, Campbell Island, Antipodes Islands, Bounty Islands, Snares Islands, Solander Island. None of these islands is at present inhabited.

**Island Territories.**—Islands annexed to New Zealand include the Cook Islands, Niue Island and the Kermadec Islands, while the Union Islands (Tokelau), formerly part of the Gilbert and Ellice Islands Colony, were transferred to the jurisdiction of New Zealand in February, 1926. Western Samoa is administered by New Zealand under mandate from the League of Nations, while Nauru, prior to its forcible occupation by the Japanese in August, 1942, was administered by a mandate held jointly by the United Kingdom, Australia and New Zealand. By Imperial Order in Council of July 30, 1923, the coasts of the Ross Sea, with the adjacent islands and territories between 160° E. long. and 150° W. long., and south of 60° S. lat., were proclaimed a British settlement under the name of Ross Dependency, and placed under the jurisdiction of New Zealand.

The Cook Islands, which lie between 8° and 23° S. lat., and 156° and

## Commerce.

170° W. long., were annexed to New Zealand in June, 1901. The islands within the territory fall roughly into two groups—the scattered islands towards the north and the islands towards the south forming the Cook group proper.

The names of the islands with their populations (census, April 30, 1936) are as follows:—

| Lower Group—            | Population | Northern Islands—          | Population |
|-------------------------|------------|----------------------------|------------|
| Rarotonga . . .         | 5,054      | Nassau . . .               | 18         |
| Mangaia . . .           | 1,459      | Avarau (Palmerston I.) . . | 90         |
| Atiu . . .              | 1,086      | Tongareva (Penrhyn) . .    | 467        |
| Aitutaki . . .          | 1,719      | Manihiki (Humphrey) . .    | 487        |
| Manke (Parry I.) . .    | 652        | Rakahanga (Reirson) . .    | 290        |
| Mitiaro . . .           | 265        | Pukapuka (Danger) . .      | 651        |
| Manuae and Te Au-o-tu . | 8          | Suvarrow (Anchorage) . .   | Nil        |
| Takutea . . .           | Nil        |                            |            |

Total area of the Cook islands about 99 square miles.

Rarotonga is 20 miles in circumference; Atiu, 20 miles; Aitutaki, 14 miles. Laws for the Cook Islands have been made since 1890 by a general Legislature, and are administered by an Executive Council, of which the Arikis, or native chiefs, are members. At Rarotonga there is a (New Zealand) Resident Commissioner, whose approval is required for all enactments, and, in turn, his approval may be disallowed by the Governor-General of New Zealand. The customs tariff of New Zealand is enforced. In 1915 an Act was passed by the New Zealand Parliament consolidating the laws relating to the Islands, and providing for the appointment of a member of the Executive Council of New Zealand as Minister for the Cook Islands, now Minister of Island Territories. The Minister is charged with the administration of the Islands. The Act provides for the constitution of Island Councils, lower and higher courts of justice, and native land courts, as well as for the establishment of public schools, etc. During the year ended March 31, 1942, registered births numbered 553, and deaths 248. Health: All natives are provided gratuitously with medical and surgical aid. Education: Government schools are established in Rarotonga, Aitutaki, Manke, Pukapuka, Mangaia, and Atiu, and the London Missionary Society is subsidised for conducting schools in the principal remaining islands of the Group. There are also 7 Roman Catholic missionary schools. The instruction given in Government schools is similar to that of the New Zealand State schools, but with a special syllabus suited to the requirements of the people. Revenue, financial year 1943-44, 40,819*l.* (excluding grants from N.Z. to extent of 27,000*l.*, mainly for medical and educational purposes); expenditure, 59,797*l.* The trade for 1943 was:—Imports, 107,205*l.*; exports, 75,552*l.* Chief exports during 1943 were: citrus fruits (25,918*l.*), tomatoes (22,188*l.*), copra (10,411*l.*), native handwork (10,651*l.*). Wireless stations are maintained at all the permanent inhabited islands except Mitiaro and Rakahanga.

Nine (or *Savage Island*) was annexed with the Cook and other islands in June, 1901. Until October, 1932, it was administered by the Minister for the Cook Islands, then to the Minister of External Affairs, and, since 1943, to the Minister of Island Territories. Distance from Auckland, New Zealand, 1,343 miles; from Rarotonga, 590 miles. Area, 100 square miles; circumference, 40 miles; height above sea-level, 200 ft. Population at the census of April 30, 1936, was 4,104, and the estimate by the Administration

at December 31, 1943, 4,242. There is a Resident Commissioner, and laws, etc., are same as for Cook Islands. During 1943 births registered numbered 154; deaths, 185. Revenue, 1942-43, 15,297*l.* (including grants from N.Z., 10,000*l.*); expenditure, 21,258*l.* Exports, 1942, 22,841*l.*, chiefly baskets, bananas, copra and kumera. Imports, 1942, 26,444*l.* There are three Government schools and nine mission schools subsidised by the Administration. There is a wireless station at Alofi, the port of the island.

Kermadec Islands, 29° 10' to 31° 30' S. lat., 177° 45' to 179° W. long., 600 miles N.N.E. of New Zealand. Area 13 square miles. The largest of the group is Raoul or Sunday Island, 20 miles in circuit, with a population of 20 in April, 1944; Macaulay Island is 3 miles in circuit.

Union Islands (Tokelau).—These Islands, formerly part of the Gilbert and Ellice Islands Colony, were transferred to the jurisdiction of New Zealand, February 11, 1926, and are administered by the Administrator of Western Samoa. They lie between 8° and 10° S. lat., and 171° and 173° W. long. (estimated population June, 1942, was 1,364), and the islands of the group under British administration are Fakaofu, Nukunono, and Atafu; area of group, 4 square miles.

2. **Bismarck Archipelago.**—In November, 1884, a German Protectorate was declared over the New Britain Archipelago and several adjacent groups of islands, and in May, 1885, they were renamed the Bismarck Archipelago. The Archipelago lies between 140° 30' and 156° east longitude, and the Equator and 8° south latitude. The chief islands are New Britain, area 14,600 square miles; New Ireland, area 2,800 square miles; Lavongai (late New Hanover), 480 square miles; Duke of York Islands, area 22 square miles; the Admiralty Islands (principal island, Manus), area 663 square miles. The other groups included in this Archipelago are Mussau Islands, Gardner Islands, Nunguria, Nissan Island, the Vitu Islands, Umboi Islands, Hermit Islands, Ninigo Group, Kaniet and Sae Islands. In these various groups there are upwards of 100 small islands, having a total area of 1,115 square miles. The enumerated native population of the Archipelago in 1940 of areas patrolled was 140,759.

**New Britain**, the largest island of this group, is a long island of crescent shape lying east and west. It has a mean breadth of 50 miles and a length of 300 miles. The island is practically undeveloped except for 33,973 hectares under cultivation chiefly on the Gazelle Peninsula in the north, and several plantations on the northern and southern coasts. A Government station, named Gaamata (non-indigenous population, 5) has been established about midway along the southern coast. Talasea (non-indigenous population, 11) is situated on the north coast. The interior of the island is little known. The enumerated native population of areas patrolled as at June 30, 1940, was 90,849, including adjacent islands. A mountain chain traverses the entire length of the island, and in the centre consists of several irregular ranges. There are several active volcanoes. The highest known peak is the Father, about 7,500 feet high, which is an active volcano. The island has very fine harbours. The only one visited regularly by oversea shipping is Simpson Harbour, in Blanche Bay. The principal settlement is around the shores of this bay. The chief product is copra, but cocoa and coffee are now being extensively planted. There are five missionary societies at work. The chief town is Rabaul (non-indigenous population, 4,674), which is the seat of the Government. The old capital was at Kokopo (non-indigenous population, 96), which is situated 14 miles south-east of Rabaul. At Rabaul there is an anchorage for all ships and a fine wharf has been built. Rabaul is well laid out and has a fine public garden. New Britain and the adjacent islands, including Duke of York Islands, have an area of 14,600 square miles.

**New Ireland** (non-indigenous population, 484), the second in size and importance of the Bismarck Archipelago, is situated north of New Britain, from which it is separated by St. George's Channel. The chief town is Kavieng (non-indigenous population, 173), at the north-west extremity of the island. The only other town is Namatanai (non-indigenous population, about 30), on the south-east coast. The island has a long range of mountains running through it. It is of older formation than New Britain, and does not show any signs of recent volcanic activity. The principal harbour is Nusa, on the north coast of which Kavieng, the seat of the local administration, is situated. The interior of the island is fairly well known. The enumerated native population in 1940 was 36,960, including adjacent islands. The soil is fertile and the climate similar to that of New Britain. The chief industry is coconut growing. The area under cultivation in New Ireland on June 30, 1940, was 32,201 hectares, 31,955 being planted with coconuts. There are numerous plantations around the coast near Kavieng. New Ireland and

adjacent islands, including Lavongai, Tabar, Litai, Tanga, Feni, Nunguria, Mussau and Emirau Groups have an area of 8,800 square miles.

The **Admiralty Islands** (non-indigenous population, 37) are the most important of the small groups. The chief island is Manus, sometimes called Great Admiralty Island. The chief town is Lorengau (non-indigenous population, 14) on the north-east coast. The enumerated native population of the group in 1940 was 13,450. Coconuts are the chief article of cultivation, and there are valuable pearl and other shell fisheries. There were 10,457 hectares planted with coconuts on June 30, 1940.

3. **Solomon Islands.**—The portion of the Solomon Islands (non-indigenous population, 104) within the area of the territory of New Guinea consists of the islands of Bougainville, Buka, and adjacent islands, including Nissan, Kilinailau, Tauu (Mortlock), and Nukumanu (Tasman) Islands. Bougainville has an area of 3,880 square miles, and an enumerated native population (of areas patrolled in 1940) of 49,067, including Buka, which has an area of 190 square miles. Smaller islands in this group have a total area of 30 square miles. The islands are very mountainous. Of the several volcanic cones, Bagana (in the Crown Prince range) and Balbi are the only active volcanoes. The principal harbour is Kieta, situated on the east coast of Bougainville, where there is a Government station (non-indigenous population, 35). Other good harbours are: Rawa and Tinputz on the north-east coast of Bougainville. There is a good harbour on the west side of Buka, named Carola Hafen. Missionary work amongst the natives is carried on by four missionary societies. The area planted with coconuts on June 30, 1940, was 11,924 hectares. The natives grow bananas, coconuts, taro, and sweet potatoes. The indigenous population is 49,067.

The following figures relate to the Territory of New Guinea:—

|                                                           | 1938-39   | 1939-40   |
|-----------------------------------------------------------|-----------|-----------|
| Import Duty                                               | 192,666   | 186,686   |

| Chief Exports:—                                           |           |           |
| Copra                                                     | 727,949   | 504,937   |
| Shell (marine)                                            | 10,590    | 10,227    |
| Desiccated coconut                                        | 69,980    | 89,050    |
| Gold                                                      | 2,129,283 | 3,021,731 |
| Total Exports <sup>2</sup>                                | 2,960,753 | 3,675,835 |

<sup>1</sup> Imports are valued on the basis of the f.o.b. cost at the port of shipment, plus 10 per cent. ad valorem.

<sup>2</sup> Including those not enumerated.

The quantities exported in 1939-40 were: copra, 59,368 tons; gold, 491,788 ozs.; desiccated coconut, 1,781 tons; timber (logs), 3,167,386 cu. ft.;

## MANDATED TERRITORIES IN THE PACIFIC: NEW GUINEA, WESTERN SAMOA, AND NAURU ISLAND.

The former German possessions in the Western Pacific included: Kaiser Wilhelm's Land, Bismarck Archipelago, the German Solomon Islands, Nauru, the Caroline Islands, the Marshall Islands, and the Marianne or Ladrone Islands (excepting the Island of Guam). The islands north of the Equator, namely, the Marshall, Caroline, Pelew, and Ladrone (Marianne) Islands, are now administered by Japan as mandatory. Those south of the Equator, namely, the Bismarck Archipelago, those of the Solomon Islands formerly owned by Germany, and (late) German New Guinea (Kaiser Wilhelm's Land), are assigned to Australia, German Samoa to New Zealand, and Nauru, a small islet just south of the Equator, to the British Empire.

## THE MANDATED TERRITORY OF NEW GUINEA.

The Territory has an area of 93,000 square miles, extending from the Equator as far as 8° south latitude, and from 141° east longitude as far as 160° east longitude. An Australian force occupied these Possessions on September 12, 1914. The mandate from the League of Nations (*see* p. xxvii, *THE STATESMAN'S YEAR-BOOK*, 1929) is dated December 17, 1920, and on May 9, 1921, the Australian Government established its civil administration in the Territory. The laws of the Commonwealth, subject to local modifications as necessary, may be applied to the mandated territories. The Japanese attacked New Guinea in January, 1942; by June, 1944, New Guinea was reconquered.

The non-indigenous population at June 30, 1940, was 6,498, of which the British numbered 3,345, Chinese 2,061, Dutch 159, German 438, Japanese 38, and American 145. The approximate number of persons (other than natives) engaged in agricultural pursuits was 459, and in mining pursuits 700. The enumerated native population was 668,871 (included in which are 39,344 indentured labourers). The native population of those areas of the Territory which have not yet been brought under Government control is unknown.

Inter-island trade is carried on by small motor vessels and schooners. There is a regular service from Australia to Rabaul and the main ports of the Territory, and a monthly service between Yokohama, Hong Kong, Manila and Australia also includes Rabaul. A weekly air service was maintained from Australia, and there are several companies operating air services within the Territory.

The total area under cultivation in the Mandated Territory at June 30, 1940, was 110,546 hectares. The greater part of this area was planted with coconuts, 105,899 hectares. Coffee, cocoa and kapok are also grown. Tropical fruits grow very abundantly. The staple articles of food of the natives are yams, taro, sago, and bananas. There is very little land used for pasture. The land is rich in mineral wealth, but, on account of the difficulty of transporting mining machinery, only gold, silver and platinum are worked. Native labour is used to work the plantations, and the natives are recruited either from the adjacent villages or from other parts of the Territory. There are 20,477 native labourers so recruited for plantation purposes. The total indentured labour in the territory on June 30, 1940, was 39,344.

*Administrator of the Territory of New Guinea*.—Brigadier-General Sir Walter Ramsay *McNicoll*, K.B.E., C.B., C.M.G., D.S.O., V.D. (appointed September 13, 1934).

The seat of administration is at Rabaul, New Britain (non-indigenous population, 1,530, including 1,100 Asiatics). In May, 1937, a volcanic eruption, which covered Rabaul with pumice dust, caused many of the residents to evacuate the town temporarily. A modern volcanological observatory is now established in the area.

1. *North Eastern New Guinea*.—This territory, the northern section of south-east New Guinea, lies between 2° 35' and 8° south latitude, and 141° and 148° east longitude. The area, including Manam, Karkar, Long, Bagabag, Schouten, Kairiru (D'Urville), and some smaller islands, is 69,700 square miles. The enumerated native population in 1940 for areas explored was 433,474. It was declared a German Protectorate in 1884, and was under the control and development of the New Guinea Company from 1885 to 1899. The principal station on the mainland is at Salamaua. The coast-line is very little broken, and there are few good harbours. There are high ranges running parallel with the coast plain, which is from 20 to 100 miles wide and broken with steep spurs in some places extending to the actual coast-line. The ranges in the interior have not been completely explored, but some of their summits are known to attain 15,000 feet. The principal rivers are the Sepik, which is navigable for over 250 miles, the Ramu or Ottilien, and the Markham. The climate is hot and the rainfall large. There are six missionary societies at work; some of these missions have plantations, sawmills, etc.

The chief towns are: In the Morobe District (non-indigenous population, 1,655), Salamaua, Wan and Lae; in the Madang District (non-indigenous population, 208), Madang, and in the Sepik District (non-indigenous population, 165), Wewak.

timber (sawn), 89,658 sq. ft. Net tonnage of shipping entered and cleared in 1939-40, 648,577 tons; 1938-39 was 653,521 tons. Total inward tonnage of cargo in 1939-40 was 50,833 tons; outward, 74,862 tons.

## TERRITORY OF WESTERN SAMOA.

The former German Samoan Islands, now the Territory of Western Samoa, include Savaii and Upolu, the largest of the Samoan or Navigators Islands. Samoa is a group of islands in the Western Pacific, lying in 13½ deg. to 14½ deg. S. lat., and 168 deg. to 173 deg. W. long. The islands are some 130 miles N. of Tonga and between 400 and 500 miles N.E. of Fiji. The group consists of nine islands, in addition to rocks and islets. They are all, with the exception of Rose Island, of volcanic formation, and are, for the most part, surrounded with coral reefs. The four largest islands are Savaii, Upolu, Tutuila and Tau, in the Manu'a Group. By the Anglo-German Agreement of November 14, 1899, ratified by the United States in January, 1900, Great Britain renounced all rights over the islands in favour of Germany as regards Savaii, Upolu, Apolima and Manono, and in favour of the United States as regards Tutuila and other islands.

On August 29, 1914, the British occupied German Samoa. By the Treaty of Peace, 1919, Germany surrendered her possessions abroad, and Samoa is assigned under a mandate dated December 17, 1920, from the League of Nations to His Majesty the King in right of his Dominion of New Zealand, which has been empowered to govern Western Samoa.

The civil administration was inaugurated on May 1, 1920. There is a Legislative Council, consisting of six official members, two elected European unofficial members, and four nominated native members representing the Samoan race. The Administrator is entitled to preside over every meeting of the Council. No person is qualified for appointment to the Legislative Council unless he is either a natural-born British subject or was born in Samoa. There is also an elective Native Council which advises the Administrator in native affairs.

Savaii has an area of about 700 square miles; Upolu has an area of approximately 430 square miles. Both islands are mountainous, fertile, and well watered. Several adjacent islets were included in the German

dependency. The port of Apia is in Upolu. The inhabitants of the islands are Polynesians, professing Christianity (Protestants, Catholics, and Mormons). Population of Western Samoa (June 30, 1944) was :—Europeans, 337; part European, 3,117; Samoan natives, 61,804; Chinese labourers, 302; other Chinese, 8; Melanesian labourers, 77; total, 65,643. There are 103 Government schools with a total number of pupils of 11,302, and also schools conducted by the various missions. There are 180 miles of roads in the Territory, 30 miles of which are bitumen or asphalt. The chief products are copra, cacao and bananas. Rubber is cultivated and 75 tons were exported in 1942. The revenue collected in Western Samoa for the year ended March 31, 1943, was 212,996L; the expenditure was 203,492L. Imports for 1943, 605,911L (from United Kingdom, 27,027L; New Zealand, 234,002L; Australia, 80,588L; U.S.A., 243,850L); exports, 1943, 282,991L (to United Kingdom, nil; New Zealand, 124,791L; Australia, 304L; U.S.A., 148,378L). The exports, 1943, are mainly copra (7,268 tons, 146,728L), cacao beans (1,131 tons, 83,655L), bananas (64,373 cases, 17,702L) and rubber (79 tons, 16,674L). In 1943, 162 vessels (272,519 tons, of which 15 vessels of 17,816 tons were British) entered the port of Apia, while clearances were 162 vessels with a total tonnage of 272,519, of which 15 vessels of 17,816 tons were British.

There is regular steam communication from New Zealand and Fiji, and the products of the territory are transported to overseas markets by steam and oil vessels which call at Apia every few weeks. A high power wireless station is erected at Apia.

New Zealand currency in the form of Samoan Treasury notes issued under the authority of the New Zealand Government is now in general use. A branch of the Bank of New Zealand was opened at Apia in April, 1915.

The Minister of Island Territories for New Zealand is in charge of Samoa.

Administrator.—A. C. Turnbull.

## NAURU ISLAND.

The island lies 26 miles south of the Equator, in longitude 166 degrees east. Area, 5,263 acres. It is an oval shaped upheaved coral island of approximately 12 miles in circumference, surrounded by a reef which is exposed at low tide. There is no anchorage adjacent to the island. On the seaward side the reef dips abruptly into the deep waters of the Pacific. On the landward side of the reef there is a sandy beach interspersed with coral pinnacles. From the sandy beach the ground rises gradually, forming a fertile section ranging in width from 200 to 800 yards and completely encircling the island. On the inner side of the fertile section there is a coral cliff which rises to a height of from 40 to 60 feet. Above the cliff there is an extensive plateau bearing phosphate of a high grade, the mining

rights of which are vested in the British Phosphate Commissioners subject to the rights of the native landowners. It is chiefly on the fertile section of land between the sandy beach and the plateau that the natives have established themselves, and from which they obtain the necessary food for themselves and families. With the exception of a small fringe round a shallow lagoon, about one mile inland, the plateau, which contains the phosphate deposits, has few food-bearing trees and is not utilized for the purposes of native villages.

The island was discovered by Captain Fearn in 1798, annexed by Germany in October, 1888, and surrendered to the Australian forces in 1914. It is administered under a mandate, dated December 17, 1920, conferred on the British Empire and approved by the League of Nations.

Great Britain, Australia and New Zealand agreed in July, 1919, that Australia should appoint the first Administrator for a term of five years, and thereafter the administrator was to be appointed as the three Governments should decide. The administrator has all the powers of government, administrative, legislative and judicial. The expenses of administration are met out of local revenue.

Japanese forces occupied the island on or about August 25, 1942.

Population, December 31, 1941 : 68 Europeans, 1,827 Nauruans, 193 other Pacific islanders, and 584 Chinese ; total, 2,672.

**Education.**—Attendance at school both for European and native children is compulsory until children reach the age of 16 years ; then, until they reach the age of 17 years, the native children are required to attend at specified periods for technical training in the case of boys and home craft training in the case of girls.

**Finance.**—The revenue and expenditure of the island have been follows :—

| Year | Revenue | Expenditure | Year | Revenue | Expenditure |
|------|---------|-------------|------|---------|-------------|
|      | £       | £           |      | £       | £           |
| 1936 | 24,906  | 23,989      | 1939 | 33,084  | 29,391      |
| 1937 | 53,343  | 29,312      | 1940 | 27,104  | 26,223      |
| 1938 | 29,428  | 30,287      | 1941 | 12,023  | 23,951      |

Excess of assets over liabilities as at December 31, 1941, 46,297.

The interests in the phosphate deposits were purchased in 1919 from the Pacific Phosphate Company by the Governments of the United Kingdom, the Commonwealth of Australia and New Zealand, at a cost of 3,500,000*l.*, and a Commission was appointed to ensure that the deposits were worked on business lines. The Commission took over a liability from the Pacific Phosphate Company to pay 6*d.* per ton royalty on phosphate shipped from the island. A Capitation Tax of 2*l.* for Europeans, 1*l.* for Chinese, 15*s.* for natives is collected from all physically fit males between the ages of 16 and 60 years. As from July 1, 1937, a royalty of 8*d.* per ton has been paid by the British Phosphate Commissioners for every ton of phosphate shipped, of which 4*d.* per ton is paid to the native landowner, 1½*d.* per ton is paid to the Administrator to be used solely for the benefit of the Nauruan people, and 2½*d.* per ton is paid to the Administrator in trust and invested for the benefit of the landowner or his assigns, to whom the interest will be paid after the principal has been invested for a period of 20 years.

**Commerce.**—The export trade of the island consists, with the exception of a small quantity of copra, almost entirely of phosphate, shipped mainly to Australia and New Zealand. Phosphate exported : 1940, 808,400 tons ; 1941, 99,150 tons.

The imports consist almost entirely of food supplies, and machinery for the British Phosphate Commissioners, for use in connection with their works. Value of imports : 1940, 192,749*l.* ; 1941, 106,978*l.* Exports, 1940, 541,168*l.* ; 1941, 69,375*l.*

**Shipping.**—Practically the whole of the shipping coming to the island consists of steamers under charter to the British Phosphate Commissioners. Numbers of vessels entered and cleared in 1940, 123 of 592,794 gross tons : in 1941, 38 of 185,481 gross tons.

**Communications.**—The Government radio station operated by the Administration has in recent years been entirely rebuilt and brought up to date. Direct daily schedules are maintained with Sydney (N.S.W.), Suva (Fiji), Rabaul (New Guinea), and with merchant shipping—both long and short wave transmissions. A free radio medical service is maintained for shipping.

## THE UNION OF SOUTH AFRICA.

### Constitution and Government.

THE Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw. 7, Ch. 9), passed by the Parliament of the United Kingdom on September 20, 1909. Under the terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal, and the Orange River Colony were united on May 31, 1910, in a legislative union under one Government under the name of the Union of South Africa, these Colonies becoming original provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal, and the Orange Free State respectively. There is a Governor-General, and an Executive Council in charge of the Departments of State.

Legislative power is vested in a Parliament consisting of the King, a Senate, and a House of Assembly. The Governor-General has power to summon, prorogue, and dissolve Parliament, either both Houses simultaneously or the House of Assembly alone. There must be a session of Parliament every year.

The following is a list of the Governors-General :—

|                                                  |         |                              |         |
|--------------------------------------------------|---------|------------------------------|---------|
| Viscount Gladstone . . . . .                     | 1910-14 | Earl of Athlone . . . . .    | 1924-31 |
| Earl Buxton . . . . .                            | 1914-20 | Earl of Clarendon . . . . .  | 1931-37 |
| H.R.H. Prince Arthur of Con-<br>naught . . . . . | 1920-24 | Sir Patrick Duncan . . . . . | 1937-48 |

The Senate consists of forty members, eight (four being selected mainly for their acquaintance with the reasonable wants and wishes of the non-European races) being nominated by the Governor-General in Council and thirty-two being elected, eight for each Province. Each senator must be a British subject of European descent, at least 30 years of age, qualified as a voter in one of the provinces, and resident for five years within the Union; an elected senator must be a registered owner of property of the value of 500*l.* over any mortgage. The Representation of Natives Act, 1936, provides for the direct representation of natives in the Senate and the establishment of a Natives Representative Council. This Act makes provision for the election of four additional senators, each of whom will represent one of the four electoral areas into which the Union is divided. Senators so elected hold their seats for five years. They are required to have the qualifications prescribed for elected senators and enjoy all the privileges of senators.

The House of Assembly consists, according to the Eighth Delimitation Commission appointed in connection with the 1941 population census results, of 150 members chosen in electoral divisions in numbers as follows:—The Cape of Good Hope, 56; Natal, 16; Transvaal, 64; Orange Free State, 14. Act No. 18 of 1930 introduced female franchise and gave the vote to all women over 21. Act No. 41 of 1931 extended the franchise to all males of European, or white, extraction over the age of 21, thus removing the property and wage qualifications existing in the Cape and Natal Provinces. Each electoral district in each province returns one member, who must be a British subject of European descent, qualified as a registered voter, and resident five years within the Union. A House of Assembly continues five years from the date of its first meeting unless sooner dissolved. Under the Representation of Natives Act, 1936, the persons whose names appear on the Cape Native Voters' roll are entitled to elect three members of the House of Assembly, who shall be additional to the number of members provided for in the South Africa Act, 1909. These members hold their seats for five years notwithstanding any dissolution of the House of Assembly.

The Natives Representative Council will consist of six official members, four nominated members appointed by the Governor-General (one for each electoral area), and twelve elected native members, three for each electoral area. The functions of the Council are to consider and report upon (a) proposed legislation in so far as it may affect the native population; (b) any matter referred to it by the minister; (c) any matter specially affecting the interests of the natives in general.

The House of Assembly, not the Senate, must originate money Bills, but may not pass a Bill for taxation or appropriation unless it has been recommended by message from the Governor-General during the Session. Restrictions are placed on the amendment of money Bills by the Senate. Provision is made respecting disagreements between the Houses, the Royal Assent to Bills, and the disallowance of laws assented to by the Governor-General.

Each member of each House must make Oath or Affirmation of Allegiance. A member of one House cannot be elected to the other, but a Minister of State may sit and speak, but not vote in the House of which he is not a member. To hold an office of profit under the Crown (with certain exceptions) is a disqualification for membership of either House, as are also insolvency, crime and insanity. Pretoria is the seat of government of the Union and Cape Town is the seat of Legislature.

At the Senate election held on November 17, 1939, the following parties were returned: United Party (General Smuts's Party), 13; General Hertzog's Party, 9; Nationalists, 6; Dominion Party, 2; Labour, 2

The result of the elections on July 17, 1943, was: United Party, 89; Labour Party, 9; Dominion Party, 7; Independents, 2; making, with the three native representatives, a total 'pro-war' strength of 110. The Opposition consists of the 43 Nationalists.

The Prime Minister receives an annual salary of 3,500*l.*; the other members of the Cabinet, 2,500*l.*

*Governor-General and Commander-in-Chief.*—Vacant (March, 1945). Salary 10,000*l.* per annum.

*Officer Administering the Government of the Union of South Africa.*—Rt. Hon. N. J. de Wet, late Chief Justice of the Union (entered on his duties on July 17, 1943, on the death of the late Governor-General).

The Executive Council was constituted as follows (September 6, 1939):—

The Governor-General.

*Prime Minister, Minister of External Affairs and Minister of Defence.*—Field Marshal The Right Hon. J. C. Smuts, P.C., C.H., K.C., D.T.D.

*Minister of Finance and Minister of Education.*—Hon. J. H. Hofmeyr.

*Minister of Transport.*—Hon. F. C. Sturrock.

*Minister of the Interior, Minister of Posts and Telegraphs and Minister of Public Works.*—Senator the Hon. C. F. Clarkson.

*Minister of Welfare and Demobilization.*—Hon. H. G. Lawrence, K.C.

*Minister of Labour.*—Hon. W. B. Madeley.

*Minister of Mines.*—Col. the Hon. C. F. Stallard, K.C., D.S.O., M.C.

*Minister of Lands and Irrigation.*—Senator the Hon. A. M. Conroy.

*Minister of Justice.*—Dr. the Hon. Colin F. Steyn, K.C.

*Minister of Native Affairs.*—Major the Hon. P. V. G. Van der Byl, M.C.

*Minister of Economic Development.*—Hon. S. F. Waterson.

*Minister of Agriculture and Forestry.*—Hon. J. G. N. Strauss, K.C.

In each province there is an Administrator appointed by the Governor-General in Council for five years, and a Provincial Council elected for five years, each council having an executive committee of four (either members or not of the council), the administrator presiding at its meetings. Members of the Provincial Council are elected on the same system as members of Parliament, but the restriction as to European descent does not apply. Under the Representation of Natives Act, 1936, the persons whose names appear on the Cape Native Voters' Roll are entitled to elect two members of the Provincial Council, who shall be additional to the number of members provided for in the South Africa Act, 1909. These members hold their seats for five years notwithstanding any dissolution of the Cabinet. The number of members in each Provincial Council is as follows:—Cape of Good Hope, 58 (including 2 members elected by persons appearing on the Cape Native Voters' Roll); Natal, 25; Transvaal, 64; Orange Free State, 25. The provincial committees and councils have authority to deal with local matters of which provincial finance, education (primary and secondary, other than higher education and technical education), hospitals, roads and bridges, townships, horse and other racing, betting, and game and fish preservation, are the most important. Other matters may be delegated to these Councils. All ordinances passed by a Provincial Council are subject to the veto of the Governor-General-in-Council.

There is a provincial Revenue Fund in each province. The old colonial capitals are the seats of provincial legislature of the provinces.

The railways, ports, and harbours are managed by a Railways and Harbours Board, under the chairmanship of a Minister of State. The revenues therefrom are paid into a special fund. All other moneys received by the Union are paid into a Consolidated Revenue Fund, on which the interest on debts of the colonies forms a first charge. To the Union has been transferred the public property, real and personal, of the colonies.

The English and Dutch languages are both official. The word 'Dutch' has now been expressly declared by Act of Parliament to include Afrikaans, a local variant of the language of Holland.

*High Commissioner in London.*—Colonel The Hon. G. Heaton Nicholls (appointed November 21, 1944).

*Accredited Representative of the Union of South Africa in Canada.*—J. H. Neethling (Acting).

*High Commissioner for Canada in South Africa.*—C. J. Burchell, K.C. (appointed February 15, 1944).

*Envoy Extraordinary and Minister Plenipotentiary at Lisbon.*—Lt.-Col. E. F. Pienaar, D.T.D., O.B.E. (appointed January 27, 1939).

*Portuguese Minister.*—Dr. J. de Barros Ferreira da Fonseca (appointed May 12, 1939).

*Envoy Extraordinary and Minister Plenipotentiary to Sweden.*—Leif Egeland (appointed January 1944).

*Envoy Extraordinary and Minister Plenipotentiary to the United States.*—Dr. S. F. N. Gie (February 16, 1944).

*United States Minister.*—General Thomas Holcomb (appointed June 14, 1944).

*Envoy Extraordinary and Minister Plenipotentiary to the Netherlands and Belgian Governments in London.*—E. K. Scallan (Chargé d'Affaires ad interim, appointed November 1944).

*Netherlands Minister.*—Dr. O. W. A. Baron van Haersolte (Chargé d'Affaires a.i., appointed December 1944).

*Belgian Minister.*—Albert Moulaert (appointed 1938).

*Envoy Extraordinary and Minister Plenipotentiary to the Greek Government.*—B. J. Jarvie (Chargé d'Affaires a.i., appointed June 1943).

*Greek Minister.*—S. Lascaris (Chargé d'Affaires a.i., appointed October 8, 1944).

*High Commissioner for Basutoland, the Bechuanaland Protectorate and Swaziland and High Commissioner for the United Kingdom in the Union of South Africa.*—Sir Evelyn Baring, K.C.M.G. (appointed October 27, 1944).

*High Commissioner for India in South Africa.*—Ramrao Madhavrao Deshmukh (appointed October 25, 1944).

### Area and Population.

The total area of the Union is 472,494<sup>1</sup> square miles divided between the Provinces as follows:—Cape of Good Hope, 277,113; Natal, 85,284; Transvaal, 110,450; Orange Free State, 49,647.

<sup>1</sup> Includes Walvis Bay (374 sq. miles), which is an integral part of the Cape Province but is administered under Act No. 24 of 1922 by South-West Africa.

The census taken in 1904 in each of the four Colonies was the first simultaneous census taken in South Africa. In 1911 the first Union census was taken.

The following tables give the returns of population at the various censuses classified according to race and sex:—

| Year       | All Races |           |              | European  |           | Non-European |           |
|------------|-----------|-----------|--------------|-----------|-----------|--------------|-----------|
|            | Total     | European  | Non-European | Males     | Females   | Males        | Females   |
| 1904 . . . | 5,175,824 | 1,116,806 | 4,059,018    | 635,117   | 481,689   | 2,047,118    | 2,011,900 |
| 1911 . . . | 6,978,894 | 1,276,242 | 4,697,152    | 685,164   | 591,078   | 2,304,228    | 2,312,924 |
| 1921 . . . | 6,928,680 | 1,519,488 | 5,409,092    | 782,085   | 737,453   | 2,754,957    | 2,664,135 |
| 1926 . . . | —         | 1,677,822 | —            | 857,828   | 819,929   | —            | —         |
| 1931 . . . | —         | 1,828,175 | —            | 930,541   | 897,634   | —            | —         |
| 1936 . . . | 9,589,898 | 2,005,837 | 7,586,041    | 1,017,874 | 985,983   | 3,819,233    | 3,766,808 |
| 1941 . . . | —         | 2,192,181 | —            | 1,109,291 | 1,082,890 | —            | —         |

The 1926, 1931 and 1941 population censuses were quinquennial ones of Europeans only, and were taken under the provisions of the South Africa Act for the delimitation of political constituencies.

Of the non-European population in 1936, 6,596,689 were Bantu, 219,691 Asiatic, and 769,661 of other races.

The increase in the total population, 1921–36, was: Union, 38.41 per cent.; Cape, 26.85 per cent.; Natal, 36.17 per cent.; Transvaal, 60.06 per cent.; O.F.S., 22.78 per cent. The increase in the European population in the Union 1936–41 was: Cape, 4.3 per cent.; Natal, 14.5 per cent.; Transvaal, 15.7 per cent.; and for the Union, 9.4 per cent. In the Orange Free State there was a decrease of 1.2 per cent.

Estimated population as at June 30, 1944:—Europeans, 2,300,000; non-European, 8,768,000; total, 11,068,000.

Principal towns (including suburbs) in the Union classified according to the number of inhabitants of European race, 1931, 1936 and 1941:—

| Town                      | Province                | 1931     | 1936     | 1941     |
|---------------------------|-------------------------|----------|----------|----------|
|                           |                         | European | European | European |
| 1. Johannesburg . . .     | Transvaal . . .         | 203,298  | 257,671  | 381,708  |
| 2. Cape Town . . .        | Cape . . .              | 150,914  | 173,412  | 187,946  |
| 3. Durban . . .           | Natal . . .             | 86,728   | 95,033   | 112,890  |
| 4. Pretoria . . .         | Transvaal . . .         | 62,138   | 76,965   | 112,778  |
| 5. Port Elizabeth . . .   | Cape . . .              | 48,924   | 53,461   | 58,256   |
| 6. Germiston . . .        | Transvaal . . .         | 28,956   | 32,564   | 40,364   |
| 7. East London . . .      | Cape . . .              | 27,801   | 31,511   | 38,384   |
| 8. Bloemfontein . . .     | Orange Free State . . . | 23,503   | 30,291   | 33,254   |
| 9. Pietermaritzburg . . . | Natal . . .             | 21,581   | 22,446   | 28,589   |
| 10. Brakpan . . .         | Transvaal . . .         | 11,736   | 17,355   | 23,321   |
| 11. Springs . . .         | Transvaal . . .         | 7,669    | 18,436   | 22,671   |
| 12. Benoni . . .          | Transvaal . . .         | 18,618   | 21,071   | 21,303   |
| 13. Krugersdorp . . .     | Transvaal . . .         | 13,696   | 18,066   | 20,588   |
| 14. Boksburg . . .        | Transvaal . . .         | 18,977   | 15,916   | 17,848   |
| 15. Roodepoort . . .      | Transvaal . . .         | 8,189    | 10,698   | 17,893   |
| 16. Kimberley . . .       | Cape . . .              | 17,590   | 15,741   | 17,018   |

*Migration.*—1943. Gross figures (excluding 'In transit'), European: Arrivals, 48,895; departures, 49,641. Non-European: Arrivals, 1,343; departures, 1,917.

**Vital Statistics.**—The following table gives the total numbers of marriages, births and deaths registered in the Union for recent years for all races:—

| Year | European |        |           | Non-European <sup>1</sup> |        |           |
|------|----------|--------|-----------|---------------------------|--------|-----------|
|      | Births   | Deaths | Marriages | Births                    | Deaths | Marriages |
| 1939 | 58,517   | 19,901 | 22,048    | 69,716                    | 52,505 | 26,298    |
| 1940 | 54,439   | 20,277 | 28,887    | 70,781                    | 55,245 | 23,378    |
| 1941 | 54,569   | 20,733 | 22,690    | 73,856                    | 58,333 | 29,262    |
| 1942 | 56,143   | 20,856 | 28,095    | 74,008                    | 62,354 | 29,796    |
| 1943 | 58,765   | 21,593 | 24,491    | 76,729                    | 64,280 | 29,755    |

<sup>1</sup> Partial Registration only.

Unifying Act No. 17 of 1923, which came into effect as from January 1, 1924, abolished compulsory registration of native vital events in rural areas, but made registration compulsory in all urban areas throughout the Union.

The figures for non-Europeans must therefore be regarded as merely recording registrations, and not the total number of actual events.

### Religion.

**Religions.**—The results of the census of 1936 as regards religions are as follows:—Europeans: Dutch Churches, 1,037,723; Anglicans, 345,130; Presbyterians, 82,344; Congregationalists, 11,504; Methodists, 141,747; Lutherans, 25,817; Roman Catholics, 92,453; Baptists, 20,152; Jews, 90,645; Christian Scientists, 7,250; Apostolic Faith, Mission Church, 31,765; other Christian sects, 50,626; others, 16,701. Non-Europeans: Dutch Churches, 379,541; Anglican, 573,197; Presbyterians, 114,291; Independents (Congregationalists), 143,780; Methodists, 877,869; various Christian Sects, 128,666; Lutherans, 366,922; Roman Catholics, 273,773; Native Separatist Churches, 1,089,479; Hindus, 180,117; Buddhists and Confucians, 3,671; Mohammedans, 79,088; no religion, 3,349,977<sup>1</sup>; others and unspecified, 45,670; total, 7,586,041.

### Education.

The Union Department of Education administers technical colleges under Act No. 30 of 1923; industrial schools and reformatories under the Children's Act, No. 31 of 1937; and trades, housecraft, and commercial schools under the Vocational Education and Special Schools Act, No. 29 of 1928. By Act No. 30 of 1937, agricultural schools were transferred to the Provincial Administrations. Special schools for the deaf and blind and epileptics are also administered under the Act of 1928. The training of mentally defective children is, however, administered by the Commissioner for Mental Hygiene under the Department of Interior.

**Higher Education.**—There are five universities in the Union:—(1) The University of South Africa, founded in 1918, with its seat in Pretoria, is a Federal University comprising the following five University Colleges: University College of the Orange Free State (1855), Bloemfontein; Huguenot University College (1874), Wellington; Natal University College (1909), Pietermaritzburg and Durban; Rhodes University College (1904), Grahamstown; and Potchefstroomse Universiteits-Kollege vir Christelike Hoër Onderwys (1869), Potchefstroom. (2) The University of Cape Town, founded in 1919. (3) The University of Stellenbosch, founded in 1918. (4) The University of Witwatersrand, founded in 1921, Johannesburg. (5) The University of Pretoria, founded in 1930.

<sup>1</sup> Indicates or Europeans 'No Religion' (so returned), and for non-Europeans covers Bantu religions and non-Christian Hottentots and Bushmen.

The following are statistics concerning universities and colleges in 1942:—

| University or College              | Current Expenditure, 1939 | Number of Full Time Professors † | Number of Lecturers and Assistants § |           | Average Number of Students for the year 1941 |           |           |
|------------------------------------|---------------------------|----------------------------------|--------------------------------------|-----------|----------------------------------------------|-----------|-----------|

<sup>1</sup> Excluding capital expenditure and loan charges.

### Poor Relief and Charitable Institutions.

With effect from April 1, 1940, the Department of Social Welfare assumed financial and administrative control of the relief of the poor and the subsidisation of charitable institutions in the Cape Province, Transvaal and Orange Free State, on transfer from the administrations of those provinces. The Natal Administration, however, carries on as before. The control and administration of poor relief assistance to natives in the Cape Province, Orange Free State and Transvaal have as from October 1, 1944, been transferred to the Department of Native Affairs.

as follows: 13,088,414 cattle; 37,888,048 sheep; 6,151,184 goats; 1,173,846 pigs.

The production of wool during the 1938-39 seasons was 208,419,139 lb. In 1941-42 the production of butter was 53,852,000 lb.; of cheese, 18,002,000 lb.

Cotton-growing is now undertaken by many farmers, the plant being found a better drought resistant than either tobacco or maize. Yield in 1939, 885,074 lb. (Grader's figures).

On March 31, 1940, the forest reserve areas comprised 3,445,871 acres.

**Irrigation.**—Technical and financial assistance is given by the State under the Union Irrigation Law of 1912, which was designed to encourage irrigation. The Government expenditure on irrigation in 1939-40 was 1,296,522*l.* and 327,787*l.* from revenue.

**Manufactures.**—The report on the industrial census in the Union in 1941-42 gives the value added by process of manufacture, etc., as 136,040,831*l.*, and the value of the gross production of the industries covered as 272,875,859*l.* The total number of factories which made returns was 9,989. Value of land and buildings, 55,217,566*l.*; machinery, plant and tools, 79,372,283*l.*, and cost of fuel, light and power, 8,054,278*l.* Average number of persons employed, 413,492 (Europeans, 149,113). Wages paid, 62,895,801*l.* The net value of the output of the principal groups of industries was: food, drink, etc., 28,226,510*l.*; metals, engineering, etc., 32,756,778*l.*; chemicals, etc., 9,446,685*l.*; heat, light and power, 11,217,075*l.*; building, etc., 8,926,395*l.*; clothing, textiles, etc., 9,763,752*l.*; books, printing, etc., 6,994,757*l.*; leather, etc., 4,577,018*l.*; stone, clay, etc., 5,155,495*l.*; vehicles, etc., 4,472,609*l.*; furniture, etc., 2,641,796*l.*

**Mining.**—The table hereunder gives the total value of the principal minerals produced in the Union to December 31, 1940. The value of gold is calculated at 4*·*24773*l.* per fine ounce up to 1919, when the gold premium came into effect, as from the 24th of July, and from 1925 onwards when the gold premium ceased to operate. The whole of the gold production of 1933 to 1939 was sold at a premium; the premium for 1939 amounted to 58,324,870*l.* Copper, tin, antimony, scheelite and silver are valued on the estimated pure metal contained in shipments according to the average current prices in London. The value of other base minerals is calculated on average local prices.

The value of the principal minerals produced to 1940 was:—

| Classification    | Cape of Good Hope | Natal      | Transvaal     | Orange Free State | Union         |
|-------------------|-------------------|------------|---------------|-------------------|---------------|
|                   | £                 | £          | £             | £                 | £             |
| Gold <sup>1</sup> | 22,118            | 94,208     | 1,874,450,569 | 27,078            | 1,874,593,978 |
| Diamonds          | 296,695,292       | —          | 62,670,566    | 88,990,690        | 881,906,538   |
| Coal              | 2,052,986         | 47,272,559 | 67,491,572    | 9,153,486         | 125,970,603   |
| Copper            | 21,175,057        | 389        | 10,314,071    | —                 | 31,489,517    |
| Tin               | 72,630            | —          | 7,695,985     | —                 | 7,768,665     |

<sup>1</sup> Including premium.

The total value of the mineral production of the Union is given hereunder for recent years:—

|                                 | 1936       | 1937       | 1938       | 1939       | 1940       |

| Total including items not named | 57,078,381 | 61,431,962 | 63,561,828 | 66,056,562 | 71,219,979 |

<sup>1</sup> Gold at standard value.

The gold output in 1940 was 14,046,502 fine ozs.; silver, 1,292,284 fine ozs.; diamonds, 543,463 metric carats; coal, 18,934,005 tons.

### Commerce.

The total value of the imports and exports of the Union of South Africa, exclusive of specie and gold bullion, was as follows:—

| Year | Imports                 | Exports                  | Year | Imports     | Exports    |
|------|-------------------------|--------------------------|------|-------------|------------|
|      | £                       | £                        |      | £           | £          |
| 1935 | 75,801,126 <sup>1</sup> | 102,200,190 <sup>2</sup> | 1938 | 95,612,358  | 29,554,215 |
| 1936 | 86,282,066 <sup>1</sup> | 112,889,114 <sup>2</sup> | 1939 | 91,821,226  | 30,923,568 |
| 1937 | 108,281,716             | 89,665,449               | 1940 | 105,009,934 | 34,090,637 |

<sup>1</sup> Includes premium of 65,535*l.*

<sup>2</sup> „ „ 28,654,925*l.*

<sup>1</sup> Includes premium of 32,266,720*l.*

<sup>2</sup> „ „ 25,854*l.*

The principal articles of import and export for 2 years were:—

| Imports                           | 1939      | 1940      | Exports                     | 1939      | 1940      |
|-----------------------------------|-----------|-----------|-----------------------------|-----------|-----------|
|                                   | £         | £         |                             | £         | £         |
| Agricultural Machinery            | 1,352,751 | 1,140,464 | Angora Hair                 | 879,908   | 386,530   |
| Cotton Piece Goods                | 3,990,703 | 5,308,749 | Asbestos                    | 514,119   | 924,417   |
| Drink                             | 707,089   | 646,067   | Bark                        | 690,851   | 547,281   |
| Electrical Machinery and Material | 4,210,573 | 3,696,086 | Butter                      | 434,594   | 421,602   |
| Engines                           | 2,499,303 | 2,068,055 | Citrus                      | 1,667,855 | 1,387,793 |

<sup>1</sup> Provisional.

### Shipping and Communications.

The four main ports are Durban, Capetown, Port Elizabeth and East London.

Overseas shipping, 1940: entered, 2,921 vessels of 12,909,734 tons net; cleared, 2,960 of 12,998,860 tons. Coastwise: entered, 3,586 vessels of 12,594,284 tons net; cleared, 3,561 of 12,316,808 tons.

Prior to the Union the State Railways of the several colonies were operated by the separate Administrations. In May, 1910, the Government lines were merged into one system, the South African Railways, under the control of the Union Government. The total open mileage at the end of March, 1944, was 13,251 (comprising Cape 5,251 miles, Orange Free State 1,633 miles, Transvaal 3,393 miles, Natal 1,511 miles, and South West Africa 1,463 miles), of which 12,400 miles were 3 ft. 6 in. gauge, and

851 miles 2 ft. gauge. Capital expenditure on Government Railways up to March 31, 1944, amounted to 178,031,583*l.* Earnings, 1943–44, 44,053,410*l.*, working expenditure, 1943–44, 28,807,747*l.* (excluding depreciation); passenger journeys, 1943–44, 202,348,842. Mileage of private lines at the end of March, 1944: 407 miles (Cape 249, Natal 84, and South-West Africa 74). Under the revised Mozambique Convention, 1935, the South African railways may alter tariffs as required, and it is now possible for the South African Administration to obtain a balanced system of traffic for its own harbours without consulting the Portuguese.

The air-mail services from Cairo to the United Kingdom are in operation, but only light-weight 'air letters' are accepted for transmission by air all the way. Ordinary air-mail correspondence is also accepted, but is subject to surface conveyance during the last stages of the route if aircraft accommodation is not available. Air-mail facilities are offered to the United States and other countries in the western hemisphere. The route is via West Africa and Brazil.

At the end of 1943–44 there were in the Union 3,475 post and 3,483 telegraph offices; 9,557,790 telegrams of all classes were forwarded. Mileage of telegraph wire, 1944, 18,350. The number of money orders issued during the year 1943–44 was 1,017,052, while 1,042,996 orders were paid. 7,042,469 postal orders were issued and 6,837,657 paid. The cash revenue of the Department of Posts, Telegraphs and Telephones, 1943–44, was 8,799,366*l.*; expenditure, 5,201,377*l.* The revenue figures include 949,741*l.* from the telegraph service and 4,256,292*l.* from the telephone service.

There were 240,801 telephone instruments and 176,006 subscribers; 1,657 exchanges, 8,131 public call offices, and 327,245,135 local and trunk calls. On February 1, 1932, the telephone systems of Great Britain and the Union of South Africa were linked together by means of the 'Beam' radio system of Cable and Wireless of South Africa, Ltd.

The number of depositors in the Government Savings Bank in the Union at the end of March, 1944, was 1,403,287 and the amount standing to their credit 56,753,846*l.*

### Banks.

Statistics of the South African Reserve Bank are as follows:—

|                                  | South African Reserve Bank, <sup>1</sup><br>March 31, 1944 |
|----------------------------------|------------------------------------------------------------|
| Subscribed capital               | £1,000                                                     |
| Paid-up capital                  | 1,000                                                      |
| Reserve fund                     | 1,000                                                      |
| Notes in circulation             | 51,169                                                     |
| Deposits and current accounts    | 142,314                                                    |
| Coin and bullion                 | 88,575                                                     |
| Securities, Government and other | 9,470                                                      |
| Loans and advances               | 1,840                                                      |
| Bills discounted                 | 22,581                                                     |
| Balance in Reserve Bank          | —                                                          |

<sup>1</sup> In December, 1920, under the South African Currency and Banking Act, 1920, a Central Reserve Bank was established at Pretoria. It commenced operations in June, 1921, and began to issue notes in April, 1922. Liability for the outstanding notes of the commercial banks was transferred to it on June 30, 1924, and amounted to 153,612*l.* on March 31, 1944. A branch was opened in Johannesburg on September 1, 1925, and further branches at Cape Town, Durban, Port Elizabeth, East London, Bloemfontein and Pietermaritzburg subsequently.

The total assets and liabilities of the five registered commercial banks operating in the Union on March 31, 1944, amounted to 440,808,000*l.*

### Money, Weights and Measures.

An Act of 1922 provided for the issue of a Union Coinage with denominations identical with those of British coins, which remained in circulation as legal tender until January 15, 1933, when they were withdrawn. On July 1, 1941, a South African Mint was set up for the Union.

Union of South Africa silver and bronze coins of 2s. 6d., 2s., 1s., 6d., 3d., 1d.,  $\frac{1}{2}$ d.,  $\frac{1}{4}$ d. are being coined and are in circulation. Gold coinage was in circulation until December 21, 1932, on which date the Union suspended gold payments.

*Weights and Measures.*—The Weights and Measures Act, 1922, which came into effect on April 1, 1923, established standard weights and measures throughout the Union and embodied the principle of optional use of the metric system, subject to provisions contained in the Act; it prescribes the denominations, and multiples thereof, of weight and measure which may be used in trade in the Union of South Africa. The original Act of 1922 was amended by Act No. 13 of 1933 and Act No. 8 of 1940.

Regulations issued under the Act prescribe the manner and frequency of assizing of trade weighing and measuring instruments, as well as controlling the sale of goods and fixing standard quantities for commodities in general use.

4,952 Congregationalists, 50,784 Methodists, 10,925 Lutherans, 33,484 Roman Catholics, 11,211 Baptists, and 23,912 other Christian sects. Jews 28,163, others 4,467. Non-Europeans: Dutch Churches, 224,549; Anglican, 300,879; Presbyterian, 77,281; Methodist, 442,413; Lutheran, 81,016; Roman Catholic, 67,226; Congregational, 115,079; other Christian sects, 48,115; Native Separatist Churches, 240,654; Buddhist, 59; Confucian, 557; Hindu, 3,079; Mahomedan, 36,472; no religion, 1,090,236<sup>1</sup>; others and unspecified, 10,711; total, 2,738,326.

**Education.**—Local school administration is conducted by school boards and school committees, the unit of administration being the school district. Each school district is under the control of a school board, a portion of the members being elected by the ratepayers and a portion nominated partly by the Provincial Administration and partly by the local authorities. Education is compulsory for children of European parentage. Grants in support of education are provided from Provincial Council revenues, education up to the age of fifteen being free.

Provincial expenditure in 1943-44 on education (excluding higher education, which is under control of the Central Government) amounted to 3,695,276*l.* on European, and 1,728,270*l.* on non-European education.

In June, 1948, there were 1,668 schools for European scholars, and in addition 9 institutions for the training of teachers. There were 155,958 European pupils, mostly under School Boards, and a total of 6,989 teachers. There were 2,984 public and aided private schools for non-European scholars, of which 20 were industrial schools and 23 training institutions for teachers. Altogether, there were 8,807 teachers in non-European schools, and a total of 356,101 pupils, mostly under churches and missionary bodies.

**Finance.**—Since the coming into effect of the Union there is one financial statement for the four provinces together, particulars of which are given above under the Union. Since the passing of the Financial Relations Act, 1913, the Provincial revenue consists of certain revenues assigned to the Province (not included in the Union summary referred to above) and an amount voted by Parliament by way of subsidy. The following figures show the provincial revenue and expenditure for five years:—

|                                                           | 1937-38   | 1938-39   | 1939-40   | 1940-41   | 1941-42   |
|-----------------------------------------------------------|-----------|-----------|-----------|-----------|-----------|
| Revenue:—                                                 | £         | £         | £         | £         | £         |
| Provincial Collections . . .                              | 2,701,752 | 3,087,499 | 2,792,976 | 2,898,698 | 3,223,858 |
| Union Government Subsidies:                               |           |           |           |           |           |

### PROVINCE OF NATAL.

**Constitution and Government.**—Natal was annexed to Cape Colony in 1844, placed under separate government in 1845, and under charter of July 15, 1856, erected into a separate Colony. By this charter partially representative institutions were established, and, under a Natal Act of 1893, assented to by Order in Council, June 26, 1893, the Colony obtained responsible government. The province of Zululand was annexed to Natal on December 30, 1897. The districts of Vryheid, Utrecht and part of Wakkerstroom, formerly belonging to the Transvaal, were annexed in January, 1903. On May 31, 1910, the Colony was merged in the Union of South Africa, becoming an original province of the Union.

The seat of provincial government in Natal is Pietermaritzburg.

**Administrator.**—The Hon. G. Heaton Nicholls (appointed February, 1943; salary, 2,000*l.*).

**Area and Population.**—The Province (including Zululand, 10,427 square miles) has an area of 85,284 square miles, with a seaboard of about 360 miles. The climate is sub-tropical on the coast and somewhat colder inland. It is well suited to Europeans. The Province is divided into 45 Magisterial Districts.

## PROVINCE OF THE TRANSVAAL.

**Constitution and Government.**—The territory was colonised by Boers from Cape Colony in 1836-37. In 1852 the independence of the Transvaal Government was recognised by Great Britain, but in 1877, in consequence of financial difficulties and troubles with the natives, and in accordance with representations and petitions from the Boers, the territory was annexed by the British Government. In 1880 the Boers rebelled, and in 1881 a Convention was signed restoring self-government, but with conditions, reservations, and limitations, and subject to the suzerainty of the British Crown. This arrangement was modified by a Convention in 1884, in which the name of the South African Republic was given to the Transvaal State; but the control over external affairs, other than engagements with the Orange Free State, was reserved to the Crown. The discovery of gold and the conditions which followed this discovery occasioned difficulties finally resulting in war. This led to the annexation of both States to the British Crown, the one on September 1, 1900, under the name of The Transvaal, and the other (May 24) as the Orange River Colony. Hostilities continued till May 31, 1902. [See STATESMAN'S YEAR-BOOK for 1906, under *The Transvaal*.]

The administration was thereafter carried on under a Governor and Lieutenant-Governor, assisted by an Executive and a Legislative Council. On December 6, 1906, Letters Patent were issued providing for a Constitution of responsible Government in the Colony. The Colony was merged in the Union of South Africa on May 31, 1910, as an original Province of the Union. The seat of provincial government for the Transvaal is at Pretoria.

*Administrator.*—General the Hon. J. J. Pienaar (salary, 2,500*l.*).

**Area and Population.**—The area of the Province is 110,450 square miles, divided into 44 districts. The following table shows the population at each of the last seven censuses:—

| Census Year | All Races |           |           | European             |         | Non-European |           |
|-------------|-----------|-----------|-----------|----------------------|---------|--------------|-----------|
|             | Total     | Males     | Females   | Males                | Females | Males        | Females   |
| 1911 . . .  | 1,686,212 | 971,535   | 714,657   | 236,918              | 188,649 | 734,642      | 531,008   |
| 1918 . . .  | —         | —         | —         | 260,840              | 238,507 | —            | —         |
| 1921 . . .  | 2,087,686 | 1,159,430 | 928,206   | 284,388              | 259,097 | 875,042      | 669,109   |
| 1926 . . .  | —         | —         | —         | 313,773              | 294,849 | —            | —         |
| 1931 . . .  | —         | —         | —         | 357,504              | 338,616 | —            | —         |
| 1936 . . .  | 3,341,470 | 1,846,576 | 1,494,894 | 424,470              | 396,286 | 1,422,106    | 1,098,608 |
| 1941 . . .  | —         | —         | —         | 487,727 <sup>1</sup> | 462,108 | —            | —         |

According to the figures of the census, the largest towns had in 1941 a European population as follows:—Johannesburg, 281,706; Pretoria, 112,778; Germiston, 40,364; Brakpan, 23,321; Springs, 22,571; Benoni, 21,302; Krugersdorp, 20,583; Boksburg, 17,848; Roodepoort-Maraiburg, 17,363, and Potchefstroom, 15,650.

Vital statistics are shown as follows:—

| Year | European |        |           | Non-European <sup>1</sup> |        |           |
|------|----------|--------|-----------|---------------------------|--------|-----------|
|      | Births   | Deaths | Marriages | Births                    | Deaths | Marriages |
| 1941 | 26,711   | 8,678  | 11,222    | 11,317                    | 17,004 | 6,389     |
| 1942 | 27,615   | 8,442  | 11,395    | 12,722                    | 17,658 | 6,450     |
| 1943 | 28,987   | 9,104  | 12,098    | 13,658                    | 18,641 | 6,632     |

<sup>1</sup> Partial Registration.

## Religion.—Statistics for the Transvaal (census 1936, Europeans only).—

| Churches, &c.          | Europeans | Churches, &c.                          | Europeans |
|------------------------|-----------|----------------------------------------|-----------|
| Dutch Churches . . . . | 426,725   | Lutheran . . . . .                     | 8,118     |
| Anglican . . . . .     | 125,853   | Apostolic Faith Mission Church . . . . | 20,293    |
| Presbyterian . . . . . | 88,000    | Other Christian . . . . .              | 26,780    |
| Methodist . . . . .    | 61,709    | Jews . . . . .                         | 55,924    |
| Roman Catholic . . . . | 40,446    | Others . . . . .                       | 8,908     |

Non-Europeans: Dutch Churches, 71,143; Anglican, 149,693; Presbyterian, 17,461; Methodist, 199,763; Lutheran, 206,931; Roman Catholic, 59,599; Congregational, 12,364; other Christian sects, 44,000; Native Separatist Churches, 446,655; Buddhist, 67; Confucian, 1,286; Hindu, 9,454; Mahommedan, 16,664; no religion, 1,265,111<sup>1</sup>; others and unspecified, 20,523; total, 2,520,714.

**Education.**—All education except that of a university and of a vocational type is under the provincial authority. The Province has been divided for the purposes of local control and management into 32 school districts. Instruction in Government schools, both primary and secondary, is free.

The following statistics of education show the position in June, 1942: 760 primary and intermediate schools and 50 secondary and high schools for European scholars with a total enrolment of 159,117, and 6,855 teachers; 989 State and State-aided schools for coloured, native and Indian children, with 161,969 pupils. There are 4 training institutions for European teachers, with 1,178 students; and 10 for coloured and native teachers, with 1,386 students. During the year 1942-43, 4,538,700*l.* was expended for educational purposes.

The medium of instruction up to the fourth standard is the home language (English or Afrikaans) of the pupil, but parents may request that the other language be gradually introduced as a second medium. Above the fourth standard both languages may be used at the parents' option or as occasion allows.

**Finance.**—For financial arrangements, see p. 445.

The following figures show the provincial revenue and expenditure for five years:—

|                                                                 | 1937-38   | 1938-39   | 1939-40   | 1940-41   | 1941-42   |
|-----------------------------------------------------------------|-----------|-----------|-----------|-----------|-----------|
| Revenue:—                                                       | £         | £         | £         | £         | £         |
| Provincial Collections . . . . .                                | 8,905,729 | 8,769,918 | 4,121,674 | 4,801,046 | 4,840,883 |
| Union Government Subsidies: . . . .                             | —         | —         | —         | —         | —         |
| Ordinary . . . . .                                              | 2,081,146 | 2,129,970 | 2,193,311 | 2,235,061 | 2,265,929 |
| In lieu of Professional Licences . . . .                        | —         | 28,013    | 28,013    | 28,013    | 28,013    |
| Grants: . . . . .                                               | —         | —         | —         | —         | —         |
| S.A. Native Trust . . . . .                                     | 170,467   | 182,884   | 195,843   | 217,373   | 280,085   |
| National Road Board for Int-<br>er-rat and Redemption . . . . . | —         | —         | —         | —         | —         |
| Other . . . . .                                                 | 5,844     | 11,368    | 12,627    | 13,932    | 18,136    |
| Total Revenue . . . . .                                         | 6,168,189 | 6,122,553 | 6,551,468 | 6,795,425 | 7,432,996 |
| Total Expenditure . . . . .                                     | 6,490,665 | 6,135,339 | 6,449,272 | 6,391,477 | 6,672,661 |

<sup>1</sup> Indicates for Europeans 'No Religion' (so returned), and for non-Europeans covers Bantu religions and non-Christian Hottentots and Bushmen.

### PROVINCE OF THE CAPE OF GOOD HOPE.

**Constitution and Government.**—The Colony of the Cape of Good Hope was originally founded by the Dutch in the year 1652. Britain took possession of it in 1795 but evacuated it in 1803. A British force again took possession in 1806 and the Colony has remained a British Possession since that date. It was formally ceded to Great Britain by the Convention of London, August 15, 1814. Letters Patent issued in 1850 declared that in the Colony there should be a Parliament which should consist of the Governor, a Legislative Council, and a House of Assembly. On 31 May, 1910, the Colony was merged in the Union of South Africa, thereafter forming an original province of the Union.

At the provincial election on November 3, 1943, the following parties were returned: United Party, 34; Nationalists, 18; Labour Party, 2; Dominion Party, 1; Independent, 1; native representative, 1.

Cape Town is the seat of the Provincial Administration.

**Administrator.**—Major G. B. van Zyl (appointed October 2, 1942; salary 2,500*l.*).

The Province is divided into 132 magisterial districts, and the Province proper, including Bechuanaland, but exclusive of the Transkeian territories (with the exception of the districts of Mount Currie and Matatiele, where there are also divisional council divisions), into 95 divisional council divisions. This figure includes the two divisions in the Transkei, viz. Mount Currie and Matatiele. Each division has a Council of at least 6 members (14 in the Cape Division) elected quinquennially by the owners or occupiers

of immovable property. The duties devolving upon Divisional Councils include the construction and maintenance of roads and bridges, local rating, vehicle taxation, and preservation of public health.

There are 139 municipalities, each governed by a Mayor and Councillors, a certain number of whom are elected annually by the ratepayers. There are also 92 Village Management Boards and 23 Local Boards.

**Area and Population.**—The following table gives the population of the Cape of Good Hope<sup>1</sup> at the last seven censuses :—

| Census Year | All Races |           |           | European |         | Non-European |           |
|-------------|-----------|-----------|-----------|----------|---------|--------------|-----------|
|             | Total     | Males     | Females   | Males    | Females | Males        | Females   |
| 1911        | 2,564,965 | 1,255,671 | 1,309,294 | 801,268  | 281,109 | 954,403      | 1,028,185 |
| 1918        | —         | —         | —         | 811,512  | 307,513 | —            | —         |
| 1921        | 2,782,719 | 1,348,589 | 1,434,130 | 339,394  | 321,315 | 1,019,195    | 1,112,915 |
| 1926        | —         | —         | —         | 344,058  | 348,741 | —            | —         |
| 1931        | —         | —         | —         | 378,046  | 371,185 | —            | —         |
| 1936        | 3,529,900 | 1,664,408 | 1,865,492 | 396,375  | 395,199 | 1,268,035    | 1,470,393 |
| 1941        | —         | —         | —         | 413,134  | 412,534 | —            | —         |

<sup>1</sup> Including Walvis Bay.

The following table gives the area and European population of the Province and native Territories in 1921, 1931 and 1936 :—

|                            | Area in Sq. Miles | 1921    | 1931    | 1936    |
|----------------------------|-------------------|---------|---------|---------|
| Colony Proper <sup>1</sup> | 260,559           | 635,933 | 731,633 | 773,950 |
| Transkeian Territories     | 16,554            | 14,676  | 17,598  | 17,624  |
| Total Province             | 277,113           | 650,609 | 749,231 | 791,574 |

<sup>1</sup> Including Walvis Bay.

Of the non-European population in 1921, 7,696 were Asiatics, 1,640,162 were Bantu, and 484,252 were of mixed and other races. According to the figures of the census in 1936, there were 10,508 Asiatics, 2,045,570 Bantu and 681,248 mixed and other races. The great majority are engaged in agricultural or domestic employments.

Chief towns: The census figures for the European population in 1941 are:—Cape Town, 187,946; Port Elizabeth, 58,256; East London, 34,834; Kimberley, 17,018; Pearl, 9,703; Uitenhage, 9,438; Oudtshoorn, 8,027; Queenstown, 7,853; Grahamstown, 7,541; George, 7,016; Stellenbosch, 6,377; Worcester, 5,847; King William's Town, 5,540.

Vital statistics are shown as follows :—

| Year | European |        |           | Non-European <sup>1</sup> |        |           |
|------|----------|--------|-----------|---------------------------|--------|-----------|
|      | Births   | Deaths | Marriages | Births                    | Deaths | Marriages |
| 1941 | 19,026   | 8,079  | 7,634     | 46,712                    | 30,391 | 14,274    |
| 1942 | 19,423   | 8,540  | 7,911     | 45,089                    | 33,105 | 14,215    |
| 1943 | 20,169   | 8,311  | 8,246     | 45,407                    | 31,729 | 13,890    |

<sup>1</sup> Partial registration.

**Religion.**—In 1936 (Europeans) there were 758,944 Christians—459,113 members of Dutch Churches, 139,858 Anglicans, 24,755 Presbyterians,

Ordinary expenditure, 1941-42: General administration, 267,810L.; education, 3,334,350L.; hospitals and poor relief, 850,907L.; roads, bridges and local works, 1,370,100L.; miscellaneous, 6,477L.; interest and redemption, 343,517L. The capital expenditure in 1941-42 was 696,797L.

The provincial revenue is mainly derived from licences, employers' (native registration) fees, poll tax, transfer duty and companies' tax.

**Production and Industry.**—The Province is in the main a stock-raising country, though there are considerable areas well adapted for agriculture, including the growing of tropical crops.

The live-stock (excluding the number in towns and villages) numbered, in 1939, 3,373,846 cattle; 4,041,446 sheep; 916,838 goats.

For mineral production, see p. 449. The Province has iron and brass foundries and engineering works, grain-mills, breweries, brick, tile, and pottery works, tobacco, soap, and candle factories, coach and wagon works, etc. The output of gold for 1944 was 12,277,228 ozs., valued at 103,128,715L.; for 1943, 12,800,021 ozs., valued at 107,520,177L., and for 1942, 14,120,617 ozs., valued at 118,613,182L.

**Commerce.**—Since the coming into effect of the Union there are no special records of trade for each of the Provinces.

### PROVINCE OF THE ORANGE FREE STATE.

The Orange River was first crossed by Europeans about the middle of the 18th century. Between 1810 and 1820, settlements were made in the southern parts of the Orange Free State, and the Great Trek greatly augmented the number of settlers during and after 1838. In 1848, Sir Harry Smith proclaimed the whole territory between the Orange and Vaal Rivers as a British Possession and established what was called the Orange River

**Sovereignty.** Great dissatisfaction was caused by this step, as well as by the native policy of the British Government. In 1854, by the Convention of Bloemfontein, British Sovereignty was withdrawn and the independence of the country was recognised.

During the first five years of its existence the Orange Free State was much harassed by incessant raids by, and fighting with, the Basutos. These were at length conquered. The British Government then stepped in and arranged matters much to the dissatisfaction of the conquering party. By the treaty of Aliwal North, only a part of the territory of the Basutos was incorporated in the Orange Free State.

On account of the Treaty between the Orange Free State and South African Republic, the former State took a prominent part in the South African War (1899-1902), and was annexed on May 28, 1900, as the Orange River Colony. After peace was declared Crown Colony Government was established and continued until 1907, when responsible government was introduced. On May 31, 1910, the Orange River Colony was merged in the Union of South Africa as the Province of the Orange Free State.

The seat of provincial government is at Bloemfontein.

**Administrator.**—Dr. the Hon. S. P. Barnard (appointed 1941; salary, 2,000L.).

There are municipalities at Bloemfontein and other centres, 64 in all.

**Area and Population.**—The area of the Province is 49,647 square miles; it is divided into 83 districts. The census population has varied as follows:—

| Census Year | All Races |         |         | European |         | Non-European |         |
|-------------|-----------|---------|---------|----------|---------|--------------|---------|
|             | Total     | Males   | Females | Males    | Females | Males        | Females |
| 1911        | 525,174   | 277,518 | 246,656 | 94,458   | 86,701  | 188,080      | 169,955 |
| 1918        | —         | —       | —       | 98,909   | 87,709  | —            | —       |
| 1921        | 628,697   | 331,878 | 297,454 | 97,724   | 90,780  | 238,597      | 216,674 |
| 1926        | —         | —       | —       | 104,862  | 98,593  | —            | —       |
| 1931        | —         | —       | —       | 104,788  | 100,687 | —            | —       |
| 1936        | —         | —       | —       | 101,872  | 98,106  | 280,081      | 291,051 |
| 1941        | 772,060   | 381,903 | 390,157 | 104,146  | 98,342  | —            | —       |

The capital, Bloemfontein, had, in 1936, 30,291 white inhabitants, 33,942 natives and other coloured persons; total, 64,238. European population, 1941, 88,254.

Vital statistics are shown as follows:—

| Year | European |        |           | Non-European <sup>1</sup> |        |           |
|------|----------|--------|-----------|---------------------------|--------|-----------|
|      | Births   | Deaths | Marriages | Births                    | Deaths | Marriages |
| 1941 | 4,471    | 1,820  | 1,866     | 2,708                     | 3,211  | 2,785     |
| 1942 | 4,661    | 1,742  | 1,735     | 2,632                     | 2,993  | 2,991     |
| 1943 | 4,847    | 1,793  | 1,786     | 2,637                     | 3,304  | 3,062     |

<sup>1</sup> Partial registration.

**Religion.**—The census of 1936 (Europeans only) gave the following results: Dutch Churches, 164,122; Anglican Churches, 10,629; Presbyterians, 2,802; Methodists, 7,692; Lutherans, 726; Roman Catholics, 2,374; Apostolic Faith Mission Church, 2,243; other Christians, 4,751; Jews,

4,822; others, 817. Non-Europeans: Dutch Churches, 76,378; Anglican, 39,008; Presbyterian, 6,729; Methodist, 122,353; Lutheran, 9,673; Roman Catholic, 34,090; Congregational, 1,999; other Christian sects, 14,038; Native Separatist Churches, 116,487; Hindu, 14; Mahomedan, 35; no religion, 147,456<sup>1</sup>; others and unspecified, 2,822; total, 571,082.

**Education.**—Higher and vocational education is under the control of the Union Education Department, while primary and secondary education and the training of primary teachers are controlled and financed by the Provincial Administration. The amount spent during the year ended March 31, 1944, on European education was 1,022,185*l.*, and on non-European education, 176,859*l.* Under the Education Ordinance of 1930 the Province is divided into 25 School Board Districts, for each of which there is a School Board elected by the School Committees in the district. In June, 1944, there were 460 European public schools and 20 aided private schools in the Province, with a total enrolment of 40,487 pupils. The number of teachers in European schools totalled 1,892. The Normal College had 192 teachers in training, and a staff of 18 teachers. Similarly, there were 469 non-European public and aided private schools with total enrolment of 53,754 and 4 training institutions for native teachers with 776 pupils; the number of teachers in all non-European institutions was 1,360. Education is free in all public schools up to the University Matriculation standard, but certain schools are allowed to charge fees and to expend the proceeds for the advantage of the schools. Attendance is compulsory between the ages of 7 and 16, but exemption may be granted in special cases or when a child has passed Standard VI and is in regular employment. Unless parents object, the two official languages—English and Afrikaans—are taught to all pupils, the home language of the pupil being the chief medium of instruction and the second language being introduced gradually during the primary school course.

**Finance.**—For financial arrangements see p. 445. The following figures show the provincial revenue and expenditure for five years:—

|                                                 | 1937-38   | 1938-39   | 1939-40   | 1940-41   | 1941-42   |
|-------------------------------------------------|-----------|-----------|-----------|-----------|-----------|
| <b>Revenue:—</b>                                |           |           |           |           |           |
| Provincial Collections                          | £ 622,888 | £ 600,814 | £ 625,851 | £ 654,881 | £ 724,411 |
| Union Government Subsidies:                     |           |           |           |           |           |
| Ordinary                                        | 937,887   | 936,762   | 940,598   | 937,041   | 937,821   |
| In lieu of Professional Licences                | —         | 5,931     | 5,931     | 5,931     | 5,931     |
| <b>Grants:—</b>                                 |           |           |           |           |           |
| S. A. Native Trust                              | 57,032    | 81,528    | 76,644    | 83,470    | 105,885   |
| National Road Board for Interest and Redemption | —         | —         | —         | —         | —         |
| Other                                           | —         | 2,889     | 10,499    | 10,014    | 12,199    |
| <b>Total Revenue</b>                            | 1,617,802 | 1,628,924 | 1,659,523 | 1,691,337 | 1,785,376 |
| <b>Total Expenditure</b>                        | 1,590,168 | 1,629,214 | 1,668,698 | 1,708,076 | 1,767,044 |

Ordinary expenditure, 1941-42: General administration, 53,952*l.*; education, 1,140,217*l.*; hospitals, poor relief, etc., 138,980*l.*; roads, bridges and local works, 309,491*l.*; miscellaneous, 8,236*l.*; interest and redemption, 116,168*l.*; total, 1,767,044*l.* The capital expenditure in 1941-42 was 128,747*l.*

<sup>1</sup> Indicates for Europeans 'No Religion' (so returned), and for non-Europeans covers Bantu religions and non-Christian Hottentots and Bushmen.

**Production and Industry.**—The Province consists of undulating plains, affording excellent grazing and wide tracts for agricultural purposes. The rainfall is moderate. The country is still mainly devoted to stock-farming, although a rapidly increasing quantity of grain is being raised, especially in the Eastern Districts.

For Mineral Statistics see p. 449.

**Commerce.**—Since the coming into effect of the Union there are no special records of trade for each of the Provinces.

The money, weights, and measures are English. The land measure, the Morgen, is equal to about 2·1165 acres.

## MANDATED TERRITORY.

### SOUTH-WEST AFRICA.

**Situation and Physical Features.**—This country is bounded on the north by Portuguese West Africa (Angola) and North Rhodesia, on the west by the Atlantic Ocean, on the south and southern portion of the eastern boundary by the Cape Province of the Union, and on the remainder of the eastern boundary by the Bechuanaland Protectorate and North Rhodesia. On the western coast, a strip varying from 60 to 100 miles in width and extending from the Orange River in the south to the Ugab River, which borders on what is known as the Kaokofeld, consists of barren desert, and this is also the case in that portion of the Great Kalahari depression which is included in the country on its eastern boundary. The eastern portion is, however, not barren, being good grazing land.

The Kunene River and the Okavango, which form portions of the northern border of the country, the Zambezi, which forms the eastern boundary of the Caprivi Zipfel, the Kwando or Mashi, which flows through the Caprivi Zipfel from the north between the Okavango and the Zambezi, and the Orange River in the south, are the only permanently running streams. But there is a system of great sandy dry river beds throughout the country, in which water can generally be obtained by sinking shallow wells; these are the Kuiseb, Swakop, Omaruru and Ugab on the west, the Fish River in the south, the Naeob, the Auob and the Elephant Rivers in the south-east, and a series of what are known as Omuramba in the north-east, with numerous smaller stream beds. In the Grootfontein area, which geologists describe as a 'karst' region, there are large supplies of underground water, but except for a few springs, mostly hot, there is no surface water throughout the country.

**Government and Administration.**—The country was annexed by Germany in 1884, but was surrendered to the Forces of the Union of South Africa on July 9, 1915, at Khorab. It is now administered by the Union under a Mandate from the League of Nations, dated December 17, 1920.

The laws of the Union, subject to local modifications, if required, may be applied to the country and are gradually being introduced.

The Administration is conducted from Windhoek, and the country is divided into 18 Districts controlled by Magistrates. In addition there is a Chief Native Commissioner at Windhoek who has charge of all Native Affairs in the territory.

Windhoek, the capital, is situated in the centre of the territory, and with its surrounding district contains a population of 8,042 Europeans (1936 census) and 12,505 natives (1942 census).

The administration has been vested by the Union Parliament in the Governor-General of the Union, who has delegated his powers to an Administrator with full authority to legislate. By Act No. 42 of 1925 the Union Parliament conferred a Constitution on South-West Africa, providing for an Executive Committee, an Advisory Council, and a Legislative Assembly with such powers, authorities and functions severally as are in the Act defined.

At the elections held on February 21, 1940, the United Party obtained 10 seats and the Nationalists 2 seats in the Legislative Assembly. The 6 remaining seats are filled by members nominated by the Administration.

**Administrator.**—Col. P. I. Hoogenhout (appointed April 1, 1943).

**Area and Population.**—The total area of the country including the Caprivi Zipfel is 317,725 square miles; that of Walvis Bay, administered by S.W.A., 374 square miles.

Owing to the difficulty of satisfactorily controlling that part of the Caprivi Zipfel, east of the line running due south from Beacon 22, situated west of the Kwando (or Mashi) river which flows through the Caprivi Zipfel from the north, as from August, 1939, it was decided to make over the control of this area to the Union Department of Native Affairs.

The European population according to the figures of the 1936 census amounted to 30,677 (German speaking, 9,634). The native population is estimated at 516,765. As large areas of the country, particularly along the coast and in the north, are uncivilised, it has been impossible to procure precise figures. In particular it has been difficult to estimate the population of the Bushmen, who still exist in considerable numbers in the north-eastern portion of the country.

The principal native races are the Ovambos, Hereros, Bergdamares or Klipkaffers, Hottentots and Bushmen.

The Ovambos are a Bantu race and follow agriculture. They still possess tribal organisation to its full extent.

The Herero are a pastoral people who formerly owned enormous herds of cattle. The Germans oppressed them, their tribal organisation completely disappeared and they were scattered throughout the country on farms and in the different towns, where they formed the ordinary source of labour. The Herero makes an excellent herd. Since the Union occupation of the country Reserves have been set apart for them and they have considerably increased in numbers and in animal wealth.

The Bergdamaaras are, it is believed, also of Bantu origin, though some authorities hold that they belong rather to the Hottentot race whose language they now speak. They are an inferior tribe and were alternately the slaves of the Hereros and the Hottentots in pre-European days, as the former or the latter were in the ascendant.

The Hottentots, so called, consist of two distinct sections: one, whose remnants are found in the central portions of the country, being of pure native extraction, the source of which is but little understood: the other

composed of tribes resulting from an admixture of European blood in the Cape with the Hottentot races residing there a couple of centuries ago, which, after conflict with their European neighbours, sought refuge across the Orange River.

The Bushmen are the oldest inhabitants of South-West Africa and are found in considerable numbers in its eastern portion from lat. 26° to the northern boundary. The country just south of the Windhoek district

In the centre of the country just south of the Windhoek district is the Rehoboth Gebiet occupied by a race known as the Bastards, whose origin is much the same as the second class of Hottentots mentioned above, except that the admixture of European blood is much greater and their ordinary language is Afrikaans. These people have a measure of self government under a council of which the local Magistrate is Chairman. They number about 5,000.

**Education.—European.**—There are (1943) 54 Government schools with 5,672 pupils, and 22 registered private schools with 699 pupils. Of the children in Government schools 3,015 are accommodated in hostels which are conducted by the Administration in conjunction with 40 of the Government schools. The general policy has hitherto been to bring the country children into these hostels and so obviate the necessity for single-teacher country schools. There are 3 aided private farm schools.

*Native.*—The education of the natives is mainly under the direct supervision of the various Missions. There are (1948) 2 Government native schools, 1 Government coloured school and 91 Government-aided mission schools for coloured and native children, with 5,965 pupils. There are 2 training schools for native teachers, subsidised by the Government, with 56 student teachers in training.

**Finance.**—The revenue and expenditure for 5 years were:—

|             | 1939-40   | 1940-41   | 1941-42     | 1942-43     | 1943-44     |
|-------------|-----------|-----------|-------------|-------------|-------------|
| Revenue     | ₹ 522,552 | ₹ 829,949 | ₹ 1,101,735 | ₹ 1,266,918 | ₹ 1,356,141 |
| Expenditure | 795,129   | 748,877   | 781,049     | 992,674     | 1,046,600   |

including loan expenditure, 1989-90, 89,457L.; 1990-91, 48,962L.; 1991-92, 58,277  
1992-93, 37,967L.; 1993-94, 47,792L.

For the purposes of Customs and Excise revenue the territory is included in the South African Customs Union. The total revenue from this source for the year 1948-44 was 272,217.

**Production and Industry.**—South-West Africa is essentially a stock raising country, the scarcity of water and poor rainfall rendering agriculture except in the northern and north-eastern portions, almost impossible. Generally speaking the southern half of the territory is suited for the raising of small stock, while the central and northern portions are better fitted for cattle. The stock census for the year 1943 (the latest taken) was as follows: 1,372,231 head of cattle, 4,591,854 head of small stock, 35,398 horses, 222,101 donkeys and 3,203 mules. Considerable attention is being paid to the improvement of cattle and the production of butter, the quantity of butter manufactured during the year 1943 being 11,088,475 lb., of which 10,478,971 lb. were exported. Cheese manufactured, 316,954 lb., of which 144,366 lb. were exported.

More and more attention is being centred on the production of karakul pelts. The number of pelts exported during 1943 was 2,327,653.

Minerals constitute 25 per cent. of the total value of exports from the territory. Diamonds, which constitute the principal production, are recovered from alluvial sources on a 300 mile stretch along the coast line from the Orange River northward. Exports in 1943, 94,208 carats, valued at 709,394*l.*; exports in 1942, 88,877 carats, valued at 779,265*l.*

Vanadium and tin are at present being worked in the north of the territory. Exports: vanadium, as concentrates, in 1943, 3,746 long tons, valued at 179,086*l.*; tin, as concentrates, in 1943, 232 long tons, valued at 42,970*l.*

**Commerce.**—Imports and exports for 6 years :—

| Year | Imports   | Exports   | Year | Imports   | Exports   |
|------|-----------|-----------|------|-----------|-----------|
|      | £         | £         |      | £         | £         |
| 1938 | 2,430,628 | 8,540,478 | 1941 | 2,730,985 | 4,961,481 |
| 1939 | 2,300,724 | 8,396,349 | 1942 | 2,644,752 | 4,165,571 |
| 1940 | 2,503,283 | 8,701,546 | 1943 | 3,315,966 | 6,633,618 |

Imports from overseas, 1943, 71,584*l.*; Union of South Africa, 3,244,382*l.* Exports overseas, 3,913,385*l.*; Union of South Africa, 2,726,233*l.*

The bulk of the direct imports into the country is landed at Walvis Bay, which is now administered as a portion of South-West Africa, and the Government proposes to develop this port as the main harbour.

**Communications.**—The railway line from Walvis Bay to Karasburg extends southwards and connects with the main system of the South African Railways at De Aar.

The total length of the line inside South-West Africa is 1,133 miles of 3ft. 6in. gauge, and 353 miles of 2ft. gauge. There are also 98 miles of private line, most of which have been constructed for the service of the diamond fields south of Luderitz. The Railway Administration also operates seven well developed road motor services, totalling 1,768 route miles, within the territory. These services have played an important part in the opening up of vast undeveloped areas. The introduction of a service between the rail head at Tsumeb and Angola border has established an important link between South West Africa and Portuguese West Africa.

At March 31, 1944, there were 101 post offices and 1,000 private bag services distributed by rail or road transport. The number of articles posted was 4,503,925 and 8,369,324 were received.

On March 31, 1944, there were 3,621 circuit miles of trunk lines, 408 miles of telegraphs, 3,015 miles of super-imposed telegraphs, 225 miles of rural telephones and 3,011 miles of farm telephone lines; 79 telegraph offices, 82 telephone exchanges, 84 rural call offices and 2,100 rented telephones.

A Post Office Savings Bank was established in 1916. The number of accounts open at March 31, 1944, was 17,062, with a credit of 673,292*l.* Savings certificates of a value of 50*l.* are also issued. The balance due to holders as at March 31, 1944, amounted to 247,050*l.*

## IRELAND.

(EIRE.)

IRELAND is a sovereign, independent state, but is associated for certain purposes with the British Commonwealth of Nations.

In April, 1916, an insurrection against British rule took place and a Republic was proclaimed. The armed struggle between Great Britain and Ireland was renewed in 1919 and continued until 1921.

The independence of Ireland was reaffirmed in January, 1919, by the National Parliament (*Dáil Éireann*) which had been elected by the people in December, 1918.

In 1920 an Act was passed by the British Parliament, under which separate Parliaments were set up for two parts of Ireland under the titles of 'Southern Ireland' (26 counties) and 'Northern Ireland' (6 counties). The Unionists of Ireland accepted this scheme, and a Northern Parliament was duly elected on May 24, 1921. The rest of Ireland, however, having already proclaimed a Republic, ignored the Act.

On December 6, 1921, a Treaty was signed between Great Britain and Ireland by which Ireland accepted dominion status for the time being under the name of *Saorstát Éireann* (Irish Free State). The border between *Saorstát Éireann* (26 counties) and Northern Ireland (6 counties) was fixed in December, 1925.

### Constitution.

The original Constitution of the Irish Free State came into operation on December 6, 1922. Certain provisions which were regarded as distasteful to the national sentiments of the Irish people were gradually removed by successive amendments, with the result that at the end of 1936 the text differed considerably from that of the original document.

On June 14, 1937, a new Constitution was approved by Parliament (*Dáil Éireann*) and enacted by the people by means of a plebiscite on July 1, 1937. This Constitution came into operation on December 29, 1937. Under it the former name of Ireland (Eire) is restored.

The Preamble to the Constitution is as follows :—

In the Name of the Most Holy Trinity, from Whom is all authority and to Whom, as our final end, all actions both of men and States must be referred, We, the people of Eire, Humbly acknowledging all our obligations to our Divine Lord, Jesus Christ, Who sustained our fathers through centuries of trial, Gratefully remembering their heroic and unremitting struggle to regain the rightful independence of our Nation, And seeking to promote the common good, with due observance of Prudence, Justice and Charity, so

that the dignity and freedom of the individual may be assured, true social order attained, the unity of our country restored, and concord established with other nations. Do hereby adopt, enact, and give to ourselves this Constitution.

**National Status.**—The Constitution declares that Ireland is a sovereign, independent, democratic State. It affirms the inalienable, indefeasible and sovereign right of the Irish nation to choose its own form of government, to determine its relations with other nations, and to develop its life, political, economic and cultural, in accordance with its own genius and traditions.

The Constitution applies to the whole of Ireland, but it provides that, pending the reintegration of the national territory, the laws enacted by the Parliament established by the Constitution shall have the same area and extent of application as those of the Irish Free State.

**The President of Ireland.**—It provides for a President of Ireland elected by direct vote of the people, who holds office for a period of seven years. On the advice of the Head of the Government he summons and dissolves *Dáil Éireann*. He signs and promulgates laws. On the nomination of *Dáil Éireann*, he appoints the *Taoiseach* or Prime Minister. On the nomination of the *Taoiseach* and with the previous approval of *Dáil Éireann* he appoints the other members of the Government. The supreme command of the Defence Forces is vested in the President, its exercise being regulated by law.

In addition, the President has power to refer certain Bills to the Supreme Court for decision as to whether they are repugnant to any provisions of the Constitution. He can, at the instance of a prescribed proportion of the members of the Houses of the *Oireachtas*, refer certain Bills to the people for decision at a referendum.

The President, in the exercise and performance of certain of his Constitutional powers and functions, is aided and advised by a Council of State.

**The Parliament.**—The *Oireachtas* or National Parliament consists of the President and two Houses, viz. a House of Representatives, called *Dáil Éireann*, and a Senate, called *Seanad Éireann*, consisting of sixty members. The *Dáil*, consisting of 138 members, is elected by adult suffrage. Of the sixty members of the Senate, eleven are nominated by the *Taoiseach* (or Prime Minister), six are elected by the universities, and the remaining forty-three are elected from five panels of candidates established on a vocational basis, representing the following public services and interests:—(1) National Language and Culture, Literature, Art, Education and such professional interests as may be defined by law for the purpose of this panel; (2) Agriculture and allied interests, and Fisheries; (3) Labour, whether organised or unorganised; (4) Industry and Commerce, including banking, finance, accountancy, engineering and architecture; (5) Public administration and social services, including voluntary social activities.

**Powers of the Senate.**—A maximum period of ninety days is afforded to the Senate for the consideration or amendment of Bills sent to that House by the *Dáil*, but the Senate has no power to veto legislative proposals.

**Executive Power.**—The Executive Power of the State is exercised by the Government, which is responsible to *Dáil Éireann*, and consists of not less than seven and not more than fifteen members. The head of the Government is the *Taoiseach* or Prime Minister.

**Fundamental Rights.**—The State recognises the family as the natural, primary and fundamental unit group of Society, possessing inalienable and

imprescriptible rights antecedent and superior to all positive law. It acknowledges the right and duty of parents to provide for the education of their children, and, with due regard to that right, undertakes to provide free primary education. It pledges itself to guard with special care the institution of marriage.

The Constitution contains special provision for the recognition and protection of the fundamental rights of citizens such as personal liberty, free expression of opinion, peaceable assembly, and the formation of associations and unions.

Freedom of conscience and the free practice and profession of religion are, subject to public order and morality, guaranteed to every citizen. No religion may be endowed or subjected to discriminatory disability. The special position of the Catholic Church as the guardian of the faith professed by the majority of the citizens is recognised by the State. The other religious denominations existing in Ireland at the date of the coming into operation of the Constitution are also recognised.

**Directive Principles of Social Policy.**—Certain principles of social policy which are intended for the general guidance of the *Oireachtas*, but whose application in the making of laws is not cognisable by the Courts, are set forth in the Constitution. Among their objects is the direction of the policy of the State towards securing the distribution of property so as to subserve the common good, the regulation of credit so as to serve the welfare of the people as a whole, the establishment of families in economic security on the land, and the right to an adequate means of livelihood for all citizens.

The State pledges itself to safeguard the interests, and to contribute where necessary to the support of the infirm, the widow, the orphan, and the aged, and shall endeavour to ensure that citizens shall not be forced by economic necessity to enter occupations unsuited to their sex, age or strength.

After a period of three years from the date on which the first President entered upon his office no amendment of the Constitution can be effected except with the approval of the people given at a Referendum.

**President of Ireland.**—Dubhglas de hÍde (Dr. Douglas Hyde).

The first President was elected on May 4, 1938, and was installed on June 25, 1938. He holds office for seven years. Salary, 10,000l. per annum. The office carries a pension of 1,200l. per annum.

In the Senate the result of the elections of June 22, 1943, left the composition of the parties as follows: Fianna Fáil (Government Party), 22; Fine Gael (United Ireland Party), 14; Labour Party, 7, and Independents, 6; total, 49.

At the General Election held on May 30, 1944, the following parties were returned to the *Dáil*:—Fianna Fáil (Government Party), 76; Fine Gael (United Ireland Party), 30; Farmers, 12; Labour Party, 8; National Labour Party, 4; Independents, 8; total, 138.

The Government of Ireland consists of the following members (re-elected June 9, 1944):—

*Taoiseach* (or Prime Minister) and Minister for External Affairs.—Ramon de Valera (Ramon de Valera).

*Tánaiste* (or Deputy Prime Minister) and Minister for Finance.—Seán T. O'Ceallaigh (Sean T. O'Kelly).

Minister for Supplies and Minister for Industry and Commerce.—Seán F. Lemass (Sean F. Lemass).

Minister for Local Government and Public Health.—Seán Mac Ant Saei (Sean MacEntee).

*Minister for Agriculture.*—An Dr. Séamas Ó Riain (Dr. James Ryan).  
*Minister for Co-ordination of Defensive Measures.*—Proinnsias Mac Aodhagáin (Frank Aiken).

*Minister for Education.*—Tomás Ó Nuig (Thomas Derrig).

*Minister for Lands.*—Seán Ó Maoláin (Sean Moylan).

*Minister for Justice.*—Gearóid Ó Broilín (Gerald Boland).

*Minister for Defence.*—Oscar Mac Threáinshir (Oscar Traynor).

*Minister for Posts and Telegraphs.*—Padraig Ó Caoilte (Patrick J. Little).

Holders of other important posts are :—

*Attorney-General.*—Caoimhghín MacRiscáird (Kevin Dixon, S.C.).

*Chairman of Dáil Éireann.*—Proinnsias Ó Fathaigh (Frank Fahy).

*Chairman of Seanad Éireann.*—Seán Goulding.

### Local Government.

Ireland (Eire) is divided into twenty-seven administrative counties and four county boroughs governed by councils which are elected triennially. The county councils administer county affairs generally, can hold property, levy rates, and borrow money. The county borough council possesses with certain exceptions the powers of a county council.

The administrative counties include the urban county districts which are urban areas that have been constituted sanitary districts. Each such district is governed by an elected council that administers the Acts relating to public health, housing, libraries, maternity and child welfare, etc., and is the sole rating authority within its area. There are sixty-three urban sanitary districts, comprising the four county boroughs, seven municipal boroughs, one town constituted under a special Act and fifty-one towns under the Towns Improvement Act, 1854. There are twenty-five towns constituted under the Towns Improvement Act, 1854, which are not urban sanitary districts. These towns have elected town commissioners who exercise certain minor powers and can levy a limited rate. There are, therefore, altogether eighty-eight areas under municipal government.

An enlarged rural sanitary district, called the county health district, was created by the Local Government Act, 1925. This district generally extends over the county with the urban districts excluded. The county council performs its duties as a health authority directly, and is required to appoint a county medical officer of health for the effective administration of the sanitary code.

The county council is also as a rule the public assistance authority. County homes have been established for the aged and infirm and chronic invalids, and county and district hospitals for the sick. Home assistance is the normal method of poor relief. Old age pensions are a charge on State funds, but local authorities assist in the administration. The insane poor are under the care of the county and county borough councils who maintain twenty-one mental hospitals. Industrial and reformatory schools are managed by religious communities, but maintained principally out of capitation grants from State and local funds. Religious communities and voluntary associations also maintain schools for the deaf and dumb, the blind, the mentally deficient and other afflicted classes which local authorities have power to utilise and subsidise.

The county and county borough councils, the urban district councils and other elective bodies have a system of government which combines an elected council with a manager. These councils have certain specified functions,

including the making of a rate, raising loans, and making bye-laws. All functions formerly exercised by the councils other than those now specifically reserved by law are exercised by the manager, a paid official, who has control over all officers, and whose removal from office is subject to the sanction of the central authority.

Elected members of local authorities are not paid, but provision is made for a contribution towards travelling expenses.

Elections to public bodies are held according to the principle of proportional representation. A person who is of full age is entitled to be registered as a local government elector at the place of ordinary residence on the qualifying date and also in respect of lands or premises occupied as owner or tenant during a qualifying period; but an elector may not vote more than once at an election of members to a local authority. Women are eligible for election as members of all local government bodies in the same manner and on the same conditions as men.

In order to abolish patronage and to ensure that only qualified persons are appointed to local offices a central body called the Local Appointments Commissioners is charged with the duty of selecting suitable persons to be appointed by local authorities to chief executive offices, to professional and technical offices and to other prescribed offices. Before making an appointment to a prescribed office which cannot be filled by promotion the local authority must request the Commissioners to recommend to them a suitable person. The Commissioners select persons for appointment by means of competitive examinations or by the machinery of selection boards.

A scheme of combined purchasing has been established in order to enable local authorities to obtain commodities of standard quality at the lowest possible price. The central authority appoints official contractors after obtaining competitive tenders.

### Area and Population.

According to the register of population in Eire, taken in December, 1943, the following are the figures of area and population :—

| Counties<br>and County Boroughs | Area in<br>Statute<br>Acres <sup>1</sup> | Population 1943 <sup>2</sup> |         |           |
|---------------------------------|------------------------------------------|------------------------------|---------|-----------|
|                                 |                                          | Males                        | Females | Total     |
| <i>Provinces of Leinster.</i>   | 221,465                                  | 17,449                       | 16,413  | 33,862    |
| Carlow                          | 227,724                                  | 281,584                      | 337,473 | 618,997   |
| Dublin County <sup>3</sup>      | 18,740                                   | 223,480                      | 271,594 | 495,074   |
| Dublin C.B.                     | 418,644                                  | 56,670                       | 27,889  | 84,559    |
| Kildare                         | 509,470                                  | 36,819                       | 31,687  | 68,006    |
| Kilkenny                        | 424,892                                  | 26,295                       | 22,965  | 49,260    |
| Laoighis                        | 257,985                                  | 19,223                       | 17,284  | 36,507    |
| Longford                        | 202,814                                  | 32,570                       | 32,588  | 65,158    |
| Louth                           | 577,824                                  | 34,573                       | 30,725  | 65,298    |
| Meath                           | 493,636                                  | 27,912                       | 24,117  | 52,029    |
| Offaly                          | 435,605                                  | 30,289                       | 25,844  | 56,133    |
| Westmeath                       | 581,062                                  | 45,960                       | 45,150  | 91,136    |
| Wexford                         | 500,250                                  | 29,125                       | 29,170  | 58,295    |
| Wicklow                         |                                          |                              |         |           |
| Total of Leinster               | 4,851,840                                | 616,369                      | 641,201 | 1,259,790 |

<sup>1</sup> Exclusive of larger rivers, lakes and tideways.

<sup>2</sup> Including the County Borough.

<sup>3</sup> Provisional figures.

## Justice.

Justice is administered by Courts set up by the Courts of Justice Act, 1924, pursuant to the Constitution. They consist of a Supreme Court, a High Court, a Court of Criminal Appeal, a Central Criminal Court, a Circuit Court and a District Court. The Courts of Justice Act, 1924, has been amended by a number of Acts, the latest and most important of which is the Courts of Justice Act, 1936.

The Supreme Court, which consists of the Chief Justice (who is *ex-officio* an additional Judge of the High Court) and four other Judges, has appellate jurisdiction from all decisions of the High Court. The High Court, which consists of a President (who is *ex-officio* an additional Judge of the Supreme Court) and five ordinary Judges, has full original jurisdiction in and power to determine all matters and questions, whether of law or fact, civil or criminal. In all cases in which questions arise touching the validity of any law having regard to the provisions of the Constitution, the High Court alone exercises original jurisdiction. The Court of Criminal Appeal consists of the Chief Justice or some other Judge of the Supreme Court and two ordinary Judges of the High Court. It deals with appeals by persons convicted on indictment where the appellant obtains a certificate from the trial Judge that the case is a fit one for appeal, or, in case such certificate is refused, where the Court itself, on appeal from such refusal, grants leave. Where leave to appeal is granted, the appeal is heard and determined by the Court of Criminal Appeal on the report of the official stenographer present at the trial, with power to the Court to hear further evidence or to refer any matter back for report by the trial Judge. The decisions of the Court of Criminal Appeal are final, unless that Court or the Attorney-General certifies that the decision involves a point of law of exceptional public importance, and that it is desirable that an appeal should be taken to the Supreme Court. The Central Criminal Court consists of a Judge of the High Court, to whom is assigned, for the time being, the duty of acting as such Court. It is held at such times and in such places as the President of the High Court may direct, and at it are tried criminal cases which are outside the jurisdiction of the Circuit Court or which may be sent forward to it for trial from the Circuit Court.

Ireland is divided into nine Circuits for the purposes of the Circuit Court, to each of which, other than the Dublin Circuit, a Judge of the Circuit Court has been assigned. Two Judges have been assigned to the Dublin Circuit. The jurisdiction of this Court in civil proceedings is limited as to amount, save by consent of the parties, in which event the jurisdiction is unlimited. In criminal matters, it has jurisdiction in all cases save murder, attempt to murder, conspiracy to murder, high treason, treason felony, treasonable conspiracy or piracy.

The District Court consists of thirty-three Justices of the District Court and three Assistant Justices. Three of such Justices and an Assistant Justice are assigned to the Dublin Metropolitan area; the remainder of the country is divided into thirty districts, to each of which a Justice of the District Court is assigned. The District Court is a Court of summary jurisdiction with a small civil jurisdiction—in contract cases up to 25*l.*, and in cases of tort, with certain exceptions, up to 10*l.*

All Judges and Justices of the District Court are appointed by the President.

## Finance.

## RECEIPTS.

|                      | 1943-44<br>Actual | 1944-45<br>Estimated |

| Superannuation                                          | 1,112,000         | 1,798,000            |
| All other                                               | 11,266,000        | 14,672,000           |
| Total                                                   | £ 45,009,000      | 50,224,000           |

Expenditure on items treated as proper to be defrayed from borrowings in 1943-44 was 700,000*l.* and the estimate for such items in 1944-45 is 1,069,000*l.*

On March 31, 1944, the liabilities of Eire were as follows: Exchequer Bills, nil; Ways and Means Advances, 1,325,000*l.*; 5 per cent. Second National Loan, 1950-60, 5,440,000*l.*; 4½ per cent. Third National Loan, 1950-70, 5,217,000*l.*; 3½ per cent. Fourth National Loan, 1950-1970, 5,441,000*l.*; 4 per cent. Conversion Loan, 1950-70, 6,458,000*l.*; 3½ per cent. Financial Agreement Loan, 1953-58, 9,479,000*l.*; 4 per cent. Exchequer Bonds, 1950-60, 6,744,000*l.*; 3½ per cent. National Security Loan, 1956-61, 7,773,000*l.*; Savings Certificates, 9,240,000*l.*; other liabilities, 17,392,000*l.*; total, 74,509,000*l.*

The assets on the same date were: Electricity Scheme, 13,289,000*l.*; Local Loans Fund, 10,749,000*l.*; Purchase of Creameries, 777,000*l.*; National Loan Sinking Funds, 1,003,000*l.*; Shares in Companies established under State auspices (Sugar, Industrial Credit, Agricultural Credit, Industrial Alcohol, Air Transport, Shipping, Insurance), 2,208,000*l.*; Exchequer Balance, 1,960,000*l.*; other assets, 3,021,000*l.*; total, 33,007,000*l.*

## Defence.

The supreme command of the Defence Forces is vested in the President (Article 13(4) of the Constitution).

The Air Corps is controlled by the Department of Defence. There is a headquarters, a depot, a training school, and service units.

The estimated total expenditure for national defence for the year ended March 31, 1945, is 8,825,284<sup>1</sup>, and for 1943-44 was 8,694,524<sup>1</sup>. The Minister for Defence, in presenting the 1944-45 Estimates, asked the Dail to approve of establishments for regular, reserve and local defence forces, which would not, during the year, exceed an aggregate of 250,000-all ranks.

### Production.

**Agriculture.**—General distribution of surface (in acres) in 1943: crops and pasture, 11,559,031; woods and plantations, 282,688; other land, including grazed mountain, 5,182,766; total, 17,024,485.

The following table shows the area under the principal crops, with the estimated yield:—

| Crops           | Extent in Statute Acres |           | Total Produce |           |
|-----------------|-------------------------|-----------|---------------|-----------|
|                 | 1942                    | 1943      | 1942          | 1943      |
| Wheat           | 574,789                 | 509,345   | 511,518       | 435,406   |
| Oats            | 877,766                 | 936,258   | 768,045       | 795,815   |
| Barley and Bere | 186,242                 | 208,947   | 172,274       | 188,052   |
| Rye             | 4,224                   | 5,892     | 3,265         | 4,084     |
| Potatoes        | 425,501                 | 407,576   | 3,120,307     | 2,097,578 |
| Turnips         | 146,427                 | 142,785   | 2,100,156     | 2,235,994 |
| Mangels         | 88,601                  | 83,579    | 1,388,740     | 1,418,566 |
| Sugar Beet      | 54,888                  | 83,056    | 899,146       | 732,471   |
| Cabbages        | 16,505                  | 16,794    | 183,135       | 190,656   |
| Flax            | 18,552                  | 27,558    | 2,493         | 4,806     |
| Hay             | 1,959,575               | 1,957,579 | 4,072,127     | 4,247,717 |

The number of live-stock at June 1, 1943, was: cattle, 4,136,428; sheep, 2,560,402; pigs, 484,371; horses, 453,852; poultry, 17,096,606.

Agricultural output for the year 1942-43 was valued at 86,203,000<sup>1</sup> (76,709,000<sup>1</sup> in 1941-42).

**Fisheries.**—The numbers of vessels, men and boys engaged in fishing in the year 1943 were: 8 steam, 564 motor, 778 sail and 2,042 row boats; total, 3,387 vessels; men and boys, 9,646.

The quantities and values of fish landed during 1943 were: demersal fish, 115,624 cwts., value 341,184<sup>1</sup>; pelagic fish, 162,287 cwts., value 169,786<sup>1</sup>; shell fish, value 99,687<sup>1</sup>. Total value, 1943, 550,626<sup>1</sup>; 1944, 559,170<sup>1</sup>.

**Industrial Production.**—The census of industrial production for 1943 gives the following details of the gross value of output for the principal industries (figures in brackets are the gross values minus cost of materials, including fuel, light, and power):—grain milling, 8,011,348<sup>1</sup> (1,361,995<sup>1</sup>); bread, flour confectionery, biscuits, etc., 6,490,094<sup>1</sup> (2,220,422<sup>1</sup>); butter, cheese, margarine, condensed milk, 8,571,151<sup>1</sup> (904,758<sup>1</sup>); bacon curing, 5,524,691<sup>1</sup> (535,600<sup>1</sup>); brewing, 10,875,197<sup>1</sup> (8,858,184<sup>1</sup>); malting, 795,570<sup>1</sup> (247,882<sup>1</sup>); sugar, sugar confectionery, jam-making, 5,999,554<sup>1</sup> (1,990,264<sup>1</sup>); tobacco, 10,320,827<sup>1</sup> (1,514,995<sup>1</sup>); women's and girls' ready-made clothing (wholesale factories), 1,931,816<sup>1</sup> (811,797<sup>1</sup>); woollen and worsted, 2,340,268<sup>1</sup> (916,086<sup>1</sup>); wood furniture and upholstery, 807,638<sup>1</sup> (414,283<sup>1</sup>); soap and candles, 885,621<sup>1</sup> (256,594<sup>1</sup>); timber, 1,564,806<sup>1</sup> (811,843<sup>1</sup>); distilling, 480,201<sup>1</sup>.

<sup>1</sup> 1942 figures.

(262,792<sup>1</sup>); bricks, glass, cement and monumental masonry, 1,293,739<sup>1</sup> (644,409<sup>1</sup>); assembly, construction and repair of vehicles, 788,804<sup>1</sup> (420,188<sup>1</sup>); metals, 1,407,583<sup>1</sup> (768,046<sup>1</sup>); engineering and implements, 1,027,468<sup>1</sup> (608,883<sup>1</sup>); linen, cotton, jute and canvas, 1,457,458<sup>1</sup> (512,669<sup>1</sup>); boot and shoe (wholesale factories), 2,740,872<sup>1</sup> (1,295,854<sup>1</sup>); hosiery, 1,865,868<sup>1</sup> (912,695<sup>1</sup>); paper-making and manufactured stationery, 1,329,247<sup>1</sup> (592,335<sup>1</sup>); printing, publishing, bookbinding, 2,523,158<sup>1</sup> (1,874,806<sup>1</sup>); fellmongery and leather, 1,815,269<sup>1</sup> (510,467<sup>1</sup>); oils, paints and polishes, 1,067,249<sup>1</sup> (357,044<sup>1</sup>).

### Commerce.

Value of imports and exports of merchandise (excluding bullion and specie and goods transhipped under bond) of Eire for 5 years:—

|            | 1939         | 1940         | 1941         | 1942         | 1943         |
|------------|--------------|--------------|--------------|--------------|--------------|
| Imports    | £ 43,415,189 | £ 46,790,307 | £ 29,530,215 | £ 34,630,064 | £ 26,082,107 |
| Exports    | £ 26,892,414 | £ 22,968,606 | £ 31,829,006 | £ 32,665,807 | £ 27,479,776 |
| Re-exports |              |              |              |              |              |

The following table shows the distribution of trade, by principal countries of origin in the case of imports and consignment in the case of exports for 2 years (details of trade statistics according to specific descriptions of goods, or according to country of origin or consignment, have not been published for any year since 1938):—

| Country.                  | Imports    |            | Exports    |            |
|---------------------------|------------|------------|------------|------------|
|                           | 1937       | 1938       | 1937       | 1938       |
|                           | £          | £          | £          | £          |
| Great Britain             | 21,470,567 | 20,315,036 | 18,076,372 | 19,682,919 |
| Northern Ireland          | 548,581    | 575,606    | 2,089,928  | 2,475,453  |
| Australia                 | 1,701,749  | 1,096,375  | 8,685      | 7,529      |
| Canada                    | 1,904,455  | 1,652,698  | 50,138     | 81,964     |
| India (including Burma)   | 1,784,383  | 1,654,051  | 46,177     | 33,680     |
| Union of South Africa     | 81,222     | 80,557     | 44,209     | 28,795     |
| Argentina                 | 2,359,646  | 1,411,677  | 65,908     | 26,642     |
| Belgium                   | 1,242,581  | 1,098,416  | 208,477    | 86,693     |
| Dutch East Indies         | 425,194    | 380,547    | 1,455      | 2,589      |

| Switzerland               | 105,815    | 101,840    | 51,252     | 57,397     |
| United States of America  | 2,906,778  | 4,706,213  | 237,226    | 118,530    |
| U.S.S.R. (Russia)         | 669,516    | 307,689    | —          | 18,278     |

### Shipping.

Net tonnage of vessels entered and cleared in the foreign trade at Irish ports during the calendar year 1939 (latest available figures):—Entered, 11,903, of 8,272,568 tons; and cleared, 11,881, of 8,245,045 tons.

<sup>1</sup> 1942 figures.

### Banking and Currency.

### Banking and Currency.

The unit of currency in Ireland is the Irish *pound*, which has the same value as the pound sterling. The circulating medium consists of legal tender notes, consolidated bank notes, which are liabilities of the issuing bank, and token coinage. The Central Bank has the sole right of issuing legal tender notes and token coinage is issued by the Minister for Finance through the Bank. The Central Bank, which was established as from February 1, 1943, in accordance with the Central Bank Act, 1942, replaced the Currency Commission which was set up under the Currency Act, 1927, and had been responsible *inter alia* for the regulation of the note issue. In addition to the powers and functions of the Currency Commission the Central Bank has the power of receiving non-interest-bearing deposits from banks and public authorities, of rediscounting Exchequer bills and bills of exchange, of making advances to banks against such bills or against Government securities, of fixing and publishing rates of interest for rediscounting bills, of buying and selling certain Government securities and of collecting and publishing information relating to monetary and credit problems. The capital of the bank is 40,000*l.* of which 24,000*l.* has been paid up and is held by the Minister for Finance. On the dissolution of the Currency Commission its paid-up capital was returned to the shareholding banks.

The Board of Directors of the Central Bank consists of a Governor, appointed by the President of Ireland on the advice of the Government, and eight directors, all appointed by the Minister for Finance, five directly and three from a panel prepared by the Associated Banks the term applied to the eight shareholding banks associated with the former Currency Commission).

of the Central Bank of Ireland for 1943-44 stated that the

The report of the legal-tender note issue fluctuated during the year between volume of the legal-tender note issue fluctuated during the year between 23,063,960L on June 12, and 28,910,794L on December 21, 1943. The latter was the highest figure ever attained by this issue.

The amount of Bank of England notes was 4,602,526. Out of the Dublin as payment for legal-tender notes fund, amounting to 23,234,215, on total assets of the legal-tender note fund, amounting to 23,234,215, on March 31, 1944, the holdings of securities of maturity exceeding 12 months amounted to 9,930,000.

Consolidated bank notes are a first charge on all the assets of the responsible Banks, and are also secured by a reserve held by the Central Bank. They are convertible into legal tender notes which in turn are convertible into equivalent British legal tender at the Bank of England. Limits are set by the Central Bank Act to the amounts of consolidated bank notes which may be outstanding at certain future dates and provision is made for their total extinction by 1957. Total notes in circulation in June, 1944, amounted to 33,064,000*l.*, as against 29,032,000*l.* in June, 1943. The following figures (representing an average of figures for a selected date in each year) show the composition of the consolidated bank notes:

Banking returns (representing an average of figures for a selected date in each of the three months, April-June, 1944):—Liabilities: capital, 8,262,000*l.*; reserves, 9,496,000*l.*; notes in circulation, 17,562,000*l.*; current, deposit, and other accounts, 293,821,000*l.*; acceptances, 390,000*l.*; other liabilities, 9,447,000*l.*; total, 293,821,000*l.* Assets: cash, 42,264,000*l.*; money at call, 19,357,000*l.*; bills, 3,769,000*l.*; loans and advances, 62,942,000*l.*; investments, 155,044,000*l.*; premises, 2,632,000*l.*; other assets, 7,422,000*l.*; total, 293,821,000*l.*

The Bank of Ireland, founded in 1783, has a capital of 2,769,231 l.; rest, 3,180,000 l.; deposits (excluding Government accounts), 47,728,000 l.

rest, 3,180,000/; deposits (excluding Government accounts), 47,728,000/.

Air services to North American and Portugal were operated continuously throughout the year from an Irish airport.

<sup>1</sup> Excluding capital figures relating to Fishguard and Rosslare Railways & Harbours.

Other banks are Hibernian Bank, Munster and Leinster Bank, Provincial Bank of Ireland, the Royal Bank, the Ulster Bank, the Northern Bank, the National City Bank (affiliated to the Bank of Ireland), and the National Bank. The latter is a London clearing bank.

### Diplomatic Representation.

#### 1. OF EIRE (IRELAND) IN OTHER COUNTRIES.

*High Commissioner in London.*—John W. Dulanty (appointed December 15, 1930).

*High Commissioner in Canada.*—John J. Hearns (appointed August 18, 1939).

*Envoy Extraordinary and Minister Plenipotentiary to France and Belgium.*—Sean Murphy (appointed December 19, 1938).

*Chargé d'Affaires to Germany.*—Cornelius C. Cremin (appointed March 1, 1944).

*Envoy Extraordinary and Minister Plenipotentiary to the Holy See.*—Thomas J. Kiernan (appointed October 28, 1941).

*Envoy Extraordinary and Minister Plenipotentiary to Italy.*—Michael McWhite (appointed April 30, 1938).

*Chargé d'Affaires to Portugal.*—Colman O'Donovan (appointed November 11, 1941).

*Envoy Extraordinary and Minister Plenipotentiary to Spain.*—Leopold H. Kerney (appointed April 10, 1939).

*Chargé d'Affaires to Switzerland.*—Francis T. Cremins (appointed October 10, 1940).

*Envoy Extraordinary and Minister Plenipotentiary to the United States of America.*—Robert Brennan (appointed October 11, 1938).

#### 2. OF OTHER COUNTRIES IN EIRE (IRELAND).

*British Representative.*—Sir John Maffey, G.C.M.G., K.C.B. (appointed October 3, 1939).

*Representative of the Holy See.*—The Most Rev. Paschal Robinson, Titular Archbishop of Tyana, Nuncio Apostolic (appointed January 15, 1930).

*High Commissioner for Canada.*—John D. Kearney (appointed August 26, 1941).

*Belgian Minister.*—Maurice Goor (appointed May 9, 1938).

*French Minister.*—Jean Rivière (appointed January 1, 1945).

*German Minister.*—Eduard Hempel (appointed July 28, 1937).

*Italian Minister.*—Vincenzo Berardis (appointed November 28, 1938).

*Spanish Minister.*—Juan Garcia Ontiveros (appointed July 27, 1939).

*Swiss Chargé d'Affaires.*—Charles J. Benziger (appointed November 6, 1939).

*United States Minister.*—David Gray (appointed April 15, 1940).

<sup>1</sup> Exclusive of larger rivers, lakes and tideways.

<sup>2</sup> Including the county Borough.

<sup>3</sup> Provisional figures.

The following are the births, deaths and marriages registered for 3 years:—

| Years | Births | Deaths | Marriages |
|-------|--------|--------|-----------|
| 1941  | 56,780 | 43,797 |           |
| 1942  | 64,117 | 41,640 | 15,021    |
| 1943  | 64,061 | 43,426 | 17,470    |

Exit permits granted in 1942 to persons going to employment were: men, 37,263; women, 14,448; total, 51,711.

**Religion.**—According to the census of population in Eire, taken in April, 1936, the principal religious professions were as follows:—

|                          | Leinster  | Munster | Ulster (part of) | Connacht | Total     |
|--------------------------|-----------|---------|------------------|----------|-----------|
| Catholics                | 1,118,831 | 918,216 | 234,141          | 618,232  | 2,779,420 |
| Protestant Episcopalians | 86,278    | 23,965  | 25,866           | 10,456   | 146,565   |
| Presbyterians            | 7,972     | 1,146   | 18,209           | 740      | 28,067    |
| Methodists               | 5,295     | 3,061   | 1,688            | 625      | 9,549     |
| Other Professions        | 8,540     | 1,894   | 915              | 405      | 11,754    |
| Total                    | 1,220,411 | 942,272 | 280,209          | 629,468  | 2,968,420 |

**Education.**—*Elementary Education.*—Elementary education is free and is given in the national schools.

Since the establishment of the *Saorstát* in 1942, the Irish language became an essential part of the curriculum for all national schools. Approximately 12,600 teachers have already qualified to teach the language. The use of Irish as a medium of instruction in the schools continues to increase.

The latest statistics available show that the number of schools in operation is 5,064. The average number of pupils enrolled in the schools is 459,984; the percentage average daily attendance is 82.8; the number of teachers of all classes is approximately 13,084.

There are four State-aided training colleges and two training centres (to which only a limited grant is payable).

The estimated State expenditure on elementary education for the year 1944-45 is 4,063,039L., excluding the cost of administration.

*Secondary Education.*—The secondary schools are under private control and are conducted in many cases by religious orders; all schools receiving grants from the State are open to inspection by inspectors of the Education Department. The number of recognised secondary schools during the school year 1942-43 was 371, and the number of pupils between the ages of 12 and 20 years in attendance was 39,787. Estimated total expenditure for 1944-45, 568,030L., excluding the cost of administration.

*Technical Education.*—Technical schools are established in all the cities and in the principal towns. These schools are controlled by the local authorities, and are maintained partly by the rates and partly by State grants. Estimated total expenditure for technical education for 1944-45 is 362,997L. (State grants), excluding the cost of administration, and 222,951L. (rates).

*Agricultural Education.*—Winter agricultural classes for the sons of farmers are provided by statutory County Committees of Agriculture, which are financed partly out of State grants and partly out of the rates. Residential courses of agricultural instruction for farmers' sons and courses of instruction in rural domestic economy for farmers' daughters are provided at institutions of which the principal are managed and financed by the Department of Agriculture or are managed by religious orders, and receive grants from State funds. Higher agricultural education is provided for in the universities.

*University Education* is given at the University of Dublin (Trinity College), founded in 1591, and at the National University of Ireland, founded in Dublin in 1909. The latter has three constituent colleges, namely, the University Colleges of Cork, Galway, and Dublin. The numbers of professors, etc., and students, in 1944-45, were as follows:—

| Universities               | Professors, Lecturers and Assistants | Students |
|----------------------------|--------------------------------------|----------|
| Trinity College, Dublin    | 144                                  | 1,400    |
| University College, Cork   | 96                                   | 1,076    |
| University College, Galway | 73                                   | 670      |
| University College, Dublin | 162                                  | 3,004    |

candidate fails to qualify then, by the twentieth amendment, the Vice-President acts as President until a President qualifies. Congress now has large powers covering all contingencies such as those arising from the failure to qualify of either President or Vice-President. The presidential term, by the twentieth amendment to the Constitution, begins with the inauguration of the President on January 20 of the inaugural year. This amendment also installs the newly elected Congress in office on January 3, instead of—as formerly—in the following December. The President's salary is 75,000 dollars per year, plus 25,000 dollars for travelling expenses and official entertainment. The Vice-President's salary is 15,000 dollars, plus the usual Congressional mileage allowance for travel.

The President is commander-in-chief of the army and navy, and of the militia when in the service of the Union. The Vice-President is *ex-officio* President of the Senate and in the case of the death or resignation of the President he becomes the President for the remainder of the term. In case of the death or resignation of the Vice-President, the President *pro tem* continues as presiding officer of the Senate and the office of Vice President remains vacant.

*President of the United States.*—Franklin Delano Roosevelt, of New York, born in New York on January 30, 1882; educated at Harvard University and Columbia University Law School; lawyer; member of State Senate, 1910-13; Assistant Secretary of the Navy, 1913-20; elected Governor of New York State, 1928; re-elected, 1930. First term of office as President began on March 4, 1933; second, third and fourth consecutive terms began on January 20, 1937, 1941 and 1945 respectively.

The offices of President and Vice-President have been occupied as follows:—

#### PRESIDENTS OF THE UNITED STATES.

| Name                | From State    | Term of Service  | Born | Died |
|---------------------|---------------|------------------|------|------|

The administrative business of the nation is conducted mainly by ten heads of departments, who form the 'Cabinet.' They are chosen by the President, but must be confirmed by the Senate. Each presides over a separate department, under the immediate authority of the President. The Cabinet is composed as follows:—

1. *Secretary of State.*—Edward R. Stettinius, Jr., of New York; company official, serving at the time as Under-Secretary of State; appointed November 27, 1944; born 1900.

# UNITED STATES.

(UNITED STATES OF AMERICA.)

## Constitution and Government.

THE Declaration of Independence of the thirteen States of which the American Union then consisted was adopted by Congress July 4, 1776. On November 30, 1782, Great Britain acknowledged the independence of the United States, and on September 3, 1783, the treaty of peace was concluded.

The form of government of the United States is based on the Constitution of September 17, 1787, to which ten amendments were added December 15, 1791: two in 1795 and 1804; a thirteenth amendment, December 6, 1865, abolishing slavery; a fourteenth in 1868, including the important 'due process' clause; a fifteenth amendment, February 3, 1870, establishing equal voting rights for white and coloured; a sixteenth in 1913, authorizing the income tax; a seventeenth in 1913, providing for popular election of Senators; an eighteenth amendment, January 16 1919, prohibiting alcoholic liquors; a nineteenth amendment, August 19, 1920, establishing woman suffrage; a twentieth amendment, January 23, 1933, advancing the date of the President's and Vice-President's inauguration and abolishing the 'lame-duck' sessions of Congress; and a twenty-first amendment, December 5, 1933, repealing the eighteenth, or liquor prohibition amendment.

The 5th article of the Constitution provides that Congress may, on a two-thirds vote of both Houses, propose amendments to the Constitution, or, on the application of the Legislatures of two-thirds of all the States, call a convention for proposing amendments, which in either case shall be valid as part of the Constitution when ratified by the Legislatures of three-fourths of the several States, or by conventions in three-fourths thereof, whichever mode of ratification may be proposed by Congress.

By the Constitution, the government of the nation is composed of three co-ordinate branches, the Executive, the Legislative, and the Judicial. The executive power is vested in a President, who holds office for four years, and is elected, together with a Vice-President chosen for the same term, by electors from each State, equal to the whole number of senators and representatives to which the State may be entitled in the Congress. In each State the electors, nominated by the various political parties and virtually pledged (in a few States by law, but in most States merely by custom and prudent politics) to the party's candidates for President and Vice-President, are in turn chosen by direct vote of the citizens on a general ticket, on the system known in France as *scrutin de liste*. The President must be a natural-born citizen, resident in the country for fourteen years, and at least thirty-five years old. There is no Constitutional or statutory bar to the re-election of a President for a second, third or greater number of terms, though there has apparently been, in past years, a traditional aversion to re-electing a President for more than a second term.

The presidential election is held every fourth (leap) year on the Tuesday after the first Monday in November; the electors then chosen meet and give their votes at their respective State capitals on the first Monday after the second Wednesday in December next following their election; and the votes of the electors of all the States are opened and counted in the presence of both Houses of Congress on the sixth day of January. The total electoral vote is 531 (1 each for 96 Senators and 435 Representatives) and a majority—266—is necessary to elect. If the successful candidate for President dies before taking office, the Vice-President-elect becomes President; if no candidate has a majority or if the successful

Women gainfully employed in November, 1944, numbered 17,820,000, including 1,690,000 in agriculture.

## II. MOVEMENT OF POPULATION.

Natality and mortality statistics are based upon the birth and death certificates filed with the registrars of vital statistics of the respective States and Territories, in accordance with their laws. The death registration area was established in 1880, but mortality statistics were not collected on an annual basis until 1900. The registration area for births was established in 1915. With the inclusion of Texas in 1933 the birth and death registration areas for the first time covered all the continental United States, Hawaii and the Virgin Islands. Puerto Rico was admitted to the death registration area in 1932. The estimated *de facto* population of continental United States (excluding military personnel outside the country), as of July 1, 1948, was 133,942,410; and the number of births (exclusive of still births) reported for the calendar year 1943 was 2,935,171, or 21.9 per 1,000 of the population; the number of deaths (exclusive of members of the armed forces outside the country), 1,459,998, or 10.9 per 1,000 population.

Total number of occupied dwelling units in 1940 (corresponding roughly to the 29,904,683 private families reported in 1930) was 34,854,532; of this number, 20,596,500 were in urban places and 14,258,032 were in rural territory.

Total number of alien immigrants admitted in year ending June 30, 1944, was 23,551. Total alien arrivals (immigrant and non-immigrant) in 1944 (June 30) was 142,192; total alien departures, 84,409, an excess of admissions over departures of 57,783.

The total number of alien immigrants from 1820 to 1944 (June 30) arriving for permanent residence was 38,423,276. In the following statement, immigrants from Canada and Mexico are included in the total:—

| Year ending June 30 | British Isles <sup>1</sup> | Germany <sup>2</sup> | Sweden, Norway, and Denmark | Austria and Hungary | Italy  | Poland | France | Total Immigrants |
|---------------------|----------------------------|----------------------|-----------------------------|---------------------|--------|--------|--------|------------------|
| 1930                | 54,460                     | 26,569               | 6,919                       | 5,009               | 23,327 | 9,231  | 8,713  | 241,700          |
| 1940                | 6,997                      | 21,530               | 1,256                       | 1,962               | 5,302  | 702    | 2,575  | 70,756           |
| 1941                | 7,986                      | 4,028                | 1,131                       | 330                 | 450    | 451    | 4,801  | 51,776           |
| 1942                | 990                        | 2,150                | 361                         | 186                 | 103    | 843    | 4,430  | 28,781           |
| 1943                | 1,139                      | 248                  | 229                         | 75                  | 49     | 894    | 1,201  | 24,735           |
| 1944                | 1,433                      | 238                  | 246                         | 87                  | 120    | 292    | 387    | 28,561           |

<sup>1</sup> Including Elze.<sup>2</sup> For 1939 and subsequent years, the figures for Austria are included with Germany and excluded from Hungary.

\* Excludes membership of Reformed Church in the United States, since merged into Evangelical and Reformed Church.

\* Figures include all Jews in communities where there is a congregation.

### Education.

Each State of the Union has a system of free public schools established by law, comprising elementary schools, junior high schools and high schools, with courses covering from 11 to 18 years. The 1940 census showed that of all those 25 years of age or over (73,733,866), 2,799,923 (3.8 per cent.) had had less than 1 year at school; 7,304,689 (9.9 per cent.) had had from 1 to 4 years in an elementary school; 8,515,111 (11.6 per cent.) had completed 5 or 6 years at school; 25,897,953 (35.1 per cent.) had had 7 or 8 years, sufficient to have completed the elementary school. Another 11,181,995 (15.2 per cent.) had had from 1 to 3 years in high school; 10,551,680 (14.3 per cent.) had had 4 years in high school; 4,075,184 (5.5 per cent.) had completed from 1 to 3 years in college, and 3,407,331 (4.6 per cent.) had completed 4 years in college. The median number of years completed by those over 25 years whose formal education may be considered terminated, was 8.4 years; for negroes, 5.7 years.

The main objective of the American school system is public mass education. If the cost be conceived as spread evenly over the entire adult population, then the cost of educating 25,448,450 students in publicly controlled schools in 1941-42 was 8.5 cents per day for each person 21 years of age and over (86,017,000) on July 1, 1942 (excluding members of the armed forces abroad), while the cost of educating 3,335,496 students in private schools (for which expenditures are given) was 1.7 cents additional. This is 10.2 cents per day in 1941-42 as compared with 10.4 cents per day in 1939-40 or 37.24 dollars per year as compared with 88.10 dollars in 1939-40 per adult for providing a median education of 11.4 years completed by the persons who became of voting age (21) in 1940. Thus public mass education aims to furnish approximately 12 years or more of education to half of the oncoming generation at a total cost over the 12 years of less than 450 dollars per present citizen for the education of a future citizen.

Since 1805, the United States Government, upon the organization of all new States, has set aside from the public domain for the benefit of the public schools therein from one to four 'sections' (square miles) of land in each township of six miles square. The proceeds of the sale of this land make the principal part of the permanent school funds of such States. The income of permanent school funds and unsold school lands constitutes about 1.0 per cent. of the revenue receipts of the schools of the country. Taxation and appropriations yield about 95.0 per cent. of total revenue receipts, and other sources yield about 4.0 per cent. In 1942 the amount expended on public schools of elementary and secondary grades was 2,322,697,688 dollars. In 1942 the 1,628 universities, colleges, teachers' colleges and professional schools reporting had an income of 818,816,659 dollars from all sources except additions to endowments.

Summary of statistics of schools, teachers and pupils in 1941-42 (compiled by the United States Office of Education):—

| Schools by Level                                        | Number of Schools | Teachers |         |           | Enrollment |            |            |
|---------------------------------------------------------|-------------------|----------|---------|-----------|------------|------------|------------|
|                                                         |                   | Male     | Female  | Total     | Male       | Female     | Total      |
| Elementary schools:                                     |                   |          |         |           |            |            |            |
| Public                                                  | 188,112           | 59,567   | 69,261  | 588,828   | 9,355,906  | 8,858,600  | 18,214,506 |

Of every 1,000 children in the fifth grade of the elementary schools in 1906-07, 139 survived in the school system to graduate from high school in 1914 and 23 graduated from college in 1918. Twenty-four years later, of every 1,000 children in the fifth grade in 1930-31, 417 survived in the system long enough to graduate from high school in 1938 and 72 graduated from college in 1942.

Assuming that the average age of graduating from high school is 18 and from college is 22, and applying the United States life tables for white males and females (published by the Census Bureau in 1941), then there were living in 1944 23,189,000 who have graduated from high school in the past 75 years and 3,684,000 who have gone on and graduated with a bachelor's degree from college.

Since 1886 the secondary schools have graduated more than 1,000,000 pupils a year, reaching a peak in 1942 of 1,222,900. The largest number graduated from college in any one year was 186,600 in 1940. One-fourth of all living college graduates received their bachelor's degree in the past 5 years; one-half in the past 12 years and three-fourths in the past 21 years. One-fourth of all the persons with a secondary school education have graduated in the past 5 years and are under 23 years of age.

Of those who in 1941-42 were 17 years old (2,428,000), 1,242,375, or 51.2 per cent., had graduated from private or secondary schools. In that year of those between the ages of 14 and 17 (numbering 9,663,982), 7,222,438, or 72 per cent., were enrolled in secondary schools. Of those 21 years old that year (2,441,489) 185,246, or 7.6 per cent., had just graduated from college or taken a first professional degree.

Results of the general effort to keep children in school regardless of economic pressures and temptations may be summed up for 1940 as follows—of those who were 14 years old that year, 92.5 per cent. were attending school; of those 15 years old, 87.6 per cent.; of those 16 and 17 years old, 68.7 per cent., and of those 18 and 19 years old, 28.9 per cent.

In 1943 there were in the United States 1,787 daily newspapers (345 morning papers with a circulation of 17,110,611 and 1,442 evening papers with a circulation of 26,284,339) and 474 Sunday newspapers (with a circulation of 35,293,543). The total number of dailies, tri-weeklies, semi-weeklies and other papers was 12,464 at the end of 1942.

### Justice and Crime.

The Federal Government maintains courts for the trial of crimes against the United States and of civil suits brought by the Government or its officers, or which arise under the Constitution, treaties and laws of the United States relating to such subjects as Admiralty, Patents, Taxation, Banking and Bankruptcy. The Federal Courts also have jurisdiction of cases between citizens of different States and between citizens of a State and foreign States, citizens or subjects; the amount in controversy must exceed \$3,000 dollars, besides interest and costs.

The Judges of all the Courts of the United States, from the District Courts to the Supreme Court of the United States, hold office during good behaviour. They may, however, retire with full pay at the age of 70 years, if they have served a period of ten years, but they are subject to call for such judicial duties as they are willing to undertake.

The United States District Courts, of which there are 85 in Continental United States, are the lowest of the Federal Courts; besides Admiralty and bankruptcy cases, they try all criminal cases arising under the Federal laws, including capital offences. The Federal penal and correctional institutions, during the year ending June 30, 1943, averaged 18,894 prisoners, a decrease of 1,383 from the average for the fiscal year 1942.

The Supreme Court consists of the Chief Justice and 8 Associate Justices, appointed by the President, with the advice and consent of the Senate. The salary of the Chief Justice is \$20,500 dollars, and that of each of the Associate Justices, 20,000 dollars.

The United States is divided into 10 circuits, each with a Circuit Court of Appeals, to each of which the Chief Justice or an Associate Justice is assigned. Cases from inferior courts are taken to the Circuit Courts of Appeals by appeal and then to the Supreme Court on writ of certiorari;

various inferior courts may certify questions of law to the Supreme Court. That Court has also original jurisdiction in cases affecting foreign Ministers and those in which a State is party.

The Court of Claims, the United States Customs Court (formerly the Board of General Appraisers) and the Court of Customs and Patent Appeals have jurisdiction over cases indicated by their titles. There is also a United States Court for China, the judge of which holds office for 10 years. These are 'legislative' courts, as contrasted with the 'constitutional' courts described above.

The State Courts have jurisdiction over all civil and criminal cases arising under State laws, but decisions of their Courts of last resort as to the validity of treaties or of laws of the United States, or on other questions arising under the Constitution, are subject to review by the Supreme Court of the United States. The highest court in each State is usually called the Supreme Court or Court of Appeals with a Chief Justice and Associate Justices, usually elected but sometimes appointed by the Governor with the advice and consent of the State Senate or other advisory body; they usually hold office for a term of years, but in some instances for life or during good behaviour. Their salaries range from \$3,000 to \$22,500 dollars. The lowest courts are usually those of Justices of the Peace; many towns and cities have municipal and police courts, with power to commit for trial in criminal matters and to determine misdemeanours for violation of the municipal ordinances; they frequently try civil cases involving usually not more than \$500 dollars.

The District of Columbia, besides minor Courts, has a District Court of the United States for the District of Columbia, with a general jurisdiction which includes that of a United States District Court, and a United States Court of Appeals. The more important territorial possessions have local Courts corresponding to the Courts of the States to adjudicate cases arising under territorial laws, and also United States Courts, to pass on cases involving Federal Law.

In 1942, 146 men and 1 woman were executed, 67 white persons and 80 negroes; 116 were executed for murder, 24 for rape, 1 (a negro) for burglary and 6 (German agents and saboteurs) who were tried for espionage and executed by the military authorities in Washington, D.C.

### Health and Social Welfare.

In 1944 it was officially estimated that of the country's 22,000,000 men of military age, between 8,000,000 and 9,000,000 men were unfit for general military service owing to physical or mental defects; in addition to 4,500,000 who were rejected when they presented themselves, 1,000,000 were subsequently discharged from service for physical unfitness not due to battle, and another 1,500,000 men were rendered fit for service only through medical and dental care given after they were inducted. Civilians, both men and women, gainfully employed in 1944 lost 600,000,000 'man days' through ill-health, sickness and injuries, which was 47 times the amount of time lost through strikes and lock-outs during that year.

Admission to the medical profession is controlled by examining boards in the various States. The profession is strongly opposed to 'State medicine' and the establishment of State-paid 'panel doctors.' Number of physicians, 1940, 180,446. By consolidations, medical schools have been deliberately reduced from 160 in 1904 to 77 in 1941. Number of hospitals

registered with the American Medical Association, January 1, 1944, 4,885, with 1,649,264 beds, 15,374,698 patients during the year, and 113,424 nurses. Chief categories are: general hospitals, 4,885; nervous and mental diseases, 575; tuberculosis, 456; maternity, 113; convalescent, 126. One person in about 8½ became a hospital patient in 1943. Schools of nursing at the close of 1943 numbered 1411, with 110,222 students; in March, 1943, there were about 205,000 registered nurses in active civilian service.

Social legislation fell largely within the province of the various State Governments until the 74th Congress adopted legislation designed to encourage it both directly and through Federal aid. The Social Security Act of August 14, 1935, provided for Federal aid to the States in the matter of old-age assistance, and established 9 other social welfare programmes, including a system of direct Federal old-age annuity benefits for annuitants wage-earners; unemployment compensation; aid for the needy blind; aid for needy dependent children; aid for crippled children; vocational rehabilitation; fostering maternal and child-health services; and fostering State and local public health services. The Social Security Board administers the first 5 of these 10 programmes. All the States, Alaska, Hawaii and the District of Columbia have since 1935 established Old Age Assistance systems. The applicant must have reached 65 years of age. Maximum assistance, where stated, ranges from 150 dollars a year to 35 dollars a month. Most States require that the applicant shall be a citizen, in some cases for 15 years, and shall have resided in the State for periods varying from 6 months to 5 years; a few States waive the question of citizenship. In March, 1944, there were 2,113,249 persons receiving Old Age Assistance, amounting to an average of 27.11 dollars for that month. The Old Age and Survivors' Insurance scheme is operated by the Federal Government; as of January 1, 1944, 38,800,000 wage-earners were either fully or currently insured. All the States, Alaska, Hawaii and the District of Columbia co-operate in the Unemployment Compensation scheme, which in March, 1944, was paying benefits to a weekly average of 112,000 persons. The 48 States, Alaska, Hawaii, and the District of Columbia were furnishing aid in March, 1944, to 664,859 needy dependent children (Alaska and Nevada operating without Federal participation) at the average rate of 42.56 dollars per family that month; 47 States (Missouri, Nevada and Pennsylvania without Federal participation), Hawaii and the District of Columbia were furnishing aid to 74,507 needy blind persons at the average rate of 28.28 dollars per person that month. Federal grants to States for Social Security in the year 1942-43 totalled 517,560,000 dollars.

In March, 1944, total payments under the main categories of public assistance amounted to 78,549,043 dollars, or about a millions dollars more than in March, 1943.

Minimum-wage laws governing private employers of women and children have been enacted (largely since 1934) in 26 States, the District of Columbia, Hawaii, Alaska and Puerto Rico. Connecticut, Hawaii and Puerto Rico alone have legal minimum-wage rates for men.

## Finance.

### FEDERAL.

Since June 10, 1921, a National Annual Budget System and an independent Audit of Government Accounts have been installed.

The following table gives direct budget 'receipts' and 'expenditures', general and special accounts, of the Federal Government, net expenditures of government agencies (Reconstruction Finance Corporation, Commodity Credit Corporation, etc.), whose operations are not included in the Federal Budget, and receipts and expenditures in trust and related accounts. 'Receipts' under general and special accounts includes receipts from customs and internal revenue, repayment of foreign loans, and receipts from miscellaneous sources but excludes postal revenues; 'expenditures' cover disbursements for general governmental activities, including departmental expenditures, national defence or war activities, Indians, veterans' benefits, and miscellaneous activities, interest on public debt, statutory public debt retirements from the sinking fund and certain special receipts and emergency expenditures: they exclude postal expenditures which are payable from postal revenues, except postal deficiencies.

| Year ending June 30 | General and special accounts (thousands of dollars) |              | Net expenditure of government agencies (thousands of dollars) | Trust accounts, increment on gold, etc. (thousands of dollars) |              |
|---------------------|-----------------------------------------------------|--------------|---------------------------------------------------------------|----------------------------------------------------------------|--------------|
|                     | Receipts, net <sup>1</sup>                          | Expenditures |                                                               | Receipts                                                       | Expenditures |
| 1939                | 5,104,824                                           | 8,765,338    | 768,325 <sup>2</sup>                                          | 1,917,369                                                      | 1,033,076    |
| 1940                | 5,387,125                                           | 9,137,374    | 33,142 <sup>3</sup>                                           | 2,119,412                                                      | 1,983,839    |
| 1941                | 7,607,212                                           | 12,774,890   | 217,526                                                       | 2,687,845                                                      | 2,785,900    |
| 1942                | 12,799,062                                          | 32,491,307   | 8,634,734                                                     | 3,190,884                                                      | 6,496,369    |
| 1943                | 22,381,648                                          | 78,182,349   | 2,194,465                                                     | 3,926,253                                                      | 5,787,247    |
| 1944                | 44,146,926                                          | 83,743,514   | 4,403,068                                                     | 5,052,721                                                      | 9,103,447    |

<sup>1</sup> Excludes net transfers of social security employment taxes to Federal old-age and survivors' insurance trust funds as follows (in thousands of dollars): fiscal year 1939, 587,000; 1939, 603,000; 1940, 537,713; 1941, 661,301; 1942, 868,833; 1943, 1,103,003; 1944, 1,269,515. Such transfers are also not reflected in expenditures.

<sup>2</sup> Net receipts.

Actual sources of revenue and branches of expenditure for year ended June 30, 1944 (in thousands of dollars) were:—

| Revenue, 1943-44.                            |                        |                                                   |                    |
|----------------------------------------------|------------------------|---------------------------------------------------|--------------------|
| General and special accounts:                |                        | Total net receipts.                               |                    |
| Customs                                      | 431,259                |                                                   | 44,148,927         |
| Internal revenue:                            |                        | Trust and related accounts:                       |                    |
| Income tax                                   | 34,654,852             | Increment from reduction in weight of gold dollar | 173                |
| Misc. internal revenue                       | 5,291,009              | Unemployment trust fund                           | 1,566,909          |
| Employment taxes                             | 1,739,097              | Old-age reserve account                           | 561,092            |
| Proceeds of Government-owned securities      | 87,767                 | Railroad retirement acct.                         | 372,557            |
| Panama Canal tolls, etc.                     | 8,849                  | Other trust accounts                              | 1,853,231          |
| Ordinary seigniorage                         | 42,705                 | Agric. Marketing Admin.                           | 2,840 <sup>3</sup> |
| Other miscellaneous                          | 3,153,311 <sup>4</sup> |                                                   |                    |
| Total receipts, general and special accounts | 95,408,442             | Total trust, etc., accounts                       | 5,052,721          |

<sup>1</sup> Gross receipts, including 1,269,515,000 dollars credited to the Federal old-age and survivors' insurance trust fund which is excluded from the next item, 'Total net receipts.'

<sup>2</sup> Mainly consists of deposits resulting from the re-negotiation of war contracts.

<sup>3</sup> Contra item (deduct).

## Expenditure, 1943-44.

Budget estimates of the public debt for June 30, 1946, were 292,000,000,000 dollars, requiring a further increase in the maximum debt total which,

1946, is 360,000,000,000 dollars. Budget estimates of the debt for the fiscal years 1944 and 1945 were 210,549,000,000 dollars and 134,830,000,000 dollars respectively.

The gross debt on June 30, 1944, was 201,003,337,221 dollars, made up as follows:—Debt bearing no interest, 1,369,180,760 dollars; matured debt on which interest has ceased, 200,851,160 dollars; and interest-bearing debt, 199,643,855,391 dollars. As a partial offset to this debt are Federal Government assets (not necessarily earning assets), which on June 30, 1944, included 21,858,403,937 dollars proprietary interest in assets of governmental corporations and credit agencies, 20,168,551,622 dollars net balance in general corporations and approximately 2,000,000,000 dollars in stabilization fund. There was also outstanding, on June 30, 1944, 1,623,049,301 dollars of obligations of governmental corporations and credit agencies guaranteed by the U.S. Government as to principal and interest.

National debt (in thousands of dollars) and per capita debt on June 30 of the years shown:—

<sup>1</sup> On August 31, 1919, gross debt reached its World War (1914-18) peak of 26,596,702,000 dollars, which was the highest ever reached up to 1934; on December 31, 1939, it had declined to 16,026,000,000 dollars, the lowest it has been since the 1914-18 World War.

## STATE FINANCE.

Direct taxation furnishes 80 per cent. of the revenues of the separate States. Unemployment compensation (24.5 per cent. of tax revenue in 1944), motor fuel (12.8 per cent.), other sale taxes (27.3 per cent.), now constitute the greatest sources of revenue of all State Governments. Tax collections totalled 5,396,458,000 dollars. Counties, cities, towns and other local subdivisions rely largely on taxes on property, real and personal, collected and expended by the local authorities. Based on 1944 reports by the Census Bureau, 38 States imposed taxes on corporation income; 83 States, on personal incomes; 25 States (and a very few individual cities), general taxes on sales; 20 States, taxes on chain stores; 30 States, taxes on tobacco; all on sales; 20 States, taxes on alcoholic beverages, and all but one (Nevada) imposed estate and States taxed alcoholic beverages, and all but one (Nevada) imposed estate and inheritance taxes. Aggregate general expenditures of the 48 States were, in 1943, 5,892,143,000 dollars. Health and welfare absorbed 22.0 per cent.; schools, 26.8 per cent.; highways, 23.2 per cent. General government revenue of the 48 States, 1943, was 6,280,012,000 dollars. Gross debt for the 48 States at the end of their 1944 fiscal year amounted to 2,796,315,000 dollars. The gross debt (1943) of the 397 largest cities is estimated at 7,790,898,000 dollars.

## National Defence.

## I. Army.

The Army of the United States, under the National Defence Act of June 3, 1916, as amended to January 1, 1942, consists of the Regular Army, the National Guard of the United States while in the service of the United States, the Officers' Reserve Corps, the Organized Reserves, and the

Enlisted Reserve Corps, and includes persons inducted into the land forces of the United States under the Selective Training and Service Act of 1940, as amended. War Department Circular No. 59, March 2, 1942, reorganised the Army of the United States under three major components, namely, the Army Air Forces, the Army Ground Forces and the Services of Supply (name changed to Army Service Forces March 12, 1943).

Voluntary enlistments in the Regular Army are suspended for the duration of the war, and enlistments in the Army are for the duration of the war and six months thereafter. Enlisted men are classified in seven grades, ranging in rank from private to master sergeant, and in pay from 50 dollars a month to 188 dollars. Every soldier receives an increase of 5 per cent. of the base pay of his grade for each 3 years of service up to 30 years. Additional pay is also granted to soldiers who are assigned to duties requiring regular and frequent participation in flights. For overseas service, officers receive 10 per cent. additional to base pay and enlisted men an addition of 20 per cent.; technicians, 3rd grade, 4th grade or 5th grade, receive the same pay as staff sergeants, sergeants and corporals respectively, the maximum addition under this head being 80 dollars per month. Parachutists receive 50 dollars a month additional (officers, 100 dollars a month additional). Additional pay is also received by enlisted men of the Army Air Corps who are rated as and perform duties of air mechanics or who are assigned to duties which require participation in flights. Beginning January 1, 1944, soldiers entitled to wear the Expert Infantryman badge get 5 dollars a month additional pay; those entitled to the Combat Infantryman badge get 10 dollars a month additional; both grants are for the duration of the war and six months thereafter if still in service.

The average strength of the Army for pay purposes for the fiscal year ended June 30, 1941, was 59,956 commissioned officers, 929 warrant officers and 791,240 enlisted men; the actual strength June 30, 1941, was 506,815 all ranks. On June 30, 1944, more than 90 divisions had been formed and trained; there were then 3,657,000 men deployed overseas throughout the world. By the end of 1944 more than 5,000,000 men were overseas. By January 1, 1944, the intention was to raise an army of 8,200,000 men, composed of 7,500,000 enlisted men and 700,000 officers. This number will include an air force of about two and a half million, and the Women's Army Corps of upwards of 150,000. The allotment of these forces was (in round numbers) as follows:—(1) Air Forces and supporting arms and services, including Anti-Aircraft Artillery for the defence of operating aerodromes, 2,800,000; (2) Defence of the continental United States, Panama, the Caribbean bases, Alaska and the Aleutians, 530,000; (3) Defence of lines of communication to include Australia and the numerous islands of the Pacific, maintenance of Pacific bases and the defence of Hawaii, 350,000; (4) Zone of the Interior activities—ports, prisoner-of-war enclosures, depôts, etc., in the continental United States, 400,000; (5) Men in schools, replacement training centres, replacement depôts, colleges (Army Specialized Training Programme) and in hospitals recovering from sickness or wounds, 650,000; (6) Overhead in the United States, 400,000 (these men furnish the housekeeping troops for all training stations; they provide medical care, operate utilities—power, light, heat, water—perform local guard and do all of the other necessary chores so that Field Force units can devote their entire attention and time to intensive training); (7) Ground striking force organised into combat divisions and supporting units, a material part of which is in action overseas, 3,118,000.

In round numbers, about 40 per cent. of the Army personnel in 1944 was in the Army Service Forces, more than 20 per cent. in the Air Forces,

and more than 35 per cent. in the Ground Forces. More than 10 per cent. of the Service Forces personnel was attached to the Air and Ground Forces; about 13 per cent. was overseas, operating as Services of Supply, under direct command of the theatre commanders.

For administration, training, and tactical control, continental United States is divided into 10 service commands on a basis of military population, a new service command, the Northwest Service Command, being established to control military activities in Canada and Alaska.

Women volunteers were first organised in a Women's Army Auxiliary Corps, but on September 1, 1943, they became the Women's Army Corps, a regular component of the Army.

The National Guard, or organised militia, Federally recognised, is maintained by the several States and Territories (including the District of Columbia and the Territories of Hawaii, Alaska and Puerto Rico) with the aid of grants from the Federal Government. (See THE STATESMAN'S YEAR-BOOK, 1944, pp. 508 and 509, for description of the National Guard and of the various Reserve Corps and Training Corps.)

The President is Commander-in-Chief of both the Army and the Navy. The Secretary of War controls the military establishment and is aided by the Under Secretary of War (procurement of munitions), the Assistant Secretary of War (generally administrative and specially delegated duties), the Assistant Secretary of War for Air (matters relating to military aviation), and by the Chief of Staff, who is the immediate adviser to the Secretary of War on all matters relating to the military establishment. The Chief of Staff is also charged with the planning, development, and execution of the Army programme, and has the military responsibilities which formerly devolved upon the General of the Armies.

The manually operated Springfield rifle, calibre .30, is rapidly being replaced by a semi-automatic rifle, the U.S. calibre .30 M1. Machine guns of both .30 and .50 calibres are of the Browning type. The approved calibres of mobile artillery are as follows:—

|                |                                                   |
|----------------|---------------------------------------------------|
|                | 75 mm. pack howitzer,                             |
| for the pack   | 105 mm. howitzer, replacing the 75 mm. gun,       |
| for the light  | 155 mm. howitzer, 155 mm. gun and 4.5 inch gun,   |
| for the medium | 210 mm. howitzer, 8 inch gun and 8 inch howitzer. |
| for the heavy  |                                                   |

Anti-aircraft guns are of 40 m.m., 3-inch, 90 mm. and 120 mm. calibres. For account of the gradual re-organisation of the Army in 1939, 1940 and 1941, see THE STATESMAN'S YEAR-BOOK, 1944, p. 510.

An important reorganisation of the various types of division, in the light of direct and indirect war experience, was announced in the autumn of 1943. Its purpose was to make them simpler to handle in the field, easier to ship, and more adaptable. The new infantry division has 8 per cent. less personnel and 14 per cent. less vehicles. Motorised divisions appear as a separate type, and all infantry divisions can be motor-moved. A still greater change has been made in the pattern of the armoured division. Instead of being formed of one infantry and two tank regiments, it will now comprise three tank battalions and three semi-armoured infantry battalions. These can be flexibly grouped according to circumstances, the fixed intermediate organisation in regiments having been eliminated. The actual strength of the division is reduced from some 13,000 men to 10,000. Specialised defensive units are removed from the divisions and grouped in a pool at the disposal of higher headquarters. The administrative side has also been simplified, by concentrating much of it at army headquarters, and thus leaving corps and divisions more free for their tactical functions.

Extensive procurement of men for the infantry, and wide diversification of training to fit varying battle conditions, characterized the continued building of the Army during 1943 and early 1944. In addition to regular ground infantry, preparation of divisions and smaller units of airborne infantry troops was stressed, including parachutists and glider-carried forces. Successful employment of airborne troops in Burma and France underscored the importance of these highly skilled specialists.

In the National Budget for the fiscal year 1945, 49,109,002,795 dollars were voted for the military establishment, including 12,810,200,000 dollars for the Army Air Forces.

## II. NAVY.

The gross naval expenditures have recently been as follows: 1939-40, 891,625,000 dollars; 1940-41, 3,626,094,838 dollars; 1941-42, 5,852,397,696 dollars. The appropriation for 1942-43 was 26,500,000,000 dollars, for 1943-44, 27,468,687,198 dollars, and for 1944-45, 32,647,184,836 dollars.

In the 50 months between July 1, 1940, and August 31, 1944, the United States Navy completed 80,000 new ships of all types, with a total displacement of over 9,000,000 tons. These comprised 1,052 combatant vessels of all types, 908 mine craft, 1,670 patrol craft, 1,018 auxiliaries and 52,950 yard, district and landing craft. No naval construction programme of comparable size and speed has ever before been accomplished. The total number of ships in service in December, 1944, was 61,045.

The total personnel on duty in December, 1944, was nearly 3,800,000 officers and men. The Marine Corps, which is largely employed as an expeditionary force, consisted of over 400,000 officers and men. In addition there were nearly 200,000 officers and men in the Coast Guard. The aggregate of the three services was expected to reach 4,000,000.

The Air Service is an integral part of the Fleet. During 1944, the Navy completed 80,070 aircraft of all types. On July 31, 1944, there were 37,000 naval aircraft in service.

The affairs of the Navy Department are directed by the Secretary of the Navy, who has as his principal advisers the Under Secretary of the Navy, the Assistant Secretary of the Navy, the Assistant Secretary of the Navy for Air, the Commander-in-Chief, United States Fleet, the Chief of Naval Operations, the Chiefs of the seven bureaus, the Judge-Advocate-General of the Navy, the Chairman of the General Board, the Director of Shore Establishments and Civilian Personnel, the Budget Officer, the Commandant, United States Marine Corps, and the Commandant, United States Coast Guard.

The principal divisions of the Department are as follows: Executive Offices of the Secretary, Office of Chief of Naval Operations, Bureau of Yards and Docks, Bureau of Naval Personnel, Bureau of Ordnance, Bureau of Ships, Bureau of Supplies and Accounts, Bureau of Medicine and Surgery, Bureau of Aeronautics, Headquarters United States Marine Corps and United States Coast Guard.

The Government navy yards are at Boston, Mass.; Cavite, P.I.; Charleston, S.C.; Mare Island, Calif.; New York, N.Y.; Norfolk (Portsmouth), Va.; Pearl Harbor, T.H.; Philadelphia, Pa.; Portsmouth, N.H.; Puget Sound, Wash.; Washington, D.C. There are also naval stations at Guam; Guantanamo, Cuba; and Trinidad, Barroa. Naval training stations are at Newport, R.I.; San Diego, Calif.; Great Lakes, Ill.; and Norfolk, Va. Naval air stations and air bases are located at Anacostia, D.C.; Coco Solo, C.Z.; Norfolk, Va.; Lakehurst, N.J.; Pearl Harbor, T.H.; Pensacola, Fla.; San Diego, Calif.; and Seattle, Wash. Under an agreement with the British Government dated September 2, 1940, leases were granted for naval

and air bases in Newfoundland, Bermuda, the Bahamas, Jamaica, St. Lucia, Trinidad, Antigua and British Guiana.

The following is a classified statement of United States vessels built on December 31, 1942, 1943 and 1944, mainly based on data furnished by the U.S. Navy Department:—

| Types                    | On December 31. |      |      |
|--------------------------|-----------------|------|------|
|                          | 1942            | 1943 | 1944 |
| Battleships              | 19              | 21   | 23   |
| Battle Cruisers          | —               | —    | 2    |
| Fleet Aircraft Carriers  | 4               | 15   | 26   |
| Escort Aircraft Carriers | 9               | 27   | 98   |

Other vessels of the United States navy may be summarised. There are 98 escort aircraft carriers, 424 destroyers, 241 submarines, 14 gunboats and many hundreds of 'destroyer escorts,' frigates, etc., motor torpedo boats, submarine chasers and minesweepers. Auxiliaries, such as destroyer tenders, submarine tenders, seaplane tenders, repair ships, store and cargo ships, oilers, ammunition ships, transports, hospital ships, surveying ships, ocean-going tugs, submarine rescue vessels, etc., are numbered in hundreds.

The United States Coast Guard, pursuant to the Act of Congress approved January 28, 1915, constitutes at all times a part of the military forces of the United States, operating under the Treasury Department in time of peace and operating as a part of the Navy in time of war or when the President shall so direct. Its peace-time duties embrace generally law enforcement upon the sea and navigable waters of the United States, the maintenance of navigational aids and the saving of life and property. Its military personnel at the end of 1944 comprised nearly 200,000 officers and men. An Academy is maintained for the education of cadets for careers as commissioned officers. Vessels in commission on December 31, 1944, included 34 seagoing cutters (the largest type, displacing 5,950 tons, being designed for icebreaking), and over 200 smaller cutters (73 to 180 feet in length), besides numerous picket boats under 100 feet in length. A large amount of additional tonnage is under construction. The armament of the vessels varies according to ship characteristics, ranging from 1-pounder to 5-inch guns. The Coast Guard also maintains about 241 Coast Guard (life-saving) stations along the coast. Ranks, ratings and pay are identical with those of the Navy.

## III. AIR FORCES.

The United States Air Arm comprises four elements: the Army Air Forces (A.A.F.); the Naval Aviation; the Marine Corps Aviation, and the Coast Guard Air Units.

*Army Air Forces.*

The Army Air Forces between August 1941 and January 1944 expanded more than tenfold, from a strength of 219,000 officers and enlisted men to more than 2,400,000. On the latter date it represented about one-third of the total strength of the Army. By June 30, 1944, it had 925 bases of the total strength of the Army. Outside Continental United States, and more than 75,000 aeroplanes of all types, of which 34,000 were combat planes.

The principal tactical units of army aviation are the twelve air forces in combat theatres. In addition to these there are four air forces and six commands stationed within the continental United States which provide trained personnel, equipment and essential services for the overseas elements of the Army Air Forces. The home air forces train combat groups, while the Training Command trains individuals.

An air force in a theatre of operations has a dual mission, tactical and strategic, and the organisation is at times divided into separate forces for this purpose. The tactical force concentrates on the enemy, in an effort to destroy him and his arms. The strategic force attacks the industry and transportation that supports the enemy, also destroying any defensive air forces which the enemy may assemble against it.

As the war has progressed, great developments have taken place in the concepts of the strategic and tactical employment of air power, as well as in the efficiency of aircraft and other air matériel. One of these is the increased use of planes and gliders to land and supply troops behind the enemy lines. Perhaps one of the most revolutionary advances is the perfection and successful use of the B29, a very long-range bomber; a 'global' air force (the Twentieth) has been built around this weapon.

The training programme of the Army Air Forces has, of necessity, been vast. Schools in all sections of the country have been established for the purpose of creating a reservoir of qualified combat, maintenance, administrative and intelligence personnel.

## Production and Industry.

## I. AGRICULTURE.

Vacant public lands were reported by the U.S. General Land Office, on July 1, 1943, at 169,013,752 acres. These were withdrawn from entry in 1934 and 1935 except under certain conditions. Public lands amounting to more than 10,000 acres were situated as follows on July 1, 1943:—

| States     | Acres      | States      | Acres      | States       | Acres      |
|------------|------------|-------------|------------|--------------|------------|
| Alabama    | 24,480     | Michigan    | 15,810     | North Dakota | 111,178    |
| Arizona    | 12,104,464 | Minnesota   | 238,188    | Oklahoma     | 23,157     |
| Arkansas   | 129,962    | Mississippi | 12,887     | Oregon       | 18,226,087 |
| California | 15,985,696 | Montana     | 6,972,265  | South Dakota | 318,716    |
| Colorado   | 8,195,804  | Nebraska    | 28,698     | Utah         | 21,695,146 |
| Florida    | 21,497     | Nevada      | 45,274,560 | Washington   | 646,435    |
| Idaho      | 12,585,387 | New Mexico  | 14,775,894 | Wyoming      | 16,660,805 |

According to census returns the total acreage of farms and the improved acreage have been as follows:—

| Years | Farm area.<br>Acres | Improved area.<br>Acres <sup>1</sup> | Value, land, bldgs.,<br>mach'y., livestock | Value of products<br>in preceding year |
|-------|---------------------|--------------------------------------|--------------------------------------------|----------------------------------------|
|       |                     |                                      | Dollars                                    | Dollars                                |
| 1910  | 878,798,325         | 478,451,750                          | 40,837,695,622                             | 8,494,230,307 <sup>2</sup>             |
| 1920  | 955,883,715         | 503,078,007                          | 77,923,651,599                             | 21,425,623,614 <sup>3</sup>            |
| 1930  | 986,771,016         | 522,895,804                          | 56,975,606,765                             | 11,011,829,885 <sup>3</sup>            |
| 1940  | 1,060,852,374       | 530,131,043                          | 41,254,978,628                             | 7,812,644,567 <sup>3</sup>             |

<sup>1</sup> Land available for crops (harvested, fallow, idle, fallow, plus ploughable pasture).

<sup>2</sup> Gross value of farm products.

<sup>3</sup> Value of all farm products sold, traded or used by farm households.

According to census returns the numbers of farms of different sizes were:—

| Acres          | 1920      | 1930      | 1935      | 1941      |
|----------------|-----------|-----------|-----------|-----------|
| Under 8 acres  | 20,350    | 43,007    | 35,573    | 38,977    |
| 3 and under 10 | 268,422   | 315,497   | 535,258   | 470,425   |
| 10 "           | 507,763   | 559,617   | 683,452   | 559,254   |
| 20 "           | 1,503,782 | 1,440,388 | 1,440,143 | 1,231,006 |
| 50 "           | 1,474,745 | 1,374,965 | 1,444,007 | 1,291,048 |
| 100 "          | 2,456,107 | 2,314,858 | 2,417,808 | 2,254,864 |
| 500 "          | 149,819   | 159,696   | 167,452   | 163,694   |
| 1,000 and over | 67,405    | 80,620    | 83,662    | 100,531   |
| Total          | 6,448,843 | 6,283,648 | 6,812,350 | 6,096,799 |

In 1940, 3,084,138 farms were operated by full owners, 615,089 by part owners, 36,351 by managers, and 2,361,271 by tenants; farm population on January 1, 1935 (census), 31,800,907; 1940, 30,546,911. On January 1, 1945, hired farm workers numbered 1,434,000 and farm family workers, including operators, 6,571,000. The 1940 census showed that agriculture had 17.6 per cent. of all 10 years of age or older who were gainfully employed; in 1930, 21.4 per cent.; in 1920, 27 per cent.; in 1900, 37.6 per cent.; in 1870, 53 per cent.

Cash income from farm production (receipts from sales of farm products), including commodities placed under Government loan and Government conservation payments, 1942, was 16,071 million dollars; in 1941, 11,743 million dollars (highest since 1920), and in 1940, 9,106 million dollars. The cash income from total crops was, in 1942, 6,387 million dollars; in 1941, 4,718 million dollars, and in 1940, 3,470 million dollars. From animals and animal products, cash income in 1942 was 8,987 million dollars; in 1941, 6,439 million dollars, and in 1940, 4,870 million dollars.

The areas and production of the principal crops for three years are shown in the subjoined table.

| Crops          | 1941           |                  |                       | 1942           |                  |                       | 1943           |                  |                       |
|----------------|----------------|------------------|-----------------------|----------------|------------------|-----------------------|----------------|------------------|-----------------------|
|                | 1,000<br>Acres | 1,000<br>Bushels | Bush.<br>per<br>Acres | 1,000<br>Acres | 1,000<br>Bushels | Bush.<br>per<br>Acres | 1,000<br>Acres | 1,000<br>Bushels | Bush.<br>per<br>Acres |
| Corn (all)     | 36,186         | 2,675,790        | 81.0                  | 39,021         | 3,131,518        | 85.2                  | 34,790         | 3,074,159        | 88.5                  |

| Rye            | 3,570          | 45,804           | 12.7                  | 3,860          | 57,678           | 14.9                  | 2,777          | 30,781           | 11.1                  |
| Barley         | 14,330         | 362,082          | 25.3                  | 16,850         | 429,167          | 25.5                  | 14,702         | 332,187          | 21.9                  |
| Buckwheat      | 387            | 6,088            | 17.9                  | 375            | 6,686            | 17.7                  | 305            | 8,330            | 17.5                  |
| Flaxseed       | 3,375          | 32,285           | 9.9                   | 4,434          | 41,054           | 9.9                   | 5,667          | 53,006           | 9.5                   |
| Rice           | 1,214          | 51,323           | 42.3                  | 1,450          | 64,549           | 44.5                  | 1,500          | 70,025           | 46.7                  |
| Potatoes       | 2,711          | 365,603          | 131.3                 | 2,706          | 370,486          | 136.9                 | 2,531          | 464,486          | 183.9                 |
| Sweet Potatoes | 746            | 62,144           | 83.3                  | 709            | 65,598           | 92.4                  | 889            | 73,573           | 81.7                  |

The chief wheat-growing States (1944) are (yield in thousands of bushels): Kansas, yielding 198,458; North Dakota, 163,025; Oklahoma, 85,414; Montana, 79,752; Texas, 77,071; Washington, 64,283; Ohio, 48,057; Nebraska, 38,745; South Dakota, 38,340; Idaho, 30,678; Indiana, 26,727; Illinois, 25,608; Oregon, 24,064; Minnesota, 21,414; Pennsylvania, 20,276; Colorado, 18,785.

In 1944, output of tame hay was 84,142,000 tons from 59,910,000 acres; of alfalfa, 31,561,000 tons from 14,346,000 acres.

The output of sugar cane in 1944 amounted to 6,303,000 short tons. The sugar beet production in 1944 was 6,821,000 short tons.

The sugar beet production (excluding 'linters') for six years were:—

| Years | Acres<br>harvested | 1,000 bales<br>(500 lb. gross) | Years | Acres<br>harvested | 1,000 bales<br>(500 lb. gross) |
|-------|--------------------|--------------------------------|-------|--------------------|--------------------------------|
| 1933  | 24,248,000         | 11,943                         | 1942  | 22,602,000         | 12,817                         |
| 1940  | 23,361,000         | 12,566                         | 1943  | 21,562,000         | 11,428                         |
| 1941  | 22,226,000         | 10,744                         | 1944  | 20,096,000         | 12,359                         |

The cotton production in 1943 was grown in the following States (in bales, 500 lb. gross): Texas, 2,860,000; Mississippi, 1,840,000; Arkansas, 1,110,000; Alabama, 955,000; Georgia, 850,000; Louisiana, 735,000; South Carolina, 695,000; North Carolina, 595,000; Tennessee, 490,000; Oklahoma, 385,000; California, 360,000; Missouri, 295,000; Arizona, 139,000; New Mexico, 111,000; Virginia, 25,000; Florida, 17,000.

In 1944 tobacco output was 1,804,879,000 lb. from 1,685,000 acres; in 1943, 1,399,935,000 lb. from 1,499,000 acres. Output of the chief tobacco-growing States was:—

| State          | 1943<br>1,000 lb. | 1944<br>1,000 lb. | State         | 1943<br>1,000 lb. | 1944<br>1,000 lb. |
|----------------|-------------------|-------------------|---------------|-------------------|-------------------|
| North Carolina | 557,612           | 743,210           | Florida       | 14,910            | 18,315            |

| Ohio           | 20,806            | 23,400            | Kansas        | 185               | 300               |
| Connecticut    | 20,221            | 22,468            | Louisiana     | 150               | 180               |
| Maryland       | 17,604            | 30,000            |               |                   |                   |

The following table exhibits the number of farm animals on farms on April 1, 1930, and January 1, 1941, 1943 and 1944:—

| Livestock           | 1930       | 1941       | 1943       | 1944       |
|---------------------|------------|------------|------------|------------|
| Horses              | 13,742,000 | 10,214,000 | 9,675,000  | 9,330,000  |
| Mules               | 5,382,000  | 3,922,000  | 3,704,000  | 3,559,000  |
| Cattle of all kinds | 61,003,000 | 71,461,000 | 79,114,000 | 82,192,000 |
| Sheep (all)         | 51,565,000 | 54,233,000 | 55,775,000 | 51,718,000 |
| Swine               | 55,705,000 | 54,256,000 | 73,736,000 | 83,756,000 |

Total value of all farm animals on farms in the United States on January 1 was, for 1930, 6,061,330,000 dollars; for 1933 (low point of the agricultural depression), 2,772,136,000 dollars; for 1941, 5,027,162,000 dollars; for 1942, 6,623,104,000 dollars, and for 1943, 8,949,757,000 dollars.

Milk production, 1944, 119,200 million lb., and in 1943, 118,246 million lb. In 1942, 2,127 million lb. of farm and factory butter, 1,109 million lb. of cheese, and 3,887 million lb. of condensed and evaporated milk were produced.

There were on January 1, 1945, 463,226,000 chickens on farms. Production of eggs in 1944 was 57,481,000,000 eggs.

In 1944 the production of shorn wool was 855,129,000 pounds from 45,254,000 sheep.

## II. FORESTS AND FORESTRY.

The United States forest lands, capable of producing timber for commercial use, cover 461,697,000 acres (about one-fourth of the land area), classified as follows:—Saw-timber areas, 212,862,000 acres; cordwood areas, 100,791,000 acres; restocking and non-restocking land, 148,044,000 acres. Ownership of commercial forest land is distributed as follows: Federal Government, 96,720,000 acres; State, county, and municipal, 24,068,000 acres; privately owned, 340,909,000 acres, including 138,000,000 acres on farms. Of the saw-timber stand (1,763,651 million board feet) Douglas fir constitutes 28 per cent.; Western yellow pine, 13 per cent.; Southern yellow pine, 11 per cent.; other softwoods, 33 per cent.; hardwoods, 15 per cent. Normal annual cut and destruction is 13,493 million cubic feet, against an annual growth of about 11,000 million cubic feet. The net area of the 160 forests in United States, Alaska and Puerto Rico administered by the U.S. Forest Service, including commercial and non-commercial forest land was on July 1, 1943, 178 million acres.

Fire takes a heavy annual toll in the forests; total area burned over in 1948 was 32 million acres, of which 86 per cent was unprotected land. Seventy-nine per cent. (482 million acres) of total forest area is now under organised fire protection service. About 236 square miles were planted with trees in 1940; in 1943, 109 square miles.

### III. MINING.

The following are the statistics of the metallic products of the United States in 1942 and 1943 (long tons, 2,240 lb. ; short tons, 2,000 lb.) :—

| Metallic Products                   | 1942            |               | 1943       |               |
|-------------------------------------|-----------------|---------------|------------|---------------|
|                                     | Quantity        | Value         | Quantity   | Value         |
| Pig-Iron                            | short tons      | 59,100,601    |            | Dollars       |
| Silver                              | troy oz.        | 56,090,855    | 60,787,159 | 1,273,634,210 |
| Gold                                | "               | 3,741,806     | 40,820,689 | 29,023,010    |
| Copper                              | short tons      | 1,687,991     | 1,394,522  | 48,806,270    |
| Refined Lead                        | "               | 467,367       | 1,992,939  | 257,984,000   |
| Zinc                                | "               | 629,967       | 401,071    | 51,337,000    |
| Aluminium                           | "               | 521,166       | 594,250    | 102,211,000   |
| Quicksilver                         | flasks (76 lb.) | 50,846        | 920,179    | 265,380,000   |
| Magnesium (new ingots)              | short tons      | 47,420        | 51,929     | 10,137,000    |
|                                     |                 |               | 170,267    | 69,960,802    |
| Total value (metallic) <sup>1</sup> | —               | 2,343,300,000 | —          | 2,493,080,000 |

<sup>1</sup> Value includes tin, platinum and nickel, for which the Bureau of Mines is not at liberty to publish separate figures.

The precious metals were mined (in 1943) mainly in Utah, Arizona, Idaho, Montana, Colorado, Nevada, California, South Dakota, Alaska, Washington and New Mexico. Output of gold, 1792 to 1847 (according to the Bureau of the Mint), 1,187,170 ounces troy; from 1848 to 1872, 53,279,778 ounces; from 1873 to 1943, 213,094,557 ounces; total, 272,561,505 ounces. Output of silver, 1792 to 1847, 809,500 ounces troy; 1848 to 1872, 118,568,200 ounces; 1873 to 1943, 3,707,343.188 ounces; total, 3,826,220,888 ounces.

Precious stones are found in considerable varieties in the United States, including sapphires (in Montana), turquoise, tourmaline, garnets, beryl, azates, amethyst, ruby, topaz, etc.

Total output of smelter copper (from domestic ore) (1943), 1,092,989 short tons, and of refined copper, 1,082,079 short tons. In 1943, shipment of bauxite, 7,496,250 long tons; mangaese ore (1941), 87,794 long tons.

manganiferous ore (1941), 1,420,887 long tons; cadmium (1941), 3,655 short tons; iron ore (1943), 99,462,850 long tons.

Statistics of the principal non-metallic minerals for two years are:—

| Non-Metallic Products      |                 | 1942          |               | 1943          |               |
|----------------------------|-----------------|---------------|---------------|---------------|---------------|
|                            |                 | Quantity      | Value         | Quantity      | Value         |
|                            |                 |               | Oollara       |               | Dollars       |
| Bituminous coal            | short tons      | 582,692,987   | 1,373,390,604 | 589,048,000   | 1,568,597,000 |
| Pennsylvania anthracite    | short tons      | 167,327,729   | 271,573,000   | 80,548,620    | 304,816,018   |
| Stones                     | short tons      | 195,884,490   | 205,002,019   | 171,343,250   | 184,329,084   |
| Petroleum                  | barrels         | 1,886,645,000 | 1,648,470,000 | 1,503,176,000 | 1,812,560,000 |
| Natural Gas                | 1000 cubic feet | 3,053,475,000 | 692,738,000   | 3,849,500,000 | 758,810,000   |
| Cement                     | barrels         | 16,879,208    | 286,905,197   | 129,478,662   | 302,460,828   |
| Salt                       | short tons      | 13,098,284    | 38,144,284    | 15,214,151    | 48,578,356    |
| Phosphate rock             | long tons       | 4,644,340     | 16,597,492    | 5,136,282     | 18,962,081    |
| Coke                       | short tons      | 70,568,944    | 425,618,744   | 71,076,063    | 476,117,472   |
| Lime                       | " "             | 0,103,791     | 44,867,441    | 6,596,615     | 49,064,828    |
| Borates                    | " "             | 226,723       | 5,733,648     | 256,683       | 6,401,507     |
| Total value (non-metallic) |                 | —             | 5,212,400,000 | —             | 5,563,000,000 |

† Value includes selling expenses.

\* Of 276 lb. net.

2 01 42 gallons

\* Value not included in the total.

Official end-of-year estimates for 1944 outputs are:—Petroleum, 1,478,000,000 barrels; natural gasoline, 4,200,000,000 gallons; natural gas, marketed, 3,735,000 million cubic feet; bituminous coal and lignite, 590,177,069 net tons; anthracite, 64,300,000 net tons; coke, 73,700,000 net tons; cement shipped, 96,000,000 barrels; sulphur, 3,500,000 tons. Gold output was put at 938,600 fine ozs.; silver, 34,873,000 fine ozs.

#### IV. MANUFACTURES.

The following table shows the condition of manufacturing industries in the United States as reported at various censuses from 1909 to 1939. Figures for years prior to 1937 differ from those previously published, because the statistics for certain industries which are not now considered manufacturing industries by the Bureau of the Census have been deducted from the totals. Statistics relate to establishments reporting products valued at 5,000 dollars or more, except those for 1909, which include data for all establishments reporting more, except those for 500 dollars or more. The change affects very slightly the products valued at 500 dollars or more. The change in the number of statistics, except for number of establishments, the change in the number of wage earners and total value of products amounting to less than one per cent. The census of 1941 was abandoned after Pearl Harbour.

| Year              | Number of Establishments | Wage earners (average number) | Wages                             | Cost of materials <sup>1</sup> | Value of product | Horse-power <sup>2</sup> |
|-------------------|--------------------------|-------------------------------|-----------------------------------|--------------------------------|------------------|--------------------------|
|                   |                          |                               | Expressed in thousands of dollars |                                |                  |                          |
| 1909 <sup>a</sup> | 264,526                  | 6,202,242                     | 8,205,548                         | 11,783,160                     | 19,945,249       | 18,062,693               |
| 1910              | 210,380                  | 3,438,964                     | 9,611,002                         | 36,229,015                     | 59,064,027       | 28,397,568               |
| 1911              | 167,629                  | 7,648,070                     | 10,099,465                        | 34,010,075                     | 60,385,469       | 37,125,949               |
| 1912              | 8,939,705                | 10,884,919                    | 8,702,606                         | 67,994,041                     | 71,122,071       | — <sup>c</sup>           |
| 1913              | 206,668                  | 6,165,144                     | 6,688,541                         | 21,229,356                     | 39,829,888       | — <sup>c</sup>           |
| 1914              | 171,450                  | 5,787,611                     | 6,940,148                         | 16,549,798                     | 30,557,328       | — <sup>c</sup>           |
| 1915              | 139,815                  | 7,208,794                     | 7,811,329                         | 26,441,145 <sup>b</sup>        | 44,998,699       | — <sup>c</sup>           |
| 1916              | 187,926                  | 8,569,231                     | 10,112,838                        | 38,539,393                     | 60,712,672       | — <sup>c</sup>           |
| 1917              | 166,794                  | 7,686,567                     | 9,080,041                         | 82,160,107 <sup>b</sup>        | 56,448,025       | 50,452,280               |
| 1918              | 184,290                  |                               |                                   |                                |                  |                          |

| 1939 | 184,250 | containers for products, fuel, and purchased electric energy. |
|------|---------|---------------------------------------------------------------|
|------|---------|---------------------------------------------------------------|

<sup>b</sup> Horsepower represents that of prime movers, plus the horsepower of purchased electric energy. For 1909, horsepower of prime movers, 16,323,467; for 1910, primary horsepower 19,432,167; for 1927, 18,901,517; for 1929, 18,328,809; for 1939, 21,235,195.

\* For all establishments, not having production valued at 500 tons or more.  
\* Data not collected. \* Including cost of contract work. \* Figures not available.

For comparison of broad types of manufacturing, the industries covered by the census of manufactures have been divided into 20 general groups:—

| Group                                                   | Census year  | Number of establishments | Wage-earners, average number | Wages                   | Cost of materials <sup>1</sup> | Value of Products        | Value added by manufacture <sup>2</sup> |
|---------------------------------------------------------|--------------|--------------------------|------------------------------|-------------------------|--------------------------------|--------------------------|-----------------------------------------|
| In thousands of dollars                                 |              |                          |                              |                         |                                |                          |                                         |
| All groups total                                        | 1937<br>1939 | 166,794<br>184,280       | 8,569,231<br>7,886,667       | 10,112,888<br>9,089,941 | 25,589,338<br>22,160,107       | 60,712,873<br>54,843,025 | 26,178,539<br>24,662,918                |

<sup>1</sup> Includes supplies, fuel, cost of purchased electric energy, and cost of contract work.

<sup>2</sup> Calculated by subtracting 'Cost of materials' from 'Value of products.'

Shipbuilding in 1944 employed 1,155,400 workers and that year turned out 1,677 vessels with an aggregate of 16,343,436 deadweight tons; 580,

vessels were turned over to the United States Army and Navy. In 1943, 1,896 vessels of 19,233,626 deadweight tons were delivered.

Output of synthetic rubber, 1944, was 763,000 tons (normal peace-time consumption of natural rubber was between 600,000 and 700,000 tons). Prices ranged from 18 cents per lb. (when made from petroleum) to much higher prices when made from alcohol. Average price was 33 cents per lb.

Industries with products valued at 400,000,000 dollars or over for 1939:—

| Industry                                                                     | Number of establishments | Wage earners (average for the year) | Wages   | Cost of materials, supplies, fuel, purchased electric energy and contract work | Value of products |

<sup>a</sup> Average of figures for 4 and 5 week periods of number in operation at some time during the period.

<sup>b</sup> Excludes woolen and worsted looms operating on cotton yarns, July, 1942–October, 1943.

<sup>c</sup> Excludes carpet and rug looms operating on blankets and cotton fabrics.

<sup>d</sup> Scoured basis, including greasy wool reduced to scoured.

Factory sales of motor vehicles and chassis in 1941 comprised 3,744,300 passenger vehicles and 1,094,261 motor trucks. Domestic exports of automotive products (automobiles, parts, accessories, tyres, service appliances and trailers), were valued in 1939 at 278,475,130 dollars; in 1940, at 282,384,844 dollars; in 1941, at 374,861,395 dollars; in 1942, at 478,289,358 dollars, and in 1943, at 381,071,631 dollars.

Output of steel in 1944 is estimated at 88,500,000 net tons, the highest in history.

Output of the iron and steel industries in recent years, according to figures supplied by the American Iron and Steel Institute, was:—

| Year | Furnaces in blast at close of year | Pig-iron production, including ferro-alloys | Steel ingots and castings production <sup>1</sup> | Production of hot rolled iron and steel products |            |                   |
|------|------------------------------------|---------------------------------------------|---------------------------------------------------|--------------------------------------------------|------------|-------------------|

<sup>1</sup> Figures include only that portion of steel castings production which was produced in foundries operated by companies producing ingot steel.

Output of pig-iron (not including ferro-alloys) for 4 years was:—

|                             | 1940       | 1941       | 1942       | 1943       |
|-----------------------------|------------|------------|------------|------------|
|                             | Gross tons | Gross tons | Gross tons | Gross tons |
| Foundry                     | 2,046,585  | 2,465,024  | 2,279,638  | 1,838,540  |
| Bessemer and low-phosphorus | 6,993,782  | 8,925,688  | 9,310,613  | 9,840,732  |
| Basic                       | 30,346,191 | 33,499,838 | 33,368,829 | 40,513,091 |
| Malleable                   | 1,636,072  | 2,158,158  | 2,142,429  | 2,186,822  |
| Forge                       | 3,206      | 939        | —          | —          |
| All other                   | 107,560    | 147,233    | 151,015    | 165,756    |
| Total                       | 41,135,416 | 49,196,230 | 52,746,879 | 54,295,241 |

Bureau of Census reported there were in 1939, 200 active blast furnaces, with a daily capacity of 130,874 gross tons; 54 converters in active Bessemer, or modified Bessemer, steel plants, with a total daily capacity (24 hours) of 26,128 gross tons of ingots or direct steel castings; 1,067 basic and acid furnaces in active open-hearth steel plants, with daily capacity (24 hours) of 196,525 gross tons; 12 crucible steel furnaces, of 23 gross tons daily capacity (24 hours), and 350 electric steel furnaces, of 9,079 gross tons.

According to the American Iron and Steel Institute, blast furnace capacity on July 1, 1944, was 61,112,777 gross tons per year, and steel capacity, 83,977,297 gross tons (Bessemer, 5,423,214 gross tons; open hearth, 73,754,107 gross tons, electric, 4,796,563 gross tons, and crucible, 3,393 gross tons).

| Steel Output for Consumption or Sale          | 1937       | 1939       |
|-----------------------------------------------|------------|------------|
|                                               | Gross Tons | Gross Tons |
| Bessemer                                      | 3,479,800  | 3,098,671  |
| Acid open-hearth                              | 775,461    | 591,196    |
| Basic open-hearth                             | 46,211,673 | 42,916,773 |
| Crucible and electric or electrically refined | 1,189,546  | 1,176,910  |
| Process not reported                          | 25,600     | 4,060      |
| Total                                         | 51,682,080 | 47,787,610 |

The total value of products of the steel works and rolling mills in 1937 was 3,146,263,440 dollars; in 1939, 2,720,019,564 dollars.

The output of tin plates in 1939 was 5,121,442,997 lb.; output ofterne plates was 589,863,132 lb.

### Commerce.

The subjoined table gives the total value of the imports and exports of merchandise in calendar years:—

| Year | Exports     |             | General Imports | Year | Exports     |             | General Imports |
|------|-------------|-------------|-----------------|------|-------------|-------------|-----------------|
|      | Total       | U.S. Mds.   |                 |      | Total       | U.S. Mds.   |                 |
|      | 1,000 Dols. | 1,000 Dols. | 1,000 Dols.     |      | 1,000 Dols. | 1,000 Dols. | 1,000 Dols.     |
| 1939 | 3,177,176   | 3,123,343   | 2,318,081       | 1942 | 3,035,414   | 7,959,589   | 2,741,882       |
| 1940 | 4,021,146   | 3,934,181   | 2,625,579       | 1943 | 3,271,885   | 12,590,538  | 3,372,087       |
| 1941 | 5,147,154   | 5,019,677   | 3,345,005       | 1944 | 14,256,372  | 14,159,485  | 3,911,234       |

legislative authority. By an Act of Congress of 1878, its municipal government is administered by three commissioners, appointed by the President.

The unit of local government in the North, especially in the New England States, is the rural township, governed directly by the voters who assemble annually or oftener if necessary, and legislate in local affairs, levy taxes, make appropriations, and appoint and instruct the local officials (selectmen, clerk, school-committee, etc.). Where cities exist the township government is superseded by the city government. Townships are grouped to form counties, each with its commissioners and other paid officials who have charge of public buildings, lay out highways, grant licences, and estimate and apportion the taxation necessary for county purposes. In the South the counties are themselves the units, though subdivided for educational or other special purposes. In the Middle and North-Western States the two systems of local government are mixed.

### Area and Population.

#### I. PROGRESS AND PRESENT CONDITION.

Population of the continental United States at each census from 1790. Residents of Hawaii, Alaska, Puerto Rico, the Philippine Islands, Guam, Samoa, Virgin Islands, and Panama Canal Zone, and persons in the military and naval service stationed abroad are not included in the figures of this table. The residents of Indian reservations are not included prior to 1890.

| Year              | White                    | Negroes    | Other Races <sup>1</sup> | Total       | Decennial increase, per cent. |
|-------------------|--------------------------|------------|--------------------------|-------------|-------------------------------|

| 1920              | 94,820,915               | 10,463,181 | 426,574                  | 105,710,670 | 16.1                          |
| 1930              | 110,286,740 <sup>4</sup> | 11,891,148 | 597,163                  | 122,775,051 | 7.2                           |
| 1940              | 118,214,870              | 12,865,518 | 588,887                  | 131,669,275 | —                             |

<sup>1</sup> The other races, in 1860, comprised 34,983 Chinese and 44,021 Indians; for 1870 68,199 Chinese, 55 Japanese, and 25,781 Indians; for 1880, 105,465 Chinese, 145 Japanese, and 66,407 Indians; for 1890, 107,488 Chinese, 3,039 Japanese, and 248,258 Indians; for 1900, 89,868 Chinese, 24,326 Japanese, and 237,196 Indians; for 1910, 71,881 Chinese, 73,157 Japanese, 263,683 Indians, and 3,175 other races; for 1920, 61,639 Chinese, 171,010 Japanese, 244,487 Indians, and 9,488 all others; for 1930, 329,397 Indians, 74,964 Chinese, 183,534 Japanese and 50,978 all others; for 1940, 333,969 Indians, 77,504 Chinese, 126,947 Japanese and 50,467 all others.

<sup>2</sup> Enumeration in 1870 in complete. Figures in italics represent estimated corrected population.

<sup>3</sup> Between the 1910 census (April 15, 1910) and the 1920 census (January 1, 1920), the period covered was 114 months (less than a full decade). Adjusting for this, the exact rate of increase for the decade was 15.4 per cent. Similarly correcting for the 123 months between the 1920 and 1930 census, the true rate of increase was 15.7 per cent.

<sup>4</sup> Figures for 1930 have been revised to include Mexicans (1,432,659) who were classified with "Other Races" in the 1930 census reports.

Total population in 1940 at 131,669,275 comprised 66,061,592 males and 65,607,683 females; 74,423,792, or 56.5 per cent., were urban.

Estimated population (including non-contiguous territory) on July 1, 1944, 138,100,874. In November, 1944, there were between the ages of 20 and 34, 1,700,000 single men and 4,000,000 single women.

In the following table of population statistics for 1943 and 1940, there is shown the year in which each of the original thirteen States ratified the Constitution, the year when each of the other States was admitted into the Union, and the years of organization of Territories; postal abbreviations for the names of the States are shown in brackets. (For census population by States and regions in 1930 and 1940, see THE STATESMAN'S YEAR-BOOK, 1944, pp. 495 and 496.)

| Geographic Divisions and States    | Land Area: sq. miles, 1940 | Estimated Civilian Population, Nov. 1, 1943 | Census Population in 1940 | Pop. per sq. mile, 1940 |
|------------------------------------|----------------------------|---------------------------------------------|---------------------------|-------------------------|
| Continental United States          | 3,977,138                  | 127,328,683                                 | 131,669,275               | 44.2                    |
| New England                        | 63,206                     | 8,084,568                                   | 8,487,390                 | 133.5                   |
| Maine (1820)                       | 31,040                     | 762,305                                     | 847,326                   | 27.3                    |
| New Hampshire (1788) (N.H.)        | 9,094                      | 453,136                                     | 491,534                   | 54.5                    |
| Vermont (1791) (Vt.)               | 9,278                      | 316,019                                     | 359,231                   | 38.7                    |

<sup>1</sup> For statistical purposes, trade with Austria, Czechoslovakia, Poland and Danzig has been included with Germany.

\* Not shown for security reasons.

Exports of exposed motion-picture films for the calendar year 1943, totalled 189,576,143 feet, valued at 4,845,637 dollars.

The total trade between the United States and the United Kingdom for 5 years (Board of Trade returns) in thousands of pounds sterling was as follows:—

|                              | 1934   | 1935   | 1936   | 1937    | 1938    |
|------------------------------|--------|--------|--------|---------|---------|
| Imports from U.S. to U.K.    | 81,956 | 87,322 | 93,327 | 114,105 | 117,887 |
| Exports to U.S. from U.K.    | 17,571 | 22,894 | 27,626 | 31,419  | 20,484  |
| Re-exports from U.K. to U.S. | 6,642  | 7,325  | 9,148  | 10,917  | 8,285   |

Including war supplies shipped by Government departments, United Kingdom exports to the United States in 1939, 1940 and 1941 were 28,405,000L., 32,993,000L. and 31,754,000L. respectively; excluding such war supplies, exports in 1942, 1943 and 1944 were 23,493,000L., 19,265,000L. and 17,671,000L. respectively.

### Shipping and Navigation.

The shipping registered under the United States was classed as follows on January 1, 1941:—

| Tonnage grouping | Number | Gross tons |
|------------------|--------|------------|
| 5 to 99          | 16,843 | 412,518    |
| 100 to 499       | 6,630  | 1,822,661  |
| 500 to 999       | 1,467  | 966,809    |
| 1,000 and over   | 2,185  | 10,517,826 |
| Total            | 27,075 | 13,721,614 |

Of this tonnage, 10,660,675 was of vessels engaged in the coasting trade and the cod and mackerel fisheries, and 3,060,939 was that of vessels engaged in foreign trade and whale fisheries.

The shipping was distributed thus (January 1, 1941):—

| Grand Divisions | Sailing Vessels |            | Steam Vessels |            | Motor Vessels |            | Unrigged Vessels |            | Total             |
|-----------------|-----------------|------------|---------------|------------|---------------|------------|------------------|------------|-------------------|
|                 | No.             | Gross Tons | No.           | Gross Tons | No.           | Gross Tons | No.              | Gross Tons |                   |
| Atlantic & Gulf | 484             | 131,776    | 2,458         | 6,875,430  | 9,033         | 901,629    | 4,652            | 1,905,301  | 16,627 9,812,136  |
| Coasts          | 28              | 26,941     | 473           | 1,448,129  | 4,784         | 233,415    | 1,497            | 240,405    | 6,727 1,948,896   |
| Pacific Coast   | 23              | 22,998     | 586           | 1,382,316  | 986           | 54,469     | 441              | 181,012    | 2,023 1,640,790   |
| Northern Lakes  | 10              | —          | 279           | 92,663     | 833           | 43,771     | 586              | 163,364    | 1,698 304,798     |
| Western Rivers  | —               | —          | —             | —          | —             | —          | —                | —          | —                 |
| Total           | 517             | 181,710    | 3,796         | 9,812,538  | 15,586        | 1,233,284  | 7,176            | 2,493,082  | 27,075 13,721,614 |

Deadweight tonnage of American merchant marine on January 1, 1942, 11,000,000; deadweight tonnage built between that date and January 1, 1945, 43,671,794; total, 53,671,794, from which war losses and retirements must be deducted. Personnel of the merchant marine, 195,000 men on January 1, 1945; war casualties to December 1, 1944, 725 dead, 4,592 missing and 581 prisoners of war.

For the net tonnage of vessels which entered and cleared for years ending December 31, from 1937 to 1940 inclusive, see THE STATESMAN'S YEAR-BOOK, 1944, p. 529.

For the nationality and net tonnage of vessels which entered and cleared at United States ports in 1940, see THE STATESMAN'S YEAR-BOOK, 1944, p. 529.

### Communications.

On January 1, 1943, the estimated rural road mileage, including State highway systems, was 3,004,000, of which 1,406,000 miles were surfaced roads. Mileage of primary State highway systems, included 334,033 miles of rural roads, of which 309,395 miles were surfaced, and 27,566 miles of urban extension or connecting streets. There were also 198,831 miles of secondary rural road systems under State control, of which 127,033 were surfaced.

Motor vehicles registered in the United States in 1942 numbered 33,002,600 out of a world total estimated at 45,400,000.

Railway history in the United States commenced in the year 1828. According to Poor's Railway Manual, the extent of railways in operation in 1830 was 23 miles; it rose to 52,922 miles in 1870; to 167,191 miles in 1890. According to the Interstate Commerce Commission the mileage operated (first main tracks) on December 31, 1925, was 261,871; 1940, 246,739; 1942, 242,744, and 1943, 241,700 (these include some duplication under trackage

In the United States the values are fixed not according to average prices, but according to invoices or shipping papers, which the importers and exporters have to produce. For imports the invoices are signed by an American Consul; for exports the shipping papers are signed by the exporter or agents at the port of shipment. The quantities and values are determined by declarations.

The 'most favoured nation' treatment in commerce between Great Britain and the United States was agreed to for 4 years by the treaty of 1815, was extended for 10 years by the treaty of 1818, and indefinitely (subject to 12 months' notice) by that of 1827.

Imports and exports of gold and silver bullion and specie in calendar years:—

| Year | Exports       |               |               | Imports       |               |               |
|------|---------------|---------------|---------------|---------------|---------------|---------------|
|      | Gold          | Silver        | Total         | Gold          | Silver        | Total         |
|      | 1,000 Dollars | 1,000 Dollars | 1,000 Dollars | 1,000 Dollars | 1,000 Dollars | 1,000 Dollars |
| 1933 | 366,652       | 19,041        | 385,693       | 193,197       | 60,325        | 253,522       |
| 1939 | 508           | 14,630        | 15,138        | 3,574,659     | 85,307        | 3,659,966     |
| 1940 | 4,995         | 3,674         | 8,669         | 4,749,467     | 58,434        | 4,807,901     |
| 1941 | 64            | 5,873         | 5,937         | 982,442       | 47,058        | 1,029,500     |
| 1942 | 102           | 1,999         | 2,102         | 815,780       | 41,108        | 856,888       |
| 1943 | 32,885        | 80,689        | 113,574       | 101,793       | 27,903        | 129,696       |

Exports and imports of merchandise for years ended June 30 are as follows in dollars:—Total exports, 1942, 6,549,968,000; 1943, 10,049,586,000; 1944, 14,429,481,000; exports of U.S. merchandise, 1942, 6,430,642,000; 1943, 9,952,692,000; 1944, 14,307,293,000; general imports, 1942, 3,171,238,000; 1943, 2,872,000,000; 1944, 3,875,348,000.

The domestic exports of United States produce and the imports for consumption by economic classes for two calendar years were:—

| Merchandise             | Exports (U.S. merchandise) |           |                 |           | Imports for Consumption |           |                 |           |
|-------------------------|----------------------------|-----------|-----------------|-----------|-------------------------|-----------|-----------------|-----------|
|                         | 1942                       |           | 1943            |           | 1942                    |           | 1943            |           |

<sup>1</sup> First main tracks.

<sup>2</sup> Deficit.

Equipment in service on December 31, 1943, was as follows: locomotives, including electric and other, 45,406; freight train cars, 1,784,472; passenger train cars, 38,881. Average number of railway employees during 1943 was 1,424,600.

In scheduled domestic air transport operations in 1943, 20 companies with 179 aeroplanes and 3,399 pilots and co-pilots maintained service on 26,982 unduplicated route miles of domestic airways; 108,601,443 miles were flown; passengers carried, 3,451,040; passenger-miles, 1,642,596,640 miles; express and freight carried, 59,543,591 lb.; express-ton miles, 15,117,925; ton-miles of mail, 35,927,042. There were, in 1942, 110,510 active licensed pilots and 22,904 licensed aeroplanes. Airports in 1942 were: Commercial, 1,069; municipal, 1,129; landing-fields maintained by the Civil Aeronautics Administration, 273; Government, private and miscellaneous airports, 338; total, 2,809.

Airports in use January 1, 1945, were: Class I, suitable for personal flying, 981; Class II, suitable for personal flying and for small feeder airlines, 810; Class III, accommodating twin-engined aircraft, 443; Class IV, serving larger aircraft, 403, and Class V, designed for long-range domestic or foreign operations, 305; total, 2,942.

There are 10 telegraph companies, 5 cable companies and 16 radio-telegraph companies.

The telegraphs of the United States (as well as much of the cable business) are largely in the hands of the Western Union Telegraph Company, which on December 31, 1943, had 32,934 offices, including 14,068 agencies not previously reported (99 per cent. of the total), a plant investment of 344,084,810 dollars (81 per cent.), an operating revenue of 178,887,819 dollars (93 per cent.), 62,352 employees (95 per cent.), and handled 237,739,672 messages (94 per cent. of the total). It had 238,699 miles of pole line and 2,346,860 miles of wire, including 1,828,662 miles of aerial wire and 517,698 miles of cable (submarine cables, 43,822 miles, underground, 343,436, and aerial cables, 130,440). These totals include data for the Postal Telegraph Company, which merged with the Western Union in October, 1943.

The following table shows the telephone and wire mileage of all the telephone systems in the United States and the chief operating statistics of

the American Telephone and Telegraph Company, and its chief telephone subsidiaries, which together form the 'Bell Telephone System,' as of December 31 of each year:—

|                                        | 1940                    | 1941                    | 1942                    | 1943        |
|----------------------------------------|-------------------------|-------------------------|-------------------------|-------------|
| All systems:                           |                         |                         |                         |             |
| Total telephones                       | 21,928,000 <sup>1</sup> | 23,521,000 <sup>1</sup> | 24,919,000 <sup>1</sup> | 26,381,000  |
| Total miles of wire                    | 99,259,000              | 103,550,000             | 106,800,000             | 108,000,000 |
| Telephones in Bell System <sup>2</sup> | 21,861,000 <sup>1</sup> | 23,451,000 <sup>1</sup> | 24,853,000 <sup>1</sup> | 26,315,000  |
| <i>Bell Telephone System</i>           |                         |                         |                         |             |
