ELECTRICAL MACHINERY noted a rise of Rs. 21 lakhs over 1944-45 and of Rs. 98 lakhs over 1943-44 at Rs. 3.22 lakhs in 1945-46. While the share of the United Kingdom declined from Rs. 2.60 lakhs in 1944-45 to Rs. 2.55 lakhs in the following year, that of the U.S.A. registered a sharp rise from Rs. 31 lakhs to Rs. 54 lakhs. The receipts of control and switch gear reached a new higher level of Rs. 98 lakhs as compared with Rs. 55 lakhs in 1943-44 and Rs. 78 lakhs in 1944-45 and those of motors showed an increase of Rs. 28 lakhs and Rs. 3 lakhs respectively at Rs. 70 lakhs. Imports of transformers, which had advanced from Rs. 28 lakhs to Rs. 54 lakhs, declined sharply to Rs. 38 lakhs and those of turbo-generating sets steadily declined from

Rs. 19 lakhs to Rs. 10 lakhs in 1944-45 and to Rs. 6 lakhs in the following year.

A sustained improvement was noted under METAL WORKING MACHINERY, the imports of which advanced from Rs. 54 lakhs in 1943-44 to Rs. 1.53 lakhs in the following year and Rs. 1.81 lakhs in the year under review. Most of the receipts were from the U.S.A. and the United Kingdom and consisted of machine tools whose imports were valued at Rs. 1.72 lakhs in the year under review showing an increase of Rs. 26 lakhs over the preceding year and of Rs. 1.44 lakhs over 1943-44.

There was a phenomenal rise in the receipts of TYPEWRITERS which numbered 30,785 valued at Rs. 74 lakhs compared with 4,773 worth Rs. 10 lakhs in 1944-45 and only 2,340 worth Rs. 4 lakhs in 1943-44. The U.S.A. accounted for 28,687 typewriters valued at Rs. 71 lakhs in the year under review. Imports of parts of typewriters steadily mounted from Rs. 2 lakhs to Rs. 3 lakhs in 1944-45 and to Rs. 5 lakhs in the year under review.

Imports of BELTING FOR MACHINERY were valued at Rs. 1.17 lakhs for 1945-46, Rs. 1.10 lakhs for 1944-45 and Rs. 85 lakhs for 1943-44 and comprised as under (the figures are in lakhs):—

	1943-44.	1944-45.	1945-46.
Cotton Belting	5	13	9
Hair	12	24	25
Leather	59	57	51
Other materials	10	16	32

Dyeing and Tanning Substances (Rs. 10.38 lakhs).—Imports of dyeing and tanning substances accounted for Rs. 7.72 lakhs, Rs. 7.09 lakhs and Rs. 10.38 lakhs for 1943-44, 1944-45 and 1945-46 respectively. Imports of DYES obtained from coal tar showed a sharp increase from 8.8 million lbs. in 1944-45 to 14.3 million lbs. in the following year, the value rising from Rs. 6.41 lakhs to Rs. 9.77 lakhs and compared favourably with 1943-44 for which the receipts totalled 9.4 million lbs. valued at Rs. 7.07 lakhs. The bulk of the imports were for Bombay. The total imports of alizarine dyes, which had

declined from 5½ lakhs lbs. valued at Rs. 18 lakhs in 1943-44 to 1½ lakhs lbs. valued at Rs. 5 lakhs in the following year, recovered to 2½ lakhs lbs. valued at Rs. 10 lakhs in the year under review. Congo red also noted a rise from 1½ lakhs lbs. valued at Rs. 8 lakhs in 1944-45 to 2½ lakhs lbs. valued at Rs. 11 lakhs in the following year but compared unfavourably with 1943-44 for which imports were 4½ lakhs lbs. valued at Rs. 30 lakhs.

The following are the details in respect of certain other categories (the rupees are in lakhs):

	1943-44.		1944-45.		1945-46.	
	lbs.	Rs.	lbs.	Rs.	lbs.	Rs.
Naphthols	6½	72	5-4/5	78	0	1,06
Indigo	4½	19	4-2/3	20	9½	52
Sulphur, black	24	64	31	78	39	72

During the year under review imports of barks for tanning totalled 5½ lakhs cwts. valued at Rs. 48 lakhs as against approximately the same quantity valued at Rs. 47 lakhs in 1944-45 and 6.3 lakhs cwts. valued at Rs. 61 lakhs in 1943-44.

Paint and Painters' Materials (Rs. 1.04 lakhs).—Imports under this group, which had advanced from Rs. 57 lakhs in 1943-44 to Rs. 83 lakhs in the following year, advanced further by Rs. 21 lakhs in the year under review. Paints

and colours mounted up from Rs. 46 lakhs to Rs. 65 lakhs and Rs. 82 lakhs respectively with the United Kingdom maintaining its position as the leading supplier. Quantitatively, however, imports were reduced from 121,181 cwts. in 1944-45 to 115,309 cwts. in the following year as compared with only 85,914 cwts. in 1943-44. The United Kingdom increased her shipments

from 41,574 cwts. in 1943-44 to 70,464 cwts. in the following year and to 85,847 cwts. in the year under review at the cost of the U.S.A. the arrivals from which declined steadily from 40,982 cwts. to 31,193 cwts. and then to 18,159 cwts. respectively. Details regarding some of the more important items are given below:—

	1943-44		1944-45		1945-46	
	Cwts.	Rs.	Cwts.	Rs.	Cwts.	Rs.
Paris Blue	6,580	7	13,201	17	14,058	17
Graphite	2,756	1½	2,158	1	11,654	3
Lithophone dry	29,175	7	28,995	6½	19,491	4½

Imports of painters' materials other than paints and colours steadily rose from Rs. 11 lakhs to Rs. 18 lakhs and further to Rs. 22 lakhs owing mainly to a substantial rise in the arrivals of turpentine substitute which rose in value from Rs. 1 lakh in 1943-44 to Rs. 6 lakhs in 1944-45 and to Rs. 9 lakhs in 1945-46 the quantity showing an increase from 11,182 cwts. to 70,036 cwts. and 154,924 cwts. respectively.

Grain, Pulses and Flour (Rs. 9.19 lakhs).—Imports under this group continued to be mainly on Government account, but the first sign of return towards pre-war pattern was in evidence in the year under review. From the small beginning of 8,772 tons valued at Rs. 31 lakhs in 1943-44, imports advanced to 301,774 tons valued at Rs. 8.09 lakhs in the following year and further to 378,901 tons valued at Rs. 9.19 lakhs in the year under review. Imports of wheat, which had amounted to only 8 tons valued at Rs. 1,689 in 1943-44, registered a sharp up-swing to 283,427 tons valued at Rs. 7.05 lakhs in the following year and reached a further high level of 351,518 tons valued at Rs. 8.44 lakhs in the year under review. Wheat flour rose from 8,651 tons valued at Rs. 30 lakhs in 1943-44 to 11,398 tons valued at Rs. 32 lakhs in 1944-45 and declined in quantity to 10,960 tons in the year under review for which the value however, showed a small rise of Rs. 80,000 at Rs. 33 lakhs.

Iron and Steel (Rs. 6.65 lakhs).—Imports of iron and steel and manufactures thereof, which had gone up from Rs. 2.02 lakhs in 1943-44 to Rs. 3.56 lakhs in the following year, registered a sharp advance to Rs. 6.65 lakhs in the year under review. Imports of iron, including ore, were valued at Rs. 1½ lakhs in 1945-46 as against a little less than Rs. half a lakh in the preceding year. The bulk represented bars and channels whose receipts mounted from 53 tons valued at Rs. 36,581 in 1943-44 to 80 tons valued at Rs. 46,990 in 1944-45 and to 183 tons valued at Rs. 1,29,471 in 1945-46. The balance consisted of angle, tea, bolt and rod whose receipts

declined from 79 tons to 8 tons and 5 tons respectively.

Imports of steel advanced from 20,985 tons valued at Rs. 43 lakhs in 1943-44 to 37,648 tons valued at Rs. 75 lakhs in the following year and to 73,310 tons valued at Rs. 1,01 lakhs in the year under review. These included 21 tons of angle and tea, 6 tons of springs, 2,412 tons of bars, 24 tons of cast and 70,847 tons of ingots, blooms, billets and slabs in the year under review as against 5 tons, zero ton, 487 tons, 11 tons and 37,145 tons respectively in 1944-45. Anchors and cables registered a six-fold rise from 208 tons in 1944-45 to 1,329 tons, the value rising eight times from Rs. 1½ lakhs to Rs. 14 lakhs. Imports of beams, channels, pillars, girders and bridgework, which had shown a small improvement from 31 tons to 36 tons, rose to 475 tons in the year under review, while the value advanced from Rs. 3,259 to Rs. 10,656 and reached Rs. 1,93,704. A substantial rise was noted under bolts and nuts from 208 tons to 353 tons and to 628 tons valued at Rs. 2½ lakhs, Rs. 4½ lakhs and Rs. 7 lakhs respectively.

Fencing material, including fencing wire, doubled from 65 tons valued at Rs. 31,156 in 1943-44 to 129 tons valued at Rs. 62,513 in the following year and reached 282 tons valued at Rs. 2½ lakhs in the year under review. A steady improvement in the arrivals of hoops and strips was noticeable. With imports moving up from 5,842 tons valued at Rs. 28 lakhs in 1944-45 to 6,388 tons valued at Rs. 18 lakhs in 1945-46 as compared with 5,822 tons valued at Rs. 25 lakhs in 1943-44. The arrivals of nails, rivets and washers suffered a slight set-back from 3,595 tons valued at Rs. 25 lakhs to 3,427 tons valued at Rs. 27 lakhs in 1945-46 but compared favourably with 1943-44 for which they amounted to 3,324 tons valued at Rs. 21 lakhs. Old steel for re-manufacture, whose imports had improved from 2,452 tons valued at Rs. 2 lakhs in 1943-44 to 3,882 tons valued at Rs. 4 lakhs in the following year, retreated to 2,977 tons valued at Rs. 4 lakhs in the year under review.

The details regarding other more important categories are given below (the figures for rupees are in lakhs) :—

	1943-44		1944-45		1945-46	
	Tons	Rs.	Tons	Rs.	Tons	Rs.
Pipes and fittings cast	613	6	661	5	847	8
Rails, chains and fishplates ..	1,145	3	50	1	57,509	1.40

Cutlery (Rs. 45 lakhs)—Imports of cutlery showed a progressive rise during the past three years. From Rs. 5 lakhs in 1943-44, they rose to Rs. 25 lakhs in the following year and reached Rs. 45 lakhs in the year under review. The U.S.A. led with a share of Rs. 24 lakhs and the United Kingdom supplied cutlery worth Rs. 21 lakhs in the year under review. Nearly 62 per cent. of the receipts were blades which were valued at Rs. 28 lakhs in 1945-46 compared with Rs. 19 lakhs in 1944-45 and Rs. 3 lakhs in 1943-44. Imports of complete razors, which were valued at less than Rs. 200 in 1943-44 and Rs. 4,000 in the following year amounted to as much as Rs. 6½ lakhs in the year under review.

Hardware (Rs. 2.22 lakhs)—Imports of hardware steadily improved from Rs. 94 lakhs in 1943-44 to Rs. 1,29 lakhs in 1944-45 and reached a new higher level at Rs. 2.22 lakhs in the year under review. A little over three fifths of the arrivals were from United Kingdom. The following are the more important details (the figures are in lakhs) :—

	1943-44	1944-45	1945-46
Agricultural Implements	0.83	2.33	2.33
Buckets	0.14		0.08
Builders hardware	1.57	6.17	10.88
Domestic hardware	1.09	0.47	1.99
Enamelled ironware	0.46	0.38	0.86
Gas mantles	0.23	0.30	0.45
Gurb hoses (Powrahs)	0.33	2.04	4.08
Metal lamps	3.03	4.02	3.84
Parts of lamps	0.52	1.21	1.08
Hand pumps	0.53	0.28	0.87
Stoves and Stoves' parts	0.01	0.02	0.60

Instruments, Apparatus and Appliances (Rs. 7.33 lakhs)—Imports in this group mounted up from Rs. 2.93 lakhs in 1943-44 to Rs. 4.40 lakhs in 1944-45 and further to Rs. 7.33 lakhs in the year under review. The arrivals of electric fans and parts thereof were adversely hit during the past three years and their value declined from Rs. 7½ lakhs in 1943-44 to a little less than Rs. 2 lakhs in 1944-45 and dropped still further to Rs. 84,474 in the year under review. Electric wires and cables registered a sustained improvement from Rs. 25 lakhs to Rs. 61 lakhs and Rs. 77 lakhs. Insulations, other than rubber, advanced from Rs. 32 lakhs to Rs. 54 lakhs in 1944-45 and Rs. 91 lakhs in the following year while telegraph and telephone wires and cables accounted for an intake of Rs. 2,353 in 1943-44, Rs. 4 lakhs in 1944-45 and Rs. 2½ lakhs in 1945-46.

The receipts of bare copper wire, which had received a sharp set-back from Rs. 8 lakhs in 1943-44 to Rs. 2½ lakhs in the following year, noted a remarkable rise to Rs. 9½ lakhs in the year under review. The total imports of electric wires and cables were consequently valued at Rs. 1.80 lakhs as against Rs. 65 lakhs in 1943-44 and Rs. 1.21 lakhs in 1944-45. Nearly 90 per cent. of the receipts were from the United Kingdom.

Imports of telegraph and telephone instruments and apparatus, which had doubled from Rs. 12 lakhs in 1943-44 to Rs. 24 lakhs in 1944-45, reached Rs. 41 lakhs in the year under review. A phenomenal rise from Rs. 11 lakhs in 1943-44 to Rs. 22 lakhs and Rs. 73 lakhs respectively was noted under electric lamps and parts thereof while vacuum electric bulbs accounted for an increase of 150 per cent. from Rs. 5 lakhs to Rs. 13 lakhs as compared with Rs. 2½ lakhs in 1943-44. The overseas supply of electric bulbs for torches increased from Rs. 1½ lakhs to Rs. 3 lakhs and Rs. 7 lakhs and that of other sorts of electric lamps increased ten times, from Rs. 1 lakh to Rs. 10 lakhs imports of batteries.

Chemicals (Rs. 6.05 lakhs)—Imports of chemicals, which had sharply advanced from Rs. 4.97 lakhs in 1943-44 to Rs. 6.88 lakhs in the following year, received a minor set-back at Rs. 6.05 lakhs in the year under review. Caustic soda accounted for an intake of 758,170 cwt. valued at Rs. 1,17 lakhs in 1945-46 as compared with 844,676 cwt. valued at Rs. 1,31 lakhs in the preceding year and 707,098 cwt. valued at Rs. 1,11 lakhs in 1943-44. The bulk of them were from the United Kingdom. Imports of sodium carbonate, which had risen from 10.2 lakhs cwt. valued at Rs. 76 lakhs in 1943-44 to 15.8 lakhs cwt. valued at Rs. 1,23 lakhs in the following year, received a small set-back at 15.7 lakhs cwt. valued at Rs. 1,19 lakhs in the year under review. A severe decline was noted under acids, the imports of which fell in quantity from 61,587 cwt. in 1944-45 to 23,477 cwt. in 1945-46 and in value from Rs. 53 lakhs to Rs. 22 lakhs but compared favourably with 32,808 cwt. valued at Rs. 29 lakhs in 1943-44.

Vehicles (Rs. 6.05 lakhs)—The upward trend of imported vehicles, which had gained momentum from Rs. 1,27 lakhs in 1943-44 to

Rs. 4.36 lakhs in 1944-45, accelerated further to Rs. 6.05 lakhs in the year under review. Imports of perambulators which numbered 12 valued at Rs. 833 in 1943-44 and one valued at Rs. 40, in 1944-45, reached 2,250 valued at Rs. 1,2 lakhs in the year under review. The arrivals of cycles doubled from 37,391 in 1944-45 to 70,141 in 1945-46 and in value from Rs. 25 lakhs to Rs. 55 lakhs and compared favourably with 28,355 valued at Rs. 19 lakhs in 1943-44. The total of cycles and spare parts amounted to Rs. 40 lakhs, Rs. 55 lakhs and Rs. 1,08 lakhs for the three respective years. 263 motor cars valued at Rs. 10 lakhs were imported in the year under review as against 19 valued at Rs. 1 lakh in 1944-45 and 41 valued at Rs. 1 lakh in 1943-44. A ten-fold rise was witnessed in motor cycles including scooters, the receipts of which increased in number from 3 in 1943-44 to 61 in 1944-45 and 600 in 1945-46 and in value from Rs. 2,302 to Rs. 46,685 and Rs. 4½ lakhs respectively.

Imports of motor, lorries, etc., numbered 13 for 1943-44, 1 for 1944-45 and 150 for 1945-46 while those of chassis were 56, 7,736 and 359 respectively.

Metal, other than Iron and Steel (Rs. 5.99 lakhs)—Imports of metals, other than iron and steel, doubled from Rs. 2.92 lakhs in 1944-45 to Rs. 5.99 lakhs in the year under review as against Rs. 2.09 lakhs in 1943-44. A phenomenal increase was noted under imports of lead whose total value jumped up from Rs. 3 lakhs in 1944-45 to Rs. 99 lakhs in the following year while the quantity advanced from 11,217 cwt. to 443,243 cwt. Out of this, pig lead accounted for 148,057 cwt. valued at Rs. 31 lakhs in 1945-46 as compared with 8,000 cwt. valued at Rs. 1½ lakhs in the preceding year. Imports of quick silver, which had advanced four-fold from 54,569 lbs. valued at Rs. 5½ lakhs in 1943-44 to 237,213 lbs. valued at Rs. 21 lakhs in the following year, slipped back to 177,181 lbs. valued at Rs. 11½ lakhs in the year under review. The total receipts of tin were 2,807 cwt. valued at Rs. 6 lakhs in the year under review as against 1,297 cwt. valued at Rs. 17,394 in 1944-45 and 198 tons valued at Rs. 43,867 in 1943-44. Out of these the receipts of unwrought tin totalled 2,803 tons valued at Rs. 6 lakhs in 1945-46 as compared with zero for the preceding year. The total of imported zinc or spelter for the year under review was 197,271 cwt. valued at Rs. 55 lakhs compared with 23,873 cwt. valued at Rs. 11 lakhs in the preceding year and 33,412 cwt. valued at Rs. 9 lakhs in 1943-44.

Paper (Rs. 4.19 lakhs)—The upward trend of imported paper accelerated in the year under review for which the total amounted to 10½ lakhs cwt. valued at Rs. 4,19 lakhs as compared with 6.2 lakhs cwt. valued at Rs. 2,40 lakhs in 1944-45 and 3½ lakhs cwt. valued at Rs. 1,63 lakhs in 1943-44. Of these packing and wrapping paper amounted to 1½ lakhs cwt. valued at Rs. 85 lakhs as against 58,590 cwt. valued at Rs. 46 lakhs in 1944-45 and 75,651 cwt. valued at Rs. 49 lakhs in 1943-44. Nearly two-thirds, was from the U.S.A. Printing paper accounted for an intake of 714,332 cwt. valued at Rs. 1,99 lakhs in 1945-46 as against 227,250 cwt. valued

at Rs. 59 lakhs in 1943-44 and 473,995 cwts. valued at Rs. 1,07 lakhs in 1944-45. Half the receipts were from Canada and a little less from the U.S.A.

Imports of news print alone accounted for 514,132 cwts. in the year under review as against 448,372 cwts. for the preceding year and 207,360 cwts. in 1943-44, their value for the respective years being Rs. 1,04 lakhs, Rs. 93 lakhs and Rs. 46 lakhs. Imports of writing paper and envelopes rose by nearly four times in quantity and three times in value from 26,529 cwts. valued at Rs. 23 lakhs in 1944-45 to 100,579 cwts. valued at Rs. 66 lakhs in the following year and compared favourably with 18,493 cwts. valued at Rs. 15 lakhs in 1943-44.

Fruits and Vegetables (Rs. 2,31 lakhs)—Imports of fruits and vegetables, which had advanced from Rs. 87 lakhs in 1943-44 to Rs. 1,55 lakhs in the following year, reached Rs. 2,31 lakhs in the year under review. Imports of coconuts, which had improved from 23.1 million valued at Rs. 194 lakhs in 1943-44 to 27.1 million valued at Rs. 211 lakhs in the following year, had, however, a set-back at 19.9 million valued at Rs. 181 lakhs in the year under review. Dates accounted for an intake of 33,738 tons valued at Rs. 153 lakhs in the year under review showing a rise of 2,802 tons valued at Rs. 24 lakhs over the preceding year and of 20,012 tons valued at Rs. 93 lakhs over 1943-44. A phenomenal increase was noted under imports of cashew-nuts which mounted up from zero in 1943-44 to 1,348 tons valued at Rs. 3½ lakhs in the following year and 16,166 tons valued at Rs. 55 lakhs in the year under review.

Liquors including Denatured and Perfumed Spirits (Rs. 2,32 lakhs)—Imports in this category showed a rise of seven per cent. in quantity and of 60 per cent. in value during 1945-46 for which the total was 1.1 million gallons valued at Rs. 232 lakhs compared with 1.0 million gallons valued at Rs. 147 lakhs in 1944-45 and 0.9 million gallons valued at Rs. 147 lakhs in 1943-44. Out of these a little less than half was received by Bombay. The bulk of the imports was in respect of spirit which accounted for an intake of 7.6 lakhs gallons valued at Rs. 197 lakhs in 1945-46 as against 5 lakhs gallons valued at Rs. 124 lakhs in 1944-45 and 5.3 lakhs gallons valued at Rs. 122 lakhs in 1943-44. Ale, beer and porter accounted for an intake of only 1.4 lakhs gallons valued at Rs. 6 lakhs in the year under review compared with 4.2 lakhs gallons valued at Rs. 14½ lakhs in 1944-45 and 3 lakhs gallons valued at Rs. 12 lakhs in 1943-44. On the other hand, imports of wines, which had remained virtually stationary around 82,000 gallons in quantity but had fallen in value from Rs. 13½ lakhs to Rs. 9½ lakhs, doubled in quantity to 1.8 lakhs gallons and trebled in value to Rs. 29 lakhs in the year under review.

Out of the total imports of liquor in 1945-46, whisky accounted for 2.4 lakhs gallons valued at Rs. 54 lakhs followed by drugs, medicines, and chemicals containing spirit with 1.3 lakhs gallons valued at Rs. 51 lakhs. Brandy stood third with 2.1 lakhs gallons valued at Rs. 46 lakhs.

Provision and Oilman's Stores (Rs. 1.3 lakhs)—After a 100 per cent. increase, imports under this head advanced further from Rs. 1,21 lakhs in 1944-45 to Rs. 1,37 lakhs in the following year as against Rs. 65 lakhs in 1943-44. A little more than half the receipts were from Australia. Imports of condensed and preserved milk, which had increased by five times both in quantity and value from 19,963 cwts. valued at Rs. 10 lakhs in 1943-44 to 96,832 cwts. valued at Rs. 50 lakhs in the following year, declined sharply to 79,687 cwts. valued at Rs. 38 lakhs in the year under review. On the other hand, a sharp rise was noted in respect of milk foods for infants from 3,947 cwts. valued at Rs. 9 lakhs in 1943-44 to 11,797 cwts. valued at Rs. 25 lakhs in 1944-45 and 17,569 cwts. valued at Rs. 35 lakhs in 1945-46.

Spices (Rs. 1.83 lakhs)—The upward trend of imported spices was well maintained in the year under review for which the receipts totalled Rs. 1,83 lakhs compared with Rs. 1,54 lakhs in the preceding year and Rs. 90 lakhs in 1943-44. Cloves accounted for 133,234 cwts. valued at Rs. 87 lakhs as against 94,380 cwts. valued at Rs. 69 lakhs in 1944-45 and 28,635 cwts. valued at Rs. 21 lakhs in 1943-44, while betel-nuts accounted for 162,263 cwts. valued at Rs. 71 lakhs, 143,551 cwts. valued at Rs. 74 lakhs and 126,006 cwts. valued at Rs. 64 lakhs respectively.

Tobacco (Rs. 3.91 lakhs)—Imports of tobacco maintained their upward curve during the past three years from 9.8 million lbs. valued at Rs. 1,60 lakhs in 1943-44 to 13.4 million lbs. valued at Rs. 2,90 lakhs in the following year and to 15.1 million lbs. valued at Rs. 3.91 lakhs in the year under review. The bulk of the arrivals consisted of unmanufactured tobacco which totalled 9.7 million lbs. valued at Rs. 1.58 lakhs in 1943-44, 13 million lbs. valued at Rs. 2.33 lakhs in 1944-45 and 14.9 million lbs. in 1945-46. Tobacco for pipes and cigarettes formed the second largest group.

Wool, Raw (Rs. 3.09 lakhs)—Imports of raw wool, which had declined from 25.5 million lbs. valued at Rs. 4.02 lakhs in 1943-44 to 10.9 million lbs. valued at Rs. 2.10 lakhs in the following year, improved by nearly 90 per cent. in quantity and 50 per cent. in value to 19 million lbs. valued at Rs. 3.09 lakhs in the year under review. Australia continued to be the main shipper with 11 million lbs. valued at Rs. 2.25 lakhs in the year under review.

Cotton Yarns and Manufactures (Rs. 1.85 lakhs)—Imports in this group were valued at Rs. 1,85 lakhs in 1945-46 showing an increase of Rs. 30 lakhs over 1944-45 and of Rs. 51 lakhs over 1943-44. The receipts of twist and yarn shrank from 6½ lakhs lbs. valued at Rs. 12 lakhs in 1943-44 to 2 lakhs lbs. valued at Rs. 4 lakhs in 1944-45 and further to 1½ lakhs lbs. valued at Rs. 3½ lakhs in the year under review. In the same period, imports of handkerchiefs and shawls were up from Rs. 0.09 lakhs to Rs. 1½ lakhs and to Rs. 4½ lakhs respectively and those of hosiery from Rs. 0.19 lakhs to Rs. 1½ lakhs and Rs. 2½

lakhs respectively. Imports of piece-goods, which had improved from 3.7 million yards valued at Rs. 24½ lakhs in 1943-44 to 5.2 million yards valued at Rs. 32½ lakhs in 1944-45, were reduced to 3.2 million yards valued at Rs. 43 lakhs in the year under review. Thread accounted for an intake of 1.3 million lbs. valued at Rs. 91 lakhs in 1945-46 as against 1.6 million lbs. valued at Rs. 1.09 lakhs in 1944-45 and 1.3 million lbs. valued at Rs. 87 lakhs in 1943-44.

Woollen Yarn and Manufactures (Rs. 3.00 lakhs)—Imports registered a phenomenal increase from Rs. 45 lakhs in 1943-44 to Rs. 1,05 lakhs in 1944-45 and to Rs. 3,00 lakhs in 1945-46. A little less than half the imports were in respect of yarn and knitting wool which advanced from 1½ lakhs lbs. valued at Rs. 6½ lakhs in 1943-44 to 7½ lakhs lbs. valued at Rs. 32 lakhs in 1944-45 and to 27½ lakhs lbs. valued at Rs. 1,24 lakhs in the year under review. An equally important item was woollen and worsted piece-goods. Imports in this category advanced from 1.1 lakhs lbs. valued at Rs. 8 lakhs to 4.4 lakhs lbs. valued at Rs. 44 lakhs and further to 11.6 lakhs lbs. valued at Rs. 1,24 lakhs respectively. The major portion of the shipments was from the United Kingdom.

Drugs and Medicines (Rs. 3.64 lakhs)—Imports of drugs and medicines mounted up from Rs. 2,87 lakhs in 1944-45 to Rs. 3,64 lakhs in 1945-46 showing an increase of Rs. 1,56 lakhs over 1943-44. Of these proprietary medicines accounted for Rs. 34 lakhs in the year under review as against Rs. 23 lakhs for 1944-45 and Rs. 20 lakhs for 1943-44. Quinine salts which were valued at Rs. 0.81 lakhs in 1943-44, mounted up to Rs. 1½ lakhs in the following year and reached Rs. 3½ lakhs in the year under review, the respective quantity being 2,007 lbs., 3,301 lbs. and 17,942 lbs. Imports of codliver-oil, which were practically nil in 1943-44 but amounted to nearly Rs. 35,515 in the following year reached Rs. 5 lakhs in the year under review. Arrivals of camphor rose from Rs. 2.1 lakhs in 1943-44 to Rs. 7½ lakhs in 1945-46 after declining to Rs. 1.9 lakhs in 1944-45.

Seeds (Rs. 1.46 lakhs)—Imports of seeds remained steady with narrow fluctuations, the value for 1943-44 and the following two years being Rs. 1,23 lakhs, Rs. 1,46 lakhs and Rs. 1,40 lakhs respectively. Copra or coconut kernel alone accounted for Rs. 1,19 lakhs, Rs. 1,43 lakhs and Rs. 1,42 lakhs respectively in value while in quantity it amounted to 38,176 tons; 46,782 tons and 35,395 tons respectively.

Salt (Rs. 1.80 lakhs)—Imports of salt which stood at 166,625 tons valued at Rs. 1,54 lakhs in 1943-44 increased to 266,583 tons valued at Rs. 2,41 lakhs in the following year but declined to 216,630 tons valued at Rs. 1,80 lakhs in the year under review. The larger arrivals from Egypt, which sent 84,151 tons valued at Rs. 75 lakhs in 1943-44 and 173,664 tons valued at Rs. 1,55 lakhs and 188,993 tons valued at Rs. 1,57 lakhs respectively in the following two years, were unable to make up the loss arising from sharp cuts in imports from Aden and other countries.

Other articles—The following table shows the trend of imports in respect of some of the other articles of importance (the figures are in lakhs):—

	1943-44	1944-45	1945-46
Bobbins ..	66.15	81.11	94.69
Boots and Shoes ..	0.46	0.16	0.91

EXPORTS

Compared with the imports, the improvement in exports was rather halting. Out of Rs. 2,40 crores worth of shipments from India in 1945-46, one-fourth were in respect of jute manufactures.

Tea stood second with exports valued at Rs. 36 crores. Cotton goods accounted for Rs. 33 crores. Thus, these three items accounted for 54 per cent. of the export trade. Raw jute, raw cotton and seeds shared almost equally, Rs. 46

	1943-44	1944-45	1945-46	Percentage on total exports of merchandise in 1945-46

Jute, Raw (Rs. 15.84 lakhs)—Exports of raw jute, which suffered a slight set-back in the preceding year from 177,557 tons valued at Rs. 8.33 lakhs in 1948-44 to 160,174 tons valued at Rs. 7.50 lakhs in the following year owing to disturbed conditions, doubled both in quantity and value to 338,318 tons valued at Rs. 1,584 lakhs in the year under review. The United

gdom was the best customer with an off-take of Rs. 4.02 lakhs as against Rs. 4.45 lakhs in 1944-45 though the quantity dropped from 98,290 tons to 87,935 tons. The U.S.A. which was the second best customer advanced to 58,374 tons valued at Rs. 2.97 lakhs as against 31,633 tons valued at Rs. 1.55 lakhs in 1944-45.

Jute Yarn and Manufactures (Rs. 59.53 lakhs)—Shipments of jute goods which had gone up from 49.47 lakhs in 1943-44 to Rs. 60.43 lakhs in the following year, maintained their position fairly well at Rs. 59.53 lakhs in the year under review. Out of these twist and yarn was valued at Rs. 12 lakhs, Rs. 41 lakhs and Rs. 68 lakhs respectively. Exports of gunny bags declined from 343,456 tons valued at Rs. 24.50 lakhs in 1944-45 to 274,121 tons valued at Rs. 19.59 lakhs in the following year and compared unfavourably even with 1943-44 for which the shipments totalled 309,502 tons valued at Rs. 19.78 lakhs. The Union of South Africa reduced her imports to one-third of the previous year while the rest of the decline was spread evenly over a number of countries. Shipments of gunny cloth, however, mounted up from 349,541 tons valued at Rs. 34.45 lakhs in 1944-45 to 375,106 tons valued at Rs. 37.53 lakhs in the year under review, while exports under this category in 1943-44 were 314,615 tons valued at Rs. 28.97 lakhs. A little over 60 per cent. of the quantity was absorbed by the U.S.A. The total exports of jute manufactures including twist and yarn were 634,365 tons in 1943-44, 708,193 tons in 1944-45 and 680,438 tons in 1945-46.

Cotton, Raw and Waste (Rs. 15.87 lakhs)—Exports of cotton, raw and waste, which had crept forward from Rs. 7.49 lakhs to Rs. 7.70 lakhs, increased by Rs. 8.17 lakhs in the year under review. Out of this cotton waste accounted for 26,510 tons valued at Rs. 1.12 lakhs, 16,303 tons valued at Rs. 77 lakhs and 44,330 tons valued at Rs. 1.95 lakhs respectively.

Thanks to the broadening of the overseas demand and the easing of the shipping situation, exports of raw cotton, which had improved from 231,574 bales valued at Rs. 6.36 lakhs in 1943-44 to 318,741 bales valued at Rs. 6.93 lakhs in the following year, increased further to 761,293 bales valued at Rs. 13.92 lakhs in the year under review. The U.S.A. increased their off-take by four times from 11,735 tons valued at Rs. 96 lakhs in 1943-44 to 47,004 tons valued at Rs. 3.91 lakhs in the following year, while the United Kingdom which used to be an important customer reduced her purchases from 41,726 tons valued at Rs. 5.65 lakhs to 39,006 tons valued at Rs. 4.74 lakhs.

Cotton Yarns and Manufactures (Rs. 32.80 lakhs).—Exports in this category continued to shrink steadily from Rs. 42.62 lakhs in 1943-44 to Rs. 37.60 lakhs in 1944-45, and further to Rs. 32.80 lakhs in the year under review. Out of these, piecegoods accounted for 462.3 million yards worth Rs. 36.57 lakhs in 1943-44, and 423 million yards valued at Rs. 33.70 lakhs, and 440.5 million yards valued at Rs. 29.52 lakhs in the following two years respectively. The bulk of the shipments were from Bombay. Exports of grey piecegoods which had shrunk from 218.9 million yards valued at Rs. 15.28 lakhs in 1943-44 to 215.7 million yards valued at Rs. 13.18 lakhs in 1944-45, improved in quantity to 228.1 million yards but declined in value to Rs. 12.12 lakhs in the year under review. Nearly one-fifth of the consignments were for Sudan. Exports of white cotton goods declined both in volume as well as value from 80.5 million yards valued at Rs. 6.18 lakhs to 63.2 million yards valued at Rs. 5.03 lakhs and further to 52.8 million yards valued at Rs. 3.69 lakhs. Coloured, printed and dyed goods declined from 163 million yards valued at Rs. 15.11 lakhs in 1943-44 to 144.1 million yards valued at Rs. 15.59 lakhs in 1944-45 but recovered to 159.6 million yards valued at Rs. 13.71 lakhs in the year under review.

The following table gives the details regarding the destinations :—

	1943-44		1944-45		1945-46	
	Yards in millions	Rs. in Lakhs	Yards in millions	Rs. in Lakhs	Yards in millions.	Rs. in Lakhs

Tea (Rs. 35.52 lakhs)—Exports of tea were reduced in quantity as well as value from 415.5 million lbs. valued at Rs. 38.12 lakhs in 1944-45 to 362.8 million lbs. valued at Rs. 35.52 lakhs in the following year as against 413.1 million lbs. valued at Rs. 37.86 lakhs in 1943-44. The biggest customer was, of course, the United Kingdom which absorbed two-thirds of the shipments. Exports to that country totalled 237.9 million lbs. valued at Rs. 22.76 lakhs in the year under review compared with 278.3 million lbs. valued at Rs. 25.58 lakhs in 1943-44 and 262.3 million lbs. valued at Rs. 23.55 lakhs in 1944-45. The U.S.A., the second important customer, absorbed 52.4 million lbs. valued at Rs. 5.45 lakhs in the year under review compared with 60 million lbs. valued at Rs. 5.93 lakhs in 1943-44 and 51.4 million lbs. valued at Rs. 5.44 lakhs in 1944-45. Exports to Canada which had improved from 32.3 million lbs. valued at Rs. 2.81 lakhs in 1943-44 to 41.3 million lbs. valued at Rs. 3.80 lakhs in the following year, received a sharp set-back at 19.8 million lbs. valued at Rs. 1.97 lakhs in the year under review. On the other hand, Australia maintained its position virtually by importing 15.8 million lbs. in 1944-45 as well as in the following year the value however increasing from Rs. 1.38 lakhs to Rs. 1.51 lakhs but the exports to that country in 1943-44 amounted to 20 million lbs. valued at Rs. 1.66 lakhs.

Seeds (Rs. 14.51 lakhs)—Exports of seeds which were subjected to severe restrictions in the preceding two years were higher in 1945-46 owing to relaxation of control and amounted to 414,515 tons valued at Rs. 14.51 lakhs as against 342,763 tons valued at Rs. 10.53 lakhs in 1944-45 and 325,956 tons valued at Rs. 11.15 lakhs in 1943-44. Shipments of groundnuts, however, displayed a downward trend from 240,875 tons valued at Rs. 8.22 lakhs in 1943-44 to 214,953 tons valued at Rs. 6.31 lakhs in 1944-45 and further to 196,690 tons valued at Rs. 6.08 lakhs in 1945-46 though the United Kingdom's share in it increased to 151,634 tons valued at Rs. 4.71 lakhs in the year under review after declining from 181,728 tons valued at Rs. 6.36 lakhs in 1943-44 to 108,327 tons valued at Rs. 3.12 lakhs in 1944-45. The Union of South Africa reduced its takings to 12,383 tons valued at Rs. 34 lakhs after raising them from 27,680 tons valued at Rs. 97 lakhs to 32,022 tons valued at Rs. 95 lakhs respectively. Practically the whole of the exports were from Madras in the year under review.

Exports of linseed maintained their upward movement and totalled 169,354 tons valued at Rs. 5.84 lakhs in the year under review as against 92,333 tons valued at Rs. 2.74 lakhs in 1944-45 and 36,052 tons valued at Rs. 1.10 lakhs in 1943-44. Like groundnuts here also the United Kingdom was the main customer and her receipts showed an astronomical rise from 2,595 tons valued at Rs. 8 lakhs in 1943-44 to 35,669 tons valued at Rs. 1,07 lakhs in 1944-45 and to 115,459 tons valued at Rs. 3.95 lakhs in the year under review. Australia took 28,293 tons valued at Rs. 1.00 lakhs in the year under review as against 46,373 tons valued at Rs. 1.37 lakhs in 1944-45 and 27,555 tons valued at Rs. 83 lakhs in 1943-44.

Shipments of rapeseed which had declined from 18,347 tons valued at Rs. 57 lakhs in 1943-44 to 16,881 tons valued at Rs. 60 lakhs in the following year rose to 21,893 tons valued at Rs. 85 lakhs in the year under review. Nearly 80 per cent. of the quantity was shipped to the United Kingdom which absorbed 17,846 tons valued at Rs. 70 lakhs in the year under review while Australia purchased 3,497 tons valued at Rs. 14 lakhs in the same year. Practically the whole of the shipments were from Sind.

Sesamum accounted for 3,040 tons valued at Rs. 18 lakhs in 1945-46 as against 6,154 tons valued at Rs. 21 lakhs in 1943-44 and 1,315 tons valued at Rs. 7 lakhs in 1944-45. Exports of castor seeds steadily fell from 14,230 tons in 1943-44 to 6,364 tons in the following year and further to 5,831 tons in 1945-46 with the value dropping from Rs. 53 lakhs to Rs. 20 lakhs and Rs. 17 lakhs respectively.

Fruits and Vegetables (Rs. 7.04 lakhs)—Exports in this group, which had doubled from Rs. 2.28 lakhs to Rs. 4.59 lakhs in the preceding two years, reached a yet higher figure at Rs. 7.04 lakhs in 1945-46. The bulk consisted of cashew kernels, which, after declining from 5,171 tons valued at Rs. 1.38 lakhs to 2,989 tons valued at Rs. 3.23 lakhs, advanced to 9,522 tons valued at Rs. 6.72 lakhs in the year under review, thanks to the growing demand from the U.S.A. and Canada entering the field for the first time.

Hides and Skins (Rs. 11.48 lakhs)—Exports of hides and skins raw as well as tanned rose from Rs. 8.20 lakhs in 1944-45 to Rs. 11.48 lakhs in the following year and compared favourably with Rs. 8.41 lakhs in 1943-44. Of these, raw and undressed hides and skins accounted for 12,952 tons valued at Rs. 5.01 lakhs in 1945-46 as compared with 14,567 tons valued at Rs. 3.99 lakhs in 1944-45 and 22,424 tons valued at Rs. 4.13 lakhs in 1943-44. There was no export of raw buffalo hides in the past two years while in 1943-44 it was to the tune of 171,030 weighing 687 tons and valued at Rs. 9 lakhs. 138,725 cow hides weighing 605 tons and valued at Rs. 14 lakhs were shipped in 1945-46 as compared with 85,328 weighing 305 tons and valued at Rs. 6 lakhs in 1944-45 and 457,191 weighing 1,815 tons valued at Rs. 21 lakhs in 1943-44. Calf skins numbered 477,070 valued at Rs. 12 lakhs for 1943-44, 330,278 valued at Rs. 10 lakhs in 1944-45 and 34,766 valued at Rs. 91,000 in 1945-46, their weight being 900 tons, 681 tons and 69 tons respectively. Sind and the Bengal area were the only sources of shipments of hides.

A downward trend was noticed in respect of exports of raw skins. From 16,185 tons, equivalent to 28.1 million in number and valued at Rs. 3.67 lakhs in 1943-44, exports fell to 11,423 tons, i.e., 22.1 million in number, valued at Rs. 3.78 lakhs in the following year and dropped further to 10,478 tons, i.e., 22.5 millions; but the value reached a new high level at Rs. 4.82 lakhs in the year under review. Goat skins dropped from 15,343 tons (25.3 millions) valued at Rs. 2.93 lakhs to 9,582 tons (16.7 millions) valued at Rs. 2.41 lakhs and then to 7,278 tons (14.7 millions) valued at Rs. 2.30 lakhs respectively. The bulk of the shipments went to the U.S.A. On the other hand a marked improvement was noted in respect of raw sheep skins, exports of which rose from 655 tons

(1.7 millions) valued at Rs. 62 lakhs to 1,569 tons (3.5 millions) valued at Rs. 1,10 lakhs and further to 2,517 tons (5.7 millions) valued at Rs. 2.22 lakhs in the year under review. Other skins advanced from 187 tons (1.1 millions) in 1943-44 to 272 tons (1.9 millions) in the following year and to 683 tons (2.1 millions) in the year under review, their corresponding value being Rs. 11 lakhs, Rs. 26 lakhs and Rs. 30 lakhs respectively.

Exports of hides and skins, tanned or dressed fluctuated from 10,677 tons valued at Rs. 4.08 lakhs in 1943-44 to 8,069 tons valued at Rs. 4.00 lakhs in 1944-45 and to 10,561 tons valued at Rs. 6.34 lakhs in 1945-46. Exports of buffalo hides, which had reached 380 tons valued at Rs. 14 lakhs in 1943-44 as the result of Iraq importing 342 tons, were reduced to only 1 ton in the following year, but improved to 5 tons in the year under review, thanks again to Iraq importing the whole of them valued at Rs. 0.22 lakhs in the year under review. Exports of cow hides improved in 1945-46 to 4,992 tons valued at Rs. 2.09 lakhs after declining from 5,559 tons valued at Rs. 1.51 lakhs to 3,648 tons valued at Rs. 1.21 lakhs. The shipments were mostly destined for the United Kingdom. The export trade in calf skins continued downward from 1,035 tons valued at Rs. 38 lakhs in 1943-44 to 631 tons valued at Rs. 28 lakhs and further to 391 tons valued at Rs. 20 lakhs in the year under review.

The overseas demand for tanned skins remained upward rising from 3,701 tons valued at Rs. 2,06 lakhs in 1943-44 to 3,788 tons valued at Rs. 2,51 lakhs in the following year and reaching 5,159 tons valued at Rs. 4,04 lakhs in the year under review. Shipments of goat skins improved from 1,909 tons valued at Rs. 1,03 lakhs to 2,069 tons valued at Rs. 1,22 lakhs and further to 3,497 tons valued at Rs. 2,37 lakhs, while those of sheep skins receded in quantity from 1,723 tons to 1,629 tons and further to 1,524 tons but rose in value from Rs. 99 lakhs to Rs. 1,07 lakhs and further to Rs. 1,19 lakhs.

A precipitate fall in exports was noted in respect of unwrought leather which slumped from 6,096 cwts. valued at Rs. 22 lakhs in 1943-44 to 3,563 cwts. valued at Rs. 13 lakhs in the following year and to 347 cwts. only valued at Rs. 5 lakhs in the year under review.

Wool, Raw and Manufactured (Rs. 6.05 lakhs)—Exports under this category advanced from Rs. 2,35 lakhs in 1943-44 to Rs. 3,01 lakhs in 1944-45 and further to Rs. 6,05 lakhs in 1945-46. Shipments of raw wool improved from 22 million lbs. valued at Rs. 1,72 lakhs to 26 million lbs. valued at Rs. 2,28 lakhs and to 39 million lbs. valued at Rs. 3,67 lakhs respectively. Sind constituted the main source of exports with the U.S.A. as the most important destination. The manufactures comprised carpets and rugs whose exports rapidly rose from 2.9 million lbs. valued at Rs. 54 lakhs and to 5.3 million lbs. valued at Rs. 1,54 lakhs and 10 million lbs. valued at Rs. 2,32 lakhs respectively, other exports comprised piece, goods, shawls, etc.

Metals and Ores (Rs. 1.60 lakhs)—Exports remained downward from Rs. 3,50 lakhs in 1943-44 to Rs. 2,52 lakhs in the following year and reached a still lower level at Rs. 1.60 lakhs

in the year under review. Of these, the metallic ores and scrap iron or steel for remanufacture accounted for Rs. 2,24 lakhs, Rs. 1,11 lakhs and Rs. 1,18 lakhs respectively. Shipments of brass, bronze and similar alloys, which had jumped up by five times in quantity and seven times in value from 1,750 tons valued at Rs. 64 lakhs to 6,987 tons valued at Rs. 43 lakhs, declined to 3,771 tons valued at Rs. 174 lakhs in the year under review. Chromite steadily fell from 27,060 tons valued at Rs. 14 lakhs to 19,187 tons valued at Rs. 10 lakhs and further to 14,036 tons valued at Rs. 74 lakhs in the year under review. Copper accounted for a few hundred tons while ferromanganese, which was shipped to the extent of 4,836 tons valued at Rs. 13 lakhs in 1943-44, disappeared from the export list in the following two years.

Exports of pig iron fell from 186,250 tons valued at Rs. 98 lakhs in 1943-44 to 159,096 tons valued at Rs. 81 lakhs in the following year and were reduced drastically to 26,696 tons valued at Rs. 14 lakhs in the year under review. Iron and steel manufactures declined in the year under review to 1,300 tons valued at Rs. 7 lakhs after improving from 1,686 tons valued at Rs. 6 lakhs to 2,859 tons valued at Rs. 9 lakhs.

Lead retreated to 309 tons after advancing from 154 tons to 1,738 tons, while manganese ore, which had dropped from 549,200 tons valued at Rs. 1,85 lakhs in 1943-44 to 156,695 tons valued at Rs. 53 lakhs in 1944-45, recovered slightly at 185,181 tons valued at Rs. 66 lakhs in the year under review.

Non-metallic Products (Rs. 2.50 lakhs)—Exports of non-metallic ores advanced from Rs. 2.91 lakhs in 1943-44 to 3.04 lakhs in 1944-45 but dropped to Rs. 2.50 lakhs in the year under review. The bulk of the shipments were in respect of mica which accounted for 149,850 tons, 76,734 tons and 125,213 tons in quantity, the value being Rs. 2.80 lakhs, Rs. 2.94 lakhs and Rs. 2.47 lakhs respectively for the three consecutive years.

Grain, Pulses and Flour (Rs. 2.74 lakhs)—Exports declined from 94,724 tons valued at Rs. 2,31 lakhs in 1943-44 to 37,838 tons valued at Rs. 1,23 lakhs in the following year and doubled to 75,948 tons valued at Rs. 2,74 lakhs in the year under review. The improvement was partly attributable to larger shipments of rice not in the husk which reached 44,936 tons valued at Rs. 1,78 lakhs after dropping from 27,258 tons valued at Rs. 60 lakhs in 1943-44 to 10,020 tons valued at Rs. 33 lakhs in 1944-45. The bulk was meant for Ceylon. Exports of wheat were reduced to zero in the year under review after falling from 31,299 tons to only 1,500 tons in quantity and from Rs. 69 lakhs to Rs. 34 lakhs in value. Shipments of wheat flour were up by 231 tons and Rs. 4 lakhs after registering a sharp fall from 10,690 tons valued at Rs. 324 lakhs in 1943-44 to 812 tons valued at Rs. 21 lakhs in 1944-45, Arabia being the favourite.

Barley, jowar and bajra did not figure in the trade returns at all; but exports of *dalis* registered a sharp upswing from 5,264 tons valued at Rs. 19 lakhs in 1944-45 to 13,083 tons valued at Rs. 60 lakhs in the following year and compared favourably with 1943-44 for which shipments had amounted to 6,120 tons valued

at Rs. 24 lakhs. Ceylon happened to absorb almost the whole of exports. Exports of gram mounted up from 2,150 tons valued at Rs. 6 lakhs to 2,800 tons valued at Rs. 8 lakhs and finally reached 8,459 tons valued at Rs. 20 lakhs, thus bringing the total shipment of pulses to 29,845 tons valued at Rs. 92 lakhs in the year under review against 25,506 tons valued at Rs. 84 lakhs in the preceding year and 15,641 tons valued at Rs. 52 lakhs in 1943-44.

Tobacco (Rs. 2.33 lakhs).—The overseas demand for Indian tobacco broadened in the year under review from 16.9 million lbs. valued at Rs. 76 lakhs in 1943-44 and 14.1 million lbs. valued at Rs. 1.40 lakhs in 1944-45 to 23.5 million lbs. valued at Rs. 2.33 lakhs. The bulk was unmanufactured tobacco in respect of which the shipments totalled 21.7 million lbs. valued at Rs. 1.85 lakhs showing an increase of 5.7 million lbs. valued at Rs. 1.27 lakhs over 1943-44 and of 9 million lbs. valued at Rs. 89 lakhs over 1944-45. Half the shipments went to the United Kingdom. Manufactured tobacco went up from 84 lakhs lbs. valued at Rs. 18 lakhs in 1943-44 to 141 lakhs lbs. valued at Rs. 44 lakhs in the following year and further to 181 lakhs lbs. valued at Rs. 48 lakhs in the year under review. Ceylon was the main customer in this category.

Gums, Resins and Lac (Rs. 4.97 lakhs).—The upward trend noticed in the preceding two years was fully maintained in 1945-46 for which exports amounted to Rs. 4.97 lakhs showing an increase of Rs. 22 lakhs over 1944-45 and of Rs. 2.04 lakhs over 1943-44. Of this, exports of lac stood at 434,614 tons valued at Rs. 4.34 lakhs in the year under review as against 236,029 tons valued at Rs. 2.47 lakhs in 1943-44 and 437,856 tons valued at Rs. 4.32 lakhs in 1944-45. Shell fluctuated within a narrow range with exports for the three consecutive years placed at 203,557 tons valued at Rs. 2.16 lakhs, 238,242 tons valued at Rs. 3.12 lakhs and 280,127 tons valued at Rs. 3.01 lakhs with the bulk finding its way to the U.S.A. Exports of seeds rose by five times in quantity and a little over four times in value from 20,804 tons valued at Rs. 20 lakhs in 1943-44 to 105,608 tons valued at Rs. 86 lakhs in 1944-45 and touched 120,076 tons valued at Rs. 1.05 lakhs in the year under review.

Exports of gums and resins stood at 91,936 cwts. valued at Rs. 63 lakhs in the year under review showing an increase of 16,793 cwts. valued at Rs. 20 lakhs over 1944-45. In 1943-44 exports have totalled 84,763 cwts. valued at Rs. 45 lakhs.

Oils (Rs. 1.70 lakhs).—Shipments of oils declined from 1.8 million gallons in 1943-44 to 1.2 million gallons in the following year and managed to recover nearly 1.8 million gallons in 1945-46; but the value remained upward rising from Rs. 83 lakhs to Rs. 1.06 lakhs and further to Rs. 1.70 lakhs respectively. The overseas demand for sandalwood oil broadened from 1,698 gallons valued at Rs. 3 lakhs to 2,780 gallons valued at Rs. 8 lakhs and 6,100 gallons valued at Rs. 16 lakhs respectively, while the total of essential oils stood at 65,344 gallons valued at Rs. 22 lakhs, 134,412 gallons valued at Rs. 54 lakhs and 168,395 gallons valued at

Exports of vegetable oils, which amounted to 1.7 million gallons valued at Rs. 61 lakhs in 1943-44, declined in the following year to one million gallons valued at Rs. 51 lakhs but recovered in the year under review to 1.6 million gallons valued at Rs. 69 lakhs. The bulk of the shipments related to linseed oil which improved from 0.6 million gallons valued at Rs. 28 lakhs in 1943-44 to 0.7 million gallons valued at Rs. 37 lakhs in the following year and advanced further to 1.1 million gallons valued at Rs. 46 lakhs in the year under review. Castor oil was shipped to the tune of 38,097 gallons valued at Rs. 2 lakhs in 1943-44; but the shipments nearly doubled to 70,739 gallons valued at Rs. 4½ lakhs in the following year and further rose by 100 per cent. to 157,259 gallons valued at Rs. 9 lakhs in 1945-46. In both respects, South Africa was the most important customer.

Exports of groundnuts were nearly steady, the top being 147,692 gallons valued at Rs. 6 lakhs in 1944-45. In the following year, they totalled 126,864 gallons valued at Rs. 5½ lakhs compared with 130,471 gallons valued at Rs. 3½ lakhs in 1943-44. Iraq increased its takings from 33,510 gallons in 1943-44 to 69,055 gallons in the following year and absorbed 119,138 gallons in the year under review. A broadening of exports was witnessed in respect of sesamum oil which was shipped to the extent of 75,255 gallons valued at Rs. 5 lakhs in 1945-46 as against 17,456 gallons valued at a little less than Rs. 1 lakh in 1944-45 and 41,453 gallons valued at Rs. 1½ lakhs in 1943-44.

Spices (Rs. 3.09 lakhs).—Exports totalled 548,370 cwts. valued at Rs. 3.09 lakhs in 1945-46 as against 235,099 cwts. valued at Rs. 1.11 lakhs in the preceding year and 248,473 cwts. valued at Rs. 1.45 lakhs in 1943-44. Bombay and Madras were the principal sources of shipments.

Exports of pepper, after declining from 69,573 cwts. valued at Rs. 89 lakhs in 1943-44 to 36,229 cwts. valued at Rs. 21 lakhs owing to a drastic cut in the United Kingdom's demand, registered a sharp upswing to 178,594 cwts. valued at Rs. 1.17 lakhs in the year under review. The spectacular increase was due to the restoration of the United Kingdom's demand and fresh openings in Near and Middle East.

Shipments of chillies were slightly upward at 113,925 cwts. in 1943-44, 120,801 cwts. in 1944-45 and 120,637 cwts. in 1945-46, their respective values being Rs. 40 lakhs, Rs. 47 lakhs and Rs. 59 lakhs. A phenomenal increase in exports was noted in respect of ginger whose exports jumped from 41,531 cwts. valued at Rs. 22 lakhs in 1944-45 to 104,870 cwts. valued at Rs. 65 lakhs in 1945-46 and compared very favourably with 1943-44 for which they totalled only 28,199 cwts. valued at Rs. 18 lakhs. Cardamoms to the tune of 16,711 cwts. valued at Rs. 36 lakhs were shipped in the year under review as against 6,811 cwts. valued at Rs. 13 lakhs in the preceding year and 9,320 cwts. valued at Rs. 30 lakhs in 1943-44.

Exports of turmeric hardened from 25,223 cwts. valued at Rs. 5 lakhs in 1943-44 to 27,865 cwts. valued at Rs. 7 lakhs in the following year; but rose by nearly four and a half times to 116,356 cwts. valued at Rs. 35 lakhs in the year

tune of 5,025 cwts. valued at Rs. 7 lakhs in the year under review as against hardly 1,719 cwts. valued at Rs. 3 lakhs in the preceding year and 2,145 cwts. valued at Rs. 3 lakhs in 1943-44.

Chemicals, Drugs and Medicines (Rs. 80 lakhs).—Exports of this group doubled from Rs. 41 lakhs in 1944-45 to Rs. 80 lakhs in the following year at which they showed a gain of Rs. 14 lakhs over 1943-44. Chemicals showed a rise of Rs. 14 lakhs over the preceding year and of Rs. 9 lakhs over 1943-44 and amounted to Rs. 25 lakhs. Magnesium compounds and saltpetre were the most important items on the export list while the exports of soda compounds showed a downward trend. Shipments of drugs in the year under review were valued at Rs. 55 lakhs showing an increase of Rs. 28 lakhs over

the preceding year and of Rs. 33 lakhs over 1943-44. Nux Vomica and Sena were the major items.

Dyes and Colours (Rs. 65 lakhs).—Exports totalled Rs. 65 lakhs in 1945-46 showing an increase of Rs. 15 lakhs over 1944-45 and of Rs. 31 lakhs over 1943-44. Out of these, two-thirds related to myrobalans, the shipments of which rose from 3½ lakhs cwts. valued at Rs. 18 lakhs in 1943-44 to 5 lakhs cwts. valued at Rs. 31 lakhs in the following year and to 6½ lakhs cwts. valued at Rs. 44 lakhs in the year under review. Nearly 95 per cent. of the exports went to the United Kingdom and the U.S.A. Myrobalan extracts, cutch and gambir and barks were other notable items.

Index Numbers of Prices

INDEx numbers of prices reflect the movement of prices within the economic system of a country. From the point of the Provincial Governments in this country, they are the basis for determining the land revenue assessments.

The index number of wholesale prices in the sub-continent during 1861-1931 are available in the publication "Index Numbers of Indian Prices, 1861-1931" issued by Director-General of Commercial Intelligence and Statistics, Calcutta. This publication contains (1) the unweighted index numbers of 28 articles of export, (2) the unweighted index numbers of 11 articles of import, (3) the general unweighted index numbers for 39 articles of export and import, and (4) the weighted index numbers of 100 articles. These series are a continuation of the series first compiled by F. J. Atkinson of the Indian Finance Department and published in the Journal of the Royal Statistical Society in March 1897. The index numbers subsequent to 1931 are available in the addenda to the Index Numbers of Indian Prices, 1861-1931.

The compilation was discontinued in August 1941 since the basis became out of date.

The following table contains these index numbers over a period of years:—

(Prices in 1873 = 100)

Year	General Index No. (39 Articles Unweighted)	Weighted Index No. (100 Articles)
1900 ..	116	143
1905 ..	110	135
1910 ..	122	150
1914 ..	147	187
1918 ..	225	215
1920 ..	281	302
1926 ..	216	260
1931 ..	127	157
1934 ..	119	136
1937 ..	136	155
1938 ..	132	147
1939 ..	134	157

WHOLESALE PRICE INDEX

The compilation of index number of wholesale prices in India has been undertaken since 1913. For this purpose, 1914 has been taken as the basic year and the data is collected for Calcutta and Bombay. In the latter case, another series is being undertaken on the basis of the 1929 price level computed as 100. Several provincial governments also publish fortnightly and monthly statements of retail and wholesale prices of certain important commodities.

The following table gives the index numbers of wholesale prices for Calcutta and Bombay up to 1939:—

INDEX NUMBER OF WHOLESALE PRICES

(End of July 1914=100).

Year	Calcutta	Bombay
1914 ..	100	100
1920 ..	201	193
1921 ..	179	198
1933 ..	87	98
1936 ..	91	96
1937 ..	102	108
1938 ..	95	101
1939 ..	108	109

The outbreak of the Second World War brought to the forefront the need for better compilation of price statistics and the Economic Adviser to the Government of India proposed the week ended August 19, 1939 as the base for compilation of index numbers of wholesale prices in India by groups of articles. This is a sensitive index. Subsequently, another index for general purposes was also introduced with the year ended August 1939 as the base.

GROUPS OF ARTICLES

The following table relates to the index numbers of wholesale prices in India by groups of articles since 1939-40 on the basis of the average of monthly figures and of the week ended August 19, 1939 being equivalent to 100:—

Year	Agricultural Commodities.	Raw Materials.	Primary Commodities.	Manufactured Articles.	Chief Articles of Export.	General Index.
1939-40*	127.5	118.8	124.2	131.5	130.5	125.6
1940-41	108.6	121.5	113.4	119.8	114.1	114.8
1941-42	124.2	146.9	132.5	154.5	137.3	137.0
1942-43	166.2	165.9	166.0	190.4	161.7	171.0
1943-44	208.7	185.0	232.5	251.7	233.4	236.4
1944-45	265.4	200.0	240.5	258.3	243.9	244.2
1945-46	272.6	210.0	246.2	240.0	248.9	244.9
1946-47	313.8	235.3	280.0	259.1	296.8	275.4
1947-48	356.9	254.0	312.6	287.8		307.0

* Seven months ended March 1940

COST OF LIVING INDEX

The provincial Governments also publish the working class cost of living index numbers. Some of the industrial towns for which these are compiled are: Bombay, Ahmedabad, Solapur, Jalgaon, Nagpur, Jabulpore, Madras, Bangalore, Jamshedpur and Calcutta.

The working class cost of living index number for Bombay was originally compiled on the basis of 1914 year; but it was revised in 1937 when the July 1933 to June 1934 was adopted as the base.

The original index, with July 1914 as the base, declined from 173 in 1921 to 97 in 1934. For the following year, it recovered to 101, while the revised index stood at 100. The latter rose to 106 in 1937 at which it remained unchanged during the next two years. The war signalled a sharp upward trend reaching 250 in 1946. It touched 285 in September 1947, declined to 258 in January 1948 and then advanced once again to reach the all-time high level of 291 for April 1948.

PRICE TREND

The five years ended 1866 coincided with the American civil war which imposed heavy demand for Indian cotton and resulted in imports of bullion and heavy coinage of silver. This, in turn, brought about a sharp rise in prices. But the following 15 years witnessed a downward trend in sympathy with the similar tendency in the West. The depreciation of the rupee signalled the reversal of the trend of commodity prices in 1883 and the upward movement was sustained till 1920 with a break during 1893-99 as the result of the contraction of currency and closing of the mints for coinage.

The Prices Inquiry Committee appointed in 1910 reported that between 1890 and 1912, there was a general rise in prices throughout the sub-continent. Hides and skins, foodgrains, building materials and oilseeds rose by 40 per cent. or more above the level of the basic period, cotton and jute by 33 and 31 per cent. respectively and other articles including food by about 25 per cent. The Committee attributed the rise to internal factors such as shortage of supply in the face of growing demand, development of transport and increase in the volume of currency and to external factors such as increased gold production and wars.

The upward trend accelerated during the First War owing to the conditions created by it. Food grains rose between 1914 and 1919 by 93 per cent. and other commodities followed suit. A feature of the rise was that the prices of imported goods rose more steeply than those of exports. But the year 1921 signalled the downward movement following the lead of the United Kingdom, and the sale of reverse councils and deflation of currency accelerated its pace. The world depression contributed its mite subsequently to the falling prices and the Calcutta index number of wholesale prices which stood at 179 in 1921 slumped to 141 in 1929 and to the bottom at 87 in 1933. The loss was subsequently retrieved partially following the world's economic recovery and the index number rose to 108 in 1939.

The outbreak of the war in September 1939 introduced a new chapter in the history of Indian commodity prices. After an initial rise, the prices received a sharp setback following the

loss of export markets in Europe; but Japan's entry into the war placed on India the responsibility of being the supply base for the East which brought about rapid expansion of currency and an equally rapid rise in prices. The Economic Adviser's index number of wholesale prices with the week ended August 19, 1939 as the base rose from 114.8 in 1940-41 to 137 in the following year, 171 in 1942-43 and 236.4 in 1943-44. The rise in the following two years was, however, comparatively small.

The end of the hostilities kindled the hopes that the rising spiral of prices would cry halt. These hopes were strengthened by a small rise of 0.7 in 1945-46; but the inflationary movement gained fresh impetus from domestic shortages and a rise of 30.5 and of 31.6 points was recorded in 1946-47 and 1947-48 respectively, placing the index number at the all time record high level of 307 for 1947-48.

INADEQUACY OF DATA

The inadequacy as also the general unreliability of Indian price statistics has been the subject of comment by many committees and commissions of enquiry including the Indian Economic Enquiry Committee of 1925, the Royal Commission on Indian Labour and also by Messrs. Bowley and Robertson who were invited by the Government of India to advise them on the question of obtaining more accurate and detailed statistics. The eleventh Industries Conference held at Mysore in December 1939 and the first Conference of the Labour Ministers held at New Delhi in January 1940 recommended that the Central Government should undertake legislation to facilitate the collection of statistics relating to industries. In pursuance of this recommendation, the Government of India introduced in the Legislative Assembly in February 1942 a bill on the subject which was subsequently passed by the Central Legislature and received the assent of the Governor-General. This Act, which is called the Industrial Statistics Act, 1942, empowers the provincial Governments to arrange for the collection of statistics relating to prices of commodities as also certain other matters like wages, employment, industrial disputes, etc.

In view of the inadequacy of the existing retail price data, especially from the point of view of compiling cost of living index numbers, the Court of Enquiry constituted in August, 1940, under the Trade Disputes Act 1929 under the Chairmanship of the Hon'ble Sir B. N. Rau to investigate the question of dearness allowance for the railway employees recommended that the Central Government should take up the work of preparation and maintenance of cost of living index figures for three distinct classes of areas in India, viz., city, urban and rural. In pursuance of this recommendation, the Government of India outlined a tentative scheme for the preparation and maintenance of cost of living index numbers for important centres in the sub-continent. The scope of the Scheme has been limited to the preparation of figures for industrial labour. A special post of Director, Cost of Living Index Scheme, has been created and a Committee of experts has been appointed to assist him. Unweighted retail price index numbers for 15 selected rural centres where cost of living index numbers are not available are being published by the Director, Cost of Living Index Scheme.

Tariff Board

UNTIL 1919 India had no authority to shape her fiscal policy without the approval of the Secretary of State for India. In that year, the Joint Select Committee on the Government of India Bill recommended that "a satisfactory solution of the question (of fiscal policy) can only be guaranteed by the grant of liberty to the Government of India to devise those tariff arrangements which seem best fitted to India's needs." It further recommended that "the Secretary of State should, as far as possible, avoid interference on this subject when the Government of India and its Legislature are in agreement, and they think that his intervention, when it does take place, should be limited to safe-guarding the international obligations of the Empire or any fiscal arrangements within the Empire to which His Majesty's Government is a party." It, however, took two more years for the acceptance of this principle by the Secretary of State.

Armed with this convention and as a preliminary step towards deciding the guiding principles of a fiscal policy for the country, a Resolution was issued on October 7, 1921 about the appointment of a Fiscal Commission "to examine with reference to all the interests concerned the Tariff Policy of the Government of India, including the question of the desirability of adopting the principle of Imperial Preference, and to make recommendations. It was this report which really laid the foundations of the tariff policy for the country and should be given credit for whatever industrial progress took place during the last quarter of a century.

THREE PRINCIPLES

The Commission came to the conclusion that the industrial development of the country had "not been commensurate with the size of the country, its population and its natural resources" and, therefore, recommended "a policy of protection to be applied with discrimination." It distinguished between basic and non-basic industries and recommended that, as a rule, non-basic industries may, subject to certain conditions, be assisted by means of import tariff and basic industries should be helped by means of bounties in order to see that the cost of the manufactured articles used by other industries does not rise. Again, it emphasised that export duties on raw or semi-manufactured goods should not be resorted to as a means of assisting industries.

For the purpose of enabling the Government of India to pursue this policy, the Fiscal Commission recommended the creation of a permanent Tariff Board charged with the task of examining the claims of various industries to protection and of watching the operations of the fiscal measures that might be taken by Government from time to time. Simultaneously, the Commission laid down three important conditions for the guidance of the Board as a prerequisite to any recommendation by it for State help. They were: (1) The industry must have natural advantages. (2) The industry is such that without protection it is not likely to develop at all or so rapidly as is desirable in the interest of the country. (3) The industry must be one which will eventually be able to face world competition without protection. It further

made clear that the question of the renewal of protection to an industry should also be examined by the Tariff Board from time to time.

TARIFF BOARD ESTABLISHED

The Government of India accepted the recommendation of the Fiscal Commission in regard to the establishment of a Tariff Board and set up the first Tariff Board in July 1923 for a period of one year. The life of the Board, however, was extended from year to year until the outbreak of the World War II though the personnel changed from time to time. During this period, the Tariff Board examined the claims of a number of industries for protection and, as a result of its recommendations, help by means of protective tariffs, bounties or subsidies was given to steel, railway wagons, wire and wire nails, bolts and nuts, paper, printers' ink, plywood, safety matches, transmission belting, glass, sugar, silk, the cotton textile industry and a variety of other industries.

During the Second World War, the need for starting new industries to fill in the gap created by the cessation of imports was keenly felt and the Government of India made a definite promise about protection and help if the need arose after the termination of the war. In the statement on industrial policy issued by the Central Government on April 23, 1945, it was announced that pending the formulation of a tariff policy appropriate to the post-war needs and conditions of the country and the establishment of permanent machinery for the purpose, Government would set up machinery for investigation claims from various industries, which were started or have developed in wartime and are established on sound lines, for assistance or protection during the transition period.

WAR-TIME INDUSTRIES

For the purpose of these and any subsequent investigation, the Government of India set up in November 1945 a Tariff Board for a period not exceeding two years in the first instance. The Board consisted of Sir R. K. Shanmukham Chetty (President), Mr. C. C. Desai, Dr. H. L. Dey and Dr. Nazir Ahmed. The *communiqué* issued in this connection stated:

In the case of each industry, the Board will, after such examination as it considers necessary, report whether the industry satisfies the following conditions:—

(1) that it is established and conducted on sound business lines; and (2) that having regard to the natural or economic advantages enjoyed by the industry and its actual or probable costs, it is likely, within a reasonable time, to develop sufficiently to be able to carry on successfully without protection or State assistance; or (3) that it is an industry to which it is desirable in the national interest to grant protection or assistance and that the probable cost of such protection or assistance to the community is not excessive.

Where a claim to protection or assistance is found to be established, the Board will recommend:

(i) whether, at what rate and in respect of what articles or class or description of article, a protective duty should be imposed; (ii) what

additional or alternative measure should be taken to protect or assist the industry; and (iii) for what period, not exceeding three years, the tariff or other measures should remain in force.

COST OF PROTECTION

In making its recommendations, the Board will give due weight to the interests of consumer in the light of the prevailing conditions and will also consider how the recommendations affect industries using the articles in respect of which protection is to be granted. Since relief, to be effective, should be attended without delay, the Board is requested to complete its inquiries with all possible expedition.

With these general terms of reference, the Board was entrusted with inquiries concerning numerous industries in the first one year and a half. Following the division of India, however, the Board's activities became rather restricted owing to the appointment of the President, Mr. Chetty, as Finance Minister, Government of

India, the transfer of its Member-Secretary Mr. C. C. Desai, to the States Ministry, Government of India, and the decision of its then member, Dr. Nazir Ahmed, to opt out for service with Pakistan.

The Tariff Board was reconstituted November 1947 with the following members: Mr. G. L. Mehta (President), Dr. H. L. Dey and Dr. B. V. Narayanaswamy Naidu. The Government resolution issued on November 3 stated that it would function for a period of three years. In addition to the terms of reference fixed earlier, the reconstituted Board is now entrusted with the following functions:

(1) To report to Government, as and when required, factors that lead to increase in the cost of production of Indian manufactured goods as against imported articles; and

(2) To advise Government, as and when required, on measures whereby internal production may be secured on the most economic cost basis.

Trade Marks

THE Trade Marks Act, 1940 (Act V of 1940) was passed by the Indian Legislature in March 1940, to provide for the registration and more effective protection of trade marks. Sections 1 and 85 of the Act came into force at once, and under the latter section, intending applicants for registration were enabled to deposit their trade marks. About 1,58,000 trade marks were so deposited, which have since been classified and indexed.

Before the other provisions of the Act could be brought into force the Act was amended in 1941 (Act XXVII of 1941) to establish a separate Trade Marks Registry at Bombay under a Bombay Registrar with jurisdiction over textile marks only. The Amended Act came into force on the 1st June 1942, but had again to be amended by the Trade Marks Amendment Act, 1943. The Act was further amended in April 1946 (Act XII of 1946) with a view to avoiding conflict of registration in various States which have either passed Trade Marks Acts of their own or proposed to do so in the near future, and also to make trade marks registered in any territory effective in all territories in which trade marks legislation has been enacted.

Infringement actions of trade marks and certification trade marks registered in India can accordingly be filed in any of the reciprocating States thus making it unnecessary for the proprietor of a trade mark to register a trade mark more than once. The Trade Marks Register is kept at the Registry at Bombay under the control and management of the Registrar of Trade Marks, Mr. K. S. Shivaksha, B.A. (Oxon.), Bar-at-Law, who is at present the Registrar of Trade Marks.

A branch of the Trade Marks Registry is established at Calcutta, at which a copy of the Register and the Refused Textile Marks List are kept. The Branch Registry is in charge of the Deputy Registrar who is empowered under section 4 (2A) of the Act to discharge, under the superintendence and direction of the

Registrar, any function which under the Act may be discharged by the Registrar. As reference in the Act to the Registrar includes reference to the Deputy Registrar when so discharging any such function. Where the Registrar directs the Deputy Registrar to deal with a particular matter, he has in disposing of such matter the same powers as the Registrar. At present, the Deputy Registrar of Trade Marks is Mr. C. V. Nagaraja Sastri, M.A. (Oxon.), M.A. (Edin.), Bar-at-Law.

The following is a summary of the important provisions of the Trade Marks Act, 1940:

A "mark" includes a device, brand, heading, label, ticket, name, signature, word, letter, numeral or any combination thereof; a "trade mark" means a mark used or proposed to be used in relation to goods for the purpose of indicating or so as to indicate a connection in the course of trade between the goods and some person having the right to use the mark. A trade mark may be registered only in respect of particular goods or classes of goods. Any person who is desirous of registering a mark should apply to the Registrar in the prescribed manner. The application may be made either at the Registry at Bombay or at the branch office at Calcutta.

Under section 6 (1), distinctiveness is the prime requisite of a trade mark for registration. A registrable trade mark must consist of or contain at least one of the following essential particulars: (1) name of a company or individual represented in a special or particular manner; (2) signature of the applicant or some predecessor in business; (3) one or more invented words; (4) word or words, having no direct reference to the character or quality of the goods and not being according to its ordinary meaning a geographical name or surname or the name of a sect, caste or tribe in India and (5) any other distinctive mark. A mark consisting of a name, signature, or any word other than such as fall within the above description is not registrable except upon evidence of distinctiveness. It

determining whether a trade mark is distinctive the extent of the inherent distinctiveness of the mark, as well as its acquired distinctiveness by use or otherwise, will be considered. The commonly accepted name of any single chemical element or chemical compound is not registrable in respect of a chemical substance or preparation. Trade marks which are contrary to law or morality, or disentitled to protection in a Court of Law by being likely to deceive or cause confusion or which are likely to hurt religious susceptibilities, are not registrable. The Act contains also special provisions for the registration of certification trade marks, and for defensive registration.

When an application for registration has been accepted subject to such conditions, if any, as the Registrar might think fit to impose, the Registrar shall cause the application to be advertised accordingly. Under section 15 (2) any person may in the prescribed manner oppose an application so advertised within 4 months, and after hearing the parties, the Registrar will decide whether registration is to be permitted. The date of registration of an application shall be the date of filing such application in the Registry.

The registration of a mark will be in force for 7 years in the first instance, after which it may be renewed for a period of 15 years. In all legal proceedings relating to a registered trade mark, the fact of registration shall be *prima facie* evidence of validity of the registration and of all subsequent assignments and transmissions. Further, after seven years from the date of registration, the validity of the original registration cannot be questioned except on grounds of fraud or deception or unless the mark offends against section 8.

The registered proprietor of a trade mark is entitled to an action for infringement under the Act. This valuable right is extended to owners of "old" marks, who had applied for registration of their trade marks within five years from the commencement of the Act and registration of which has been refused by the Registrar. The rights of action to passing off are not affected by registration, and are expressly preserved under the Act. Registration gives to the registered proprietor the exclusive right to the use of the trade mark in relation to the goods for which the mark is registered. Where a mark is already registered by one person, the same or nearly similar mark cannot be registered by another person, except in case of honest concurrent use or of other special circumstances section 10 (2).

The proprietor of a registered trade mark has power to assign the mark, and may assign it whether in connection with the goodwill of the business or not. A registered proprietor may also assign an unregistered trade mark without the goodwill of the business along with a registered trade mark under certain circumstances. Any assignment made without the goodwill of the business must be advertised as directed by the Registrar.

A person other than the proprietor of a mark may be registered as a registered user, on application being made both by the proprietor

and such person to the Registrar in the prescribed manner, accompanied by particulars relating to their relationship, the control of the one over the other, and other facts relevant to the "permitted" use. The registered user may under certain circumstances file an action for infringement in his own name as if he were the proprietor, but cannot assign or transmit the mark.

Any person aggrieved by the presence of a mark or entry on the Register may apply in the prescribed manner to the Registrar or to a High Court for rectification of the Register. The registered proprietor may apply to the Registrar for correction or cancellation of any entry in the Register, relating to his trade mark. He may also apply for alteration of the registered mark in any manner not substantially affecting its identity.

With effect from the 1st January, 1947, it will be an offence to describe a trade mark as registered when it is not so registered. This will not however apply to a trade mark, for the registration of which an application had been filed at the Trade Marks Registry before 1st January 1947 and which has not been disposed of by the Registrar. The use of the word "Registered", however, is permissible if it is clearly indicated that the reference is to registration of the mark under the law of a country outside India or if the word is used solely in relation to goods to be exported to a foreign country where the mark is registered. Declaration of ownership of a trade mark under the Indian Registration Act of 1908 is not equivalent to registration under the Trade Marks Act, 1940, and the use of the word "registered" to signify registration of declaration of ownership would therefore be an offence with effect from the aforesaid date. The use of Royal Arms, Heraldic devices, and State emblems without due authority may be restrained by injunction from the Registrar or at the suit of any other person who is duly authorised to use such Arms, etc., but the rights to their use acquired before the coming into force of the Act, are not affected.

All appeals from the decisions of the Registrar lie to the High Court.

There are also special provisions for registration of textile trade marks and for the constitution of an Advisory Committee to advise the Registrar with respect to usages of the textile trade.

The criminal law relating to the registration of trade marks is contained in the Merchandise Marks Act (IV of 1889), which has recently been amended. Section 3 of this Act enacts sections 478-489 of Chapter XVIII of the Indian Penal Code.

Since 15th August, 1947 the Trade Marks Registry has been registering trade marks for both the Dominions of India and Pakistan. Special provisions have been made in The Indian Independence (Miscellaneous Transitional Provisions) Order 1947 whereby the present arrangement is to continue upto 31st March, 1948.

Patents and Designs

PRIOR to the 15th August 1947, the granting of Patents for new inventions and the registration of new or original Designs in British India were regulated by the Indian Patents and Designs Act, 1911 (No. 2 of 1911). As a result of the partition of India, the said Act, with suitable modifications has become the law of all the Provinces of India and Pakistan, and the Patents granted and the Designs registered by the Patent Office in India prior to 15th August 1947 continue to be operative in the said Provinces. Patents granted and Designs registered by the Patent Office in India after the 15th August 1947 will be operative only in the Provinces of the Indian Dominion, and unless special legislation is enacted for that purpose, will not extend to Pakistan or to the States.

The texts of the Indian Patents and Designs Act, 1911, and the Indian Patents and Designs Rules and the Indian Secret Patent Rules which regulate the practice under the Act, are contained in the PATENT OFFICE HANDBOOK. The seventh edition of the Handbook published in 1947, contains also a thoroughly revised set of instructions for the guidance of inventors and applicants for the grant of patents and for the registration of designs. Copies are available for sale with the Manager of Publications, Civil Lines, Delhi, at Re. 1-0-0 per copy.

The Indian Patents and Designs Act does not extend to the United Kingdom, or any British possession, or any State in the Indian sub-continent. The States of Baroda, Cochin, Cooch Behar, Hyderabad (Deccan), Indore (Holkar), Jodhpur, Kashmir and Jammu, Mysore, Rampur and Travancore, have separate Patent Offices and Patent Laws of their own. For information regarding Patents and Designs in those Countries or States, application should be made to the Patent Offices of the Countries or States concerned.

India is not a party to the International Convention for the Protection of Industrial Property. But, arrangements for giving "Priority" patents and registered designs exist between India on the one side and each of the following countries and States on the other, viz., Australia, Canada, New Zealand, Elre, the United Kingdom, the Union of South Africa, and the States of Baroda, Mysore and Rampur. In the case of Ceylon, priority arrangements exist in respect of patents only and not in respect of designs.

PATENTS

The main provisions of the Indian Patents and Designs Act which regulate the granting of patents and patent rights are briefly as follows:—

Varieties of Patents.—The Act provides for the granting of four kinds of patents, namely:—

- (i) a patent, which is dated as of the official date of the application for the patent;
- (ii) a patent of addition, for improvement or modification of an invention for which invention a patent has already been applied for or granted;

(iii) a secret patent for an invention relating to instruments or munitions of war;

(iv) a patent claiming "Priority," which is dated as of the official date of the corresponding application for patent first made in a country outside India which has established reciprocal arrangements with India for mutual protection of inventions.

What may be Patented.—The subject-matter of a patent should be a "manner of new manufacture," which may be any process or apparatus for producing, preparing, or making an article, or any article of manufacture. It is essential that the process, apparatus or article of manufacture should suggest an act to be done or an operation to be performed, and that the result must be a vendible product.

Illustrations of patentable inventions are, new textile machines, power plants, agricultural implements, domestic appliances, drying and moistening apparatus and processes, and sanitary appliances. New compositions of matter may also be patented if their properties would not be deducible from known properties of their constituent substances. In the field of chemical industry, new processes and apparatuses for manufacturing synthetic products, food-stuffs, dyes, soda ash, caustic soda, bleaching powder, toilet preparations and processes for the treatment of oil seeds, by-products and waste materials, would be patentable inventions.

The discovery of a hitherto unknown natural law is not patentable. Similarly, a method of calculation or a new notation for writing music, a new method of curing diseases, natural substances suitable for food, cannot be classed as "manufactures," and are, therefore, not patentable.

What are commonly called "patent medicines" are medicines prepared by secret formulae and are not usually protected by the grant of patents. The proprietors of such medicines may in most cases possess trade mark rights in the names by which the medicines are known. "Patent" or proprietary medicines may be registered under the Drugs Act, 1940, which contains provisions for the prohibition of the import, manufacture and sale of mis-branded drugs. Applications for registration of patent or proprietary medicines should be made to the Central Drugs Laboratory, 110, Chittaranjan Avenue, Calcutta.

Who may obtain Patent.—Any person in possession of an invention may obtain a patent, irrespective of his nationality. The term "person" includes a company, a firm or a partnership. An application for an ordinary patent (i.e., a patent which would be dated as of the official date of the application) may be made by any person either alone or jointly with others. An application for a patent of addition may be made only by the applicant for the original patent to which it is an addition as long as the application for the original patent is pending, or by the registered proprietor of the original patent if it has been granted. An application

for a secret patent should be made by the inventor himself. An application for a patent which claims a "Priority date" may be made by the person who has made the application on which the claim to priority is based, or by his legal representative, or assignee, either alone or jointly with others.

Government Servants.—Subject to any special conditions of service or to any special orders applicable to the persons employed in any particular department, all government servants are at liberty to apply for a patent direct to the Patent Office. Government servants employed in the Defence Services, in the Royal Indian Navy and in the Indian Air Force should not apply for patents except in the manner laid down in the Special Regulations applicable to them. Government servants employed on scientific or technical research should not apply or cause or permit any other person to apply for a patent for an invention made by them, save with the permission of the Government and in accordance with such conditions as the Government may impose. Railway servants are also subject to similar restrictions.

PROCEDURE FOR OBTAINING PATENTS

An application for a patent should be drawn up on the prescribed form and forwarded to the Controller of Patents and Designs, the Patent Office, No. 214, Lower Circular Road, Calcutta 17. As a rule, the inventor, or his legal representative or his assignee should be a party to the application. The application should be accompanied by a specification in duplicate, prepared on the appropriate prescribed form, and also the prescribed fee.

Specifications.—The specification which should accompany an application may be either a Provisional Specification or a Complete Specification. A Provisional Specification should describe the nature of the invention. A Complete Specification must particularly describe and ascertain the nature of the invention and the manner of performing it in practice. A Provisional Specification cannot be filed in respect of an application claiming "Priority date." A Complete Specification should, therefore, accompany every such application.

If a Provisional Specification accompanies an application it will be necessary to file the Complete Specification within 9 months from the date of the application. This period of nine months may be extended by one month by paying an additional fee of Rs. 10.

Drawings.—If the invention is capable of illustration by means of drawings, suitable drawings should also be filed in duplicate.

Fees.—The fees payable in respect of the filing of an application accompanied by a Provisional Specification is Rs. 10, and in respect of the filing of an application accompanied by a Complete Specification is Rs. 30. The fee payable in respect of filing a Complete Specification following a Provisional Specification is Rs. 20.

The fees may be paid in cash at the Patent Office, or may be sent by Postal Order, Money Order or Cheque, made payable to the Controller at Calcutta.

Examination.—An application properly filed in the Patent Office is accorded a serial number and date. Every application in respect of which a Complete Specification has been filed is, before it is accepted, examined with a view to ascertaining mainly whether the invention is *prima facie* a manner of new manufacture or improvement, whether the nature of the invention or the manner of performing it is particularly described, and also whether the statement of claim sufficiently defines the invention.

Acceptance.—On the acceptance of an application (other than an application for a secret patent), the specification and drawings in respect of it become open to public inspection. The acceptance is advertised by the Patent Office in the Gazette of India. The specification and drawings are also printed and a limited number of printed specifications are made available for sale. Printed specifications are identified by their serial numbers and are sold by the Manager of Publications, Civil Lines, Delhi, at Re. 1 per copy.

Opposition.—The grant of a patent on any application (other than an application for a secret patent) may be opposed by any person within 4 months of the date of advertisement of its acceptance.

Some of the grounds on which the grant of a patent may be opposed are—that the invention sought to be patented has been publicly used or made publicly known in any part of India; that the nature of the invention or the manner of performing it is not sufficiently or fairly described in the specification; or that the applicant for patent is not the true inventor but the applicant obtained the invention from the opponent or from a person through whom he claims.

Sealing the Patent.—In the absence of any opposition, or in the event of an opposition if the application passes the opposition successfully, the Patent Office would send the applicant a sealing fee demand notice, and on receipt from him of his request for sealing the patent accompanied by a sealing fee of Rs. 30, a patent is sealed on the application and the sealing is notified in the Register of Patents.

TERM AND CONTINUANCE

The normal term of a patent other than a patent of addition is 16 years from its date; but in special circumstances the term may be extended for a further period not exceeding 10 years. A patent of addition remains in force as long as the main patent is in force.

The continuance of a patent other than a patent of addition and a secret patent is subject to the payment of certain renewal fees. No renewal fees are payable for the continuance of patents of addition and secret patents.

Effect of Grant.—The grant of a patent under the Act confers upon the patentee the exclusive privilege of making, selling and using the invention throughout India and of authorising others to do so.

After a patent is obtained, the patentee may sell the patent outright, or may grant licences for its exploitation, or may work the patent himself.

Infringement of Patents.—If, during the continuance of a patent, any person makes, sells, or uses the invention protected by the patent without obtaining a licence from the patentee, or counterfeits or imitates it, the patentee may institute a suit for infringement against such person. The defendant in an infringement suit may counter-claim the revocation of the patent.

A suit for infringement may be instituted in a District Court having jurisdiction to try the suit, but when a counter-claim has been made for the revocation of the patent, the suit along with the counter-claim is decided by a High Court.

Compulsory Licences and Revocation.—In order for the grant of a compulsory licence or for revocation of any patent may be obtained on application to the Central Government by any interested person on the ground that the patentee has abused his rights under the patent. What constitutes an abuse of patent rights is laid down in Sections 22 and 23 of the Act.

A patent may also be revoked on other grounds by the Controller, or the Central Government, or a High Court in certain circumstances.

DESIGNS

The main provisions of the Act relating to the registration of designs and registered designs are briefly as follows:—

A Design means only the features of shape, configuration, pattern or ornament, applied to an article by any industrial process or means. To be registrable under Part II of the Act, a design must be *new or original*, and must be applicable to an article. A model or principle of construction of an article, or anything which in substance is a mere mechanical device cannot be registered as a design. Trade Marks and trade names are not designs for the purpose of the Act. Literary or artistic creations such as books, pictures and music which fall under the Indian Copyright Act (III of 1914) do not also come within the scope of the Indian Patents and Designs Act.

The novelty or the originality of a design is judged solely by the eye with reference to the external appearance of the finished article to which the design is applied. Neither the constructional details of the article which would not be visible in the finished article, nor the utility of the article, would be relevant for deciding the registrability of the design. The novelty and the originality of a design will be destroyed by the publication of the design.

For purposes of registration of designs, goods to which the designs are to be applied have been grouped into fourteen classes according to the substances composing the article. If an article is composed of more than one substance, it is classified according to the predominant substance.

WHO MAY APPLY AND HOW

Any person claiming to be the proprietor of a new or original design not previously published in India may apply for the registration of the design.

An application for the registration of a design should be drawn up on the prescribed form and

should be forwarded to the Controller of Patents and Designs. The prescribed fee and four copies of the design should accompany the application. The fee payable for filing an application for registration of a design in any one of the classes Nos. 1-12 is Rs. 3, and for registration in class No. 13 or 14 is annas eight only.

The copies of the design which should accompany an application may be drawings, photographs, tracings or specimens. The representation of the design should be such as would enable a person looking at it to form a mental picture of the shape, configuration, pattern or ornament of the finished article to which the design is to be applied. Representations illustrating merely the method or principle of construction or the operation of the article, are not suitable.

It is possible to register a design in more than one class, if the article to which it is to be applied is composed of substances included in different classes.

Copyright on Registration.—The registration of a design confers upon the registered proprietor, for a limited period, the exclusive right to sell or to make for sale any article to which the registered design has been applied.

The period of copyright obtainable on registration of a design is initially five years, but this initial period can be extended to two further periods of five years each, on payment of a fee of Rs. 10 for each period of extension.

Infringement.—During the existence of copyright in a registered design, the unauthorised application of the design to the article in question for purpose of sale is prohibited. The penalty for each infringement is a sum not exceeding five hundred rupees recoverable as a contract debt; the proprietor may, in the alternative, elect to bring a suit for the recovery of damages and for an injunction against the repetition of the infringement, in which case the infringer is liable to pay such damages as may be awarded. By an amendment made in Section 18 of the Indian Sea Customs Act (No. VIII of 1878), it has been rendered possible to stop the importation into India of goods bearing a pirated design.

Cancellation.—The registration of a design may be cancelled on the ground that the design has been previously registered in India, or the design has been published in India prior to the date of registration, or the design is not new or original. An application for cancellation may be made by any interested person at any time to a High Court, or to the Controller within one year from the date of registration on the ground of prior registration or prior publication mentioned above.

GENERAL

The Patent Office at Calcutta which was established under the Indian Patents and Designs Act for the purpose of administering this Act continues to be the Patent Office for all the Provinces of the Dominion of India. (It is expected that a separate Patent Office for the Dominion of Pakistan will be established by the Government of Pakistan.) The office at Calcutta is in charge of the Controller of Patents and Designs. It has no branches anywhere.

Registers—The Patent Office maintains a Register of Patents and a Register of Designs. Particulars of name, addresses, nationalities of the grantees of patents, the titles of inventions, dates of patents, renewal of patents and transactions affecting the proprietorship or validity of patents are notified in the Register of Patents. Similar particulars in respect of designs accepted for registration are notified in the Register of Designs. The Registers are open to inspection

by the public on payment of a fee of Re. 1 in respect of each patent or design.

Certificates—Certified copies, sealed with the seal of the Patent Office, of any entry in the Register of Patents and the Register of Designs may be obtained by any person on application to the Controller, accompanied by the prescribed fee.

A technical library is attached to the office. The library is open to the public, free of charge.

Copyright

COPYRIGHT in every original literary, dramatic, musical and artistic work means the sole right to produce or reproduce the work or any substantial part thereof in any material form whatsoever: to perform or in case of a lecture to deliver the work or any substantial part thereof in public; if the work is unpublished, to publish the work or any substantial part thereof. Amongst other things it includes the sole right to produce, reproduce, perform or publish, any translation of the work; in the case of a dramatic work, to convert it into a novel or other non-dramatic work and in the case of a novel or other non-dramatic work or of an artistic work, to convert it into a dramatic work by way of performance in public or otherwise, and in the case of a literary dramatic or musical work, to make any record, perforated roll, cinematograph film or other contrivance by means of which the work may be mechanically performed or delivered. Copyright also includes the right to authorise any such acts as aforesaid.

Publication in relation to any work means the issue of copies of the work to the public but does not include the performance in public of a dramatic or musical work, the delivery in public of a lecture, the exhibition in public of an artistic work or the construction of an architectural work of art.

COPYRIGHT ACT

Copyright in the Indian sub-continent is governed by the Indian Copyright Act III of 1914 which made the Imperial Copyright Act of 1911 applicable to India with such modifications as appeared to be desirable for adapting its provisions to the circumstances of India. The portions of the Imperial Act made applicable to India form the First Schedule to the Indian Copyright Act III of 1914.

Copyright subsists throughout the parts of His Majesty's dominions to which the Imperial Act extends. Registration is no longer necessary but the publisher of every book has to supply a copy thereof as provided in the Copyright Act and in the Press and Registration of Books Act XXV of 1867. The author of a work is the first owner of the copyright therein and may assign the right either wholly or partially (copyright being a bundle of different rights) and either generally or subject to limitations, or may grant any interest in the right by license to another person but no such assignment or grant is valid unless it is in writing signed by the owner of the right in respect of which the assignment or grant is made or by his duly authorised agent.

DURATION OF COPYRIGHT

Generally the term for which copyright subsists is the life of the author and a period of 50 years after his death but at any time after the expiration of 25 years or in the case of a work in which copyright subsisted at the time of the passing of the Imperial Act of 1911, 30 years from the death of the author of a published work, copyright in the work is not deemed to be infringed by the reproduction of the work for sale if the person reproducing the work proves that he has given the notice in writing prescribed by the Governor-General in Council of his intention to reproduce the work and that he has paid in the prescribed manner to or for the benefit of the owner of the copyright, royalties in respect of all copies of the work sold by him calculated at the rate of 10 per cent. on the price at which he publishes the work.

If, at any time after the death of the author of a literary, dramatic or musical work, which has been published or performed in public, a complaint is made to the Judicial Committee of the Privy Council that the owner of the copyright in the work has refused to re-publish or allow the re-publication of the work or has refused to allow the performance in public of the work and that by reason of such refusal the work is withheld from the public, the owner of the copyright may be ordered to grant a licence to reproduce the work or perform the work in public as the case may be on such terms and subject to such conditions as the Judicial Committee may think fit.

DURATION OF SOLE OWNERSHIP

In the case of works first published in India copyright is subject to this limitation that the sole right to produce, reproduce, perform or publish a translation of the work subsists only for a period of 10 years from the date of the first publication of the work but if within the said period the author or any person to whom he has granted permission so to do publishes a translation of any such work in any language, copyright in such work as regards the sole right to produce, reproduce, perform or publish such translation in that language is not subject to the limitation above prescribed.

COPYRIGHT OF PHOTOGRAPHS

The term for which copyright subsists in photographs is 50 years from the making of the original negative from which the photograph was directly or indirectly derived and the person who was owner of such negative at the time when such negative was made is deemed to be the author of the work.

MUSICAL INSTRUMENTS

The provisions of the Act as to mechanical instruments for producing musical sounds were found unsuitable to Indian conditions. "The majority of Indian melodies," it was explained in Council, have not been published, i.e., written in staff notation, except through the medium of the phonograph. It is impossible in many cases to identify the original composer or author, and the melodies are subject to great variety of notation and tune. To meet these conditions s. 5 of the Indian Act follows the English Musical Copyright Act of 1902 by defining musical work as meaning any combination of melody and harmony, or either of them, which has been reduced to writing.

The Copyright Act does not apply to designs capable of being registered under the Patents and Designs Act II of 1911 except designs which though capable of being so registered are not used or intended to be used as models or patterns to be multiplied by any industrial process.

INFRINGEMENT OF COPYRIGHT

Copyright in a work is considered to be infringed by any person who without the consent of the owner of the copyright does anything, the sole right to do which is conferred by the Copyright Act on the owner of the copyright. Where copyright in any work has been infringed, the owner is entitled to all remedies by way of injunction, damages and accounts. Every suit or other civil proceeding regarding infringement of copyright must be instituted and tried in the High Court or the Court of the District Judge. An action in respect of infringement of copyright cannot be commenced after the expiration of 3 years next after the infringement. No Court inferior to that of a Presidency Magistrate or a Magistrate of the First Class can try any offence against the Copyright Act. It is not an infringement of copyright to publish a report in a newspaper of an address of a political nature delivered at a public meeting.

Where a married woman and her husband are joint authors of a work the interest of such married woman therein shall be her separate property.

The Press

THE newspaper Press in the sub-continent is an essentially English institution and was introduced soon after the task of organising the administration was seriously taken in hand by the English in Bengal. In 1773 was passed the Regulating Act creating the Governor-Generalship and the Supreme Court in Bengal and within seven years at the end of the same decade, the first newspaper was started in Calcutta by an Englishman in January 1780. Exactly a century and a third has elapsed since, not a very long period certainly, a period almost measured by the life of a single newspaper, *The Times*, which came into existence only five years later in 1785; but then the period of British supremacy is not much longer, having commenced at Plassey, only twenty-three years earlier. Bombay followed Calcutta closely, and Madras did not lag much behind. In 1789 the first Bombay newspaper appeared, *The Bombay Herald*, followed next year by *The Bombay Courier*, a paper now represented by *The Times of India* with which it was amalgamated in 1861. In Bombay the advent of the press may be said to have followed the British occupation of the Island much later than was the case in Calcutta. In Calcutta the English were on suzerainty before Plassey, but in Bombay they were absolute masters after 1665, and it is somewhat strange that no Englishman should have thought of starting a newspaper during all those hundred and twenty-five years before the actual advent of *The Herald*.

FIRST NEWSPAPER

The first newspaper was called *The Bengal Gazette* which is better known from the name of its founder as *Hicky's Gazette* or *Journal*. Hicky like most pioneers had to suffer for his enterprising spirit, though the fault was entirely his own; as he made his paper a medium of

publishing gross scandal, and he and his journal disappeared from public view in 1782. Several journals rapidly followed Hicky's, though they did not fortunately copy his bad example. *The Indian Gazette* had a career of over half a century, when in 1833 it was merged into the *Bengal Harkaru*, which came into existence only a little later, and both are now represented by *The Indian Daily News* with which they were amalgamated in 1836. No fewer than five papers followed in as many years, the *Bengal Gazette* of 1780, and one of these, *The Calcutta Gazette*, started in February 1784, under the avowed patronage of Government, flourishes still as the official gazette of the West Bengal Government.

In 1821 a syndicate of European merchants and officials commenced the publication of *John Bull in the East*, a daily paper which was intended to reflect Tory opinion in India and set an example to the Press generally in the matter of moderation and restraint. The name of this journal was altered to *The Englishman* by the famous Stocquer in 1836.

From its commencement the press was jealously watched by the authorities who put serious restraints upon its independence and pursued a policy of discouragement and rigorous control. Government objected to news of apparently the most trivial character affecting its servants. From 1791 to 1799 several editors were deported to Europe without trial and on short notice, whilst several more were censured and had to apologise. At the commencement of the rule of Wellesley Government promulgated stringent rules for the public press and instituted an official censor to whom everything was to be submitted before publication, the penalty for offending against these rules to be immediate deportation. These regulations continued in force till the time of

the Marquis of Hastings who in 1818 abolished the censorship and substituted milder rules.

This change proved beneficial to the status of the press, for henceforward self-respecting and able men began slowly but steadily to join the ranks of journalism, which had till then been considered a low profession. Silk Buckingham, one of the ablest and best known of Anglo-Indian journalists of those days, availed himself of this comparative freedom to criticise the authorities, and under the short administration of Adam, a civilian who temporarily occupied Hastings' place, he was deported under rules specially passed. But Lord Amherst and still more Lord William Bentinck were persons of broad and liberal views, and under them the press was left practically free, though there existed certain regulations which were not enforced, though Lord Clare, who was Governor of Bombay from 1831 to 1835, once strongly but in vain urged the latter to enforce them. Metcalfe, who succeeded for a brief period Bentinck, removed even these regulations, and brought about what is called the emancipation of the press in India in 1835, which was the beginning of a new era in the history of the Indian press. Among papers that came into being, was the *Bombay Times* which was started towards the close of 1838 by the leading merchants of Bombay, and which in 1861 changed its name to the *Times of India*. The *Bombay Gazette* founded in 1791, ceased publication in 1914.

The liberal spirit in which Lord Hastings had begun to deal with the press led not only to the improvement in the tone and status of the Anglo-Indian press, but also to the rise of press in Indian-owned English and language papers. The first newspaper in any Indian language was the *Samachar Durban* started by the famous Serampore Missionaries Ward, Carey and Marshman in 1818 in Bengal, and it received encouragement from Hastings who allowed it to circulate through the post office at one-fourth the

usual rates. This was followed in 1822 by a purely Gujarati paper in Bombay called the *Bombay Samachar* which still exists, and thus was laid the foundation of the Indian language Press which at the present day is by far the largest part of the press in India, numbering nearly 800 papers.

From 1835 to the upheaval of 1857 the press spread to other cities like Delhi, Agra, Gwalior, and even Lahore, whereas formerly it was chiefly confined to the Presidency towns. During the Mutiny its freedom had to be temporarily controlled by the Gagging Act which Canning passed in June 1857 on account of the license of a very few papers, and owing still more to the fears of its circulating intelligence which might be prejudicial to public interests. The Act was passed only for a year at the end of which the press was once more free.

On India passing to the British Crown in 1858, an era of prosperity and progress opened for the whole country in which the press participated. There were 19 Anglo-Indian papers at the beginning of this period in 1858 and 25 Native papers and the circulation of all was very small. The number of the former did not show a great rise in the next generation, but the rise in influence and also circulation was satisfactory. Famous journalists like Robert Knight, James Maclean and Hurris Mookerji flourished in this generation. The *Civil and Military Gazette* was originally published in Simla as a weekly paper, the first issue being dated June 22nd, 1872. Prior to and in the days of the Mutiny the most famous paper in Northern India was the *Mofussil*, originally published at Meerut, but afterwards at Agra and then at Ambala. After a lively existence for a few years in Simla the *Civil and Military Gazette* acquired and incorporated the *Mofussil*, and in 1876 the office of the paper was transferred from Simla to Lahore, and the *Gazette* began to be published daily.

Press Law

Before 1835 all printing of books and paper was subject to licence by the Governor-General in Council, and the licences were issued or refused at the discretion of Government. Act XI of 1835 repealed the old Regulations and merely required registration of the printer and made a few minor requirements. That Act was replaced in 1887 by the present Press and Registration of Books Act, and, except for an Act which was in force for one year during the Mutiny, there was no further legislation directly affecting the Press until 1878 when the Vernacular Press Act was passed. That Act was repealed during the Viceroyalty of Lord Ripon in 1882. From that date until 1907 Government made no attempt to interfere directly with the liberty of the Press, the growth of sedition being dealt with in other ways by the passing in 1898 of section 124A of the Penal Code in its present form, which had been originally enacted in 1870, and by the introduction into the Penal Code of section 153A and into the Criminal Procedure Code of section 108. There were a

certain number of prosecutions under those sections up to 1907, but the dissemination of sedition through the Press continued. In 1907 the Newspaper (Incitement to Offences) Act was passed which dealt with papers inciting to murder or to acts of violence. This Act failed to have the desired effect.

The Indian Press Act, 1910, was a measure of wider scope, the main object of which was to ensure that the Indian press generally should be kept within the limits of legitimate discussion.

Repeal of Press Legislation.—By the autumn of 1917 the Government of India had begun to consider the desirability of modifying at least one section of the Press Act to which great exception had been taken on account of the wide powers that it gave. Finally, after more than once consulting Local Governments, a Committee was appointed in February 1921 after a debate in the then Central Legislative Assembly, to examine the Press and Registration of Books Act, 1897, and the Indian Press Act

1910, and report what modifications were required in the existing law. That Committee made an unanimous report in July 1921, recommending:—

(1) The Press Act should be repealed.

(2) The Newspapers Incitements to Offences Act should be repealed.

(3) The Press and Registration of Books Act and the Post Office Act should be amended where necessary to meet the conclusion noted below: (a) The name of the editor should be inscribed on every issue of a newspaper and the editor should be subject to the same liabilities as the printer and publisher, as regards criminal and civil responsibilities; (b) any person registering under the Press and Registration of Books Act should be a major defined by the Indian Majority Act; (c) local Governments should retain the power of confiscating openly seditious leaflets, subject to the owner of the press or any other person aggrieved being able to protest before a court and challenge the seizure of such document, in which case the local Government ordering the confiscation should be called upon to prove the seditious character of the documents. The powers conferred by Sections 13 to 15 of the Press Act should be retained. Customs and Postal officers being empowered to seize seditious literature within the meaning of Section 124A of the I. P. C. subject to review on the part of the local Government and challenge by any persons interested in the courts; (e) any person challenging the orders of Government should do so in the local High Court; (f) the term of imprisonment prescribed in Sections 12, 13, 14 and 15 of the Press and Registration of Books Act should be reduced to six months; (g) the provisions of Section 16 of the Press Act should be reproduced in the Press and Registration of Books Act.

Effect was given to these recommendations during the year 1922.

The Indian and Eastern Newspapers Society.—An important development in connection with newspapers in the sub-continent took place in 1939, when the Indian and Eastern Newspaper Society was formed. The Society's principal objects are as follows:—(a) To act as a central organisation of the Press of India, Burma and Ceylon; (b) To promote and safeguard the business interests of members as affected by the action of Legislatures, Governments, the Law Courts, municipal and local bodies and associations or organisations commercial or formed for any other purpose; (c) To collect information upon all topics having a practical interest for members and to communicate the same to them; (d) To promote co-operation in all matters affecting the common interests of members; (e) To hold periodical conferences of its members to discuss and determine action on matters of common interest; (f) To make rules to govern the conduct of its members in specified matters,

to provide penalties for the infringement thereof, and to provide means of determining whether there has been such infringement; (g) To maintain a permanent secretariat in India which should watch over the interests of members and should permit of a constant interchange of information and views; (h) To do all such other things as may be conducive or incidental to the attainment of the aforesaid objects.

Editors' Conference.—During 1940 a Conference of Editors was called by Mr. K. Srinivasan of *The Hindu* to consider the Government of India's restrictions on the Press under the Defence of India Act in connection with the Congress satyagraha movement. The Conference was held at Delhi and formed itself into a body representing the Editors of Indian newspapers. As a result of its representations the Government of India decided to withdraw the restrictions on the Press under the Defence of India Act and to set up in each province a Press Advisory Committee which Provincial Press Advisers should consult in connection with articles about which there was doubt. A Committee was also set up at Delhi to act in conjunction with the Chief Press Adviser. These Committees are intended to act as a sort of liaison between the Press and Government, and are appointed with the sanction of both Government and the President of the Editors' Conference.

The All-India Newspaper Editors' Conference subsequently adopted a constitution with the following aims and objects:—(a) To preserve the high traditions and standards of journalism. (b) To serve and safeguard the interests of the Press in regard to the publication of news and fair comment. (c) To secure all facilities and privileges to the Press for the due discharge of its responsibilities. (d) To represent the Press in India in its relations with the public and public institutions and particularly in its relations to Government to set up Committees who would act as liaison between the Government and the Press as a whole. (e) To establish and develop contacts with Association with similar objects in other countries.

The Standing Committee of the Editors' Conference which is representative of the editors of English and Indian language newspapers and news-agencies keeps itself in touch with the Government of India and its meetings are generally attended by a spokesman of Government.

The general outlines of the restraint to be observed by the editors are laid down by this Committee for the whole Dominion.

Provincial Press Advisory Committees function in most of the provinces and a senior official if not the Minister in charge, of the Home Department keeps himself in close touch with the proceedings of the Committee. From time to time procedure is laid down by these Committees regarding restraints to be observed in publication or dissemination of matters tending to communal differences.

The Indian National Congress

FOR a complete history of the movement represented by the Indian National Congress the reader is referred to earlier editions of the *Indian Year Book*.

The Congress was founded in 1885 by Mr. Allan Octavian Hume, a retired member of the Indian Civil Service, and it held its first session in Bombay during Christmas of that year. The fundamental principles of the Congress then laid down were:—

Firstly, the fusion into one national whole of all the different and discordant elements that constitute the population of India;

Secondly, the gradual regeneration, along all lines, mental, moral, social and political of the nation thus evolved; and

Thirdly, the consolidation of union between England and India by securing the modification of such of the conditions as may be unjust or injurious to the latter country.

Early Split.—With these objects in view the Congress pursued an uneventful career until 1907. It undoubtedly exercised a great influence in inducing a spirit of national unity amongst the diverse peoples of India, in focussing the chief political grievances and in providing a training ground for Indian politicians. But in 1907 the extremists, chiefly of the Deccan and the Central Provinces, who had for some time chafed under the control of the older generation, succeeded in wrecking the Surat session of the Congress and produced a split. The senior members of the Congress therefore re-crystallised its creed in definite terms. They laid down that—

“The objects of the Indian National Congress are the attainment by the people of India of a system of Government similar to that enjoyed by the self-governing members of the British Empire, and a participation by them in the rights and responsibilities of the Empire on equal terms with those members. These objects are to be achieved by constitutional means by bringing about a steady reform of the existing system of administration and by promoting national unity, fostering public spirit and developing and organising the intellectual, moral, economic and industrial resources of the country.”

For some years following 1907 efforts were made to heal the split, but these were without avail. In 1916 a re-united Congress met at Lucknow under the presidency of Babu Ambica Charan Muzumdar of Faridpur in Bengal; but the union then effected was purely superficial. The difference between the moderates and the extremists proved to be fundamental, and the extremists captured the machinery of the Congress, so that from the period of the special session held at Calcutta in September 1920 the Congress passed entirely under the domination of Mahatma Gandhi and his followers.

In 1927 the Congress adopted independence as the goal of India. In the following two years the Congress made what the extremist left described as a climb-down. At its 1928 session the Congress, while adhering to Independence, agreed to accept Dominion Status, if granted, before the end of 1929.

Ideal of Independence.—Things were tending towards a satisfactory settlement when in the latter half of 1929 the Congress insisted on the immediate grant of Dominion Status or an assurance that Dominion Status would be the basis of discussion at the Round Table Conference to be convened in England between representatives of England, British India and the Indian States.

Here was the parting of the ways. The Liberals went their way and the Congress its own. In fulfilment of the “ultimatum” issued at its previous session, the Congress, at its 1929 session, declared itself for complete independence or “Purna Swaraj.” Throughout the year 1930 the Congress was engaged in a defiance of the law of the land which, it was hoped, would help India, to attain complete independence.

Early next year the Congress suspended civil disobedience by virtue of an agreement arrived at with the Government.

As a result of this Mahatma Gandhi, on behalf of the Congress, went to London to take part in the Round Table Conference. While he was away things took a turn for the worse in the country, and matters reached a crisis with the birth of the New Year. In 1932 the Government bent all its efforts to making it impossible for the Congress to carry on its normal activities and succeeded fully in its object. The Congress was crushed and all forms of Congress work throughout the country were successfully prevented. In fact as well as in law the Congress ceased to exist.

In the middle of 1934 the civil disobedience movement, which had rendered the Congress illegal, was withdrawn. In the autumn of that year Mahatma Gandhi retired from the Congress, although he remained in practice the virtual dictator of the organisation. During the next four or five years, the Congress functioned as a constitutional organisation. It was actually in charge of His Majesty's Government for more than two years in eight provinces under the 1935 constitution.

(See past issues of the *Indian Year Book* for a history of the non-co-operation and the civil disobedience movements, and for the parliamentary activities of the Congress).

This parliamentary phase proved to be short-lived. Soon after the declaration of the Second World War the Congress withdrew its Ministers in the provinces as a protest against the fact that India was made a belligerent without consulting the people, and two, that India cannot assist the war effort unless one of the aims of the war was the grant

of freedom to India. The Congress gave supreme command of the organisation and its members to Mahatma Gandhi who launched another campaign of civil disobedience—this time on the issue that Congressmen should have the right non-violently to preach against India's war effort.

Thousands of Congressmen answered the Mahatma's call, uttered anti-war slogans and courted jail. This civil disobedience campaign was not of the mass type, but restricted to individuals carefully chosen by Mahatma Gandhi himself. Even so, close upon 25,000 representative Congress leaders took part in the campaign.

Ramgarh.—The first great event in the history of the Congress after the war started was the annual session at Ramgarh in April 1940. Maulana Abul Kalam Azad presided. Only one resolution was adopted by the Ramgarh session. It stated *inter alia*:

“The Congress hereby declares again that nothing short of complete independence can be accepted by the people of India. Indian freedom cannot exist within the orbit of Imperialism and Dominion Status or any other status within the imperial structure is wholly inapplicable to India...”

“The Congress is further of opinion that, while it will always be ready, as it ever has been, to make every effort to secure communal harmony, no permanent solution is possible except through a Constituent Assembly, where the rights of all recognised minorities will be fully protected by agreement, as far as possible, between the elected representatives of various majority and minority groups, or by arbitration if agreement is not reached on any point. Any alternative will lack finality...”

“The Congress cannot admit the right of the rulers of Indian States or of foreign vested interests to come in the way of Indian freedom. Sovereignty in India must rest with the people, whether in the States or the provinces, and all other interests must be subordinated to their vital interests. The Congress holds that the difficulty raised in regard to the States is of British creation...” (For full text of the resolution see past issues of *The Indian Year Book*).

The weeks that followed the Ramgarh session of the Congress were occupied by intensive preparation for a direct action movement under the guidance of Mahatma Gandhi, side by side with expressions of hope by the Mahatma and other Congress leaders that such a struggle might be avoided. Mahatma Gandhi's notion of “preparation” was as usual on the constructive plane, that is, hand-spinning, removal of untouchability and promotion of Hindu-Muslim unity.

As for communal unity, Mahatma Gandhi stoutly resisted the Muslim League demand for Pakistan but declared that, although, as a man of non-violence, he could not resist the proposed partition with force, he could never be a willing party to the proposed vivisection of the country. He wrote: “My whole soul rebels against the idea that Hinduism and Islam represent two antagonistic cultures and doctrines. To assent to such a doctrine is for me denial of God...”

POONA OFFER

A few weeks later the war took a sudden turn for the worse. The invasion of the Low Countries, the capitulation of Belgium and the collapse of France produced in India a new feeling in favour of Britain. There was clear evidence of a desire on the part of many Congress leaders actively to help in the war in spite of Mahatma Gandhi's known convictions on the subject.

By now the feeling had grown among Indians that the war had come closer to this country and that the danger of external aggression and internal disorder were not remote possibilities. This realisation caused a revolution in the minds of most Congressmen who did not adhere steadfastly to the Mahatma and his non-violence in any eventuality. The Congress Working Committee virtually abandoned him and offered to co-operate in the war effort provided a fully representative National Government was formed at the centre. Apart from the ideological separation from the Mahatma, this offer constituted a big jump for the Congress—from non-participation in any war to active help in the prosecution of this war.

The resolution said, among other things:—

“The Working Committee are more than ever convinced that the acknowledgment by Great Britain of the complete independence of India is the only solution of the problems facing both India and Britain and are, therefore, of opinion that such an unequivocal declaration should be immediately made and that, as an immediate step in giving effect to it, a provisional National Government should be constituted at the Centre, which, though formed as a transitory measure, should be such as to command the confidence of all the elected elements in the Central Legislature, and secure the closest co-operation of the responsible Governments in the provinces.

“The Working Committee are of opinion that, unless the aforesaid declaration is made, and a National Government accordingly formed at the Centre without delay, all efforts at organising the material and moral resources of the country for defence cannot in any sense be voluntary or as from a free country, and will, therefore, be ineffective. The Working Committee declare that if these measures are adopted, it will enable the Congress to throw in its full weight in the efforts for the effective organisation of the defence of the country.”

Government Response.—Then came the famous statement by the Viceroy, known as the British Government's August offer. (For full text see past issues of *The Indian Year Book*.) It said *inter alia*:

“Last October His Majesty's Government again made it clear that Dominion Status was their objective for India. They added that they were ready to authorise the expansion of the Governor-General's Council to include a certain number of representatives of political parties, and they proposed the establishment of a Consultative Committee...”

"His Majesty's Government do not feel that they should any longer postpone the expansion of the Governor-General's Council, and the establishment of a body which will more closely associate Indian public opinion with the conduct of the war by the Central Government.

"They (His Majesty's Government) have authorised me accordingly to invite a certain number of representative Indians to join my Executive Council.

"They have authorised me further to establish a War Advisory Council, which would meet at regular intervals and which would contain representatives of the Indian States and of other interests in the national life of India as a whole ...

"With regard to the machinery for building, within the British Commonwealth of Nations, a new constitutional scheme when the time comes, there has been very strong insistence that the framing of that scheme should be primarily the responsibility of Indians themselves ...

"It is clear that a moment when the Commonwealth is engaged in a struggle for existence is not one in which fundamental constitution issues can be decisively resolved.

"But His Majesty's Government authorise me to declare that they will most readily assent to the setting up, after the conclusion of the war, with the least possible delay, of a body representative of the principal elements in India's national life in order to devise the framework of the new Constitution, and they will lend every aid in their power to hasten decision on all relevant matters to the utmost degree."

The Congress, however, rejected the Viceroy's offer as being wholly opposed not only to the principle of democracy, acclaimed by the British Government in their war aims, but also to the best interests of India.

In order to meet the League objections to the Congress idea of a National Government Mr. C. Rajagopalachariar made what has come to be known as a "sporting offer". He said: "In answer to Mr. Amery's difficulty as to the minorities, I may make a sporting offer that if His Majesty's Government agree to a Provisional National Government being formed at once, I will undertake to persuade my colleagues in the Congress to agree to the Muslim League being invited to nominate the Prime Minister and to let him form a National Government as he would consider best. If there is sincerity in the difficulty felt by His Majesty's Government it should be met by what I offer." Nothing, however, came out of this "sporting offer."

CIVIL DISOBEDIENCE

When this "last gesture" was ignored, the Congress returned to Mahatma Gandhi and his programme. This was the outcome of the deliberations of the All-India Congress Committee held in Bombay in the middle of September 1940. The A.I.C.C. passed a resolution confirming the August resolution of the Working Committee rejecting the Viceroy's offer and requesting the Mahatma to take over the leadership of the Congress.

About a fortnight after this, Mahatma Gandhi unfolded his plan of individual civil disobedience restricted to a limited number of satyagrahis.

He chose as his first satyagrahi Mr. Vinoba Bhave who had been doing village uplift work. The satyagraha for the time being was to be confined to Mr. Bhave. Accordingly Mr. Vinoba Bhave set out on a marching tour from village to village preaching non-participation in war on grounds of non-violence. He enjoyed freedom for a couple of days but was arrested on the third day and sentenced to imprisonment for doing an act prejudicial under the Defence of India Ordinance.

It soon became known that Pandit Jawaharlal Nehru was to be the second satyagrahi but before he could formally defy the law he was arrested in respect of certain speeches made by him weeks earlier, and sentenced to four years' imprisonment.

Then followed a series of arrests of persons chosen by the Mahatma. They included most of the members of the Congress Working Committee, most of the Premiers and Ministers of the former Congress Governments and a large number of members of the Central Legislature and other prominent Congressmen all over the country.

The general feeling of political inaction engendered by the satyagraha movement, the restlessness of the public at the absence of any gesture from the Government, the conviction that the country's war effort was being adversely affected, ever so slightly, by the continuance of leaders in prison, and the insistent demands of non-Congress leaders led the Government to release the prisoners towards the end of 1941. The Government of India announced that "confidence in the determination of all responsible opinion in India to support the war effort until victory is secured, have reached the conclusion that those civil disobedience prisoners whose offences have been formal or symbolic in character can be set free." Accordingly the bulk of satyagrahi prisoners were released.

Co-operation Offered.—From the statements issued by the Congress President, Pandit Nehru and others soon after their release it became apparent that once again they favoured active participation in the armed defence of India and the prosecution of the war to victory if Indians were given complete control of affairs and if steps were taken to lay the foundations of Indian freedom. There was, however, no inclination to shelve the Indian political issue during the war, and the declaration was made by more than one leader that India would participate "only as a free nation and not as slaves."

The Congress Working Committee met at Bardoli and made an important change in Congress policy. Civil disobedience was suspended and the door was left open for negotiations with the British Government for a political settlement.

A resolution was passed reiterating their attitude towards the war as set forth in their statement issued on September 14, 1939, wherein they condemned the Nazi and Fascist aggression and expressed their willingness to help the cause

of freedom and democracy, provided the objectives of the war were clearly stated and acted upon insofar as was possible at present. If freedom and democracy were those objectives, then they must necessarily include the ending of imperialism and the recognition of the independence of India.

Another resolution relieved Mahatma Gandhi of the responsibility laid upon him by the A.I.C.C. in September 1940, while reiterating that the policy of non-violence adopted under his guidance for the attainment of 'swaraj', and which had proved so successful in leading to mass awakening and otherwise would be adhered to by the Congress. (For details see past issues of the *Indian Year Book*.)

Japan's entry into the war and her early gains in Malaya, the Netherlands, East Indies and Burma impelled the British authorities to consider whether the time had not arrived for settling the political problems in India if only to promote unity of purpose and co-ordinated endeavour in this country in order effectively to meet Japanese invasion of India. It is also widely believed that Russia, China and the United States of America brought their influence to bear upon the British authorities in this behalf.

CRIPPS' OFFER

Shortly thereafter the Prime Minister made a statement in Parliament announcing that Sir Stafford Cripps, the Socialist leader who had recently returned to England from his diplomatic successes at Moscow and had been made the Lord Privy Seal in a reconstituted War Cabinet, would go to India immediately on a special mission. Mr. Churchill (see past year's issues) said:—

"The War Cabinet have agreed unitedly upon conclusions for the present and future action, which, if accepted by India as a whole, would avoid alternative dangers, either that the resistance of a powerful minority might impose an indefinite veto upon the wishes of the majority or that a majority decision might be taken which would be resisted to a point destructive of internal harmony and fatal to the setting up of a new constitution."

Sir Stafford Cripps flew to India in a few days and held consultations with representatives of the Congress, the Muslim League, the Hindu Mahasabha, the Princesses' Chamber, and a number of other political and sectional organisations. Here is the text of the offer which he brought to India in the name of the British Cabinet:—

"His Majesty's Government, having considered the anxieties expressed in this country and in India as to the fulfilment of promises made in regard to the future of India, have decided to lay down in precise and clear terms the steps which they propose shall be taken for the earliest possible realisation of self-government in India. The object is the creation of a new Indian Union which shall constitute a Dominion associated with the United Kingdom and other Dominions by a common allegiance to the Crown but equal to them in every respect, in no way subordinate in any aspect of its domestic or external affairs.

"His Majesty's Government, therefore, make the following Declaration:—

"(a) Immediately upon cessation of hostilities steps shall be taken to set up in India in manner described hereafter an elected body charged with the task of framing a new Constitution for India.

"(b) Provision shall be made, as set out below, for participation of Indian States in the Constitution-making body.

"(c) His Majesty's Government undertake to accept and implement forthwith the Constitution so framed subject only to:—

"(i) The right of any Province of British India that is not prepared to accept the new Constitution to retain its present constitutional position, provision being made for its subsequent accession if it so decides.

"With such non-acceding Provinces, should they so desire, His Majesty's Government will be prepared to agree upon a new Constitution giving them the same full status as the Indian Union and arrived at by a procedure analogous to that here laid down.

"(ii) The signing of a Treaty which shall be negotiated between His Majesty's Government and the Constitution-making body. This Treaty will cover all necessary matters arising out of the complete transfer of responsibility from British to Indian hands; it will make provision, in accordance with undertakings given by His Majesty's Government, for the protection of racial and religious minorities; but will not impose any restriction on the power of the Indian Union to decide in future its relationship to other Member States of the British Commonwealth.

"Whether or not an Indian State elects to adhere to the Constitution it will be necessary to negotiate a revision of its Treaty arrangements so far as this may be required in the new situation.

Responsible Government.—"(d) The Constitution-making body shall be composed as follows unless the leaders of Indian opinion in the principal communities agree upon some other form before the end of hostilities:—

"Immediately upon the result being known of Provincial Elections which will be necessary at the end of hostilities, the entire membership of the Lower Houses of Provincial Legislatures shall as a single electoral college proceed to the election of the Constitution-making body by the system of proportional representation. This new body shall be in number about 1/10th of the number of the electoral college.

"Indian States shall be invited to appoint representatives in the same proportion to their total population as in the case of representatives of British India as a whole and with the same powers as British Indian members.

"(e) During the critical period which now faces India and until the new Constitution can be framed His Majesty's Government must inevitably bear the responsibility for, and retain the control and direction of, the defence of India as part of their world war effort, but the task of organising to the full the military moral and

material resources of India must be the responsibility of the Government of India with the co-operation of the peoples of India. His Majesty's Government desire and invite the immediate and effective participation of the leaders of the principal sections of the Indian people in the councils of their country, of the Commonwealth and of the united nations. Thus they will be enabled to give their active and constructive help in the discharge of a task which is vital and essential for the future freedom of India."

In announcing the scheme, Sir Stafford made it clear that it was only a proposal submitted to the leaders of Indian opinion by the War Cabinet and that its publication was not the publication of a declaration by His Majesty's Government but only a declaration which they would be prepared to make if it met with sufficiently general and favourable acceptance from the various sections of Indian people.

After protracted negotiations, in which representatives of the principal Indian organisations met, in addition to Sir Stafford, the Commander-in-Chief and Col. Louis Johnson, the personal representative in India of President Roosevelt, the Congress rejected the scheme. The Hindu Mahasabha had already rejected it (see chapter on Hindu Mahasabha) and the Muslim League followed suit (see chapter on Muslim League), while other organisations expressed disapproval in more or less strong language (see chapter on the Indian National Liberal Federation).

CONGRESS OBJECTIONS

The Congress Working Committee, which held what was perhaps the longest session in its history, passed a resolution of which the following is a summary:—

"The British War Cabinet's new proposals relate principally to the future upon the cessation of hostilities.

"The Committee, while recognising that self-determination for the people of India is accepted in principle in that uncertain future, regret that this is fettered and circumscribed. . . . Even the constitution-making body is so constituted that the people's right to self-determination is vitiated by the introduction of non-representative elements. . . .

"The complete ignoring of the ninety millions of the people of the Indian States and their treatment as commodities at the disposal of their rulers is a negation of both democracy and self-determination. . . .

"The acceptance beforehand of the novel principle of non-accession for a province is also a severe blow to the conception of Indian unity and an apple of discord likely to generate growing trouble in the provinces, which may well lead to further difficulties in the way of the Indian States merging themselves in the Indian Union. . . .

"Nevertheless the Committee cannot think in terms of compelling the people in any territorial unit to remain in an Indian Union against their declared and established will. . . . The acceptance of the principle inevitably involves that no changes should be made which

result in fresh problems being created and compulsion being exercised on other substantial groups within that area. Each territorial unit should have the fullest possible autonomy within the Union, consistently with a strong national state. The proposal now made on the part of the British War Cabinet encourages and will lead to attempts at separation at the very inception of a union and thus create friction just when the utmost co-operation and goodwill are most needed. . . .

Freedom Now.—"Any proposal concerning the future of India must demand attention and scrutiny, but in today's grave crisis, it is the present that counts, and even proposals for the future are important in so far as they affect the present. . . . For this present the British War Cabinet's proposals are vague and altogether incomplete, and it would appear that no vital changes in the present structure are contemplated.

"It has been made clear that the defence of India will in any event remain under British control. . . . The Committee would repeat that an essential and fundamental prerequisite for the assumption of responsibility by the Indian people in the present is their realisation as a fact that they are free and are in charge of maintaining and defending their freedom. . . . It is manifest that the present Government of India, as well as its provincial agencies are lacking in competence, and are incapable of shouldering the burden of India's defence. It is only the people of India through their popular representatives who may shoulder this burden worthily. But that can only be done by present freedom, and full responsibility being cast upon them.

"The Committee, therefore, is unable to accept the proposals put forward on behalf of the British War Cabinet."

Sir Stafford Cripps then announced that the draft declaration of the British Government had been withdrawn and that the position reverted to what it was before he came out to India, "though not quite perhaps to that position."

League Demand Rejected.—In spite of the failure of the effort of Sir Stafford Cripps and the bitter tone of the final remarks in the controversy, responsible Indian leaders reiterated their determination to defend the country against aggression.

Just at this time, on the eve of the meeting of the All-India Congress Committee, called at Allahabad at the end of April 1942, the Madras Congress Legislature Party, under the guidance of Mr. Rajagopalachari, passed a resolution recommending to the A.-I.C.C. to "acknowledge the Muslim League's claim for separation should the same be persisted in when the time comes for framing the future constitution of India" and to "invite the Muslim League for consultation for the purpose of arriving at an agreement and securing the installation of a National Government to meet the present emergency."

The meeting also passed a resolution voicing "the general feeling in this part of the country that there should be at this critical juncture a popular Government in this province doing its

utmost to secure the requisite conditions for the people to play their part. The party is of the opinion further that to facilitate united and effective action in this regard by such a popular Government, the Muslim League should be invited to participate in it."

The party requested the A.-I. C. C. to permit it to take steps to this end, notwithstanding the general All-India policy followed by the Congress.

These resolutions met with a storm of protest from Congress leaders outside Madras, but were welcomed by some moderate leaders and by Muslim League circles.

The Madras resolution acknowledging the Muslim League's claim to separation came up for consideration before a meeting of the A.-I.C.C. at Allahabad in April 1942, but was defeated by 120 votes against 15, while a counter-resolution, moved by Pandit Jagat Narain, opposing any proposal to disintegrate India, was carried by 92 votes to 17.

When the bold line suggested by him proved unacceptable to the bulk of Congressmen Mr. Rajagopalachari had to resign his membership of the Congress Working Committee and his leadership of the Madras Legislature Congress party.

"QUIT INDIA"

The weeks that followed the Allahabad meeting of the All-India Congress Committee witnessed Mahatma Gandhi's advocating in his weekly organ, *Harijan*, policies outlined in the resolutions adopted at Allahabad and resisting Mr. Rajagopalachari's proposal to settle with the Muslim League on the basis of dividing India. The South Indian leader, for his part, carried on a raging and tearing campaign in favour of making peace with Qaid-e-Azam Jinnah and thereby facilitating the establishment of a National Government, which, he affirmed, was essential not only for the well-being of India but also for the object of effectively defending the country against Japanese aggression.

It became apparent from Mahatma Gandhi's writings and utterances that he was growing more and more restless and bitter towards Britain for the latter's refusal to concede the Congress demand. Towards the end of April the Mahatma conceived an idea which later crystallised into what has come to be known as the "Quit India" demand. He urged the withdrawal of the British from India not only in India's interest but also for the sake of Britain. He wrote in *Harijan*: "I see no Indian freedom peeping through all this preparation for the so-called defence of India. It is a preparation pure and simple for the defence of the British Empire." Later he said: "Hitherto the rulers have said, 'we would gladly retire if we know to whom we should hand over the reins'. My answer now is, 'leave India to God; if that is too much, then leave her to anarchy'."

As time rolled on Mahatma Gandhi appeared to abandon the policy of non-embarrassment to Britain's war effort in India. He also hinted

that his views on the moral basis of Britain's war had undergone a change. In an interview to the press in Bombay in the middle of May, he stated: "I used to say that my moral support was entirely with Great Britain. I am very sorry to have to confess today that my mind refuses to give that moral support." He added, "This ordered, disciplined anarchy of British rule should go, and if there is complete lawlessness in India as a result, I would risk it, for I believe that 22 years of continuous effort at educating India along the lines of non-violence will not have gone in vain and people will evolve real popular order out of chaos."

Not Pro-Japanese.—The Mahatma took care to avoid giving the impression that his demand for the withdrawal of Britain was the outcome of pro-Japanese sentiment. He wrote: "Of course, the people must not, on any account, lean on the Japanese to get rid of the British power. That were a remedy worse than the disease. But in this struggle every risk has to be run in order to cure ourselves of the biggest disease, a disease which has sapped our manhood and almost made us feel as if we must for ever be slaves. . . . I am more interested than the British in keeping the Japanese out. For Britain's defeat in Indian waters may mean only the loss of India, but if Japan wins, India loses everything. . . .

"My proposal is one-sided, i.e., for the British Government to act upon, wholly irrespective of what Indians would do or would not do. I have even assumed temporary chaos on their withdrawal. . . .

"Assuming that the national Government is formed and it answers my expectations, its first act would be to enter into a treaty with the United Nations for defensive operations against aggressive powers, it being common cause that India will have nothing to do with any of the Fascist powers and India would be morally bound to help the United Nations. . . .

"It should be understood that the Indian army has been disbanded with the withdrawal of British power. Again if I have any say in the councils of the national Government, all its power, prestige and resources would be used towards bringing about world peace. But of course after the formation of the national Government my voice may be a voice in the wilderness and nationalist India may go war-mad."

Answering the criticism that the withdrawal of Britain might lead to Japanese occupation of India, Mahatma Gandhi wrote: "Abrupt withdrawal of the Allied troops might result in Japan's occupation of India and China's sure fall. I had not the remotest idea of any such catastrophe resulting from my action. Therefore I feel that if in spite of the acceptance of my proposal, it is deemed necessary by the Allies to remain in India to prevent Japanese occupation, they should do so, subject to such conditions as may be prescribed by the national Government that may be set up after the British withdrawal."

Summarising the implications of his proposals the Mahatma wrote early in July:—

1. India becomes free of all financial obligation to Britain;
2. The annual drain to Great Britain stops automatically;
3. All taxation ceases except what the replacing Government imposes or retains;
4. The deadweight of an all-powerful authority keeping under subjection the tallest in the land is lifted at once;
5. In short, India begins a new chapter in her national life, as I shall hope will affect the fortunes of the war with non-violence as her predominant sanction. This non-violence will no longer take the shape of non-co-operation and the like.

"All this may not come to pass," he continued. "I do not mind. It is worth fighting for, it is worth staking all that the nation has."

DEMAND FOR WITHDRAWAL

With the country thus prepared, the Working Committee of the Congress met at Wardha in the middle of July and passed a lengthy resolution embodying the Mahatma's ideas. The resolution ran:—

"Events happening from day to day, and the experience that the people of India are passing through, confirm the opinion of Congressmen that British rule in India must end immediately, not merely because foreign domination, even at its best, is an evil in itself and a continuing injury to the subject people, but because India in bondage can play no effective part in defending herself and in affecting the fortunes of the war that is desolating humanity."

"Ever since the outbreak of the world war, the Congress has studiously pursued a policy of non-embarrassment. Even at the risk of making its *satyagraha* ineffective, it deliberately gave it a symbolic character, in the hope that this policy of non-embarrassment, carried to its logical extreme, would be duly appreciated and that real power would be transferred to popular representatives, so as to enable the nation to make its fullest contribution towards the realisation of human freedom throughout the world, which is in danger of being crushed. It had also hoped that negatively nothing would be done which was calculated to tighten Britain's stranglehold on India."

"These hopes, have, however, been dashed to pieces. The abortive Cripps proposals showed in the clearest possible manner that there was no change in the British Government's attitude towards India. . . . The Committee hold that all aggression must be resisted, for any submission to it must mean the degradation of the Indian people and the continuation of their subjection."

"The Congress would change the present ill-will against Britain into good-will and make India a willing partner in a joint enterprise of securing freedom for the nations and peoples

of the world and in the trials and tribulations which accompany it. This is only possible if India feels the glow of freedom."

"The Congress representatives have tried their utmost to bring about a solution of the communal tangle. But this has been made impossible by the presence of the Foreign Power whose long record has been to pursue relentlessly the policy of divide and rule. . . . On the withdrawal of British Rule in India, responsible men and women of the country will come together to form a Provisional Government. . . . Representatives of Free India and representatives of Great Britain will confer together for the adjustment of future relations and for the co-operation of the two countries as allies in the common task of meeting aggression."

"In making the proposal for the withdrawal of British Rule from India, the Congress has no desire whatsoever to embarrass Great Britain or the Allied Powers in their prosecution of the war. . . . The Congress is, therefore, agreeable to the stationing of the armed forces of the Allies in India, should they so desire, in order to ward off and resist Japanese or other aggression, and to protect and help China."

"The proposal of withdrawal of the British Power from India was never intended to mean the physical withdrawal of all Britishers from India."

"The Congress realises that there may be risks involved in such a course. Such risks, however, have to be faced by any country in order to achieve freedom and, more especially at the present critical juncture, in order to save the country and the larger cause of freedom the world over from far greater risks and perils."

"While, therefore, the Congress is impatient to achieve the national purpose, it wishes to take no hasty step and would like to avoid, in so far as is possible, any course of action that might embarrass the United Nations."

"Should, however, this appeal fail, the Congress cannot view without the gravest apprehension the continuation of the present state of affairs. . . . The Congress will then be reluctantly compelled to utilise all the non-violent strength it might have gathered since 1920. . . . Such a widespread struggle would inevitably be under the leadership of Gandhiji."

"OPEN REBELLION"

Commenting on the resolution, Mahatma Gandhi said: "It will be a mass movement of a strictly non-violent character. It will include all that a mass movement can include. I do not want rioting as a direct result. . . . My intention is to make the thing as short and swift as possible. But if I am dragged into jail, it is difficult to say what I may do. But I can fast, as I have fasted before now, though I should try to avoid such an extreme step so far as possible." Discussing the possibility of negotiations, he said: "There is no room left for negotiations in the proposal for withdrawal. Either they recognise independence or they don't. After that recognition many things can follow. After all it is an open rebellion."

In rebuttal of the charge that this projected movement was conceived with a view to helping Japan, the Mahatma wrote in the last week of July, an article addressed "To Every Japanese," in which he said he deeply grieved the unprovoked attack against China and the "merciless devastation of that great and ancient land. We are in the unique position of having to resist an imperialism that we detest no less than yours and Nazism. Our resistance to it does not mean harm to the British people. We seek to convert them. Ours is an unarmed revolt against British rule."

"Our movement demanding the withdrawal of the British Power from India should in no way be misunderstood. In fact, if we are to believe your reported anxiety for the independence of India, a recognition of that independence by Britain should leave you no excuse for any attack on India. Moreover the reported profession sorts ill with your ruthless aggression against China."

In the period between the adoption by the Working Committee of its July resolution and the meeting of the A-I.C.C. in August Mahatma Gandhi indicated that he was prepared to meet the Viceroy and discuss his demand with him and that he would call off the movement if he were convinced by anyone that in the midst of war the British Government could not declare India free without jeopardising the war effort. He intended to handle the movement gently, but he would not hesitate to go to the extreme limit if he found that no impression was produced on the British Government or the Allied Powers.

A Warning.—Publication of the Working Committee's July resolution aroused much hostile comment abroad in reply to which the Mahatma wrote: ".... The Justice of the demand for the ending of British Power has never been questioned; the moment chosen for enforcing it is the target of attack. It is clear as crystal in the Working Committee resolution, why this moment is chosen. . . . We know, that if India does not become free now, the hidden discontent will burst forth into a welcome to the Japanese, should they effect a landing."

"But the critics say, 'To whom are the British rulers to hand the keys on their withdrawal?' It is a good question. Here is what Maulana Abul Kalam Azad, the Congress President, has said: 'The Congress always stands, firstly for sympathy towards democratic countries, secondly, never desires to embarrass Britain and her war effort, and, thirdly it stands for opposition to the Japanese aggression. . . . The Congress President added that he had no objection to Britain handing over power to the Muslim League or any other party provided it was real independence. . . .'"

Apart from Indo-British relationship Mahatma Gandhi made an important change in his policy in the summer of 1942 when he gave up his old belief that internal unity must precede political emancipation and declared instead that communal unity could only follow the removal of the third party.

Throughout this controversy, Pandit Jawaharlal Nehru steadfastly advocated that nothing should be said or done which would render India vulnerable to Japanese attack. According to Pandit Nehru, "the fundamental way to look at it is how ultimately to increase the strength of the Indian people to meet invasion. If I am convinced that I might weaken India I will not take that step."

For a time, there seemed to be some difference of opinion among the front rank Congress leaders on the wisdom of launching a political movement when the enemy was at the country's gates; but eventually unanimity was reached and a resolution was passed (see above) declaring that the withdrawal of British from India was necessary both for Indian independence and for effective resistance to the Axis and that if the British refuse to yield, the Congress had no alternative but to launch a campaign of civil disobedience.

AUGUST RESOLUTION

On the eve of the meeting of the A-I.C.C. in Bombay, the Working Committee of the Congress met and drafted the following resolution for submission to the A-I.C.C.:—

"The All-India Congress Committee has given the most careful consideration to the reference made to it by the Working Committee in their resolution dated July 14, 1942, and to subsequent events, including the development of the war situation, the utterances of responsible spokesmen of the British Government, and the comments and criticisms made in India and abroad. The Committee approves of and endorses that resolution and is of opinion that events subsequent to it have given it further justification, and have made it clear that the immediate ending of British rule in India is an urgent necessity."

"The Committee has viewed with dismay the deterioration of the situation on the Russian and Chinese fronts and conveys to the Russian and Chinese peoples its high appreciation of their heroism in defence of their freedom. This increasing peril makes it incumbent on all those who strive for freedom and who sympathise with the victims of aggression, to examine the foundations of the policy so far pursued by the Allied Nations, which had led to repeated and disastrous failure. It is not by adhering to such aims and policies and methods that failure can be converted into success, for past experience has shown that failure is inherent in them. These policies have been based not on freedom so much as on the domination of subject and colonial countries, and the continuation of the imperialist tradition and method."

Constituent Assembly.—"The peril of today, therefore, necessitates the independence of India and the ending of British domination. . . . The A-I.C.C. therefore repeats with all emphasis the demand for the withdrawal of the British Power from India. On the declaration of India's independence, a Provisional Government will be formed and Free India will become an ally of the United Nations, sharing with them in the trials and tribulations of the joint enterprise of the struggle for freedom."

Provisional Government can only be formed by the co-operation of the principal parties and groups in the country... The Provisional Government will evolve a scheme for a Constituent Assembly which will prepare a constitution for the Government of India acceptable to all sections of the people. This constitution, according to the Congress view, should be a federal one, with the largest measure of autonomy for the federating units, and with the residuary powers vesting in these units.

"The freedom of India must be the symbol of and prelude to this freedom of all other Asiatic nations under foreign domination..."

"While the A.I.C.C. must primarily be concerned with the independence and defence of India in this hour of danger, the Committee is of opinion that the future peace, security and ordered progress of the world demand a World Federation of free nations, and on no other basis can the problems of the modern world be solved... An independent India would gladly join such a World Federation and co-operate on an equal basis with other countries in the solution of international problems... The Committee regretfully realises, however, that despite the tragic and overwhelming lessons of the war and the perils that overhang the world, the Governments of few countries are yet prepared to take this inevitable step towards World Federation..."

The Coming Struggle.—"The A.I.C.C. would yet again, at this last moment, in the interest of world freedom, renew this appeal to Britain and the United Nations. But the Committee feels that it is no longer justified in holding the nation back from endeavouring to assert its will against an imperialist and authoritarian Government... The Committee resolves, therefore, to sanction for the vindication of India's inalienable right to freedom and independence, the starting of a mass struggle on non-violent lines on the widest possible scale, so that the country might utilise all the non-violent strength it has gathered during the last twenty-two years of peaceful struggle. Such a struggle must inevitably be under the leadership of Gandhiji..."

"The Committee appeals to the people of India to face the dangers and hardships that will fall to their lot with courage and endurance, and to hold together under the leadership of Gandhiji, and carry out his instructions as disciplined soldiers of Indian freedom. They must remember that non-violence is the basis of this movement. A time may come when it may not be possible to issue instructions or for instructions to reach our people, and when no Congress Committees can function. When this happens, every man and woman, who is participating in this movement must function for himself or herself within the four corners of the general instructions issued."

"Lastly, while the A.I.C.C. has stated its own view of the future governance under free India, the A.I.C.C. wishes to make it quite clear to all concerned that by embarking on mass struggle it has no intention of gaining power for the Congress. The power, when it comes, will belong to the whole people of India."

The A.I.C.C. met in Bombay on the 7th August in a tense atmosphere. Maulana Abul Kalam Azad, opening the proceedings, refuted the suggestion that once India was given freedom she would ally herself with Japan. Mahatma Gandhi, who followed the President, maintained that he had no hatred for the British. "In fact," he remarked, "I am the greatest friend of theirs now, as they are in trouble. I have always believed that they would never lose."

Six amendments were moved, three of which stressed the need for a communal settlement as a condition precedent to the starting of any mass movement. After Pandit Jawaharlal Nehru, the mover of the resolution, had replied to the debate, the President, Maulana Abul Kalam Azad, appealed to the movers of the amendments to withdraw them and save time. Three amendments were then withdrawn, and the remaining three were rejected. The resolution was carried, 13 members voting against it. The total number of members present was nearly 240.

Do or Die.—On the declaration of the result of the resolution, Mahatma Gandhi spoke for nearly 70 minutes in Hindi and for 20 minutes in English.

He observed that he had no objection to the transfer of power to Muslims. The Muslims would then have a body to administer the affairs of the country. That body would command the allegiance not only of Muslims but of Hindus and other communities as well.

Continuing the Mahatma said that he would write to the Viceroy intimating to him the contents of the resolution and the implications thereof. It would not be very long before the Viceroy's reaction was known. Meanwhile he would advise the members and through them other Indians to feel that very day that they had shaken off the bonds of slavery and that they were free men and women.

In his English speech, Mahatma Gandhi remarked that he had the privilege of friendship and trust of many of his friends in India and abroad. Some of them doubted his wisdom and even his honesty. His wisdom was not such a treasure, but honesty was a precious treasure to him. He claimed friendship between the present Viceroy and himself. He wanted Englishmen and the United Nations to examine their hearts and search their hearts. What crime, he asked, had the Congress Committee committed in demanding independence?

The Mahatma concluded: "Every man is free to go to the fullest length under *ahimsa* (non-violence), by complete deadlock, strikes and other non-violent means. Satyagrahis should go out to die and not to live. It is only when individuals go out to seek and face death that the nation will survive. *Karenge ya Marenge* (We shall do or die)."

It was reported that on the eve of the A.I.C.C. meeting and during this session vigorous efforts were made by Congress leaders to contact Qaid-e-Azam Jinnah with a view to arriving at an agreement with the Muslim League.

Just as the Congress was eager to arrive at a settlement with the Muslim League, similarly it was obvious that the Congress would have accepted any genuine gesture from the Government and cheerfully submit to negotiations in respect of details. The view was widely held at the time that subsequent events would have taken a different course if a week or fortnight had been allowed to elapse after the adoption of the A.I.C.C. resolution. "We stand to lose more than the Government as the result of a struggle" said a prominent Congress leader. "We have to face fines, imprisonment and shooting. We will face it all, if necessary; but we certainly wish to avoid it, if possible."

GOVERNMENT CHARGE

Government, however, took a different view of the situation. They were convinced and they claimed they had evidence, that the Congress had no genuine desire to negotiate a settlement but that with peace on their lips they were secretly planning a widespread subversive movement. The Government, therefore, decided to act firmly and quickly.

Within a few hours of the adoption of the "Quit India" resolution by the A.I.C.C. and the termination of its proceedings, Mahatma Gandhi and the other Congress leaders were rounded up under the Defence of India Rules and kept under detention, completely isolated from the outside world. Strict measures were taken to prevent the movement from spreading or taking root. In a resolution of the Governor-General-in-Council published on the morrow of the A.I.C.C. meeting Government expressed regret at the Congress resolution and affirmed their determination to meet the challenge contained in it. The resolution ran:—

"The A.I.C.C. have ratified the resolution passed by the Working Committee of the Indian National Congress on August 6. That resolution demands the immediate withdrawal of British Power from India, and sanctions the starting of a mass struggle on non-violent lines on the widest possible scale.

"The Governor-General-in-Council has been aware, too, for some days past of dangerous preparations by the Congress Party for unlawful, and in some cases violent activities, directed among other things, to the interruption of communications and public utility services, the organisation of strikes, tampering with the loyalty of Government servants, and interference with defence measures, including recruitment."

"The Government of India have waited patiently in the hope that wiser counsels might prevail. They have been disappointed in that hope. To a challenge such as the present there can only be one answer.

"The Government of India would regard it as wholly incompatible with their responsibilities to the people of India, and their obligations to the Allies, that a demand should be discussed the acceptance of which would plunge India into confusion and anarchy internally, and would paralyse her effort in the common cause of human freedom."

"For the demand of the Congress leaders there is no warrant. In the view of the Government of India that demand is difficult, if not impossible, to reconcile with a full sense of responsibility on the part of the leaders of the Congress Party, or a full appreciation by them of the realities of the present situation..."

"Nor can the Government of India accept the claim of the Congress Party to speak for India as a whole... Acceptance of the proposals now put forward by the Congress Party must mean the abandonment of all those large and powerful elements in the population which have condemned the course of action proposed by the Congress Party... But for the resistance of the Congress Party to all constructive endeavours, India might even now be enjoying self-government."

No Flinching.—"British policy for India's future stands clear. It is that once hostilities cease, India shall devise for herself with full freedom of decision; and on a basis embracing all and not only a single party, the form of Government which she regards as most suited to her conditions; and that in the meantime Indian leaders shall fully participate in the Government of their country and in the councils of the Commonwealth and of the United Nations. The fullest opportunity for the attainment of self-government by the people of India has been guaranteed by His Majesty's Government..."

"The leaders of the Congress Party have claimed that the withdrawal of British rule 'with good-will' will result in establishing a stable provisional government in India, and co-operation between this government and the United Nations in resisting aggression and helping China. There is no justification for those claims..."

"In the view of the Government of India, it is not too much to say that acceptance of the demand now put forward by the Congress Party must mean the betrayal of the Allies, whether in or outside India; the betrayal, in particular of Russia and China; the betrayal of those ideals to which so much support has been given and is given today from the true heart and mind of India; the betrayal of India's fighting men whose glory is so great; and the betrayal of all those loyal and co-operating elements which do not support the Congress Party, but which have played so active and so valuable a part in British India and the Indian States in the prosecution of the war..."

"There is nothing that the Government of India regret more than this challenge at so critical a juncture. But on them there lies the task of defending India, of maintaining India's capacity to wage war, of safeguarding India's interests, of holding the balance between the different sections of her people without fear or favour. That task the Government of India will discharge in face of the challenge now thrown down by the Congress Party."

LEADERS ARRESTED

On the morning of August 9, Mahatma Gandhi and other Congress leaders were arrested in Bombay and simultaneously through-

out the country a round-up of important Congressmen took place. The total number of arrests on that day amounted to a few hundred. In the words of an official publication, the first reactions to the arrests were surprisingly mild. On August 9 there were disturbances in Bombay, Ahmedabad and Poona, but the rest of the country remained quiet. On August 10 disturbances occurred also in Delhi and a few towns in the United Provinces; but still no serious repercussions were reported from elsewhere. It was from August 11 that the situation began to deteriorate rapidly.

From then onwards, apart from the hartals, protest meetings and similar demonstrations that were to be expected, outbreaks of violence, arson, murder and sabotage unfortunately took place; though in no sense could they be regarded as an integral part of the protest movement. In almost all cases these latter were directed either against communications of all kinds (including railways, posts and telegraphs) or against the police. The outbreaks started almost simultaneously in widely separated areas in the provinces of Madras, Bombay and Bihar and also in the Central and United Provinces. The damage done was extensive; and in many instances the manner in which it was done displayed a great deal of technical knowledge. Block instruments and control rooms in railway stations were singled out for destruction; and the same technical skill appeared over and over again both in the selection of objects for attack—on the railways, in Post and Telegraph offices and lines, and on electric power lines and installations—and also in the manner in which the damage was carried out. On the other hand, industrial plant and machinery, even where it was fully employed on Government work, escaped any serious injury.

Violence.—In the course of a debate in the Assembly, Sir Reginald Maxwell declared that till the middle of November 1942; 49 fatal and 1,363 non-fatal cases amongst the police force were reported from general violence. This was also responsible for destroying or badly damaging 192 police stations and posts, 494 Government buildings, 318 railway stations and 309 post and telegraph offices. There were 103 cases of serious damage to railway track and 11,285 cases of serious damage or destruction of telegraph and telephone lines and installations. There were three cases in which military property and installations were destroyed or damaged. There were 14 fatal cases and 70 non-fatal cases amongst the military from mob violence. These figures would indicate the seriousness of the rebellion Government had to face in the country.

Muslims as a community kept out of the disturbances; so did the followers of Dr. Ambedkar. Except for cessation of work for a few weeks in the Ahmedabad textile industry, the industrial population was generally unaffected by the movement. The public services, the police, the post and telegraphs, the railways and urban utility services carried on as usual. Students were enthusiastic for a few months, but inevitably their zeal flagged as time passed.

Most of the moderate leaders condemned the less attractive features of the protest movement

lachari was among the foremost of the critics. Many of them, however, disputed the Government's contention that the movement was initiated and inspired by the Congress, contending that it was more the expression of the people's frustration and disappointment at Britain's attitude towards Indian aspirations and an expression of the people's resentment over the arrest of Mahatma Gandhi and the Congress leaders. They were anxious that something must be done to put a stop to the movement and to restore normal political life. They suggested that negotiations be undertaken with the Mahatma both for a settlement for the Indo-British question and the inter-party disputes within the country.

In pursuance of this desire, Dr. Shyamaprasad Mookerjee, Hindu Mahasabha leader, at present Minister of Industries and Supply requested the Viceroy to permit him to meet Mahatma Gandhi with a view to exploring the possibilities of a Congress-League settlement. This was turned down. Mr. Rajagopalachari made a similar attempt a few weeks later, but he too met with the same fate.

THE FAST

There was complete frustration in the Indian political world. There seemed no way out of the deadlock, both Indo-British and internal. At this juncture, on the 9th of February 1943, exactly six months after his arrest, Mahatma Gandhi announced his intention to undertake a fast for 21 days. He had earlier written to the Viceroy reiterating his faith in non-violence, abhorring the violence both of the people and of the Government in the shape of repression, protesting against the charge that he and the Congress were responsible for all that had taken place in the country, demanding an opportunity to rebut that charge, and asking for facilities to go over the whole question, in consultation with the members of the Congress Working Committee, with a view to an examination of the political situation *de novo*.

His letters to the Viceroy and the latter's replies are published in *extenso* in past issues of *The Indian Year Book*.

There was widespread demand for the release of the Mahatma or at least for facilities to enable him to consult the members of the Working Committee. The Opposition in the Indian Legislature raised the question of his fast through an adjournment motion and avoiding controversial issues, demanded his release both on personal grounds and on wide political considerations.

A couple of days later an All-parties Conference was held at Delhi to voice a joint demand that in the interest of the future of India and of international good-will Mahatma Gandhi should be released immediately and unconditionally. To this the Viceroy replied that no change had occurred in the situation since February 10, to warrant such a step.

In this connection it is noteworthy that the Hindu Mahasabha expressed anxiety over

Quaid-e-Azam Jinnah for his part refused to be associated with the conference on the ground that the Viceroy-Gandhi correspondence showed no change on the part of Mahatma Gandhi in the attitude towards the Muslim League except the reiteration of the oft-repeated political demand having for his sanction a threat to resort to mass civil disobedience.

Government Unhelpful.—During the controversy, a mild sentence was caused by the resignation of three members of the Viceroy's expanded Executive Council, namely, Sir H. P. Mody, Mr. M. S. Aney and Mr. N. R. Sarker. Explaining the reasons for their resignations they said that "certain differences arose on what we regarded as a fundamental issue (the action to be taken on Mahatma's fast) and we felt we could no longer retain our offices."

Meanwhile, the Mahatma successfully survived the 21-day foodless ordeal, although on two occasions his condition caused anxiety. On the conclusion of the fast the commotion which had prevailed between February 10 and March 4 gradually subsided.

Nevertheless, the situation created by the fast was further considered by the non-party leaders who again met, this time in Bombay, and issued a resolution requesting that "the Viceroy be approached on our behalf to permit a few representatives to meet Mahatma Gandhi authoritatively to ascertain his reactions to recent events and to explore with him avenues for a reconciliation."

In pursuance of this resolution representations were made to the Viceroy to let some of the non-party leaders meet the Mahatma. Declining to give the facilities sought, the Viceroy said that if Mahatma Gandhi was prepared fully to repudiate the Congress resolution of August 1942, to condemn the incitements to violence represented by his reference to "open rebellion," etc., and if he and the Congress were prepared to give assurances for the future, acceptable to the Government, then the matter could be considered further.

The months that followed the termination of the fast were marked by comparative silence and inactivity. The disturbances, which broke out in August 1942 and continued with varying intensity for six months, virtually ceased in the spring of 1943. This was partly due to the atmosphere of anxiety and sorrow created by the Mahatma's fast in February 1943. In particular, the disapproval of violence in any form voiced by Mahatma Gandhi in his letters to the Viceroy, published in the first half of February 1943, served to damp the ardour of those who had imagined that either the Congress or the Mahatma had sanctioned acts of violence. The cumulative effect of these factors was the virtual cessation of some of those acts of violence which had marked the latter half of 1942.

Marking Time.—The apparent determination of Government to face the situation in the country should the fast prove fatal rather than give an "unrepentant rebel" facilities for normal political life, coupled with their refusal to

encourage non-Gandhite Congressmen and non-Congress leaders to explore possibilities of an internal settlement in consultation with the Mahatma, produced a stifling stillness in the political atmosphere.

Such political life as prevailed in the country was confined to Liberals and non-party leaders (see chapter on Liberal Federation) and the Muslim League (see chapter on Muslim League). The only activity directly concerning the Congress or emanating from Congressmen was Mahatma Gandhi's letter to Quaid-e-Azam Jinnah in the summer of 1943 and an occasional move by released Congressmen to meet together and evolve an agreed policy in the absence of official Congress leadership.

In response to an appeal made by the Quaid-e-Azam in the Delhi session of the Muslim League inviting the Mahatma to write to him, the latter addressed a letter to the League leader offering to meet him. Not only were the contents of the letter not published, but Government refused to forward it to the Quaid-e-Azam.

The twelve-month period from the summer of 1943 to that of 1944 was one of depression and inactivity. A feeble attempt made by Congressmen released from jail to whip up some kind of political activity in the country was effectively scotched by Mrs. Sarojini Naidu.

Throughout this period there was no authoritative and comprehensive statement of Government's policy towards the Congress, although there were occasional announcements on specific issues. Lord Linlithgow, in his farewell address to the Central Legislature in the autumn of 1943, adopted an attitude of studied silence in respect of the Congress. People thought that it was done in order not to anticipate any new policy which his successor might unfold. This belief was reinforced by broad hints thrown by the Viceroy-designate, Lord Wavell, on the eve of his assumption of office.

Much was expected from Lord Wavell who assumed office in the autumn of 1943. Within a few days of his being sworn in however, he turned his attention to the famine situation in Bengal and naturally devoted all his energies to that problem in preference to the political question.

Death of Kasturba.—This period witnessed a sad event, namely, the passing away of Kasturba Gandhi. She died in detention in the Aga Khan's Palace, a victim of heart attacks. There were repeated demands from the public for her release, but Government seemed to be of the view that she would be more happy where she was, especially when adequate medical help was made available to her. This was the second bereavement of the Mahatma since his arrest and detention, the first being the death of Mr. Mahadev Desai, his secretary and confidante, in August 1942. As during the fast in the spring of 1943, friends and relatives of the Gandhi family were allowed to enter the Aga Khan's Palace to visit Kasturba during the latter part of her prolonged illness and later to attend her funeral.

One of the first acts of the Mahatma after his release in May 1944 was to release the text of his letter to Quaid-e-Azam Jinnah which was written from detention about a year previously and which was withheld by Government.

Here is the text of the letter: "Dear Quaid-e-Azam, When sometime after my incarceration, Government asked me for a list of newspapers I would like to have, I included *Dawn* in my list. I have been receiving it with more or less regularity. Whenever it comes to me I read it carefully. I have followed the proceedings of the League, as reported in the *Dawn* columns. I noted your invitation to me to write to you. Hence this letter. I welcome your invitation. I suggest our meeting face to face rather than talking through correspondence. But I am in your hands. I hope this letter will be sent to you and, if you agree to my proposal, that the Government will let you visit me. One thing I had better mention. There seems to be an 'it' about your invitation. Do you say 'it' should write only if I have changed my heart? God alone knows men's hearts. I would like you to take me as I am. Why should not both you and I approach the great question of communal unity as men determined on finding a common solution, and work together to make our solution acceptable to all who are concerned with it or are interested in it?"

The publication of this letter produced no effect.

In the weeks immediately following his release Mahatma Gandhi concentrated on the collection of facts and opinions regarding what had happened during his detention and on efforts to gauge the feeling in the country as he emerged out of his detention. Typical of his reaction immediately after his release was his letter to Mr. M. R. Jayakar in which he said: "The country expects much from me. I do not know how you feel about this release. I am not at all happy. I feel even ashamed."

LETTERS TO WAVELL

About this time the correspondence which passed between Mahatma Gandhi while he was a detainee in the Aga Khan's Palace and Lord Wavell, the Viceroy, saw the light of day. The starting point of these letters was a notice served on the Mahatma on behalf of the Government of India giving reasons for his detention and extending to him the right of making a representation against it. He suggested that Lord Wavell should "descend upon Ahmednagar and the Aga Khan's Palace in order to probe the hearts of your captives," adding that if, as His Excellency believed, the Congress leaders were high-minded persons, they should be treated as such and their interpretation of their formula should be accepted. The Mahatma also assured Lord Wavell that he and the other Congress leaders were all friends of the British, however much they might criticise the British Government and system in India. If they could but be trusted, they would be found to be the greatest helpers in the fight against Nazism and the like.

Lord Wavell, writing to the Mahatma, urged that the greatest contribution that the Congress Party could make towards India's welfare was to abandon the policy of non-co-operation and join wholeheartedly with other parties and the British in helping India's economic and political progress. He assured Mahatma Gandhi that he was only seeking the best means to implement the Cripps Offer without delivering India to confusion and turmoil. Wisdom and a spirit of goodwill and compromise would be required to arrive at the right solution; but with good leadership he was sure a solution could be found.

In the letters which the Mahatma exchanged with Lord Wavell he affirmed that the "Quit India" demand had no sinister significance but only gave vivid expression to the people's desire for real political freedom, if only to render India's war effort real and wholehearted; that civil disobedience was not actually launched by the August resolution but was embodied in it as a contingent sanction; that it was never his intention, nor that of the Congress, that the movement should depart from non-violence; and that, above all, the Congress would give genuine and complete help in realising Nazism, etc., if its co-operator were sought in earnest.

Lord Wavell for his part contended that the resolution was ill-timed and unfriendly and that the Congress could not escape responsibility for the tragic events which followed although he exonerated the Congress and Mahatma Gandhi of any wish deliberately to aid the Japanese.

No Change.—About this time, light was also thrown on the correspondence between the Mahatma in detention and the authorities in connection with Government's charge fastening the blame for the disturbances on the Congress. (See last year's issue of *The Indian Year Book*.)

These letters belong, however, to the pre-release era. His expressed views after the release are more in accord with those contained in his letter to Lord Wavell rather than in those addressed to Lord Linlithgow. In the middle of June 1944 Mahatma Gandhi wrote to the Viceroy: "Though there is little cause for it, the whole country and even many from outside expect me to make some decisive contribution to the general good. I am sorry to say my non-violence threatens to be fairly long. Even if I was quite well, I could do little or nothing unless I knew the mind of the Working Committee of the Congress. I pleaded as a prisoner for permission to see them. I plead now as a free man for such permission. If you will see me before deciding, I shall gladly go wherever you want me to, as soon as I am allowed by my medical advisers to undertake long-distance travelling."

To this Lord Wavell replied: "In consideration of the radical difference in our points of view which appeared in our recent correspondence, I feel that a meeting between us at present could have no value and could only raise hopes which would be disappointed."

I am afraid that similar considerations apply to your request to see the Working Committee. You have recently made public your adherence to the 'Quit India' resolution, which I am afraid I do not regard as a reasonable or practical policy for the immediate future. If after your convalescence and on further reflection, you have a definite and constructive policy to propose for the furtherance of India's welfare, I shall be glad to consider."

Within a week of the receipt of the Viceroy's reply, Mahatma Gandhi made his first public utterance since his release. Addressing the Congressmen of Maharashtra, he said there was no cause to feel frustrated because "we have not achieved our goal within a given period." Speaking for himself, he said he had never for one moment felt that sense of frustration. What was needed was "unshakeable faith in ourselves."

Referring to the communal tangle, the political deadlock and the food situation, the Mahatma said: "I have an answer for all these, but I may not attempt it at this meeting." The only solution of India's sufferings, he added, was a real National Government. It was essential that India should be free. He reaffirmed his unbounded faith in truth, non-violence and non-violent non-co-operation with what he considered to be evil. He said that his authority as representative of the Congress had lapsed with his imprisonment.

C. R. FORMULA

The next stage arrived shortly after. Mr. C. Rajagopalachari, who had spent a few days with Mahatma Gandhi while the latter was recuperating at Panchgani, announced in July that, he had carried on negotiations on behalf of the Mahatma with Quaid-e-Azam Jinnah for a settlement on the basis of virtual agreement on the principle of Pakistan. The Quaid-e-Azam declined to express an opinion on the proposals, but said, he would submit the scheme to the League Working Committee if it was forwarded to him by Mahatma Gandhi himself. Mr. Rajagopalachari felt that it was futile to allow the Quaid-e-Azam if he could not himself wholeheartedly back it, to put the proposals before the League Working Committee. The personal negotiations, therefore came to an end and Mr. Rajagopalachari released the correspondence between himself and the Quaid-e-Azam as he wished to take the public into confidence.

"My efforts to secure Quaid-e-Azam Jinnah's powerful help in pushing through an honourable settlement of the communal question have reached a stage when the public have to be taken into confidence," Mr. Rajagopalachari said in his statement. "The public will note from the correspondence now published that I had secured Gandhi's personal approval even during his fast in February-March last year for the formula that I am now releasing. All parties may judge the formula on its merits. I felt that it was futile to allow Quaid-e-Azam Jinnah, if he could not himself wholeheartedly back it, to put my proposal before

the Muslim League. Let the League and all who are interested in the solution of the problem apply their minds to the question dispassionately and in the interests of the whole country. Needless to say, I am taking the public into confidence with Gandhi's approval. Both he and I have approached the question in no bargaining spirit. The formula may now be regarded as our joint contribution to the solution of the communal problem and dealt with as such."

The correspondence on this subject between Quaid-e-Azam Jinnah and Mr. Rajagopalachari was published in the issue of *The Indian Year Book* for 1945-46.

Close on the heels of the publication of the Gandhi-cum-C.R. offer to the Quaid-e-Azam, Mahatma Gandhi made another gesture, this time to British authority. According to a British journalist, who had had a series of interviews with the Mahatma, the latter "is prepared to accept and to advise the Congress to participate in a wartime National Government in full control of the civil administration, leaving the Viceroy and the Commander-in-Chief in full control of the British and Indian armies. It would be expected that the establishment of such a Government would be accompanied now by a guarantee of Indian independence after the war."

"Mahatma Gandhi has also approved the proposal submitted to Quaid-e-Azam Jinnah by Mr. C. Rajagopalachari. Mahatma Gandhi pointed out that he had no authority to speak in the name of the Congress without consulting the Working Committee, but there is no doubt whatever that his views and the Hindu-Muslim proposals as endorsed by him would be accepted by them without hesitation." (For details see the issue of *The Indian Year Book* for 1945-46).

FIRM PROPOSAL

Mahatma Gandhi followed this up by writing direct to the Viceroy. He regretted the premature publicity in the Indian press given to his interview with Mr. Gelder of the London *News Chronicle* outlining his proposals for a solution of the Indian deadlock. But the Viceroy, in his reply, still insisted on what he called "a definite and constructive policy". Thereupon the Mahatma rejoined:—Here is my concrete proposal. I am prepared to advise the Working Committee to declare that in view of the changed conditions, mass Civil Disobedience envisaged by the resolution of August 1942 cannot be offered and that full co-operation in the war effort should be given by the Congress if a declaration of immediate Indian Independence is made and a National Government responsible to the Central Assembly be formed subject to the proviso, that, during the pendency of the war, the military operations should continue as at present but without involving any financial burden on India. If there is a desire on the part of the British Government for a settlement, friendly talks should take the place of correspondence."

The Viceroy's reply answered: "His Majesty's Government remain most anxious that a settlement of the Indian problem should be reached. But proposals such as those put forward by you are quite unacceptable to His Majesty's Government as a basis for discussion, and you must realise this if you have read Mr. Amery's statement in the House of Commons on July 28th last. They are indeed very similar to the proposals made by Maulana Abul Kalam Azad to Sir Stafford Cripps in April 1942 and His Majesty's Government's reasons for rejecting them are the same as they were then."

"Without recapitulating all these reasons in detail, I should remind you that His Majesty's Government at that time made it clear: (a) That their offer of unqualified freedom after the cessation of hostilities was made conditional upon the framing of a constitution agreed by the main elements of India's national life and the negotiation of the necessary treaty arrangements with His Majesty's Government; (b) That it is impossible during the period of hostilities to bring about any change in the constitution, by which means alone a 'National Government', such as you suggest, could be made responsive to the Central Assembly...

"It is clear, in these circumstances, that no purpose would be served by discussion on the basis which you suggest. If, however, the leaders of the Hindus, the Muslims and the important minorities were willing to co-operate in a transitional Government established and working within the present constitution, I believe good progress might be made... The period after the termination of hostilities for which the transitional Government would last would depend on the speed with which the new constitution could be framed. I see no reason why preliminary work on that constitution should not begin as soon as the Indian leaders are prepared to co-operate to that end."

Blocking the Way.—Commenting on the Viceroy's reply, Mahatma Gandhi said: "It is clear as crystal that the British Government do not propose to give up the power they possess over the 400 millions, unless the latter develop strength enough to wrest it from them. I shall never lose hope that India will do so by purely moral means."

Political circles in India generally welcomed the Mahatma's double gesture to the Viceroy and Quaid-e-Azam Jinnah although some Liberal leaders questioned the wisdom of the acceptance of the Pakistan principle, while a Hindu Mahasabha spokesman derisively referred to it as "from 'Quit India' to 'Split India'."

A fierce controversy raged for weeks. As for the Mahatma he said: "I myself feel firmly that Mr. Jinnah does not block the way, but the British Government do not want a just settlement of the Indian claim for independence which is overdue, and they are using Mr. Jinnah as a cloak in denying freedom to India." He denied the interpretation put in certain quarters that the 1942 August Congress resolution had lapsed. On the other hand the resolution, he said, could not be altered except by the Congress Working

Committee, but his authority under that resolution had lapsed. "Let me make it clear," he observed, "that the lapsing of my authority has nothing to do with the normal activities of Congressmen."

"What no one can do in the name of the Congress is mass civil disobedience which was never started and which, as I have said, I cannot at the present moment, even in my personal capacity start. The 'Quit India' resolution, I hold to be absolutely innocuous."

Dealing with the Cripps Offer, Mahatma Gandhi said, the proposals were not acceptable to him "for the simple reason that they contemplate the perpetual vivisection of India and they work as an effective barrier against Indian Independence." His own proposals covered the whole of India, British India as well as Indian (Princes) India. "I shall never be a party to a sale of the rights of the people of the States for the sake of freedom of the people of British India."

The doings in India produced little impression on Whitehall whose reaction was limited to a reiteration of the Cripps Offer.

If the Mahatma was cold-shouldered by Whitehall, he met with poor response from Quaid-e-Azam Jinnah who in his address to the Lahore session of the League Council was highly critical of the manner in which the Gandhi-C.R. Offer was handled from Panchgani.

Thereupon the Mahatma sent a communication to the Quaid-e-Azam conveying to the latter the C.R. formula. This was the basis of a meeting between them which took place in September 1944. (For details see chapter on "The Muslim League").

CONSTRUCTIVE WORK

Meanwhile, Mahatma Gandhi gave further evidence of his disapproval of violence by advising underground Congress workers to give themselves up to authority on the ground that sabotage and all that it meant, including the destruction of property, was in itself violence.

He said: "The question most discussed with me by visitors is whether I approve of underground activities... My reply is that no nation has, so far as I know, deliberately used Truth and Non-violence as exclusive means for the attainment of freedom. Judged by that standard, I say unhesitatingly that underground activities, even though utterly innocent in themselves, should have no place in the technique of non-violence..."

"I swear by the constructive programme. Let me recount the items of that programme:—

- (1) Communal unity, (2) Removal of untouchability, (3) Prohibition, (4) Khadi, (5) Other village industries, (6) Village sanitation, (7) New or basic education, (8) Adult education, (9) Uplift of women, (10) Service of the so-called aboriginals, (11) Education in health and hygiene, (12) Propaganda of *rashtra bhasha*, (13) Love of one's own language, and (14) Working for economic equality.

"Unfortunately the workers have not developed in that programme the living faith which I have. I can but re-emphasize the importance of that programme..."

The Mahatma also seemed to contemplate a new drive among India's 700,000 villages evidently as a counterblast to the many post-war reconstruction plans being adumbrated by Government and non-official agencies.

DESAL-LIAQAT TALKS

In the winter of 1944-45 an interesting development occurred which at least provided an opening for big political changes in the summer of 1945. Mr. Bhulabhai J. Desai, Leader of the Congress Party in the Assembly at the time initiated negotiations with Mr. Liaquat Ali Khan, then Deputy Leader of the Muslim League Party in the Assembly. These led up to a proposal by the former which met with a measure of encouragement from the latter. At one time it was believed to have resulted in a pact between the two in their individual capacity, it being assumed that neither would have continued in his efforts without the tacit approval of the respective principals, namely, Mahatma Gandhi and Quaid-e-Azam Jinnah.

The facts, (as revealed by Mr. Liaquat Ali Khan in September 1945) showed that Mr. Desai had suggested a formula for an interim agreement between the Congress and the League. It is known that Mr. Desai discussed this formula with Lord Wavel and that, although its main provisions were varied, it provided the basis for the proposal made by the Viceroy in June 1945 and in a sense for the Simla Conference which met later. Here is Mr. Liaquat Ali's version (quoted in part), which is the only authoritative statement on the subject:

"Mr. Desai met me after the last autumn session of the Central Legislative Assembly and we informally discussed the prevailing distressing condition in the country, economic and otherwise... Mr. Desai, during the course of the conversation, asked me about the attitude of the Muslim League with regard to some interim arrangement at the Centre and a temporary reconstitution of the Governor-General's Executive Council in a manner which would secure for it the confidence of all the peoples so that it may be able to help them in their present plight and deal more effectively than what had been done in the past with the serious situation that was bound to arise in the future on account of the prolongation of the war."

"I explained to him the position in the light of the resolutions that were passed from time to time by the Muslim League in this connection, and told him that my personal view was that, if any proposals were made to ease the situation, the Muslim League was bound to give its very careful consideration to them..."

"Mr. Desai saw me again in Delhi in the beginning of January this year just as I was leaving on a tour of the Madras Presidency and showed me some proposals which had been drafted for the formation of an interim Government at the Centre... He told me

his plan was to meet the Viceroy and Mr. Jinnah in this connection. I told him that in my personal opinion the proposals were such that they could be made a basis for discussion, but I did not see any prospect of his making any headway unless he could either get Mr. Gandhi to move in the matter personally or get his definite approval and open support for the move that he was making..."

"During my talks with Mr. Desai, which were purely of a personal nature, I made it absolutely clear to him that whatever I had said was my individual view and I was not speaking either on behalf of the Muslim League or anyone else..."

"In view of the statement of Mr. Desai—to the press of Bombay that the Pact could not be published as I desired that it should remain confidential—and the confusion that is being created, I feel that these proposals should be published; hence I am releasing them to the press."

TEXT OF PACT

The following is the Desal-Liaquat Pact:—

"The Congress and the League agree that they will join in forming an interim Government in the Centre. The composition of such Government will be on the following lines:—

- (a) An equal number of persons nominated by the Congress and the League in the Central Executive (the persons nominated need not be members of the Central Legislature);
- (b) Representatives of minorities (in particular the Scheduled Castes and the Sikhs);
- (c) The Commander-in-Chief.

"The Government will be formed and function within the framework of the existing Government of India Act. It is, however, understood that, if the Cabinet cannot get a particular measure passed by the Legislative Assembly, they will not enforce the same by resort to any of the reserve powers of the Governor-General or the Viceroy. This will make them sufficiently independent of the Governor-General."

"It is agreed between the Congress and the League that, if such interim Government is formed, their first step would be to release the Working Committee members of the Congress."

"The steps by which efforts would be made to achieve this end are at present indicated to take the following course:

"On the basis of the above understanding, some way should be found to get the Governor-General to make a proposal or a suggestion that he desires an interim Government to be formed in the Centre on the agreement between the Congress and the League and when the Governor-General invites Mr. Jinnah and Mr. Desai either jointly or separately, the above proposals would be made declaring that they are prepared to join in forming the Government."

"The next step would be to get the withdrawal of Section 93 in the provinces and to form as soon as possible, provincial Governments on the lines of a coalition."

WAVELL PLAN

In the summer of 1945 Lord Wavell paid a visit to Great Britain and had prolonged consultations with members of the British Cabinet. On his return in June His Excellency unfolded the proposals of His Majesty's Government to ease the Indian political situation. He said in a broadcast to the people of India: "I have been authorised by His Majesty's Government to place before Indian political leaders proposals designed to ease the present political situation and to advance India towards her goal of full self-government..."

"This is not an attempt to obtain or impose a constitutional settlement.

"His Majesty's Government had hoped that the leaders of the Indian parties would agree amongst themselves on a settlement of the communal issue, which is the main stumbling-block, but this hope has not been fulfilled..."

"I propose, with the full support of His Majesty's Government, to invite Indian leaders both of central and provincial politics to take counsel with me with a view to the formation of a new Executive Council more representative of organised political opinion.

"The proposed new Council would represent the main communities and would include equal proportions of caste Hindus and Muslims. It would work, if formed under the existing constitution. But it would be an entirely Indian council except for the Viceroy and the Commander-in-Chief, who would retain his position as War Member.

"It is also proposed that the portfolio of External Affairs, which has hitherto been held by the Viceroy, should be placed in charge of an Indian member of the Council, so far as the interests of British India are concerned.

"A further step proposed by His Majesty's Government is the appointment of a British High Commissioner in India, as in the Dominions, to represent Great Britain's commercial and other such interests in India.

"Such a new Executive Council will, you realise, represent a definite advance on the road to self-government. It will be almost entirely Indian..."

"The Council will work within the framework of the present constitution..."

The main tasks for this new Executive Council would be:—

(1) to prosecute the war against Japan with the utmost energy till Japan is utterly defeated;

(2) to carry on the Government of British India, with all the manifold tasks of post-war development in front of it, until a new permanent constitution can be agreed upon and comes into force; and

(3) to consider when the members of the Government think it possible, the means by which such agreement can be achieved....

The Invitees.—"I have considered the best means of forming such a Council; and have decided to invite the following to Viceregal Lodge to advise me:—

Those now holding office as Premier in a provincial Government; or, for provinces now under Section 93 Government, those who last held the office of Premier;

The leader of the Congress Party and the Deputy Leader of the Muslim League in the Central Assembly; the leaders of the Congress Party and the Muslim League in the Council of State; also the leaders of the Nationalist Party and the European Group in the Assembly;

Mahatma Gandhi and Mr. Jinnah as the recognised leaders of the two main political parties;

Rao Bahadur N. Siva Raj to represent the Scheduled Classes; and

Master Tara Singh to represent the Sikhs.

"Invitations to these gentlemen are being handed to them today, and it is proposed to assemble the conference on June 25 at Simla, where we shall be cooler than at Delhi..."

"I also hope that it will be possible for ministries to re-assume office and again undertake the tasks of Government in the provinces now administered under Section 93 of the Constitution Act and that these ministries will be coalitions.

"If the meeting should unfortunately fail, we must carry on as at present until the parties are ready to come together..."

"With the approval of His Majesty's Government, and after consultation with my Council, orders have been given for the immediate release of the members of the Working Committee of the Congress who are still in detention, I propose to leave the final decision about the others still under detention as the result of the 1942 disturbances to the new Central Government, if formed, and to the provincial Governments..."

"I believe in the future of India, and as far as in me lies I will further her greatness. I ask you all for your co-operation and goodwill."

WHITE PAPER

Simultaneously the British Government issued a White Paper on the subject. It said: "The main constitutional position remains, and the offer of March 1942 stands in its entirety without change or qualification... The Indian administration, overburdened with the great tasks laid upon it by the war against Japan and by the planning for the post-war period, is further strained by the political tension that exists..."

"It is not the intention of His Majesty's Government to introduce any change contrary to the wishes of the major Indian communities.

"But they are willing to make possible some step forward during the interim period if the leaders of the principal Indian parties are prepared to agree to their suggestions and to co-operate in the successful conclusion of the war against Japan as well as in the reconstruction in India which must follow the final victory.

"To this end they would be prepared to see an important change in the composition of the Viceroy's Executive. This is possible

without making any change in the existing statute law except for one amendment to the Ninth Schedule to the Act of 1935. That Schedule contains a provision that not less than three members of the Executive must have had at least ten years' service under the Crown in India..."

"Also, the External Affairs (other than those tribal and frontier matters which fall to be dealt with as part of the Defence of India) should be placed in the charge of an Indian Member of the Viceroy's Executive so far as British India is concerned, and fully accredited representatives shall be appointed for the representation of India abroad.

CONGRESS ACCEPTS

Mahatma Gandhi gave a lead to the Working Committee by observing that the composition of the Simla Conference was "a very great advance upon all similar bodies." This was echoed by the Congress President who observed that "we are very near our goal of complete independence."

The Congress Working Committee met in Bombay after nearly three years. Most members seemed to welcome the political content of the Wavell Plan inasmuch as it dealt only with interim machinery without prejudice to the ultimate goal. After a few hours' deliberation, the Working Committee decided to take part in the Simla Conference and authorised its President to proceed to Simla. The other Congress invitees were asked to do likewise.

The acceptance of the invitation by the Congress was interpreted to mean that it agreed with the broad outlines of the Wavell Plan as an interim arrangement. The transfer of portfolios including the external relations, the appointment of a British High Commissioner and the authoritative assurance regarding the manner of the exercise of the Viceregal veto made a good impression on Congress leaders and Mahatma Gandhi, some holding that it was an improvement on the Cripps Offer. Note was also taken of the benefits of co-operation between the Congress and the League in the task of day-to-day administration. Only the ideal of independence remained, but there too the interim arrangement promised to help.

THE CONFERENCE

The political centre of gravity then shifted to Simla. Mahatma Gandhi, Maulana Azad and Qaid-e-Azam Jinnah met the Viceroy on the day previous to the opening of the Conference and it was revealed that, in pursuance of the emphasis laid by the Mahatma on his individual capacity, he would not attend the meetings of the Conference, though he would stay on in Simla. The Conference opened at the Viceregal Lodge on June 25, under the Presidentship of the Viceroy, to discuss the proposals of His Majesty's Government which were designed "to ease the present political situation and to advance India towards her goal of full self-government."

In his opening speech, Lord Wavell said *inter alia*:

"Before we begin on the agenda of this Conference, the outcome of which will have a momentous influence on the destiny of India, I feel there are a few words I should say to you. First, I welcome you all as men who by character and ability have risen to leadership in your provinces and parties... It is not a constitutional settlement, it is not a final solution of India's complex problems that is proposed. Nor does the plan in any way prejudice or prejudice the final issue. But if it succeeds, I am sure it will pave the way towards a settlement; and will bring it nearer..."

"You must accept my leadership for the present..."

A press note issued at the end of the first day's Session said:

"The Conference assembled at Viceregal Lodge, Simla, at 11 a.m. Their Excellencies met and talked to the delegates on the lawn outside the Conference Room. At 11-20 the delegates moved into the Conference Room, and the proceedings began with the Viceroy in the chair. His Excellency made a short opening speech. He then made a statement on the procedure he proposed for the conference and announced that he had appointed Sir Evan Jenkins, his Private Secretary, and Rao Bahadur V. P. Menon, the Reforms Commissioner to act as Secretaries to the Conference.

"The Conference then took up the discussion of the general principles of His Majesty's Government's proposals. The discussions continued until 5 p.m., when the Conference adjourned until tomorrow."

On the following day the Conference re-assembled in the morning but dispersed before lunch as it had reached "certain provisional conclusions" and the delegates expressed a wish to confer amongst themselves. There were two further postponements, the last one for a period of a fortnight.

For correspondence exchanged by Lord Wavell and Qaid-e-Azam Jinnah during this period see the issue of *The Indian Year Book* for 1945-46.

FAILURE

When the Conference reassembled on July 14, the Viceroy announced the failure of his efforts and said:

"As you know, my original intention was that the conference should agree upon the strength and composition of the Executive Council, and that thereafter the parties should send me lists of names. To these lists I would, if necessary, have added names of my own..."

"Unfortunately, the Conference was unable to agree about the strength and composition of the Executive Council, and on the 29th June I undertook, with the approval of the Conference, to endeavour to produce a solution not based on any formula agreed in advance..."

I received lists from all parties represented here except from the European Group, who decided not to send a list, and the Muslim League... I therefore made my provisional selections, including certain Muslim League

names... I did not find it possible, however, to accept the claims of any party in full. When I explained my solution to Qaid-e-Azam Jinnah he told me that it was not acceptable to the Muslim League and he was so decided that I felt it would be useless to continue the discussion. In the circumstances, I did not show my selections as a whole to Qaid-e-Azam Jinnah, and there was no object in showing them to the other leaders. The conference has therefore failed.

"Nobody can regret this more than I do myself. I wish to make it clear that the responsibility for the failure is mine..."

"I have now to consider the next stage. I must remind you that whatever happens, the first two of three tasks mentioned in my broadcast—the prosecution of the war against Japan, and the carrying on of the administration and preparation of post-war development—must be performed by the Government of India for the time being in office..."

Following the failure, spokesmen of the Congress and the League gave their respective versions of the Simla Conference. (See the issue of *The Indian Year Book* for 1945-46).

Meanwhile, the British General Elections had been held. They resulted in an overwhelming majority for Labour. Of particular interest to India was the defeat of Mr. L. S. Amery who had directed Britain's policy towards India over a period of five years during which the Congress was very much *persona non grata* with the British Government.

Then came the surrender of Japan and the end of the Far Eastern War. This created a new situation in Indian politics inasmuch as the war emergency ceased. The King in his speech from the Throne at the opening of the new Parliament made this reference to India:

"In accordance with the promises already made to my Indian Peoples, my Government will do their utmost to promote, in conjunction with the leaders of Indian opinion, an early realisation of full self-Government in India."

Shortly after, the British Government announced general elections in India, both to the Provincial Legislatures and to the Central Legislature. Simultaneously with this announcement Lord Wavell was summoned to England for fresh consultations with the British Government.

A NEW SPIRIT

Shortly after the Simla Conference, the Government lifted the ban on the various Congress organizations, and Congress activity was resumed in full swing. Leaders who went straight from the prison to Simla, as it were, and had therefore no time to meet the people after their imprisonment, now had the opportunity to go round the country and survey the effects of the movement.

All confusion regarding responsibility for the disturbances in 1942-43 was dispelled by Pandit Nehru not only owning them up, but also applauding those who participated in them and sympathising with those who suffered in consequence. "Victims of repression" were designated "martyrs".

Condonation, nay, approbation of violence misled the people at large into the belief that the Congress policy of peaceful struggle had undergone a change. The depression and helplessness which characterized the political outlook in the preceding months soon gave place to a spirit of defiance and militancy. This found expression in various demonstrations, accompanied inevitably in some cases by acts of violence, in connection with the trial of officers of the Indian National Army. Students and others, encouraged in this outlook by Congress Socialists and the Communists, created disturbances in several parts of the country and violence was so much in the air that the Congress Working Committee felt called upon to issue a warning to the public in this behalf. It passed the following resolution in December 1945:—

"After the arrest of the principal Congressmen in the August of 1942, the unguided masses took the reins in their own hands and acted almost spontaneously. If many acts of heroism and sacrifice are to their credit, there were acts done which could not be included in non-violence. It is, therefore, necessary for the Working Committee to affirm, for the guidance of all concerned, that the policy of non-violence adopted in 1920 by the Congress continues unabated and that such non-violence does not include the burning of public property, the cutting of telegraph wires, the derailing of trains and intimidation..."

"The Committee is further of the opinion that the constructive activities of the Congress, beginning with the spinning wheel and 'khadi' as the centre, are emblematic of the policy of non-violence and that every other Congress activity, including what is known as the parliamentary programme, is subservient to and designed to promote the constructive activities as explained by Mahatma Gandhi..."

An event of considerable importance to the internal organization of the Congress occurred in the latter half of 1945 when it was decided that Communists should be expelled from the All-Indian Congress Committee as a punishment for their opposition and obstruction to the policy and programme of the Congress for a considerable time.

Learning a lesson from the Simla breakdown and wishing to make yet another effort at a communal settlement, Maulana Abul Kalam Azad, who was resting in Kashmir, proposed that the Congress should clarify its attitude to the Muslims in order to reassure them that their interests would be safe in any future constitutional reconstruction.

His suggestion, on the details of which it is not necessary now to dwell, was hotly discussed for a few weeks until the matter came up before the Congress executive in September 1945. In an effort to clarify the Congress attitude to the separation demand and to remove the confusion arising from the apparently conflicting 1942 resolutions on the subject, the Congress Working Committee adopted a new resolution. It contained no new offer in the shape of an approach to the League view-point; nor did it make any reference to the "C.R." formula or Mahatma Gandhi's offer to Qaid-e-Azam Jinnah. It was just a reiteration of Congress policy with

the emphasis on unity subject to the proviso that no territorial unit inhabited by a homogeneous people would be forced to stay in against its will.

Apart from this, the Congress Working Committee which in September 1945 held its first business session after August 1942, had a heavy agenda before it. The formation of a Labour Government in Britain, the end of the Japanese War, a fresh consideration of the Indian question in the light of the changed situation, Lord Wavell's second visit to Britain and the announcement of general elections in India—these were all post-Simla developments.

Clarification:—After taking into account the altered circumstances and the rapidly changing situation, the Working Committee decided that the Congress should contest the general elections "on the issue of immediate transfer of power" and "to demonstrate the will of the people." This announcement came at the tail-end of a two-thousand word statement split up into three resolutions drafted for the All-India Congress Committee. The first of these reaffirmed the August Resolution of 1942. The second reviewed the various policies pursued by the Congress during the past sixty years and declared that the Congress policy would be "negotiation and settlement when possible and non-co-operation direct action if necessary." All the three resolutions were evidently framed on the one hand, to emphasize the revolutionary ideology of the Congress and, on the other, to leave the door open in the event of the British Government announcing any new approach. The decision arrived at in August 1942 was justified by "the urgency of the situation and the perils that confronted India" at the time. But the disturbances that followed were deplored ("in some places the people forgot, and fell away from, the Congress method of peaceful and non-violent action"), and the authorities accused of provocative action and "brutal and ruthless repression", which "goaded them (the people) to rise spontaneously to resist the armed might of an alien, imperialist power".

The Congress review of the events of the months immediately preceding was full of disappointment and resentment over the British Government's determination "to hold on to its authoritarian power and to exercise it arbitrarily autocratically"; yet there was no desire to allow frustration and pessimism to express themselves through any form of direct action. For the moment, Congress policy was one of negotiation and conciliation but the method of non-co-operation was doubtless held in reserve. This was evidently a continuation of the spirit which informed the Congress attitude at Simla.

The same spirit of working with available implements, however imperfect they might be, seemed to have actuated the Working Committee's decision in regard to the forthcoming elections. Vigorous protests were made against the manner and circumstances in which the authorities proposed to hold elections to the legislatures, but eventually the resolution on the subject recommended the Congress participation in the elections,

H. M. G. PROPOSALS

Between then and the meeting of the All-India Congress Committee the Viceroy had returned from London. His Excellency made a broadcast embodying the conclusions of His Majesty's Government.

These were that H. M. G. were determined to do their utmost to promote, in conjunction with the leaders of Indian opinion, the early realisation of Self-Government in India. It was their intention to convene as soon as possible a Constitution-making Body, and as a preliminary step, they had authorized him to undertake, immediately after the elections, discussions with representatives of the Legislative Assemblies in the Provinces, to ascertain whether the proposals contained in the 1942 declaration were acceptable or whether some alternative or modified scheme was preferable. Discussions would also be undertaken with representative of Indian States with a view to ascertaining in what way they could best take part in the Constitution-making Body. Further H. M. G. were proceeding to the consideration of the content of a treaty which would require to be concluded between Great Britain and India. His Majesty's Government had authorized His Excellency, as soon as the results of the provincial elections were published, to take steps to bring into being an Executive Council which would have the support of the main Indian parties. His Excellency concluded that the Government and all sections of the British people were anxious to help India in these matters and it remained for Indians to show that they had the wisdom and courage to determine in what way they could best reconcile their differences and how their country could be governed by Indians for Indians.

Not Acceptable.—The All-India Congress Committee which met towards the end of September 1945 adopted its Executive's recommendation to contest the general elections.

Two of the three political resolutions submitted by the executive were endorsed almost unanimously by the A.I.C.C. They first reiterated the "Quit India" resolution passed on August 8, 1942, while the second declared that the Congress policy was one of negotiation when possible and direct action when necessary. Amendments calculated to "stiffen" the Congress attitude were negatived. One of these suggested that the Congress should abandon the "humiliating" path of negotiation; another sought not to "regret" but simply to "admit" acts of violence during the disturbances that followed the adoption of the "Quit India" resolution. Others wanted to denounce Communist "traitors" who had "allied themselves with the alien Government in sabotaging the people's struggle for independence."

The speakers, including Pandit Nehru, Sardar Vallabhbhai Patel and Mr. J. B. Kripalani, felt no regrets for what had happened but, on the contrary, expressed pleasure at the people's spirit of resistance to Government's "repression of their urge for freedom." Sardar Patel was inclined to replace "Quit India" by "Quit Asia" demand, for the world could

have no freedom without a free India. Whereas the resolutions were couched in more or less moderate language, the speeches both of the leaders and the rank and file were keyed to a high pitch; they seemed to ask, "How can we forget and forgive?"

The resolution on the Wavell proposals, moved by Sardar Vallabhbhai Patel, stated: "The A.-I.C.C. has carefully considered Lord Wavell's and the British Prime Minister's broadcasts on the steps proposed to be taken by British authority in India. These proposals repeat with unimportant variations, the offer made in March, 1942 by Sir Stafford Cripps on behalf of the British Government, an offer which was not accepted by the Congress. . . Nothing short of independence can be acceptable to the Congress and the country. The proposals now made are, in the opinion of the A.-I.C.C., vague, inadequate and unsatisfactory. . ."

Civil Liberties.—The Central Assembly is still governed by the Act of 1919. To continue such an impotent and undemocratic Central legislature, constituted on a franchise of less than one per cent. of the population, can have no justification in the context of Indian freedom. If elections for the Central Legislature are to be held they must at least be on a properly revised register, even though this might involve some little delay. . .

"Further, free and fair elections are hardly possible when several organisations, like the Congress Socialist Party, the Forward Bloc, and Kisan organisations are still under ban; when thousands are still held in detention without trial, or are undergoing sentences of imprisonment in connection with political activities; when in many places public meetings cannot be held without previous permission of the authorities; and when many persons are labouring under disqualifications arising out of their conviction for political offences.

"It has become notorious that the present Government in India are responsible for the widespread corruption that prevails in the country, for the gross mismanagement of the food and cloth problems and for the supreme tragedy of the Bengal famine. . .

"In spite of the handicaps that the Congress will labour under, as related above, and in order to demonstrate the will of the people, especially on the issue of the immediate transfer of power, the A.-I.C.C. resolves that the forthcoming elections be contested, and directs the Working Committee to take all necessary steps in this behalf. . .

A Bombshell.—Then came the bombshell in the shape of an amendment by a Muslim Communist who wished the elections to be fought on the issue of "an agreed people's plan of convening a constituent assembly. . . which will have the support of the major parties and all communities". In order to secure Hindu-Muslim unity he wanted to assure the Muslims that "the elected representatives of areas in which Muslims are in a majority will be free to constitute themselves into a constituent assembly and to decide for themselves whether to join the Indian Union or not." He was frequently interrupted by the House,

which had a marked grouse against Communists and against those who demanded further measures to placate the League.

Mian Iftikhar-ud-Din, ex-President of the Punjab Provincial Congress Committee, (now President of the West Punjab Muslim League) known to be a keen advocate of a Congress-League settlement, declared through an amendment that "the creation of an independent and democratic India must be such as will win the backing of all major sections of our people, especially the Muslims."

Pandit Nehru, who spoke next, and Sardar Patel, who replied to the debate, said that the Communists always found fault with them, whatever they did. The Congress had gone to the fullest extent possible, consistent with its nationalistic ideal, to meet Muslim fears—communal electorates, weightages, safeguards and recently, parity—and had nearly reduced itself to the position of a purely Hindu body; they could go no farther. If the Congress attitude was regarded as unreasonable, the whole question might be referred to an international tribunal for arbitration. The resolution passed unanimously.

MANIFESTO

The Congress election manifesto, issued a fortnight later, stated:

"For 60 years the National Congress has laboured for the freedom of India. During this long span of years its history has been the history of the Indian people, straining at the leash that has held them in bondage, ever trying to unloose themselves from it. From small beginnings it has progressively grown and spread in this vast country, carrying the message of freedom to the masses of our people in the towns as well as the remotest villages. . . The career of the Congress has been one of both constructive effort for the good of the people and unceasing struggle to gain freedom. . . After the recent three years of an unprecedented mass upheaval and its cruel and ruthless suppression, the Congress has risen stronger than ever and more loved by the people by whom it has stood through storm and stress.

"The Congress has stood for equal rights and opportunities for every citizen of India, man or woman. It has stood for the unity of all communities and religious groups and for tolerance and goodwill between them. It has stood for full opportunities for the people as a whole to grow and develop according to their own wishes and genius. It has also stood for the freedom of each group and territorial area within the nation to develop its own life and culture within the larger framework, and for this purpose such territorial areas or provinces should be constituted as far as possible, on a linguistic and cultural basis. It has stood for the rights of all those who suffer from social tyranny and injustice and for the removal of them of all barriers to equality.

"The Congress has envisaged a free, democratic state with the fundamental rights and civil liberties of all its citizens guaranteed in the constitution.

"This constitution, in its view, should be a federal one with a great deal of autonomy for its constituent units and its legislative organs elected under universal adult franchise.

"A hundred and fifty years and more of foreign rule have arrested the growth of the country and produced numerous vital problems that demand immediate solution. . . There is no way to solve any of these urgent problems except through freedom and independence. The content of political freedom must be both economic and social.

"The most vital and urgent of India's problems, is how to remove the curse of poverty and raise the standard of the masses. . ."

Co-operative Commonwealth.—For this purpose it will be necessary to plan and co-ordinate social advance in all its many fields, to prevent the concentration of wealth and power in the hands of the individuals and groups, to prevent vested interests inimical to society from growing, and to have social control of the mineral resources, means of transport and the principal methods of production and distribution in land, industry and in other departments of national activity, so that free India may develop into a co-operative commonwealth.

"In international affairs the Congress stands for the establishment of a world federation of free nations. . . In the Far East, in South-East Asia and in Western Asia, India has had trade and cultural relations for thousands of years and it is inevitable that with freedom she should renew and develop these relations. . . She will also champion the freedom of all other subject nations and peoples, for only on the basis of this freedom and the elimination of imperialism everywhere can world peace be established.

"On the eighth of August, 1942, the All-India Congress Committee passed a resolution, since then famous in India's history. By its demands and challenge the Congress stands today. It is on the basis of this resolution and with its battle-cry that the Congress faces the elections for the Central and Provincial Assemblies.

"The Central Legislative Assembly is a body with no power or authority and is practically an advisory body whose advice has been constantly floated and ignored. . . Yet, with all these and other handicaps and drawbacks, the Congress has decided to contest the elections to show that the inevitable result of elections, however, restricted, must be to demonstrate the overwhelming solidarity of the opinion of the voters on the issue of independence. . .

"So the Congress appeals to the voters for the Central Assembly all over the country to support the Congress candidates in every way at the forthcoming elections, and to stand by the Congress at this critical juncture, which is so pregnant with future possibilities. . .

"The Congress election campaign was conducted on the assumption that the Congress could secure easy victories in general constituencies and that it should concentrate instead on Muslim seats. In many cases the Hindu Mahasabha candidates withdrew in favour of the

Congress, either with a view to giving the Congress a free hand in the light of its unequivocal declaration of hostility to partition or because the Mahasabha realized that it had no chance in face of the strong wave of pro-Congress feeling that was sweeping over the country."

ELECTION RESULTS

The elections fulfilled Congress expectations as far as general seats were concerned. Such Hindu Mahasabhaists as dared to oppose the Congress nominees (were badly defeated. Moderates and Independents had no chance at all. In Sikh constituencies in the Punjab, the Congress captured one-third the number of seats, although in terms of votes recorded nearly half the electorate supported it.

It was different, however, in the case of Muslim seats. In all the Hindu-majority provinces the Congress suffered a heavy defeat except in the United Provinces and to a smaller extent in Assam. Of the four Muslim majority provinces the Congress emerged successfully in the Frontier, though even there the League did much better than in the general elections held ten years previously. In the Punjab and Bengal, the League secured signal triumphs. In Sind, the League captured the majority of the Muslim seats, while a rebel-section of the League and a pro-Congress group of Muslims secured sufficient number of seats to form a coalition with the Congress and thereby threaten the solidarity of the League there.

All this while, the Congress was waiting events, expecting His Majesty's Government to implement the policy outlined by the Viceroy in his broadcast in September 1945.

Then came Premier Attlee's statement in Parliament in March 1946 followed by the British Cabinet Mission's visit to India to settle the basis of the country's future constitution. (This subject is dealt with elsewhere.)

On the eve of the Mission's return to England, the Congress announced its acceptance of the long-term project but turned down the specific proposals for an Interim Government. This decision was endorsed by the All-India Congress Committee which met in Bombay early in July 1946. It was an easy victory for the Congress executive.

Shortly after the A.-I.C.C. meeting, various provincial assemblies elected their representatives to the Constituent Assembly. Most of the "general" seats were filled by Congress nominees, who included representatives of the various cross-sections of Indian life, vertical and horizontal, communal and economic.

Certain statements made by the new Congress President—Pandit Nehru was declared elected in place of Maulana Abul Kalam Azad, who relinquished his office as Congress President after a period of six years—regarding the status and powers of the Constituent Assembly and the Congress intentions in that behalf alienated the Muslim League, which was already labouring under a sense of grievance. For instance, the Congress President said that the Constituent

Assembly would be a sovereign body with complete freedom to mould the future India. This was interpreted by the League to mean that decisions in the Assembly would be taken by a majority vote, leaving the Muslims helpless. Similarly he said that the Congress was committed to nothing except to enter the Constituent Assembly, which raised a grave doubt in the League mind that the Congress did not accept the framework and procedure laid down in the State Paper of May 16, 1946.

GESTURE TO LEAGUE

These impressions were corrected by the Congress Working Committee early in August, 1946, but the mischief had already been done. For, late in July, the League decided altogether to withdraw its co-operation from the Mission's plan. The August 1946 resolution of the Congress Working Committee said:—

The Working Committee regretted to note that the Council of the All-India Muslim League, reversing their previous decision, had decided not to participate in the Constituent Assembly. In this period of rapid transition from dependence on a foreign power to full independence, when vast and intricate political and economic problems had to be faced and solved, the largest measure of co-operation among the people of India and their representatives was called for, so that the changeover should be smooth and to the advantage of all concerned. The Committee realised that there were differences in the outlook and objectives of the Congress and the Muslim League. Nevertheless, in the larger interests of the country as a whole and of the freedom of the people of India, the Committee appealed for the co-operation of all those who sought the freedom and the good of the country, in the hope that co-operation in common tasks might lead to the solution of many of India's problems.

The Committee had noted that criticisms had been advanced on behalf of the Muslim League to the effect that the Congress acceptance of the proposals contained in the Statement of May 16 was conditional. The Committee wished to make it clear that while they did not approve of all the proposals contained in this Statement, they accepted the scheme in its entirety. They interpreted it so as to resolve the inconsistencies contained in it and fill the omissions in accordance with the principles laid down in that Statement. They held that provincial autonomy was a basic provision and each province had the right to decide whether to form or join a group or not. Questions of interpretation would be decided by the procedure laid down in the Statement itself, and the Congress would advise its representatives in the Constituent Assembly to function accordingly.

The Committee had emphasized the sovereign character of the Constituent Assembly, that is, its right to function and draw up a constitution for India without the interference of any external power or authority. But the Assembly would naturally function within the internal limitations which were inherent in its task, and would therefore seek the largest measure

of co-operation in drawing up a constitution of free India allowing the greatest measure of freedom and protection for all just claims and interests. It was with this object and with the desire to function in the Constituent Assembly and make it a success, that the Working Committee passed their resolution on June 26, 1946, which was subsequently ratified by the All-India Congress Committee on July 7, 1946. By that decision of the A-I.C.C. they must stand, and they proposed to proceed accordingly with their work in the Constituent Assembly.

The Committee hoped that the Muslim League and all others concerned, in the wider interests of the nation as well as of their own, would join in this great task.

NEHRU-JINNAH CORRESPONDENCE

Immediately after the Viceroy invited the Congress to make proposals for an Interim Government, Pandit Nehru accepted the invitation on behalf of the Congress and sought Quaid-e-Azam Jinnah's co-operation. The League leader declined. The following correspondence passed between the two leaders:

Letter from Pandit Nehru, dated Wardha, August 13:

"Dear Mr. Jinnah,—As you know, the Viceroy has invited me, in my capacity as President of the Congress, to make proposals for the immediate formation of an Interim Government. I have accepted this invitation. I feel that my first step should be to approach you and seek your co-operation in the formation of a coalition provisional Government. It is naturally our desire to have as representative a Government as possible. Should you wish to discuss this matter further with me, before coming to a decision, I shall gladly see you in Bombay or wherever you may be... —Jawaharlal Nehru."

Reply from Mr. Jinnah, dated Bombay, August 15:

"Dear Pandit Jawaharlal Nehru,—I have received your letter dated the 13th, yesterday, delivered to me by hand.

"I know nothing as to what has transpired between the Viceroy and you; nor have I any idea of what arrangement has been arrived at between you two, except what you say in your letter that the Viceroy has invited you, in your capacity as the President of the Congress, to make proposals for the immediate formation of the Interim Government and that you have accepted the invitation.

"If this means that the Viceroy has commissioned you to form the Executive Council of the Governor-General and has already agreed to accept and act upon your advice and proceed to constitute his Executive accordingly, it is not possible for me to accept such a position on that basis.

"However, if you care to meet me on behalf of the Congress to settle the Hindu-Muslim question and resolve the serious deadlock, I shall be glad to see you today at 6 p.m.—M. A. Jinnah."

Immediate Issue—Letter from Pandit Nehru, dated August 15:—

"Dear Mr. Jinnah,—Thank you for your letter of today's date which was delivered to me at about 1 p.m. . . .

"It is understood, as stated in the published correspondence between the Congress President and the Viceroy, that the Interim Government will have the greatest possible freedom in the exercise of the day-to-day administration of this country.

"Since this brief offer was made and we accepted it, I have had no opportunity to meet the Viceroy or discuss the matter with him more fully, I hope to do so within the next two or three days. It was our wish, however, that I might approach you first and invite your co-operation. . . .

"In your letter you state that you are unable to accept the position as it appears to you. I regret this. Perhaps, on fuller consideration of the position you would be agreeable to reconsider your decision. If so we would welcome it. For this purpose I shall gladly see you, if you so desire.

"As regards the general Hindu-Muslim question, we are always prepared to discuss this and try to find a way out. Just at present we are immediately concerned with the formation of the provisional Government and circumstances demand that early steps should be taken in regard to it. We hope that a coalition provisional Government will itself help in the consideration and solution of our problems. While I am willing to discuss the larger question with you, I have no new suggestions to make. Perhaps you may be able to suggest a new approach. . . .

Yours sincerely, Jawaharlal Nehru."

Letter from Mr. Jinnah, dated August 15:—

"... I have already made my position clear in my letter dated August 15 sent to you this morning. But as you have given certain explanations, with some of which I must not be taken to agree, and as you desire to meet, I shall be glad to see you today at 6 p.m. . . . Yours sincerely, M. A. Jinnah."

INTERIM GOVERNMENT

Pandit Nehru then proceeded to Delhi and submitted to the Viceroy the names of twelve persons constituting the Interim Government. These included six top-ranking Congress leaders, namely Pandit Nehru, Sardar Vallabhbhai Patel, Dr. Rajendra Prasad, Mr. C. Rajagopalachari, Mr. Sarat Chandra Bose and Mr. Asaf Ali. This was on the basis of a Cabinet of fourteen. Two seats were to be filled later. Of the 12, three were Muslims, five caste Hindus and one representative each of the scheduled castes, Indian Christians, Sikhs and Parsis. The Congress also suggested the name of an Anglo-Indian as an additional member, but the Viceroy was apparently reluctant to increase the strength of the Cabinet.

On August 24, 1946, His Excellency the Viceroy announced the formation of the Interim Government. In a broadcast, he said:

"You will have heard the announcement of the names of the members of the new Interim Government which will come into office very shortly. You will, I am sure, all realise that a very momentous step forward has been taken on India's road to freedom. Some of you who listen to me may feel, however, that the step should not have been taken in this way or at this time. It is to these that I want principally to address myself tonight.

"You who are opposed to the formation of the new Government are not, I assume, opposed to the main policy of His Majesty's Government, namely, to fulfil their pledges by making India free to follow her own destiny. . . . But it has not been possible at present to secure a coalition. No one could be sorer about the failure than I am. . . .

"Offer To League—Let me state clearly the offer which has been made and is still open to the Muslim League. They can propose to me five names for places in a Government of 14, of which 6 will be nominees of Congress and three will be representatives of the Minorities. Provided these names are acceptable to me and approved by His Majesty, they will be included in the Government, which will at once be reformed. The Muslim League need have no fear of being out-voted on any essential issue; a Coalition Government can only exist and function on the condition that both main parties to it are satisfied. . . .

"As I have already made clear, I shall implement fully His Majesty's Government's policy of giving the new Government the maximum freedom in the day to day administration of the country. In the field of provincial autonomy, of course, the Provincial Governments have a very wide sphere of authority in which the Central Government cannot intervene. . . .

"The recent terrible occurrences in Calcutta have been a sobering reminder that a much greater measure of toleration is essential if India is to survive the transition to freedom. . . .

"The War Member in the new Government will be an Indian, and this is a change which both the Commander-in-Chief and I warmly welcome. But the constitutional position of the Armed Forces is in no way changed. They still owe allegiance, in accordance with their oath, to the King-Emperor, to whom and to Parliament I am still responsible.

"In spite of all immediate appearances I believe there is yet a chance of agreement between the two principal parties.

"It is desirable also that the work of the Constituent Assembly should begin as early as possible. I can assure the Muslim League that the procedure laid down in the Statement of May 16 regarding the framing of Provincial and Group Constitutions will be faithfully adhered to; that there can be no question of any change in the fundamental principles proposed for the Constituent Assembly in paragraph 15 of the Cabinet Mission's statement of May 16 or of a decision on a main communal issue, without a majority of both major communities; and that the Congress are ready to agree that any dispute of interpretation

may be referred to the Federal Court. I sincerely trust that the Muslim League will reconsider their decision not to take part in a plan which promises to give them so wide a field in which to protect the interests and to decide the future of the Muslims of India.

"We have come to another critical and solemn issue in the affairs of India. Never were tolerance and soberness in thought and action more necessary."

The new Government assumed office on September 2, 1946. It could not, however, settle down to any very useful work of administration or preparation for the Constituent Assembly, because grave breaches of the peace in Calcutta and elsewhere, resulting in the deaths of thousands of persons and considerable loss of property, cast a gloom over the country. Even so, the Government strove to consolidate its position by establishing conventions intended to invest it with real political power. For instance, it stopped the practice of Secretaries having direct access to the Governor-General. It also began to function as a Cabinet with joint responsibility under leadership of the Vice-President, Pandit Nehru.

PREMIER'S BROADCAST

Broadcasting shortly after the formation of his Government, Pandit Jawaharlal Nehru said:—

"Friends and Comrades—Jai Hind—Six days ago my colleagues and I sat on the chairs of high office in the Government of India. A new Government came into being in this ancient land, the Interim or Provisional Government we called it, the stepping stone to the full independence of India....

"And yet we asked for no celebration of this historic event and even restrained our people's enthusiasm. For we wanted them to realize that we were yet on the march and the goal had still to be reached....

"Our hearts were heavy also with the terrible tragedy of Calcutta and because of the intensive strife of brother against brother. The freedom we had envisaged and for which we had laboured, through generations of trial and suffering, was for all the people of India, and not for one group or class or the followers of one religion....

"I speak to you today not much of high policy or our programme for the future—that will have to wait a while—but to thank you the love and affection which you have sent us in such abundant measure. That affection and spirit of co-operation are always welcome but they will be needed more ever in the difficult days ahead of us....

"The future is already taking shape and India, this old and dear land of ours, is finding herself again through travail and suffering....

"The Interim National Government is part of a larger scheme which includes the Constituent Assembly which will meet soon to give shape to the constitution of free and independent India....

"We shall take full part in international conferences as a free nation with our own policy and not merely as a satellite of another nation....

"We propose, as far as possible, to keep away from the power politics of groups, aligned against one another, which have led in the past to world wars and which may again lead to disasters on an even vaster scale. We believe that peace and freedom are indivisible and the denial of freedom anywhere must endanger freedom elsewhere and lead to conflict and war....

"In spite of our past history of conflict, we hope that an independent India will have friendly and co-operative relations with England and the countries of the British Commonwealth. But it is well to remember what is happening in one part of the Commonwealth today. In South Africa racialism is the State doctrine and our people are putting up a heroic struggle against the tyranny of a racial minority....

"We send our greetings to the people of the United States of America to whom destiny has given a major role in international affairs.... To that other great nation of the modern world, the Soviet Union which also carries a vast responsibility for shaping world events, we send greeting....

"Old Order Passes—We are of Asia and the peoples of Asia are nearer and closer to us than others. India is so situated that she is the pivot of western, southern and south-east Asia.... China, that mighty country, with a mighty past, our neighbour has been our friend through the ages and that friendship will endure and grow....

"I have not said anything about our domestic policy, nor at this stage do I wish to do so. But that policy will inevitably have to be governed by the principles by which we have stood all these years. We shall look to the common and forgotten man in India and seek to bring him relief and raise his standards of living. We shall continue our fight against the curse of untouchability and other forms of enforced inequality....

"An equally urgent and vital task for us is to conquer the spirit of discord that is abroad in India....

"There has been much heated argument about sections and groupings in the Constituent Assembly. We are perfectly prepared to accept and have accepted, the position of sitting in sections, which will consider the question of formation of groups.... We shall go to the Constituent Assembly with the fixed determination of finding a common basis for agreement on all controversial issues....

"India is on the move and the old order passes. Too long have we been passive spectators of events, the playthings of others. The initiative comes to our people now and we shall make the history of our choice.... JAI HIND!"

CALCUTTA TRAGEDY

Meanwhile, the Congress Working Committee met in Delhi and passed a resolution on the Calcutta carnage. It ran

"The Working Committee have read with deep sorrow reports about the recent happenings in Calcutta in connection with the observance by the Muslim League of Direct Action Day on August 16 and subsequent days. They deplore the serious loss of life and property and condemn in particular the acts of brutality committed against defenceless persons, especially women and children....

"On July 29 the Council of the All-India Muslim League passed a resolution deciding upon Direct Action. In support of the resolution inflammatory speeches were made and subsequently speeches and statements and pamphlets by responsible members of the League and Ministers, and articles in some League newspapers have served to inflame a large section of the Muslim masses....

"The Government of Bengal declared August 16 as a public holiday in spite of protest and thereby gave an impression that the observance of August 16 was enjoined by the Government and persons not joining in the observance could claim or get no protection from the Government....

"Stabbing and looting started early in the day and guns are said to have been used by hooligans in many places. Murders in most brutal circumstances, looting and burning of houses on a large scale followed and lasted for three or four days resulting in the death of several thousand persons and looting and burning of property worth crores of rupees....

"There was practically no police, nor even traffic police, to be seen on August 16 and even the precaution of sending foot and mounted police to accompany processions was not taken....

"The military were not called till long after the havoc had commenced. In some places even the police participated in the looting. After the initial orgy of murders, loot and arson the Hindus and others retaliated and indulged in reprisals wherever they could and a large number of Muslims were killed....

"It is satisfactory to note, however, that in the midst of this mutual slaughter and inhuman barbarities there were cases where Hindus gave shelter to Muslims in distress and Muslims gave protection to Hindus in difficulty....

"In view of the very serious, nature of the riots, the like of which has never before happened in any part of the country, it is essential in the opinion of the Working Committee that a thorough inquiry be held by an impartial tribunal into the circumstances preceding August 16 and incidents of August 16 and the following days....

"The Working Committee place on record their opinion that the Government of Bengal utterly failed to maintain peace and give protection of life and property to peaceful citizens...."

WORKING COMMITTEE RATIFIES

The history, since the formation of the Interim Government at the centre in June 1946, of the Indian National Congress as the party in the vanguard of India's political struggle, has been

largely determined by the stormy and momentous events in India culminating in the granting of independence to the country and its inevitable partition.

After independence, India's problems continued no less to tax the ingenuity and resources of Governments, Central and Provincial, and of the majority party representing the people.

At the All-India Congress Committee meeting at the end of September 1946 the steps taken by the Congress Executive leading up to the formation of the Interim Government were ratified by an overwhelming majority. The resolution was moved by Maulana Abul Kalam Azad ratifying the Working Committee's decision. Twelve members out of about 250 present were against the motion; Mr. Jai Prakash Narain announced that he and his group would remain neutral on the resolution.

Maulana Abul Kalam Azad's resolution said: "The A. I. C. C. having considered the direction of the Working Committee to the President of the Congress to accept the invitation of the Viceroy to form an Interim National Government, approved this direction and ratified the subsequent steps taken thereunder resulting in the formation of the Interim Government."

Dr. Pattabhi Sitaramayya, seconding the resolution, characterised it as a bridge and not a house to live in.

Two amendments, one of which directed the Government to demand the immediate withdrawal of British troops from India and the other to transcend the limitations imposed by the Cabinet Mission on the Constituent Assembly, were ruled out.

A second resolution on the agenda seeking to permit the Congress members of the Interim Government to continue as members of the Working Committee was moved by Pandit Govind Ballabh Pant.

Pandit Jawaharlal Nehru, Congress President, addressing the Committee declared that he was relinquishing the Congress Presidency, consequent on his acceptance of office at the Centre.

Opening the session, the President giving a resume of the developments since the last meeting of the A. I. C. C. early in July, explained how the Working Committee's decision not to participate in the formation of the Interim Government on the basis of the Viceroy's statement of June 16 had to be revised in the light of altered circumstances.

Commending their resolution ratifying the Working Committee's decision to form the Interim Government, Maulana Abul Kalam Azad said that whatever step the Congress had taken was the only correct one. "Our achievement today is because of the methods we employed in the past," the Maulana said, and added, "today our goal—freedom—is within sight. With the change, in the circumstances and the particular situation in which we find ourselves we must change our methods as well. Today we are in such a position that, by joining Government, we could increase our strength enormously."

On the following day the A. I. C. C. by a comfortable majority, passed Pandit G. P. Pant's resolution enabling members of the Interim Government to serve on the Congress Executive

Before voting on it, Pandit Pant, replying to the debate, invited the House to understand its exact meaning. He made it clear that the resolution was permissive. It merely sought to remove an obstacle in the way of the President choosing, if he wished to be so, members of the Interim Government as members of the Working Committee. "I did not mean that members in the Interim Government should necessarily be members of the Working Committee," he added.

On the following day the Congress Working Committee accepted Pandit Nehru's resignation from the presidency, but requested him to carry on his duties till a new one was elected. The Working Committee, in a resolution, invited the attention of the provincial governments to the issue of 'Reform of the Land System'. The provincial governments were, accordingly, requested to send their proposals in this behalf to the Working Committee within two months.

New President.—In the middle of October, it was announced that, in the election of the President to the A. I. C. C. the names of Maulana Abul Kalam Azad and Acharya Kripalani were proposed, but that as the former had withdrawn the latter remained the only candidate and would be duly elected.

On that occasion Maulana Azad said, "The reason which influenced my decision in April last not to seek re-election holds good even today. I am fully sensible of the desire of all my friends and colleagues who would like me to resume the heavy responsibilities I have shouldered for six years continuously, but I regret to say that I must disappoint them for the reasons I have frankly stated before the country six months ago."

Later, Acharya Kripalani, in a statement on his election as President, said "I am not unconscious of my limitations... My first task I conceive is to exert my utmost in the cause of Hindu-Muslim unity so that the inhumanities and barbarities that recently disfigured and disgraced Calcutta and still do East Bengal become things of the past. My second concern will be the purification and consolidation of our organisation."

On October 24, 1946, the Congress Working Committee adopted a resolution on the disturbances in East Bengal, which said, "Communalism can only be fought with nationalism and not with counter-communalism. The riots in Bengal clearly formed parts of a pattern of political sabotage calculated to destroy Indian nationalism and check the advance of the country towards democratic freedom." The Committee warned the country against retaliatory outbreaks of communalism.

Nearly a month later, strong condemnation of retaliatory communal violence was made by the Congress Working Committee in a resolution adopted on Bihar. The Committee called upon all Congressmen to restore a sense of security and bring about reconciliation between Hindus and Muslims.

The Working Committee paid a tribute to the late Pandit Malaviya in a resolution. Other resolutions passed referred to the dispute of Indians in South Africa, the situation in East Africa and Indonesia.

GLOOMY PICTURE

In the third week of November Pandit Nehru, speaking at the Subjects Committee of the 54th session of the Indian National Congress, drew a gloomy picture of the prevailing political situation. In a fighting political speech, he made grave and direct charges against the Viceroy and the Muslim League, hinting at an "inevitable struggle" if things did not improve. Pandit Nehru hoped, however, that the League would join the Constituent Assembly but, if it did not, he declared, the work of constitution making would proceed. Pandit Nehru was speaking on a resolution declaring, on the eve of summoning of the Constituent Assembly (which was to meet on December 9), that the Congress stood for an independent sovereign republic.

Earlier the Committee passed by an overwhelming majority, only 30 opposing, Maulana Azad's resolution confirming and ratifying the decisions of the Working Committee and the A. I. C. C., including the one on the formation of the Interim Government.

The following day, clear reference was again made to the "struggle ahead" and the need for preparing for it. A resolution was presented by the Working Committee for adoption by the Congress reviewing the events and tendencies of the six and a half years ending then since the last session of the Congress and calling upon the people to put an end to internecine conflict.

Moving the resolution, Pandit Nehru said, "Ours is not an empty threat. We have fought the British in the past and we shall fight them again if necessary."

Moving a resolution on the Indian States, Dr. Pattabhi Sitaramayya traced the development of Congress policy to date in which the question of the States' people was integrated with the British India's struggle for freedom.

Broader Franchise.—Mr. Shankarrao Deo's resolution suggesting amendments to the Congress Constitution was dropped and its place was taken up by an amendment by Babu Purshottamdas Tandon as a substantive motion which said that "in view of the new conditions that had arisen, the Congress authorises the A. I. C. C. to amend and revise the Congress constitution in order to make the Congress as widely representative of the Indian people as possible."

A further definition of the Congress objective was contained in a resolution adopted by the Working Committee, which said that, in the opinion of the Congress, *swaraj* could not be real for the masses unless it made possible the achievement of a society in which democracy extended from the political to the social and economic sphere, and in which there would be no opportunity for privileged classes to exploit the bulk of the people, nor for gross inequalities such as exist at present. A resolution on the revision of the Congress constitution altered the basis of the four-anna membership and pleaded for broader franchise in the election of Congress representatives.

At the 54th Indian National Congress Session held at Meerut on November 23, Pandit Nehru and Sardar Patel lashed out at the Muslim League and the permanent officials, who were charged with acting as if they were members of the League.

Speaking on the resolution ratifying the decision to form the Interim Government, Sardar Patel, in one of the most fighting speeches of his career, said: "The sword must be met by the sword." This was a stern warning to those who, he said, were trying to achieve a political objective by violent means. "We are not resigning from the Interim Government," he asserted. It was for the League to make up its mind whether it was joining the Constituent Assembly.

Acharya Kripalani in his presidential address, said: "If the Congress had not taken up the challenge of British Imperialism in August 1942, we would not have been occupying the position we do today." He said that the British could no longer deny freedom to them whatever their intentions. If today they missed their goal, the fault was theirs (Indians).

Referring to the communal trouble in India, Acharya J. B. Kripalani said, "The communal conflict has today assumed not only a serious but a vicious aspect. If we are to be worthy of freedom we must learn to live together and respect each other's sentiments... In no case must we allow the poison of communal strife further to disintegrate our national and corporate life."

Moving the resolution on "retrospect", first moved by the Subjects Committee, Pandit Nehru, spoke with emotion about the resurgence of freedom fervour in the land. Administering a stern rebuke to the British members of the Services who, he said, "were in league with the Muslim League and with reactionism", he also referred to those killed in the 1942 movement. He conceded that the British Government might be sincere in their intentions but the British bureaucracy in India had not changed. Correcting the impression that the Congress Government might leave the Central Government in a huff, he declared they would refuse to resign—they would have to be dismissed.

New Working Committee.—At the end of November 1946, Acharya J. B. Kripalani, the Congress President, announced the personnel of the new Working Committee which would consist of the following 14 members: Maulana Abul Kalam Azad, Pandit Jawaharlal Nehru, Sardar Vallabhbhai Patel, Mrs. Sarojini Naidu, Dr. Rajendra Prasad, Khan Abdul Ghafar Khan, Sarat Chandra Bose, Rajagopalachari, Shankarrao Deo, Smt. Kamala Devi, Rafi Ahmed Kidwai, Jai Prakash Narain, Pratap Singh and Jugal Kishore (U.P.). Shankarrao Deo and Jugal Kishore were to be General Secretaries and Vallabhbhai Patel would continue as Treasurer.

INDEPENDENT SOVEREIGN REPUBLIC

The Constituent Assembly designed to shape a new constitution for India met on December 9. On December 12 Pandit Jawaharlal Nehru moved the resolution on the declaration of

objectives prepared as a result of discussions at meetings of Congress members during the two previous days. The final draft read: "Wherein this Constituent Assembly declares its firm and solemn resolve to proclaim India as an independent sovereign Republic and to draw up for her future governance a constitution of the territories that now comprise British India, the territories that now form the Indian States, and such other parts of India as are outside British India and the States as well as such other territories as are willing to be constituted into the independent sovereign India shall be a Union of them all; and

"Wherein the said territories, whether with their present boundaries or with such others as may be determined by the Constituent Assembly and thereafter, according to the law of the constitution, shall possess and retain the status of autonomous units, together with residuary powers, and exercise all powers and functions of Government and administration, save and except such powers, and functions as are vested in or assigned to the Union, or as are inherent or implied in the Union or resulting therefrom; and

"Wherein all power and authority of the sovereign independent India, its constituent parts and organs of Government, are derived from the people; and

"Wherein shall be guaranteed and secured to all the people of India justice, social, economic and political; equality of status, or opportunity, and before the law; freedom of thought, expression, belief, faith, worship, vocation, association and action, subject to law and public morality; and

"Wherein adequate safeguards shall be provided for minorities, backward and tribal areas, and depressed and other backward classes; and

"Wherein shall be maintained the integrity of the territory of the Republic and its sovereign rights on land, sea and air according to justice and the law of civilised nations, and this ancient land attain its rightful and honoured place in the world and make its full and willing contribution to the promotion of world peace and the welfare of mankind."

Grouping Of Provinces.—At the end of December the Congress Working Committee decided not to clinch the issue of grouping of provinces beyond declining to pursue the proposal to refer it to the Federal Court. It left the decision to the A. I. C. C., of which an emergency session was called in Delhi, on January 5 following. The purport of the lengthy statement issued by the Working Committee on the occasion was that the statement issued by the British Government on December 6, 1946, giving their decision on the grouping issue, as well as other statements made subsequently in Parliament were clearly additions to and variations of the British Cabinet Mission's Statement of May 16, 1946, on which the whole scheme of the Constituent Assembly was based.

The Congress Constitution Sub-Committee, in seven meetings held from December 12 onwards, laid down certain principles on which the new constitution was to be based. The drafting was entrusted to Mr. R. R. Divakar, convener of the Committee.

The Congress Working Committee, in a draft resolution, submitted to the A. I. C. C. in early January, 1947, recommended agreement with the British Government's interpretation of the State Paper relating to grouping of the provinces. The step was stated to be due to the Congress anxiety to facilitate the work of the Constituent Assembly with the goodwill of all parties and to remove all complications created by a variety of interpretations. At the same time it was made clear that the Congress would not be a party to coercion by any province of any other province or part of a province.

The resolution explained that making a reference to the Federal Court on this issue had become purposeless and undesirable after the interpretation of the British Government. The A. I. C. C. was firmly of the opinion that the constitution for a free and independent India should be framed by the people of India and on the basis of as wide an agreement as possible. There was to be no interference whatsoever by any external authority and no compulsion of any province or part of a province by any other province. Mr. Shankarrao Deo pointed out that the course of wisdom lay in seizing even an apparently adverse situation, namely, that created by the December 6 Statement, and turn it to the country's advantage.

The A. I. C. C. passed on the following day the Working Committee's resolution advising acceptance of his Majesty's Government's December 6 Statement by 99 votes to 52. The main amendment for rejection of the statement, moved by Babu Purshottamdas Tandon, was lost, 64 voting for it and 102 against it. Pandit Nehru declared that the Congress was not going to commit itself at that moment to any reference to the Federal Court or to any authority.

The opposition comprised not only Socialists, who disapproved of a compromise and wished to give a revolutionary turn to Congress policy, but also members from Assam who sympathised with them. Even some known to be consistent supporters of the High Command also voted against the resolution. Mr. Jai Prakash Narayan, who resigned from the Working Committee, but whose resignation was not accepted by the President, was permitted to oppose the resolution sponsored by the Executive. The Socialist leader declared that he refused to believe that the British were quitting India.

ATTLEE DECLARATION

A resolution calling upon the provincial and district committee to mobilise public opinion in the country "in view of the prospect of an early termination of foreign rule in India", to enable the Central and Provincial Governments to maintain close contact with the masses and respond to their needs and view and "thereby becoming fully democratic instruments of popular will and rule", was adopted at a three-day conference of the presidents and secretaries of Provincial Congress committees held at Allahabad at the end of February. The conference, by another resolution, appointed another committee to consider the A. I. C. C. note on Congress reorganisation and submit its report before the conference.

The Congress Executive which met at New Delhi early in March considered the different

interpretations of the Labour Government "Quit India" announcement (Mr. Attlee's declaration of British withdrawal from India made in the House of Commons on February 20). It was generally agreed that the declaration should be welcomed as a bold and courageous enunciation of policy. On the question of the method of transfer, the Committee seemed to be of the view that the best course for Britain would be to hand over power to a Central authority in conformity with the British Cabinet Mission Plan of May 16 as subsequently interpreted by the British Government and agreed to by the Congress. If however the authority so constituted was repudiated by certain elements in the country then, it was suggested, the secession of authority should be in favour of existing provincial areas in which the dissidents predominated.

It was also discussed what the nature of the intervening period of 14 months before the final withdrawal of the British authority should be. The Punjab developments were deplored by the Committee which attributed the trouble to the possibility envisaged in the statement of February 20 of a transfer to "existing provincial governments".

Later the Congress Working Committee invited the Muslim League to nominate representatives to meet Congress representatives to consider the situation that had arisen from the impending transfer of power and to devise means to meet that situation. The Committee declared that the transfer of power, to be smooth, should be preceded by the recognition in practice of the Interim Government as a Dominion Government with effective control over the Services and administration, and the Viceroy and Governor-General functioning as the constitutional head of the Government. The Committee asserted that, in view of the tragic events in the Punjab, it was necessary to find a way out involving the least amount of compulsion that would necessitate the division of the Punjab into two provinces.

The Working Committee also welcomed the decision of a number of States to join the Constituent Assembly and trusted that all the States and their peoples should be effectively represented for the task of making a constitution for an Indian Union.

CONGRESS CONSTITUTION

The Working Committee also approved of the resolution regarding the constructive programme passed unanimously at the conference of presidents and secretaries of the Provincial Congress committees and other bodies like the All-India Village Industries Association.

At the end of March the Congress Constitution Committee, under the Presidency of Dr. Pattabhi Sittaramayya, recommended that the Congress should ordinarily meet every three years, that all Congress elections should be triennial and that the Working Committee should consist of 21 members instead of 15 as then prevailing, as there would be three classes of Congress members—ordinary, qualified, and active. Each lakh of population would be entitled to send one delegate to the Congress provided there were 500 ordinary and qualified members in that area and also provided that no constituency should be bigger than five lakhs of population.

The Congress Working Committee which met early in May spread over two sessions, covered the prevailing political situation against the background of the talks which Mahatma Gandhi, the Congress President and other Congress leaders had during the previous month with the Viceroy and the developments subsequent to Mahatma Gandhi's departure, with particular reference to the North-West Frontier Province, which was discussed at length and which, according to Congress quarters, might become a "test case".

The following day the Committee sent to the Viceroy's House an important memorandum reiterating the Congress stand on the issue of the division of India and expressing its strongest opposition to any proposal for fresh elections in the Frontier Province. It was made clear in the document that if there was to be a division of India, it should be as complete and thorough as possible, including the partition of the Punjab and the Bengal.

At the end of May important talks were conducted at New Delhi between Mahatma Gandhi and the Congress President, Acharya Kripalani, on one hand and the Socialist leaders, Mr. Jai Prakash Narayan, Shrimati Kamaladevi and others, on the other hand to bridge the widening gulf between the Congress and its Socialist wing.

PARTITION INEVITABLE

Meanwhile, events had moved fast in India. The country was engulfed in communal frenzy and carnage, especially in the northern parts. There seemed to be no alternative solution, however inadvisable, and unpalatable to the partitioning of the land. This inevitability was recognised in the British Government's Statement of June 3 envisaging the partition of India and a union of India with Indian States.

The Working Committee, ten days later, passed a resolution explaining the inevitable. The draft resolution for the A. I. C. C. said that H. M. Government's proposals of June 3 were likely to lead to the secession of some parts of the country from India. However much this was to be regretted, the A. I. C. C. accepted the possibility in the circumstances then prevailing. Welcoming the decision of the British Government to transfer power to the Indian people completely by the following August, the resolution appealed to Congressmen to forget their differences and petty disputes and to stand by vigilant, disciplined and prepared, to serve the cause of India's freedom and defend it with all their strength from all who might seek to do it injury.

On June 14, 1947, the A. I. C. C. commenced a historic session at the Constitution Club at New Delhi. Pandit Govind Ballabh Pant, moving the resolution accepting H. M. Government's plan of June 3, said that this was the only way to achieve freedom and liberty for the country: the choice then was between accepting the Statement of June 3 and committing political suicide. Pandit Pant argued that it was better to accept the Statement of June 3 than fritter away the energies and to keep unwilling people in the Union.

A. I. C. C. Endorses.—Maulana Abul Kalam Azad, seconding the resolution, said that the choice before the Congress was not which plan to accept and which to reject, but whether the

prevailing state of indecision and drift should continue. The Congress stood by the ideal of united India and it also conceded to the principle of self-determination and was against coercing unwilling areas to join the Union. Mr. Purshottamdas Tandon, the principal opponent to the resolution, declared in an impassioned speech that the A. I. C. C. must reject it and that it was not sufficient for accepting to say that an adverse vote would hurt the prestige of the Working Committee. Acceptance of the resolution would mean abject surrender to the British and to the Muslim League. The Working Committee had failed India, but India with the strength of millions behind her must reject this resolution. The Working Committee had accepted the plan in weakness and out of a sense of desperation.

Mahatma Gandhi, in a 40-minute address to the Committee, commended the Working Committee's resolution. If at that stage the A. I. C. C. rejected the Working Committee's decision, he said, what would the world think of it? All the parties had accepted it and it would not be proper to go back on its word. If the A. I. C. C. held so strongly on this point, continued Mahatma Gandhi, that this plan would do injury to the country, then it could reject the plan. The consequence of such a rejection would be the finding of a new set of leaders who could constitute not only the Congress Working Committee but also take charge of the Government.

After eight hours' lively debate, the following day, the A. I. C. C. endorsed the stand taken on their behalf by their Executive in accepting the British Government's June 3 proposals.

The official resolution was adopted by an overwhelming majority—in a house of 218, 157 voted in favour of the resolution and 29 against.

The 500-word official resolution recalled the policy of the Congress: "It cannot think in terms of compelling the people of any territorial unit to remain in an Indian union against their declared and established will" and explained the proposals embodied in the Statement of June 3 which "have laid down the procedure for ascertaining the will of the people concerned".

The resolution added: "The A. I. C. C. earnestly trusts that when present passions have subsided India's problems will be viewed in their proper perspective and the false doctrine of two-nation will be discredited and discarded by all. The proposals of June 3 are likely to lead to the secession of some parts of the country from India."

At this session the A. I. C. C. passed unanimously a resolution telling the Princes that the Congress "cannot admit the rights of any state in India to declare its independence and to live in isolation from the rest of India."

FUTURE ROLE

On the eve of India's independence, Mr. Shankarrao Deo, General Secretary of the A. I. C. C. explained the future role of the Congress. If India's destiny was to be fulfilled, he declared, and if it had to take its proper place in the comity of nations, then unity was essential.

There was no other organisation more fitted for this task than the Congress, he added, and, therefore, its need was greater than before. Besides

at a critical period in her history India required for its progress one big political party large enough to guarantee a stable government and strong enough to maintain its hold and influence over the people. The Congress alone, he pointed out, could secure all the requirements.

The Congress, he continued, had proved its capacity to adapt itself to the need of the changing times. Disaster awaited them in all directions if the Congress failed to transform itself so that it could assume that great responsibility. The aim of the Congress was to create a new society based on social justice and equality.

On August 15, 1947, India celebrated Independence day with great country-wide rejoicing.

The Congress Working Committee met at the end of September to consider, among other things, the situation arising out of the disorders in the Punjab, with particular reference to the refugee problem and the safety of minority in East and West Punjab. In a statement the Committee gave an assurance to the minorities that the Congress Government would continue to protect to the best ability their citizen rights against aggression. At the same time it emphasised that is expected from the minorities the same allegiance and loyalty to the State as from the majority community.

Mr. C. Rajagopalachari who had taken over the Governorship of West Bengal resigned from the Congress Working Committee on November 10. Mr. Jai Prakash Narayan, another member, had already resigned but was invited to attend the last two meetings.

At the A. I. C. C., which met in mid November, Mahatma Gandhi declared that no muslim in the Indian Union should feel his life unsafe and all those muslims who had left India under coercion should be brought back. He thus gave the lead to two resolutions, earlier approved by the Working Committee, moved by Mr. Shanker

Rao Deo and seconded by Mr. Jai Prakash Narayan: one laying down the "national policy" to be followed by the Government of India in dealing with relief and rehabilitation problems and another on the question of protection of minorities in India.

KRIPALANI LEAVES

Pandit Nehru moved a resolution about the elimination of foreign rule and of the fundamental policy of the Congress. It was seconded by Mr. B. G. Kher. Acharya Kripalani asked the A. I. C. C. to relieve him of the responsibility of presidentship and to treat his decision "as irrevocable". Acharya Kripalani expressed dissatisfaction with the prevailing identifications of the Congress Executive with the Government at the Centre and asked how the Congress was to give to the Government its active and enlightened co-operation unless its highest executive or "at least its popularly chosen head is taken into full confidence on important matters that affect the nation".

Dr. Rajendra Prasad was later elected President of the Indian National Congress in place of Acharya Kripalani, who had resigned. Dr. Prasad resigned the ministership in the Central Government but retained presidentship of the Constituent Assembly. The proposal which came like a bolt from the blue to the majority of the A. I. C. C. members was proposed by Sardar Patel and seconded by Pandit Nehru. There was, however, all round satisfaction with the choice and Dr. Prasad was unanimously elected.

The A. I. C. C. appointed a Committee to report to a special session of the A. I. C. C., which was to be held in the month of January following, on the revision of the Congress constitution in the light of the changed political picture in the country and the need for readjustment in the organisation and functions of the Congress.

The National Liberal Federation.

A DEFINITE breach between the moderate and extremist elements in the Congress at its special session in Bombay in August 1918 (vide 1919 edition of this book) witnessed the birth of the National Liberal Federation which till the other day was the platform of Indian moderate leaders. Today liberalism in India is as good as dead. The country has become almost exclusively Congress minded, so that this chapter has only historical value.

The National Liberal Federation held its first session in Bombay in 1918, Sir Surendranath Banerjee presiding. The Federation adopted for its creed the old Congress formula which was set aside by the Nagpur Congress. The Liberal Party in India has always been the rallying point of moderately progressive opinion. It has consistently stood for a pure type of nationalism and orderly progress through peaceful and constitutional means, as opposed to the revolutionary creed and policy of the Congress. During the first five or six years of its existence, the party played a useful and valuable part in politics and exerted a wholesome influence on public life. The death of Montagu was a serious blow to the Indian Liberal Party whose influence on Indian affairs steadily waned from then on. The Indian Round Table Conference brought it again to the forefront, but its influence again suffered partly as the result of the reactionary provisions of the Government of India Act of 1935 and partly as the result of the growing strength of the Congress organisation. The return of the Congress to the constitutional path ousted it from Indian Politics.

At the time of writing the Liberal Party exists only in name, there being no place for a middle group in Indian affairs of the present day. Latterly scope has arisen for activity in between extremist groups, rather as mediators than as principals. This function of mediation has been filled by a group of leaders, consisting mostly of retired administrators and others who own no party affiliations or have severed party allegiance. Quite a few Liberal Party members have joined in the deliberations of this group in their individual capacity. Formed under the title of Non-Party Leaders' Conference, this group has itself crystallised into a centre party, throwing the Liberal Federation further into the background. Indeed, it was felt necessary to enter at a recent session of the Liberal Federation a special plea for the continuance of the Liberal Party in reply to suggestions that the party be wound up.

CONSTRUCTIVE CRITICISM

The general elections for the provincial legislatures under the Government of India Act of 1935 confirmed the exit of Liberals from active political life in India. Few Liberal candidates contested the elections, but hardly any was successful. During the past two or three years the Liberal Party existed only in name. Its leaders, however, made their existence felt by occasional contributions to the discussion of public questions. They also played a valuable part in offering sober and constructive criticism of the policies and actions of the majority party, the Congress. Such criticism was all the more

useful owing to the absence of an opposition in most of the provincial legislatures in which the Congress was in power.

The elections of 1946 completed the rout of the Liberals who have ceased to be an effective factor in the country's political life. Their place was more or less taken by the right wing of the Congress which in its turn is the result of the development of extremism within the Congress itself.

Although the Liberals held no less progressive views than Congressmen, there was a fundamental difference between the two: the former had fixed Dominion Status within the Empire as their ambition, while the latter set "complete independence" as their goal; similarly in the matter of method, the Liberals were opposed to direct action and were wedded to constitutional forms of agitation to accelerate the pace of the country's political advance.

There is another direction in which the Liberal Party's sentiments may be said to be different from those of the Congress. Having an abiding faith in the British connection and being convinced of the potentialities for good of the British Empire, the Liberal Party constantly wishes well by the Empire and what it stands for. For this reason no member of the Party wished anything but success for the Empire in the struggle against aggression. Many of them gave public expression to their convictions in this behalf and to their undoubted desire that India should render full support to Britain in her war.

Latterly, however, the bulk of the Liberals showed signs of impatience over the deadlock in the country. They were by no means happy over the bureaucratic form of administration both at the centre and in the majority of the provinces. They wished that the authorities should make an effort to end the political inactivity. Towards this end they made repeated appeals to the British authorities.

Not all of these were made in the name of the Liberal Federation. Indeed the most influential and well-known exponents of the view-point of the Liberal Federation do not belong to that organisation. Take for instance, the Non-Party Leaders' Conference whose proceedings figured largely in Indian politics during the years 1942-1944. The President and more than one leading light of this Conference are not members of the Liberal Federation. It is nevertheless true that the views of both are identical on many subjects. It may therefore be appropriate to deal with the activities of these leaders in this Chapter.

THE MODERATE ERA

The activity of the Liberals and other moderate leaders during the few years preceding independence followed a dual policy. On the one hand, they were never slow to denounce any attempt to hamper the country's war effort, and, on the other, their demands were little different from those of the Congress.

The period when the Congress was in the wilderness, especially since the adoption of the August resolution till the release of Congressmen

In June, 1945, may perhaps be described as the moderates' era in Indian politics. Not that they regained their lost influence, nor that the masses abandoned their extremist tendencies which they had acquired from the Congress propaganda. If anything, extremism, feeding on itself, became more extremist. Nevertheless, it was a moderates' period in the sense that the moderate leaders occupied the public stage. The Congress exit into wilderness was partly responsible for this development. When the satyagraha movement was in progress, there was hardly any politics worth the name except the activities of the Liberals and other moderate leaders."

Another reason for public attention being directed towards moderate politics was the effort made by the British Government to meet the demands of moderate leaders. It cannot be said that the authorities did anything substantial to enhance the reputation, and strengthen the position, of the sober element in the Indian political world; on the contrary, the point was frequently made that, the way in which the Liberals were ignored gave additional impetus to extremism. But such action as was taken was the result of the outspoken representations made by the moderate leaders.

The year 1944-45 was marked by the jubilee session of the Liberal Federation which completed 25 years of public service. Another remarkable activity was the evolution by Sir Tej Bahadur Sapru and a Committee of non-party leaders of a compromise formula relating to India's future constitution. This was drawn up following the failure of the Gandhi-Jinnah negotiations in the autumn of 1944.

PEACE EFFORTS

During the year 1943-44 the activities of the Liberals and the peace efforts of moderate politicians generally were of a limited character. This was due partly to the stagnant nature of the attitude of both sides to the dispute, namely, Government and Mahatma Gandhi. Whereas the Government of India refused to move from the decision not to reopen the question unless the Mahatma abrogated the "Quit India" resolution of August 1942 and forsook the policy underlying it, the Mahatma, for his part, gave no indication to respond in terms of the Government demand. Notwithstanding the hopes and speculations of those who variously claimed to know the Mahatma's mind, his own attitude seemed hardly to have varied from the sentiments expressed by him in his letter to Lord Linlithgow and the Government of India published on the eve of his fast in February 1943. Thus there was available to the intermediaries no common factor which they could exploit to bring about an understanding between the two opposite view-points.

Even so, efforts, though of a sporadic nature, continued to be made by unattached leaders to secure a change in the official policy towards the Congress or at least to induce Government to release the leaders so as to enable them to consider the altered situation. Undeterred by their failure to move the Government following Mahatma Gandhi's fast, the moderate leaders urged the appointment of an impartial tribunal to investigate the charges made against Congress

under detention or, in the alternative the release of those leaders so as to enable them to review the situation and attempt a solution of the deadlock. To this, however, the Secretary of State replied in the House of Commons, saying that the Government of India had no intention of "staging a trial" of Mahatma Gandhi and other detained Congress leaders.—(See last year's issue).

In the winter of 1943-44 the annual session of the National Liberal Federation met in Bombay under the presidency of Kunwar Sir Maharaj Singh. The Session was remarkable for the diametrically opposite view points expounded by the President and the Chairman of the Reception Committee (Sir Cowasjee Jehangir).

While deploring the August resolution of the Congress, Sir Maharaj Singh criticised Government for failure to announce a complete change of policy at the commencement of the war, adding that "if Sir Stafford Cripps had come to India with his proposals in 1939 or early in 1940, instead of 1942, there would have been an excellent prospect of their acceptance." Under present conditions, he deplored, "we are face to face with a divided India, with thousands of our fellow-countrymen, including many prominent and popular leaders, in prison, the retention by European officials of the key departments of Finance, Defence and Home in the Government of India, a complete absence of popular government in large portions of India, swollen prices, general distress and famine in large and densely populated areas." Sir Maharaj complained that the advice of moderate leaders had been brushed aside by Government.

Sir Cowasji Jehangir took a different view of the problem. He blamed the Congress for the failure of the Cripps Mission and affirmed that it broke down owing to the eleventh-hour raising of the issue of the Viceroy's veto. He cited Quaid-i-Azam Jinnah's opinion in support of the contention that the formation of a national Government on the lines of the Congress demand would have been totally opposed by the minorities in general and the Muslims in particular.

After drawing attention to the events that followed the August resolution, Sir Cowasji declared that if any progress was to be made it was essential that the Congress should not only withdraw the August resolution but also give an assurance to the British public and to the peoples of the Allied Nations that all people in India were behind this war and that they would unconditionally and enthusiastically help the war effort.

Two-nation Theory—The unconditional release of Congress leaders, the treatment by the Congress leaders of the "Quit India" resolution of August 1942 as a dead letter, a conference of political parties and the formation of national composite governments at the Centre and in the provinces—these suggestions were embodied in a resolution, passed by the session. The conference also passed resolutions dealing with the war, India's position at the peace conference, Government's food policy and the Bengal famine.

Early in the summer of 1944, a session of the Non-Party Leaders' Conference met at Lucknow under the presidency of Sir Tej Bahadur Sapru. (See last year's issue.)

In June 1944 the Council of the National Liberal Federation met in Poona and made a two-fold appeal one to the Government unconditionally to release Congressmen not found guilty of violence and the other to the Congress to treat the August resolution as a dead letter, to put it aside and take measures to arrive at a working arrangement with other political parties for the formation of a provisional Government.

The next meeting of the Council was held at Allahabad in October and expressed the opinion that the two-nations theory advanced by the Quaid-i-Azam was opposed to facts while his insistence on a plebiscite confined to Muslims was unfair to other communities and incompatible with democratic concepts. The Council also declared that the division of the country into two or more separate sovereign states was not a right solution for the Hindu-Muslim question.

CONCILIATION COMMITTEE

Soon after the failure of the Gandhi-Jinnah talks in Bombay Sir Tej Bahadur Sapru, President of the Non-Party Conference, announced his intention to set up a committee (called the Conciliation Committee), comprising eminent public men with no marked political affiliations, to examine the Indian communal question from a political and constitutional point of view. This was the outcome of a resolution passed by the Standing Committee of the Non-Party Conference.

Sir Tej Bahadur Sapru explained that he had placed before Mahatma Gandhi the idea of a committee of the kind now decided upon and the Mahatma had said:—"I shall unreservedly co-operate with it. You can call me whenever you like, put me any questions you like and ask me for any assistance you like."

Sir Tej Bahadur added that it was his intention that there should be on the committee no one who was a partisan or one who had expressed himself violently on political issues of the country. It was also the idea that there should be one or two retired judges who would bring a judicial mind to bear on the country's problems.

The basic conception of the committee was that the discussion of the communal and political problem should be lifted from the partisan level to the scientific and judicial level.

The effort of the committee would be to understand the views of each party, act as a sort of conciliation board by establishing contact with all parties and recommend some solution that they thought good on their own responsibility.

Personnel, Scope—The personnel of the Committee was completed towards the end of the year. It included eminent leaders from different communities most of whom fulfilled Sir Tej Bahadur's qualifications, in particular that they should be experts, eminent and experienced and non-partisan in outlook. They included the Metropolitan of India, Sir S. Radhakrishnan, Sir Maharaj Singh, Sir Jagdish Prasad, Mr. N. Gopalaswami Jeyaraj, Mr. Tushar Kanti Ghosh, Mr. N. M. Joshi, Mr. E. R. Das, Sardar Sant Singh, Sardar Harnam Singh, Mr. K. B. Nahi Bux Hussain, Sir H. P. Mody, Dr. John Mathai, Dr. P. K. Sen, Mr. Frank Anthony and Mr. B. L. Rallaia Ram.

The Committee began its work on December 29, 1944, with an opening address by the President, Sir Tej Bahadur Sapru, defining the exact scope and functions of the Committee. "Our essential duty", he said, "is to apply our minds to the basis of the constitution, not to detailed provisions of the constitution."

"Let me assure you", said Sir Tej Bahadur, "I have got some very encouraging letters and memoranda, even from Muslims". Sir Tej Bahadur mentioned that as many as nine memoranda were from Muslims; one valuable memorandum had come from a very distinguished Muslim, who had approached the problem from an entirely independent point of view.

Sir Tej Bahadur had also received similar encouraging letters from quarters from which he did not expect any encouragement. He had received letters and telegrams from England.

"I have tried to approach Quaid-i-Azam Jinnah. He does not want to recognise the Non-Party Conference or this Committee. I have no quarrel with him. He may not recognise us. But we recognise ourselves. That is my answer. This Committee will go on. This Committee must discharge its duty."

He had tried to approach the Sikh leaders and had received an encouraging reply from Master Tara Singh. He had approached Dr. Syama Prasad Mookerjee and Mr. Savarkar. They had agreed to see him.

This Committee, Sir Tej Bahadur pointed out, was not established on the basis of representation of each caste or community; but he left it to the Committee to decide for itself on this question. He was anxious to get representation of the Scheduled Castes. At one stage Dr. Ambedkar seemed agreeable to help the Committee in this matter, but, later, he said he did not approve of some of the Committee's members—Sir Tej Bahadur did not know who were the sinners.

Mahatma's Reply—The material on which the Committee based its discussions included memoranda which the committee had received from various organisations and individuals. Sir Tej Bahadur Sapru, sent to Mahatma Gandhi the committee's questionnaire for a reply, but the latter wrote back saying that he would prefer to reply to any specific questions that may be put to him with reference to his talks with the Quaid-i-Azam.

The following are some of the questions put to Mahatma Gandhi and the replies received from him:—

Question:—In his letter of September 17, Quaid-i-Azam Jinnah says that "the word (Pakistan) has now become synonymous with the Lahore resolution." Did you ask him whether in accordance with the Lahore resolution of the All-India Muslim League a scheme of constitution in accordance with the basic principles providing for the assumption finally by the respective regions of all powers such as defence, external affairs, communications, customs and such other matters as may be necessary, had been prepared? Was your attention drawn to any such scheme by Mr. Jinnah?

Answer:—"No, Quid-i-Azam's position unfortunately was that while he could come as far as seeing me and trying to convince me of his position, he, the President of the League, could not discuss details with me, a mere individual. But so far as I could gather from our conversations, he had no prepared scheme. As the correspondence shows, he had referred me to two books, both of which I read, but neither of which could help me to understand his exact position. One thing he insisted upon was that if I first accepted the Pakistan of his conception, he could then discuss other things with me, even though I was but an individual."

Asked if it was true that the real breakdown between him and the Quid-i-Azam came about on the question of central authority or Government, the Mahatma replied: "It can be said that the breakdown took place because we could not come to an agreement on the two-nation theory of Quid-i-Azam. As the correspondence will show, I wanted to avoid a central Government. I suggested an authority acceptable to both the parties, but he would insist first on complete partition as between two nations and then an agreement between them as on foreign affairs, etc. He would not agree to anything simultaneous."

Mahatma Gandhi's attention was drawn to a passage in his letter to the Quid-i-Azam dated September 28, 1944, in which he said:—"That if it means utterly independent sovereignty so that there is to be nothing in common between the two, I hold that it is an impossible proposition. That means war to the knife" and was asked what he meant by "war to the knife."

The Mahatma replied: "War to the knife is a simple English idiom. I have never known it used in the literal sense. It simply means a determined quarrel between parties. I hold that if there is nothing in common between the two or nothing which does not come in conflict with each other's culture, there can be no friendly mutual agreement."

To another question the Mahatma replied "Although I could not agree to the two-nation theory, I agreed on the basis of members of a family desiring severance of the family tie in matters of conflict but not in all matters so as to become enemies one of the other as if there was nothing common between the two except enmity."

C.R.'s Support—Mr. C. Rajagopalachari wrote to the Committee:—

"I have your circular letter of Dec. 3 about the Conciliation Committee. I need hardly say how warmly I wish you every success."

"As regards my views of which you have asked for a memorandum, they are contained in the 'C. R. Formula' which formed the subject matter of the Gandhi-Jinnah talks. I am unable to improve the terms of that formula."

"I may clarify a point which has been deliberately misrepresented by certain advocates of the Muslim League. It is only for fixing the Pakistan area of Punjab and Bengal that I have in my formula asked for examination of population statistics district by district. Once the area is thus delimited, my formula leaves the verdict on the issue of separation

to the people inhabiting the delimited area as a whole. It is not the intention of the formula to take the plebiscite district by district..."

"My position after the failure of the Gandhi-Jinnah talks is set out in the introduction to the Gandhi-Jinnah talks published by the 'Hindustan Times'. I need add nothing to what I have stated therein about the communal issue. I wish, however, to add one other point for the consideration of the Committee. It is not psychologically possible to create an atmosphere of reasonableness unless Self-Government on democratic lines in some shape or other is a settled fact, and such form of Government as is functioning and threatens to continue is replaced by an agreed constitution. I therefore appreciate the stand taken by the Non-Party Conference. The federal part of the Government of India Act of 1935 should with suitable modifications, be introduced at once with or without fresh Provincial elections according to the convenience of the British Government..."

Cable to Wavell—While the Committee was still in session and before the formulation of its conclusions, Sir Tej Bahadur sent a cable to Lord Wavell, who was then in London discussing with His Majesty's Government proposals for a solution of the Indian political deadlock, communicating the following resolution unanimously adopted by the Committee:—

"In view of the internal situation particularly relating to the economic life of the people and in view of the rapid pace at which international events are marching, and in view of the necessity of India being represented in her own right and by her own representatives at all international conferences and peace conferences, if any, this committee strongly recommends that the following steps be taken at once:

"(1) All political prisoners and detenus be released immediately;

"(2) India should, by a royal proclamation, be declared an independent state and treated as a dominion equal and in no way inferior to any other dominion of the British Commonwealth of Nations, even though, pending the framing and coming into force of a new constitution, the Government of India may have to be conducted in conformity with the provisions of the Act of 1935 subject to minimum necessary modifications;

"(3) (a) The proclamations issued in several provinces under section 93 of the Act should be withdrawn forthwith and the legislatures allowed to resume their normal activities; (b) Popular Ministries should be re-established in those provinces and allowed to function under the provisions of the Act; (c) In the formation of such Ministries the Prime Minister representing the largest single party in the legislature should be required as far as possible to include in the Ministry persons commanding the confidence of other parties in the legislature."

"(4) In addition to the restoration of autonomy in all the provinces of British India a National Government should replace the present Executive Council at the centre."

"For this purpose the committee would recommend for consideration the following two alternatives:

ALTERNATIVES

"(a) Section 5 of the Government of India Act, 1935 should be so amended as to provide for the issue of a proclamation by His Majesty bringing into being forthwith a federation of India without insisting on the entry of Indian States as a condition precedent as provided in sub-section (2) of the said section, Indian States being at liberty to accede to the federation in accordance with the terms of section 6 of the Act."

"(b) Part 11 of the Government of India Act, 1935 with the proposed amendments should be brought into force and steps taken immediately to hold elections to the two houses of the federation legislature and to appoint a Council of Ministers in accordance with the provisions contained in that part."

Provided, however, that in the formation of such a ministry, the prime Minister representing the largest single party in the Legislature shall as far as possible, include in the ministry persons commanding the confidence of other important parties in the Legislature."

Schedule IX of the Act may be continued in force but should be so amended as to provide for altering the constitution and functioning of the Governor-General-in-Council on the following lines:

(A) Except for the Commander-in-Chief who may continue to be ex-officio member of the Executive Council in charge of war operations and matters ancillary thereto the entire Executive Council should consist of Indians commanding the confidence of the parties in the Central Legislature; the provision in sub-section (3) of section 36 which requires that three, at least, of the members should be persons who have been in the service of the Crown in India for a period of at least ten years being repealed."

(B) No officials belonging to the permanent services shall be nominated to either House of the Central Legislature. The nominated block in each of the two houses shall consist entirely of non-officials nominated by the Governor-General-in-Council."

(C) In the 9th schedule of the Act the provisions excluding from the control of the Legislature expenditure under heads Ecclesiastical, External Affairs, Defence, Tribal Areas and other items incurred by the Governor-General in his discretion shall be repealed."

(D) The Political Adviser to the Crown Representative should be an Indian with the rank and status of an Executive Councillor though he may not be a member of the Executive Council."

(E) The decision as to when the general elections to the Central and Provincial Legislatures should take place should be left to the National Government at the centre and the popular governments in the provinces."

"The Committee greatly appreciates your initiative in proceeding to London for the purpose, as it believes, of ending the present political deadlock in the country and trusts that the suggestions that it is now making will be of

assistance to you and His Majesty's Government in solving the problem that faces you. The Committee is continuing its work."

The cable represented the first part of the Committee's work and contained its recommendations with regard to the interim period."

Quaid-e-Azam's Protest—The Quaid-e-Azam, who represented the principal factor in the internal deadlock, reacted unfavourably to the suggestions made in Sir Tej Bahadur's cable to Lord Wavell. He said:

"Sir Tej Bahadur Sapru and his associates have been passing off under different labels from time to time, first as 'all party conference', then as 'no party conference', and now they have assumed the label of 'conciliation committee.'"

"They are nothing but handmaids of the Congress and have played and are playing to the tune of Mahatma Gandhi..."

"Two alternatives are offered. The Muslim aspirations and their national demands of Pakistan would be torpedoed by this subtle and flanking movement, if either of them is accepted."

"Muslim India will not accept any attempt to change the present constitution in any way which would directly or indirectly be on the basis of a united India. The question of Pakistan is the first and the foremost issue to be decided... I am confident that having regard to the solemn declarations of His Majesty's Government and the pledges and assurances given to the Muslims they will not go back as an honourable nation and coerce the Mussalmans or force or impose upon them a constitution against their will and without their approval and consent..."

Hindu-Muslim Parity—Within a week the Sapru Conciliation Committee unfolded its proposals for the future constitution of India which proceeded on the basis of parity between Hindus, other than the Scheduled Castes on the one hand, and Muslims on the other, in the constitution-making body, the future Central Legislature and in the Executive, the overriding condition being that the unity of India and joint electorates were accepted."

The Committee emphatically declared itself against Pakistan. Mr. N. M. Joshi dissented from this declaration, as also from the corollary that no province should elect not to accede to the future Indian Union or secede therefrom."

The Committee envisaged the transfer of Paramountcy to the Union, and recommended the appointment of a Minister in charge of functions in relation to Indian States, with whom a body of three Indian States' advisers is to be associated."

A declaration of fundamental rights, the setting up of a minorities commission, and special proposals for minorities in the Punjab were included in the Committee's recommendations."

"It is needless to say that the recommendations do not constitute a full blue print for the future constitution," said the Committee. "They merely indicate the outlines which the

Committee feels would suit the conditions in India. They are essentially suggestions made for the constitution of the country at large.

"These proposals are confined to British India only. When the Indian States decide to come into the Union, as the Committee hopes they will, it is obvious that arrangements will have to be made in consultation with them for necessary adjustments and additions."

THE CONSTITUTION-MAKING BODY

The constitution-making body shall be constituted in the manner prescribed in Clause "D" of the draft resolution of His Majesty's Government, brought by Sir Stafford Cripps, subject to the following modifications:—

(1) The total strength of the body shall be 160, distributed as follows: Special Interests, namely, commerce and industry, land-holders, universities, labour and women—16; Hindus, excluding the Scheduled Castes—51; Muslims—51; Scheduled Castes—20; Indian Christians—7; Sikhs—8; Backward areas and tribes—3; Anglo-Indians—2; Europeans—1; others—1.

(2) It is because Clause "D" of His Majesty's Government's declaration provides for election by a joint electorate, composed of members of all Provincial Legislatures, under the system of proportional representation, that the Committee has decided to recommend that, in spite of the disparity in the population strengths between Muslims and Hindus other than the Scheduled Castes, the Hindu community should, in the interests of promoting communal unity, agree that the representation of the Muslim community on the constitution-making body shall be on a par with that given to the Hindus, other than the Scheduled Castes.

(3) No decision shall be valid unless it is supported by three-fourths of the members present and voting.

(4) His Majesty's Government shall enact the constitution on the basis of the valid decisions of the constitution-making body, supplemented wherever necessary by its own awards matters in which the requisite majority for decision was not forthcoming.

Division of India—The Committee, having considered carefully the resolution of the Muslim League passed at Lahore in 1940, the various other resolutions of the League and the published version of the talks between Quaid-e-Azam Jinnah and Mahatma Gandhi, and having also considered the "C. R." and Gandhi proposals, is emphatically of the opinion that any division of India into two or more separate independent sovereign States is unjustified, and will endanger the peace and orderly progress of the whole country without any compensating advantage to any community, and that the political unity of India should therefore, be maintained.

Provisions should be made in the constitution for the accession from time to time of Indian States as units of the Union, on such terms as may be agreed upon. The establishment of the Union should not, however, be made contingent on the accession of any Indian State or of any minimum number of Indian States. The Union should be brought into

being and should commence to function at the earliest possible date, even if no Indian State has acceded to it as a unit by then.

No province of British India may elect not to accede to the Union, nor may any unit—whether a Province or a State, which has acceded—be entitled to secede therefrom.

Provincial Boundaries—While it is not desirable that the new constitution should be delayed by the realignment of provincial boundaries on linguistic or cultural considerations, the Constitution Act shall indicate the machinery and prescribe the procedure for such realignment of the old Provinces and for the creation of new Provinces after it has come into force, and on such realignment or creation of Provinces all consequential amendments may be made, in the constitution.

The Committee submits the accompanying suggestions for the consideration of the constitution-making body. They have been placed before the Committee by one of its members, who has great experience of the administration of Indian States and of the working of the Government of Indian Act (1935) in relation to them. As the Indian States are not represented on this Committee, and as the suggestions are of a very vital and far-reaching character, the Committee has thought it desirable to express no opinion on the merits of the several alternatives suggested beyond stating that a clear definition of "a Head of the State" is necessary as the several resolutions adopted by the Committee assume the existence of a Head of the State and the exercise by him of certain powers and functions. The member responsible for these suggestions agrees that they, or any variant of them, involving the participation of the Indian States, cannot be finally adopted except with the consent of the Indian States.

Head of State—(1) There shall be a Head of the State (that is, Union) in India, who shall be the repository, of (a) all such powers and duties as may be conferred or imposed on him by or under the Constitution Act; and (b) such other powers as are now vested in His Majesty the King of England, including powers connected with the exercise of the functions of the Crown in its relations with Indian States, provided that in relation to his powers, the Head of the State shall conform to the traditions, usages and conventions which are binding on the constitutional head of any State.

(2) The office of Head of the State shall have a tenure of five years, and ordinarily no person may hold the office for more than one term.

The head of the State shall be elected by an electoral college composed of members of the two Houses of the Union Legislature, either without any restriction as to their choice, or subject to their choice being confined to the Rulers of Indian States having a minimum population, or revenue, or both, to be named in a schedule to the Constitution Act.

(3) The Head of the State shall be elected by the Rulers of the Indian States referred to above from amongst themselves.

The Head of the State shall be appointed by His Majesty the King of England, on the advice of the Union Cabinet, either without any

restriction as to his choice, or subject to his choice being confined to the Rulers of the Indian States referred to above.

(4) In case the third alternative is adopted, and a link with the British Crown is maintained, the Secretary of State for India, together with all the control that he or the British Cabinet exercises over Indian administration, should, in any case, be abolished.

(5) The head of a unit, other than an Indian State, shall be appointed by the Head of the State on the advice of the Union Cabinet.

UNION LEGISLATURE

(a) The Union Legislature shall consist of the Head of the State and two Chambers—the Union Assembly and the Council of State.

(b) The strength of the Union Assembly shall be so fixed that there shall be on the average one member for every 1,000,000 of the population.

(c) Ten per cent. of the total strength shall be reserved for the representation of the following special interests: Landholders; commerce and industry; labour; women.

(d) The remaining seats shall be distributed among the following communities: (1) Hindus, other than Scheduled Castes; (2) Muslims; (3) Sikhs; (4) Indian Christians; (5) Anglo-Indians; (6) other communities.

(e) (i) In case the Muslim community agrees to the substitution throughout of joint electorates with reservation of seats for separate, communal electorates, in that case only this Committee would recommend that, in the interests of promoting national unity, the Hindu community should agree that in the strength of the Central Assembly, excluding the seats allotted to special interests, such as commerce and industry, landholders, labour, etc., Muslim representation from British India shall be on a par with the representation given to the Hindus (other than Scheduled Castes), in spite of the great disparity in their respective population strengths.

The Committee desire to emphasise their view that if this recommendation is not to be implemented in its entirety, the Hindu community should be at liberty not merely not to agree to the claim for parity of representation, but to ask for a revision of the Communal Award.

(ii) The Committee considers that the representation given to the Sikhs and Scheduled Castes in the Government of India Act is manifestly inadequate and unjust and should be substantially raised. The quantum of increased representation to be given to them should be left to the constitution-making body.

(f) For the Union Assembly there shall be adult franchise, for seats other than those reserved for special interests.

(g) For the special interest, there shall be special constituencies. There shall be direct election to the Union Assembly. As for election to the Council of State, the question shall be decided by the constitution-making body.

DIVISION OF POWER

Lists of the matters in respect of which the power of making laws for peace, order and good Government, and the functions pertaining to the administration of those laws, shall fall within the sphere, respectively, of the Centre and the units, shall be embodied in the Constitution Act. The detailed drawing up of these lists should be left to the constitution-making body. The Committee, however, would recommend that the following principles, among others, should guide the constitution-making body in the distribution of powers and functions between the Centre and the units:—

(A) The powers and functions assigned to the Centre should be as small in number as possible, provided that they shall in any case include (i) matters of common interest to India, as a whole, such as foreign affairs, defence, relations with Indian States, inter-unit communications, commerce, customs, currency, posts and telegraphs; (ii) settlement of inter-unit disputes; (iii) co-ordination where necessary of the legislation and administration of different units; and (iv) such other matters or action as may be required for ensuring the safety and tranquillity of India or any part thereof, or for the maintenance of the political integrity and economic unity of India, or for dealing with any emergencies.

(B) While all matters not assigned to the Centre exclusively or concurrently must be declared to fall within the sphere of the units a list of these should, for greater certainty, be given in the Constitution Act, with the rider that all residuary powers—those not included in either of the two lists shall vest in the units.

(C) All customs barriers between one unit and another shall be abolished, and there shall be free trade within the Union, provided that, where the abolition of existing customs barriers affects prejudicially the finances of a unit, it shall be entitled to adequate compensation out of the revenues of the Union Executive.

THE EXECUTIVE

(A) Subject to the provisions of Clause (B), the Executive of the Union shall be a composite Cabinet in the sense that the following communities shall be represented on it: (i) Hindus, other than Scheduled Castes; (ii) Muslims; (iii) Scheduled Castes; (iv) Sikhs; (v) Indian Christians; (vi) Anglo-Indians.

(B) The representation of these communities in the Executive shall be, as far as possible, a reflection of their strength in the Legislature.

(C) The Cabinet shall be deemed to be duly constituted, notwithstanding the absence from it temporarily of representatives of any of the communities mentioned in Clause (A). Where, on account of a whole community refusing to join or remain in a Cabinet that community goes, without representation therein, the vacancies may, pending the availability of members of that community, be filled by the appointment of members of other communities, and the Cabinet may commence or continue to function, provided it commands a majority in the Legislature.

(D) The Cabinet shall be collectively responsible to the Legislature.

(E) The Cabinet shall be led, guided and held together by a Prime Minister, who shall ordinarily be the leader of a party, which by itself, or in combination with other parties, is able to command a stable majority in the Legislature. A convention should be created that the offices of the Prime Minister and the Deputy Prime Minister should not be monopolised by any one community.

(F) The other members of the Cabinet shall be appointed on the advice of the Prime Minister.

(G) One of these Ministers shall be designated Deputy Prime Minister, and it shall be a standing rule that the Deputy Prime Minister shall not belong to the same community as the Prime Minister.

Cabinet to be Elected—(A) Subject to the provisions of Clause (B), the Executive of the Union shall be a composite Cabinet in the sense that the following communities shall be represented on it: (i) Hindus, other than Scheduled Castes; (ii) Muslims; (iii) Scheduled Castes; (iv) Sikhs; (v) Indian Christians and (vi) Anglo-Indians.

(B) The representation of these communities in the Executive shall be, as far as possible, a reflection of their strength in the Legislature.

(C) The Cabinet shall be deemed to be duly constituted notwithstanding the absence from it temporarily of representatives of any of the communities mentioned in Clause (A) where, on account of a whole community refusing to join or remain in a Cabinet that community goes without representation therein, the vacancies may, pending the availability of members of that community, be filled by the appointment of members of other communities, and the Cabinet commence or continue to function, provided it commands a majority in the Legislature.

(D) The Cabinet shall be elected by the Central Legislature in a joint session by the system of the single transferable vote. The elected Ministers shall hold office for the duration of the Legislature. The Legislature shall elect from among the Ministers a President and a Deputy President who shall not both belong to the same community.

There shall be a Minister in charge of the functions in relation to Indian States, and with him shall be associated a body of persons, not less than three and not more than five in number, who shall be called Indian States' advisers, and who shall be chosen in the manner agreed upon with the Indian States. The Minister shall consult the Indian States' advisers in all important matters, and shall obtain their concurrence in respect of certain matters to be specified in the Constitution Act.

THE JUDICIARY

(1) There shall be a Supreme Court for the Union and a High Court in each of the units.

(2) The strength of Judges in each of these Courts at the inception of the Union, as well as the salaries to be paid to them, shall be fixed by the Constitution Act and no modification in the number of Judges shall be made except on the recommendation of the High Court, the Government concerned and the Supreme Court, and with the

sanction of the Head of the State (a Governor-General or President as the case may be), provided, however, that the salary of no Judge shall be varied to his disadvantage during his term of office.

(3) (A) The Chief Justice of India shall be appointed by the Head of the State and the other Judges of the Supreme Court shall be appointed by the Head of the State in consultation with the Chief Justice of India.

(B) The Chief Justice of a High Court shall be appointed by the Head of the State in consultation with the head of the unit and the Chief Justice of India.

(C) Other Judges of a High Court shall be appointed by the Head of the State in consultation with the head of the unit, the Chief Justice of the High Court concerned and the Chief Justice of India.

(4) A Judge or a High Court of a Supreme Court shall be appointed for life, subject to an age-limit prescribed by the Constitution Act, but he may by resignation addressed to the Head of the State resign his office.

(5) (A) A Judge of the High Court may be removed from office by the Head of the State on the ground of misbehaviour or of infirmity of mind or body, if on reference being made to it by the Head of the State, the Supreme Court reports that the Judge ought on any such grounds to be removed.

(B) The Judge of the Supreme Court may be removed from office by the Head of the State on the ground of misbehaviour or of infirmity of mind or body, if on reference being made to it by the Head of the State, a special tribunal appointed for the purpose by him reports that the Judge ought on any such grounds to be removed.

(6) As regards other matters connected with the appointment and function of the Judiciary, the provisions embodied in Part 6 of the Government of India Act of 1935 seem suitable, with such modifications as may be required for being fitted into the framework of the new constitution.

DEFENCE

The Committee strongly recommends that under the new constitution there should be a Portfolio of Defence which should be held by a Minister responsible to the Legislature, and that the actual control and discipline of the Army should be placed in the hands of a Commander-in-Chief under the new Government.

The Committee further recommends that a National Army should be created and developed as rapidly as possible. It is unable to suggest at this stage what the strength of this army should be, as this will depend, apart from the vital question of finance, on a number of other factors; such as the nature of the post-war world settlement and the efficacy of the international organisation for the maintenance of world peace. Among the measures which should be adopted for the creation of such an army, the Committee recommends the following:—

(1) (A) Such British units as temporarily may be required for the efficient defence of India, and such officers as may be needed for officiating the National Army until an adequate number of Indian officers becomes available, shall be obtained by a treaty or agreement entered into by the Union Government and His Majesty's Government, specifying, among other things, the terms and conditions of their re-employment by the Union.

(B) As soon as the war is over, all direct recruitment of British officers to the Indian forces should cease. Such British officers as do not belong to the Indian Army and are not required for specific appointments should be reverted to the British Army Establishment.

(2) An institution should be established for the training in sufficient numbers of officers of all the three arms—air, land and sea—and all defects existing in the present system which prevent rapid Indianisation or the creation of Indian officers capable of assuming leadership should be forthwith removed.

(3) If it is found that the present educational system does not produce a sufficient number of young men suitable in every respect for a military career, steps should be taken at once to remove this defect.

(4) University Officers Training Corps should be established where they do not exist and largely expanded, and measures taken not only for ensuring the supply of officers to fill vacancies in peace-time, but for the rapid expansion of the cadre in the event of a military threat to India. Such measures should aim at creating a reserve of young men with service training who can be rapidly absorbed as officers when expansion takes place.

(5) The Committee would emphasise that the maintenance of law and order is essentially the responsibility of the Unit Governments, and they should, if necessary, by increasing the strength of their police forces, equip themselves adequately for the discharge of this responsibility. The Committee would, however, make it clear that the services of troops on the Union Army Establishment should be available for being requisitioned only when the civil power finds itself unable to cope with any particular situation.

The Committee further recommends that a balance should be maintained between the respective arms and that special attention should be paid to the Navy, Air Force, mechanised units and such other branches as may from time to time be developed.

The Committee recommends that steps should be taken, even before the coming into being of the new constitution, to adopt and give effect to the measures as far as practicable.

(3) The orders now in force at the Centre regarding the representation of the communities in public services may continue in operation till the Union Government under the new constitution comes into being. The Committee, however, recommends that the 84 per cent. of the seats now allotted to the Sikhs, the Indian Christians, and the Anglo-Indians and Parsis may be split up between the Sikhs, the Indian Christians and the Anglo-Indians, and Parsis in the proportion of 34

per cent. for the Sikhs, 3 per cent. for Indian Christians and 1-5/8 per cent. for Anglo-Indians and Parsis. The special provisions relating to Anglo-Indians in certain services under Section 242 of the Government of India Act of 1935 are not to be affected by this recommendation.

MINORITIES COMMISSIONS

(A) The Constitution Act shall provide for the establishment at the Centre and in each of the provinces an independent Minorities Commission which shall be composed of a representative for each of the communities (not necessarily a member of that community) represented in the Legislature.

(B) Subject to the possession of such qualifications or experience as may be prescribed, the member representing each community who need not necessarily belong to the same community, shall be elected by members of the Legislature belonging to that community.

(C) No member of the Legislature shall be eligible for membership of the Commission.

(D) The term of office of members of the Commission shall be the same as, and synchronised with the term of office of members of the Legislature concerned.

(E) The functions of the commission shall be:—(i) To keep a constant watch over the interests of minority communities in the area (ii) without attempting to deal with administrative acts or individual grievances to call for such information as the Commission may consider necessary for discharging its functions; (iii) to review periodically—for example once every six months—the policies pursued in legislation and administration by the Legislature and the executive in regard to the implementing of non-justifiable fundamental rights assured by the constitution to minority communities, and to submit a report to the Prime Minister.

(F) The recommendations of the Commission shall be considered by a small committee of the Cabinet who shall as soon as possible place the report of the Commission before the Legislature with a full statement of the action taken or proposed to be taken in pursuance of the recommendations of the Commission. In case any of the recommendations are not accepted wholly or in part, the statement should also contain full explanations of the decisions taken by the Government. Facilities shall be provided to the Legislature for a discussion of the report and the decisions of the Government thereon.

The Committee while strongly recommending to all communities and parties to accept the proposals says that in the event of their being unacceptable to the various communities and parties and their failure to reach an agreement on any other basis, His Majesty's Government should set up an interim Government in India and proceed to establish machinery for drafting the new constitution generally on the basis of the principles underlying these proposals, enact it in Parliament and put it into operation at the earliest possible date.

SILVER JUBILEE SESSION

The Silver Jubilee Session of the National Liberal Federation was held in Lahore in March 1945 under the presidency of Mr. T. R. Venkatarama Sastri of Madras. He made a demand for an immediate declaration by the British Government granting Dominion Status to India and urged the release of political prisoners and Congress detainees including the members of the Congress Working Committee.

Mr. Sastri said: "The Government must declare immediately that India shall have the status of a Dominion at the end of the war. Her millions have fought on the battlefield for the cause of the United Nations. The Cripps' Offer contained that declaration... That declaration must be made forthwith and implemented, so far as it may be, by the British Government..."

"I should say that the Governor-General should have released the political prisoners and the Congress detainees long ago... They should be immediately released. Even for a solution of the present deadlock, mutual consultation between the members of the Working Committee of the Congress is necessary..."

Mr. Sastri dealt at length with the problem of minorities and said: "Pakistan is no solution for the problem of the minorities. The creation of separate foreign states does not really get rid of the minority problem altogether... What, again, of the expense of defence which each independent state will have to maintain? And would the defence organised by the separate states be adequate in the event of aggression?..."

"The Muslim League appeals to the principle of self-determination. This principle is a much misunderstood one... Whether Quaid-e-Azam Jinnah, who has, so far, made the concession of Pakistan a condition of any discussion, constitutional or other, can now bring himself to put aside Pakistan and discuss the terms of a federal constitution is more than anyone can say..."

The States—Mr. Sastri then touched upon the problem of Indian States. He said: "The time has come now when the States should have representative governments, and the people of the states should be given their due share in a popular government..."

Referring to the industrialisation of India, Mr. Sastri remarked: "There have been many plans drawn up or in the process of being drawn up. I will not attempt to assess their exact value. The plans involve expenditure in astronomical figures: How they can be worked out is a matter for the experts to consider. But all seem to agree that without a National Government it will be impossible to put into effect any large-scale plan of economic policy..."

Mr. Sastri then referred to the plight of Indians overseas. He said: "The plight of Indians in the colonies and especially in South Africa deserve our active sympathy and help... The Government of India should take such steps as might be necessary to protect them..."

On the subject of Indianisation, the President said: "Recruitment in the services just now has an alarming aspect and needs our close attention. It is regrettable that the process of Indianisation in the services has not been accelerated. The recruitment in the officers cadre in the Army is still disappointing. The Foreign and Political Departments are still largely kept a close preserve of the British..."

Mr. Sastri concluded: "There will be no place so long as imperialism lasts. As for Britain's attitude to the future of India, words promise, but action denies... 'An independent India will be an asset even in the present war against Japan. Everything plainly indicates the need for unity and the united effort of all parties in India. None but the wilfully blind can fail to see it.'"

NATIONAL GOVERNMENT

Resolutions urging the British Government to form a National Government at the Centre and deploring the continuance of the political deadlock in India and asking the Government of India to release members of the Congress Working Committee and the other Congress leaders were adopted.

The resolution on the formation of a National Government said:

"(a) While adhering to its opposition to any division of India into Hindustan and Pakistan, the federation is of the opinion that without prejudice to the different viewpoints on controversial issues relating to the ultimate form of the future Indian constitution, the Congress, the Muslim League, the Hindu Mahasabha and other important political parties and interests should, during the period of the war, unite and co-operate with a view to the formation of National Government both at the Centre and the provinces and urges on the British Government the necessity of forming such a Government at the Centre and creating it on the same footing as a Dominion Government..."

"(b) The Federation deprecates the policy of the British Government in assuming the role of passive spectators and urges them actively to participate in the solution of the present political deadlock and take constructive steps to promote the establishment of a national government, both at the Centre and in the provinces, composed of important political parties and interests."

"(c) The Federation urges the British Government to announce without delay that they would be prepared to implement their promises to India on the basis of an agreement between the various political parties and interests or, in the absence of such agreement, if necessary, by themselves enacture a Dominion constitution for India within one year of the cessation of hostilities."

Other Resolutions—The Federation also passed a resolution demanding for Indians in South Africa full citizenship rights. Another resolution expressed deep regret and concern at the "misuse of the Defence of India Act and Rules on numerous occasions". The Federation also deplored racial prejudice existing between the white and non-white peoples of the world.

CABINET MISSION PLAN

At the Poona session of the Council of the Federation in July 1946 an appeal was issued to the major political parties in the country to enter the Constituent Assembly frankly and fully accepting the basic principles and the necessary implications of the Cabinet Mission's plan.

The meeting issued the warning that, unless that was done there must inevitably be a complete breakdown of the functioning of the Constituent Assembly with consequences entirely fatal to the attainment of freedom by India in the near future.

While the Muslims were asked not to consider the use of the Constituent Assembly as a mere stepping-stone to the achievement of Pakistan, the Congress was asked not to act in the spirit of the announcement of its President that the Congress was committed to nothing except going into the Constituent Assembly.

The Council recognised that the minorities, particularly the Sikhs and the Scheduled Castes, had legitimate grievances regarding their position in the Constituent Assembly.

In the absence of Mr. T. R. Venkatarama Sastri, the President of the Federation, owing to illness, Sir Chimanlal Setalvad presided.

After the I.M.G. plan of June 1947, the Council of the Federation which met again in Poona, under the presidency of Mr. T. R. Venkatarama Sastri, expressed, in a resolution, its deep regret that it had not been possible to evolve a plan for the achievement of freedom of India which would also maintain its unity. A division of the country, in its opinion, was contrary to its economic and strategic interests and would weaken the country's position in the international sphere.

The Council, however, trusted that as partition had been accepted by the major political parties, the Governments concerned "will act in a statesmanlike manner and enter into treaties which would safeguard the interests of the country as a whole particularly those relating to economic and defence matters."

The Council, in another resolution, welcomed the participation of many States in the Constituent Assembly and hoped "that in their own interests and those of India the remaining States, too, will decide to join the Assembly."

The Liberals lost one of their leading men in the death of Sir Chimanlal Setalvad in December 1947.

The Federation pressed upon the Rulers of Indian States to declare full responsible government as their policy as rapidly as possible and assured the people of the States of its full support in their constitutional methods for securing reforms and the redress of their grievances. The Federation, in another resolution, expressed profound concern at the food situation in the country. The Federation unanimously passed a resolution demanding that in the Imperial and International conferences India should be represented largely, if not wholly by non-official public men commanding the confidence of the people "until such time as a National Government can appoint its own proper accredited representatives."

Demanding complete nationalisation of India's Defence services within a short period, the Federation also urged that India's status as envisaged in the post-war world and her future role as a bulwark of peace in Asia required a radical change in regard to her defence policy.

The President, Mr. T. R. Venkatarama Sastri, winding up the session, expressed gratification at the formation of a Ministry by the Congress in the Frontier Province and expressed the hope that this will be followed by the assumption of office by the Congress in those other Provinces where Section 93 rule continued.

Bombay Meeting—"The Viceroy should declare forthwith that the future steps for the formation of a Central Government and for the framing of a constitution will go forward notwithstanding the dissent of any party," said a resolution passed by the Council of the National Liberal Federation of India held in Bombay in the winter of 1945.

The resolution further said:—

"The Council of the National Liberal Federation of India notes that the proposals now adumbrated in the broadcasts of the Prime Minister and the Viceroy are incomplete and must wait for the elections and consultations with the elected representatives to take their final shape..."

"Immediately after the elections, a Central Government should be formed consisting of the representatives of the major political parties with provision for representation of minority interests and no refusal of co-operation by any party should hold up the formation of such representative government."

The Hindu Mahasabha

THE Hindu Mahasabha, is an organisation of comparatively recent origin. Its beginnings can be traced to the first years of the current century, almost simultaneous with the awakening of Muslim consciousness in 1908 and in vigour equal but opposite to that of the Muslim communal organisation.

During the first twenty-five years of its life, the Hindu organisation had to struggle for its existence, what with the proverbial indifference of the Hindu masses, the inherent inability of majorities the world over to organise, and the better response which the Congress with its wider nationalistic appeal evoked among the Hindus. All this time, however, the causes which hampered the growth of the Hindu organisation were gradually, if imperceptibly, neutralised.

For instance, the Hindu community's indifference began to give place to communal consciousness as a result of a number of Hindu-Muslim riots in which the majority community came out second best. The waves of conversion from the Hindu fold, partly due to the discontent of the outcastes and partly because of the proselytising nature of the Islamic and Christian religions, opened the eyes of Hindu leaders to the growing decrease in the number of people owing allegiance to the Hindu faith.

In addition to the reasons stated above, the political gains secured by the Muslim community under the Minto-Morley and Montagu-Chelmsford Reforms Schemes taught the Hindu community to come together and set up an organisation to voice its claims in future adjustment.

Even the wider platform of national emancipation and Hindu-Muslim unity from which the Congress appealed to the Hindu mind has latterly given signs of weakness, because Hindu-Muslim concord, far from coming within reach, threatened to go beyond grasp.

It is, however, wrong to assume that the Hindu organisation is anywhere near as powerful as the Congress, or even the Muslim League of the past six or seven years. The Hindu Mahasabha undoubtedly consolidated its position in recent years; most Hindus, not excluding Congressmen professing nationalistic ideals, have a sneaking sympathy for the Mahasabha, but when it came to a question of elections to representative institutions, the Mahasabha failed to make an appeal to the Hindu electorate to the exclusion of the Congress.

Just as the Muslim League, in spite of its not very flattering success at the polls in 1937, became a mighty organisation among the Muslims of India, similarly the Hindu Mahasabha gave proof of considerable following among the Hindus and even of a certain amount of power. In 1940, for the first time in its history, the Mahasabha was recognised as an organisation influential enough in the country to be reckoned with for purposes of representation in the Central Government. This was, however, neutralised subsequently as far as official recognition was concerned; at the Simla Conference, for example, not only was the Hindu Mahasabha denied representation but its demands found no place.

Election Rout.—Speaking for the present, however, it is highly doubtful whether the status attained by the Mahasabha will continue. It was only recently that the Mahasabha struck out a path of its own, to the point of hostility to the Congress, having in the first twenty or twenty-five years of its existence contented itself with occupying a status subordinate to that of the Congress and seeking only to emphasise the communal claims of the Hindus as distinct from their national claims.

Such importance as the Mahasabha enjoyed in recent years as the opposite number of the growingly aggressive Muslim League almost disappeared when the Congress set its face squarely against the League, the Mahasabha lost its *raison d'être*. In the result the Mahasabha fared badly at the general elections of 1945-46—it was routed.

During the war years, the Mahasabha figured prominently—advocating, from the communal point of view, more aggressive opposition to the Muslim claims than the Congress and, from the political stand-point, a less militant programme and policy than the Congress. Even in respect of the latter the Mahasabha became less and less "soft." For instance, at the last session of the All-India Committee of the Mahasabha, some of its leaders, including a Knight, renounced their titles as a protest against the British policy towards Hindus in general and the Mahasabha in particular. Broad hints were thrown at the prospect of a movement to be launched by the Mahasabha for "national liberation and the vindication of Hindu rights."

When the Congress went into the wilderness in August 1942, the Hindu Mahasabha came into the limelight as it was the only organisation to which the Hindus could look up both for urging the Hindu cause as against the militant communalism of the Muslim League and generally to propagate nationalism which, so to say, went by default as the result of the then Congress policy. When the Congress returned to public life the Mahasabha had no place.

Arya-Samaj.—Those who first urged the community to organise were actuated by a fear lest the numerical strength of the community should be adversely affected by the proselytising activities of the champions of other faiths. A Hindu leader, for instance, remarked: "Political power in democracies hinges more and more on the population strength of a community which in the case of the Hindus must depend in the main on the proportion in which the Hindus succeed in stopping the dreadful conversion activities of alien faiths and in accelerating the reclamation of the alienated numbers back to the Hindu fold. In a country like India where a religious unit tends inevitably to grow into a cultural and national unit, the *Suddhi* (reconversion to Hinduism) movement ceases to be merely theological or dogmatic, but assumes the wider significance of a political and national movement. If the Muslims increase in population, the centre of political power is bound to be shifted in their favour."

For these reasons, the early years of the Hindu Mahasabha were more or less associated with the activities of the Arya-samaj, an allied organisation which worked for the reclamation to Hinduism of those who had been converted to other faiths.

Apart from the denominational aspect of its activities, the Hindu Mahasabha claims that India belongs to the Hindus—the term "Hindus" being interpreted as meaning people belonging to the Hindu race, irrespective of their denominational affiliations. It has been argued that "the minority problem of Europe is pre-eminently a racial one and not religious because there is only one religion, Christianity, which is common to all. The minority problem of India, on the other hand, is, if anything, pre-eminently religious and not racial at all."

(For the early history of the Hindu Mahasabha see past issues of *The Indian Year Book*.)

Modern History.—Just as the history of the All-India Muslim League as we know it today dates from 1937 or more, generally speaking from the inauguration of the 1935 constitution; similarly the modern history of the Hindu Mahasabha dates from the start of the same constitution. The Communal Award, which formed the basis of elections to the Legislatures under the 1935 constitution, and the attitude of neutrality observed by the Congress towards it provided the *raison d'être* for the agitation of the Mahasabha since 1934-35.

About this time there appeared on the Mahasabha platform Mr. V. D. Savarkar, the ex-revolutionary who had just been released after long years of incarceration with a virile programme for the regeneration of the Hindu community. The cleavage between the Congress and the Hindu Mahasabha was further accentuated. Mr. Savarkar's attitude of hostility towards Congress may be illustrated by the following words: "The Hindu Sangatanists had to face the apathy on the part of scores of the unawakened masses of their co-religionists on the one hand and on the other the treacherous attitude of the pseudo-nationalist Hindus who are friends of every other community in the world but their own and who are ever ready to betray even the just interests of the Hindus and to placate the Muslims even in the most anti-national demands on their part—just to prove that the Indian patriotism of these pseudo-nationalists, like Caesar's Wife, was above suspicion. Thus, unaided and betrayed at home, the brave band of the Hindu Sangatanist leaders and missionaries had to face outside the organised opposition of the Christian missionaries on the one hand and the fanatical riots, hoodliganism, assaults and assassinations by the Muslim fanatics on the other, while the British Government out of its political hostility to the Hindus was sworn never to take the side of the Hindus whenever Hindu interests clashed with the interests of the traditional 'favoured wife' of the British..."

Bhai Parmanand said: "the best way to bring about Hindu-Mahomedan unity is to strengthen the communities... Let the Hindus cease to be Hindus, but the Mahomedans shall be Mahome-

dans for all time to come.... If the Congress had not engineered the theory that liberty can only follow Hindu-Muslim unity, liberty to day would not be hampered and confined as it is."

Referring to the latest phase of the Hindu-Muslim relationship before partition, Bhai Parmanand said, "The situation has got only two solutions. One is the partition of the country into two, and the other to allow a Muslim State to grow within the State. That is sure to take us to a period of trial of strength and in that case the Hindu Mahasabha alone and not the Congress can offer the right solution. I am convinced that if the Congress had not thought of Hindu-Muslim unity, if Mr. Gandhi had not made his ill-fated pact with the Ali Brothers, it could have made a significant contribution to the achievement of freedom. It would then not have nurtured an enemy to its ideals within its own territories."

Similarly Dr. Moonje also speaking before the partition remarked that "during the last 18 years the Congress has developed a tendency that may aptly be called a pro-Muslim mentality at the cost of Hindu interests with the ultimate object of placating and winning them over to merge in the Congress.... The Muslims have no idea of patriotism, or nationalism, if shown of Muslim communalism; nor do they care for *Swaraj* in India, if *Swaraj* does not offer to them a domineering status in the administration of the country..."

"What is the cure for such a mentality? It has now reached its culminating point; it is no mere bluff. It has now begun to demand division of India into Muslim India and Hindu India."

Dr. Moonje claims that "in any country it is always the right of the majority community to establish *Swaraj* and to create its own nationalism, to maintain internal law and order and to defend the *Swaraj* from external aggression."

For a period of six or seven years since 1937, Mr. Savarkar was Hindu-India's No. 1, until, owing to his ill-health, his place was taken by the Bengali leader Dr. Syama Prasad Mookerjee. In 1937 the Mahasabha declared as its goal the attainment of complete independence by all legitimate and peaceful means. In 1945 some prominent Mahasabha leaders gave up their titles as a token sacrifice for their ideals.

IN THE LIMELIGHT

The declaration of war in September 1939, followed as it was by numerous efforts by Viceroy to get leaders of Indian opinion to agree on the political and constitutional issues with a view to unifying and intensifying India's war effort, brought the Hindu Mahasabha very much into the limelight.

It was in 1939-40 that the Mahasabha secured for the first time official recognition at the hands of the Government of India, a fact which was appreciated by the annual session of the Mahasabha in 1940. When His Excellency the Viceroy summoned leaders of different communities and interests for consultation on the political question, the Hindu Mahasabha insisted that it alone had the

right to speak in the name of the Hindu community. The resolution passed by the Mahasabha welcomed "the recognition by the Viceroy and the Secretary of State that the political situation in the country cannot be satisfactorily solved without the co-operation of the Hindu Mahasabha, which is the most outstanding body representing the Hindu community's interests."

In the middle of 1940 when the Viceroy was considering the best method of associating representative Indian opinion with the governance of India by means of an expanded Central Executive Council, the Hindu Mahasabha strongly advocated the claims of the Hindu community for adequate representation thereon, and stoutly resisted the claims of Mr. Jinnah that the Muslim League should have a majority in the Central Executive Council if the Congress abstained from participation.

This status of equality with the Muslim League, in the eyes of authority, the Mahasabha has lost, witness, for instance, the neglect it suffered at the time of the Simla Conference.

Indian States—A somewhat recent development in the outlook of the Hindu Mahasabha is its attitude towards Indian States. Presumably as a result of Muslim agitation in certain Hindu States, the Hindu Mahasabha leadership took the side of the Princes. It is also conceivable that Hindu leaders tried to emulate the example of League leadership in regard to the authority and prestige of some Muslim Princes whose administration was criticised by their Hindu subjects. An example of this new trend in Mahasabha thought is to be found in a strong plea made by Mr. Savarkar to maintain Hindu States and strengthen them in all possible ways. Mr. Savarkar envisaged a bright future for the Indian Princes who, he thought, would be required to play a great part in laying the foundations of a united and free India.

During 1939-40 the Hindu Mahasabha was considerably exercised over the demands of the Muslim League for the division of the country into Muslim and Hindu Indias. Anxiety was also expressed over the statements made by the Secretary of State for India on this subject, which were interpreted by the Mahasabha as conceding too much to the Muslims. The Working Committee of the Mahasabha claimed that India should be granted Dominion Status within a definite time limit and expressed the opinion that the statements made by the Viceroy and Mr. L. S. Amery as highly "unsatisfactory and disappointing", in that they contained no reference to India's right to independence, which was the declared goal of the Mahasabha, and that the reference made to the grant of Dominion Status as an immediate step in constitutional advance was vague and uncertain.

The Statement to the effect that the British Government would not agree to hand over the administration of the country to a system of Government which would not be acceptable to large and powerful elements of Indian life, the Committee thought, required clarification as it was capable of the inter-

pretation that if the Muslim League, the Princes or other vested interests opposed the recognition of the legitimate rights of the majority in India the further constitutional advance would be held up, or the rights of the majority would be surrendered to them. This would mean negation of the principle of democracy and an incitement to the minorities to obstruct and revolt.

DIRECT ACTION THREAT

The annual session of the Mahasabha met at Madura in South India in December, 1940 and passed a resolution appreciating the recognition by the Viceroy and the Secretary of State that the political situation in the country could not be satisfactorily solved without the co-operation of the Hindu Mahasabha.

The resolution added that while reiterating faith in the goal of complete independence, the Hindu Mahasabha was prepared to accept Dominion Status of the Westminster type as the immediate step.

The resolution also called upon the Government to recruit Hindus for the army and the navy, make military training compulsory for Indians, and to promote the establishment of war industries in India. The resolution concluded: "In case the Government fails to make a satisfactory response to the demands embodied herein before March 31, 1941, the Mahasabha will start a movement of direct action." A committee was appointed to devise ways and means for starting and conducting the campaign of direct action after the lapse of the period mentioned above.

Nothing happened, however, on the expiry of the ultimatum. The All-India Committee of the Mahasabha which met in the summer of 1941 resolved to postpone the direct action contemplated at Madura. The resolution on this subject referred to the correspondence that had passed between Mr. Savarkar and H.E. the Viceroy in pursuance of the Madura resolution, and to the pronouncements made from time to time by the Secretary of State for India in connection with the political situation in India. It noted that the Viceroy had turned down "some of the fantastic communal demands" put forward with regard to the extension of the Viceroy's Executive Council and also that the Secretary of State for India had, under pressure of public opinion created by the Hindu Mahasabha, criticised adversely the so-called Pakistan proposal.

About this time communal rioting broke out in several places, including Ahmedabad, Dacca, Bombay, Cawnpore and Bihar Shariff. Hindu Mahasabha circles were unanimous in ascribing the riots to a design on the part of some Muslim leaders to force the issue of Pakistan. Mr. K. M. Munshi, a well-known Congress leader and former Home Minister of the Government of Bombay, left the Congress on the issue of non-violent approach to the communal rioting. He started an Akhand Hindusthan (Indivisible India) campaign which was very popular in Hindu circles.

Difficult Position—When the Cripps proposals (see the chapter on The "Indian National Congress") were announced, the Hindu Mahasabha was one of the earliest to reject it on the ground of the unity of India. This did not, however, mean that the Mahasabha refused to co-operate in any case. In fact, Mr. Savarkar agreed to join in a Government at the centre, in spite of the Mahasabha's opposition to the other parts of the Cripps formula.

The months that immediately followed the Cripps visit witnessed a strong denunciation by Hindu Mahasabha leaders of the demand for Pakistan, rendered more fierce by the proposal of leaders like Mr. C. Rajagopalachariar to settle with Mr. Jinnah and the Muslim League on the basis of Pakistan. When Mr. Rajagopalachariar's move was condemned even by the bulk of Congressmen (see chapter on the "Indian National Congress") it is easy to understand the opposition of the Mahasabha leaders.

When disturbances broke out in the country after the arrest of the Congress leaders on August 9, 1942, the Mahasabha President appealed to his followers not to extend any active support to the Congress move, as the Congress resolution was bound to prove detrimental to Hindu interests and to the integrity and strength of India as a nation and State. At the same time he urged Government to appease Indian discontent by an unequivocal Parliamentary declaration giving India the status of a completely free and equal partner in the Indo-British Commonwealth, equal to that of Great Britain herself, and by investing India with actual political power.

The position of the Hindu Mahasabha was indeed unenviable. It could not unduly condemn the Congress which had now given up the cry of "No *Swaraj* without communal unity" and had instead gone all out to win freedom for the country irrespective of what the Muslims said or did. Thus one of the major grievances of the Hindu Mahasabha against the Congress had been removed. At the same time the policy of the Congress was opposed to that of the Hindu Mahasabha which was one of responsive co-operation. The Mahasabha would very much like the Congress demand for India's political emancipation being conceded without delay, but would not at the same time support the Congress methods.

Right Wing—The period when the Congress was behind prison bars witnessed the growth of certain new elements within the Hindu Mahasabha. A right wing came into being—rather the right wing forces which were already there came to the fore. This comprised leaders like Dr. Syama Prasad Mookerjee who were, in comparison, for example, with Mr. Savarkar, less communally minded, and more politically conscious.

For a time there was a tussle between the old and the new forces, and the official policy of the Mahasabha fluctuated in consequence. In August 1942 the Working Committee of the Mahasabha demanded immediate declaration of India's independent status and negotiation by Britain with the principal parties in India to solve the political deadlock and establish an Indian National Government. The relevant

resolution stated that if the British Government did not respond to the demand the Mahasabha would be compelled to revise its programme and devise ways and means whereby Britain and her Allies "will realise that India as a self-respecting nation can no longer be suppressed." In pursuance of this resolution Dr. Mookerjee sought permission to meet Mr. Gandhi, but the Viceroy declined to give it.

This tendency to move away from the communal basis of the Mahasabha was checked when, in December 1942 the Viceroy, speaking at Calcutta, referred to the geographical unity of India and advised Indians to preserve Indian unity. This was naturally interpreted as disapproval of Pakistan and any proposal to divide the country. The extremists in the Mahasabha were jubilant and the advocates of compromise thought it expedient to take the Viceroy's hint and abandon all efforts to settle with the Muslim League on the basis of Pakistan. The prospects of a rapprochement between the Hindu Mahasabha and the Muslim League, such as they were, were rendered more remote as the result of the Viceroy's Calcutta speech.

The proceedings of the annual session of the Hindu Mahasabha which met at Cawnpore a few days after the Calcutta pronouncement were naturally coloured by the latter.

The feeling of self-satisfaction engendered by Lord Linlithgow's speech at Calcutta in December 1942, which was voiced at the Cawnpore session of the Mahasabha, was somewhat shaken by developments in the summer of 1943. Qaid-e-Azam Jinnah, who was doubtless upset by the Viceroy's pronouncement on the geographical unity of India, made a conciliatory gesture to Mahatma Gandhi in his presidential address at the annual session of the All-India Muslim League at Delhi in April, 1943. He said that, if Mahatma Gandhi were keen on a settlement, he, had only to write to him from the Aga Khan's palace. Mahatma Gandhi did write to him expressing a desire to meet him. Although the Mahatma's letter was withheld from the Qaid-e-Azam, the fact of the Mahatma's response to the Qaid-e-Azam's invitation amounted, in the eyes of the Mahasabha, to a readiness to concede the Qaid-e-Azam's demand. The Working Committee of the Mahasabha took such a serious view of the possibility of "a cent per cent. transfer of power to the League" that it felt that "under the circumstances the Hindus may have to meet and fight the danger of Pakistan single-handed", and urged the Hindu community to "prepare and be ready".

Savarkar Resigns—Early in the autumn of 1943 Mr. Savarkar staged one of his periodical exits from the leadership of the Mahasabha. More than once before he had announced his resignation of its presidency, but on each occasion he was induced to stay on. A similar development was expected on this occasion, too. But he stuck to his decision, in spite of the fact that the Mahasabha re-elected him President for another year. Obeying his doctors, who advised complete rest, Mr. Savarkar declined to go to Amritsar to preside over the Silver Jubilee session of the Mahasabha whose deliberations were guided by Dr. Syama Prasad Mookerjee, Working President.

The session which celebrated the silver jubilee of the organisation, was inaugurated by the Maharaja of Coimbatore, whose late father was the first President of the Hindu Mahasabha. Raja Narendra Nath, ex-President, in a short speech asserted that the Hindu Mahasabha was not a communal organisation but had come into being to infuse the spirit of nationalism among the people. He was followed by Bhal Parmanand and Dr. Moonje, who stressed the need for Hindu unity and claimed that India belonged to the Hindus and should have its constitution based on the Vedas just as the pan-Arabic countries were endeavouring to base their constitution on the Quran. He made a stirring appeal to the audience for the militarization of the Hindus.

Organisationally speaking, the Hindu Mahasabha suffered a number of reverses in 1944-45. This was due mainly to the fact that Mahatma Gandhi was out, and, to the extent that he is the Congress, the latter organisation once again came to the stage, thereby depriving the Hindu Mahasabha of the position which it had held in public life for two or three years previously as the opponent of the Muslim League.

Common Platform—Even so, the Mahasabha was not completely out of the picture; for it was not slow to make its opinion felt on the many situations which arose as the result of the attempts made on behalf of the Congress to placate the Muslim League. Throughout this period, the Mahasabha, which had previously occupied the front of the stage as a counterblast to the Muslim League, contented itself by attacking the principal actors, the Congress and the League, and latterly the British authority. Symptomatic, perhaps, of the resentment felt by the Mahasabha leaders at this persistent relegation to the background were the series of protests made by the Mahasabha culminating in the renunciation in August 1945 of their titles by some prominent Mahasabha leaders.

The failure of Mahatma Gandhi to evoke response from the Viceroy to this gesture soon after his release (see chapter on "The Indian National Congress") led the Mahasabha Working Committee to express deep concern at the constitutional deadlock which "continues to exist at a time when the war menace to India has become so real and so imminent" and regret that "Government have taken no practical steps towards resolving the deadlock and the establishment of national coalition Governments at the Centre and in the provinces."

A resolution passed in July 1944 said: "The Working Committee reiterates that no communal settlement will be acceptable to the Hindus which has not the approval of the Hindu Mahasabha, and it will be a fatal mistake for Congress leaders to come to a patched-up agreement with the Muslim League so long as it persists in its Pakistan ideology and refuses to identify itself with the national interests of India as a whole. The Working Committee declares that the suicidal policy of appeasement, specially jeopardising Hindu rights, has not proved a success in the past, nor will it be so in the future. Instead of this policy being

pursued, there should now be all-India effort for uniting all progressive parties and organisations throughout the country who believe in the unity and integrity of India on a common Indian national demand, and both Hindu and Muslim public opinion should be effectively mobilised on such lines. In the preparation of, and in giving effect to such a scheme, the Hindu Mahasabha will be glad to offer its wholehearted co-operation."

C.R. Formula Condemned—Ironically enough, within a few weeks of the adoption of this resolution, Mr. C. Rajagopalachari published the details of his negotiations with Qaid-e-Azam Jinnah on the basis of the Gandhi-cum-C.R. Formula conceding the right of secession on certain conditions (see chapter on "The Indian National Congress"). This roused vigorous protests from Mahasabha leaders. Mr. Savarkar remarked:—

"From the 'Quit India' the Congress has inevitably landed on 'Split India.' The Hindu Mahasabha had foretold that just as the Swaraj-Khilafat ended in strengthening the Khilafat forces and gave birth to the Pan-Islamic movement, the Swaraj-Pakistan movement could result in strengthening the Pakistan forces." He added that this offer had completely justified the policy of the Mahasabha in refraining "from being duped into the movement of 'Quit India,' which has now ended in such a miserable fiasco."

"It is really unjust," observed Mr. Savarkar, "to look upon Mr. Rajagopalachari as the villain of this tragedy. The fact is that a Muslim Raj in India has always been looked upon by Gandhiji and a large number of Congressmen as cent per cent. Swaraj." He contended that neither Mahatma Gandhi nor Mr. Rajagopalachari had the authority to make a gift of any of the Indian provinces.

Mahasabha suspicions were accentuated by the prospect of Gandhi-Jinnah negotiations. Mahasabha leaders were so much disturbed by the fear of fresh concessions to the Qaid-e-Azam that Dr. Mookerjee sought clarification from Mahatma Gandhi on the latter's intentions.

Outlining his impressions of his talk with Mahatma Gandhi, Dr. Mookerjee made three points. The first was that Mahatma Gandhi's mind was still open to conviction and if he felt satisfied that what he had done was injurious to India as a whole or to a particular province, or even to a particular community, he would not hesitate to retrace his step. Secondly, Mahatma Gandhi's personal views on the question of partition of India were still the same as they were two years ago. In the third place, Mahatma Gandhi was most anxious that all people, including Congressmen, should, without reserve, express their opinion on the C.R. formula so that he might correctly appreciate the country's reaction.

Appeal to U. N.—Dr. Mookerjee said that the real solutions for settling Hindu-Muslim differences was to find out from the spokesmen of the respective communities in what manner minority rights required protection in provincial spheres and the Centre. It was clear, continued Dr. Mookerjee, that Qaid-e-Azam Jinnah's

settlement with Mahatma Gandhi could be only on the basis of Pakistan. He had not even stated what his Pakistan was, though he had emphatically indicated that the C.R. formula did not give him the Pakistan he wanted. The Qaid-e-Azam's demands would now increase, of which indications had already been given.

Even after it was known that the Gandhi-Jinnah pourparlers had broken down the Working Committee of the Mahasabha passed a resolution condemning the Rajagopalachari Formula and Mahatma Gandhi's Scheme "as being destructive of the integrity of India and being detrimental to the interests of the Hindus as well as of the country as a whole," and reaffirming that "no communal settlement will be binding on the Hindus unless arrived at with the consent of the Hindu Mahasabha."

In a second resolution, the Committee reaffirmed that India was one and indivisible and called upon the United Nations to make an unequivocal declaration recognising the right of India as such a nation.

The Working Committee further resolved that, in the event of failure on the part of Britain to satisfy the fair and just demand made by India, the other Allied Nations should not permit Britain to delay any longer the removal of India's bondage on the pretext of communal, sectional or other differences, mostly created by the policy of divide, and rule and seditiously fostered with the object of continued exploitation of the Indian people.

The Working Committee was further of the opinion that continuance of the undemocratic Government, not at all responsible to the people of India, had resulted in the estrangement between India and Britain which would not fail to be a menace to world peace and world order.

The Working Committee authorised the President to cable the resolution to President Roosevelt, Premier Churchill, Marshal Stalin and General Chiang-Kai-Shek.

HINDUSTAN CONSTITUTION

The annual session of the Mahasabha was held at Bilaspur on Christmas Eve in 1944. Dr. Syama Prasad Mookerjee presided.

The proceedings of the session were signalled by the adoption of a draft constitution for the future free India embodying the principles for which the Mahasabha stands. The draft said: "Hindustan shall be a free State and her constitution shall be styled 'The constitution of the Hindustan Free State.' Historically, politically, ethnologically and culturally, Hindustan is one whole and indivisible, and so shall she remain. The form of Government shall be democratic and federal. The federal legislature shall be bicameral in structure. Elections to the legislature, whether federal or provincial, shall be on the basis of adult franchise and of 'one man one vote.' The federal government shall be distributed between the central and provincial legislatures in a manner so as to give an adequate measure of autonomy to the provinces, with residuary powers at the centre. The power of

the Government, whether federal or provincial, shall be divided into legislative, executive and judicial, with the executive responsible to the legislature and both responsible to the people and with the judiciary independent of the executive. Distinctions between martial and non-martial races shall no longer exist, and the military strength of the Hindustan Free State shall, as far as possible, be equilibrated amongst its various provinces, consistently with its standard of discipline and efficiency. The States should be brought into the federation of Hindustan. Responsible government should be introduced, on the principles stated above."

It was laid down that "the fundamental rights of a free state, namely, that all citizens domiciled in Hindustan shall, in general, enjoy rights and privileges and be subject to the obligations of citizenship and shall, in particular, enjoy fundamental rights."

The principal resolution of the session expressed the opinion that an agreed scheme of reforms which would solve her political problems and a united front were the pretexts which were being put forward by British politicians to enable Britain to defeat Hindustan's claim to freedom. The resolution declared that "a major surgical operation like Pakistan" was not in the best interests of Hindustan. Without prejudice to the Mahasabha's demands for complete independence and the right to frame its constitution, the resolution called upon the British Government to prove their *bona fides* by taking immediate steps to implement the Cripps scheme, shorn of clauses giving power of secession to provinces, and to dissolve the legislatures as the first step with a view to forming a Constituent Assembly elected not on the basis of the Communal Award but on the basis of a joint electorate with reservation of seats where necessary.

Wavell Plan Condemned—When Lord Wavell broadcast his plan for an Interim Central Government the Working Committee of the Mahasabha registered its strong protest against the proposal which it described as a "deliberate device on the part of the British Government to perpetuate British Rule over India to camouflage the issue of India's independence, to break the solidarity of the Indian nation, to reduce the Hindus who constitute about 75 per cent. of India's population to a minority by the introduction of parity between caste Hindus and Muslims and disparity between Muslims and the Scheduled Castes, and to divide the politically-minded Hindu community into separate entities as Caste Hindus and the Schedule Castes."

The resolution continued: "The said plan negates the principles of nationalism, freedom and democracy for which the Second World War is said to be waged and fought by the Allies. Even a fully Indianized Executive Council under the existing constitution without any collective responsibility with the Viceroy's veto and the overriding power of the Secretary of State intact can be no substitute for a truly National Indian Government responsible to the people based on the recognition of Indian independence...."

"It is obviously a step in retrogression of the Cripps proposal and a monstrous extension of the so-called communal award which has proved to be the fountain source of all communal bitterness and political strife.

"The Indian National Congress has bartered away the political rights of the caste Hindus by repeated secret negotiations and by its open failure to defend such a right whenever they were trampled under foot. The Congress has ceased to be a national organisation by its persistent negotiations with the Muslim League, a body outside the Congress on communal issues and by its latest acceptance through Gandhiji of an equal political status with an avowedly communal and reactionary organisation like the Muslim League. Any decision taken behind the back of the Hindu Mahasabha, which alone is the accredited political organisation of the Hindus and which has been in the past recognised by the Government itself as a major political organization, shall not be acceptable to the Hindus of India.

"The Working Committee demands that a referendum be taken of the Wavell plan and the opinion of the people be ascertained before it is put into operation.

"The Working Committee therefore declares that the Wavell Scheme even if it be accepted by the Simla Conference will be repudiated by the Hindus and if enforced will be resisted by all possible means.

Titles Renounced—Government's "increasingly hostile attitude towards the legitimate rights of Hindus" came in for violent criticism at the meeting of the All-India Committee of the Mahasabha held at Delhi in August 1945. The meeting witnessed the unprecedented spectacle of some Mahasabha leaders renouncing their title as a protest against Government's policy.

Opening the session of the All-India Committee Dr. S. P. Mookerjee, the President, said that a new situation had been created by the Wavell offer. Dr. Mookerjee added Lord Wavell had not invited the Hindu Mahasabha to the Simla Conference, because the Viceroy feared opposition from the Mahasabha, who not only opposed the offer but also charged the British Government with unwillingness to part with real power.

Referring to Qaid-e-Azam Jinnah, Dr. Mookerjee said, the Qaid-e-Azam had now changed his demand from parity with Hindus to that of parity with the rest of India. Dr. Mookerjee claimed that the Mahasabha was the only national organisation and challenged any one to prove that the policy and programme of the Mahasabha was inconsistent with national aspirations. He strongly demanded that the future of India should be based on unity and drew support from the speeches of Pandit Nehru.

The resolution on titles said: "As a mark of protest against the increasingly hostile attitude of the Government towards the legitimate rights of the Hindus, the Working Committee of the All-India Hindu Mahasabha calls upon all Government title-holders who are office-bearers or who are members of the Council or committees of the provincial or district

Sabhas to relinquish their titles. No Government title-holders shall therefore be eligible for any elective office or offices in the Hind Mahasabha."

The principal political resolutions ran as follows: "On the termination of the world war causing untold misery and sufferings to millions of people in India and the other countries both in the east and the west, we call upon His Majesty's Government to redeem the pledge of liberation of oppressed humanity from both political and economic fetters. In view of the glorious part played by the Indian Army in achieving victory in theatres of war, and particularly by the Hindus, who formed about 70 per cent. of the combatant forces and won as many as 27 Victoria Crosses out of 31 won by Indian soldiers, the United Nations should stand by India's demand for justice, fairplay and see that no injustice is done to the Hindus in this crisis.

"To make agreement between political parties and communities a condition precedent to the freedom of India is a pretext for imperialism to cling to power. . . . We call upon the British Government immediately to repeal the communal award, which is unfair, undemocratic and anti-national. The Hindu Mahasabha has all along rejected the communal award. We are of the opinion that the election should be based on the genuine democratic principle of one man, one vote. . . . The Mahasabha insists that any Constituent Assembly or any body entrusted with the work of drafting India's new constitution should proceed on the basis that India is and shall remain one and indivisible and further, that any majority community shall not be reduced to a minority or equality.

"The Hindu Mahasabha is opposed to the pernicious principle of parity between Hindus and Muslims. It is inherently unjust to reduce a majority of three-fourths to the same position as a minority of one-fourth. . . . The Hindu Mahasabha is of the opinion that the Wavell Plan, which envisaged no real transfer of power to Indian hands, was foredoomed to failure because it was based on inherently unjust proposals of parity.

"His Majesty's Government can call for the co-operation of all nationalist elements, Hindus and Muslims, who are willing to shoulder responsibility for tackling the triple issues of the integrity of India, opposition to parity and the demand for complete independence without a weakening or crippling of the Hindus.

Memorandum—As remarked earlier, the Mahasabha receded into the background with growing political activity on the part of the Congress. Such influence as it had over the Hindu mind suffered as the result of a new declaration of Congress policy towards Pakistan and the proposed partition of India. The Working Committee of the Congress in the Autumn of 1945 adopted a resolution on the subject which set its face squarely against the division of the country (See Chapter on the "Indian National Congress"). Then followed months of electioneering activity in which the Congress successfully eclipsed the Mahasabha. It was only in very few

constituencies that the Mahasabha could put up its own candidates, but hardly any could come on top. Most of the Mahasabha nominees forfeited their deposits. The Hindu electorate solidly voted Congress.

When, therefore, the British Cabinet Mission arrived in India in the spring of 1945 and carried on negotiations with the Indian political parties, the Mahasabha was not much in evidence. Mr. L. B. Bhopatkar, Acting President of the Mahasabha, met the Mission and submitted a ten-point memorandum. The points made out were: (1) immediate declaration of independence of India; (2) formation of an interim government with complete transfer of all power and authority of Government of India to the Government; (3) recognition of India's integrity and indivisibility; (4) opposition to territorial self-determination; (5) India's constitution to be of the federal type with (6) provisions for the grant of the utmost measure of autonomy to the federating units, the provinces and the States, but with residue of powers vested in the Centre; (7) the governing principle of the constitution to be democracy, which means the rule of the majority; (8) representation in legislatures on the principle of adult franchise; (9) no division of India into British India and the Indian States; and (10) the setting up of a sovereign constituent assembly.

The memorandum stated that, as all sovereignty in respect of India was vested in the Indian people, it was the right of Indians to be fully and completely free.

As regards the Interim Government, the memorandum said that it should be composed of eleven representatives elected by the eleven provincial legislative assemblies, who should co-opt four members representative of such minorities as were not represented on it. These 15 members need not be members of Legislative Assemblies.

The Constituent Assembly itself should be as small a body as possible and should be composed of members elected by the Provincial Legislative Assemblies with power to co-opt representatives of such minorities as were not represented on it and some experts, if necessary.

The constituent body should be a sovereign one which would decide the terms of a treaty with Great Britain. It would decide all matters by a majority vote, and these decisions should be binding on all.

The memorandum emphatically declared that historically, ethnologically, politically and even culturally India was one whole and indivisible nation and it must remain so in future.

The Sabha was opposed to the principle of territorial self-determination which it said would prove as dangerous as Pakistan itself.

After that, however, the Mahasabha was completely out of the picture. The annual session of the organization, which was to have been held early in the year, was postponed. Instead, the Working Committee met in Calcutta towards the end of September, when the unprecedented communal outburst at

Calcutta provided grist to the Mahasabha mill. It expressed the view that the Muslim League should be declared an illegal body and dealt with as such, if it persisted in its attempt to indulge in unconstitutional and illegal activities. The committee urged the new Central Government and the Governor-General to exercise their powers for the maintenance of peace and tranquillity in the country. It also declared that the "Direct Action" declared by the Muslim League against British imperialism was a camouflage and was a manoeuvre to inflame the fanatical mass mind against the Hindus. It recorded its firm conviction that "the Calcutta massacre was organized and planned to terrorise and intimidate the Hindus in order to frighten them into acceptance of Pakistan."

FOUR-POINT PROGRAMME

In the historic events which led up to the independence of India, the stand of the Hindu Mahasabha was what it had always been—communalism as a cure for communalism.

At the twenty-seventh annual session of the All-India Hindu Mahasabha at Gorakhpur at the close of 1946, Mr. B. L. Bhopatkar, in his presidential address, outlined a four-point programme to propagate "the ideas and ideal for which the Hindu Mahasabha stands and to indicate to the Hindus the right lines of their defence against Muslim aggression."

Mr. Bhopatkar declared that, in the crisis then prevailing, it was the duty of the Hindu Mahasabha to run to the help of the rest of the Hindus. The work of the Mahasabha to be carried on was suggested on the following lines:—

Firstly, it must educate both the Hindu masses and classes in the ideology of the Mahasabha and make them communally conscious.

Secondly, it should organise a Hindu front composed of Caste Hindus, Scheduled Classes Sikhs and others with a view to confronting successfully all "open or veiled aggression" in any part of India.

Thirdly, it should remould the Hindu mind by making it more self-reliant and, if necessary even militant.

Fourthly, to carry out this stupendous work the Mahasabha should start a fund called "The Hindu Reconstruction and Relief Fund".

In his review of events over two years ending with December 1946, Mr. Bhopatkar said that the Simla proposals were manifestly pro-Muslim and, therefore, unfair and unjust to the Hindus Sikhs and the Scheduled castes. They surreptitiously introduced the principle of parity between Caste Hindus and Muslims.

Recalling the Mahasabha's appeal to Hindus Mr. Bhopatkar urged them to realise the danger inherent in the Cabinet Mission's proposals and said that the danger lay in the "proposed three tiered constitution."

Mr. Bhopatkar declared that there were occasions in a nation's history when communalism had to be met by communalism and nationalism was required to be purified through the fire of communalism.

Mr. Bhopatkar urged the Constituent Assembly "which seems to be determined to frame India's constitution," the abolition of distinction between martial and non-martial races and to see that the military strength of Hindustan was as far as possible equilibrated among its various provinces.

Inaugurating the session, Dr. Syama Prasad Mookerjee declared that, if all members of the Constituent Assembly remained united and proceeded with their task without any anxiety to appease the Muslim League or to make any surrender of the fundamental issues of Indian unity and liberty, "there is no power on earth that can ultimately stand in the way of our attaining the goal."

He urged the Constituent Assembly to frame a constitution for a free India based on sound and democratic principles, making provision for all minority interests. Whether the Muslim League accepted such a constitution or not, he declared, India should acquire sufficient strength to enforce it on her people.

To his mind it seemed almost certain that India would have to pass through another stage of bitter struggle before she attained her complete freedom.

At this four-day session more than half a dozen resolutions were passed and eloquent tributes were paid by delegates from almost every province to the great qualities of leadership of Mr. Bhopatkar, the new President, after the voluntary retirement of Dr. Syama Prasad Mookerjee.

Hindustan National Guards—The highlight of the session was the unanimous adoption of the resolution embodying a future programme for Hindus envisaging the formation of the Hindusthan National Guards for the purpose of self-defence.

Resolutions urging the intensification of the "Suddhi" (purification movement) protesting against the League Ministry in Sind, inviting Muslims of other provinces to convert Sind into a complete Pakistan province, and warning the Sind Government that should it pursue that policy Hindu India would really rescue the Sind Hindus, were also passed. Dr. B. S. Moonje, moving his resolution on the future constitution of India, said that any constitution without a strong centre would never be accepted by the Hindu Mahasabha.

Mr. N. C. Chatterjee's resolution on Noakhali said that that calamity was likely to spread to other areas in Hindu minority districts in Bengal and regretted that the Governor-General and the Governor of Bengal, who had a special responsibility to protect minorities, had "failed miserably to discharge their obligations".

At the close of the session a new Working Committee of the All-India Hindu Mahasabha was elected. The following is a complete list:—

President: Dr. L. B. Bhopatkar, **Vice-Presidents:** Dr. V. D. Savarkar, Dr. Syama Prasad Mookerjee, Mr. B. G. Khaparde (in case Bhai Parmanand refused to accept), Mr. N. C. Chatterjee, Mahant Digvijayanath and Dr. B. S. Moonje, **General Secretary:** Mr. Anusutosh Lahiri, **Secretaries:** Mr. Dhamdhare (Poona) and Mr. V. G. Deshpande, **Treasurer:** Captain Deshachandrar.

Working Committee Members: Mr. Gangadhar Tulsidas (Sind), Mr. Mahendra Dewan (Gujarat), Kumar Sureshprakash Singh (Oudh), Mr. Rajmunar Narsinhrao (Andhra), Mr. Ramnath Kalia (Delhi), Mr. Panchanatham (Madras), Mr. R. K. Pande (Mahakoshal), Mr. K. D. Dhamdhare (Bombay), Mr. Indra Prakash (Punjab), Mr. R. A. Kanitkar (Berar), Mr. L. V. Paranjpe (C.P.), Mr. Satishsingh (Assam), Mr. D. N. Muckerjee (Bengal), Mr. K. Shivanand (Tamilnad), Mr. R. N. Man (Maharashtra), Mr. Chandkiran Sharda (Ajmer), Mr. Chandralal Banker (N.W.F.P.), Kumar Ganganand Sinha (Bihar), Rani Phulkumari of Sherkot (ladies) and Mr. G. A. Gavani (Scheduled Caste).

Nominations: Lala Narain Dutji, Dr. Gokulchand Narang, Mr. Gangaram Khanna, and Mr. Lakmishanker Verma.

The Working Committee of the All-India Hindu Mahasabha, which met at New Delhi on February 1947, reiterated the views and demands of the general body a month earlier. It passed a resolution expressing the opinion that "the Constituent Assembly, as it is, is a properly constituted legal body with full sovereign power and authority and competent to frame the political constitution of 'Akhand Hindustan'". The Mahasabha was of the opinion that now as the Congress and other representatives had started the work of the Constituent Assembly, they should complete it whether the League joined it or not or even if the British Government withdrew the Cabinet Mission's proposals.

Fair Play to All—The Committee also felt that the Karachi resolution of the Muslim League declining to join the Constituent Assembly marked a definite departure from the path of constitutionalism in favour of direct action.

It urged the Princes to join the Constituent Assembly, giving adequate representation to their own people and to introduce responsible government in their own States as speedily as possible.

The Working Committee appointed a committee to draft the outlines of a constitution for Akhand Hindustan "broad-based on the principles of equity, democracy, justice and fair play to all communities and interests".

The Committee reiterated its opinion that the Cabinet Mission's proposals envisaging a three-tiered constitution should not have been accepted by the Congress. What was needed was a strong central government paramount enough to make all the provinces and States work in union with each other.

The Committee appointed another committee consisting of the President and 32 members from different parts of India for collecting a fund to implement the constructive programme of the Mahasabha outlined at its Gorakhpur session. It also authorised the General Secretary in co-operation with two others to take the necessary steps to organise a *Suddhi* (purification movement).

At another session of the Working Committee in New Delhi the following month, a resolution was adopted declaring that, except for the deadline, H.M.G.'s Statement of February 20 on the withdrawal of British power by June

1948 was vague and likely to lead to unrest and strife in India. The resolution opposed transfer of power to provincial governments "with regard to areas which are not fully represented in the Constituent Assembly owing to their own perversity".

The Mahasabha called upon the Constituent Assembly to proceed with the completion of its task to provide for a strong Centre.

By another resolution the Working Committee congratulated the Hindus and Sikhs of the Punjab for having built up a common anti-Pakistan front. Expressing grave concern at the riots in that province, the resolution declared that these riots were brought about by "a combination of the agents of bureaucracy and the Muslim League to terrorise Hindus and Sikhs so that they may give up their anti-Pakistan agitation."

The Committee finally called upon the British Government to transfer power and responsibility to a strong and independent Central Government which could effectively control the destinies of the whole of India (Akhand Hindustan).

Integrity of India—The reaction of the All-India Committee of the Hindu Mahasabha to H.M.G.'s announcement of June 3 was in keeping with its avowed policies. The Committee reiterated its opposition to partition of the country and declared that there would not be peace in India unless the separated areas were brought back into the Indian Union and made its integral parts. The Committee declared the tentative allocation of territories in the proposed partition of the Punjab and Bengal was "unjust and unfair to the non-Muslims".

The main resolution moved by Mr. N. C. Chatterjee and seconded by Dr. Gokulchand Narang *inter alia* said, "The cardinal principle of the Hindu Mahasabha has always been the unity and integrity of India, and under no circumstances would it be a party to the vivisection of India in any shape or form."

Deploping that the Indian National Congress, after solemn assurances to the Hindu electorate that it stood by the unity of India, had agreed to the partition of India without a referendum, the Committee declared that "the Hindus were not bound by this commitment of the Congress".

As the principle of partition had been accepted both for the Punjab and Bengal and as the communal ministry in Bengal had been pursuing a policy detrimental to Hindus, the Committee urged the Viceroy to promulgate Section 93 of the Government of India Act of 1935 pending the appointment of two regional ministers.

The Committee resolved that July 3 be observed as a day of countrywide protest by peaceful "hartal" and holding public meetings wherever possible.

On the eve of independence Mr. L. B. Bhopatkar, President of the All-India Hindu Mahasabha, called upon the Hindus not to participate in the August 15 celebrations decided upon by the Indian National Congress.

Direct Action in U. P.—Meanwhile, the U.P. Hindu Mahasabha's direct action movement against the U. P. Government had begun in Lucknow. After many demonstrations Hindu Mahasabha volunteers attempted to hoist the Hindu Mahasabha flag in a Lucknow park and were taken into custody. The movement was started after the ten demands of the Mahasabha on the Government had broken down.

The demands were based on communal lines about representation in Government service and about effective defence provisions in the provinces against disturbances.

During the course of the movement several Hindu Mahasabha workers were arrested. The U. P. Government also directed the District authorities to put in charge of receivers the estates and commercial and industrial establishments of persons arrested under the movement.

The campaign was carried on, besides the U.P. in Bihar and elsewhere. The movement was called off in the third week of September as, it was declared, the communal situation needed the undivided attention of all the people.

At the opening session of the All-India Hindu Convention, which met in New Delhi on August 9, 1947 under the Presidentship of Mr. V. D. Savarkar, there was commotion and uproar. Mr. Savarkar, winding up the proceedings, said, "If Hindus do not organise and assert themselves, realise the grave danger that lies ahead and work to get the severed areas back, there will be numerous other Pakistans in our midst in the next few years."

The Convention passed a resolution expressing opposition to the partition of India on the basis of religion and urging the Hindus not to accept the division of the country and criticising the Indian National Congress for having acceded to it without getting a verdict from the people on this issue.

In September, the Working Committee of the All-India States Hindu Mahasabha met in Baroda under the Presidentship of Pandit Ananda Priyaji, the Working President, and passed a resolution disapproving the action of Junagadh State in joining the Pakistan Dominion. Another resolution on Hyderabad requested the Nizam to join the Indian Union forthwith.

The assassination of Mahatma Gandhi, on January 30 led to police raids on some offices of the Hindu Mahasabha and R.S.S. and the arrest of some Mahasabha and R.S.S. leaders.

The Muslim League

THE awakening of political consciousness among Muslims in the sub-continent as a separate entity dates back to 1906 when the All-India Muslim League was formed. It worked up its influence steadily, so that when it was hardly ten years old it became sufficiently important to enter into an agreement—known since as the Lucknow Pact—with the powerful Indian National Congress. The League fell on evil days in the 'twenties, and differences set in among its members. When enhanced powers were conferred on India by the Montford Reforms, Muslims became more and more politically minded and began to aspire for a greater share in the control of the administration of the country and in Government posts. This feeling gave rise to the formation of a new body whose promoters concentrated on aggressive presentation of Muslim demands. With the prospect of still further constitutional reforms at the end of the first ten years of the working of the Montford Scheme, these leaders strove to organise Muslims into an influential body which would safeguard their interests more effectively than the League. The result was the All-Parties Muslim Conference in 1928. The publication of the Communal Award and its inclusion in the White Paper Scheme of Reforms in 1933 helped this process of consolidation.

An attempt was made early in 1934 to consolidate the community by healing the split within the Muslim League and, if possible, bringing the League and the Conference together to work as a united body. The latter failed, but the former object was largely successful and the League marched from strength to strength until it emerged as a powerful organisation of the Muslim community on the eve of the first elections to the provincial legislatures under the Government of India Act of 1935. For the first time in the political history of Muslims their representative institution functioned as a vigorous and active all-India organisation although the success of League nominees was not very striking. Doubtless Quaid-e-Azam Mahomad Ali Jinnah, who was the guiding spirit behind this new activity, was handicapped by fissiparous tendencies and reactionary forces in distant provinces beyond the sphere of his direct influence. This was soon rectified by the growing influence of the leader and the League among the Muslims.

The leader's influence among the Muslims increased rapidly in the years following the advent of the 1935 constitution. The Muslim League grew into a powerful organisation with branches all over the sub-continent. At Lucknow in 1937 its creed was lightened up; at Lahore three years later it adopted a resolution demanding the partition of the country into Hindu and Muslim India; and in 1941, the creed was again changed into what amounts to a demand for secession.

The Muslim League gathered strength as the years rolled by, especially during the war when the Congress was in jail and there was no effective opposition to the League. An attempt was made by Lord Wavell in the summer

of 1945 to form a coalition government including the Congress and the League as a temporary measure without prejudice to the claims and aspirations of the two organizations. This move failed and elections were ordered through the country. The League came on top at the polls, and immediately thereafter the British Government sent a Cabinet Delegation to settle the Indian problem once and for all.

The Delegation, after elaborate investigation and personal discussion, came to the conclusion that Pakistan was impracticable and inadvisable. It decided to set up a Constituent Assembly to frame a three-tier constitution, comprising a limited union centre, three groups of contiguous provinces (one in the north-west, the second in the centre and the third in the east), and 11 provincial constitutions. It also decided to set up an Interim government, pending the evolution of a future constitution. The League at first accepted the British Cabinet Mission's proposals, but later went back on its decision and resolved upon direct action. In the late autumn of 1946, the League again decided to co-operate and sent its nominees to the Interim Government at the centre formed earlier by the Congress.

Down below the foregoing events are reviewed in greater detail.

Shortly after the 1936 elections, the Quaid-e-Azam explained the position of the League members of provincial legislatures *vis-à-vis* other groups and said: "The constitution and policy of the League do not prevent us from co-operation with others. On the contrary, it is part and parcel of our basic principle that we are free and ready to co-operate with any group or party from the very inception, or inside the legislature, if the basic principles are determined by common consent."

These words engendered a hope that the League might be induced to co-operate with the Congress and negotiations were started, but it soon became apparent that the two could not come together. The situation was rendered more difficult by the attitude of stiffness adopted by the Congress and its President, Pandit Jawaharlal Nehru. The Quaid-e-Azam refused to convert the League into "an understudy of the Congress" and firmly upheld the position of the Muslim community. The Congress, for its part, found as the result of the elections that it did not have the support of the Muslim community. Very few Congress Muslims were put up as candidates for the elections, and even they failed. The Congress, therefore, sought to bring in the Muslims by an appeal to their economic conscience, explaining that the Congress was out to alleviate the sufferings of the masses, Muslims as well as Hindus, and to uplift the nation as a whole. In this process the League and its leaders came in for a great deal of criticism at the hands of the Congress leaders. On behalf of the League the Quaid-e-Azam retorted: "The Congress have not the monopoly, nor are they the sole custodians of Indian nationalism. As I have always maintained, the Muslim League is prepared to join hands with any progressive party in the

fight for the country's freedom, but to achieve this the question of minorities must be settled satisfactorily. Here I am not talking of only Muslims but all minorities. Further, we are not prepared to merge ourselves into any organisation, however great it may be, and however advanced its programme and policy may be, unless it is determined by common consent."

In what may be described as non-Muslim provinces—that is, those in which the Muslims are in a minority—the Congress, however, formed Ministries without the co-operation of the Muslim League. Attempts were made to arrive at an understanding with the Muslim League, but they failed mainly on account of the Congress demand that wherever such an understanding was reached the Muslim League should cease to be a separate parliamentary body and merge itself into the resultant Congress-League Party. When the Muslim League refused to join the Government minority representation was secured by appointing non-League Muslims as ministers.

Simultaneously an attempt was made to approach the Muslim masses direct through an economic and national programme. For a time this appeared to succeed, but eventually failed to achieve its object. The League leaders counteracted the Congress propaganda by pointing out to the Muslim masses that their true interests lay in their organisation under the banner of the League which alone could serve them truly. The League's counter-drive succeeded in a large measure aided by allegations that in provinces where the Congress was running the Government the Muslim minorities were not treated well. The widening gulf between the Congress and the League gave an additional stimulus to the consolidation of the Muslim forces under the League which found fruition at the Lucknow session of the League in the autumn of 1937.

Complete Solidarity.—The session was unique in several respects. For the first time in the history of the Muslim organisational movement, complete unity was achieved, and every section of Muslim opinion, including those which till then had been opposed to the League or outside it, rallied round the League. There was no discordant note and Muslim political unity was complete. The Muslim League emerged the only strong and influential political organisation of the Muslim community.

The session changed the creed of the League to "the establishment in India of full independence in the form of a federation of free democratic states in which the rights and interests of the Muslims and other minorities are adequately and effectively safeguarded in the constitution." (For details of the proceedings of this session, see *Indian Year Book*, 1938-39.)

The foundations of Muslim solidarity laid at the Lucknow session of the League in the autumn of 1937 proved very strong indeed. The League grew from strength to strength in the two succeeding years and admittedly it became the most powerful organisation of the community. The League's spokesmen claimed that it was the only mouthpiece of the Muslims, and one might have been inclined to recognise that claim but for the existence of other organisations in the community with more or less following and

influence, not excluding a large number of Muslims who were members of the Congress. There might have been two opinions about the claim that the League was the only organisation of the community, but no one questioned that it was the most powerful and the most influential.

With the outbreak of the war and the changes it wrought in Indian politics, the League found itself in an extremely advantageous position. A perusal of the chapter on the Indian National Congress will show how the Congress withdrew its ministries from the provinces where it had held sway for nearly two and a half years. As a result of this the League came to be on a par with the Congress in that both were now out of office and without the power and influence which went with it. Whereas the Congress lost through the resignation of its ministries such bargaining power as it had while in office, the League acquired some indirect power through the international complications that resulted from the war.

Again, whereas the Congress had alienated the sympathies of the Indian Princes by sponsoring and encouraging agitation for responsible government for the States people, the League earned the friendship of the Princely order by condemning such activities and upholding the rights and privileges of the Indian Princes in any revision of the Indian Constitution. In yet another direction the League manoeuvred itself into a comfortable position; whereas, the Congress categorically withheld its co-operation from the war, the League abstained from taking any such attitude and merely insisted on the satisfaction of its claims prior to making up its mind. Even this was only the official attitude of the League as an organisation. Most of its individual members were in favour of wholeheartedly aiding in the prosecution of the war. And the League winked at this.

A fortnight after the declaration of the war, the Working Committee of the League passed a resolution which illustrates the tact and firmness with which the League steered the Muslim ship. The League Committee stated that "if full, effective and honourable co-operation of the Mussalmans is desired by the British Government in the grave crisis which is facing the world today and if it is desired to bring it to a successful termination it must create a sense of security and satisfaction among the Mussalmans and take into their confidence the Muslim League, which is the only organisation that can speak on behalf of Muslim India."

NO MAJORITY RULE

Side by side with the demand for the redress of Muslim grievances and the assertion that their full and free consent should be obtained before any change in the Constitution was attempted, the League continued its campaign against the Congress ministries, to which a reference has been made in past issues of the *Indian Year Book*. Apart from the "atrocities" which the League affirmed, had been perpetrated on the Muslim minorities in the provinces administered by the Congress, the League made a fresh point which was soon to become the nucleus of a serious development in Indian politics.

In a resolution passed in September 1939, the Working Committee of the League said: "The developments that have taken place, especially since the inauguration of the provincial constitution based on the so-called democratic parliamentary system of government and the recent experiences of over two years, have established beyond any doubt that it has resulted wholly in a permanent communal majority and the domination by the Hindus over the Muslim minorities, whose life and liberty, property and honour are in danger, and even their religious rights and culture are being assailed and annihilated every day under the Congress Governments in various provinces.

"While Muslim India stands against exploitation of the people of India and has repeatedly declared in favour of a free India, it is equally opposed to domination by the Hindu majority over the Mussalmans and other minorities and vassalisation of Muslim India, and is irrevocably opposed to any federal objective which must necessarily result in a majority community rule under the guise of democracy and parliamentary system of government. Such a constitution is totally unsuited to the genius of the peoples of the country, which is composed of various nationalities and does not constitute a national state."

This attack on provincial autonomy and on majority rule was an altogether new line which was struck almost for the first time by the League. Till then the Muslim demand had always been for effective safeguards for the protection of the Muslim community's religious, cultural and other rights; now the Muslims began to question the very basis of democracy and declared that the western democracy in the sense of rule by majority was unsuitable. This was developed in the summer of 1940 into a demand for the separation of Muslims on the ground that they constituted an integral nation and not a minority in the Indian population.

In the succeeding weeks numerous attempts were made to ascertain the grievances of the Muslims and to find out whether they were justified—in other words, whether the Congress ministries had been guilty of oppressing them or even neglecting them. But very little came out of them.

Meanwhile, discussions on the political field continued and early in October 1939 the Viceroy called into consultation leaders of all sections of opinion in India with a view to ascertaining their wishes in the matter of constitutional reform. On the conclusion of these consultations, the Viceroy issued an exhaustive statement on Britain's War aims *vis-à-vis* India.

It gave the Muslim community the requisite assurance concerning its status in future adjustments. This is evident from the resolution passed by the Working Committee of the League which met in Delhi towards the end of October 1939. The Committee hailed the Viceroy's statement as a new charter of hope for the minorities and as a recognition of the League's right to full say in the future constitutional arrangements. From this resolution one can infer that the League found in the Viceregal declaration an acknowledgment of the League's status as an essential factor in any political development on an all-India basis.

SEPARATION

To return to the Muslim League. As already stated, the idea of Muslims being a nation gathered strength during 1939-40, in which period a number of schemes for the formation of a Muslim bloc of autonomous states were mooted. For a time they were not regarded seriously; but from the proceedings of the annual session of the League held in April 1940, it became clear that the Muslim League was serious about this partition business. At Lahore, the Muslim community, as represented by the Muslim League, declared for Muslim independence.

The principal resolution of the session known later as the first categorical demand for Pakistan, which was carried unanimously, ran:—

"While approving and endorsing the action taken by the Council and the Working Committee of the All-India Muslim League, as indicated in their resolutions dated the 27th of August, the 17th and 18th of September and 22nd of October, 1939, and the 3rd of February, 1940, on the constitutional issue, this session of the All-India Muslim League emphatically reiterates that the scheme of Federation embodied in the Government of India Act, 1935 is totally unsuited to and unworthy of the peculiar conditions of this country and is altogether unacceptable to Muslim India.

"It further records its emphatic view that, while the declaration dated the 18th of October, 1939, made by the Viceroy on behalf of His Majesty's Government is reassuring in so far as it declares that the policy and plan on which the Government of India Act, 1935, is based will be reconsidered in consultation with the various parties, interests and communities in India, Muslim India will not be satisfied unless the whole constitutional plan is reconsidered *de novo* and that no revised plan will be acceptable to the Muslims unless it is framed with their approval and consent.

"Resolved that it is the considered view of this session of the All-India Muslim League that no constitutional plan would be workable in this country or acceptable to the Muslims, unless it is designed on the following basic principles, namely, that geographically contiguous units are demarcated into regions which should be so constituted, with such territorial readjustments as may be necessary, that the areas in which the Muslims are numerically in a majority, as in the north-western and eastern zones of India, should be grouped to constitute 'Independent States' in which the constituent units shall be autonomous and sovereign and that adequate, effective and mandatory safeguards should be specifically provided in the constitution for minorities in the units and in the regions for the protection of their religious, cultural, economic, political, administrative and other rights and interests in consultation with them, and, in other parts of India where the Mussalmans are in a minority adequate, effective and mandatory safeguards shall be specifically provided in the Constitution for them and other minorities for the protection of their religious, cultural, economic, political, administrative and other rights and interests in consultation with them.

"This session further authorises the Working Committee to frame a scheme of Constitution in accordance with these basic principles, providing for the assumption finally by the respective regions of all powers such as Defence, External Affairs, Communications, Customs and such other matters as may be necessary."

Stir in Country.—This created a stir in the country, among nationalists and Hindus alike and also among some Muslims. True the novelty of the thing caught the Muslim imagination, but even among Muslims there were many who questioned the wisdom of the step suggested in the Lahore resolution. Apart from destroying Indian unity which had been built up after years of strenuous effort, it was argued by many, the Lahore scheme would place the Muslim minorities in Hindu provinces in a very unenviable position.

The evolution of Muslim League thought in 1940-41 followed the lines laid down in April 1940, when the Pakistan resolution was adopted at Lahore. Percentages and weightages, proportion of representation and share in services, guarantees and safeguards— notions which had held the political field for decades—were clean swept aside. Quaide Azam Jinnah was not thinking in terms of these trifles, outworn gadgets of a democracy held to be unsuitable to an oriental people and totally inapplicable to the peculiar conditions of India. All these devices pre-supposed the continuance of Muslims as members of a State, more or less secured and safeguarded, enjoying greater or less share of power, but scarcely likely as a community ever to occupy a dominant position. The Quaide Azam refused to think of an arrangement which would not give the Muslims equal power and authority with the majority community. He would not be party to making the Muslims subordinate to the Hindus. Being a numerical minority they as a community would perforce be the junior partner in any composite State.

As in a composite State the Muslims could not in the nature of democracy expect to be reckoned as equals with the majority community, much less as the dominant force, the Quaide Azam went away from the idea of a composite State and proposed that India should be divided into two spheres, Muslim and Hindu. Each was to be autonomous internally and for purposes of a Central Government with minimum powers, the two should collaborate as equals.

PAKISTAN

The Pakistan ideal began to exercise the Muslim mind. It provided the League and the Quaide Azam with a new plank, gave the Muslim community a new goal, a new vista free from what was described as "the danger of Hindu Raj." Every development affecting the future of India in any way was viewed against the background of Pakistan; how will more power for the future Indian State affect the Muslims? Therefore the League claimed the right to approve or reject every proposal calculated to affect the country and its population. The threat was put forth that "any move by the Congress to widen political power in India without the League's approval will meet with the League's resistance."

The annual session of the League was held in Madras amidst scenes of great enthusiasm in the middle of April 1941. The Quaide Azam, who presided, urged the British Government to give up their policy of appeasement towards those who were bent upon frustrating the war efforts and to get on with those who wanted to get on with them.

The most important resolution of the Madras session was that which changed the creed of the League:—

"(1) The establishment of completely Independent States formed by demarcating geographically contiguous units into regions which shall be so constituted with such territorial readjustments as may be necessary that the areas in which the Muslims are numerically in a majority as in the north-western and eastern zones of India shall be grouped together to constitute Independent States as Muslim free national homelands in which the constituent units shall be autonomous and sovereign:

(2) That adequate, effective and mandatory safeguards shall be specifically provided in the constitution for minorities in the above mentioned units and regions for the protection of their religious, cultural, economic, political, administrative and other rights and interests in consultation with them:

(3) That in other parts of India where the Muslims are in a minority, adequate, effective and mandatory safeguards shall be specifically provided in the constitution for them and other minorities for the protection of their religious, cultural, economic, political, administrative and other rights and interests in consultation with them."

MASS PROPAGANDA

Encouraged by the successes achieved through the Lucknow, Lahore and Madras sessions of the League, the Quaide Azam was engaged in 1941-42 in further consolidating the influence of the League among the Muslim masses and propagating the new policy of the League. In this task he achieved a large measure of success, although it must be admitted that he met with one or two reverses.

These notwithstanding, the Quaide Azam and the Muslim League continued to grow in stature, as evidenced by the recognition accorded by the British Government to the influence and representative character of that organisation as far as the Muslims of India are concerned. The Quaide Azam never showed any slackening of his demand for Pakistan, although he expressed willingness not to raise that question in a pointed form while the war was in progress, provided, however, that in any transitional arrangements for the transfer of power from British to Indian hands steps were taken to ensure that the League got a fair share.

Perhaps the highest marks scored by the League so far are to be found in the British War Cabinet's formula brought by Sir Stafford Cripps in the spring of 1942, in which the British Government offered to give to Indian provinces the right to choose whether they would join any union that might be decided to be formed at the end of hostilities or would stay out and form their own State, separately

or in collaboration with other provinces similarly willing to stay out. This was an unprecedented concession to the League demand, which was stoutly opposed by the Hindu element of the population and by nationalist forces, although the Qaid-e-Azam himself would have liked the concession to be more specific and categorical.

CRIPPS SCHEME REJECTED

The proposals of the British War Cabinet were examined carefully by the Muslim League Working Committee which, whilst rejecting the scheme, expressed gratification that the possibility of Pakistan was recognised by implication by providing for the establishment of two or more independent unions in India. It regretted that the proposals of His Majesty's Government embodying the fundamentals were not open to any modification and therefore no alternative proposals were invited, and passed the following resolutions:—

"In view of the rigidity of the attitude of His Majesty's Government with regard to the fundamentals not being open to any modifications, the Committee have no alternative but to say that the proposals in their present form are unacceptable.

"(1) The Mussalmans, after 25 years of genuine efforts for the reconciliation of the two major communities and the bitter experience of the failure of such efforts, are convinced that it is neither just nor possible, in the interest of peace and happiness of the two peoples, to compel them to constitute one Indian Union, composed of the two principal nations—Hindu and Muslim...

"(2) In the Draft Declaration a constitution-making body has been proposed with the primary object of creating one Indian Union. So far as the Muslim League is concerned, it has finally decided that the only solution of India's constitutional problem is the partition of India into independent zones...

"Besides, the machinery which has been proposed for the creation of the constitution-making body, namely that it will consist of members elected by the newly elected lower houses of the eleven provinces, upon the cessation of hostilities, as a single electoral college by the system of proportional representation, is a fundamental departure from the right of the Mussalmans, hitherto enjoyed by them, to elect their representatives by means of separate electorates, which is the only sure way in which true representatives of the Mussalmans can be chosen.

"The constitution-making body will take decisions by a bare majority on all questions of most vital and paramount character involved in the framing of the constitution... The Mussalmans, by agreeing to this will, instead of exercising their right and judgment as a constituent factor, be at the entire mercy of the constitution-making body in which they will be a minority of about 25 per cent:

Muslim Plebiscite.—"The right of non-accession to the Union as contemplated in the draft declaration has been conceded presumably in response to the insistent demands by the Mussalmans for the partition of India but the method of procedure laid down is such as to negative the professed object...

"(3). In the draft proposals no procedure has been laid down as to how the verdict of the province is to be obtained in favour of or against accession to the one union: but in the letter dated April 2 from the Secretary of Sir Stafford Cripps, addressed to the President of the All-India Muslim League, it is stated that "a province should reach the decision whether or not to stand out of the Union by a vote in the Legislative Assembly on a resolution to stand in.

"If the majority for accession to the Union is less than 60 per cent, the minority will have the right to demand a plebiscite of the adult male population." In this connection it must be emphasised that in the case of the major provinces of Bengal and the Punjab they (the Muslims) are in a minority in the Legislative Assemblies, and in the Assemblies of Sind and the North-West Frontier Province, the total number, namely, 60 and 50 respectively, is so small and the weightage given to the non-Muslims so heavy that it can be easily manipulated and a decision under such conditions cannot be the true criterion of ascertaining the real opinion of the Mussalmans of those provinces.

"As regards the suggested plebiscite in the provinces in which the Mussalmans are in a majority, in the event of the requisite majority not being available in the Legislative Assemblies, the procedure laid down is that reference shall be made to the whole adult population of the provinces and not to the Mussalmans alone, which is to deny them the inherent right, to self-determination.

"(4) With regard to the Indian States, it is the considered opinion of the Committee that it is a matter for them to decide whether to join or not to join or form a union.

"(5) With regard to the treaties to be negotiated between the Crown and the Indian Union or Unions, the proposals do not indicate as to what would happen in case of disagreement...

"(6) With regard to the Interim arrangement, there is no definite proposal except the bare statement that His Majesty's Government desire and invite the effective and immediate participation of the leaders of the principal sections of the Indian people in the councils of their country, of the Commonwealth and of the United Nations. The Committee are, therefore, unable to express their opinion until a complete picture is available.

"Another reason why the Committee are unable to express their opinion on the Interim arrangements for participation in the council of the country, is that Sir Stafford Cripps has made it clear that the scheme goes through as a whole or is rejected as a whole...

"In conclusion, the Committee wish to point out that the position of the Muslim League has been and is that unless the principle of Pakistan scheme, as embodied in the Lahore Resolution of March 1940, which is now the creed of the All-India Muslim League is unequivocally accepted and the right of the Mussalmans to self-determination is conceded by means of a machinery which will reflect the true verdict of Muslim India it is not possible for the Muslim League to accept any proposal or scheme regarding the future."

During 1942-43 the policy of the Muslim League was somewhat negative in character. It made no specific contribution towards the settlement either of the Indo-British question or of the Hindu-Muslim problem. The resolutions of the League and the utterances of its leaders have been in the nature of comments on the actions of other people and response—rather the lack of it—to others' moves.

Not a Sub-Group.—When Mahatma Gandhi on behalf of the Congress evoked the "Quit India" slogan and developed it up to the stage of the A.I.C.C. resolution, the Qaid-e-Azam made a series of public statements repudiating the Mahatma and the Congress and warning his community against the dangers of playing into the hands of the latter. (See *Indian Year Book* of 1945-46).

Commenting on the A.I.C.C. resolution of August 8, 1942, the League leader said it was substantially the same as the resolution of the Congress Working Committee passed in September 1939.

"Muslim India," he declared, "as I have repeatedly said, stand for complete independence of all the peoples of India. But we turned down the proposal of the Congress because the demand for a National Government to be set up immediately would have meant Hindu raj or a Hindu majority Government.

"As to the second item, namely, the right of the people to frame their own constitution, the constituent assembly would have been one of overwhelming majority of Hindus...

"Not only this, but the fundamental principle was also laid down in September, 1939, that the constitution should be on the basis of an All-India Federal Government with units as autonomous as possible...

"This position the Mussalmans could not accept as it clearly meant ruling out of order their demand for Pakistan and would have implied their submission to Hindu raj as a national sub-group, instead of this being a nation in fact...

When the August disturbances broke out he advised the Muslims to keep aloof from the Congress movement. He regretted that the Congress has finally declared war and has launched a most dangerous mass movement in spite of numerous warnings and advices from various individuals, parties and organisations in this country.

READY TO TAKE OFFICE

About a week after the commencement of the disturbances the Working Committee of the League met in Bombay and passed a resolution calling upon the British Government to guarantee to the Muslims the right of self-determination and assure them, without delay, that they would abide by the verdict of a plebiscite of the Muslims in favour of Pakistan and expressing the willingness of the Muslim League to negotiate with any party for the setting up of a provisional government in order to mobilise the resources of India for the defence of the country and the successful prosecution of the war, conditional on the grant of the Muslim demands.

In the winter of 1942 Mr. Rajagopalachari had prolonged talks with the Qaid-e-Azam at Delhi

and, presumably in pursuance of some tentative understanding with the League leader, sought the Viceroy's permission to meet Mahatma Gandhi with a view to eliciting the latter's reactions to his proposals for a Hindu-Muslim settlement. When permission was refused there was widespread criticism of the Government's attitude, and the Qaid-e-Azam too evidently thought that there was no use pursuing that line. He, therefore, turned his attention to securing power for the Muslims in general and the League in particular irrespective of the Congress. Thus almost for the first time in recent years, he called upon the British authorities to start a provisional Government with Muslim support. He had all the while pleaded for the continuance of the *status quo* in the absence of a settlement on the basis of Pakistan, but now he made the demand that settlement or no settlement, the Muslims should not be kept out of power on the plea that the Congress was in prison.

A session of the Muslim League was held at Delhi late in the spring of 1943. The Qaid-e-Azam Jinnah, who presided, made a three-hour speech in the course of which he said:—"Nobody will welcome it more than myself, if Mr. Gandhi is now really willing to come to a settlement with the Muslim League. Let me tell you that will be the greatest day, both for the Hindus and the Muslims. If that is Mr. Gandhi's desire, what is there to prevent him from writing direct to me? Who is there that can prevent him from doing so? (Renewed Cheers). What is the use of going to the Viceroy? Strong as this Government may be in this country, I cannot believe that they will have the daring to stop such a letter, if it is sent to me. It will be a very serious thing indeed, if such a letter were stopped..."

No 'Hindu Rule'.—"When we passed the Lahore resolution, we did not use the word 'Pakistan' at all," the Qaid-e-Azam continued.

"Who gave us this word? (shouts of 'Hindus'). Let me tell you this is their folly... I say to Hindu and British friends, we thank you for giving us one word."

Deprecating talk of some sort of loose Federation, the Qaid-e-Azam declared, "There is no such thing as a loose Federation. When a Central Federal Government is established, it will tighten and tighten until the units are pulverised in the matter of real power and are reduced to the same status as Indian States at present. We are opposed to any such scheme."

After charging Mahatma Gandhi and other Congress leaders with systematic and deliberate attempt to establish Hindu rule in India, the Qaid-e-Azam said "let us close that chapter... I make this appeal to the Hindu public. If your leaders are on this path, as I say they are, and if you do not approve of it, it is your responsibility. The responsibility of the Hindu public, to come forward and say 'stop this internecine war. Declare a truce. Let us sit as two equals and come to a settlement... Why should not the country say: 'Unite and drive the British out?' It is no use appealing to other nations of the world."

The principal resolution of the session ran:—"This session of the All-India Muslim League views with concern and grave apprehension the

failure of the British Government to make an explicit declaration asked for in the resolution passed by the Working Committee of the All-India Muslim League in Bombay on August 20, 1942...

"This session warns the British Government in all earnestness that the imposition of a federal constitution will be resisted by Muslim India with all its might, which will inevitably result in strife, bloodshed and misery, the responsibility of which will rest on the British Government alone.

"This session of the All-India Muslim League is convinced that the attainment of the cherished goal of Pakistan is possible. . .

In response to the Quaide Azam's appeal at the annual session of the League, Mahatma Gandhi a few weeks later wrote a letter to the League leader expressing his willingness to meet him; presumably to discuss with him the Congress-League relationship and Hindu-Muslim question generally. The Government of India refused to forward the letter to the addressee on the ground that it was against their policy to give detenus any facilities for political intercourse. Government intimated to the Quaide Azam that Mahatma Gandhi had addressed a letter to him but that they had decided to withhold it.

COMMITTEE OF ACTION

The year 1943 had two plenary sessions of the Muslim League. In addition to the session at Delhi held in the summer, a session was held in the winter at Karachi. At the Karachi session the Quaide Azam said:—During seven years we have made remarkable progress, and it is admitted by our friends and even by our opponents today. We have shown that not merely to India but to the world, and we have fully established that we are a nation." We shall never rest content until we seize the territories that belong to us and rule over them...

"We have survived the opposition which first came from Government and the bureaucracy when we undertook the reorganisation of the Muslim League. For reasons of their own, that opposition was slackened. Then came a terrific onslaught from the Congress—mass contact and challenges—and when the Congress Ministries were formed. . .

The Quaide Azam asserted that the Hindus were responsible for holding up the progress of the country. He asked: "Can we Mussalmans of India accept Akhand Hindustan, Hindu Raj over the entire sub-continent? Is it possible to expect Muslim India to agree to Akhand Hindustan and Hindu Raj on the continent? This is their proposal. . .

A committee of action consisting of not fewer than five and not more than seven members and with a proper secretariat to organise, co-ordinate and unify the activities of the League was suggested by the Quaide Azam. "It will be the duty of this committee to examine the various suggestions received for the uplift of the Muslims," he said. He appealed for funds to carry on the activities of the League. He said that he appealed nearly two years ago for a sum of Rs. 10,00,000; but so far he had

received only Rs. 5,50,000. With that money at their disposal they could make a beginning. The Quaide Azam also suggested the setting up of an All-India Parliamentary Board—a supreme body to supervise the elections and disputes regarding elections.

A resolution setting up a committee of action was moved by Chaudhury Khaliq-uz-zaman:—

"... This session of the All-India Muslim League hereby resolves to appoint a committee of action of not less than five and not more than seven, to be nominated by the President, to prepare and organise the Mussalmans all over India to meet all contingencies, resist the imposition of All-India Federation or any other constitution for a united India and prepare them for the coming struggle for the achievement of Pakistan."

Letter to Jinnah.—Shortly after the release from jail in May 1944, Mahatma Gandhi released to the press a copy of the letter which he had written to the Quaide Azam from the Aga Khan's Palace. (See chapter on "The Indian National Congress"). In this letter the Mahatma expressed a desire to meet the Quaide Azam to discuss the communal question. The Quaide Azam, who was holidaying in Kashmir, refused to comment on the letter. In about two months time Mr. Rajagopalachari published details of his offer to the Quaide Azam for a settlement on the basis of the concession of the principle of Pakistan (see chapter on "The Indian National Congress"). It aroused a diversity of reaction among Muslims, some of whom thought that the C.R. Formula contained the germs of settlement, while others felt that it did not go far enough to meet the Muslim demand. The majority of the Leaguers, however, thought it best to let the Quaide Azam deal with it.

GANDHI-JINNAH TALKS

The Gandhi-Jinnah talks which were scheduled to take place in August had to be put off owing to the Quaide Azam's ill-health. They actually began in September.

The negotiations lasted full three weeks at the end of which the Quaide Azam made the following statement, at the same time releasing for publication the voluminous correspondence that had passed between him and Mahatma Gandhi during that period.

"Mr. Gandhi from the very commencement of our talks made it clear that he had approached me in his individual capacity and that he represented no one but himself. However, he assured me that he was really open to conviction and conversion to the Muslim League Lahore Resolution of March 1940."

"I regret to say that I have failed in my task of converting Mr. Gandhi."

"We have, therefore, decided to release to the Press the correspondence that has passed between us."

"Nevertheless, we hope that the public will not feel embittered, and be trust that this is not the final end of our effort."

(For the full text of the Gandhi-Jinnah correspondence see the issue of the *Indian Year Book* for 1945-46).

Commenting on the failure, Mahatma Gandhi said at a press conference that it was a matter of deep regret that he and the Quaide Azam could not reach an agreement but there was no cause for disappointment. "The breakdown is only so-called: it is an adjournment *sine die*," he said. "Each one of us must now talk to the public and put our viewpoints before them. If we do so dispassionately, and if the public co-operate, we may reach a solution of the seemingly insoluble at an early date.

"My experience of the precious three weeks confirms me in the view that the presence of the third Power hinders the solution. . . .

To this, the Quaide Azam replied: It is a pity that he thinks that the presence of a third party hinders a solution, and it was very painful to me when he said, "a mind enslaved cannot act as if it was free."

Things drifted for the next few months until the publication of press reports relating to certain secret negotiations between Bhrilabhai Desai, then leader of the Congress in the Central Assembly, and Mr. Liaquat Ali Khan, then Deputy leader of the Muslim League Party in the Central Assembly.

SUCCESS IN ELECTIONS

The next phase of Muslim activity was in connection with the Wavell proposals in the Simla Conference. This, together with the part played by the Muslim League and its leader, were exhaustively dealt with in the chapter on "The Indian National Congress in the issue of *The Indian Year Book*" for 1945-46.

After the breakdown of the Simla Conference the Working Committee of the Muslim League passed a resolution emphasising the urgent need for fresh elections to the Central and Provincial legislatures. The League Committee invited the attention of the Government to the resolution unanimously adopted at the annual session of the All-India Muslim League held in Karachi in December 1943 demanding fresh elections to the Central and Provincial legislatures on the ground that these legislatures were getting out of touch with public opinion and could no longer be said to be representative of the true needs and sentiments of the people. The Committee stressed the urgent necessity of giving effect to the terms of that resolution. The Working Committee was convinced that fresh elections to the Central and Provincial legislatures should no longer be delayed because important questions awaited solution which could only be properly dealt with by representatives in touch with public opinion and the sentiments of the people.

The Muslim League and its leader then carried on a campaign demanding early general elections throughout the country. In August 1945, the Government announced that general elections would be held in the winter of 1945-46 and the spring of 1946.

The Muslim League plunged into the elections heart and soul. In one of his first electioneering speeches the Quaide Azam said: "This is a war that can be fought only with silver bullets", and, after the fashion of Mr. Churchill, "give me those silver bullets and I will finish the job."

He added, "We are determined not to submit to any scheme of an All-India Union, interim or otherwise, and we will resist any attempt to impose such a union upon us. The just and only solution of India's constitutional problem lies in the establishment of Pakistan and Hindustan."

As the elections drew near, the Quaide Azam said that the deadlock in this country was not so much between India and Britain as between the "Hindu Congress" and the Muslim League. The British Government were putting the cart before the horse in proposing an All-India constitution-making-body before a settlement of the Pakistan issue. The League leader also revealed his intention to include Assam in the eastern zone of Pakistan.

The elections to the Central Assembly were a hundred per cent success to the League. Applauding the electors, the Quaide Azam said that the Congress had adopted a cowardly policy and had run away. It didn't dare to put up any Muslim candidate on the Congress ticket, knowing full well that the fate of those candidates would be the same as that of the Nationalist Muslims. Like the central elections, the elections to the Provincial Assemblies were fought on the issue of Pakistan also, in which, except in the Frontier Province and in a few isolated cases in other provinces, the Muslim League scored a signal triumph. In Madras, Bombay, the C.P. and Orissa it secured cent per cent success. In Bihar, Assam and the United Provinces, especially in the last-named, a few non-League Muslims were returned, but the large majority were Leaguers. In Bengal, the heart of what was called Eastern Pakistan, only a couple of non-Leaguers could come in; all the other Muslim seats were captured by the League. At the other end, in the heart of "Western Pakistan", namely the Punjab, the League annexed all the seats except about a dozen which went to supporters of the Unionist Party, which had held sway in the province for about ten years. In Sind, out of a total of 35 Muslim seats, as many as 27 went to the League; of the remaining eight, four went to pro-Congress Muslims and the other four to a group which had cut itself away from the official League. In the Frontier Province, however, the League's hopes failed, for the majority of the Muslim seats went to the Congress. Even here, the League put up a better show than in the previous elections held ten years ago. Thus the League was able to establish its claim to represent the vast majority of the Muslims of India.

LEAGUE MINISTRIES

In terms of Ministries, however, the League did not fare so well. Bengal was the only province in which a League Ministry could be formed without its supporters having to depend on the votes of other groups. In the Frontier of course, the Congress formed the Ministry with the League as the main Opposition party. In the Punjab again, in spite of the fact that the League formed a solid group of 75 in a House of 175, it had to remain in the Opposition a Government having been formed with the aid of a coalition of a dozen non-League Muslims, 30 odd Sikhs and a large number of Hindus. In Sind, a League Ministry was formed by the Governor, but it had a precarious

existence, faced as it was by an opposition of nearly equal strength. Thus, out of the four Muslim majority provinces, there were League Ministries in two, a Congress Ministry in the third and a pro-Congress coalition Ministry in the fourth.

This, the League did not mind because it had already stated it did not think in terms of Ministries. As the Quaide Azam observed on the morrow of the elections, "We have secured a thumping verdict throughout India, the elections showing a clear result of not less than 90 per cent. of the Muslim votes cast in favour of Pakistan." The claim was more or less right in so far it related to the proportion of successful Leaguers returned at the polls. An analysis of the voting figures showed, however, that the pro-League percentage was much lower.

Early in 1946 there was an indication of a big move on the part of Britain finally to settle the Indian political and constitutional question. The British Premier, in March 1946, made the famous declaration announcing the Labour Government's policy and the despatch of a Cabinet Delegation to settle the Indian question on the spot. Commenting on this the Quaide Azam said: "The Congress is threatening the British that it will not work the constitution but will use it for the purpose of preparing the people for a final struggle if the British Government did not surrender to the Congress demand for immediate formation of an All-India federal constitution to be framed by a constituent assembly. To prevent bloodshed a bribe is offered to the British of a flourishing trade in India, in common with the Indian capitalists. If they make peace with the Congress. This is a dream, for they fail to take into account that there are one hundred million Muslims and that there is a powerful mass organisation, the All-India Muslim League, which cannot remain a spectator."

The weeks that followed the arrival of the British Cabinet Mission was a period in which the Quaide Azam went all out to sustain his Pakistan claim. He went to the extent of telling the Sikhs that they as a nation were entitled to a State of their own and that he was not opposed to it as such provided they showed where it could be created.

The Quaide Azam saw no room for the Muslims to compromise on the issue of Pakistan, which, he said, was the question of their very existence. Asked by an interviewer if this statement inferred a loyalty to the community before loyalty to the country, he replied: "There is no country in that sense. I do not regard myself as an Indian. India is a State of nationalities, including two major nations, and all we claim is a distinct sovereign State for our nation, Pakistan." He admitted that 25 million Muslims would be excluded from Pakistan as minorities in Hindustan, but he thought that they could not help that in any case. Under Pakistan, they would be better off, because it was fortunate that there would be a corresponding minority of 25 million Hindus in Pakistan.

MUSLIM LEAGUE CONVENTION

Early in April, while the British Cabinet Mission was sojourning in Delhi, the Quaide

Azam convened an All-India Muslim Legislators' Convention, attended by about 360 members of the various provincial legislatures. Addressing the Convention, the League President said, "We are prepared to sacrifice anything and everything, but we shall not submit to any government formed without our consent. This Convention is going to lay down once for all, in unequivocal terms, what we stand for. We stand unanimously for Pakistan. We shall fight and die for it, if necessary: achieve it we must, or we perish."

Commending the resolution to the Convention, Mr. H. S. Suhrawardy, Premier of Bengal, made a speech which was evidently meant for the ears of the British Cabinet Mission. He said: "Britain was ready to part with power . . ."

The Congress was stating: "Hand over power to us. We shall sweep all opposition. We shall suppress the Muslims. We shall bring the scheduled castes to the heel and we shall annihilate the Adibasis. Give us the police, your army and arms and we shall reproduce an armageddon in the name of a united India." This I call insanity induced by the lust for power. The Cabinet Mission is not so blind as to trust the destinies of India to this gang. Is Pakistan our last demand?" he asked, and replied: "I will not attempt to give an answer. But that is our latest demand."

Khan Abdul Qayyum Khan (N.-W.F.P.) said that if "Quit India" meant that the British should quit there and then and leave the Hindus and Muslims to decide the question among themselves, then on behalf of 100 million Muslims he would ask the British to quit. But what puzzled him was that the Congress wanted the British to stay for a sufficiently long period so that they could consolidate their position with British bayonets. "It cannot happen" he said, adding: "Thank God, we have one flag, one leader, one platform and one ideal—Pakistan—to fight for. We are only waiting for the final order to do whatever is considered necessary for the attainment of Pakistan."

Mr Shaikat Hyat Khan (Punjab) claimed that he represented the martial class in the Punjab and that they were eager to join the struggle for Pakistan. Sir Firoz Khan Noon declared: "If the Hindus give us Pakistan they will be our best friends. If the British give us Pakistan, then they will be our friends. But if neither give us Pakistan, then Russia will give it to us."

Winding up the Convention session, the Quaide Azam said that the august and historic Convention of the Muslim nation had declared itself for Pakistan. "While we hope for the best," he said, "we are prepared for the worst."

TWO ASSEMBLIES

The following resolution was unanimously adopted by the Convention:—

"Whereas in this vast sub-continent of India hundred million Muslims are the adherents of a faith which regulates every department of their life (educational, social, economic and political), whose code is not confined merely

to spiritual doctrines and tenets or rituals and ceremonies, and which stands in sharp contrast to the exclusive nature of Hindu Dharma and philosophy, which has fostered and maintained for thousands of years a rigid caste system. . . .

"Whereas soon after the introduction by the British of the policy of setting up political institutions in India on the lines of Western democracies based on majority rule, which meant that the majority of one nation or society could impose its will on the majority of the other nation or society in spite of their opposition, as was amply demonstrated during the two and a half years' regime of Congress Governments in the Hindu majority provinces under the Government of India Act, 1935. . . .

"Whereas the Muslims are convinced that with a view to saving Muslim India from the domination of the Hindus, and in order to afford them full scope to develop themselves according to their genius, it is necessary to constitute a sovereign independent State comprising Bengal and Assam in the north-east zone and the Punjab, the North-West Frontier Province, Sind and Baluchistan in the north-west zone;

"This Convention of the Muslim League legislators of India, Central and Provincial, after careful consideration hereby declares that the Muslim nation will never submit to any constitution for a united India and will never participate in any single constitution-making machinery set up for the purpose. . . .

"First that the zones comprising Bengal and Assam in the north-east and the Punjab, the North-West Frontier Province, Sind and Baluchistan in the north-west of India, namely, Pakistan zones where the Muslims are a dominant majority, be constituted into a sovereign independent State and that an unequivocal undertaking be given to implement the establishment of Pakistan without delay.

"Second, that two separate constitution-making bodies be set up by peoples of Pakistan

and Hindustan for the purpose of framing their respective constitutions.

"Third, that the minorities in Pakistan and Hindustan be provided with safeguards on the lines of the All-India Muslim League resolution passed on March 23, 1940, at Lahore.

"Fourth, that the acceptance of the Muslim League demand of Pakistan and its implementation without delay are the *sine qua non* for the Muslim League co-operation and participation in the formation of an Interim Government at the Centre.

"This Convention further emphatically declares that any attempt to impose a constitution on a united India basis or to force any Interim arrangement at the Centre contrary to the Muslim League demand will leave the Muslims no alternative but to resist such imposition by all possible means for their survival and national existence."

A SOLEMN PLEDGE

All the participants in the Convention took the following pledge:

"I do hereby solemnly declare my firm conviction that the safety and security, and the salvation and destiny of the Muslim nation inhabiting the sub-continent of India lie only in the achievement of Pakistan, which is the one equitable, honourable and just solution of the constitutional problem and which will bring peace, freedom and prosperity to the various nationalities and communities of this great sub-continent. I most solemnly affirm that I shall willingly and unflinchingly carry out all the directions and instructions which may be issued by the All-India Muslim League in pursuance of any movement launched by it for the attainment of the cherished national goal of Pakistan, and, believing as I do in the rightness and the justice of my cause, I pledge myself to undergo any danger, trial or sacrifice which may be demanded of me."

The Muslim League's negotiations with the Cabinet Mission are dealt with in the Chapter "British Cabinet Delegation", which relates to the period from April to October 1946.

INTERIM GOVERNMENT

THE Muslim League was in no mood to be reconciled to the interim arrangement at the Centre and, in pursuance of the Lahore resolution of 1940 on Pakistan, began to intensify its agitation in favour of the partition of India based on the two-nation theory. It had reason to congratulate itself when due to this agitation and more to the communal frenzy and blood orgy that swept the land, the seven-year-old demand was at last granted by H. M. Government's plan of June 3, 1947.

In November 1946 the Quaide Azam, in a statement at an interview given jointly to foreign press correspondents in New Delhi, cautioned the Muslims that retaliation or vengeance in the Muslim majority provinces for what had happened in Bihar and what was happening in other parts of India would be "a terrible catastrophe and a blunder on our part both morally and politically and we shall only be playing into the hands of our enemies."

Later he declared that the Interim Government should not be allowed to do anything administratively or by Convention which would in any way prejudice or militate against the problems of the future constitution of India, and that the Muslims would certainly resist any attempt which directly or indirectly prejudiced or militated against their demand of Pakistan. He added that the only solution of the Indian problem was the division of British India into Pakistan and Hindustan, whose constitutions should be drawn up by two Constituent Assemblies.

In a letter to the Viceroy dated November 17, 1946, the Quaide Azam asked for the postponement of the Constituent Assembly *sine die*. He also contested the claims of the Congress that it had accepted the Statement of May 16. After referring to the disturbances in Bihar, he said that all energy should be concentrated upon restoring peace and order in the country. These

points were contained in his reply to the letter from the Viceroy dated November 5, 1946, in which the Viceroy hoped that the Quaide Azam would arrange to summon the League Council with a view to their accepting the State Paper.

Further to this the Quaide Azam in a statement later said categorically that no representative of the Muslim League would participate in the Constituent Assembly and that the Bombay resolution of the Muslim League Council, passed on July 29, 1946, stood in its entirety. The statement read: "I deeply regret that the Viceroy and His Majesty's Government have decided to summon the Constituent Assembly on December 9. In my opinion, it is one more blunder of a very grave and serious character. It is quite obvious that the Viceroy is blind to the present serious situation and the realities facing him and is entirely playing into the hands of the Congress and is appeasing them in complete disregard of the Muslim League and other organisations and elements in the national life of the country."

He followed this up by saying a few days later that it would be sheer recklessness and folly to go on with the Constituent Assembly specially in the "terribly explosive" atmosphere that had been created by the wholesale massacres in the different parts of the country. He regretted that Congress leaders at the Meerut Congress Session had done their best to add more fuel to the fire.

While in London, in December 1946, to get the British Government's clarification on the grouping issue, the Quaide Azam in a broadcast to the United States, said: "The sooner Britain declared its intention of giving effect to Pakistan the better would be the chance of avoiding a terrible disaster."

Referring to the Punjab arrests and the ban on the Muslim National Guards in the province at the end of January 1947, he said: "The repercussions of this one more wide and inimical action against the Muslim League on the part of the Punjab Government will be terrific all over Muslim India, and I appeal to the Viceroy immediately to intervene and save the situation which otherwise may take a very serious turn for which the entire responsibility would vest with the Viceroy and His Majesty's Government."

"DISSOLVE CONSTITUENT ASSEMBLY"

On January 29, the All-India Muslim League Working Committee met at the old Government House at Karachi under the Chairmanship of the Quaide Azam, President, to consider and decide whether a definite change in the Indian political situation had taken place since the last meeting of the League Council, as a result of the British Government's Statement of December 6 on grouping and the subsequent Congress decision, to warrant the convening of the Council to revoke its original decision to enter the Constituent Assembly. In a lengthy resolution the Working Committee not only refused to summon its Council which on July 29, 1946, withdrew the League's acceptance of the Cabinet Mission's plan but also called upon his Majesty's Govern-

ment of the rejection by the Congress of the British Government's Statement of December 6. The resolution, which closely followed the views expressed by the Quaide Azam on his return from London, criticised the A. I. C. C. resolution as nothing more than "a dishonest trick and jugglery of words by which the Congress had again attempted to deceive the British Government, the Muslim League and the public opinion in general". The resolution further asserted that Congress, having thus rejected "the final appeal of His Majesty's Government" by its action in the Constituent Assembly converting it into a body of its own conception, had destroyed all fundamentals of the Statement of May 16, and every possibility of a compromise. The resolution on republic passed by the Constituent Assembly was illegal and *ultra vires* as it went beyond the limited powers and terms of the plan. By the appointment of a number of committees the method of procedure of framing the new constitution had been destroyed. The League, therefore, expressed the opinion that the Constituent Assembly should be forthwith dissolved.

A few days later the Working Committee urged on the Governors in Bombay, Madras, Central Provinces, Bihar, the United Provinces and Assam to use their special powers for safeguarding Muslim minority interests after declaring that the Congress ministries in those provinces had failed to protect the Muslim population. "The great Bihar mass slaughter," said another resolution, "expressed the utter failure of the Congress Government to give protection to Muslims", and the Committee demanded the immediate appointment of impartial judicial tribunals of the highest order to investigate the matter. The External Affairs Department of the Government of India was censured by the Committee for imposing a fine on Frontier tribesmen of Rs. 75,000 in cash. Expressing grave concern over Punjab developments the Committee, in another resolution charged the Government of that province with resorting to "Fascist methods" of "garging public opinion and prosecuting political opponents."

The Quaide Azam addressing a group of Bihar Muslims in their refugee camp, repeated emphatically an old demand by saying that the Muslim League would not "yield an inch" in their demand for Pakistan.

AGITATION IN N.-W. F. P.

After the resignation of the Punjab Ministry early in March, Quaide Azam appealed for complete unity among Muslims. "If we establish complete unity, co-operation and harmony among ourselves" he declared, "it will not be difficult to settle with other communities or parties and the British Government." He said that he hoped that the Punjab example would soon be followed by Dr. Khan Sahib.

At the end of the same month, calling for a truce on the basis of Pakistan, the Quaide Azam declared, "It is better to divide India and flourish than to fight for a united India and des-

in exchange of population which should be carried out only by the Governments concerned namely, Hindustan and Pakistan.

In April the Quaide Azam saw the Viceroy in connection with the political talks initiated by the latter. The conversations, beyond being "friendly and informal", had no results.

The same month Pandit Jawaharlal Nehru, inaugurating the United Provinces Political Conference at Mhow, indicating the pressure which India felt on the insistent Muslim demand, declared that those who demanded Pakistan could have it, but on condition that they did not coerce other unwilling parts of India to join Pakistan. Denouncing this demand for a partition of Bengal and the Punjab as "a sinister move actuated by spite and bitterness," the Quaide Azam in a statement later said: "I do hope that neither the Viceroy nor His Majesty's Government will fall into this trap and commit a grave error." He reiterated his demand for the creation of a Muslim national state consisting of six provinces.

The problem of the North-West Frontier Province was one of the most important aspects of the demand for Pakistan. When he declared that he was unable to disagree with the decision of the Frontier League leaders taken on May 1 not to call off the movement against the Khan Sahib Ministry, the Quaide Azam, in a lengthy statement issued a few days later, made a fervent appeal to all Muslims particularly leaders to do everything in their power to remain peaceful. The League movement in the Frontier, he said, was started because the people, and especially the Muslim Leaguers and the League organisation in the province had been sought to be crushed by the Khan Sahib Ministry by "fair means or foul" ever since the Ministry was formed at the end of June. The resolution of the Frontier Congress demanding a free Pathan State of Paktoons was condemned by the Quaide Azam as a direct breach of the acceptance by the Congress of His Majesty's Government's plan of June 3. He said: "I want the Muslims of the Frontier to understand that they are Muslims first and Pathans afterwards and that the province will meet with a disastrous fate if it does not join the Pakistan Constituent Assembly. A month later he appealed "to all the different elements in the Frontier Province and the tribal areas to forget past disputes and differences and join in this with the Government of Pakistan in setting up a truly democratic Islamic State. He assured the tribesmen that Pakistan would like to continue agreements and allowances until new agreements were negotiated. This statement was issued after the referendum in the North-West Frontier Province had shown that an absolute majority of the Pathans was desirous of joining Pakistan.

FUTURE POLICY

In a series of answers given by the Quaide Azam to Reuter's correspondent in New Delhi in response to questions put by him relating to Hindustan and Pakistan, the Muslim leader outlined the nature and content of the Pakistan demand:—

The relationship between Pakistan and Hindustan should be friendly and reciprocal for the mutual interests of both.

All the armed forces must be divided completely and an alliance pact or treaty between Pakistan and Hindustan in the mutual interests of both and against any aggressive outsider was envisaged.

As to a federation of Pakistan States, even if there was to be partition of Bengal and Punjab, such a move would have disastrous results, the caste Hindus being the greatest sufferers under such a scheme.

As regards the Muslim attitude towards the Indian States, the policy was and would be not to interfere with them with regard to their internal affairs.

While Muslims expected as rapid a progress in the various States towards the establishment of full responsible Government, it was primarily the concern of the ruler and his people.

The theory of Pan-Islamism was discredited but the Muslims would certainly establish friendly relations and co-operate for the mutual good and world peace and would always stretch out their hand of friendship to the Near and Middle East and the Far East.

The minorities in Pakistan would be citizens of Pakistan and enjoy all rights, privileges and obligations of citizenship without any distinction of caste, creed or sect and would be treated justly and fairly.

On June 9, 1947 the Muslim League accepted the British Government's scheme of June 3 "as a compromise." The League leader commended the resolution placed before the Council of the All-India Muslim League accepting the scheme.

Answering the doubts and misgivings of Muslims from Hindu majority areas, the Quaide Azam was reported to have assured them that they need have no fears on the score of protection of their interests.

The Quaide Azam issued a statement on the Muslim League attitude towards the States at the end of July. The League, he declared, had no intention of coercing any State into adopting any particular course of action. The League recognized the right of each State to choose its destiny.

CHANGE OF OUTLOOK

On August 15, 1947, on the declaration of Indian Independence, Mr. Jinnah became the Governor-General of Pakistan with the title of Quaide Azam.

Consequent on the partition of the country, the future of the Muslim League and the future of Muslims in India began to exercise the minds of the Muslim community. In November a final decision was taken.

Addressing the conference of Muslim leaders of the Indian Union that he had convened at Calcutta, Mr. H. S. Suhrawardy, ex-Premier of Bengal, said: "This shall be the main spring of our policy: 'we shall serve our country' (meaning India). He added: "Clearly unequivocally, and without fear, with our hand on our hearts, we can declare that we are loyal citizens of the State and shall remain so expecting that the State will guarantee us our rights and will not take advantage of our loyalty to destroy our culture, and will not consider that any attempt that we may make to look after our interests is an act of disloyalty. We, therefore, will never be

anti-national and whatever we do, whatever organisation we may join, we shall serve our country."

"We pledge our support to the Government of Pandit Jawaharlal Nehru, not merely lip support, but true and loyal support, not merely because he is the head of the State, but because in him we have found a true man of outstanding and mighty stature, whose great moral qualities compel admiration and loyalty."

"To Mahatma Gandhi, we offer our homage and our tribute. He has proved himself to be one shining light in a darkening world, and may his efforts in the cause of peace and unity pierce the gloom of our hearts and establish the glorious reign of mutual friendship, goodwill, toleration and co-operation."

Mr. Suhrawardy emphasised that the Muslims of India must strive for peace and unity, peace within the State, co-operation between the two Dominions of India and Pakistan, and unity amongst the communities of each Dominion based on the realisation that they were all citizens of the State in which they lived and to which they owed unstinted allegiance.

Referring to the two-nation theory, Mr. Suhrawardy said that with the division of India they had made a clean sweep of it.

The conference adopted a resolution urging both the Governments of India and Pakistan to make an early and affirmative declaration that they renounced war for all time and were resolved to settle their differences by all peaceful methods. One of the 18 resolutions passed at the conference, which was attended by 200 leaders, expressed the view that the solidarity of Muslims should not be impaired so that Muslims as a whole might be enabled to establish neighbourly and friendly relations with the non-Muslim co-citizens and co-operate with them for the welfare and prosperity of the State to which they belonged as well as to safeguard their rights and liberties adequately. The conference called upon the Governments of India and Pakistan to adopt a common policy regarding the States.

NON-LEAGUE MUSLIMS

A conference of West Bengal Muslims held simultaneously at Calcutta issued a call to the Muslims of India to join the Indian National Congress to make that organisation strong, to keep reactionary forces down and ensure real service to the masses. The conference called upon all Indian Muslims to follow the lead given by the conference called by Maulana Abul Kalam Azad to meet in Delhi. It characterised as disruptive the move of Mr. H. S. Suhrawardy in calling a conference in view of his past political activities. The conference also expressed the opinion that the Muslim League demand for Pakistan based "on the false and fantastic two-nation theory" had resulted in the division of the country and was solely responsible for "the unparalleled calamities and immeasurable sufferings" that had befallen the country and its people. It urged all Indian Muslims to thoroughly dissociate themselves from the League forthwith, abjure the two-nation theory, which, it said, was fraught with even greater potential dangers and unequivocally affirm sincere, true and faithful allegiance to India.

By another resolution the conference endorsed the policy enunciated by Pandit Jawaharlal Nehru of leaving the choice in the matter of accession to the people of the Indian States. The Conference congratulated the Government of India on taking prompt steps in aid of Kashmir. It also deplored this attitude of Pakistan and the statements of responsible authorities in that State.

The Conference expressed its confidence in the activities of the Jamiat-ul-Ulema-i-Hind and said that it was the only competent body to guide Muslims in all Islamic matters.

Dr. R. Ahmed, in his presidential speech, appealed to Indian Muslims to discard the two-nation theory and join hands with progressive forces to build a truly democratic State.

MAULANA AZAD'S LEAD

A third convention of the Indian Muslims which met at New Delhi at the same time and at the invitation of Maulana Abul Kalam Azad, Education Minister, passed a resolution advising Muslims in the Indian Union "to wind up the Muslim League and all other communal and political organisations and join the Indian National Congress which stands for unity, democracy and progress."

Addressing the convention, Maulana Azad said that for the past ten years the Muslim League had been spreading "poison" among the Muslims and leading them on a long and dangerous path. The tremendous task before those who had come to attend the convention was to remove the evil effects of that propaganda.

Maulana Azad said he did not favour the idea of forming a new Muslim organisation to lead the Indian Muslims towards nationalism. It was agreed that the Muslims of India should join the Indian National Congress and that left no room for any new communal or political party.

India stood on the cross roads, declared the Maulana. The people of India must decide once for all whether they were going the way of communalism or nationalism and also whether they wanted democracy or Fascism. The people must make their irrevocable choice. They must cease to think in terms of their own community and work for the good of the entire people as a whole.

Referring to the large gathering of Indian Muslims which was to be held at Lucknow the following month, Maulana Azad emphasised the need of inviting Muslims of all shades of thought, including the Muslim Leaguers to attend that conference.

TWO LEAGUES

The Working Committee of the All-India Muslim League which met at Karachi in mid-December at the residence of the Governor-General of Pakistan, Quaide Azam presiding, took a momentous decision "to split the organisation into two—one for the Indian Union and the other for Pakistan. The decision was designed to enable the Indian Muslims to reorganise Muslims under a new leadership and shape their destiny independently in the Indian Union."

The Committee also approved of two other resolutions, one concerning the partition of Palestine and the other sympathising with the Muslims in their sufferings owing to the communal disturbances in the other Dominion.

The All-India Muslim League Council which soon followed, Quaide Azam Jinnah presiding, took the historic decision on the fate of the 50-year-old political organisation. Reminding the Indian Muslims that even a small minority, properly organised, could become effective and powerful, Quaide Azam Jinnah, in the course of his address to the Council, was stated to have urged them to reorganise themselves under correct leadership and was believed to have advised them not to feel demoralised. He asked them to work for the State in which they lived but, at the same time to safeguard their interests by unity and discipline.

After reviewing the disturbances in both the Dominions, the Quaide Azam was reported to have expressed the hope that minorities in both the Dominions would be ensured of adequate protection and that as the Pakistan Governor-General he would do his duty.

The Council finally passed the three official resolutions in regard to the provision of a separate League for Indian Muslims, condemnation of disturbances in the Indian sub-continent and the rejection of the United Nations decision to partition Palestine.

The first and main resolution, after paying a glowing tribute to the "superb leadership of Quaide Azam Jinnah in establishing the fifth largest and biggest Muslim State in the world," called upon Muslims and other loyal citizens of Pakistan to make the greatest contribution to build the newborn State as an ideal democratic State based on social justice.

Violence Deplored.—The resolution said: "Now that the Muslims of India and Pakistan can no longer have one and the same political organisation, the Council, therefore, resolves that in place of the All-India Muslim League there will be separate Muslim League organisations for India and Pakistan; that all members of the Muslim League who have ordinarily become residents of the Indian Union or settled therein and all Muslim members of the Indian Union Constituent Assembly League Party do hereby constitute the Council of the Indian Muslim League; that a convener for each be appointed for the Indian and Pakistan League with instruction to convene, at a very early date, meetings of the two respective councils as defined above for the purpose of electing office-bearers, framing the constitution and transacting such other business as has arisen by virtue of this decision; that all primary members of the All-India Muslim League now resident in Pakistan should *ipso facto* become members of the Indian Union Muslim League; that each Council appoint members of a joint *ad hoc* committee for the purpose of deciding how the assets and liabilities of the All-India Muslim League are to be equitably divided.

In the event of a difference of opinion in *ad hoc* committee, the dispute will be finally decided by Quaide Azam Jinnah: that, in case of disputes regarding membership of a Council a written declaration by the existing member of the Council to the effect that he is ordinarily a resident of or has settled in Pakistan or the Indian Union shall be conclusive; that, till such time as the respective Councils meet,

the existing Central Parliamentary Board shall continue to function in accordance with its constitution and rules."

The resolution of the communal situation in India, after reviewing political events since the last meeting of the Council on June 9, "places on record its deep sense of sorrow and its feelings of horror at the widespread acts of organised violence and barbarity which had taken place resulting in the loss of hundreds of thousands of innocent lives, the colossal destruction of property and mass migration of people. The Council also views with grave concern the rising tide of communal antagonism against the Muslim minority in the Indian Union and despite the Congress assurance regarding minorities Muslim life and property continue to be insecure and Muslims are being subjected to various disabilities because they happen to be Muslims."

The resolution on Palestine, after narrating the circumstances in which the U. N. Assembly voted for partition, says: "The Council feels that a decision adopted in such vitiated circumstances cannot be regarded as binding on the Arabs of Palestine or the Arab and Muslim world and, therefore, fully supports the decision of the Arab League not to accept it."

New Convener.—Contrary to expectations, the main resolution on dividing the Muslim League into two parts had a smooth passage. The Pakistan Premier Mr. Liaquat Ali Khan, General Secretary, in the course of his reply took the wind out of the sails of the opposition members who were stated to have been in a majority at the outset.

The Council appointed the Madras Provincial Muslim League President, Mr. Mohamed Ismail as convener of the Indian Union Muslim League Council and Mr. Liaquat Ali Khan for Pakistan. The Indian Muslim League convention was to be held at Madras in about a month's time.

All those who participated in the debate were the "big guns" of Pakistan like Sardar Abdur Rab Nishtar, and Mian Iftikharuddin. Mr. H. S. Suhrawardy was the only prominent Indian Muslim leader who spoke in favour of keeping the League as it was till such time as a complete settlement was reached between India and Pakistan on the question of minorities. He was reported to have suggested the appointment of "observers" from each Dominion to look after the interests of the minorities.

In the course of his concluding remarks, the Quaide Azam thanked the members who had come from far and near to take part in that last session of the All-India Council. In a parting message to Indian Muslims, Quaide Azam Jinnah pointed out that the problems facing Indian Muslims were different from those confronting Pakistan Muslims. They alone were competent to take a decision on their policy and programme, but in doing so, however, they must make a realistic approach to their problem. He added that although the Council had put before them a line of action, it was for them to meet and decide their future at the earliest date. Thereafter, the resolutions were put to vote and passed with only three or four dissidents.

Political Parties in Pakistan

THE Muslim League, the party in power, is the most influential among the existing political parties in the dominion. The other parties are the Congress Party, the recently-formed Peoples Party under the leadership of Khan Abdul Gaffar Khan, the Frontier leader, the All-Pakistan Socialist Party and the Communist Party.

The Pakistan Muslim League was formed as a result of the All-India Muslim League Council being partitioned at the League's last meeting at Karachi early in December, 1947. It was decided then to give freedom to Indian Muslims to reshape their future by reorganising themselves under new leadership. Explaining the significance of this decision, Quaide-Azam Jinnah, President of the Council, said in an interview to the B.B.C. representative in India, Robert Stimson, "Since August 15, the Muslims of Pakistan and Muslims of India have been faced with entirely different problems. That is beyond question. It is only right, therefore, that the Muslims of India should be free to form their own independent policy." The Quaide-Azam added "that it would be impracticable, and indeed improper for a single Muslim organisation to operate in the two dominions." Asked whether the Muslim League of Pakistan would eventually transform itself into a national organisation, open to members of all religious communities, now that the political objective of the Muslim League had been achieved, the Quaide-Azam said: "The time has not yet come for a national organisation of that kind. Public opinion among the Muslims of Pakistan is not yet ready for it. We must not be dazzled by democratic slogans that have no foundation in reality. The Muslims have only just won their own Muslim homeland, and they have still to build a structure that will suit the conditions and developments that will take place. But the decision to form a purely Muslim League organisation in Pakistan is not irrevocable. It may be altered as and when necessary to suit changing conditions. Nothing is static in politics. It all depends upon what progress we make and further developments that may take place."

OBJECT OF LEAGUE

The first session of the Pakistan Muslim League Council held its deliberations at Karachi from February 22 to 25, 1948, Quaide-Azam Jinnah presiding.

The Council adopted its new draft constitution comprising 65 clauses with modifications suggested by a committee appointed during this session for the purpose. The most important aspect of the adopted constitution was that no minister or servant of the Government of Pakistan could become an office-bearer of the Pakistan Muslim League. Exemption in the case of the Pakistan Governor-General, Quaide-Azam Jinnah, who was responsible for building up the League organisation for a decade, was suggested by the Mir of Manki Sharif, who moved the resolution, but the Quaide-Azam made it clear that he could no longer continue as the President of the Muslim League as he had become the head of the State. The Council adopted the resolution and appointed Chaudhri Khalique-Zaman, former leader of the Muslim League in the Indian Union Parliament, as provisional president to carry out the Council's

decisions on implementation of the constitution including holding of fresh elections.

According to the League constitution, the aims and objects of the Pakistan Muslim League shall be: (a) to safeguard the integrity and sovereignty of Pakistan, (b) to safeguard the religious, cultural, social, economic and political interests of Muslims of Pakistan, (c) to promote friendly relations between the Muslims and other communities in Pakistan, (d) to advance the interests of Muslims all over the world and strengthen the solidarity between Pakistan and other Muslim states, (e) to promote the cause of peace, freedom and justice throughout the world, and (f) to do all things that are from time to time deemed necessary or expedient in furtherance of these aims.

THE CONSTITUTION

The organisation will consist of the National Convention of the Pakistan Muslim League, its National Council, Executive, Provincial, District and City Muslim Leagues and branches of the Pakistan Muslim League, if any, outside Pakistan. The Pakistan Muslim League will also maintain a National Parliamentary Board, Provincial Parliamentary Boards, boards for publicity and information, economic affairs, Muslim world collaboration, international peace and freedom of subjects peoples.

As regards membership, it was made definitely clear that one must be a Muslim to become member although the other qualifications that he must be a national of Pakistan and that he must have completed 18 years of age may be waived in favour of a candidate by the National Executive. The President of the Pakistan Muslim League will be elected by the Council, while other office-bearers will be elected by the national convention at its annual session. All office-bearers are eligible for re-election.

The National Council of the Pakistan Muslim League shall consist of 75, 20, 25, 10 and 90 persons nominated respectively by the Punjab, North-West Frontier, Sind, Baluchistan and East Bengal provincial councils; presidents and secretaries of provincial Muslim Leagues; office-bearers of the Pakistan Muslim League; and 20 persons nominated by the President. Members of the Council will hold office for two years and are eligible for re-election. Every member of the Council shall pay in advance an annual subscription of Rs. 12 without paying which he shall not be entitled to attend the meetings. A special meeting of the Council will be convened if the Secretary receives a written requisition signed by 75 members stating the purpose for which the meeting is required to be convened.

Every year, after the election, the President shall nominate 15 members of the National Council, to form the National Executive of the Pakistan Muslim League. There shall be also included five other members by election as ex-officio members.

The National Parliamentary Board, to be annually appointed by the National Executive, will select, in consultation with the Provincial Parliamentary Boards, candidates for the Central Legislature and exercise general control over the Muslim League Party in the Central Legislature. It will also supervise and control the

activities of Provincial Parliamentary Boards and hear and decide finally all appeals against the decisions of Provincial Parliamentary Boards.

The final clause provides that the constitution of the Pakistan Muslim League shall not be added to, amended, altered or cancelled except at a special meeting of the National Council and by at least a two-thirds majority of the members present.

In the course of the budget session of the Pakistan Dominion Parliament, Khan Abdul Gaffar Khan, the Frontier Congress leader and Mr. H. S. Suhrawardy (Muslim League) who is in the anomalous position of being a member of the Pakistan Assembly and citizen of the Indian Union, urged League leaders to convert it into a national organisation. The leader of the House, Mr. Liaquat Ali Khan (the Pakistan Premier) maintained that the Muslim League had bigger tasks before it such as consolidating the Muslim nation, but such persons as shared the views of Khan Abdul Gaffar Khan and Mr. Suhrawardy could organise a party on non-communal lines, if they so desired.

THE CONGRESS PARTY

The next most important party was the Congress which has now been separated from the All-India body. In the beginning the leader of the Opposition, in the Pakistan Constituent Assembly was Mr. Kiran Shankar Roy of East Bengal, who attended the opening session, but later resigned his seat and left for West Bengal to become a Minister there in March 1948. The Deputy leader, Mr. Bhim Sen Sachar, along with his colleagues in the Punjab, also migrated to the East Punjab and became members of the East Punjab Provincial Assembly. Mr. Jai Ramdas Daulatram who was returned to the Pakistan Assembly from Sind also resigned and migrated to the Indian Union and is now the Food Minister in the Government of India.

Even before the partition of India, front-rank Congress leaders from Sind, like Acharya Kripalani and Mr. Jai Ramdas Daulatram had left their native soil in response to the call of All-India politics. The President of the Sind Provincial Congress, Dr. Chhotram Gidwani, followed them immediately after the establishment of Pakistan. Thus Congressmen were left without an influential and popular leader to guide them in their future policy and action. As it was the Congress Party in the Pakistan Assembly is led by Mr. Srischandra Chattopadhyaya of East Bengal. Except in the Parliamentary field, the Congress Party in Pakistan could be said to be in the doldrums.

THE PEOPLES' PARTY

In the first week of March, 1948, a new opposition party materialised under the leadership of Khan Abdul Gaffar Khan, known throughout the sub-continent as "Frontier Gandhi." A draft memorandum issued on behalf of the party explained that the sponsors of this so-called 'Peoples' Party' found it impossible to merge themselves with the Muslim League which, according to them, had outlived its purpose, and hence the need for a non-communal party deriving inspiration from the masses.

The Peoples' Party of Pakistan envisaged that Pakistan should be a union of free Socialist Republics in which poverty, illiteracy and

class domination would be eliminated. A convention of the party met at Karachi on May 9. The sponsors of the party included, apart from the Khan Brothers of the Frontier, Mr. G. M. Syed of Siad, Sheikh Abdul Majid, former Khilafat leader, Mr. Hsammuddin, leader of Ahhrars in Pakistan, Sheikh Zahiruddin, the head of the Momins, Khan Abdul Samad Khan, the Congress leader of Baluchistan and Munshi Ahmed Din, the Punjab Socialist.

Muslim League Press gave a hostile reception to the Peoples' Party which it characterised as a mere branch of the Indian National Congress.

Prominent League leaders who do not agree with the policy and programme of the existing Government have kept aloof from this party, although all of them feel the need for a healthy and constructive opposition wing in the Muslim League itself.

THE LEFT WING

Pakistan's Socialists and Communists met here in February separately but so far they have not succeeded in making their influence felt in the politics of the Dominion. The Pakistan Communist Party which met at the end of February, passed a resolution that the future constitution of Pakistan must be based on adult franchise and suggested that provinces should be reorganised on a linguistic basis with the right of self-determination to the federating units.

THE SCHEDULED CASTES

Scheduled Castes in Pakistan are led by Mr. Jogendra Nath Mandal, Minister for Law and Labour in the Pakistan Government. He belongs to the All-India Scheduled Castes Federation which has a large membership in Eastern Pakistan. The future policy and programme of the party will be drafted at the conference expected to be convened in Karachi in the near future.

Mr. Jogendra Nath Mandal has been fighting for the cause of his community from within the Government. A grant of Rs. 5 lakhs has been made in the first Pakistan budget.

A few weeks after the Establishment of the Pakistan dominion, he protested against exclusion of members of his community from provincial administrations, particularly from the cabinets. He said: "It is a pity that Provincial Governments of Pakistan have not only done precious little but given no indication of doing anything for the amelioration of poor Achuts I and many other Achuts gave our full and active co-operation to the Pakistan movement, even at the risk of our lives, believing that Muslims would be their real friends."

As a result of his representations, the East Bengal Ministry has agreed to include a Scheduled Castes representative in the cabinet.

After partition, an Anglo-Indian Association for Pakistan has also been formed with Mr. C. E. Gibbon, member of the West Punjab Assembly, as the President.

Mr. Gibbon is now engaged in organising various branches in the provinces of Pakistan their strongholds being, Karachi and Lahore. Anglo-Indians are an important element as Pakistan railways are run mainly with Anglo-Indian technical skill. Mr. Gibbon is also on the Pakistan Constituent Assembly committee on fundamental and minorities rights.

The Sikhs

THE Sikh minority of India has been greatly agitated of late over its position, integrity and safety in the future set-up of India. Mostly living in the Punjab, they were, before independence, much concerned about their future in a province where the Muslims were in a majority.

Reconciled to Partition, the Sikhs were, however, not satisfied with the award of the Punjab Boundary Commission.

The following is an account of the Sikh attitude towards India's constitutional problems since the Cripps offer:—

The Sikh All-Parties Committee in a representation to Sir Stafford Cripps declared that the proposals were unacceptable to them because: "instead of maintaining and strengthening the integrity of India, specific provision has been made for separation of provinces and the constitution of Pakistan and the cause of the Sikh community has been lamentably betrayed."

"Why should a province that falls to secure three-fifths majority of its legislature in which a religious community enjoys statutory majority, be allowed to hold a plebiscite and given the benefit of a bare majority. In fairness this right should have been conceded to communities who are in permanent minority in the legislature.

"Further, why could not the population of any area opposed to separation be given the right to record its verdict and to form an autonomous unit? We are sure you know that the Punjab proper extended upto the banks of the Jhelum excluding Jhelum and Multan districts, and the trans-Jhelum area was added by the conquest of Maharaja Ranjit Singh and retained by the British for administrative convenience. It would be altogether unjust to allow extraneous trans-Jhelum population which only accidentally came into the province to dominate the future of the Punjab proper.

"We give below the figures which abundantly prove our contention:—

From the boundary of Delhi to the banks of the Ravi river the population is divided as follows:—Muslims—4,505,000; Sikhs and other non-Muslims—7,948,000.

From the Delhi boundary to the banks of the Jhelum river excluding Multan and Jhang districts:—Muslims—8,238,000; Sikhs and other non-Muslims—9,348,000.

To this may be added the population of the Sikh states of Patiala, Nabha, Jind, Kapurthala and Faridkot, which is about 2,600,000. Of this the Muslims constitute barely 20 per cent. and this reduces the ratio of Muslim population still further.

"We do not wish to labour the point any more. We have lost all hope of receiving any consideration. We shall resist, however, by all possible means separation of the Punjab from the all-India union. We shall never permit our motherland to be at the mercy of those who disown it."

Sikhs and Pakistan.—After the withdrawal of the Cripps' offer the Sikhs were somewhat in the limelight in connection with several proposals, unofficially mooted, to determine the allocation of territories and powers in the event of a compromise between the Muslim League and nationalist India. The virile and compact community of Sikhs, mostly confined to the Punjab, had an important say in regard to the question of Pakistan. With a view to buying over Sikh opposition to Pakistan and thereby strengthening the demand *vis-à-vis* the rest of India, Quaid-e-Azam Jinnah made more than one attempt to reassure the Sikh community and thereby induce them to come under the scheme of Pakistan on the basis of guaranteed safeguards for their interests. At one stage it looked as though a section of the Sikh leadership was favourably inclined towards the Quaid-e-Azam's gesture. Some of them seemed to be impressed with the argument that, whereas in an All-India Federation the Sikh community would be a drop in the ocean, they would not be a negligible factor in Pakistan not only because of their proportion in the population of the Punjab, but also by virtue of statutory guarantees offered to them by the Muslim leader. Eventually, however, the Quaid-e-Azam's overtures were turned down because the bulk of the Sikh community was opposed to Pakistan.

At the same time there began to grow up in the Sikh community a tendency to exclusivism and self-reliance. This was due on the one hand, to the growingly militant Muslim League campaign for Pakistan and, on the other, a feeling that Hindu leadership might not hesitate to sacrifice the Sikhs for a settlement with League on the all-India plane.

The advent of the War and the supply by the martial race of Sikhs of a large number of recruits for the Allied armed forces invested this community with added importance in the eyes of British authority. Thus, for instance, a Sikh leader found a place in the expanded Executive Council of the Governor-General, and, later still, the community was given representation in the Simla Conference called by Lord Wavell to consider his proposals for the establishment of an interim Government at the Centre. Now a Sikh leader holds the Defence portfolio in the National Government.

Whereas the bulk of Sikh opinion continued to be hostile to the idea of partitioning India into Hindustan and Pakistan, there was a small section of opinion which suspected the possibility of the Congress compromising with the Muslim League in its Pakistan demand. This section tended to take the destinies of the community in its own hands and forestall a possible division of the country by entering into advance arrangements with the League in the event of the creation of Pakistan.

The latter school tended to form the Sikh community into a water-tight entity apart not only from the Muslims but also from the Hindus, with whom they have close social and inter-marital relations. The fear that, in its anxiety to reach an all-India political

settlement, the Congress might sacrifice the interests of the Sikhs was exploited by the Akali Group in the Sikh community, which was thus divided into two strong groups, one owing allegiance to the Congress and the other being hostile to that institution. In the general elections held in April 1946, the Akalis captured two-thirds of the number of seats reserved for them in the Punjab legislature, while the Congress got the remaining one-third, although an analysis of the voting figures revealed that the Congress candidates secured the support of nearly half the electorate.

Official Recognition.—In the British Cabinet Mission's proposals the Sikhs were recognized as an important minority like the Muslims but unlike Indian Christians, Anglo-Indians or even Scheduled Castes, who all came under the term "General"; yet the Sikhs were not given the communal veto which was accorded to the Muslims in determining the future constitution. This constituted a sore point with the community whose spokesman wrote to the Secretary of State for India as follows:

"Since the British Cabinet Mission's recommendations for the future constitution of India have been published, a wave of rejection, resentment and indignation has run throughout the Sikh community. The reasons are quite obvious.

"The Sikhs have been entirely thrown at the mercy of the Muslims. Group B comprises the Punjab, the N.-W. F. P., Sind and Baluchistan, and the representation given to each community will be Muslims 23, Hindus nine and Sikhs four. Can anybody expect from this assembly, constituted as it is, any consideration or justice for the Sikhs? The Cabinet Mission recognises 'the very genuine and acute anxiety among the Sikhs lest they should find themselves subjected to a perpetual Muslim majority rule.' If the British Government are not aware of the Sikh feelings, the Sikhs will have to resort to some measures in order to convince everybody concerned of the Sikh anxiety, in case they are subjected to a perpetual Muslim domination. The Cabinet Mission has not only put under Muslim domination the non-Muslim areas of the Punjab and Bengal but the whole province of Assam where the non-Muslims are in overwhelming majority. This is evidently done to placate the Muslims.

"This is how I read the recommendations of the Cabinet Mission. But as the issues are very grave and momentous, the Sikh representatives, assembled here today to consider the situation created, have advised me to seek clarification from you and find out if there is any hope of such amendments as may save the Sikhs from perpetual domination.

Three queries.—So I put three questions:

"(1) What is the significance of recognising the Sikhs as one of the main communities?

"(2) Suppose the majority of Section B frames a constitution under section 19 (v) but the Sikh members do not agree, does it mean deadlock or does the opposition of the Sikh members mean simply disassociation?

"(3) Is there any hope of obtaining for the Sikhs the same right as is given to the Muslims and the Hindus under section 15 (ii) and 19 (vii)?"

The Secretary of State replied:—

"The anxieties of the Sikhs were kept prominently in mind when we were drafting the Cabinet Mission's statement, and I can certainly claim that of the various alternatives open to us the best one from the Sikh point of view was chosen. You will, I am sure, admit that, if India had been divided into two sovereign States, or if the Punjab had been partitioned, either of these decisions would have been far less acceptable to the Sikhs than the one which was actually reached."

"I have considered carefully the detailed points you raise at the end of your letter. I fear the Mission cannot issue any addition to, or interpretation of, the statement. There is, however, no intention whatever to prejudice the position of the Sikhs in the Punjab or in the North-West Group, nor do I think their position has been prejudiced, for, it is inconceivable that either the Constituent Assembly or any future Government of the Punjab will overlook the special place in the province of the Sikhs.

"If you and Sardar Baldev Singh would care to see the Cabinet Mission and the Viceroy in the first week of June, we shall be glad to see you."

Sikh hostility to the Mission's proposals and the fear that they might be placed at the mercy of the Muslims in their own homelands unified the community, with the result that even Congressmen among them had to submit to the will of the majority. Although the Congress, towards the end of June, accepted the long-term proposals of the Mission, the Sikh community, under the leadership of the newly-formed Panthic Board (representative of all Sikh interests) decided not to participate in the proposed Constituent Assembly. The decision was reversed in response to the appeal made by Pandit Nehru to the Congress Sikhs, but was again reversed owing to a misunderstanding caused by Pandit Nehru's instructions. Then followed a series of negotiations between Sikh leaders on the one hand and the Congress and the League on the other. Eventually, the Sikh community decided to withdraw its rejection and to take part in the constitution-making effort on the understanding that the Congress would do everything in its power to safeguard the rights of the Sikhs. As a result of this decision, Sardar Baldev Singh, a leader of the community, was taken on as a member of the Interim Government formed in the Autumn of 1946 and continues to remain as Defence Member in the National Government.

ANXIETY FOR FUTURE

The Sikh concern to safeguard their interests in the future constitution of India was first expressed at the close of 1946 at a meeting of the Prathindhi Panthic Board at Amritsar.

A call to the Sikhs to carry on their struggle till a satisfactory provision was made for their future interests was sent out at a meeting,

Presided over by Bawa Harkishen Singh, President of the Panthic Board, the meeting discussed the position created by Sir Stafford Cripps' statement in Parliament on the British Award of December 3 on the grouping issue and adopted the following resolutions:

"That, as on June 30, 1946, the Secretary of State for India intimated to Master Tara Singh, in reply to his letter dated May 25 that it was not possible for the Cabinet Mission to make any addition to the statement, dated May 16, 1946, or to give an interpretation of that statement, the statement dated December 6, 1946, is not only an interpretation of that statement but makes a substantial addition to that statement. Furthermore, the Prathindhi Panthic Board feels that the statement of December 6 has been made to placate the intransigence of the Muslim League and to the detriment of the minorities especially the Sikhs.

"For the reasons explained above the Panthic Board views with indignation the last statement of His Majesty's Government and calls upon the Sikhs to carry on their struggle till a satisfactory provision for safeguarding their interests is made in the future constitution of India."

In mid-January, Giani Kartar Singh and Sardar Ujjal Singh, Sikh members of the Constituent Assembly, emphatically asserted that the Sikhs would withdraw from the Assembly if they were not conceded the right of communal veto in the Punjab and the North-West group.

On the question of representation of Sikhs on the Minorities Advisory Committee the Sikh delegates demanded equal representation for the major minorities—Sikhs, Depressed Classes, Muslims and Hindus—and urged that the Chairman of the Committee should be a person of the highest integrity like Mahatma Gandhi.

JUNE 3 PLAN

After the publication of H.M.G.'s Plan of June 3, the Sikhs were seriously perturbed. About a fortnight after the announcement of the British Plan Sardar Baldev Singh, according to the President of the Shiromani Akali Dal, wrote to Lord Mountbatten that the Sikhs could not submit to any award which "does not maintain the solidarity of our population and does not consolidate our shrines in East Punjab."

Later, however, Sardar Baldev Singh showed readiness to accept the Boundary Commission's decisions "whatever these may be."

Subsequent utterances of Sikh leaders nevertheless, created the contrary impression that they could not willingly accept the Boundary Commission Award.

At the end of June the Akhali High Command of the Sikhs drafted a charter of eight demands at Amritsar which, in effect asked for the establishment of a separate state of Punjabi-speaking Hindus and Sikhs in Eastern Punjab. Further a secret circular containing these demands is reported to have been sent round to Sikh organisations in the districts which were also advised to collect facts and figures of populations and property.

The Sikh leaders then went on to prepare for action if this became necessary. A month later, large crowds of Sikhs tried to enter Gurudwara

Nankana Sahib at Lahore in defiance of the Magistrate's ban and were dispersed by the police who opened fire. "Jathas" started from Amritsar and many members were arrested. Thousands of persons secretly gathered at the Gurudwara and passed a resolution "not to accept the Award which did not satisfy the just interests of the Sikhs".

BOUNDARY COMMISSION AWARD

At the discussions of the Panthic Board of Sikhs held at Amritsar in the third week of August, two resolutions on the Award of the Boundary Commission were passed. One of them said:

"The award of the Chairman of the Boundary Commission is most unjust to Sikhs. The legitimate claims of the Sikh community have been completely disregarded. The sacred shrines of Nankana Sahib and Kartarpur Sahib have been placed in West Punjab. East Punjab has not been awarded any of the rich colony areas in the Lyallpur, Sheikhupura and Montgomery districts. The integrity and solidarity of the Sikh community have been completely disregarded and even the traditional homeland of Sikhs, the Majha tract, has been cut up. Such an award obviously cannot be acceptable to Sikhs, and they cannot be happy and contented unless this grave injustice is remedied."

In the opinion of the Panthic Board the situation created by the Award might to some extent have been remedied by a scheme of transfer of populations and exchange of property between Muslims and Non-Muslims of the Punjab and the Pakistan areas by a mutually acceptable modification of the boundary in certain places and by making special arrangements for sacred shrines, particularly Nankana Sahib.

The other resolution of the Board appealed to Sikhs to desist from all kinds of violence and endorsed the appeal made by Sikh leaders condemning arson, loot, murder and other crimes.

At a press conference at Jullundur at the end of December Giani Kartar Singh, the Sikh leader declared that the Shiromani Akali Dal would give its fullest co-operation in the establishment of a democratic secular state in India. Disapprove as it did the establishment of a religious state in India, the Dal, he said, did not want any more concessions for the Sikhs than those given to other minorities. The Sikhs did not want separate electorates, but in the matter of reservation of seats generosity, he hoped, would be shown towards them.

Early in January 1948, it was announced that Master Tara Singh, the veteran Akali leader, had resigned from the Working Committee of the newly formed Panthic Durbar of which the Maharaja of Patiala was the chief leader.

While Master Tara Singh had declined to disclose the reasons for this sudden withdrawal of the support which he had lent only the previous month, it was gathered that Sikh public opinion had been gradually swinging in favour of the Shiromani Akali Dal whose President Giani Kartar Singh, had declined the invitation of the Panthic Durbar to join it. He had obtained the verdict of the Akali Dal in this matter, which refused to recognise the leadership of the Maharaja of Patiala in Panthic matters.

DEMAND FOR SAFEGUARDS

The Sikh community spoke with many voices and had many organisations to voice its grievances according to its own inclinations. In the middle of February, Giani Kartar Singh, President of the Shiromani Akali Dal, declared in a statement that the Sikhs would resist any ban on their political organisations. The statement followed press reports that the Akali Party had requested Sardar Patel to give it fifteen days' time to consider voluntary liquidation of the Shiromani Akali Dal. The report, Giani Kartar Singh said was false and baseless.

All the Sikhs, however, were much exercised about the weightage of their community in the future constitution of the country. A number of Sikh organisations in East Punjab sent telegrams to the All-India Congress Committee and the Indian Ministers reminding them of their promises to give special weightage to Sikhs in the future constitution. A few Sikh leaders went to Delhi to present their case before Congress leaders.

In a speech at Jullundur, however, Pandit Nehru definitely told the Sikhs that their demand for weightage could not be conceded. This was a great disappointment to the Sikh community—the worst sufferer from the partition of the Punjab. They found themselves in a minority in East Punjab and without the lever of a third party to keep them in a tactical position.

The Sikh community's representatives on the Minorities Advisory Committee of the Indian Constituent Assembly supported an alternative to weightage canvassed by many Sikh leaders. The plan envisaged cutting off of the predominantly Hindu districts of Rohtak in Gurgaon and parts of Hissar District and the merger of Sikh states in the reduced province.

The proposal was forwarded to the sub-committee charged with consideration of safeguards for the Sikhs. The plan corresponded to the Jath proposals of a new province comprising U.P.'s western districts and East Punjab's eastern districts.

At a press conference Giani Kartar Singh, President of the Shiromani Akali Dal, announced that the Working Committee of the Akali Dal had advised all members of the Panthic Assembly Party, both at the Centre and East Punjab, to join the Congress Assembly parties forthwith. The merger of their Assembly Party, the Akali leader explained, was unconditional.

Master Tara Singh, one of the foremost leaders of the community, however, disapproved of the idea. His attitude constituted a detraction from the Akali decision specially in the light of what he had said at Ludhiana a few days previously: "The Akali Dal will merge in the Congress for six months; it will, however, preserve its individuality and entity of the Panth."

THE women's movement has achieved remarkable progress in the sub-continent during the last twenty years. Women have acquired numerous rights, social and legal, no less than political. And they have acquired them without much trouble.

Today, in the Cabinet of the Union of India, a woman, Rajkumari Amrit Kaur, a former President of the All-India Women's Conference, is a member holding the Health portfolio; Mrs. Sarojini Naidu, another former President of the All-India Women's Conference is the Governor of the United Provinces; Mrs. Vijayalaxmi Pandit, yet another of the ex-Presidents of the All-India Women's Conference, is the Ambassador of India at Moscow, in U.S.S.R. Another leading figure in the women's movement Mrs. Mithan Lam was Sheriff of Bombay.

Three fundamental causes have led to this remarkable success: first, the deep veneration that is given by the Hindu, Islamic and Sikh religions to the feminine aspect of life equally with the masculine. Secondly, the introduction of schemes of reform in Indian government planned to give representative government on a progressively extended scale. Thirdly, the long and strenuous agitation for the vote by women in Britain and America and their recent victories.

Though the Municipal franchise was granted to the women of the Bombay and Madras Presidencies over fifteen years ago it was so limited in numbers that it did not make any large impact on women's consciousness, and indeed no protest was made when it was suddenly withdrawn from Madras women some years later. A unique step has been taken in Bombay city with the adoption of adult franchise. All women, above the age of 21, are qualified to vote for the Bombay Corporation although the percentage of those who voted in the recent general election did not exceed 15. In other Municipalities in that Presidency too, women exercise their vote responsibly and intelligently. Since 1922 scores of women have become Municipal Councillors and members of Local Boards. Their appointment has chiefly been by nomination but there have been notable instances of seats won by election in open contest with men, such as the election of all the four women who first entered the contest for seats in the Bombay Corporation, or the one in which the single woman contestant in the Municipal elections in Lucknow secured the largest poll of any of the candidates. Many important local reforms have been secured by this large band of women councillors, and every year sees a greater number of women serving on these local Councils and Boards.

It was the Home Rule agitation in the years 1914-17 which first made women conscious of their own rights. The interment of one of their own sex, Dr. Besant, stimulated political activity and political self-consciousness amongst women to a very great extent. The moment for giving public expression to their feelings came when the Secretary of State for India arrived in India in 1917 to investigate and study Indian affairs at first-hand.

WOMEN'S DEPUTATION

The first claim for suffrage for Indian women was made in the address presented to Mr. Montagu at the historic All-India Women's Deputation which waited upon him in Madras on the 18th December 1917. The section referring to enfranchisement merits full quotation:

"Our interests, as one half of the people, are directly affected by the demand in the united (Hindu-Muslim Reform) scheme (I. 3) that 'the Members of the Council should be elected directly by the people on as broad a franchise as possible,' and in the Memorandum (3) that 'the franchise should be broadened and extended directly to the people.' We pray that, when such a franchise is being drawn up, women may be recognized as 'people,' and that it may be worded in such terms as will not disqualify our sex, but allow our women the same opportunities of representation as our men. In agreeing with the demand of the abovementioned Memorandum that a full measure of Local Self-Government should be immediately granted, we request that it shall include the representation of our women, a policy that has been admittedly successful for the past twenty years in Local Self-Government elsewhere in the British Empire. The precedent for including women in modern Indian political life has been a marked feature of the Indian National Congress, in which, since its inception, women have voted and been delegates and speakers, and which, his year finds its climax in the election of a woman as its President. Thus the voice of India approves of its women being considered responsible and acknowledged citizens; and we urgently claim that, in the drawing up of all provisions regarding representation, our sex shall not be made a disqualification for the exercise of the franchise or for service in public life."

The year 1918 was devoted to converting the Government forces to the justice and expediency of Indian Woman Suffrage, but this proved a more difficult matter. It was a disappointment first, that, though the Secretary of State had given a sympathetic reply to the All-India Women's Deputation, yet when the Scheme of Reforms, drawn up by him and Lord Chelmsford was published, no mention of women was made though the widening of the electorate was one of the reforms suggested. When the Southborough Franchise Committee was formed to investigate the suggestions regarding the franchise in this Scheme, the women suffragists took every means to bring to the notice of the Committee all the evidence which pointed to the need for, and the country's support of, the inclusion of women in the new franchise.

FRANCHISE GRANTED

After the introduction of the Government of India Bill into Parliament in July 1919, a number of Indian deputations proceeded to London to give evidence before the Joint Select Committee of Members of both Houses of Parliament which had been appointed to place the Reforms on a workable basis. Mrs. Annie Besant, Mrs. Sarojini Naidu and

Miss Herabai Tata were heard by the Committee in support of the extension of the franchise to women in India.

The House of Commons decided that the question was one for Indians to answer for themselves and while retaining the sex disqualification in the Reform Bill they framed the Electoral Rules in such terms that if any Provincial Legislative Council should approve by a resolution in favour of women's franchise, women should be put on the electoral register of that Province. This was the only provision regarding franchise matters which might be changed before a 10 years' time limit. Until after that period women were ineligible for election to Legislative Councils.

Madras led the way in the matter of women's franchise and under the operative provision of the Government of India Act, women were enfranchised. Other provinces followed suit, and at the time of the inquiry by the Simon Commission seven out of the nine provinces had acquired the right. And the women justified the confidence placed in them by sponsoring and successfully carrying through many measures of uplift and reform in regard to the status and influence of women.

REFORMS

During the last twenty years, the women of India have made enormous progress in several directions. A great awakening has come on them. The raising of the age of consent for marriage, the abolition of the practice of dedicating girls to temples, the demand for legal and property rights *vis-à-vis* men embodied in some of the reform measures—all have tended to raise the status of Indian women in their own eyes as well as in the eyes of the world. The national movement evoked an unprecedented outburst of service and sacrifice among Indian women who were thrown into the thick of a political struggle from which they emerged fully conscious of their political rights and responsibilities.

Small wonder, therefore, that the Government of India Act of 1935 gave Indian women political rights far in advance of those enjoyed by them before that date. In terms of number of seats, women were allotted 6 seats out of a total of 150 reserved for British India in the Federal Council of State and 9 out of a total of 250 so reserved in the Federal Assembly. In the Provincial Assemblies, women have reserved to them 8 seats in Madras, 6 in Bombay, 5 in the old undivided Bengal, 6 in the United Provinces, 4 in the old undivided Punjab, 4 in Bihar, 3 in the Central Provinces and Berar, 1 in Assam, 2 in Orissa and 2 in Sind.

In the Dominion Parliament, today, there are ten women members, including a Muslim. Most of these women members take an active part in the proceedings.

Some of the provisions as regards franchise are as follows. Women have been enfranchised who have the property qualification in their own right, or are wives or widows of men so qualified, or are wives of men with a service qualification, or are pensioned widows or mothers of members of the military or police forces, or who possess a

literacy qualification. Women not holding the requisite qualification in their own right are required to apply to be enrolled, stating their derived qualification, but this procedure has been waived in some provinces. Through these means it is estimated more than six million women (against 315,000 under the Act of 1919) have been given the right to vote, compared to 29 million men.

It is noteworthy, too, that men and women can vote both in general constituencies and in special constituencies. Women can vote in and contest elections to the Upper House in provinces where bicameral legislatures have been set up.

Both evidence and result of the awakening among Indian women are to be found in nearly half a dozen legislative measures sponsored by women legislators, notably in the Bombay Assembly, calculated to confer greater rights and freedom on women.

The right of divorce which was unknown to Hindu Law has been secured under certain conditions. In Bombay, antipolygamy and divorce laws have been placed on the Statute Book. During the past 12 months, at least half a dozen Hindu women were able to secure divorce from their husbands in the law courts for bigamy.

ALL-INDIA WOMEN'S CONFERENCE

In the past 20 years Indian women's rights, grievances, and demands have been voiced principally by the All-India Women's Conference.

The All-India Women's Conference came into existence, as a result of the initiative taken by Mrs. Margaret Cousins, towards the end of 1926, the first session of the conference being held at Poona in the first week of January, 1927. In the beginning it was inclined to concentrate its attention on the basic question of women's education. The resolutions passed at the first conference were almost wholly devoted to the different aspects of women's education, the only exception being a resolution condemning child marriage and supporting Sir H. S. Gour's Age of Consent Bill. Even this subject was touched upon only because it was felt that early marriages were a very serious impediment in the progress of girls' education.

Such a narrow programme could not, however, be expected to satisfy the leaders of the women's movement for a long time and it was not surprising that at the third session the scope of the conference was definitely widened to include social reform. Education of women, raising the age of marriage, removal of untouchability and caste restrictions, rural uplift, and reform of the laws of inheritance as affecting women are some of the more important of the subjects in which the conference has interested itself.

A satisfactory feature of the women's movement in India has been the spirit of unity and co-operation behind it. A mere glance at the list of presidents of the All-India Women's Conference—which includes the names of the Maharani of Baroda, the late Begum of Bhopal, Mrs. Sarojini Naidu, Lady R. Nilkanth, Lady Abdul Qadir, Mrs. Faridoonji, the Maharani of Travancore, Mrs. Cousins, Rajkumari Amrit Kaur, Mrs. Rameshwari Nehru, Shrimati Vijayalaxmi Pandit, Shrimati Kamaladevi,

Lady Rama Rau and Shrimati Anasuyabai Kale,—should suffice to show that the Conference has never been affected by differences of caste, community, race or class.

This organisation, it may be noted, has latterly shown a tendency to move beyond the requirements of sectional plea and strayed into wider political activity. It is not, however, difficult to explain this development. The women's movement gained considerable impetus by the part played by and the status accorded to, women in the intensive political movement conducted by Mahatma Gandhi and the Congress since 1920.

The membership of the All-India Women's Conference has risen to nearly 27,000. There are altogether 40 branches and 164 constituent branches. Recording the recent achievements of the conference, the Secretary's latest report stated that a central office for the conference was established; an All-India milk-for-children campaign was launched; agitation was carried on against the employment of women and children in mines; money was collected for the Kasturba National Memorial Fund and a memorandum submitted an evidence tendered before the Hindu Law Committee.

Presiding over the eighteenth session of the All-India Women's Conference held at Hyderabad (Sind) in December 1945, Mrs. Hansa Metha, now a member of the Dominion Parliament at New Delhi; made a comprehensive survey of the problems of Indian women and said: "It is not enough to ask for our rights; we must also understand our responsibilities. Woman is an individual as well as a member of society. She can no longer lead the life of a parasite, but must contribute her mite to the common good of society. We may soon be called upon to help in the work of national reconstruction, especially in the fields of education and health."

LATEST SESSION

Speaking at the twentieth session of the All-India Women's Conference, Lady Rama Rau, referred, with legitimate pride, to the recognition of the work of the women's organisations in India not only by the people in this country but by the leading organisations of the world. She also referred to the recognition, the Conference had received from the United Nations Organisation and stated: "This is the first time that a national organisation like ours has been so honoured."

Delegates from several parts of the world, including the United Kingdom, France, Sweden, U.S.A., China and Indonesia were present. They all conveyed the greetings of their countries to the Conference.

Presiding over the Conference, Mrs. Anasuyabai Kale stressed the need for a Ministry of Social Affairs at the Centre and in the Provinces. "The importance of social problems has been overlooked in our fight for political freedom, she observed. "It is essential now," she pointed out, "that we should co-ordinate the two if we wish to achieve our goal of social justice and equality. No country can make headway even politically unless and until social disabilities are removed. For this purpose, I humbly suggest the establishment of a Ministry of Social Affairs both at the Centre and in the Provinces. It will be the function of this Ministry to frame a new Manusmriti to govern social relations

of all the subjects of the State to remove social injustice and to regulate the population according to the needs of the country. We must remember that we have to do all this immediately as there is a danger of a third world war."

The President made an appropriate reference to the services of Mahatma Gandhi. The All-India Women's Conference, she remarked, had reasons to be grateful to the Mahatma, for, it was he who inspired the womanhood of India to take its full share in the national struggle. The fearless part played by thousands of Indian women in our heroic struggle was an eloquent testimony to the influence of Mahatma Gandhi.

Mrs. Kale regretted the upheaval in the Punjab which resulted in the killing of thousands of people and abduction of innocent women and children, of forced conversions and exodus of thousands of families. She said: "The refugees have to be accommodated and provided for. After all, they are the victims of our political negotiations and therefore, we are in duty bound to see that they are helped to settle down. We can take upon ourselves the welfare work amongst them. We, women, have a great deal to do in this sphere."

The President went on: "I am aware that Government are faced with many important problems at the present moment. Our economy has been temporarily upset due to the partitioning and the influx of refugees. To raise the standard of living Government are devising plans for the industrialisation of the country. To achieve this end, huge schemes of electrification are on the anvil. But I have to invite the attention of Government to one more important problem which cuts at the very root of all, and that is the alarming increase of population. No less a person than Sir M. Visvesvaraya has sounded a note of warning. He says that unless and until we regulate this abnormal increase by artificial means the economy of the whole country will collapse."

The President expressed satisfaction, that the important portfolio of Health had been entrusted to an ex-President of the Conference, Rajkumari Amrit Kaur, who had already made a useful beginning by putting the Nurses Council Bill on the statute book.

Several resolutions were passed by the Conference. One resolution acclaimed the attainment of freedom by the people of India under the inspiration and leadership of Mahatma Gandhi. Another resolution declared the determination of the Conference to make its fullest contribution to the fulfilment of the firm and solemn resolve, embodied in India's Charter of Freedom, to proclaim India as an independent sovereign republic.

The Conference strongly condemned the deliberate incitement to communal hatred which had resulted in inhuman atrocities, forced conversions and abduction of women and children in several parts of the country, and called upon the members of branches to give their fullest support to all organised efforts for their recovery and rehabilitation.

The headquarters of the World Health Organisation, it was urged in another resolution, should be located in India and member States of the United Nations were asked to support the demand.

By yet another resolution, the Conference appealed to the Government of India to revise the Hindu Code and to this end, it directed the Standing Committee of the Conference to appoint a deputation to wait on the Prime Minister, Pandit Jawaharlal Nehru. The Conference also appealed to all the States to adopt the draft revision of the Hindu Code as embodied in the recommendations of the Rau Committee.

Other resolutions adopted by the Conference include: the need for implementing on a nation-wide scale schemes for the immediate introduction of compulsory and free basic education; the adoption of films as a medium of instruction; the compulsory study of ethics, civics and physical training in all schools and the need of imparting sex education to boys and girls in high schools.

A notable contribution to the proceedings was the speech made by Rajkumari Amrit Kaur. She appealed to the women in the country to work ceaselessly for the establishment of communal concord, which, at present, was disturbed on account of the partition. "Unity," she declared, "can be re-established only by women, as they are by instinct and temperament best fitted for the task. Let us be disheartened by what has happened, let us build our future with a new hope."

Following this an appeal was made by the leaders of the women's movement in both the Dominions, headed by Lady Mountbatten, Miss Fatima Jinnah and Mrs. Sarojini Naidu for the rescue of women and children. This appeal has had some effect already.

Kasturba Fund.—The work in connection with the emancipation of Indian womanhood and the improvement of the lot of Indian women, particularly in rural areas, obtained an enormous stimulus in 1944-45, thanks to the Kasturba Memorial Fund created for the commemoration of Mrs. Gandhi who died under detention in February 1944. At Mahatma Gandhi's request the trustees of the fund used the money for the establishment of a countrywide organisation to improve the lot of Indian women, especially in villages. Attempts have been to provide opportunities for Indian women to secure education, acquire knowledge of basic sanitary and hygienic lines and to become alive to their social and political rights. An essential part of the plan is to equip rural areas with up-to-date maternity hospitals and clinics. In order to fulfil this ambitious project a large number of women were trained in special camps so that after adequate equipment they have scattered themselves throughout the length and breadth of the land to carry the message of women's uplift to every corner of rural India. At these training camps instruction was given in first-aid and home nursing, child welfare, village nursing, health visits, rural sanitation, balanced diet and cheap remedies. The object of these training camps was the raising of an army of experts called "Gram Sevikas" (servants of the village).

Women in Mines.—The keen awareness which the leaders of the women's movement in India developed in regard to practices affecting women is illustrated by the repeated protests registered by them against the lifting of the ban on the employment of women in

mines. These protests found an echo in Parliament when the Cabinet spokesman made apologetic references to the need for ensuring adequate supplies for coal for war purposes and promised to secure a revision of the position at an early date. The ban on the employment of Women underground in coal mines was reimposed in February 1946.

HINDU LAW REFORM

As the result of increasing consciousness on the part of Indian women of their social and political status, there has in recent years been a move to revise and codify the somewhat vague and contradictory law governing the Hindu home, especially as it affects marriage, divorce, succession to property, etc. In 1937 the Legislature enacted the Hindu Women's Rights to Property Act. Four years later, the Government of India set up a Committee to overhaul and codify the Hindu Law. This Committee, which is known as the Rau Committee, drafted two bills dealing with Hindu intestate succession and Hindu marriage. When the measures came up for consideration by the two Houses of the Central Legislature, a joint committee of the two Houses recommended the revival of the Rau Committee with a view to the codification of the entire Hindu Law. Consequently the Rau Committee was revived early in 1944. During 1944-45, the Committee made a tour of the country and elicited public opinion on the proposals embodied in the two measures and on the codification of the Hindu Law as a whole. They gathered evidence from leading lawyers and representative organisations of various shades of Hindu opinion on a draft Hindu Code prepared by them.

The draft code is divided into six parts dealing with intestate and testamentary successions and matters arising therefrom, including maintenance; marriage and divorce; minority and guardianship; and adoption. In an explanatory statement the Committee say that it is generally felt that the evils of piecemeal legislation on the subject should be avoided and that an entire code acceptable to the general Hindu public should be formulated.

Divorce.—According to the proposed changes daughters are allowed a share—hitherto denied them—in property left by their fathers. Both wives and daughters are given absolute control of their inheritance. Marriages are divided into two classes, sacramental marriage and civil marriage. Either can be performed only when there is no other spouse living, thereby enforcing monogamy. Divorce is a new feature sought to be introduced by the draft code, although the grounds on which dissolution of marriage can be sought are limited; but equal rights in this behalf are given to husband and wife.

Although at the outset, there was a volume of opposition to some of the recommendations of the Rau Committee, the country has now recognised the need for advance as can be seen by the provision contained in the constitution of the Democratic Republic of India within the next few months, the Dominion Parliament is expected further to codify Hindu Marriage Law Reform so as to conform to modern ideas.

Rotary

THE first Rotary Club in India was started in 1910 at Calcutta. It took eight years to have the second club—Lahore—and in the next two years there was a total of seven clubs. Since then, by the end of 1941 there were 43 clubs in India, Burma and Ceylon. Then came the war and with the Japanese occupation of Burma five clubs were lost and three other clubs' charters were withdrawn, so that there were only 35 Rotary clubs.

The Rotary Governors and Club officers took a keen interest in the spreading of Rotary and today there are 83 clubs all functioning in India, Pakistan, Burma and Ceylon. There was only one district for the whole area of India, Burma and Ceylon until 1939, when the area was divided into two districts and in 1942 into four districts. With the increase in the number of clubs it became necessary in 1946 to set up 7 districts, with 7 Governors to administer them.

MIDDLE ASIA OFFICE: Brabourne Stadium, North, Churchgate Street, Bombay. Asst. Secretary-in-charge: George R. Means.

88TH DISTRICT. GOVERNOR:

Dr. Dev Raj Narang, 5, Montgomery Road, Lahore.

TUTICORIN: 6364; August 18, 1946. *President:* J. L. P. Roche Victoria, "Sukhastan", Beach Road, Tuticorin; *Secretary:* S. N. Chinnakannu Pillai, West Great Cotton Road, Tuticorin. 7 p.m., every First Wednesday after 1st and 15th of every month.

ROTARY INTERNATIONAL

Office for Middle Asia: Brabourne Stadium, North, Churchgate Street, Bombay.

The Office for Middle Asia of Rotary International provides the services of R. I. Secretariat, at Chicago, to all the district governors in this region; and the Rotary clubs and the

Rotary organisation in India, Pakistan, Burma, Ceylon, Afghanistan, Malaya Union, Siam, French Indo-China, Sarawak, Brunei, British North Borneo and Indonesia.

Secretary In-charge:—George R. Means.

Freemasonry

IN 1728 a dispensation was granted by the Grand Lodge of England to Geo. Pomfret, authorising him to "open a new Lodge in Bengal." Of his personage nothing further is known but under Capt. Farwinter, who in the following year succeeded him as Provincial Grand Master of India, a Lodge was established in 1730, which in the Engraved Lists is distinguished by the arms of the East India Company, and is described as "No. 72 at Bengal in the East Indies." The next Provincial Grand Masters were James Dawson and Zeeh. Gee, who held office in 1740; after whom came the Hon. Roger Drake, appointed 10th April 1755. The last named was Governor of Calcutta at the time of the attack made on the settlement by Surajah Dowlah in 1756. Drake missed the horrors of the Black Hole by escaping and was accused of deserting his post, but, though present at the retaking of Calcutta by Admiral Watson and Olive, it is improbable that he resumed the duties of his masonic office after the calamity that befell the settlement.

The minutes of the Grand Lodge inform us that William Mackett, Provincial Grand Master of Calcutta, was present at the meeting of that body, November 17, 1760, and we learn on the same authority that at the request of the "Lodges in the East Indies" Cullin Smith was appointed P. G. M. in 1762. At this period it was the custom in Bengal "to elect the Provincial Grand Master annually by the majority of the votes of the members present, from amongst those who passed through the different offices of the (Prov.) Grand Lodge and who had served as Dep. Prov. Grand Master." This annual election as soon as notified to the Grand Lodge of England was confirmed by the Grand Master without its being thought an infringement of his prerogative. In accordance with this practice, Samuel Middleton was elected (P. G. M. circa) in 1767; but in passing it may be briefly observed that a few years previously a kind of roving commission was granted by Earl Ferrars in 1762-64 to John Bluvitt, Commander of the "Admiral Watson," Indianman "for East India where no other Provincial Lodge is to be found." Middleton's election was confirmed October 31st, 1768, and, as the dispensation forwarded by the Grand Secretary was looked upon as abrogating the practice of annual elections, he accordingly held the office of D. G. M. Unfortunately the records of the P. G. L. date back only to 1774, and thus much valuable information is lost to us. This Grand Lodge continued working until 1792 when it ceased to meet. It seems that the officers were selected from only two Lodges much to the dissatisfaction of the other Lodges, and resulted in most of the dissatisfied bodies seceding and attaching themselves to the Athol or Ancient Grand Lodge. In 1813 at the Union both the Ancients and Moderns in Calcutta combined and gave their allegiance to the United Grand Lodge of England and have since been working peaceably under the Provincial Grand Lodge of Bengal which was revived in that year and in 1840 created a District Grand Lodge.

Madras.—The earliest Lodge in Southern India (No. 222) was established in Madras in 1762. Three others were also established about 1766. In 1767 Capt. Edmund Pascal was appointed P. G. M. for Madras and its Dependencies and in the following year another Lodge was established at Fort St. George. In 1768 the Athol (or Ancients) invaded this District and in 1781 established a Provincial Grand Lodge and both these Provincial Grand Bodies continued working peaceably side by side until the Union. Indeed, though not generally known, these two Grand Bodies made an attempt at coalition long before any such movement was made by their parent bodies, the Grand Lodge of England, and the Ancient Grand Lodge, and Maiden in his History of Freemasonry in Madras states that in a great measure they succeeded. At the Union in 1813 all the bodies in Madras gave their allegiance to the United Grand Lodge. One event worthy of note was the initiation in 1774 at Trichinopoly of the eldest son of the Nawab of Arcot, Umdat-ul-Umra, who in his reply to the congratulations of the Grand Lodge of England stated "he considered the title of English Mason as one of the most honourable that he possessed." This document is now stored in the archives of the United Grand Lodge.

Bombay.—Two Lodges were established in this Presidency during the 18th century, Nos. 234 at Bombay in 1758 and 569 in Surat in 1798 both of which were carried on the lists until the Union when they disappeared. A Provincial Grand Master, James Todd, was appointed but there is no record that he exercised his functions and his name drops out of the Freemasons' Calendar in 1799. In 1801 an Athol Warrant was granted (No. 322) to the 78th foot which was engaged in the Maratha War under Sir Arthur Wellesley. In 1818 Lord Morla was asked to constitute a Lodge to be known by the name of St. Andrew by eight Masons residing there and also to grant a dispensation for holding a Provincial Grand Lodge for the purpose of making the Hon. Mountstuart a Mason, he having expressed a wish to that effect. The Petitioners further requested "that his name might be inserted in the body of the warrant, authorising them to instal him after being duly passed and raised a Deputy Grand Master of the Deccan." Of the reply to this application no copy has been preserved. Lodge Benevolence was established in Bombay in 1822.

In 1823 a Military Lodge "Orion-in-the-West" was formed in the Bombay Artillery and installed at Poona as No. 16 of the Coast of Coromandel. It seems from Lane's records that in 1830 it was discovered that this Lodge was not on the records of the United Grand Lodge of England. A Warrant was subsequently issued bearing date 19th July 1833. According to the early proceedings of this Lodge, members were examined in the Third Degree and passed to the chair in the Fourth Degree for which a fee of three gold mohurs was charged. In the following year a second Lodge was established at Poona by the Provincial Grand Lodge of Bengal which, however, left no

trace of its existence. In 1825 the civilian element of "Orion" seceded and formed the "Lodge of Hope" also at Poona No. 502.

Here "Orion" unrecognized at home, aided in the secession of some of its members, who obtained a warrant, on the recommendation of the Parent Lodge from the Grand Lodge of England. Two years later it was discovered that no notification of the existence of "Orion-in-the-West" had reached England, nor had any fees been received, although these including quarterages had been paid into the Provincial Grand Lodge, Coast of Coromandel, it was further ascertained that in granting a warrant for a Bombay Lodge the Provincial Grand Master of Coromandel had exceeded his powers. Ultimately a new warrant No. 598 was granted as already stated in 1833. Lodge "Perseverance" was started in Bombay No. 818 in 1823. Up to this time the jurisdiction of the Grand Lodge of England in India had not been invaded; but in 1836 Dr. James Burnes was appointed by the Grand Lodge of Scotland P. G. M. of Western India and its Dependencies. No Provincial Grand Lodge however was formed until 1st January 1838. A second Scottish Province of Eastern India was started which on the retirement of the Marquis of Tweedale was absorbed within the jurisdiction of Dr. Burnes, who in 1846 became Provincial Grand Master for all India (including Aden) but with the proviso, that this appointment was not to act in restraint of any future sub-division of the Presidencies. Burnes may be best described as being in 1836 in ecclesiastical phrase as a Provincial Grand Master "in partibus infidelium" for whatever Lodges then existed throughout the length and breadth of India were strangers to Scottish Masonry. But the times were propitious. There was no English Provincial Grand Lodge in Bombay and the Chevalier Burnes, whom nature had endowed with all the qualities requisite for Masonic Administration, soon got to work and presented such attractions to Scottish Freemasonry that the strange sight was witnessed of English Masons deserting their mother Lodges, to such an extent that these fell into abeyance, in order to give support to Lodges newly constituted under the Grand Lodge of Scotland. In one case, indeed, a Lodge "Perseverance" under England went over bodily to Scotland, with its name, jewels furniture, and belongings, and the charge was accepted by Scotland. This Lodgestill exists in Bombay and now bears No. 338 on the Register of Scotland. From this period, therefore, Scottish Masonry flourished, and English Masonry declined until the year 1848 when a Lodge St. George No. 549 on the Rolls of the Grand Lodge of England was again formed at Bombay, and for some years was the solitary representative of English Masonry in the Province. In 1844 Burnes established a Lodge "Rising Star of Western India," at Bombay for the admission of Indian gentlemen the result of which is seen at the present day. Thus the seed planted at Trichinopoly in 1774 by the initiation of Umdat-ul-Umra has borne fruit resulting in the initiation of thousands of Indian gentlemen of all castes and creeds, and which has gone far to establishing that mutual trust between West and East a distinguishing characteristic of Speculative Freemasonry. A Provincial Grand Lodge was re-established

in Bombay in 1860, and converted into a District Grand Lodge in 1861.

ADMINISTRATION

All three constitutions of the United Kingdom, the United Grand Lodge of England, the Grand Lodge of Scotland and the Grand Lodge of Ireland hold jurisdiction in India. The largest of these is that of England which has four districts under District Grand Masters, totalling over two hundred Lodges. The Grand Lodge of all Scottish Freemasonry in India which comes under Scotland has some seventy-five Lodges, but the Grand Lodge of Ireland, which is governed in India by a Grand Inspector only has eleven Lodges.

The districts under Grand Lodge of England are as follows:—

Bengal.—Founded 1723. 74 Lodges.

District Grand Master:—Rt. Wor. Bro. A. Barr Pollock. Deputy District Grand Master:—Wor. Bro. S. K. Gosh.

District Grand Secretary:—Wor. Bro. Guy D. Robinson, 19, Park Street, Calcutta.

District Grand Lodges meet quarterly, in January (Calcutta), April (Assam), July (Bihar or Upper Bengal) and October (United Provinces). Two Charitable Institutions are maintained. The Bengal Masonic Association for the education of children of indigent Freemasons and the District Fund of Benevolence for relief and maintenance of indigent Freemasons and their widows.

Bombay.—Founded 1763. 56 Lodges.

District Grand Master Rt. Wor. Bro. Sorab R. Davar; Deputy District Grand Master, Wor. Bro. J. S. Tilley.

District Grand Secretary, Wor. Bro. Khan Bahadur K. C. Banaji, Freemasons' Hall, Ravelin Street, Fort, Bombay.

District Grand Lodge meets in March (Installation) and September. It maintains two Charitable Institutions; the District Grand Lodge Fund of Benevolence, for the relief and maintenance of indigent Freemasons and their widows and the Bombay Masonic Association, for the maintenance and education of children of deceased Freemasons.

Punjab.—Founded 1863. 34 Lodges.

District Grand Master:—Rt. Wor. Bro. Rt. Rev. The Lord Bishop of Lahore, C.I.E., O.B.E., V.D., M.A., Deputy District Grand Master:—Wor. Bro. Lt-Col. F. R. Gifford, O.B.E.

District Grand Secretary:—Wor. Bro. G. Reeves-Brown, Freemasons' Hall, Lahore.

The District maintains The Punjab Masonic Institution for the Children and Widows of Freemasons for providing maintenance and education as required. There is a separate fund, the Dr. Owen Bursary Fund for the assistance of children of Freemasons, to enable them to fit themselves for employment after leaving school.

Madras.—Founded 1767. 36 Lodges.

District Grand Master, Rt. Wor. Bro. T. V. Muthukrishna Iyer, Deputy District Grand Master, Wor. Bro. Hon'ble Sir K. P. Lakshmana Rao.

District Grand Secretary:—Wor. Bro. Rao Bahadur S. T. Srinivasa Gopala Chari, Freemasons' Hall, Egmore, Madras.

The Lodge meets on the penultimate Saturdays in February and August each year in Madras, though the August meeting is sometimes held outside Madras. The District Grand Lodge maintains two Charitable Institutions; The District Fund of Benevolence, for the maintenance and relief of Indigent Freemasons and their widows and the Madras Masonic Association, for the education and maintenance of children of deceased Freemasons.

Grand Lodge of All Scottish Freemasonry in India. 75 Lodges.

Its area is divided into districts which are supervised by Grand Superintendents. The Grand Master of the Grand Lodge of all Scotland is Sir Iyon Hope Taunton, K.C.I.E., his Deputy Grand Master being Rt. Wor. Bro. Sir Shapoorji D. Billimoria. The Grand Superintendents are: Northern India, Rt. Wor. Bro. Rai Bahadur R. P. Varma, Southern India, Rt. Wor. Bro. A. Cook and Eastern India, Rt. Wor. Bro. R. D. Lemon.

The Grand Secretary is Rt. Wor. Bro. Khan Bahadur J. C. Mistree, 17, Murzban Road, Bombay.

The Grand Lodge of All Scottish Freemasons in India maintains two charity funds, the Scottish Masonic Fund of Benevolence in India and Scottish Benevolence Association in India, the Secretary of each fund being the Grand Secretary.

Grand Lodge meets in Bombay, its installation being in November.

Grand Lodge of Ireland

The Irish constitution is governed in India by a Grand Inspector, who has two assistant Grand Inspectors, one for Bombay and the other for Bengal. It has eleven Lodges working three in Bombay, six in Calcutta, one in Lahore and one in Simla.

Royal Arch Masonry

In England the District Grand Master is nearly always created Grand Superintendent

of the Royal Arch Chapter, his deputy generally being second principal, while the third principal is appointed every year. The districts adopt the same practice; Bengal having 31 Chapters, Madras 21, Bombay 27 and the Punjab 22.

Royal Arch Masonry in Scotland has a separate constitution from the craft. The District Grand Chapter in India under Scotland is at present ruled by Most Ex. Companion, Sir Shapoorji Billimoria, Kt., M.B.E., under whom there are 33 Chapters. The Grand Secretary of all Scottish Freemasons in India is also District Grand Scribe 'E'.

There is only one Irish Chapter situated in Calcutta.

Mark Masonry

Mark Masonry is worked under the Grand Mark Lodge of England and Wales and is divided into several districts, but in most cases, the district Grand Master is also the District Grand Mark Master. There are nineteen Lodges under Bengal, 18 under Bombay, 16 under Madras and 12 under the Punjab. Attached to the Mark degree is that of Royal Ark Mariner, which, under the English constitution, is worked in a separate Lodge attached to a Mark Lodge. Its ruler is the District Grand Mark Master and only Mark Master Masons can take this degree.

Under Scotland, the Mark degree is usually worked in Royal Arch Chapters, but it is conferred on candidates in some Lodges under the Scottish constitution.

Under Ireland, the Mark Degree is incorporated in that of the Royal Arch.

Other Degrees

There are many other degrees worked in India, including the Ancient and Accepted Rite, but no degree higher than 18th is actually worked in India under England, but under Scotland the 30th is worked. There are fourteen 18th degree Chapters working in India.

The Knight Templar degree is worked in several places under both England and Scotland.

The Red Cross Of Constantine has three conclaves working in India, at Bombay, Simla and Lahore.

The Order of the Secret Monitor has seven conclaves under Bombay, seven under Madras, three under Calcutta and one under Cawnpore.

Boy Scouts

THE Boy Scouts movement initiated in England by the late Lord Baden-Powell (the Chief Scout), spread widely in India and Pakistan. The Viceroy was Chief Scout and the heads of Provinces and States were Chief Scouts in their own areas. The aim of the Association was to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and self-reliance—inculcating loyalty and thoughtfulness for others—and teaching them services useful to the public and handicrafts useful to themselves. The Association was directly affiliated with the Boy Scouts International Bureau.

The Boy Scouts Association of India and the Hindustan Scouts will now merge to form a new association to be called Hind Scouts. The merger was decided on at a meeting of the Boy Scouts and Hindustan Scouts Councils on June 2, 1948. The new amalgamated Interim Council will consist of 18 members, 9 from Boy Scouts and 9 from Hindustan Scouts. There will be no Chief Scout in the new organization. The Chief Commissioner will be Sir Tej Bahadur Sapru and the Deputy Chief Commissioner the Hon'ble Mr. Justice Vivian Bose. Pandit Hridayanath Kunzru will be the National Commissioner and Rao Bahadur G. T. J. Thaddaeus and Mr. Shriram Bajpai, General Secretary and National Organizing Commissioner respectively.

Since the partition Pakistan has had a separate Scouts Association of its own with Quaid-e-Azam Jinnah as the Chief Scout. This is how the headquarters of the Boy Scouts Association of India was organized at the time of the partition:

INDIAN HEADQUARTERS

Chief Scout for India.—H.E. Rear Admiral the Viscount Mountbatten of Burma K.G., P.C., G.M.S.I., G.M.P.E., G.C.V.O., K.C.B., D.S.O.

Chief Commissioner.—Sir Tej Bahadur Sapru. Deputy Chief Commissioner for India.—The Hon'ble Mr. Justice Vivian Bose, B.A., LL.B. (Cantab.), Bar-at-Law.

Honorary Treasurer.—F. B. Blomfield, F.R.I.B.A.

General Secretary for India.—Hon. Lieut. Rao Bahadur G. T. J. Thaddaeus, B.A., D.O.C., A.K.L., R.I.N.V.R.

Office Superintendent.—S. H. A. Jaffri, B.Com.

HEADQUARTERS COUNCIL FOR INDIA.

President.—The Chief Scout for India.

Chairman.—The Chief Commissioner (ex-officio).

Secretary.—The General Secretary (ex-officio).

Members:—
G. A. Small, M.A., I.E.S., D.C.C., A.K.L.; Rai Bahadur U. N. Ghosh; A. S. Khan, M.Sc., C.I.E., I.E.S.; Commander K. B. Godrej, B.E.M., R.I.N.V.R., D.C.C., A.K.L.; The Hon'ble Mr. Justice M. Hidayatullah, O.B.E., B.A. (Cantab.), Bar-at-Law; F. B. Blomfield, F.R.I.B.A.; Khan Bahadur Shah Alam Khan, M.A., LL.B., P.E.S.; Sir Iqbal Ahmad, Kt., B.A., LL.B.; G. C. Chatterjee, M.A., I.E.S.; P. Kuttikrishna Menon, B.A., L.T., D.C.C., A.K.L.; Rao Bahadur K. P. Naidu; Lieut. Commander S. D. Pande, M.Sc., R.I.N.V.R.; Rajkumar Bikram Bahadur Singh of Khairagarh; Sardar D. K. Sen, M.A., B.C.L., Bar-at-Law; P. Siva Shankar, B.A., LL.B.; M. A. McCanliss, M.A. and M. N. Zutshi, B.A.

LITERARY

ASSOCIATION OF BRITISH UNIVERSITY WOMEN IN INDIA

The Association of British University Women in India was established in 1913. Its objects are:— (1) To facilitate intercommunication and co-operation between women of any nationality who are members of the universities of the United Kingdom and Northern Ireland, resident in India. (2) To provide a means of keeping in touch with the universities of the United Kingdom, by communication with the British Federation of University Women, and otherwise as may seem expedient. (3) To act as an organisation which shall afford opportunity for the expression of united opinion and for concerted action by university women. Membership is open only to those women who hold degrees in any university in the United Kingdom and in Northern Ireland: but Associate Membership is open to women who have studied at a British University for two years and each Branch may admit as Honorary Members women who have advanced the higher education and interests of women.

The Association of British University Women has had several branches. The address of the Honorary Secretary, Bombay, is as follows:—

Mrs. Hannah, 19, Bilkha House, Churchgate Reclamation, Bombay.

The Delhi and Punjab Branches came into existence in 1918. The Calcutta and Bombay Branches have been influential and have repeatedly intervened with good effect to educate public opinion with regard to subjects affecting women. All Branches have, for instance, made investigations on behalf of the Education Department, Government of India, the Calcutta University Commission, etc., and have supplied, through the International Federation of University Women, information on Secondary Education in India to the League of Nations. They have been the means of introducing women on to University Senates and Municipalities. The Calcutta Branch carried through an important exhibition of Food Products. This branch, however, has not functioned for a number of years.

The Bombay Branch has done good work in connection with the formation of the Social Purity Committee and has, through a special sub-committee, organised public meetings for women on subjects affecting their interests about which legislation was being or had been recently enacted.

A valuable part of the work of the Association was the establishment of Women's Employment Bureaus in Calcutta and Bombay. They were remarkably successful. The Bombay Bureau was eventually merged into the employment Bureau established by the Women's Council.

As a means of promoting friendships between women from various parts of the United Kingdom, with widely differing tastes and interests and spheres of life in India, and as an instrument for affording opportunities for usefulness to educated women, the Association of University Women has a useful function to perform.

This Association is Federated to the "Federation of University Women in India," and thus forms one of the Units of the Indian Federation.

FEDERATION OF UNIVERSITY WOMEN IN INDIA

The Federation of University Women in India unites various Associations of University Women throughout the country, its object being to promote friendship and understanding among University Women of all races resident in India and to further their common interests. It is affiliated to the International Federation of University Women which in 1939 has a membership of over 60,000 representing thirty-three nations and which seeks by scholarships, exchange of teachers, group discussions and conferences to unite in common action and understanding the University women in the world.

The Federation in India is controlled by a Central Committee at present located in Bombay. It has branches in Bombay and Kodalkanal while women, eligible for membership, resident in places where no branch exists can be enrolled as "Scattered Members." Hon. Gen. Secy.: A. G. Moore, 31, Pedder Road, Bombay.

BHANDARKAR ORIENTAL RESEARCH INSTITUTE, POONA

The Institute was inaugurated on the 6th of July 1917, the 80th birthday of late Sir R. G. Bhandarkar, at the hands of H. E. Lord Willingdon, who became its first President. Its objects are to publish critical editions of texts and original works bearing on Oriental antiquities, to provide an up-to-date Oriental library, to train students in the methods of research and to act as an information bureau on all points connected with Oriental Studies. The valuable library of the late Dr. Sir R. G. Bhandarkar, which he had bequeathed already to the Institute, was after his demise handed over by his executors to the Institute, and is now located in the Central Hall of the Institute. Since the 1st of April 1918 the Government of Bombay have transferred to the custody of the Institute the unique collection of nearly 20,000 manuscripts formerly accommodated in the Deccan College, together with a maintenance grant of Rs. 3,000 a year. Government have likewise entrusted to the Institute a grant of Rs. 10,000 a year for the publication of the B. S. S. and the Government Oriental Series. The Institute has also started a series called the

Bhandarkar Oriental Series in which five works have been already published and some others have been undertaken. The Institute has undertaken to edit *Mahabharata* critically at the initiation of the Raja of Aundh who has promised a total grant of Rs. one lakh for that purpose. Dr. V. S. Suthankar was the General Editor of the *Mahabharata* up to 21st January 1943 the date of his unfortunate demise. Dr. S. K. Belvalkar has now been appointed General Editor. Grants are being received from the Government of India (Rs. 4,000 a year) the University of Bombay (Rs. 3,000 a year) and the Government of Bombay (Rs. 6,000 a year), Madras, Hyderabad (Deccan), Baroda, and Mysore as well as from several Southern Mahratta States. Recently the Government of H. H. The Maharaja Scindia of Gwalior sanctioned Rs. 25,000 for the *Mahabharata* work at the rate of Rs. 2,500 per year for 10 years. The Government of H. H. The Maharaja of Kashmir has sanctioned a grant of Rs. 2,000 a year for three years for this work. The Trustees of Sir Dorab Tata Trust have also sanctioned an annual grant of Rs. 1,500 for the same purpose for 3 years. The British Academy has also given a grant to the *Mahabharata* as a token of their appreciation of this work. On 25th March 1944, the Institute inaugurated its *Mahabharata* Printing Department with a view to expediting the printing of the *Mahabharata* Edition. The Institute issues a Journal called *Annals of the Bhandarkar Oriental Research Institute* published four times a year. It also held under its auspices the First Oriental Conference on the 5th, 6th and 7th of November 1919 under the patronage of H. E. Sir George Lloyd and the presidency of Sir E. G. Bhandarkar. Thanks to liberal donations from the Patas and the Jain community, supplemented by Grants-in-Aid from the Government of Bombay, the Institute is housed in a fine building. Since August 1927 the Institute has been conducting regular M.A. classes in Sanskrit, Pali, Ardhamagadhi and Ancient Indian Culture. It has also been coaching students for the Doctorate degrees of the University of Bombay. Lectures by eminent scholars are also delivered occasionally. Besides these lectures a regular series of Extension Lectures at certain intervals has been arranged for the benefit of the public. The Institute celebrated its Silver Jubilee on the 4th and 5th of January 1943, when delegates from learned bodies all over India and other eminent scholars attended. Membership dues Rs. 10 a year or Rs. 100 compounded for life. Members can, subject to certain conditions, borrow books from the library and get the "Annals" free and other publications (a list covering about 100 titles sent free upon request) at concession rates.

BHARATA ITIHASA SANSHODHAKA MANDALA, THE, POONA

Founded in 1910 by the late Mr. V. K. Rajwade and Sardar K. C. Mehendale and registered under Act XXI of 1860 in 1910 with the object of collecting and conserving historical materials, erecting suitable buildings for preserving and exhibiting them, publishing such materials and

research in Indian history. Has a building of its own; has recently acquired new premises for additional buildings; possesses the best collection of Persian and Marathi historical papers owned by any private society. Has a rare collection of about a thousand Indian paintings now housed in a special wing, maintains a coin cabinet and an armoury of old weapons. Has a section for copper plates, sculpture and archaeology and has a library of general, historical and rare books. Holds fortnightly and annual meetings where notes and papers based on original documents are presented, discussed and afterwards published. The Poona City Research Section of the Mandal does research work in the city and publishes findings. Has published several volumes of original historical letters and other historical and literary books whose total number exceeds 90. Conducts a quarterly journal devoted to research. Work done mostly in Marathi. Celebrated the Silver Jubilee by calling the first All-India Modern History Congress in 1935. Has planned Commemorative volumes in English giving an analytical account of researches in various fields. Depends mainly on public subscriptions. Has been receiving some grant-in-aid from the Government of Bombay for the last five years. Was supported by many Rajas, Jagadidars, Sardars and the public. The Government of India is pleased to sanction Rs. 1,000 yearly from 1947-48. The late Dr. J. E. Abbot of New Jersey, U.S.A., left by will a gift of 30,000 dollars to the Mandal for buildings. Annual membership fees for various classes are Rs. 3, 6, 12, 25, 125 and 300 which can be compounded for life by paying ten times the annual subscription for a particular class in a single year. Effective members over 1,000; Annual income averages between 5 to 6 thousand rupees.

President: The Raja Saheb of Phaltan; *Vice-Presidents:* The Raja Saheb of Aundh; The Raja Saheb of Bhor and C. G. Agashe; *Chairman:* Prof. D. V. Potdar, B.A.; *Secretaries:* Dr. M. G. Dixit; C. G. Karve, B.A.; Prof. R. V. Oturkar, M.A.; *Treasurer:* D. K. Sathe, B.Sc., B.A. Address: 312-13, Sadashiv Peth, Poona City.

BOMBAY ART SOCIETY

Founded 1888, to promote and encourage Art by exhibitions of Pictures and Applied Arts, and to assist in the establishment and maintenance of a permanent gallery for pictures and other works of Art. Annual exhibition usually held every January. The Society maintains a Salon which provides a centre for general exhibitions, one-man shows, lectures and meetings, etc. Annual subscription Rs. 10. Life member Rs. 140. *President:* Sir Cowasji Jehangir, Bart.; *Hon. Treasurer:* J. N. Upadhyaya; *Hon. Salon Secretary:* K. M. Gaudhy; *Office and Salon Room:* Sassoon Building, 6, Rampart Row, Fort, Bombay.

BOMBAY BRANCH OF THE ROYAL ASIATIC SOCIETY

Founded 1804, to investigate and encourage Oriental Arts, Sciences and Literature. Annual

12907

BOMBAY NATURAL HISTORY SOCIETY

(Registered under Act XXI of 1860). Founded 1883 to promote the study of Natural History in all its branches. The Society has a membership of about 1,400 all over the world and a museum with a representative collection of the different vertebrates and invertebrates found in the Indian Empire and Ceylon. In 1921 the Society was entrusted with the management of the Natural History Section of the Prince of Wales Museum, and a great part of the Society's collections have been transferred to that Museum. A Journal is published three times during the year which contains articles on natural history and sport as well as descriptions of new species and local lists of different orders. The Society's library is open to members and books may be borrowed under special arrangement by members residing in the mofussil. Annual subscription Rs. 25. Entrance fee Rs. 10. Life Membership Rs. 860 including entrance fee. *Patron-in-Chief:* Rear Admiral the Viscount Mountbatten of Burma, K.G., P.C., G.M.S.I., G.M.I.E., G.C.V.O., K.C.B., D.S.O. *Offices:* 114, Appollo Street, Bombay.

DAWOODI BOHRA LITERARY AND WELFARE SOCIETY

(Established in 1940 A.D.); **AIM & OBJECTS:**—To promote study of Islamic culture, Law and History, Arabic & Urdu; to create common platform for free and unfettered discussions and expressions of opinion by different Schools of thought, to spread education amongst adults and females and to undertake economical, social and other activities by organising debates, lectures, tours, establishing libraries and publishing books, magazines and pamphlets. Zakir, Bar-at-Law; *Treasurer:*—A. A. Patharia, B.A., and *Secretary:*—T. S. N. Diwanji, Advocate. *Address:*—C/o. A. K. M. Patharia, 288, Abdul Rahman St., Bombay 3.

DECCAN EDUCATION SOCIETY, POONA

(Established in 1884). The object of the Society is "to facilitate and cheapen education by starting, affiliating and incorporating at different places, as circumstances permit, schools and colleges under private management or by any other ways best adapted to the wants of the people." The Society has now thirty-six life members. The value of the property and endowment funds held by the Society amounts to more than Rs. 50,00,000. The annual receipts and expenses of the Society's Institutions amount to Rs. 8,50,000. The Council, the Governing Body and the Board of Life Members are the bodies entrusted with the management of the Society's affairs.

Chairman of the Council and the Governing Body:—H. G. Gharpurey, M.A., I.C.S. (Retired); *Secretary:*—Dr. R. N. Dandekar, M.A., Ph.D., Fergusson College, Poona 4.

The Society's Institutions are the Fergusson College, Poona; the Willingdon College, Sangli; the Brihan-Maharashtra College of Commerce, Poona; the New English School, Nanawada, Poona; the New English School, Ramanag,

Poona; the New English School, Satara; the Navin Marathi Shala, Poona; the Majji Madhavi English School, Umbargaoon; the Dravid High School, Wal; The Ahilyadevi High School for Girls, Poona; the Technical Institute, Poona (attached to the Fergusson College, Poona). The total number of students in the institutions of the Society exceeds 8,000.

THE IMPERIAL LIBRARY, CALCUTTA

The present Imperial Library was founded in 1902 by Lord Curzon, the then Viceroy of India, by amalgamating the former Calcutta Public Library with the then Imperial Library which itself had been founded in 1891 by combining a number of Departmental Libraries of the Govt. of India Secretariat. One of them, the Library of the Home Dept., contributed a very important and interesting collection of books, which formerly belonged to the East India College, Fort William, Calcutta, and to the East India Board, London. The Calcutta Public Library also contained a fairly large number of valuable and rare books and pamphlets. In 1904, Maulvi Sayyid Sadrud Din Ahmad al Musavi, Zamindar of Buhar, (Burdwan District), endowed a collection of 1,500 printed Arabic, Persian and Urdu books, along with 950 Arabic and Persian manuscripts which collection is named "Buhar Library" after the name of the place to which the donor belonged.

The Ministry of Education of the Government of India, is responsible for the maintenance of the Library; while its management is vested in a Council appointed by the Governor-General in Council. The Educational Adviser to the Government of India is the ex-officio Chairman and the Librarian, Imperial Library, its ex-officio Secretary. The members represent the University of Calcutta (2), the Government of Bengal (2) and other Provinces (3).

The aim of the Imperial Library in the words of its great founder is that "it should be a Library of reference, a working place for students, and a repository of material for the future historians of India, in which, so far as possible, every work written about India at any time can be seen and read." The Library contains most of the important and rare works in English and the Indian languages dealing with India. The Library is also in possession of a collection of important books of reference and of standard works on various subjects which is kept up-to-date by the addition of new books. The present strength of the stock of the Library is a little over 4,20,000 which makes it the biggest Library in India.

The Library is provided with Reading Rooms, public and private, where facilities are offered to students, Research workers and general readers. There is a separate Reading Room for ladies. Books are also lent out to any one living in any part of the Dominion of India, against cash security. The membership of both the Reading Rooms and the Lending Section is free. General and special reference enquiries are also attended to.

The Library was housed in the Metcalfe Hall, Calcutta, from 1902 to 1923, when it was moved to the old Foreign and Military Secretariat

Building, 6, Esplanade East, Calcutta. As a war measure the Library is temporarily housed in 34, Chittaranjan Avenue, Calcutta since February 1942.

Librarian: Vacant. *Special Officer:* Y. M. Mulay, M.A., D.L. (Lond.), P.L.A.

INDIAN ACCOUNTANCY BOARD

The Indian Accountancy Board is constituted under the Indian Companies Act VII of 1913 which was amended by the Indian Companies (Amendment) Act, 1930, in order to give effect to an All-India scheme of registration of public accountants and auditors and the creation of an Indian Accountancy Board to advise the Central Government on all matters relating to the accountancy profession in India.

Before 1930 local Govts. were empowered to grant auditors' certificates entitling persons to act as auditors of companies other than private companies. Auditors' Certificates were of two kinds "restricted" and "unrestricted." The holders of the former were entitled to practise within the jurisdiction of the Province granting the certificate while those of the latter were entitled to practise throughout India.

There were several practical difficulties in administering a central subject by a provincial government and in 1932 the Central Government took charge of the accountancy profession—the youngest of the learned professions.

Every person desirous of practising as a public accountant in British India, has to be enrolled on the Register of Accountants maintained by the Central Government and is styled "Registered Accountant." Necessary conditions for eligibility for enrolment on the Register of Accountants are laid down in the Auditors' Certificates Rules, 1932, which have been framed under section 144 of the Indian Companies Act. There is, in operation, a strict scheme of professional examinations, registration of apprentices for the practical training, recognition of coaching institutions for the theoretical aspect, registration for the practising public accountant and an elaborate code of professional ethics, all conducted and rigorously enforced by the Central Government on the advice of the Indian Accountancy Board.

From 1932 to 1939 the members of the Indian Accountancy Board were nominated by the Central Government out of the ranks of the leading public accountants throughout India. In 1939 the Central Government changed the rules and introduced a progressive element of elected members from the practising accountants. The ultimate goal is to form an autonomous body of accountants to take charge of the profession. Under the present rules, the Indian Accountancy Board consists of 21 members. The term of membership is for 3 years. In exceptional conditions the Central Government is empowered either to reduce the term of office of the members or to extend it for a further specified period. The present term commenced from 1st July 1947.

Chairman: The Hon'ble Mr. K. C. Neogy, Minister for Commerce; *Secretary:* P. N. Bhandari, B.Com. (London), A.C.A., B.A.;

Address: Under-Secretary to the Government of India, Dept. of Commerce, Simla.

INDIAN ADULT EDUCATION ASSOCIATION

Founded in the year 1937 in order to organise and carry on adult education work throughout the country. Among its earliest founders Prof. H. B. Richardson and Prof. J. B. Raju took a very prominent part.

The aims and objects of the Association are:—

To spread knowledge among the people of India on all subjects related to their all-round welfare and culture, in a popular and attractive manner through suitable agencies; to initiate, wherever necessary, adult education activities in co-operation with various organisations and individuals interested in the work, and to encourage and co-ordinate local efforts and organisations engaged in promoting the cause of adult education; to serve as a central bureau for information and advice concerning adult education in the different provinces and Indian States; to co-operate with movements aiming at the removal of illiteracy and ignorance and the promotion of the civic, economic and cultural interests of the people; to serve as a connecting link for inter-provincial and Inter-State co-operation and co-ordination; to prepare and supply, if necessary, slides, charts, films, booklets, suitable literature, etc., and to undertake the publication of bulletins and journals; to arrange public lectures, demonstrations, seminars, etc., for the furtherance of the objects of the Association; to organise the Indian Adult Education Conference at least once every two years; to induce the Universities and other educational bodies in the country to take up adult education work, and to do all other acts that are incidental to the fulfilment of the above-mentioned objects of the Association.

The Association is affiliated to the World Association for Adult Education. Since its establishment it has held three important conferences. The first one in Delhi in 1938, presided over by the late Hon'ble Mr. Justice Sir Shah Mohammad Sulaiman; the second at Bhalgalpur in 1939 under the presidency of Mr. (now Sir) R. P. Masani, then Vice-Chancellor, Bombay University; and the third at Indore in December 1942, under the patronage of His Highness the Maharaja Holkar of Indore, and the presidency of Prof. A. Jha, Vice-Chancellor, Allahabad University.

INDIAN AND EASTERN NEWSPAPER SOCIETY

Formed in February 1939 to act as a Central Organisation of the Newspaper Press of India, Burma and Ceylon and to promote the common interests of its members. *President:* Tushar Kanti Ghosh, 'The Amrita Bazar Patrika'; *Deputy President:* Deshbandu Gupta, 'The Taj'; *Vice-President:* M. N. Cama, 'The Bombay Chronicle'; *Honorary Treasurer:* J. K. Cowley, 'The Statesman'; *Committee:* F. T. Coulton, 'The Times of India'; K. Kasturi Srinivasan, 'The Hindu'; W. J. B. Walker, 'The Statesman'; Devdas Gandhi, 'The Hindustan Times'; C. R. Srinivasan, 'The

Swadesa Mitran'; Suresh Chandra Mazumdar, 'The Hindustan Standard'; Amritlal Seth, 'The Jammabhoomi'; A. A. Hayes, 'The Madras Mail'; S. Sadanand, 'The Free Press Journal'; P. N. Mehta, and A. D. Mani, 'The Hitavada'. Address: Post Box No. 69, New Delhi.

INDIAN LIBRARY ASSOCIATION

Founded in September, 1933, on the recommendation of the first All-India Library Conference, convened in Calcutta on the invitation of about 20 prominent librarians in the country. It has for its objects (a) the furtherance of the library movement in India; (b) the promotion of training in librarianship in India and (c) the improvement of status of librarians.

Among the methods employed for an achievement of these objects, the Association has with the help of local workers and supporters been able to organise biennial Library Conferences, of which seven have been held so far. The Association is responsible for bringing out a professional journal, called the "Library Bulletin" which is published every quarter, since April 1942 and which is supplied free to members of the Association. Another useful publication issued by the Association is the "Directory of Indian Libraries" of which two editions have been brought out so far and a third is under preparation. The Association has also undertaken the compilation and publication of certain works of reference, such as (a) the Union Catalogue of Scientific periodicals contained in important libraries of India; (b) a Compendium of Scientific and technical pamphlets as contained in important Indian Libraries; (c) a Catalogue of library literature found in important libraries of the country and (d) expansion of such topics of the well-known scheme of book classification, the Dewey Decimal, as pertain to India and Indian subjects. Of the last, certain expansions have been published in the "Library Bulletin," while others are either awaiting publication or are being worked out.

The Association also contemplates a survey of Indian libraries, which work is held up as no financial assistance is forthcoming from the Govt. to carry out such a huge task.

The membership of the Association includes individual members, Libraries and Library Associations, of which about a dozen are affiliated to the Indian Association.

K. M. Asadullah, Librarian, Imperial Library, Calcutta.

INDIAN MUSIC ASSOCIATION, LUCKNOW

Founded by Ralzada Onkar Prasad in 1939, and is the only institution of its kind in India. Its object is to revive and reorganise the decaying art of the Indian music. Membership is open to both sexes and a nominal quarterly subscription is charged. The success of the Association has been proved by the recognition of the service of the members at various Music Conferences and Charity Shows.

INDIAN SOCIETY OF ORIENTAL ART (CALCUTTA).

Patron: Marquess of Zetland, G.C.I.E. Secretary: Dr. Niharjan Ray. Office: 11, Wellington Square, Calcutta.

INDIAN STANDARDS INSTITUTION

'P' Block, Raisina Road, New Delhi.

Origin: With a view to co-ordinating standardization activities of various laboratories and institutions and to introduce industrial standards on a national basis the Government of India by their Resolution No. 1-St(4)/45 dated the 3rd September 1946, brought into existence the Indian Standards Institution.

Aims and Objects: The aims and objects of the Institution include the co-ordination of efforts of Producer and Consumer for the improvement of materials, products, appliances, processes and methods, introduction of code of practices, provisions or arrangements of facilities for examination and testing of commodities, processes and practices and planning and direction of related investigations and research.

Management: The affairs of the Institution are administered by the General Council, on which are represented Ministries of the Government of India, Governments of Provinces and States, professional societies of technologists and scientists, chambers of commerce and industry and other important interests.

General Council:—President: Dr. Shyama Prasad Mookerji, Minister for Industry and Supply, Government of India; Vice-Presidents: Nawab Zain Yar Jung Bahadur; Dorab C. Driver; Secretary: Dr. Lal C. Verman, Director, Indian Standards Institution (Ex-officio).

Preparation of Standards: The technical work of preparing standards, specifications, codes of practices, etc. will, for the present be carried out under the authority of five division councils, namely, (a) Engineering, (b) Buildings, (c) Textiles, (d) Chemicals and (e) Agriculture and Food Products.

Finances: The income of the Institution is derived from (a) Government grants, (b) contributions from industry, the Provinces, the States and other interested public bodies, (c) subscription from members and (d) sale of Indian Standards, specifications, etc.

The Government of India have decided to make annual grants from year to year for a period of five years by which time they anticipate the Institution should be largely self-supporting.

Director: Dr. Lal C. Verman.

KALAKSHETRA—INTERNATIONAL ARTS CENTRE, ADYAR, MADRAS

Literally "The Abode of the Arts" was founded at Adyar in 1936 by Shrimati Rukmini Devi, to emphasize the essential unity of all true Art.

Rukmini Devi, her staff and students in Kalakshetra are engaged in studying and popularising the principles and practice of various Hindu classical dances, Bharata Natya, Kathakali, etc. Special features are instrumental and vocal music, folk songs, dramatic arts, and painting. Recent expansion includes the inauguration of 4-year teachers course in Dance and Music. There is besides a crafts department including furniture and interior decoration and a weaving section.

Bookbinding and publications are also part of the Centre's activities. The Centre has a unique and rare collection of fifteen hundred Tamil palmleaf manuscripts on the *Kamba Ramayana*, many of these annotated by the late Mahamahopadhyaya Dr. U. V. Swaminatha Iyer.

The Arundale Montessori Training Centre under the direction of Dr. Maria Montessori and herself as the Principal, was started on July 3rd 1947. It will train teachers all over India in the Montessori System. The Kalakshetra and the Besant Theosophical School, will form a Cultural Centre to be endowed as a Centenary Memorial to Dr. Annie Besant.

MADRAS LITERARY SOCIETY AND AUXILIARY OF THE ROYAL ASIATIC SOCIETY

College Road, Nungambakam, Madras.

The Society's Library contains nearly a lakh of books which are circulated to members.

President: The Hon'ble Mr. Justice A. C. Happeel, I.C.S.; Hon. Secy.: J. Spencer; Librarian: C. N. Rama Krishna Iyer, B.A.

P. E. N. ALL-INDIA CENTRE

The All-India Centre of this International Society of eminent poets, playwrights, editors, essayists, novelists (P.E.N.) was founded in 1933 by Sophia Wadia under the presidency of Dr. Rabindranath Tagore. After his death in 1941, Shrimati Sarojini Naidu was elected President. The Vice-Presidents are Maulana Syed Sulaiman Nadvi, Pandit Jawaharlal Nehru and Prof. S. Radhakrishnan. The aim of the P.E.N. everywhere is to promote friendliness among writers and to uphold freedom of speech. In addition, the All-India Centre is working for national cultural unity by spreading appreciation of the many Indian literatures outside their own language areas and also abroad. This is done by means of public lectures, through its monthly journal *The Indian P.E.N.*, free to P. E. N. members and available to the general public in India for Rs. 5 per annum, and through its "P.E.N. Books" series on the different Indian literatures. The All-India Centre has over 350 members among the country's leading writers and editors, and has sponsored two All-India Writers' Conferences. Membership is open to any Indian of recognised position as a writer, subject to the approval of the Executive Committee: Entrance fee Rs. 5; annual fee Rs. 6; life membership fee Rs. 100.

Honorary Secretary: M. D. Altekar, M.A., "Aryasanga," 22, Narayan Dabholkar Road, Malabar Hill, Bombay 6.

PHILATELIC SOCIETY OF INDIA

Formed March 1897; Annual subscription Rs. 5. Hon. Secretary and Treasurer: E. Franklin DeSouza, 30-C, Khotachiwadi, Bombay 4.

TAHERI SCHOLARSHIP SOCIETY

The Society was established by His Holiness Sardar Syedna Dr. Taher Saifuddin Saheb in 1944 and is being run by contributions from

His Holiness and members of the Dawoodi Bohra Community. The Aims and Objects of the Society are (1) to award scholarships to Dawoodi Bohra students of both sexes taking education in Schools and Colleges; (2) to award a gold medal every year to the student who shows exceptional merit in any Degree or Diploma Examination held during the year; and (3) to encourage Dawoodi Bohra students making research in any branch of knowledge. The Society has awarded scholarships in 1944-45, 1945-46 and 1946-47 respectively as under:—Rs. 11,145 (100 students), Rs. 11,196/12 (116 students) and Rs. 11,510/12 (113 students). Secretary:—A. N. Patharia. Address:—Mohamed Baug, 21, Sarang St., Bombay 3.

SCIENTIFIC

AGRICULTURAL AND HORTICULTURAL SOCIETY (THE ROYAL) OF INDIA (CALCUTTA)

Founded 1820. A Class, Annual subscription Rs. 35. Entrance fee Rs. 8. B Class, Annual subscription Rs. 15. Secretary: S. Percy-Lancaster, F.L.S., F.R.H.S., M.R.A.S., 1, Alipore Road, Alipore.

AGRI-HORTICULTURAL SOCIETY OF MADRAS

Established 1835. Quarterly subscription for members in Class A Rs. 7, in Class B Rs. 3. President: H. E. The Governor of Madras; Chairman: Mrs. M. M. Buck; Hon. Secretary: Richard Apriel, M.D.; Hon. Treasurer: Rao Saheb P. S. V. Nambal.

ANTHROPOLOGICAL SOCIETY OF BOMBAY

Founded 1886, to promote the prosecution of Anthropological research in India; to correspond with Anthropological Societies throughout the world; to hold meetings for reading and discussing papers; and to publish a journal containing the transactions of the Society. Annual subscription Rs. 10. President: Prof. G. S. Ghurye, M.A., Ph.D.; Hon. Secretary: Prof. K. T. Merchant, M.A., LL.B., B.Sc. (Econ.). Office Address: C/o K. R. Cama Oriental Institute Building, 136, Apollo Street, Bombay.

BENARES MATHEMATICAL SOCIETY

Founded in 1918 for the encouragement and promotion of research in the various branches of Pure and Applied Mathematics, and in the History of Mathematics. It conducts a journal entitled *The Proceedings of the Benares Mathematical Society*, in which original papers on Mathematics are published, and maintains a library. It published 23 volumes of *The Proceedings* and 12 books. There are about 100 members from all parts of India. Admission fee Rs. 10. Annual subscription Rs. 6 (Resident members) and Rs. 5 (non-resident members). President: Dr. M. R. Siddiqi. Vice-Presidents: Dr. B. N. Prasad, Dr. B. R. Seth and Prof. V. V. Narlikar. Secretary: Dr. R. D. Misra, Ph.D. Editor: Dr. A. N. Singh, D.Sc.; Treasurer: Dr. R. S. Verma, D.Sc. Librarian: Dr. B. Mohan, Address: 22, Sempura, Benares.

BOMBAY SANITARY ASSOCIATION

Founded (a) to create an educated public opinion with regard to sanitary matters in general; (b) to diffuse the knowledge of sanitation and hygiene generally, and of the prevention of the spread of disease amongst all classes of people by means of lectures, leaflets and practical demonstrations and if possible, by holding classes and examinations; (c) to promote sanitary science by giving prizes, rewards or medals to those who may by diligent application add to our knowledge in sanitary science by original research or there wise; (d) to arrange for homely talk or simple practical lectures for mothers and girls in the various localities and different chawls, provided the people in such localities or chawls give facilities. The Sanitary Institute Building in Princess Street was built by the Association at a cost of nearly Rs. 1,00,000. The foundation stone was laid by Lady Willingdon in March, 1914, and it was opened in March, 1915. It is a large and handsome structure with a large Lecture Hall, Library, Museum, etc., and also provides accommodation for King George V Anti-Tuberculosis League Dispensary transferred to the Municipality in 1924, the Museum and office of the Assistant Health Officer, C and D Wards, and the Vaccination Station. *Hon. Secretary and Treasurer:* Dr. K. N. Choksy, M.B.B.S., D.P.H., D.T.M., Acting Executive Health Officer, Bombay. *Joint Honorary Secretary:* Dr. C. Coutinho, B.Sc., L.M. & S., D.Hy. *Health Visitor:* S. K. Kulkarni.

BRITISH MEDICAL ASSOCIATION
(Bombay Branch)

Founded 1886, to promote Medical and the Allied Sciences and the maintenance of the honour and interests of the Medical Profession. *Secretary:* Dr. D. R. Bharucha, F.R.C.S. (Eng.), "Dreamland", 25, New Queen's Road, Bombay 4.

INDIAN CHEMICAL SOCIETY

Was founded in 1924 with late Sir P. C. Ray as *President*, located in the University College of Science Buildings, 92, Upper Circular Road, Calcutta. *Prof. P. Ray, M.A., F.N.I., President;* Sir S. S. Bhatnagar, F.R.S., s.w., Dr. B. B. Dey, Prof. N. R. Dhar, Dr. Gilbert Fowler, Sir J. C. Ghosh, Prof. B. K. Singh, Dr. J. N. Mukherjee, Dr. B. C. Guba, Dr. P. C. Mitter, Dr. P. B. Sarkar and Dr. K. Venkataraman, *Vice-Presidents;* Prof. B. Sanjiva Rao and Dr. P. K. Bose, *Hony. Editors;* Dr. B. N. Ghosh, *Hony. Secretary;* Dr. K. N. Bagchi, *Hony. Treasurer;* P. C. Bandhyopadhyay, *Asst. Secretary;* G. Banerjee, *Asst. Editor.* *Bombay Branch:* *Principal P. N. Joshi, President;* S. M. Mehta and Dr. G. V. Jadhav, *Vice-Presidents;* J. Samson and A. N. Kothare, *Joint Hony. Secretaries;* Barave, *Hony. Treasurer.* *Madras Branch:* Sir J. C. Ghosh, *President;* Dr. K. L. Moudgill, *Vice-President;* H. Subba Jola, *Hony. Secretary and Treasurer.*

The Society publishes a monthly Journal dealing with original researches in Chemistry in India and a quarterly Industrial Edition of the main Journal specially devoted to industrial topics. Annual subscription for the Industrial Edition is Rs. 6 for non-Fellows. Subscription of Fellows: Rs. 16, Non-Fellows Rs. 18 and an

additional Rs. 2 for the Industrial and News Edition. Fellowship is open to graduates of Chemistry and to those who are interested.

INDIAN INSTITUTE OF SCIENCE
(MALLESWARAM, P. O., BANGALORE)

The Institute owes its origin to the munificence of the late Mr. J. N. Tata, whose plan for establishing a Research Institute, was brought to fruition after his death by the generosity of his two sons, the late Sir Dorabji Tata and the late Sir Ratanji Tata, supported by the Government of India and the Government of H. H. the Maharaja of Mysore. The Institute began work in July 1911, and its laboratories provide facilities for post-graduate work in the following branches of Science, namely Physics, General Chemistry, Organic Chemistry, Chemical Engineering, Biochemistry, Pharmacology, Fermentation Technology, Food Technology, Electric Technology, Electric Communication Engineering, Aeronautical Engineering, Power Engineering, Internal Combustion Engineering and Metallurgy. There is a library of scientific books and journals comprising about 35,000 volumes. The Institute awards a limited number of research studentships, research scholarships and research stipends. The Associateship is awarded by the Governing Council on the recommendation of the Senate after five terms, devoted entirely to research carried on during the period. Diplomas are granted to students who satisfactorily complete approved courses of study in Electrical Technology, Electrical Communication Engineering, Chemical Engineering, Aeronautical Engineering and Metallurgy. A department of Power Engineering is being set up and a section of Economics and Social Sciences will be added in the near future. The scientific work of the Institute is recorded in the Quarterly Journal of the Indian Institute of Science. *Director:* Sir Juan Chandra Ghosh, Kt., D.Sc., F.N.I.; *Registrar:* A. C. Paf, M.A. (Cantab.).

INDIAN MATHEMATICAL SOCIETY

Founded in 1907 for the advancement of mathematical studies in India. It conducts two quarterly journals, *The Journal of the Indian Mathematical Society* and *The Mathematical Student*; the former publishes original papers on mathematical subjects and the latter is devoted to the needs of students and teachers of mathematics. The Society maintains a library of current mathematical periodicals in all languages and some new books on the subject. The library is located at the Fergusson College, Poona, where the journals and books are circulated to members by post. The journals of the Society are published in Madras. There are about 400 members from all parts of India. *President:* Dr. M. R. Siddiqi, Osmania University, Hyderabad. *Secretaries:* Dr. T. Vijayaraghavan, Professor of Maths., Andhra University and S. Mahadevan, M.A., L.T., Engineering College, Guindy, Madras. *Librarian:* D. D. Kosambi, Professor of Mathematics, Fergusson College, Poona.

THE INDIAN RESEARCH FUND
ASSOCIATION

This Association was constituted in 1911 with a sum of Rs. 5,00,000 set aside as an endowment for the prosecution and assistance of research,

the propagation of knowledge and experimental measures generally in connection with the causation, mode of spread and prevention of communicable diseases. The Association is a pioneer in organised medical research on a large scale and its work has been widely appreciated in other countries. The Association receives large grants-in-aid from the Government of India.

The control and management of the Association are vested in a Governing Body the President of which is the Hon'ble Health Minister of the Government of India. This body is assisted by a Scientific Advisory Board. On the Board are Directors of the leading Research Institutes and medical and scientific research workers of standing and experience. The Director-General of Health Services is the Chairman of the Board.

Membership of the Association is open to non-officials. Every donor of Rs. 5,000 is entitled to become a permanent life member, while every subscriber of Rs. 100 per annum can be a temporary member.

The original Governing Body was composed exclusively of officials until 1929 when the Raja of Parakimedi made a donation of Rs. 1,00,000 to the Association and was appointed a life member. In the same year the Govt. of India, with a view to liberalising the constitution of the Governing Body, decided to enlarge it by including three representatives of the Indian Legislature, two representatives of Medical Faculties of Universities incorporated by law in India and one eminent non-medical scientist to be nominated by the Governor-General. As a result of further representations from the Universities and the Legislature, this Body was again enlarged in 1933 by the addition of a third representative of the Medical Faculties of Indian Universities, whilst it was decided that the non-medical scientist should in future be elected by the Indian Science Congress Association with the dissolution of the Indian Legislature, three representatives of the Constituent Assembly of India have replaced the three representatives of the Indian Legislature.

A Recruitment and Appointments Board has been formed from amongst the members of the Governing Body of the Association to select and recommend officers for appointment in the Medical Research Department and the All-India Institute of Hygiene and Public Health, Calcutta.

In order to ensure the closest co-operation between workers and to prevent overlapping of efforts, an annual conference of medical research workers and administrative heads of Medical and Public Health Departments used to be convened under the auspices of the Association up to 1938. In that year it was decided that the Conference should be held biennially in future. No conference has however been held due to the abnormal travel and other conditions prevailing in the country. At this conference free discussions were held on the work accomplished and on proposals for future work. The results of the discussions enabled the members of the Scientific Advisory Board to make their recommendations for the programme for the following year. The Board is assisted by Advisory Committees consisting of workers on more important items

of research, e.g., cholera, malaria, plague, leprosy, filariasis, rabies, clinical research and industrial health, nutrition, maternity and child welfare which examine the proposals for research work and make recommendations to the Scientific Advisory Board. The Scientific Advisory Board annually publishes a technical report describing the research work done and the various enquiries carried out under the auspices of the Association during each calendar year. This report is obtainable from the office of the Secretary, Governing Body, Indian Research Fund Association, Secretariat, New Delhi on payment.

The results of researches carried out under the auspices of the Association are published in the "Indian Journal of Medical Research" and its "Memoirs" and the "Journal of the Malaria Institute of India." Since the inception of the Association a large number of enquiries have been carried out. Enquiries include investigations on cholera, bacteriophage, malaria, nutrition, leprosy, plague, vaccines, tuberculosis, pharmacology, indigenous drugs, material mortality, helminthology, medical mycology, dracontiasis and filariasis, protozoal parasites, cancer, epidemic dropsy, kala-azar, dried blood plasma, sandfly fever, typhus bacillary dysentery, snake venoms, fluorosis, clinical problems, etc.

Besides financing investigations which are conducted by workers in its direct employment, the Association gives grants-in-aid to institutions and also to outside workers. The expenditure for the last few years has amounted to between seven and eight lakhs of rupees per annum. The Association maintains the Research Sections of the Malaria Institute at Delhi as well as its Southern India Branch at Coonoor until March, 1946 when they were taken over by the Government of India.

The Association maintains the Nutrition Laboratories at Coonoor, which carry out investigations which have a direct bearing on the problem of nutrition in India. The diet surveys undertaken by the laboratories have provided very valuable information as to food requirements. The publication of Health Bulletin No. 23 "The Nutritive value of Indian Foods and the planning of satisfactory diets" has made available to the public useful knowledge about Indian foodstuffs. Besides carrying out experiments in nutrition, annual classes are held at which candidates from all over India are trained in the problems of nutrition. The nutrition advisory committee of the Association has been recognised by the Government of India as the National Advisory Nutrition Committee for India.

The Association has set up Nutrition Research Units at the Seth G. S. Medical College, Bombay and at Dacca University, Dacca. They have also set up a Clinical Research Unit at the Tata Memorial Hospital, Bombay.

From the 1st April, 1932 to the 31st March 1946, the Association awarded biennially to young medical graduates five research fellowships of the value of Rs. 150 p.m. each tenable for a period of two years. In April, 1946, the value of these fellowships was raised to Rs. 250 p.m. and it was decided that ten such fellowships should be awarded annually with effect from

the 1st April, 1947. Of these eight are reserved for medical graduates and two for persons holding a master's degree in science of a recognised University. In addition to the stipend of Rs. 250 p.m. the research fellows receive a contingent grant of Rs. 250 per annum to cover the cost of contingent expenditure in connection with their research which cannot be met by the Medical College or Research Institute at which they are working. In addition to these fellowships, the Association also awards four research fellowships of the value of Rs. 100 p.m. each tenable on a yearly basis. These fellowships are intended to encourage young medical and science graduates to take up research on nutrition.

The Governing Body of the Indian Research Fund Association also administers the Parlakimedi Trust Fund. This was formed by the grant of a lakh of rupees given by the Maharaja of Parlakimedi in 1929. The income from this fund is used to pay for two scholarships of the value of Rs. 150 p.m. each tenable for three years for research on human, animal and plant nutrition. The Parlakimedi scholars are attached to the I.R.F.A. Nutrition Research Laboratories at Coonoor.

THE INDIAN ROADS AND TRANSPORT DEVELOPMENT ASSOCIATION LIMITED

Registered Office—27, Bastion Road, Bombay.

The Association was formed in 1926 and registered in October 1927 having a Council with headquarters in Bombay and Branches at Calcutta, Bombay, Madras, Karachi, Lahore, Nagpur and New Delhi, each with a Local Committee.

The Annual Subscriptions for membership of the Association are: Associate Members Rs. 5; Ordinary Members Rs. 10; and Supporting Members Rs. 300.

The aims and objects of the Association are to promote the development of transport of any kind including Road, Motor and Air Transport throughout India by making representations to the Government of India, Governments of Provinces, District Boards and other Public Bodies concerned, regarding the construction, improvement and maintenance of roads, bridges and aerodromes, etc., to make representations to all or any of the bodies regarding the adjustment of taxation, customs duties and excise affecting motor vehicles and other modes of transport and the employment of same in such a manner as to facilitate the development of transport throughout India; to educate the public by means of propaganda and to create authoritative public opinion with regard to the needs of, and advantages to be derived from, improved road and air communications and the use of these forms of transport.

All persons, associations, firms or companies interested in Transport Development are eligible for election as members.

Branches are already in existence in Bombay, Calcutta, Madras, Karachi, Lahore, Assam, Nagpur and New Delhi and others will be formed as and when occasion demands.

Applications for membership should be made to the General Secretary of the Association 2 Bastion Road, Bombay, or to the Secretaries of the Branches, Bombay, P.O. Box 853; Calcutta P.O. Box 2285; Madras, P.O. Box 1270 Karachi, P.O. Box 168; Lahore, P.O. Box 181 Nagpur, B. Raghavendra Rao Road; New Delhi, P.O. Box 56, and Assam, P.O. Rehbar.

INDIAN SCIENCE CONGRESS ASSOCIATION

The Indian Science Congress Association was founded in 1914 largely through the efforts of Prof. P. S. Macmahon and Dr. J. L. Simonse who were Honorary General Secretaries of the Congress till 1921. The general administrative work of the office of the Congress was under the management of the Royal Asiatic Society (Bengal) till 1939. The Association at present has its offices at 1, Park Street, Calcutta 16.

The main objective of the Association is the advancement of science in India, and the annual sessions (Indian Science Congress) are organised for the purpose of (1) encouraging research and making the results generally known among science workers in India; (2) giving opportunities for personal intercourse and scientific companionship in order to overcome to some extent the isolation in this large country of workers in science; and (3) promoting public interest in science.

Membership of the Association is open to all interested in the activities of the Congress. The Association has an average total membership (Ordinary Members) of 1,500. The annual subscription is Rs. 12. There are also Sessional Members, and Associate and Student Members who are enrolled at concession rates. The members receive free of cost the proceedings of the annual sessions, which are issued in four parts. No educational qualification is generally insisted upon at the time of enrolment.

The Congress meets in January each year in one of the principal cities and the proceedings last for six days. The session is opened by a Presidential Address delivered by the President for the year. The President is chosen annually, the different branches of science being usually represented in turn. The work of the Session is divided into thirteen sections: (1) Mathematics, (2) Statistics, (3) Physics, (4) Chemistry, (5) Geology and Geography, (6) Botany, (7) Zoology and Entomology, (8) Anthropology and Archaeology, (9) Medical and Veterinary Sciences, (10) Agricultural Sciences, (11) Physiology, (12) Psychology and Educational Science, (13) Engineering and Metallurgy. The Sections meet separately, and each section is presided over by its own President also chosen annually. The mornings are devoted to the reading and discussion of the papers. Special discussions and symposia are held in the mornings or in the afternoons during the Session. Social functions and visits to places of scientific and industrial interest are arranged in the afternoons by the Local Reception Committee which is formed at the venue of the Congress to arrange for the work of the Session. Popular Lectures by eminent scientists and specialists are delivered in the evenings for the general public and form an important and attractive feature of the programme.

With effect from 1947, a programme for international scientific co-operation has been initiated through invitations to eminent foreign scientists and representative scientific bodies. In January, 1947, as many as 30 foreign scientists representing Great Britain, Canada, Australia, America, France, China, etc., were present at the Annual Congress. A similar representative body of scientific delegates will also attend the 1948 Session of the Congress.

President:—Jawaharlal Nehru. **President-elect:**—Col. Sir Ramnath Chopra, C.I.E., M.A., M.O., sc.D. (Cantab.), F.R.C.P. (Lond.), F.N.I., F.R.A.S.B.

General Secretaries:—Prof. P. C. Mahalanobis, F.R.S., Statistical Laboratory, Presidency College, Calcutta; Prof. M. Qureshi, Ph.D., F.N.I., Head of the Dept. of Chemistry, Osmania University, Hyderabad (Dn.); Dr. B. Mukerji, D.Sc., F.M.D., F.N.I., Central Drugs Laboratory, Govt. of India, Calcutta.

INSTITUTION OF ENGINEERS (INDIA).

Founded in 1920; granted a Royal Charter in 1935. **Objects:**—(briefly) to promote the general advancement of engineering and engineering science and their application in India and to facilitate the exchange of information and ideas on those subjects amongst its members. The membership consists of Honorary Members; Honorary Life Members; Members and Associate Members (Corporate Members); Companions; Students; Subscribers and Associates. The Institution is an All-India body and comprises engineers of all branches, civil, mechanical, electrical, mining, structural, etc. Membership of the Institution demands the same high standard of professional status and qualifications as required by the Civil, Mechanical and Electrical institutions in England.

The Institution is administered by a Council consisting of about 50 Corporate Members representing all branches of engineering. It has eight Local Centres with its own Administrative Committee, and the total membership is over 1,000. It publishes a quarterly technical journal.

SOCIAL, RELIGIOUS AND POLITICAL

BOMBAY MEDICAL UNION

Founded 1883 to promote friendly intercourse and exchange of views and experiences between members and to maintain the interest and status of the medical profession in Bombay and the Presidency. Entrance Fee for Resident members Rs. 5, monthly subscription Rs. 3 or Rs. 30 paid in advance in a lump sum. Absent members Rs. 2 yearly and non-resident members early subscription Rs. 5. **President:** Dr. S. B. Adgil; **Vice-Presidents:** Dr. V. L. Parmer and Dr. F. L. Daji; **Hon. Secretaries:** Dr. George Oelbo and Dr. N. G. Modi; **Hon. Treasurer:** Dr. B. B. Yodh; **Hon. Librarians:** Dr. M. G. Alwalkar and Dr. D. S. Alreja. **Office:**—Lavatsky Lodge Building, French Bridge, Hopwatsky, Bombay.

HE BIBLE SOCIETY OF INDIA & CEYLON

Founded in Nov. 1944, carries on the work of the British and Foreign Bible Society, the National Bible Society of Scotland and the

The Council of this Institution act as the Indian National Committee of the International Electro-Technical Commission. **President:**—E. A. Nadirshah. **General Secretary:**—R. D. Ratnagar. **Secretary:**—Rai C. C. Seal Bahadur. **Head-quarters:**—8, Gokhale Road, Calcutta.

NATIONAL HORSE BREEDING AND SHOW SOCIETY OF INDIA

Formed in 1923, by the late Major-General Sir Bernard James, KT., C.B., C.I.E., M.V.O., who was President from 1923 to 1925.

Objects:—To improve the breeds of horses, ponies and mules in India; to expand the breeding of horses, ponies and mules in India in order to make the country self-supporting in this respect; to protect and promote the interests of breeders and to give them every encouragement; to secure uniformity throughout India in all matters connected with Horse Shows; to prepare an Indian Stud Book; to endeavour by intercourse and discussion to attract public attention to a subject so important to the nation, and to spread knowledge of the principles upon which better horses may be bred; to hold shows of horses and to offer prizes and premiums at such Shows, or at Imperial and District Board and Local Horse Shows or at the Shows of any other Society; to advise and assist Horse Show Committees in regard to the organisation and management of Horse Shows, and in the appointment of Judges; to receive subscriptions and other payments for the general purposes of the Society.

The Society issues the following publication: "The Horse in India," an illustrated quarterly Journal in English. The Society holds the Imperial Delhi Horse Show annually in February, which was suspended during the war years.

Registered Office:—New Delhi. At present the office has been shifted from New Delhi and is situated C/o the Royal Western India Turf Club Ltd., 6, Burnett Road, Poona, Deccan.

American Bible Society in India, Pakistan and Ceylon. Bible Society work started in India 136 years ago and has grown steadily ever since. Today the Bible or some portion of it is printed and published in about 130 different Indian languages and dialects and the circulation reached 10,78,267 in 1946. The Bible's New Testaments and Portions in the various vernaculars are sold at rates which the very poorest can pay and at a considerable loss to the Society, which is made up by Voluntary Subscriptions in India and elsewhere.

Portions of Scriptures in the important vernaculars have been prepared in Braille for the use of the blind. The Society's headquarters are in Nagpur, with Auxiliaries in Calcutta, Bombay, Madras, Allahabad, Bangalore, Lahore and Colombo.

General Secretary for India and Ceylon:—The Rev. Canon G. Sinker, M.A., Mayo Road, Nagpur C.P.

CHILDREN'S AID SOCIETY

Was established in 1927 to help forward the operation of the Bombay Children Act by taking over responsibility for the maintenance of the Umakhadi Children's Remand Home, for the organisation of inquiry, and probation, including voluntary supervision work regarding the cases of boys and girls dealt with by the Juvenile Court, for the management of the David Sassoon Industrial School, Matunga. The Society maintains the Children's Home, Chembur, which is an Agricultural biased school and the Home for Mental Deficients. The Society is a private charitable organisation with a grant-in-aid from Government. Its work lies amongst destitute children hailing from all parts of India, juvenile offenders less than 16 years of age and children offended against by adult persons, all of whom have been arrested under the Bombay Children Act in either Bombay City or Suburban District.

CONSUMPTIVES' HOMES SOCIETY

This Society was started by the late Byramji Malabari and Dayaram Gidumal on the 1st of June 1903. Malabari secured a large grant of land in a Himalayan pine forest in Dharampur (Simla Hills) from H. H. the Maharaja of Patiala, for a Sanatorium for Consumptives. His Highness also gave a donation of Rs. one lakh. In 1911 by special permission the Sanatorium was named "The King Edward VII Sanatorium." It has its special waterworks known as the Lady Hardinge Waterworks, presented by the late Sir Chinnubhai Madhavlal, Bart, of Ahmedabad. The Sanatorium has a Guest House: The Noshirwan Adul Guest House for visitors to Dharampur. It has accommodation for 105 patients including the special Punjab Block built from a grant of the Punjab Government and meant for European patients. Most of the blocks and cottages are built by Parsis. The N. M. Wadia Charities built 5 cottages and 3 blocks of 11 rooms and gave yearly donations. Sir Dorab Tata Trustees are also Donors. The Sir Ratan Tata Charities donated large sums for the upkeep of the sanatorium from 1922, and in 1930 endowed the X-Ray and Electric Light Departments at a cost of Rs. 20,000. A donation of Rs. 15,000 is promised for the Sir Ratan Tata Laboratory. The Sanatorium has its own dairy and is called the Bal Projbal R. H. Fatuck Dairy. The Sir Chinnubhai Madhavlal Dispensary has an out-patient department. The Recreation Hall is called "The Sir Bhupinder Singh Recreation Hall" after the name of the late Maharaja of Patiala. Nearly Rs. 3,10,000 have been spent on laying out the sites, buildings, etc., and the upkeep annual expenditure is about Rs. 70,000. The Senior and 3 Junior Medical Officers are in charge of the Sanatorium. The office of this Society is situated at the Seva Sadan Buildings, Gamdevi, Bombay. S. F. Wadia is the Hon. Secretary and Pirosha P. Mistri is the Hon. Treasurer.

EUROPEAN ASSOCIATION

The European Association was established in 1883 under the title of "The European and Anglo-Indian Defence Association" and was re-established in 1912 under the title of the

European Defence Association, the present title being adopted in 1913, formerly to organise European influence in the political life of India. Policy now under revision. The Head Office (Central Administration) is in Sassoon House, 4, Lyons Range, Calcutta. 15 Branches all over India. *President*: H. Rowan Hodge; *Vice-Presidents*: J. H. Methold and B. W. Batchelor, C.B.E.; *Hony. General Treasurer*: J. D. K. Brown; *General Secretary*: Mrs. I. Bryden.

BRANCHES OF THE ASSOCIATION:

ASSAM.—*Chairman*, E. H. S. Lewis; *Hony. Secretary*, Miss E. Slater.

CACHAR.—*Emergency Committee Members*, J. S. R. Telfer and J. R. Wilson.

E. BENGAL.—*Chairman*, A. D. Boldy; *Hony. Secretary*, J. H. Lusby.

W. BENGAL.—*Chairman*: W. V. J. Curtain; *Hony. Secretary*: R. F. Orme.

CALCUTTA.—*Chairman*: J. H. Methold; *Secretary*: Mrs. I. Bryden.

DARJEELING.—*Chairman*: C. W. H. Ansell, O.B.E.; *Hony. Secretary*: W. J. Kydd.

DOOARS.—*Chairman*: W. D. Simpson; *Hony. Secretary*: J. J. Miller.

KANKINARRAH.—*Chairman*: W. Haining.

NORTH BIHAR.—*Chairman*: Lt.-Col. W. N. R. Kemp, E. D.; *Hony. Secretary*: R. J. Barkley.

MANBHUM.—*Chairman*: J. McCrae; *Hony. Secretary*: P. W. H. Woods.

BOMBAY.—*Chairman*: L. F. H. Goodwin.

SOUTH INDIAN.—*Chairman*: B. W. Batchelor, C.B.E.

PUNJAB.—*Chairman*: Sir William Roberts, C.B.E.; *Hony. Secretary*: J. T. Holland.

SIND.—*Chairman*: J. N. Kerr; *Hony. Secretary*: M. R. Carter.

UNITED PROVINCES.—*Chairman*: A. C. Inskip, C.B.E., O.B.E., E.D.; *Hony. Secretary*: R. L. Powell.

FEDERATION OF INDIAN OVERSEAS ORGANISATION

Founded in 1938. The objects of the Federation of Indian Overseas Organisation are, among others:—To promote, protect, safeguard and maintain the rights, privileges and interests of all Indians overseas; to secure for them by every possible endeavour equality of treatment as to admission, residence, occupation and status; to strengthen in every way constitutional organisations in different countries and colonies for the protection of Indian interests; to assist emigrating Indians; to encourage friendly feelings between Indians and non-Indians; to organise educational, cultural, commercial and agricultural exhibitions, and to publish, sell and distribute literature that further the objects of the Federation.

Membership is open to all Indians sympathising with the cause of Indians Overseas. Minimum annual subscription Rs. 10, Life Membership, Rs. 250.

INDIAN CHRISTIAN ASSOCIATION

Trichinopoly District. *President*: S. E. Pakkiam Raja, B.A., B.L.; *Vice-Presidents*: Rev: Canon J. G. Kolpillai, B.A., B.D., Rev. I. A. Appadurai, S. Devagnanam, B.A.; Dr. E. P. Mathuram; Dr. G. Joseph Gnanadickam; *Treasurer*: W. D. Joseph; *Publicity Officer*: M. P. H. Albert, M.A., L.T.; *Secretaries*: Schwartz Blake, B.A., B.T. and Arthur Peter, Office:—"Tanquebar House", Trichinopoly, S. India.

INDIA SUNDAY SCHOOL UNION

The India Sunday School Union, founded in Allahabad in 1876, is an interdenominational and ecumenical organisation having for its object the strengthening of religious and moral education in the Christian schools throughout India and Pakistan. It has 4 secretaries. Its General Council is composed of representatives from the National and Provincial Christian Councils, regional and denominational union of Sunday schools and which are Auxiliaries of the I.S.S.U. and from Churches and Missions and Christian Youth Organizations in the country.

The headquarters of the Union are at Coonoor on the Nilgiri Hills, where, besides the office and well-stocked book shop, there is the St. Andrew Teacher Training Institution. In this institution Summer Schools are held where a short but intensive course of study and training is offered to leaders in religious education from all parts of India.

Besides the activities at headquarters, the Union offers courses of lectures in any part of the country, delivered by members of its staff. A Quarterly Journal is published in English, and Lesson Notes for teachers in English and most of the regional languages. Text-books on subjects connected with the work of Bible teaching are also published in various languages, and Scripture and Teachers Training examinations are held for Scholars and Teachers, respectively.

The officers of the Union are as follows:—

President: Prof. B. B. Malvea, Ph.D., Allahabad.

Vice-President: Bishop S. K. Mondol, Hyderabad, Deccan.

Treasurer: W. H. Warren, Madras.

General Secretary: V. M. Koshy, Coonoor.

The most recent statistics show that there are in India 21,704 Sunday Schools with 42,886 teachers, and 881,568 scholars.

INDIAN RED CROSS SOCIETY

When Great War first broke out, what is generally termed Red Cross work was undertaken in the sub-continent and Mesopotamia by the St. John Ambulance Association and by a number of provincial organisations working on independent lines. From August 1916, the central work was taken over by the Indian Branch of the Joint War Committee of the Order of St. John of Jerusalem and the British Red Cross Society.

The Committee closed its career in June 1920 under the following circumstances. In the summer of 1919, an invitation was received

to join the International League of Red Cross Societies, having for its object the extension of Red Cross work in the sphere of purely civil activity. Though there was then no formally constituted Red Cross Society in India, the invitation was accepted, thus giving India a distinct position in a world-wide League of humanitarian societies. A Bill to constitute an Indian Red Cross Society was introduced by Sir Claude Hill in the Imperial Legislative Council in March 1920, and duly passed into law as Act XV of 1920. This Act handed over the balance of the funds of the Joint War Committee to the new Society, and authorised it not only to direct the utilisation for war purposes of the capital funds at its disposal but also to devote the interest, as far as possible, for civil purposes. As contemplated in the Act of Constitution of the Society, its activities are completely decentralised, and are being carried on through 34 Provincial and State Branches under which there are 342 sub-branches.

The objects on which the funds of Society may be spent are:—

1. The care of the sick and wounded men of His Majesty's Forces, whether still on the active list or demobilised (now of course most of His Majesty's Forces have left the sub-continent).
2. The care of those suffering from Tuberculosis, having regard in the first place to soldiers and sailors, whether they have contracted the disease on active service or not.
3. Child welfare.
4. Work parties to provide the necessary garments, etc., for hospitals and health institutions in need of them.
5. Assistance required in all branches of nursing, health and welfare work, ancillary to any organisations which have or may come into being in India and which are recognised by the Society.
6. Home Service Ambulance Work.
7. Provision of comforts and assistance to members of His Majesty's Forces whether on the active list or demobilised.

The Society has five grades of subscribing members, namely, Honorary Vice-Presidents, Patrons, Vice-Patrons, Members and Associate Members. Their respective subscriptions are Rs. 10,000, Rs. 5,000, Rs. 1,000, Rs. 12 annually or a consolidated payment of Rs. 150 and anything between Rs. 1 and Rs. 12 annually or consolidated payment of Rs. 50. The number of adult members of all categories enrolled during 1946 was 39,986 as against 37,731 in previous year.

To stimulate interest in the aims and objects of the Society amongst the future generation, the Junior Red Cross movement has been instituted which embraces the student population. Out of the 33 Provincial and State Branches, 27 have organised Junior Red Cross groups, which is a year indication of the fact that this children's branch of Red Cross Society which seeks to develop a child's personality by encouraging his individual initiative, making him think and act, is being firmly established all over the sub-continent. At the end of the year the total membership of the Junior Red Cross was 8,64,454

in 19,630 groups as against 8,30,782 in 21,090 groups in the previous year. The Director of the Junior Red Cross, K. Shanker Nigam, who is in charge of the movement, is guided by a Sub-Committee. Several new lines of activity towards the promotion of health, service to the sick and suffering and inter-national fellowship have been initiated during recent war years and the movement is meeting with increasing popularity among the juvenile population of the country.

CONSTITUTION :—His Excellency the Governor-General is President of the Society. The Managing Body ordinarily consists of a Chairman to be nominated by the President and 25 members of the Society, of whom 12 are the Vice-Presidents nominated by Provincial or State Branches, 8 selected by the Society at the Annual General Meeting from among the members of the Society, and 5 nominated by the President.

The present Chairman of the Managing Body is Sir Usha Nath Sen, C.B.E., Vice-Chairman, Dr. Jivraj N. Mehta, L.M. & S., M.D., M.B.C.P., F.C.P.S. Director-General of Health Services, Government of India, and the Secretary-General, Sardar Bahadur Balwant Singh Puri, C.I.E., O.B.E.

The Indian Red Cross Society professes itself as an essentially Indian Society. Most of its members (about 96 per cent.) are Indians. It is controlled in India. Its headquarters are at New Delhi. The Society received a gift of a lakh and a half of rupees from H. H. the Nawab of Junagadh to build headquarters offices in New Delhi. It has branches in every Province of India and Pakistan and in several States. These branches are again sub-divided into districts, so that there is a network of Red Cross centres all over the sub-continent. The provincial branches appoint representatives to the Central Committee, called the Managing Body. This Central body, after deduction of management expenses, distributes all its income from invested funds among the branches for their activities.

The development of child health services is one of the important peace-time activities. The various branches of the Indian Red Cross Society have initiated and maintained Maternity and Child schemes in the Provinces and States. In the absence of a Maternity and Child Welfare Section under the Government of India, the Bureau functions as Central Office for information and technical advice for the Red Cross Branches and other voluntary and official organisations conducting Maternity and Child Welfare schemes.

In view of the importance of a qualified staff to conduct Maternity and Child Welfare schemes, the Indian Red Cross Society has all along encouraged training schemes for health personnel. The provincial schemes for training of Health Visitors, Midwives and dais have received assistance from the Maternity and Child Welfare Bureau.

The Director of the Bureau keeps in touch with other activities which help to promote maternity and child health services and as such she is the Secretary of the Maternity and Child Welfare Advisory Sub-Committee of the Indian Research Fund Association, the Delhi Maternity Services Co-ordinating Committee and the

Association of Medical Women in the sub-continent. She also represents the Indian Red Cross Society on the Inter-Services Benevolent Fund Committee dealing with Indian Forces' Families Maternity and Child Welfare Services and on the Girl Guide Association.

The Indian Red Cross Society has supported schemes for inauguration of Public Health Nursing in the sub-continent and has offered scholarships to candidates for such training. The Society, in addition to the endowment fund for post-graduate scholarship under the Indian National Committee of the Florence Nightingale International Foundation, has recently created a few scholarships for post-graduate training of nurses to enable suitable candidates to have a year's Public Health Nursing training in Canada.

Popular health education is carried on steadily by the Society by varied methods. Health lectures in many different vernaculars are regularly organised under Red Cross auspices illustrated by films and slides.

A large number of civil hospitals in the sub-continent receive regular assistance from Red Cross funds.

The number of trained nurses registered on the Red Cross roll maintained for civil emergency service is eighty-seven. These nurses belong to different parts of the sub-continent, and with a view to ensuring speed and accuracy at the time of need, they are asked twice a year to intimate any change of address to headquarters.

FINANCES.—The operations of the Joint War Committee were brought to a close in June 1920 with a capital investment of the face value of Rs. 56,33,000 and Rs. 8,01,500-8-6 in floating and fixed deposit accounts. The Society has since invested further funds in various securities and its finances at the end of December, 1946, stood at a capital investment of the face value of approximately Rs. 78½ lakhs. The income derived from the capital of the Society (which is 3 lakhs at present), after providing for certain liabilities of the Central Society, is distributable under the Act to the Provincial Branches in proportion to their contributions to the Central "Our Day" Fund.

The Indian Forces' Medical After-Care Fund was instituted at the headquarters of the Society at the end of 1941 to provide medical relief and other ameliorative measures for discharged Indian soldiers who participated in the World War II. Assistance of the Fund was invoked by an increasing number of ex-servicemen. The total number of applications dealt with until the end of the year was 660 against 285 reported in 1945. During the year 176 ex-servicemen suffering from tuberculosis, leprosy, mental and miscellaneous ailments were helped and artificial limbs provided for seven cases.

A sum of Rs. 50,116 was given in grants during the year, thus raising the total of disbursements made during the last three years to Rs. 71,464. The financial position of the Fund continued to be satisfactory inasmuch as the initial capital of Rs. 3,64,315, steadily augmented by donations and interest, amounted to Rs. 7,18,724 at the end of 1945.

ISMAILIA ASSOCIATION

This Institution—a philanthropic and humanitarian body—was established by the members of the Ismaili Dharmic Library in 1911 under the name of the Recreation Club with the object of uplifting and elevating the poor, without distinction of caste or creed. It also tries to improve the social, economic and spiritual condition of the depressed and poor classes of people and with this intent has founded primary schools, associations and such other departments in order to ameliorate their condition and to achieve these objects by constructive and constitutional means. It also maintains orphanages, lecture halls and social workers who constantly travel and impart general education. It has branches at Ahmedabad, Ahmednagar, Karachi, Hyderabad (Sind), Poona, Warrangal, Gondia, Dhoraji, Burma and East Africa. It publishes three Anglo-Vernacular papers, namely the 'Ismaili' (a weekly Anglo-Gujarati), for the benefit of its members and the propagation of Islam. Its central office is situated in Bombay at Kandi Moholla, Imamwada Road. **Board of Executives**.—President: Abdulah S. Shivi, I.P.; Vice-President:—Rehemtulla Virji; Treasurer:—Nazarali Hashim; Chief Secys:—Abbas Alimohamed and Yusufali E. Dossa.

PASSENGERS AND TRAFFIC RELIEF ASSOCIATION

(Established in 1915). **Head Office**—Albert Building, Hornby Road, Fort, Bombay. **Objects**: (a) To ascertain and endeavour generally to obtain redress of grievances of passengers travelling either by Railways, Steamers, Tramways or Motor Buses; (b) To deal with problems of transport in general; (c) To represent to Government, Local Bodies, and other authorities as also to Railway and Steamship Companies, and Tramway Company, carrying passengers and traffic to take all proper and necessary steps to obtain redress of such grievances; (d) To take all proper and necessary steps to obtain redress of aforesaid grievances and tackling of problems relating to transport in general and (e) To hold or join with other associations, organisations or Institutions, having similar aims and objects in holding lectures, gatherings, public meetings, etc., and to carry on propaganda to further the objects of the Association and to educate the travelling public and the mercantile community with regard to their rights and remedies.

President: Jamshed J. J. Cursetji; **Vice-President**: H. N. Contractor; **Hon. Secretaries**: Verbal H. Mehta, J. G. Mehta and P. R. Shatt.

POONA SEVA SADAN SOCIETY

This Institution was started in 1909 by the late Mrs. Ramabai Ranade, the late Mr. G. K. Devadhar and a few other ladies and gentlemen in Poona, and registered in 1917. Its main object is to make women self-reliant and to train them for missionary work, including educational and medical work, on a non-sectarian basis, amongst their sisters and brethren in backward areas, especially the former. Nominal fees are charged for instruction in all classes. There are eight different departments subdivided into about 110 classes. The total

number of women and girls on the rolls at the various Centres of the Society is about 3,125. There is in Poona a common hostel for women with 125 inmates including inmates from Backward Classes. Two fully qualified nurses were so far sent by the Society for Post-graduate Course in Public Health Nursing at the Bedford College for Women, London, with the partial help of a scholarship from the League of Red Cross Societies, Paris. Besides, there are Maternity Hospitals, Nursing Homes and Infant Welfare Centres at Alibag, Sholapur and Baramati under the management of the Society in connection with other organisations. The Institution is largely dependent upon public contributions and Government aids. The annual expenditure of the whole organisation now exceeds Rs. 3,00,000.

President: Shrimant Sow, Laxmidevi Nalk Nimbalkar, Rani Saheb of Phaltan; **General Secy.**: Lady Supdt.: Miss Kashibai Athavle, B.Sc.; **Jt. General Secy.**: Mrs. Indumathibai Phadake, B.A. (Hons.), B.T.; **Hon. Medical Adviser**: Dr. N. L. Ranade, B.A., M.B.B.S.; **Asst. Secy.**: C. G. Kulkarni, B.A., B.T.; **Member in charge of Propaganda Work and Collection of Funds**: N. S. Pathak, M.A., S.T.C.

SAFETY FIRST ASSOCIATION OF INDIA, THE

(Incorporated in 1932). **Registered Office**: Dinkar Vacha Road, Church Gate Reclamation, Bombay. The Association is registered under Section 26 of the Indian Companies Act. The liability of its members is limited by guarantee to a contribution of Rs. 5.

The aims include the promotion of safety teaching and safety measures for the prevention of accidents on roads, in factories, mines, workshops, schools and homes and the encouragement of co-operation between different sections of road-users and between employers and employees.

In this connection, sustained educational safety propaganda is conducted through the Press, Platform, the Wireless, the Association's monthly magazine "Efficiency News" and "Radiant Youth" as well as through publications such as Industrial Efficiency, Communiques, Games Lessons, Indian Highway Codes leaflets and posters, exhibition film stars.

President—The Hon'ble Sir Rahimtoola Chinnoy, Kt.

Hon. General Secretary.—P. J. D'Souza.

SERVANTS OF INDIA SOCIETY

The Servants of India Society, founded by the late G. K. Gokhale in 1905, is a body of men who are pledged to devote their life to the service of the country on such allowances as the Society may be able to give. Its objects are to train national missionaries for the service of India and to promote, by all constitutional means, the interests of the Indian people. Its present strength is 28 members. The Society has its headquarters in Poona with branches at Madras, Bombay, Allahabad and Nagpur, and

other centres of work at Mayanur, Mangalore and Calicut in the Madras Presidency; Shendurjana in C.P.; Lucknow, Kotdwara and Moradabad in U.P.; Lahore in the Punjab, Cuttack and Raigada in Orissa.

The Society's work is primarily political but as it believes in all-round progress of the Indian people, it has always laid equal emphasis on social, economic, educational, labour and depressed class activities and has worked in these fields. The political work is done through the legislatures, the non-official political organizations deputations to foreign countries and propaganda.

In the field of social, economic and educational work, the Society's activities are equally varied. Some of its members are practically the founders of such institutions as the Poona Seva Sadan, Bombay and Madras Social Service Leagues, the U.P. Seva Samiti, and the Bhi Seva Mandal catering for the needs and uplift of the aboriginal tribes in Gujarat. The Society has been conducting a model Depressed Class Mission in Mangalore and the Devadhar Malabar Reconstruction Trust activities in Malabar district. During natural calamities such as floods, famine and epidemics, the Society has done relief work in every part of India. By its work in the Mopla rebellion, the Society has become a household name in Malabar. During recent years several members of the Society have paid special attention to rural reconstruction, including rural education.

The Society conducts two papers.—The *Dnyan Prakash*, the oldest Marathi daily, and the *Hitavadi*, an English daily issued from Nagpur. The Society has also published several pamphlets on public questions of the day.

The question of the subjects of Indian States has also engaged the attention of the Society and some of its members, particularly S. G. Vaze and A. V. Thakkar, are devoting a part of their energies to that work.

Hon. Pandit H. N. Kunzru is the President, A. V. Thakkar, the Vice-President and D. V. Ambekar, the Secretary.

The Society is a non-communal, non-sectarian body which does not recognise any caste distinctions.

SEVA SADAN

The Seva Sadan Society was started on the 11th of July 1908, by the late B. M. Malabari and Dayaram Gidumal. It is the pioneer Indian ladies' society for training Indian ministrant sisters and through them, serving the poor, the sick and the distressed. To spread its Gospel far and wide, the first branch was opened at Poona as early as 1909. The Society has its headquarters in Gamdevi, Bombay, and maintains the following departments of work: (1) Home for the Homeless; (2) Ashramas (Training Homes); (3) a Marathi Training College, with a primary School; (4) Home Education Classes; (5) Industrial Department including a workshop; Sewing, Cutting, Hosiery, Cooking and Pastry, and machine and hand Embroidery are among the chief industries taught. The total number of women in the different classes is over 700.

Hon. Secretary: Miss B. A. Engineer, M.A., LL.B., M.B.E., J.P.

SOCIETY FOR THE PROTECTION OF CHILDREN IN WESTERN INDIA

Office and Homes at King's Circle, Matunga, Bombay.

The Objects of the Society are: To rescue children of all castes and creeds from the street of Bombay, to prevent begging or other improper use of poor children by adults, to pass such children on to existing charitable Institution and to provide for those otherwise unprovided for, with the support and assistance of the police to prevent children so far as possible from appearing in Police Courts, to prevent the public and private wrongs of children and the corruption of their morals, to take action for the enforcement of the laws for the children and if necessary to suggest new laws or amendments to the existing laws, to promote education, to provide and maintain an organization for those objects, to do all other lawful things, incidental or conducive to the attainments of the foregoing objects.

Several experiments are being carried out successfully in self-expression and self-Government by children of the B. J. Home. Children's Act of 1924. Subscription for Annual Membership, Rs. 10; for Life Membership, Rs. 100.

THEOSOPIHICAL SOCIETY

Internal Headquarters: Adyar, Madras. Founded at New York, 1875, transferred to Madras, 1882 and incorporated, 1905.

Objects: To form a nucleus of the Universal Brotherhood of humanity, without distinction of race, creed, sex, caste or colour; to encourage the study of comparative religion, philosophy, and science; to investigate unexplained laws of nature and the powers latent in man.

Founders: Colonel H. S. Olcott and Madam H. P. Blavatsky; Past Presidents: Col. H. S. Olcott, 1875 to 1907, Dr. Annie Besant, 1907 to 1933 and Dr. G. S. Arundale, 1933-1945; Present President: C. Jinarajadasa, M.A. (Cantab.); Vice President: Sidney A. Cook; Recording Secretaries: Miss Helen V. Sahara, A.F.L.A. (Aust.); Mrs. Jane Clumbeck; Treasurer: C. D. F. Shores.

There are National Societies, or Sections in 47 countries. Each Section organizes its own activities. The Indian Section consists of 300 Lodges with headquarters at Benares City, U.P. General Secretary: Rohit Mehta.

Headquarters activities include the international organization and Theosophical publications. Tributary activities: Kalakshetra (Rukmini Devi's Cultural Centre), The Besant Theosophical School and other schools, The World Federation of Young Theosophists, The Order of the Round Table, etc.

The Society has its own printing house (Vasanta Press) and the Theosophical Publishing House where books and journals are produced and dispatched to many countries.

The Adyar Library, containing about 50,000 books and pamphlets in the Western Section, over 24,000 Sanskrit books and MSS in the Eastern Section, and more than 2,000 Tamil

MSS in the Dr. V. Swaminatha Iyer collection owned by Kalakshetra), is one of the finest oriental libraries in the world.

The Headquarters estate comprises nearly 300 acres, extending east along the Adyar river from the Adyar Bridge to the sea, with many picturesque buildings in beautiful gardens including temples of the great religions. The banyan tree is one of the finest in India.

WESTERN INDIA NATIONAL LIBERAL ASSOCIATION—(Founded in 1919)

The Association was formed, in pursuance of clause (b) of Resolution XI of the First Session of the All-India Conference of the Moderate Party, with a view to do sustained work for the political progress and the moral and material welfare of the people; to give expression from time to time to the considered opinion of the Party on matters of public interest; and to inform and educate public opinion in this presidency in support of its views, policy and methods.

The objects of the Association are the attainment by constitutional means of full Dominion status for India at the earliest possible date. For the promotion of these objects, the Association shall adopt constitutional methods of agitation and work and shall foster a spirit of broadminded liberalism based on principles of liberty, equality and fraternity among the different classes and communities of the people. For the fulfilment of these objects the Association shall carry on educative and propagandist work by means of leaflets, pamphlets and other publications, (a) representations to Government, (b) meetings or conferences, lectures and all such methods as may be deemed practicable and expedient to educate public opinion, and (c) for advancing the interests of the Liberal Party by organising and influencing elections to the legislatures, Central and Provincial, to Municipalities and District Local Boards.

The affairs of the Association are conducted by a Council consisting of 46 members who are elected every two years.

Office:—107, Esplanade Road, Fort, Bombay.

WOMEN'S INDIAN ASSOCIATION "MERU," TEYNAMPET, MADRAS

This Association was started in Madras in July 1917, with aims of service.

Aims and Objects:—To present to women their responsibilities as daughters of India. To secure for every girl and boy the right of education through schemes of compulsory primary education, including the teaching of religion. To secure the abolition of child-marriage and other social evils. To secure for women the vote for Municipal and Legislative Councils on the same terms as it is or may be granted to men. To secure adequate representation of women on Municipalities, Taluk and Local Boards, Legislative councils and Assemblies. To establish equality of rights and opportunities between men and women. To help women to realise that the future of India lies largely in their hands; for as wives and mothers they have the task of training, guiding and forming the character of the future rulers of India. To band

women into groups for the purpose of self-development and education and for the definite service of others.

The Association is actively engaged in the promotion of adult education, the training of women in industrial occupations and slum welfare work.

It interests women in maternity and child welfare work, in the uplift of the depressed classes and in other social and welfare activities for the general betterment of Indian society; has worked successfully for securing franchise for women in India (see pages 93 and 94 of the Simon Report, Vol. II), and compulsory education for girls and also actually helped in the passage of Child-Marriage Restraint Act in the Assembly and the Acts for the Suppression of Traffic in women and children and the abolition of the Devadasi system. The Association is affiliated to all the important progressive women's associations in India and throughout the world. It was the initiator of the All-India Women's Conference and the First All-Asian Women's Conference at Lahore. The Madras Seva Sadan, the Madras Children's Aid Society, The Aavali Home for Orphan Children and the Montessori School owe their origin to the efforts of this Associations. The Association opened a Rescue Home to facilitate the working of the Rescue Section of the Immoral Traffic Act, enforced by Government. The Home was opened on 21st March 1934 by Lady Beatrice Stanley and is now under the Madras Vigilance Association.

YOUNG MEN'S CHRISTIAN ASSOCIATION

This Association, which was founded by the late Sir George Williams in 1844, is now a world-wide movement, well established in almost every country in both the hemispheres. The aim of the Association is, through its religious, social, educational, and physical work to answer the fourfold—spiritual, social, mental and physical—needs of young men and boys.

The Young Men's Christian Association, though relatively new to India, is spreading rapidly. The 'local' Associations are autonomous and governed by local Boards of Directors. These Associations in Convention elect a General Board which is responsible for the supervision and expansion of all forms of the Association work in India, Burma and Ceylon.

There are now 65 Associations in large towns and cities and many village Associations with many thousands of members of all races and creeds. The following Associations own one or more buildings which serve as the local headquarters: Allahabad; Alleppey; Bangalore; Bombay; Calcutta; Calicut; Coimbatore; Colombo; Coonoor; Delhi; Galle; Hyderabad; Jubbulpore; Kandy; Karachi; Kunnankulam; Kottayam; Lahore; Madras; Madura; Nagpur; Naini Tal; Ootacamund; Poona; Rangoon; Ernakulam; Risalpur; Salem; Secunderabad; Simla; Trivandrum; Wellington. The others use rented or rent-free buildings.

The work of the National Council and of the local Association is carried on by numerous voluntary workers and Committees, assisted by 92 specially trained full-time Secretaries. Fully cognisant of the generous help in men and money the Association has received in the

past from overseas organisations, the Indian Y.M.C.A. today have their own men conducting their affairs; five secretaries from foreign Councils still contribute their share to the work of the Indian Movement but all the rest are recruited in India and financed in India.

The work of the National Council (excluding that of the 65 local Y.M.C.A.s) call for a Budget of Rs. 91,879 in 1947. Of this sum Rs. 24,000 has to be raised from the public in India.

The Headquarters of the National Council in 5, Russell Street, Calcutta. The officers are:—

Patron:—Rear-Admiral the Earl Mountbatten of Burma, K.G., P.C., G.M.S.I., G.M.I.E., G.C.V.O., K.C.B., D.S.O.

President of the National Council:—H.E. Raja Sir Maharaj Singh, Kt., C.I.E., Bar-at-Law.

National General Secretary of India, Burma and Ceylon:—T. D. Santwan, 5 Russell Street, Calcutta.

The Bombay Association now possesses four well-equipped buildings:—Wodehouse Road, Lamington Road, Rebsch Street and Reynolds Road. **Patron** of the Association, Lt.-Col. The Right Hon'ble Sir John Colville, P.C., G.C.I.E., T.D.; **President:** Sir Francis Low, Kt.; **General Secretary:** J. S. B. Abraham. In connection with each branch there is a well-managed hostel providing accommodation for over 200 young men. These branches are managed by a Committee working under the Board of Directors. Each Branch organisation directs many and varied activities designed to meet the physical, spiritual, social, and mental needs of their members. A Welfare Service agency for labourers started in 1924 is now conducting four centres, serving mill workers, Municipal menial employees, Port Trust and Railway employees. A programme of education, lectures, physical culture, play and general uplift, profitably fills up the leisure time of the workers and their families. The Association is responsible for the direction of three public playgrounds in the city, which are financed by the Municipality.

YOUNG WOMEN'S CHRISTIAN ASSOCIATION OF INDIA, BURMA AND CEYLON

This Association founded in the year 1875 was organised nationally in 1896.

The aim of the Association is to unite women and girls of India, Burma and Ceylon in fellowship and mutual service for their spiritual, intellectual, social and physical development.

COMMERCIAL AND INDUSTRIAL

BOMBAY PIECE-GOODS NATIVE MERCHANTS' ASSOCIATION

Office:—Mulji Jetha Cloth Market Hall, Bombay.

The objects of the Association are:—

(a) To promote, by creating friendly feelings and unity amongst the merchants, the business of the piece-goods trade in general at Bombay, and to protect the interests thereof; (b) to remove, as far as it will be within the powers of

intellectual, social and physical development. The Association exists for women and girls of all communities. There are the following branches: General 121; Fellowship Groups 31; School Girl and Junior Branches 32; Girl Guide Companies 11. The needs of girls are met by recreation, clubs and classes, lectures, commercial classes, Bible Study and devotional meetings, and meetings for social intercourse. Hostels, some of them holding as many as 70 girls, are established where there is a demand for them and the Association, at present owns 25, including 9 Holiday Homes in the hills. These hostels accommodate working girls, teachers, nurses, students and apprentices. In addition to Holiday Homes, Summer Conferences are held annually in Ootacamund in South India and at Mussoorie, Special Girls' Camps are arranged from time to time in many centres.

Traveller's aid work is done in the large ports, and a large number of transient guests and visitors are accommodated in the Homes in these centres. The Association also runs Employment Bureaux through the agency of which many girls find positions. The commercial schools train girls for office and business life. These larger Associations are manned by trained Secretaries, some of whom come from India, Great Britain, America, Australia, New Zealand and Canada, though the majority of staff members are found and trained in India. In many of the smaller branches where the work is of a simpler nature, it is carried on by voluntary workers who render faithful service year by year.

The Association, which is affiliated to the World's Young Women's Christian Association is international and inter-denominational. Full membership is open to all who declare their faith in our Lord Jesus Christ and desire to serve others in His spirit of love, and Associate membership is open to any girl or woman, regardless of what her religion may be, who wishes to join the world-wide fellowship of the Y. W. C. A. and declare her sympathy with its purpose, and to share in its activities.

President, National Committee:—Rani Lady Maharaj Singh. **Vice-Presidents:** Mrs. G. Dey, Mrs. John Matthai, Mrs. Ahmed Shah, Mrs. Ba Maung Chain and Mrs. Loss.

Copies of the Annual Report and other printed matter can be obtained from the National Office which is at 37, Cantonment Road, Lucknow, U.P. The official organ of the Association is the leaflet "Everymember" which is issued each month and sent to members and friends of the Association.

the Association to do so, all trade difficulties of the piece-goods business and to frame such line of conduct as will facilitate the trade; (c) to collect and assort statistics relating to piece-goods and to correspond with public bodies on matters affecting the trade, and which may be deemed advisable for the protection and advancement of the objects of the Association or any of them; and (d) to hear and decide disputes that may be referred to the Association for arbitration.

The following are the office-bearers for the current year:—

Chairman:—

Purshottam Mulji Kapadia, Advocate.

Deputy Chairmen:—

(1) Narottamdas Keshavlal, J.P.

(2) Harjivan Bhagwandji.

Hon. Jt. Secretaries:—

Padamsey Damodar Govindji, J.P.

Himatlal Trimbaklal Muni.

Navnilal Lallubhai Shah.

Hon. Treasurer:—

Jethabhai Kallanji.

DEPARTMENT OF COMMERCIAL INTELLIGENCE AND STATISTICS

(1, COUNCIL HOUSE STREET, CALCUTTA)

The Department of Statistics was re-absorbed into the Department of Commercial Intelligence with effect from the 1st December, 1922. The joint department has its office at No. 1, Council House Street, Calcutta, and was until lately administered by the Director-General of Commercial Intelligence assisted by two Deputy Directors and an Assistant Director. The posts of Director-General and Deputy Directors having been abolished there are now two Directors, one designated Director of Commercial Intelligence and the other Director of Statistics with one Assistant Director. It embraces two distinct classes of work; (a) the collection and dissemination of information connected with overseas trade which may be of use to Indian firms and (b) the compilation and publication of All-India statistics.

Among the important publications for which the Department is responsible are the following annual volumes:—Statement of the Foreign Seaborne Trade and Navigation of British India, Statistical Abstract for British India, Agricultural Statistics, Estimates of Area and Yield of Principal Crops and Indian Customs Tariff. The department also publishes a weekly journal—"The Indian Trade Journal"—the principal features of which are (a) information as to tariff changes in foreign countries which affect Indian interests, (b) notices of tenders called for and contracts placed by Government departments and public bodies, (c) crop reports and forecasts, (d) Government orders, communications and other notifications affecting trade, (e) analysis of Indian trade statistics, (f) market reports, price and trade movements of the staple exports and imports, (g) trade enquiries for securing trade introductions, and (h) monthly, quarterly and annual reports of the Indian Trade Commissioners abroad and Summaries of the leading features of consular and other trade reports.

The Department also administers the COMMERCIAL LIBRARY AND READING ROOM located at No. 1, Council House Street, Calcutta. This was at first a small departmental library used for the purpose of answering enquiries, but in 1919 the Government of India agreed to the formation of a combined technological library of reference in Calcutta in place of the separate

libraries attached to the Departments of Commercial Intelligence and Statistics, and Patents and Designs, and the resultant Commercial Library and Reading Room was placed under the administrative control of the Director-General, which control is now exercised by the Director of Commercial Intelligence. It has now been expanded into a first-class technical library containing over 21,325 volumes on different subjects of commercial, economic and industrial interest as well as Indian and foreign statistical publications, and over 385 technical and commercial journals and market reports. Ordinarily books are consulted in the Library but they are also available on loan upon deposit of value throughout India.

The Department works in close co-operation with the Directors of Industries and other Government Departments in India, with the Indian Trade Commissioners in London, Toronto (Canada), Mombasa (East Africa), New York, Buenos Aires (Argentina), Alexandria, Sydney (Australia), Tehran (Persia) and the Indian Trade Agent, Kabul, with His Majesty's Trade Commissioners in India and the Dominions and with Consular Officers in various parts of the world.

EAST INDIA COTTON ASSOCIATION, LIMITED

The Association is the outcome of the findings of the Indian Cotton Committee which was appointed by the Governor-General in Council under a resolution dated September 27th, 1917. Until the end of 1917, the Cotton Trade of Bombay was in the hands of seven distinct bodies, viz., The Bombay Cotton Trade Association, Ltd., The Bombay Cotton Exchange, Ltd., The Bombay Millowners' Association, The Bombay Cotton Brokers' Association, Ltd., The Marwari Chamber of Commerce, The Bombay Cotton Merchants' and Mucadams' Association, Ltd., and The Japanese Cotton Shippers' Association. None of these bodies was representative of the trade as a whole and their interests often came into conflict with each other. The necessity of a system of periodical settlements, such as existed in Liverpool, was badly felt, especially when speculation was rife in figures which were so excessive in 1918 that the Trade had to invoke the aid of Government to prevent a financial crisis.

The Cotton Contracts Committee was created under the Defence of India Act in June, 1918 as a temporary measure under the Chairmanship of G. Wiles, L.C.S. This body was replaced by the Cotton Contracts Board in 1919, which continued to function until May, 1922, when the Act under which the Board worked, was repealed, and its functions were carried on by the East India Cotton Association under Bombay Act No. XIV of 1922.

The Association continued to function under the above Act until 31st October, 1932. With effect from 1st November, 1932, the Association has been regulating transactions in cotton under Bombay Act No. IV of 1932 under which it has been declared to be a recognised Cotton Association.

The constitution of the Board of Directors is as under:—

Sir Purshotamdas Thakurdas, K.B.E., C.I.E. (President); Ramdas Kilachand (Vice-President) (Buyers' Panel); Jehangir Pestonji Patel, Madanmohan R. Rulya, Arthur Pether (Buyers' Panel); Sundaril B. Dalal, Shivchandra Jhunjhunwala, Bhawanji A. Khimji, M.L.A., (Sellers' Panel); Umadutt Nemanal, Hemraj Anandilal, J.P., Madanlal Nemanal, Hiralal A. Dave, Mahabirprasad Ramrikhdas, Ramanath A. Podar, M.L.A. (Brokers' Panel); Rao Bahadur Sir Madhwarao G. Deshpande, K.B.E., Rao Bahadur F. B. Laxmeshwar Kurtkoti, Mian Mohd. Nurullah, M.L.A. (Cotton Growers' Representatives nominated by the Indian Central Cotton Committee); K. S. Patil, B. D. Deshmuk, M.L.A. (Cotton Growers' Representatives nominated by the Government of Bombay).

Officers.—C. M. Parikh, B.Com., Secretary; A. R. Meneses, J.P., Dy. Secretary and Manager, Clearing House; S. A. P. Aiyar, Assistant Secretary.

Some of the objects for which the Association is established are:—To provide and maintain suitable buildings or rooms for a Cotton Exchange in the City of Bombay and elsewhere in India and to regulate admission to and prohibition of the use thereof and the nature and times of such user, whether in the case of the general body or particular classes or any individual or firm or company using the Exchange; to provide forms of contracts compulsory or permissive and regulate the making, carrying out and enforcement or cancellation of contracts; to adjust by arbitration or otherwise controversies between persons engaged in the cotton trade; to establish just and equitable principles in the trade and to maintain uniformity of control; to fix or adopt standards of classification of cotton; to acquire, preserve and disseminate useful information connected with the cotton interest throughout all markets; to decrease or insure the local risk attendant upon business; and generally to control, promote and regulate the cotton trade in the Presidency of Bombay and elsewhere in India, improve its stability and augment the facilities with which it may be conducted; to establish and maintain a Clearing House for the purpose of dealing with cotton transactions, and to regulate admission to and prohibition of the user thereof and the nature and times of such use whether in the case of the general body or firm or company using the Clearing House; to regulate the handling and exportation of cotton from India and the importation of cotton into India in so far as it may be imported; to bring, prosecute, or defend, or aid in bringing, prosecuting, or defending, any suits, actions, proceedings, applications, or arbitrations on behalf of Members or Associate Members or Special Associate Members or otherwise as the Directors of the Association may think proper or conducive to the objects of the Association and to prescribe the principle of framing of contracts with a view to eliminating the temptation and possibility of speculative manipulation.

The Association has a fine Building, at Sewri Cotton Depot, containing 121 Buyers' Rooms and 84 Sellers' Rooms, a large Trading Hall

on the lines of Liverpool and New York Exchanges, Survey Rooms, Appeal Rooms, etc.

The Association has another fine Building "The Cotton Exchange" at the corner of Sheikh Memon Street and Kalbadevi Road wherein trading in "forward" contracts is conducted. It comprises of a basement, a ground floor (Trading Hall) with two galleries and six other upper floors. There are 114 telephone cabins for members on the ground floor and the galleries. The top floor accommodates the administrative offices of the Association and the Clearing House, and the remaining five floors contain 113 rooms for members' offices.

The Association has a membership of 536.

The Bombay Cotton Annual containing matters relating to every branch of the trade is published annually in December and statistics are issued twice weekly.

Address:—Cotton Exchange, Marwari Bazar, Bombay 2.

Telephone:—Bombay No. 26176,

Telegraphic Address:—"Cotboard."

GRAIN & OIL-SEEDS MERCHANTS' ASSOCIATION

The object of this body is "to promote the interests of the merchants and to put the grain and oil-seeds trade on a sound footing." It is an influential body with a large membership. Office-bearers for the s.y. 2003 are:—

President:—Sheth Velji Lakhamsi Napoo, B.A., LL.B.

Vice-President:—Sheth Devji Rattansey.

Hon. Secretary:—Sheth Vallabhdas Peraj.

Secretary:—K. N. Joshi.

The address of the Association is Masjid Bunder Road, Mandvi, Bombay.

INDIAN CENTRAL COTTON COMMITTEE

The Office.—Nicol Road, Ballard Estate, Bombay. Offg. Secretary.—C. J. Bocarro, M.B.E., M.A. Offg. Asst. Secretary.—Raj Sahib Ajodhya Sahai, Offg. Director, Technological Laboratory.—D. L. Sen, M.Sc. (Tech.) (Mach.), M.Sc. (Bom.), A.I.I.S.C., F.I.C.

The Indian Central Cotton Committee was constituted by the Government of India in March 1921, as a result of the recommendation of the Indian Cotton Committee of 1917-18. Originally the Committee was purely an advisory body but with its incorporation under the Indian Cotton Cess Act in 1923, it became an administrative body having at its disposal funds for the improvement and development of the growing, marketing and manufacture of cotton in India. The funds of the Committee are derived from the Cotton Cess of two annas per bale (four annas for the first three years) which was imposed in 1923. Having complete control over its funds, the Committee has been able to build up a satisfactory reserve and is at present spending about Rs. 10 lakhs per annum on cotton improvement, mainly on agricultural and technological research and seed distribution and marketing schemes.

The activities of the Committee now extend to all branches of cotton improvement in India, and, as an authoritative body to advise the Central and Provincial Governments on important matters of cotton policy, it has attained an outstanding position. The Committee provides funds for research into cotton problems of all-India importance and for the development, extension and marketing of improved varieties of cotton. The aim, however, has always been to supplement and not supplant the work of the Agricultural Departments in the cotton growing provinces and Indian States. Including as it does representatives of growers, agricultural officers, traders, spinners and manufacturers, it has been an invaluable forum for the discussion of many problems of general concern.

A list of the members constituting the Committee and the various interests they represent as on 1st April, 1947, is given below:—

President.—Sardar Bahadur Sir Datar Singh, Vice-Chairman, Imperial Council of Agricultural Research.

The Agricultural Commissioner with the Government of India, ex-officio (Vacant).

Madras.—Rao Bahadur Dr. B. Viswanath, I.L.E., Director of Agriculture.

Bombay.—Dr. Ganda Singh Cheema, D.Sc., A.S., Director of Agriculture.

United Provinces.—C. Maya Das, I.A.S., Director of Agriculture.

Punjab.—Malik Sultan Ali Noon, I.A.S., Director of Agriculture.

Central Province & Berar.—R. H. Hill, C.I.E.

Sind.—Raj Bahadur R. L. Sethi, Director of Agriculture.

The Director of Commercial Intelligence, ex-officio.

The East India Cotton Association, Sir Purshotamdas Thakurdas, K.B.E., C.I.E.

The Bombay Millowners' Association, Sir Jorab Saklatvala, M.L.A.

The Bombay Chamber of Commerce, L. F. H. Joodwin.

The Indian Merchants' Chamber, Chimanlal B. Parikh.

The Karachi Chamber of Commerce, A. P. Darlow.

The Ahmedabad Millowners' Association, Nanddas Haridas.

The Tuticorin Chamber of Commerce, S. D. Hard, C.B.E.

The Upper India Chamber of Commerce, Major S. R. Pocock, M.C., M.B.E., M.L.A.

The Empire Cotton Growing Corporation, Sir William Roberts, C.I.E., M.L.A.

Commercial representatives nominated by Central Government. Central Provinces and Berar.—Pukharaj Kochhar; Dewan Bahadur Seth Jopaldas Mohita. Madras.—G. V. Doraiswamy Vaidu. Punjab.—Sardar Ujjal Singh. Bengal Representative.—Dr. N. Dutta.

Co-operative Banking Representative.—Sir Chunnil V. Mehta, K.C.S.I.

Representatives of Cotton Growing Industry.—Madras.—D. Gnanasromani; The Hon'ble Mr. H. Sitarama Reddi. Bombay.—Rao Bahadur F. B. Loxmeshwar; Rajes J. R. Deshmuk. United Provinces.—Major Nawab Sir Mohd. Jamshed Ali Khan, M.B.E., M.L.A.; Lala Basant Lal Agarwal. Punjab.—Mian Mohd. Nurulla; G. R. Sawhney. Central Provinces and Berar.—Rao Bahadur Sir Madhwarao Deshpande; Mir Riyat Ali. Sind.—Fakirjee Phirozjee Gohwala.

Representatives of Indian States.—Hyderabad State.—Raj Bahadur Kalidas Sawhney, Director of Agriculture. Baroda State.—C. A. Maclean, C.B.E., M.C., Commissioner of Agriculture. Gujior State.—N. M. Deshmuk. Rajputana and Central India States.—Rao Bahadur Dr. D. V. Bal.

Additional members nominated by the Central Government.—Rao Sahab V. C. Pavate, Deputy Director of Agriculture, S. D. Dharwar; K. H. Srinivasan, Director of Agriculture in Mysore, Bangalore; R. Balasubramania Ayyar, Cotton Specialist, Coimbatore; Musahib-i-Khas Bahadur Capt. H. C. Dhandra, Commerce Minister, Holkar State, Representative of the Holkar State; M. A. A. Ansari, Economic Botanist (oil-seeds) to Govt., U.P., Cawnpore; Sir Shankar Lal, Representative of the Cotton Millowners of Delhi; Dewan Bahadur Sir T. Vijayaraghavacharya, K.B.E.; Camer Tyabjee, Second representative of Hyderabad State; Dr. V. K. R. V. Rao, Sir Padampat Singhania; R. G. Saraiya, O.B.E., J.P., Vice-President; Sir Roger Thomas, C.I.E., G. V. Deshmuk; Khan Sahab Agha Yusuf Ali, Director of Agriculture, Bahawalpur State, Bahawalpur; Sir Chunnil B. Mehta and Sardar Bahadur Sardar Beant Singh; The Hon'ble Nawab Khurshid Ali Khan, M.B.E., M.L.A.; Dr. M. M. Junaid, Director of Statistics, Govt. of India, Dept. of Food, New Delhi; K. K. Chatur, Joint Secretary to the Govt. of India, Commerce Dept., New Delhi; D. N. Mehta, O.B.E., B.A. (Oxon.), F.R.S.A., Secy. to the Govt. of Bombay, Agr. and Rural Development Dept., Bombay.

Amongst the research schemes of the Committee, plant breeding schemes for the improvement of quality naturally take pride of place. The agencies employed by the Committee for its research work have varied little in character since 1923, though they have grown in number. It continues to maintain a Technological Laboratory at Bombay which includes a complete experimental spinning plant and a scientific laboratory for research on the cotton fibre and a Testing House which is recognised by the B.I.S.F.A. The Committee also provides a large proportion of the funds for the Indore Institute of Plant Industry.

For a considerable period the Committee restricted its grants to agricultural research, but in 1930 it was decided that the time had come to add its support to the efforts already being made to bridge the gap between the experimental station and the cultivator and to supplement the funds which the Agricultural Departments were devoting to the introduction of improvements into agricultural practice. Special attention from that time began to be devoted to seed distribution schemes.

The Committee has not stopped at the production of better cotton, but from its inception has devoted special attention to better marketing, to the prevention of adulteration and other abuses and to many other problems connected with the cotton trade of the country. Regulated Cotton Markets existed in Berar before the establishment of the Committee, and that system which had stood the test of time was commended with certain modifications for general adoption. Regulated Cotton Markets have now been established in Bombay, Central Provinces, Madras, Punjab, Hyderabad, Baroda and Indore. Similarly, on the recommendation of the Committee, the Cotton Transport Act was passed in 1923 by which Provincial Governments are empowered to exclude from any specified area cotton, *kapas* or seed from outside unless required for a special purpose and covered by a licence. Prior to the passing of this Act, inferior cottons used to be imported in large quantities into the staple cotton tracts for purposes of adulteration, to the detriment of the reputation of several valuable cottons. The Act is now in force in almost all the important staple cotton areas of Bombay, Madras and the Central Provinces as well as in Baroda, Rajpipla, Chhota Udaipur, Hyderabad and Indore, etc. In 1925, on the recommendation of the Committee, the Cotton Ginning and Pressing Factories Act was passed. This provides for a certain measure of control of ginning and pressing factories and especially for the marking of all bales of cotton pressed with a press mark and serial number which enables them to be traced to their origin. Recently the Act has been used for the prevention of watering and for the mixing of non-cotton articles with cotton. The Committee has also taken steps to bring to the notice of the trade, both in India and abroad, those improved varieties which have now reached a commercial scale.

It may be stated without hesitation that, as a result of the efforts of the Committee, the last twenty-five years have seen a marked change in the character of the Indian crop, particularly in the percentage of short and medium staple. Equally important is the result of agricultural research and its application to the yield of cotton per acre. The average yield per acre in the quinquennium 1939-44 for the whole country was 112 lbs. This is 18 per cent. higher than for the quinquennium 1927-32. The average yield per acre in 1944-45 was 121 lbs. The ascertained area under improved cotton during 1944-45 was about 52 per cent. of the total. The ultimate ideal is to encourage the establishment of single variety tracts wherever agricultural conditions and the limitations of irrigation supply and soil make this possible.

THE INDIAN JUTE MILLS ASSOCIATION

Now one of the most important, if not the most important, of the bodies affiliated to the Bengal Chamber of Commerce, was started under the following circumstances:—In 1886 the existing mills, finding that, in spite of the constant opening up of new markets, working results were not favourable, came to an agreement with the late S. E. J. Clarke, Secretary to the Chamber of Commerce as trustee, to work short time. The only mills which stood out of this

arrangement were the Hooghly and Serajunge. The first agreement for six months dating from 15th February 1886, was subsequently renewed at intervals without a break for five years up to February 15, 1891. The state of the market at the time of the renewals dictated the extent of the short time, which varied throughout the five years between 4 days a week, 9 days a fortnight and 5 days a week. Besides short time, 10 per cent. of the sacking looms were shut down for a short period in 1890. An important feature of this agreement was a mutual undertaking by the parties not to increase their spinning power during the currency of the agreement, only a few exceptions being made in the case of a few incomplete new mills.

KARACHI INDIAN MERCHANTS' ASSOCIATION

Established in 1902 and registered in 1925. 295 members on the roll as on 1st July 1947.

Objects:—To protect and promote Indians' trade and industry in and around Karachi and secure unanimity among them, settle members' disputes and secure equitable dealings in trade, negotiate and promote or oppose legislative and other measures affecting trade interests, maintain departments devoted to particular trades or industries, regulate trade exchanges, examine agenda of the International Labour Organisation and recommend for nomination of Employers' delegates to International Labour Conference. Represented on various public bodies, e.g., Sind Legislative Assembly, Karachi Port Trust, Karachi Municipal Corporation, N. W. R. Local Advisory Committee, Indian Central Cotton Committee, Sind Cotton Committee, Provincial Marketing Board, Traffic Committee for the City of Karachi, etc. Has a Clearing House to settle differences periodically between members *inter se*. Affiliated to Federation of Indian Chambers of Commerce and Industry, Indian National Committee and International Chamber of Commerce and Indian Chamber of Commerce in Great Britain. **President:**—Seth Jai Ramdas Savaldas. **Sr. Vice-President:**—Seth Shivji V. Kothari. **Vice-President:**—S. S. Partapsingh J. Sethi, J.P. **Chairman of the Produce Exchange Department:**—Seth Ramchandra Pannalal, B.A. **Vice-Chairman of the P. E. Department:**—Seth Mayaram Chellaram. **Offg. Secretary:**—K. G. Punwani, B.A.

MARWARI ASSOCIATION

160A, Chrittanranjan Avenue, Calcutta.

The Association was established in the year 1898.

Its chief objects are:—To promote and advance the moral, intellectual, commercial, economic, political and social interests of the Marwari community and to protect its rights and status.

To arbitrate in the settlement of disputes arising out of commercial transactions between parties either one or both of which are members of the Marwari community, provided the parties are willing to abide by the judgment and decision of the Association; to adjust controversies between members of the Association; to communicate with Chambers of Commerce and other mercantile and public bodies within or outside

India and to concert and promote measures for the protection of trade, commerce and industries in which Indians, in particular Marwaris, are engaged; to found and support establishments and institutions for disseminating commercial, technical and general education in different branches of Art and Science in the Marwari community; to take all necessary steps for promoting, supporting or opposing legislation or other action affecting the interest of the Commercial communities in general and of the Marwari community in particular either by Government or any department thereof or by any local body or bodies; to take such action as may be necessary for securing the redress of grievances of any branch of trade, commerce and industry in which the Marwari community is interested as also such other action as may be conducive to the development and growth of such trade, commerce and industry.

The constituents of the Association are the leading industrialists, exporters and importers of the province of Bengal.

The Association issues certificates of origin to exporters of indigenous goods.

The Association is a member of the Federation of Indian Chambers of Commerce and Industry.

The following are the Office-bearers:—

President:—Baij Nath Bajoria.

Vice-Presidents:—Gobardhandas Saraf and Hari Krishna Jhajharia.

Hon'y. Secretary:—Badri Prasad Poddar.

Asst. Secretary:—Mohan Lal Chokhanya.

Auditor:—M/s Singhi & Co.

Personal Asst. to the Hon'y. Secretary and Officer-in-Charge:—T. K. Sen, M.A., M.R.A.S.

The following are representatives on public bodies:—

Bengal Legislative Assembly:—Anandji Lal Poddar.

Board of Industries, Bengal:—Hari Krishna Jhajharia.

Non-Official Jail Visitor, Alipore Jail:—Anandji Lal Poddar.

E. I. Rly. Wagon Supply Advisory Committee:—Jahabir Prasad Kaseera, B.Com., B.L., M.R.A.S.

MILLOWNERS' ASSOCIATION, BOMBAY

Established in the year 1875, the Millowners' Association, Bombay, is one of the oldest and most important organisations of industrial employers in the country. Membership of the association is mainly confined to cotton spinning and weaving concerns drawn from every part of India including the Indian States. The great work done by the Association ever since its inception has been generally recognised, and the important role which it fills in the economic life of the country is perhaps nowhere better illustrated than in the representation accorded to it in the Central and Provincial Legislatures, in local authorities such as the Bombay Municipal Corporation, and on public bodies such as the Bombay Port Trust. The Association is also represented on all important all-India bodies instituted by the Central Government connected in one way or another with the interests of the textile industry.

By special arrangement with the Department of Commercial Intelligence and Statistics, the Association compiles every month special statistics relating to the import, re-export an export trade in cotton yarn and piece-goods an artificial silk goods of British India and the Province of Bombay. The annual Cotton Mill Statement published by the Association is well known as a comprehensive and authoritative directory of cotton mills in India.

By a system of market correspondence stationed in important piece-goods consuming markets in India, the Association keeps its members regularly informed of the trend of prices and tendencies in the principal trading centres in the country. The Association also publishes every fortnight detailed lists of the average ex-mill quotations for the principal lines of cotton yarn and piece-goods produce by Bombay mills and the wholesale bazaar prices of the chief lines of goods imported into the principal ports in India.

As large employers of Labour, the Association has always adopted a forward policy in regard to labour problems, and a very large number of recommendations have been made to members during the last few years for the amelioration of the conditions of labour employed by constituent members. That some of these recommendations have subsequently been adopted by other large employers of labour and the country is at once a tribute to the excellent spadework done by the Association in the field of social and labour work.

The Association has on its rolls 154 members including 5 woollen mills, 3 silk mills, 2 cotton ginning and pressing factories and 3 dye and bleach houses.

Managing Committee of the Association for the year 1947:—Bhagavandas C. Mehta **Chairman**; H. G. H. Everitt, **Deputy Chairman**; Sir Sorab Saklatvala, Kt., M.L.A.; Sir Vitthal Chandavarkar, Kt.; Dharamsey Mulra Khatau; E. D. Sheppard; Neville N. Wadia A. Pether; Krishnaraj M. D. Thackersey J. C. Burns; Navinchandra Mafatlal; G. I. Somani; J. C. Lancashire; L. F. H. Goodwin W. B. Bryden; Ramnath A. Podar; R. S. Khatian; Radhakrishna Ramnarain Ruia Motilal Tapuriah; S. P. Jain; N.S.V. Aiyer **Secretary**; R. G. Gokhale, **Labour Officer**.

The Office of the Association is located at 2nd Floor, Elphinstone Building, Churchgate Street Fort, Bombay, and the Telephone Nos. are 31041 and 31042. Tel. Address: Millomutua.

The following are the Association's representatives on public bodies:—

All-India Board of Textile Studies: Dharamsey Mulraj Khatau; **Bombay Legislative Assembly:** Sir Sorab Saklatvala, Kt., M.L.A.; **Bombay Municipal Corporation:** Ramnath A. Podar **Bombay Port Trust:** Krishnaraj M. D. Thackersey **Bombay Provincial Industries Committee:** Nevill N. Wadia; **Bombay Smoke Nuisances Commission:** H. A. Wood and G. S. Karpur; **College of Engineering Advisory Committee:** Sir Vitthal Chandavarkar Kt.; **Development of Bombay Advisory Committee:** Sir Vitthal Chandavarkar, Kt., **Empire Cotton Growing Corporation:** Administrative Council; H. H. Sawyer; **Indian Central Cotton Committee:**—

Sir Sorab Saklatvala, Kt., M.L.A.; *Local Advisory Committee, B.B. & C.I. Railway*: Sir Vithal Chandavarkar, Kt.; *Local Advisory Committee, G.I.P. Rly.*: Krishnaraj M. D. Thackersey; *Royal Institute of Science Advisory Committee*: Sir Vithal Chandavarkar, Kt., *Sydenham College of Commerce and Economics Advisory Board*: B. S. Dabke; *Technological Research Sub-Committee of the Indian Central Cotton Committee*: Bhagvandas C. Mehta and A. D. Walwyn; *Textile Division Council of the Indian Standards Institution*: N. S. V. Alyer; *Textile Trade Marks Advisory Committee*: Dharamsey Mulraj Khatau, H. F. Milne and Neville N. Wadia; *Victoria Jubilee Technical Institute, Bombay*: Sir Vithal Chandavarkar, Kt.

MILLOWNERS' MUTUAL INSURANCE ASSOCIATION, LTD.

The Millowners' Mutual Insurance Association, Ltd., was registered on 30th June, 1924 as a Company limited by guarantee. The registered office of the Association is located in Elphinstone Building, Churchgate Street, Fort, Bombay.

The objects:—(a) The mutual Insurance of members of the Company against liability to pay compensation or damages to workmen employed by them or their dependants for injuries or accidents, fatal or otherwise, arising out of and in the course of their employment; (b) the insurance of members of the Company against loss or damage by or incidental to fire, lightning, etc.; and (c) to reinsure or in any way provide for or against the liability of the Company upon any assurances granted or entered into by the Company and generally to effect and obtain re-insurances, counter-insurances and counter-guarantees, etc., etc.

All members of the Millowners' Association are eligible for admission to the Mutual Company. Non-members are also eligible for membership of the Mutual, provided their application is approved of by the Committee of the Millowners' Association.

The affairs of the Mutual Insurance Association are under the Control of the Board of Directors.

The present Directors are:—

Sir Sorab Saklatvala, Kt., M.L.A. (*Chairman*).
Sir Joseph Kay, Kt., D. M. Khatau; Krishnaraj M. D. Thackersey; A. Pether; J. C. Burns; Radhakrishna S. Khaitan; Neville N. Wadia and A. C. M. Cursetjee, M.A., LL.B., *Secretary* of the Association.

PRESS ASSOCIATION, NEW DELHI/SIMLA

Established in 1938 to secure and safeguard the rights and the privileges of the press in the discharge of their duties in relation to the Central Government and the Central Legislature and to promote whatever may tend to the elevation of the status of the journalistic profession and the maintenance of the independence of the Press. *President*: Sir Usha Nath Sen, "Associated Press of India"; *Vice-President*: P. D. Sharma, "Janmabhoomi"; *Secretary*: Durga Das, "The Hindustan Times"; *Jt. Secretary*: Mohd. Jafri, "Inquilab"; *Treasurer*: S. A. Sastri, "Indian News Chronicle"; *Ordinary Members*: J. N. Sahni, "Indian News Chronicle";

B. Shiva Rao, "The Hindu"; Sri Krishna, "The Pioneer"; K. C. Sen Gupta, "United Press of India"; G. V. Krupandhi, "National Call"; O. Orestov, "Tass Agency". *Address*: 2, Keeling Lane, New Delhi.

PRESS-OWNERS' ASSOCIATION, BOMBAY

Started on 30th April 1919 to promote the interests of the printing and litho presses and allied trades, to bring about harmony and co-operation among press-owners and proprietors and to take such steps as may be necessary in furtherance of the above objects.

Secretary:—Manilal C. Mod.

Office:—196 B, Galwadi, Girgaum, Bombay 4.

YARN MERCHANTS' ASSOCIATION, LTD.

Registered Office:—11, Chawala Bldg., Tambakanta, Bombay 3.

The Association previously known as the Bombay Yarn and Silk Merchants' Association was formed in 1935 and subsequently was registered under the Indian Companies Act on the 4th June 1944 and styled as the Yarn Merchants' Association, Ltd.

Objects:—To promote and protect the interest of manufacturers, distributors and merchants carrying on business of yarn in Bombay and elsewhere in India, to regulate their methods of business to establish just and equitable principles in the trade and maintain uniformity in the rules, regulations and usages of the trade, to provide forms of contracts, fix market rates for fixed delivery contracts, arbitrate between members, to acquire, preserve and disseminate useful information connected with the trade, fix or adopt standards of classification of yarn, and in general to control, promote and regulate the yarn trade in general.

This is a unique Association in India having its members all over the country. At present there are 387 members and 183 registered brokers.

The Association has been appointed in 1945 as the nominee of the Government of Bombay for the distribution of yarn, in Bombay Province.

President: Ratilal Daryabhai Shah; *Vice-President*: Mangaldas Gopaldas Parekh; *Hon. Treasurer*: Nanakchand Devidas Khanna; *Secretary*: D. M. Boradia, B.A., LL.B.

ALL-INDIA ORGANISATION OF INDUSTRIAL EMPLOYERS

The Employers' Delegations to the various sessions of the International Labour Conference felt the necessity of a central organisation in India representing employers of industrial labour in the country with a view to studying various questions coming before these International Conferences from the Indian employers' point of view. Walchand Hirchand, who was the President of the Federation of Indian Chambers of Commerce and Industry, with the consent of the Committee, took the initiative of launching a central organisation in December, 1932, to represent Indian employers. Any organisation representing an industry, the constituents of which are employers of

industrial labour, is entitled to become a member of the All-India Organisation of Industrial Employers (briefly called A.O.I.E.). Besides this membership, any industrial concern is also entitled to become a member of the Organisation.

The annual subscription for industrial associations is Rs. 300 and for individual industrial concerns Rs. 50.

The Organisation has on its roll 20 industrial associations representing Ahmedabad and Bengal millowners, Northern India employers, salt industry, national shipping, sugar industry, Baroda State Mills and Industries, glass, coal mining, tea, Delhi Factory Owners and Jute Industry. Besides, there are about 144 big industrial concerns as members of the Organisation.

Office-Bearers for 1947-48.

President:—Seth Sakeral Balabhai, Ahmedabad.

Secretary:—D. G. Mulherkar.

Office:—28, Ferozshah Road, New Delhi.

EMPLOYERS' FEDERATION OF INDIA

The Employers' Federation of India was registered early in 1938 with the following among its main objects:—To promote and protect the interests of employers engaged in the trade, commerce, industries and manufactures of India; to promote or oppose legislative or other measures affecting their interests; to collect and circulate statistics and other information of interest to employers; to nominate delegates and advisers to the International Labour Conferences and to formulate opinions on the subjects coming for discussion before such bodies, and to promote or oppose their recommendations; to secure concerted action on all subjects involving the interests of its members; to consider and support well-considered schemes for the welfare and uplift of Labour and establish harmonious relations between Capital and Labour; and to carry on propaganda for the purpose of educating public opinion with regard to the character, scope, importance and needs of industrial enterprise as represented by the Federation.

Most of the leading employers' organisations in India are members of the Federation.

President:—Sir Homi Mody; *Deputy Presidents*:—H. D. Cumberbatch, Sir Robert Menzies and C. S. Ratnasabapathy Mudallar.

The office of the Federation is at present located at Elphinstone Bldg., Churchgate Street, Bombay.

PUNJAB FEDERATION OF INDUSTRIES, THE (AMRITSAR)

The Punjab Federation of Industries was established in 1937, with the object of creating a solid body of industrialists

of the Punjab and Northern India to promote and protect their interests through organised effort. It is now the only body of its kind in the Punjab as a purely industrial association which can speak with authority on all matters relating to industrial development. The Federation has now among its members the largest industrial units in the province and no industry of any importance is left unrepresented in the Federation.

President:—H. R. Sakhuja (Managing Director, The Upper India Metal Works Ltd., Chheharta).

Vice-President:—Som Raj Kapur (Managing Director, Messrs. Shambhu Nath & Sons Ltd.).

Secretary:—Dr. Jagdish Chand.

Members of the Managing Committee:—S. B. S. Sapran Singh Chawla (The Punjab Distilling Industries Ltd.); Satya Paul Virmani (The Jawala Flour Mills); G. E. Longdin (The New Egerton Woollen Mills); Panna Lal Talwar (Northern India Steel Works); Consta Constantinides (The Oriental Carpet Manufacturers (India) Ltd.); S. Joginder Singh Chawla (The Punjab Distilling Industries Ltd., Khassa); Dr. Dev Raj Narang (The Punjab Sugar Mills Co., Ltd.); L. Kishori Lal (The Mahabir Hosiery & Textile Mills); W. R. Watson (The New India Embroidery Mills Ltd.); Sh. Ahmed Sadeque (The Amritsar Swedeshi Woollen Mills Ltd.).

WESTERN INDIA AUTOMOBILE ASSOCIATION

Lalji Naranji Memorial Building, Churchgate Reclamation, Bombay.—The objects of the Association include: the encouragement and development of motoring; the improvement of road communications; the provision for its members of a centre of information and advice on matters pertaining to motoring; the provision for its members of protection and defence of their rights as motorists; free legal advice and defence; facilities for touring abroad and the use of International Touring Documents. *Tel. Address*:—"Windautas." Phone No. 31071 (*Three Lines*). *Branch Offices*: POONA:—Coronation Building, 7, Moledina Road; AHMEDABAD:—Lal Darwaja.

Patron:—H. E. Raja Sir Mahara Singh, Governor of Bombay.

President:—V. C. Setalvad, M.A., LL.B. *Vice-Presidents*:—P. R. Bhatt, J.P. and K. G. Dayal.

Secretary:—Jehangir J. K. Patell, B.A., R.A., F.C.R.A. *Asst. Secretary*:—K. G. Subramanian, B.A.

Other Motoring Associations in India and Ceylon are: The Automobile Association of Bengal, 40, Chowringhee Road, Calcutta; The Automobile Association of Ceylon, P. O. Box 338, Colombo; The Automobile Association of Northern India, Charing Cross, The Mall, Lahore; The Automobile Association of Southern India, 200, Mount Road, Madras and the United Provinces Automobile Association, 32-A, Canning Road, Allahabad.

MEDICAL AND NURSING

NATIONAL ASSOCIATION FOR SUPPLYING
MEDICAL AID BY WOMEN TO
THE WOMEN OF INDIA

The National Association for Supplying Medical Aid by Women to the Women of India was founded by the Countess of Dufferin in 1885, the object being to open women's hospitals and women's wards in existing hospitals; to train women doctors, nurses and midwives in India; and to bring them out when necessary from Europe. An endowment fund of about 6 lakhs was obtained by public subscription. In addition branches were formed in each Province, each branch having its own funds and each having a number of Local Committees and Zenana Hospitals affiliated to it.

The Central Fund gives grants-in-aid to several Provincial branches; it gives scholarships to a number of women students at the medical colleges of Bombay, Calcutta, Madras and Delhi. It has in the past brought from England a certain number of European medical women. It has assisted by grants-in-aid the building of a number of zenana hospitals in different parts of India. It has affiliated to it 12 Provincial branches and a number of Local Committees.

The Government of India subsidise the Countess of Dufferin's Fund to the extent of Rs. 3,70,000 per annum to maintain a Women's Medical Service for India—this service consists of 45 officers, with a training reserve of 25 doctors and one officer in the junior service. Medical women either British or Indian, holding registrable post graduate qualifications, are eligible for the senior service.

The President is Lady Mountbatten, the Hon. Jt. Secretary is the Surgeon to H. E. the Governor-General of India and the Secretary Dr. Jean M. Orkney, Chief Medical Officer, Women's Medical Service, Red Cross Buildings, 20, Talkatora Road, New Delhi.

THE TRAINING RESERVE OF THE
WOMEN'S MEDICAL SERVICE

This Service has a sanctioned cadre of 22, and is open to women graduates in medicine of the Indian Universities. Salaries range from Rs. 200 to Rs. 250 per month, with furnished quarters.

2. Two of the 22 members of the reserve, but not more at any one time, may be deputed by the Executive Committee for post-graduate training.

3. Ordinarily four years shall be spent in the reserve before a member is considered for appointment to the Women's Medical Service, but the Executive Committee shall have power to shorten this period in special cases. Service in the reserve shall be considered by the Executive Committee when appointments are being made to the Women's Medical Service, but shall not of itself constitute a claim to appointment.

THE WOMEN'S MEDICAL SERVICE FOR
INDIA

This Service is included in the National Association for supplying medical aid by women to the women of India, generally known as

the Countess of Dufferin's Fund, and is administered by the Executive Committee and Council of that Fund. Recruitment to the service is made (a) in India by a Medical sub-committee of the Council which includes the Director-General, Indian Medical Service, the Honorary Joint Secretary to the Council, a medical woman, a medical man and the Chief Medical Officer, Women's Medical Service; (b) in England, by a sub-committee, including a medical man and two medical women conversant with conditions in India. These sub-committees perform the duties of a medical board examining candidates for physical fitness, and for return to duty after invaliding.

The Council determines what proportion of the members of the Service is to be recruited in England and in India respectively. In the original constitution of the Service, duly qualified medical women who were in the service of, or who had rendered approved service to the Countess of Dufferin's Fund, were to have the first claim to appointment, and thereafter special consideration was to be paid to the claims of candidates who had qualified in local institutions and of those who were natives of India.

The qualifications are that the candidate must be (a) a British subject resident in the United Kingdom or in a British Colony or in India, or a person resident in any territory of any Indian Prince or Chief under the suzerainty of His Majesty exercised through the Governor-General of India or through any Governor or other officer subordinate to the Governor-General of India. (b) Must be between the ages of twenty-four and thirty-two at entry. (c) She must be a first-class medical woman, i.e., she must possess a medical qualification registrable in the United Kingdom under the Medical Act, or an Indian or Colonial qualification registrable in the United Kingdom under that Act, and an advance post-graduate qualification. (d) The candidate must produce a certificate of health and character. The Council reserves the power to promote to the Service ladies not possessing the above qualifications, but who have shown marked capacity. Members of the Service are required to engage for duty anywhere in India. After three years of probation have been satisfactorily passed, their appointments are confirmed.

NURSING

Whilst the sub-continent cannot show the complete chain of efficiently nursed hospitals which exists in England, there has been a great development of skilled nursing of recent years. This activity is principally centred in the E. and W. Bengal, Madras, Bombay, Delhi, United Provinces, E. and W. Punjab, where the chief hospitals in the Presidency towns are well nursed, and where large private staffs are maintained, available to the general public on payment of a prescribed scale of fees. These hospitals also act as training institutions and turn out a yearly supply of fully trained nurses, both to meet their own demands and those of outside institutions and private agencies. In this way the supply of trained

nurses, English, Anglo-Indian and Indian, is being steadily increased. In Bombay the organisation went a step farther, through the establishment of the Bombay Presidency Nursing Association, which was composed of the various Nursing associations in charge of individual hospitals, and worked under the Government. The principle on which the relations of this Association with the Local Associations was governed was that there was central examination and control combined with complete individual autonomy of administration.

State Registration of Nurses.—Acts for State Registration have been passed in Madras, Bombay, re-partition Provinces of Punjab and Bengal, United Provinces, Bihar, Central Provinces, Ind. Orissa, Assam and Travancore, for Nurses, Midwives and Health Visitors and Nursing Councils have been formed. These are named in the order in which the Acts were passed and Councils formed. A Central Nursing Council for the Union of India and a Central Nursing Council for Pakistan have been passed by Ordinances in August 1947. These Councils will help to co-ordinate and make for higher and more Uniform Standards throughout each Dominion.

Bombay Presidency.—The Bombay Presidency was amongst the first in India to realise the value of nursing in connection with hospital work. The first step was taken on the initiative of Mr. L. R. W. Forrest at St. George's Hospital, Bombay, where a regular nursing cadre for the hospital was established together with a small staff of nurses for private cases. This was followed by a similar movement at the J. J. and Allied Hospitals and afterwards spread to other hospitals in the Presidency. Ultimately, Government laid down a definite principle with regard to the financial aid which they would give to such institutions, agreeing to contribute a sum equal to that raised from private sources. Afterwards, as the work grew, it was decided by Government that each nursing association attached to a hospital should have a definite institution and consequently these bodies have all been registered as Associations under Act 21 of 1860. By degrees substantial endowments have been built up, although the associations are still largely dependent upon Annual Subscriptions towards the maintenance of their works.

The Bombay Presidency Nursing Association as incorporated under the Societies' Registration Act of 1860, in the year 1911, with the primary object of establishing a nursing service on which the Nursing staff at Government hospitals under management of Nursing Association might be recruited. This function, however, was never carried out by the Bombay Presidency Nursing Association and it appeared to the Committee improbable that it could be carried out. The auxiliary functions of training and granting certificates to nurses and midwives and maintaining a register of qualified nurses and midwives and also maintaining a Provident Fund for the employees of the affiliated Associations were, however, carried out. The Memorandum, Rules and Bye-laws of the Association were not revised and brought to line with the actual working of the Association. This was done towards the end of 1927, when the Committee decided that some steps

must be taken to do so. Accordingly a Sub-Committee was appointed to consider the revision and amendment of the Memorandum, Rules and Bye-laws. The Sub-Committee reported that it appeared to be impossible to amend and revise the rules piecemeal and that the only way to put the things in order was to draft an entirely fresh constitution and rules.

After fully considering the Sub-Committee's report, the Committee agreed that the Association be incorporated by an Act on the line of the Registration Act in the United Kingdom. Pending the passing of the Act, the New Memorandum of Association was brought into operation from 1st April 1929.

ESTABLISHMENT OF THE BOMBAY
NURSES, MIDWIVES AND HEALTH
VISITORS' COUNCIL

The need of legislation for the Registration of Nurses, Midwives and Health Visitors had existed in the Province since a long time and with a view to protecting the public from the activities of persons who misrepresent themselves to be fully qualified Nurses, Midwives or Health Visitors, Government, in April 1935, passed the Bombay Nurses, Midwives and Health Visitors' Registration Act. In the absence of State Registration the nurses trained in this Province were subject to certain disabilities and were refused Registration in other Provinces and in other countries, where state registration prevailed. The Act obtains for them the necessary status and secures their registration in other provinces in India or in other parts of His Majesty's Dominions which are willing to reciprocate with the Bombay Nurses, Midwives and Health Visitors' Council which was established in August 1935.

From the date of the establishment of the Council, the Bombay Presidency Nursing Association became defunct. The training and registration of nurses, midwives and health visitors in this Province is now controlled by the Council. Nurses who are trained and registered in this Province can now get registration with the General Nursing Council of England and Wales and the General Nursing Council of Scotland and can practice as qualified nurses in these Countries.

LADY MINTO'S INDIAN NURSING
ASSOCIATION

The Lady Minto's Indian Nursing Association was founded in 1892 under the title of the "Up-country Nursing Association" to supplement the supply of trained nurses in India.

The pre-partition Punjab and the United Provinces were the first provinces to consider the possibility of providing nurses for private work, but it was not until 1906 that provision was made on a really adequate basis.

Lady Minto issued an appeal to the public both in India and England which met with a generous response.

The financial liabilities of the Association are met from five sources:—

Interest on the Endowment Fund; Government Grant; Donations; Subscriptions; Fees.

It is the practice of the Association to invite people to become annual subscribers. This carries with it two advantages; priority of claim to the services of a Sister, and a reduction in the fees paid for those services. Thus members of the Association are enabled to obtain skilled nursing at moderate charges on a sliding scale of fees determined by the income of each patient.

The control of the Association is in the hands of two Committees; one in England and one in India.

The English Committee is responsible for the recruitment of the staff in the United Kingdom, but fully trained nurses are also eligible in India and the Central Committee has the power to enlist them on the spot.

In addition to this duty the Indian Committee deal with all matters of administration delegating to the Provincial Branches questions of local significance.

Her Majesty Queen Mary is a Patron of the Association.

Viscountess Mountbatten is President of the Central Committee in India.

Hon. Secretary: Colonel A. C. Taylor, O.B.E.; Chief Lady Superintendent: Miss C. Wilson, Central Committee.

Lady Minto's Indian Nursing Association Vice-regal Estates, Simla, and Red Cross Buildings, New Delhi.

The latest development is a Bill to constitute an Indian Nursing Council to co-ordinate the activities of the Provincial Nursing Council and prescribe a Uniform Standard for the profession. During the debate in the Dominion Parliament, it was emphasized that the country need at least 100,000 nurses and some 20,000 health visitors. The Bill was originally introduced during the budget session in 1946 but it did not come up for consideration. In view of the urgency of the matter the Government were compelled to promulgate an Ordinance. The present Bill is intended to replace this Ordinance.

ST. JOHN AMBULANCE ASSOCIATION (INDIAN COUNCIL)

ST. JOHN AMBULANCE BRIGADE OVERSEAS (EMPIRE OF INDIA)

The St. John Ambulance Association was founded in 1877, by the Order of the Hospital of St. John of Jerusalem in England, and has for its objects:—

(a) The instruction of persons in rendering First Aid in cases of accident or sudden illness and in the transport of the sick and injured;

(b) The instruction of persons in the elementary principles and practice of nursing, and also of hygiene and sanitation, especially of a sick room;

(c) The manufacture, and distribution by sale or presentation, of ambulance material, and the formation of ambulance depots in mines, factories and other centres of industry and traffic;

(d) The Organisation of Ambulance Corps, Invalid Transport Corps, and Nursing Corps;

(e) And generally the promotion of instruction and carrying out of works for the relief of

suffering of the sick and injured in peace and war independently of class, nationality or denomination.

An Indian Council of the Association was constituted on a regular basis in 1910. It has since issued over 649,000 certificates of proficiency in First Aid, Home Nursing, Hygiene and Sanitation and Domestic Hygiene and Mothercraft and over 36,000 tokens such as Vouchers, Medallions, Labels and Pendants for special proficiency in those subjects. In addition over 121,000 certificates have been issued in the elementary course for school students known as Mackenzie School Course in First Aid, Hygiene and Sanitation.

The object of the Association is not to rival but to aid the medical man, and the subject-matter of instruction given at the classes qualifies the pupil to adopt such measures as may be advantageous pending the doctor's arrival, or during the intervals between his visits.

During the year 1946 35,441 persons attended courses of instruction in First Aid, Home Nursing, Hygiene and Sanitation and Domestic Hygiene, and Mothercraft. Of these 25,369 qualified for the Association's certificates: i.e., 23,511 in First Aid, 2,459 in Home Nursing, 192 in Hygiene and Sanitation and 207 in Domestic Hygiene and Mothercraft.

The Association has five grades of members, namely, Patrons, Honorary Councillors, Life Members, Annual Members and Annual Associates. Their respective subscriptions are Rs. 1,000, Rs. 500, Rs. 100, Rs. 5 and Rs. 2.

The income of the Indian Council at headquarters consists primarily of interest on securities, a fixed annual grant from Government, fees for certificates and membership subscriptions.

Lord and Lady Mountbatten the President and Lady President respectively, with 23 members from the Indian Council. The general business of the Indian Councils conducted by an Executive Committee of which Sir Patrick Spens, O.B.E., Knight of Grace of the Order of St. John of Jerusalem, is the Chairman and Sardar Bahadur Balwant Singh Puri, O.B.E., the Secretary General.

The St. John Ambulance Brigade Overseas is a uniformed, disciplined body of men and women, all of whom are holders of First Aid, and, in the case of women also Home Nursing certificates. They meet together regularly for practice, are inspected and re-examined annually and undertake to turn out for public duty whenever required.

The Brigade in the sub-continent is commanded by Sir Patrick Spens, O.B.E. as Chief Commissioner for India and Pakistan. Under him are 21 Districts covering almost all the provinces in India and Pakistan and some of the States, with headquarters at Lahore, Calcutta, Bombay, Madras, Bangalore, Lucknow, Nagpur, Patna, Delhi, Karachi, Peshawar, Shillong, Indore, Cuttack, Secunderabad and Sambalpur and there are three also on the North-Western, East Indian and G.I.P. Railways.

In charge of each District there is an Assistant Commissioner or a Commissioner according to the membership strength of the District, and as the work of the Brigade lies so much in the medical and surgical sphere, the Officers-in-Charge of the Districts are generally the administrative heads of the Civil Medical Departments of the respective provinces. It is their business to organise and maintain the training and efficiency of Ambulance and Nursing Division and to see that they are available for public service on occasions when they are required.

The Auxiliary Nursing Service, India, was constituted in 1941 to provide a reserve of nurses sufficiently trained to be immediately useful when called up for duty during the second World War.

Both the St. John Ambulance Association and Brigade work under the aegis of the Order of St. John of Jerusalem and as their work is complementary to that of the Indian Red Cross Society, close co-operation exists between the Order and the Society.

THE TRAINED NURSES' ASSOCIATION OF INDIA AND THE ASSOCIATION OF NURSING SUPERINTENDENTS OF INDIA

The Trained Nurses' Association of India was founded in 1905 and incorporates the Association of Nursing Superintendents of India. It is affiliated with the International Council of Nurses and the National Council of Women in India, and the Nurses' Auxiliary of the Christian Medical Association is an affiliated Association. Its objects are:—

- to uphold in every way the dignity and honour of nursing profession,
- to promote a sense of esprit de corps among all nurses,
- to enable members to take counsel together on matters affecting their profession,
- to elevate nursing education and to raise the standard of training,
- to strive to bring about a more uniform system of education, examination, certification and registration.

The Association has accomplished a great deal in raising the standard of nursing throughout India, in improving nursing legislation and in providing post-graduate courses for nurse administrators, sister tutors and health visitors and in promoting the Founding a College of Nursing, Delhi, which gives a 4 year B.Sc. Honours course in Nursing leading to a degree from Delhi University).

It strives in every way to promote efficient and adequate nursing for the sick and to improve conditions, not only for nurses but primarily for patients. The Association is self-supporting and is maintained by the nurses themselves.

The branches of the Association are the Health Visitor's League, the Midwives' Union and the Student Nurses' Association. The number of qualified members are 2,493 and student members

2,002 totalling 4,495. The official organ of the Association is 'The Nursing Journal of India.'

Patron: Viscountess Mountbatten of Burma.

Vice-Patrons: Lady Nye, Madras; H. E. Lady Trivedi, East Punjab; Miss MacQueen, Central Provinces; H. E. Lady Hydari, Assam; H. E. Mrs. Hay, Baluchistan; Miss MacQueen, Sind; Her Highness The Maharani Sahiba of Travancore and Her Highness The Princess of Barar.

Hon. Legal Adviser: P. A. Mehta, Govt. of India, Legislative Department, New Delhi, Simla.

President: Miss A. Wilkinson, 1, Underhill Lane.

Vice-Presidents: Miss France; Miss M. Craig; Mrs. E. A. Watts; Mrs. Anthony; Miss T. K. Adranvala and Mother M. Kinesbuge.

Officers: General Secretary: Miss A. Roy, T.N.A.I. Office, Underhill Lane, Delhi; Hon. Secretary, S.N.A. Association: Miss Barnes, 11, Underhill Lane; Hon. Treasurer: Miss E. Hutchings, Office of the Director-General, Indian Medical Services, New Delhi; Editor: Miss A. Wilkinson, T.N.A.I. Office, Underhill Lane, Delhi.

Hon. Secretaries: Health Visitors' League: Miss M. Korah, Lady Reading Health School, Delhi; Midwives' Union: Miss Coggins, B.M.S. Hospital, Berhampur, Ganjam; Student Nurses' Association Secretary.

Representatives of the Nursing Services and Affiliated Associations: The Military Nursing Services (India): Chief Principal Matron, G.H.Q. Medical Directorate, New Delhi; Government Nursing Services, Bengal: Miss Martin, Office of the Surgeon-General with the Government of Bengal, Writers' Buildings, Calcutta; Miss Farr, Office of the Inspector-General, Civil Hospitals, U. P.; Lucknow; Miss Holden, Office of the Surgeon-General with the Government of Bombay, Bombay; Mrs. Neal, Office of the I.G.C.H., Karachi 4, Sind, Pakistan; Miss Bullock, Office of the I.G.C.H., Shillong, Assam; Lady Minto's Indian Nursing Service: Miss C. Wilson, Vice-regal Estate, Simla/New Delhi; The Auxiliary Nursing Service: Miss E. Hutchings, Chief Lady Superintendent, A.N.S. Office of the D.G.I.M.S., New Delhi; The Nurses Auxiliary of the Christian Medical Association: Miss H. W. Sutherland, L.W.L. Settlement, Chingleput, S. India.

Membership.—Membership is open to qualified Nurses, Health Visitors and Midwives who have completed their training in hospitals or Health Schools recognised by the Association. All officers are fully trained nurses.

Subscriptions.—Entrance fee Rs. 3: Annual subscription which includes monthly copies of the Nursing Journal of India Rs. 8 and Nurses whose monthly salaries are under Rs. 50 are entitled to pay half fees.

Church Organisation

ANGLICAN

DOWN to March 1st, 1930, the Church of England in India (and Ceylon), though possessing its own bishops and Metropolitan, was in the eyes of the law an integral part of the Church of England, and subject to the general supervision of the Archbishop of Canterbury. By the Indian Church Act and the Indian Church Measure passed by Parliament in 1927 this legal connection was severed, and on March 1st, 1930, for the fixing of which date provision was made by the Indian Church Measure, the Church of England in India and in Ceylon, in future to be known as the Church of India, Burma and Ceylon, and, for short, the Church of India, (or of Burma or of Ceylon, in those countries became wholly responsible for the management of its own affairs, although, as it states in the Preamble to its Constitution, it has no intention or desire "to renounce its obligations to the rest of the Holy Catholic Church and its fundamental principles, but on the contrary acknowledges that if it should abandon those fundamental principles it would break spiritual continuity with its past and destroy its spiritual identity."

Anglican work in India dates from the first establishment of the East India Company in the 17th Century on the shores of India at Surat, Madras, and Bombay, where the servants of the Company were ministered to by a continuous succession of chaplains. The first chaplain was the Revd. Peter Rogers, Surat, 1612. The first Church built was St. George's, Madras, in 1680, followed by Bombay Church, now St. Thomas' Cathedral, in 1716. In South India the work of Danish and German Lutheran missionaries was assisted by the English S.P.C.K. (Society for the Promotion of Christian Knowledge), but missionary work was not attempted by the Church itself till the beginning of the 19th Century.

Like all other branches of the Anglican Communion the Church of India is episcopal. The first bishopric was not, however, founded until 1814 when the See of Calcutta was set up, the first bishop being Thomas Fanshawe Middleton. His jurisdiction at first included not only British India but the British settlements in Australia, the Straits, the Cape and St. Helena's. At the same time India was divided into three Archdeacons, and two of these, Madras in 1835 and Bombay in 1837, were later erected into bishoprics. The three dioceses thus formed have been repeatedly subdivided, until there were sixteen, the dates of their creation being as follows: Calcutta 1814; Madras 1835; Bombay 1837; Colombo 1845; Lahore 1877; Rangoon 1877; Travancore 1879; Cochin 1890; Lucknow 1893; Tinnevely 1896; Nagpur 1903; Dornakal 1912; Assam 1915; Nasik 1929; Bhopal 1943; Delhi 1947. There are assistant bishops in the dioceses of Lahore, Calcutta and Colombo. Since September 1947, and the inauguration of the Church of South India, the dioceses of Madras, Tinnevely, Travancore, and Dornakal have ceased to be part of the Church of India.

Rules for the government of the Church are contained in its "Constitution, Canons and Rules" adopted by its General Council in session at Calcutta in 1930. All clergy before receiving a license from their bishop make, in addition to an oath of canonical obedience to their bishop, a declaration accepting the Constitution, Canons and Rules, as well as a declaration concerning the faith and formularies of the Church. Lay members of the General and Diocesan Councils also make declarations of assent and acceptance. The government of the Church is through these councils, the General Council being for the whole ecclesiastical province of India, Burma and Ceylon. Its membership consists of the bishops of the province, and houses of clergy and laity elected by the diocesan councils. The Diocesan Councils consist of the Bishop of the Diocese and all its clergy, together with lay representatives elected by the parishes. To exercise a vote in the election of lay representatives parishioners must be adult communicant members of the Church. It is open to a diocese to add to these qualifications that of having contributed some specified amount to the expenses of the Church. In addition to these councils every parish has a Church committee or council with a recognized constitution and these are in many areas organised into district Church councils, particularly where Indian parishes are numerous. Again in addition to these councils the bishops of the province meet in Synod, with clerical and four lay assessors if a matter of faith or order is being dealt with, and the bishop of a diocese can at any time hold a Synod of his clergy. Determinations on matters of faith and order are made only by the House of Bishops of the General Council and cannot be made subjects of disciplinary action unless adopted in the form of a canon by the whole Council.

The additional title of Metropolitan was given to the Bishop of Calcutta when the Sees of Madras and Bombay were formed. It is an ancient title similar to archbishop and indicates that its holder has jurisdiction over the other bishops of the province. Before consecration a diocesan bishop takes an oath of canonical obedience to the Metropolitan. Under the Constitution of the Church bishops are elected by the diocese, subject to confirmation by the bishops of the province. In the Constitution, Canons and Rules, the Constitution consists of Declarations laying down the position of the Church of India as a part of the One, Holy, Catholic and Apostolic Church; the Canons lay down principles of government and organisation; the Rules arrange in detail for the carrying out of the Canons, and are more easily altered or added to than the Canons. The salaries and allowances of the Bishops of Calcutta, Madras and Bombay have from the foundation of those Sees been paid out of the Revenues of Government, as also in part those of the Bishops of Lahore, Rangoon, Lucknow and Nagpur. Down to 1930 these bishops were appointed by the Crown. Since 1930 vacancies are filled by election, and Bishops elected to the Sees of Calcutta,

Madras and Bombay, instead of being paid wholly by Government were till 1947 so paid only in part. For the other seven bishoprics, and for any others, set up, Government is in no way responsible.

The Ecclesiastical establishment of the Government of India was an inheritance from the East India Company. That Company from the first provided chaplains for its servants. The chaplains of the establishment were till 1947 maintained for ministration to the Government's British born servants, civil and military. They were chosen by the Indian Chaplains Board sitting in London, were appointed by the Secretary of State, were posted to Dioceses by the Governor-General in consultation with the Metropolitan, and within their Dioceses were posted to stations by the Provincial Governor on the recommendation of the diocesan bishop. Their pay and allowances were wholly met by Government. In spiritual matters they were subject to the supervision and jurisdiction of their bishop, and while Government servants, civil & military were their primary charge, they were the parish priests of the chaplaincies to which they were appointed and were responsible for the care of all members of the church in their parish except in so far as Indian Members of the Church were cared for by missionaries or Indian clergy. Besides providing chaplains the Government of India, again following the practice of the East India Company, has provided or assisted in the provision of churches and their maintenance, and also of cemeteries. Where numbers do not warrant the provision of an Establishment, chaplain Government has assisted in the provision of clergy by grants-in-aid, and when from time to time the number of Establishment chaplains has been reduced special grants-in-aid have been granted. The Establishment ended in 1947, and the block grant for aided Chaplaincies ended on March 31st 1948. A lump sum grant will be paid for the financial year 1948-1949. Then all grants will cease from Government.

The great influx of British troops caused by the war had necessitated the provision of additional religious ministrations. This need was met by the organisation in 1942 of an Indian Army Chaplains Service. It provided ministrations for Indian Christian as well as British Christian troops.

The Ecclesiastical establishment included besides Anglican chaplains, Church of Scotland, Free Church, and Roman Catholic chaplains, for ministrations to members of those communions; and churches and grants-in-aid were provided or given on the same principles as for Anglicans.)

Members of the Church of England or any of the branches of the Anglican Communion are, while resident in India, full members of the Church of India. There are no racial distinctions whatever in the Church. Indian clergy frequently preach or celebrate for European congregations, and in a few instances are in permanent charge of European parishes. The Indian laity though usually preferring services in their own languages are everywhere free to attend English churches, and to be enrolled, if they wish, as parishioners.

The education of European children, and more particularly the children of the Domiciled and Anglo-Indian community, has from early days been a concern of the Church. In addition to day-schools it has established over 70 boarding schools for boys and girls, many of them in hill stations. The provincial Governments assist these schools with grants-in-aid both for building and current expenditure, just as they do to all other schools, according to the rules of the education codes. The schools are inspected by Government inspectors. Indian boys and girls are admitted to these schools, but the number that may be taken is limited to a percentage fixed by the local Government. An appeal issued by the Archbishop of Canterbury in 1938 for the endowment of these schools had produced by June, 1939, just under £30,700. The fund is known as The Anglo-Indian Schools Fund and is still open for the receipt of donations. Indianisation of Government services, especially of the railways, customs and post and telegraph departments has severely hit the Domiciled and Anglo-Indian community, and the ability of parents to pay fees is steadily decreasing. Hence the urgent need for increased endowments. The existing endowments of all the schools yield an income of less than £1 per child per annum.

(The Church of India is not the only community responsible for European education in India. The Roman Catholics, the Church of Scotland and the various free churches provide schools for their children, and receive similar assistance from Government.)

MISSIONS

In Malabar, on the south-west coast of India, there have been Christians certainly from the 6th century, probably from the 4th century and possibly from the 1st century A.D. They are called "Syrian" Christians owing to their connection with the Church in Syria. They do not appear to have attempted to spread the Christian faith in India. The Portuguese may therefore be regarded as the first missionaries in India, and from their arrival at Goa the Franciscans and Dominicans who accompanied their fleets in large numbers threw themselves with great activity into the work of evangelism. The formation of the Society of Jesus led to one of its first members, the famous St. Francis Xavier, being sent to Goa, where he arrived in 1541. Under his leadership the preaching of Christianity was carried on with great earnestness. The missionary work of the Roman Catholic Church thus begun has been continued, and at the present day the number of Indian members of that Church is given as 2,113,659 (Census 1931), to which may be added 654,939 Syrian Christians attached to the Roman Church. The number of independent Syrian Christians (Census 1931) is given as 525,607.

Protestant missions did not begin till the 18th Century, and as missionaries were not allowed to establish themselves in the Company's territories, they worked from Danish territory and in Indian States. These missionaries were Lutherans, but as stated above, were in the latter part of the 18th Century assisted with funds from England. Famous men among them were Ziegenbalg, Klernander, Schultz and Christian Friedrich Schwarz. By the end of the

18th Century it is believed that there were in South India about 30,000 Lutheran converts. In 1800 the famous Baptist trio, Carey, Marshman and Ward established themselves at Serampore in Bengal (Carey had come to India in 1793). Men of humble origin and education, one was a cobbler, one a ragged-school teacher, and one a printer, they displayed great ability and enterprise, and threw themselves not only into evangelism but into the scientific study of India, its languages and culture, and its flora and fauna. Books and translations poured from their printing press. Carey was made professor of Sanskrit in Lord Wellesley's College for the training of civil and military officers.

The 19th Century saw a great increase in missionary effort of every sort. This was due to the opening of the Company's territories to missionaries by the Government of India Act of 1813, and it was only after that date that Anglican (Church of England) missionary Societies took up work in India, namely the Church Missionary Society and the Society for the Propagation of the Gospel, by sending as missionaries ordained clergy of the Church of England, those hitherto subsidised or sent by the S.P.C.K. (see above) being Lutherans. The first missionaries to arrive after the passing of the Act were American Congregationalists. The London Missionary Society were also early in the field and Presbyterians from America and Scotland soon followed. In the course of the century India became covered by a network of missions, engaged not only in evangelism, but in educational work in schools and colleges, in medical work and in industries. Among famous names of missionary educationalists are those of Dr. Duff of Calcutta, Dr. Wilson in Bombay and Dr. Miller of Madras. In the education of women missions may fairly claim to have taken the lead. The total number of missionary societies from Europe and America working in India is now over 150. For consultation and common action there is a National Christian Council with headquarters at Nagpur, first organised in 1914, and in connection with this there are 10 Provincial Christian Councils. Membership of these councils is by election or appointment by local churches and mission councils.

REUNION

Since the Great War there has been widespread interest in India in the subject of the reunion of the separated Christian bodies. In South India the movement for union was started in 1919 by a group of Indian clergy. This has led to the preparation of an elaborate scheme of union the parties to which are Anglicans, Methodists and the already united South Indian United Church which consists of Presbyterians and Congregationalists. Much time and thought have been given to the preparation of the scheme, the problem presented by the task of reconciling Anglican, Presbyterian, Wesleyan and Congregationalist principles being of extreme difficulty.

The scheme was inaugurated in September 1947, and "The Church of South India" then came into being.

In north India there has been in existence for some years the Church of Northern India, consisting of Presbyterian, and Congregationalists. Since 1929 a further movement for a

wider union in north India has been considered at a series of Round Table Conferences to which the Church of India has sent representatives. There is also a scheme of Union for Ceylon.

ANGLICAN MISSIONS

In addition to the two principal missionary societies of the Church of England, the S.P.G. (Society for the Propagation of the Gospel in Foreign Parts) and the C.M.S. (Church Missionary Society) already mentioned, there are also certain smaller, but important missions, namely the Oxford Mission to Calcutta working in Calcutta among students and also at Barisal; the Cowley-Wantage-All Saints Mission, working in Poona and Bombay; the Dublin Mission at Hazaribagh, the Cambridge Mission at Delhi, the Cawnpore Brotherhood; the Scottish Episcopal Church Mission at Chanda, C.P.; the Bible Churchmen's Missionary Society (12 ordained missionaries in the Lucknow and Nagpur and Raichur dioceses); the Christa Seva Sangha, Poona, 1927, which divided in 1934 into the Christa Seva Sangha, and the Christa Prema Seva Sangha; the Canadian Church Mission (4 ordained missionaries in the Lahore Diocese); the Church of England Zenana Missionary Society, in several dioceses; the Sisters of St. Margaret (East Grinstead) in the Colombo diocese; Sisters of St. Denys (Warminster) in the Chota Nagpur Diocese; Sisters of the Holy Family, Naini Tal; the Winchester Brotherhood, Mandalay, and the Sisters of the Church, Maymyo. The first two of these, and several of the others in the list, consist of communities of priests or sisters under religious vows. Members of the brotherhoods mentioned are in most cases not under life vows. The work and influence of these communities is a most important element in the life of the Church of India.

The Church of India has taken its full share in educational, medical and industrial work in India. Among colleges founded and managed by its missionaries St. Stephen's, Delhi, St. John's, Agra, St. Columba's, Hazaribagh, Christ Church, Cawnpore, and Trinity College, Cawnpore; are well-known. A college at Trichinopoly has been amalgamated with the inter-denominational Madras Christian College. For the training of Indian and Anglo-Indian ordination candidates Bishops' College, Calcutta, serves the whole of India. In the various language areas are other colleges for the training of ordinands and lay church-workers through the medium of the local language. Among hospitals made famous by the work of the doctors in charge are those at Quetta (Sir Henry Holland), Bannu (the late Dr. Pennell) and St. Stephen's, Delhi (for women). The C.M.S. High School at Srirangar is distinguished among the many High Schools of the Church for the methods adopted to develop manliness and *esprit de corps* in the boys. Cawnpore in the north and Nazareth in the extreme south are well-known centres of industrial work and training. The Diocesan Press at Madras was built up into a very large and efficient institution by a retired C. M. S. Missionary. At Hubli, in the Bombay Diocese, S. P. G. Missionaries have, since 1919, done extremely good work in charge of an Industrial Settlement (for the reformation and training of members of criminal tribes) committed to their care by Government.

THE ROMAN CATHOLIC CHURCH

The Catholic community is composed of the following elements:—

- (1) The "Syrian" Christians of the Malabar Coast, traditionally said to have been converted by the Apostle St. Thomas. They were brought under allegiance to the Pope by the Portuguese in 1599, and placed first under Jesuit bishops and then under Carmelite Vicars Apostolic. They are at present ruled by an Archbishop and three suffragan Bishops of their own Syriac rite.
- (2) Converts of the Portuguese missionaries from 1500 and onwards, starting from Goa and working in the south of the peninsula and up the west coast, Ceylon, Bengal, etc.
- (3) European immigrants at all times, including British troops.
- (4) Modern converts from Hinduism and Animism in recent mission centres.
- (5) Recent converts from the Jacobite community in Malabar, of which 3 Bishops, 71 priests and some 23,000 laity have been received into the Catholic Church.

The Portuguese mission enterprise, starting after 1500, continued for about 200 years, after which it began to decline. To meet this decline fresh missionaries were sent out by the Congregation *de propaganda fide*, till by the middle of the 19th century the whole country was divided out among them except such portions as were occupied by the Goa clergy. Hence arose a conflict of jurisdiction in many parts between the Portuguese clergy of the "Padroado" or royal patronage, and the *propaganda* clergy. This conflict was set at rest by the Concordat of 1886 (amended by the Agreement of 1928, abolishing "double jurisdiction"). At the same time the whole country was placed under a regular hierarchy, which after subsequent adjustments now stands as follows:—

Under the Sacred Congregation of Extraordinary Ecclesiastical Affairs:—

The archbishopric of Goa and Damaun (having some extension into British territory) with suffragan bishoprics at Cochin and Mylapore (both in British territory).

Under the Sacred Congregation of Oriental Churches:—

The archbishopric of Ernakulam, with suffragan bishoprics of Changanacherry, Kottayam and Trichur.

The archbishopric of Trivandrum, with suffragan bishopric of Tuticorin.

Under the Sacred Congregation of Propaganda Fide:—

The archbishopric of Agra, with suffragan bishoprics of Allahabad, Ajmer and Lucknow and the Prefectures Apostolic of Indore and Jhansi.

The archbishopric of Bombay, with suffragan bishoprics of Poona, Mangalore, Calicut, Trichinopoly, Tuticorin, Madras and Missions of Karachi and Ahmedabad.

The archbishopric of Calcutta, with suffragan bishoprics of Ranchi, Dacca, Chittagong, Krishnagar, Dinaipur, Patna and Shillong and the Prefecture Apostolic of Sikkim.

The archbishopric of Madras, with suffragan bishoprics of Nellore, Hyderabad, Vizagapatnam, Nagpur, Bezawada, Cuttack and Guntur, the Prefecture Apostolic of Jubbulpore, and the Mission of Bellary.

The archbishopric of Pondicherry (French), with suffragan bishoprics of Mysore, Coimbatore, Kumbakonam, Salem, Malacca and Bangalore.

The archbishopric of Delhi and Simla, with suffragan bishoprics of Lahore and Multan, the Prefecture Apostolic of Kashmir.

The archbishopric of Verapoly, with suffragan bishoprics of Quilon, Kottar, Trivandrum and Vijayapuram.

The archbishopric of Colombo (Ceylon), with suffragan bishoprics at Kandy, Galle, Jaffna, Trincomalee and Chilaw.

Three Vicariates Apostolic and three Prefectures Apostolic of Burma.

The European clergy engaged in India almost all belong to religious orders, congregations or mission seminaries, and in the great majority are either French, Belgian, Dutch, Swiss, Spanish or Italian by nationality. They number over 2,000 besides which there is a body of secular clergy mostly Indian, etc., numbering about 2,800, and over 11,000 nuns. The first work of the clergy is parochial ministrations to existing Christians, including railway people and British troops. Second comes education, which is not confined to their own people; their schools being frequented by large numbers of Hindus, Mahomedans, Parsis, etc. Among the most important institutions are St. Xavier's College, Calcutta, St. Peter's College, Agra, St. Xavier's College, Bombay, St. Joseph's College, Trichinopoly, St. Aloysius College, Mangalore, Loyola College, Madras, teaching university courses; besides a large number of high schools and elementary schools. The education of girls is supplied for by numerous convent schools worked by religious congregations of nuns to say nothing of orphanages and other charitable institutions. The total number under education in 1936 exceeded half a million. As to missionary work proper, the country is covered with numerous modern mission centres, among which those in the Punjab, Chota-Nagpur, Krishnagar, Gujerat, the Ahmednagar district and the Telugu coasts may be mentioned. (Full particulars on all points will be found in the Catholic Directory already quoted.) The mission work is limited solely by shortage of men and money, which if forthcoming would give the means to an indefinite extension. The resources of the clergy after the ordinary church collections and pay of a few military and railway chaplains are derived mainly from Europe, that is, from the collections of the Society for the Propagation of the Faith and of the Holy Childhood

helped out by private or other donations secured from home by the different local missionaries. In mission work the fathers count as enrolled only those who are baptised and persevering as Christians, and no baptism, except for infants or at point of death, is administered except after careful instruction and probation. This, while keeping down the

THE CHURCH OF SCOTLAND

The Chaplaincy work of the Church of Scotland dates from 1814, when the Rev. Dr. Bryce landed in Calcutta and organised a congregation of his Scottish fellow countrymen. The centenary of the churches in the three Presidency towns was celebrated: Calcutta 1914, Bombay 1919, Madras 1921. Up until August 15, 1947, the Indian Ecclesiastical Establishment (Church of Scotland) had from 12 to 15 Chaplains on its staff. Some of these were attached to the Scottish Regiments in India, while others administered to the civil population of the towns where they were stationed and to those living in the smaller outstations in their respective areas. In addition to the regular establishment, there were a number of ministers throughout India who were maintained by the various communities to whom they ministered and by the additional Clergy Societies in India. Missionaries of the Church also maintained, and still do, regular services in English at a number of centres. In consequence of Constitutional and other changes in India, the Ecclesiastical Establishment was abolished after Aug. 15, 1947, and the churches which had ministers of their own became entirely responsible themselves for the maintenance of religious ordinances. The whole of the work of the Church of Scotland amongst Scots and other Europeans in India is now under The Colonial Continental Committee of the Church, and is maintained entirely from Church funds.

The main centres are now Calcutta, Bombay, Madras and Karachi, where there are strong and flourishing congregations.

The Mission Work of the Church of Scotland officially dates from 1829, but Scottish Church Missionaries were in India before then. John Wilson, who left Scotland in 1828 for Western India, and was the founder of Wilson College in Bombay, was with other Scots working under the auspices of the Scottish Missionary Society, until in 1835 the General Assembly took the missionaries under its charge. Alexander Duff, one of the greatest of modern missionaries, was sent to Calcutta in 1829, and was the first to open schools where English was made the medium of instruction. Mrs. Wilson was the first in Bombay to open a Boarding School for girls a revolutionary step in 1834. Alike in Calcutta, Bombay, and in Madras from 1837, the early Scottish Missionaries made a deep mark in the educational life of the time.

BAPTIST SOCIETIES

THE BAPTIST MISSIONARY SOCIETY OF GREAT BRITAIN.—Formed in 1792, largely through the efforts of Dr. Wm. Carey, operates mainly in Bengal, Bihar, Orissa, the United Provinces, the Punjab and Ceylon. The Baptist Zenana

record, has the advantage of guaranteeing solid results.

The Holy See is represented by a Delegate Apostolic of the East Indies who resides at Bangalore. At present this post is occupied by the Most Rev. Archbishop Kierkels, D.D., appointed in 1931.

This educational contribution has been maintained up to the present (1947) and shows no signs of diminishing. The Church today has many schools in all parts of its field, and it has five well-known Christian Colleges at work: The Scottish Church College, Calcutta; The Madras Christian College; Wilson College, Bombay; Hislop College, Nagpur; and Murray College, Sialkot. The Madras Christian College has been rebuilt on a magnificent site at Tambaram, and it became known to many all over the world when in 1938 it became the meeting place of the World Missionary Conference. In a number of these educational institutions, the work is now shared with other societies and missions. On the women's side, the Women's Foreign Mission does invaluable service in school, medical and Zenana work, having in India 41 European Missionaries, 163 teachers, over 50 schools, 4 hospitals and 6 dispensaries. On the men's side: there are 15 Mission Hospitals at different centres.

As a result of the Evangelistic work carried on for over 100 years, an Indian Church has been established. In the Punjab, Evangelistic work is carried on from 8 centres, and the Baptised Christian Community now numbers over 30,000. Work commenced in Darjeeling in 1870, is now carried on throughout the whole eastern Himalayan District, and there is a Christian Community there of over 15,000. In the 8 mission districts of Calcutta, the Eastern Himalayas, Madras, Santia, Rajputana, Nagpur, Western India and the Punjab there were at the end of 1938 over 70,000 Baptised Indian Christians.

The Church has also played a large part in educational work for the Anglo-Indian Community. In Bombay the Scottish Congregation there has 6 statutory representatives on the Governing Body of the Anglo-Scottish Education Society, while the Scottish Community in Bombay is responsible for the Bombay Scottish Orphanage Society's School at Mahim, over which the Scots Kirk, Bombay, exercises pastoral supervision. The well known St. Andrew's Colonial homes at Kalimpong, in Bengal, though not directly part of the work of the Church of Scotland, were initiated by and are being locally managed by Missionaries of that church. The homes exist for the benefit of the domiciled European and Anglo Indian Community and are doing magnificent work. There are now over 20 cottages and about 700 children in residence.

Mission and the Bible Translation Society have been united with this Society. The staff of the united Mission in India and Ceylon numbers 190 Missionaries and 894 Indian and Singhalese workers. Connected with the Society

are 497 Indian and Singhalese Churches, 321 Primary Day Schools, 35 Middle and High Schools, and 3 Theological Training Colleges. The Church membership at the close of 1946 stood at 34,761 and the Christian community at 84,185. Amongst the non-caste people great progress has been made. In recent years, and many of the Churches formed from amongst these peoples are self-supporting.

Special work amongst students is carried on in Calcutta, Dacca, Cuttack, Patna and Delhi where there are hostels for the prosecution of this form of work.

EDUCATIONAL WORK.—Ranges from Primary School to Colleges. Serampore College with its Royal Charter granted by His Danish Majesty in 1827, and confirmed by the British Government in the Treaty of Purchase of the Settlement of Serampore in 1845, was placed in 1856 by the College Council at the disposal of the Baptist Missionary Society to become a part of its Missionary educational operations, in Arts and Theology. It was affiliated in 1857 to the newly-formed Calcutta University; reorganised in 1910 on the lines of its original foundation with the appointment of a qualified Theological Staff on an Inter-denominational basis for the granting of Theological Degrees to qualified students of all Churches.

In Arts and Science the College prepares for the Calcutta Examinations.

There is a vernacular institute also at Cuttack for the training of Indian preachers and Bible schools in several centres.

There are 10 purely English Baptist Churches connected with the Society, but English services are carried on in many of the stations. Medical work connected with the Society is carried on in 7 Hospitals. Two large Printing Presses for both English and Vernacular work are conducted at Calcutta and Cuttack. The Secretary of the Mission is the Rev. D. Scott Wells, 44, Lower Circular Road, Calcutta, 16.

The Headquarters of the Mission are at 93-95 Gloucester Place, London, W. 1. The total expenditure of the Society for 1946 amounted to £2,32,501 of which £92,044 was expended in India and Ceylon.

THE CANADIAN BAPTIST MISSION.—Was commenced in 1873, and is located in the Telugu and Oriya Country to the north of Madras, in the Kistna, Godavari, Vizagapatam and Ganjam Districts. There are 20 stations and 535 outstations with a staff of 70 missionaries including

6 qualified physicians, and 1,250 Indian workers, with Gospel preaching in 1,659 villages. Organised Churches number 138, communicants 84,000 and adherents 40,000 for the past year. 32 Churches are entirely self-supporting. In the Educational department are 415 village day schools, with 19,000 children, 12 boarding schools, 2 High schools, 2 Normal Training schools, a Bible Training School for Women, a Theological Seminary providing in all for 5,850 pupils. There are 6 Hospitals, two leper-asylums and an Orphanage. Village Evangelisation is the central feature of the Mission, and stress is laid upon the work amongst women and children. Indian Secretary: The Rev. R. M. Bennett, B.A., B.D., Vuyyuru, Kistna Dist.

THE AMERICAN BAPTIST ASSAM MISSION.—Was opened in 1836, and has 11 main stations staffed by about 30 missionaries. There are about 850 native workers, 1,600 organized churches, about 1,08,000 baptized members, 400 schools of all grades including 2 High, 1 Normal Training, 2 Bible and 9 station schools. There are 3 hospitals and 4 dispensaries which treated about 4,465 in-patients and about 18,035 out-patients during the year. Mission work is carried in 16 languages.

Treasurer and Cor. Sec.—Miss Marion Burnham, Gauhati.

AMERICAN BAPTIST, BENGAL-ORISSA MISSION AND INDUSTRIAL CENTRES.—Commenced in 1836. Area of occupation: Midnapore district of Bengal, Balasore district of Orissa and Jamshedpur Town of Bihar. Work chiefly for Oriya and Santal peoples. Address: Jhadrang. Agust A. Berg, Secretary, Thardram, B.N.R.

THE AUSTRALIAN BAPTIST FOREIGN MISSION.—(Incorporated) Embracing the societies representing the Baptist Churches of the States of the Australian Commonwealth. The field of operations is in East Bengal and Assam. The staff numbers 28 Australian workers. There are 5,716 communicants and a Christian community of 10,134.

Secretary, Field Council: The Rev. N. P. Anderson, Mission House, Birisiri, P. O. Hatahigbanj, Dist. Mymensingh, E. Bengal, Pakistan.

THE STRICT BAPTIST MISSION.—Has 19 European Missionaries, and 210 Indian workers in Madras, Chingleput, Salem, Ramnad and Tinnevely Districts. Communicants number 1,802; organised churches 64, Day and Sunday schools 84 with 3,553 pupils.

Secretary: Rev. D. A. Thrower, Eilpauk, Madras. Treasurer: Rev. G. F. Champion, Kovilpatti, S.I.Ry.

PRESBYTERIAN SOCIETIES

THE IRISH PRESBYTERIAN CHURCH MISSION:—Operates in Gujarat and Kathiawar with a staff of 45 Missionaries, of whom 19 are clerical, 13 Educationalists, 6 are Doctors and 3 Nurses. The Indian staff numbers 500, of whom 19 are Pastors, 108 Evangelists, 2 Colporteurs, 40 Bible-women, and 231 are Teachers. There are 23 Organised Churches, a communicant roll of 8,565, and a Christian Community of 9,967. In Medical work there are 5 Hospitals including one at Dohad and several Dispensaries, with

4,199 in-patients, 25,353 new cases, and a total attendance of 108,851. The Mission conducts 3 High Schools, 1 Anglo-Vernacular School, 1 Preparatory School at Parantij and 100 Vernacular schools affording tuition for 8,000 pupils; also 1 creche, 4 Orphanages, an Industrial School at Borsad, a Teachers' Training College for Women at Borsad co-operates in a United Divinity College at Baroda, and has a Mission Press at Surat. The Mission has a speciality of Farm Colonies, of which there are

about a score in connection with it, most of them thriving.

The Jungle Tribes Mission with 4 Missionaries is a part of the activities of the above, working in the Panch Mahals and Rewa Kantha districts, with Farm Colonies attached.

Secretary: James Brolly, B.A., Mission House Borsad, Kaira Dist.

THE UNITED PRESBYTERIAN CHURCH OF NORTH AMERICA.—The Slaikot Mission of this Church was established at Slaikot in the Punjab, in 1855. It is now carrying on work in eight civil districts in the Punjab and two in the North-West Frontier Province. Its missionaries number 81. Its educational work comprises one Theological Seminary, one College, four High Schools, one Industrial school, 8 Middle schools and 64 Primary schools. The enrolment in all schools in 1914 was 15,367. Medical work is carried on through five Hospitals and 7 Dispensaries. The communicant membership of the Church which has been established is 45,178 and the total Christian community 105,044.

General Secretary: W. H. Merriam, M.A., American Mission, Gujaranwala.

THE AMERICAN PRESBYTERIAN MISSION operates in three main sections, known as the Punjab (1834), North India (1836) and Western India (1870) Missions. According to statistics for the year ending March 31, 1943, the American staff, including women and special-term Missionaries numbers 214, and the Indian staff about 987. There are two and thirty main stations and 197 out-stations. Organised churches number 125 of which 38 are entirely self-supporting. There are 22,797 communicants and a total baptized community of about 70,000.

Educational work is as follows:—Two men's colleges and an interest in the Isabella Thoburn and Kinnaird Colleges for Women,—students about 2,700; one Theological College, students 16 and an interest in Poona Theological College; two Training Schools for Village Workers; thirteen High Schools; two Industrial Schools; three Agricultural Demonstration Farms; four Teachers' Training Departments; The Miraj Medical School and an interest in the Ludhiana Medical College for Women; 107 Elementary Schools; 139 Schools of all grades,—pupils about 13,000.

Medical Work:—Eight Hospitals; twenty-one Dispensaries and four Speciality Hospitals.

Evangelistic Work:—258 Sunday Schools, with an average attendance of 6,414 pupils. Contributions for church and evangelistic work, on the part of the Indian church, have decreased slightly, and amount to about Rs. 45,000.

The Hospital at Miraj, founded by the late Sir William J. Wanless and under the care of E. H. Evans, is well-known throughout the whole of South-West India, and the Forman Christian College of Lahore, under the principalship of the Rev. C. H. Rice, Ph.D., LL.D., is equally well-known and valued in the Punjab. The Ewing Christian College, B.B. Malvea, Ph.D. (Principal) and Allahabad Agricultural Institute (Dr. J. L. Goheen, Principal) have grown rapidly in numbers and influence.

Secretary of Council of A. P. Missions in India.—The Rev. J. B. Weir, Ph.D., D.D., "Lowriston," Dehra Dun, U.P.

Secretary, North India Mission.—The Rev. C. H. Hazlett, Ed.D., A. P. Mission, Mainpuri, U. P.

Secretary, Punjab Mission.—The Rev. W. A. Zoevner, 3, Empress Road, Lahore, Pb.

Secretary, Western India Mission.—The Rev. M. W. Strahler Irvil Christian High School, Kolhapur-Shahupuri S.M.C.

THE NEW ZEALAND PRESBYTERIAN MISSION.—Commenced as recently as 1910 at Jagadhri, Punjab. It also works in Kharar and Saharanpur.

Secretary: Miss E. L. Saunders, Dist. Amballa.

THE UNITED CHURCH OF CANADA MISSION.—Commenced in 1877, has 13 main stations in Indore, Gwalior, Ratlam, Dhar, Sitamau, Bhopal and Banswara States. The Mission staff numbers, 49 Canadians and 12 Indians and there are about 200 Indian workers. This Mission works in conjunction with the Malwa and Ratlam Church-Councils of the United Church of Northern India, which report. Organised churches 50; Unorganised churches 4; Communicants 3,963; Baptised non-communicants 19,642; Unbaptised adherents 2,936; total Christian community 26,541.

Educational work comprises Elementary and Middle Schools for boys and girls; a High School for girls, an Arts College for students of both sexes (The Indore Christian College), and the Union Theological Seminary. Vocational Training for boys is a feature of the Kasalpur Vocational High School, where training is provided in printing, tailoring, carpentry and welding.

The medical work is large. There are three General Hospitals, where both men and women are treated, and five Women's Hospitals, and also a number of dispensaries in central and out-stations.

General Secretary and Treasurer of the Mission.—The Rev. A. A. Scott, M.A., D.D., Indore, C.I.

Associate Secretary of Mission.—Miss C. V. Baxter, Kharua, C.I. (Via Mehidpur Road Station).

Treasurer of the Mission.—Miss M. E. Martin, Dhar, C.I.

Secretary of Malwa Church-Council.—Rev. Jacob Masih, Indore, C.I.

Secretary of Ratlam Church Council.—Rev. Kenneth B. V. Yohan Masih, B.A., Neemuch, C.I.

THE CANADIAN PRESBYTERIAN MISSION operates in two sections, the Northern Section with headquarters at Jhansi in the U.P., and the Central India Section, known as the Bhil Field.

In Central India the Mission comprises within its area the States of Alirajpur, Barwani, Jobat and Kathiawar also parts of the States of Jhabua, Chhota Udaipur (in the Bombay Presidency) and Dhar, Indore and Gwalior bordering on the Jobat-Barwani Road. The five central stations are Amkhut, Mendha and Alirajpur located in Alirajpur State, Jobat in the State of Jobat and

Barwani in Barwani State. The staff consists of 16 missionaries and 50 Indian workers. There are several elementary schools in the area and a central Anglo-Vernacular School at Amkhut in which upwards of 300 children are being educated. At Amkhut also there is a Children's Nursery Home. At Jobat there is a General 60 bed Hospital with a Canadian Medical man, Dr. W. R. Quinn in charge.

There are in the district 7 organized and 2 unorganized congregations with a Communicant membership of 430 and a baptized community of slightly over 1,500.

Secretary.—Rev. A. E. Toombs, Barwani (Via Mhow), Central India.

The Jhansi Section formerly known as the Gwalior Mission was founded by the late Dr. J. Wilkie in 1905. There is now a staff of 9 missionaries and twenty-five Indian workers who are engaged in Jhansi city, Esagarh, Baragan, Babina and the surrounding villages.

Activities include Anglo-vernacular middle schools for girls and hostels for Christian pupils in each. There are also an orphanage for children under school age, a dispensary. There is an

agricultural settlement at Esagarh where the Mission has a farm of 1,200 acres.

There are two organised churches having a communicant membership of 150.
Secretary.—Mrs. Muckan.

THE WELSH CALVINISTIC METHODIST (PRESBYTERIAN) MISSION established in 1840 occupies stations in Assam in the Khasi and Jaintia Hills, the Lushai Hills and at Sylhet and Cachar. The Khasi language has been reduced to writing, the Bible translated, and many books published in that language by the Mission. A large amount of literature has also been produced in the Lushai language. Total in the Church 15,000. Well equipped Hospitals at Shillong (Khasi Hills), Jowai (Jaintia Hills) and Durtlang (Lushai Hills) provide Medical, Surgical and Nursing aid to large numbers annually.

Primary, Middle and High School education is carried on widely in Assam. A Theological College and a Department for Teachers' training are maintained at Cherrapunji, Khasi Hills.

Secretary: Rev. G. Angell Jones, P.O. Jowai, Shillong, Assam.

CONGREGATIONAL SOCIETIES

THE AMERICAN BOARD OF COMMISSIONERS FOR FOREIGN MISSIONS.—In 1947 it included 32 missionaries and 372 Indian workers operating in 10 stations and 163 outstations. There were 58 churches with 6,108 communicants. Besides conducting 5 secondary and training schools with 1,505 pupils, the Mission has a large share in various union educational enterprises. There are 52 primary schools and 7 kindergartens with a total of 3,285 pupils. Its 5 hospitals and dispensaries treated a total of 62,819 patients. The Mission has a total of 10 major social service centres with 23 full time and 10 part time workers. During 1946, these Centres had a total activity attendance of 569,804. *Secretary:* Rev. Miss E. L. Wood, Rahuri, Ahmednagar District.

MADURA MISSION SANGAM.—This Sangam now carries on all the work formerly administered by the Madura Mission, except the American College. The institutions under the Sangam are:—

The Pasumalai High and Training School for Boys; The Capron Hall Training School for Girls; The O. C. P. Memorial High School for Girls, Sakkikulam, Madura; The Union Theological Seminary, Pasumalai; The Lucy Perry Noble Institute for Women, Rachanyapuram, Madura; The Willis F. Pierce Memorial Hospital for Men and the Hospital for Women and Children; The Trade School, Pasumalai.

The Sangam also nominates a person to be honorary superintendent of the Dayapuram Leprosy Hospital at Manamadurai.

Chairman.—A. Ranjitham, M.A., L.T., Madura.
Secretary.—Rev. E. E. White, Aruppukottai, Madura.

Treasurer.—G. Chinniah, 211, S. Marret St., Madurai.

THE AMERICAN COLLEGE, MADURA.—The American College, then located at Pasumalai,

was affiliated to the University of Madras as a second-Grade College in 1881. In 1904 the College Department was removed to Madura where for five years it was accommodated in what is now the Union Christian High School building. In 1909 the College was removed to its present site in Tallakulam on the north side of the Vaigai river. It was affiliated as a First Grade College in 1913.

In 1934 at the time of the centenary of the Mission, the American College became organically independent under its own Governing Council. In the same year it was granted affiliation as an Honours College.

The present College site comprises about forty acres. On the College grounds are located the Main College Hall, the Ellen S. James' Hall of Science, Binghamton Hall, B. Com. Hall, the Chapel, Daniel Poor Memorial Library, Main Hostel, Zumbro Memorial Hostel, Hostel Dining Halls, Women's Day Building, "Coe Lodge" for tutors and demonstrators, Principal's residence, three Wardens Lodges, four additional bungalows, and athletic fields.

AMERICAN MADURA MISSION CHURCH OF SOUTH INDIA, Madura Ramnad Diocese.—*Bishop.*—Rt. Rev. J. E. L. Newbigin, Madura. *Secretary.*—Sangam, Rev. E. E. White, Aruppukottai, Ramnad Dt.—*Manager.*—High & Training, Schools.—D. P. Michael Pasumalai. *Manager.*—Trade School.—Rev. C. P. Heineman, Pasumalai. *Principal.*—Theological Seminary.—Rev. A. Samuel Pasumalai. *Medical Officer.*—Pierce Hospital, Dr. E. S. Chellappa, Madura. *Medical Officer.*—Hospital for Women & Children.—Dr. H. S. Thomas, Madura. *Manager.*—Pierce High School.—Miss K. Wilcox, Tallakulam. *Manager.*—Capron Hall Training School.—Miss D. Abraham, Madura. *Manager.*—Rachanyapuram.—Miss G. E. Chandler Tallakulam. *Principal.*—American College.—A. Ranjitham, Tallakulam. *Secretary.*—Mission.—Rev. E. G. Nichols, Pasumalai.

THE SCANDINAVIAN ALLIANCE MISSION OF NORTH AMERICA.—The mission staff in Khandesh is represented by 58 missionaries and 90 Indian workers. There are 1,063 Church members and 1,705 pupils in Sunday Schools. 40 elementary Schools provide for 1,193 pupils. There is one mission Hospital located at Chinchpada, West Khandesh. This Hospital and several dispensaries have treated and cared for over 60,000 yearly.

Secretary:—Rev. A. M. Wilson, Pimpalner, West Khandesh.

THE LONDON MISSIONARY SOCIETY.—Commenced work in India in 1798 and occupies 3 centres in N. India, 12 in S. India and 7 in Travancore State. The Mission engages in every form of Missionary activity.

UNION INSTITUTIONS.—With which the London Missionary Society is connected, and is a contributing Body. Number of Institutions 13; Schools, 6; Scholars, 2,084; Colleges, 8; Students, 1,284.

The main centres of the Mission in N. India are at Calcutta and Murshidabad District, E. Bengal;

L.M.S. work in the United Provinces has been closed but a Union Mission of the W. M. S., O. M. S. and L. M. S. has been opened in Benares City, of which the Rev. J. S. Moon of the W. M. S. is Superintendent. This Mission concentrates especially on work amongst pilgrims and students. Special efforts are made amongst the Nama Sudras. The S. India district and Travancore are divided into Kanarese, Telugu, Tamil and Malayalam fields with 22 stations and 1,095 out-stations. At Nagercoil (Travancore) is the Scott Christian College and High School with 974 students, a Church and congregation said to be the largest in India and a Printing Press, the centre of the S. Travancore Tract Society.

India—Secretary and Treasurer—Rev. L. J. Thomas, 18, Lavelle Road, Bangalore.

Bengal Secretary:—Miss Olive Stellwell, 3, Ashutosh Mukerji Road, P.O. Elgin Road, Calcutta.

Benares Superintendent.—Rev. J. S. Moon, Ramkatora, Benares Cantonment, U.P.

MISSIONS

THE CHRISTIAN AND MISSIONARY ALLIANCE.—Dates from the year 1892 under the name of the International Missionary Alliance, but a number of its missionaries were at work in the province of Berar much earlier. Work is carried on in the provinces of Berar, Khandesh and Gujarat. There is a staff of 50 missionaries and 150 Indian workers. The number of mission stations is 16, with additional out-stations. There is a Christian community of 3,350 adults. There are 4 boarding schools, two for boys and two for girls, 3 training schools for Indian workers. There are 26 organized congregations, including one English at Bhusawal.

Executive Secretary.—The Rev. K. D. Garrison, Akola, Berar, C.P.

THE CHURCH OF THE BRETHREN (AMERICAN)—Opened work in 1894, and operates in Broach, Surat and Thana Districts, also in Baroda and Rajpipla States. Its staff number 41 foreign workers, including missionaries' wives, and 216 Indian workers. The baptized (immersed) membership stands at 8,235. Education is carried on in 2 Boys' Boarding Schools, 2 Girls' Boarding Schools, and in 3 Co-educational Boardings with separate hostel quarters. Females under instruction number 1,263, males 3,765 total 5,028. There are 108 Sunday Schools with a total enrolment of 5,244 (teachers included). There were 76,705 calls at Mission dispensaries in 1946. The foreign medical staff consists of 4 doctors and three nurses. Industrial work is carried on in 5 of the Boarding Schools. A vocational school, including teachers' training, village trails and agriculture for boys and a school of practical arts for girls are conducted at Ankleswar. Evangelistic, Temperance and Publication work receive due emphasis.

Secretary:—L. A. Bilckenstaff, 240, Hornaby Road, Bombay.

THE POONA AND INDIAN VILLAGE MISSION.—Founded in 1893, Mission Stations:—Poona City, Khed-Shivapur, Poona District; Nasrapur and Bhor (Bhor State), Poona District; Lonand, M. S. M. Ry., Satara District; Phaltan (Phaltan State), Satara District; Pandharpur, Sholapur District; Nateputa, Sholapur District; Akulz, Sholapur District; Chiplun, Khed, Ratnagiri; Sangola and Nandeshwar, Sholapur District.

The Staff consists of 34 Europeans and 80 Indian workers, including hospital staff, with a community of about 600 Indian Christians and their families. The main work is evangelising in the villages, women's zenana work, and primary education and a baby boy's orphanage and Boys' Boarding School. Medical work is conducted at most stations, with a hospital at Pandharpur. There is also a Bible School. Mission Headquarters, 12, Irwin Rd., Poona 2.

Secretary:—Miss A. Monot.

THE AMERICAN CHURCHES OF GOD MISSION.—Has 4 missionaries at Bogra, two at Khanjapur, Bogra District, Bengal and 3 at Ulubaria, Howrah District, Bengal.

President:—Rev. W. J. Frederik, B.A., Ulubaria, Howrah Dist., Bogra, B.A. Railway.

Secretary:—Miss Eunice Catlin, Mission House—Ulubaria, Howrah Dist.

THE CHURCH OF THE NAZARENE MISSION.—Has its headquarters for India at Buldana, Berar, where it has a junior Bible School. In Chikhli 14 miles from Buldana, there is Co-educational Boarding School with secondary Departments and an enrollment of 325. At Basim, Berar, 70 miles from Chikhli there is a Day School, a Senior Bible School and the Reynolds Memorial Hospital—a hospital for women and children. There are also other Day schools in the District. At present there are 21 missionaries in India. There is an organized Indian District Assembly

with about 32 churches. The Indian Staff of preachers and teachers number 75.

Mission Chairman: Rev. John McKay, Buldana, Berar, C.P.

THE INDIAN MISSIONARY SOCIETY, TINNEVELLY (DORNAKAL AND THE HILL TRIBE MISSION).—Opened in 1903, operates in the Warangal District of the Nizam's Dominions as well as among the hill tribes called Paliars in the British and Travancore Hills. It is the missionary effort of the Christians living in India and overseas. There are now nearly 13,000 Telugu Christians in 180 villages and 550 Paliyar Christians in the hills. Annakkari in Travancore has become a well established colony of the hill tribes. The nomads have begun to do agricultural work. The Society publishes monthly *The Missionary Intelligencer* containing information about the Society's work in both the fields. Headquarters: Palamcottah.

Secretary:—Rev. Joseph Abraham, Palamcottah.

THE MISSION TO LEPERS.—Founded in 1874. An interdenominational and international Society for the establishment and maintenance of Homes and Institutions for those suffering from leprosy and for their healthy children, working in 20 countries but largely in India, Burma, China and countries in Africa. Its work in India is carried on through co-operation with about 30 Missionary Societies. In India and Burma alone the Mission now has 31 Homes of its own with upwards of 7,600 inmates and is aiding or has some connection with work for leprosy patients at 24 other places in India. Altogether in India and Burma over 10,000 cases of leprosy are being helped.

The Mission also provides for the segregation from their parents of the healthy children of those suffering from leprosy. More than 800 children are thus being saved from becoming infected.

Most of the Mission's income is derived from voluntary contributions. Some funds are raised in India and Burma but the bulk of the money expended by the Mission in India and Burma is received through Britain, although the provincial Governments give regular maintenance grants.

There is an Indian Auxiliary of the Mission to Lepers of which the Hon. Treasurers are—C. B. Park, c/o M's. Macnelli & Co., 2, Fairlie Palace, Calcutta and H. F. Milne, c/o M's. Killick, Nixon & Co., Bombay.

The General Secretary of the Mission is A. Donald Miller, 7, Bloomsbury Square, London, W.C.1. The Secretary for India is William Bailey, M.A., Fyzabad, U.P.

THE REGIONS BEYOND MISSIONARY UNION.—An interdenominational Society which commenced work at Motihari, Bihar, in 1900, and now occupies 7 stations and 6 out-stations in the Champaran and Saran Districts, with a staff of 30 European and 3 Indian Missionaries and 25 other Indian workers. The Mission maintains 2 Hospitals, 1 Girls' Orphanage, 1 Women's Home, 1 Boys' Orphanage and Boarding School with a Carpentry Industrial department, and 1 M. E. School with 150 pupils. Communicants number 200.

Secretary:—Rev. S. W. Law, Motihari, Champaran District, Bihar.

THE NATIONAL MISSIONARY SOCIETY OF INDIA.—Established 1905, started, financed and managed by Indian Christians; has a staff of 36 missionaries and 166 helpers and voluntary workers; operates in Montgomery District (W. Punjab); Ferozabad (U.P.); Halaughat, Mymensingh (East Bengal); Murwahi (C.P.); N. Kanara, Mirajgaon and Poona (W. India); Palkar Taluk (Nizam's Doms); Tirupattur Taluk (N. Arcot) and Kottayam in Travancore and Darapuram. Direct evangelistic work from 14 main Centres with about 300 workers including volunteers and missionaries in 10 language areas; Interdenominational; 37 Higher Elementary, Primary Nursery and night Schools, 1 High School, 1 Printing Press, 4 dispensaries, 1 Hospital, and 2 Child Welfare Centres. Annual expenditure Rs. 86,114 including self-supporting institutions. *The National Missionary Intelligencer* (a monthly Journal in English sold at Re. 1 per year, post free), *Deepikai* (a monthly journal in Tamil at 8 annas per year. Post free).

Address:—N. M. S. House, Royapettah, Madras.

President:—The Rt. Rev. S. K. Mondol. **General Secretary:**—S. J. Duraisamy, Madras.

THE SEVENTH-DAY ADVENTIST MISSION.—The Seventh-day Adventists commenced mission work in India in 1893, and now employ a staff of 848 workers, European and Indian, including 200 ordained and licensed ministers. Evangelistic and educational work is conducted in 39 vernaculars, beside work for English-speaking peoples in the large cities. For administrative purposes, there are five branch organisations located as follows:—

Seventh-day Adventist Mission—Western India. (Pastor F. E. Spiess, Superintendent.) **Office Address:** Salisbury Park, Poona.

Seventh-day Adventist Mission—Burma. (Pastor M. O. Manley, Superintendent.) **Office Address:** 63, U Wisara Road, Rangoon, Burma. Office Address during Japanese occupation: Salisbury Park, Poona.

Seventh-day Adventist Mission—North east India. (Pastor O. A. Skan, Superintendent.) **Office Address:** "Baragain", Ranchi.

Seventh-day Adventist Mission—North-west India. (Pastor R. L. Kimble, Superintendent.) **Office Address:** 23, Curzon Road, New Delhi.

Seventh-day Adventist Mission—South India. (Pastor O. O. Mattison, Superintendent.) **Office Address:** 9, Cunningham Road, Bangalore.

The general headquarters for India, Burma and Ceylon is located at Salisbury Park, Poona. A. L. Ham, President; A. F. Tarr, Secretary and Treasurer. (Office Address: Post Box 15, Poona). On the same estate is an up-to-date publishing house devoted to the printing of health, temperance, evangelical and associated literature. (Address: Oriental Watchman Publishing House, Post Box 35, Poona).

A large number of day and boarding vernacular and Anglo-vernacular schools are conducted in

different parts of the country; and at Vincent Hill School, Mussoorie, European education is provided, a regular high school course, with more advanced work for commercial and other special students, being available. In all the denominational boarding schools increasing emphasis is being laid on vocational work, the students being required to share in the domestic work of the institution, and in many cases, to engage in some trades or other work.

9 physicians, and a number of qualified nurses are employed, regular medical work being conducted at 29 stations.

The baptized membership (adult) is 8,659 organized into 198 churches; and in addition a substantial community of enquirers is receiving systematic instruction. 396 Sabbath Schools are conducted with an enrolled membership of about 15,589.

The Bombay Address is No. 15, Club Back Road, Byculla.

THE AMERICAN MENNONITE MISSION.—Established 1899, works in the C. Provinces & Bihar. Mission staff numbers 30, Indian workers 140, Church members 1,446, children (unbaptized) 930, Industrial Training institutions: 1, Academy including High School, Normal School and Bible School; Anglo-Hindi Middle Schools 2, Elementary Schools 12, Hostels 3, Women's Home 1, Hospital 2, Dispensaries 8, Leper Home 1, Home for untainted children of Lepers 2, Farm Village projects, 2.

Secretary:—Rev. Geo. H. Beare, Balodgahan, Via Dhamtari, C.P.

CENTRAL INDIA BAPTIST MISSION.—Taken over in 1944 by the Conservative Baptist Foreign Mission Society of the United States of America, from the Old Kurker mission. Working in C.P. and Berar; has a mission Staff of 25 workers, Indian workers 10; Churches 3; Christian Community 600.

Chairman:—Fredrick L. Kurtz, Ellichpur, Berar, C.P.

THE Ceylon and India General Mission.—Established 1892, occupies stations in Mysore State, in the Coimbatore and Anantapur Districts, also in the United Provinces. Mission staff 47; Indian workers 80; Churches 48; Communicants 1,522; Christian community 3,775; Orphanages 4; Schools 5; Pupils 552.

Headquarters:—"Mizpah," Richards Town, Bangalore.

THE BOYS' CHRISTIAN HOME MISSION.—The Boys' Christian Home Mission, better known as the B. C. H. Mission, was founded by Albert Norton in 1899, when a severe famine swept the land. The Headquarters of the Mission is Dhond, Poona District.

The main function of the Mission is the care of orphans and at present it is looking after 170 orphans or needy children.

It also runs a day school which has an attendance of nearly 320 children. A little agricultural work is also being carried on. The Mission has a work centre at Oral, U.P., where a school for girls is conducted, with an attendance of about 100.

There are 6 missionaries in the Mission at present and nearly 50 Indian workers. The Mission is evangelical and does evangelistic work in many villages around the main stations. Its object is to help the Indian people in any way it can, especially poor Indian Christians.

Director:—Rev. John E. Norton.

LADIES' SOCIETIES

ZENANA BIBLE AND MEDICAL MISSION.—This is an interdenominational society, with headquarters, 33, Surrey Street, London, working among women and girls in 5 stations in the Bombay Presidency, 6 in United Provinces and 4 in the Punjab. There are about 45 European Missionary ladies on the staff with Assistant Missionaries, Indian teachers, nurses and Bible women. There are three hospitals supported by the Society—Nasik, Lucknow and Patna. There are High Schools in Bombay Lahore and Panchgani and a number of City schools of which those at Benares are the largest. At Lahore there is a University Department. The Evangelistic side of the work is largely done by house to house visiting.

Hon. Treasurer:—Major Mainwaring Burton.

President:—The Lady Kinnaird.

Secretary:—Miss Robinson.

WOMEN'S CHRISTIAN MEDICAL COLLEGE, LUDHIANA with which is incorporated the PUNJAB MEDICAL SCHOOL FOR WOMEN. In 1894, the North India School of Medicine for Christian Women was opened in Ludhiana in order to give a Medical Education under Christian influence to Indian women. Doctor Edith Brown, D.B.M., M.A., M.D., M.C.O.G., etc., was its Founder and Principal until October 1942 when she became Principal Emeritus, and Dr. A. M. S. Pollock, F.R.C.S.E., was appointed Principal. The School is Inter-denominational, and trains students for various Missionary Societies.

The Memorial Hospital in connection with the College has 270 beds and 61 cots.

1944 is the year of the College Jubilee and in these 50 years 476 medical students qualified as Doctors, 186 as Dispensers, over 300 Nurses and over 1,500 Midwives and Nurse Dais. Nurses and Dispensers also do midwifery and are included in this last figure.

There are at present 107 students, 5 dispensers, 52 Nurses, 1 Mothercraft Pupil, 18 Midwives and 52 Nurse Dais making a total of 235 women in training, besides 20 Indigenous Dais receiving instruction at the Health Centres run in connection with the Hospital. There are 3 City Centres.

During the year 1943 there were 5,229 In-Patients, and 54,525 Out-Patients.

THE MISSIONARY SETTLEMENT FOR UNIVERSITY WOMEN was founded in Bombay in 1896, its work is religious, social and educational. The Settlement supplies a hostel for University students of all nationalities. Classes for educated girls are provided and teaching is also given in pupils' homes. The Settlement staff take part in many of the organised activities for women's work in the city.

Warden:—O. M. Kaar, B.Sc. (London), Reynolds Road, Byculla, Bombay.

Staff:—E. L. Lane Smith, B.A. (Oxon.); E. Watts, B.A. (Wales).

THE RAMABAI MUKTI MISSION (affiliated with the Christian and Missionary Alliance Mission in 1925), the well-known work of the late Pandita Ramabai shelters about 700 deserted wives, widows and orphans, educating and fitting them to earn their living. The Mission is worked on Indian lines and carried on by Indian and European workers. Evangelistic work is carried on in the surrounding villages of Kedgaon, Poona District.

Secretary and Treasurer:—Miss J. I. Craddock.

INTER-DENOMINATIONAL MISSIONS

"THE CENTRAL ASIAN MISSION." Founded 1902. Head Office, 47, Victoria Street, London, S.W. 1; Field Secretary, Bandipur, Kashmir. Stations at Mardan, Bandipur, Shigar, Khapala, Kargil and Zangskar. Protestant, Evangelical, Inter-denominational. 20 European workers.

THE FRIENDS' SERVICE COUNCIL.—The Friends' Service Council works in five stations of the Hoshangabad District besides two organized congregations in Central India.

The Church, which is composed of 5 Monthly Meetings united in the Mid-India Yearly Meeting, is largely organised on the lines of the Society of Friends in England. There are 250 full members and 1,650 adherents.

There are 9 missionaries.

The principal activities are a general hospital with dispensary and nurses' training department, a Primary School and an Indian English Middle School Itarsi; a Boarding school for girls with Primary and Indian English Middle Departments at Sohagpur; a Home for older girls in Sohagpur where toys are made for sale; a Boys' Hostel at Itarsi for boys attending Middle school there. The Council's work also covers two villages in the Seoni Tahsil of the Hoshangabad district in one of which, Makoriya, there is a Mission Farm stretching 200 acres for demonstration methods of intensive farming and anti-erosion work and a Primary School.

A Settlement is maintained at Rasulia near Hoshangabad a Centre of a Rural Development Co-operative Society which is handling a large proportion of the goods sold in the Hoshangabad Tahsil under the Govt. Rural Rationing Scheme; besides work of an educational and social nature is carried on; Wardens, D. G. and E. M. Groom.

There is also a Weavers' Co-operative Society at Khara, Itarsi, where cloth is made on handlooms.

A "Quaker Centre" at 24, Rajpur Road, Delhi acts as a Christian Cultural Centre for the promotion of adult education and Inter-Communal harmony and as a meeting place for people interested in the international service of the Society of friends.

Wardens: Ranjit & Doris Chetsingh.

Mission Secretary: Heinz Tucher, Mokhariya, near Itarsi, C.P. **Church Secretary:** Harry Mirchulal, Itarsi, C.P.

THE AMERICAN FRIENDS' MISSION.—With Missionaries working in Bundelkhand, Hospital for Women and Children at Chhatapur, Orphanage, and school work at Nowgong. Churches and Evangelistic work throughout the district.

Superintendent: Rev. Everett L. Cattell, Chhatapur, C.I.

THE OLD CHURCH HEBREW MISSION was established in 1858, in Calcutta, and is the only Anglican Hebrew Christian Agency in India. **Hon. Secretary:** Rev. C. R. Thomson, 11, Mission Row, Calcutta.

LUTHERAN SOCIETIES

THE INDIA MISSION OF THE UNITED LUTHERAN CHURCH IN AMERICA—founded 1842—commonly known as the United Lutheran Church Mission. THE BASEL EVANGELICAL MISSION—(Incorporated in Switzerland), with its headquarters in Mangalore, South Kanara, was founded in 1834 and is at present carrying on the work in South Kanara, South Malabar, Malabar and Coorg. It has at the beginning of 1945, 28 chief stations and 84 out-stations with a total missionary staff of 18 European and about 800 Indian workers. The membership of the churches is 29,000. Educational work embraces 100 schools, among which a Theological Seminary, a second grade college and 7 high schools. The total number of scholars is 18,000. Medical work is done at Betgeri-Gadag, Southern Malabar Country, where a hospital for men and women and at Udipi, South Kanara, where a hospital for women and children is maintained. The Mission maintains a Home Industrial Department for women's work. There is also connected with the Mission a large Publishing Department with a Book Shop and a Printing Press, with about 100 workers, at Mangalore, S. Kanara, which is doing work in English and in a number of Indian languages.

President and Secretary:—Rev. A. Streckelsen, Calicut, Malabar.

ANGLO-INDIAN EVANGELICAL MISSIONARY SOCIETY—Constituted and Established by the Government of India Act XXI of 1860. British Headquarters, 55, Gloucester Road, London, S.W.7. **Chairman**—The Rev. Theodore Allison, B.D. **Secretary**—for U.S.A. The Rev. E. H. Ellenwood, Th.B., R.R.Z., Chicago, Illinois. For India, Ceylon and Malaya The Rt. Rev. The Lord Bishop of Ambur, India. **Address:** Diocesan Office, Ambur, N.A., India.

THE FEDERATION OF EVANGELICAL LUTHERAN CHURCHES IN INDIA was established in 1926 as an outward expression of the spiritual unity of the Lutheran Churches in India. It consists of 10 constituent churches and 3 co-operating Missions in India with a total membership of over 520,000. The work of the Federation is carried on by the Triennial Conference of the Federation, by its Executive Council, by a number of standing and special Committees and by its office-bearers. It was registered under the Societies Registration Act (Act XXI of 1860) in Oct. 1942. Including the members of one Lutheran Mission in South India, considering affiliation. The Lutheran baptised membership in India is 530,000.

The names of Officers for 1947 are as follows:

President:—Rao Sahib the Rev. T. D. Asirvatham, Tambaram, Gudur (Nellore Dt.).

Vice-President:—The Rev. Joel Lakra, Ranchi.

Treasurer:—The Rev. Dr. E. G. Wood, Guntur. **Secretary:**—The Rev. H. W. Mayer, Renigunt, M.S.M. Rly.

The Federation has set up a Committee on subsidized Churches and from contributions received chiefly from America and partly from India, are supported three Churches connected with the Federation. The budget of disbursements for 1947 amounts to Rs. 228,390 out of which Rs. 14,000 is expected to be raised in India.

THE CHURCH OF SWEDEN MISSION was founded in 1874. It operates in the Trichinopoly, Coimbatore, Madura and Ramnad Districts. In conjunction with the Leipzig Evangelical Lutheran Mission (L.E.L.M.) it co-operates with the Tamil Evangelical Lutheran Church. The C. S. M. maintains a general and eye hospital at Tirupattur, an eye hospital at Coimbatore, High Schools for boys at Madura and Pudukotah, High Schools for girls at Tanjore and Uslampatti and various Primary Schools. European staff 43; School Teaching staff 154; Schools 22; Pupils: boys 2,555 and girls 1,120.

President:—Rev. I. Eseborn, B.A., D.D., "Gurupul," Kilpauk, Madras.

LEIPZIG EVANGELICAL LUTHERAN MISSION—The Lutheran Mission work in India was commenced in 1706 by German Missionaries under the Danish Tranquebar Mission. It was taken up by the L.E.L.M. (founded in 1836) in 1841. The L.E.L.M. re-entered into the work after the great war in 1927. It is located in the Madras, Chingleput, South Arcot and Tanjore Districts. The Mission co-operates with the Church of Sweden Mission and the Tamil Evangelical Lutheran Church. The L.E.L.M. maintains two High Schools for boys at Madras and Shiyali (Tanjore Dt.), one High School for girls at Madras, a number of Elementary Schools for boys and girls in different places, and various other institutions.

Owing to the war, the whole Mission work has been temporarily placed under the Mission Council of the Church of Sweden Mission. The work is administered by a Special Committee. "The Northern Field Committee".

Chairman: Rev. S. Estborn B.A., D.D., Principal, Gurukul, Kilpauk, Madras.

TAMIL EVANGELICAL LUTHERAN CHURCH—Organised Churches (Pastorates) 46; Ordained Indian Ministers 47; other Indian workers 117; Baptised membership 43,515; Schools 195; Teaching staff 821; Pupils: Boys 13,689; Girls 7,451.

President:—Rt. Rev. J. Sandegren, M.A., D.D., L.N.O., Bishop of Tranquebar, Trichinopoly.

MISSOURI EVANGELICAL LUTHERAN INDIA MISSION (M.E.L.I.M.)—Located in Madras Presidency, Mysore, Travancore and Ceylon (1895).

Work is principally among the Santals but also among Bengalis and the Mech people (Boro). Mission staff numbers 57 of whom 2 medical missionaries. Indian pastors 51, other Indian workers 500, Christian community in organised congregations 27,000. 6 boarding schools with 900 pupils, 130 elementary schools with 3,000 pupils, industrial school with 60 pupils, 1 printing press, 1 orphanage with 30 orphans, 2 hospitals, 4 dispensaries, 2 leper colonies with 400 lepers, 1 tea garden. **Secretary:** Rev. J. Gausdal, Dumka, Santal Parganas.

METHODIST CHURCH

The Free Methodist Mission of North America—Established at Yeotmal, 1892, operates in Yeotmal District in Berar with a staff of 10 Missionaries and 43 Indian workers. Organised churches 12, 1 Theological School, 1 Anglo-Vernacular Middle School, 5 Elementary Schools, 1 Biblical Seminary, 3 Primary Schools.

Secretary:—Miss P. M. Phelps, Yeotmal, Berar.

THE SALVATION ARMY

The work of the Salvation Army in India and Ceylon was commenced in 1882 by the late Commissioner Booth-Tucker and was for many

years under his control, with Headquarters in India. For some time now, the areas occupied have been divided for administrative purposes into 6 Territories, each under a Territorial Commander; and one smaller Command.

Northern Territory, with Headquarters at Lahore.

Western Territory, with Headquarters at Bombay.

Madras and Telugu Territory, with Headquarters at Madras.

Southern Territory, with Headquarters at Trivandrum, in Travancore State.

Ceylon Territory, with Headquarters at Colombo.

Eastern Territory, with Headquarters at Calcutta.

Burma Command, with Headquarters at Rangoon.

The Commanders are directly responsible to the International Headquarters in London.

Northern Territory—The area in this Territory is the Salvation Army work in the Punjab, Delhi and United Provinces. The Territory is controlled from Lahore.

Evangelistic work, especially among the "depressed classes," is extensively carried on, both in the Punjab and the U.P.

A number of Settlements for the reformation of "Criminal Tribes" are under the control of the Salvation Army in the United Provinces (where this important reformatory work was commenced).

A land colony 2,000 acres in extent is in existence in the Multan District, where a population of 2,250 has been settled. The land has become the property of the holders.

Medical work is carried on in two Hospitals, one of which is in the Punjab and the other in the United Provinces; and also in dispensaries.

Other institutions include, Day and Boarding Schools and Agricultural Colonies.

Village centres at which the S. A. Works 2,411
Officers and Employees 610
Social Institutions 13

Territorial Headquarters:—35, Queen's Road, Lahore, Punjab.

Territorial Commander:—Lt.-Commissioner H. S. Hodgson.

Western India Territory—The Western India Territory comprises Rajputana, Central India, Kathiawar, Bombay Presidency, Goa, Marathas, Mauritius.

Territorial Headquarters:—The Salvation Army, Morland Road, Byculla, Bombay.

Territorial Commander:—Lieut.-Commissioner A. Moffat.

Corps. 316; Outposts 524; Societies 4534; Social Institutions 18; 209 Day Schools and Boarding Schools.

Besides the distinctly evangelistic operations there are established 2 large General Hospitals—"Emery Memorial," Anand; "Evangeline Booth," Ahmednagar; several Dispensaries; 209 Day Schools; 4 Boarding Schools; Industrial and Rescue Home for Women; King George V Memorial Infirmary, and Lady Dhanubai Home for the Destitute; Weaving Schools, Factory for the making of Weaving and Warming Machines; and a Land Colony, one Red Shield Hostel; Employment Bureau, Bombay; King Edward Industrial Home, Bombay and Workmen's Hostel, Bombay.

Madras and Telugu Territory—Embraces Madras City, the Central and Northern districts of the Presidency, also Hyderabad and the Central Provinces. 430 fully commissioned officers and 105 workers are fully occupied in evangelical, educational and village uplift work carried on in just on 400 villages, two central boarding schools, a Training Institute for men and women selected for officership; a criminal tribes settlement of 2,500 men, women and children—many work at Chirala, the others on the land. A Leper Colony, General Hospital for women and children, though men are also treated, a Social Services Department where wastepaper sorting, etc. is carried on, and a Women's Industrial Home in Madras complete the list of institutions where a selfless humanitarian work is going forward.

Territorial Headquarters—The Salvation Army, 2 Ritherdon Road, P.O. Box 453, Vepery, Madras.

Territorial Commander—Lt.-Colonel Ivor Palmer.

General Secretary—Brigadier N. Zachariah.

Southern India Territory—The Territorial Headquarters is Trivandrum, Travancore State.

The work of The Army had its beginning among the Tamil-speaking people of the southern part of the State nearly fifty years ago. The work developed and extended northward through the whole State of Travancore into Cochin, and during the past twenty-five years eastward into the British administered districts of the southern part of the Madras Presidency.

More than 495 corps and over 1,255 officers labour amongst the village populations. The Army has a membership in South India of some 85,518. Hundreds of Salvation Army Halls have been erected in which gather Sunday after Sunday congregations of Christian men and women, converts from among those who have been the most depressed people in the country, now of the third, second and first generations.

This territory is divided for administrative purposes into 15 divisions and Districts 6 among the Tamil-speaking people and 9 amongst those who speak Malayalam.

Medical work, also the work of our Leper Hospitals take care of a vast amount of human suffering. The Catherine Booth Hospital at Nagercoil, which has grown out of a very small beginning, is now a fully equipped, modern institution of many departments, dealing with all manner of medical and surgical cases. The

Hospital is equipped with X-Ray, radium, iron lung and splendid nursing facilities. Branches from this institution carry the service of the Hospital to some of the most remote regions.

134,945 patients were treated during the past year in the Catherine Booth Hospital and its several Branches and 1,525 major operations and 3,490 minor operations were performed. Two Leper colonies are run on behalf of the Cochin Government and the other the Evangeline Booth Leper Hospital in North Travancore, have combined 553 patients. These two institutions carry on the work ranking with the highest traditions of Christian service.

Workers in the Territory consist of 1,255 Officers, 456 employees. There are 468 Officer Corps and 137 Societies, 94 primary day schools, 5 Boarding Schools, 1 Middle School, 1 High School, 1 Night School, 1 Training Garrison, 1 Women's Industry and 2 Men's Industries.

Territorial Headquarters—S. A. Kowdyar, Trivandrum, Travancore State.

Territorial Commanders—Colonel Edwin H. Sheard, F. A. Mackenzie.

Chief Secretary—Lieut.-Colonel S. Manuel.

CHRISTIAN COUNCIL OF INDIA AND PAKISTAN

This Council (formerly known as the National Missionary Council, later as the National Christian Council) was organised in 1914 as the result of the first World Missionary Conference held in Edinburgh in 1910. Similar Councils have come into existence in China, Japan, Korea, The Near East, Siam, Philippine Islands, Netherland Indies, Congo and other Mission fields. The Missionary Societies of the 'sending countries' are also linked together by similar national organizations. All these National Christian Councils and Conferences of Missionary Societies head up in the International Missionary Council which has its offices in London (Edinburgh House, 2 Eaton Gate, London, S.W. 1) and in New York (150, Fifth Avenue, New York City).

Basis—The Council is established on the basis that the only bodies entitled to determine the policy of the Churches and Missions are the Churches and Missions themselves. Questions of doctrine and ecclesiastical policy lie outside the province of the Council.

Objects—1. To stimulate thinking and investigation on missionary questions, to enlist in the solution of those questions the best knowledge and experience to be found in India and other countries; and to make the results available for all Churches and Missions in India.

2. To help to co-ordinate the activities of the Provincial Councils and to assist them to co-operate with each other where such co-operation is desirable.

3. Through common consultation to help to form Christian public opinion and bring it to bear on the moral and social problems of the day.

4. To be in communication with the International Missionary Council regarding such matters as call for consideration or action from the point of view of the Indian mission field as a whole.

5. To make provision for the convening of a National Christian Conference when such is in the opinion of the Council desirable.

(Exclusive of games and library subscriptions). *Secretary:*—N. G. Brown.

Sports

SPORT in India during 1947 was considerably interfered with by the political and communal conditions, which not only divided the country but temporarily curtailed many sporting activities.

Cricket.—The Board of Control for Cricket in India is the ruling organisation of the game. There are seventeen Provincial Associations in the country in affiliation with it and these compete annually for the Cricket Championship of India, the trophy for which is a magnificent gold Cup of unique design, called the Ranji Trophy, which keeps green the memory of that illustrious Indian cricketer, Prince Ranjitsinhji. The year saw the demise of the famous Pentangular Tournaments, these being discontinued because it was feared that sport on a communal basis was not for the general good of the country.

The year 1947 saw an Indian Cricket team leave the shores of India for Australia, this being the first occasion on which a representative Indian cricket team had toured that continent.

Football.—The game in India is controlled by the All-India Football Federation which has subordinate provincial associations in affiliation with it. The game has gained tremendous popularity in recent years and huge crowds attend important matches. The official championship tournament of the country is conducted on provincial lines between teams representing the subordinate associations, the other principal competitions being the Indian F.A. Shield in Calcutta and the Rovers Cup Tournament in Bombay.

Hockey.—Hockey is controlled by the All-India Hockey Federation and enjoys considerable popularity. In view of India's repeated victories in the Olympiads, it is claimed that the standard of play in this country is the best in the world. The parent body controls through subordinate provincial associations. The Provincial Championship Trophy is a quaintly carved Moari Shield, which was presented by the Moaris to the Indian team which toured New Zealand. The principal club tournaments are the Aga Khan Cup in Bombay, the Peighton Cup in Calcutta and the Yadavendra Shield in New Delhi.

Turf.—Racing in India is organised on a large scale and the many courses are controlled by the Royal Western Indian Turf Club and the Royal Calcutta Turf Club between them. The standard of racing is very high and the race courses, particularly those in Bombay and Calcutta, compare favourably with the best in the world. Recent trend has been the encouragement of the indigenous breed which has made remarkable improvement in recent years. The principal races are the Indian Derby and the Eclipse Stake of India in Bombay and the King's and Governor-General's Cups in Calcutta.

Tennis.—Tennis is controlled by the All-India Lawn Tennis Association through its provincial associations. A definite attempt is being made to raise the general standard by the employment of expert coaches, the ultimate aim being the creation of a strong Davis Cup team. Most tournaments in India are played on hard courts of beaten earth, though there are some good grass courts in Calcutta.

Athletics.—Athletics in the country is in a state of transition. Formerly, the All-India Olympic Association, with subordinate associations in most of the provinces, controlled all the branches of it, but the present trend is for de-centralization. The biggest handicap is the lack of suitable tracks and training grounds there being only two cinder tracks, one at Bangalore and the other at Patiala.

Golf.—Golf has a big following and almost every town of any size has its own course. The Royal Calcutta Golf Club's, golf course is the best in the country, though the one recently laid out by the Bombay Presidency Golf Club at Chembur, a suburb of Bombay, holds out good promise. Annual competitions are held by leading clubs all over the country, the Nasik Golf Club tournament being the most popular.

Other Games.—Most of the other games have their controlling organizations. Amateur boxing is strong in Bombay, Bengal, Lahore and Karachi. Table-Tennis and Billiards have got on well and Badminton is making appreciable progress. Aquatics which is being placed on organised basis shows signs of development.

BOMBAY RACES

1000 GUINEAS, JANUARY 2, 1948.
(1 Mile).

Maharaja of Idar's "Jeanne d'Arc" 8-7
(Rickaby) .. 1

Western India Championships, over 36 holes, at W.I.G.C. Nasik, September 1947. N. E. A. Pandole beat Major Blair 1 up.

SWIMMING

All-India Championships, at Pransukhlal Maffathal Hindu Swimming Pools (Salt Water), December 1947. Results:—

MEN'S EVENTS

100 Metres Free Style: I. Mansoor (Bombay) 1, Thanawalla (Bombay) 2, Dilip Mitter (Bengal) 3. Time: 1 minute, 4.4 seconds.

100 Metres Breast Stroke: P. Mullik (Bengal) 1, J. J. Naigamwalla (Bombay) 2, N. Das (Bengal) 3. Time: 1 minute, 23.6 seconds. (New All-India Record).

100 Metres Back Stroke: K. N. Shah (Bombay) 1, J. Burman (Bengal) 2, S. Mehta (Bombay) 3. Time, 1 minute, 19.4 seconds. (P. Mitter Bengal finished first but was disqualified for holding the lanes while swimming).

200 Metres Breast Stroke: Prafulla Mullik (Bengal) 1, J. J. Naigamwalla (Bombay) 2, Nripen Das (Bengal) 3. Time: 3 minutes, 5.5 seconds. (New All-India Record).

200 Metres Back Stroke: K. N. Shah (Bombay) 1, Pratap Mitter (Bengal) 2, Bijoy Burman (Bengal) 3. Time: 2 minutes, 57.5 seconds.

400 Metres Free Style: Bimal Chandra (Bengal) 1, I. Mansoor (Bombay) 2, M. Talbot (Bombay) 3. Time: 5 minutes, 38.4 seconds.

1,500 Metres Free Style: Bimal Chandra (Bengal) 1, I. Mansoor (Bombay) 2, M. N. Bhatia (Bombay) 3. Time: 22 minutes, 36.7 seconds. (New All-India Record).

4 x 100 Metres Team Relay: Bombay (Mansoor, Karmally, K. Shah and Thanawalla) 1, Bengal (Dass, Chatterjee, Partap Chandra and Dilip Mitter) 2. Time: 4 minutes, 31.4 seconds. (New All-India Record).

3 x 100 Metres Medley Relay: Bombay (Shah, Naigamwalla and Mansoor) 1, Bengal (P. Mitter, Mullik and D. Mitter) 2. Time: 3 minutes, 49.2 seconds. (New All-India Record).

Springboard Diving: M. Greenwell 1, J. B. Yodh 2, Dand 3.

WOMEN'S EVENTS

100 Metres Free Style:—Miss Pam Ballantyne (Bombay) 1, Miss L. King (Bombay) 2, Miss Arati Saha (Bengal) 3. Time: 1 minute, 18.6 seconds. (New All-India Record).

FOOTBALL

I.F.A. Shield at Calcutta, November 15, 1947. Mohan Baghan beat East Bengal by 1 goal to nil.

Rover's Cup, at Bombay, abandoned due to a stand collapse, October 1947.

Santosh Memorial Shield, at Calcutta, October 13, 1947. Bengal beat Bombay by 1 goal to nil.

BOXING

Western India Boxing Championships, at Bombay, March 5, 1948. Results of finals:—

Flyweight:—L. Coutinho (Rangers) beat B. D'sa (Sir D. M. P. G. I.) on points.

Bantamweight:—C. J. Satur (B. B. & C. I.) beat F. Roquizzinho (20th Century H. C.) on points.

Featherweight:—Peter Prince (Rangers) beat Sid Parry (Rangers) on points.

Lightweight:—G. Raymond (Rangers) beat D. Irani (B. B. & C. I.) on points.

Welterweight:—V. Pereira (N.N.H.) w.o. M. Carvalho (20th Century H. C.), who was declared medically unfit.

Middleweight:—Capt. T. Divecha (Indian Green) beat M. N. Pagriwalla (Dadar B. C.), the referee stopping the fight in the first round.

30 Metres Breast Stroke: Miss Dolly Nazir (Bombay) 1, Miss N. Bharucha (Bombay) 2, Miss Arati Saha (Bengal) 3. Time: 1 minute, 30.1 seconds. (New All-India Record).

60 Metres Back Stroke: Miss J. MacClumpha (Bombay) 1, Miss N. Bharucha (Bombay) 2. Time: 1 minute 39.0 seconds. (New All-India Record).

300 Metres Breast Stroke: Miss Dolly Nazir (Bombay) 1. Time, 3 minutes, 30.6 seconds. Miss Arati Saha of Bengal, was disqualified.

300 Metres Freestyle: Miss Pam Ballantyne (Bombay) 1, Miss Lorna King (Bombay) 2, Miss Arati Saha (Bengal) 3. Time: 3 minutes, 2.4 seconds. (New All-India Record).

HOCKEY

Aga Khan Cup, at Bombay, April 14, 1947. Rawalpindi Spartans beat "The Times of India" by 2 goals to 1, after a 1-1 draw.

Bighton Cup, not played.

Inter-Provincial Championships at Bombay, March 18, 1947. Punjab beat Bombay by 2 goals to 1.

Gold Cup for Women at Bombay, April 28, 1947. Bombay beat Bengal by 3 goals to nil.

Climbing In The Himalayas

OWING to their immensity and the time and cost involved in undertaking expeditions into the Himalayas a great deal of mountaineering and exploration remains to be done in the world's highest mountain range. There are over fifty summits of 25,000 ft. and of these only two, *Kamet* (25,447 ft.) and *Nanda Devi* (25,660 ft.) have been scaled, whilst there are innumerable lesser summits of such formidable difficulty, owing to the comparatively recent geological formation of the range, that judged by modern mountaineering standards the majority are inaccessible. The highest peak is Mount Everest, which by latest measurements is 29,141 ft. Next come Kanchenjunga and K2, both about 28,150 ft., though which is the higher of the two is not certain.

Pioneer Climbers.—Mountaineering in the Himalayas began some eighty years ago when surveyors crossed high passes and scaled peaks in the course of their work. Among these pioneers must be mentioned the Schlagintweit brothers, who in 1855 reached a height of 22,329 ft. on the Eastern Ibi Gamlin, one of the subsidiary peaks of *Kamet*, whilst I. S. Pocock of the Survey of India set up a plane table at 22,040 ft. in the same district. Another notable early explorer was the famous botanist Sir Joseph Hooker who, in 1849, explored the Sikkim valleys of Kanchenjunga and made attempts to climb Kangchenjau, 27,700 ft. and Pauhunri, 23,180 ft. Some remarkable explorations were also carried out by the Pandits of the Survey of India. Among these men was Babu Sarat Chandra Das who traversed the Jonsong La, 20,200 ft.

Later in the nineteenth century came Lord Conway who, in 1892, made explorations in the Karakoram Himalayas, particularly in the region of the Baltoro Glacier, the greatest of Himalayan glaciers, and climbed a peak of 25,000 ft. Sir Francis Younghusband also made explorations in the Karakoram and accomplished the first crossing of the Karakoram Pass. The Duke of the Abruzzi also made a number of expeditions into this range and reached a height of 25,000 ft. on the Bride Peak. Mountaineering developed rapidly in the "nineties", and a bold attempt was made by A. F. Mummery, Professor N. Collie and Brigadier-General the Hon. C. G. Bruce to climb Nanga Parbat. In a final attempt on the mountain, Mummery and his two Gurkhas were lost. In 1899 D. W. Freshfield made the first circuit of Kanchenjunga and explored the Nepal side of the mountain.

A New Phase.—Meanwhile, thanks to Brigadier-General Bruce, Gurkhas, and later Sherpas and Bhotias were trained for mountaineering and, with the advent of first-class portage, Himalayan mountaineering entered on a new phase. Dr. and Mrs. Bullock Workman made a number of expeditions into the Karakoram and W. W. Graham made a number of remarkable ascents, with Swiss guides, including an ascent of Kabru, 24,000 ft., which has been the subject of much controversy. Kabru was later attempted by two Norwegians, Messrs. Rubenstein and Monrad Aas, who got within a few feet of that top.

The present century opened with a number of remarkable ascents by Dr. A. M. Kellas, who died during the 1921 Everest expedition. He climbed several great peaks including Kangchenjau, Pauhunri and Chomolomo and made expeditions to the Central Himalayas where, with Colonel H. T. Morshead he reached in 1920 an altitude of 23,500 ft. on *Kamet*.

In 1907 Brigadier-General Bruce, Dr. T. G. Longstaff and A. L. Mumm explored the Garhwal, Himalayas and reconnoitred *Kamet*. After this Longstaff, with the Swiss guides Alexis and Henri Brocherel, ascended Trisul, 23,406 ft. which, until the Jonsong Peak, 24,344 ft., was climbed in 1930 remained the highest summit reached. In 1911 and 1912 attempts were made to climb *Kamet* by C. F. Meade and his Swiss guides and a height of 23,500 ft. was gained. Captain Morris Slingby also attempted *Kamet* at this time.

Attempts on Kanchenjunga.—The first attempt on Kanchenjunga was made in 1905 but ended in disaster, Lieut. Pache and three porters being killed by an avalanche. The second attempt in 1929 was made by a solitary American, E. F. Farmer, who lost his life. In the same year a determined attempt was made by a party of Bavarian Mountaineers led by Paul Bauer. A height of over 24,000 ft. was reached on the north-east spur before bad weather forced the party to retreat.

In 1930 a fourth attempt was made by an International expedition led by Professor G. Dyhrenfurth. The party attempted the mountain from the Nepal side, but were repulsed by an ice avalanche which killed one of the porters. Subsequently, they ascended a number of peaks including the Ramthang Peak, 23,200 ft. and the Jonsong Peak 24,344 ft.

The fifth attempt in 1931 was made by Bauer and his party, but failed at a slightly greater elevation than was attained in 1929. One of the party H. Schaller and a porter were killed by a fall during the expedition.

In the summer of 1931 a party of young British climbers led by Mr. F. S. Smythe succeeded in reaching the summit of *Mount Kamet* (25,447 ft.), the first peak over 25,000 ft. to be climbed.

Mount Everest.—There have been six expeditions to Mount Everest of which those in 1921 and 1935 were reconnaissances and those in 1922, 1924, 1933, 1936 and 1938 attempts to reach the summit.

The preliminary expedition for the reconnaissance of the approaches to Mt. Everest carried out its work in the most complete manner under the leadership of Lt.-Col. C. K. Howard-Bury. The approaches to Mt. Everest on all its northern faces were thoroughly examined, and relations were established with the local authorities. On the information and experience of the reconnaissance expedition the second expedition to Everest was organised and set off the following year under the leadership of Brig.-Gen. the Hon. C. G. Bruce. Capt. G. Finch and Capt. T. A.

Bruce succeeded with the help of oxygen in reaching the height of 27,300 ft. During this expedition seven men were killed when an avalanche swept them over an ice cliff some 60 feet high.

The 1924 expedition was again commanded by Brig.-Gen. Bruce. But owing to his ill health Lt.-Colonel E. F. Norton took on the command. Lt.-Col. E. F. Norton and Dr. T. H. Somervell reached a height of 28,100 feet. Then a final attempt was made by G. L. Mallory and A. C. Irvine. They were assisted by a supporting party consisting of N. E. Odel and J. de V. Hazard. On June 6th they left the 25,000 feet camp with three porters who carried loads for them up to 23,800 ft. On June 8th they left camp for their attempt and were never seen again. On June 10th for the third time Odel climbed up to the 26,800 feet camp but could find no sign of Mallory and Irvine, and communicating with Norton evacuated the mountain.

The expedition of 1933 followed a successful effort by Lt.-Col. J. L. R. Weir, Political Officer in Sikkim, to obtain the permission of the Tibetan Government for a further attempt to climb the mountain. An *Everest Committee* was formed under the aegis of the Royal Geographical Society and the Alpine Club, and Mr. Hugh Rutledge, formerly of the I.C.S., accepted an invitation to take charge of the expedition. Included in its members were Mr. F. S. Smythe, leader of the successful *Kamet Expedition* of 1931, and Capt. E. St. J. Birnie, E. E. Shipton and Dr. C. R. Greene who climbed with Mr. Smythe in 1931. The Expedition reached Calcutta in February and forthwith proceeded to its main task.

The 1933 expedition established its base in the Rongbuk Valley on April 17th and on April 21st. Camp I was established. Thenceforward the expedition was dogged by exceptionally bad pre-monsoon weather which greatly hindered the establishment of camps and made the ascent to the North Col. 23,000 ft. prolonged and arduous work. Camp IV, 22,800 ft. was not established until the middle of May after a 40 feet ice wall on the North Col. slopes had been climbed. The expedition was equipped with wireless which enabled weather reports to be received from the meteorological authorities at Alipore. One installation was at Darjeeling, one at the base camp and a third at Camp III, 21,000 ft. Camp III was linked to the North Col. by field telephone so that messages could be received up to 23,000 ft. from the plains of India in a short space of time.

Owing to a series of blizzards and high winds Camp V was not established until May 22nd. But it was pitched at 25,500 ft. several hundred feet higher than previously. The party was then cut off for three days by a furious blizzard and eventually had to retreat to Camp IV. The camp was re-established on May 28th and on May 29th. Wyn Harris, L. Wager and J. L. Longland continued the ascent and finally pitched Camp VI at 27,400 ft., 600 ft. higher than in 1924, after a magnificent effort on the part of the porters. Longland then brought the porters down but had a terrible time in a

blizzard and only by exercising great mountaineering skill steered them down to Camp V. The following morning Wyn Harris and Wager made a reconnaissance of the route to the summit and failing to discover a route along the crest of the north-east ridge finally followed the same route as Norton in 1924. They were stopped by dangerous conditions at 23,100 ft. and returned to Camp VI where they met Shipton and Smythe who had come up from Camp V, after which they descended to Camp V. The following morning Shipton and Smythe were unable to leave Camp VI owing to a high wind but on June 1st they made their attempt on the summit.

An hour and a half after leaving the Camp Shipton had to return owing to some internal trouble. Smythe carried on alone and reached approximately the same point as Wyn Harris and Wager before he was forced to retreat owing to the deep powdery snow resting on the steep slabs. Shipton descended to Camp V the same day in very bad weather and Smythe spent a third night at Camp VI descending to Camp IV next day in a blizzard. Owing to frost-bites, strained hearts, and high altitude deterioration the party had to retire to the base camp. A week later they returned to Camp III to make another attempt. Owing, however, to the breaking of the monsoon this had to be abandoned and the expedition returned to Darjeeling.

An extraordinary attempt to climb Everest was made in 1934 by Maurice Wilson, a young airman. Having penetrated Tibet in disguise he marched to Everest and with a few porters went on in reaching 21,000 feet. He then succeeded alone and nothing more was heard of him, until his body was discovered near the site of Camp III, 21,000 feet, by Mr. E. E. Shipton's party in 1935.

1936 Expedition.—Early in 1935 the Tibetan Government granted permission for a further attempt to take place from June 1935 to June 1936 inclusive.

As there was no time to organise an attempt on the summit it was decided to send out a small party under the leadership of Mr. E. E. Shipton. This had as its objects: Collection of data as to monsoon snow and weather conditions; examination of alternative routes from the west, the trying out of new men for the summit attempt; physiological observations; a stereophotogrammetric survey; examination of ice formations on the North Col.

This expedition proved that Everest cannot be ascended during the monsoon and that the only hope of an ascent is during the period immediately before the monsoon.

Conditions during the monsoon are extremely dangerous and the party had a narrow escape from an enormous avalanche that fell from the slopes of the North Col.

During the course of this reconnaissance two dozen peaks over 20,000 feet high were ascended.

The 1936 expedition was led by Mr. Hugh Rutledge and included three of the 1933 climbers Messrs. Shipton, Smythe and Wyn Harris, and one of the 1933 Signals Officers Lieut. Smith Windham. It encountered exceptionally bad

weather and unusual conditions. Before the monsoon, snowstorms rendered the mountain unclimbable and the usual pre-monsoon north-west wind was lacking to clear the snow away. However, Camp IV on the North Col. was established to schedule and the party were in position to attack the summit when the weather broke and two feet of snow forced them to retreat down the dangerous slopes of the North Col. To cap their discomfiture the monsoon arrived on the exceptionally early date of May 24th. Two attempts were made to re-open the route to the North Col. but on both occasions the party were in great danger and the attempt had to be abandoned when Shipton and Wyn Harris were carried down by an avalanche and nearly lost their lives. Subsequently reconnaissance parties ascended the main Rongbuk glacier and examined the west side of the North Col. which, in spite of Mallory's unfavourable verdict, was found to be not only practicable but less dangerous in monsoon conditions than the east side.

The 1938 expedition consisted of seven climbers, H. W. Tilman, E. E. Shipton, F. S. Smythe, N. E. Odell, Dr. C. B. M. Warren, P. Lloyd and Capt. P. R. Oliver and was led by Tilman. It was considerably smaller than previous expeditions owing to economic reasons and because experience has shown that the small light expedition has as good and perhaps better chance of achieving its object than a large cumbersome expedition rendered comparatively immobile by its transport and tied down to a fixed plan. Though the expedition failed to reach the summit of Mount Everest it fully justified these beliefs and cost only £2,500 as against the £10,000 or more of previous Everest expeditions.

The expedition reached Rongbuk on April 6th and established Camp 3 on April 26th. Wind and cold made further advance impossible and the party descended to the Kharta valley for a rest and to recuperate from influenza, chills and sore throats. They returned in the middle of May during the commencement of the monsoon which broke on the unprecedented date of May 5th, one month to six weeks earlier than usual. The route up the North Col. was forced in dangerous snow conditions and the party had a narrow escape from an avalanche. Camp 4 was established on May 24th but snowstorms drove the party down. It was then decided to regain the North Col. from the west via the Main Rongbuk Glacier and Camp 4 was re-established after a difficult ice climb on June 5th. On June 8th Camp 6 was established by Shipton and Smythe with seven porters and the following day an attempt was made to reach the summit. Conditions, however, proved impossible owing to deep monsoon snow, and the party was forced to retreat after reaching a height of 27,300 ft. A further attempt by Tilman and Lloyd on June 11th met with no more success and the expedition had to be abandoned.

Aerial Expedition—An interesting side to the exploration of Everest was an aerial expedition undertaken in 1933 for the purpose of photographing the mountain from the air. This venture was financed by Lady Houston. Major L. V. S. Blacker, formerly of the Guides, was its leader and in charge of its survey work, Lord Clyde's

chief pilot, Flt. Lt. A. McIntyre second pilot and Major P. T. Etherton, its London manager. Two specially equipped aeroplanes, adapted to the use of the well-known Wapiti, were provided. A special point in their equipment was the provision of compressed oxygen for supply through gas masks to the aviators at high altitudes. The expedition was not permitted to fly across the Tibetan frontier, so as to circle Mt. Everest, but both machines successfully flew over the peak and several good photographs were taken of it. By permission of the Nepal Government a line of flight from Purnea, the base of the expedition, across Nepal territory to Mt. Everest, was taken and along this good survey photographs as the somewhat poor visibility at the time of the flight, in April permitted.

An interesting mountain flight of which details were published in 1933 was one from Raisalpur to Gilgit and back, undertaken by the R.A.F. at Raisalpur in the course of its routine duties in October, 1932. The expedition was commanded by F. Lt. Isaac and was made by five of the machines ordinarily in use by the Force. The distance from Raisalpur by way of the Indus Valley and past Nanga Parbat to Gilgit is 286 miles. It was covered in 2 hrs. 20 mins. on the outward flight and in 2 hrs. 5 mins. on the return journey. From Gilgit, the machines further proceeded upon flights over the Hunza, Nagar and Rakjot areas. Brilliant photographs of Nanga Parbat and Rakaposhi, as well as of other places of importance or interest, were taken. Such flights are now frequently made by the R.A.F.

PLANS FOR 1949

A new expedition to the Everest is being planned for 1949 or 1950 by an Australian ex-officer of the Royal Air Force, called A. F. Bandit who hopes to lead the expedition. He explained his plans in a broadcast over the BBC in December 1946. He said that he was more confident of success this time because he would have advantage of all the methods and equipments that have been perfected during the War. The commandos, the air rescue parties that had to get to inaccessible places in the mountains, the parachutists and other special Air Force units had made tremendous progress. Then as regards the question of supplies it would be possible to have these dropped by air, which would vastly simplify and economize on transport. Oxygen in the past had consisted of old-fashioned heavy equipment; they could now use modern equipment. This was much lighter and would supply them with oxygen for six or seven hours and would weigh about 15 lbs. against 35 of that used in the 1938 expedition.

There would also be at their disposal self-heating food. This would consist of cans of food with a heating unit incorporated in each individual can. Clothing also had reached a great height of perfection.

All the plans, captain Bandit explained would be made in England; all equipment and supplies would be collected; then it would all be flown in transport planes to Calcutta. It is possible that the journey from the foot of the

Himalayas to the base camp at Rongbuk 16,000 feet would be done by air which would mean that food and equipment could be dropped by air.

The base camp would be something like the base of a pyramid. And from that base as they go higher and higher through the advanced camps towards the peak, supplies and men would become smaller and smaller and more highly specialized. This would go on until at last the most successful climber carrying the minimum of equipment necessary to survive would get to the top.

NANGA PARBAT

The year 1932 saw a well organised expedition to *Mount Nanga Parbat*. It was conducted by Dr. Merkl, of Munich, and included Lt. R. N. Frier, of the Gilgit Scouts, who acted as transport officer, an American Mr. Rand Herron and Miss E. Knowlton, of Boston, U.S.A. Several determined attempts to reach the summit of the mountain in August were brought to an end by the break-up of the weather before they attained success.

The Disaster of 1934—In 1934 Herr Merkl returned to the attack with an even stronger party, which included a number of well-known German and Austrian mountaineers and Captains Frier and Sangster of the Indian Army as transport officers. Fatality early overtook the expedition, Herr Drexel dying of pneumonia. Owing to various delays, Camp IV was not established until the end of June. The party then proceeded to rush to the peak leaving only skeleton camps behind. Finally, after a height of 25,600 feet had been reached, and Camp VIII established at 24,800 feet, a terrible blizzard broke. The party retreated, but owing to the storm and ill-equipped camps retreat became a rout during which no fewer than nine lives were lost, Herren Merkl, Welzenbach and Wieland and six Darjeeling porters—men who had accompanied the 1933 Everest Expedition. Of the Europeans only the two Austrians Herren Schneier and Aschenbrenner escaped whilst of the surviving porters, all of whom were frost-bitten, one or two spent a week without food or shelter.

In May 1937, another attempt was made to climb *Nanga Parbat* by a German expedition, headed by Dr. Wien. News reached Simla on June 20 that disaster had overtaken the expedition and subsequently it was learned that the entire party of climbers with the exception of one survivor, Dr. Luft, had perished. Eight of the nine members of the expedition were killed along with nine Sherpa porters. Mountaineering experts are of the opinion that the season was not very propitious for the ascent of the peak, which is considered to be more accessible in the autumn.

A further German attempt to climb *Nanga Parbat* was made in 1938 under the leadership of Dr. Paul Bauer. During the second half of July the party succeeding in reaching a height of over 23,000 ft. but were forced to retreat by bad weather. During the climb the bodies of Herr Willy Merkl and the porter Gay Lay, who perished in 1934 were discovered.

In 1939 another German expedition led by Herr Peter Aufshnaiter explored the Diamir flank of *Nanga Parbat*.

Another expedition to the Karakoram took place in 1934 under the leadership of Dr. G. Dyhrenfurth. All four peaks of "Queen Mary" were climbed. The highest of these has been triangulated as 24,350 feet, but the party, state it to be more than 1,000 feet higher.

In 1934 E. E. Shipton and H. W. Tilman, by a magnificent piece of exploration and mountaineering, succeeded in penetrating the hitherto impracticable Rishi Ganga to the glacier basin of *Nanda Devi*, thereby solving a problem that had exercised the minds of Himalayan mountaineers for many years and completing the work of pioneers such as Dr. T. G. Longstaff and Hugh Rutledge. Shipton and Tilman also crossed from Badrinath to Gangotri via the Satopanth Pass and explored the head of the Gangotri glacier. Profiting by the discovery of the route to the Nanda Devi basin an Anglo-American party, the leader of which was H. W. Tilman, successfully scaled *Nanda Devi* via its south-west ridge, H. W. Tilman and N. E. Odell being the climbers to reach the summit. This expedition was remarkable in that owing to the sickness of the porters the climbers had to carry their own camps up the mountain. This is the finest and most difficult peak yet climbed in the Himalayas.

In 1939 the first Polish expedition to visit the Himalayas succeeded in making the ascent of the East Peak of *Nanda Devi*. Unfortunately an accident led to the death of M. M. A. Karpinski and S. Bernadzikiewicz on Trisul above the Milam Glacier.

Lt.-Col. C. F. Stoehr, R.E., and Lt. D. M. Burn, R.E., lost their lives on 12th August 1932, while climbing on Panjtarni, near Pahlgam in Kashmir.

In 1935 an attempt to scale Peak 325,400 feet, in the western Karakoram, was made by Lieut. J. Waller, Lieut. J. Hunt, Dr. J. S. Carslaw and W. R. Brotherhood, R.A.F. A series of blizzards were experienced but the party reached a height estimated as 24,500 feet. There is no great difficulty between this point and the summit.

In the Autumn of 1935 the summit of Kabru was reached by Mr. C. R. Cooke who was accompanied to the foot of the final rocks by G. Schoberth who was forced to give up owing to a high altitude cough and the risk of frost-bite. This ascent was made on November 18th, an unusually late date and is of great interest as proving that high Himalayan peaks can be climbed in early winter at least.

The 1936 a French expedition to the Karakoram, like the Everest expedition, encountered very bad weather and accomplished little.

After *Nanda Devi* the most remarkable ascent of 1936 was that of *Sinlochu*, a peak once designated as the "embodiment of inaccessibility", in the Kanchenjunga range. This was made by a small German party under the leadership of Herr Paul Bauer. *Sinlochu* is one of the most beautiful peaks in the Himalayas.

In 1939, a party of Munich mountaineers, consisting of Herren Grob, Paidar and Schmaeder, made the first ascent of the Tent Peak in the Kanchenjunga range and attempted the Twins Peak but were defeated by bad weather.

Other ascents in Sikkim were made by Marco Pallis's party who attempted Simvu unsuccessfully and by C. R. Cooke and F. Spencer Chapman who ascended several peaks of over 20,000 feet including the Fluted Peak.

During the summer of 1937 a number of peaks were climbed, the most notable being Chomolhari 23,997 ft. by F. Spencer Chapman with one porter, and the Mana Peak 23,860 ft. by Captain P. R. Oliver and F. S. Smythe. The latter completing the ascent alone as Capt. Oliver was insufficiently acclimatised. Three other peaks of 21,400 ft., 21,500 ft. and 22,481 ft. were also climbed by Oliver and Smythe and attempts made on Nilkanta and Dunagiri which were frustrated by bad weather. They also explored a remarkable plateau above the Banke Glacier, discovered in May 1937 by Lieut. R. A. Gardiner of the Survey of India. In addition, Smythe with three Tibetan porters climbed seven peaks of the Zaskar Range among them the very difficult peak of Nilgiri Parbat, 21,264 ft. During this expedition Smythe came upon some remarkable tracks in the snow which the Tibetan porters believed were made by a Mirka or Abominable Snow Man. These tracks were afterwards identified as bear tracks by the natural history authorities in London. It is believed that there is now enough evidence to explain this strange legend of the Himalayas.

Garhwal was visited in 1939 by a Swiss expedition led by M. Andre Roch and two fine peaks were scaled, Dunagiri and the Wedge Peak.

In 1938 C. S. Houston led an expedition to the Karakoram during the course of which a bold and determined attempt was made to climb K2, 28,150 ft. After failure to obtain a footing on the N. W. ridge, the party, which included several veteran Sherpa porters, ascended the N. E. ridge to a height of 26,000 ft.

A further attempt on K2 was made by an American party in 1939 but ended in disaster, Dudley Wolfe, and three Sherpa porters losing their lives in stormy weather high up the mountain.

Another expedition to the Karakoram was that undertaken by Capt. J. B. Harrison, Lieut. J. O. M. Roberts, R. A. Hodgkin, Dr. T. Graham Brown and Lieut. J. Waller together with Dr. G. A. J. Teasdale and Dr. Elizabeth Teasdale. The principal objective was Mashumbum, 25,660 ft. After establishing Camp 7 at 24,600 ft. Harrison and Hodgkin reached a height of about 25,000 ft. before being forced to retreat by bad weather. In descending to Camp 6 they were overtaken by a blizzard and forced to spend a night in the open as a result of which they were seriously frost-bitten. The devotion of the Sherpa porters prevented a more serious disaster.

Further exploration of the Badrinath, Kedarnath ranges at the sources of the Ganges as well as various ascents was made by a German expedition under the leadership of Dr. R. Schwarzgruber in the autumn of 1938. A little less than 10 years later (August, 1947) a Swiss party claimed that it had ascended Kedarnath.

The Survey of India are now very active and much work has been accomplished during the re-survey of Garhwal and Kumaon under the direction of Major Gordon Osmaston, whilst several thousand square miles of country have been mapped by Shipton and Tilman during their expeditions to the Shaksam in 1937 and by Shipton during his expedition to the Karakoram in 1939.

The Himalayan Club was founded in 1928, at New Delhi with the object of encouraging and assisting Himalayan travel and exploration, and extending knowledge of the Himalayas through science, art, literature and sport. The initiation of this Club was due to the late Sir Geoffrey Corbett, one-time Secretary, Commerce Department of the Government of India, and to Major Kenneth Mason, M.C., R.E., Assistant Surveyor-General.

A Tourist's Guide

MOUNT Abu (hill station): pop. 4,316, is in Rajputana, about 4,500 feet above sea-level. There are two seasons in the year, he first lasting about two and a half months from the middle of March to the beginning of June, and the second lasting about one and a half months from the middle of September to the end of October. *Places worth a visit*: 1. The Dilwara Jain temples, 2. Achalgarh temples, 3. Ruins of an ancient town called Chandra, 4. Shrine cut in rock, 5. Arbuda Devi, 6. Hermit's Peak, the highest in the Aravalli Hills, 7. Sun-set point, 8. Palanpur point, 9. Devangan temples, and 10. The Municipal Park. Mount Abu is electrified and has waterworks with public utility taps. The chief means of conveyance are rickshaws, touring cars and buses. There is a *Dak Bungalow* containing furnished rooms, permission to use which has to be obtained from the Assistant Engineer, P.W.D., Mount Abu. *Clubs*: 1. Rajputana Club, open only to Princes, Chiefs, Government and State Officials, 2. Rajputana Secretariat and State Officials, 3. Rajputana Club, open to visitors. *Hotels*: Rajputana Hotel. Mount Abu is reached by railway and road. The nearest railway station is Abu Road on the metre-gauge section of the B.B. & C.I.Rly. from Ahmedabad to Delhi. From the station Abu Road is about 17½ miles by road, and there is regular motor service between the town and the station.

Agra: pop. 284,140, a town in U.P., stands on the banks of the River Jumna. It was the capital of the Moghul Empire during the reigns of Babar and Akbar. *Places worth a visit*: 1. the Taj Mahal, regarded by many as the most beautiful building in the world, 2. the Fort, 3. the Juma Masjid, 4. Moti Masjid, 5. the tomb of Imdad-ud-Daula, 6. the Dewan-I-Am, 7. Akbar's tomb at Sikandra, about five miles from Agra, 8. Kailash Temple at Sikandra, 9. Ram Bagh, 10. Government Gardens. *Clubs*: 1. Agra Club, 2. Indian Club, 3. Agra Tennis Club. *Hotels*: 1. Cecil Hotel, 2. Imperial Hotel, 3. Empress Hotel, 4. Laurie's Hotel, 5. Agra Hotel. Agra, which has many railway stations, is on the main Bombay-Delhi and Calcutta-Delhi lines and is accessible by the G.I.P. or the B.B. & C.I. or the E.I.R.

Ajmer: capital of Ajmer-Merwara, Hindu and Muslim religious centre, contains B.B. & C.I. railway workshop. Pop. 147,258. *Places worth a visit*: 1. the Durga of Kwaja Sahib (tomb of Muslim saint), 2. the Magazine (Akbar's old palace now museum), 3. Ana Sagar Lake (built by Shah Jahan), 4. Daulat Bagh, 5. Badli Shahi Building, 6. Taragarh Fortress (built by Akbar), 7. Mayo College, 8. Pushkar (pilgrimage centre, has temple and lake, is about seven miles away). The chief means of conveyance are buses, tongas and pal gharris. *Clubs*: 1. Ajmer Club, 2. Bisset Institute, 3. European Club, 4. Indian Club, 5. Kalabagh Young Men's Association, 6. Railway Institute. *Hotels*: 1. Ajmer Hotel, 2. Empire Hotel, 3. Hindu Hotel, and 4. Imperial Hotel. Ajmer lies on the metre-gauge section of the B.B. & C.I. line between Delhi and Ahmedabad. A line from Ajmer goes south to connect it with Khandwa on the G.I.P. Railway line between Delhi and Bombay.

Ajanta Caves: are 55 miles north of Aurangabad in the State of Hyderabad. The caves are 29 in number (5 chaityas or shrines and 24 viharas or monasteries, all Buddhist) and present a record of a unique combination of painting, sculpture and architecture of a period extending over nine centuries from about the 2nd Century B.C. to about 7th Century A.D. Three miles from the caves are a rest-house and a travellers' bungalow under the charge of the Director of Archaeology of the State. There is a curator's office next to the rest-house from which help and information can always be obtained. The caves can be reached from Aurangabad on the railway line between Hyderabad and Manmad by the State railway buses which regularly ply between Aurangabad Station and the Ajanta caves.

Amritsar: town in East Punjab, sacred to the Sikhs. Pop. 391,010. Amritsar is the very centre of the Sikh religion and has a big trade in grain and textiles. *Places worth a visit*: 1. the Golden Temple standing in the pool of Immortality, 2. Baba Atal Tower, 3. Akal Takht, 4. Ram Bagh Gardens, and 5. Fort Govind Garh. The chief means of conveyance in the city are buses and hackney carriages. Fares are fixed. *Clubs*: 1. Amritsar Club, 2. Lumsden Club, 3. Railway Club, 4. Bar Club, 5. Purdah Club, and 6. Service Club. *Hotels*: 1. Amritsar Hotel, 2. Cambridge Hotel, 3. Prince Hotel, 4. Imperial Hotel. Amritsar stands on the main railway line between Delhi and Lahore and Karachi and Pathankot. It is about 33 miles east of Lahore on the East Punjab Railway.

Bangalore: largest city in Mysore and a health resort is about 3,000 feet above sea-level. It is well laid-out and up-to-date with every urban facility. *Places worth a visit*: 1. Cubbon Park, 2. Lal Bagh, 3. Band-stand, 4. Race Course, 5. Maharaja's Palace, 6. Tipu's Palace, 7. Venkataramanaswamy Temple. The chief means of conveyance are rick-shaws, jutkas, buses and taxis. *Clubs*: 1. Century Club, 2. Bangalore Race Club, 3. Bangalore Golf Club. *Hotels*: 1. Anand Bhavan, 2. Central Hotel, 3. Modern Indian Lodge, 4. Udipi Hotel, 5. West End Hotel.

Baroda: capital town of Baroda State about 250 miles to the north of Bombay, modern, pop. 153,301. *Places worth a visit*: 1. Laxmi Vilas Palace (the residence of the Maharaja, one of the most beautiful in India), 2. Old Nazar Bagh Palace, 3. Museum and Public Park, 4. Jubilee Garden, 5. L. F. Battery, and 6. the city walls. The chief means of conveyance are tongas, buses, taxis. *Clubs*: Sayaji Vihar Club. *Hotels*: 1. Guest House Hotel, 2. Krishna Nivas Hotel. Baroda lies on the main lines of the B.B. & C.I. Railway between Bombay and Delhi and Bombay and Ahmedabad.

Benares: town in U.P. on the banks of the Ganges, very sacred to the Hindus. It is in fact the religious capital of Hindu India and contains about 1,500 comparatively large temples besides countless minor shrines. It is also reputed to be the oldest city in the sub-continent. Pop. 263,100. *Places worth a visit*: 1. Vishwanath

Temple, 2. Bharat Mata Temple, 3. Manmandir, with Jaisingh's observatory, 4. Aurangzeb's Mosque, 5. Gyan Wapi Mosque, 6. Nandeswar Kothli, 7. Ramnagar Fort, 8. Maidajin Garden, 9. Victoria Gardens, 10. Benares Hiydu University, and 11. Sarnath which is about six miles from Benares. The chief means of conveyance are taxis and tongas. **Clubs:** 1. Benares Club, 2. Kasi Club, 3. Theosophical Society, and 4. Prabhu Narain Club. **Hotels:** 1. Clark's Hotel, 2. Grand Hotel. There are also about 30 *dharmasalas* for Hindu pilgrims. Benares is on the E.I. Railway's branch line from Moghul Sarai to Saharanpur. It is also connected with Allahabad by railway on the B. & N.W.

Bhuvaneswar: place in Orissa, notable as containing the only relics of the Age of the Guphas. **Places worth a visit:** 1. Lingaraj Temple (visitors are not allowed inside the compound but have to see it from a platform), 2. Mukteswar Temple, 3. Parasurameswar Temple. There is a Dak Bungalow where visitors can stay with the District Board's permission. Bhuvaneswar is on the main B.N.R. line between Waltair and Howrah, about 20 miles from Cuttack.

Bijapur: town in the Bombay Presidency, capital of the old Muslim kingdom of Bijapur is full of the remains of palaces, mosques, tombs of the rule of the Adil Shahi kings. **Places worth a visit:** 1. Jaml Masjid (the greatest mosque in South India), 2. Goli Gumbas (the tomb of Mahammad Adil Shah and the second largest dome in the world), also called the Whispering Gallery, 3. Methar Mahal, 4. Ashar Mahal, 5. Gagan Mahal, 6. Chini Mahal, 7. Mecca Masjid, 8. Taj-Baury (water-tank), 9. Malik-i-Maidan, (Great Gun), 10. Landi-Kasab Gun, 11. Haidar Burj (tower), 12. Ibrahim Roza (the tomb and mosque of Ibrahim II), 13. Jala Mandir (reservoir), 14. Chand Bauri (old tank), 15. Granary, Jod Gombaz (double tombs), 17. Bara Kaman Masjid, and 18. Begum Tank. The chief means of conveyance are taxis, lorries, tongas and bullock carts. **Clubs:** 1. Darbar Club, 2. European Gymkhana Club, 3. Tennis Club, 4. Union Club. **Hotels:** Arogya Nivas. Bijapur is a railway station on the Gadag-Sholapur section of the M. & S. M. Railway. There are a *dharmasala* and a dak bungalow about one and a half miles from the station.

Bombay: second city and port in the sub-continent, generally called the gateway to India, is big, western, modern. Pop. 3 million. May and October are the hottest months, but from November to March it is very cool. **Places worth a visit:** 1. The Gateway of India, 2. Apollo Bunder, 3. Prince of Wales Museum, 4. the Town Hall, 5. Bombay Castle, 6. Rajabai Tower and University Building, 7. Victoria Terminus of the G.I.P. Railway, 8. the General Post Office, 9. Crawford Market, 10. Bra-bourne Stadium, 11. Chowpathy sands, 12. Malabar Hill and Hanging Gardens, 13. Central Station, terminus of the B. B. & C. I. Railway, 14. Race Course, 15. Bhandarwada Reservoir and Gardens, 16. Victoria Gardens. Places near about Bombay which are worth a visit are: 1. Juhu (sea-side resort), 2. Versova (sea-side resort), 3. Vihar Lake (from which the city gets its water-supply), 4. Kennerly Caves (rock-cut

caves of Buddhist origin), 5. Jogeshwari Caves, 6. Vajreshwari (temple and hot springs of medicinal property), 7. Mandapeshwar (cave temple), 8. Nirmal (temple and lake), 9. Ambarnath (temple), 10. Uran (port, with private garden and zoo), 11. Pali (hot springs and small game shooting), 12. Elephanta Caves (originally Buddhist rock-cut, contain carved Hindu deities). The chief means of conveyance in Bombay are trams, buses, electric railways, taxis and tongas. **Clubs:** 1. Bombay Club, 2. Bombay Commercial Gymkhana, 3. Bombay Flying Club, 4. Bombay Gymkhana, 5. Bombay Presidency Golf Club, 6. Catholic Gymkhana, 7. Cricket Club of India, 8. Islam Gymkhana, 9. Orient Club, 10. P. J. Hindu Gymkhana, 11. Parsi Club, 12. Princess Mary Victoria Gymkhana, 13. Ripon Club, 14. Rotary Club, 15. Royal Bombay Yacht Club, 16. Royal Western India Turf Club, 17. United Lodge of Theosophists, 18. Western India Automobile Association, 19. Willingdon Sports Club, 20. Y.M.C.A., and 21. Y.W.C.A. **Hotels:** 1. Empire Hotel, 2. Fredrick Hotel, 3. Grand Hotel, 4. Green's Hotel, 5. London Hotel, 6. Madhavashram, 7. Majestic Hotel, 8. Ritz Hotel, 9. Sardar Grahra Hotel, 10. Shri Krishna Boarding House, 11. Taj Mahal Hotel. Bombay is one of the termini of the G.I.P. and the B. B. & C. I. Railways.

Brindavan: holy place of Hindus, about five miles north of Muttia in U.P. It is sacred because of its association with the birth and early life of the Hindu God Shri Krishna. **Places worth a visit:** 1. Govind Dev Temple, 2. Gopinath Temple, 3. Ranganath Mandir. There are travellers' bungalows and also a hotel called Brindavan Boarding. Brindavan is accessible by railway or road from Muttia.

Calcutta: biggest city and port in the sub-continent, stands on the left bank of the Hooghly about 85 miles from the sea. It was founded by Job Charnock of the East India Company. It is a great business and industrial centre and contains jute mills, jute presses, iron foundries, rice, paper and oil mills, tanneries etc. Calcutta is now the capital of the newly created Province of West Bengal and till 1911 was the capital of old undivided India. **Places worth a visit:** 1. Victoria Memorial (contains picture-gallery and museum), 2. the Indian Museum, 3. the zoological gardens, 4. the Jain Temple, 5. the Kalighat Temple, 6. Belvedere House (where the Viceroy stays when he is on visit to Calcutta), 7. Government House (residence of the Governor of West Bengal), 8. Marble Palace (containing art treasures property of the Mullik family), 9. Fort William, 10. the Eden Gardens, 11. the Town Hall, 12. the Imperial Library, 13. Dalhousie Square, 14. the Race Course, 15. Dhakuria Lake, and 16. the Hindu bathing ghats. Places near about Calcutta which are worth a visit are: 1. Bally (holy place), 2. Belur (home of the Ramakrishna Mission), 3. the Royal Botanical Gardens (contains the biggest banyan tree in existence), 4. Diamond Harbour (fort and customs house), 5. Dum Dum (air port of Calcutta).

Conjeevaram (Kanchipuram): also called the city of temples, the Benares of the

uth, is about 60 miles to the south of Madras. It is one of the seven holy cities of India and the only one in the South. The place is divided into three parts, Shiva Conjeevaram (containing five temples), Vishnu Conjeevaram (containing a smaller number of Vishnu temples) and Ilayar Paliyam, a testimony to the part played by all the main Hindu religious sects in the story of the city. There are over a thousand temples in all. **Places worth a visit:** 1. the evaraja Temple (Vaishnavite, has a seven-storied tower, 100 feet high), 2. the Ekamrath Temple (Shalvite, has 10 stories and is 48 feet high), 3. the Temple of Kamakshi mma. **Hotels:** Ganpati Vilas. Conjeevaram is on the Renigunta-Chinglepet section of the M. & S.M. Railway and is easily accessible from Madras via Chinglepet.

Coonoor: hill station on the Nilgiri Hills, the Madras Presidency, is about 6,000 feet above sea-level. The climate is mild and genial either too hot in the summer nor too cold in the winter. The mean day temperature is 64 degrees. The north east monsoon breaks in October and lasts about two months. The town has good water-supply and natural drainage facilities and is reputed to be one of the cleanest towns in South India. **Places worth a visit:** 1. Sim's ark (contains collection of plants), 2. Low's waterfall, 3. Tiger Rock (hill fort). There are innumerable places for excursion and picnic purposes, e.g. the Droog, the Dolfin Nose, the Lamb's Rock, Laz Falls, Lady Canning Seat, the Ralliah Dam and Catherine Falls. The chief means of conveyance are cars which can be hired. **Clubs:** Coonoor Club. **Hotels:** 1. Hampton Hotel, 2. Hillgrove Hotel, 3. Krishna Vilas, 4. Ramchandra Lunch Home. Coonoor lies on the Mettupalayam-Ootacamund line of the Nilgiri Railways. It is also connected by road with Ootacamund, and Kotagiri, another hill station.

Darjeeling: hill station, and summer capital of the West Bengal Government lies on the lower slopes of the Himalayas about 370 miles to the north of Calcutta. It is 8,000 feet above sea-level. The maximum temperature in the summer is about 80 degrees and the minimum in the winter is about 30. The town commands picturesque views including that of Mount Kinchinjunga and on a clear day of Mount Everest. Various sports are available during the season such as fishing, shooting, horse-riding and a number of other indoor and outdoor sports. Darjeeling has also a first-class sanatorium known as Eden Sanatorium. **Places worth a visit:** 1. Government House, 2. Town Hall, 3. Museum, 4. Observatory Hill (from there a magnificent view of Kinchinjunga can be obtained), 5. the Mall, 6. Lloyd Botanic Garden, 7. Birch Hill Park, 8. Seachal Lakes, 9. Ghoom Ghoom Rock, 10. Tiger Hill (from here the sunrise over Everest is generally viewed). **Clubs:** 1. the Chowrasta Club, 2. the Darjeeling Club, 3. the Darjeeling Gymkhana Club. **Hotels:** 1. Belvue Hotel, 2. Central Hotel, 3. Mount Everest Hotel, 4. and 4. Park Hotel. The chief means of conveyance are rickshaws, ponies and dandies. Darjeeling is the terminus of the Darjeeling-Himalayan Railway and is about 14 hours' journey from Calcutta. From Siliguri on the Eastern Bengal

Railway where the visitor has to change, Darjeeling can also be reached by car or Rail Motor, which is quicker than travelling by the mountain railway.

Delhi (New): the capital of India and the seat of the Government. It was planned in accordance with modern ideas by the architect Sir Edwin Lutyens and completed in 1931. New Delhi houses the Viceroyal Lodge, the Council House, and the Secretariat. All the buildings in New Delhi are white except the ones mentioned above. These latter are built of red sandstone. **Places worth a visit:** 1. Connaught Place (shopping centre), 2. All India War Memorial and 3. Willingdon Air Port (port of call of all air services).

Delhi (Old): also called Shahjahanabad, the ancient capital of India stands on the river Jumna, and is enclosed by a stone wall with seven gates. It has a history going back to 3,000 years and within an area of 50 square miles eight Delhi rose and declined and fell. The seven predecessors of present-day Delhi are Kutub, Siri, Tuglakabad, Jahanabad, Firozabad, Purana Qila and Shahjahanabad. No city in India contains as many historical remains as Old Delhi. One can trace here the growth and decay of almost every dynasty which held sway over the ancient land of Hindustan. There are also a number of factories and jewellery and gold and silver embroidery and ivory carvings works for which Delhi is well-known. Pop. 521,849 (1941 census). **Places worth a visit:** 1. The Fort (built by Shahjahan) contains Moti Masjid, Diwan-i-Khas, Khas Mahal, Jai Mahal, Rang Mahal, the Delhi Museums and the Indian War Memorial, 2. Juma Masjid (built by Shahjahan, the biggest mosque in the world), 3. Chandni Chowk (the main thoroughfare), 4. Kashmiri Gate, 5. Kalan Masjid, 6. Sunheri Masjid, 8. Tomb of Nizamuddin, 7. Rajghat and Salimgarh, 8. Public Gardens, 9. Jantar Mantar (Jaisingh's old observatory) garh, 10. Purana Kila (built by Sher Shah). Places near about Delhi which are worth a visit are: 11. Kutub Minar (11 miles from Delhi), 12. Tuglakabad (12 miles from Delhi), 13. Humayun's Tomb (4 miles), 14. Safdar Jung's Tomb (5 miles). The means of conveyance are tongas, buses, taxis and trams (in old Delhi only). **Clubs:** 1. Aero Club, 2. Beadon Club, 3. Delhi City Gymkhana, 4. Imperial Delhi Gymkhana Club, 5. Lodi Club, 6. Roshanara Club, 7. Y.M.C.A., 8. Y.W.C.A. Delhi is directly connected by railway with Bombay, Calcutta, Lahore, Karachi and Madras. The G.I.P. and the B.B. & C.I. connect it with Bombay, the E.I.R. connects it with Calcutta, the N.W.R. connects it with Lahore and Karachi, and the M.S.M. the N.S.R. and G.I.P. together connect it with Madras.

Ellora Caves: are situated about 15 miles to the north-west of Aurangabad in the Nizam's Dominions. The caves which are excavated in the face of a hill are 34 in number and run north to south for a distance of a mile and a quarter. The hill has the shape of a crescent the southern, the centre, and the northern being occupied respectively by Buddhist, Hindu and Jain temples. There are 12 Buddhist caves, 17 Hindu caves and 5 Jain caves. The Hindu caves are

more lavishly decorated than others and Kailash Temple which is the most famous of the caves is also the biggest cave temple in India. It stands in a court averaging 154 feet wide, 276 feet long with a scarp 107 feet high at the back. Among other notable caves are the Carpenter's cave and Dining caves. It is believed that the Ellora Caves are about a thousand years old. They are reached from Aurangabad by bus or car.

Fatehpur Sikri: founded by Akbar in 1569 but now a dead forsaken city, is situated 23 miles from Agra. Akbar wished to make it his capital but it had to be abandoned because of lack of water. Here Akbar's son Salim who later became the Emperor Jehangir was born. The place contains a number of palaces, shrines, mosques built of marble and red sandstone. *The more notable among the ruins are:* 1. Buland Darwaza, the Gateway of Victory, built to commemorate the conquest of Kandesh. It is 176 feet high and is the highest gateway in India. It forms the southern gateway to the most imposing structure in Fatehpur Sikri, 2. the Jamī Masjid, said to be a copy of the mosque at Mecca or Medina. Then there are 3. Panch Mahal, 4. Diwan-e-Khas (Hall of Private Audience), 5. Maryam's House, 6. Palace of Jodh Bai, 7. House of Birbal, 8. Elephant Tower and 9. Khas Mahal. Fatehpur Sikri has a railway station and the ruins can also be easily reached by car. There is a dak bungalow where visitors can get meals by previous arrangement.

Gwalior: best known for its fort (which is reputed to be the most interesting and remarkable example of a Hindu palace on an early age) lies about 200 miles to the south of Delhi. *Places worth a visit:* 1. Gwalior fort (includes Man Singh's Palace and a number of temples and shrines), 2. Tansen's Tomb, 3. Rani Laxmi Bai's Chhatra, 4. the Chhatris of other Mahratta rulers, 5. tomb of Mahomed Ghaus, 6. Jamī Masjid, 7. State Museum, 8. King George Park and Zoo. The chief means of conveyance are tongas and buses. *Clubs:* 1. Ali-jah Club, 2. Elgin Club, 3. Young Men's Club. *Hotels:* 1. Hotel de Gwalior, 2. Park Hotel. There are two dharmasalas open only to Hindus but at Dufferin Sarai opposite the station rooms are available for rent. Gwalior is on the main G.I.P. railway line between Bombay and Delhi.

Jaipur: capital of Jaipur State in Rajputana, is a well laid-out modern city. It is famous all over India for the beauty of its art and the skill of its artisans. Jaipur pottery, brass ware, stone carving, ivory and sandal-wood work and jewellery have enjoyed a great reputation from ancient times. Pop. 175,810. *Places worth a visit:* 1. Maharaja's Palace, 2. Jai Singh's observatory, 3. the ruins of Amber (ancient capital), 4. the Hawa Mahal, 5. the Palace Armoury, 6. Cenotaphs of the Queens, 7. Galtā (place of pilgrimage) and Ghat, 8. School of Arts, 9. Public Library, 10. Transport Gardens. The chief means of transport are tongas, ekkas, phaetons, taxis, buses and pal gharris. *Clubs:* Jaipur Club. *Hotels:* 1. Edward Memorial Hotel, 2. Jaipur State Hotel, 3. Kaiser-i-Hind Hotel, 4. New Hotel. Jaipur is on the metre-gauge line of the B.B. & C.I. between Ahmedabad and Delhi.

Kangra Valley: famous for its magnificent landscapes and historic temples, is situated about 100 miles north-east of Lahore. Semi-urban concentrations are Kangra, Dalhousie and Dharamsala. Places worth a visit in Dharamsala are: 1. Bhagsunath Water Springs, 2. State Quarries, 3. Himalayan Snow View. The chief means of conveyance are cars and buses. *Club:* Raja Baghbir Singh Club (Dharamsala). *Hotels:* 1. Arranmoor (Dalhousie), 2. Grand View (Dalhousie), 3. Stille's (Dalhousie), 4. Switzer's (Dharamsala). There is also a dak bungalow at Dharamsala where visitors can stay. To get to the Kangra Valley a visitor has to change at Pathankot into the narrow-gauge railway which runs to Jogindranagar in the Mandi State. Dharamsala can also be reached from Pathankot by car.

Kashmir: unsurpassed for the beauty of its mountain, lakes and valleys is a State called the State of Kashmir and Jammu, situated in the north of India. The State is also famous for its shawls and carpets and the exquisite beauty of its wood-work and papier-mache articles. Its fruit and vegetables are equally well-known. The normal recreations include trips on lakes in house boats and mountain climbing. Other attractions in the State are big and small game, golf, fishing and swimming. Gulmarg in Kashmir is a place where wealthy people congregate for winter sports. The capital is Srinagar. Besides Srinagar and Gulmarg and other places which are worth a visit are Patalgam, the summer capital, about 60 miles from Srinagar, and Amarnath, a place of pilgrimage about 30 miles from Pahalgam. The way into Kashmir is from Rawalpindi or Sialkot both of which are on the North-Western Railway. From Rawalpindi one goes via Murree by car or bus to Srinagar, the journey taking about forty-eight hours. The other way to Srinagar is from Jammu which is a terminus on the North-Western Railway. From Jammu one goes by road to Srinagar. All along the way there are dak bungalows and excellent catering arrangements. Medical relief is available, so are postal and telegraph facilities. **Srinagar,** the winter capital is situated on the river Jhelum. It is a little over 5,000 feet above sea-level. The chief means of conveyance are boats, tongas, cars or buses. *Places worth a visit:* 1. The Moghul Gardens, like a. Shalimar, b. Chashama, c. Achabal, and d. Nishat. 2. The lakes like a. Dal Lake, b. Wulur Lake, c. Anchar Lake, d. Manasbal Lake and so on. 3. Places of historical and religious interest like a. Martand temple, b. Pandranthan temple, c. Bhaumazu caves, d. Avantī Pura and e. Pari Mahal. *Clubs:* 1. Amarsingh Club, 2. Srinagar Club. *Hotels:* 1. House Boats Hotel, 2. Indian Muslim Hotel, 3. Mount View Hotel, 5. National Hotel, 6. Nedou's Hotel, 7. Park Hotel, 8. Royal Hotel. **Gulmarg,** an ideal hill station about twenty-five miles from Srinagar, is a little less than 9,000 feet above sea-level. The place boasts of all modern facilities and is particularly noted as a winter play-ground affording scope for skating, ski-ing, tobogganning, and golf. Round about are ideal places for walks, rides and excursions.

Khyber Pass: one of the gateways into Pakistan from Afghanistan is situated 104 miles west of Peshawar in the North-West Frontier

Province. The Pass is rich in historical association as it was the route by which all of the sub-continent's invaders swooped down on the inhabitants for conquest or plunder. It still remains a great highway for continental trade between India and Pakistan on the one hand and the countries of Central Asia on the other. On Tuesdays and Fridays one could see long caravans of men and camels laden with merchandise of every description passing into and from Afghanistan.

Kodaikanal: famous hill station on the Palni Hills in South India. It is about 7,000 feet above sea-level and is neither too hot nor too cold. The average annual rainfall is 65 inches, the major part of the rain falling in October, November and December. The months of April, May and June constitute the 'season'. The town enjoys excellent water-supply and is also well-equipped with all the ordinary amenities of life. The place affords plenty of scope for such recreations as walking, hiking, boating, fishing, hill climbing and golf. Going on an excursion or picnic is yet another way of diverting oneself. For the more adventurous there is big game hunting. Kodaikanal is the delight of the gardener and plants are in bloom all the year round. *Places worth a visit:* 1. the lake skirted by a three-mile road, 2. the water falls like a. Fairy Falls, b. Silver Cascades, c. Bear Shola Falls, d. Glen Falls, e. Pamber Falls, 3. There are view points like a. Coaker's Walk, b. Pillar Rocks, c. Prospect Point, d. Vembadi Shela Peak, e. Dolphin's Nose. Then 4. the Solar Observatory. *Clubs:* 1. Golf Club, 2. Kodaikanal Boat Club, 3. Kodaikanal Club. *Hotel:* Carlton Hotel. There are a number of boarding houses, and fully furnished flats can also be rented. Kodaikanal is reached from Kodaikanal railway junction on the South Indian Railway via Trichinopoly. Kodaikanal town is 50 miles from the railway station and the journey can be done by car, taxi or bus on a very good motoring road.

Kanarak or Konark: place in Orissa, famous as the site of the Temple of the Sun God otherwise called Black Pagoda. It is remarkable both as an example of ancient Indian architecture and sculpture and of engineering skill. A great part of the temple is destroyed but the porch stands with the huge figures of warriors and life-sized pieces of horses and elephants and the famous carved wheels at the basement. The image of the sun in the yard of Puri Temple is generally supposed to have come from Kanarak. Kanarak is about 20 miles from Puri with which it is connected by road which is about 50 miles long.

Kotagiri: hill station on the Nilgiris, higher than Coonoor, but lower than Ootacamund is smaller and quieter than either. It is about 6,500 feet above sea-level and has a mean day temperature of 62 degrees. The town has electricity, a number of shops and boarding houses, a local board hospital and golf course. Kotagiri is reached from Coonoor or Ootacamund by car or bus. The roads are excellent and there is regular bus service. Between Kotagiri and Ootacamund the road goes over Doddabetta the highest peak in the Nilgiri Hills.

Kulu Valley: well-known for the variety of its scenery and places of historical interest is

situated in East Punjab, north of Simla and east of the Kangra Valley of which it forms a subdivision. The important part of the valley from the tourist's point of view is the road which runs from Pathankot or Nagrota the rail-heads into the valley. A few miles beyond Pathankot the road passes through the rich cultivation of the Kangra Valley and the extensive tea gardens surrounding Palampur and Baijnath. The traveller has a view of the majestic snow-capped mountains of the Dhaul Dhar range standing out in bold relief against the sky-line. He also comes across the ancient temples of Baijnath. Beyond Ant after Mandi the valley opens out and the final stretch through the lovely Kulu Valley mainly along the left bank of the river Beas offers an entirely different type of scenic effect. The Kulu Valley is also called the Valley of the Gods as in addition to several important deities like Raghunathji at Sultampur and Jamlu of Malana every village has its own particular God. The best season is from March to May and September to November. The summer is never uncomfortably hot. The main centres of the Kulu Valley are: 1. Kulu or Sultampur, the principal town, about 4,000 feet above sea-level. It is the main shopping centre and has a dak bungalow, and a number of rest-houses. 2. Raison, 8 miles from Sultampur and 4,600 feet above sea-level. The available sports are golf, tennis and swimming. Mayflower and the Shacks are two hotels. 3. Katrain, is in the widest part of the valley, 12 miles from Sultampur and 4,800 feet above sea-level. 4. Naggar, summer headquarters, is 5,800 feet above sea-level. There is a departmental rest-house and a serial. 5. Manali, the head of the valley and terminus of the motor road, is 23 miles from Sultampur and is situated amid typical alpine scenery. Accommodation for visitors is available at Sunshine Orchards, Departmental rest houses and Mission Hospital. Except Manali, the road to which may be occasionally closed owing to snow-fall the rest of the valley is open throughout the year. There is regular bus service from Pathankot and Nagrota to Kulu. Amritsar is the main railway junction for Kulu. From Amritsar a line runs to Panthakot and thence to Nagrota which is the rail head.

Lahore: one of the most ancient and famous cities of the sub-continent is the capital of the West Punjab Province. The city has been notable since the 11th century when Babar the first of the Moghul dynasty made it a place of royal residence, the remains of which are found in the tombs, mosques, pavilions, and pleasure gardens of the city. But the man who laid the foundations of the city's greatness was the Emperor Akbar. Today the city is almost wholly Muslim with a population of 671,659. *Places worth a visit:* 1. Ranjit Singh's mausoleum, 2. Jehangir's and Nurjehan's tombs, 3. tomb of Asaf Khan, 4. tomb of Anarkali, 5. Guru Arjun's Shrine, 6. Badshahi Masjid, 7. Sunhari Masjid, 8. Wazir Khan's mosque, 9. Moti Masjid, 10. Minto Park, 11. Shalimar Gardens, 12. Lawrence Gardens, 13. Gulabi Bagh, 14. Museum, 15. Zoo, 16. Chabutra, 17. the fort. The chief means of conveyance are cars, taxis and hackney carriages. *Clubs:* 1. Cosmopolitan Club, 2. Gymkhana Club, 3. Punjab Association Club, 4. Y. M. C. A. *Hotels:* 1. Braganza Hotel, 2. Fallett's Hotel,

3. Napier Hotel, 4. Stiffie's Hotel. Lahore is on the North Western Railway and is connected with Karachi, Delhi, Calcutta and Bombay.

Lucknow: the city of gardens is the capital of U.P. It is full of places of historical interest and of architectural beauty and is generally regarded as the cultural capital of Moghul India. It is well-known for its pottery, copper and brass ware, wood and ivory carvings and gold and silver embroidery on cloth. Legend connects the founding of the city with Laxmana, the brother of Rama, the mythical hero of the Hindus, and is sometimes called Laxmanpur. Pop. 387,177. The chief means of conveyance are tongas, ekkas, phatons and taxis. *Places worth a visit:* 1. Great Imambara, 2. Small Imambara, 3. tombs of Wajid Ali Shah and his Begum, 4. Kaiser Bagh Palace, 5. Chatter Manzil, 6. Dilkusha Palace, 7. Moti Mahal, 8. Machi Bhawan Palace, 9. Jumma Masjid, 10. Charbagh, 11. Alambagh, 12. Sikander Bagh, 13. Musa Bagh, 14. Wingfield Park, 15. Residence, 16. Havelock's Tomb, 17. Clock Tower, 18. Museum, 19. Observatory, 20. Iron Bridge. Lucknow is a big junction on the E.I.R.

Madras: the third largest city in the sub-continent and the capital of the Madras Presidency. It is the place where the English first settled to trade. Pop. 777,481 (1941 census). The chief means of conveyance are rickshaws, jukkas, horse carriages, taxis, buses and trams. *Places worth a visit:* 1. Fort St. George (contains the oldest Protestant church in the sub-continent where Clive was married), 2. High Court, 3. Light House, from the top of which one can get a panoramic view of the city, 3. Marina and the Aquarium. The Marina is one of the most beautiful promenades in the world; sea-bathing is possible at certain points. The Aquarium is one of the best of its kind in the world, 6. The Museum, 7. Connemara Library, 8. the Zoo, 9. the Observatory, 10. Moore Market, 11. Parthasarathy Temple, 12. Mylapore Tank and Kapaleswar Temple, 13. St. George's Cathedral, 14. St. Thomas Mount, 15. Race Course, 16. Buckingham and Carnatic Mill, 17. Madras Pencil Factory and 18. Adyar, where the headquarters of the Theosophical Society are located. There are two places round about Madras which are also worth a visit: 1. the ruins of the Gingee Fort famous in the days of the Vijayanagar Empire are about 95 miles from Madras and can be reached by rail and road, 2. The seven Pagodas of Mahabalipuram which can be reached by road from Chinglepet Railway Junction. *Clubs:* 1. Adyar Club, 2. Ladies Recreation Club, 3. Madras Boat Club, 4. Madras Gymkhana Club, 5. Madras Cricket Club, 6. Madras Cosmopolitan Club, 7. Madras United Club, 8. Madras Yacht Club, 9. South Indian Athletic Association, 10. Y.M.C.A. *Hotels:* 1. Ambia Cafe, 2. Hotel Bosotto, 3. Connemara Hotel, 4. Modern Cafe, 5. Modern Hindu Hotel, 6. Spenser's Hotel, 7. Chesney Hall, 8. Clarence.

Madura: the second biggest city in the Madras Presidency is a great religious centre, containing as it does a number of famous temples. In the old days it was the capital of the Pandya kingdom and has always been a seat of Hindu culture particularly Hindu architecture. The

silk-weaving industry of Madura is also noteworthy. *Places worth a visit:* 1. The Great Temple, actually made up of two temples one of Meenakshi and the other of Shiva. Adjoining the temple are a. Nandi Hall, b. temple of the Saints, c. the Jewel House, d. the Stable Houses. Then there is 2. Tirumal Nayak's Palace.

Mahabaleshwar: a hill station in the Bombay Presidency, the season being April and May. It is 4,500 feet above sea-level and is noted for its dry and bracing climate. It is also well-known for its fruit and vegetables, orchids and lilies which bloom in April and May. The chief recreations are hiking and a drive in a car. Among the sports which are available are tennis, golf and polo. *Places worth a visit:* 1. the two Government Houses old and new, 2. Reay Garden and 3. the two temples Krishna and Mahabaleshwar. Then there are a number of points from which magnificent views can be obtained, like Arthur Seat Point, Baghadat Point, Castle Rock, Carnac Point, Connaught Point, Falkland Point and so on. Then there are the waterfalls like Chinaman Waterfall, Dhobi Waterfall, Lingmala Waterfall and a lake called Yenna Lake. The places of historical interest are all connected with the name of the Mahatma leader Shivaji such as Kamalgah Fort, Makrandgarh Fort, Pandavgarh Fort, Pratapgarh Fort and Raigarh Fort. Near Pratapgarh are the Bhavani Temple and the tomb of Afzulkhan. All these places are accessible by road from Mahabaleshwar. *Clubs:* 1. European Gymkhana, 2. Hindu Gymkhana, 3. Parsi Gymkhana. *Hotels:* 1. Central Hotel, 2. Dave Hindu Hotel, 3. Bina Hotel, 4. Fountain Hotel, 5. Frederick Hotel, 6. Race view Hotel, 7. Rajmahal Hotel, 8. Ripon Connaught Hotel.

Mahabaleshwar can be reached from Poona both by road and railway. By railway one can go as far as Wathar Station from where Mahabaleshwar is only about half-an-hour's journey.

Matheran: the nearest hill station to Bombay is 2,650 feet above sea-level, and is famous for the magnificent views which it yields. The town looks on to the sea, and the coastal plain rises imperceptibly until it reaches the steep ascent of the Ghats. In his walk round the eighteen-mile circumference of the hill the visitor can reach no fewer than thirty-three points of which the following deserve mention: 1. Garbat Point, 2. Panorama Point, 3. Porcupine Point, 4. Louisa Point, 5. Chowk Point, 6. Alexandra Point, 7. Belvedere Point. At every one of these points the visitor will find comfortable seats, shady trees and fine views. Among other places which are worth a visit are: 1. Charlotte Lake, 2. Paymaster Park, 3. Band Stand, 4. Castle Hill Tower, 5. Race Course. The chief recreations are walking and riding. Rickshaws, munchis and horses are the chief means of conveyance. *Clubs:* 1. Cosmopolitan Gymkhana, 2. European Gymkhana, 3. Parsi Gymkhana. *Hotels:* 1. Cecil Hotel, 2. Lord Hotel, 3. Rugby Hotel, 4. Points Hotel, 5. Regal Hotel, 6. Girl Vihar. Matheran is reached from Neral Station on the main line between Bombay and Poona. From Neral there is a light railway to Matheran which is about one-and-a-half-hour's journey. Alternatively one can do the journey by rickshaw or pony by previous engagement at Matheran.

Mohenjo-daro: the ruins of Mohenjo-daro (the Domain of the Departed) are situated eight miles by car off Dorki station on the Kotri-Larkana branch of the N. W. Railway. Indian archaeological history dates from the 3rd century B.C. The excavated remains in Mohenjo-daro belong to the last city, which had been built on ancient cities, which are suspected generally to be lower than the water-level. Excavations of the lower strata may be expected to yield the remains of an older period.

It is a very remarkably well-planned city. All the streets were laid south to north. Nothing is more welcome to an Indian city than the south wind. Homes were two-storeyed and the staircases lead not to the lower storey but to outside. This feature is not unknown in the houses in the hills. Covered balconies or open porticoes are conspicuous by their absence. The courtyards are somewhat small.

Proximity of the dwellings points to a very crowded city. Mohenjo-daro is a city of bricks, fire-burnt and sun-burnt. It had probably stressed more on drainage than any other ancient city. Evidence of underground drains are to be found everywhere. They are large and high and provided with manholes. The vastness of the drainage surely reflects the greatness of the upper structure, now very much lost to view. It is not known, however, whether the drains led to any common dumping place away from the city, although soak pits have been noticed, but from their size one cannot be sure that they were used as the main dumping grounds. Bathrooms are another feature significant of the cleanliness of the city.

The objects found in the remains mainly consist of seals, jewellery, potteries, figures (human and animal) and toys. The seals have on them inscribed characters of a conventionalised form of photograph writing, which have not yet been deciphered. Most of them are of steatite and are square. The more common animal is difficult to be identified. It has features both equine and bovine, with one horn only.

Murre: hill station in West Punjab, is about 40 miles from Rawalpindi and is 7,500 feet above sea-level. It lies on the main road leading into Kashmir from Pakistan. In pre-Partition days it was the summer headquarters of the Northern Command, and was a great social and sports centre. *Places worth a visit:* 1. Kashmir Point, 2. Paneh Pandu Park, and 3. Pindi Point. The Himalayan views are an additional attraction. The chief means of conveyance are rickshaws, dandis, horses and buses. *Clubs:* 1. Mountain View Club, 2. Rawalpindi Club. *Hotels:* 1. Brightlands Hotel, 2. Cecil Hotel, 3. Viewforth Hotel. From Rawalpindi the journey is usually made by car.

Mussoorie: hill station in U.P. lies to the north of Dehra Dun. It is 7,000 feet above sea-level. The town has excellent water-supply, electric lighting system, hospitals, nursing homes and some of the best schools in India both for boys and girls. There are also plenty of sports and amusements. And like every Himalayan hill station one can obtain magnificent views of mountain tops and green river valleys. Hiking and going on excursion or picnic are among the

main recreations. The means of conveyance are rickshaws, ponies, dandis, buses and cars. *Places worth a visit:* 1. The falls like a. Bhatta Falls, b. Kamptee Falls, c. Hearsay Falls, d. Mossy Falls, 2. Wimpy's Tank, 3. Bandstand. *Clubs:* 1. Happy Valley Club, 2. Himalayan Club, 3. Mussoorie Club. *Hotels:* 1. Charleville Hotel, 2. Kashmir Hotel, 3. Roseleigh Hotel, 4. Savoy Hotel. Mussoorie is reached from Dehra Dun by car and is about two hours' journey.

Mysore (State): commemorates the destruction of Mahishasur, the monster by Chamundi who is the tutelary goddess of the royal family of Mysore. Mysore is a picturesque land of forest and mountain presenting the most diversified and beautiful scenery. In the southern forests are found wild elephants for the capture of which khedda operations are undertaken from time to time. Tigers, leopards, bears and lions are also numerous. *Places worth a visit in Mysore State:* 1. the Chenna Kesava Temple at Belur, 25 miles from Hasan, 2. Sivasamudram Falls on the Cavery River, 3. Hoysaleswara Temple at Halebidu, 4. Gersoppa Falls also called the Jog Falls on the Saraswati River, the most famous beauty spot in Mysore. The falls are higher than Niagara, 5. Kolar Gold Fields, the biggest in India worked by electric power, 6. Nandidurg, a hill station near Bangalore, and the summer residence of Tippu Sultan, 7. Seringapatam of historical and religious interest as the capital of Tippu and as the city of many temples, 8. Shravanabelagola, the great Jain religious centre with the huge statue of Gomateshwara and of course the city of Bangalore and the town of Mysore.

Mysore (City): the capital of the State, is built in accordance with modern standards, and contains a number of beautiful public buildings. It attracts great crowds twice a year when the city wears a gala appearance. These two occasions are the Maharaja's birthday and the Dasarah. *Places worth a visit:* 1. the various palaces like the Maharaja's Palace, Jagannathan Palace and so on, 2. Chamundi Hill, with the Bull and the Temple, 3. Zoological Gardens, 4. Silk Factory, 5. Sandalwood Factory, 6. Krishnarajasagar Dam and the Brindavan Gardens, among the most beautiful in the world, about 12 miles from Mysore. The chief means of conveyance are jukkas, coaches and taxis. *Clubs:* 1. Cosmopolitan Club, 2. Mysore Club. *Hotels:* 1. Anand Bhavan, 2. Krishna Bhavan, 3. Modern Cafe, 4. Modern Hindu Hotel. Mysore is one of the termini of the Mysore Railway.

Naini Tal: hill station and summer capital of the U.P. Government, is about 6,400 feet above sea-level. Among the principal recreation are hiking, boating and yatching on the lake on which the town stands, and fishing and riding. One can also enjoy the Himalayan mountain scenery. *Places worth a visit:* 1. Cheeva Peak, 2. Land's End, 3. Lariya Kantha Peak. *Clubs:* 1. Naini Tal Club, 2. Y.M.C.A. *Hotels:* 1. Empire Hotel, 2. European Hotel, 3. Grand Hotel, 4. Manor Hotel, 5. Naini Tal Hotel. Naini Tal is reached from Kathgodam railway station which is connected with Bareilly and Muttra. From Kathgodam one goes by bus or car to Naini Tal which is 22 miles away.

Ootacamund: hill station and summer capital of the Madras Presidency stands 7,500 feet above sea-level on the Nilgiris. It is sometimes called 'the Queen of the hill stations.' One of the main features which distinguishes it from other hill stations is the number and length of motorable roads which go winding in and out of spacious parks or long stretches of turf studded with ornamental trees. The mean temperature for the year is 57.33; during the winter the thermometer touches freezing point. Ootacamund is called the sportsman's paradise: plenty of fishing and big game shooting being available. There is also golf and tennis and during the season races and tournaments are held. *Places worth a visit*: 1. Botanical Gardens, 2. Race Course, 3. the Palaces, 4. Assembly Room, 5. Doddabetta, the highest peak in the Nilgiris, and 6. Pykara Hydro-Electric Dam which is about 18 miles from Ootacamund. The chief means of conveyance are jukkas, rickshaws and taxis. *Clubs*: 1. Hunt Club, 2. Ootacamund Club, 3. Ootacamund Gymkhana Club. *Hotels*: 1. Modern Hindu Hotel, 2. Cecil Hotel, 3. Savoy Hotel. Ootacamund is the terminus of the Nilgiri Metre-Gauge Railway.

Pachmarhi: hill station and summer capital of the Central Provinces lies on the Mahadeo hills of the Satpura Range and is about 4,500 feet above sea-level. There are about 20 golf links in the town and plenty of game is also available in the Pipariya forests. *Places worth a visit*: 1. Bee Dam, 2. Mahadeo Hills Cave, 3. Dhupgarh, 4. Dorothy Deep Falls, 5. Duchess Falls, 6. Lansdowne Hill, 7. Nilphur springs. *Clubs*: Pachmarhi Club. *Hotels*: 1. Pachmarhi Hotel, 2. Royal Hotel. Pachmarhi is reached from Pipariya station on the main G.I.P. Railway line from Bombay to Jabulpore. From Pipariya, Pachmarhi is 32 miles and the journey can be done by bus or car.

Puri: famous for the Jagannath Temple, is a coastal town in the Province of Orissa and is the Province's summer capital. The car festival when an image of Jagannath is taken in procession in a huge rath is an event of India-wide importance. The temple has a black marble pillar in front and a 24-feet high stone wall all round. There are four entrances. The presiding deities are Krishna, Balaram and their sister Subhadra. One interesting feature of the place is that in the matter of taking the *prasad* no caste distinctions are recognised, a practice unknown elsewhere in the country. A reason given is the influence of Buddhism. Besides the Jagannath Temple other places worth a visit are the monastic establishments (maths).

Rameshwaram: an island to the south-east connected with the mainland by railway across the Palk Straits. It contains the Ramnathswamy Temple believed to be the richest in India. Legend says that the temple was built by Sri Rama himself before voyaging across Ceylon to do battle with the kidnapper of his wife. Rameshwaram is thus one of the most famous centres of pilgrimage in the whole country. According to history the temple which took 350 years to complete was built in the 15th century with the help of a Ceylon prince. The temple is typical of Dravidian sculpture and architecture. Off Rameshwaram where the

Arabian Sea meets the Indian Ocean is a sacred bathing ghat. *Other places worth a visit*: 1. the tombs of Cain and Abel near the railway station, 2. Noah's Ark on the Dhannskodi Beach, a funny-shaped stone structure, 3. the other temples of Rameshwaram all of which are noted for their style. Rameshwaram is reached from Pamban Junction on the Madras Dhanuskodi Railway.

Sanchi: small village in Bhopal State, famous for the Buddhist stupa which is the largest and the best preserved in India. The stupa is built with red stone and is about 103 feet in diameter and 42 feet high. The sculpture is remarkable in that there is no anthropomorphic figure of Buddha. Sanchi is on the main G.I.P. line between Bombay and Delhi. There is a state-owned dak bungalow at the place where lodging and boarding are available by previous arrangement.

Shatrunjaya Hills.—Shatrunjaya, near Palitana in Kathiawar, is also known to the Jains as Siddhagiri or Siddhachala or the Hill of the Perfected Ones. It is the most sacred place (*tirtha*) of Shvetambara Jains. There are a great number of temples in groups on touks or summits. The most important one is the touk of Adishvara Bhagavan. The ancient image, consecrated by the prophet's son, Batubai, has been replaced. This is perhaps the most holy site within the most sacred precincts of the Shatrunjaya Hills. At this place a large number of saints attained *Nirvana* or absorption. A number of inscriptions have been found here, which have been utilised towards writing the history of Western India and the history of the different schools of Jainism.

Simla: the summer capital of the Government of India and the Government of East Punjab, it is situated on a spur of the Himalayas at a height of 7,100 feet. Among the recreations of the place are hiking, riding and shooting. The roads are excellent. *Places worth a visit*: 1. Viceregal Lodge, 2. Race Course, 3. Jakko Hill, 4. Observatory Hill, 5. Prospect Hill, and 6. Mashobra, 7 miles away. There is a very good road into the interior and hikers to Narkunda, Kotgarh, Rampur and Bushahr can lodge in rest-houses that line the road. There is also a motor bus service on this road and holiday-makers who leave in the morning can be back in Simla by evening. Simla is also well provided with a number of excellent schools. The chief means of conveyance are rickshaws and horses. *Clubs*: 1. Anandale Gymkhana, 2. Catholic Club, 3. Y. M. C. A. *Hotels*: 1. Cecil Hotel, 2. Corstorphane Hotel, 3. Clarke Hotel, 4. Grand Hotel, 5. Hindu Hotel, 6. Muslim Hotel, 7. Taj Hotel. Simla is reached from Delhi via Kalka on the Delhi-Ambala line. From Kalka there is a mountain railway upto Simla. At Kalka motor cars are available for those who prefer to travel by road, the journey taking 3½ hours. For cheaper travel there are buses now which regularly run between Kalka and Simla. All through the scenery is superb, with mountain peaks or luxuriant foliage.

Srirangam: an island on the Cauvery, two miles north of Trichinopoly, contains the largest temple in India. The temple is consecrated to Ranganath. Changes were made from the 9th

to the 16th centuries and inscriptions of Chola, Pandya, Hoysala and Vijayanagar are all found on it. The north gopuram is 152 feet high.

Trichinopoly: the third largest city in the Madras Presidency is situated on the Cauvery. It is a very ancient city and was the strategic capital of the Chola and Naik kings. Trichinopoly is also known as the Kashi of the South. It is now a great educational centre. *Places worth a visit*: 1. the Rock and the temple on the Rock, 2. the two huge masses of granite known as the Golden Rock and Fakir Rock, 3. the Jambukeshwar Temple, two miles north of Trichinopoly dedicated to Appulinga or the water-phallus. *Clubs*: Trichinopoly Club. *Hotels*: Roberts Hotel.

Tanjore: in the delta of the Cauvery river in the Madras Presidency is noted for its temples and palaces. It was the capital of the Cholas under whom it grew in name and fame as a great centre of culture. *Places worth a visit*: 1. the temple of Brihadishvara built by Raja-Raja the great, 2. Naik's Court, 3. Mahratha Court (the two together are often called the Palace in Tanjore), 4. the Bull Nandi. The chief means of conveyance are jukkas and taxis. *Clubs*: 1. Cosmopolitan Club, 2. Kumaragana Sabha, 3. Union Club. *Hotels*: Ananda Lodge. There are also good dak bungalows. Tanjore is reached from Madras by the South Indian Railway.

Taxila: seat of a famous Buddhist University in the 7th century, is situated about 20 miles north-west of Rawalpindi. The Indian name literally means stone-cut city of the Takka clan. The remains are actually of three cities within three and a half miles of each other. The epic record that Rama's brother Bharata conquered this territory and the capital took its name from his son Taksha. It is believed that the great snake-sacrifice recorded in the Mahabharata was held at Taxila.

Taxila presents historical records extending over a period of about 1,000 years, from the 4th or 5th century B.C. to the 5th century A.D. Seven different peoples rule at Taxila. Achaemenian and Alexandrian suzerainty have left almost no records. The Mauryan records consist mainly of almost primitive punch coins (they may be of an earlier date), jewellery and lapidaries, which surely indicate that Indians were in that age the greatest masters

in the treatment of the most refractory stones and gold and silverworks of refined workmanship.

The most imposing pile at Taxila is the Dharmarajika or the Great Stupa (Stupa). It is also known as Chir (split) tope, because of the cleft driven through its centre by former explorers. Around it there are a number of Stupas, Chaityas, Viharas, etc. The construction of the group extended over four centuries (2nd-5th). The original stupa was built in the Scytho-Parthian period and enlargements were made in the Kusha period. The most important architectural features are trefoil arches and Erothian pillars.

Travancore: the most beautiful and fertile region in all southern India has many charms to offer the traveller within its domains. It has scenery ranging from a countryside of lakes, creeks and canals, to low hills, undulating land, rice fields and forests of coconut and areca palms, with a heavy undergrowth of pepper vines and tapioca.

It has also a wonderful highland zone with mountains touching heights of from 5,000 feet to over 8,000 feet, and hills covered with the densest of virgin jungle, the home of great herds of wild elephants and bison, tiger, bear, black panther and wild boar, and where lies the lovely Periyar Lake over which one may cruise in comfort and see wild life in its natural habitat.

Trivandrum, the capital, is accessible by well-kept roads and railway, and is also now connected by air with Bombay, Madras and Colombo, except during the monsoon.

About seven miles south of Trivandrum is Kovalam, a pleasant seaside resort with good facilities for bathing.

Cape Comorin, the Lands End of India, is the southern most point of Travancore where the sunrise and sunset are magnificent sights. It is a sacred spot to Hindus and a place of pilgrimage as the reputed abode of Kanyakumari, the virgin Goddess to whom the temple there is dedicated.

North of Trivandrum is the ancient town of Quilon and to the north of this again, a pleasant trip by boat along delightful backwaters or by car along a good motor road, is the busy seaport of Alleppey.

The Frontiers

THE frontier regions of Pakistan are Persia, Afghanistan and, of course, the wild and mountainous country lying between the Arabian Sea and the confines of Kashmir, which used to be called the north-west frontier in the pre-Partition days. So far as Pakistan is concerned (and for that matter India too) this is the real frontier, one which should give most trouble. India is also vitally interested in this region since after the accession of Kashmir the north-west frontier of Pakistan is also India's frontier in the far north where the frontier country borders on Kashmir.

India has a frontier of her own in the north and north-east consisting of Tibet, Nepal, Sikkim and Bhutan. And Assam and East Bengal have a common frontier with Burma. We shall proceed to deal with the more important of these regions in turn, starting with the north-west frontier of Pakistan which for reasons of security is the most important of the frontier regions.

NORTH-WEST FRONTIER

It would be useful to see the problem in its historical perspective, to begin with.

The Frontier problem of India and Pakistan has had a two-fold character—the local issue and the international issue. For almost a century the international issue was the greater of the two, and the most serious question which the undivided Indian Government, both directly and as the executors of British Imperial policy, had to face. But the tendency of later times before the Partition was for the international aspect to recede and for the local aspect to grow in importance, until it might be said, with as much truth as characterises all generalisations, that the local issue dominated, if it did not absorb the situation.

The local problem, in its broadest outlines, may be briefly indicated before proceeding to discuss it in detail. From the Arabian Sea on the West to the confines of Kashmir is a wild and troublous sea of some of the highest mountains in the world. The thin valleys in these immense ranges are populated by hardy, brave, militant mountaineers. But sparse as the population is, it is in excess of the supporting power of the country. Like mountaineers in all parts of the world, these brave and fearless men have sought to supplement their exiguous agriculture by raiding the rich plains down below. We may find a fairly close parallel to the situation in the position of the Highlands of Scotland until after the rebellion of 1745 the English Government of the day sought a permanent remedy by opening for the warlike Highlanders a military career in the famous Highland regiments, and in rendering military operations easier by the construction of Wade's road. The Highland problem has disappeared so long from English politics that its pregnant lessons are little realised, but if the curious student will read again that brilliant novel by Neil Munro, "The New Road," he will appreciate what Wade's work meant for the Highlands of Scotland, and what lessons it teaches those who are called

upon to face, in its local aspect, the frontier problem of India and more especially of Pakistan.

So far as the area with which we are dealing was concerned, two policies were tried. In Baluchistan, the genius of Sir Robert Sandeman devised the method of entering into military occupation of the principal points, and thence controlling the country. At the same time close engagements were entered into with the principal chiefs, through whom the tribesmen were kept in order.

That policy was so successful that whilst the administration was expensive the Baluchistan frontier did not seriously embarrass the Government of India from the time when Sandeman set his mark on the land. Thus so far as this section of the frontier is concerned it may be said that no frontier problem exists, save the need for an economic and constructive policy.

AFGHAN FRONTIER

Far otherwise has it until lately been with the section of the frontier which stretches from Baluchistan to the confines of Kashmir. That was, for three-quarters of a century, the scene of almost ceaseless military operations, which constituted a devastating drain on the Indian exchequer. For years one sought for a definite policy guiding the actions of the Government of India. One explanation of their inconsistencies was found in the existence of two schools of thought. Once the frontier with Afghanistan had been delimited, the soldiers naturally pressed for the armed occupation of the whole country right up to the confines of Afghanistan, or at any rate, for military posts, linked with good communications, which would dominate the country. But those who looked at policy not only from the military standpoint, were fearful of two considerations. They felt that occupation up to the Afghan frontier would only shift the frontier problem farther north. Instead of the differing tribes, we should, they argued, have to meet the Afghan on our border line. If Afghanistan were a strong, homogeneous State, that would be a matter of little account. But even under the iron rule of Abdurrahman Khan, the Amir's writ ran but lightly in the southern confines of his kingdom. Under his successor, Habibullah Khan, whose policy was generally wise and successful, it ran still less firmly. There was the further consideration that financiers were of the fixed belief that even if the Forward Policy was wise from the military standpoint, it would involve charges over an indefinite period greater than the Indian finances would bear. Moreover, on this section of the frontier, the position was complicated by the expansion of Russia in Central Asia. The easiest passes, and the passes down which for centuries from the time of Alexander the Great invaders have swept from Persia and Central Asia to loot the fat plains of Hindustan, traverse this region. Therefore it was deemed essential to control, if not to occupy them, in the interests of the Imperial situation. In this zone therefore policy ebbed and flowed between the Forward

School, which would have occupied, or dominated, the whole Frontier up to the Durand Line, that is to say up to the Afghan frontier, and the Close Border School, which would have remained out of the difficult mountainous zone and meet the tribesmen on the plains if they sallied forth.

THE TWO POLICIES

The result of this conflict of opinion was a series of wavering compromises, which like all compromises was profoundly unsatisfactory. The Government pushed forward posts here and there, which irritated the tribesmen, and made them fearful for their prized independence, without controlling them. These advanced posts were in many cases inadequately held and rarely were they linked with their supporting posts by adequate means of communication. The Government preserved between their administrative frontier and the Durand Line which demarcated the Indian frontier with Afghanistan an irregular belt of land called the Tribal Territory, in which neither the British nor the Afghan Government exercised jurisdiction. This was left entirely under the control of the tribes who peopled it.

Now it was often asked why the Government did not follow the precedent of Baluchistan and "Sandemanise" the Independent Territory. The answer was there were essential differences between this zone and Baluchistan. Sir Robert Sandeman found a strong tribal system existing in Baluchistan, and he was able to enter into direct engagements with the tribal chiefs. There is no such tribal organisation in the Independent Territory. The tribal chiefs, or maliks, exercise a very precarious authority, and the instrument for the collective expression of the tribal will is not the chief, but the jirgah, or tribal council, of the most democratic character, where the voice of the young men of the tribe often has the same influence, in time of excitement perhaps more influence, as the voice of the wiser greybeard.

The bitter fruit of this policy of compromise was reaped in 1897, when following a minor outbreak in the Tochi Valley the general uneasiness flamed into a rising which involved the whole of the North-West Frontier, from the Gomal to the borders of Kashmir. A force over thirty thousand strong had to be mobilised to deal with it. Even this large force, owing to the immense difficulties of transportation, was unable effectively to deal with the situation, though peace was made.

The emergency thus created synchronised with the advent of Lord Curzon as Viceroy. He dealt with it in masterful fashion. In the first place, he separated the frontier zone from the Government of the Punjab, which had hitherto been responsible for its administration, and had organised for the purpose a special force of Frontier soldiers, known as the Punjab Irregular Frontier Force. The area so separated was constituted into a separate administrative zone under the direct authority of the Government of India, exercised through a Chief Commissioner. Then Lord Curzon withdrew the advanced military posts and concentrated the regular troops in bases better linked with the main military centres of India by roads and railways. The advanced posts, and especially

important Passes like the Tochi, the Kurram and the Khyber, were entrusted to the defence of local militia, recruited from the tribesmen themselves, and officered by British officers drawn from the ranks of the Indian Army.

Later it was supplemented by a fine development policy. The construction of the Upper Swat Canal, led to such an increase in cultivation that the tribesmen were given a means of livelihood and were invested with the magic charm of valuable property. The irrigated part of the Frontier has since been one of the most peaceful in the whole border line.

THE AFGHAN WAR

Judged by every reasonable standard the Curzon policy was successful. It endured throughout the Great War, though the Wazirs built up a heavy bill of offences, which awaited settlement when Government were free from the immense preoccupations of the war. It broke down under the strain of the invasion of India by the Afghans in the hot weather of 1919. On February 20th the Amir Habibullah Khan was assassinated in his sleep near Jelalabad. Although he does not figure so prominently in frontier history as his iron father Abdurrahman Khan, he nevertheless has high claims on the favourable verdict of history. In truth, the position of the Amir when Turkey entered the war, and called Moslems everywhere to arms on the side of Germany, was extraordinarily difficult. He received Turkish, German and Austrian missions in Kabul, from which British representatives were still excluded. But he kept Afghanistan out of the war, and with the complete defeat of the Central Powers and their satellites, his policy was justified up to the hilt. Indeed his success was the cause of his assassination. When he was done to death, his brother, Nasrullah Khan, was proclaimed Amir by the assassins. But the conscience of Afghanistan revolted against the idea of Nasrullah, the arch-fanatic of the ruling House of Kabul, ascending the throne over the blood-stained corpse of his brother. A military movement in Kabul itself brushed him aside and installed the son of Habibullah Amanullah Khan, on the throne.

But Amanullah Khan soon found it was a thorny bed on which he lay, and encouraged by the disorders in the Indian sub-continent, set his troops in motion on April 25, 1919, and preaching a *jihad* promised his soldiers the traditional loot of Hindustan. The Indian Army was at once set in motion, and as has always been the case the regular Afghan Army was easily beaten. Dacca, beyond the Khyber, was seized, Jelalabad and Kabul were bombed from the air, and there was nothing to prevent the British occupation of Kabul, save the knowledge gleaned from the bitter heritage of the wars of 1838 and 1878, that it is one thing to overthrow a government in Afghanistan, but it is quite another to set up a stable government in its stead. The Government of India wisely held their hand, and the Afghans having sued for peace, a treaty was signed on the 8th August, 1919.

But an untoward effect of this wanton war was to set the Frontier from the Gomal to the Khyber ablaze. With one or two exceptions,

the Tribal Militia, left without the support of the regular troops, who in the emergency ought to have been hastened to their succour, could not stand the strain of an appeal from their fellow tribesmen, and either melted away or joined the rising.

RUSSIA AND THE FRONTIER

The Curzon policy was up to this inevitable collapse greatly assisted by extraneous events. The greatest external force in moulding Indian frontier policy was the long struggle with Russia. For nearly three-quarters of a century a veiled warfare for predominance in Asia was waged between Great Britain and Russia. This external force involved the Government of India in the humiliations of the Afghan War of 1838, with the tragic destruction of the retreating Indian force between Kabul and Jelalabad, slightly relieved by the heroic defence of Jelalabad and the firmness of General Pollock in refusing to withdraw the punitive army until he had set his mark on Kabul by the razing of the famous Bala Hissar fortress. But in the early eighties the two States were on the verge of war over a squabble for the possession of Penjdeh, and then men began to think a little more clearly. There began a series of boundary delimitations and agreements which clarified the situation, without however finally settling it.

The old controversy broke out in another form when intrigues with a Buriat monk, Dorjief, during Lord Curzon's viceroyalty, gave rise to the grave suspicion that the scene had only shifted to Tibet. An expedition to Lhasa rent the veil which had so long concealed the mysterious city and dispersed the miasma of this intrigue. But it was not until the conclusion of the Anglo-Russian agreement of 1907 that the two countries arrived at a stage long sought by those who looked beyond their noses. The Agreement embraced the whole frontier zone and placed Afghanistan beyond the sphere of Russian influence. There were many unsatisfactory features in the Agreement especially in regard to Persia, for which the British had to pay a considerable price in the attitude of Persians in the War. But again taking long views, the Agreement fully justified itself in a broad definition of the interest of the two countries, which put an end to the period of excursions and alarms up to the outbreak of the War.

Russia then ceased to be a material factor in the Indian Frontier Problem. With the establishment of the Soviet Government in Moscow uneasiness returned, for the geographical and allied circumstances which influenced the policy of the Tsarist regime exert precisely the same pressure upon its successor.

GERMAN INFLUENCE

As nature abhors a vacuum, so in the case of States bordered by higher civilisations, no sooner does one strong influence recede than some other takes its place. Long before the signing of the Anglo-Russian Agreement the shadow of the German menace had begun to appear on the horizon. The seeds of the

German effort were sown when the Kaiser, extending the hand of Christian fellowship to the Sultan of Turkey, Abdul-Hamed, at a time when that sovereign was ostracised by Europe for his direct complicity in the massacre of Armenians, made German influence supreme at Constantinople. Later it fructified more effectively in the Baghdad Railway concession, under which German interests secured the right of extending the Anatolian lines from the port of Haider Pasha, opposite Constantinople, to a port in the Persian Gulf. Now successive British statesmen of both parties had declared that the acquisition of a territorial foothold in the Persian Gulf by any power—Russia and the port of Bunder Abbas being then in view—would be regarded as an unfriendly act. There followed a replica of the period of alarms and excursions which had disfigured British relations with Russia. Undaunted, even when their endeavour to secure British co-operation in the enterprise failed, and when the Revolution in Turkey which set the Committee of Union and Progress in power entailed a temporary interruption of their influence at Constantinople, the Germans pressed forward with their enterprise.

Throughout the progress of these schemes, which did not stop short of Baghdad, but were directed through a port in the Persian Gulf, at India, the Germans were anxious to secure the co-operation of Great Britain. If they could do so on their own terms, that is to say without affecting the enterprise as a dominant German adventure. Shortly before the commencement of the War of 1914-18 the protracted negotiations with London which had this end in view ended in a definite agreement between the two Powers. Under this agreement the Gulf section of the line was to have been British, and the other portion German. But this agreement which had not been signed became waste paper with the outbreak of the war, and the German plans vanished into thin air with the complete defeat of Turkey and Germany. Nevertheless the railway did not stand still during the war. Germany made immense efforts to complete the difficult tunnel sections and the work was substantially finished when the Armistice was signed.

FRANCE AND THE FRONTIER

It is difficult to find any sound policy behind the efforts of France to obtain a coaling station at Muscat in the Persian Gulf, and her long opposition to the steps necessary to extinguish the slave trade, and hold in check the immense traffic in arms which was equipping all the tribesmen on our North-West Frontier with rifles of precision and a large supply of ammunition. These embarrassments were slowly removed one by one after the conclusion of the Anglo-French Entente. Far otherwise was it in the East. The consolidation of French authority in French Indo-China was the prelude to designs for the expansion of this authority at the expense of Siam and to find compensation there for the veiled British protectorate of Egypt. There had earlier been mutterings in Burma. The British were established in Lower Burma in the thirties and in the eighties the foolish and tyrannical King Theebaw, in

Upper Burma, became an impossible neighbour, and ambitious Frenchmen were not averse to fanning his opposition to the British. However, if any hopes were entertained of extending the Asiatic possessions of France in this direction, they were dissipated by the Second Burmese War and the firm establishment of British rule.

Far otherwise was it on the confines of Siam. It was the fixed purpose of British policy to preserve Siam as a buffer state between Burma, then a regular Province of the Indian Empire and French Indo-China. This policy was definitely challenged by French encroachments on Siam. Matters approached a crisis in 1894, and Britain and France were within measurable distance of a situation which might have ended in open war between them. But as in the case of Penjdeh, and later when Major Marchand marched across Africa to Fashoda, the imminence of hostilities made statesmen on both sides ask themselves what they might be going to fight about. They found there was nothing of vital interest involved and an agreement was negotiated between the two Powers, which secured the independence and integrity of Siam.

THE NEW FRONTIER PROBLEM

The whole purpose of this brief sketch has been to show that for three generations—most assuredly since the events leading to the Afghan War of 1838—the Indian and Pakistan frontier problem has never been a local problem. It has been dominated by external influences—in the main the long struggle between Great Britain and Russia, for a brief period the German ambition to build up a dominant position in the East through the revival of the land route, and to a much lesser extent by the ambitions of France and Turkey.

The circumstances affecting the Frontier from centres beyond it have greatly changed. Old dangers have disappeared. Consequently, a great deal of new attention is necessarily being directed to local aspects of the general problem. The tribesman in the north-west borderland was always an opponent to be respected. Brave, hardy, fanatical, he has always been a first-class fighting man. Now these tribesmen are everywhere armed with magazine rifles, either imported through the Persian Gulf when gun-running was a thriving occupation, stolen from British magazines, or secured from Russian and Afghan sources. They have an abundant supply of ammunition. Considerable numbers of the fighting men have been trained in the ranks of the Indian Army, either as Regulars in the Pathan regiments, or else in the tribal militias.

It may be said that the crux of the situation was in Waziristan. This sector of the Frontier has always been the most difficult of the whole, because of the intractable character of the people, and of their inveterate raiding activities. Besides, possessing a bolt hole into Afghanistan they had in the past evaded effective punishment. In view of the complete disappearance of the external menace, there were many who urged the desirability of complete withdrawal, even to the line of the Indus. This extreme school gained little support. The position in Quetta

on the one side and Peshawar on the other is fully consolidated, and no good case could be made out for withdrawing from it. On the other hand, there was a strong case made out for leaving the tribesmen severely alone from the Gomal to the Kurram, and dealing with them if they emerged from their fastnesses. The military standpoint was that the Waziristan tribes are intractable; that it was unfair to impose on troops the frequent necessity of punitive operations in most arduous conditions; and that the only solution of the question was the occupation of dominant points in Waziristan, as far north as Ladha, and linking these posts with the military bases, and particularly with the termini of the frontier railways, by good motor roads.

This controversy lasted long. It resulted in a compromise which specially arose from the changed conditions in which the British found themselves in 1922, when the troops were in occupation of Waziristan. The ensuing policy has been aptly described as the "half-forward" policy. It is in truth a repetition of the Sandeman policy, adapted to local conditions. There has been no withdrawal in the ordinary sense of the term, but the limit of the North Waziristan occupation was temporarily fixed at Razmak, not at Ladha. A network of consequential roads was pushed forward. In South Waziristan, Wana had been re-occupied, partly in response to a pressing invitation from the Wana Waziris, because they wanted to share the benefits which they saw British occupation to be bringing to their cousins northward of them.

In February, 1933, control over tribal territory was pushed forward beyond Razmak towards the Afghan Border because of a rebellion on the Afghan side and of the need to assist the King of Kabul by preventing excursions by bodies of Waziris into Indian territory.

The work of control and of civilization rapidly progressed in the whole territory. Of this particulars are given elsewhere in this chapter. One of its recent fruits was a request by the Afridis for roads in their country of Tirah. A beginning with construction was made, but discussions within the tribe in regard to it caused the work to be suspended. The desirability of better controlling the Afridis was demonstrated in 1930 when, the young Afridis invaded the Peshawar Plain and the need for the adoption of a more active policy in Waziristan was shown by a rising of the Tori Khel Waziris in 1936-37. A serious military campaign in Waziristan in 1936-37, necessitated by the disturbing religious agitation, showed that conditions there were far from settled. The extent of the trouble there resulted in serious official review of the whole problem once again.

The main railhead, which for many years terminated at Jamrud, at the easterly entrance to the Khyber Pass, was in the autumn of 1925 extended to Landi Khana, at the opposite end of the Pass and within a mile of the frontier between India and Afghanistan.

THE WITHDRAWAL

With the establishment of the two Dominions of India and Pakistan what is called the North-West Frontier has passed into the hands of the

Dominion of Pakistan. At the beginning some anxiety was felt about the attitude of the tribes towards the new State; but a number of tribal jirgas hastened to offer their allegiance to the new Government. For example, the Mohmands, the tribes of the Khyber Agency, the Shikhanis and the Bhitianis are reported to have expressed their loyalty to Pakistan and given assurance of help to the State in time of need.

Three months after the new State came into being it carried through what it called a new policy in regard to the frontier; a policy based on trust and friendship unlike the old policy which, it was claimed, was based on fear and hostility. In pursuance of the new policy troops were withdrawn from south and north Waziristan. The withdrawal operations started on December 6 and were completed on December 27. The famous frontier outposts of Wana and Razmak were given up and the Pakistan troops fell back to military stations in the settled districts of Bannu, Dera Ismail Khan and Kohat. Pakistan troops have also been withdrawn from the Khyber Pass where sufficient strong forces used to be kept, particularly at the outposts of Torkhan and Kamind Fort.

Necessary administrative arrangements would obviously be made till such time as the Pakistan Constituent Assembly in consultation with tribal leaders decides the future of their Government. A committee has already been appointed for the purpose during the preliminary session.

One of the objects of the withdrawal is to save the Pakistan exchequer several crores.

The effects of this 'close border' policy are likely to be far-reaching. For instance, the frontier between Pakistan and Afghanistan the so-called Durand Line has never been clearly defined or demarcated. In the old days the tribes have profited by the existence of these military outposts: a number of economic advantages have accrued to them, a very important point in a barren and rugged country. The question may be asked: Does the Pakistan Government intend to substitute other economic aids to keep the tribesmen contented? If not is there not a danger of a recrudescence of tribal raids across the border in search of food and loot? What effect will all this have on north-western Pakistan or Kashmir in which India is interested? Again, what is the position to be in respect of that natural but strongly defensible gateway to the Indian sub-continent, the Khyber Pass which itself lies in the Afghani country?

AFGHAN INTEREST

It is presumed that the withdrawal of troops would help maintain happy and peaceful relations between Pakistan and Afghanistan. A point which must be mentioned here is the strong interest which the Government of Afghanistan evinced in the future of the N.W.F.P. during the referendum. A note presented by the Government of Afghanistan in London in the middle of June appeared to revive its claims on the N.W.F.P., the land between the Indus and the Durand Line. But closer scrutiny showed that what the note actually demanded was that the Pathans should

be given the choice to be completely independent of the rest of the sub-continent, a demand which appeared to be in harmony with that of the Red Shirts who were agitating for an independent Pathanistan.

The Afghan press and radio for sometime emphasized the close kinship between the Pathans and the Afghans and suggested that that was the opportune moment for the Pathans to come back to their 'mother country'. A further suggestion was that Afghanistan should be allowed to send its own mission to conduct the referendum.

The Afghan note was rejected both by Britain and India. The British reply said that the question of the future of N.W.F.P. would be decided by the Pathans themselves while the Indian reply took the line that the boundary between Afghanistan and India was settled once and for all by the Durand Line.

The withdrawal of British rule reopened the whole question of the future of the native States in Baluchistan. Persia and Afghanistan were greatly interested and the Khan of Kalat sat on the fence for a long time. Eventually the question was decided by the accession of Kalat, Kharan and Las Bela to the Dominion of Pakistan.

Beyond Afghanistan and Persia was Russia who was credited with the desire of uniting the inhabitants of north Afghanistan with allied groups in the U.S.S.R. and offering Afghanistan compensation in N.W.F.P. There also appeared to be an impression that Russian eyes were directed on a warm water port in the Indian Ocean as an outlet for Central Asian produce and that this warm water port might be Karachi.

Altogether, the whole frontier question may be described as being once again alive.

WAZIRISTAN

After a general discussion of the north-west frontier problem we may next pass on to a detailed discussion of the past history and present conditions of Waziristan which is the most unruly and turbulent part of the whole region.

Geographically, Waziristan is a rough parallelogram averaging 60 miles from East to West and 160 from North to South. The western half consists of the Sulaiman Range gradually rising up to the ridge from five to ten thousand feet high, which forms the water-shed between the Indus and the Helmand Rivers and corresponds with the Durand Line separating Pakistan from Afghanistan. This is the western boundary. On the east is the Indus. North is the watershed of the Kurram River running East and West about 80 miles north of Bannu separating Waziristan from the Kohat District. South is a zigzag political boundary from the Durand Line running between Wana and Fort Sandeman in Baluchistan with a turn southwards to the Indus.

The western half is a rugged and inhospitable medley of ridges and ravines straggled and confused in hopeless disarray. The more inhabited portions lie well up the slope at heights of four to six thousand feet. Here are the outposts of

Wana and Razmak some 15 and 20 miles respectively from the Durand Line, in the centre of the grazing district, the latter within five miles of important villages of Kaniguram and Makin.

The submontane tracts from the hills to the Indus vary from the highly cultivated and irrigated land round Bannu to the sand desert in the Marwat above Peshawar.

Where irrigation or river water is obtainable cultivation is attempted under conditions which can hardly be encouraging. Other tracts like that between Peshawar and Tank, usually pastoral, can only hope for an occasional crop after a lucky rainfall.

Inhabitants.—The inhabitants, unable to support existence on their meagre soil, make up the margin by armed robbery of their richer and more peaceful neighbours. The name originates according to tradition from one Wazir, two of whose grandsons were the actual founders of the race. Of the four main tribes Darweshkhal, Mahsuds, Dawars and Batani, only the first two are true Wazirs. Their villages are separate though dotted about more or less indiscriminately, and inter-marriage is the exception—in fact all traditionally are in open strife, a circumstance which, until some bright political comet like the Afghan War of 1919 joined them together, materially aided British dealings with them.

Unlike other parts of the frontier however these wild people acknowledge little allegiance to maliks or headmen. No one except perhaps the Mulla Powindah till his death in 1918 could speak of any portion of them as his following.

The policy of the British was at first one of non-interference with the tribes. Gradually it was found that more and more supervision became necessary to control raiding and this was attempted by expeditions to portions of the country with Regulars, followed by building posts and brick towers to be held by Militia. These posts were at first placed at the points where raiders usually debouched.

The Political Officers, at first supported by Regulars, built up from 1904 onwards a force of some 3,000 Militia with British Officers at their disposal, who were backed up by the garrisons at Bannu and Dera Ismail Khan. In addition certain allowances were made to the tribes for good behaviour, prevention of raids and surrender of offenders when required; also for tribal escorts as necessary. Gradually, as occasion required, posts were constructed and occupied. Wana was occupied in 1895 at the request of the Wana Wazirs. Similarly the Tochi in 1916. In the comprehensive expedition of 1895-96 when this policy was put into effect, the British arms were shown in every remote valley in the vain hope of taming the Mahsuds. It was hoped the various posts would prove a pacifying influence and a rallying ground for Government supporters. From 1904 to 1919 they were held by Militia. Roads and communications were improved and tribal allowances augmented by sales of produce to the troops on a liberal scale.

A COMPROMISE

A full statement of the policy finally adopted by Government in view of the situation left upon their hands after the Mahsud rebellion was made

by the Foreign Secretary, Sir Denys Bray, in the course of a Budget discussion in the Legislative Assembly on 5th March 1923. He outlined neither a Forward policy nor a Close Border policy. Both these terms had, in fact, ceased to be appropriate. Circumstances had so changed that neither the one plan nor the other remained within the bounds of reasonable argument.

Sir Denys referred to the triumph of the Sandeman policy in Baluchistan. He pointed out that some people long ago believed that the same policy would prove effective in Waziristan. "But what was a practical proposition 20 or 30 years ago is not necessarily so now. The task is infinitely more difficult to-day, chiefly because the tribesmen are infinitely better armed; their arms having increased at least tenfold during the last 20 years."

Dealing with the Close Border prescription Sir Denys Bray showed that if one erected a Chinese wall of barbed-wire fence along the plain some distance below the hills, "all the time the problem in front of us would be going from bad to worse, with the inevitable increase of arms in the trans-border and with that inevitable increase in the economic stringency in this mountainous tract, which would make the tribesmen more and more desperate, more and more thrown back on barbarism."

The settled policy of Government in Waziristan, Sir Denys stated, was the control of that country through a road system, of which about 140 miles would lie in Waziristan itself and one hundred miles along the border of Dera Ismail Khan and the maintenance of some 4,600 Khassadars and of some 5,000 irregulars, while at Razmak, 6,500 feet high and overlooking northern Waziristan, there would be an advanced base occupied by a strong garrison of regular troops. This was a forward policy in a very real sense, for it was a policy of constructive progress and was a big step forward on the long and laborious road towards the pacification, through civilization, of the most backward and inaccessible, and therefore the most truculent and aggressive tribes on the border.

The policy thus initiated for a period proceeded with results according to the highest reasonable expectations and exceeding the most sanguine hopes of most people concerned in its formulation.

PACIFICATION

The roads were policed by the Khassadars, who in the main, until the Tori Khel rebellion of 1936-37 upset some of them, proved faithful to their trust. The open hostility of the Wazir tribesmen to the presence of troops and other agents of Government in their midst, which at the outset they showed by shooting up individuals and small bodies of troops at every opportunity, faded away, and the people showed an understanding of the rule of law, and, under the control exercised, a readiness to conform to it. In various small but significant ways, methods of civilization caught the imagination of the people and won their approval. Thus, the safety of the roads was encouraged, and became buttressed by a considerable development

of motor-bus traffic. The roads, as the King's Highway, are officially held to be sacrosanct, that is no shooting up or other pursuit of personal or tribal feuds is permitted upon them. This permits villagers to proceed to and from the plains and towns in safety. Under the influence of their women, the tribesmen applied that the ban against shooting upon the highway would be extended to all the country for three miles on either side of the highway.

Tentative efforts to introduce primary education proved possible and achieved as much success as could be expected. The hospitals and dispensaries maintained for irregular troops, called Scouts, employed about the country, attend to the wants of the tribespeople who come to them. So much has this arrangement been appreciated that the Mahsuds formally applied for the establishment of a hospital of their own. With grim humour, they offered to provide such an institution with the necessary surgical instruments, saying that they had saved this from the time when the British formerly left the country. In other words, they offered what they had captured or looted during the 1919 emute.

Wana was occupied, following an encouraging petition from the local Wazirs, in 1929. A motor road had already been run out from Jandola through Chagmalai and the Shahur Tangi to Sarwakai. A brigade of troops, hitherto stationed at Manzai, whereabout the Takki Zam, after flowing down its deep valley from central Waziristan, debouches on to the Derajat, was accordingly ordered up to Wana in the autumn of 1929. It proceeded throughout the journey hither without opposition and was warmly welcomed by the tribes people at Wana, where it established itself in a favourably sited camp not far from the fort which was the earlier centre of British occupation.

The area cultivated by the villagers of Wana plain doubled by the end of 1931 and the people declared their readiness to surrender their firearms if their neighbours also gave up theirs or were deprived of them. A road was built connecting Fort Sandeman via Gulkach, on the Gomai river, with Tanai, on the Sarwekai-Wana road. A motor road was also constructed from Razmak through Kaniguram, in the heart of the Mahsud country, to Wana. It was completed in 1933 and the only disputes connected with its construction arose from the rivalry of the tribesmen whose villages lie along the route and who sometimes fought one another to secure road-making contracts.

Congress Movement.—A startling new development upon the North-West Frontier during 1930 was the spread thereto of the agitation which was then in full swing in the interior of India. In the N.F.P. the agitation was carried on by Congress organised in what are known as Khilafat Committees. It started as an attack on the Sarda Act which makes illegal and provides penalties for the marriage of boys and girls below stated minimum ages. Gradually the tribal areas were affected. The first point of violent combustion was Peshawar city. Within a short time, Afridi bands descended the ravines and nullahs from Tirah to join in the fray. The Mohmands

became greatly excited and sent down bands to sit near the border and watch for an opportunity to join in. The Upper Tochi Wazirs simultaneously took to arms and shortly afterwards the Mahsud Wazirs about Ladha, did the same. At this stage, the Air arm of the Government came into play. Aeroplanes patrolled the whole country and were frequently employed by the political authorities to take preventive and punitive action by bombing. The road system meanwhile, enabled troops to be moved at will to positions of advantage for dealing with whatever serious tribal aggression appeared likely.

In the result the Mohmands, after being bombed several times, made no descent in force. The Afridis twice endeavoured to raid Peshawar in force but by combined air and land action were both times driven back to their hills. The Orakzais of southern Tirah threatened to descend by the Ullan Pass upon Kohat and their western clans attacked a post in the Upper Kurram and endeavoured to attack Parachinar. Even two or three clans of Afghan tribesmen across the border were drawn into the fray. Combined air and ground action threw them back. The Tochi Wazirs heavily attacked Datta Khel, but were speedily repulsed. The Mahsuds were similarly repulsed and punished when they assaulted Sorarogha, in the valley of the Takki Zam.

The entire uprising was suppressed and the establishment of new fortified posts on the Peshawar plain, immediately opposite the main valleys leading out of Tirah, and the construction of roads for their service, indicated the application of the new frontier policy in that region. The Afridis long refused to assent to these, but being thereby deprived of access to their normal winter grazing grounds on the Khajuri and Aka Khel plain, and prevented from visiting Peshawar, their marketing centre, they came in and accepted peace under the new conditions before the opening of the winter of 1931-32. The Afridis later asked for roads into Tirah but were not yet sufficiently agreed among themselves or construction successfully to proceed.

MOHMAND OUTBREAK

Disturbances in the Mohmand country during the summer of 1933 both illustrated the operation of the new Frontier policy and the need to keep it a live policy if it was to be of any use at all. The Mohmands may for the purposes of present description be divided into two categories namely, the Upper Mohmands, who live in the highlands of the Mohmand country, and the Lower Mohmands, whose country stretches from the lower altitudes of the same hills down to the Peshawar Plain. Through the country of the Upper Mohmands passes the Durand line but the Afghan Government never agreed to its delimitation in part of this region and consequently its place had long been taken over a considerable portion of the length of the frontier by what was described as the Presumptive Frontier. The exact position of this latter had never been settled between the two governments and it was consequently sometimes difficult to say whether people from particular villages belonged to one side or to the other of it.

In 1932 during the Red Shirt campaign in the Peshawar plain, the Upper Mohmands decided to join in and raids in the administered territory immediately northward of Peshawar occurred.

The Lower Mohmands were described as the Assured Tribes. The meaning of the description was that the British authorities assured them protection against the attacks of the Upper Mohmands and they, on the other hand were bound by promises of good behaviour. The Assured Tribes in 1932 interfered with the programme of the Upper Mohmands in raiding the plain, and the Upper Mohmands in 1933, when spring and early summer once more facilitated their methods of campaigning, commenced retributory raids upon the Halimzai and other Assured clans. The attacked clans appealed to the political authorities for help and which the latter were obliged to give.

About the same time as this movement was germinating, there appeared in Bajaur, a country immediately to the north of that in which the events just described developed, a Pretender to the Afghan throne. He was accompanied by two companions and started a campaign in Bajaur for a revolution or such other trouble as might be possible in Afghanistan. This compelled the British authorities to take measures in fulfilment of their obligations of good neighbourliness to Afghanistan.

Peace.—Road construction from the Peshawar Shabkadr road northwards through Ghalanal into the Halimzai country and towards the passes which lead from that country into the upper extremities of the Bajaur Valley was undertaken by two brigades of troops, with other details, were sent forward up it to assist in dealing with the Upper Mohmands. At the same time, aeroplanes bombarded the village of Kotkal in Upper Bajaur, which had given shelter to the Pretender, further aerial demonstrations were made and the Bajauris were given an ultimatum demanding the surrender of the Pretender by a given date.

The Upper Mohmands continuing aggressive and the Bajauris obdurate, there was good prospect of a campaign over the same country as that covered by the campaign of 1897. It seemed likely that the Ghalanal Road would be continued into the upper extremity of Bajaur and that another road for troops would also have to be constructed from Malakand up the Bajaur valley itself so that by the meeting of the two roads in Upper Bajaur, there would become established a circular road through this part of the tribal territory, resembling that running through North Waziristan.

In the end, the Upper Mohmands, partly doubtless because of punishment which they received in certain encounters with British troops and partly probably because of influence brought to bear upon them from Kabul, retired to their hills and after negotiations entered into bonds to keep the peace; and the Bajauris, while maintaining on grounds of tribal custom their refusal to surrender the Pretender, nevertheless expelled that person from their territory, probably into Afghanistan. Thus, the trouble ceased. The final result of it all was the construction of the road through Ghalanal and the rapid development of bus services and other

activities of civilization which speedily took place along with it.

The Upper Mohmands made another descent in the summer of 1935. The Lower Mohmands quarrelled among themselves over the distribution of road maintenance contracts and the Upper Mohmands decided to fish in the troubled waters. Successful military operations ended in the Upper Mohmands suing for peace—and in the Ghalanal road being carried forward over the Nahakki Pass and down beyond it on to the plain which extends to the natural road junction where the Upper Bajaur Valley meets the Upper Mohmand country.

TORI KHEL REBELLION

The Wazirs and Mahsuds in 1930 showed signs of rebelling against Government in parallel with the Afridis. All went peacefully until the autumn of 1936 in North Waziristan when a Muslim lad was accused of kidnapping a Hindu girl of Bannu. Apparently she eloped with him. She was restored to her parents by the order of the Civil Court, on the ground that she was a minor. There was a good deal of communal excitement about the matter and the faqir named Ipi was alleged to have started an agitation about it in the Tribal country. There was also in 1936, a dispute between Muslims and Sikhs in Lahore over the possession of an old building said to have been a mosque. This was settled in the Lahore High Court in favour of the Sikhs and the Punjab Muslims accepted the decision. The faqir of Ipi is said to have lumped together the Bannu Girl Case and the Lahore (Shahidganj) Mosque Case and to have raised among the Waziristan Tribes the slogan, "Islam in Danger." Whether the accusation against the faqir was true or not a sub-section of the Tori Khel section of the Wazirs of Northern Waziristan rose. Their elders begged Government to order a flag march of troops through their country so as to increase the credit of the loyalist element. This Government did. The troops were heavily fired upon and had to fight their own way out. Efforts to round off the engagement before it developed into a major rebellion failed and there followed a war in which the Tori Khel were the only tribal section avowedly at war with Government but all the other tribesmen of the country were hardly more than nominally friendly, some joined in gangs to fight the authorities and others connived at such acts. Not until the fall of winter towards the end of 1937 were the Tori Khel and the bands of irreconcilables under daring leaders beaten by extensive military operations into asking for peace. The summer campaign in 1937 involved the employment of 50,000 troops. Before they were withdrawn in the following winter 106 miles of new roads opening up some of the hitherto inaccessible country in and about the upper reaches of the Shaktu river were made. But north Waziristan remained, in a disturbed condition throughout 1938 and on into 1939. It was therefore, found necessary to keep an extra brigade in the territory and spasmodic operations against recalcitrant gangs proceeded by land and air but normal conditions were not restored.

Unrest during War.—In the summer of 1938 a temporary complication was provided by the appearance amongst the Mahsuds of a Syrian called the Shami Pir who was only just prevented from leading a tribal incursion to support a rebellion against the Government of Kabul.

The persistence and expense of the trouble in Waziristan, constituting as it did a heart-breaking set-back to the "policy" which had seemed for fifteen years to be achieving material results, provoked renewed discussion of Frontier policy especially in regard to military commitments which were examined by a Defence Committee under the chairmanship of Lord Chatfield who visited India on behalf of the British Government towards the end of 1939.

Although hostile sections still persisted with mischief there was thought by April 1939 to be sufficient justification for the hope that the period of major military operations was over and Waziristan was in consequence returned to the charge of the Governor of the N.-W.F.P., in his capacity as A.G.G. for the tribal areas. Sporadic disturbances continued into the period of the second world war and the Fagir remained an elusive figure.

During 1939, Waziristan was in a state of continual unrest. The number of offences said to have been committed by the Ahmedzai tribesmen by the end of the year amounted to over fifty cases of major outrage. They included blasting of bridges and destruction of communication holding up and looting lorries, sniping, kidnapping and several cases of murder. The situation became difficult necessitating military operations. Two columns of troops were sent to the Ahmedzai salient and it took three months to subdue the hostile elements.

A detailed investigation into the economic conditions in the tribal areas, as a preliminary step to the adoption of measures aimed at radical improvement of the tribesmen, was thereupon believed to be opportune and would probably have been attempted but for the preoccupation of the war.

IRAN

From causes which only need to be very briefly set out, the Iran question as affecting Pakistan frontier policy has receded until it is of no account. Reference is made in the introduction to this section to the fact that the conclusion of the Anglo-Russian Agreement left the British a bitter legacy in Persia. That Agreement divided Iran into two zones of influence, and the Iranians bitterly resented this apparent division of their kingdom between the two Powers, though no such end was in view. German agents, working cleverly on this feeling, established an influence which was not suspected, and when World War I broke out they were able to raise the tribes in opposition to Great Britain, in the South, and after the fall of Kut-al-Amara, when a Turkish Division penetrated Western Iran, they exercised a strong influence in Teheran.

With the defeat of Turkey and the Central Powers this influence disappeared, but at that time there was no authority in Iran besides that of the British Government, which had strong forces in the North-West and controlled the southern provinces through a force organised under British officers and called The South Persian Rifles.

It was one of the first tasks of the British Government to regularise this position, and for this purpose an agreement was reached with the then Persian Government, the main features of which were:—

- To respect Persian integrity;
- To supply experts for Persian administration;
- To supply officers and equipment for a Persian force for the maintenance of order;
- To provide a loan for these purposes;
- To co-operate with the Persian Government in railway construction and other forms of transport.

Both Governments agreed to the appointment of a joint committee to examine and revise the Customs tariff.

The second agreement defined the terms and conditions on which the loan was to be made to Persia. The loan was for £2,000,000 at 7 per cent.

redeemable in 20 years. It was secured on the revenues and Customs' receipts assigned for the repayment of the 1911 loan and should these be insufficient the Persian Government was to make good the necessary sums from other sources.

When however the British troops in the north-west retired before the Bolsheviks, the Iranians had no use for the Agreement and it soon became a dead instrument. It was finally rejected and the advisers who were to have assisted Persia under it withdrew.

The general situation in Iran was gravely disturbed in 1932 by the sudden termination by the Iran Government of the Anglo-Iran Oil Co.'s concession, a matter affecting one of the biggest industrial undertakings in the world and millions sterling of capital. The intervention of the British Government led to the reference of the trouble to the League of Nations and this paved the way for negotiations between the Company and the Iran Government. While these were being settled some progress was also made with general negotiations between the British and Iran Governments for an agreement covering all outstanding points of difficulty between them.

In July, 1941, Britain drew the attention of the Iranian Government to the danger of allowing German tourists in their country. A large number of German technicians and camouflaged agents had been infiltrating into Iran. The Iran Government's reply being unsatisfactory, the British and Soviet representatives made a new *démarche* to Iran in August, 1941, without any result. On one point, however, the Government of Iran made some concession to British feelings, that of restraining the activities of Rashid Ali and his supporters from Iraq who had been actively consorting with Axis representatives. The British and Russian *démarche* requested the expulsion of Germans from Iran.

On the Iran Government's failure to do so in August, 1941, the British and Soviet Governments decided to take action. The Soviet Government in their note to Iran pointed out that they found themselves

confronted with the necessity of taking immediate steps and exercising their right by virtue of paragraph 6 of the 1921 treaty in the form of sending troops to Iranian territory for temporary occupation in order to safeguard the security of the Soviet. It assured the Iran Government that those measures were not in any way directed towards Iran. The Soviet had no territorial desire nor any intention of infringing the independence of Iran. The note also assured the Iran Government that as soon as the danger threatening them was past the Soviet Government, in obedience to the obligations undertaken in the 1921 treaty, would withdraw their forces from Iranian territory. The British Ambassador in Teheran presented a similar note simultaneously.

Following on the Allied plan of action British and Indian forces entered Iran at three points. The Soviet troops entered from the Caucasus. The Allied forces met with a slight resistance at first but on August 25th, 1941, the Iran Government issued to their forces an order to cease fire, a new Cabinet being formed under the Prime Ministership of Mr. Ali Furugh. It entered into negotiations with the Allies and the concluded peace. One of the clauses of the peace terms was that the Iranians should facilitate the transit of supplies and war materials to Russia. Iran agreed to the closing of German, Italian, Rumanian and Hungarian Legations. Further, German nationals were handed over to the Allies. The terms also included the

withdrawal of the Iranian troops from certain zones. In September, 1941, the Shah of Iran, Reza Shah Pehlvi, abdicated in favour of the Crown Prince, Shahpur. Reza Shah Pehlvi died in July 1944.

All through the War Persia was a life-line in the communication of the Western Allies with Russia. After the War differences between America and England on the one hand and Russia on the other broke out chiefly on the question of oil. America and England appear to be pursuing a common policy in this regard. Briefly the Russian demand on Persia is that Persia should fulfil the provisions of the treaty which she has signed with Russia in regard to oil rights. In effect Russia is demanding the same rights in north Persia as those which she claims the Anglo-Americans are enjoying in the south. Two incidents in this triangular struggle were the starting of an autonomous movement in the border region of Azerbaijan in the north and the resignation of a Prime Minister Ghavam-es-Saltaneh. The whole question is still hanging fire. Of late however there have been signs that Persia is striking out an independent line in international politics.

India and Pakistan have embassies in Persia. A point which might be mentioned here is an anti-Indian demonstration in Teheran towards the end of 1947 which seemed to be an echo of Indo-Pakistan differences.

AFGHANISTAN

The relations of Afghanistan with the Indian Empire were for long dominated by one main consideration—the relation of Afghanistan to a Russian invasion of India. All other considerations were of secondary importance. For nearly three-quarters of a century the attitude of Great Britain towards successive Amirs has been dictated by this one factor. It was in order to prevent Afghanistan from coming under the influence of Russia that the first Afghan War of 1839 was fought—the most melancholy episode in Indian frontier history. It was carried by a Russian envoy was received at Kabul whilst the British representative was turned back at All Masjid that the Afghan War of 1878 was waged. After that the whole end of British policy toward Afghanistan was to build up a strong independent State, friendly to Britain, which would act as a buffer against Russia, and so to order our frontier policy that we should be in a position to move large forces up, if necessary, to support the Afghans in resisting aggression.

GATE-WAYS TO PAKISTAN

A knowledge of the trans-frontier geography of the sub-continent brought home to the administrators the conviction that there were only two main gate-ways to Pakistan—through Afghanistan, the historic route to India, along which successive invasions have poured, and by way of Sclistan. It was the purpose of British policy to close them, and of Russia to endeavour to keep them at any rate half open.

To this end, having pushed her trans-Persian railway to Samarkand, Russia thrust a military line from Merv to the Kushkinsky Post, where

railway material is collected for its immediate prolongation to Herat. Later, she connected the trans-Siberian railway with the trans-Caucasian system, by the Orenburg-Tashkent line, thus bringing Central Asia into direct touch with her European magazines.

Nor was Great Britain idle. A great military station was created at Quetta. This was connected with the Indian railway system by lines of railway which climb to the Quetta plateau by the Bolan Pass and through the Chappar Rift. From Quetta the line has been carried by the Khojak tunnel through the Khwaja Amran Range, until it leads out to the Afghan Border at New Chaman, where it opens on the route to Kandahar. The whole of Baluchistan was also brought under British control. Quetta is thus one of the great strategical positions of the world, and nothing has been left undone which modern military science can achieve to add to its natural strength. In the opinion of many military authorities it should firmly close the western gate to Pakistan, either by way of Kandahar, or by the direct route through Sclistan.

Further east, the first railway system was carried to Jamrud and by 1925 up the Khyber Pass to Landi Kotal and down the other side of the Pass to Landi Khana on the Afghan Frontier. A first-class military road, sometimes double, sometimes treble, also threads the Pass to an advanced post at Landi Kotal, and then descends until it meets the Afghan Frontier at Landi Khana. In this wise, to continue the story, the two Powers prepared for the great conflict which was to be fought on the Kandahar-Ghazni-Kabul line.

RELATIONS WITH INDIA

Between the advanced posts on either side stands the Kingdom of Afghanistan. The end of British policy was to make it strong and friendly. In the first particular it largely succeeded. The second aim may also be said to have been attained. When Abdurrahman was invited to ascend the throne, none realised his great qualities. Previously the Amir of Afghanistan had been the chief of a confederacy of clans. Abdurrahman made himself master in his own kingdom. Aided by a British subsidy of twelve lakhs of rupees a year, increased to eighteen by the Durand Agreement of 1893, and subsequently to over 20 lakhs, he established a strong standing army and set up arsenals under foreign supervision to furnish it with arms and ammunition. Step by step his position was regularised. The Anglo-Russian Boundary Commission, which nearly precipitated war over the Pendjeh episode in 1885, determined the northern boundaries. The Pamirs Agreement delimited the borders amid those snowy heights. The Durand Agreement settled the border on the British side, except for a small section to the west of the Khyber, which remained a fruitful source of trouble between Afghanistan and Britain until 1919, when the Afghan claims and action upon the undemarcated section led to war. That section was finally surveyed and the frontier determined shortly after the conclusion of peace with Afghanistan. Finally the McMahon award closed the old feud with Persia over the distribution of the waters of the Helmand in Sistan. This frontier was later reaffirmed by a Turkish boundary commission appointed by Iran and Afghanistan conjointly.

It was estimated by competent authorities that about the time of Abdurrahman's death, Afghanistan was in a position to place in the field, in the event of war, one hundred thousand well-armed regular and irregular troops, together with two hundred thousand tribal levies, and to leave fifty thousand regulars and irregulars and a hundred thousand levies to maintain order in Kabul and the provinces. But if Afghanistan were made strong, it was not made friendly. Abdurrahman Khan distrusted British policy up to the day of his death. He closed his country absolutely against all foreigners, except those who were necessary for the supervision of his arsenals and factories. He refused to accept a British Resident, on the ground that he could not protect him, and British affairs were entrusted to an Indian agent, who was in a most equivocal position. At the same time he repeatedly pressed for the right to pass by the Government of India and to establish his own representative at the Court of St. James.

FIRST WORLD WAR

These relations were markedly improved during the reign of the Amir Habibullah Khan. He visited India soon after his accession. He strengthened and consolidated his authority in Afghanistan itself. At the outset of the war he made a declaration of his complete neutrality. It is believed that he warned the Government of India that he might be forced into many

equivocal acts, but that they must trust him; his reception of Turkish, Austrian and German "missions" at Kabul, at a time when British representatives were severely excluded, was open to grave misconstruction. But a fuller knowledge induced the belief that the Amir was in a position of no undue dimity. He had to compromise with the fanatical and anti-British elements amongst his own people, inflamed by the Turkish preaching of a Jihad, or holy Islamic war. But he committed no act of hostility; as soon as it was safe to do so he turned the members of these missions out of the kingdom. At the end of the war his policy was completely justified; he had kept Afghanistan out of the war, he had adhered to the winning side; his authority in the kingdom and in Central Asia was at its zenith.

MURDER OF THE AMIR

It is believed that if he had lived Habibullah Khan would have used this authority for a progressive policy in Afghanistan, by opening up communications and extending his engagements with India. He was courted by the representatives of Persia and the Central Asian States as the possible rallying centre of a Central Asian Islamic confederation. At this moment he was assassinated on the 20th February 1919.

The circumstances surrounding his murder have never been fully explained; but there is strong ground for the belief that it was promoted by the reactionaries who had harassed him all his reign. These realised that with his vindication by the war their time of reckoning had come; they anticipated it by suborning one of his aides to murder him in his sleep. His brother, Nasrullah Khan, the nominee of the fanatical element, was proclaimed Amir at Jelalabad in his stead, but public opinion in Afghanistan revolted at the idea of the brother seizing power over the corpse of the murdered man.

His sons, Hayat and Amanullah, were not disposed to waive their heritage. Amanullah was at Kabul, controlling the treasury and the arsenal and supported by the Army. Nasrullah found it impossible to make headway against him and withdrew.

The new Amir, Amanullah, at once communicated his accession to the Government of India and proclaimed his desire to adhere to the traditional policy of friendship. But his difficulties multiplied; he had to deal with the war party in Afghanistan; he was confronted with the dissatisfaction arising from the manner in which the murderers of Habibullah had been dealt with; the fanatical element was exasperated by the imprisonment of Nasrullah; and the Army was so incensed that it had to be removed from Kabul and given occupation to divert its thoughts.

A further element of complexity was introduced by the political situation in India. The agitation against the Rowlatt Act was at its height. Disturbances in the Punjab and Gujarat had taken place. The result of all this was to convince the Amir that the real solution of his difficulties was to unite all the disturbing

elements in a war with the British. His troops were set in motion and simultaneously a stream of anti-British propaganda commenced to flow from Kabul and open intrigue was started with the Frontier tribes, in whom the Afghans placed their chief reliance.

Speedy Defeat.—The war caught the Army in India in the throes of demobilisation and with a large proportion of the seasoned troops on service abroad. Nevertheless the regular Afghan Army was rapidly dealt with. Strong British forces moved up the Khyber and seized Dacca. Jelalabad was repeatedly bombed from the air and also Kabul. Nothing but a shortage of mechanical transport prevented the British forces from seizing Jelalabad. In ten days the Afghans were severely defeated and asked for an Armistice.

The Afghans tried to water down the conditions of the armistice, but as they were met with an uncompromising attitude they despatched representatives to a conference at Rawalpindi. On 8th August a Treaty of Peace was signed which is set out in the Indian Year Book, 1923, pp. 196-197.

It will be seen that under this Treaty the way was paved for a fresh engagement six months afterwards. During the hot weather of 1920 there were prolonged discussions at Mussoorie between Afghan Representatives and British officials under Sir Henry Dobbs. These were private, but it is believed that a complete agreement was reached. Certainly after an interchange of Notes which revealed no major point of difference it was agreed that a British Mission should proceed to Kabul to arrange a definite treaty of peace. This Mission crossed the border in January 1921 and entered Kabul where a peace treaty was signed.

AFTER GREAT WAR I

Since World War I the relations between Afghanistan and Great Britain have been good. The main object of the Afghan government was to strengthen the resources of the country and to bring it into closer relation with modern methods of administration. But Afghanistan is an intensely conservative country and no changes are popular; especially violent was the opposition to a secular form of administration and education.

The direct result was a formidable rebellion of Mangals and Zadrans in the Southern Provinces, and serious reverses to the regular troops sent against the rebels. At one time the position was serious, but the rebels were not sufficiently united to develop their successes, and with the aid of aeroplanes and other assistance afforded by the Government of India the insurrection was broken. Whilst this assistance was appreciated, the whole business gave a serious set-back to the reforms initiated by the Amir; he had to withdraw almost the whole of his administrative code and to revert to the Mahomedan Law which was previously in force.

Soviet Penetration.—Taking a long view a much more notable development of the policies of Afghanistan, at the period to

which the foregoing notes apply, was the penetration of the Russians, who had converted the former Trans-Caspian States of Tsarist Russia into Soviet Republics. The object of this policy was gradually to sweep into the Soviet system the outlying provinces of Persia, of China and of Afghanistan. In Persia this policy was foiled by the vigour of the Sipar Salah, Reza Khan. In Chinese Turkestan it was pursued with qualified success. In Afghanistan it also made certain progress.

The first step of the Russians was to extend the Soviet Republics of Tajikistan, Uzbekia and Turkmenistan so as to absorb all Northern Afghanistan. This was later, apparently, abandoned for a more gentle penetration. Large subsidies, mostly delivered in kind, were given to Afghanistan. Telegraph lines were erected all over the country; roads were constructed, large quantities of arms and ammunition were supplied, whilst an air force with Russian pilots and mechanics was created and was largely developed. In return the Russians received important trading facilities.

RUSSO-AFGHAN TREATY

Outwardly the relations between the two States were friendly. In December 1926 the Afghan papers published the text of a new treaty concluded with Soviet Russia, which was signed on August 31st, but it provided that it should in no way interfere with the secret treaty signed in Moscow on February 28th, 1921. The principal clauses of this treaty, as disclosed in the Afghan papers, were as follows:—

Clause 1.—In the event of war or hostile action between one of the contracting parties and a third power or powers, the other contracting party will observe neutrality in respect of the first contracting party.

Clause 2.—Both the contracting parties agree to abstain from mutual aggression, the one against the other. Within their own dominions also they will do nothing which may cause political or military harm to the other party. The contracting parties particularly agree not to make alliances or political and military agreements with any one or more other powers against each other. Each will also abstain from joining any boycott or financial or economic blockade organised against the other party. Besides this in case the attitude of a third power or powers is hostile towards one of the contracting parties, the other contracting party will not help such hostile policy, and, further, will prohibit the execution of such policy and hostile actions and measures within its dominions.

Clause 3.—The high contracting parties acknowledge one another's Government as rightful and independent. They agree to abstain from all sorts of armed or unarmed interference in one another's internal affairs. They will decidedly neither join nor help any one or more other powers which interfere in or against one of the contracting Governments. None of the contracting parties will permit in its dominions the formation or existence of societies and the activities of individuals whose object is to gather

armed force with a view to injuring the other's independence, or otherwise such activities will be checked. Similarly, neither of the contracting parties will allow armed forces, arms, ammunition, or other war material, meant to be used against the other contracting party to pass through its dominions.

THE KING'S TOUR

In the closing months of 1927 King Amanulla, accompanied by the Queen and a staff of officials, commenced a long tour of India and Europe. King Amanulla, when he set out, was warmly welcomed in India and received a great popular greeting in Bombay both from his co-religionists and from members of other communities. He then took ship for Europe. He was the guest of His Majesty King George V in London, and visited the principal European capitals. He made a State visit to Turkey, and returned to Afghanistan by way of Soviet Russia and Persia. A series of treaties with the governments of the countries visited was announced and the King returned to Kabul in the late summer of 1928, the tour having been unclouded by any untoward incident. Afghanistan was peaceful during his long absence.

Reforming Zeal.—King Amanulla returned to his realm full of reforming zeal. He was much impressed by the political and social institutions of the western lands he visited, and in particular by the dramatic forcefulness with which Mustapha Kemal Pasha had driven Turkey along the path of "reform". In this he was encouraged by the Queen, who was desirous of seeing the women of Afghanistan enjoy some of the freedom and opportunity won by and for the women of the West.

Edict after edict was issued, changing the whole structure of Afghan society. New codes and taxes were imposed; it was proposed that women should emerge from their seclusion and doff the veil; the co-education of boys and girls was prescribed; in September Government officials were forbidden to practise polygamy; in October European dress was ordered for the people of Kabul. At the same time, the pay of the regular troops fell into arrears.

With every appreciation of the spirit and direction of these changes, friends of the King advised him to moderate the pace. They reminded him that in 1924 far less drastic changes had brought serious trouble in their train.

In May of that year the "Lame Mullah" raised the standard of rebellion amongst the Glizai and Mangal clansmen of Khost. The Mullahs were openly active against the King and he was equally frank in his hostility to them. Possibly also well-wishers suggested that what was possible in Turkey, after centuries of close contact with the West, and where the ground had been prepared by missionary effort and a long struggle for the emancipation of women, might be less easy in Afghanistan, where there had been no contact with the western world.

A CHANGE OF KINGS

Events moved rapidly in 1929. A notorious north Afghan *badmash*, Bacha-I-Sagqao, raised the standard of revolt and inflicted

severe losses on the Afghan Regular troops discontented as they were by arrears of pay. Day by day the Afghan representatives in various parts of the world issued messages asserting that the rebels had been destroyed, and a rapid series of pronouncement declared the withdrawal of all the reforms and the establishment of a Council of Provincial Representatives. Communications with the outer world were broken.

King Amanulla and his family fled from Kabul to Kandahar and then from Kandahar via Quetta to Bombay where they took ship for Europe. King Amanulla on his arrival at Rome entered into possession of the Afghan Legation, where he remained.

Bacha-I-Sagqao declared himself King of Afghanistan, and for a few months held his position in Kabul. Without money, administrative experience or a disciplined following his throne was a thorny one and he was harassed by constant attacks. The Royal Air Force in India meanwhile went to the rescue of the British Nationals beleaguered in and around Kabul and in a series of brilliant flights evacuated all.

The most formidable of the new king's adversaries were led by General Nadir Khan, a scion of the old ruling house, with a wide knowledge of the world. Heavy fighting took place. Fortunes varied. Nadir Khan almost gave up his chances as finally lost. But a band of Wazirs from the British side of the border attracted by prospects of loot, joined Nadir and finally seized Kabul in his name and interest. Nadir Khan thus became victor and shortly afterwards, at the wish of the Afghans, Bacha-I-Sagqao was executed with other rebels, and when the year closed Nadir Khan was to all seeming in firm possession of the Kingdom.

He despatched members of his family to the principal Afghan Legations in Europe. A Shinwari rising near the exit from the Khyber Pass took place in February 1930, and was repressed with unexpected success and vigour. There followed a serious rebellion in Kohistan, Bacha-I-Sagqao's country. This also was promptly quelled. And thereafter Nadir Shah ruled without challenge. He devoted himself to the reorganisation of his Army. England was strictly neutral during the successive stages of the revolution, but promised support to Afghanistan to help her maintain internal peace when she had restored it and this promise was fulfilled by the provision of an interest free loan of £200,000 to King Nadir and by the supply of rifles and ammunition to him. He gave ample evidence of his friendliness towards Britain and India. The trade routes were reopened and the new King again took up Amanullah's mantle of reform but in a statesman-like manner which carried the Mullahs along with him.

MURDER OF NADIR SHAH

This ordered march of progress was tragically interrupted by the murder of Nadir Shah on 8 November 1933. The king was attending a football tournament prize-giving when a young man among the gathering stepped forward and fired several revolver shots at him

at close range, killing him instantly. It later appeared that the assassin committed the crime in revenge for the execution of a prominent Afghan who had been caught deeply involved in treasonable activities after he had been mercifully treated for earlier behaviour of the same kind. The assassin's father was stated to have been this man's servant.

The murder was not followed by general or widespread disorder. The members of Nadir Shah's family and his prominent officers of State stood loyally by his heir, his son, Muhammad Zahir. The latter was duly placed on his father's throne and his accession was in due course acknowledged and confirmed throughout the kingdom in the traditional manner.

The new King started his reign with a high reputation for courage and steadiness. He early issued assurances to his people that he would continue the policy of his father in affairs of State. No untoward events have occurred in the years that have since past during which the young King has by his sagacity and good government gradually

strengthened his position on the throne and, by the development of communications and trade, done much to encourage the establishment of settled conditions among his people.

A mutual desire for close relations and particularly economic understanding led in 1938 to exploratory negotiations between India and Afghanistan with a view to seeking some form of trade agreement.

All the great European Powers maintain Embassies or Legations in Kabul, and it must be recorded of the present Afghan Government that in tune with the ideas of their predecessors and in the interest of their continued independence as they see it, they have pursued a policy of balance in their relations with the Powers, but with careful adjustments.

The Governments of India and Pakistan on the one hand and the Government of Afghanistan on the other have decided to exchange ambassadors. The Indian Ambassador in Kabul is Mr. Tara Chand and the Pakistan Ambassador Mr. I. I. Chundrigar, who at the time of writing had not taken charge of his new office.

TIBET

RELATIONS WITH INDIA

In the latter part of the 18th century Warren Hastings succeeded in establishing friendly contacts with the Tashi Lama at Shigatse. But this led to nothing of a permanent nature owing to unfortunate suspicion that the British had encouraged the Nepalese invasion of Tibet in 1792. From then on Tibet remained a closed country, except to the courageous Pundits of the survey of India and a few others such as Manning, until the Younghusband expedition of 1904. In 1873 the Chinese agreed to protect any British Mission which might enter Tibet; but the mere fact that the British accepted Chinese sponsorship in such a matter appears to have aroused Tibetan resentment and necessitated the abandonment of the proposed Mission.

This indication of weakness led to a Tibetan invasion of Sikkim. The Chinese were incapable of exercising any remedial influence and after one year's delay the Tibetans were expelled by force. A treaty and trade regulations were concluded with the Chinese in 1890 to regulate the frontier, but it soon became evident that the Tibetans had no intention of acknowledging such an agreement, and that the Chinese were unable to secure its respect. After some years of frustration Lord Curzon sought to remedy matters by means of direct approach to the Dalai Lama, but all his letters were rejected and returned unopened.

At the same time the Dalai Lama was in direct intercourse with the Tsar of Russia. His emissary was a Siberian named Dorjef, who had established a remarkable ascendancy in the counsels of the Dalai Lama. After a few years' residence at Lhasa, Dorjef went to Russia on a confidential mission. In 1899, at the end of 1900 he returned to Russia at the head of a Tibetan Mission of which the head was officially described in Russia as "the senior Tsanite Khomba attached to the Dalai Lama of Tibet". This Mission arrived at Odessa in October 1900 and was received in

Now we can go on to deal with three frontier regions of India—Tibet in the north and Nepal and Bhutan in the north-east.

Tibet has long held the imagination of the Indian sub-continent. To India she owes the main elements of her religion, Buddhism (first introduced in the seventh century A.D.), and also of her literature—a Tibetan alphabet based on the Dev Nagri Sanskrit character was first compiled at the time of the introduction of Buddhism, and many translations from Pali and Sanskrit manuscripts were made. But Tibet's chief interest to India in the modern world lies in the fact that she is co-terminous with India and Nepal for some 2,000 miles, and that "along this enormous distance her physical nature constitutes a barrier equal or superior to anything that the World can show elsewhere". At present India's North-East Frontier presents no problems similar to that of Pakistan's North-West. In order that this may so continue, it is an Indian interest that Tibet should remain a strong mistress in her own house.

In earlier days, Tibet was a successful military power capable of threatening Indian and Chinese neighbours alike: an inscription of the eighth century A. D. at Lhasa indicates that China paid tribute at that time to Tibet. The introduction of Buddhism apparently softened earlier aggressive militarism. The conversion of Kubla Khan, the first Mongolian Emperor, to Lamaism led to strong cultural connections between the Mongolian Emperors of China and Tibet. It was a Mongolian Prince who, in the sixteenth century A. D., established in the present line of Dalai Lamas. Early in the 18th century, taking advantage of internal dissensions in Tibet between Mongols and Tibetans, the newly established Manchu dynasty adopted an aggressive policy. From that time until the Chinese revolution (1911) the Manchu dynasty maintained officers at Lhasa, although their authority decreased in time to a merely nominal suzerainty, until finally in 1911 the Chinese forces were evicted and permitted safe conduct through India.

audience by the Tsar at Livadia. Dorjief returned to Lhasa to report progress, and in 1901 was at St. Petersburg with a Tibetan Mission where, as bearers of an autograph letter from the Dalai Lama, they were received by the Tsar at Peterhoff. They were escorted home through Central Asia by a Russian force to which several Intelligence Officers were attached. At the time it was rumoured that Dorjief had, on behalf of the Dalai Lama, concluded a treaty with Russia, which virtually placed Tibet under the protectorate of Russia. This rumour was afterwards officially contradicted by the Russian Government.

EXPEDITION OF 1904

In view of these conditions the Government of India proposed in 1903 to despatch a mission, with an armed escort to Lhasa to discuss the outstanding questions with the Tibetan authorities on the spot. To this the Home Government could not assent, but agreed in conjunction with the Chinese Government, to a joint meeting at Khamiab Jong, on the Tibetan side of the frontier. Sir Francis Younghusband was the British representative. But after months of delay it was ascertained that the Tibetans had no intention of committing themselves. It was therefore agreed that the mission, with a strong escort, should move to Gyantse. On the way the Tibetans developed marked hostility, and there was fighting at Tuna, and several sharp encounters in and around Gyantse. It was therefore decided that the mission should advance to Lhasa, and on August 3rd, 1904, Lhasa was reached.

There Sir Francis Younghusband negotiated a convention by which the Tibetans agreed to respect the Chinese Convention of 1890; to open trade marts at Gyantse, Gartok and Yatung; to pay an indemnity of £500,000 (seventy-five lakhs of rupees); the British to remain in occupation of the Chumbi Valley until this indemnity was paid off at the rate of a lakh of rupees a year. In a separate instrument the Tibetans agreed that the British Trade Agent at Gyantse should have the right to proceed to Lhasa to discuss commercial questions, if necessary. Later the amount of indemnity was reduced from seventy-five to twenty-five lakhs of rupees, to be paid in 3 years; the period of occupation of the Chumbi Valley was likewise reduced.

In June, 1906, the British concluded a convention with China which purported to regulate the position in Tibet. Thereunder Great Britain agreed neither to annex Tibetan territory nor to interfere with the internal administration of the country, and China undertook not to permit any other foreign state to do so. The Chinese Government paid the indemnity in 3 years and the Chumbi Valley was evacuated. The only direct result of the Mission was the opening of the three trade marts (Yatung, Gyantse, and Gartok) and the establishment of a Trade Agency at Gyantse.

Chinese Action—The approach of the Younghusband Mission to Lhasa led to the flight of the Dalai Lama to Urga, the sacred Buddhist city in Mongolia, leaving the internal

Government of Tibet in confusion. The 1906 convention explicitly re-affirmed a Chinese suzerainty over Tibet which had in fact become sketchy; and the Chinese, thus strengthened, proceeded to convert Tibet from a loose form of vassalage into a province of China. In 1908 Chao Erh-feng, acting Viceroy in the neighbouring Province of Szechuan, was appointed Resident in Tibet; his ruthlessness and severity, backed by the wild atrocities of the Chinese soldiers exasperated the populace.

The fugitive Dalai Lama had returned by the end of 1909 expecting to resume his temporal and spiritual sovereignty. But it was evident that the Chinese intended to deprive him of all temporal power; and the report that a strong Chinese force was moving on to Lhasa so alarmed the Dalai Lama that he fled from Lhasa, and by the irony of fate, sought refuge in India. He was pursued to the frontier by Chinese troops and took up his abode in Darjeeling, whilst Chinese forces overran Tibet.

TRIPARTITE CONVENTION

The British Government acting on the representations of the Government of India, made strong protests to China against this action. They pointed out that Great Britain, while disclaiming any desire to interfere with the internal administration of Tibet, could not be indifferent to disturbances to the peace of a country which was a neighbour, on intimate terms with other neighbouring States on our frontier, especially with Nepal, and urged that an effective Tibetan Government be maintained. The attitude of the Chinese Government was that no more troops had been sent to Tibet than were necessary for the preservation of order, that China had no intention of converting Tibet into a province, but that being responsible for the good conduct of Tibet, she must be in a position to see that her wishes were respected by the Tibetans. Finally, the Chinese remarked that the Dalai Lama was such an impossible person that they had been compelled again to depose him.

Here the matter might have rested but for the revolution in China. That revolution broke out in Szechuan, and one of the first victims was Chao Erh-feng. Cut off from all support from China, surrounded by a hostile and infuriated populace, the Chinese troops in Tibet were in a hopeless case; they surrendered, and sought escape not through China, but through India, by way of Darjeeling and Calcutta. The Dalai Lama returned to Lhasa, and in the House of Lords, Lord Morley stated the policy of the British Government in relation to these changes. He said the declaration of the President of the Chinese Republic that Tibet came within the sphere of Chinese internal administration and that Tibet was to be regarded as on an equal footing with other provinces of China, was met by a very vigorous protest from the British Government.

In June 1913 the Chinese Government agreed to a tripartite conference between representatives of Tibet, China and Great Britain. The conference met at Simla in 1914, under the presidency of Sir Henry McMahon, and initiated

a convention. *Inter alia* this convention recognised the autonomy of Tibet proper ('Outer Tibet'), and creates a zone ('Inner Tibet') under Chinese authority subject to certain already existing Tibetan rights. The Chinese Government were unable to accept the boundaries between Inner and Outer Tibet laid down in the Convention, and so refrained from ratifying it, though they accepted the terms of the Convention in all other respects; but the two remaining parties accepted it as binding between themselves.

PRACTICAL EQUILIBRIUM

In 1918 Chinese aggression led to strong and successful Tibetan retaliation. At a time of Chinese weakness Great Britain did its utmost to urge moderation on Tibet, and deputed Sir E. Teichman to the scene of hostilities. He succeeded in effecting a truce in September 1918; unfortunately it was not possible to convert this truce into anything of the nature of a permanent settlement owing to the growing predominance at that time of the Chinese militarist element under Japanese influence.

In the period of uncertainty following the truce of September 1918, the Dalai Lama sent a pressing invitation to Sir Charles Bell, who had just resigned the post of Political Officer in Sikkim, to visit Lhasa with a view to assisting in a settlement between Tibet and China. While a refugee in India from Chinese aggression, the Dalai Lama had established warm friendship with Sir Charles Bell. After some hesitation, the Government of India permitted Sir Charles Bell to accept this invitation. He reached Lhasa in November 1920 and stayed there a year.

The British Government and the Government of India did not succeed in effecting a permanent settlement between China and Tibet,—the chaotic condition of the former country at that time and the precarious condition of the Government in addition to the preoccupations of the Washington Conference impeded their efforts; these efforts did, however, succeed in bringing about a state of practical equilibrium between the two protagonists. But Bell's Lhasa visit will be mainly memorable for the permanent contribution he made to the good relations between Tibet and her southern neighbour; this visit also furnished the foundation for Bell's three valuable studies, "Tibet, Past and Present", "The People of Tibet", and "The Religion of Tibet".

In 1922 in response to the repeated request of the Tibetan Government the Government of India arranged for the construction of telegraphic communication with Lhasa.

During the years following the Washington Conference, Chinese disunity made any permanent settlement between Tibet and China impossible, in spite of the wishes of the Tibetan Government for such settlement.

During the years 1931 to 1933, local disputes and the aggressiveness of local Chinese war-lords led to a period of confused fighting. In the southern sector civil war in Szechuan led to an armistice in November 1932; by February 1933, on the northern sector (owing, it appears, to shortage of military supplies) the Sinkiang war-lord was ready for a truce.

In 1933 the great 13th Dalai Lama died. Since then a Regent has presided over the destinies of Tibet. A new Dalai Lama—now aged 12—was discovered and installed with traditional ceremonial in September 1939. The Tibetan Government admitted to Lhasa a Chinese Mission of condolence on the death of the 13th Dalai Lama and a complimentary Mission on the occasion of the installation of the 14th Dalai Lama.

RELATIONS WITH INDIA

The Second World War had no direct effect on Tibet. Tibet's main export, wool, increased in value. The Tibetan Government agreed to the transport through Tibet of supplies of a non-military nature required for China, and this traffic brought and still brings large profits to those engaged in it.

Relations between the Government of Tibet and Nepal are regulated by a treaty signed in 1856 since which date Nepal has maintained a representative at Lhasa, at present Major Kaisher Bahadur.

The Republic of China has had a representative at Lhasa (at present C. H. Chen), since 1939.

Indian relations with Tibet were conducted through the agency of the Political Officer in Sikkim, with the assistance of Trade Agents at Gyantse, Yatung and Gartok till 1936 when direct contacts were established. Since Sir Charles Bell's visit in 1920-21, the Political Officer in Sikkim has visited Lhasa on several occasions at the invitation of the Tibetan Government, viz., 1924 (Colonel F. M. Bailey); 1930 and 1932 (Colonel J. L. R. Weir); 1933 and 1935 (F. M. Williamson); 1936, 1940 (Installation of the 14th Dalai Lama) and 1944 (Sir Basil Gould); 1945 and 1946 (A. J. Hopkinson).

In 1936 Sir Basil Gould left behind one of his colleagues. Since that date a representative of the Government of India has maintained direct contact with the Government of Tibet at Lhasa.

In 1946 the Tibetan Government deputed a Good-will Mission from Lhasa bearing victory congratulations. The Mission, numbering 8 officials, first proceeded to New Delhi where they formally presented letters and gifts from the Tibetan Government to His Majesty the King Emperor, His Excellency the Viceroy and the President of the United States. They were formally received by His Excellency the Viceroy and the American Commissioner in India, the Hon'ble George Merrell, and attended victory celebrations. Thereafter they did a short tour to places of interest in the Indian sub-continent. On the completion of this tour they proceeded to China by air where they made similar formal presentations to His Excellency Chiang-Kai-Shek and were formally received by him.

For the year ending 30th June, 1945 Tibetan imports via Sikkim were valued at approximately Rs. 80 lakhs and exports at approximately Rs. 35 lakhs. The main item under the former head was cotton piecegoods and Indian tea. The main export item was wool.

Political Officer in Sikkim: A. J. Hopkinson, C.I.E., I.C.S.

THE NORTH-EASTERN FRONTIER

The position on the northern frontier has been considered as if the Indian frontier were contiguous with that of Tibet. This is not so. The territories on this frontier are actually the independent Kingdom of Nepal, the Sikkim State and Bhutan. From Chitral to Gilgit, now the northernmost posts of the Indian Government to Assam, with the exception of the small wedge between Kashmir and Nepal, where the Indian district of Kumaon is thrust right up to the confines of Tibet, for a distance of nearly fifteen hundred miles, there is a narrow strip of territory between India and the true frontier.

The first of these frontier States is Kashmir which is almost the only important State which has acceded to India with frontier responsibilities. And these responsibilities the State worthily discharged through the agency of its efficient State troops composed mainly of Rajput Dogras, who make excellent fighting material. One of the most important trade routes with Tibet passes through Kashmir—that through Ladakh.

Then comes the long narrow strip of land called Nepal. This Gurkha Kingdom stands in special relation with the Indian Government. It is the main Indian outpost against Tibet or against foreign aggression through Tibet.

Beyond Nepal are Bhutan and Sikkim (q. v.) whose rulers are Mongolian by extraction and Buddhist by religion. In view of Chinese aggressions in Tibet, the Government of India in 1910 strengthened their relations with Bhutan by increasing their subsidy from fifty thousand to a lakh of rupees a year, and by taking a guarantee in return that Bhutan would be guided by them in its foreign relations. Afterwards

China was officially notified that the rights and interests of Sikkim and Bhutan would be protected.

Assam and Burma.—There now remain the Assam border tribes—the Monbas, Lamai (Mijis), Nisu (Daflas), Abors and others—living between the administered border of Assam and the external frontier of India, in the region defined by agreement with Tibet in 1914 by Sir Henry McMahon and known as the McMahon line. Excepting the Abors, none of these tribes has, given serious trouble in recent years; but in 1911 the murder of Mr. Williamson and Dr. Gregorson by the Minyong Abors made necessary an expedition to the Dihang valley of the Abor country on the N.-E. Frontier. A force of 2,500 and about 400 military police was employed for six months in subduing the tribe. After two or three small actions the murderers were given up. At the same time friendly missions were sent to the Mishmi and Nisu countries. The border region is some of the most difficult country in the world and the maintenance of close contact with the tribes has always been far from easy.

In the hills between Assam and Burma various Naga tribes predominate from Manipur northwards, and tribes of the Chin-Lushai stock from Manipur southwards. Administration has not yet been extended to all the Naga tribes and cases of head-hunting still occur in the more remote areas.

In 1947, the Government of India approved a Five Year Development Plan for the tribal areas of the N.-E. Frontier, a plan which contemplates the building of roads, schools and hospitals. Work on the plan commenced in the winter of 1947.

NEPAL

The small hilly independent Kingdom of Nepal is a narrow tract of country extending for about 520 miles along the southern slope of the central axis of the Himalayas. It has an area of about 56,000 square miles, with a population of about 5,680,000, chiefly Hindu. The greater part of the country is mountainous, the lower slopes alone being cultivated. Above these is a rugged broken wall of rock leading up to the chain of snow-clad peaks which culminate in Mount Everest (29,002 feet) and others of slightly less altitude.

The country before the Gurkha occupation, was split up into several small kingdoms under Newar kings. The Gurkhas under Prithi Narayan Shah overran and conquered the different kingdoms of Patan, Kathmandu, and Bhatgaon, and other places during the latter half of the 18th century and since then have been rulers of the whole of Nepal. In 1846 the head of the Rana family, Maharaja Jung Bahadur Rana, obtained from the sovereign the perpetual right to the office of Prime Minister of Nepal, a right which is still enjoyed by the descendants of the Rana family. This right was conceded in a signed document called

Panipatra. In 1850 Jung Bahadur paid a visit to England and was thus the first Hindu Chief to leave India and to become acquainted with western conditions and outlook.

The rule of one of the Prime Ministers Maharaja Chander Shamsher Jang Bahadur Rana deserves special mention. It was he who placed Nepal on the path of progress. During his long rule of 32 years he introduced reforms in all departments of administration. He abolished slavery in spite of violent opposition. He prohibited Sati. He was responsible for the spread of education; he opened a college for higher education at Kathmandu and strove hard to bring light and knowledge to the people of Nepal. He reformed the method of dispensing justice and also the judiciary. In short Nepal owes much to this courageous and wise administrator.

After his death he was followed by his brothers Maharajas Bhim Shamsher Jang Bahadur Rana and Juddha Shamsher Jang Bahadur Rana successively as Prime Ministers. Both of them carried on steadily the work of reform inaugurated by Maharaja Chander Shamsher,

Administration.—The Government of the country has generally been in the hands of the Prime Minister of the day. Since the time of Jung Bahadur this system of Government has been clearly laid down and defined. The sovereign or Maharajadhiraja, as he is called, is but a dignified figure-head, whose position can best be likened to that of the Emperor of Japan during the Shogunate. The real ruler of the country is the Prime Minister who, while ruling the country, coupled with his official rank the title of Maharaja. Next to him comes the Commander-in-Chief who ordinarily succeeds to the office of Prime Minister.

The present king of Nepal is His Majesty Maharajadhiraj Tribhuvana Bir Bikram Jung Bahadur Shah Bahadur Sham Shere Jung Deva, and the Prime Minister Padma Sham Shere Jung Bahadur Rana.

Economy.—Rice, wheat and maize form the chief crops in the low-lands and in some parts of the hills too. Mineral wealth is supposed to exist but has not as yet been either prospected or developed.

There is a bank and a jute and cotton mill. The starting of sugar and woollen industry is under consideration. Communication in the hills is necessarily primitive owing to the difficult nature of the country but improvements are being made from time to time. Since 1920 the vehicular traffic from Amlekhganj to Bhimphedi, the base of a steep ridge in the main route to the capital of the country from India, goes over a well-maintained permanent road linking up with the 18 mile-long ropeway which was opened in 1927. A motor trolley service which was installed in 1934 joins up the ropeway terminus with the customs house for transport of goods traffic. The telephone from Kathmandu to Birganj, which has been extended to Raxaul, now forms part of the 300 miles main line extending from Kathmandu to Biratnagar and Dhakunta in the easternmost part of the Nepal terai.

The revenue of the country is about two crores of rupees per annum.

The standing army is estimated at 45,000. The state is of considerable archaeological interest and many of the sites connected with scenes of Buddha's life have been identified in it by inscriptions on pillars.

The relations of Nepal with the Government of India are regulated by the treaty of 1816, which brought to an end the Nepal War, and by subsequent agreements. By virtue of the same treaty either Government maintained a representative at the Court of the other while Nepal's treaty relations with Tibet allow her to station a representative at Lhasa. Ever since

the conclusion of the treaty of 1816, the friendly relations with the British and Indian Governments have been steadily maintained. During the first World War Nepal gave valuable assistance to the Allies in recognition of which she received an unconditional annual present of rupees ten lakhs to be paid in perpetuity from Indian revenues. To strengthen further the bonds of friendship that has subsisted so long between the two countries, a new treaty of friendship was concluded between the Government of Nepal and Great Britain on the 21st December 1923.

When the Second World War broke out, Nepal again came forward with an offer of help and in the early part of 1940 sent 8 Battalions of her regular army to the Indian sub-continent for the defence of its frontiers against foreign aggression. Three Battalions of these took an active part in checking the incursions of the Japanese and driving them back deep into Burma while the two Auxiliary Pioneer Battalions which were sent later played no less important a part in the construction of the Leda road. In recognition of this help the annual grant referred to above was enhanced to twenty lacs of rupees and payment of the capitalised value of fifty per cent of it was also made.

After Transfer of Power.—With the transfer of power which took place in the sub-continent on the 15th August 1947, it was decided to exchange representatives at the highest level between the Governments of India and Nepal. Sardar Surjit Singh Majithia was appointed as Ambassador for India in Nepal and Commanding General Singha Sham Shere Jung Bahadur Rana as the Nepalese Ambassador to India.

INDIAN EMBASSY IN NEPAL

H. M.'s Ambassador for India, H. E. Wing Commander Sardar Surjit Singh Majithia.

First Secretary, Mr. S. K. Banerji.
Superintendent & Treasury Officer, Sri P. S. Krishnaswamy.

NEPALESE EMBASSY IN INDIA

Nepalese Ambassador in India, H. E. Commanding General Sir Singha Shumshere Jung Bahadur Rana, K.B.E.

Counsellor, Lt.-Col. G. S. Thapa.

First Secretary, Mr. P. N. Pradhan.

Military Attache, Captain S. B. Basnyat.

The Nepalese Legation in London and the British Legation in Nepal have also been raised to Embassies. Commanding General Kaiser Shum shere Jung Bahadur Rana is the first Nepalese Ambassador at the Court of St. James, and Lt.-Col. G. A. Falconer, H.M.'s Minister in Nepal is the first British Ambassador in Nepal.

BHUTAN

Bhutan (area 48,000 sq. miles) is an independent Himalayan State, under the protectorate, in respect of foreign relations, of the Government of India, possessing a fertile soil and temperate climate. The population, computed to number about 300,000, are sturdy folk of Tibetan affinities; in recent times there has been a considerable Nepalese immigration in the foot-hill region,

Though politically independent of Tibet Bhutan is susceptible to Tibetan influence; for the Bhutanees share the religion and culture of Tibet, and look to the Dalai Lama as their spiritual head. In former times, China exchanged presents with Bhutan, but did not establish effective suzerainty.

For some 250 miles Bhutan dominates a tract of land, singularly rich and fertile, situated

partly in Bengal and partly in Assam, known as the 'Eighteen Duars' ('Duar' being a "door" or "pass"). This area and what is now the State of Cooch Behar formed the traditional happy hunting-ground of Bhutanese free-booters. Indeed it was the forcible abduction of the Cooch Behar Raja and his brother that led indirectly to the first intercourse between 'John Company' and Bhutan. This Bhutanese aggression was followed by a small successful expedition under a Company Officer. This led the then Tashi Lama (who was also Regent of Tibet) to address a friendly letter to Warren Hastings, interceding on behalf of the erring Bhutanese. Warren Hastings immediately responded by deputing Bogle's 'Good-will Mission'. Bogle travelled via Bhutan, and *en route* established cordial relations there (1774). These continued till 1792. In that year Nepal invaded Tibet. The Chinese suspected that the Bengal authorities had engineered this invasion, and by their influence induced the Bhutanese to shut the door.

The suspicion and hostility thus engendered was accentuated, when the Company, extending its influence to Assam, on the expulsion of the Burmese (1825), became heir to the uneasy relations existing between the Assamese and Bhutan: conditions prevailed comparable with those in the Derajat on the Waziristan border at their worst. Between 1837 and 1864, thirty cases of plundering occurred, and at least 25 Indians were known to have been carried off into slavery. Meanwhile 50 outrages were committed in Cooch Behar territory (one involving over Rs. 20,000 worth property), and 69 residents of the State were kidnapped.

The upheaval of 1857 served to postpone settlement. An envoy (Mr. A. Eden) sent in 1863, charged with proposals of a conciliatory character, but instructed to demand the return of

all captives and plundered property and security for the future peace of the frontier, was insulted in open Darbar and put under duress. The Bhutan War of 1864 led to the conclusion of the Treaty of Sinchula in January, 1866. Bhutan ceded in perpetuity the whole of the 18 Duars and in return received a subsidy of Rs. 50,000 a year.

From that date relations with Bhutan were excellent, and the bonds between Bhutan and India grew closer, until, in 1910, in return for an increase in the subsidy to Rs. 50,000 paid under the Sinchula Treaty to Rs. 1,00,000, that treaty was amended to include a provision that Bhutan's foreign relations should be controlled by the British (now Indian) Government at the same time undertaking to exercise no interference in the internal administration of Bhutan. Under another agreement the Bhutan Government undertook to remove all liquor shops from within a 10-mile zone of the Indian District borders in return for an annual compensation of Rs. 1,00,000.

In 1907 the leading chief of Bhutan, Tongsa Penlop Ugen Wangchuk was elected by the unanimous votes of Bhutan Chiefs and a number of monks as hereditary Maharaja of Bhutan. He was succeeded in 1926 by his eldest son, now his Highness Maharaja Sir Jigme Wangchuk, K.O.S.I., K.C.I.E.

Stand-Still Agreement—On the transfer of power in India in August 1947, the Bhutan Government entered into a stand-still arrangement with the Government of India, pending the conclusion of negotiations.

Bhutan representatives attended the Delhi Inter-Asian Relations Conference in Spring 1947. The Political Officer in Sikkim visited Bhutan and met His Highness the Maharaja in September 1947.

RAILWAYS TO THE SUB-CONTINENT

The prospect of linking Europe and Asia by a railway running eastwards through Asia Minor has fascinated men's minds for generations. The plans suggested have, owing to the British connection with the Indian sub-continent, always lain in the direction of lines approaching Pakistan. More than 50 years ago a Select Committee of the British House of Commons sat for two years to consider the question of a Euphrates Valley railway. The Shah of Persia applied to the British Foreign Office for the investment of British capital in Persian railway construction many years before the end of the nineteenth century. A proposal was put forward in 1895 for a line of 1,000 miles from Cairo and Port Said to Koweit, at the head of the Persian Gulf. While these projects were in the air, German enterprise stepped in and made a small beginning by constructing the Anatolian railway system. Its lines start from Scutari, on the southern shore of the Bosphorus, opposite Constantinople, and serve the extreme western end of Asia Minor. And upon this foundation was based the Turkish concession to Germans to build the Baghdad Railway.

Meanwhile, Russia was pushing her railway from various directions into the Central Asian territory running along the northern frontiers of Persia and Afghanistan to the borders of Chinese Turkestan. The construction of a Trans-Persian railway, connecting the Indian sub-continent, across Persia, with the Russian lines between the Black Sea and the Caspian Sea came to the forefront after the conclusion of the historic Anglo-Russian agreement regarding Persia in the first decade of the present century.

The Germans pushed forward their Baghdad railway project with a calculating shrewdness arising from their estimate of the value it would possess in their aim to overthrow the British Empire. The outbreak of the First World War and the success of the Germans in inveigling Turkey into it saw the final stages of the construction of the railway pressed forward with passionate energy. Thus, before the overthrow of the Turks and Germans in Asia Minor and of the Germans in France the railway was completed and was in use from Scutari across Anatolia, over the Taurus Mountains to Aleppo and thence eastward across the

Euphrates to a point between Nisbin and Mosul. The Germans had also by that time constructed a line to Baghdad at the eastern end of the route, northwards from Baghdad to a point a considerable distance beyond Samara.

The war compelled the British to undertake considerable railway development northward from Basra, the port at the mouth of the Shat-el-Arab, the broad stream in which the Tigris and Euphrates, after their junction, flow into the head of the Persian Gulf. The system consists of a metre-gauge line from Basra via Nasiriah, on the Euphrates, thence northwards to Baghdad, the line passing a considerable distance westward to Kut-I-Amara, of historic fame. From Baghdad the line runs eastward approximately to the foot of the pass through which the Persian road crosses the frontier of that country. A line branches off in the neighbourhood of Kifri in the direction of Mosul. It has for some time been open as far as Kirkuk, 200 miles northward of Baghdad and 112 miles southward of Mosul.

LINKS THROUGH PERSIA

Similarly, the Taurus railway has long been open eastward of Aleppo as far as Tel Kocheh, on the Syrian frontier, a few hours' motor run, north-west from Mosul. Through passenger services between Iraq and Istanbul are run, a road motor service is linking the railway termini at Kirkuk and Tel Kocheh. The gap in the railway has now been closed, and through communication was established at the end of 1940. A line also runs westward from Baghdad to Feluja, on the Euphrates.

The Trans-Persian line to join the Russian Caucasian system and the Pakistan railways first assumed proportions of practical importance in the winter of 1911. Both the Russian and the Pakistan railway systems were by then well developed up to the points likely to be the termini of a Trans-Persian line. The Russian

system reached Julfa, on the Russo-Persian frontier in the Caucasus. During the First World War this line was carried thence southward into the region east and south-east of Lake Urumia. The Pakistan railway system, on the borderland of Pakistan and Persia, was similarly much extended and improved during the war. A new agreement which was negotiated between England and Persia specially provided for British assistance in the development of Persian natural resources and particularly for the extension and improvement of Persian roads suitable for motor traffic, but the agreement came to naught.

A railway connection between the Pakistan and the Russian systems again assumed considerable importance after the German attack on Russia and the alignment of Britain, India and Russia along with other democracies like China and U.S.A. against Germany and Japan. With the whole of the European west coast under German control or domination and the eastern shores of Siberia rendered unapproachable by the Japanese, the only route which British and Indian supplies to Soviet Russia could take was via Iran. The Quetta-Nushki line which had been extended during the First Great War upto Duzdap (or Zahidan) in Persia had been put out of use afterwards beyond Nok-kundi. This was again set in order.

There also remains the possibility of linking the Russian and Pakistan railway systems by way of Afghanistan. The suggestion has often been made that the Russian line from Merv to Herat, on the northern frontier of Afghanistan should be linked to the Pakistan line which, proceeds from Quetta to the Afghan border at Chaman. The completion of a broad-gauge line extending the Pakistan railway system through the Khyber Pass to Landi Khana, at its western extremity, opens a prospect of further possible rail connections with Afghanistan.

French Possessions

THE French possessions in India comprise five Settlements, with certain dependent lodges, or plots. They aggregate 203 square miles, and have a total population of 362,045. The first French expedition into Indian waters, with a view to opening up commercial relations, was attempted in 1603. It was undertaken by private merchants at Rouen, but it failed, as also did several similar attempts which followed.

In 1642 Cardinal Richelieu founded the first *Campagne d'Orient*, but its efforts met with no success. Colbert reconstituted the Company on a wider basis in 1664, granting exemption from taxes and a monopoly of the Indian trade for fifty years. After having twice attempted, without success, to establish itself in Madagascar, Colbert's Company again took up the idea of direct trade with India and its Resident, Caron, founded in 1668 the Comptoir, or agency, at Surat. But on finding that city unsuitable for a head establishment he seized the harbour of Trincomalee in Ceylon from the Dutch. The Dutch, however, speedily retook Trincomalee; and Caron, passing over to the Coromandel Coast, in 1672, seized San Thome, a Portuguese town adjoining Madras, which had for twelve years been in the possession of Holland. He was however, compelled to restore it to the Dutch in 1674.

The ruin of the Company seemed impending, but one of its agents, the celebrated Francois Martin, quickly restored its fortunes. Rallying under him a handful of sixty Frenchmen, saved out of the wreck of the settlements at Trincomalee and San Thome, he took up his abode at Pondicherry, then a small village, which he purchased in 1683 from the Raja of Gingee. He built fortifications, and trade began to spring up; but he was unable to hold the town against the Dutch, who wrested it from him in 1693, and held it until it was restored to the French by the peace of Ryswick, in 1697. Pondicherry became French in this year and has ever since remained, the most important of the French Settlements in India. Its foundation was contemporaneous with that of Calcutta.

Chandernagore, in Lower Bengal, had been acquired by the French Company in 1688, by grant from the Delhi Emperor; Mahé, on the Malabar Coast, was obtained in 1725-26, under the Government of M. Lenoir; Karikal, on the Coromandel Coast, under that of M. Dumas, in 1739. Yanaon, on the coast of the Northern Circars, was taken possession of in 1760, and formally ceded to the French two years later.

REFORMS

The French Government have announced that the administration of the French Settlements in India is going to be radically altered, according to the wishes of the people and in consonance with the changing times.

A people's convention was held recently by the residents of French India when it was decided that the French Settlements should merge with British India like most of the Indian States. A resolution to this effect was passed and forwarded to the Government of French India. At present, the French Ambassador in India is having political talks with Pandit Nehru, Prime Minister of India, regarding the political future of the French Settlements in India. It is agreed that the future of the French possessions will be decided by means of a plebiscite.

In the meantime the French Government has made two gestures. It has returned to India all French *loges* as an earnest of France's will to settle all outstanding problems in a friendly manner. It may be explained that these *loges* are scattered plots of land where formerly there stood French factories. They are in Jugdea, Cossimbazar, Bernampore, Patna, Dacca, Masulipatam, Calicut and Surat.

The second gesture was the recasting of the status of the five French Indian towns. The new reforms make French India five autonomous units with a united federal lien wholly or partly remaining in the French Union and partly in the Indian Union particularly on the economic plane.

According to the proposed constitution French India administration would be confined to a council of six members, three of whom at least will be elected. This Council in reality will constitute a Cabinet with the Governor as President who will be without any special overriding powers. The Governor's designation will be changed into Commissioner of the Republic.

PEOPLE AND TRADE

There were in 1937, 67 primary schools and 3 colleges, all maintained by the Government, with 353 teachers and 13,602 pupils. Local revenue and expenditure (budget 1943) are Rs. 3,800,300.

The principal crops are paddy, groundnut, and ragi. There are at Pondicherry 3 cotton mills, and at Chandernagore 1 jute mill. The cotton mills have in all 1,968 looms and 85,976 spindles, employing 6,900 persons. There are also at work one oil factory and a few oil presses for groundnuts and one ice factory.

The chief exports from Pondicherry are oil-seeds which are sent out from the ports of Pondicherry and Karikal. In 1940-41 (for the year ending 31st March 1941) the imports amounted to Rs. 4,583,495 and the exports to Rs. 6,714,951. In 1940, 122 vessels entered and cleared the total tonnage being 240,957.

Before the war Pondicherry was served by French steamers, sailing monthly between France and Indo-China via Colombo, Madras and

Singapore and also fortnightly by the British India Steam Navigation Co. steamers which plied between East Coast Ports and the Straits Settlements. The figures contained in this paragraph are the latest available and are corrected up to March 1941.

On the 15th February 1941 a Customs Union with British India came into force. As a result, all goods exported from or imported into the Ports of Pondicherry and Karikal are liable to the same duties as are levied at other British Indian ports.

PONDICHERRY

Pondicherry is the chief of the French Settlements in the sub-continent and its capital is the headquarters of the Governor. It is situated on the Coromandel Coast, 105 miles from Madras by road and 122 by the Villupuram-Pondicherry branch of the South Indian Railway. The area of the Settlement is 115 square miles and its population 222,572.

The Settlement comprises a number of isolated pieces of territory which are cut off from the main part and surrounded by the British District of South Arcot, except where they border on the sea.

At Pondicherry there is a Consul General for India.

The town is compact, and is divided by a canal into two parts, the *Ville blanche* and the *Ville noire*. The *Ville blanche* has a European

appearance, the streets being laid at right angles to one another, and the houses being constructed with courtyards and embellished with green venetians. All the cross streets lead down to the shore, where a wide promenade facing the sea is again different from anything of its kind in India or Pakistan. In the middle is a screw-pile pier, which serves, when ships touch at the port, as a point for the landing of cargo, and on holidays as a general promenade for the population. There is no regular harbour at Pondicherry; ships lie at a distance of about a mile from the shore, and communication with them is conducted by the usual *masula* boats of this coast. Facing the shore end of the pier is a statue of the great Duplex, to whom the place and the French Empire owed so much. The population of Pondicherry town is 59,835.

CHANDERNAGORE

Chandernagore is situated on the bank of the Hooghly, a short distance below Chinsura. The population (according to 1943 census) was 44,786. The town was permanently occupied by the French in 1688, though previously they were

in temporary possession of it at a date variously given as 1672 and 1676.

All the former grandeur of Chandernagore has disappeared, and at present it is little more than a quiet suburban town with little external trade.

KARIKAL

Karikal lies on the Coromandel Coast between the Tanjore District of Madras and the Bay of Bengal. The settlement is divided into six communes, containing 110 villages in all, and covering an area of 53 square miles. It is governed by an Administrator subordinate to the Governor at Pondicherry.

The population has in recent years rapidly decreased. In 1883 it was 98,055; in 1891, 75,526; in 1901, 54,003; in 1923, 57,028; in 1924, 56,922; in 1938, 60,447 and in 1941, 60,555. But in 1948 it rose once again to 70,541; but the density is still very high, being 1,068 persons per square mile. Kumbakonam is the only taluk in Tanjore District which has a higher density.

Each of the six communes—namely, Karikal, La Grande Aldee, Nedungadu, Cot-Kery, Neravy and Tirunelveli—possesses a mayor and council. The members are all elected by

universal suffrage but in the municipality of Karikal half the number of seats are reserved for Europeans or their descendants.

The country is very fertile, being irrigated by seven branches of the Cauvery, besides many smaller channels.

The capital of the settlement is situated on the north bank of the river Arasalar, about 14 miles from its mouth. It has a brisk trade in rice with Ceylon, and to a less extent with the Straits Settlements. It has no trade with France, and very little with other French colonies. The port is merely an open roadstead, provided with a light-house 142 feet high, the light having a range of from 8 to 10 miles. In 1899 Karikal was connected with Peralam on the Tanjore District Board Railway. Karikal finally came into French possession at the European settlement after 1815. The population of Karikal town is 23,008.

French Possessions

THE French possessions in India comprise five Settlements, with certain dependent lodges, or plots. They aggregate 203 square miles, and have a total population of 362,045. The first French expedition into Indian waters, with a view to opening up commercial relations, was attempted in 1603. It was undertaken by private merchants at Rouen, but it failed, as also did several similar attempts which followed.

In 1642 Cardinal Richelieu founded the first *Campagne d'Orient*, but its efforts met with no success. Colbert reconstituted the Company on a wider basis in 1664, granting exemption from taxes and a monopoly of the Indian trade for fifty years. After having twice attempted, without success, to establish itself in Madagascar, Colbert's Company again took up the idea of direct trade with India and its Resident, Caron, founded in 1668 the *Comptoir*, or agency, at Surat. But on finding that city unsuited for a head establishment he seized the harbour of Trincomalee in Ceylon from the Dutch. The Dutch, however, speedily retook Trincomalee; and Caron, passing over to the Coromandel Coast, in 1672, seized San Thome, a Portuguese town adjoining Madras, which had for twelve years been in the possession of Holland. He was however, compelled to restore it to the Dutch in 1674.

The ruin of the Company seemed impending, but one of its agents, the celebrated Francois Martin, quickly restored its fortunes. Rallying under him a handful of sixty Frenchmen, saved out of the wreck of the settlements at Trincomalee and San Thome, he took up his abode at Pondicherry, then a small village, which he purchased in 1683 from the Raja of Gingee. He built fortifications, and trade began to spring up; but he was unable to hold the town against the Dutch, who wrested it from him in 1693, and held it until it was restored to the French by the peace of Ryswick, in 1697. Pondicherry became French in this year and has ever since remained, the most important of the French Settlements in India. Its foundation was contemporaneous with that of Calcutta.

Chandernagore, in Lower Bengal, had been acquired by the French Company in 1688, by grant from the Delhi Emperor; Mahé, on the Malabar Coast, was obtained in 1725-26, under the Government of M. Lenoir; Karikal, on the Coromandel Coast, under that of M. Dumas, in 1739. Yanaon, on the coast of the Northern Circars, was taken possession of in 1750, and formally ceded to the French two years later.

REFORMS

The French Government have announced that the administration of the French Settlements in India is going to be radically altered, according to the wishes of the people and in consonance with the changing times.

A people's convention was held recently by the residents of French India when it was decided that the French Settlements should merge with British India like most of the Indian States. A resolution to this effect was passed and forwarded to the Government of French India. At present, the French Ambassador in India is having political talks with Pandit Nehru, Prime Minister of India, regarding the political future of the French Settlements in India. It is agreed that the future of the French possessions will be decided by means of a plebiscite.

In the meantime the French Government has made two gestures. It has returned to India all French *loges* as an earnest of France's will to settle all outstanding problems in a friendly manner. It may be explained that these *loges* are scattered plots of land where formerly there stood French factories. They are in Jugdea, Cossimbazar, Berhampore, Patna, Dacca, Masulipatam, Calicut and Surat.

The second gesture was the recasting of the status of the five French Indian towns. The new reforms make French India five autonomous units with a united federal lien wholly or partly remaining in the French Union and partly in the Indian Union particularly on the economic plane.

According to the proposed constitution French India administration would be confined to a council of six members, three of whom at least will be elected. This Council in reality will constitute a Cabinet with the Governor as President who will be without any special overriding powers. The Governor's designation will be changed into Commissioner of the Republic.

PEOPLE AND TRADE

There were in 1937, 67 primary schools and 3 colleges, all maintained by the Government, with 353 teachers and 13,602 pupils. Local revenue and expenditure (budget 1943) are Rs. 3,800,300.

The principal crops are paddy, groundnut, and ragi. There are at Pondicherry 3 cotton mills, and at Chandernagore 1 jute mill. The cotton mills have in all 1,968 looms and 85,976 spindles, employing 6,900 persons. There are also at work one oil factory and a few oil presses for groundnuts and one ice factory.

The chief exports from Pondicherry are oil-seeds which are sent out from the ports of Pondicherry and Karikal. In 1940-41 (for the year ending 31st March 1941) the imports amounted to Rs. 4,583,495 and the exports to Rs. 6,714,951. In 1940, 122 vessels entered and cleared the total tonnage being 240,957.

Before the war Pondicherry was served by French steamers, sailing monthly between France and Indo-China via Colombo, Madras and

Chandernagore and also fortnightly by the British India Steam Navigation Co. steamers which led between East Coast Ports and the Straits Settlements. The figures contained in this paragraph are the latest available and are corrected up to March 1941.

On the 15th February 1941 a Customs Union with British India came into force. As a result, all goods exported from or imported into the Ports of Pondicherry and Karikal are liable to the same duties as are levied at other British Indian ports.

PONDICHERRY

Pondicherry is the chief of the French Settlements in the sub-continent and its capital is the headquarters of the Governor. It is situated on the Coromandel Coast, 105 miles from Madras by road and 122 by the Villupuram-Pondicherry branch of the South Indian Railway. The area of the Settlement is 115 square miles and its population 222,572.

The Settlement comprises a number of isolated pieces of territory which are cut off from the main part and surrounded by the British District of South Arcot, except where they border on the sea.

At Pondicherry there is a Consul General for India.

The town is compact, and is divided by a canal into two parts, the *Ville blanche* and the *Ville noire*. The *Ville blanche* has a European

appearance, the streets being laid at right angles to one another, and the houses being constructed with courtyards and embellished with green venetians. All the cross streets lead down to the shore, where a wide promenade facing the sea is again different from anything of its kind in India or Pakistan. In the middle is a screw-pile pier, which serves, when ships touch at the port, as a point for the landing of cargo, and on holidays as a general promenade for the population. There is no regular harbour at Pondicherry; ships lie at a distance of about a mile from the shore, and communication with them is conducted by the usual *masula* boats of this coast. Facing the shore end of the pier is a statue of the great Duplex, to whom the place and the French Empire owed so much. The population of Pondicherry town is 59,835.

CHANDERNAGORE

Chandernagore is situated on the bank of the Ganges, a short distance below Chinsura. The population (according to 1943 census) was 44,786. The town was permanently occupied by the French in 1688, though previously they were

in temporary possession of it at a date variously given as 1672 and 1676.

All the former grandeur of Chandernagore has disappeared, and at present it is little more than a quiet suburban town with little external trade.

KARIKAL

Karikal lies on the Coromandel Coast between the Tanjore District of Madras and the Bay of Bengal. The settlement is divided into six communes, containing 110 villages in all, and covering an area of 53 square miles. It is governed by an Administrator subordinate to the Governor at Pondicherry.

The population has in recent years rapidly increased. In 1883 it was 93,055; in 1891, 5,526; in 1901, 54,003; in 1923, 67,023; in 1924, 56,922; in 1936, 60,447 and in 1941, 65,555. But in 1943 it rose once again to 95,411; but the density is still very high, being 1,068 persons per square mile. Kumbakonam is the only taluk in Tanjore District which has a higher density.

Each of the six communes—namely, Karikal, Grande Aldee, Nedungadu, Cot-Kery, Neravy and Tirunelveli—possesses a mayor and council. The members are all elected by

universal suffrage but in the municipality of Karikal half the number of seats are reserved for Europeans or their descendants.

The country is very fertile, being irrigated by seven branches of the Cauvery, besides many smaller channels.

The capital of the settlement is situated on the north bank of the river Arasalar, about 14 miles from its mouth. It has a brisk trade in rice with Ceylon, and to a less extent with the Straits Settlements. It has no trade with France, and very little with other French colonies. The port is merely an open roadstead, provided with a light-house 142 feet high, the light having a range of from 8 to 10 miles. In 1899 Karikal was connected with Peralam on the Tanjore District Board Railway. Karikal finally came into French possession at the European settlement after 1815. The population of Karikal town is 23,008.

Portuguese Possessions

PORTUGAL and France both hold small territories in the Indian sub-continent.

The Portuguese possessions all of which are situated within the limits of Bombay Province, consist of Goa on the Arabian Sea coast; the territory of Daman with the small territory called Pragana-Nagar-Avely on the Gujarat

coast, at the entrance to the Gulf of Cambay; and the little island of Diu with two places called Gogola and Simbor, on the southern extremity of the Kathiawar Peninsula. All these three territories constitute what is called by the Portuguese *Estado da Índia Portuguesa*. Portuguese India has an area of 3,983 square kilometers.

GOA

Goa, derived from Govein or Gova, forms a compact block of territory surrounded by Indian districts and the sea. Savantwadi State lies to the north of it, the Arabian Sea to the west and North Kanara to the south, and its eastern boundary is the range of Western Ghats, which separate it from the Indian districts of Belgaum and North Kanara. The extreme length from north to south is 62 miles and the greatest breadth from east to west 40 miles. The territory has a total area of 3,806 square kilometers and consists of the *Velhas Conquistas*, or Old Conquests, comprising the island of Goa, acquired by the Portuguese in 1510, and the neighbouring municipalities of Salsette, Bardez, and Mormugao acquired in 1543; and of the *Novas Conquistas*, or New Conquests, comprising the municipalities of Pernem, Sanquelim, Ponda, Quepem, Canacona, Satali and Sanguem acquired in the latter half of the 18th and early 19th centuries.

The country is intersected by numerous rivers running westward from the Ghats, of which nine—Mandovi, Zuari, Tiracol, Chapora, Baga, Siquerim, Sal, Talpona, Galgibaga—are all navigable, and of same size. Goa possesses a fine harbour, formed by the promontories of Bardez and Salsette. Half-way between these extremities lies the *cabo*, or cape, which forms the extremity of the island of Goa. This divides the whole bay into two anchorages, known as Aguada and Mormugao. Both are capable of accommodating the largest shipping from September to May, but Aguada is virtually closed during the south-west monsoon, owing to high winds and rough sea and to the formation of sand bars across the estuary of the Mandovi river which opens into Aguada. Mormugao is accessible at all times of the year and is therefore a harbour of commercial importance.

The People.—The total population of Portuguese India was 624,177, according to the 1940 census. The population of Goa is 540,925 of which 286,599 are Hindus, 245,878 Catholics and the remaining Muslims, Parsis and Jews. The population of Daman is 63,521 and that of Diu is 19,731. Portuguese India has 4 cities, 3 towns and 600 villages in which reside 130,000 families. The density of the country is about 172 the highest being in Bardez with 492 inhabitants per square kilometer, and lowest in Sanguem with only 28 inhabitants per square kilometer.

The country presents many interesting demographic problems relating to the distribution of population, birth and death rates, average span of life, density, etc. The *Velhas Conquistas* are thickly populated and takes the

highest contingent for emigration; and its inhabitants are to be found in almost all the parts of the world, including the Pakistan and Indian Dominions and British East Africa where there are about 120,000 Goans serving in various walks of life. During the war there was a regular influx of Goans into the Dominions where they found temporary jobs either in military departments or in civil positions. Though there are no official statistics, it is estimated that over 100,000 Goans have emigrated to Bombay and other parts of India and Pakistan where the rationing system guarantees them the necessities of life.

In the *Velhas Conquistas* the majority of the population is Catholic. In the *Novas Conquistas* Hindus are more numerous than Christians. The Muslims in the territory are not more than a few hundreds and speak Konkani as well as Hindustani. The Christians still very largely adhere to caste distinctions, claiming to be Brahmans, Chardos, Sudras and low castes, which generally do not intermarry although the younger people intermarry and do not believe in these social conventions. The Hindus who form about one-half of the total population are largely Maratha and do not differ from those of the adjacent Konkani districts of Bombay. All classes of the people, with the exception of Europeans, use the Konkani dialect of Marathi with some admixture of Portuguese words.

The Country.—A little over one-third of the entire territory of Goa is stated to be under cultivation. The present policy of the Government is to bring as much land under cultivation as possible. For this purpose, technical and agricultural experts have been appointed to carry on propaganda and to demonstrate to the farmers modern methods of cultivation. Statistics are being organised in regard to agriculture, rice and cocoanut production, area under the plough, etc. The fertility of the soil varies considerably according to quality, situation and water-supply. The *Velhas Conquistas* areas, as a rule, are better and more intensively cultivated than the *Novas Conquistas*. In both these divisions a holding of fifteen or sixteen acres would be considered a good sized farm but the majority of holdings are of much smaller extent varying from half an acre to five or six acres. The staple produce of the country is rice, of which there are two good harvests, but the quantity produced is barely sufficient to meet the needs of the population for two-thirds of the year. Due to lack of supplies of rice from the rest of the sub-continent, Goa suffers at present great hardship.

In recent years a remarkable change has come over the means of transport throughout the country. A large number of new roads have been built which have brought the most distant villages of Goa into close and intimate connection with the cities and towns. It is easy to cover the whole country in a motor car within practically a single day and *Novas Conquistas* are now easily accessible to the remotest parts of the *Velhas Conquistas*. All the principal roads are asphalted. A number of new bridges have been built which makes inter-district communication easy. There are cheap bus services throughout the country at regular intervals.

Besides the steamer service, the country craft carries on trade to a limited extent between Diu, Daman and Goa and other parts of the Indian sub-continent.

There are also steam launches and motor boats plying between Nova Goa, Betim, Verem Aldona and other places accessible by water.

Commerce.—In the days of its glory, Goa was the chief entrepot of commerce between the East and the West and was specially famous for its trade in horses with the Persian Gulf. It lost its commercial importance with the downfall of the Portuguese Empire and its trade is now insignificant.

The present trade of Goa is not very large. Its imports amounted to about Rs. 151 lakhs and exports to about Rs. 9 lakhs in 1945, the trade being chiefly with India, Pakistan, Portugal and Japan. The deficit is met from the remittances sent to Goa by over one lac of emigrants who are to be found in India, Pakistan and other parts of the world. Few manufacturing industries of any importance exist and most of the manufactured articles in use are imported. The exports chiefly consist of cocoanuts, copra, betel-nuts, mangoes, cashew-nuts, bamboos, salt and salt-fish. No reliable statistics are available of the country's balance of indebtedness and of its invisible exports which are considerable and which are mainly responsible for the favourable terms of trade which the country enjoys.

The only industries are soap-making, tinned food products and cashew-nuts and jaggery.

A sugar factory has been started at Sigao, Collem, Goa. The Government is keen on helping industrial enterprises in Goa as this will contribute to the prosperity of the country. This factory also manufactures jaggery.

No exports of any local produce to the Dominions or foreign places are permitted by the Portuguese Customs Department unless a special permit is obtained by the exporter from the local authorities. This new regulation has been enforced with a view to reserving sufficient stocks for local consumption.

A railway line connects Mormugao with the Madras and Southern Mahratta Railway. Its length from Mormugao to Castle Rock above the Ghats where it joins the Indian system is 51 miles, of which 49 are in Portuguese territory. The railway is under the management of the Madras and Southern Mahratta Railway administration, and the bulk of the trade of Mormugao port is carried by the railway. The W. I. P. Rly., now run by the Madras and Southern

Mahratta, has, recently experienced increased traffic, both passenger and goods, and has yielded enormous profits more than sufficient to pay the guaranteed rate of interest; even a surplus is left over which is paid regularly into the Lisbon treasury every six months. The telegraphs in Portuguese territories are worked as a separate system from the Indian; and the same office maintains and works all the telegraphs in its territories including Daman and Diu.

Most of the commerce of Portuguese India is with India and Pakistan with whom it maintains close commercial relations. About 90 per cent. of the imports of the country are now from the two Dominions which also receive most of its exports but in recent years these have shown a remarkable fall due to various controls set up by the Government. Among the most important imports are rice, textiles, sugar, cereals, petrol, kerosene oil, machinery, foreign liquor, etc. There is a large entrepot trade running into 8 to 9 crores of rupees a year, which is generally cleared by the port and railway at Mormugao.

Taxes and Tariffs.—The finances of the country showed chronic deficits for nearly 60 years with occasional exceptions. These were met by fresh taxes and new loans. Most of the new taxes were initiated by the Governor-General, Jaime de Morais, who is popularly known as the "Governor of Taxes." Only in 1927 did the country experience the joys of a balanced budget, and the public servants whose salaries had always remained in arrears are now being paid regularly. If municipal and national taxes be added together, the country presents a very high incidence of taxation, even higher than that of India or Pakistan, the average coming to about Rs. 13 per capita. The income tax is paid only by those merchants who make large profits and by Government servants. Income from other sources is not taxed. There is a special ten per cent. tax on all incomes derived in the shape of interest on loans. This tax is a powerful contributory cause to the flight of capital from Portuguese India. The chief sources of revenue are the land tax, interest on loans, excise and the customs. There is a special tax on emigrants—all persons, Goan and non-Goan who leave Goa—which yields a little over Rs. 40,000. It is proposed to revise the system of taxation, specially the land tax which represents 12 per cent. of the net yield. A profession tax has been levied by the Goa Government this year, in spite of protests and representations from business community and representative associations.

For the last ten years the country has experienced recurring surpluses due to the increasing indirect taxes. Public revenues between 1914 and 1941 have almost doubled and the indirect taxes yield to the State about 32 lakhs of rupees and direct taxes about 9 lakhs of rupees. The surplus from 1935 to 1937 came to 17 lakhs which, together with other special funds, make up a reserve of about 65 lakhs of rupees available for developmental expenditure, in which sum is included about 17 lakhs of rupees due by other colonies of Portugal. The total surplus for the last decennium amounts to about 90 lakhs of rupees, of which about 64 lakhs are constituted into a reserve fund. Recently all the different special

funds have been merged into one consolidated reserve fund with the exception of the yield of the rice tax which will constitute a separate reserve ear-marked entirely for the development of rice cultivation. The duty on imported rice which was introduced towards the end of 1938 has now been withdrawn. The tax on rice was levied with a view to giving protection to the local producer but when Government saw that the price of paddy was soaring it saw that no useful purpose was served by keeping the tax on rice. Hence the repeal of this tax which has brought relief to the poor consumers. A notification in the Government Gazette says that the price of paddy continues to remain at Rs. 30 per candy of 160 litres with the exception of *Corgul*. It is understood that this price is applicable only to places of production or at the godowns of producers. The price of unboiled rice locally produced is fixed at Rs. 30 a bag of 88 litres. Boiled rice imported from Karachi is to sell at Rs. 34 a bag.

The public-debt of Goa is made up of dues to Portugal and small loans floated in the country itself. Most of the debt due to Portugal has been wiped out by lump payments. The currency of the country is the monopoly of the Banco Nacional Ultramarino which is the State Bank of issue for some of the Portuguese colonies. Currency in recent times has expanded and the fiduciary issue has been increased from 10 millions to about 12 millions. The State holds a percentage of share capital on which interest is payable by the Bank to the respective colonies. The total fiduciary issue of the Bank at the end of last year was about 172 lakhs and its active note circulation has recently increased to about 13 millions. The Bank does ordinary banking business with very few central banking operations. It preserves a limited-loan policy but purchases, on a large scale, Indian notes and coins and remits them to Bombay where it maintains a branch financed by transfer of capital from Goa through the purchase of Indian currency. Indian currency notes freely circulate in Goa though during the war the emigrants had to pay a premium of Rs. 5 to Rs. 12 to get Indian notes converted into Portuguese.

The Capital.—Nova-Goa, the present capital of Portuguese India, situated on the banks of the Mandovi, comprehends Panjim and Ribandar and is the seat of the Governor-General. Old Goa is some six miles away from the new city. Panjim occupies a narrow strip of land leading up to the Cabo, the cape dividing the Aguada Bay from that of Mormugao, and mainly slopes down to the edge of the Aguada. It was selected as the residence of the Portuguese Viceroy in 1759, and in 1843 it was raised to its present rank as the capital of Portuguese India.

With its row of public buildings and elegant private residences, as seen from the water the city appears very picturesque and this impression is not belied by a closer inspection of its neat and spacious roads, lined by decent, tidy houses. The most imposing public structures are the barracks, an immense quadrangular building the eastern wing of which accommodates the Primary School, the Public Library

and the Government Press. Other notable buildings are the Cathedral at Velha Goa, the Viceregal Palace, the High Court, and the various Churches. The square in the lower part of the town is adorned with a life-sized statue of Albuquerque standing under a canopy.

Panjim has been undergoing in recent years many remarkable improvements. The electrical supply of the place has been reorganised under the control of the Municipality and an excellent system of lighting, public and private, is now in force. Most of the important roads have been asphalted at a large cost and recently a great number of buildings have come up. A decree has been published calling upon all house-owners to introduce septic tanks as a preliminary step to the working out of a scheme of water-supply. But this decree has so far not been enforced, due to lack of water-supply.

The population of Nova Goa, the capital of Goa, according to the latest census of 1940, shows 20,291 inhabitants, 10,747 males and 9,544 females. There are 1,020 Indian and Pakistani subjects, 5 Germans, 6 Chinese, 3 Iraqians and 1 Yugo-Slavian. There are 4 up-to-date hotels with all comfort catering to the needs of visitors.

History.—Goa was captured for the Portuguese by Alfonso de Albuquerque in 1510. Albuquerque promptly fortified the place and established Portuguese rule on a firm basis. From then on Goa rapidly rose in importance and became the metropolis of Portuguese power in the East. There was constant fighting with the armies of the Bijapur kingdom, but the Portuguese held their own and gained the surrounding territory now known as the *Velhas Conquistas*.

Then the Mahrathas came on the scene and once again there was fighting. In 1741 the Mahrathas invaded the neighbourhood of Goa and threatened the city itself. An army of 12,000 men arrived from Portugal at the critical moment. The invaders were beaten off, and the *Novas Conquistas* were added to the Portuguese possessions. In 1844 the shelter given by Goa to fugitives from justice in British territory threatened to bring about a rupture with the British Government at Bombay. In 1852 the Ranes of Satali in the *Novas Conquistas* revolted. In 1871 the native army in Goa mutinied and King's own brother came from Lisbon to deal with the trouble and disbanded the native army, which has never been reconstituted. Another outbreak among the troops occurred in 1895 and the Ranes joined the rebels again. The trouble was not put down until the arrival of a special expedition from Lisbon. The Ranes yet again broke out in open revolt in 1901 and again in 1912, troops being imported to deal with the last outbreak, which was only reported to be concluded in the summer of 1913. There has been no outbreak since then.

Administration.—The territory of Portuguese India is ruled by a Governor-General, residing in the Capital of the State, at Panjim, now known as Nova-Goa, and is divided into three districts: Goa, Daman and Diu. The last two are each under a Lieutenant-Governor. The district of Goa is under the direct control of the Governor-General.

Assisting the Governor-General in the administration are the Home and Political, Finance, Customs, Education, Military, Naval, Agriculture, Health and Public Works Secretariats. There are also three special and autonomous Departments, which do not constitute exclusive Secretariats, one of them being the Department of Posts and Telegraphs, the second that of Survey and the third that of the Fiscal of the W. I. P. Railway.

As the principal organ of administration next to the Governor-General and in collaboration with him is a Governor's Council (*Conselho do Governo*) with legislative and advisory powers. The Council is constituted, in addition to the Governor-General, *ex-officio* President, of four officials (Attorney-General, the Director of Finance, the Director of Civil Administration and the Director of Public Works), five elected members (three representing *Velhas Conquistas*, one the *Novas Conquistas* and one the Districts of Daman and Diu) and five members nominated by the Governor-General to represent the minorities, agricultural, commercial and other interests and the press.

In each province of Goa, Daman and Diu there is a District Council to supervise the Municipalities and other local institutions. The District Council of Goa is composed of the Director of Civil Administration, President; the Government Prosecutor of the Nova-Goa Civil Court; the Deputy Chief Health Officer; the Engineer next to the Director of Public Works; the Deputy Director of Finance; the Chairman of the Municipal Corporation of Ilhas; one member elected by the commercial and Industrial Associations of the district; one member elected by the 60 highest tax-payers of Goa; one member elected by the Associations of Land-owners and Farmers of the District; and one co-optate-member elected by the Legislative Council from among the legally qualified.

There is one High Court in Portuguese India with five Judges and one Attorney-General; and Sessions Courts at Panjim, Margao, Mapuca,

Bicholim, Quepém e Damão; and Municipal Courts of Justice at Mormugão (Vasco da Gama), Ponda, Diu and Nagar-Aveli.

The establishment of dictatorship in Portugal has produced profound changes in the administrative machinery of Goa. A system of centralisation, financial and administrative, has been introduced with the result that all important financial and administrative acts require the sanction of the Lisbon Government. The Governor-General has to submit periodical reports of his administration to the Lisbon Government. A press law controls the freedom of the Press and imposes heavy penalties on all offences committed by newspapers. Old newspapers are exempted from deposits, but new ones have to deposit with the State considerable sums of money before they are allowed to appear. Every paper has to be previously censored by official censors and so also have books, brochures and pamphlets.

The powers of the Council of Government are also reduced, particularly their legislative functions. They are for all intents and purposes a mere advisory body as officials and nominated members form a majority.

There is a common parliament and the whole Portuguese Empire is constituted into a single constituency electing about 90 members to the National Assembly. Presidents of municipalities and charitable associations are appointed by the Governor-General.

The economic condition of the country has deteriorated considerably in recent times. Due to scarcity of necessities of life, thousands of Goans have come to India to earn their living. Prices have risen by leaps and bounds and people cannot afford to buy in the black markets which flourish under the very eyes of the authorities who seem helpless to check profiteering. So the result is increase of emigration to India.

There are over six English teaching High Schools recognised by the University of Bombay from which students appear for the Bombay Matriculation.

PORT OF MORMUGAO

Mormugao Harbour is the terminal station of the Western India Portuguese Railway which is controlled by the Madras and Southern Mahratta Railway with headquarters in Madras.

In view to promoting the economic, aerial and industrial development of Mormugao, a special Department has been created with its head office at Vasco da Gama, 2 miles from Mormugao Harbour.

DAMAN

The settlement of Daman lies at the entrance to the Gulf of Cambay, about 100 miles north of Bombay and four hours run by rail from Bombay Central Station. It is composed of two parts, namely, Daman proper, lying on the coast, and the detached *pargana* of Nagar-Aveli, separated from it by a narrow strip of Indian territory and bisected by the B. B. & C. I.

The Local Government have introduced various regulations granting every facility to those intending to raise buildings for residential and industrial purposes in the whole area, comprising about 300 acres, near the Harbour. The scheme of "free" port did not produce much commercial development. No new industries were established. But railway traffic increased to about 9 crores of rupees, and more vessels visited the Harbour.

Railway. Daman proper has an area of 22 square miles and 26 villages and a population (1931) of 19,741 of whom 1,675 are Christians. The number of houses is according to the same census 4,095. Nagar-Aveli has an area of 60 square miles and a population (1931) of 38,260 of whom only 400 are Christian. The number of houses is 6,069.

The town of Daman was sacked by the Portuguese in 1531, rebuilt by the natives and retaken by the Portuguese in 1558, when they made it one of their permanent establishments in the Indian sub-continent. They converted the mosque into a church and have since built eight other places of worship. The native Christians have adopted the European costume, some of the

DIU

Diu is an island lying off the southern extremity of the Kathiawar Peninsula, from which it is separated by a narrow channel running through a considerable swamp. It is composed of three parts, namely, Diu proper (island), the village of Gogola on the Peninsula, separated by the channel and the fortress of Simbor, about 5 miles west of the island.

It has a small but excellent harbour, where vessels can safely lie at anchor in two fathoms of water and owing to the great advantages which its position offers for trade with Arabia and the Persian Gulf, the Portuguese were fired at an early period with a desire to obtain possession of it. This they gained first by treaty with the Sultan of Gujerat and then by force of arms.

Diu became opulent and famous for its commerce for a time. It has now dwindled into insignificance. The extreme length of the island is about seven miles and its breadth from north to south two miles. The area is 20 square miles. The population of the town of Diu, from which the island takes its name, is said to have been 50,000 in the days of its commercial prosperity. The total population of the island, according to the census of 1940, is 19,731 of whom 350 are Christians.

Political Reforms.—The Portuguese Government announced some months back that Portuguese India would have the same rights and privileges as a province of Portugal. A Committee was set up early in 1947, from the members of the Council of Government, to draw up a constitution which would satisfy the demands and aspirations of the people. The Committee invited views from representative associations and submitted its report to the Government.

The Portuguese Premier announced recently in the National Assembly of Lisbon that Portuguese India was "a source of great concern." He referred to the importance of the Portuguese port of Marmagao to India and said, "There is no great difficulty in finding a solution compatible with the interests of both parties. If new circumstances and the people's aspirations to increase their responsibilities justify alterations in the administrative regime or status, that is a problem which concerns Portuguese India and ourselves. This problem is already under study and will have a speedy solution."

women dressing themselves after the present European fashion, and others following the old style of petticoat and mantle once prevalent in Spain and Portugal. The language spoken here is Portuguese and Gujarati. There is an English School recognised by the Government of Portuguese India.

The freedom movement organised by Dr. Ram Manohar Lohia to drive away the Portuguese from Goa, Daman and Diu, did not prove successful though, in its initial stage, it captured the imagination of the people. After the deportation of Goan leaders like T. Braganca Cunha, Jose Inacio Loyola and Kakodkar, the satyagraha movement fizzled out and the situation returned to normal.

At present the movement is directed from India and so far it has not had any serious effect on the administration of Goa.

OFFICIALS

Governor-General of Portuguese India—Commandante Quintanilha Dias.

Chief of Military Staff—Major Alexandre Aguiar.

Commissioner of Police—Major Daniel Fernandes Aguiar.

Director of Health—Dr. Victor Dias.

Director of Posts and Telegraphs—Oliveira Chaves.

Public Works Department—Director: Eng. Jose Godinho; Deputy Director: Eng. Bernardino Camilo Da Costa.

High Court Judges—Dr. Antonio Miranda; Chief Justice: Dr. Braganca Pereira; Dr. Nicolau Sobrinho; Dr. Virgilio Souza; Dr. B. Rau.

Director of Finances—Vasco Ferreira Martins.

Deputy Director of Finances—A. J. M. de Melo Moreira.

Advocate-General—Dr. Antonio Taumaturgo Pereira.

Elected Members of the Legislative Council—Rev. Father Canon Castilho Serpa do Rosario Noronha; Antonio Jose Joao Francisco Pinto de Menezes; Antonio Anastasio Bruto da Costa; Vinalca Sinai Coissoro; Dr. Joao Filipe Ferreira.

Indian Vice-Consul at Nova-Goa—Prof. Armando Menezes.

Indians Overseas

THE total Indian (includes Indian and Pakistani) population overseas, according to the latest available estimates, is as follows:—

Name of country	Indian population	Date of estimates
<i>Dominions.</i>		
1. Australia	4,544	1933
2. Canada	1,500	1941
3. New Zealand	1,200	1942
4. South Africa—Cape	16,901 (Asiatics)	1946
Transvaal	37,505 (")	1946
Natal	223,119 (")	1946

Total for foreign countries	156,685	
Total for all countries	3,850,082	

* Includes Straits Settlements, Federated and Unfederated Malay States.

ORIGIN

Emigration is prohibited by the Hindu Shastras, and there is little evidence of any settlement of Indians overseas in early times except in Sumatra, Java and Ceylon. Emigration for purpose of labour dates from the beginning of the 19th century.

From 1800 A.D. onwards Indians crossed the Bay to the Straits Settlements to work on the sugar, spice, tapioa and coconut plantations of Penang, and this intercourse was allowed to continue for long without regulation. The first officially recorded instance of genuine recruitment for labour emigration occurred in 1830, when a French merchant, named Joseph Argand, carried some 150 artisans to Bourbon. The abolition of slavery in British colonies in 1834 gave the first great impetus to the movement. The sugar planters of Mauritius at once turned to India as their best recruiting ground, and between 1834 and 1837 obtained at least 7,000 recruits from Calcutta.

The Government of India at a very early stage realised the necessity of bringing such emigration under regulation. The Law Commission was asked to investigate the case and to make recommendations for securing the well-being of emigrants. They advised that no legislation was required except in order to prevent undue advantage being taken of the simplicity and ignorance of emigrants by providing that a magistrate should satisfy himself that all contracts were entered into freely and understood by them and in order to secure that sufficient provision was made for their accommodation and sustenance during the voyage. A copy of every engagement was also to be transmitted to the Government under which the emigrants were to live. These recommendations were embodied in the first Emigration Act (V of 1837), which also provided that contracts should be determinable after 5 years.

HISTORY

Under the above Act emigration during 1837 was permitted to Mauritius, British Guiana and Australia (89 men, the first and last direct emigrants to Australia). In 1838 emigration was suspended owing to agitation in England regarding the abuses to which the system was liable, and a committee of enquiry reported in 1840 that emigrants were being entrapped by force or fraud, robbed of their wages and treated with brutality. In consequence, emigration was prohibited (Act XV of 1842) except to Mauritius and there control was tightened. In Act XXI of 1844 emigration under still stricter regulation was allowed to Jamaica, British Guiana and Trinidad. Act XIII of 1847 removed the restrictions on emigration to Ceylon. The emancipation of slaves in the French colonies in 1849 gave rise to a system of emigration from French Indian ports to Reunion and Bourbon which was largely based on crimping in British territory. This practice was checked by Act XXIV of 1852. In 1853 emigration was opened to St. Lucia, and in 1860 to St. Vincent, Natal and St. Kitts. In the latter year a more elaborate Act, based on a convention with the French Government was passed, regalling and regulating emigration to Reunion,

Martinique, Guadeloupe, and French Guiana. Act XIII of 1864 marks an important stage in the history of emigration, since it elaborated and consolidated the whole system of control. It was itself amended in 1869 and 1870 in important respects with the object of preventing epidemics on emigrant vessels and improving sanitary conditions in settlements. In 1869 emigration was permitted to Grenada, and in 1872 to Surinam.

Owing to the removal of the Straits Settlements from the control of the Government of India in 1867, emigration to that colony came under all the restrictions imposed by the Emigration Act and was only permitted from the port of Negapatam. Owing to the injury caused to the agricultural industries of the colony, these restrictions were removed in 1872, subject only to magisterial control of recruitment in India. In 1870 complaints reached the Government of India of gross abuses in the treatment of emigrants in British Guiana.

A commission of enquiry was appointed, and their report led to important legislation in the Colony for the protection of Indian immigrants, which was subsequently extended to Trinidad. Owing to similar complaints from Natal and Mauritius, commissions of enquiry were also instituted in both these colonies, and their reports in 1872 brought to light a number of points requiring amendment.

LEGISLATION

In 1871 a fresh consolidating Act was passed (Act VII of 1871) by which the Acts regulating emigration to the French Colonies and two amending Acts to Act XIII of 1864 were incorporated in the general law. The question of revision of the law again came up for consideration in 1882, when several cases of kidnapping and other objectionable practices were reported to the Government of India. The opportunity was taken to depute two officials (Major Pitcher and Mr. Grierison) to ascertain, in the N.-W. P. and in Bengal respectively, the way in which the system of recruitment actually worked, the respects in which it was open to improvement, and the attitude of the people towards emigration. Their reports were reviewed by the Government of India, and finally in 1883 the law was again recast and consolidated by Act XXI of that year.

This Act specified the countries to which emigration was lawful, but empowered the Governor-General in Council to add to the list by notification, and also to prohibit emigration to any of the countries in the list on the ground of epidemic disease and/or excessive mortality among emigrants in such country, or on the ground that proper measure had not been taken for the protection of emigrants, of that the agreements made with them in India were not duly enforced. This Act with certain amendments of no importance to the system of indentured emigration remained in force until 1908, when a fresh revision of the law was undertaken.

Under the Act of 1908 (XVII of 1908) the countries to which emigration was lawful were the British Colonies of Mauritius, Jamaica, British Guiana, Trinidad, St. Lucia, Grenada,

St. Vincent, Natal, St. Kitts, Nevis, Fiji, the Seychelles, the Netherlands Colony of Dutch Guiana and the Danish Colony of St. Croix. Emigration to St. Lucia, Grenada, St. Vincent, St. Kitts, Nevis, the Seychelles and St. Croix ceased soon after the passing of the Act, the demand for fresh labour having died out.

Emigration to Natal was discontinued from the 1st July 1911 as the Government of India were satisfied that it was undesirable to continue to send Indian labour to that country. Emigration to the French Colonies of Reunion, Martinique and Guadeloupe had been suspended prior to the passing of the Act of 1908 on account of repeated complaints of the inadequate precautions taken for the proper treatment and repatriation of the immigrants.

ENQUIRIES

The labour laws of the several Colonies provide for the protection and welfare of resident Indian labourers. The Government of India also occasionally depute to the Colonies their officers to report on the condition of Indian labourers. Deputations from India visited Fiji and British Guiana in 1921. In spite of all precautions certain social and moral evils had grown up in connection with the indentured system of emigration and Indian public opinion became strongly opposed to it.

The whole system was exhaustively examined by the Government of India in 1915 in the light of the report received from Messrs. McNeill and Chimanlal, and they arrived at the conclusion that the time had come when contract labour should be abolished. The Secretary of State for India accepted this policy and authorised the Government of India to announce the abolition of the indentured system and the announcement to this effect was made in 1916.

In 1922 a further step forward was taken in Act VII of 1922 which prohibited indentured emigration and all unskilled emigration, except to countries specially approved by the Legislature. Emigration to Ceylon and Malaya was brought under control, and the definition of "Emigrant" was extended to cover all persons "assisted" to depart from India.

Another development was the appointment of a Standing Emigration Committee, composed of 12 members of the Central Legislature, to advise the Government of India on all major emigration questions, and more particularly with regard to the terms and conditions on which the emigration of unskilled labour should be allowed. The terms and conditions on which emigration of unskilled labour has been permitted to Ceylon and Malaya since March, 1923, are those which the committee approved, after meeting deputations sent by the two countries.

The Committee, though originally constituted to advise on emigration questions only, always advised the Government on all important matters concerning Indians Overseas. In April, 1945, its name was changed to that of 'Standing Committee on Commonwealth Relations' and its membership was increased to 14. Its functions now are to advise the

Commonwealth Relations Department on all matters with which it is concerned excepting the pilgrimage to Mehad.

Safeguards.—It was found that the lack of power to regulate the total flow of emigration for unskilled work, whether assisted or voluntary and whether under contract or not, may operate to the detriment of Indian communities overseas, particularly in times of economic depression. The Indian Emigration Act was suitably amended in 1938 and the Government of India took power to prohibit, when necessary, even unassisted emigration for the purpose of unskilled work. This amendment was promulgated on December 14, 1939.

The Indian Emigration Act, 1922, also contains certain provisions to safeguard the interests of persons emigrating for the purpose of skilled work. It was found that illicit emigration in some volume was taking place particularly in Bombay with the connivance of some dishonest passage brokers and rules were promulgated under the Act on the 14th Dec. 1939, providing for the licensing of passage brokers and requiring that a passage broker should not be a party to any arrangement to recover from the emigrant the 'cost of recruitment.' These rules have so far been made applicable to the provinces of Bombay and Sind.

During 1939-40 two minor defects in the Indian Emigration Act, 1922, were remedied. Now the Protectors of Emigrants can exercise the powers of detention, search, etc., for the prevention of offences under the Act and by making the offence under Section 30 of the Act cognizable, removes an anomaly between Sections 25 and 30A of the Act.

PRESENT POSITION

Indian emigration questions have recently taken on a wider aspect. The status of Indians in the Empire generally is one in which the Indian public now take keen interest. It is no longer possible to deal with the treatment of Indian labour apart from other classes of Indian emigrant and travellers. In several Colonies and Dominions considerable Indian communities have sprung up, which although composed largely of the descendants of indentured labourers, are themselves free and lawfully domiciled citizens of the countries in which they are settled, but have not yet been placed on a footing of legal, social, political and economic equality with the rest of the population. The issues round which public interest at present centres are three:—

- (a) Control of emigration.
- (b) Rights of Indians to admission to other parts of the Empire.
- (c) Rights and disabilities of Indians domiciled overseas.

These questions may be considered separately.

So far as unskilled labour is concerned, the Government of India have assumed absolute power of control in accordance with powers conferred on them by the Emigration Act of 1922. The functions of the Government of India were previously performed by the Provincial Governments by virtue of powers delegated to them

under Section 124 (1) of the Government of India Act, 1935. With a view to dealing directly with all emigration problems in the post-war period on a uniform all-India basis, the Government of India resumed the administration of those functions with effect from 1st October, 1944, and appointed a Controller General of Emigration in the Commonwealth Relations Dept. for that purpose. (See earlier issues of the Year Book for details.)

ADMISSION

On the motion of the Government of India this question was discussed at the Imperial War Conferences, 1917, and 1918, and the policy accepted by the self-governing Dominions and the British Government was embodied in the following resolutions:—

"(1) It is an inherent function of the Governments of the several communities of the British Commonwealth including India, that each should enjoy complete control of the composition of its own population by means of restriction on immigration from any of the other communities.

"(2) British citizens domiciled in any British country, including India, should be admitted into any other British country for visits, for the purpose of pleasure or commerce, including temporary residence for the purpose of education; such right shall not extend to a visit or temporary residence for labour purpose or to permanent settlement.

"(3) Indians already permanently domiciled in the other British countries should be allowed to bring in their wives and minor children on condition: (a) That not more than one wife and her children shall be admitted for each such Indian; and (b) that each individual so admitted shall be certified by the Government of India as being the lawful wife or child of such Indian."

Prohibitions.—The first paragraph of this resolution has regularized the various restrictions on immigration which the self-governing dominions have, from time to time, adopted and which, without expressly differentiating against Indians are in practice used in order to check Indian immigration, the objections to which are stated to be not racial or political but economic.

Australia prohibits the entry of any person who fails to pass a dictation test of not less than 50 words in any prescribed language. New Zealand prohibits the entry of any person who has not received in advance a permit from the Dominion Government which is refused to any person regarded as unsuitable to settle in the country. South Africa prohibits the entry of any person deemed by the Minister of the Interior on economic grounds, or on account of his standard or habits of life, to be unsuitable to the requirements of the Union. Canada prohibited the landing of any person who had come to the Dominion otherwise than by continuous journey from the country of which he was a native and unless he possessed in his own right 250 dollars. Since 1930, Canada has restricted the immigration of Indians to the wife or unmarried child under 18 years of age, of any Canadian citizen legally admitted

to and resident in Canada, who is in a position to receive and care for his dependents. Newfoundland and the Irish Free State impose no restrictions.

All the self-governing Dominions have adopted special exemptions in favour of students, tourists and merchants visiting the countries for the temporary purposes of commerce, pleasure, or education.

Reciprocity.—India on its side assumed power to regulate the admission of immigrants from any other part of the Empire of foreign countries, by means of passports. By the Immigration into India Act, 1924 the Government of India was empowered to make rules "for the purpose of securing that persons not being of Indian origin, domiciled in any British possession, shall have no greater rights and privileges as regards entry into and residence in British India, than are accorded by the law and administration of such possession to persons of Indian domicile." That Act was repeated in 1943 by the Reciprocity Act, 1945, which enables the Government of India to impose such disabilities in respect of entry into, or travel, residence, etc., etc., upon subjects of any British possession which subjects persons of Indian origin to like disabilities.

With regard to the Crown colonies and protectorates, the attitude of the Indian Government is that there is no justification for placing any restrictions on the immigration of British Indians, which are not placed on other classes of British subjects, and this principle has in practice been observed by the Colonial Office except in the case of Kenya Colony where, as stated hereafter, the British Government has reserved to itself the right to impose restrictions on the immigration of classes of people whose entry into the Colony may have an adverse effect on the economic evolution of the indigenous population.

Rights and Disabilities.—The policy of the Empire is summed up in the resolution of the Imperial Conference, 1921, which was recorded in the following terms:—

"This Conference reaffirms that each Community of the British Commonwealth should enjoy complete control over the composition of its own population by restricting immigration from any of the other communities, but recognised that there is incongruity between the position of India, as an equal member of the Empire, and the existence of disabilities upon British Indians lawfully domiciled in some parts of the Empire, and this Conference, therefore, is of opinion that in the interests of the solidarity of the Commonwealth it is desirable that the rights of such Indians to citizenship should be recognised."

The representatives of South Africa regretted their inability to accept this resolution in view of the exceptional circumstances of the greater part of the Union. The representatives of India while appreciating the acceptance of this resolution, nevertheless felt bound to record their profound concern at the position of Indians in South Africa and hoped that by negotiations between India and South Africa a way could soon be found to reach a more satisfactory position.

A SUMMARY

The present position is as follows:—

Australia.—The majority of Indians in Australia are engaged in retail trade or agricultural operations. The Commonwealth franchise was granted to British Indians domiciled in Australia in 1925. In the States of New South Wales, Victoria, South Australia, Queensland and Tasmania, Indians are not disqualified on racial grounds for the State franchise. The disability which existed in this respect in Queensland until December 1930 and in Western Australia until the end of 1934 was removed as a result of informal representation made by the representatives of India on various occasions, including the one made by the late Sir Muhammad Shafi at the 1930 Imperial Conference. The Constitution and Electoral Acts in Western Australia disqualify an aboriginal native of Australia, Asia or Africa from being registered as an elector for the Assembly; but he may be enrolled as a voter for the Legislative Council (which is the Upper House) in each province in which he holds freehold property of at least £50 capital value.

Indians born in British India were admitted to the benefits of the Invalid and Old Age Pensions Act of 1928. They were also made eligible for maternity allowances. Indians in Australia still suffer from certain minor disabilities (administrative and legal) relating to Crown lands, mining, certain occupations and employment. Under the Mining Act of 1904, in Western Australia the grant of mining rights to Asiatics requires the approval of the Minister in charge of Mines. Under the South Australia Irrigation and Reclaimed Lands Act, 1914, Indians are not eligible to obtain leases of land. In Western Australia wherever licences are prescribed, for example, for cutting sandalwood, for employment under Government contractors and for employment in European factories, Indians find it difficult under the present administrative practice to get the authorities to exercise discretion in their favour. The Government of Western Australia have announced their decision to take steps to remove any disabilities which now attach to British Indians in that State.

An exchange of High Commissioners took place between India and Australia in 1944.

Canada.—Indian residents of Canada are mostly farmers, gardeners, farm workers, managers of retail stores, hawkers, and unskilled labourers. While in the other eight provinces of Canada, Indian residents were not subject to any political or legal disabilities, Indians in British Columbia numbering about 1,300 were denied the municipal, provincial and federal franchises, as a result of which they could not serve as trustees in any municipal or rural school district, hold any municipal office or serve as jurors; they are debarred from employment by contractors for the Public Work Department and for the sale of Government timber and also from holding a foreshore lease or Engineers' certificate under the Boiler Inspection Act. In 1947 an Act known as the British Columbia Provincial Election Amendment Act was passed in the British Columbia Legislature conferring provincial franchise on Indians in British Columbia. As a result of this Indians

in that Province also became entitled to federal franchise. The Union of British Columbia Municipalities passed a resolution in 1947 recommending that municipal franchise be granted to Indians.

In October, 1945 a Canadian Citizenship Bill was moved in the Canadian House of Commons which provided for the status of 'Canadian Citizenship' which can be acquired by persons (i) who were born in Canada or on Canadian ship, (ii) whose parents at the time of their births were British subjects of Canadian domicile or are Canadian citizens, (iii) who have resided in Canada and make an application of their intention to become Canadian citizens. It also introduced an entirely new system for determining who are British subjects, thus involving fundamental change from the present system for determining the common status of British subjects throughout the Commonwealth. It was passed in 1946 and came into force with effect from 1-1-47. It would bestow 'Canadian Citizenship' on all Indians born in Canada and would also enable Indians born outside Canada to acquire citizenship rights under certain circumstances. The Govts. of India and Canada have decided to exchange High Commissioners: and towards the middle of 1947, Mr. J. D. Kearney and Mr. H. S. Malik were appointed as Canadian High Commissioner in India and Indian High Commissioner in Canada, respectively.

New Zealand.—Indians domiciled in New Zealand are generally not subject to any disability and enjoy equal citizenship rights including franchise with the other British subjects.

SOUTH AFRICA

The main grievances of Indians, which led to a passive resistance movement headed by Mahatma Gandhi, were settled by the compromise embodied in the Indians Relief Act, 1914 and by the guarantee known as the Smuts-Gandhi agreement. (See earlier editions of the Year Book for details.)

In 1920 an Asiatic Enquiry Commission was appointed to investigate the grievances of Indians regarding their rights to trade and hold land in the Union. Their main recommendations were published in earlier editions of the Year Book.

Cape Town Agreement.—It was announced in April 1926 that the Government of India and the Government of the Union of South Africa had agreed to hold a Round Table Conference to explore all possible methods of settling the Indian question in the Union in a manner which would safeguard the maintenance of western standards of life in South Africa by just and legitimate means. The Conference assembled at Cape Town on December 17th and its session finished on January 12th. There was, in these meetings, a full and frank exchange of views which resulted in a truer appreciation of mutual difficulties and a united understanding to co-operate in the solution of a common problem in a spirit of friendliness and good-will. The terms of the Cape Town Agreement were on the following lines:—

"Both Governments re-affirm their recognition of the right of South Africa to use all just and legitimate means for the maintenance of western standards of life.

The Union Government recognises that Indians domiciled in the Union who are prepared to conform to western standards of life, should be enabled to do so.

For those Indians in the Union who may desire to avail themselves of it, the Union Government will organise a scheme of assisted migration to India or other countries where western standards are not required. Union domicile will be lost after 3 years' continuous absence from the Union in agreement with the proposed revision of the law relating to domicile which will be of general application. Emigrants under the assisted emigration scheme who desire to return to the Union within the 3 years will only be allowed to do so on refund to the Union Government of the cost of the assistance received by them.

The Government of India recognise their obligation to look after such emigrants on their arrival in India.

The admission into the Union of the wives and minor children of Indians permanently domiciled in the Union will be regulated by paragraph 3 of Resolution XXI of the Imperial Conference of 1918.

Review.—In the expectation that the difficulties with which the Union has been confronted will be materially lessened by the agreement now happily reached between the two Governments, and in order that the agreement may come into operation under the most favourable auspices and have a fair trial, the Government of the Union of South Africa have decided not to proceed further with the Areas Reservation and Immigration and Registration (Further Provision) Bill.

The two Governments have agreed to watch the working of the agreement now reached and to exchange views from time to time as to any changes that experience may suggest.

The Government of the Union of South Africa have requested the Government of India to appoint an agent in order to secure continuous and effective co-operation between the two Governments.

The number of Indians who took advantage of the Assisted Emigration Scheme was below expectations. Early in 1932 representatives of both the Governments met in Cape Town to review the working of the Cape Town Agreement. Both Governments recognised that the Cape Town Agreement had been a powerful influence in fostering friendly relations between them and that they would continue to co-operate in the common object of harmonising their respective interests in regard to Indian residents in the Union and that the possibilities of the Union's scheme of assisted emigration to India were now practically exhausted owing to the economic and climatic conditions of India as well as to the fact that 80% of the Indian population of the Union were now South African-born. Both Governments agreed that the Cape Town Agreement was to remain valid.

INDIAN REPRESENTATIVES

The Government of India selected the Rt. Hon'ble V. S. Srinivasa Sastri as their first Agent. He reached the Union on the 28th June, 1927. The designation of the Agent was changed to that of 'Agent-General' in 1935.

Following the appointment of a High Commissioner in the Union of South Africa by the Dominion Government of Canada, the Government of India considered that the status of their representative should not be lower than that of any of the sister Dominions. As a result of negotiations between the two Governments the status of the Agent General was raised to that of High Commissioner from 1st January 1941.

India's representatives in the Union since 1927 have been—

Rt. Hon'ble V. S. Srinivasa Sastri	1927-1929
Sir K. V. Reddi	1929-1932
Kunwar Sir Maharaj Singh, I.C.S.	1932-1935
Sir Syed Raza Ali	1935-1938
Sir B. Rama Rau, I.C.S.	1938-1941
Sir Shafa'at Ahmad Khan	1941-1945
Mr. R. M. Deshmukh	1945-1946

During the period 1932-1939 various anti-Indian Laws were enacted. European agitation during this period also led to the appointment in 1938 of two Commissioners Mr. Murry Land Commission and Mixed Marriages Commissions. (For details see earlier editions of the Year Book.) Following is the more recent history of the Indian problem in South Africa.

INTERIM ACT

In spite of repeated representations from the local Indian community and the Government of India, the Union Government passed the Asiatic (Transvaal Land and Trading) Act, 1939, which came into force on June 16, 1939. The Act restricts three important rights of the Indian community in the Transvaal: (a) the right to occupy land not subject to Gold Law restrictions; (b) the right to trade anywhere in the Transvaal; and (c) the right of Indians holding trading licences in May 1919 to transfer their business premises in the same township. The main provisions of the Act are as follows: (1) Further protection for two years was granted to such illegal occupation of land by Asiatics in the area under the Gold Law as had been protected since May, 1930. (2) The issue of trading licences except with the permission of the Minister was prohibited unless it was proved that the applicant and the person in control of the business were not Asiatics. (3) The hiring or occupation by Asiatics of any land or premises was prohibited if such land or premises were not occupied by Asiatics or coloured persons on April 30, 1939. (4) The Minister was empowered to issue permits of exemption. In April 1941 an amending Act was passed to keep alive the provisions of the Act of 1939 for a further period of two years, i.e., till May 1943.

The international situation in September, 1939, and the consequent change of Ministry in the Union with General (now Field Marshal) Smuts coming into power altered the position slightly so far as the Indian community was concerned. It was officially announced that the Government of the Union intended to appoint a commission to ascertain whether penetration had in fact taken place. The Union Government also declared that no fresh statutory measures involving segregation would be introduced during the war.

LAWRENCE COMMITTEE

Towards the end of 1939, Mr. Lawrence, the Minister of the Interior, suggested that the Natal Indian Association and the Durban City Council should constitute a Joint Committee for the purpose of preventing further penetration by Asiatics into European areas. The Natal Indian Association expressed their opposition to any form of segregation but offered to co-operate with the Durban City Council in the manner suggested in order to establish harmonious relations between the two communities. The object of the Committee was also to draw the attention of the City Council to the housing needs of the Indian community and the necessity for providing proper municipal amenities. The Committee was formed in March, 1940, but owing to the attitude of the European members, it could not function successfully and the Minister of the Interior was obliged to dissolve it in September, 1942.

BROOME COMMISSION

In January, 1940, the Minister of the Interior announced the intention of the Union Government to appoint a judicial Commission to ascertain the extent, if any, of Asiatic penetration of predominantly European areas, and the Commission was actually appointed in May with the Hon'ble Mr. Justice F. N. Broome as Chairman and the following terms of reference:—

"To enquire into and report whether, and if so, to what extent Indians have since 1st January, 1927, commenced occupation of or acquired sites for trading or for residential purposes in predominantly European areas in the Provinces of Natal and the Transvaal (excluding land proclaimed under the Precious and Base Metals Act, 1908, as amended, of the Transvaal), and the reasons for such occupation or acquisition."

A summary of the findings of the Commission was published on October 11th 1940. The two main findings were that in the Transvaal the extent of penetration since 1927 did not appear to be alarming or even surprising and in Natal the extent of penetration into European areas was little more than a trickle. As regards the cases of penetration as had been found, it was stated that the main reason for penetration by acquisition was attributable to the desire to obtain good investments (and this was also held to account for some of the acquisitions with occupation), while the most important reason for acquisition with occupation was given as the "lack of housing and civic amenities in predominantly Indian areas." The Commission also recorded that "it is the Commission's considered opinion that the Indian opposition to compulsory segregation will never be overcome, but that *de facto* segregation may some day be achieved by voluntary mutual co-operation."

Towards the end of 1942, the Durban City Council represented to the Minister of the Interior that since October 1940 Indian penetration in predominantly European areas in Durban had been taking place on an accelerated scale. As a result of this representation, Mr. Justice F.

N. Broome was once again appointed to enquire into and report whether, and if so to what extent, Indians (including Companies with predominantly Indian directorates) had, since 30th September, 1940, in the Municipal area of Durban, acquired sites in those areas which the previous Commission found to be predominantly European on 1st January, 1927. According to the findings of this Commission, the sites acquired by Indians in 1942 were 2½ times greater than the highest previous yearly total and the amount paid for these sites during the 29 months covered by the Commission did not fall short of the total amount so paid during the 13 years which were covered by the previous Commission.

PEGGING ACT

As a result of this finding and in order to check further acquisition of property by Indians, the Union Government passed in the teeth of opposition by the Indian Community and Government of India, an Act called "the Trading and Occupation of Land (Transvaal and Natal) Restriction Act, 1943," generally called as the Pegging Act. This Act provides for the continuance in the Transvaal of the provisions of the Asiatic (Transvaal Land and Trading) Act 1939 for a further period of 3 years and extends similar provisions prohibiting transfer of properties between Europeans and Indians in Natal for a period of 3 years i.e., up to March 31, 1946.

Government of India formulated their plans to take retaliatory action against the Union. In the meanwhile, however, it became clear that the general elections in the Union had played a large part in the enactment of Pegging Legislation—Indian penetration having been used as a convenient election issue for securing votes of anti-Indian Europeans. The Government of India, therefore, waited for the excitement aroused by the elections to subside in the hope that the Union Government would make a conciliatory move after the atmosphere in the country had returned to normal. Indian public opinion, however, continued to be disturbed both in India and S. Africa and constantly urged upon the Government of India to adopt retaliatory measures.

PRETORIA AGREEMENT

On 18th April, 1944, as a result of an agreement, known as "Pretoria Agreement", between the Union Prime Minister and the Minister of the Interior on the one hand and a deputation from Natal including members of the Natal Indian Congress on the other, a decision was taken according to which the Pegging Act was to be replaced by an Ordinance to be passed by the Natal Provincial Council. It was agreed by both the parties that the main problem was the occupation of property for residential purposes in urban areas where the question arose of Indians living in close proximity to Europeans. The Ordinance was to provide for the creation of a licensing board with two Europeans and two Indian members and a third European with legal training as chairman. The Board was to control occupation of dwellings in Durban by licensing. The Pegging Act was to be withdrawn by proclamation after the Ordinance was passed.

The Agreement on the whole, met with satisfactory reception among the majority of Indians in South Africa. The Government of India also decided to give it a chance although they did not think it an ideal solution. A draft Ordinance embodying major points of the Agreement, which was approved by the Natal Indian Congress, was introduced in the Natal Provincial Council and it was referred to the Select Committee after first reading. On October 17th, 1944, the draft Residential Property Regulations Ordinance with the Report of the Select Committee was placed on the table of the Provincial Council.

The amended draft Ordinance departed from the Pretoria Agreement in many aspects; in particular it restricted the right of Indians to acquire property. F. M. Smuts himself admitted afterwards that this Ordinance was inconsistent with the Pretoria Agreement. That Ordinance, with two other Ordinances, viz. Natal Housing Ordinance and Provincial and Local Authorities Expropriation Ordinance, was passed on 3rd November 1944. Indians in South Africa were greatly agitated over this legislation. It also aroused great resentment among the Indian public in India. It was apprehended that these Ordinances would enable the Provincial Administration to carry out racial zoning.

RECIPROCITY ACT

The Government of India represented to the Union Government that the new measure was unwarranted and urged for its withdrawal and implementation of the Pretoria Agreement. As the representations met with failure, the Government of India enforced the Reciprocity Act against South Africa, and persons of South African domicile were declared prohibited immigrants in India. They were debarred from acquiring or occupying any property without a permit and were also deprived of the local franchise.

HOUSING ACT

The Residential Property Regulations Ordinance and the other two ordinances were eventually declared *ultra vires* of the powers of the Provincial Council and therefore did not become operative. The Union Government however passed in June 1945 another Act known as Housing (Emergency Powers) Act, 1945. It enabled the Government to frame Regulations relating to acquisition and expropriation of property by the local authorities, the Natal Housing Board and the National Housing and Planning Commission of the Union Government. The power of expropriation was to remain in the hands of the Union Minister. It also empowered the Provincial Councils to institute Housing Boards through Provincial legislation. Accordingly the Natal Provincial Council passed an Ordinance entitled "Natal Housing Ordinance" which became law on the 6th December 1945.

The regulations under the Housing (Emergency Powers) Act, were also issued on the same day. The Prime Minister also issued a statement on the same date giving an assurance that the safeguards regarding Ministerial consent and approval would be used to ensure that the powers in question were exercised in a reasonable, equitable and impartial manner.

THIRD BROOME COMMISSION

In 1944 the Union Government appointed a Commission "To enquire into and report upon matters affecting the Indian community of the Province of Natal, with special reference to housing and health needs, civic amenities, civic status and provision of adequate residential, educational, religious and recreational facilities, and to make recommendations generally as to what steps are necessary further to implement the uplift of clauses of the Cape Town Agreement of 1927, and as to all matters affecting the well-being and advancement of the permanent Indian population of Natal."

The Commission included two Indians and commenced work in May, 1944. The introduction of the Residential Property Regulation Ordinance and other Ordinances mentioned in the foregoing paras brought about a crisis. In December 1944, the two Indian members resigned the membership of the Commission saying that, as the Ordinances and the Reports of the Natal Post-War Reconstruction Commission had anticipated the work of the Commission and forestalled its recommendations, the usefulness of the Commission was stultified.

The Commission, however, continued its work. In the 2nd week of June 1945, the Interim Report of the Commission was published. The main and only important recommendation of the Commission was that the Union Government should invite the Government of India to send to the Union a delegation, composed substantially of Indians for the purpose of discussing with the Union Government, and with such representatives as the Union Government might appoint, and with such other persons as the delegation may invite, all matters affecting Indians in South Africa.

LAND TENURE ACT

One of the most important events in the history of Indians in South Africa was the passing of the Asiatic Land Tenure and Indian Representation Act. This event raised the Indian question in South Africa to international plane.

On January 21st 1946, the Prime Minister announced in the Union Parliament, his intention to introduce a Bill for the purpose of prohibiting the occupation and acquisition of property by Indians in Natal, except in certain exempted areas. This roused consternation among the Indian community in South Africa and the public in India. According to the statement made by the Government Spokesman in the Central Legislature on the 12th March, the Government of India urged upon the Union Government to convene, as recommended by the Third Broome Commission, a Round Table Conference of representatives of both the countries to discuss Indian question before passing this legislation. The Union Government rejected this request. The Bill was introduced in the Union House of Assembly on 16th March and passing through all stages became law on 3rd June 1946.

The Act which has replaced the Pegging Act of 1948, consists of two Chapters. The

first Chapter dealing with land tenure places restrictions on the acquisition and occupation of land by Asiatics in Natal, except in exempted areas which have been so proclaimed in the schedule to the Act. These areas may be increased or decreased on the advice of the Land Tenure Advisory Board (established under the Act) or after five years by a resolution of the Parliament. In non-exempted areas transfer of fixed property between non-Asiatics and Asiatics both for occupation and acquisition is subject to a permit granted by the Minister. In the Transvaal the Interim Act (1939) position is retained with the exception that trade licenses are no longer to require the Minister's permit. Thus the Act extends the temporary provisions of the Pegging Act to the whole of Natal and has also introduced a new principle of racial segregation.

The second Chapter gives a limited franchise to Indians. It enfranchises a male Indian who is

- (a) a Union national of or over 21 years of age,
- (b) has passed the sixth Standard or equivalent; and either
- (c) has an annual income of not less than £84 or
- (d) owns immovable property of the minimum value of £250.

Indians will be represented by 2 Senators, 3 Members in the House of Assembly and 2 Members in the Natal Provincial Council. Indians in the Transvaal have not been given any representation in the Transvaal Provincial Council. The members in the Senate and the Assembly must be of European descent and thus Indians will be represented by Europeans in both Houses of the Union Parliament.

On the Act becoming law the Government of India was strongly urged by the Indian public and the Indian community in South Africa to recall their High Commissioner and enforce trade sanctions against that country. The Government of India informed the Union Government that in view of the attitude of that Government the Government of India considered themselves free to take counter-measures. Accordingly they gave notice of the termination of Trade Agreement with the Union Government on the 25th March 1946 and banned all exports to and imports from South Africa with effect from the 17th July. The High Commissioner for India in the Union was recalled. In South Africa itself Indians have started a passive resistance movement which has taken the form of defying the Asiatic Land Tenure Act by occupying land in the non-exempted areas. About 200 persons including women, Africans and Europeans have cousted imprisonment and the movement is continuing.

The Government of India was also urged by the Indian legislature to raise the Indian question in South Africa before the United Nations as the Union Government's treatment of Indians was a violation of the United Nations Charter. The Government of India lodged a complaint with the Secretary

General, United Nations requesting that the General Assembly should take up this question under articles 10 and 14 of the Charter.

U. N. O.

Later the Government of India submitted a factual memorandum to the United Nations, which described the various disabilities under which the Indians in South Africa suffer. The question was discussed at the 1946 (October-December) session of the General Assembly which referred it to the Joint Political and Legal Committees. The South Africa delegation, led by F. M. Smuts, contended that this question was essentially a domestic question of South Africa and therefore under Article 2(7) of the Charter UNO had no right to discuss the matter. They therefore wanted the whole question to be referred to the International Court of Justice for legal clarification on this point.

The Indian delegation led by Mrs. Vijay Lakshmi Pandit, emphasised that this was not a domestic question. During the course of discussions South Africa's racial policy came in for much criticism. Various resolutions were proposed but the Committee passed the joint French-Mexican resolution, to which India had agreed.

The resolution after stating that because of the treatment of Indians in South Africa friendly relations between the two countries had been impaired, expressed the opinion of the General Assembly that such treatment "should be in conformity with the international obligations under the agreements concluded between the two Governments and the relevant provisions of the Charter". It requested the two Governments to report at the next session of the General Assembly the measures adopted to that effect. This resolution was passed by the General Assembly by 2/3rd majority.

After his return to South Africa F. M. Smuts in his public speeches strongly criticised the resolution. He attributed the resolution to ignorance and a "solid wall of prejudice" against the colour policies of South Africa. According to him the General Assembly had taken the decision on this question under the influence of a "flood of emotion" and "mischievous propaganda". He accused the Assembly of having been unfair to the Union and of having denied it the most elementary and fundamental right of access of the International Court. He did not regard what had happened at the UNO as final and decisive.

One of the direct results of the UNO resolution was the intensification of anti-Asiatic feeling in South Africa. A movement was set afoot among Europeans to boycott Indian traders. The Indian community continued its passive resistance. The Union Government did not take any initiative to give effect to the resolution. Then Pandit Jawaharlal Nehru, the Prime Minister of India, in a personal letter to F. M. Smuts, expressed the Government of India's readiness to enter into any discussions of the Government of South Africa might see fit to initiate for implementing the UNO resolution. This was the beginning of correspondence between the two Governments but it ended without any result. The Union Government desired the

return of the High Commissioner to South Africa for consultation. The Government of India preferred a Round Table Conference, but were willing to send back the High Commissioner for discussion provided the Union Government accepted the U.N.O. resolution as the basis of such discussion. The Union Government declined to do so. They asserted that they had no agreements with India to which the resolution had referred.

Both the Governments submitted their reports to the General Assembly which discussed the question again in September-December 1947 session. The question was referred to the Political Committee which passed the Indian resolution as amended by Mexico. The resolution after reaffirming the last year's resolution requested the two Governments to enter into discussions at a Round Table Conference on the basis of that resolution, inviting the Government of Pakistan to such a Conference. But the resolution failed to secure 2/3rd majority in the General Assembly and hence was not effective. The present position is that while the South African Government are stating that the failure of the Indian resolution this year has wiped out the last year's resolution, the Government of India contends that 1946 resolution stands.

Education.—As a result of endeavours on the part of the High Commissioner for India, who felt that advancement of education was a real necessity for the Indian community, the Union Government agreed to set up a Committee to 'enquire into and report upon the facilities at present existing in Natal for University and technical education for Indians, and to make recommendations as to the policy which should be followed in the further development of such facilities.' The Committee reported in November, 1942, and made recommendations for the establishment of an Indian Technical College. This recommendation could not be put into effect for some time due to the refusal of Durban City Council to allot some suitable land for the college, but in 1946 a compromise was reached and a beginning has been made for the erection of the College building.

Although some progress in the education of Indians has been made, about 25,000 of Indian children of school going age do not go to school for lack of facilities.

EAST AFRICA KENYA COLONY

The grievances of Indians domiciled in this Colony were fully set forth in the published despatch of the Government of India, dated October 21st, 1920. The controversy centred round the following points:—

(a) **FRANCHISE.**—Indians had not the elective franchise. The Government of India, therefore, proposed that there should be a common electoral roll and a common franchise on a reasonable property basis plus an educational test without racial discrimination for all British subjects.

(b) **SEGREGATION.**—Professor Simpson who was sent to East Africa to report on Sanitary matters, recommended segregation on sanitary grounds. The Government of India objected, firstly, that it was impracticable;

secondly, that it was commercially inconvenient; and thirdly, that Indians were in practice unfairly treated in the allocation of sites.

(c) **THE HIGHLANDS.**—Lord Elgin decided in 1908 that as a matter of administrative convenience grants of land in the upland area should not be made to Indians. The whole area had by then been given out, and the Government of India claimed, that there was no land left to which Lord Elgin's decision applied. That decision was, however, extended so as to prohibit the transfer of land in the uplands to non-Europeans.

(d) **IMMIGRATION.**—Suggestions were put forward for restricting Asiatic immigration into Kenya. The Government of India claimed that there was no case for restricting Indian immigration and that such restrictions were in principle indefensible.

THE SETTLEMENT

The decisions of the British Government were contained in a White Paper Presented to Parliament in July, 1923. It was held that the guiding principle should be that "the interests of the African native must be paramount," and in the light of this it was decided:—

(a) **FRANCHISE.**—A communal franchise was adopted with 11 seats for elected Europeans, 5 elected Indians, one nominated Arab, one missionary representing the Africans, and a nominated official majority. One Indian was also appointed on the Governor's Executive Council.

(b) **SEGREGATION.**—The policy of segregation as between Europeans and Asiatics was abandoned.

(c) **THE HIGHLANDS.**—The old practice was maintained both as regards initial grants and transfers. A similar reservation in the lowlands was offered to Indians.

(d) **IMMIGRATION.**—Racial discrimination in immigration regulations was rejected. But in the economic interests of the Africans, further control over immigration was considered necessary. It was held that some arrangement was required for securing a strictly impartial examination of applications for entry into Kenya. The Governors of Kenya and Uganda were, in that connection, instructed to submit joint proposals for legislation.

The Government of India reviewed their decisions in a resolution published on August 18th, 1923, and recorded "their deep regret that His Majesty's Government did not feel justified in giving greater effect to the recommendations made by them" and reserved liberty to reopen the case on a suitable opportunity. They stated their intention of making representations regarding the action to be taken to implement those decisions, particularly in the matter of the Immigration regulations.

H. M. C.'S DECISIONS

Following upon the Kenya award, statutory action was taken by the local administration on the franchise question. Adult suffrage on communal lines was conferred upon Indians. As

regards immigration, the Government of India took the opportunity to urge the postponement of the bill giving effect to the decision of His Majesty's Government until such time as the Committee proposed by their representatives at the Imperial Conference in 1923 had an opportunity of examining the question of the restrictions therein embodied. Accordingly the introduction of the bill was postponed at the instance of the Colonial Secretary. The Government of Kenya was also asked by His Majesty's Government for an explanatory statement regarding the method proposed for the administration of immigration measures. The Government of India received an assurance from the Colonial Secretary that ample opportunities would be afforded for the expression of their views, and that earnest attention would be given to any representation which their Committee desired to make. As stated in a subsequent para, a Colonies Committee was appointed in March 1924. As a result of the representation of the Colonies Committee the following decisions were announced by the Secretary of State for Colonies in the House of Commons on 7th August 1924.

"(1) **IMMIGRATION.**—No definite statistics were available to judge the extent of non-native immigration. Accordingly steps will be taken to create a statistical department to obtain accurate information with regard to persons of all races arriving in or departing from Kenya. Meanwhile the Kenya Immigration Ordinance will not be enacted.

(2) **FRANCHISE.**—Communal system of franchise will continue.

(3) **HIGHLANDS.**—The present practice will continue.

(4) **LOWLANDS.**—It was proposed to reserve an area in the lowlands for agricultural immigrants from India. The Committee made it plain that it isaverse from any reservation of land for any immigrant race, subject to the suggestion that before applications for land in lowland areas are invited an opportunity should be taken of sending an officer experienced in Indian settlement and agricultural methods to report on the areas.

The work of the Colonies Committee did much to abate the bitterness which existed in the relations between the different classes of settlers in Kenya, and the situation was further improved by the decision of the Indian community to relinquish their attitude of non-co-operation and to select five members for nomination by the Governor to the Legislative Council.

EAST AFRICA COMMITTEE

In June 1924, His Majesty's Government announced the appointment of an East African Committee, under the Chairmanship of Lord Southborough, to consider and report on certain questions regarding the administration and economic development of British East African dependencies. Since this enquiry was likely to affect Indian interests, the Government of India urged that the Indian point of view should be heard before the Committee came to any conclusions. This request was granted, but further action in the matter was suspended,

pending the publication of the report of the Commission presided over by Major Ormby Gore, which visited East Africa to enquire into certain aspects of the questions referred to the Southborough Committee.

The report of the Ormby Gore Commission was published in the United Kingdom on May 7th, 1925. On June 9th, Major Ormby Gore announced in the House of Commons that, in view of the completeness of the report presented by the Commission which, under his chairmanship, had visited East Africa, His Majesty's Government had decided that the Southborough Committee should not resume its sittings.

CLOSER UNION

In view of the issue of another White Paper in July 1927, in which it was announced that His Majesty's Government had authorised the Secretary of State for the Colonies to send to Africa a special Commission to investigate the possibility of securing more effective co-operation between the Governments of Eastern and Central African Dependencies and make recommendations on this and cognate matters, the question regarding the position of Indians in Kenya again came to the forefront.

In March 1929, the Secretary of State for the Colonies sent out Sir Samuel Wilson, Under-Secretary of State for the Colonies, to East Africa to discuss the recommendations of the Hilton Young Commission for the closer union of Kenya, Tanganyika and Uganda (and such possible modification of these proposals for effecting the object in view as may appear desirable) with the Governments concerned and also with any bodies or individuals representing the various interests and communities affected, with a view to seeing how far it might be possible to find a basis of general agreement.

Sir Samuel was also directed to ascertain on what lines a scheme for closer union would be administratively workable and otherwise acceptable and to report the outcome of his consultations. At the invitation of the Secretary of State for the Colonies, the Government of India deputed the Rt. Hon. V. S. Srinivasa Sastri, P.C., to East Africa to help the local Indian communities to state their views to Sir Samuel Wilson on matters arising out of the Hilton Young Commission's Report and to be at Sir Samuel Wilson's disposal, if he wished to make use of him in dealing with the Indian deputations.

The report of Sir Samuel Wilson was published on the 5th October 1929. Another meeting of the Standing Emigration Committee was held soon after to consider the report and a further communication was addressed to His Majesty's Government on the subject.

The conclusions of His Majesty's Government as regards closer union in East Africa were published in June, 1930, in the form of a White Paper and it was announced that they would be submitted to a Joint Committee of the two Houses of Parliament. In accordance with this decision a Select Committee was set up in November, 1930. The Government of India communicated their views in a despatch

to the Secretary of State for India on the scheme set out in the White Paper in so far as it affected the Indian population in East Africa. With the permission of the Joint Select Committee of Parliament they also deputed the Right Honourable V. S. Srinivasa Sastri, as their representative to present their case and elucidate in the course of oral examination such questions as the Committee might consider necessary to refer to him. The Select Committee examined Mr. Sastri in July, 1931.

THE REPORT

The report of the Committee was published simultaneously in England, East Africa and India on the 2nd November, 1931, and the decisions of His Majesty's Government on the recommendations of the Committee together with certain correspondence arising from the report of the Committee were also similarly published on the 24th August, 1932.

As regards the question of closer Union, His Majesty's Government accepted the view of the Joint Committee that apart from considerations arising out of the Mandatory position of the Tanganyika Territory, the time had not arrived for taking any far-reaching step in the direction of the formal Union of the several East African Dependencies.

There was no important development in regard to this question until 1935 when certain sections in Kenya attempted to revive the proposal for closer union. Early that year an unofficial conference of Europeans, held at Arusha, was reported to have expressed the view that since 1931 circumstances had changed so rapidly as to justify a reversal of the Joint Committee's decision and that immediate steps should be taken towards the closer union of East Africa. A "Memorandum on Union" was also forwarded to the Secretary of State for the Colonies by the European Elected Members' Organisation of the Kenya Legislative Council. His Majesty's Government did not, however, consider that there were adequate grounds for reopening an enquiry into the matters which had been so carefully investigated by the Joint Select Committee as recently as 1931. This decision is contained in Malcolm MacDonald's despatch, dated the 12th October, 1935, to the Governor of Kenya which was published in all the countries concerned.

Franchise.—As regards franchise, His Majesty's Government stated in the White Paper of 1930 that "His Majesty's Government are of the opinion that the establishment of a common roll is the object to be aimed at and attained, with an equal franchise of a civilization or education character open to all races." In 1931 the question of franchise was also referred to the Joint Select Committee of Parliament which was appointed to consider the question of Closer Union. After discussing the arguments that had been brought forward for and against a common electoral roll, the Select Committee stated in para. 100 of their report that it was impracticable under the prevailing conditions to advocate the adoption of the system of common roll representation in preference to the existing system of election. The Secretary of State for the Colonies accepted the recommendations of the Joint Select Committee in the matter.

Highlands.—The Joint Select Committee of Parliament had recommended that "in view of the nervousness among the native population as regards the land question, a full and authoritative inquiry should be undertaken immediately into the needs of the native population, present and prospective, with respect to land within or without the reserve held either on tribal or on individual tenure." In April, 1932, a Commission was accordingly appointed by His Majesty's Government and the terms of reference of the Commission included the following:

'To define the area known as the Highlands within which persons of European descent are to have a privileged position in accordance with the White Paper of 1923.'

The Commission in their report, which was published in May, 1934, recommended that the boundaries of the European Highlands should be safeguarded by Order-in-Council so that the European community might have the same measure of security in regard to land as the Commission had recommended for the natives. His Majesty's Government announced that they accepted this recommendation of the Land Commission.

The Indian community was perturbed by this announcement as the proposed Order-in-Council would give statutory effect to restrictions which were originally considered necessary on grounds of administrative convenience and representations were made to His Majesty's Government both by the Government of India and the local Indian community.

In spite of protests from the Government of India and the local Indian community, the Order-in-Council was issued in February, 1939. Though the Order did not contain a definition of the 'privileged position' which persons of European descent were to have within the territorial limits to be included in the Highlands, His Majesty's Government made it clear that there was no intention of changing the administrative practice which had been followed for many years with regard to alienation and transfer of land in the Highlands.

This decision caused profound disappointment to all sections of Indian opinion both in Kenya and in India, in particular because of the preference which it accorded even to non-British subjects of European race.

Two Ordinances.—In 1944 another important development took place. In the middle of the year the Kenya Legislature passed two Ordinances, namely (a) the Land Control Ordinance, 1944, and (b) the Crown Lands (Amendment) Ordinance 1944. The objects of the Land Control Ordinance were stated to be (i) putting land to the most beneficial use, (ii) empowering the Crown to acquire land for settlement purposes, and (iii) prevention of speculation in land to the prejudice of post-war settlement.

Under this Ordinance a Board called the Land Control Board has been established. The Board is to have, subject to any special or general direction of the Governor, absolute control over all transactions in land in the Highlands. It consists of three official

members and 4 other persons appointed by a majority of the European elected members of the Legislative Council of Kenya. One of the objects of the second Ordinance is to make the provisions of the Crown Lands Ordinance 1915 more effective by giving a power of veto to the Governor, in exercise of which he can disallow inter-racial transfers of shares in a landowning company, as is being done in the case of inter-racial transfers of land.

Both the Ordinances have been strongly denounced by the Indian community and the Indian members of the Legislature, who have always been opposed to the practice of reservation of the Highlands to the Europeans. The Government of India also made suitable representations against this legislation.

Subsequent to the announcement made in the House of Commons in 1924, in connection with the 'Lowlands,' the question of deputing an officer to examine these areas was considered by the Government of India but they thought it inadvisable to proceed any further with the idea.

REORGANISATION

Another matter which led to much controversy in 1945 was the reorganisation of the administration of Kenya. The Government of Kenya proposed to expand the Executive Council of the Governor. Under the proposals the official members of the executive council were to be made the members of the Executive Council in charge of Departments and the non-officials were to be allowed to hold portfolios in respects of two of the Departments, viz., Agriculture and Natural Resources and Local Government portfolios.

The Indian community opposed these proposals on the ground that the appointment of non-officials who would invariably be Europeans as members in charge of Departments would be detrimental to Indians' interest. They suggested that if Government were keen on utilising the experience of non-officials it should be done by means of advisory bodies and that Indians should also be given a share in the Government. The proposals were debated in the Legislative Council of Kenya and were adopted in spite of the opposition of all non-European members. A non-official European has been given the charge of the new Department of Agriculture and Natural Resources.

INTER-TERRITORIAL ORGANISATION

Colonial Paper 191 published on December 12, 1945 contained the proposals of U.K. Government for an inter-territorial organisation in East Africa. Briefly these proposals were:—

- to set up an East African High Commission consisting of the Governors of Kenya, Uganda and Tanganyika,
- to constitute a Central Legislature, and
- to create a federal executive organisation for the services which are to be operated in common between the territories.

The Legislative Assembly was empowered to legislate on defined subjects throughout Kenya, Uganda and Tanganyika and was to consist of 12 official and 24 unofficial members of whom

6 were to belong to each of the European, Indian and African communities. The equality of racial representation on the un-officials side considerably attracted Indian and African opinion which expressed itself in favour of the acceptance of the proposals, but these were subjected to criticism by the European community. Following the visit of the then Under-Secretary of State for Colonies, Mr. Creech-Jones, to East Africa in 1946, revised proposals were published in Colonial Paper No. 210 of 1947. In the revised proposals the principle of equality of racial representation on the un-official side of the Central Legislature has been given up; and instead, equality of territorial representation has been proposed. The composition of the Assembly under the original and the revised proposals is given below:—

Original proposals

12 Official members

Un-Official members:

6 European members, two from each territory, elected by the un-official European members of the Territorial Legislative Councils.

6 Indian Members, two from each territory, elected by the un-official Indian members of the Territorial Legislative Council.

6 members to represent Africans nominated by the High Commission.

2 Arabs nominated by the High Commission.

4 other members nominated by the High Commission.

Revised proposals

7 official members appointed *ex officio* from the staff of the High Commission services.

5 members appointed from Kenya

5 members appointed from Uganda

5 members appointed from Tanganyika.

1 member of the Arab Community appointed by the High Commission.

The Indian community and the Africans have expressed their opposition to the revised proposals. The U.K. have however announced their decision to bring them into operation on 1st January 1948.

WAR-TIME RESTRICTIONS

In December, 1943, the Government of Tanganyika informed the Government of India that on account of extreme pressure on housing and other accommodation, it was proposed to restrict the entry into the territory of non-natives who were not essential for war work. Persons normally resident in the territory were, however, to be exempted from the restrictions provided they had not been away for more than two years.

The Government of India pointed out to the Tanganyika Government, among other things, that due to acute shortage of shipping it would not be possible for many Indians otherwise 'normal residents' of the territory to return within two years and asked for their exemption from the scope of the proposed restrictions. The Tanganyika Government while not agreeing to the exemption of such persons, assured the Government of India that the regulations would be enforced with due regard to the circumstances of each case. The Regulations were promulgated on the 14th February, 1944.

In the third week of February, 1944, the Governments of Kenya and Uganda also intimated to the Government of India that on account of acute shortage of housing and food they also proposed to enact legislation similar to that of Tanganyika and promulgated Defence Regulations imposing restrictions on immigration on the 1st March, 1944. The East African Governments assured the Government of India that the Regulations were not discriminatory and that they would be terminated after the war.

The restrictions, however, aroused great apprehensions among Indians in East Africa and India. Several representations were made to the Government of India and deputations waited on them. The matter was also raised in the Council of State and it was stressed by all that the restrictions were the outcome of strong anti-Indian agitation carried on by local Europeans and were only the thin end of the wedge, designed to exclude Indians from East Africa after the war. The pleas of housing and food shortage were described by the critics as groundless.

On representation by the Govt. of India the Colonial Government assured the Government of India that entry permits would be granted to all *bona fide* residents of the Colonies even though they might have been absent from the Colonies for more than two years.

With the cessation of hostilities in 1945, it was expected that the immigration restrictions which were introduced in the East African territories as a result of the War, would be removed. It was however made known that the war-time regulations would be withdrawn in the year 1946 and that in the meantime new proposals for post-war legislation on immigration were being examined and would be published early. In February 1946 the Emergency Powers (Defence) Act 1939 to 1945 of the British Parliament were abrogated and consequently the Defence Immigration regulations in East Africa lapsed. These were however revived as an interim measure till 31st December 1946 until the contemplated immigration legislation for the post-war period had been passed.

IMMIGRATION BILL

An Immigration Bill was published simultaneously by the Tanganyika, Kenya and Uganda Governments in the month of April 1946. The Bill has produced agitation among the Indian community in East Africa who apprehend that although it is non-racial in terms it will be discriminatory in effect against them. This Bill is proposed to be enacted as a permanent measure with a view to tightening up the immigration restrictions.

Section 5 of the Bill specifies who are "prohibited immigrants". Any person born in the colony is not a "prohibited immigrant". Classes of persons who are "prohibited immigrants" have been defined. Persons other than "prohibited immigrants" can enter the colony if they have residential certificate issued under the ordinance. Class of person who can apply for residential certificates for entering or re-entering the colony have been

enumerated. An immigrant intending to engage in agriculture and animal husbandry has to prove that he possesses a sum of at least £300. Anyone wishing to engage in mining has to possess sum not less than £1,000. A person wishing to engage in trade on his own account has to show that he holds £2500. Most Indians wish to go to East Africa as traders and shopkeepers and thus the requirement of a large bank deposit of £2,500 will practically stop the Indian immigration.

As a result of the representation of the Indian community the second reading of the Bill was postponed till October 1946. In August 1946 the Government of India sent a delegation to East Africa under the leadership of Raja Sir Maharaj Singh to study the facts and circumstances relating to the Immigration Bill in East African Legislatures. The Delegation returned in the last week of September and submitted a report to the Government of India. The report expressed the view of the delegation that there was no material to indicate the absorptive capacity of the territories and suggested that before immigration is controlled a population census and an economic survey be held.

Revised Immigration has recently been introduced in the Kenya Legislative Council. The revised bill contains most of the objectionable features of earlier bills, but some suggestions made by the delegation have also been incorporated. Inter-territorial movement in East Africa, which was severely restricted in the original bill, has been liberalised in the revised bill in favour of permanent residents. The capital sums to be possessed by intending immigrants for trade have been reduced as follows:

	From	To
for mining	£1,000	£800
for trade	£2,500	£800
for manufacture	£10,000	£2,500

But some new restrictions have also been introduced. Under the revised bill mere intention to engage in trade, etc. and possession of the prescribed capital (as provided in the original bill) are not enough; but the prescribed authority should be satisfied that such engagement in trade, etc., of the person will not be to the prejudice of the inhabitants generally of the territory. Further if any licence is required by such person in engaging in the trade, etc., he must be in possession of such licence or he must satisfy that he will be able to obtain one, before he enters the territory. The bill has passed Second Reading and is before the Select Committee.

Government of India Agent.—Demand for an Agent of the Government of India in the East African territories has been voiced from time to time. At the request of the Government of India, which was repeated this year, His Majesty's Government in U.K. have agreed in principle to the appointment of Indian Agents in East Africa, Mauritius, Fiji and British West Indies subject to agreement being reached about their precise status and functions. Discussions are now in progress between the two Governments on these points.

Nyasaland, Rhodesias.—In May, 1938, a Royal Commission under the Chairmanship of Lord Bledisloe was appointed to enquire and report whether any and, if so, what form of closer co-operation or association between Southern Rhodesia, Northern Rhodesia and Nyasaland was desirable and feasible, with due regard to the interests of all the inhabitants, irrespective of race. It was apprehended that if amalgamation took place, there would be danger of Indian residents in those territories numbering about 4,100 being subjected to restrictions similar to those obtaining in the Union of South Africa. The Commission reported to H.M.G. in March, 1939, recommending against the immediate federation of the two Rhodesias and Nyasaland but in favour of organised closer relations with a view to eventual unification. H.M.G. were understood to have received the views of the Governments of Northern Rhodesia and Nyasaland and discussed them with the Prime Minister of Southern Rhodesia, but further discussions were suspended due to war.

In October 1944, His Majesty's Government announced the setting up of a Standing Central African Council for bringing about the closest possible co-ordination between the Governments of the two Rhodesias and Nyasaland. The Governor of Southern Rhodesia is its Chairman.

Proposals for Segregation.—In 1945 a bill known as the "Town and Country Planning Bill" was introduced in the Legislative Assembly of Southern Rhodesia. It contained a clause which provided for reservation of residential areas for occupation by non-Europeans. The Indians in the Colony objected to this clause and ultimately it was deleted from the Bill by a vote of the Legislature and did not become law. Towards the end of 1947 press reports indicated that certain municipalities in South Rhodesia were putting pressure on the Southern Rhodesian Government to introduce legislation for the segregation of Indians in the Colony. On 16th December 1947 at a special meeting the Bulawayo City Council passed a resolution calling on the Government of Southern Rhodesia to introduce legislation for bidding Europeans to sell, lease or hire property in a European area except to Europeans and providing that the local authorities may reserve specific areas for non-Europeans. This anti-Indian agitation has caused grave apprehensions among the Indian Community.

Fiji

Emigration to Fiji was stopped in 1917, under Rule 18 (B) of the Defence of India (Consolidated) Rules in pursuance of the general policy of stopping recruitment under the indentured system of emigration. With a view to secure, if possible, a renewal of emigration to the Colony, an unofficial mission composed of the Bishop of Polynesia and Mr. Rankine, Receiver-General to the Fiji Government, arrived in India in December 1919, and submitted a scheme of colonisation, which was referred to a committee of the Imperial Legislative Council on 4th February, 1920. To secure a favourable reception for the mission the Fiji Government cancelled all outstanding indentures of East Indian labourers from 2nd January, 1920, and also announced their intention to take early measures to provide

for the representation of the Indian community on the Legislative Council on an elective basis by two members.

In accordance with the recommendations made by the Committee the Government of India informed the mission in March, 1920, that they would be willing to send a Committee to Fiji provided that the Government of Fiji and the Secretary of State for the Colonies would guarantee that "the position of the emigrants in their new home will in all respects be equal to that of any other class of His Majesty's subjects resident in Fiji." In July, 1920, the Government of Fiji informed the Secretary of State for the Colonies of their willingness to give the pledge, subject to his approval. Arrangements with regard to the contemplated deputation, however, were postponed until January, 1921, owing to the announcement of Lord Milner's policy in regard to Indians in Kenya, and the desirability of consulting the new Legislature in India. After consultation with the Fiji Government as to the terms of reference and personnel of the deputation, an announcement was made on the 27th June, 1921. But owing to the inability of the two Indian members, Messrs. Srinivasa Sastri and Hirdaynath Kunzru, who had been nominated to join the Committee which as finally constituted consisted of Messrs. Venkatapati Raju, G. L. Corbett, Govind Sahai Sharma; and Lieutenant S. Hissam-ud-din Khan did not reach Fiji until the end of January 1922.

LABOUR TROUBLES

The labour troubles in Fiji in the years 1920-21 had produced an unexpected result in India. The Government of Fiji cancelled the indentures of Indian labourers, as from January 1920, while arrangements were made for the early repatriation of such of them as desired to return to their own country. In consequence, large numbers left Fiji. Many arrived in India comparatively destitute; while others, who were colonial born or whose long residence in the colonies had rendered them unfit for the old social conditions, found themselves utterly out of place—indeed foreigners—in their own country. Returned emigrants from other colonies also, being in difficulties owing to the unfavourable economic situation in India, strongly desired to return to the territories from which they had come.

During the early part of 1921, from all parts of India there was a steady drift of destitute and distressed labourers in the direction of Calcutta where they hoped to find ships to take them back to the colonies in which they were certain of work and livelihood. At the earnest representation of the Fiji Government, and after full consultation with representative public men, arrangements were made to relax the emigration restriction in favour of those Indians who were born and had property in any colony, as well as of such near relations as they desired to take with them.

Admirable work was done among these distressed persons by the Emigrants' Friendly Service Committee which had been formed primarily to deal with the applications

of repatriated Indians desirous of returning to Fiji. The Government of India gave discretion to this Committee to permit persons who could prove that they had been in Fiji to return there if they so desired. The local labour conditions stimulated the return of these unfortunate people by giving them assisted passages. The Legislative Assembly had made a grant of £1,000 for the maintenance of these labourers, until such time as they were able to find work and settle down in India. The deputation from India left Fiji on the 3rd April, 1922, and submitted its report to the Government of India. It has not been published.

REPRESENTATION

In February, 1929, Letters Patent under which the constitution of the Fiji Legislative Council was revised, were issued. Provision was made, *inter alia*, for the election of three Indian members on a communal basis. On the 5th November, 1929, one of the Indian members moved a resolution recommending the adoption of a common electoral roll in place of the existing communal one. The resolution was supported by the three Indian members and opposed by the rest of the Council including the elected European and nominated Fijian members. As a protest against this vote, all three Indian members resigned their seats and, no Indian having subsequently offered himself for election, the seats remained unfilled throughout the life of the Council. A fresh election was held during 1932 and as a result two Indian constituencies returned their representatives to the Council, but no candidate offered himself for election from the third constituency.

In 1935, the elected Indian members of the Legislative Council advocated a system of nomination in place of the system of election and the proposal was opposed by the local Indian Association. European opinion was divided. The Government of India supported the principle of election and made representations to His Majesty's Government. The decision of His Majesty's Government is contained in the despatch, dated the 20th July 1936, addressed by the Secretary of State for the Colonies to the Government of Fiji. The main points of the decision were:—

(a) the Fijian representatives should be selected as heretofore, viz., by the Governor from a panel submitted by the Great Council of Native Chiefs;

(b) some of the European and Indian members should be elected and the others nominated;

(c) the circumstances were such as to make it impossible to arrange for representation of the three sections of the population by means of a general franchise. The Legislative Council should consist of the Governor, 16 official members, 5 European members (3 to be elected on a communal franchise and 2 to be nominated), 5 Fijian members (all to be selected as at present) and 5 Indian members (3 to be elected on a communal franchise and 2 to be nominated).

The Legislative Council as newly constituted met in September, 1937. Fresh elections to the reformed Legislative Council took place in 1940.

LAND TENURE

The most important problem affecting the Indian community in Fiji is that of land tenure. Out of the total Indian population of 94,966 estimated in 1939, a very large majority consists of agriculturists, but alienation of native-owned land is prohibited. More than 80 per cent. of the land in the Colony is held by native owners as tribal land, and the rest is held as Crown grants or as freehold property mainly by the Colonial Sugar Refining Company, Ltd. Indians hold land as lessees from the native owners for the cultivation of rice, sugarcane, etc., and from the Colonial Sugar Refining Co., for cultivation of sugarcane.

Practically the whole problem is one of security of tenure and the encouragement given to Fijians to cultivate their own lands with the most stable and profitable crop, sugarcane caused some alarm to Indians engaged in agriculture. A number of practical difficulties connected with the leases which in main related to the procedure for obtaining leases and the administration of the land law were also brought to the notice of the Government of India.

In September, 1936, the Council of Chiefs of Fiji agreed that all lands (including leases) not required for the maintenance of the Fijian owners should be opened for settlement; that to further this end a Committee should be appointed to inquire into and to determine the amount of land needed for proper development by the Native owners; and that all land (including leases) not so required should be handed over to the Government to lease on behalf of the Fijians.

Land Trust Bill.—As a result of the examination of the question the Colonial Government came to the conclusion that the most satisfactory method of procedure would be for Government to take power to deal with all the native lands in the Colony, and then to appoint a Commission to determine the lands to be set aside for the exclusive use of the Fijians. These proposals were referred to the Council of Chiefs in October, 1938, and accepted by them. A Bill entitled Native Land Trust Bill was published by the Government of Fiji in the Gazette dated the 17th November, 1939 to give effect to the proposals referred to above. The Government of India made suitable representations on the Bill, and the Bill with certain amendments passed its third reading on the 22nd February, 1940, and was assented to by the Governor.

The Native Land Trust Ordinance, 1940, provides for the formation of a Native Land Trust Board to administer all native land in the Colony on trust. A Fijian Commission has been appointed to conduct enquiries into particulars of land needed for Fijian use and to report to the Board, but with a view to safeguarding the interest of Indians, it has been arranged to depute an Indian Assistant to the District Commissioner to accompany the Commissioner and to place before him any representations made by Indian lessees. The Colonial Government have also agreed that existing occupants of land should not as far as possible be disturbed.

Though there is no Indian representation on the Board, provision has been made for such representation on local committees which have been set up to advise the Board in respect of native land in those areas. Regulations have been framed regarding the terms and conditions of leases to be granted by the Board and provide *inter alia* for the grant of agricultural leases up to a term of 99 years.

Fiji Sugar Dispute, 1943.—In view of the rising cost of living due to war, the sugarcane farmers in Fiji, who are mostly Indians, demanded, in June, 1943, a higher price for their cane. The Sugar Refining Company, who has the monopoly of sugar production in the Colony, refused any increase in the price of cane until and unless the price of sugar was increased by the Ministry of Food, United Kingdom, to whom the Company was bound to sell all its produce. The farmers thereupon decided not to harvest their crop. They stuck to their decision in spite of appeals made by the Governor of the Colony. As the crushing season advanced, the feelings amongst the Indians ran high. Some of them even ploughed in their crops. All attempts on the part of Indian leaders to reach an amicable settlement having failed till the end of the crushing season, the major part of the cane crop in the Colony remained unharvested.

In March, 1944, the Secretary of State for the Colonies announced in the House of Commons his decision to send an independent expert to the Colony to report upon the matter and further informed the House that Dr. C. Y. Shephard of Trinidad had agreed to conduct the enquiry. Though the report has since been published, most of the recommendations made of Dr. Shephard in his report have not yet been implemented.

WELFARE LEGISLATION

Three important Ordinances bearing on the subject were passed in 1941. These are (1) The Industrial Association Ordinance (No. 18 of 1941), (2) The Industrial Disputes (Conciliation and Arbitration) Ordinance (No. 19 of 1941) and (3) The Labour (Welfare) Ordinance (No. 20 of 1941). No. (1) provides for the formation, registration and regulation of Industrial Associations; No. (2) provides for the investigation and settlement of industrial disputes and No. (3) authorises the appointment of a Commissioner of Labour to safeguard and promote the general welfare of workmen in the Colony.

Education in general, and Indian education in particular, has made considerable progress in the last few years. In 1928 there were only one Government and 23 aided schools out of which one was Indian. The number of Indian schools now is 88 as against 230 European and Fijian Schools. Education in the Colony is under the control of a Board of Education consisting of 8 members of whom 2 are Indians.

Residential Tax.—According to the Fiji Residential Tax Ordinance, passed in July 1923, all male persons between the ages of 18 and 60 other than the Fijians and Rotuman residents in the Colony were liable to pay a tax not exceeding £1 per annum per person. The tax was imposed with the object of raising

additional revenue for effecting improvements in the Colony. The Ordinance evoked very strong opposition among the Fijian Indians, but in course of time they became reconciled to the tax.

During the last war a further tax of 10sh. per head per annum was imposed. An assurance was however, given by the Government of Fiji that this additional war tax would be lifted as soon as the war ended. The promise was kept but simultaneously with the lifting of the war tax, the Residential Tax was increased from £1 to £2 per head. Those who pay income-tax are exempted from the tax, with the result that almost the entire European population is exempt from the tax, as majority of them pay the income-tax. In actual practice therefore the incidence of the tax has mainly fallen on the Indians whose economic condition has not shown improvement proportionate to the increase in the tax now demanded.

BRITISH GUIANA

The Indian population in this colony belong almost entirely to the labouring classes and their grievances are mainly economic. Towards the end of 1919, a deputation consisting of the Hon'ble Dr. J. J. Nunan, Attorney-General, and J. A. Luckhoo, a prominent Indian who was a member of the combined court, visited India to put forward a scheme for the colonisation of British Guiana by means of emigration from India. This was examined by a Committee of the Indian Legislature, which advised that a deputation be sent from India to investigate conditions on the spot. Owing to certain unforeseen circumstances it was not found possible to proceed with the proposal until 1922, when a deputation consisting of Messrs. Pillai, Keatinge and Tivary visited British Guiana. Mr. Keatinge was a former member of the Indian Civil Service who had retired from the post of Director of Agriculture, Bombay; Diwan Bahadur P. Kesava Pillai was an elected member of the Madras Legislative Council of which he was also Vice-President; and Mr. Tivary was a member of the Servants of India Society who had done considerable amount of Social Welfare Work among the Depressed Classes in the United Provinces.

The two reports of the deputation were published on the 21st of January, 1924. Towards the end of the month a deputation from the Colony of British Guiana consisting of Sir Joseph Nunan, Kt., and the Hon. Mr. J. C. Luckhoo, K.C., arrived in India for further discussions. The Standing Emigration Committee of the Indian Legislature eventually reported that while they would be inclined to view with favour the colonisation scheme put forward by the deputation, they would, before making any definite recommendation, like the Government of India to depute an officer to British Guiana to report on certain matters.

Kunwar Maharaj Singh, M.A., C.I.E., Bar-at-Law, was deputed for this purpose. He proceeded to that Colony in September, 1925. His report was received on February 1st, 1926, and published. As a result of the

report a notification was issued by the Government of India in March, 1926, with the approval of the Standing Emigration Committee and the Indian Legislature, permitting reopening of emigration to British Guiana on certain terms. Certain recommendations of Kunwar Maharaj Singh relative to the improvement of the position of the existing Indian population in the Colony were also supported by the Government of India to the Colonial Government who accepted all of them in principle and stated that some of them were already being acted upon. The Colonisation scheme did not, however, eventually materialise; the Roy-Wilson Commission of 1926 recommended that it should not be brought into operation in view of the high cost involved, and in June 1927 the Colonial Government, with the concurrence of the Government of India, decided to postpone the scheme indefinitely.

LABOUR LEGISLATION

In March, 1928, following special inquiries by the Colonial Office, reports appeared in the press that a bill had been introduced in the House of Commons empowering His Majesty's Government to alter the constitution of British Guiana by Order in Council. The changes eventually introduced by the British Guiana (Constitution), Order in Council 1928, did not involve any differentiation against Indians and did not in any way infringe the provisions of the special declaratory Ordinance which was passed by the Colonial Government in 1923 and which confers equality of status on all persons of East Indian race resident in the Colony.

Nothing important about the Indian community in that colony was heard till September-October 1935, when there were labour disturbances on certain sugar estates. A Commission was appointed by the Governor to enquire into and report on (a) the causes which led up to the disturbances and (b), *inter alia*, the condition of labour on sugar estates; and to advise on the measures necessary to obviate the recurrence of similar disputes. From the report of the Commission, which was published in December 1936, it would appear that the disturbances were primarily of an economic character and were inspired by grievances and disabilities which the Commission found to be genuine and which were common to both African and Indian labourers whether resident or non-resident.

There is reason to suspect that the position of the Indian labourer has somewhat deteriorated in the last few years. The abolition of the indentured system was no doubt most desirable and constitutes a theoretical advance, but as things are at present the Indian labourer no longer enjoys the measure of security provided by the Immigration Ordinance in regard to pay, hours of work and other benefits and the supervision of the Immigration officers in his relation with the plantation authorities. In order to remedy this state of affairs, the Commission recommended:

(i) the creation by Government of some authority with such powers as were considered necessary for the efficient safeguarding of the interests of both employed and employer; and

(ii) the revision of the provision of the Employers and Servants Ordinance in the light of more modern conceptions of the relations between employer and employee.

In 1942, a Labour Ordinance (No. 2 of 1942) was passed. This Ordinance provided for the appointment of a Commissioner of Labour for the regulation of the relations between employer and employees and for the settlement of disputes between them. This brought the labour laws of British Guiana in line with modern conceptions of labour legislation. The Government of India were given an opportunity to comment on the Ordinance at the Bill stage and certain modifications suggested by them were incorporated in it.

ROYAL COMMISSION

The decision of His Majesty's Government to appoint a Royal Commission to conduct a comprehensive survey of the social and economic problems affecting the group of the West Indian Colonies was announced by the Secretary of State for the Colonies in the House of Commons on the 14th June, 1938, in the course of the debate on the Colonial Office vote during which discussion largely centred around conditions in the West Indies. The actual terms of the Commission (which were announced in the House of Commons on the 28th July) were the following:—

"To investigate social and economic conditions in the Barbados, British Guiana, British Honduras, Jamaica, Leeward Islands, Trinidad and Tobago, and Windward Islands and matters connected therewith and to make recommendations."

In view of the large number of Indians in Jamaica, Trinidad and British Guiana and the importance of the Indian case in these territories being properly presented before the Royal Commission, the question of (deputing someone from India) safeguarding the interests of Indians engaged the attention of the Government of India.

As a result of representations made by them, they were able to secure the approval of His Majesty's Government to the deputation of an officer to represent their views before the Commission and to assist Indians in the West Indies in the presentation of their case. Mr. J. D. Tyson, C.B.E., I.O.S., who was secretary to the Rt. Hon'ble V. S. Srinivasa Sastri, when the latter went as the first Agent in the Union of South Africa, and subsequently represented the Government of India before the Joint Select Committee in South Africa on the Transvaal Asiatics Land Tenure Amendment Bill in 1930, was the officer chosen in this connection.

RECOMMENDATIONS

The Commission concluded taking evidence towards the end of March, 1939, and the report was made available to the press in October, 1939. Only a summary of the recommendations of the Commission were available; the report having been published by H.M.G. in June 1945. The Commission recommended that some officer or officers, preferably members of the labour department should specialise in East Indian questions and if suitable candidates were forthcoming should be East Indians.

The Commission also recommended that the possibility of the appointment of suitable East Indians to posts in the Government service should be carefully borne in mind by Colonial Governments. They expressed sympathy with the complaints regarding the arrangements for legitimisation and validation of East Indian marriages and recommended that these marriages should so far as the law was concerned be put on exactly the same footing as other marriages.

In effect the commission conceded practically all the demands to which Indians themselves attached importance. The general recommendations which related to matters of education, housing and labour administration appeared satisfactory and were likely to be of benefit to Indians. As an immediate step towards implementing the recommendations of the Commission His Majesty's Government announced their decision to increase the annual allotment to the Colonial Development Fund from £1,000,000 to a maximum of £5,000,000 for ten years and to sanction annually a grant up to £500,000 for the purpose of colonial research.

Marriage Bills.—In June 1945, an ordinance to make provision for the solemnization and registration of Hindu marriages in Trinidad and Tobago was enacted. The Ordinance provides for the appointment of Hindu priests as Marriage Officers and the solemnization by them of Hindu marriages. It makes the marriage officers to get the marriages solemnized by them registered with the Registrar of Hindu Marriages appointed for the Colony. Any marriage officer who fails to get registered a marriage solemnized by him, is made liable on summary conviction to a fine, but the marriage itself is not rendered invalid. Parties to any marriage can also apply to a Judge for an order directing the Registrar to register the marriage.

In British Guiana a Hindu Marriage Bill and a Muslim Marriage and Divorce Bill are receiving attention of the Government of the Colony. The Bills provide for the appointment of Marriage Officers and solemnization by them of Hindu and Muslim marriages. The duty for getting marriages registered here also is laid on the marriage Officers and no marriage is rendered invalid by reason only of its non-registration. Marriage solemnized by any person who has not been appointed as marriage officer or whose appointment as such has been cancelled, are deemed invalid and of no effect. The Muslim Marriage and Divorce Bill provides for Divorce Boards constituted of three marriage officers, each party selecting one and the two officers thus selected co-opting a third one, who would act as Chairman of the Board.

During 1939-40 Major G. Orde Browne was deputed by the Secretary of State for the Colonies to investigate and report on labour conditions in the West Indies. The Government of India took steps to ensure that any measures undertaken to ameliorate the condition of labour as a result of Major Orde Browne's recommendations should reach also the Indian labour population in British Guiana, Trinidad and Jamaica. The Government of India suggested with

reference to Indian labour in Trinidad that the Industrial Adviser should also concern himself with the evolution of machinery for collective bargaining among rural labour as in the sugar industry; and in regard to educational institutions in British Guiana, that the Colonial Government should make every endeavour to assume direct responsibility for their management and control.

CONSTITUTIONAL CHANGES

Some of the recent developments, since the visit of the West India Royal Commission, in the Colonies of British Guiana, Trinidad and Jamaica which contain considerable numbers of East Indians (as Indians in these parts are referred to) deserve mention. In Jamaica where Indians are less organised and fewer in numbers than in the other two territories, there had been a demand for the revival of the post of the Protector of Immigrants to deal with Indians which was abolished in 1934 as a measure of economy and the revival of the appointment was also recommended by Mr. Tyson in his evidence before the Royal Commission. This claim has since been conceded.

It has also been proposed to introduce constitutional reforms in the three Colonies immediately by reducing the proportion of official representation in the local Legislative Councils and increasing the extent of elected representation, while retaining the method of nomination for representation of minority or backward interests. In Jamaica where there is not much likelihood of any Indian securing election to the Council in view of the paucity of Indian voters and they not being numerically strong enough in any electoral district to have their effect felt, the Government of India have suggested that the possibility of nominating a member to safeguard Indian interests should be kept in view. In Trinidad and British Guiana local committees having Indian representatives were appointed to examine franchise questions.

The reports of the Franchise Commissions in both the Colonies were published in 1944. The British Guiana Commission recommended that for the purposes of franchise, the income and property qualifications should be approximately halved and there should be a literacy test in English. The Secretary of State for the Colonies accepted all the recommendations of the Commission except the language test which he decided should be in any language. The Indian members of the Commission has supported universal adult suffrage. The decision of the Secretary of State caused disappointment to the Indians, the majority of whom are illiterate labourers. The Secretary of State, however made it plain that the aim of policy in British Guiana was the adoption of universal adult suffrage at an early date. In Trinidad universal adult suffrage as in the case of Jamaica, has been introduced.

CEYLON

A satisfactory settlement regarding the standard wage and other outstanding questions affecting the interests of labourers was arrived at in 1927 and the legislation to give effect to it was passed by the Ceylon Legislative Council in December, 1927, as the 'Indian Labour

Ordinance No. 27 of 1927. The standard rate of wages agreed upon were introduced with effect from the 1st January, 1929. In view of the considerable fall in the cost of living and the precarious condition of the rubber and tea industries during the slump, the rates of wages in mid and low country estates were reduced in 1932 and 1933.

Since September, 1935, there has been little or no recruitment of Indian labour owing to the depression in the tea and rubber industries. In September, 1937, with an increase of prosperity in these two industries, the demand from the planters for extra labour became insistent. The Government of India did not feel justified in permitting recruitment unless some revision of wages was promised and Indian estate labourers were accorded the village Committee franchise.

WAGE RATES

With effect from the 12th June 1939. The Ceylon Government restored the wages of Indian estate labourers to the levels prevailing before the slump period since February, 1932, viz.:

	Men	Women	Children
Up-Country Cts.	49	39	29
Mid-Country "	47	37	28
Low-Country "	45	35	27

with provision for the supply of rice at a rate not exceeding Rs. 4-80 per bushel.

With the outbreak of war there was a general rise in commodity prices and a corresponding rise in the cost of living of the labourers. The period synchronised with a period of unrest and there was naturally a demand by the labourers and their associations for an increase in the rates of wages. With a view to meeting this demand the planters agreed to the grant of a war bonus at the discretion of the Superintendent of an estate. In order to place the scale of wages on a statutory basis, the Board of Indian Immigrant Labour recommended the following scale of wages after considering the varying recommendations of the Wages Boards:

	Men	Women	Children
Up-Country Cts.	54	43	32
Mid-Country "	52	41	31
Low-Country "	50	40	30

with the old provision about the issue price of rice to labourers.

These rates were brought into force from the 1st February, 1941, the grant of war bonus being discontinued from that date.

The following increased rates of wages came into legal force with effect from the 1st May, 1942:—

	Men	Women	Children
Up-Country ..	57	46	35
Mid-Country ..	55	44	34
Low-Country ..	53	43	33

With issue price of rice not exceeding Rs. 4-8 per bushel together with a "dearness allowance" for each labourer based on the cost of living index number, in the proportion of 5 : 3 for men, women and children respectively. The dearness allowance was subject to variation according to the prices of foodstuffs from time to time, but from October, 1942, the rate of

the allowance remained stationary at 30 cents for men and women and 18 cents for children, notwithstanding the increase in prices.

Dearness Allowance.—A special committee was constituted at the end of 1942 to examine the whole basis of the calculation of dearness allowances. The recommendations of the Committee were considered by the Board of Indian Immigrant Labour and certain modifications of the system of computing dearness allowance were brought into force in April, 1943.

As a result of further discussion by the Wages Boards. The following minimum rates of daily wage have been fixed from 1-8-45:—

	when index is between 211-219	Basic rate	Plus Dearness allowance	Total
		cts.	cts.	cts.
Male worker not under 16 yrs.		58	67	125
Female worker not under 15 yrs.		46	54	100
Child worker under 15 years		41	47	88

When the cost of living index for any month varies outside the limit 211-219, the dearness allowance for the following month is to be varied by 3 cents for a male adult and 2 cents for others for each complete unit of 5 points by which the index differs from 215. The minimum overtime rate is to be 25 per cent more than the minimum hourly rate during the day (7 a.m. and 7 p.m.) and 50 per cent more during the night.

One important feature of the new scale of wages is that the distinction hitherto made between the minimum rates for the up-country, mid-country and low country estates is not maintained.

INDO-CEYLON RELATIONS

In 1936, as a result of a resolution passed in the State Council, the Ceylon Government appointed an Immigration Commission to consider and report upon the problem of non-Ceylonese workers in Ceylon, particularly with a view to the restriction and effective control of immigration into Ceylon of workers from other countries, including assisted estate labourers.

The report of the Commissioner was published in April, 1938. The Commissioner came to the conclusion that, although in the absence of statistics it was not possible to estimate the extent of Indian immigration, the immigrant came to share the work when it was available and when it was not, he returned to his home; that the immigrant workers made possible an economic and general advance which could not have taken place without them; that Indians did not undercut wages; that the existing means of control of immigration were sufficient and that the restriction of Indian immigration for the protection of Ceylonese employment was not practicable.

Ban on Emigration.—Early in 1939, the Government of India came to know that the Ceylon Government had under consideration some scheme for the replacement of Indian

daily paid employees in the Government Departments by Ceylonese. The Government of India at once communicated to the Ceylonese Government their strong objection to the proposed scheme and suggested that it should be held in abeyance pending discussions at the time of trade negotiations, which were to take place between the two countries very soon. The Ceylon Government did not agree to that and also to other requests from the Government of India and the latter were compelled to withdraw their offer to negotiate a trade agreement and also to impose a ban on the emigration to Ceylon of Indian unskilled labour from the 1st August, 1939.

The Ceylon Government however, continued their policy of replacement of Indian daily-paid employees and by the end of 1940 over 2,500 employees, including about 1,200 workers, retired from Ceylon Government service under the scheme.

NEGOTIATIONS

The vindication of the cause of Indian immigration into Ceylon by the Immigration Commission did not satisfy Sinhalese opinion. The Board of Ministers were intent on some measure to control Indian immigration and a memorandum containing a summary of certain far-reaching proposals designed to restrict the entry of persons into Ceylon, whether for purposes of permanent residence or for taking up any occupation in Ceylon, was referred to the Government of India in August, 1940, in accordance with an assurance given to them in the matter. It was agreed to discuss these proposals during the informal conversations arranged to be held in November, 1940, in New Delhi to consider all questions outstanding between the Indian and Ceylon Governments.

The Conference was held at New Delhi from the 4th to the 12th November, 1940. The proposals of the Ceylon Delegation were conditioned by one main purpose, namely, a substantial reduction in the number of Indians resident in the Island, and sought to limit full citizenship rights to Indians in Ceylon in the second or third generation while extending certain restricted rights to those Indians with only a Ceylon domicile of choice (which was to include among other conditions to be prescribed residence in Ceylon for a minimum period of five years). They further proposed that all other Indians in Ceylon and future immigrants should be debarred for ever from acquiring franchise or other rights of citizenship.

The Government of India, on the other hand, pressed for full citizenship rights for Indians who had put in five years' residence in the Island and produced evidence of a permanent interest in the Colony and for opportunity for all other Indians in Ceylon on a prescribed date to qualify for such rights in due course. As the Ceylon Delegation were not prepared to modify their attitude, the talks ended in a breakdown of the negotiations.

On 4th March, 1941, the Board of Ministers introduced two Bills in the State Council, one to provide for the registration of persons in Ceylon who did not possess a Ceylon domicile of origin, and the other to make provision for the regulation and control of the entry of

non-Ceylonese into Ceylon. These bills were however held in abeyance by the Government of Ceylon pending an outcome of the India, Ceylon talks.

JOINT REPORT

In August, 1941, at the request of the Government of Ceylon, the Government of India agreed to a resumption of the informal conversations that had ended inconclusively at New Delhi in November, 1940. Delegations from the two Governments met at Colombo on the 5th September, 1941, and the conference ended on the 21st when agreed conclusions were reached on all the subjects discussed and a joint report was signed by the two Delegations.

The proposals in the joint report, however, came in for criticism from prominent Indians and Indian Associations in Ceylon, particularly in regard to the provisions about the establishment of domicile of choice, the reservation in the grant of franchise rights to the Indian population already in Ceylon, the absence of specific provision for the safeguarding of domicile rights of the children of holders of certificates of permanent settlement, the disabilities attaching to absence of more than a year, and the conditions on which future immigration might take place. Opinion in India was also strongly against the proposals in the joint report, and on 17th November, 1941, the Central Legislative Assembly rejected the joint report.

In view, however, of the developments in the Eastern political situation, it was agreed between the two Governments that further consideration of the Report should be suspended and that the *status quo ante* introduction of the Immigration Ordinance should be maintained. Considering the hardship caused to Indian labourers already in Ceylon on account of the ban, the Government of India relaxed the ban in respect of such labourers as were in Ceylon on 1st September, 1942. Soon after that, the Ceylon Government approached the Government of India for additional labour for rubber-tapping, on same terms of employment as those offered to Indian labour already in Ceylon and on the condition of compulsory repatriation to India at the end of war or after other agreed period. The Government of India set their face strongly against any suggestion of compulsory repatriation and made counter-proposals in this regard. But the Government of Ceylon did not agree to them.

DISCRIMINATION

In 1945 the Government of India had some correspondence with the Government of Ceylon for the resumption of Indo-Ceylon negotiations and the latter Government expressed a desire that the negotiations should be resumed when the first Government was formed in Ceylon under the new constitution. Accordingly, when the new Government was formed in Ceylon in September 1947, the Prime Minister of Ceylon came to Delhi in December 1947 for discussion with the Prime Minister of India on the Indo-Ceylon problem, and the two Prime Ministers agreed in principle on the question of citizenship rights of Indians in Ceylon subject to further discussion by the two Governments.

There are certain legislative measures enacted by the Ceylon Government which are in effect of discriminatory nature and have therefore affected Indians in Ceylon, the most important of them being the Land Development Ordinance, the Omnibus Services Ordinance and the Fishing Ordinance under which Indians are prohibited from enjoying the rights and privileges conferred on the Ceylonese.

CONSTITUTIONAL REFORMS

There are certain executive discriminatory measures also which affect Indians for example, by a circular issued in 1940 the Ceylon Government have restricted appointments to public Services to those 'Ceylonese' who are defined as a British subject born in Ceylon and one of whose parents was born in Ceylon.

The proposals for constitutional reforms in Ceylon were revived, as a result of persistent demands in that country, by a declaration by H.M.G. on the 26th May, 1943, authorising the Ministers to proceed with the drafting of proposals for a new Constitution, to be examined in detail by a Commission or Conference. The declaration put full responsible government under the Crown in all matters of internal civil administration as the goal of the contemplated constitutional advance. H.M.G. then announced in July 1944 that a Commission would be sent to Ceylon at the end of the year to examine the proposals made by the Ministers and it would enter into consultation with all minority parties concerned with the Constitution.

The Commissioner under the chairmanship of Lord Soulbury arrived in Ceylon on 22nd December, 1944, and invited proposals for the reform of the Ceylon constitution. The Indian community in Ceylon presented their case before the Commission which completed its sittings and returned to England in March 1945.

The report of the Commission on constitutional reforms for Ceylon was published on the 9th October 1945. They recommended the continuance of adult suffrage on the present basis with a legislature composed of the House of Representatives (consisting of 95 elected and 6 nominated members) and the Senate (consisting of 15 elected from the lower House and 15 nominated members) and a Cabinet on the British model with full responsibility in all matters in internal affairs. All Bills relating to defence, external affairs, and currency were to be reserved by the Governor-General for His Majesty's assent while any Bill relating to trade and communication was to be reserved if it prejudiced the interest of any part of the Commonwealth.

The safeguards for minorities were contained in the statutory prohibition of legislation, discriminatory against persons of one community or religion and the reservation by the Governor-General of any Bill involving oppression or serious injustice to any racial or religious community. The second chamber by impeding precipitate legislation and the Public Service Commission by its freedom from the taint of partisanship would also constitute additional safeguards.

The main demands of Indians in Ceylon that were placed before the Commission were the grant of franchise to the Indian community

in Ceylon on a footing of equality with the rest of the population and of citizenship rights to Indians resident in Ceylon for a prescribed period and making a declaration of permanent settlement in Ceylon. Their demands were ignored by the Commission and they left the Indo-Ceylon question to be decided by negotiations between the two Governments.

INDEPENDENCE ACT

On 31st October 1945, H.M.G. published a White Paper which accepted almost all of the recommendations of the Commission, but deviated from them only in minor details. A resolution regarding the acceptance of the White Paper was debated upon in the Ceylon State Council on 8th November 1945.

The Ceylon (Constitution) Order in Council was issued on the lines of the White Paper and published on 16th May 1946. A Delimitation Commission was also appointed by the Governor May 1946 to demarcate constituencies which would return Ceylon's first Members of Parliament under the new constitutions.

The General elections in Ceylon under the new Constitution took place in August-September 1947, and a new Government was formed in Ceylon in September, 1947.

The Ceylon Independence Act was afterwards passed by the British Parliament which conferred Dominion Status on Ceylon with effect from the 4th February 1948. Before this status was conferred on Ceylon, agreements were entered into between the Government of Ceylon and H.M.G. regarding external affairs, defence and public servants.

Exchange of Representatives.—In October, 1942, with the concurrence of the Government of India, the Government of Ceylon appointed their Special Representative in India to secure and maintain adequate food supplies for Ceylon from India and to improve relations between the two countries.

The Government of India also appointed, on a reciprocal basis, a Representative in Ceylon in August 1943 who has been since December 1947 redesignated as the High Commissioner for India in Ceylon. Towards the end of 1947, the Prime Minister of Ceylon, D. J. Senanayake, paid a visit to India. At the end of his talks with the Prime Minister of India it was reported, that all outstanding questions including the one about citizenship were amicably settled. The post of the Agent of the Government of India in Ceylon has also been continued.

MALAYA

The position of Indians in Malaya before the occupation by the Japanese has been fully dealt with in the 1942-43 issue of the Year Book. On the cessation of hostilities in August, 1945 the country was put under military administration till the establishment of civil Government on the 1st April, 1946.

The old office of the Agent of the Government of India in Malaya at Kuala Lumpur, which ceased to function on the Japanese occupation of the country, started functioning on the 1st September, 1945 under the charge of Mr. T. G. Nataraja Pillai, the Assistant

agent. In October, 1945 the Government of India appointed Mr. S. K. Chettur, I.C.S., their Representative and Liaison Officer with Supreme Allied Commander, South East Asia. He opened his office in Singapore in January, 1946. His designation was changed to that of the Representative of the Government of India in Malaya with effect from 1st April 1946. Mr. John A. Thioy formerly Resident of the Malayan Indian Congress was appointed Representative in August 1947 in succession to Mr. Chettur.

Condition of Indians.—Soon after the establishment of the military administration reports received in India showed that large number of Indians had been arrested and were being prosecuted because of their connections with the Indian Independence League and the Indian National Army.

The reports also showed that the economic condition of Indians, particularly that of labouring class, was unsatisfactory. A large proportion of the Indian labourers who had been drafted by the Japanese for the construction of the Burma-Siam Railway were reported to have perished and the survivors were said to be in miserable plight. On account of the repudiation of the Japanese issued currency called 'Banana' currency the sufferings of the labouring classes were aggravated. Acute shortage of cloth and medical aid was being felt.

The Government of India, therefore sent their Representative, Mr. Chettur to Malaya in November, 1945 to study the condition of Indians in that country. Soon after his return in December, 1945 a non-official delegation consisting of the Hon'ble Pandit H. N. Kunzru, Member of the Council of State and Mr. P. Kodanda Rao of the Servants of India Society was also sent by the Government of India. In December, 1945 the Working Committee of the Indian National Congress decided to send Pandit Jawaharlal Nehru to Malaya and he accordingly visited the country in March, 1946.

RELIEF MEASURES

The number of Indians arrested on charge of collaboration with the Japanese was considerable. The policy of the Military Administration in Malaya caused great stir both in Malaya and India. The Government of India after considering the reports of their Representative and of the Kunzru delegation undertook the defence of the Indian arrestees by sending a panel of competent lawyers from India. The policy of the Military Administration towards collaborators underwent a change in March, 1946 and in pursuance of that all cases against Indians charged of mere collaboration were withdrawn.

The Government of India through their representative in Malaya provided cash relief to deserving working class and middle class Indian families in Malaya. They also placed funds at the disposal of their Representative for assisting destitute Indians in their repatriation to India. Certain relaxations in the export regulations were made to permit

The Working Committee of the Indian National Congress in December, 1945 decided to send a Congress Medical Mission to Malaya. In March, 1946 the Government of India Medical Mission headed by Lt.-Col. T. S. Shastri proceeded to Malaya and it was closely followed by the Congress Medical Mission under the leadership of Dr. M. R. Cholkar. The two Missions worked in close collaboration and did much good work. The Congress Medical Mission returned to India in August, 1946 and the Indian Government Mission in September, 1946.

Repatriation.—Soon after re-occupation there was a great demand for passages from Malaya to India. Passages were however very scarce as there was no commercial shipping. Only a few berths became available on troopships from time to time. The Representative of the Government of India set up priorities committees at Singapore and Kuala Lumpur and whatever passages became available were allotted by those committees. The passage position however did not show much improvement by September-October 1946. To cope with the great demand for passages the Government of India specially chartered S.S. 'Jalgaon' with a carrying capacity of 1,500 deck passengers for the Malaya-India run. It made 4 trips and considerably reduced the backlog awaiting repatriation. The shipping position improved in early 1947. The Representative of the Government of India provided free passages to a number of destitutes.

CONSTITUTIONAL PROPOSALS

In January 1946, His Majesty's Government announced the policy on the future constitution of Malayan Union and Singapore. According to this the 9 States of Malaya and the British Settlements of Penang and Malacca were to constitute a Malayan Union. The Malayan Union and Singapore were each to be under a Governor and there was to be a Governor-General for the Malayan Union and Singapore. A common citizenship in the Malayan Union was also envisaged.

In July 1946 a Working Committee consisting of the representative of the Government, of rulers of Malayan States and of the United Malaya National Organisation was appointed to make proposals in regard to the future constitution of Malaya. The Working Committee submitted their report towards the end of 1946 and it was published in January 1947.

According to these proposals there was to be a Federation of Malayan States and the Settlement of Penang and Malacca and a separate administration for Singapore. There was to be a High Commissioner instead of a Governor-General of the Malayan Union. A Federal Council of 23 persons including 2 Indians was suggested. Besides, there was to be a Federal Executive Council. His Majesty's Government announced their final decision on these proposals in July 1947. The Federation plan has been accepted. The Federal Legislative Council is to consist of 50 members. The constitution

Labour Situation.—Most of the rubber estates were in a very poor shape after the re-occupation of Malaya. The British Military Administration offered employment to the labourers on the rubber estates on fixed wage rate at 60 cents per man and 57 cents per woman. Later in the year the Planters Association of Malaya fixed the basic rate of wage at 70 cents per man and 55 cents for a woman and 40 cents for a child, plus a cost of living allowance of 40 cents for an adult and 20 cents for a child.

As most of the commodities which the labourer used were in short supply and the level of prices was 400 to 500 per cent above the pre-war level, there was general dissatisfaction amongst the labourers. Shortage of rice, the staple diet, was another factor in causing this dissatisfaction. The events came to head in Kedah in July 1946 where there was serious trouble in the two large American owned estates, the Dublin Estate and the Harvard Estate, the number of people affected being 1,200 and 2,000 respectively. At about the same time a series of strikes also broke out on the Estes of Perak State involving some 3,000 Indian labourers in the Sungai Siput area. There was also a wave of sporadic strikes in Selangor, Malacca and Johore States. Some of the strikes were amicably settled by the intervention of the Representative of the Government of India. Labour wages however remained at a low level but on account of a slump in the rubber market the labourers desisted from strikes and demonstrations to get their demands fulfilled.

BURMA

Burma was occupied by the Japanese in early 1942. For an account of matters affecting Indians there see the Year Book for 1942-43. The Allied Forces made some advance in Burma in early 1945 and occupied Rangoon on 18th May, 1945. The Japanese surrendered in August, 1945 and soon after a military administration was established in the whole country under the Civil Affairs Service (Burma).

The Governor of Burma, who had remained in Simla during the war returned to Burma on the 16th October, 1945 and established civil administration in the whole of Burma except the Tena-serim Division from that date. The change-over from military to civil administration was, however, gradual and by the 1st January, 1946, the civil administration was established in the whole of Burma.

Political Changes.—H.M.G. made an announcement on the future of Burma in May 1945. The Governor of Burma appointed his Executive Council consisting of 9 members on 4th November, 1945 and a Legislative Council of 34 members on 1st January, 1946. He also appointed the Hon'ble Mr. S. A. S. Tyabji, M.B.E. as his Advisor on India affairs. The main political parties in Burma did not participate in the formation of the Executive Council or the Legislative Council. H.E. Sir R. H. Dorman Smith, the Governor of Burma resigned his post on account of ill-health and Major-General Sir H. E. Rance took charge on 31st August, 1946. As a result of his negotiations with political parties in Burma a national Government under the leadership of U. Aung San was formed on 28th September, 1946.

In January 1947, a Burmese delegation headed by U Aung San went to London to negotiate with H.M.G. the basis of transfer of power to Burma.

In accordance with the Attlee-Aung San Agreement General Elections to a Constituent Assembly were held in April-May 1947. The A.F.P.E.L. Party secured an overwhelming majority of seats in the Constituent Assembly. The Assembly adopted the final constitution of Burma in September 1947. The Constitution envisaged a Union of British Burma and the various States and tribal areas. It further provided that the Union of Burma would be a Republic outside the British Commonwealth. The transfer of power from British hands to Burmese took place on the 4th January 1948 when Burma was formally declared an independent Republic.

Indian Embassy.—The Office of the Representative of the Government of India with the Government of Burma which was functioning in Simla since October, 1944, moved to Burma in November 1945. Mr. Jamnadas Metha, the Representative of the Government of India resigned his post in June, 1946. Dr. M. A. Rauf was appointed Representative in October 1946. His Status was raised to that of High Commissioner in August 1947 after the independence of India. Later with effect from 4th January 1948 he was made Ambassador of India in Burma.

Burmese Embassy.—The Government of Burma appointed U. Win as their first High Commissioner in India in August 1947. His Status was raised to that of an Ambassador on 4th January 1948.

Immigration.—In 1944 the Governments of India and Burma were understood to be considering the question of future Indian Immigration into Burma. The discussions remained at official level and no progress appears to have been made.

On account of shortage of shipping and abnormal conditions prevailing in Burma immediately after its re-occupation, free entry of Indians was not allowed for some time. Passages to Burma were later controlled by the Government of India and facilities to proceed to Burma were provided by them to evacuees and such of the non-evacuees who desired to proceed to Burma on compassionate grounds or on business, etc.

The Government of Burma promulgated the Immigration (Emergency Provision) Act, 1947 on the 13th June 1947. Under this Act, no person can enter Burma without an entry permit issued by the Controller of Immigration, etc. or a valid passport duly visaed or endorsed by or on behalf of the Governor of Burma. It was stated that the measure had been necessitated by the large scale unauthorised entry of non-Burmans into Burma along the land frontiers adjacent to India, China and Siam. India lodged a protest against the promulgation of this Act, which they characterised as unnecessary and inopportune. The Government of Burma in reply stated that the legislation was designed to meet the existing emergency and pending the conclusion of satisfactory agreement with the Government of India and so long as the present emergency existed they had no alternative but to continue to apply the Act to Indians seeking entry into Burma.

Sometime after the establishment of the civil Government in Burma Mr. M. L. Doshi and five other Indians who were connected with the Indian National Army and Netaji's Relief Fund were prosecuted for alleged offences of extortion, dacoity, etc., committed during the period of Japanese occupation. In September, 1946, however, on the personal intervention of Pandit Jawaharlal Nehru, the Vice-President of the Indian Interim Government and Member-in-Charge of the Commonwealth Relations Department, the cases against them were withdrawn.

LEGISLATION

With a view to expediting rehabilitation and reconstruction of the country, the Government of Burma controlled the import and export trade of the country. They have also controlled the internal distribution of some of the essential commodities. To step up the imports from India, a Burma Supply Mission was set up in November, 1945 with its Headquarters at New Delhi. This office was merged into the office of the High Commissioner for Burma in India towards the end of 1947.

Emigration of unskilled Indian labour to Burma is prohibited under a ban imposed under the Indian Emigration Act, 1922, in July, 1941. In 1944, the Government of India, however, agreed to the recruitment of some labour by the military authorities. After the end of the war, though the ban was not lifted it was relaxed in favour of evacuees, but later the exemption in favour of evacuees was withdrawn.

With the termination of war certain emergency legislation was enacted in Burma. This legislation affected large number of Indians who had assets and properties in Burma. Some of the important Acts were as follows:—

(a) **The Liabilities (War-time Adjustment) Act, 1945.**—This Act aims at providing relief to the debtors who by reason of the circumstances created by the war, were unable to pay their debts. It confers on Courts in Burma certain powers in relation to remedies in respect of non-payment of money and non-performance of obligation, and also provides for the adjustment and settlement of the affairs of persons financially affected by reason of war circumstances.

(b) **The Custodian of Movable Property Act, 1945.**—This is a piece of emergency legislation to provide for the speedy recovery and return to owners of movable property of which the owners had been deprived by circumstances arising out of the war and for the appointment of Custodians of such property.

(c) **The Lands Disputes (Summary Jurisdiction) Act, 1945.**—The Act provides for a summary decision, by specially appointed "Commissioners" in disputes as to possession and boundaries of immovable properties without going into the question of ultimate right or title to the property. The Act aims at determining who was the last person in lawful possession of a particular immovable property during the short period between the dates when the British Administration began to disintegrate and finally ceased to function and leaves

questions relating to periods prior to that or later to the decisions of competent civil courts.

The Tenancy Act, 1946.—The object of the Act is to provide regulation in certain respects of agricultural tenancies. It provides for the determination of rents in respect of tenancies by the Revenue Officers and the mode of payment of the same. Under the Act, the unpaid rent in respect of a tenancy and the unpaid wages of the labourers employed by the tenant rank equally and are the first charge on the produce of the land. This legislation is of some importance to Indians who own lands in Burma.

Under the provisions of Act, 1946, Burma will have its own currency with effect from the 1st April, 1947. The currency which is at present being managed and controlled by the Reserve Bank of India will be managed and controlled by a Currency Board situated in London. After independence, however the currency will be managed by a Board in Burma itself.

Immigration (Emergency Provision) Act, 1947. See para on Immigration above.

Courts (Emergency Provision) (Repeal) Act, 1947.—Under Section 7 of the Courts (Emergency Provisions) Act, 1943, the Civil Courts in Burma were deemed to be closed for the purposes of the Limitation Act with effect from 8th December 1941, until a date to be notified by the Governor of Burma. In 1946, 30th September was declared to be that date. Later however a notification fixing that date was cancelled. In early 1947 the Government of Burma enacted the Courts (Emergency Provision) (Repeal) Act, 1947, in accordance with which Section 7 of the main Act was to be in force upto the 31st March 1947. As a large number of Indians had evacuated to India during the war this piece of legislation was of particular interest to them.

The Accrual of Interest (Wartime Investment) Act 1947.—Under this Act debts, loans and mortgages made in Burma before 6th May 1942, do not bear any interest during the period of suspension of limitation. This measure was found necessary to prevent mounting of interest on debts, loans and mortgages for the period for which suits were not filed on account of suspension of limitation.

Foreign Exchange Regulation Act, 1947.—This Act places certain restrictions on the export of currency etc. from Burma. These are more or less similar to those imposed by the Government of India consequent upon the Financial Agreement concluded by them with H.M.G. The restrictions are designed to conserve foreign exchange.

The Agricultural Debts Moratorium Act 1947.—This Act debars creditors who have any debts to realise from agriculturists or have decrees of civil courts against them, from taking any legal action in enforcing their claims. They were further required to register within 6 months from taking any legal action in enforcing their claims. They further required to register within 6 months from 7th May 1947, certain particulars in respect of their claims with the Deputy Commissioners of the Districts in which the debtors resided. The Act further provided that claims not

registered with the local authorities within the specified period would not be entertained by the civil courts and thus be extinguished. The Government of India gave wide publicity to this provision of the Act for the benefit of evacuees from Burma.

During the first week of December 1947, Thakin Nu and his colleagues on their way back from London, paid a courtesy visit to New Delhi, on the request of the Prime Minister of India. Advantage was taken of this visit for a preliminary and informal exchange of views regarding the settlement of certain questions outstanding between India and Burma. Both sides expressed cordial desire for the speedy and friendly adjustment of these questions and it is hoped that in the near future there will be an exchange of missions for this purpose.

ZANZIBAR

The small Protectorate of Zanzibar, consisting of the two islands of Zanzibar and Pemba, has an Indian community of nearly 15,000 out of a total population of 235,000. These Indians are mostly traders, and the trade in cloves—of which Zanzibar furnishes more than 80 per cent. of the world's supply—is largely in their hands. No problems of any magnitude faced this community until July, 1934, when a group of Decrees regulating the trade in cloves and prohibiting the free alienation of land by Africans and Arabs to others was passed by the Legislative Council of Zanzibar and received the assent of H.H. the Sultan. (For full details see *The Indian Year Book 1934-44*.)

MAURITIUS

In April, 1924, the Government of Mauritius requested that emigration to the Colony might be continued for a period of one year, but the Government of India in consultation with the Standing Committee on Emigration decided that consideration of the request should await the results of a local investigation. The Government of Mauritius agreed to receive an officer for the purpose and to give him all facilities; and in December, 1924, Sir Maharaj Singh, left India to conduct the necessary inquiry.

Sir Maharaj Singh's report was published by the Government of India in August, 1925. The various recommendations made in the report were commended to the consideration of the Colonial Government.

In February, 1926, the Government of India received a reply from the Colonial Government stating that they accepted the main conclusion formulated by Sir Maharaj Singh in regard to the renewal of emigration to Mauritius, viz., that no more unskilled Indian labour should be sent to Mauritius either in the immediate or near future. With regard to Sir Maharaj Singh's suggestions relating to other matters of interest to the Indian population resident in the Island, the Colonial Government expressed their willingness to give effect to several of them.

Labour Trouble.—The condition of Indians in this Colony continued to remain satisfactory till 1937 when there were labour disturbances on certain sugar estates employing Indian labour.

The Colonial Government appointed a Commission to enquire into and report on the disturbances. The commission reported during 1938 and the most important recommendations of the Commission related to the necessity for the formation of a Department of Labour and the enactment of suitable labour legislation in place of the Labour Ordinance of 1922 which mainly dealt with indentured labour.

Both recommendations have been given effect to and the Labour Ordinance of 1938 which closely follows the Malayan Labour Code should prove of considerable benefit to the Indian labourers, a large number of whom are employed on sugar estates. The Industrial Associations Ordinance of 1938 provided for the regulation of conditions of employment, the establishment of machinery for the peaceful settlement of disputes and generally the formation of Industrial Associations. This Ordinance, it will be observed, provides for collective bargaining by industrial labourers.

The Government of India had under consideration for some time the question of deputing an officer to visit the Colony and to report on the condition of Indians resident there, as no officer of the Government of India visited the Colony since Sir Maharaj Singh's deputation in 1925. The suggestion was accepted by H.M.'s Government and in May, 1940, Mr. S. Ridley, I.C.S., Secretary to the Agent General for India in the Union of South Africa, was deputed to visit Mauritius. He stayed in the Colony for about five weeks.

In his report, which was published at the end of 1943, he made a number of recommendations, the more important of which are (1) minimum wage for labourers in the sugar industry, (2) grant of war bonus, (3) Government control over housing of labourers of estates, (4) introduction of compulsory education in suitable stages, (5) extension of franchise by adding educational qualification as an alternative to property qualification, and (6) adequate representation of the Indian community in the Council of Government and the Executive Council, etc., etc.

Disturbances on Estates.—In 1943 disturbances occurred on 4 estates pending settlement of a demand for higher wages. The police were reported to have been assaulted and in the course of firing which followed, 3 persons were killed and 3 wounded. A Commission of enquiry was appointed to investigate the cause of the outbreak and the Conciliation and Wages Boards examined the question of adjustment of wages. The report of the Commission was published on the 28th November, 1944.

The Commission observed that the main underlying causes of the disturbances were unsatisfactory economic conditions and low wages. It made far-reaching recommendations for the improvement of labour conditions, general welfare and health services and the general administrative machinery. The Government of Mauritius have taken action on certain recommendations in regard to the improvement of labour conditions and have set up a Central Statistical Bureau.

Proving of Wills

IN India if a person has been appointed executor of the Will of a deceased person, it is always advisable to prove the Will as early as possible. If the Will is in a vernacular, it has to be officially translated into English. A petition is then prepared praying for the grant of probate of the Will. All the property left by the deceased has to be disclosed in a schedule to be annexed to the petition. Values must be shown as at the date of the Petition and Probate Fees will be calculated on such value. The Values of immovable properties are usually assessed at 10½ years' purchase on the net Municipal assessment, in the absence of a report from a competent architect.

Scale of Probate Duty.—Up to Rs. 1,000—Nil.

For the next Rs. 9,000 (i.e. upto Rs. 10,000), 2 per cent.; for the next Rs. 40,000 (i.e. upto Rs. 50,000) 3 per cent.; for the next Rs. 50,000 (i.e. upto Rs. 1,00,000) 4 per cent.; for the next Rs. 1,00,000 (i.e. upto Rs. 2,00,000) 4½ per cent.; for the next Rs. 50,000 (i.e. upto Rs. 2,50,000) 5 per cent.; for the next Rs. 50,000 (i.e. upto Rs. 3,00,000) 5½ per cent.; for the next Rs. 1,00,000 (i.e. upto Rs. 4,00,000) 6 per cent.; for the next Rs. 1,00,000 (i.e. upto Rs. 5,00,000) 6½ per cent.; for amounts exceeding Rs. 5,00,000 (or the portion over Rs. 5,00,000) 7 per cent. In addition to this Probate Duty there is, at present, a surcharge of 25%.

Exemptions from Probate Duty.—In determining the amount of the value of the estate for the purposes of probate duty, the following items are allowed to be deducted:

1. Debts left by the deceased including mortgage encumbrances.
2. The amount of funeral expenses.
3. Property held by the deceased in trust and not beneficially or with general power to confer a beneficial interest.

In addition, there is general exemption for service personnel killed in action or dying on service in certain circumstances.

Procedure.—The particulars of the property of the deceased and the particulars of all items allowed by law to be deducted have to be shown in separate schedules. It is the practice of the High Court to send a copy of these schedules to the Revenue Authorities and if the properties, particularly immovable properties, have not been properly valued, the High Court issues a notice to the petitioner requiring him to amend the schedule of property accordingly. In certain cases the Court requires citations to be published and served on such persons as the Court thinks are interested in the question of the grant of probate. If no objection is lodged by any person so interested within the time mentioned in the citation to the effect that nothing should be done in the matter of the petition for probate without notice to the person objecting or to use the technical language the caveator, and if the Will is shown to have been properly executed,

probate is ordered to be granted. If an objection or caveat is filed the petition for probate is converted into a suit in which the petitioner is plaintiff and the caveator is the defendant.

Probate Codicil, etc.—Probate has effect over all the property and estate moveable or immovable of the deceased throughout the province in which the same is granted and is conclusive as to the representative title of the person to whom the probate is granted against all debtors of the deceased and all persons holding property which belongs to the deceased and will afford full indemnity to all debtors paying their debts and all persons delivering up such property to the person to whom such probate is granted. Probate can only be granted to an executor appointed by the Will and the appointment may be express or by necessary implication. Probate cannot be granted to any person who is a minor or is of unsound mind. Where several executors are appointed probate may be granted to them simultaneously or at different times. If a codicil is discovered after the grant of probate a separate probate of that codicil may be granted to the executor if it in no way repeals the appointment of executors made by the Will. If different executors are appointed by the codicil, probate of the Will will be revoked and a new probate granted of the Will and codicil together. When probate has been granted to several executors and one of them dies, the entire representation of the testator accrues to the surviving executor or executors. Probate of a Will when granted establishes the Will from the death of the testator and renders valid all intermediate acts of the executor as such. When a person appointed an executor has not renounced the executorship, letters of administration will not be granted to any other person until a citation has been issued calling upon the executor to accept or renounce the executorship, but when one or more of several executors have proved the Will, the Court may, on the death of the survivor of those who have proved, grant letters of administration without citing those who have not proved. The renunciation may be made orally in the presence of the Judge or by a writing signed by the person renouncing and when made will preclude him from ever thereafter applying for probate of the Will appointing him executor. If an executor renounces or fails to accept an executorship within the time limited for the acceptance or refusal thereof, the Will may be proved and letters of administration with a copy of the Will annexed may be granted to the person who would be entitled to administration in case of intestacy.

Residuary Legatee.—When no executor has been appointed by a deceased in his Will or when the deceased has appointed an executor who is legally incapable or refuses to act or who has died before the testator or before he has proved the Will or when an executor dies after having proved the Will but before he has administered all the estate of the deceased, a universal or a residuary legatee

may be admitted to prove the Will and Letters of Administration with the Will annexed may be granted to him of the whole estate or so much of it as may be unadministered.

After any grant of Probate or Letters of Administration with Will annexed, no other than the person to whom the same may have been granted has the power to sue or prosecute any suit or otherwise act as representative of the deceased until such Probate or Letters of Administration has or have been recalled or revoked.

SMALL ESTATES.

Administrator General's Certificate.—In cases where the value of the estate is Rs. 2,000/- or less, an Administrator General's Certificate can be obtained. The procedure for obtaining this Certificate is simple and less expensive. A fee of 3% on the value of the estate is payable. The value of the estate has, however, to be taken as at the date of the death of the deceased. These Certificates are equivalent to Letters of Administration.

EAST Bengal Province came into existence on August 15, 1947 through the partition of what used to be called Bengal. East Bengal comprises the whole of the Chittagong and Dacca Divisions; the Districts of Rangpur, Bogra, Rajshahi, Pabna and Khulna; parts of the Districts of Nadia, Jessore, Dinajpur, Jalpaiguri, Malda and Sylhet—the last from old Assam. East Bengal which is one of the Provinces of Pakistan is also sometimes referred to as Eastern Pakistan.

The area of East Bengal is 54,091 sq. miles and the total population 41,949,710. Out of this, 29,481,099 are Muslims, 11,736,026 Hindus, 56,882 Christians and 1,197 Sikhs. The density of the population is 775.

ADMINISTRATION GOVERNOR

His Excellency Sir Frederick Chalmers Bourne, K.C.S.I., C.I.E., I.C.S.

MINISTRY

Prime Minister-in-Charge of (1) Prime Minister's Department, Planning Department, Prime Minister's Secretariat and Cabinet Secretariat, (2) Home Department and (3) Judicial and Legislative Department, The Hon'ble Mr. Khawaja Nazimuddin.

Minister-in-Charge of Department of Civil Supplies and Department of Public Relations, The Hon'ble Mr. Nurul Amin.

Minister-in-Charge of Finance Branch of the Finance and Revenue Department and Commerce and Industries Branches of the Department of Commerce, Labour and Industries, The Hon'ble Mr. Hamidul Huq Chowdhury.

East Bengal

H.E. Sir Frederick Bourne

Minister-in-Charge of Education Branch of the Department of Education and Registration, The Hon'ble Mr. Abdul Hamid.

Minister-in-Charge of Department of Communications, Buildings and Irrigation, The Hon'ble Mr. Hassan Ali.

Minister-in-Charge of Agriculture and Co-operation Branches of the Department of Agriculture, Co-operation and Relief, The Hon'ble Mr. Syed Mohammad Afzal.

Minister-in-Charge of Department of Health and Local Self-Government, The Hon'ble Mr. Muhammad Habibullah Chowdhury.

Minister without Portfolio, The Hon'ble Dr. Abdul Motaleb Malik.

Minister-in-Charge of Relief and Rehabilitation Branches of the Department of Agriculture, Co-operation and Relief, Registration Branch of the Department of Education and Registration and Labour Branch of the Department of Commerce, Labour and Industry, The Hon'ble Mr. Mafizuddin Ahmed.

Minister-in-Charge of the Revenue Branch of the Finance and Revenue Department, The Hon'ble Mr. Tafazzal Ali.

THE GOVERNOR'S PERSONAL STAFF

*Private Secretary, J. S. Treanor.
Military Secretary, Major W. J. B. Purcell.
Aides-de-Camp, Risaldar Major and Honorary Captain Dost Muhammad Khan, Sardar Bahadur.*

HOME DEPARTMENT

*Chief Secretary to Government, Secy., Home Dept., Aziz Ahmed.
Deputy Secretaries, D. L. Power; Khan Bahadur Manhi Ansar Ali; W. B. Kadri.*

AZAD, Abul Kalam, The Hon'ble Moulana, Education Member, Interim Government, January-August 1947 and Education Minister, Govt. of India, since August, 1947; eminent Muslim divine and thinker. Belongs to an old family of Delhi whose history dates back to Akbar's time. His father, a famous divine scholar of his time, went to Mecca in 1857 and settled there. b. in Mecca 1889, and in 1898 his father returned with his family to India and settled in Calcutta. Educ.: Privately, and when fourteen years old finished studies in Arabic and Oriental learning and had started teaching. Afterwards went for a tour of Iraq, Egypt, Syria, Turkey and France and acquired knowledge of European languages and literatures through private reading. In 1912, when Indian Muslims were still keeping away from national political movements and were regarded as opponents of Indian National Congress, he started his famous Urdu journal, "AL-HILAL", and invited Indian Muslims to join the National Congress which acquired extraordinary popularity and brought about political awakening among Mussalmans. Government suppressed "AL-HILAL" in 1914 and interned him in Ranchi. Was released in January 1920, took part in the Non-Co-operation Movement under Mahatma Gandhi's leadership, arrested the same year along with other leaders and imprisoned for two years. Served several terms of imprisonment eleven years in all. Was last imprisoned in August 1942 for three years. President of the Indian National Congress in 1923 and again from 1939-46. Country's political destiny took shape during his Presidentship. Talks with Sir Stafford Cripps in 1942 were conducted by him on behalf of the Congress and in 1945 when Lord Wavell called the Simla Conference, he was the sole spokesman of the Congress. He conducted negotiations with the Cabinet Mission on behalf of the Congress in 1946. Oriental scholar and author of international renown, impressive speaker and powerful writer. Publications: Several books on different branches of Philosophy and Literature. His commentary on Quran is particularly well-known. Next to Mahatma Gandhi, his publications yield the highest royalty in India. Address: 19, Akbar Road, New Delhi and Ballygunge Circular Road, Calcutta.
