IT BEGAN WITH THE CRUSADES

We take some pride in our long history but the business in which we are engaged is older than we are. Eastern banking began in the 12th century when the Knights Templar, protecting the lines of communication which sustained the Crusades, devised a mechanism for exchanging currencies and transferring goods between Western Europe and the Asian Continent. This primitive but highly efficient banking service made possible a rapid expansion of the trade between the Eastern and Western worlds —a traffic which has been fittingly described as the foundation of all commerce. Nowadays travellers along the Asian trade routes and merchants and manufacturers engaged in the Eastern trade entrust their banking transactions to The Chartered Bank of India, Australia and China which maintains an extensive system of branches, under British management directed from London, throughout Southern and South-Eastern Asia and the Far East.

THE CHARTERED BANK OF INDIA, AUSTRALIA AND CHINA

(Incorporated by Royal Charter, 1853)

Head Office: 38 Bishopsgate, London, E.C.2.
