Rice crop occupies the largest area in the Indian Union, 75.2 million acres which is about 30 per cent. of the annual cultivated area and the production is 21.7 million tons giving an average yield of 645 lbs. of rice per acre. The annual consumption of rice in the country is more than the production and there is always a deficit to the extent of 8 to 10 per cent. of the total production. In the past, this deficit was usually met by imports from south-east Asian countries especially Burma which alone used to supply about 1.7 million tons of clean rice annually. The Second World War, however, upset this position completely. While during the war itself no supplies were available, after the war the exportable surplus of Asian countries was much less than before the war. Subsequent to the partition of the country the position with regard to rice has further deteriorated as some of the rice surplus areas have gone to Pakistan. Thus, the food scarcity in general and rice in particular has been an acute problem.

Rice is a predominantly tropical crop requiring warm temperature and high humidity. It requires 70°-100°F. temperature throughout its growing period and in India, its distribution follows the rainfall line. Where the annual rainfall exceeds 80" rice is predominant, with 30"-80" it is still an important crop, while under 30" it is grown mostly with irrigation. The principal rice growing areas are located in southern and north-eastern India. On area basis, Madras, Bihar, Bengal, Orissa, Madhya Pradesh, Uttar Pradesh, Assam and Bombay are the main rice growing States and they together claim about 95 per cent. of the total rice area in India.

Rice is grown under a wide range of conditions. At one extreme, there are deep water rices of Assam and Bengal growing in 15-20 feet of water and at the other extreme are the rices grown entirely as rain-fed crop with 25"-30" of rain. Rice soils are very variable; it may be loam, sandy loam, clay, heavy clay and shallow laterite. Rice can grow under acid and alkaline soil conditions and the range of phosphorus in soils which it can tolerate is from 5 to 8.5.

Though over large areas one crop of rice is taken per year on the same land, 2 to 3 crops of rice may be taken on the same land per year, depending upon the situation and water facilities. The crop may be grown on lands almost at sea level, in lands even below sea level with protective embankments and also in altitudes of 3,000 to 5,000 feet above sea level. The rice areas in India extend from 8 to 37°N. latitude. The crop may be of 80 days' duration or may take even 200 days to mature. The bulk of the rice is *winter crop*, i.e., sown in June-July and harvested in November-December, but there are rices grown in different seasons the harvest coming in summer, autumn or winter.

Rice is sown either broadcast or transplanted. Broadcast rice is grown generally on high lands and where irrigational facilities are not available. Early varieties are suitable for such conditions. For transplanted rice, the seedlings are raised in a well prepared nursery and the seedlings transplanted when 4 to 5 weeks old. The rice fields are kept more or less under water until the crop shows signs of ripening. The transplanted crop always gives a higher yield than the broadcast crop. The wide range of conditions under which rice is grown in India has given rise to a large number of varieties, differing greatly in quality and maturity period. There are about 4,000 distinct types of rice existing in India.

Research.—As already stated, the average rice yield in India is low, being only about 723 lbs. of cleaned rice per acre as compared to 2,350 lbs. in Japan. The low yields of India are due to the following causes:—1. Lack of assured and timely irrigation water in all rice areas. 2. The low level of soil fertility and the general absence of fertilizing practices. 3. Use of indifferent seeds and inefficient methods of cultivation and 4. Losses due to the incidence of diseases and pests.

The results of research during the past three-four decades indicate that every one of these factors can be remedied by adoption of improved methods of cultivation, growing improved varieties and the application of fertilizers and manures. As regards assured irrigation supply a large number of irrigation schemes are under construction and when complete will provide the necessary protective irrigation.

As regards the improved varieties, substantial progress has already been made and a large number of high yielding improved varieties totalling about 300 have already been evolved by the various State Agricultural Departments, suitable for the particular environmental conditions existing in their respective areas. However, the systematic multiplication and distribution of these varieties still remain to be done.

The manuring of rice is even more important for increasing the acre yields. The results of a large number of manurial experiments conducted in various rice growing States, indicate that by the application of moderate doses of nitrogenous fertilizers, specially ammonium sulphate and organic manures like compost, oil cake and green manuring, the yields can be raised by about 25 to 30 per cent.

Losses due to disease and insect pests can also be minimized by seed treatment and timely spraying with fungicides and insecticides. Further studies with regard to the evolution of varieties of rice resistant to the most distinctive diseases, *Helminthorsporium* and *Piricularia* are under way.

In view of the importance of the crop in India's agricultural economy, the Indian Council of Agricultural Research has been subsidising since 1932, a chain of research stations all over India and has through them organised a co-ordinated scheme of rice research covering the entire rice growing regions of the country. As a result of this, a large number of varieties suitable for varying conditions such as flood resistant varieties for Bihar, flood and drought resistant varieties for Bengal, flood, drought and salinity resistant varieties for Orissa and deep water varieties for Bihar and Assam, have been produced. Likewise, purple pigmented rice varieties have been evolved to solve the wild rice (Karga) menace in Madhya Pradesh and Bihar and hybrid Sathis for the Gundhi bug infested areas of U.P. The improved varieties also gave a higher yield than the existing cultivators' seeds of the order of 17 to 23 per cent. in Travancore, 20 to 25 per cent. in Bihar, 30 to 52 per cent. in Orissa and 55 to 70 per cent. in Kashmir. The investigations in Kashmir revealed at the same time the possibilities of growing rice successfully on high altitudes ranging between 7,000 and 9,000 feet where ordinarily it does not thrive.

Realising the importance of rice in the economy of the nation and in order to intensify research on this most important crop, the Government of India established a Central Rice Research Institute at Cuttack in 1946.

WHEAT

Wheat is grown widely throughout the north as a winter crop, Uttar Pradesh and the Punjab supplying about two-thirds of the total area, and nearly three-quarters of the total outturn in the country. This crop occupies, on an average, about 10 per cent. of the total cultivated area. The majority of the varieties grown belong to the species *Triticum vulgare*. Bombay mostly grows durum wheats in which a number of improved strains are evolved and are spreading rapidly. A new improved wheat, called Niphad-4, having the blood to durum, unglare and dicoceum wheat species has been recently evolved with exceedingly good baking quality. Indian wheats are generally white, red and amber coloured and are mostly classed as soft from a commercial point of view. Most of the Indian wheats are soft weak wheats but there are some well-known Maccaroni wheats amongst them. The largest wheat acreage of recent years was that of 1933-34, namely, 36 million acres but the yield did not come up to the record harvest of 1939-40 which exceeded 104 million tons. Recent crops have averaged about 9 million tons per annum which is only slightly, if anything, above internal requirements. In 1945-46 the total area under wheat in the Indian Union including States was 24,546,000 acres with a yield of 5,912,000 tons. With the development of irrigation in the newer Punjab Canal Colonies a further increase in wheat production is certain. The crop is generally grown after a summer fallow and except in irrigated tracts, depends largely on the conservation of the soil moisture from the previous monsoon. On irrigated land 2 to 4 waterings are generally given. The crop is generally harvested in February to April and the threshing and winnowing go on up till the end of May. The total area under improved varieties of wheat is now over 8 million acres.

The latest available production figures for wheat are as follows: 1947-48, 5,389,000 tons; 1948-49, 5,472,000 tons; 1949-50, 6,110,000 tons.

Unfortunately, wheat is subject to a violent fungus disease called "rust", which is a potent factor limiting wheat production in India. The magnitude of the loss to the wheat crop during a season in which rust occurs in epidemic form is very great indeed. For instance during 1946-47, as a result of severe rust attack, the Madhya Pradesh and certain other parts of India lost nearly 2 million tons of wheat worth 60 crores of rupees. The Indian Council of Agricultural Research has, since 1930, financed schemes to tackle the rust problem from its very foundation. Though a suggestion has been mooted to discourage summer wheat crops in the hills to eliminate the sources of secondary infection, the key to the solution of the rust problem eventually lies in the evolution of the resistant strains of wheat a question which was taken up in 1934 at Simla, Madhya Pradesh and Bombay. Strains of wheat tolerably resistant to one of the other forms of the three types of rust have already been produced. The problem now is the evolution of varieties of wheat resistant to attack of all the three forms of rust suited to the different wheat regions of the country. For this a comprehensive and co-ordinated scheme of wheat rusts control, on an all-India basis has been recently launched by the Government of India at a total cost of about 8 lakhs of rupees.

MILLETS

Millets are grown mostly in rain-fed areas, supplying food for the poorer classes and fodder for the cattle. The varieties vary greatly in quality, height and suitability to various climatic and soil conditions. Perhaps the two best known varieties are jowar (*Sorghum Vulagre*) the great millet, and bajra the bullrush millet (*Pennisetum typhoideum*) which, between them occupy about 50 million acres in the sub-continent.

The area and production of jowar and bajra during 1948-49 were 35,388,000 and 19,604,000 acres; and production 4,788,000 and 2,247,000 tons, respectively. Generally speaking, the jowars require better land than the bajras and the distribution of the two crops follows the quality of the soil. Both the crops are generally sown in the beginning of the monsoon and so they require to be thoroughly weeded. It is often grown mixed with the several pulses especially *arhar* (Cajanus Cajon pigeon pea) and other crops and is commonly rotated with cotton. The subsidiary crops are harvested as they ripen either before the millet is harvested or afterwards. In some States like Bombay *rahi* juar is also an important crop.

PULSES

Pulses play a vital role in the Indian diet as they form the primary source of protein for the vegetarian population of the country. Some of them form a source of nutritious fodder, while others make excellent green manure crops. Being leguminous plants they enrich the soil and rightly form an inevitable component in mixed cropping as well as the linch pin in most crop rotation. India possesses a wealth of pulses of various varieties suited to different soil, climatic areas, season and requirements, in the Red gram (*Cajanus cajan*), Bengal gram (*Cicer aurietinum*), Black gram (*Phaseolus mungo*), Green gram (*P. rediatum*), Matki (*P. aconotifolius*), Horse gram (*Dolichos biflorus*), Mothbean (*Cyaepsis psoraloides*), Khessari (*Lathyrus sativus*), various species of the pisum and such like. Since 1943, the Indian Council of Agricultural Research has been financing co-ordinated pulse research schemes in the States of Assam, Bihar, Bombay, West Bengal, Madhya Bharat, Hyderabad, Madras, Madhya Pradesh, Mysore and Orissa with the object of producing high yielding, disease resistant types possessing commercially desirable qualities. The value of some of the pulses in green manuring, mixed cropping and rations is also being investigated. Some varieties with great potentialities have been discovered. Likewise, interesting data on suitable mixtures for mixed cropping and proper crop sequence and other farming practices are also revealed by these investigations. Some of these have already been taken up by the cultivators with advantage.

COTTON

Cotton is one of the most important commercial crops in the Indian Union. The average area under cotton in the triennium ending 1938-39 was 21.0 million acres and the average yield 4·2 million bales of 392 lb. net each. During the three-year period ending 1949-50 the average annual acreage and yield in the Indian Union decreased to about 11.4 million acres and 2.2 million bales, respectively. In 1950-51, owing to the 'Grow More Food' campaign and favourable weather conditions, the estimated area and yield increased to 13.9 million acres and 2.9 million bales, respectively. The area under improved varieties of cotton in 1950-51 is estimated at about 7 million acres. The consumption of cotton in mills in the Indian Union amounted to 3,622,000 bales (Indian 2,517,000 bales and foreign 1,105,000 bales) in 1950-51. Ordinarily the principal exports are of medium and short staple cotton below ⅞" in staple. Exports are now restricted to Bengal Deshi, Mathia, Assam and Comilla varieties and are allowed under certain conditions. There is no Indian cotton belt; the States of Bombay, the Punjab, Madhya Pradesh, Madras, Uttar Pradesh, Madhya Bharat, Rajasthan, Saurashtra, PEPSU and Hyderabad, all have important cotton tracts producing distinct types. Sowing and harvesting seasons are equally diverse, the former extending from May to December in different parts of the country and the latter from October to May and June. Yields vary greatly; in the best irrigated tracts the normal yield is about 200 lb. of ginned cotton per acre and yields much above this have been recorded, whilst in the poorest unirrigated tracts 60 lb. per acre is a good crop. Of recent years, as the result of the work of the Agricultural Departments and the Indian Central Cotton Committee, the quality and yield of staple cottons have improved and also the yield and cleanliness of the produce from the short staple tracts.

At the instance of the Indian Central Cotton Committee, certain legislative measures have been taken for the purpose of checking adulteration and promote better marketing. In certain States, legislation has been enacted, or is under consideration, with the aim of preventing the growing of very inferior varieties and of stopping certain malpractices which affect the quality and reputation of Indian cotton. Agricultural Departments have continued their campaign of cotton improvement apart from improvements in methods of cultivation.

SUGARCANE AND SUGAR

The Indian Union after the partition, owns as much as 90-95 per cent. of the total cane acreage and sugar production of the undivided subcontinent. The Sugar Industry is the second biggest national industry in the Union of India and the sugarcane crop plays a very important part in the rural economy of the country. Today, the number of people engaged in the cultivation of sugarcane, sugar factories, research stations, sugar trade, is well over two millions. U.P. and Bihar together produce more than 8 lakh tons of sugar. During the year 1950-51 the area under cane was 4,138,000 acres, the estimated total production of cane expressed in terms of gur, 5,462,000 tons, the quantity of cane crushed in sugar mills 11,016,000 tons, sugar produced by factories 1,098,000 tons. Production of Khandsari sugar in the same year was 125,000 tons and the sugar refined from gur was almost nil. The total production of sugar was thus 1,223,000 tons.

The cultivation of improved varieties of cane has been steadily expanding; old and indigenous varieties have been replaced to the extent of 90 per cent. by canes of high quality, mainly bred at the Sugarcane Breeding Station, Coimbatore. A net of sugarcane research stations has been spread in all sugarcane growing tracts of India for testing out the Coimbatore canes under different sets of soil and climatic conditions.

The Planning Commission has laid the target for sugar production of 15 lakh tons of sugar by 1955-56, on the basis of per capita consumption of 8.32 lbs. of crystal sugar and after making provision of 0.50 lakh tons of sugar for export. This target will be achieved mainly through intensive cultivation measures including provision for irrigation facilities, manures, fertilizers, seed nurseries and the protection against pests and diseases through the five-year development scheme already initiated by the Indian Central Sugarcane Committee, which was constituted in November 1944.

Besides financing the sugarcane research schemes at the Centre and in various States, the Committee has also planned to establish, at Lucknow, a new Institute of Sugar Technology and Sugarcane Research of its own, which is expected to be the largest of its kind in Asia. A start was made in 1952 with the establishment of four important sections of Agronomy, Agricultural Engineering, Sugarcane Entomology and Sugarcane Mycology of the Sugarcane Research Division of the proposed Institute at an estimated cost of Rs. 7.15 lakhs. The Hon'ble Minister for Food and Agriculture, Government of India, laid the Foundation Stone of the Institute on 16th February 1952. A model sugar factory will also be erected there to provide opportunities of applying results of research on a factory scale and to impart the much-needed technological training on a scientific basis to the post-graduate students for fitting them for future absorption into the industry. This Institute is also expected to provide greater integration and fuller co-ordination in investigations on sugar technological and sugarcane problems which have been lacking to a great extent up to the present moment.

OILSEEDS

India is one of the principal oil seeds producing countries of the world. Oilseeds crops also find a prominent place in India the major oilseeds (groundnut, rape and mustard, linseed, sesamum and castor) occupying about 26 million acres or about nine per cent. of the total cultivated area. In addition to this, about 12 million acres are under the cotton crop which yields about one million tons of cotton seed.

The Indian Central Oilseeds Committee, set up by the Government of India, under the Indian Oilseeds Committee Act IX of 1946, for the improvement and development of the cultivation and marketing of oilseeds and of the production, manufacture and marketing of oilseeds products, is taking all possible steps to stimulate the production of oilseeds without encroaching upon the acreage under food crops. Several schemes to increase the production of oilseeds by multiplication and distribution of improved strains, by adopting better methods of cultivation and by controlling pests and diseases are being worked in States financed jointly by the Indian Oilseeds Committee and the State Governments concerned.

The following are the major oilseeds grown in India:—

Groundnut:—India has the largest area under groundnuts in the world. She accounted for 40·6 per cent. of the groundnut production in the world during 1951. In this country, groundnuts accounted for about 40·3 per cent. and 65·7 per cent. of the total area and production, respectively, under oilseeds crops during the same year. Madras ranks first, claiming 37·8 per cent. and 48·6 per cent. of the acreage and production, respectively, under groundnut in India and is followed by Bombay and Hyderabad. The area under this crop in India in 1950-51 was 10,472,000 acres and the production was 3,331,000 tons.

Rape & Mustard:—Rape and mustard form an important group of crops in the northern parts of the country where they grow freely and attain a fair state of development. The oil obtained from the seeds is extensively used for domestic consumption. The chief producing areas are Uttar Pradesh, Bihar, Punjab and Assam. The area and production of rape and mustard seeds in India during 1950-51 was 5,505,000 acres and 826,000 tons, respectively.

Linseed:—The linseed crop is cultivated in India for its seeds which yields the linseed oil of commerce extensively used in the varnish and paint industries and to a limited extent for edible purposes. The crop grows well under a variety of soil conditions and is raised extensively in India except in the south of the peninsula. Madhya Pradesh, Uttar Pradesh, Bihar and Hyderabad are the chief seed producing areas, accounting for about 90 per cent. of the total area in India. The area and production of linseed in India during 1950-51 were 3,503,000 acres and 385,000 tons, respectively.

Sesamum:—Sesamum (Gingelly) or *til* is grown extensively, almost throughout India from the foot of the Himalayas down to the extreme south in Travancore. The crop is, however, intensively cultivated in Peninsular India in more than one season in the year. The area and production of sesamum in India during 1950-51 were 5,245,000 acres and 421,000 tons, respectively.

Castor:—The castor plant grows well under varied conditions of soil and climate. It is seen to grow almost throughout the length and breadth of India and up to an elevation of 8,000 ft. Both perennial and annual types are recognised. The plant is grown mostly for the seed which yields the castor oil of commerce. India comes next to Brazil only in world production and trade of castor seed. The area and production of castor seed in India during 1950-51 were 1,255,000 acres and 106,000 tons, respectively.

The statistics of area and production of this crop are, however, considered as under estimates, as no regular reporting is done for the areas sown under mixed crops.

India also produces considerable quantities of coconut, cottonseed, niger, safflower and mohwa seed besides a variety of other vegetable oils, both essential and non-essential, which are produced in quantities, but for which she holds almost a world monopoly.

JUTE

Jute is one of the most important cash crops. The fibre is obtained from the bark of two cultivated species of annual plants called *Corchorus capsularis* and *Corchorus olitorius*.

Jute is grown in the alluvial soils of West Bengal, Bihar, Assam, Orissa, Cooch Behar, Tripura and in parts of U.P. In 1950-51, the acreage in India was 1.5 million acres, the output being 31.7 lakhs bales (one bale=400 lbs.). It is a Kharif crop and is sown broadcast during February to May on well prepared seed beds. Two to three inches of rainfall during sowing and alternate periods of sunshine and moderate rainfall (about one or two inches every week) thereafter, seems ideal for a good growth of the crop. It responds well to weeding and thinning operations which are usually given two or three times during the growing season.

The plants often grow to a height of 12 feet or more. Four to five months after sowing when they are in flower the plants are cut close to the ground. Cut plants are tied up into bundles and steeped under water for retting. In 12 to 15 days, the retting is complete; the fibre is then carefully separated out from the stalks, washed and dried. It is then ready for various commercial uses. The outturn of dry fibre of jute generally varies from 12 to 25 mds. with an average of 15 mds. per acre, depending upon soil fertility and other factors.

Quality in jute is judged by its strength, fineness, colour, lustre, length and uniformity. The types of goods ordinarily manufactured from jute fibre in India are hessians, sackings, canvas and tarpaulins; certain 'specialities' for example, rugs and carpets, linoleum hessians, jute blankets, etc., are also made on a small scale. During the Second World War, jute was put to many new lines of manufacture such as sandbags, union fabrics (jute-cotton), tents, hood-cloth, netting, cords, etc., which were used for war purposes.

Compulsory restriction of jute acreage which came into force in pre-partition Bengal in 1941 is completely removed in West Bengal. Total areas under the crop in India and Pakistan together during the years 1944, 1945, and 1946 were 2,103,055, 2,421,670 and 1,911,000, respectively, and the corresponding yields were 6,203,205, 7,991,070 and 5,648,000 bales, respectively.

The table below gives the acreage and yield of the Indian Union since 1948 after the partition:—

Year. (Jute year July to June.)	Acreage.	Jute yield in bales.
1948	834,000	2,056,000
1949	1,158,000	3,117,000
1950	1,454,000	3,301,000
1951	1,951,000	4,677,000

The West Bengal State alone has effected an increase of 225,000 acres over 1950 area and Bihar an increase of 129,000 acres over 1950. The increase is 34.2 per cent. in acreage and 41.7 per cent. in production over 1950.

The increase in area and production during 1951 as compared with 1950 is attributed partly to the efforts made to grow more jute under the integrated production programme and partly to weather conditions and prices being favourable.

Efforts are now being made in the Indian Union to increase the production and yield of jute by intensive cultivation by (*a*) use of improved varieties of seed, (*b*) use of fertilizers and (*c*) line sowing in preference to broadcast sowing of jute seed.

In order to reduce the cost of production, the Indian Central Jute Committee has developed a "seed drill" for sowing jute seeds in line, and is popularising the use of "wheel hose" for intercultural operations. The labour cost is thus reduced and the cost of production is estimated to decrease by about 25 per cent.

Efforts are also directed to improve the quality of Indian jute and various researches are in progress in the Jute Agriculture Research Institute of the Indian Central Jute Committee. In addition, other fibres akin to jute and comparable in quality and cost of production are being studied in order to cultivate them in such areas where jute cannot be grown in order to augment the supplies of jute for the Indian jute mill industry. In this connection, mention may be made of Linseed fibre separated from the stalks of Linseed plants. The cultivation of Mesta or Bimli jute which is another fibre akin to jute has also increased in recent years.

On February, 1951, an agreement was concluded with Pakistan which stipulated *inter alia* that Pakistan would supply to India 35 lakh bales of raw jute of which 10 lakh bales would be despatched by the 30th of June, 1951, and the rest, *i.e.*, 25 lakh bales, by the 30th of June, 1952. Up to 30th November, 1951, over 15 lakh bales of raw jute have been received under the terms of the Agreement. Immediately after the Agreement there was a steep rise in the prices of both raw jute and jute manufactures. The raw jute prices were decontrolled from 9th March, 1951. By June, the upward trend in jute prices was reversed and the raw jute prices gradually slumped. Meanwhile, the outlook for the supply of raw jute to mills became brighter with the announcement of the official crop forecast for the jute year 1951-52, which put the total yield at 46.7 lakh bales. With the supply position much easier the Indian jute mills have now reverted to the 48-hour week.

The annual world consumption of jute during the period from 1940-41 to 1950-51 varied from 77 to 100 lakhs of bales a year, the consumption in 1950-51 being roughly 102 lakhs of bales.

TOBACCO

The tobacco acreage in India is not uniformly distributed but is concentrated in certain areas which form distinct tobacco growing centres of considerable commercial importance. There are 5 zones of concentrated production, *viz.*:—

(1) *North Bihar and Bengal Area* comprises the districts of Muzaffarpur, Purnea and Darbhanga in Bihar and Jalpaiguri, Malda, Berhampore and Dinajpur in West Bengal where tobacco is mostly grown for use in hookah (water-pipe).

(2) *The Charotar (Gujarat) Area* comprises the talukas of Anand, Nadiad, Borsad, Petlad and Bhadran of Bombay State.

(3) *Nipani Area* includes Belgaum, Satara, Kolhapur, Sangli and Miraj in Bombay State.

Bidi tobacco is extensively grown in the two areas of Bombay State.

(4) *Guntur Area:* This is the most important Cigarette Leaf (Virginia Tobacco) producing area which runs along the eastern coast with concentrations in the Guntur, Kistna, East and West Godavari districts of Madras State.

(5) *Southern Madras Area* comprises mainly of Madura and Coimbatore districts of Madras State where cigar, filler and binder tobacco as well as chewing tobaccos are mostly grown.

Tobacco seed is first grown on raised seed beds for providing good drainage and for preventing stagnation of water. Seedlings are ready for planting in about 6-8 weeks. By then they would have grown to a height of about 4 to 5 inches with 6 to 8 leaves. The seedlings are transplanted in lines, the distance varying from 15"-21" in rows and about 2' to 3' between rows.

Topping is done in the production of Desi or Poorbi Tobaccos grown in North Bihar and U.P. and the Calcutta variety grown in U.P., Punjab and Delhi. It is useful for increasing the strength of tobacco used in hookah and chillum, etc.

The harvesting season varies from place to place depending upon the different climatic conditions and the types of tobacco grown. However, the leaves are cut when fully matured and at this stage they assume a yellowish green colour in the case of *Virginia Tobacco*, brownish yellow in the case of *Cigar & Cheroot Tobacco*, yellow with reddish brown spots in *Bidi Tobacco*, and yellow with brown flecks in the case of *Hookah, Chewing and Snuff Tobaccos*.

The cut leaf is then dried and cured.

The total areas under tobacco in the Indian Union in 1949-50 and 1950-51 were 860,000 and 839,000 acres, respectively.

The total yield of dried leaf in 1949-50 and 1950-51 was 591,360,000 and 562,240,000 lbs., respectively.

This excludes the quantity retained for personal consumption by the growers.

LIVESTOCK CENSUS

It is estimated that there are about 136·372 million cattle in India, and 40·618 million buffaloes.

For draught purposes cattle are mainly used everywhere though male buffaloes are important as draught animals in the rice tracts and damper parts of the country. For dairy purposes, the buffalo is important, the milk yield being high and the percentage of butter fat considerably above that in cow's milk. The best known breeds are the Murrah, Nili and Ravi buffaloes of the Punjab, the Jafferabadi buffaloes of Saurashtra, Mehsana of Gujarat, Nagpuri of central India and the Surti and Pandharpuri, a type of Nagpuri buffaloes of Bombay State. The cattle and buffalo population in the subcontinent is abnormally high amounting to over 60 per cent. of the human population. The spread of cultivation has diminished the grazing grounds, insufficient fodder crops are raised and many of the cattle are small, ill-fed and inefficient. Nevertheless the best Indian breeds have many merits. Of the draught breeds, the best known are the Hissar (Punjab), Nellore (Madras), Amrit Mahal (Mysore), Kangayam (Madras), Kherigarh (U.P.), Malwa, Khillar (Bombay), Nimar (Madhya Pradesh), and Dangi (Bombay). The Dangi and Nimar breeds of Bombay State have the potentialities for being developed into dual purpose breeds. Amongst the best milking breeds are: the Sahiwal (Punjab), and the Sindhi, which is a breed of West Pakistan, but of which small herds are met with in various parts of the country. Of the dual-purpose (*i.e.*, draught and milk combined) the best known breeds are the Hariana (Punjab), Kankrej (Gujarat), and the Gir (Saurashtra).

On the Government cattle-breeding farms pedigree herds are reared and bulls issued, preferably to those breeding areas or villages which undertake to exclude 'scrub' bulls and where serious efforts to improve the breed are made. Once established such breeding areas rapidly produce superior bulls for general distribution.

Recently, a new scheme, the Key Villages Scheme, has been introduced. Under this Scheme a number of villages in a restricted area is taken up for intensive improvement. Pedigree bulls are supplied and all scrub bulls castrated. Breeding work which is strictly controlled is carried on over a number of years. A number of Key Villages are being established in various parts of the country in 1952. During the next four years it is planned to establish 600 Key Villages with 150 Artificial Insemination Centres and 560 bull rearing farms associated with them. These Key Villages, once developed, will serve as valuable sources for supply of bulls to other areas.

A Gowshala Scheme has also been launched in some States. Under this, Gowshalas are intended to be utilized for breeding of pure stock, so that they may be able to supply bulls for grading up work elsewhere.

Improving Quality

Herd Books have been opened for most of the important breeds of cattle and buffalo and shows are held throughout the Union to encourage breeders. Legislation to enforce castration of scrub bulls, has been introduced in many States.

It has been estimated that the number of sheep in the country is in the neighbourhood of four crores and that the total quantity of wool produced is 8½ crores pounds annually. The yield of wool per sheep varies greatly in different parts of the country. In Punjab, Uttar Pradesh, Rajasthan and Saurashtra, the annual production per sheep is estimated at between 3.1 lbs. and 4 lbs., while in the rest of the States it does not exceed 1 lb. The average for the whole of the country is in the neighbourhood of 1.9 lb. per sheep per year.

Improvement of sheep has been engaging the attention of the Indian Council of Agricultural Research for a number of years and several Sheep Breeding Research Stations have been established in various parts of the country under the auspices of the Council.

The plan of work consists in selecting breeding of indigenous breeds or cross-breeding the Indian breeds with some foreign breed, usually the Merino. In some States local sheep are being graded-up with superior Indian strains. Wool Analysis Laboratories have been established in some of the States to study the variability of the different attributes of wool fibres and to select stock on the basis of the quality of the fleece of individual sheep.

A plan to organize sheep development work on a regional basis is now under the consideration of the Indian Council of Agricultural Research.

Poultry development work is now being intensively pursued throughout the country.

DAIRYING

India is still far behind other countries in the matter of dairy industry, although many of the State Governments have now been taking keen interest in its development. The main difficulty is the low milk productivity of the Indian dairy animal, which has to be improved by systematic and scientific methods of breeding, feeding and management. Factors such as adverse climate and the vastness of the country have, no doubt, been obstacles but, unless the individual dairy animal is improved and arrangements made to dispose of the milk economically, it would not be possible to put the dairy industry on a sound footing.

Most of the States have now appointed special Dairy Development Officers to promote dairying and many State Governments have been considering plans to improve dairying on co-operative lines as well as through private enterprise.

In order to relieve the congestion consequent on the location of a very large number of dairy cattle in Bombay City, Government of Bombay have also established a very large milk colony at Aarey near Bombay where about 10,000 animals would be housed under the most modern conditions and milk supplied to Bombay City after pasteurization. Milk supply schemes are operating in various States.

Research in dairying is done at the Indian Dairy Research Institute at Bangalore. This Institute, in addition to research work also trains students for Indian Dairy Diploma Course and runs a post-graduate course in Animal Husbandry and Dairying.

There is not a big market in India for western dairy products, such as cream, butter, cheese, etc., although the demand for them is constantly growing. Many dairy units being small, small lots of 'Desi' butter, Dahi, Ghee, etc. are made purely as a cottage industry.

ANIMAL DISEASES

The control of contagious diseases of livestock is carried out by the Civil Veterinary Departments in the States. The personnel of these departments are, for the most part, recruited from among the graduates of the Veterinary Colleges of which there are nine in India, one each at Gauhati, Patna, Calcutta, Bombay, Mathura (U.P.), Hyderabad (Deccan), Madras, Hissar and Jabalpur. Universities impart training up to the graduate standard, as against licentiate training which they used to impart formerly.

The chief research centre is the Indian Veterinary Research Institute at Mukteswar in Uttar Pradesh and its branch at Izatnagar, near Bareilly. This institute is maintained by the Government of India and has recently been considerably expanded, the latest additions being a poultry research section and a nutrition section and genetics section. A certain amount of research is also conducted at the State Colleges.

In addition to research, the Indian Veterinary Research Institute also manufactures large quantities of sera and vaccines for the use of the State Departments in their fight against disease and until recently was the only manufacturing centre for these products. Serum institutes have, however, now been opened in various States such as Bombay, Madras, Hyderabad and Uttar Pradesh.

The chief diseases that the Animal Husbandry and Veterinary Departments have to deal with are glanders and surra in equines, and rinderpest, foot and mouth disease, haemorrhagic septicaemia, black quarter and anthrax in ruminants while tuberculosis, Johne's disease and contagious abortion are assuming greater importance than in the past. Glanders and surra are both scheduled diseases under the Glanders and Farcy Act. Glanders is incurable but surra can now be successfully treated with Naganol or Antrypol. This disease (surra) also affects camels, cattle and dogs and in recent years its importance as a bovine disease has been more widely recognised.

Of the diseases of ruminants mentioned, all, with the exception of foot and mouth disease, can now be controlled either by means of sera or by vaccines.

The successful manufacture of anthrax "spore" vaccine at Mukteswar is another advance of great importance in the fight against livestock disease.

A scheme for the mass eradication of Rinderpest by the use of lapinized virus is now under the consideration of the Government of India.

Indian poultry are also subject to several contagious diseases. The dreaded "Ranikhet" disease is fairly wide-spread and its ravages have seriously hampered the poultry industry. A chick-passaged vaccine has now been developed at the Indian Veterinary Research Institute and trials conducted in the field have been very encouraging. However, its extreme instability at room temperature severely limits its use on a large scale. Fowl pox and fowl cholera vaccines are available for the protection of poultry against those diseases.

India is protected from foreign infection by the application of the Livestock Importation Act at all ports at which the landing of animals is permitted.

In addition to their duties in connection with disease control, the Civil Veterinary Departments also conduct the treatment of animals in hospitals and dispensaries. The institutions are for the most part maintained by Local Boards with financial assistance from Government, the professional staff usually being provided by Government. However, in most States the Veterinary Dispensaries are now being taken over by Government.

(The statistics given in the following statements are the latest available.)

AREA CULTIVATED AND UNCULTIVATED IN EACH STATE

(Thousand Acres)

State	AREA (According to village papers) 1947-48	1948-49

IMPROVEMENT OF AGRICULTURAL MARKETING

IN view of the importance of agricultural marketing as an aid to the general economic recovery of the country, the Government of India decided to give effect to the recommendations made by the Royal Commission on Agriculture and generally endorsed by the Central Banking Enquiry Committee regarding marketing surveys. After consultation with State Governments, it was decided that the first step should be the appointment of a highly qualified and experienced marketing expert with practical knowledge of agricultural marketing in other countries.

Directorate—In accordance with this decision, the office of the Agricultural Marketing Adviser to the Government of India (since designated as Directorate of Marketing and Inspection) was constituted with effect from 1st January, 1935, at Delhi, with Mr. A. M. Livingstone as the first Agricultural Marketing Adviser. After more than six years of useful activity in India, he reverted in 1941 to the Ministry of Agriculture of the United Kingdom Government. The present incumbent of the post is Dr. T. G. Shirname, B.AG., PH.D. (Wales), F.S.S. (Lond.), F.R.ECON.S. In addition to the above office, Dr. Shirname has also been appointed by the Government of India to act as a Regional Agricultural Production Commissioner for Bihar, Assam and West Bengal regions, in connection with the Grow More Food Campaign.

The Agricultural Marketing Adviser to the Government of India is assisted by a Deputy and this post is at present held by Dr. B. C. Sen, D.SC. The technical gazetted staff consists of an Agricultural Marketing Adviser, a Deputy Agricultural Marketing Adviser, 3 Senior Marketing Officers, 3 Marketing Officers, and 15 Assistant Marketing Officers. In addition, the Agricultural Marketing Adviser is assisted, in quality control and inspection work for internal and for export trade under the Agricultural Produce (Grading and Marking) Act, 1937, by 2 Chief Inspectors, one Senior Inspector, 28 Inspectors; one Chief Chemist and by 1 Development Officer and 6 Deputy Development Officers for the administration of the Fruit Products Order, 1948.

With the help of suitable subsidies from the Indian Council of Agricultural Research, the State Governments established similar organisations in their respective areas and have, in some cases, further added to their staffs to meet the growing demand for developmental work of a practical nature.

The subsidies were progressively reduced and entirely suspended from 1949; but realising the advantages that have accrued to the State economy as a result of having adequate marketing organisations, some States like West Bengal, Bombay, Madras, Punjab, Bihar, Orissa, Hyderabad and Mysore have already made these organisations permanent. Marketing organisations are functioning in many Part 'B' and Part 'C' States also. In States without a separate marketing organisation the Director of Agriculture supervises the work of the marketing section.

The Central Marketing Staff also undertook survey work in a large number of States which did not have staffs of their own. They also advised and continued to advise and assist the State marketing staffs in carrying out their work.

MARKETING SURVEYS

During the existence of this Directorate for over 17 years, marketing surveys have been carried out on an All-India basis and 67 reports on various commodities and subjects have so far been published. The more important of these are on wheat, rice, potatoes, gram, barley, grapes, bananas, citrus fruits, linseed, groundnuts, cashewnuts, lac, sugar, cocomuts, tobacco, milk, fish, cattle, hides, skins, wool and hair, sheep and goats, eggs, coffee, castor seed, co-operative marketing, fairs, markets and produce exchanges, ghee and other milk products, arecanuts, stone and small fruits, rapeseed and mustard, sann hemp and cardamom. "A Handbook on the Quality of Indian Wool" which is intended to serve as a guide to wool trade and persons interested in Wool, a "Preliminary Guide to Indian Fish, Fisheries and Methods of Fishing and Curing" and a supplement to the wheat report have also been published.

Similar All-India marketing reports on several other commodities, *e.g.*, meat, poultry, mangoes, pulses and chillies were in different stages of preparation and those on maize and millets, and sesamum and nigerseed, and an Atlas on livestock and livestock products were in the course of printing. The Marketing Officers Conference held in 1948 recommended that having regard to the necessity of devoting more time and energy for undertaking and executing actual marketing improvement work, the preparation of marketing survey reports should be slowed down. No fresh marketing surveys are to be undertaken at present and attention is to be given only to those reports which are under preparation and the work on which has remained in abeyance.

Hitherto, the All-India marketing survey reports have dealt with the problem as it related to the entire undivided India. In fact, the earlier reports had included Burma as well. With the partition of the country all these reports have to be revised and brought up-to-date for the Indian Union. Accordingly a revised report on milk for the Indian Union was published in 1950, and revised editions of the reports on hides, rice and groundnuts and of the fish guide were in the press. The revision of the reports on cattle, tobacco, gram and skins were in progress and up-to-date material therefore was being collected.

The marketing survey reports so far published and those which are in the press are very exhaustive and detailed. For the convenience of the general public and administrators, therefore arrangements have been made to prepare small and handy brochures summarising the principal features of marketing of the various commodities. Two such brochures on fish, and wool were published in 1948 and another two on milk and isubgol in March 1949. Two more on kapok and akund floss, and groundnuts were published in 1951, and one on bristles was in the press.

Similarly brochures on agricultural produce exchanges, palmyra fibres, ghee, lac, etc., were in different stages of preparation.

Translations of these editions in various Indian languages have also been published in the case of certain reports like wheat, linseed and eggs. An abridged edition of the milk report in Hindi was published in 1951 and the one on fish was in the press while that on wool was under preparation.

Storage and Transport—A report on cold storage and transport of perishable produce in Delhi State was published in 1937. With a view to studying the commercial possibilities of cold storage transport of perishable products like fruits, etc., certain refrigerated transport trials were conducted during 1940-41 on two N.W.R. cold storage wagons. All-India survey work on cold storage was also carried out in part during that period. In view, however, of the recent transport difficulties and the consequent shortage of wagons, the experiment and survey on cold storage has had to be postponed for the present. A separate Directorate of Storage and Plant Protection has been set up by the Ministry of Agriculture to take up immediately on more intensive scale work on ordinary and cold storage construction and refrigerated transport.

GRADING AND MARKING

In discussing steps which might be taken to improve the general level of quality, the Royal Commission thought that organised trade associations in India could give great assistance in applying effective pressure to secure improved quality from the producers. This view was fully borne out by the preliminary marketing surveys and two general lines of action were decided upon: first, the physical grading and packing of commodities such as fruit, eggs, etc., on the basis of statutory standards and, secondly, the standardisation of contract terms for staples such as cereals and oilseeds. The former involved legislation and the Agricultural Produce (Grading and Marking) Act, 1937, was passed in February 1937, for defining standards of quality and methods of marking in respect of prescribed grade designations applied to scheduled products.

As a result of consultation with State governments and representative trade and manufacturing interests, further commodities were added to the schedule to the Act, which now includes fruit, vegetables, eggs, dairy produce, tobacco, coffee, hides and skins, fruit products, *atta*, oilseeds, vegetable oils (including hydrogenated oils and vegetable fats), cotton, rice, lac, wheat, sann hemp, sugar-cane gur (jaggery), myrobalans, *bura*, wool, goat hair bristles, rosin and turpentine and arecanuts. The grading and marking rules in respect of most of these commodities have been duly prepared and notified. Tentative grade specifications and rules for several varieties of rice, fruit, cotton, etc. have also been drawn up. The Castor Oil Grading and Marking Rules which were approved at an informal conference of the trade interests concerned in July 1948 and the Citrus Fruits Grading and Marking Rules, were finally published in 1949. The latter replaced the Oranges Grading and Marking Rules, 1937. Grade specifications for coconut oil were finally notified and appended to the Edible Oils Grading and Marking Rules. The Table Potatoes Grading and Marking Rules were notified in 1951 for eliciting public opinion.

The development of trading on the basis of the standard methods of grading is definitely "catching on". In the early stages experimental grading stations are operated on the basis of provisional standards; subsequently the process of grading and marking is done commercially on a voluntary basis by packers holding a Certificate of Authorisation issued by the Agricultural Marketing Adviser. The authorised packer may be the primary producer or co-operative society or an association of primary producers, village collectors and processors or the individual larger packer or manufacturer holding a key position in the process of distribution.

The grading of agricultural and other produce under the Agricultural Produce (Grading and Marking) Act, 1937, which had been introduced with the aim of providing the consumers with a standardised produce of specified purity and quality under a mark of guarantee was continued. There were as many as 547 packers during 1951 under the various grading schemes. It will be observed from the table below that produce worth over 20 crores of rupees was graded in 1951 as against 15 crores in the previous year as per details given below:

Value of quantity graded (in rupees).

	1950	1951
(*a*) *Grading for export:*		
Sann Hemp	1,18,87,480	2,32,40,108
Tobacco	10,14,11,126	13,51,09,304

Ghee :—Among the commodities graded for internal consumption in the country, ghee holds a pre-eminent position. The volume of ghee graded, however, began to decline from 1946 due to the cessation of purchases of Agmark ghee for the defence services in Kathiawar and Baroda. This decline continued in 1947 and 1948 although a sharp increase in the number of packers was noticed in those years. In 1949, the number of packers decreased to an appreciable extent which was followed by a corresponding decrease in the output of graded ghee and there was a further decline in 1950. The fall is attributable to a general fall in the production of ghee and arrivals of ghee in the market, and the stricter measures adopted by the Marketing Organisation for checking the quality of Agmark ghee. The restrictions on the inter-State movement of ghee which were hitherto in the way of grading larger quantities were removed during 1950 and the ghee grading work consequently expanded during 1951, as will be apparent from the above table.

Fruit Products :—The grading of fruit products was carried on under the Agricultural Produce (Grading and Marking) Act, 1937, until the issue in 1946 of the Fruit Products Control Order which was later replaced by the Fruit Products Order, 1948. The administration of the Order, continued with the Central Government upto 1950 when it was decentralised and the work entrusted to State Governments. With a view to helping the development of the Indian fruit preserving industry, the functions under the Order have been recentralised under the Agricultural Marketing Adviser with effect from 1st January 1952. One of the functions which devolves on him, is also the allotment of scarce raw materials like sugar and tin plate to licence-holders. The Order now extends to the whole of India except the State of Jammu and Kashmir.

The Edible Oils Grading and Marking Rules, 1939 originally provided specifications for the grading of mustard, groundnut and til oils, but in 1950, specifications for coconut oil were also added to the Rules. The grading is, however, mostly confined to mustard oil, which is mainly concentrated in Uttar Pradesh. The grading of gingelly oil was started in Madras and Bombay in 1949. Groundnut oil is also being graded in Bombay.

The charges for Agmark edible oils were also raised to three times their former level from 20th October, 1947 and were further raised to 2 annas per maund in 1951 in order to make the scheme self-supporting, as far as possible.

The Egg Grading and Marking Rules were further amended reducing the number of grades from six to four in order to facilitate rapid marketing. That the advantages of grading marketable produce are being appreciated all over the country has been exemplified by the introduction of a scheme of compulsory grading of eggs by the Mysore city municipality within its jurisdiction. An interesting experiment for marking the date of grading on the shell of graded eggs was initiated at Delhi and was attended with a fair amount of success. It has, however, been recognised that such a measure could be practised with advantage only at the stage where the graded eggs are sold out to the consumers. It has accordingly been decided only to persuade egg graders who import eggs for grading to adopt the principle as far as possible.

Staples like rice and atta are not graded at present on account of their being subjected to rationing and controlled distribution. Towards the close of 1943 an experiment was initiated in Madras to grade rice according to *ad hoc* war quality specifications and to link up such grading with the activities of the local Civil Supplies Department. The scheme expanded considerably but had to be closed down towards the close of 1944 due to low arrivals in the market of good quality rice. The Directorate also decided in 1944 to abandon the atta grading scheme as it was not considered to be of direct benefit to the producers.

Grading of Sann Hemp :—Special mention should be made here of the scheme for the grading and marking of sann hemp introduced towards the close of 1942. The scheme was drawn up as a result of complaints received from the Hemp Controller in the United Kingdom regarding the low quality of exports of hemp from India. The scheme follows the general lines of all other grading schemes under the Agmark in that grading is done by authorised packers holding certificates of authorisation issued by the Agricultural Marketing Adviser to the Government of India. The Government of India have, by a notification under the Sea Customs Act, prohibited the export of sann hemp not graded under the Agricultural Produce (Grading and Marking) Act, 1937. In order to ensure that grading is done correctly and in accordance with the Act and the Rules, a special inspectorate staff consisting of one Chief Inspector and 7 Inspectors (including 3 Assistant Marketing Officers temporarily diverted to work as Inspectors) has been appointed and stationed at Shiupur (Banares), Calcutta, Vizianagram and Bombay. The major portion of the cost of this staff is recovered from the trade by means of a charge of twelve annas per bale.

As a result of the decisions arrived at the various Conferences held with the trade, certain modifications have been made in the Sann Hemp Grading and Marking Rules, 1942 so as to bring about improvement in the quality of the exported hemp and to establish a proper and acceptable correlation between the grades represented by private trade marks and the corresponding grades under the Agmark of Sann Hemp exported out of India. These changes were introduced on 1st September 1948. The Department generally takes the advice of importers abroad and the exporters in the country before making any such modification in the scheme.

The compulsory grading of sann hemp for export purposes has been working satisfactorily and has been favourably commented upon. The introduction of correlation between the Agmark grades and the private trade marks of packers, has contributed largely to the success of the grading scheme and has resulted in a decline in the number of arbitration cases between importers and exporters. Recently the London Hemp Association have reiterated their complete satisfaction with the scheme and have remarked that "Generally speaking, the Agmark scheme is working very satisfactorily."

Tobacco Grading :—In the beginning of 1944 a conference of tobacco interests convened at Guntur decided that the quality of exports of the main types of tobacco from India should be controlled and that such tobacco should not be exported unless it conformed to Agmark specifications. Accordingly, early in 1945, the Central Government banned under S. 19 of the Sea Customs Act, the export of flue-cured Virginia, sun-cured Virginia, sun-cured Natu and Motihari tobaccos to a foreign country other than the U.K., unless it was graded under the Tobacco Grading and Marking Rules, and certified as such by the Inspectors appointed for the purpose. They also sanctioned the posts of one Chief Inspector and 8 Inspectors to be stationed at Guntur and other centres for purposes of quality control.

Later, at a conference of the trade presided over by the Supply Member of the Government of India and attended by a representative of the Tobacco Leaf Section of the London Chamber of Commerce, it was decided to extend the scheme of restricted exports to the U.K. also, and accordingly the Government of India issued a notification withdrawing the exception allowed in the case of exports to the U. K. from the operation of their former notification banning the export of ungraded tobacco. The result is that the four varieties of tobacco mentioned above cannot be exported to a foreign country unless they are graded according to Agmark specifications. The ban on the exports of tobacco unless graded under Agmark has further been extended to white burley tobacco for which grade specifications were prepared and notified.

The Indian Central Tobacco Committee, who were placed in charge of all developmental and marketing schemes concerning tobacco, accordingly sanctioned an additional staff of one Senior Inspector and 10 Inspectors for exercising quality control including 2 Vigilance Inspectors to inspect packages at ports immediately prior to shipment. The entire tobacco grading scheme is now being financed by the Committee from the funds placed at their disposal by the Government of India.

An Advisory Panel has been constituted by the Central Government to arbitrate on disputes arising with regard to the assignment of grades, etc.

Samples of different varieties and grades of tobacco are despatched to foreign countries from time to time with a view to developing the foreign demand for Indian tobacco and finding new markets.

The grading scheme has been in operation for more than six years and has brought about a definite improvement in the quality of exports which is evidenced by the general appreciation by foreign buyers in the United Kingdom and other countries. The foreign buyers, more particularly those in the United Kingdom have started purchasing Indian tobacco on firm order basis for which credits are opened by the importers in the local banks to the full extent of the value of tobacco. Such credits can be operated by the exporters here on the production of the certificate of Agmark trading. Under this system there is no question of arbitration of any dispute in regard to the price or quality of tobacco at the other end. This has enabled the primary producers and many big growers to export tobacco direct to foreign markets and thereby to secure higher returns for their produce. The grading scheme has also stimulated prices in the local market where transactions take place mostly on the basis of Agmark standards.

INSPECTION OF PRODUCE

In order to ensure adequate control of quality and proper grading, several persons in the States have been authorised by the Agricultural Marketing Adviser to inspect graded produce and grading centres. The co-operation of agricultural, veterinary and allied departments in all States was sought for in this connection and several of their officers were provided with the necessary authority to inspect grading stations and graded produce. Arrangements have also been made for controlling the quality of graded produce by systematically analysing samples collected by the inspecting staff both from the packers' premises as well as from the markets. Nearly 5,000 samples of ghee and quite a large number of edible oil samples were analysed at the Central Control Laboratory, Kanpur during the calendar year 1951. Samples of graded butter and gur are also periodically analysed there by an assistant chemist appointed for the purpose.

The exercise of quality control by examination of samples at control laboratories naturally involves a certain amount of unavoidable expenditure. This is partly offset by the sale of Agmark labels to authorised packers. It was, however, observed that the Agricultural Produce (Grading and Marking) Act, 1937, under which such recoveries were being made, did not permit the levy of any further charges than what the labels, etc., were costing to the Government. In order, therefore, that a portion, if not the whole, of the inspection cost could be recovered from the packers who were the chief beneficiaries from the grading scheme, the Act was amended about the middle of 1943 so as to permit recoveries on labels for this purpose as well as for arranging any special publicity with regard to particular commodities. In the early stages, before the grading of a particular commodity has passed the experimental stage and proved its merit, it has not always been found possible to get the packers to agree to contribute in this way. Steps are being taken, however, to make quality control as far as possible self-supporting, particularly with regard to commodities mainly

produced for export, *e.g.*, sann hemp, or commodities like *ghee*, the grading of which has now become definitely established. With the same view the Edible Oils Grading and Marking Rules were amended in October 1947 so as to provide for an enhanced rate of charges on Agmark labels and to provide for the application of these labels to bigger containers like drums and railway tank wagons.

Expansion in the grading of ghee and the increasing general demand for graded ghee has also committed the Government to ensure that proper arrangements are instituted or existing ones stiffened in order to provide for an adequate check on the quality of the graded products. Certain new measures have accordingly been instituted. Firstly, vigorous tests have been introduced for examining the purity of ghee and ensuring its freedom from adulteration. To detect unmistakably the commonest adulterant—vegetable fat—the Control Laboratories at Kanpur and Rajkot and most of the packers' laboratories have been equipped with Phytosteryl Acetate test apparatus. Another test known as Baudouin test was introduced at the laboratories of the packers in 1947, according to which all raw ghee before being purchased for grading purposes is subjected to this test to ensure that it is free from vegetable products (Vanaspati). This test became possible because of the Government of India's decision to mix at least 5 per cent. sesame oil in all hydrogenated vegetable fats. The policy of appointing Government Chemists at the laboratories of authorised packers so as to ensure freedom from possible influences, initiated in 1945 has been working satisfactorily in Uttar Pradesh and Bihar, and it was also later extended to Madhya Pradesh.

In pursuance of the recommendation of a conference of ghee packers held in 1949, the Government of India appointed an Expert Committee to examine the Agmark specifications for ghee as also the methods of analysis of ghee and to suggest such modifications as might be considered necessary. The Committee issued a questionnaire to all the States. The replies received are under consideration. Simultaneously with this, arrangements were also made for the collection and analysis of control samples of ghee from the cotton tracts of Madhya Pradesh and Saurashtra with a view to considering revision of the regional specifications for ghee produced in those areas.

As a further measure of improving the existing quality control arrangements, it was also decided to divide the areas in which the ghee grading centres are located into zones, each zone being placed under the charge of an Inspector. For this purpose four posts of Inspectors have been sanctioned. The Inspectors exercise vigilant control on the quality of ghee in their respective areas by visiting the grading stations frequently and by collecting check samples of graded ghee from the premises of the packers and from the market, for examination. The number of samples so collected has increased to such a point that a large percentage of the melts processed by the authorized packers is now being checksampled. As a result of the various quality control measures the reputation of the purity of Agmark ghee is on the increase.

Owing to the fact that Saurashtra contributed a large proportion to the ghee graded in the country it was found necessary to establish a Subsidiary Control Laboratory in Saurashtra for doing the immediate work connected with the analysis of samples. The equipment of the laboratory was completed and it started functioning at Rajkot from the 1st April 1950. The increasing popularity of Agmark products has brought to light ingenious efforts on the part of unscrupulous persons at illegally imitating and counterfeiting the Agmark labels and manipulating and adulterating the contents of graded products. Wherever sufficient evidence was available, prosecutions were launched and the culprits were awarded suitable penalties by courts of law. As a measure of safeguard against such malpractices, revised designs of ghee labels were introduced and steps were taken to print the labels under security conditions on star watermark paper of the Government of India. This change in the label design was also introduced in the Agmark labels for edible oils. With a view to further strengthening the quality control measures and to safeguarding against the misuse of Agmark proposals were under consideration for amending the Agricultural Produce (Grading and Marking) Act, 1937 so as to provide therein enhanced penalties for the violation of the rules made under the Act.

STANDARD CONTRACT TERMS

The Standard Contract terms for wheat and linseed, were finally agreed to by the Grain and Oilseeds Conference, 1938, and similar terms for groundnuts were settled at an informal Conference held at Bombay in January 1939. A fairly satisfactory measure of agreement has been obtained regarding the adoption of the terms and while certain trading associations have started trading on this basis, unanimous support was not forthcoming, owing partly to the existence of an excessive number of small "futures" trading associations scattered all over the country and partly to the opposition of one or two important trading institutions and certain influential exporting and importing interests.

With a view to bringing about uniformity in the different contract terms for wheat and linseed (including the Standard Contract) adopted by the trade, an informal Conference of the representatives of three important trade associations of Bombay was convened in February 1941. Besides suggesting certain changes in the tolerances and limits of rejection for damaged, slightly damaged and shrivelled grains, the Conference made two important recommendations, *viz.*, that (1) 25 tons should be adopted as an alternative to 500 maunds as the minimum unit of transaction, and (2) that the cwt. should be adopted as an alternative to the maund as the unit of quotation. In the case of linseed, the Conference further suggested that the cleaning charge under "Retraction" should be lowered. These latter suggestions were circulated to the trade interests concerned and they have been accepted.

In the case of wheat, it has been decided to amend the Standard Contract for wheat as finally agreed to in 1938 and thereby implement the above mentioned recommendations.

The Standard Groundnut Contract was examined at the Bombay Conference, 1941, and several minor changes were suggested. These were afterwards circulated to the trade intercsts concerned. As regards Hand Picked Selected Groundnuts (kernels and nuts in shell), the Contract terms agreed to at a Conference held in 1940, were further revised and accepted by two leading trade associations of Bombay. Three leading exporters of groundnuts in Madras adopted the Standard Groundnut Contract from the beginning of 1942 and they have reported that the Contract terms have been readily accepted both by the sellers and purchasing agents and that they worked very well during the period of adoption. The question of enforcing the standard contract terms for groundnuts by legislation was examined at a conference of groundnut interests convened at Bombay in August 1944 under the joint auspices of the Directorate of Marketing and Inspection and the Indian Council of Agricultural Research. The conference agreed upon the various terms except in regard to drage and methods for estimating it, and recommended that the point be examined by the Oilseeds Committee of the Indian Council of Agricultural Research and till then the drage clause may be omitted. It was also felt that the trade should adopt the standard contract terms voluntarily, compulsion being introduced only if the trade fail to do so. The question of framing legislation to make the adoption of standard contract terms compulsory was referred to State Governments. The action taken by the State Governments in this connection including consultations with the interests seems to have convinced the trade that the Government are determined to enforce the standard contracts on a compulsory basis, and this has brought a good deal of change in their attitude. An informal conference of the leading trade associations held in Bombay in July 1948 suggested that another conference of an All-India character should be called to consider the possibilities of a general adoption of standard contracts by the trade associations on a voluntary basis. The matter is under further examination. Standard contracts were also prepared in respect of three vegetable oils, *viz.* groundnut oil, linseed oil and castor oil, and of milling copra. The latter were considered by the Indian Central Coconut Committee and approved for adoption.

Standard Containers.—For most commodities the containers used in the sub-continent are very variable in size. Owing to their fragile nature the contents are subject to appreciable damage which also varies in extent. To overcome these difficulties, trials on a commercial scale were carried out in Madras, Travancore-Cochin, old undivided Bengal, old undivided Punjab, the North-West Frontier Province, Assam, Rampur State, Uttar Pradesh, etc., with boxes of standard patterns for use in transit of eggs and fruit. Careful records were kept of the results for comparing the standard and the ordinary containers.

In the Travancore experiment conducted during 1939 and 1940 covering about 300,000 eggs, the loss by damaged and broken eggs in the standard boxes was only 0.52 per cent. as compared with damage and loss through pilferage of 1.77 per cent. in the ordinary baskets. As a result of the experiments, almost the entire export of eggs from Travancore to other markets like Madras were packed in the improved containers in 1941. This was facilitated by the grant of suitable concessions in freight rates by the railway administrations. In the Bengal trials the total wastage in the standard boxes was 0.5 per cent. as compared with 2.5 per cent. in the case of baskets. The experiments conducted in Rampur revealed that in three out of four containers of eggs consigned to Nainital in August 1941, the contents were absolutely undamaged, while in the case of the fourth, the damage was only about one per cent. Such reductions in the physical loss of produce are of small magnitude, but even a saving of one per cent. on this score alone would represent an economy of something like Rs. 5½ lakhs in the cost of distribution of the eggs put on the market. These experiments, however, received a set-back during 1942 owing to transport difficulties created by the War.

Regulation of Markets.—The draft model bill for the regulation of markets circulated by the Agricultural Marketing Adviser in the year 1938 formed the basis for necessary legislation in States. Agricultural Produce Markets Acts are now in force in Punjab, Madras, Bombay, Madhya Pradesh, Mysore, Hyderabad, and certain Districts of Madhya Bharat and Patiala. And steps to introduce similar legislation are also being taken in other States where no legislation already exists.

The regulation of markets enables the primary producer to sell his produce with absolute confidence and get a fair deal. Its aim is to standardise market practices which is essential for promoting orderly marketing and preventing malpractices. It has therefore found an important place in the post-war development programme, of practically all the States, and steps are being taken to bring in more markets under regulation so as to cover a large number of commodities. The Regulated Markets are, however, mostly in respect of particular commodities which are of local importance. For instance, in Amraoti, in Madhya Pradesh the number of regulated markets for cotton was 39 in 1949, and the number of other agricultural markets was only 9. It is proposed to regulate within five years the remaining 37 important markets in the State. In Madras, the Madras Commercial Crops Markets Act, 1933 is in operation, and is applicable to cotton markets in Tirupur, Adoni, Tirunelveli and Nandyal, to groundnuts at South Arcot, Coimbatore and Adoni and to tobacco markets in Guntur, West Godavari and Coimbatore districts. The Act was amended so as to extend its scope to any commodity after notifying it as a

commercial crop. At present the Act extends to arecanuts, coconuts, cotton, groundnuts, tobacco, turmeric and potatoes. Provision has also been made in the Act to declare the limits of a market yard. The Anantapur market was regulated for groundnut and cotton. The most rapid expansion in the organisation of regulated markets has been in Bombay and Hyderabad. Bombay State had planned under the post-war reconstruction scheme to establish 112 markets by the end of March 1952 but the re-imposition of control of food-grains resulted in heavy set-back to its implementation. Nine new markets were however regulated during 1949 raising the total to 53 and proposals in respect of another 16 were under consideration. Additional commodities were brought under regulation in the case of eight markets. The Bombay Agricultural Produce Markets Act was amended to permit an increase in the membership of market committees, and to enable them to determine retail sale, etc. In the Hyderabad State, thirteen new markets were brought under regulation raising the total to 67. The Hyderabad Agricultural Markets Act was amended as to enable the State Marketing Officers to participate in the meeting of the Market Committees. The Act was also extended to livestock. In the PEPSU the Patiala Agricultural Products Markets Act applied to 38 important markets. In the Punjab practically all important markets numbering 59 have been regulated. A bill for the introduction of regulated markets in the centrally administered areas was prepared but its enactment has been postponed. In the meantime the Government of Ajmer and Delhi are considering the extension of any of the existing State Legislations to those States. Gwalior District has 36. In Mysore, a regulated market has been established at Tiptur at a cost of about Rs. 28 lakhs for coconut, copra, oilseeds and jaggery. This began functioning in October 1949. Another scheme costing Rs. 4 lakhs was sanctioned for the establishment of a regulated market at Davangere. During 1951, four markets functioned in that State, and four more were sanctioned. It is further proposed to establish regulated markets for arecanuts, cotton, groundnuts, pulses and cardamoms. The Bombay Agricultural Produce Markets Act was extended to the State of Ajmer, but its enforcement could not be made. In West Bengal, a bill on the subject has been prepared. It is however, observed that due to abnormal conditions and reimposition of food control, legislation relating to regulated markets is not making the desired progress. It is however gratifying to note that the necessity for organising regulated markets has been stressed by the Central Food Advisory Council and the attention of the States has been drawn to this important activity.

Weights and Measures.—The attempts at regulating the markets were fittingly strengthened and supplemented by the passage on the 28th March 1939, by the Central Government of the Standards of Weight Act, 1939. The Act came into force with effect from the 1st July 1942 and the Standards of Weights Rules were promulgated in 1942, and sets of standard weights were prepared by the Mint Master, Bombay and distributed to all State Governments.

The need for the standardisation of weights and measures is recognised by all concerned and in several States, including Bombay, Bihar, Madhya Pradesh, Coorg, Orissa, Punjab, U.P. as also Hyderabad, Mysore and PEPSU, necessary legislation has been passed for enforcing the use of standard weights and measures. Subject to modifications the Orissa Weights and Measures Act, 1943 was extended to Delhi State in 1949. The Punjab Weights and Measures Act was extended to Ajmer State but it was not enforced.

As far as the actual use of standard weights and measures is concerned, a good deal remains to be done even in areas where the necessary legislation is in force. The Marketing Officers' Conference held in 1948 have however proposed that the question should be prosecuted with vigour and the State Marketing staff should be more intimately associated with the administration and enforcement of standard weights and measures. The Indian Standard Institution has proposed the introduction of the metric system of weights and measures in the country. *(For latest developments, see section on Weights and Measures.)*

CO-OPERATIVE MARKETING

With a view to ensuring to the cultivator, a fair price for his produce, the necessity of developing the marketing of agricultural produce on co-operative lines has been stressed time and again in the survey reports published by this Directorate. A separate survey on the subject has also been published but the actual progress made in the States in this direction is not very satisfactory. It is proposed to take up with the State Governments the question of making special efforts for organising co-operative sale of agricultural produce. In the meantime, an actual scheme of practical utility was prepared for organising the co-operative sale of vegetables in Delhi State and it was under the consideration of the State Government.

Warehouses.—The establishment of licensed warehouses for agricultural produce in India is yet another direction in which the cultivator can be helped and the wastage of food on account of bad storage saved, but very little work on the subject has been done. Only the States of Bombay, Madhya Pradesh, Travancore-Cochin, Mysore and Madras have passed the Warehouses Acts. In Madras and Madhya Pradesh, a set of rules under the Act was prepared.

Futures Trading in Agricultural Produce—Futures exchanges, as organised in India, aim at providing facilities for hedging. But there is a good deal of unnecessary speculation and many malpractices. In some markets there are two, three or more exchanges operating in the same commodity. The financial position of many of the exchanges is not sound and a large number of operators on them have no genuine interest in the trade. It is also known that the contracts and units of transactions prescribed by different associations vary widely and there is no co-ordination. Since the operations of futures exchanges are not generally confined to any one particular State, the need for Central legislation has been felt. Under the new Constitution the regulation of markets is a Central subject. A draft bill was therefore prepared and the opinion of the trade interests and others concerned has been obtained.

Broadcasting Market Quotations.—The dissemination of reliable up-to-date and accurate market intelligence is an essential function of the marketing department. The solution of the problems of food administration and price control would have been facilitated if a properly co-ordinated All-India Market News Service had been in existence from the beginning. Unfortunately, due mainly to lack of funds, the Central Agricultural Marketing Department had to rest content with a skeleton service of limited value. Similarly, except in the case of a few States, *e.g.*, East Punjab, Madras, Bihar, and Mysore, where a fairly good market intelligence is run, the other States have either no arrangements or have inadequate arrangements.

The Directorate of Marketing and Inspection had arranged for the broadcast of (1) the daily market rates of a number of commodities at Hapur market, (2) a weekly market report dealing with the fluctuations in important commodities like wheat, rice, oilseeds, pulses and several graded articles at various centres in India. During the year 1943, at the instance of the Food Ministry arrangements were made to broadcast daily the market rates for coarse grains at a number of selected centres all over India; but this broadcast was discontinued after a short time. The Directorate also issued a monthly review of prices and stocks relating to various commodities. Consequent on the establishment of the Directorate of Economics and Statistics the market news service at the Centre is now being attended to by that Directorate.

Publicity for Agmark.—The necessity for publicity for any scheme of agricultural improvement should be obvious. Efforts are accordingly being made to keep the public informed of the activities of the Directorate through the media of newspapers, exhibitions of special posters at railway stations and other suitable public places, and by putting up demonstration stalls at the various agricultural and industrial exhibitions in the States. In these exhibitions, public demonstrations are given of the technique of grading by exhibiting illustrative maps, diagrams and charts relating to the production, supplies and prices and by sale of the actual graded commodities. Brief pamphlets on the "Story of Agmark Ghee" and "Agmark Edible Oils" have been prepared for distribution to the public. In the recent period publicity of the above sort has however been modest. A proposal for the preparation of an Agmark ghee film is under consideration. Samples of sann hemp and bristles were sent for display in the Indian Industries Exhibition, London, in September 1950. Standard samples of graded tobacco were also sent in 1951 to Indian Government Trade Commissioners at United Kingdom, Egypt, Australia and several countries on the European Continent, with a view to developing a market for Indian tobacco in those countries. An Agmark stall was also set up in the International Industries Fair held at Bombay in 1951, for the publicity of Agmark grading schemes.

The question of setting up departmental Agmark stalls was examined recently and it was considered necessary that their establishment and efficient running would be best facilitated only if the Agricultural Produce (Grading and Marking) Act, 1937, was suitably amended. Proposals for amending the Act to provide for this and also to provide for more stringent measures for quality control of graded produce are under consideration.

QUALITY CONTROL OF EXPORTS

The Royal Commission on Agriculture and more recently the Indian Government Trade Commissioners abroad have pointed out repeatedly that the main obstacle in the way of attempts at pushing Indian agricultural products abroad was lack of standardisation in the quality and have stressed the need for an organised attempt to improve the quality of exported goods. The Directorate of Marketing and Inspection has from the beginning paid close attention to this problem. A scheme for the grading and marking of seedlac exported out of India was initiated in 1941 and during the period from July 1941 to January 1942, 2 consignments of graded seedlac weighing about 2,194 maunds were sent to the United States of America. Though the report on the first consignment was favourable, the experiment had to be abandoned due to the abnormal conditions consequent on the War.

Complaints about uncertainties of quality of lac have been increasing and there has been since recently a tendency on the part of foreign users to go in for substitutes. Proposals for regulating the quality of exports on the basis of standard Agmark grades are therefore under consideration. A scheme for the standardizing of quality and regulating the marketing of lac in India was approved by the Indian Lac Cess Committee in July, 1949. The question of introducing the scheme is being considered. In the meantime the question of revising the Lac Grading and Marking Rules was considered and general approval of the trade was secured for revising the grade specifications for seedlac and shellac. After eliciting public opinion, the revised Rules have been notified finally.

In a country like India where the units of production are small and dispersed over a wide area, quality control on exports is the only method by which advantages of standardisation could be progressively filtered down right to the small producer. This question has therefore assumed importance. An Inter-Ministerial meeting was held in the Ministry of Commerce in February 1949 which decided that priority should be given to the standardisation of several commodities, *e.g.*, wool, vegetable oils, lac, shellac, etc. The need for controlling the quality of export goods was also stressed by the Hon'ble Minister for Industry and Supply, and accordingly the question was examined in detail by a Special Committee of the Indian Standards Institution which was presided over by the Agricultural Marketing Adviser to the Government of India. The Committee recommended that exports of important commodities should be checked and inspected by qualified inspectors for quality and machinery for doing so should be set up. The principles of compulsory grading of various articles of agricultural produce for export purposes have also been approved of by the Planning Commission, who have recommended the introduction of such grading in stages spread over the five-year period commencing from 1951-52 on the lines of the sann hemp and tobacco grading schemes. Certain schemes prepared in accordance with their recommendations were under examination.

Goat Hair, Wool.—Sometime during 1943 contact was made with the Australian importers of goat skins and information was obtained with regard to their requirements of quality in Indian goat skins. Similar enquiries were also addressed to the Trade Commissioners at New York and London. Samples of goat hair collected from different parts of the country were sent to the Indian Government Trade Commissioner in Australia for being shown to buyers in that country. It was found that while the Australian merchants were generally satisfied with Indian goat hair, they would require it in a specially dressed form if they were to take Indian goat hair on any large scale for commercial use. A specimen of this dressed hair as used in Australia was obtained and shown to the trade interests in India in order to find out whether such dressing could be done as a matter of course before exporting hair from India. The trade in India felt that such dressing was not possible in the absence of the necessary mechanical means and technical knowledge. With great difficulty some more information was secured on the point and a consignment of samples of dressed hair was sent to Australia for evaluation. The samples were greatly appreciated by the trade in that country. As a result of this, tentative grade specifications for goat hair have been drawn up. These have been generally approved by importers in foreign countries and the question of finalising them now in consultation with the trade in India is under consideration.

During 1944 ten bales of cleaned and washed wool were collected by the Directorate from Ajmer and Jodhpur and sent to the Indian Government Trade Commissioner, New York, for purposes of evaluation by the Incorporated Carpet Manufacturers' Association, New York. The quality of this wool sample was highly appreciated by the Association. In view of this success a scheme for the grading of wool under the Agmark with a view to developing foreign markets and bringing about improvement in the local quality and for the appointment of the necessary Inspectorate staff is under consideration. In order to ascertain the views of the trade in the matter a conference of the important wool traders in the country was convened in January, 1946, and as recommended by the conference, an *ad hoc* wool committee was constituted by the Government of India in order to examine the question. This Committee could not make much progress in the matter, as opinion on the question of grading was not unanimous.

At the instance of this Directorate, wool and goat hair were included in the Schedule to the Agricultural Produce (Grading & Marking) Act, 1937, in August 1948. Tentative specifications for wool had been prepared a long time back. These were referred to buyers abroad and approved by them. The specifications for wool and the Grading Rules were notified finally after eliciting public opinion. Steps have been taken to induce a few prominent exporters of wool for grading it before export. The possibilities of establishing an auction market for wool at a convenient centre in India was examined with a view to establishing direct contact between exporters in India and foreign buyers. Representative samples of wool were collected for the purpose of classifying the different types of wool produced in India and preparing Agmark specifications for each class. A draft scheme for regulating the quality of exports of Indian wool was prepared. This and the question of establishing an auction market were discussed at a meeting of wool merchants in October 1949. The trade opposed the introduction of grading of wool on a compulsory basis but agreed to undertake it voluntarily. A scheme for collection, grading and marking of wool in Rajasthan was under consideration.

In view of the various malpractices in the trade which tended to bring down price of Indian bristles in foreign markets, the need for immediate enforcement of quality control on bristles exports was indicated. An *ad hoc* survey on the trade in pig bristles was therefore carried out with a view to finding out the existing defects. The question of quality control on the exports was discussed with the trade concerned at important centres, and later a meeting with the trade was held in September 1949 under the auspices of the Ministry of Agriculture to discuss and finalise the specifications of pig bristles and the scheme for regulating the quality of exports. The specifications were adopted with some modification and were notified finally after eliciting public opinion and the item bristles was included in the schedule to the Agricultural Produce (Grading and Marking) Act, 1937. The trade agreed that no bristles should be allowed to be exported unless they were graded according to the Agmark specifications and it also agreed to bear the cost of quality control on export, which may be incurred by the Government. The question of exercising control on the quality of exports of kapok was also under consideration.

Edible Nuts.—Some time in 1942 the Directorate collected certain samples of edible nuts, such as groundnuts in shell, cashewnuts, almonds and apricot stones, and sent them to the Indian Government Trade Commissioner in Canada in order to find out whether there would be any possibility of their utilisation in Canada for the preparation of chocolates, etc. The nuts were shown to the importers and were approved. A consignment of similar samples of wool, seedlac, shellac, cashewnuts, peanuts, almonds and wool has been sent to the Indian Trade Commissioner in Canada with a view to exploring possibilities of development of trade in those commodities. The samples were received with approval and satisfaction, but the practices of Indian exporters were unfavourably criticised, the more important of which are the lack of uniform standards and quality, continuity of supply and lack of proper inspection of produce before export. The question of the development of the export trade in hand-picked selected groundnuts used for confectionery purposes was examined and steps are being taken to arrange exports on the basis of Agmark grades, especially to Canada where this is in special demand.

Samples of different commodities were sent to the Imperial Institute, London, for exhibition purposes. A few samples of Indian wool were also sent to the Indian Government Trade Commissioner in Australia and New Zealand in May, 1947 for exhibition at the Sydney Show. The samples were considered as 'wonderful collection of Indian wool varieties' and were retained by Sydney Technical College as a permanent collection.

As a result of complaints received from the Indian High Commissioner in London regarding the quality of Indian curry powder and ginger exported to United Kingdom, the desirability of imposing some control on the quality of exports was considered. With a view to including these commodities in the schedule to the Agricultural Produce (Grading and Marking) Act, 1937, and to draw up suitable grade specifications, representative samples were collected and analysed. A survey on the marketing of this commodity is also in progress and as soon as the results thereof are known, the question of laying down standard grades and specifications will be taken up.

Vegetable Oils.—The Indian Central Oilseeds Committee resolved at its meeting in 1948 that all vegetable oils crushed in power mills should be compulsorily graded. As a preliminary step, a scheme for drawing up Agmark specifications for vegetable oils was prepared and the collection of samples was undertaken. The analytical work has been completed and the question of drawing up grade specifications for various vegetable oils and the revision of the existing specifications for linseed, mustard and groundnut oils is under consideration. A technical officer was appointed to examine and report on the facilities existing at present and prepare a scheme for setting up Government laboratories at port towns. The report he submitted is under consideration.

In order to safeguard the reputation in foreign markets of all kinds of agricultural produce exported out of the country, a comprehensive Bill styled the Agricultural Produce Exports (Quality Control) Bill to provide for legislation for the compulsory grading of all such produce was prepared by the Directorate of Marketing and Inspection and considered by the Government of India. The question of its enactment has however been postponed for sometime, though arrangements for analysis of samples of vegetable oils, oil seeds, wool, skins, bristles, lac, shellac and kapok have been made before finalizing their grade specifications.

The Government of India appointed in 1949 a Committee under the Chairmanship of Dr. Panjabrao S. Deshmukh, M.P., to examine the present conditions of cotton marketing in India and to make suggestions for improvement. The Committee visited important cotton areas and markets and has submitted its report.

Close liaison is maintained by this Directorate with the Indian Standards Institution in the matter of standardisation of agricultural products. Under the Rules and Regulations of the Institution, the standards laid down for agricultural products under the Agmark and the machinery for the quality control of those standards are to be recognised by the Institution. The Agricultural Marketing Adviser is a member of the General Council and he and other officers of this Directorate are members of various committees of the Institution.

Apart from the activities detailed above, the Agricultural Marketing Adviser to the Government of India performed the functions assigned to him as Regional Agricultural Production Commissioner for Bihar, West Bengal and Assam, in connection with the Grow More Food Programmes. The Central Marketing Staff has also to deal with numerous enquiries of a general nature. The marketing staff in several States are also closely connected with price control activities and are required to supply useful information regarding the availability of several agricultural commodities in India for the use of the Defence Services. The Central Marketing Staff are frequently called upon to supply information of various commodities to the different Ministries of the Government of India. The Directorate also offered material assistance to the Defence Services by arranging supplies of various foodstuffs to the military. For instance several thousand maunds of Agmark ghee and butter were purchased by the Ministry of Industry and Supply for the Defence Services during the last few years. Graded eggs in large numbers were supplied to the Army, Internment camps, hospitals, etc.

The above is only a brief sketch of the activities of the marketing staff. The detailed accounts, given in the published annual reports of the Agricultural Marketing Adviser, show that the scheme has recorded steady progress in spite of several difficulties such as lack of adequate funds and personnel and reluctance and hesitation on the part of the trade to follow new methods.

INDIAN COUNCIL OF AGRICULTURAL RESEARCH

THE Royal Commission on Agriculture after discussing the methods by which closer contact might be established between cientific investigators working in the Institutions under the Central Government and nvestigators employed under the State Governments, recommended the establishment of an mperial Council of Agricultural Research to vhich the Imperial Agricultural Research nstitutions and the State Agricultural Research nstitutions would stand in exactly the same elation.

In the now defunct Department of Education, Health and Lands Resolution No. 826-Agr., lated 23rd May, 1929, the Government of India lecided that the Imperial Council of Agricultural tesearch should be registered under the Registration of Societies Act, XXI of 1860, and the Council was accordingly registered as a Society under the provisions of that Act. The name of he Council has since been changed to " Indian Council of Agricultural Research ".

The Royal Commission on Agriculture envisaged that the primary function of the Council should be to promote, guide and co-ordinate agricultural, including veterinary research in he country and to link it with agricultural esearch in other parts of the commonwealth and in foreign countries. It should make rrangements for the training of research workers, should act as a clearing house of information in regard not only to research but lso to agricultural and veterinary matters enerally and should take over the publication work which was being carried out by the then mperial Agricultural Department. In the light of the experience gained it was subsequently lecided that the Council's functions should e enlarged to include work connected with the pplication of the results of research to field ractice and the Council's function is now to undertake, aid, promote and co-ordinate agricultural and animal husbandry education, esearch and its application in practice, development and marketing in India by all means calculated to increase the scientific knowledge of the subjects and to secure its adoption in everyday practice.

The Commission recommended that the Council should be entrusted with the administration of a non-lapsing fund of Rs. 50 lakhs to which additions should be made from time to time as financial conditions permitted. The Government of India decided that an initial lump grant supplemented by a fixed minimum grant annually should be made to the Council. They decided that the initial grant should be Rs. 25 lakhs of which Rs. 15 lakhs would be provided in the budget for 1929-30 and from the next financial year onward the annual recurring grant would be fixed at Rs. 7.25 lakhs per annum of which Rs. 5 lakhs would be devoted to the furtherance of the scientific objects of the Council and the remaining Rs. 2.25 lakhs to the cost of its staff and Secretariat. In 1940 the Agricultural Produce Cess Act was passed under which a cess of ½ per cent *ad valorem* on certain commodities was levied for the purpose of providing funds for carrying out the general research programme of the Council. The proceeds of the cess were expected to yield in a normal year about Rs. 14 lakhs.

CONSTITUTION

As regards the constitution of the Council, the Government of India decided that the Council should be divided into two parts, a Governing Body which would have the management of all the affairs and funds of the Council subject to certain limitations and an Advisory Board the functions of which would be to examine all proposals in connection with the scientific objects of the Council which might be submitted to the Governing Body.

In order to enable the Council to perform its duties in all the three spheres, *viz.*

(1) Fundamental Research ;

(2) Technological Investigation ; and

(3) Introduction of research into practice, the Rules of the Council were amended at its Special General Meeting held in November 1950 and the Council now consists of a Governing Body, a Standing Committee, an Advisory Board, a Board of Research and a Board of Extension.

The Governing Body is responsible for the management of the affairs and funds of the Council, subject to certain limitations. It now consists of the Hon'ble Minister for Food and Agriculture, Government of India, who is *ex-officio* President, the Vice-President of the Society, the Hon'ble Deputy Minister for Food and Agriculture, Government of India, the Hon'ble Ministers for Agriculture in each of the Parts A and B States in the first Schedule to the Constitution of India, the Chief Commissioners of Part C States, three representatives of Parliament, two representatives of the Advisory Board of the Council, the Secretary to Government of India in the Ministry of Food and Agriculture, members of the Standing Committee and such other persons as the Hon'ble Minister for Food and Agriculture, Government of India, may from time to time appoint.

The Standing Committee has been constituted to afford relief to the Governing Body in the discharge of its executive functions and to enable the Principal Administrative Officer of the Council to place before it for advice the various matters that arise in the course of its day to day administration. The Committee consists of the President and the Vice-President of the Council, the Hon'ble Deputy Minister for Food and Agriculture, Government of India, a representative of the Hon'ble Ministers for Agriculture in Part A States, a representative of the Hon'ble Ministers for Agriculture in Part B States, a representative of the Chief Commissioners of Part C States, a representative of the Vice-Presidents of the Central Commodity Committees, the Agricultural and Animal Husbandry Commissioners with the Government of India, the Vice-Chairmen of the Board of Research and the Board of Extension, the Financial Adviser of the Society, the Economic and Statistical Adviser to the Government of India in the Ministry of Food and Agriculture, the Secretary of the Society and persons not exceeding three in number to be nominated by the President of the Society for such period and for such meetings as may be considered necessary.

The Advisory Board is now responsible for examining such proposals as may be referred to it by the Standing Committee of the Council in connection with the scientific objects of the Council, including research, extension and development projects. It consists of the Vice-President of the Society, the Agricultural and Animal Husbandry Commissioners with the Government of India, the Agricultural Marketing Adviser to the Government of India, the Economic and Statistical Adviser to the Government of India in the Ministry of Food and Agriculture, the Statistical Adviser of the Council, Directors of the Indian Agricultural Research Institute, the Indian Veterinary Research Institute, the Indian Dairy Research Institute, the Indian Institute of Science, the Central Rice Research Institute, the Central Potato Research Institute, the Directors of Agriculture and the Directors of Veterinary Services/Animal Husbandry in each of the Parts A and B States, two representatives of Part C States, the President of the Forest Research Institute, a representative of the Co-operative Movement in India, a representative of the Indian Council of Medical Research, four representatives of the Universities, a joint representative of the Indian Tea Association and the United Planters' Association of Southern India, one representative of each of the Central Commodity Committees, a representative of the Indian Rubber Board, a representative of the Indian Coffee Board, a representative of the Fisheries Research Stations nominated by the Government of India, not more than five non-official members nominated by the Government of India on the recommendations of the Standing Committee on the ground of scientific knowledge or other special qualifications, members of the Board of Research and the Board of Extension and such other persons as the Hon'ble Minister for Food and Agriculture, Government of India may from time to time appoint.

The Research Board is responsible for advising the Standing Committee in respect of the general policy of agricultural research (including animal husbandry, forestry, fisheries, and allied subjects), training and education and formulation of a unified programme for the whole country.

It is also required :

(*i*) to initiate, guide and supervise research projects ;

(*ii*) to co-ordinate schemes of research in the country ; and

(*iii*) to make recommendations to the Board of Extension for testing the results of research on cultivators' fields through pilot schemes.

It consists of not more than fifteen members, representing as far as possible, all major branches of research, nominated by the President of the Council who is also an *ex-officio* member and Chairman of the Board. The Vice-President of the Council, the Economic and Statistical Adviser to the Government of India in the Ministry of Food and Agriculture, the Vice-Chairman of the Board of Extension, the Agricultural and Animal Husbandry Commissioners with the Government of India and the Statistical Adviser of the Society are its *ex-officio* members.

The Board of Extension is responsible for advising the Standing Committee in respect of general policy pertaining to the conduct of pilot schemes for trying out results of research in the cultivators' fields to ensure their utilisation throughout India.

Is is required :

(*i*) to initiate, guide, supervise and co-ordinate extension schemes with a view to securing unified programme of extension work throughout the country ; and

(*ii*) to make recommendations to the Board of Research on the basis of experience gained in the working of pilot schemes and in the adoption of improved practices.

It consists of not more than 21 members, appointed by the President of the Council and *inter alia* includes :

(*a*) two Directors of Agriculture in the States ;

(*b*) two Directors of Veterinary Services/ Animal Husbandry in the States ;

(*c*) the Head of the Department of Forestries in one of the States ;

(*d*) one Officer of the Fisheries Departments in the States ;

(*e*) one Registrar of Co-operative Societies; and

(*f*) one Officer dealing with extension work in one of the Central Commodity Committees.

The Vice-President of the Council is the *ex-officio* Chairman of the Board and the Agricultural and Animal Husbandry Commissioners with the Government of India, the Vice-Chairman of the Board of Research and the Statistical Adviser of the Council are its *ex-officio* members.

President, The Hon'ble Shri Rafi Ahmed Kidwai, Minister for Food and Agriculture, Government of India.

Vice-President, Sardar Datar Singh.

Joint-Vice-President, K. R. Damle, I.C.S.

Agricultural Commr. with the Govt. of India, Vacant.

Animal Husbandry Commr. with the Govt. of India, P. N. Nanda, M.R.C.V.S.

Agricultural Extension Commissioner, S. C. Roy, M.Sc.

Statistical Adviser to the Council, Dr. V. G. Panse, Ph.D. (Lond.), F.N.I.

Secretary to the Council, J. V. A. Nehemiah, M.A.

Indian Institute of Sugar Technology, Kanpur

The Indian Sugar Committee of 1920 recommended *inter alia* the establishment of a central research institute as necessary for the proper development of the sugar industry.

The recommendation of the Sugar Committee was accepted and the Imperial Institute of Sugar Technology as it was then called was started at Kanpur by the Government of India on 1st October, 1936, to carry out research in different branches of sugar technology and to help the Indian sugar industry in various ways by rendering technical assistance to sugar factories, by training students in all branches of sugar technology, by providing short term courses to technical men already engaged in the industry, etc. On the 1st March, 1945, the control of the Institute passed to the Indian Central Sugarcane Committee, formed by a resolution of the Governor-General in Council and registered under the Registration of Societies Act XXI of 1860. The Committee is constituted by members from every section of the Industry, *viz.*, cane growers, sugar manufacturers, sugar merchants and sugar technologists.

The Institute is financed by grants from the Sugar Excise Fund.

The work of the Institute is organised under two broad heads, (*a*) office work including general administration and (*b*) research and teaching. The former includes the technical, the statistical and general sections ; the latter consists of three main sections—Sugar Technology, Sugar Engineering and Sugar Chemistry, the last comprising Sugar Chemistry, Organic Chemistry, Physical Chemistry and Bio-Chemistry. The laboratories are well equipped with instruments required for research on sugar and allied products. Attached to the Institute are the Experimental Sugar Factory, Workshop, Sugar Engineering and Chemical Engineering Laboratories, Bureau of Sugar Standards and the research scheme for the manufacture of sugar candy in India, and the scheme for research on Gur and Khandsari industries.

The functions of the Gur and Khandsari section are (*i*) testing of existing plants and processes in use in the open pan industry for the manufacture of gur and Khandsari sugar, (*ii*) undertaking research work for introducing improvements in the plants and processes, (*iii*) giving demonstrations of new machines and improved processes. In this connection it may be mentioned that the Indian Central Sugarcane Committee have since 1945 constituted a gur and Khandsari sub-committee for advising them on the lines of work to be carried out.

The functions of the Sugar Candy Research Scheme at Ravalgaon are (*i*) testing the indigenous methods of candy manufacture, (*ii*) collecting technical data, (*iii*) initiating researches for introducing new and improved plants and processes for the manufacture of sugar candy with a view to developing it as a subsidiary industry to the modern vacuum pan industry thereby increasing consumption of sugar in India, and (*iv*) giving demonstration of new machines and improved processes. Facilities also exist at the centre for imparting training in the manufacture of candy by the improved process. Besides the above the Indian Central Sugarcane Committee have initiated two new schemes which are functioning at the Institute (1) Scheme for the survey of excessive fuel consumption in Indian sugar factories, (2) Scheme for extension lectures. The object of the former scheme is to carry out a survey of the causes of excessive fuel consumption in sugar factories and to make them self-sufficient on bagasse fuel only, while under the latter scheme, eminent persons are invited each year for delivering a series of two to four lectures on subjects relating to sugar and allied industries.

TECHNICAL ASSISTANCE

Apart from work relating to collection, compilation and publication of technical statistics, technical assistance and advice on various aspects of the sugar industry are given by the Institue to sugar factories, private parties, Central and State Governments. The Institue endeavours to meet all technical requirements of factories so far as its staff and equipment permit. The more important types of work which the Institute undertakes for rendering technical assistance to sugar factories are (*a*) advice to promoters of new factories, (*b*) advice relating to extensions and alterations of existing factories, (*c*) advice relating to improvements in working of plant, (*d*) advice relating to improvements in curing processes, (*e*) technical control of manufacturing operations, (*f*) advice regarding working expenses and cost of production, (*g*) investigations into special problems and (*h*) analytical work.

The Indian Sugar Trade Information Service run by the Director issues a daily and a weekly sugar market Bulletin, which contains useful information regarding Sugar, Gur, and Khandsari market rates, wholesale and retail—and stocks and despatches—for principal sugar markets in the Indian Union ; Indian and foreign sugar news. Official notifications are also given therein. The annual subscription for these services are Rs. 180 for daily and Rs. 75 for weekly Bulletins.

A scheme for a Broadcasting Service has also been put into operation since August 1949, under which a weekly report of average prices of Sugar, Gur and Khandsari is prepared both in Hindi and English and supplied to A.I.R., Lucknow, every Monday.

In order to establish and maintain contact with the sugar factories and enable them to keep in touch with research work carried out at the Institute and developments elsewhere, arrangements have been made for issuing brief summaries on matters of technical interest under the title of *Sugar Notes*. Description and results of various experimental and research work carried out in the Institute are being published annually in the publication entitled *Annual Report of the Indian Institute of Sugar Technology*. A copy of the report is sent for information to every sugar factory.

The Institute trains a limited number of men every year and gives them a thorough and up-to-date training. For most courses, a period of factory training is an essential condition for the grant of diploma or certificate. There are six regular courses of training for students desiring to qualify for technical posts in sugar factories, *viz.*, Fellowship and Associateship courses in Sugar Technology and in Sugar Engineering, the Sugar Engineering Certificate Course, and the Sugar Boilers Certificate Course. Since the year 1948 the Institute has been recognized by the Agra University for purposes of research work for the Ph.D. Degree of the University in Chemistry. Facilities are also provided for men already engaged in the industry to have the necessary technical training during the off-season provided they have the requisite educational qualifications. The off-season courses are (*a*) Pan Boiling, (*b*) Fuel and Boiler Control.

In order to afford adequate facilities to the sugar factories in India for selecting properly qualified staff and at the same time to reduce unemployment among the educated technical workers in the sugar industry, the Institute maintains an Employment Bureau which collects authentic information about the qualifications and experience of persons seeking employment in the sugar industry and makes it available free of charge to factories on receipt of enquiries.

FOOD AND FAMINE

INDIA'S total production of food grains is approximately 45 million tons per year, of which the *kharif* crop constitutes about two-thirds. The 1951-52 *kharif* crop will be more or less the same as that of last year which was itself short by 5 million tons. The *rabi* crop of May 1950—April 1951 was about 8 million tons. Even if the *rabi* crop of 1951-52 maintains the present level of production, it is felt that the food deficit will be more than 5 million tons in 1952.

It is gathered that out of five million tons required for 1952, 4·11 million tons including the one million tons of U.S. loan have already been contracted for.

The internal procurement is expected to be 3·2 million tons (2·5 million rice and millets, 700,000 wheat) while the present (1952 May) stocks amount to 2·6 million tons.

As regards the target of food imports of five million tons 1·5 million tons will come from the International Wheat Conference pool, one million constitutes the American wheat loan and 200,000 tons are expected to be received under the Colombo Commonwealth Aid Plan. Over and above this, India is receiving eight lakh tons of *milo* from the U.S.

As for rice, India is expected to receive during the year 3·5 lakh tons from Burma, 1·60 lakh tons from Thailand and about a lakh of tons from China. Thus the rice imports contracted so far this year amount to only 6·1 lakh tons against over eight lakh tons imported last year.

If Pakistan comes to the rescue of India and fulfils her contract to supply this country 150,000 tons of rice this year the position may somewhat improve.

Internally, the largest contribution during the current year 850,000 tons in rice is expected from Madras State. Uttar Pradesh will be second, with 467,000 tons—307,000 tons in wheat and barley and 160,000 tons in rice and millets.

Bombay will contribute 260,000 tons of rice and millets and 20,000 tons of wheat, West Bengal 250,000 tons of rice, Hyderabad 218,000 tons of rice and millets and 7,000 tons of wheat, Madhya Pradesh 260,000 tons of rice and millets and 20,000 tons of wheat, Orissa 142,000 tons of rice, and Punjab 122,500 tons of wheat and barley and 60,000 tons of rice and millets.

The quantity of food procured in 1951 was 3,430,000 tons, a million tons less than in 1950.

A committee to enquire into the working of the Grow More Food campaign was appointed under the chairmanship of Mr. V. T. Krishnamachari.

Other members of the committee are Mr. R. K. Patil, a former member of the Planning Commission, Mr. M. P. Patil, once Minister for Agriculture in Bombay, Pandit Thakurdas Bhargava and Mr. T. N. Singh, members of Parliament, Dr. V. K. R. V. Rao, head of the Delhi School of Economics, Mr. Dip Narain Singh of Bihar and Sardar Dattar Singh, Vice-Chairman of the Indian Council of Agricultural Research. Mr. S. T. Raja, Deputy-Secretary in the Food and Agriculture Ministry, and Mr. M. P. Bhargava, Assistant Chief of the Food and Agriculture Division of the Planning Commission, will be secretaries of the committee.

In the first half of 1952 the Government of India withdrew its food subsidy to some of the States. The result of this was that the price of food in these States rose and there was much public agitation.

The normally surplus States are Madhya Pradesh, The Punjab, PEPSU, Orissa and Assam; those that can be considered self-sufficient are U.P. and Madhya Bharat; the deficit States are Bombay, Madras, Mysore, Travancore-Cochin, Saurashtra, Hyderabad, Rajasthan, Himachal Pradesh, Bihar and West Bengal.

GROW MORE FOOD

Soon after the Prime Minister's self-sufficiency declaration in March 1949, a Food Commissioner was appointed for the country as a whole and corresponding offices created in the States. These were abolished one by one within a year of the officers' appointments. Even while these officers functioned, there was hardly a change in the "grow more food" schemes either by way of putting more drive into them or making them more efficient. The futility of the schemes was disclosed by some surveys published in 1950. A Bombay official survey computed the food increase as a result of the schemes at about 4 per cent. but added that this was more than masked by seasonal fluctuations which were of a greater magnitude. Survey parties sent out by the Bombay University School of Economics and the Reserve Bank of India came to the conclusion that the schemes had failed utterly in their purpose and drew attention to various ominous signs of a fall in the fertility of the soil, diversion of land to uncontrolled oilseeds, misuse of subsidies and corruption in the distribution of loans, etc. It is a fair inference that what is true of Bombay cannot be untrue of other parts of India. The official policy nevertheless remained practically unchanged and little thought was paid to such basic problems as improving the yield itself so that the output of food could increase automatically, reorganising agricultural economy to make this possible, and of controlling the different crops in regard to price and procurement so that none is put at a premium over another and the land is put under crops according to their natural suitability. On the contrary Government policy is directed towards achieving self-sufficiency simultaneously in food, cotton and jute. What is actually happening is that more and more land is being planted with oil-seeds the prices of which are uncontrolled, and on top of this cotton and jute, whose cultivation carries several concessions, have been claiming a portion of the remaining food acreage. Food production has thus suffered, while there was no corresponding gain in cotton and jute. It was expected that cotton production would be up by about eight lakh bales; actually it was estimated in April 1951, that the increase would not be more than 2 to 3 lakh bales. The target for jute in 1950 was an increase of 1·2 million bales but actually the additional production was only about 2 lakh bales, the reason advanced being the bad quality of seed.

REASON FOR FAILURE

Mr. K. M. Munshi, then Minister for Food and Agriculture, in a note circulated to members of Parliament gave a different picture, and said that the grow-more-food schemes would have to be extended at least up to March 31, 1954.

The note explained that since partition, as a result of the increase in population, the "per capita" area under cereals had declined by ten per cent. in spite of an increase of 3·5 million acres in the total area.

During the same period, according to the figures supplied by the State Governments, the production of cereals had declined by 3·4 million tons. The "per capita" production, if these figures were correct would appear to have fallen by 18 per cent.

"But I am inclined to consider that these figures are inaccurate," the Minister went on. "The reporting agencies, with a bias towards building up a claim for additional supplies from the Centre—that being human nature—would tend to be too pessimistic about their own production."

The campaign for increased production had to be operated through millions of small holdings of farmers and "naturally, therefore, the vigour of the campaign gets dissipated and mechani ed farming and improved practices are difficult to adopt."

Since the pre-war period, the area of fallow land had increased by 10·7 million acres, due, among other things, to the refugee movement, disturbed conditions in Hyderabad and the Punjab and a desire to hold on to the land, though not required, "so as to escape from the operation of the country-wide activities relating to Zamindari Abolition and Tenancy Protection Acts." Among the reasons why fallow lands, in spite of Land Utilisation Acts, were not given to well-to-do farmers ready to plough them, are "administrative dilatoriness or corruption". Some diversion of areas from food grains to other crops such as oilseeds had been reported. Since food grain prices were controlled and the prices of other crops were not controlled, it was difficult to effectively stop this diversion. The loss due to inadequate and unsatisfactory storage was at least five per cent.

In the States endowed with natural resources, the results of the grow-more-food programme had been "remarkable."

The principal reason, however, why the results of the grow-more-food campaign were not reflected in the supplies of food grains and their prices was that the producer withheld 'considerable stocks' from the market due, firstly, to the increase in his own consumption; secondly, to the shifting of the dietary emphasis from coarse grain to wheat and rice; and thirdly, to the increase of the holding capacity and the fear of procurement.

The estimated additional production from the grow-more-food campaign, on the basis of conventional yardsticks, was 3.4 million tons in 1950-51 over 1947-48. Even if this was considered to be subject to a margin of error of 15 per cent., the increase could not be less than 2.92 million tons. Against this, however, had to be set off a reduction of about 0.36 million tons due to the diversion of certain areas to cotton and jute. Even then, an increase of at least 2.56 million tons should have taken place. Unfortunately, this increase had been more than cancelled by the reduction of 5.5 million *tons, caused by natural calamities.* "*It is* important to note, however, that the loss would have been even greater if the different grow-more-food schemes had not been in operation and the additional production due to them had not taken place,"—the note concluded.

LACK OF PLANNING

In conditions of scarcity it is as important to procure and distribute equitably what is produced as it is to produce more. It is quite possible that if Bihar had an efficient procurement and distribution system, its people would not have starved in 1950 and would have received at least a few ounces occasionally. Commonsense has dictated for long that India's food scarcity must be treated as a national problem and that there ought to be a uniform system of procurement and distribution so that all the available supplies are shared equally by different parts of the country so that there is no glut in one State and starvation in another. But the ideal remains unfulfilled and Bombay's lead in the matter given in 1943-44—monopoly procurement and the levy system and rationing in all urban and rural areas—has not yet been copied elsewhere. Only 45 millions of the country's 360 millions are statutorily rationed and there is no fool-proof procurement system on the Bombay model in any other State. A Committee to report on the subject was appointed under the chairmanship of Mr. Thirumal Row, then Deputy-Minister of Food, but its findings have not yet been published. There was much talk of equality of sacrifice but no steps have been taken to enforce it. In August 1950, the Food Ministers passed a resolution repeating the old intention of placing the food problem on a war footing and intensifying procurement. But no measures were devised to vitalize the resolution and nothing was said about distribution.

A disconcerting feature of the whole problem is the lack of unanimity in the Party in power over the question of food control. In spite of authoritative resolutions to the contrary, some Congressmen openly advocate decontrol forgetting the disastrous results of the 1947 experiment. Some time ago the Prime Minister asked the Party to appoint a Committee to go into the whole question and arrive at a firm and well-defined policy.

FAMINE

Food production in the sub-continent has through the ages periodically failed to meet the needs of the people. The sub-continent's history has consequently been punctuated by disastrous famines, the worst of which have killed millions of people and left wide tracts of country desolate. Famines may be said to arise when large groups of people fail to produce enough food for their own needs and lack the means of obtaining it from other sources. Such conditions may be precipitated either by successive failures of the monsoon, on which four-fifths of the country's agriculture depends even today; by natural disasters such as floods or earthquakes or by human agencies such as war and grain market speculation.

References to famine are found early in the sub-continent's history. Little is known of these early disasters; details are based on tradition and until late in the eighteenth century such visitations were regarded as natural calamities which man was powerless to prevent. The first definite outbreak known to historians was in 650 A.D. when famine raged throughout the country. There was another series of famine in 941, 1022, and 1033, when whole provinces were depopulated and men were driven to cannibalism, according to tradition. The years 1148-1150 saw almost continuous famine. In 1344 famine was rampant in Upper India. The Emperor Muhammad Tughlak was unable to obtain necessaries for his own household and ordered the evacuation of Delhi's population to Deogiri (modern Daulatabad) in the Deccan. From 1396-1407 the Durga Devi famine devastated the Deccan and so reduced the population that land went out of cultivation for years. The years 1595-98 saw famine in the north.

The Gujarat famine, one of the first about which precise details have survived, broke out in 1630. Towns and districts were stripped of inhabitants. In 1631 a Dutch merchant reported that only 11 of the 260 families at Swally had survived.

Between 1660 and 1750 there were 14 major famines about which little is known.

The causes of these famines were those already stated. Practically the whole of the food production was dependent on the vagaries of the monsoon. Internal wars were common and often coupled with them were widespread pillage, trade dislocation and general devastation. The fast communications of the nineteenth and twentieth centuries were not available for relief to be brought from outside the famine area. Between 1838 and 1899 there were eight major disasters.

THE FAMINE CODES

The first great Famine Commission which sat under the Presidency of Sir Richard Strachery, elaborated the Famine Codes, which, amended to meet later experience, form the basis of the famine relief system today. They recommended (1) that employment should be given on the relief works to the able-bodied at a wage sufficient for support, on the condition of performing a suitable task; and (2) that gratuitous relief should be given in their villages or in poor houses to those who are unable to work. They recommended that the food supply should be left to private agency, except where that was unequal to the demands upon it. They advised that the land-owning classes should be assisted by loans, and by general suspensions of revenue in proportion to the crop failure.

Provincial codes were drawn up, and were tested by the famine of 1896-97. The experiences of this famine were examined by a Commission under Sir James Lyall, which reported that the success attained in saving life and the relief of distress was greater than had ever been recorded in famines, comparable with it in severity, and that the expense was moderate. But before the Local Governments had been given time to digest the proposals of this Commission, or the people to recover from the shock, the great famine of 1899-1900 began.

This famine affected 475,000 square miles with a population of 59,500,000.

1943 BENGAL FAMINE

Localised famine conditions have recurred fairly frequently since 1901, but until 1943 it seemed that the procedure laid down by the Famine Codes was capable of dealing with all eventualities. Unfortunately, conditions in which the difficulty of obtaining relief supplies would be so great that the Codes' provisions could not be filled, were not envisaged. This state of affairs, however, arose in Bengal early in 1943. The province was estimated to be 83 per cent. self-sufficient for food and before 1942 imported most of the balance of its needs from Burma. The cutting off of this supply was followed by a series of natural disasters, including the Midnapore hurricane which late in 1942 devastated a wide area and was estimated to have destroyed 1,500,000 tons of rice. During the monsoon of 1943, when famine was already present in Bengal, floods in the Damodar river held up relief supplies from U.P. and Punjab at a critical period. Public nervousness over the fall of Burma, the denial policy, by which boats and the larger stocks of rice were removed from East Bengal to prevent their use by the Japanese, and the general shortage of food in most consuming centres in the country were all contributory causes of the famine. When shortages became apparent in Bengal their effect was intensified by speculation on a most outrageous scale. A few areas such as Midnapore, were short of food from natural causes. Most of the other famine-stricken districts suffered because rice prices were far beyond the reach of the people, because speculators had drained the area of stocks, or because the available grain was hoarded by its owners.

According to the Famine Codes, assistance should have been provided from outside. In 1943 the problem was two-fold. Very large supplies were not readily available elsewhere owing to the general dislocation of Indian grain markets; the movement of supplies into Bengal was difficult owing to the congested state of the railways. A fairly steady stream of grain did, however, reach Calcutta from July onwards, but the Bengal Government did not evolve a satisfactory plan of distribution. Many famine areas in the province were virtually without relief until the army assisted the civil authority to organise food distribution and medical relief in November, 1943. This relief, coupled with a record rice crop, which became available in January-February, 1944, overcame the immediate crisis.

Famine conditions were accompanied by epidemics of cholera, malaria, smallpox and dysentery which probably caused as many deaths as starvation itself.

In 1950 there was a famine in Bihar.

Since 1921, Bihar's population has increased by 11,000,000 and it now stands at 40,218,916, according to the provisional totals of the 1951 census.

During the last 30 years, while the population has increased by about 25 per cent, food production has actually fallen by as much as 40 per cent.

Food statistics published by the Economic and Statistical Adviser to the Ministry of Agriculture, Government of India, show that there has been a steady and continued decline in production in the period 1938-39 to 1948-49 from over five million tons to slightly over four million tons.

The population is now over 40 million, the level of prices was the highest in the recorded history of Bihar, and the estimated losses owing to floods, excessive rains or continued drought amounted to over 25 lakh tons.

The number of under-nourished people could not be less than 20 million—almost half the population. They were unable to have a full meal once in two or three days.

In 1951 the drought affected areas were Gujarat, the Districts of Hissar and Gurgaon in the Punjab, Gohilwad and Palitana in Saurashtra, the bulk of Rajasthan, Ajmer-Merwara, parts of Madhya Bharat. About 150,000 to 200,000 persons were affected. The most unfortunate part of it was that it was the most fertile and the best crop-growing areas that were hardest hit.

In the early part of 1952 there was serious famine in the Rayalaseema area of Madras.

More recently a most disturbing circumstance has been the recurring failure of the monsoon in the south in the past four years. This has affected not only production of crops on dry land but also of irrigated crops because of the low level of water in the reservoirs. The year 1950 witnessed an unprecedented drying up of the Krishnarajasagar reservoir in Mysore. This has an optimum level of 124 feet and it went down to less than 7 feet. The consequences to irrigation were grave.

Soil erosion, too, continues unabated. Thousands of acres pass every year from fertile into marginal land and from marginal into waste. Deforestation is unchecked and it has been observed that as a result of large quantities of silt being washed down the eroded hill sides, the beds of some of the irrigation reservoirs have been rising with a consequent lowering of their capacity. New dams are being built but the increase in irrigation facilities will have little effect so long as the basic problems of deforestation and soil erosion are not adequately managed

Table 1

PRODUCTION AND IMPORTS

(Figures in million tons)

	1948	1949	1950
Requirements	52	52	52
Production	43·7	43·3	45·5
Imports	2·8	3·7	2·1
Cost (C & F) of Imported Food (in crores of rupees).	129·72	144·6	79·8

Notes: (1) The requirements figure (which is not official) is worked out on the basis of a population of 35 crores, a daily per capita diet of 12 oz. and a margin of 20 per cent for seed purposes, waste, etc. On the basis of the nutrition experts' norm of average daily diet of 1 lb., requirements for consumption alone come to about 52 million tons.

(2) The production figures are for food grains which include rice, wheat, bajra, jowar, maize, ragi, barley and small millets. Imports include wheat, wheat flour, rice, millets, maize, barley, milo, spelt, oats, semolina and rye.

(3) Production figures for 1949 and 1950 are not strictly comparable with those for the earlier year owing to coverage for them being larger.

Table 2

COUNTRIES FROM WHICH IMPORTS WERE OBTAINED TOTAL QUANTITY AND VALUE

(quantity in million tons and C & F value in lakhs of rupees)

Table 3

PRODUCTION AND IMPORT OF DIFFERENT FOOD GRAINS
(million tons)

Grain	1948		1949		1950	
	Production	Imports	Production	Imports	Production	Imports
Rice	21·2	·86	22·5	·76	22·7	·34
Wheat (including wheat flour) ..	5·5	1·3	5·6	2·2	6·2	1·39
Others	16·9	·66	15·0	·73	16·4	·36
Total ..	43·7	2·8	43·3	3·7	45·5	2·1

In 1951 the imports of rice, wheat (including wheat flower) were ·74, 3·01 and ·98 million tons respectively.

Table 4

STATEWISE FIGURES OF PRODUCTION, REQUIREMENTS, SURPLUS OR DEFICIT AND CENTRAL FOOD ALLOCATIONS

(in million tons)

1. The requirement figures in the table on next page are not official and are computed on the basis of the Home Ministry's estimated population as in March, 1950, a daily per head consumption of 12 oz. and a margin of 20 per cent. for seed, waste, etc.

2. As regards Central allotments, it should be noted that all States are not self-sufficient in all grains and while some grains may be exported to deficit areas, others may be imported. Thus in 1950, Madhya Pradesh, for example, exported 145,000 tons of rice and imported 39,000 tons of wheat and other grains. The export figures are not shown in this table. The net exporting States were: 1948—Madhya Pradesh, Orissa, PEPSU, Coorg and Vindhya Pradesh; 1949—Orissa, PEPSU, Coorg and Vindhya Pradesh; 1950—Madhya Pradesh, Orissa, Punjab, Madhya Bharat, PEPSU, Bhopal, Coorg and Vindhya Pradesh.

3. The table reveals how in some cases the official statistics are not reliable. Bombay, for example, is seen from the table to have received more than its requirements in 1950 and yet there was a breakdown in the rural rationing system—this indicates that the production figure is not correct. Similarly Assam is seen to be a surplus area and yet it has received grains in excess of what it has exported.

The table also reveals that the country as a whole has been living on less than it requires which should support the generally observed fact that millions of people do not have sufficient food to eat.

Table 6

PROCUREMENT SYSTEMS

ASSAM.—Direct levy in thanas bordering Pakistan. Elsewhere purchases made through agents from producers of surplus above 200 maunds.

BIHAR.—Monopoly purchase in five districts; in others purchases made from traders and producers.

BOMBAY.—Levy-cum-monopoly.

MADHYA PRADESH.—Levy on trade.

MADRAS.—Levy in surplus and highly deficit districts where procurement is intensive. Elsewhere easy and varying levy.

ORISSA.—Monopoly procurement through trade agents.

PUNJAB.—Monopoly procurement.

UTTAR PRADESH.—Monopoly procurement through trade agents.

WEST BENGAL.—Procurement only in surplus districts through agents.

HYDERABAD.—Levy on producers.

KASHMIR.—Levy on producers.

MADHYA BHARAT.—Monopoly procurement plus levy in regard to wheat and jowar.

MYSORE.—Monopoly procurement by levy and of all saleable surplus.

PEPSU.—Purchases through dealers' syndicate from approved markets.

RAJASTHAN.—Procurement by levy of Kharif crops.

SAURASHTRA.—Procurement by levy.

TRAVANCORE-COCHIN.—Levy by which all surplus is bought by Government.

AJMER.—Procurement on voluntary basis.

BHOPAL.—Purchases for export only.

COORG.—Direct Levy proposed.

VINDHYA PRADESH.—Traders liable to sell to Government up to 80 per cent. of their purchases.

Note.—Figures for C.T.O. (Central Tractor Organization), have not been given in this statement.

* Excludes Rs. 0·72 lakhs given to cultivators as loan.

† Excludes Rs. 1·43 lakhs advanced as taccavi to cultivators.

‡ Excludes loan of Rs. 2·15 lakhs.

During 1951-52 the Government of India sanctioned for the Grow More Food Fund a total sum of Rs. 12,12,90,517 (includes loan and grant) to the States, and a total food bonus fund of Rs. 96,74,979. The grand total is thus Rs. 13,09,65,496.

FISHERIES

THE fisheries of India potentially rich as yet yield a mere fraction of what they could were they exploited in a fashion comparable with those of Europe, North America or Japan. The fishing industry, particularly the marine section, has certainly expanded considerably within the last 50 years concurrently with improvement in the methods of transport and increase in demand for fish, cured as well as fresh, from the growing population of the great cities within reach of the seaboard.

The caste system, however, exerts a blighting influence on progress. Fishing and fish trade are universally relegated to 'low' caste men who alike from their want of education, the isolation caused by their work and caste and their extreme conservatism, are among the most ignorant, suspicious and prejudiced of the population extremely averse to changing the methods of their forefathers and almost universally without the financial resources necessary for the adoption of new methods, even when convinced of their value. 'Higher' caste capitalists have hitherto fought shy of associating with the 'low' caste fishermen, and except in large operations on new lines, the capitalists cannot be counted upon to assist in the development of Indian fisheries. As in Japan, it appears that the general conditions of the industry are such that the initiative must necessarily be taken by Government in the *uplift and education* of the fishing community and in the introduction and testing of new and improved apparatus and methods.

BOMBAY

The fisheries of Bombay are almost entirely concerned with the exploitation of the wealth of the sea. Bombay is favoured with a coast line abounding in excellent harbours for fishing craft, a fair-weather season lasting for some seven months, and a fishing population more alive to their opportunities and more daring than those of the sister States.

The more important sea-fish in Bombay are pomfrets, and sea-perches, among which are included the valuable Jew-fishes often attaining a very large size and notable as the chief source of "fish-maws" or "sounds," largely exported for eventual manufacture into isinglass.

FISHING BOATS

The finest of the Bombay fishing boats are from the coast between Bassein and Surat. These boats are beautifully constructed, attain a considerable size, and are capable of keeping in the sea for weeks together. In the season fishermen fish principally off the Kutch and Saurashtra coasts and in the mouth of the Gulf of Cambay. Their main method of fishing is by means of huge anchored stow nets, which are let down for several hours and hauled at the turn of the tide. The chief catches are bombil (Bombay duck), pomfrets and Jew-fishes. The first named are dried in the sun after strung through the mouth upon lines stretched between upright posts.

South of Bombay the fishermen of Ratnagiri and Rajapur make use of another and lighter class of fishing boat specially designed for use in drift-net fishing. Fine hauls of bonito seer (a large form of mackerel) and allied fishes are often made during the season from September to January. Later sharks and rays predominate. For the latter specially large and powerful nets are employed. For part of the fair season, when fishing is not usually remunerative, many of the larger Bombay fishing boats are employed as small coasters, a fact which shows how big their size is.

FRESHWATER FISHERIES

With a view to developing the freshwater fisheries of the State a survey of different sheets of water and their fish fauna was undertaken which revealed that although there were extensive irrigation reservoirs and tanks for commercial fish culture, there was hardly any indigenous fish suitable for the purpose.

With the merger of Baroda, Kolhapur and some other States with the State of Bombay, the prospects of obtaining a local source of supply of fry have brightened. Efforts of the Fisheries Department are, accordingly, directed towards this objective.

Experiments on growing both indigenous and exotic varieties of fish in natural tanks and a study of their rate of growth, feeding and breeding habits, have revealed that selected varieties of carps occurring in the rivers of northern India fatten satisfactorily under local conditions and are most suitable for stocking ponds, lakes, etc. The experiments have shown that a suitable tank of about four acres in area can grow about 2,000 lb. of fish and that the financial returns are most encouraging.

The main difficulty, however, in undertaking stocking operations on a large scale is that fry and fingerlings of suitable carps have to be imported from such distant places as Patna, Calcutta, etc. and consequently there is great uncertainty about the supplies. The future of the freshwater fisheries in this State therefore, depends on whether a reliable source of supply can be established at hand. In order to obviate the difficulty of importing fry and fingerlings from outside the State perennial sheets of water are being annually stocked. These waters include the Ulhas River, Visapur Reservoir, Tata Lakes and Powai Lake.

SORLEY'S REPORT

A special department exists in Bombay for the development of the fisheries of the State and their organisation on progressive lines. The department which is in the charge of the Director of Fisheries was specially constituted with effect from the financial year beginning April 1, 1945.

No survey of the fishing industry can be complete without a reference to the so-called Sorley's Report (published in 1931) which is a store-house of information and also the starting-point of all subsequent measures for the improvement of the industry. Among its more important recommendations were 1. the establishment of a marine aquarium, 2. the opening of a bureau of fisheries information, 3. the encouragement of marine biological research and 4. the employment of motor launches for the transport of fish to consuming centres.

The experiment in mechanical transport was first conducted at Danda in co-operation with the head of the local fishing community. A launch obtained on loan from the R.I.N. was used with suitable modifications. The experiment was such a great success, the fishermen were so highly impressed with the speed with which fish could be transported that today there are no less than 44 vessels engaged in the carrying trade. The launches operate between Bombay and the fishing fields both in the north and south of it, and the total quantity of fish brought into the city during 1950-51 was 8,517,134 lb.

DEEP-SEA FISHING

The problem of increased catches is now being tackled in this State by the Government of India, private parties and the State Government. The Fisheries Department's vessel 'Tapase', specially built to fish and to demonstrate to the fishermen its potentialities landed during 1948, 1949, 1950 a total 292,000 lb. of fish. Operation of the vessel has clearly shown to fishermen that power boats are superior to sailing smacks for the capture of fish. The trawlers and reekie boats owned by the Government of India landed 352,852 lb. of fish at Bombay during 1949-50.

The Fisheries Department have designs for vessels with a much wider cruising range than was possible before. In accordance with the wishes of the fishermen these vessels will be deckless but will have arrangements for the installation of engines and the storage of fish. Two of such 45 vessels have been allotted to the fishermen's co-operative societies on a subsidy cum-loan basis.

A scheme has been prepared by the Department for the grant of loans and subsidies to fishermen's co-operative societies for the adoption of improved types of fishing craft. The vessels are constructed by fishermen to suit their requirements and are fitted with marine engines, half the cost of which is borne by Government. Part of the whole scheme is to train youths of the fishing community to run and maintain motor launches so that the whole trade can be confined to the community itself. Courses have been started for this purpose and an apprentice gets as much as Rs. 30 a month as stipend.

An example of fruitful results occurring from improvements provided through the instrumentality of the department was seen in the action of Messrs. Trinity Stores, whose representative visited Japan and brought out from that country, Mr. O. Ueda, an expert and five assistants. The Government of Bombay placed at their disposal its vessel the "Tapase" for survey work. Its operation in conjunction with the "Jyoti" (bull-trawling), off the Bombay and Saurashtra coasts convinced them of the potential resources of our waters. The Japanese returned home after eight months spent here. The expert has now returned with a trawler the "Taiyo Maru" manned by 21 of his compatriots to fish in our waters. He will train Indian fishermen in all aspects of trawling and processing of fish.

The trawler "Taiyo Maru" arrived in Bombay on October 21, and immediately started fishing operations off Bombay and Saurashtra coast. So far, it has landed 250 tons of fish in Bombay. The operations have met with financial success apart from making available to the city adequate supplies of fish.

REFRIGERATING FACILITIES

Larger supplies of fish made available by the launches have induced the flow of private capital into channels intimately bound up with the fishing trade. Ice factories and cold storage plants have been put up at Malvan and Ratnagiri on the Ratnagiri coast and at Chendia and Ankola on the Karwar coast. In Poona two cold storage plants of 200 and 100 tons have been put up for storing fish. At Satpati (District Thana) Government have put up an ice and cold storage plant at a cost of rupees 1,17,000. The plant is entrusted for operation to the local fishermen's society on loan-cum-subsidy basis. In Bombay, a quick-freezing plant employing the Z-process has been installed by a Russian technician at the Kermani market at Delisle Road and an ice factory and a cold storage plant have also been set up on the east side of Crawford Market (Bombay). A feature of the Plant mentioned last is that it has a number of small chambers which are hired out at small fees either to one individual or to several collectively. This plant also provides for the quick-freezing of fish.

As a result of the erection of new ice factories the output of ice has increased vastly in the past few years, being about 700 tons per day today compared with 300 tons during the war. The production of ice can still be increased. In addition to the existing cold storage plant with a capacity of 54 tons, the Bombay Municipality has put up a new plant with additional 13 tons capacity. The Government of India have erected at Sassoon Dock a 20-ton ice plant and 200-ton cold storage depot with arrangement for quick freezing of fish. The plant which started production in November 1951, is located at Bombay's main fish landing site and will thus prove most useful to our fishermen.

FISH CURING

The control of the fish curing yards was transferred to the Department of Industries on July 1, 1936, prior to which they were administered by the Salt Department of the Government of India. There are 36 such yards in Bombay, 21 in the Ratnagiri District and 15 in the Kanara District. At these yards duty-free salt is stored in salt kothars from where it is issued to fish curers to cure fish. The total quantity of fish cured and the salt issued at the fish curing yards in 1950-51 was 269,239 maunds and 94,036 maunds respectively.

Government have sanctioned a scheme for the improvement of curing facilities at the fish curing yards in the Ratnagiri and Kanara Districts, which provides for the construction of cement concrete platforms, permanent fish curing sheds over the platforms, compound walls and sinking of new wells for adequate water supply. The total non-recurring outlay on the project will be Rs. 8,45,950. Part of the expenditure on these works will be subsidized by the Government of India under the 'Grow More Food' scheme. The scheme is already put in operation and the works are nearing completion at several yards. The provision of these facilities should greatly benefit the fish curers and the fish curing industry as experience has shown that about 20 per cent economy can be effected in the quantity of salt used under the present insanitary method of curing. This is also bound to improve the quality of the cured product.

Smoking of fish is another method of preserving fish which has recently been introduced.

CO-OPERATIVE SOCIETIES

The value of co-operative societies cannot be gainsaid. And as a result of vigorous propaganda several co-operative societies of fishermen have come into existence at Bingza, Ankola, Nandangad and Kodibag in the Kanara District, Bagmundla, Vengurla, Jaitapur, Vijaydurga and Shiroda in the Ratnagiri District, Satpati, Murbe, Kharekuran, Shirgaon and Uttan in the Thana District, Danda in Greater Bombay, Lower Colaba in Bombay City, Majali, Harwada, Keni, Honaver and Gangavali (District Kanara), Karla, Mithbao, Malvan (District Ratnagiri), Dativre, Kharekuran (Thana District), Bhadeli, Kolak and Bulsar (District Surat) and two at Versova in Bombay. In addition, a State Co-operative Association has also been formed with its headquarters in Bombay. The societies will market the fish caught by its members in the mofussil, and the profits which hitherto went to middlemen, will now accrue to the fishermen. These Societies will receive Government help for the acquisition of motor launches, trucks, ice plant and also financial help in the form of loan or subsidy.

The education of fisher-children has been kept in the forefront among the activities of the Department of Fisheries. Accordingly, fisheries schools have been established in the State: three in the Kanara District, four in the Ratnagiri District, one in the Thana District and two in the Surat District. Proposals for the establishment of four more schools are under consideration.

Five other items which need to be mentioned are the fisheries information bureau, the marine aquarium, the fish farm, the marine biological station and technological laboratory at Sassoon Dock and the exploitation of the by-products of the fishing industry. The last item will be dealt with at some length, while the others will be dealt with briefly.

A fisheries information bureau has been set up. The function of this bureau is to collate and supply information connected with the local and other fisheries. The information collected by the bureau is useful to the fishing industry, as it furnishes information not available to them before.

LOANS AND SUBSIDIES

Every assistance is given by the department to fishermen to increase the output of the industry. A scheme for the grant of loans and subsidies for the adoption of improved types of fishing crafts geared with suitable marine engines, has been in operation. Loans and subsidies are granted to fishermen's co-operative societies for the construction of hulls and purchase of engines. Loans to the extent of Rs. 1,44,000 and subsidies of about Rs. 80,000 were granted to fishermen's co-operative societies for the purpose. In addition, about Rs. 14,56,000 have been advanced during the past five years to individual fishermen and their associations for construction of sailing craft, purchase and repairs of nets, purchase of trucks and establishment of fish farms. The Government aid rendered to the industry in several ways has resulted in an increased quantity of fish being brought to the City. The total quantity in 1950-51 was 31,000 tons as against 18,000 tons in 1945-46.

The establishment of marine aquarium was made possible by a munificent donation of Rs. 2 lakhs by Mr. and Mrs. Vicaji D. B. Taraporwala. The Government accepted the donation and allotted a commanding plot of land for it along the Marine Drive. A feature of the aquarium is that the exhibits include both fresh water and marine forms found along the coast of the State. In addition, the aquarium has facilities for marine biological research and investigations. The aquarium was opened by the President of the Union on May 28, 1951.

A scheme to establish a marine biological research station at Ratnagiri has been sanctioned. This is a part of a five-year plan of post-war development programme involving a capital expenditure of Rs. 2,30,000 and an average annual expenditure of Rs. 73,500. Establishment of a similar station at Okha is also under contemplation. The station is expected to cost about Rs. 1,00,000.

The Fisheries Technological Laboratory is also conducting research on problems related to the fishing industry and trade such as the preservatives for nets and the drying of Bombay Ducks by a special process, which will eliminate the risk of deterioration during shipment. The Department has been successful in the export of a small consignment of dry Bombay Ducks to a firm in the U.S.A. The experiments are in progress.

FISH OILS

A Fisheries Technological Laboratory has been established at Sassoon Docks for conducting research on problems relating to ancillary industries like shark-liver oil, gelatin, glue, fish meal, etc. To ensure quick and clean extraction of oil a sharple's super centrifuge, a fish liver boiler, and a steam boiler have been installed. One piece of work which the Laboratory does is to test samples of shark-liver oil from the public for their vitamin A content. the number of samples so tested average over 300 a year.

The Second World War led to an investigation of the possibilities of the manufacture of oil from shark-livers to replace the dearth of supplies occasioned by the stoppage of imports of cod-liver oil from Norway.

A simple process of oil extraction, not involving the use of any complicated machinery, was devised and demonstrated by the Department to the local fishermen and to the fishermen of Ratnagiri, Jaitapur, Malwan and Shiroda. The demonstrations were largely attended and the fishermen were greatly impressed by the fact that a new occupation and fresh source of income had been opened out to them. As a result of the demonstrations the fishermen earnestly took up the work of oil extraction and have regularly been sending to the Fisheries Department oil extracted by them. This is refined by the Department and later sold to chemists in Bombay.

During 1950-51 the output of neat shark-liver oil delivered to the Department was 4,000 gallons with an average vitamin A potency of 15,000 International Units per gramme. The oil when processed was capable of yielding 533,340 lb. of Oleum vitaminatum of B.P. standard. Besides this there is the oil disposed of by the fishermen directly which will be about 2,000 gallons.

The characteristic odour of fish liver oil is an obstacle to its popularity with the consuming public. To overcome this drawback and encourage the use of the vital health giving commodity, the department has put on the market 3 minim pearls containing 3,000 international units of vitamin 'A' and 300 international units of vitamin 'D'. A pearl per day supplies the minimum daily requirements of an average individual.

The encapsulating unit ordered out from the U.S.A. has been installed at the Laboratory and will soon be put into operation. When this is done, it will economise the cost on the production of Elasmin Pearls.

The superiority of Bombay's shark-liver oil over other varieties is unquestioned. Oils from *Carcharieus melanopterus* and *Pristis perrotteti*, for instance, yielded a vitamin A potency of 140,000 and 40,600 international units per gramme respectively. This is many times more potent than cod-liver oil which, according to the British Pharmacopœia standard, is between 500 and 1,500 international units per gramme.

The manufacture of adhesives is a valuable industry from the by-products of the fishing industry and the department has recently taken to its manufacture on a commercial scale. The product is sold under the trade name 'Adhesine' in tubes, 1 lb. bottles and one gallon tins. The experiments conducted at the departmental laboratory on the manufacture of glue suitable for photoprocessing work have also met with a good measure of success and the work is being finalised with a view to achieving perfection.

Another important by-product of fisheries is fish meal. The production of fish meal has been undertaken at the departmental laboratory on a semi-commercial scale.

HYDERABAD

The Hyderabad Fisheries Department was established in 1941. Since then investigations and preliminary surveys of many tanks and reservoirs have been carried out and about 100 varieties of fishes have been collected.

Till recently the activities of the Fisheries Department were restricted to the district of Hyderabad, Nizamabad and Medak, Manair and Dindi Projects. But recently the Government of Hyderabad have sanctioned a scheme for development of fisheries in the districts of Mahboobnagar, Karimnagar and the establishment of a prawn fishery station at Nanded. This newly sanctioned scheme costs about Rs. 1.25 lakhs, annually with non-recurring expenditure of about .44 lakhs. The Department which had at its inception a nucluous staff has now been staffed with one senior gazetted officer known as the Fisheries Officer with six junior gazetted officers as his assistants at the respective district headquarters. The Department has now its Sub-offices in the selected taluqas of the six districts, *viz.* Hyderabad, Nizamabad, Medak, Mahboobnagar, Karimnagar and Nanded.

The chief sources of fish are the perennial rivers Godavari, Krishna and Manjera, but their tributaries are not so useful as most of them dry up during the summer. There are also many big reservoirs and more than 35,000 big tanks besides thousands of small ones, in which fishing is done.

Murrel is the most common and popular fish and it is obtained in large numbers during the hot season. A method is under observation for the supply of Murrel throughout the year.

Breeding and culture of fishes is the most important part of the work, which is done by the Fisheries Department. Fish-farms where besides indigenous fishes, other fishes like Gourami, Etroplus and Mirror Carp are kept for breeding, are being established in certain parts of the State. Hosainsagar fish-farm, for instance, is already functioning; and three others in Nizamabad, Medak and Hyderabad are now functioning as full units. In the near future, fish-farms will be opened in other Districts too. The stocking of tanks has also started and a large number of them have already been stocked with fingerlings of fish to increase production. About 8 lakhs of fry and fingerlings of carp have already been

imported from Calcutta and introduced in various tanks of the State. The result of this transplantation is most encouraging.

Besides breeding and culture the Department is concerned with improving the technique of fishing. Deep-water netting, has been introduced in one of the reservoirs as an experimental measure and if successful it will be extended to other reservoirs in the near future. A recent addition to the department is refrigeration which is saving a lot from wastage.

Incidentally the Fisheries Department is helping the Health Department to fight malaria with larvicidal fishes as at Trimalapur in the Nizamabad District.

The Fisheries Department is active not only on the production side but also on the marketing side. It supplies the Hyderabad city markets with an increasing variety of edible fishes. The needs of the District, however, are not overlooked for it is only the fish which are in excess of the needs of the District that are being sent to the City. The money for the purchase of the fish is provided by the Department but part of the idea is to encourage the growth of co-operative enterprise. The ultimate object is to entrust the whole work of supply as well as of sale to the various organised bodies of fishermen. With this end in view Societies are being formed in the Districts, and tanks instead of being given to individuals are now being leased out to these Societies on nominal payments.

In the near future when the Hyderabad Government receives its shares of Tungabhadra waters on a 50 : 50 basis with Madras Government a Biological Station will be established in the vicinity of its own territorial waters. A prawn fishery research station has been established at Nanded to tap this resource in the Godavary river. The Biochemical Laboratory is engaged in the investigation of the effect of heat and cold on fishes which promises to be of wider application to the human system.

The newly sanctioned scheme referred to above has been financed by the Planning Commission who have allotted Rs. 2,00,000 annually with effect from 1951-52 for five years. As Rs. 2,00,000 have not fully been utilised this year it is likely that the department may take the remaining three districts of Telengana under its jurisdiction for accelerating fisheries activities in the whole of the Telengana sector. The schemes in this regard as well as a few research schemes have been submitted to Government for consideration.

The schemes that have been sanctioned under five year development plan have been financed by the Planning Commission in view of the fact that if fish production is increased and the public is given the opportunity to supplement economically their food with popular fish, the problem of food scarcity would be minimised to a great extent. The preliminary work in respect of scientific development of tanks in the respective areas of Mahboobnagar and Karimnagar has long ago been started and is nearing completion. The main feature of the work is to increase the fish production particularly that of Murrel; besides this carp and other species of exotic fishes would be imported from other parts of India and acclimatised to the State waters. As to the work that would be carried out at prawn fishery station at Nanded it is made clear that the station has been established with a view to develop the prawn fishery industry to effect enormous sales providing proper facilities for catching prawns and their transport to the markets. Moreover, the work of dehydration of prawns and preparation of peptone from un-marketable fish would also be started.

New varieties like mirror carps, leather carps, katla, etc., are being introduced, all as a part of the "Grow More Food" campaign. The new research programme which is being prepared is more comprehensive and includes transport of live and dead fish and their care and preservation, etc.

MADRAS

The Madras coastline of 1,750 miles is margined by a shallow-water area within the 100 fathom line of 40,000 square miles; outside of the mere fringe inshore, this vast expanse of fishable water lies idle and unproductive. The surf-swept east coast is singularly deficient in harbours whereon fishing fleets can be based, and so from Ganjam to Negapatam, the unsinkable catamaran, composed of logs tied side by side is the only possible easy-going fishing-craft. Its limitations circumscribe the fishing power of its owners and consequently those men are poor and the produce of their best efforts meagre compared with what it would be if better and larger boats were available and possible. At present better and larger boats are being made available and several motor fishing vessels of this department are also engaged in fishing and towing canoes.

The west coast is more favoured and contributes to more than three-fourths of the total landings of sea fish in the State. From September till April weather conditions are good enough to permit even dugout canoes to fish daily. No difficulty is found in beaching canoes and boats throughout this season.

The fishing population is a large one. According to a census taken in 1946-47 the total number of fisher population on the west coast was 198,924.

During 1950-51 fifty-three lakhs of maunds of fish were landed on the west coast of which the important varieties were as follows:—

	Mds.
Mackerels	24,23,436
Soles	5,02,879
Silver-bellies	3,03,798
Horse Mackerels	1,85,873
Prawns	1,30,304
Cat Fishes	43,035
Oil Sardines	1,70,564
Other Sardines	1,10,998
Seer	28,686
White Bait	63,823
Sharks	26,622

On the east coast (north and south) about 5 lakhs of maunds of fish were landed of which the important varieties were as follows:—

	Mds.
White Bait	23,929
Sardines	32,036
Ribbon Fish	42,810
Jew Fish	26,957
Cat Fish	12,535
Seer	16,015
Sharks	23,769

Fishing on both coasts is mainly by seine nets, drift nets and wall nets and also by hooks and lines. The most common craft used are the dugout canoe on the west coast and the Catamaran and masula boat on the east coast. Fishing outside the 5 fathom line is little in evidence save by Bombay boats (Ratnagiri) which are engaged in drift netting for bonito, seer and other medium-sized fishes. These strangers are enterprising fishers and bring large catches into Malpe and Mangalore and other convenient centres; the material is largely cured for export.

The Department.—As Government attention has been given in Madras over a longer period to the improvement of fisheries, and a larger staff concentrated upon the problems involved than elsewhere, this State is now in the proud position of knowing that her fisheries and collateral industries are better organised and more progressive than those in other States. It was as early as 1907 that a fisheries bureau was created. Later it developed into a separate Department of Government. In 1940 Fisheries were amalgamated with the Department of Industries and Commerce. In 1949 the Department was separated from the Industries Department and constituted into a separate Department.

The activities of the Department are so varied that it is difficult even to enumerate them in the space available, much less to give details.

Madras practically led the way in developing the shark-liver oil industry in the country. Oil from a South Indian shark-liver is ascertained to be about thirty-five times richer in Vitamin A than an average sample of medicinal cod-liver oil. When cod-liver oil could not be imported in any quantity during the war, an opportunity was provided for developing an indigenous industry for the production of fish liver oil rich in Vitamin A, and also for manufacturing malt extracts and emulsions and various preparations of this kind. The manufacture of shark-liver oil is undertaken at the fish curing yards and oil extraction centres. In 1950-51, 24,950 lbs. of crude oil were manufactured and sent to the Government Oil Factory, Kozhikkode for purification and blending. The product both in the blended and standardised bulk form and in the vitamin concentrated form of 'Adamin' has stood its test well and is now finding new channels of utilisation like 'Veterinary Oil' for administering to livestock. In addition the Department has produced shark-liver oil capsules and this has been recently put in the market.

Fish Curing.—Fish curing is practised extensively everywhere on the Madras coasts: its present success began some eighty years ago with Dr. Francis Day who, after an investigation during 1869-71 of the fisheries of the whole of the sub-continent, pressed for the grant to fishermen of duty-free salt for curing purposes within fenced enclosures. His suggestions were accepted by the Madras Government, and from 1882 a gradually increasing number of yards or bounded enclosures were opened at which powdered salt was issued as and when necessary to the curers.

There were 82 fish curing yards on the east and west coasts at the beginning of April 1950. During the course of 1949, 25 yards were closed on the east coast due to poor transactions. 1,445,253 maunds of fresh fish were brought to these yards for curing and 221,540 maunds of salt were issued for the purpose.

However, with the abolition of the salt duty the issue price of salt in the curing yards was not attractive for the curers. Hence the number of curing yards in 1949-50 was only 78. Recently the Government of Madras have sanctioned a scheme for issuing salt at subsidised rates. The issue price was reduced from November 11, 1951. The subsidy has, therefore, attracted all the men to bring the fish for curing inside the yards. This has given curing a fillip and more yards are being reopened now.

Besides salt curing, the Department started, in 1944, the smoking of fish, mainly for supplying the Army. During the year 1944-45, 124,320 lbs. of smoked mackerel, pomfret and seer were supplied to the Army and 5,382 lbs. to the civilian population, from the seven centres of production. The supply to the Army was stopped sometime back and at present smoking of fish is done on a small scale at the Fisheries Technological Station, Kozhikkode, where researches on the efficient and economic methods of preserving and transporting fish are being carried out.

Experiments were carried out successfully on the curing of fresh water carps. The large quantities of big size fishes caught in the Mettur Reservoir are gutted, cleaned of all blood clots and salted under the supervision of a qualified inspector. The resultant product is free from smell and attractive. This is now in great demand in the inland rural areas. It has been estimated that 10,000 lbs. of fish can be taken out of the river without depleting the fishes. On an average 5,000 to 6,000 lbs. are landed daily and successfully marketed in the inland towns. A total quantity of 84½ tons of fish was landed by the department fishing units in 1950-51.

Two fish factories for processing prawns are subsidised by the Indian Council of Agricultural Research; they manufacture semi-dried prawns from inland lakes. During 1950-51 8,690½ lbs. of semi-dried prawns were produced.

Fish is a commodity that gets spoiled early. The fishes are bad by the time they are landed. They have to be rushed to the market soon. A fleet of specially constructed fish vans have been introduced to run from fishing centres like Ennore, Pulicat, Latice bridge, Sriparru (Collair lake) to consuming centres. About 641 tons of fish have been transferred and saved from spoilage.

Pearl Fisheries.—Off the coasts of Tirunelveli and Ramnad Districts of the State lie the valuable pearl oyster beds which, owing to a complex of causes yield at long intervals, an irregular supply of the oysters. With a view to elucidating and controlling the fluctuations to the best advantage, the life history of the oyster with correlation to oceanographic factors is studied by the Marine Biological Section of the Department. The rearing of pearl oysters in captivity, started in 1933 at the Krusadai Biological Station, Pamban has been very successful and a highly promising technique of pearl production by artificial inducement is being developed here. During 1950-51 the stock of oysters at Krusadai were replenished with 785 oysters from the Tuticorin banks.

Allied to the Pearl fisheries are the Chank fisheries of the maritime districts, both being Government monopolies. Besides the precious sacred chanks, the ablution chanks and Pooja conches, lakhs of chank shells feeding the flourishing chank ornament industry in the north come mostly from the seas of this State. A total of 666,195 chanks were fished during the year 1950-51. Experiments in marking chanks started in 1931 to study the rate of growth and migration of the chank in its natural haunt is continuing and up to 30th June 1946, 5,374 chanks have been marked and liberated. During 1950-51 two hundred and forty-five chanks were measured every day for their size and weight and correlated to the bank from where they were fished.

The Marine Aquarium.—A word is necessary about the old Marine Aquarium in Madras. Ever since its opening; being the first Institution of its kind in Asia, it was immensely popular with the public. On account of war emergency, the Marine Aquarium was closed on 8th March 1942. The opening of a larger Aquarium on more up-to-date lines is now under active consideration.

The Fisheries Museum is now located in the old Aquarium building.

Deep Sea Fishing.—It is well known that Indian fishing requires improvement so as to cover more of ground as well as of catch. The survey of deep sea fisheries by the trawler "Lady Goschen," though brief, disclosed the existence of important off-shore fisheries unsuspected before. The wealth of fish off Negapatam reported by the trawler was of sufficient importance to attract the notice of Japanese fishermen thousands of miles away. Even then it was realised that if Madras was to benefit by the survey, the allied duty of enabling the local fishermen to exploit the off-shore fishing grounds by suitable craft and tackle must be shouldered by the Department.

In 1943, the Department initiated deep sea fishing operations in different centres in the State, mainly to augment the output of sharks to feed the growing shark-liver oil industry and also to demonstrate off-shore fishing. The operations resulted in a catch of over 300 tons of fish in 1947-48. Meanwhile in December 1945, a new fishing method was attempted, viz., schooner fishing. The Pearl Fishery Inspection Vessel, "Lady Nicholson" was engaged in off-shore fishing with handlines and longlines and took four local fishing boats on tow. The catches made during the 4 months of the trial were 29,549 lbs. of fish. Further experiments are under way. The Department has acquired 8 motor fishing vessels from the Navy and they are now operating at Vizagapatam, Kakinada, Madras, Adirampatnam, Pamban, Tuticorin, Kozhikode and Mangalore. Recently the fishing fleet operated on the Wadge Bank off Cape Comorin and 20 tons of fish were caught by 12 days' fishing. The quantity of fish caught in 1950-51 was 322,564 lbs. The Department has recently introduced 'trolling' with great success. To a bamboo-pole above the M.F.V. are attached a number of lines with suitable bait. The M.F.V. is allowed to go full speed. Perches and seer run after the line and are caught. One M.F.V. alone off Tuticorin lands 1 ton of Horse Mackerel.

A special craft and tackle section has been established to devise, demonstrate and popularise improved fishing methods for different types of water, including inland waters. This section has opened boat-building and net-making yards for departmentally manufacturing boats and nets of improved design. Recently a mechanised inshore fishing boat was constructed by this section at a cost of Rs. 6,000. This mechanised boat 'Ajit' has proved a great success off Adirampatnam. Private enterprise is taking interest in this. The Government have recently ordered the construction of 6 more. Of these 4 have been completed and launched from the west coast, while two will be at Mettur to harvest the immense potential wealth of the fisheries of the reservoir.

The Inland Fisheries.—The fisheries of the numerous, extensive backwaters along the coastal belt of the Peninsula, the various rivers and the innumerable irrigation tanks, wells, canals, artificial reservoirs, natural lakes and domestic ponds distributed all over the land are of considerable magnitude, though in several cases the non-perennial nature of the water causes their fisheries to be ignored except during the summer drought when the streams shrink to pools and the tanks to puddles and the owners or the lessees of the fishing rights turn out to catch fish. Still Madras State has an acreage of 850,000 inland waters. Nearly 2 lakhs of this have been surveyed and found ideal for fish culture. The ryots were shown the advantages of fish culture by running demonstration farms. In the farm at Vijag over 1,000 lbs. of fish were harvested from an acre of water. The potentiality of stocking fully the 2 lakhs of waters is immense. Recently the Department has undertaken to stock 50,000 acres of water with 5 crores of fish seed. Within 3 months of the commencement of the scheme one crore has been put in productive water. An additional quantity of 5,000 tons of fish will be harvested.

The major waters are, however, provincialised, and their fisheries systematically developed and exploited directly or through a lease system. With a view to conserving fish seed, great congregations of breeder carps and their young below the Mettur Dam and the Hogainakal falls on the Cavery, of spawning Hilsa below the anicuts in the Godavari, the Krishna, the Cavery and the Coleroon rivers and of immature mullets in the coastal backwaters, are protected by legislation against their indiscriminate capture. Destructive methods of fishing such as poisoning, dynamiting, etc., are also penalised.

The chief freshwater fishes of economical importance are, the ubiquitous Murrel (*Ophicephalus striatus, O. marulius*, etc.) notable for its ability to live for a considerable period out of water, the various carps (*Catla catla Cirrhina cirrhosa, C. reba, Labeo calbasu, L. fimbriatus, L. kontius, Barbus dubius, B. carnaticus* and the well known favourite of sportsmen in India, the Barbustor), the catfishes (*Wallagonia attu, Mustus seengala, M. aor, M. punctatus, Pangasius pangasius, Clarias magur, Saccobranchus fossilis. Silundia silundia*) the eel (*Anguilla*), the spiny eels (*Mastacembelus Spp.*), *Notopterus notopterus*, the climbing perch (*Anabus scandens*) and the Hilsa (*Hilsa ilisha*). To these have been added a number of valuable exotic fish which have been successfully acclimatised to the waters of the State. Thus the giant Gourami, acclaimed as the best freshwater table fish in the world has been introduced from Java and successfully reared and bred in the Departmental farms from where it has been distributed to Bombay, W. Bengal, Punjab and other places. In the Nilgiris the English Carp, the Tench and the Rainbow Trout have been acclimatised and thrive well. The Government working in conjunction with the Nilgiri Game Association maintain a hatchery at Avalanche where quantities of trout fry are hatched and reared for replenishment of the streams of the plateau. The Mirror Carp which was introduced from Newara Eliya, Ceylon, in 1939, is thriving well in the Nilgiris and is now extensively used for stocking other upland waters of the State. From Madras it has now been distributed to Bangalore, Bombay and the Kumaon Hills in Uttar Pradesh. Semi-exotic forms like the Rohu (*Labeo rohita*) have been recently introduced from the delta of the Ganga. The attempts of the Department to introduce Catla, the quick growing carp, into the Cavery river were successful and this fish which was unknown to the south of the Kistna is now established in the Cavery System.

Methodical attempts to augment the stock by local fingerling collection and distribution, acclimatisation of salt water forms like the mullets (*Mugil spp.*), the Pearlspot (*Etroplus suratensis*), the milkfish (*Chanos chanos*), the cock-up (*Lates*), etc., and hatchery operations for Hilsa, carps and the Trout have all been very successful in the building up of the inland fisheries of the State. During 1950-51, 21,638,367 of the above fingerlings have been successfully transplanted.

In addition to the existing departmental fish farms, a scheme of District Rural Fishery Demonstration has been put in operation in all the districts for a systematic survey and utilisation of every piece of cultivable water for aquiculture and, through Demonstration Fish Farms to educate the ryots and make them interested in fish farming as well as to maintain and distribute fish seed.

For the biological control of "water-borne" diseases like malaria, filariasis and guinea worm, small mosquito-cidal and cyclopscidal fishes are collected, reared and distributed in thousands to municipalities and other local authorities at a nominal price for introduction into mosquito-haunted sheets of water: these anti-malarial operations have proved successful in places where the local authorities have given proper attention to the directions issued. A special Public Health Fish Unit is attending to this item of work. Exploitation of inland deep water lakes on commercial lines was introduced with much success for the first time. Nearly 1,500 lbs. of fresh fish by the Department and 4,000 lbs. by the licensees are being landed in Mettur Reservoir every day. The pilot scheme was so successful that plans have been sanctioned for doubling the landing. The fresh fish as also salted ones, mentioned elsewhere will be made available to the public at reasonable rates through fair price shops.

Research.—Marine Biological Research with special reference to applied fisheries science is being carried at the three Research Stations, one on the west coast at West Hill and the other two on the east coast at Tuticorin and Krusadai. Krusadai is a small coral islet situated near the island of Rameswaram and has been popularly called the "Biologist's Paradise". Every year biology students from various institutions in India visit this station for field studies. Investigations on the occurrence, migrations, feeding and spawning habits and development of the various food fishes as also the physico-chemical factors which influence their life are being carried out at all the three stations. Research on the life history of the pearl oyster and chank is an important item of work at Krusadai and Tuticorin. Experiments are also being conducted at the Krusadai biological station in the culture of pearls under controlled conditions.

An estuarine research station has been set up at Ennore, near Madras to study important fishes like Mullets, Bekti and Threadfins which generally frequent the estuaries.

After an experimental stage in Rural Pisciculture a regular Freshwater Biological Research Station, perhaps the first of its kind in India,

has been functioning in Madras since 1942, with a subsidy from the Indian Council of Agricultural Research. The work of the station is directed towards the investigation of the bionomics, feeding and breeding habits and biometry of the important food fishes of the State and the varied aspects of Ecology and Hydrology with a view to determine and promote the optimum conditions for maximum fish production. Two special wings, one Hydrological and the other Phytological have been added to the Research Station for special attention to physico-chemico and floral studies towards the increase of aquatic productivity and the solution of pollution problems. The foundation stone of the new Hydrobiological Laboratories proposed for the Station was laid by Dr. Rajendra Prasad.

A Hill Fishery Research Station has been established at Ootacamund on the Nilgiris to study the problems relating to the improvement of the trout and carp fisheries of the plateau. A research station for the investigation of the valuable Hilsa fisheries and a Hilsa hatchery are located on the Godavari river near Rajahmundry. A study of the fisheries of the Tungabhadra river with a view to assess the probable effects of the dam on fishery has been started at the dam-site near Hospet. Research on fish passes in collaboration with the Irrigation Research Station at Poondi has been planned.

Welfare Work.—A remarkable feature in the work of the Madras Fisheries Department is the energy which it devotes to the improvement of the condition of the fisherfolk. The Department has always recognised the duty of spreading among them education and the habits of thrift, temperance and co-operation. The work has been specially successful on the west coast. The number of fishermen's co-operative societies in 1950-51 was 156 with a membership of 13,612 and share capital of Rs. 2,10,225.

The Committee on Fisheries recommended that all co-operative work among fishermen both on the west and east coasts in the Presidency should be done by the Fisheries Department and that, on the analogy of the system in vogue in the Labour Department, the Inspectors of Co-operative Societies should work under the Fisheries Department, the Co-operative Department supplying trained Inspectors and auditing the books of the societies. The Government partially accepted the recommendations and sanctioned the deputation of a Sub-registrar of Co-operative Societies and 3 Inspectors for exclusive work among fishermen under the department. Recently three more Inspectors have been sanctioned for similar work among fishermen on the east coast. There are more than 360 Co-operative Societies of Fishermen working at present with 50,000 members.

To promote the education of fisherfolk, the Department runs a number of schools for fisher children where free education and midday meals are given. There are at present 64 Fishery Schools with a strength of 10,327 pupils. A unique feature of this movement is a Fisheries Technical High School, which is perhaps the only one of its kind in India.

While these service institutions of the department have been catering to the needs mainly of marine fishermen, the diffused distribution of the inland fishermen has been one of the difficulties in the way of equally rapid progress in their rehabilitation work. Preparatory statistics of inland fisherfolk are however, being collected.

The Department has undertaken to supply yarn and fishing implements to poor fishermen at 75 per cent of the cost price. The tackle especially were found torn. Timely repair could land tons of fish from the sea. Hence in 3 months time the Department has distributed Rs. 1,13,919-9-4 worth of yarn.

The running of Fish Transport Vans has also improved the socio-economic conditions of fishermen. The catches are now taken to the markets by the womenfolk of the fishermen.

The educational work of the Department is becoming one of its most important branches in training men in the technology of curing, oil manufacture, etc., in co-operative propaganda and in general fisheries science. In the past Fisheries Officers of most States have received training in the Madras Fisheries. Till recently the Fisheries Training Institution in Madras, under the subsidy of the Government of India, trained batches of graduates and post-graduates in an half-yearly course of general fishery work, while a Popular Short Term Course trained interested persons in the art of fish farming, to enable them to run private farms on efficient lines. Arrangements are made for the training of skilled workers at the Marine Fisheries Technological Institute, Tuticorin, while Fisheries Technology has been included in the subjects taught in the Polytechnic recently opened at Kakinada and Madras. The Fisheries Station at Ennur supplies zoological specimens for the use of college classes and museums throughout India and even abroad and is contributing materially to the advancement of the study of Zoology throughout India.

A Fisheries Information Bureau has recently been set up by the Department to disseminate information on all fishery matters, to answer enquiries and for popularising scientific methods of fish farming, production, exploitation and utilization. Besides, the Bureau maintains a Central Fisheries Museum and a well-equipped Library. A Fishery Marketing Unit has been opened recently with a view to effecting a speedy survey of the existing marketing conditions of fish and fishery products, to draw up a working plan for the rational utilisation and equitable distribution of the produce assuring a fair return to the producer and to arrange necessary transport facilities, by road, rail and water

MYSORE

The Fisheries Section in Mysore is an adjunct to the Department of Veterinary and Animal Husbandry Services and was started in 1940. A survey of the fisheries of the State was first of all undertaken with a view to studying the existing condition of the fisheries, *i.e.*, the extent of fishing done at present, and the scope for the improvement of the fishing industry.

Fisheries development work, namely the adoption of conservation measures, the establishment of fish-sanctuaries and the stocking of tanks and river with good species of food fishes has been organised in three suitable areas of the State. They are Shimoga, Krishnarajasagar and Kolar Fishery Divisions.

In 1951-52 the following stocking was made: at Hesserghatta tank 1,000 *labes fimbriatus* from Markonahally, *Catla* from Madras, Mirror carp from Ooty: at Ulsoor Tank 1,200 *Etroplus* fingerlings from Mangalore: at Krishnarajasagar Catta fingerlings from Madras.

Three Fish Farms have been established one at Markonahally, one at Hesserghatta and a third at Markandeya where fishery investigations are being carried out. Three varieties, viz., Catla, Pearlspot and Gowrami were first introduced into the nursery ponds of these farms and after sufficient rearing disseminated into selected fisheries of the State. Fingerlings of the Mirror Carp (Cyprinus Carpio) imported from the Nilgiris are being cultured in State waters.

While stocking indigenous fry of varieties of some important food fish of the State regular surveys are being undertaken to locate the food fry resources of the State and the recent surveys of the resources and their analysis have shown that the State is almost self sufficient in its fish seed resources for undertaking State-wide development.

Mysore State is also noted for its game fishing resources. The famous sporting fish of the Cavery Waters is the main game variety. Measures are being devised to conserve and develop game fisheries in the State.

The formation of an angling club is contemplated.

The Fisheries Department today has two objects in view: one is to effect proper conservation on scientific lines, so as to increase the production of food fishes and the other is to ameliorate the economic condition of the fishermen of the State. For this purpose yarn, hooks and other fishing material are procured and distributed at reasonable costs.

The revenue from fisheries has risen from Rs. 6,165 in 1945-46 to Rs. 35,940-8-0 in the first nine months of 1950-51.

ORISSA

The fishery wealth of Orissa is enormous. The east coast, the Chilka Lake and large areas of inland waters yield all the 3 types of fish, *i.e.* (*i*) marine, (*ii*) estuarine, (*iii*) inland.

(*i*) *Marine.*—Due to lack of communication facilities, the fishing is scattered along the sea coast, the most important fishing centres being Chandbali, Chandipur, Talpada, Puri, Aryipalli, Gopalpur, Markandi and Sonepur. Fish is consumed locally, the surplus being simply sun-dried or salted. Whitebait, sardine, mackerel, seer, hilsa and pomfrets, are the principal varieties. Fish curing yards have been replaced by Fishermen's Co-operative Stores administered by a Central Union. Fishermen get their daily requirements of salt, etc., from these stores.

Catamarans are used throughout the year, the surf being too rough for larger boats. Podows, *i.e.*, country boats, are used in winter for the shore-seine net. Fishing gear consist of hooks and lines, drift nets, drag nets and seines of crude types. These are made locally. Middlemen control the fishery but are being eliminated by co-operative societies who are taking up joint marketing of produce.

Lack of harbour and cold storage facilities and capital to introduce better fishing methods make improvement of marine fisheries a very difficult problem. The standard of living of the sea-fishermen is extremely low and calls for improvement. In some fishing centres the fishermen live on fish alone for days together. Improvement of the financial position of the co-operative societies, legislation limiting the middlemen's activities, establishment of fishery schools are some of the measures which Government has to take. At the moment Government are considering the introduction of pilot schemes for deep-sea fishing. There are for instance, about 90 miles of coast line where no fishing is done. Government are attempting to settle displaced fishermen in suitable places and a colony has already been established at Sandhakud.

(*ii*) *Estuarine.*—The Chilka lake forms a compact fishing area and yields extremely tasteful fish and prawns. The lake is leased out by zamindars to merchants who have built up a well organised industry. The export averages 70,000 mds. per annum and consists of mullets, bhekti, pomfrets, mackerel, Indian salmon, etc. The fish is packed in ice and exported mainly to Calcutta. Other estuarine fishing centres are Kirtaniakhati, Kujang, Chowmuhan and Sonepur. Within the last 4 years 19 Co-operative Societies have been operating in the lake, the total volume of business being on an average of Rs. 30 lakhs per annum. A technological station is set up at Baliguaon to work on life histories of fish and utilise the resources of Chilka. Government transport has been provided from Kujang (Mahanadi estuary) to Cuttack to market the catches. Recently refining and standardisation of medicinal shark liver oil has been taken up and also manufacture of agar-agar from weeds in the Chilka lake.

(*iii*) *Inland.*—The rivers and tanks form a great potential source of fishing though hilsa in Orissa is not as tasteful as that in the Ganges. Rohee, catla and mrigala are the economic species. These breed only in rivers and in large bunds which resemble rivers during rains as in the Sambalpur District. Collection of fry is carried on every year in Balasore, Cuttack and Sambalpur. An organised fry trade exists in Lakhannath in the Balasore District. Government have nurseries in 56 fry distribution centres and supply 30,00,000 fingerlings annually.

The fisheries are owned mostly by private individuals. Government fisheries are controlled by the Revenue Department. Although people realise that pisciculture is profitable, the multiple owners of water areas prevent active development. The high price of fish has focussed the attention of fish farmers on the industry and demand for fry and technical advice has been great. Research has been taken up on nutrition of fish fry and growth of fish.

As part of the 'Grow More Food' drive large swamps hitherto unproductive are being cleaned out and converted into fish farms as the farms established in 1945 have been found to be profitable. Large-scale reclamation work is also going on at Puri, Angul, Sambalpur, Sonepur, Baud and other places. 250 acres were reclaimed and converted into productive water area in 1949-50. 200 acres in 1950-51 and another 200 acres are now under reclamation.

THE PUNJAB

With a view to supplementing the diet of the people which, in the majority of cases, falls below minimum nutritional standards, the Punjab Government is successfully developing its fisheries resources which have hitherto remained largely unexploited. There are a number of tanks, ponds, diggies and other impounded waters which can yield substantial quantity of fish. Experts advise at least a ten-fold increase in our present day level of fish production, if people are to derive substantial nutrition from this important animal-food which is very rich in fats and proteins. Per capita annual consumption of fish in India has been estimated at 3.4 lbs. only, whereas it should at least be 34 lbs., *viz.* ten times. India today stands lowest in this respect as compared with other progressive countries of the world. Per capita annual consumption of fish in Great Britain, Denmark, Germany, France, U.S.A., Italy and Switzerland is 40, 24, 20, 18, 15, 11 and 6.6 lbs. respectively.

The Fisheries Section in the Punjab which was transferred from the Agriculture to the Veterinary Department with effect from April 1, 1949, could not escape the post-partition effects. Office records, laboratory apparatus, equipment, other valuable collections and even the truck used for stocking operations were all left in the Pakistan Punjab. The Fisheries Section literally had to start from scratch in the new State. Mass migration of Muslim fishermen to Pakistan created further difficulties for the fishing trade. The few displaced non-Muslim fishermen who came from Western Pakistan without their fishing implements only reluctantly took to fishing as a whole-time occupation, as the two important rivers (Ravi and Sutlej) are both on the border. The unprecedented heavy floods in the rivers and streams washing away most of the fish during September 1947 further aggravated the situation. To cope with the problems it was decided to dispense with the traditional system of issuing individual fishing licenses. Catching and marketing of fish were started in the districts of Amritsar, Kangra, Jullundur, Karnal, Ambala and Gurgaon by issuing joint licenses to fishing parties. Fish is now caught on share basis and marketed under departmental control and supervision.

The activities of the Punjab Fisheries are directed to: 1. *Conservation*:—comprising conservation by legislation, providing fish ladders at the canal head-works, creating fish sanctuaries and the eradication of fish enemies. 2. *Culture and propagation*:—comprising culture of exotic species like trout, carp, etc. 3. *Catching and marketing of fish.* 4. *Research.* 5. *Stocking operations.*

CONSERVATION

From August 15, 1947 to December 31, 1951 more than 30,700 licenses were issued by the Department bringing a revenue of about Rs. 1,37,464-10-6 to the State exchequer. During this period no less than 2,308 cases of illegal fishing were detected and a sum of Rs. 10,909-13-3 realised as compensation.

The fish ladder at the Madhopur Headworks was completely washed away by the 1947 floods. Now it has been decided to construct a fish ladder in the dam to be built across the Eastern Bein, near Malsian Shahkot in Jullundur District. The site has been inspected, the plan discussed and approved.

The heavy floods of 1947 in the river Beas changed its course and washed away everything at the hatchery, including the stock of breeders.

In spite of the heavy damage done to the hatchery and mass mortality of the breeding stock, the stripping operations were carried out. Sixty-five Brown Trout (*Salmo fario*) hens were stripped, and 36,976 eyed ova were obtained. But all the ova and the fry got from some of them were washed away during the floods which came six months later in March 1948.

The stripping was also continued during 1948-49. 1950 and 1951. Eighty-two Brown Trout (*Salmo fario*) hens were stripped and 58,078 ova were obtained in 1948-49. Fry numbering 19,378 were planted in the natural fry rearing pond at Bahang Bihal. Fry numbering 13,469 were also planted in the sanctuary in the Katrain Bihal.

CATCHING AND MARKETING

In the absence of professional fishermen, the Department organised private fishing parties and caught fish on a share basis. From August 15, 1947 to December 31, 1951, fish weighing 18,63,544 lbs. was caught. This brought an income of Rs. 2,55,089-12-3 to the State exchequer. Government fish shops were opened at Amritsar, Jullundur, Ludhiana, Ferozepur, Simla, Ambala, Karnal and Panipat, where commission agents, mostly belonging to the fishermen class were appointed. The so-called 'Rai Sikhs' of the Amritsar and Ferozepur Districts have been reclaimed and their parties initiated into the fishing trade.

The scheme for stocking fish, in large numbers in the impounded waters of the Punjab as originally enunciated in the old undivided Punjab, terminated with the partition of the Province. A similar scheme for stocking fish, was put into operation on December 1, 1948 when the Fisheries Section was under the Department of Agriculture. This scheme was of three years' duration and was jointly financed by the Punjab Government and the Central Government on a 50:50 basis. No work, however, under the scheme could be carried out due to lack of necessary equipment such as trucks. Under the Civil Veterinary Department, Punjab, stocking operations commenced in the month of December, 1949 and since then upto May 15, 1951 199 acres of ponds and tanks were stocked with 1,18,995 carp fry and fingerlings.

A survey of the suitable impounded waters in the Punjab has also been carried out and stocking operations are being pushed forward as a part of the normal activities of the Fisheries Section since May 15, 1951, on which date the Stocking Scheme was abandoned.

After the partition the Punjab (India) was left without any laboratory or equipment. A miniature laboratory was, however, fitted up at Batala, and research in various branches of fisheries carried out. Observations on the spawning of Carp under controlled conditions were made at the Government Fish Farm, Batala, during 1947-48. Another scheme which is of All-India importance, on the "investigation of the factors influencing the spawning of the Indian Carp" was submitted to the Indian Council of Agricultural Research with a view to obtaining sanction and financial aid.

UTTAR PRADESH

Fisheries investigations in Uttar Pradesh date back to the sixties when Dr. Day, as Inspector-General of Fisheries made a survey of the inland fisheries of India. His report on the freshwater fisheries of India (1876) includes replies to his questionnaire to District and Taluq officers in Uttar Pradesh which contain valuable information, most of which still holds good. One of the results of Day's investigation was the enactment of the Government of India Fisheries Act of 1897.

The possibilities of developing fisheries in this State, however, was for the first time considered by the Government in 1920 in connection with a reference from the Punjab Government about the regulation of fishing in the Jumna. The Government decided to institute an investigation into the possibility of establishing a Fisheries Industry in the State.

In 1943 as part of the programme for post-war reconstruction and more immediately to provide against the prevailing shortage of food caused by the War, the development of fisheries received consideration. It was, however, felt that the exploitation of fisheries to increase the supply of fish to towns and the Army was the immediate need and should take precedence of fisheries survey and fisheries research. The Government, therefore, decided to take immediate steps to provide a regular, abundant and cheap supply of reasonably good quality fish in the market in Lucknow and other important cities. Energetic action was taken by the Government through the Co-operative Department and the War Supply staff:—

To improve the existing sources of supply by encouraging market contractors to increase supplies and where this was not possible by directly recruiting fishermen, supplying them with boats and nets and intensively fishing rivers, tanks and jhils, to seek and develop new sources of supply hitherto unexploited;

To improve transport by the provision of ice and refrigeration vans;

To improve the marketing of fish by direct sale to the public and the Army at equitable rates far below the ruling market prices.

The scheme which was put through at Lucknow, Allahabad, Benares and Naini Tal was extended to other large consuming centres in 18 districts.

In March 1944 the need for a technical expert was felt and a Fisheries Development Officer was appointed in the Department of Animal Husbandry to help immediately in the proper expansion of the supply scheme which had been launched and ultimately to plan a Scientific Department of Fisheries for the State.

A comprehensive five years' plan of post-war development was drawn up by the Fisheries Development Officer and was approved by the Government.

In response to the general demand to grow more food a scheme for stocking as many suitable tanks as possible in 6 districts was sanctioned jointly by the Government of India and the U.P. Government early in 1945. The extension of the scheme to 6 more districts in 1946-47 and again to 6 more districts in 1947-48 was sanctioned. This scheme is now operating in 31 districts of the State.

As the D.I.R. had lapsed it was decided to release private tanks and confine attention to Government tanks. Accordingly 1,124 Government and such private tanks as had been offered to the Department were selected in 32 districts. The 573 tanks stocked before 1947 were also fished and this yielded over 24 mds. per acre instead of the 10 seers of poor fish of different sizes and kinds previously produced.

Rivers being the primary source of supply of food fish it was realized that side by side with intensive culture and exploitation the conservation and control of river fisheries should receive attention. A fisheries research laboratory at Lucknow has been established for continuous study of conditions obtaining in the rivers and tanks and to initiate suitable measures of fish conservation and culture which will keep pace with intensified exploitation. A suitable site at

the Tanda Falls (Mirzapur) has been selected for a research fish farm. As waters above 3,000 ft. are devoid of food fish the well-known mirror carp of Europe which has done remarkably well in Ceylon and on the Nilgiris has been brought to Kumaon for stocking rivers. As an initial measure to develop the fisheries of the Kumaon lakes, Government sanctioned in 1948-49, a scheme for one of the best known lakes in the area, "Naukuchia Tal". A training centre for fisher youths and departmental recruits has also been established there.

A comprehensive Fisheries Act to control and develop the fisheries of the State was passed in 1949. For the socio-economic uplift of the fishermen wartime controls were utilized to benefit both the producer and the consumer. A voluntary Fishermen's Association on a new model has been formed at Allahabad for a stretch of 80 miles along the Ganges. The members have contributed nearly 5,000 Rupees towards a benevolent fund for providing credit and amenities to themselves.

The Fisheries Department which was separated from the old Animal Husbandry Department in 1947-48 was made permanent from April 1, 1949. The Fisheries Department has been placed under the supervisory charge of the State Director of Animal Husbandry as a measure of economy with effect from October 1950.

WEST BENGAL

Before the year 1920, there was one Fisheries Department to serve the needs of the two provinces of Bengal and Bihar and Orissa. Separation was effected in 1920 after which fisheries in Bengal were administered by the Director of Agriculture. Three years later in 1923 the Bengal Fisheries Department was abolished under retrenchment measures.

During the 14 years after the closure of the Fisheries Department, the price of fish in Calcutta soared consequent on the rapidly increasing demand and the unhealthy monopoly exercised by a small group of vested interests. The economic condition of the fishermen gradually became worse due to exploitation, and the fisheries in general were getting depleted owing to various causes. As a result the public began to demand the re-establishment of the Fisheries Department to protect the fisheries interests and to organize and develop the fishing industry on modern lines. The Bengal Government, therefore, appointed a Fisheries Expert to survey the existing condition of the fishing industry in the State and to suggest schemes for development with a view to augmenting the fish supply, to examine ways and means to bring down the existing price of fish, to stimulate commercial enterprise in speedier transport and better marketing, and to establish cold storage plants for short-term preservation and factories for the utilization of fish by-products. On the basis of the survey report submitted by the expert, the Fisheries Department of the then united Bengal was re-established in May 1942, with a view to organize the fish trade under war emergency conditions and to conserve the existing supplies.

The Province of Bengal was partitioned in August 1947 into East Bengal and West Bengal; the former came under the Pakistan Dominion and the latter under India. The technical personnel were also divided. After the partition of the Province, the Fisheries Department of the West Bengal State was reorganized under the administrative control of the Director of Agriculture, Animal Husbandry and Fisheries, the technical control being vested in the Technical Assistant Director in charge of the Department.

On the basis of present population figures, which have been estimated at about 25 millions, West Bengal needs about 32,000 maunds of fish per day, calculating on the basis of 2 ounces per adult per day, as against an estimated production of 2,000 maunds and an uncertain import varying from 1,000 to 2,500 maunds per day according to season.

As a result of the partition of the Province, most of the potential fisheries—fresh water, riverine, estuarine and coastal—have fallen to East Bengal, leaving to this State only about 12 lakh acres of upland water area excluding the few big rivers, creeks and canals, and a limited coast line of about 25 miles where foreshore fishing is in existence, though not on an extensive scale.

Of the 12 lakh acres of upland water area for freshwater fish cultivation, over two-thirds remain practically dry during several months of the year. They will have to be improved by de-silting, re-excavation, etc., before they can be utilized for fish production. The remaining areas consisting mostly of large tanks and beels are also found in a large majority of cases to be filled up with submerged and floating vegetation including water-hyacinth, necessitating a long-term programme of development.

Most of the small rivers of West Bengal are in a dying condition and the scope for the development of riverine fisheries, consequently, is very poor.

Due to the partition of the Province, the scope for the development of foreshore fisheries is also very limited as the major portion of the coastal areas are now within East Bengal, leaving to this State the Moore, Frazerganj and Saugar Islands near the mouth of the Hooghly River and the coastal area of Contai sub-division in the district of Midnapore where about 1,000 fishermen usually catch fish during the cold weather months (November to February).

The only areas within this State where fishing may be undertaken, more or less on an extensive scale by helping the fishermen with nets and boats, and by organizing quick transport system under refrigerated condition, is the rivers, creeks and canals of Sunderban estuaries in the district of 24-Parganas.

LACK OF GEAR

Statistics indicate that fish production in West Bengal has been steadily falling since 1942-43 due to the following reasons:—

(a) Death of a large number of fishermen in the famine of 1943 and subsequent epidemics. Departmental survey made in the year 1945 indicated that the number of fishermen actually engaged in fishing was about 108,000 in West Bengal. About 10,000 fishermen have since migrated to West Bengal from East Bengal as refugees.

(b) Destruction of a large number of fishing boats owned by fishermen due to the Denial Policy adopted by the Government towards the end of the war and subsequent diversion of an appreciable percentage of fishermen to non-fishing occupation.

(c) Serious scarcity and abnormal rise in the prices of yarn for nets, timber for boats, and other capital goods, the essential prerequisites for fishing, have compelled the fishermen to have recourse to fishery owners and fish merchants with consequent danger of exploitation. Thus the profession is losing some of its old attraction.

A scheme has been undertaken which aims at developing some of the vast water areas locally known as beels with financial and technical help to owners from Government, the financial help being in the form of loan. The estimated capital expenditure of the scheme is about Rs. 11,79,000 as against the expected production of 94,000 maunds of fish within a period of 5 years.

Another project aimed at the opening up of nursery units in the rural areas of the State for nursing of carp spawn and subsequent distrb. bution to pond culturists at cost price has been put into operation at an estimated cost of Rs. 3,10,700. It is expected that about 21,500 maunds of extra fish would be available within a period of 5 years.

Side by side with the above schemes, two more schemes have been undertaken—one for stocking the culturable tanks in different places with carp fry at Government cost at the start, the cost being recoverable from the tank owners with interest, and the other for the improvement of the partially derelict tanks in the dry districts of the State by de-silting and re-excavation at Government cost and subsequent leasing out for fish cultivation to fish culturists on rental basis. The cost of the first scheme has been estimated at Rs. 8,70,000 against an estimated production of 27,000 maunds of extra fish and the second at Rs. 28,50,000 as against an estimated production of 450,000 maunds of fish.

To help in the exploitation of the estuarine areas of the State on an extensive scale, a refrigerated power-craft carrier scheme has been undertaken at an estimated cost of about Rs. 12,00,000 as against an estimated extra production of 250,000 maunds of fish.

A foreshore and off-shore scheme aims at the extensive exploitation of foreshore and off-shore fisheries of the Bay by organizing fishermen groups on share catch basis, the nets, boats and other requisite accessories being supplied by Government free. The estimated cost of the scheme is about Rs. 4,00,000, and the expected outturn of fish about 30,000 maunds.

A project aimed at the production of shark liver oil, fish meal, processed fish, etc., has been put into operation by using the existing Government Fish Curing Yard at Jounput (Contai) as a shark catching base and the field station for processing of the by-products. The Departmental Technological Laboratory in Calcutta is being used for final refining and standardization of the produce. The total cost of the scheme has been estimated at about Rs. 4,00,000.

In addition to the aforesaid development schemes, another project has been undertaken for distributing nets and boats to the needy fishermen of the State at subsidised rates, at a total cost of Rs. 13,25,000. The extra production is estimated at about 125,000 maunds.

For the improvement of derelict tanks and making them suitable for pisciculture, another scheme for maintaining a central pool of pumps and mud hogs at six selected districts of the State has been put into operation with a view to assisting the tank owners in de-watering and de-silting of such tanks against reasonable hire charges. The total cost of the scheme is Rs. 1,03,100 and the water area likely to be improved per year is 700 acres.

In order to study the potentiality of the Bay of Bengal with regard to sea fishing two fishing trawlers have been brought from Denmark at a total cost of about Rs. 5,94,000 with a full compliment of Danish expert personnel on contract basis. The main objective of the scheme is to chart out the best fishing ground of the Bay and to train Indian personnel. The scheme has been put into operation and the results so far obtained appear to be promising. The total cost of the scheme will be Rs. 10,77,000 during 1951.

The exploratory work carried out by the two trawlers has shown that there are good fishing grounds in the Bay of Bengal and that the percentage of inedible fish in the catches secured is fairly small. The Government of West Bengal, therefore, propose to increase the number of these fishing vessels at as early a date as possible for increasing fish supplies in the State.

It is also proposed to review the programme of work of the Fisheries Directorate with the help of experts from the Food and Agriculture Organisation of the United Nations so that development work can be stepped up along right lines.

PUBLIC HEALTH

THE history of the public health administration in the country may be traced back to the appointment of the Royal Commission in 1859, which recommended measures for the amelioration of the health of the army and the civil population. In accordance with its suggestions "Commissions of Public Health" were established in the States of Madras, Bombay and Bengal in 1864. This led to the appointment of Sanitary Commissioners. In 1888 the Government of India issued a resolution "drawing the attention of local bodies and village unions to their duties in the matter of sanitation."

The success achieved by such efforts was negligible except in the larger cities. Owing to the vast number of the sick the main emphasis was laid on curative medicine; preventive medicine did not receive proper attention. The outbreak of plague in 1896 had a great effect on the people and the Government, awakening them to the need of overhauling the public health machinery in the country.

The report of the Plague Commission in 1904 was a landmark in the history of public health administration. It recommended the strengthening of public health services and the establishment of laboratories for research and the preparation of vaccines and sera, but the total effect of the measures adopted in pursuance thereof was small. Attention was directed mainly to urban centres while about 90 per cent. of the population lived in villages.

Under the Government of India Act, 1919 the health administration was transferred to State Governments making it a subject directly under Ministers responsible to the Legislatures. This position continued under the Government of India Act, 1935 and still continues under the new constitution and the State Governments are unfettered in the development of health and sanitation in areas under their jurisdiction. The effect of this transfer is summarised by the Health Survey and Development Committee in its report as follows:—

"Ministers were anxious to promote the growth of education, medical relief and preventive health measures as far as funds permitted. Indeed, there has been, since the Reforms, far greater public health activity in the States than ever before."

Another important landmark in the history of public health in the country was the setting up by the Government of India, of a small Committee known as Environmental Hygiene Committee. This Committee was designed to cover a long range of public health activities such as Town and Village planning; housing, rural and urban water-supply; sanitation; river and water pollution; control of insect vectors and diseases; and regulation of certain offensive trades.

The recommendations made by this Committee are now under the consideration of the Government of India.

VITAL STATISTICS

India's population growth is characterised by high levels of fertility and mortality. Interconnected with this feature is the high infantile mortality. Thus, her birth rate, death rate and infantile mortality rate are much higher than those of Western countries.

An idea of the levels of birth rate, death rate and infant mortality rate and their trends is given in the following paragraphs.

Birth Rates.—The five yearly averages for the pre-war period 1937-41 was 33·6 and for the years 1941-45 was 28.5. This noticeable fall in the birth rate was shared by almost all the individual States. There was a sharp fall in the birth rate during the famine years of 1943 and 1944 when the figure came down to 26 per mille but in 1945 and 1946 there was a substantial increase. In 1947, the rate again came down to 26.6 per mille as against the corresponding figure of 29.2 per mille in 1946 for areas now in partitioned India. The recorded birth rate for 1948 was 25.5 per mille which compared to 1947 shows a further fall. In 1949 the birth rate increased to 26.7 per mille. The States which show a substantial fall in birth rate in recent years are Punjab, U.P., Bihar, Orissa, and West Bengal.

Death Rates.—The five yearly averages of 22.6 in 1937-41 and of 22.9 in 1941-45 show that disparity in the death rates was not so marked as in the case of birth rates, the only instance of an increase of over 2.0 per mille being Bengal which went through the great famine of 1943. It seems therefore reasonable to hold that, in spite of the stress and strain which war conditions brought to bear on community life, the rise in mortality over India as a whole was not appreciable. The death rate in 1946 was 19.0 per mille being the lowest on record. The rate in 1947 increased to 19.7 per mille but was still on the low side. The recorded death rates for 1948 and 1949 were 17.2 and 16.0 per mille. Almost all the States show a fall in death rate in recent years in particular Delhi, Punjab, U.P. and Bihar.

Infantile Mortality Rates.—The five yearly average for 1937-41 was 161 per 1,000 live births and there was little change in the average for 1941-45. Here again, the war years did not produce a rise in the country as a whole, while some of the individual States recorded varying reductions in the infantile mortality rate in comparison with the five-year period before the war. The infantile mortality rate was 137 in 1946 and in 1947 it increased to 146 but was still on the low side. The infant mortality rates in 1948 and 1949 were 130 and 123 per 1,000 live births. The decline in the infant mortality rate in recent years is shared by every State but it is marked in the cases of Delhi, Punjab, U.P. and Bihar.

Infant mortality rates for some cities for the year 1948-49 are given below:—

Name of the city	1948	1949
Bombay	165·8	174·2
Calcutta	258·7	233·6 (Provisional)
Madras	156·7	158·6
Lucknow	155·4	143·3
Nagpur	305·9	216·1
Delhi	115·5	107·7
Ahmedabad ..	203·3	244·5

The registered birth rate during the last decade has shown unmistakable signs of decline. The indication of a reduction in Indian birth rate and its real significance as to how far it is, if at all, due to a real change in the country's potential and how far it is so due to temporary factors like wartime and food scarcity conditions are matters of vital importance. The Government of India have undertaken to institute jointly with the U.N.O. an enquiry into the birth rate in India. It is hoped it will throw useful light on the current trends. However, there is one significant study based on census data by Kingsley Davis. His estimates of birth rate and death rate are as follows:—

Decade	Birth rate per 1,000	Death rate per 1,000
1881–1891	49	41
1891–1901	48	44
1901–1911	49	43
1911–1921	48	47
1921–1931	46	36
1931–1941	45	31

In the period 1921-41, the birth rate did not increase though famine and epidemics were absent; in fact, the birth rate declined from 49 per 1,000 in 1881-91 to 46 per 1,000 in 1921-31 and 45 per 1,000 in 1931-41. It is not unlikely that wartime factors like urbanisation may have accelerated the process of decline in birth rate.

The estimates of Davis indicate another important feature. The unprecedentedly high rates of natural increase in the last two decades ending 1941 were mainly due to the greater reduction in death rates. The concerted effort of the Government to improve public health and sanitation to control epidemics and to maintain undisturbed civil order may further augment this tendency. Infant mortality rate is a sensitive index of health conditions and being a ratio of infant deaths to live births is not likely to be materially affected by any deterioration in the machinery for registration of events. This rate actually shows a declining trend. Upto 1919 the lowest level was 200 per 1,000 live births, from 1919 to 1939 the lowest level dropped to 160 per 1,000 live births. In recent years the birth rate has shown a further decline which may be taken to indicate an improvement in the health of the general population. This is actually reflected in the declining trend in the observed death rates. There does not appear to be much reason to believe that the increased omissions under the stress of war conditions will affect birth and death registration differently. *Prima facie* a decline in birth rate also appears to be indicated.

In conclusion it may be said that an improvement in the mortality rate seems to be fairly well indicated and this would appear to point more forcibly to the need for strengthening forces which go to reduce birth rate, if the country is to avoid an undesirable increase in population.

EPIDEMICS

Activities of the public health departments have been successful in considerably reducing suffering and loss of life from cholera, smallpox and plague but it cannot be claimed that these epidemic diseases have been brought under control completely. It is not uncommon for these diseases to break out every year in an epidemic form in one or the other part of a State and thus the prevalence of these diseases in a State considered as a whole turns out to be at a fairly high level. However, when the epidemic becomes more widespread than it usually does the State figure of incidence shows an abnormal rise and the States may then be said to be severely affected. Unlike cholera and smallpox which affect all the States plague prevails mainly in the States of U.P., Bihar, Madhya Pradesh, Bombay and Madras.

In India, statistics of case incidence are collected in respect of the five conventional diseases only. Happily typhus is rare and yellow fever is unknown in India. As the symptoms of the remaining three, *viz.*, cholera, smallpox and plague are known to the layman who reports the occurrence of cases of these diseases, a fair idea of the trend of their incidence in the general population can be formed from the published figures, though they are generally incomplete. Figures of deaths recorded under these diseases present a more reliable picture. Information on the incidence of other diseases is lacking. Some idea of the relative importance of these may be formed from the statistics of patients treated for these diseases in the hospitals and dispensaries, which in so far as they relate to Government institutions and the Army are published annually. Statistics of Army recruits rejected for various defects may often furnish useful information in this connection. These sources of information, however, have their well known limitations and require caution in the proper interpretation of the data.

Natality and mortality statistics are in a somewhat better position. These are collected in several details, *e.g.*, by age, sex and community. Statistics of deaths by causes are recorded under several headings but their usefulness is limited by the fact that the information is supplied by laymen. This difficulty is really responsible for the large variation in the list of causes of death under which deaths are published by the States. Several States do not

separately show deaths from important diseases like malaria and tuberculosis in the rural areas. In view of the general unreliability of the recorded cause of death, all India mortality statistics are shown under seven groups, *viz.* cholera, smallpox, plague, dysentery and diarrhœa, fever, respiratory diseases and all others. The three epidemic diseases generally do not account for more than 5 per cent. of total mortality in any State. By far the largest proportion of total deaths is recorded under the group 'Fevers.' This group includes a variety of heterogeneous diseases and a large number of unclassified conditions which for want of proper facilities for diagnosis are catalogued here by the informants. In most of the States 50 to 75 per cent of mortality is shown under this group, but this merely reflects the peculiar idiosyncrasy of the reporting agency and not the relative importance of the disease included in the group. In 1949 when the mortality rate for all causes was 16.0 per thousand, the specific mortality rate due to the three epidemic diseases was 0.4 per thousand and due to fevers, dysentery, diarrhœa and respiratory diseases it was 8.6, 0.6, and 1.3 per thousand respectively.

The information available from the published data is insufficient for the purpose of assessing the extent and the precise nature of the problems in health administration.

LEPROSY

Leprosy has been prevalent in the country for many centuries, being recognised and described by ancient Hindu physicians. The *Susharate Sambita* written 2,500 years ago describes the different forms of leprosy, and its treatment with chaulmoogra oil, the mainstay in its present-day treatment.

The 1931 census report recorded 150,000 persons suffering from leprosy. Investigations carried out by expert leprosy workers indicate that at a conservative estimate the number of cases is about one million. About three-fourth of these cases are of the mild type and are not infective. The disease is found throughout the country, but is most prevalent in parts of Assam, West Bengal, Bihar, Orissa, Madhya Pradesh, Madras, Hyderabad and Travancore-Cochin.

Leprosy relief work has been going on for a long time. Apart from the Central and State Governments, and some local organisations, the Mission to Lepers and the Indian Council of the British Empire Leprosy Relief Association (now redesignated as Hind Kushta Nivaran Sangh) have played an important role in this field.

Founded by Wellesley Bailey, the first asylum was built at Chamba, Punjab, in 1875. The Mission now runs about 50 leper homes with about 10,000 inmates. It has done very noble work and has given a lead in various ways. The State Governments assist the Mission by making grants on a *per capita* basis.

Leprosy Relief Association.—The introduction of new methods of treatment of leprosy led to the foundation in the year 1924 of the British Empire Leprosy Relief Association in London followed by the foundation of the Indian Council of the Association in 1925; later, branches were formed in most of the States of India. At the inauguration of the Indian Council, Lord Reading, the then Viceroy and Governor-General of India, issued an appeal on behalf of the Association, and collected a sum of over Rs. 20 lakhs, which forms the Capital Fund of the Indian Council.

The work of the Association has greatly stimulated interest in leprosy in the country, resulting in knowledge of the disease, of its prevalence, clinical forms, prognosis, spread and the factors influencing its spread. The medical profession as a whole is now taking a keen interest in the leprosy problem. The President of the Indian Republic is the President of the Indian Council and the Director-General of Health Services, the Chairman of the Governing Body, Mr. Brij Narayan and Sardar Balwant Singh Puri, the Honorary Treasurer and Secretary respectively. Dr. Dharmendra, an officer of the Medical Research Department, Government of India, is at present the Research Worker of the Association.

The research work of the Association is carried out at, or directed from, the School of Tropical Medicine, Calcutta, and is done in collaboration with the Endowment Fund of the School and the Indian Council of Medical Research (formerly known as the Indian Research Fund Association). The main activities of the Association are :—

(*i*) *Research.*—This includes clinical, histological, bacteriological, therapeutic, epidermiological and immunological studies. Recent studies of the only immunological test the "lepromin test" or the "Mitsuda Reaction" by Dr. Dharmendra at the School of Tropical Medicine, Calcutta, have resulted in a great improvement in the test, and have thrown considerable light on the mechanism of the reaction.

(*ii*) *Post-graduate Training in Leprosy.*—Special post-graduate training classes for training doctors in the diagnosis and treatment of leprosy are arranged annually at the School and over 1,000 doctors from the country and not a few from abroad have attended these special courses. In addition, lecture-demonstrations in leprosy are given to the L.T.M. and D.T.M. classes at the School.

(*iii*) *Leprosy Surveys.*—In the early years, a survey party carried out rough sample surveys in different parts of the country in order to get an idea of the incidence and distribution of the disease. More recently, intensive surveys of small selected areas have been carried out in different parts of the country in order to collect information about the factors that favour the spread of the disease and in order to study the possibility of evolving suitable methods of isolation of infective cases for the control of the disease.

(*iv*) *Publication and Propaganda.*—The Central Advisory Board of Health appointed in October, 1941, a Special Committee, which after a thorough examination of the problem of leprosy in India submitted its Report entitled "Leprosy and its Control in India". The Report contains valuable information. *Leprosy in India*, a quarterly journal published by the BELRA (now Hind Kushta Nivaran Sangh), is a record of the study of leprosy and of anti-leprosy work in this country and other places. Recently a new propaganda book entitled "Popular Lectures on Leprosy" by Dr. Dharmendra has been published, which gives the main facts about leprosy in simple and non-technical language.

The Treatment of Leprosy.—The mainstay in the treatment of leprosy has been injections of chaulmoorga (hydnocarpus) oil or its preparations. Recently encouraging results have been reported by the use of certain sulphone drugs such as "Promine" and "Diasone." Licenses for the import of sulphone series of drugs from soft currency areas are now issued freely. The treatment with chaulmoorga oil is of value in individual cases. It cannot be expected to control the spread of leprosy with curative treatment alone.

Indigenous Manufacture of Anti-Leprosy Sulphone Drugs.—The Sir Profulla Chandra Research Laboratory and the connected Bengal Chemical and Pharmaceutical Works Ltd., Calcutta, have commenced production of an anti-leprosy drug called "Novotrone." Both the mother sulphone (Diamino-Diphenyl-Sulphone) called "Novophone" and a soluble derivative called "Novotrone," which is of the same composition of the well known compound Sulphetrone prepared by Burroughs Welcome & Co., London, are being manufactured. The School of Tropical Medicine, Calcutta, have been using both these indigenous preparations on an experimental basis and have found them quite satisfactory.

Control of Leprosy.—Leprosy can be controlled by raising the general economic and social conditions of the population and, by preventing contact of infective patients with healthy people, specially children. The only sure method of preventing contact with infective cases is the isolation of these cases in leprosy hospitals, sanatoria, or colonies, etc. Great difficulty is experienced in providing institutional accommodation for all infective cases in the country. The total number of beds available for indoor patients is 15,000 whereas a rough estimate of infective cases places the figure at 2½ lakhs. So some other methods of isolation are urgently needed to supplement the institutional isolation.

The two alternatives are the isolation of the patient in his home, and the isolation of all the patients of a village or a group of villages in huts made in the outskirts of the village. Home isolation is practicable only in families with sufficient financial resources. Village isolation appears to be specially suited to India with its big leprosy problem and limited resources. It is desirable that methods of village isolation should be developed in suitable areas and then widely applied. Treatment in out-patient leprosy clinics is also available in the various parts of India. The number of such clinics is approximately 1,000 and the total number of cases taking treatment therein is roughly 60,000 per year.

Under Dr. Cochrane, now Director of the Leprosy Campaign in Madras State, rural preventive units were established in 1939, the object of which was to deal with the problem of leprosy in rural areas. Each unit consists of an administrative block, including treatment centres and staff quarters, and a segregation area where patients sleep at night and where evening meals are provided. All infective cases of leprosy in villages served by the preventive unit are required to sleep in the segregation area, thus preventing contact with their families during night. In the villages where such control methods have been adopted, there has been a marked decrease in the gross incidence of leprosy over the period 1939 to 1945, whereas in villages where such control had not been established, the incidence of leprosy had increased, in one case to more than twice the 1939 figures. The decrease was particularly marked among infective cases and children.

With the advance in knowledge of infectiousness of leprosy there has been some change in the existing restrictions on patients suffering from leprosy, and the leprosy Section of the Madras Public Health Act (1939) has been considerably modified, the amended act of 1944 allowing considerable liberty to patients suffering from leprosy while at the same time ensuring adequate protection for the public.

Leprosy Conferences held at Wardha and Calcutta :—Two conferences on leprosy have recently been held. One conference was held at Wardha in October, 1947 and the second at Calcutta in December 1948. The Reports of these conferences have already been published by the British Empire Leprosy Relief Association (Indian Council).

Central Leprosy Teaching and Research Institute Committee :—On the recommendations of the Health Survey and Development Committee that a Central Leprosy Teaching and Research Institute should be established, the Government of India, Ministry of Health, appointed a Committee in November, 1948 to advise regarding the location of the proposed Institute and other questions connected therewith. Although this proposal has not yet materialised, yet the matter is under the active consideration of the Government of India.

MALARIA

Malaria is by far the most important disease in India, both from the point of view of sickness and of mortality. It has been estimated that in the sub-continent at least 100 million persons suffer from this disease annually, and that out of 8 million deaths from all causes every year, it is responsible for at least 2 million deaths due to its direct and indirect

effects. In addition, 25 to 75 million cases, primarily debilitated from attacks of malaria are finally reported under other diseases. The loss in man-hours of these millions employed in all types of labour in industry and agriculture runs into colossal figures resulting in much avoidable wastage of potential wealth.

Malaria is primarily a disease of the rural areas, as the mosquitoes that transmit it, breed in fresh water collections more often associated with rural rather than urban conditions. Ninety per cent. of the population living under rural conditions following agricultural pursuits, are exposed to the risk of suffering from this disease. While malaria has been successfully controlled in some urban and industrial areas like the coalfields, railway colonies and tea estates, where the population lives in compact colonies and is subject to some degree of discipline, in rural areas, with a sparse and scattered population, the *per capita* cost of its control has so far been considerably high. A proper exploitation of the special feature of residual action of the new synthetic insecticides like D.D.T., B.H.C., etc., which enables the operations to be carried out at extended intervals has simplified procedure to the extent that the control of malaria in vast rural areas has now become economically and technically feasible, as borne out by experiments carried out in recent years. The anti-malaria drugs such as quinine, paludrine, camoquin and chloroquine also provide efficient weapons for combating this disease.

Malaria control in the States is carried out by their respective anti-malaria organizations.

The officers employed in the anti-malaria organisations have been recruited from among those trained at the Malaria Institute of India, Delhi, a Central Government organization. The Institute also functions as the Central headquarters of malaria research and is devoted to the promotion of uniform standards and serves as a bureau of information on all malaria problems. It also supervises malaria control organisations in Centrally Administered Areas which are meant to serve as models to the rest of the country.

The special importance of malaria lies in the fact that it hampers the full exploitation of natural resources and in fact, the development of large tracts of land is held up owing chiefly to the prevalence of this disease. The Malaria Institute of India functions as an instrument of international co-operation in Malaria work in the South-East Asia region and has since 1949 been collaborating with the World Health Organisation and the United Nations International Children's Emergency Fund for the operation in India of 4 malaria control demonstration schemes in Terai (U.P.), Jeypore Hill Tracts (Orissa), Malnad (Mysore) and Ernad (Madras). The cost of each scheme is shared by the Central Government, the State Government concerned, the WHO and the UNICEF.

The foreign teams attached to the last three schemes have since completed their task which is now continued by the parallel Indian teams. The fourth team in the U.P. (Terai) is still functioning in a new scheme operated jointly by the WHO and the FAO. The promotion of the schemes has served to advance the cause of "Grow More Food Campaign" in the country.

The UNICEF have further agreed to make free gifts of D.D.T. during the year 1952-53, equivalent to half the quantity used over and above the previous year for facilitating the expansion of DDT spraying programmes in the country.

PLAGUE

Plague first appeared in India in Bombay in 1896 and within a short time the disease spread widely throughout the country. Its incidence reached the maximum in 1904 with a total mortality of 964,577 in the sub-continent excluding Burma. Since then there has been a gradual decline and now the incidence of the disease has been reduced very considerably. In 1940, the total deaths recorded in the sub-continent were 19,799 which figure came down to 11,984 in 1941 and 10,577 in 1942. In 1943 the figure went up to 13,578 and since then there has been a steady rise in the recorded mortality with 21,525, 29,751, 32,977 and 75,274 deaths respectively in 1944, 1945, 1946 and 1947. After the partition there were 21,174 deaths in 1948 and 17,092 deaths in 1949 giving a death-rate of 0.1 per 1,000 in each case. The States which may be considered to have a serious plague problem are U.P., Bihar, Madhya Pradesh, Bombay and Madras. Of these, Uttar Pradesh recorded the highest number of deaths and had epidemic outbreaks in 1940, 1944, 1945, 1946, 1947 and 1948 with 11,725, 15,454, 14,024, 18,206, 51,455 and 13,722 deaths respectively. The incidence in Bihar and Madhya Pradesh is usually not heavy. There were sudden epidemic outbreaks in Bihar in 1946 and 1947 with 8,689 and 13,204 deaths respectively as compared with 1,523 deaths in 1945. In Madhya Pradesh the incidence is rather abnormal for 1947, 1948 and 1949 when 2,902, 2,860 and 3,475 deaths were recorded as against 189 in 1946. Bombay had epidemics in 1940 and 1941 and again in 1944, in the last quarter, the total deaths in those years being 5,573, 5,311 and 2,514 respectively. The disease prevailed in a severe form in several districts in 1945 resulting in 11,779 deaths. In 1949 there were only 1,139 deaths. Madras had a severe epidemic in 1943 with 4,885 deaths. In 1949 there were only 150 deaths. Of late, Punjab is showing heavy infection in Ambala and Karnal districts. In 1947, the number of deaths from plague was 1,905 but in 1948 and 1949 there were only 211 and 241 deaths. Bengal has been free from plague for the last 30 years but since 1948 there have been a few indigenous cases in Calcutta and the surrounding areas. It is difficult to specify the reasons for the reappearance of plague in West Bengal, and the Government is watching the situation.

However, the history of plague through the centuries serves as a warning against taking a complacent view of the reduced prevalence of the disease in the country. It is known that the disease can smoulder in its endemic homes for long periods and that on certain occasions, it acquires an increased striking power and spreads far and wide in epidemic waves into distant lands, to retreat again after a while to those areas where it permanently resides. In India there are certain endemic centres situated in the cool and moderately damp areas running from the Himalay as in the north through central and east India to the Deccan and the State of Madras. While, therefore, it is gratifying that plague as a public health problem has been of decreasing importance within the past decade, the fact that endemic foci exist makes it imperative that no slackening of effort for its complete eradication should be permitted.

CHOLERA AND SMALLPOX

Smallpox affects almost every State for at least some part of the year but the mortality from this cause is seldom as high as its widespread incidence would seem to suggest. On the other hand cholera frequently breaks out in a severe epidemic form in certain areas and causes heavy mortality. The control of these two diseases is a special problem of the public health authorities. They have been successful in considerably reducing suffering and loss of life from these diseases in certain areas although their efforts have not been able to secure a permanent eradication of the sources of infection.

From 1890 to 1920 there were 10 years when the mortality rate from cholera was 2.0 or over per thousand of population, and 8 years when it was between 1.5 and 2.0 per thousand of population. After the introduction of public health activities there were only two years during the period 1921-49 when the cholera mortality rate was in excess of 1.5 per thousand. In the period 1921-49 the incidence in the individual years also was much below the level in the period before 1921. In the years 1947 to 1945 the incidence was rather abnormal. As against a total of 86,133 deaths from cholera in 1940 a total of 228,141, 218,489, 459,829, 204,191 and 278,309 deaths were recorded in the next successive five years (1941 to 1945) when the mortality rate varied between .7 and 1.6 per thousand. In the following years the incidence came down and only 162,870 and 74,326 deaths were recorded in the years 1948 and 1949 respectively. These figures correspond to death rates of 0.7 and 0.3 per thousand. After 1940 heavy epidemics occurred in 1942, 1945 and 1948 in U.P.; in 1941, 1943-1946 and 1948 in Bihar; in 1941-1945 in Orissa; in 1941-1943 in Bengal; in 1942 and 1945 in Madhya Pradesh; in 1945 in Bombay; in 1942 and 1943 in Madras and in Assam. It will be seen that there were heavy epidemics of cholera in most of the States in the period 1941-1945 and that the incidence in the period after partition was comparatively milder.

The reduction in mortality due to smallpox is at a much slower pace. In 1890-1920, there were 6 years when the mortality rate from smallpox was above 0.5 per thousand, 7 years when it was between 0.4 and 0.5 per thousand, 8 years when it was between 0.3 and 0.4 per thousand, and 8 years when it was between 0.2 and 0.3 per thousand. Corresponding to this in the period 1921-49 it was only in 1944 that the mortality rate was above 0.5 per thousand. It is clear that after the introduction of public health activities the level of incidence has been reduced. In 1926-35 the average mortality rate from smallpox was 0.3 per thousand while in 1936-45 it was 0.25 per thousand. The incidence of the disease has been fairly low since 1940 except for the years 1944 and 1945 when it was abnormal. There was an abnormally heavy incidence in U.P. in 1941-1945, in Bihar in 1940, 1941, 1944 and 1945, in Orissa in 1940-46, in Bengal in 1943, 1944, 1945 and 1948, in Madhya Pradesh in 1943, in Madras and Assam in 1944 and 1945. The incidence was heavy in most of the provinces in 1944 and to some extent in 1945 also. The incidence after partition has been comparatively mild.

THE HANDICAPPED

The education of the handicapped comprises a number of specialised fields of education—the education of the blind, the deaf, the crippled, the mentally retarded and so on. Methods of education differ according to the nature of the handicap of a person. It is difficult to estimate accurately the number of handicapped persons in the country, but the census Report of 1931 puts the number of blind persons at approximately 600,000 and the number of the deaf and the hard-of-hearing at approximately 200,000. Since no census of handicapped persons was taken in 1941 and 1951, the figures of the 1931 census remain the latest statistics available on the subject. But experts generally believe that the number of handicapped persons is actually about two or three times as given in the 1931 Census Report.

A few decades ago handicapped persons were generally regarded as helpless creatures and were the objects of wanton pity. The outlook is gradually changing for the better but the education of the handicapped is still in the initial stages of development in this country. Luckily, there is a growing consciousness among the public of the need to educate the handicapped and to train them to a life of interest to themselves and of usefulness to the community.

As mentioned above Government have instituted a special unit under the Ministry of Education to deal with the education and welfare of the physically and mentally handicapped. This Unit has several plans in hand for promoting the education and welfare of the handicapped. Some of these plans have already been implemented.

With effect from the 1st January, 1950 the Government of India have established a Training Centre for the Adult Blind at Dehra Dun. The primary objects of this Centre is to impart vocational training to both the war-blinded and civilian blind adults from all parts of the country with a view to helping them to regain total or partial economic independence.

A common Braille code for Indian languages, nown as Bharati Braille, has been evolved in ne light of recommendations made on this ubject by several international conferences onvened by UNESCO following the sug- estion of the Government of India that the ossibility of evolving a single Braille script for he world should be explored. A book contain- ng Braille charts for the various Indian langu- ges is to be published shortly.

A Central Braille Printing Press has been stablished at Dehra Dun. It has published s first Braille book in Hindi.

With a subsidy from the Government of ndia the Convention of the Teachers of the Deaf in India has launched a publication entitled *'he Deaf in India*, a periodical devoted to the ducation of the Deaf.

In order to provide educational and training acilities for deaf and dumb children in Delhi and he adjoining States the Government of India ave provincialized the Lady Noyce School for he Deaf and Dumb, New Delhi.

The Children's Aid Society Home, Delhi has een provincialized with effect from the 1st April, 951. It is intended for the care of neglected nd destitute children.

In addition to their activities in the edu- ational field, the Government of India and the tate Governments have associated themselves a the medical field. The treatment of eye iseases has been and is being carried out in he eye wards of hospitals, a few travelling eye ispensaries, camp eye hospitals and eye fairs, nd in small local dispensaries. For this purpose, rants-in-aid have been given in deserving ases.

TUBERCULOSIS

The vastness of the tuberculosis problem is eing increasingly recognised by the public, he Government of India, and also by the nternational organisations interested in health natters such as the World Health Organisation nd the United Nations International Children's mergency Fund.

Mortality figures for cities show a tuberculosis eath rate of from 200 to 450 per 100,000 as far s can be ascertained. Little information is avail- ble from rural areas but certain investigations ave shown that in small up-country towns the nfection rate is nearly as high as in the larger ities, and that in the villages it is lower though onsiderable. It can be safely estimated that here are at least 500,000 deaths from tuber- ulosis annually. If about 5 cases of active tuber- ulosis to one tuberculosis death is accepted, here will be at least 2,500,000 active cases of uberculosis in India.

Lankester, in his comprehensive survey of uberculosis in the country in 1920, estimated hat approximately 1 out of every 7 or 8 deaths vas due to tuberculosis, and 1 out of every 3 of dults in cities. As far as can be estimated the osition is a little different today. This means hat tuberculosis is one of the most frequent auses of death. Further, the problem is special- y serious as tuberculosis is found chiefly among oung adults whose lives are economically and ocially of most value to the community.

The Government of India has an Adviser in uberculosis in its Directorate of Health Services. He advises the Central Government and the arious State Governments on tuberculosis olicy and helps in co-ordinating the various uberculosis schemes in different parts of the ountry. He is also Technical Adviser to the uberculosis Association of India.

The B.C.G. Vaccination programme against uberculosis was introduced in India in 1948 with the assistance of WHO; a B.C.G. Labo- atory was set up by the Government of India at the same time in the King Institute, Guindy, Madras. In November 1948, the Joint Enter- prise (International Tuberculosis Campaign) offered assistance to the Government of India for undertaking the B.C.G. campaign on an extended scale and sent out to India six foreign teams each consisting of a doctor and two nurses and also provided the necessary equip- ment, transport, etc. This campaign covered practically the whole of India and by the begin- ning of 1951, 96 teams who were trained by the ITC were working in this campaign in different parts of India. In April 1951 the working of this programme was reviewed in a conference of B.C.G Workers and Administra- tive Medical Officers of different States and it was then recommended that it was necessary to extend the programme further so as to include all the 170 million young people in the shortest possible time. It was decided to continue and extend B.C.G. Vaccination on a mass scale and the WHO/UNICEF under- took to render assistance in the programme for this mass campaign. A mass campaign was accordingly started in April 1951 and has now been in progress in three States, *viz.* Madhya Bharat, Punjab and Uttar Pradesh. After a few months, the mass campaign will be started in some more States assisted also by the inter- national personnel and preparations have already been made for starting this early in 1952 in PEPSU, Travancore-Cochin and West Bengal. Plans are ready to introduce mass vaccination in other States also and it is anticipated that by the end of 1953 the campaign will be introduced in all the States of India. By the end of January 1952, approximately six million and two million persons were tested and vaccinated respectively in the whole of India.

The Joint Enterprise was wound up in July 1951 and the responsibility for assistance in the programme hitherto rendered by that organi- sation was taken over by the WHO/ UNICEF. The Plan of Operation provides that the Central Government will meet all the cost involved in the maintenance of the B.C.G. Laboratory, Guindy and the Central B.C.G. Organisation consisting of special staff for or- ganisation, publicity and statistical work. The State Governments will meet the cost of the local teams and contingent charges incidental to the field work, while the WHO provides foreign personnel required in connection with these programmes. The contribution of the U.N.I.C.E.F. amounts to payment of about $ 50,000 to the W.H.O. to cover the continuation of the services of the international personnel and provision of equipment and supplies con- sisting of vehicles, film projectors, public address equipment, etc. amounting to $ 4,20,000.

Field research on the efficacy or otherwise of the vaccine under Indian conditions is being carried out in a controlled population group in South India. Three anti-tuberculosis teaching and demonstration centres are being established in Delhi, Trivandrum and Patna. The ones in Delhi and Trivandrum have started functioning. The one in Patna was expected to start work in April 1952. The equipment and personnel for these centres have been supplied by the WHO and UNICEF respectively.

In furtherance of the object of introducing B.C.G. Vaccination in India, a laboratory for the manufacture of this vaccine was established by the Government of India at the King Insti- tute, Guindy. Two officers, *viz.* Dr. K. S. Ranganathan and A. V. Omon (the Director and the Assistant Bacteriologist respectively) were trained in the technique of manufacture of B.C.G. Vaccine at the State Serum Institute, Copenhagen. This laboratory was established in 1948 and it was visited and inspected by Major-General Sir Sahib Singh Sokhey on behalf of WHO and he has certified that the laboratory was of the right standard set by WHO. The work and importance of the laboratory have since increased very rapidly as a result of the expanded programme for B.C.G. Vaccination in India and the other countries in South-East Asia, *viz.*, Ceylon, Malaya and Singapore and the vaccine needed for these latter countries also is being supplied from the India Laboratory.

In addition to the manufacture and supply of tuberculin and B.C.G. Vaccine, the Laboratory also undertakes research relating to certain problems connected with the manufacture of the vaccines. It also gives training to Medical Officers in the technique of B.C.G. Vaccine manufacture. So far four medical officers have undergone this training at the laboratory.

CENTRAL ADVISORY BOARD OF HEALTH

In April, 1937, the Government of India acting under Section 135 of the Government of India Act constituted a Central Advisory Board of Health. The aim of the Board is to ensure co- operation between the Centre and the States and between State and State in matters related to health which are of common concern. Work is done through standing or *ad hoc* committees which permits the Board to act as a central in- formation bureau. It advises on all matters referred to it by the Central or State Govern- ments and makes suggestions to the Central Government on any matter affecting public health to which it considers Government's attention should be drawn.

The Public Health Commissioner with the Government of India was Secretary to the Board.

The first meeting was held in 1937 when *ad hoc* committees were appointed—

(1) to report on the maternity and child wel- fare work in the sub-continent including the training of maternity and child wel- fare workers and the organisation of schemes in urban and rural areas, and

(2) to examine the question of food adultera- tion with reference to legislative measures then in force in different States and such additions and amendments to these as may be considered advisable.

The Maternity and Child Welfare Committee met in Simla in October, 1938 and its report was widely circulated. The Food Adulteration Committee produced two reports one on the technical aspect dealing with standards for purity in regard to different foods and the standardisation of the technique to be employed in food analysis, while the other dealt with the legislative aspects of the problem including an examination of the various Acts and Regulations with suggestions for their improvement.

The second meeting of the Central Advisory Board of Health was held in Madras in 1939 and recommended the appointment of a sub-committee to examine the possibility of introducing a system of compulsory inoculation of pilgrims against cholera. It also appointed an *ad hoc* committee to prepare a report on leprosy and its control in the sub-continent. The first of these committees met and reported in June, 1939 and the second in October, 1941.

The third meeting of the Board was held in Poona in July, 1940. The meeting recommended the appointment of a special committee to report on the questions of teaching of hygiene in schools and of the medical inspection of school children. This special committee met in December, 1941 and reported.

The fourth and the fifth meetings of the Board were held in January, 1942 and October, 1943. An important outcome of the fifth meeting of the Board was the appointment of a joint committee of the Central Advisory Board of Education and Health to examine the problem of blindness in the sub-continent. A report on this subject was published in 1944 which deals with the two main aspects of blindness, *viz.*, its prevention and cure and the education, employment and general welfare of the blind.

As a result of the recommendations of the Health Survey and Development Committee (see below), the Medical and Public Health Depart- ments were amalgamated on the 15th August, 1947 and consequently the post of the Public Health Commissioner with the Government of India merged with that of the Director-General of Health Services. That Committee has further recommended the establishment of a Central Board of Health which, if and when established, will take the place of the existing Central Advi- sory Board of Health.

BHORE COMMITTEE'S PLAN

A Health Survey and Development Committee was appointed by the Government of India in October, 1943 under the chairmanship of Sir Joseph Bhore, K.C.S.I., K.C.I.E., C.B.E., to make a survey of existing health conditions in the sub- continent and to formulate plans for future health development. The Committee was quite re- presentative in its composition and consisted of 9 officials and 16 non-officials. The Committee, had, further, the advantage of discussing its prob- lems with certain distinguished workers in the field of health from the United Kingdom, the United States of America, the U.S.S.R. and Australia, who came to India for this purpose on the invitation of the Government of India.

The Committee's Recommendations.—In putting forward its recommendations the Committee kept in view certain objectives. They are :—

(1) the scheme, when fully developed, should provide each individual in the country with adequate medical care, curative and preventive, irrespective of his ability to pay for such services;

(2) the medical aid made available to the rural areas is much less than that provided in urban areas; this must be righted;

(3) the active co-operation of the people should be secured in the development of the health programme.

Taking these objectives into consideration the Committee drew up a long-term programme which would provide the country with a modern health service based on the newer and expanding conceptions of modern health practice.

The district health organisation will have as its smallest unit of administration a primary unit which will normally serve a population of 10,000 to 20,000. About 15 to 20 such primary units will together constitute a secondary unit and a varying number of the latter (3 to 5) will form the district health unit, the designation suggested by the Committee for the district health organ- isation. At each of the headquarters of the district, secondary and primary health units will be established a Health Centre from which will radiate the different forms of health activity into the territory covered by each type of unit. The provision made for medical relief and pre- ventive health work at each of these Health Centres will increase in scope and efficiency from the primary unit to the district health unit.

The District Health Centre will possess general and special hospitals with a total bed strength of about 2,500 and all the consultant and laboratory services required for the diagnosis and treatment of disease on up-to-date lines. The Secondary Health Centre will have a hospital with 650 beds and the primary unit headquarters a 75-bed hospital. A system of ambulances and telephone connections between these three types of hospi- tals will help to promote the fullest utilisation of the higher types of service available at the larger institutions by the people living in the remoter parts of the district.

Health Environment.—These hospitals will also take an active part in the preventive health campaign. They will be linked with the field health organisations in respect of such services as those for tuberculosis, for mothers and children or for venereal diseases in order to ensure that the remedial and preventive health work carried out in the homes of the people receive the full benefit of the treatment and diagnostic facilities available at the hospitals.

The Committee stressed that preventive and curative health work should be dovetailed into each other in order to produce maximum results. It therefore, suggested extensive changes in the existing training programme for doctors and laid emphasis on equipping him for preventive health work. It also made elaborate proposals for a considerable expansion of training facilities for the different types of other health personnel required for meeting the country's needs.

The Committee made it plain that no health development plan could produce adequate results unless sufficient measures were taken for the provision of a healthy environment for community life, such as safe water-supply, hygienic houses, a satisfactory system of con- servancy and proper supervision over the pro- duction, distribution and sale of food intended for public consumption. Specific recommenda- tions were put forward in respect of these.

In order to secure the active support of the people, the establishment of a Health Committee in every village was recommended. Such Committees were intended to stimulate local effort for the improvement of environmental sanitation, control of infectious disease and the steady development of a programme of health education.

Government of India accepted in principle all the recommendations of the Bhore Com- mittee, and have been carrying out the recom- mendations in regard to the items given below :—

1. *Scholarship Scheme.*—A medical scholar- ship scheme was initiated in 1945. Under this scheme a limited number of medical and dental graduates and nutrition workers are selected annually for post-graduate training abroad at Government expense in medical and allied subjects, dentistry and nutrition. The scheme has further been revised in 1948 and a certain number of travel fellowships of shorter duration are being granted to selected officials holding responsible posts in Medical Colleges, Hospitals, Teaching and Research Institutions holding key posts in the Administrative Medical Service. This scheme has undergone further revision during 1949 and as a result of the recommenda- tions made by the Overseas Scholarship Commit- tee appointed by the Government of India, Ministry of Education, it has ceased to function as a separate scheme and has merged into the main scheme for advanced studies overseas administered by the Ministry of Education. It has further been decided that as a measure of economy it would not be possible for the Centre to assist the States by way of grants for financing training schemes and that the entire expenditure on the training of candidates nominated by the States Governments under the various schemes for higher training abroad in medical and allied subjects including nursing and dentistry will from 1950-51 be borne by the States Govern- ments concerned.

2. *All-India Medical Institute.* (*A*) *Up- grading Programme* :—The Health Survey and Development Committee recommended the establishment of an All-India Medical Institute under the control of the Central Government to provide facilities of the highest order for training-health personnel, to promote research of the highest type in all branches of medicine and to provide advanced post-graduate training. The Advisory Committee which was set up to make recommendations for the establishment of such an Institute recommended the setting up of four such institutes in India, the first of them to be located in Delhi. The cost of these had been estimated at rupees five crores initially and Rs. 60,00,000 recurring. In view of the heavy cost involved, the scheme was temporarily postponed and, in the meantime, the question of upgrading certain teaching and research branches in existing medical colleges and research institutions to provide necessary teaching personnel for the Institute was taken up as a first step. A small committee which was constituted to look into this question, recommended the upgrading of various institu- tions and divided those institutions into three priority groups,—the institutions in the first priority group were to be upgraded immediately and the rest after further investigations had been made and some improvements had been carried out. The question of upgrading the institutions included in the first priority was taken up in 1949-50 and a grant of Rs. 8,94,680 has been paid as the Central Government's contribution for the upgrading of the Physiology Department, Medical College, Patna; Tata Memorial Hospital, Bombay; Tuberculosis Department, Delhi; Industrial Institute of Hygiene, Calcutta; during the period from 1949-50 to 1951-52. Besides this, a grant of Rs. 1 lakh has been paid to the Christian Medical College, Vellore, for the upgrading of the Thoracic Surgery Department, which is placed in the second priority. Rs. 3 lakhs going to the Tata Memorial Hospital, Bombay, for the develop- ment of a cancer research and teaching centre and Rs. 1 lakh to the Delhi University for the construction of a Hostel for the Tuberculosis Institute. During the year 1950-51 a sum of Rs. 2 lakhs (including Rs. 50,000 which had already been sanctioned by the Health Ministry and was expected to be paid before the expiry of the 1950-51 financial year) has been paid to the Tata Memorial Hospital, Bombay, Rs. 62,000 to the Industrial Hygiene Institute, Calcutta, and Rs. 83,500 to the Mental Hospital, Bangalore. Payment to other Institutions is under considera- tion.

(*B.*) *Medical Institute* :—

A modified scheme for the establishment of an All-India Medical Institute in association with the Irwin Hospital, New Delhi has been formulated, and will be implemented from the year 1952-53. The Institute will have as its components a Medical College for training of under-graduates, a Dental College and a Post- graduate Centre. The New Zealand Government has agreed to contribute £1 million for the scheme within the next three years under the Colombo Plan, of which a sum of £2,50,000 has already been paid. A provision of Rs. 50,00,000 has been made for the scheme in the budget estimates for the year 1952-53.

3. *All-India Council of Post-graduate Medical Education.*—On the recommendation of the Inter-University Board, India, the All-India Council of Post-graduate Medical Education consisting of the following members has been constituted :—

> Two members nominated by the Central Government; and one member to represent each of the following organisations or interests to be elected by them: The Inter-University Board, India; The Medical Council of India; The National Institute of Sciences India; The Indian Council of Medical Research (formerly the Indian Research Fund Association).

The term of the first Council is three years.

The All-India Council of Post-graduate Medical Education will prescribe standards for Post- graduate Medical Education for the guidance of Universities, and advise Universities with a view to securing uniformity of standards for post- graduate medical education throughout the country.

The Council began to function from the 10th January, 1950 when its inaugural meeting was held at its headquarters in Madras, with Dr. Lakshmanaswami Mudaliar as its Chairman.

4. *Committee on Indigenous Systems of Medi- cine.*—This Committee was appointed to make recommendations regarding the steps to be taken for the development and regulation of the indigenous systems of medicine. The report of the Committee was submitted in February, 1949. The views of the Central Government on the Report of the Committee on Indigenous Systems of Medicine were communicated to State Governments, who were asked to furnish their views. The report of the Committee was considered by the 3rd Health Ministers' Confer- ence held in August-September 1950, and the views of the Medical Council of India have been invited. A small Committee was set up consist- ing of suitable persons representing the Ayur- vedic and Unani Systems of Medicines and the natural and biological sciences in order to work out and submit to Government a detailed scheme for the development of a centre of research in the Ayurvedic and Unani Systems of Medicines. On the recommendations of this Committee, a Research Centre is being established at Jamnagar for conducting research in Indigenous Systems of Medicine. A Governing Body for the

proposed Institute has been constituted and a grant-in-aid of Rs. 1·0 lakh has been paid for the establishment of the Institute. A provision of Rs. 4 lakhs has been made in the budget estimates for 1952-53 as grant-in-aid to the Governing Body of the Centre.

5. *Homœopathic Enquiry Committee.*—In pursuance of the undertaking given to the Central Legislature, a Committee was appointed to examine the position of Homœopathy in India and to make recommendations to Government regarding its regulation and development. The report of the Committee was submitted to Government on the 17th October, 1949. The views of the State Governments were invited on the recommendations made by the Committee. The report of the Committee was considered by the 3rd Health Ministers' Conference held in August-September 1950 and the views of the Medical Council of India have been invited on the recommendations made by the Conference which are still awaited.

6. *Cancer Research Centre, Bombay.*—In their report, the Upgrading Committee recommended the upgrading of the Tata Memorial Hospital, Bombay, which serves an all-India purpose and is eminently fitted for the promotion of cancer research in all its aspects. In order to develop this institution into a post-graduate and research centre on an all-India basis, a building grant of Rs. 2 lakhs has been paid for the establishment of a Cancer Research Centre. Besides this, a non-recurring grant of Rs. 1·5 lakhs for the purchase of equipment and a recurring grant of Rs. 1,24,000 to meet the salary of the staff has also been paid to the institution during 1950-51 and 1951-52.

7. *Chest Institute.*—In view of the fact that respiratory diseases constitute the major killing diseases in India, the need for giving special attention to the training of personnel to combat them has been recognised and a Post-graduate Course has been started at the Delhi University. The foundation stone for the building of this Institute was laid by the late Sardar Vallabhbhai Patel, on the 6th April, 1949 and the construction of the building has been completed.

8. *State Governments' Five-Year Plan.*—The Health Survey and Development Committee proposed a long-term and a short-term programme of reorganisation of health services. It envisaged primary units as peripheral organs for the administration of the preventive and curative care of the people; the provision of a higher type of medical service at the secondary health centre which would also supervise the work of a number of primary units, and facilities at a still higher level at the headquarters of the district.

The limitation of funds available for expenditure on health, however, makes it imperative that the health programme is based on a careful consideration of priorities, and that the approach to the various problems of health is in keeping with the basic economic condition in the country. These considerations received special attention from the Panel on Health Programmes of the Planning Commission, whose recommendations are being followed in reaching conclusions on various aspects of the health problem. The Planning Commission have earmarked a total provision of Rs. 8359·81 lakhs towards medical and Public Health Schemes during the five years 1951-56.

THE MATERNITY AND CHILD WELFARE MOVEMENT

Among the most pressing problems of health is that presented by the appalling maternal and infant mortality. The figures for maternal mortality are not accurately known, but the investigations into the causes of maternal deaths carried out in certain areas indicate that over 20 mothers lose their lives each year for every thousand babies that are born as a result of pregnancy and child birth. The number of mothers who suffer from ill health and are disabled temporarily or permanently as a result of the normal physiological function of child bearing is at least 20 times the annual maternal deaths. Every year approximately one-fourth of the children die before the age of 5 years, while many others survive only to grow weak and feeble from unhygienic surroundings during infancy and childhood.

The Maternity and Child Welfare Bureau, Indian Red Cross Society, is the only body at present working on an all-India basis. The Bureau is managed by a technical committee representing the medical and public health services, the nursing profession and voluntary organisations and individuals working in fields allied to maternity and child welfare. The Honorary Director of the Maternity and Child Welfare Bureau who is also the Adviser to the Government of India in matters relating to maternity and child welfare in the country, acts as Secretary. The Bureau administers the Victoria Memorial Scholarships fund for the improvement of midwifery services in rural areas and, the Lady Chelmsford League fund for maternity and child welfare. The Honorary Director of the Bureau is also the Secretary of the Lady Reading Health School Committee and operates on its funds.

The income from the funds is expended on (1) the maintenance of a Central Bureau of information on all aspects of maternal and child health, (2) on training schemes for workers in the maternity and child welfare field, doctors, health visitors, midwives, nursery school teachers and nursery nurses, (3) on propaganda, literature and publicity and (4) on grants-in-aid of experimental schemes. Since there is an acute shortage of teachers and supervisors, the Bureau has lately concentrated on the training of such personnel both in India and abroad.

Army Child Welfare was formerly an activity of the Maternity and Child Welfare Bureau under the Lady Birdwood Fund, but due to rapid expansion of welfare activities for the Indian Troops, a special committee, "The Indian Fighting Forces Maternity Child Welfare" took over the management of Indian Army Centres in the year 1942. The Secretary of the Indian Red Cross Society and the Honorary Director of the Bureau are members of this Committee. A remarkable feature of the whole movement is the keenness of the men themselves to aid it, realising as they do the benefits to their own women and children. There are very few cantonments where some work of this kind is not going on.

In all the States welfare activities for the care of mother and child now exist, the activities differ in the nature of the work undertaken, and the amount of organisation displayed. The Health Survey and Development Committee appointed by the Government of India in 1943 have studied the existing Maternal and Child Health services and have made their recommendations for its future developments. The Committee have emphasised the need for organising the services as an integral part of the medical and public health services of the State and much emphasis has been laid on the preparation of workers. Much excellent work is still being done by voluntary organisations such as Branches of the Indian Red Cross Society in Assam, West Bengal, Madras, Orissa, Punjab, Madhya Pradesh and Uttar Pradesh. In Bihar the work is undertaken by the Bihar Maternity and Child Welfare Society and in Bombay the Bombay Mothers and Children's Welfare Society. The pace of the transition from voluntary to official direction has been accelerated in recent years and posts of maternity and child welfare officers exist in Madras, West Bengal, Orissa, Assam, Delhi, U.P. and Punjab, and in some of the other recently formed States.

A demonstration centre has been set up in the rural areas of Delhi State at Najafgarh to provide model health services with special emphasis on the promotion of health of mothers and children. The centre will serve as a training field for the various institutions in Delhi. The World Health Organization have closely collaborated with the Government of India in setting up the model centre and have assigned a Maternal and Child Health Team consisting of a Pædiatrician and a Public Health Nurse, which arrived in India in November, 1949. This is the first attempt to implement the recommendations of the Health Survey and Development Committee in Delhi. Some of the other States are also developing the services on these lines but in a modified form.

Maternal and Child Health.—The Government of India have decided to establish, in collaboration with the United Nations International Children's Emergency Fund and World Health Organisation, a Maternal and Child Health Centre by developing the existing Maternity and Child Welfare Section of the All-India Institute of Hygiene and Public Health, Calcutta, into a Department of Maternal and Child Health and by the development of Urban and Rural Practice Fields at Calcutta and Singur, to serve as an international training centre for child health workers. The cost of the establishment of the Centre is estimated at Rs. 90 lakhs spread over a period of five years, and will be shared equally by the UNICEF and the Government of India. After the initial period of five years, the Government of India will continue the Centre as an integral part of the All-India Institute of Hygiene and Public Health, Calcutta.

When developed, the Department of Maternal and Child Health at the Institute will provide post-graduate courses for doctors in maternal and child health; courses in Public Health Nursing for certified nurses; and facilities in the teaching of clinical and social pædiatrics and obstetrics as part of courses in Diploma in Child Health, Diploma in Gynæcology and Obstetrics, refresher courses for general practitioners and medical officers, training courses for Pædiatric nurses, Public Health nurses and midwives, Diploma in Public Health, etc. which are now given or will be developed by various institutions in Calcutta.

The Centre will start functioning by July 1953.

WELFARE WORK IN INDUSTRY

Industrial concerns in recent years have realised the importance of providing special facilities for the employees and an increasing number of industries are now maintaining comprehensive welfare schemes for women and children. The Government of India have instructed authorities in the coal mines to establish creches and provide such minimum requirements regarding building staff and equipment as are detailed in their circular. The Employees' State Insurance Act, 1948, which applies to all factories would further improve social conditions so far as medical care is concerned and the insured person will be entitled to certain benefits, one of them being the maternity benefit which is a special central legislative measure for the protection of mothers and entitles an insured woman to claim maternity benefit for confinement.

So far the schemes have devoted their attention to educating women in the elements of mothercraft and attempting to preserve infant lives and improve child health. In Western Countries the Child Welfare Movement has no more marked characteristic than its inability to stop expanding. Its ramifications know no bounds. Its inevitable corollaries are endless, and like the banyan tree it will no doubt in this country also develop innumerable fresh roots such as medical supervision, dental clinics, better housing, open air playgrounds, etc.

VICTORIA MEMORIAL SCHOLARSHIPS

The Victoria Memorial Scholarships Fund was founded in 1902 by Lady Curzon, with the object of securing better standards of midwifery practice. A sum of about Rs. 6½ lakhs was secured by public subscription in 1903.

The Fund is now administered by the Maternity and Child Welfare Bureau, Indian Red Cross Society and the income is expended as grants-in-aid of training schemes for rural midwives maintained by voluntary organisations, generally branches of the Indian Red Cross Societies in the States. The Honorary Director of Maternity and Child Welfare, I.R.C. Society, is Secretary of the Fund.

In spite of continuous efforts since the beginning of the present century, no appreciable improvement has yet been made in the midwifery services in the rural areas. It is, therefore, necessary to extend the training to rural areas taking care that only the required number are trained and allowed to work under supervision until such time as they can be replaced by properly trained midwives.

INSANITY AND MENTAL HOSPITALS

In India there are thirty mental hospitals for the care and treatment of mental patients providing a total accommodation for about 10,330 patients. In addition to these there is also one mental hospital in Madras reserved for criminal lunatics only. Of all the institutions the Mysore Government Mental Hospital at Bangalore and the Inter-State Mental Hospital at Ranchi are the ones which are best equipped. They provide all the facilities of modern treatment including electric shock, insulin, cardiozal treatment, psycho-analysis, with or without sodium penthal and relevant brain surgery like prefrontal leucotomy and in epileptics ventricular puncture and exploration of the brain. Both these centres are to be upgraded as post-graduate teaching and research centres.

In India facilities for the care and treatment of persons suffering from mental disorders are very inadequate. To serve a population of over 360 millions, there are about 30 institutions with accommodation for about 10,330 patients. While accurate figures are lacking regarding the actual number of mental patients, even at a conservative estimate of two per thousand of the population, as against 3.5 in England, and 5 in America, the figures run into nearly one million. This does not take into account the mental defectives, who are not less than one and a half millions and the psycho-neurotics, who are about twice this number, needing intensive treatment.

In general the types of insanity occurring in India at present are very much in the same proportion as in other parts of the world, the majority of serious and intractable cases being schizophrenic in nature. Other less prevalent types are Acute Mania and Maniac-depressive psychosis. The major probable causes are hereditary predisposition, mental strain, critical periods of life (*e.g.*, puberty) cannabis indica, probably in the form of ganja or some other preparation, privation and diseases consequent on malnutrition, epilepsy and syphilis.

The Bhore Committee, in its report, has made pointed reference to the extremely unsatisfactory conditions of some of the existing mental hospitals, which are altogether too few to meet the requirements of the country, and has recommended, among other measures, (*i*) an improvement and augmentation of existing institutional facilities for the treatment of mental ill-health and (*ii*) provision for the training of different types of mental health workers, including doctors and ancillary personnel. The State Governments are taking steps to give effect to these recommendations.

The World Health Organisation and UNICEF are interesting themselves in the promotion of mental health, and child care and psychology, by the provision of suitable fellowships and by grants to deserving institutions.

RAILWAYS

THE total route mileage of all the railways in India on March 31, 1951 was 34,078·94. The total electrified route mileage was 235·99. The total capital at charge on March 31, 1951 was Rs. 838·17 crores.

The entire Indian system is now regrouped into six administrations: the Southern Railway, the Western Railway, the Central Railway, the Northern Railway, the Eastern Railway and the North-Eastern Railway.

The Southern Railway came into existence on April 14, 1951. It has its headquarters in Madras and is composed of the former M. & S.M., S.I. and the Mysore State Railways. The following are other particulars (estimates based on 1949-50 figures):

Route Mileage	.. ..	5,999
Locomotives	.. ..	1,326
Wagons	.. ..	20,431
Coaching Vehicles	.. ..	3,003
Gross Earnings	.. ..	Rs. 41,72,35,000
Working Expenses	.. ..	Rs. 31,47,79,000
Net Earnings	.. ..	Rs. 7,24,56,000

The Western Railway was inaugurated on Nov. 5, 1951. It has its headquarters in Bombay and is composed of the former B.B. & C.I., the Saurashtra, the Rajasthan and the Jaipur Railways and the small section Phulad-Marwar Junction of the Jodhpur Railway. It serves the Western and Northern parts of Bombay State, the whole of Saurashtra, a corner of Kutch, a large part of Madhya Bharat and the Eastern segment of Rajasthan. Other particulars based on 1949-50 estimates are as follows:

Route Mileage	.. ..	5,073
Gross Earnings	.. ..	Rs. 39·3 crores
Working Expenses	.. ..	Rs. 25·5 ,,
Net Earnings	.. ..	Rs. 13·8 ,,
No. of Passengers carried		296·6 million
Total Goods Traffic	..	15·6 million tons
Area served	.. ..	150,000 sq. miles

The Western Railway is being divided into three regions, *viz.*, Broad Gauge Region including the Narrow Gauge portion (Bombay as regional headquarters); Northern Metre Gauge Region (Ajmer as regional headquarters) and Southern Metre Gauge Region (Gondal as regional headquarters for the present).

Each of the three Regional Headquarters will be under the control of three administrative officers dealing with Traffic, Mechanical and Engineering matters, respectively.

The Central Railway was also inaugurated on Nov. 5, 1951. It has its headquarters in Bombay and is composed of the former G.I.P., N.S., the Scindia State and Dholpur State Railways. The following are other particulars based on the 1949-50 estimates:

Route Mileage	.. ..	5,400
Broad-Gauge	.. ..	4091·23
Metre ,,	.. ..	744·24
Narrow ,,	.. ..	563·98
Gross Earnings	.. ..	Rs. 50,90,64,000
Working Expenses	..	Rs. 37,00,52,000
Net Earnings	.. ..	Rs. 13,90,12,000
No. of Passengers carried		242 million
Volume of Freight	..	20 million tons
Area served	.. ..	210,000 sq. miles

The Central Railway will be administered by a General Manager with 9 Heads of Departments under him. These Departments will be: (*a*) Engineering, (*b*) Signals and Tele-Communications, (*c*) Commercial, (*d*) Transportation, (*e*) Mechanical Engineering, (*f*) Electrical Engineering, (*g*) Stores, (*h*) Medical and (*i*) Accounts and Finance.

The total requirements of gazetted posts for the entire Central Railway has been estimated at 364.

Other features of the proposed organisation are summarised below:—

There will be 7 Transportation Divisions located at Sholapur, Bombay, Bhusaval, Nagpur, Jabalpur, Jhansi and Secunderabad. Each of these will be in the charge of a Divisional Transportation Superintendent who will be an Officer of Junior Administrative rank.

There will be a corresponding number of Commercial Divisions with the same headquarters and jurisdictions of the Transportation Divisions, but each under a Divisional Traffic Manager of District rank.

There will be 13 Engineering Divisions each under a Divisional Engineer of District rank with their headquarters at the following places:—Poona, Parel, Bhusaval, Akola, Nagpur, Jabalpur, Jhansi, Secunderabad, Gwalior, Lonavla.

There will be four major Mechanical Workshops, one Locomotive Workshop at Parel, one Carriage and Wagon Workshop at Matunga, one Carriage and Wagon Workshop at Jhansi and one Loco and Carriage and Wagon Workshop at Lallaguda.

The Northern Railway was inaugurated on April 14, 1952. It has its headquarters in Delhi and is composed of the former Eastern Punjab, Jodhpur, Bikaner, the Allahabad, Lucknow and Moradabad Divisions of the East Indian Railway, Delhi-Rewari-Fazilka section of the former B.B. & C.I. It has an estimated route mileage of 5,200.

On this system Delhi, Ferozepur, Moradabad, Lucknow and Allahabad Divisions will continue to function as at present and the Bikaner and Jodhpur railways will be formed into two Divisions. The Delhi-Fazilka section will be included in the Delhi Division.

The Eastern Railway was also inaugurated on April 14, 1952. It has its headquarters in Calcutta and is composed of the former B.N.R., the E.I.R. except parts transferred to the Northern and North-Eastern Railways. It has an estimated route mileage of 5,000. The system serves a large part of West Bengal, South Bihar, Orissa, South Vindhya Pradesh, Eastern Madhya Pradesh and the Northern tip of Madras State.

On this system the Dinapur and Asansol sections will continue to function as at present. The Dhanbad Transportation Division will absorb the Adra District of B.N.R. The reduced Howrah Division will absorb a portion of the Kharagpur District of B.N.R. The remaining portions of B.N.R. will be formed into a region. The Sealdah Division will stay.

The North-Eastern Railway was inaugurated on April 14, 1952. It has its headquarters at Gorakhpur and is composed of the former Oudh Tirhut and Assam Railways, Khana-Jamalpur loop, Bandel-Barharwa, Bandel-Naihati, Naihati-Azimganj sections of the E.I., and the Fatehgarh traffic District of the B.B. & C.I. The total estimated mileage is 6,000.

The system serves Assam, a good part of West Bengal, north Bihar and a large part of U.P. The metre-gauge will be divided into three regions one at Pandu, and two temporarily located at Gorakhpur. Eventually the whole system will be organized into three Divisions.

BEFORE AMALGAMATION

Before the amalgamation there were 35 railway systems in India of which 22 were owned by the Indian Government.

These 22 were:—

Assam, Bengal Nagpur, Bombay Baroda and Central India, Bezwada, Dhone Kurnool, Darjeeling Himalayan, East Indian, Eastern Punjab, Great Indian Peninsula, Madras and Southern Mahratta, Oudh Tirhut, South Indian, Bikaner State Railway, Kutch State Railway, Dholpur State Railway, Jaipur State Railway, Jodhpur Railway, Mysore State Railway, Nizam's State Railway, Rajasthan Railway, Saurashtra Railway, Scindia State Railway.

The chief administrations were the Assam Railway, the Bengal Nagpur Railway, the Bombay Baroda & Central India Railway, the East Indian Railway, the Punjab Railway, the Great Indian Peninsula Railway, the Madras & Southern Mahratha Railway, the Mysore State Railway, the H.E.H. Nizam's State Railway, the Oudh Tirhut Railway, the South Indian Railway and the Saurashtra Railway.

There are three kinds of gauges, broad (5 ft. 6 in.), metre (3 ft. 3⅜ in.) and narrow (2 ft. 6 in.). There is also a light gauge usually laid on the mountains (2 ft.). Examples of this last are the Matheran (Hill) Light Railway, and the Darjeeling-Himalayan. The longest line in this class is the Scindia State, 294 miles.

The total route mileage open on March 31, 1950 and other particulars are as follows:—

Broad-gauge	15,694·53
Metre	15,027·71
Narrow and Light	3,356·70
New Lines opened to traffic during 1949-50	65·62
Under construction total ..	250·96
No. of Locos	8,614
No. of Passenger Carriages.	14,726
No. of Goods Vehicles ..	184,994
No. of Passengers carried.	1,129 million
Total staff	919,747
Cost of staff ..	Rs. 1,10,46,70,043

The fares are as follows:—

Air Conditioned Class	30 pies per mile
I Class	27 „ „ „
II Class	16 „ „ „
Inter Class	10·5 pies per mile (mail).
„	9 „ „ „ (ordinary).
III Class.. ..	6 „ „ „ (mail).
„	5 „ „ „ (ordinary).

Principal Statistics—(1950-51)

Gross earnings ..	(crores) Rs.	264·61
Total Working expenses	(crores) Rs.	214·35
Operating ratio ..	Per cent.	81·01
Number of passengers originating	(millions)	1,307· 7
Passenger miles ..	(millions)	41,709· 6
Earnings from carriage of passengers ..	(crores) Rs.	99·21
Average earnings per passenger mile	Pies	4·57
Freight tons originating ..	(millions)	92·35
Freight ton miles	(millions)	27,007·52
Earnings from carriage of goods	(crores) Rs.	139·77
Average earnings per freight ton mile	Pies	9·04
Total train miles	(millions)	185·11
Gross earnings per train mile ..	Rs.	14·58
Working expenses per train mile..	Rs.	11·81
Net earnings per train mile ..	Rs.	2·77
Net earnings per mean mile worked ..	Rs.	14,494

Taking all Class I Railways together, the distribution of passenger earnings by various classes in 1950-51 was as follows:—

	In lakhs of rupees
Class I including Air Conditioned..	2,65
Second Class/Class II Special ..	4,31
Inter Class/Class II	6.80
Third Class	85,45

The highest administrative authority for the railways is the Railway Board. The majority of the railways are still organized on a Departmental basis, though the general drift is towards the Divisional organization. There are a number of Committees which have been associated with the Railway Administration: Standing Finance Committee, Central Advisory Council, Railway Rates Tribunal, Indian Railway Fuel Committee. There are also a number of standardization Committees such as for bridges, structure, track, signalling and inter-locking, building, locomotive, carriage and wagon, electrical, specifications.

PARTITION

The partition of India into India and Pakistan affected only three railway systems: the North Western, the Bengal-Assam and the Jodhpur Railways. The North Western had a mileage of 6,881¼ before partition. Of this 1,855¼ miles fell within India and 5,026 miles in Pakistan. The part of Railway that remained in India was reconstituted and re-named as East Punjab Railway with the headquarters in Delhi. Of the 3,555 miles of the Bengal Assam Railway, 352 broad-gauge, 17 narrow gauge and 1,573 metre-gauge became India's share, and the rest 1,613 miles Pakistan's. Part of the system that remained in India was amalgamated with the East Indian Railway, part with the Oudh Tirhut Railway and the rest was constituted into what was called the Assam Railway. Finally, of the Jodhpur-Hyderabad Railway 1,126 miles long, the Sind section a length of 319 miles went to Pakistan, and the rest 807 miles remained in India later to become part of the Rajasthan railways system.

The question of the division of rolling stock, stores, etc., was settled in accordance with the Radcliffe Award by the Railways Stores Sub-Committee. Details were worked out by Balancing Committees. After the partition about 60,000 employees opted for service with India, and these had to be found comparable postings on the Indian railways. The transfers could not be carried out in an orderly manner because of the disturbances that followed in the wake of the partition. Relief was afforded by sanctioning an advance pay of two months. Later a second rehabilitation advance was sanctioned equal to three months' pay and returnable in 36 instalments. The question of finding suitable jobs on the Indian railways raised a host of difficult points such as grading. Other particulars like provident fund were settled on *ad hoc* formula.

One important result of the partition was that the northern districts of West Bengal and the whole State of Assam were cut off by road and railway from the rest of the Union. Actually Indian Union territory here between Nepal in the north and East Pakistan in the south is about 12 miles broad. It is through this narrow neck of land that the railway link between Assam and the rest of the Union was finally driven. The whole length of the newly constructed railways (metre-gauge) is 142¾ miles and is divided into three separate sections. The first section between Kishenganj and Siliguri, 66 miles, directly connects Assam with the rest of the Union. The other two sections give access to different parts of the northern districts of West Bengal and of Assam. Construction on the Assam rail link project, as it is called, started on 27th January 1948. Through rail link for goods traffic was established on 9th December 1948, and through link for passenger traffic on 26th January 1950 to coincide with the inauguration of the Indian Republic. Construction was difficult as there were over a hundred bridges in one section alone. The estimated cost was Rs. 8,89,71,204.

EX-ASSAM RAILWAY 1950-51

Total Mileage	17,74.15
Broad-Gauge	2·15
Metre-Gauge	1,720.03
Narrow-Gauge	51·97
Capital at Charge ..	.. Rs. 33,63,70,056

Appropriation to Depreciation Reserve Fund ..	30	30	30
Total revenue expenditure	224	233	240
Net railway revenues	55	55	59 (57)
Dividend to general revenues	33	33	34
Net surplus	22	22	25 (23)

The then Railway Minister, Mr. N. Gopalaswami Ayyangar, presenting the Railway Budget for 1952-53 in Parliament on Feb. 22, forecast a net surplus of Rs. 25 crores during 1952-53. The surplus for 1951-52 was Rs. 22 crores.

Mr. Ayyangar said that for 1952-53, he proposed to ask only such supplies as might be necessary for meeting the estimated expenditure for the first 4 months.

Mr. Ayyangar laid before Parliament a White Paper reviewing the working of the Railways. The White Paper replaces the normal procedure of presentation of the estimates with a lengthy speech by the Minister.

The White Paper states that the Indian Railways are the only system in the world whose financial position is sound.

Under expenditure of a capital nature, the Budget includes Rs. 15 crores for track renewals and a token provision for the Quilon-Ernakulam line on the Sourthern Railway. Provision has also been made for the purchase of the Tinnevelly-Tiruchendur line in Madras State.

The White Paper adds that indigenous capacity has been mobilised to meet the requirements of railways. Rs. 2 crores in the shape of share capital has been given to the Tata Locomotive Company, which was expected to deliver the first 2 locomotives in February.

Gross Receipts

The actual result of working for the year 1950-51 was a surplus of Rs. 15·01 crores against the revised estimate of Rs. 14·24 crores. As regards the current year, the gross receipts are now expected to increase to Rs. 288·06 crores, an improvement of Rs. 8·56 crores over the Budget estimate, due mainly to increase in parcels and goods traffic owing to increased industrial production and large scale imports of food grains.

The working expenses have also increased by Rs. 8·97 crores, due mainly to an increase of Rs. 5 crores p.m. in the rates of dearness allowance with effect from June 1, 1951, and also to increases in the price of food grains and railway stores. It is anticipated that, in 1952-53, there will be a drop of about Rs. 1·25 crores in coaching earnings, as compared with the revised estimates of the current year. The goods earnings are, however likely to show an improvement resulting from increased industrial production, and an augmentation in railways' transport capacity, particularly on the metre gauge system. The completion of the rationalisation of the freight structure will also bring in some additional revenue.

Taking these trends into account, the total earnings for the Budget year are placed at Rs. 298·47 crores against Rs. 288·06 crores provided in the revised estimates of the current year, an increase of Rs. 10·41 crores. Working expenses have been estimated at Rs. 202·70 crores, which is Rs. 6·98 crores more than the revised estimates of the current year.

The increase in working expenses is mainly due to provision for the full year of the increased dearness allowance and increase in the prices of food grains and stores which were only partially effective in the current year.

Under expenditure of a capital nature, Rs. 58 crores is alloted for rehabilitation of railways' assets, against Rs. 53 crores in the revised estimate of the current year. The Budget includes Rs. 15 crores for track renewals, so that the only remaining impediment in the way of the intensive use of the existing assets may be removed.

The new lines, which are proposed to be taken in hand in 1952-53 are Madhopur-Murliganj on the ex-O.T. Railway and Kastogram-Pariharpur on the E.I. Railway.

The major problem confronting the Railways in the post-war years has been the rehabilitation of their assets, and expansion of existing facilities to meet growing traffic demands. The magnitude of the problem can be gauged from the fact that 1,640 locomotives were due for replacement on Apr. 1, 1951, against the normal annual wastage of 200. Similarly, 5,120 coaches and 25,000 wagons were due for replacement on Apr. 1, 1951, against the normal annual wastage of 600 and 5,500, respectively.

The condition of the track had also deteriorated very considerably during this period as maintenance and replacement could be carried out only to the minimum required for safety purposes.

Besides, during the war, 26 branch lines were dismantled to provide permanent way materials for use overseas or on military projects in India, which have to be restored as soon as possible. Meanwhile, the volume of traffic, both passenger and goods, reached unprecedented proportions; the passenger miles increased by 17·1 per cent compared to the pre-war year and, as regards goods traffic, the tons carried were 25 per cent more, while the ton miles were 40 per cent more.

Recovery Plans

A balanced plan for rehabilitation as well as for the provision of better and more acceptable amenities for the travelling public, particularly in the lower classes, and the provision of essential welfare measures for labour has been drawn up, but, as a necessary prelude to the execution of this plan, a new Convention for the separation of railway finance was brought into force from Apr. 1, 1950.

As a result of the new Convention, it has been possible to make increased allotments for the rehabilitation programme as indicated below: 1949-50 Rs. 31 crores; 1950-51 Rs. 32 crores; 1951-52 Rs. 53 crores (revised estimates); 1952-53 Rs. 58 crores.

The impressive increases in the provision of funds are being utilised to make good the deficiencies of earlier years to the extent indicated in the table below:

—	Number 1949-50	received 1950-51	Number expected to be received 1951-52	Number on order at end of 1951-52
Locomotives	435	225	131	344
Carriages	346	562	548	714
Wagons	1,443	3,157	9,806	4,305

* This is the provisional budget. The final budget was presented on May 22, by Mr. Lal Bahadur Shastri. There were no substantial changes except for one crore for labour welfare, and one crore for eliminating bottle-necks. The final figures are given in brackets.

To meet the requirements of Railways, indigenous capacity has been mobilised to the fullest extent.

The Government has given financial assistance to Tata Locomotive & Engineering Co., a private undertaking, to the extent of Rs. 2 crores in the shape of share capital for the manufacture of locomotives.

It was expected that the first 2 locomotives would be delivered in February.

Similarly, the Government Locomotive Works at Chittaranjan will manufacture 42 locomotives in 1952-53 in addition to 21 produced in 1951-52.

A Coach Building Factory is also being constructed at Perambur (Madras). This is likely to be completed within 2 years' time at a cost of about Rs. 4 crores.

Meanwhile, the spare capacity of the Government owned Hindustan Aircraft Ltd., has been mobilised for the production of coaches, and an annual production of 100 coaches has already been established, which will soon be expanded to about 180 coaches a year.

With the integration of various Indian Railways into one railway system under unified control, the Government has decided that the disparity in the rates and fares should be removed. The present anomaly of inflated mileage as a basis for charge on all railways on the plains is, therefore, being progressively removed with the regrouping of railways. The process of rationalisation of freights introduced in 1948 has also been completed by the adjustment of freight rates on coal, sugar, oil-seeds, etc.

Economy

Economies in administrative and operational expenditure are being comprehensively explored. For this purpose, every important fact of railway operation is being investigated by high level committees or experienced officers. For instance, a committee with Mr. A. D. Shroff, a Director of Tatas, as Chairman was set up to examine the stores arrangements on the railways. A second committee with Mr. D. C. Driver, a Director of Messrs. McNeil and Barry, has been set up to inquire into fuel economy on the railways. A retired Director of the Railway Board has been placed on special duty to investigate cases of loss and damage to goods in transit, which have resulted in phenomenal increases in expenditure in recent years. Besides these investigations, a Central Efficiency Bureau is being created to study operation and performance statistics with a view to improving efficiency and effecting economies.

Labour Relations

Referring to labour relations, the White Paper states that there has been a definite reorientation in Government's policy towards labour for continually improving the status and ameliorating the condition of railway workers. Unfortunately the friendly relations between railway administrations and railway labour were disturbed by the decision taken by the General Council of All-Indian Railwaymen's Federation on July 6, 1951, to commence a general strike with effect from Aug. 27, 1951. As a result of discussions between the Government and the two Railway Federations, the strike threat was not put into execution. In the course of these discussions, a permanent negotiating machinery to deal with disputes between railway labour and railway administrations was evolved, and put into force from Jan. 1, 1952. The machinery is envisaged in 3 tiers, first at the railway level, then at the Railway Board's level including the Minister and, in cases in which no agreement is reached between the Federations and the Railway Board and the matters are of sufficient importance, a reference can be made to a Tribunal consisting of railway representatives and labour representatives under a neutral chairman.

It has also been decided to relax the disciplinary rules and provide certain facilities for the defence of individual cases. The General Managers would have revisionary powers in regard to dismissal and discharges and, before disposing of a case, the General Manager would, if the employee so desires, refer the matter to the Railway Rates Tribunal.

Concluding the White Paper states that although very substantial sums are spent on rehabilitation of Railways' assets and on labour welfare and passenger amenities, the Indian Railways are about the only railway system in the world whose financial position is sound.

In the operational field, there has been remarkable improvement in efficiency as is evident from the fact that the wagon turn-round both on the Broad Gauge and Metre Gauge Railways, which was 11·1 and 6·4 days in March 1949, had decreased to 10·5 and 5·8 days in March 1951 respectively. The number of engine failures in 1948-49 was 7,250, while in 1950-51 it was only 3,911. The engine miles per engine failure were 30,000 in 1948-49 and the corresponding figure in March 1951 was 40,000. The detention to wagons in big marshalling yards, which was 32 hours in 1946-49, had been reduced to 22 hours in 1950-51.

There has been a general improvement in the handling of goods traffic on the railways, but the most outstanding achievement of the year was the part played by the Railways in averting famine in Bihar. While in 1950, Bihar received only 74,000 tons of food grains from outside the State, 7·8 lakh tons were imported in 1951, of which nearly 5 lakhs had to be transported in the short period of about 3 months before the transport system in the rural areas was immobilised by the rains.

Welfare Programme

The railways are going ahead with their plans for labour welfare. Plans estimated to cost Rs. 7·95 crores during 1951-52 envisaged the construction of quarters of an improved type, particularly for essential staff, new dispensaries, extensions for hospitals and new canteens. On staff quarters alone, the expenditure will be Rs. 3½ crores.

The health of the worker and his family is priority No. 1 in the railways' welfare programme. A network of 60 hospitals with over 2,000 beds and 300 dispensaries, staffed with qualified doctors and nurses, provides free medical assistance and medicines to all railway staff and their families. Most of these hospitals have the latest and up-to-date equipment.

In addition to medical and surgical facilities, the employment of radiological and other methods for examination and treatment is permitted.

In certain circumstances, free consultation with a specialist in the service of the Government is allowed. Where no suitable accommodation is available in a railway hospital, free accommodation, medical attendance and treatment in a Government or private hospital is permitted.

The increase in railway population and its concentration in big colonies at certain points indicate the need for adequate emphasis on measures designed to maintain the health of the employees and not merely to treat them when they are ill. Anti-malaria measures and greater attention to sanitation and water supply were the chief aspects of this preventive drive. The railways' budget on health and medical services has been steadily expanding—from Rs. 60 lakhs in 1938-39, it is today about Rs. 2½ crores.

With a view to financing welfare work, a Staff Benefit Fund has been instituted by every railway administration. It is financed mainly from the railway revenues to the extent of one rupee per head per annum. All fines collected from the staff also go into this fund, which is managed by a committee at railway headquarters, presided over by a senior railway officer. This committee has representatives of workers, drawn from local staff councils in the districts or divisions.

Sub-committees functioning under the direction of the Staff Benefit Fund Committee at railway headquarters also exist at convenient centres. Money from the fund is spent for the following purposes: Scholarships and grants to certain schools; relief of distress among ex-members of the staff or their families not provided for under the regulations in force on the railway; recreation and amusement for the staff and their families; and schemes for sickness or maternity benefits or child welfare for families of the staff.

As part of their labour welfare activities, the Indian railways are setting up canteens to serve cheap and wholesome food to workers at the site of their work. Sixty such canteens are already functioning and more are being planned. Free accommodation, furniture, eletric and sanitary installations, crockery, cutlery and other equipment are provided by the railway administrations who, in addition, bear charges for electricity and water consumed. The canteens are run under departmental management, the profit motive being entirely eliminated. Wherever possible, the employees are permitted to run the canteens themselves on a co-operative basis.

The setting up of co-operative societies is also receiving active encouragement. There are today a number of railway co-operative credit societies, stores, banks, insurance societies, all managed by railway employees. The credit societies advance loans to employees at a low rate of interest, the loans being recovered in small instalments from their salary bills. Similarly, co-operative stores sell commodities at reasonable rates to their members.

No account of welfare work will be complete without reference to the measures taken to promote the physical well-being of the staff employed in this great undertaking. Railwaymen are known for their interest in sports.

Railway teams have distinguished themselves in many a field; they have from time to time set up all-India records in athletics, and the last Olympic hockey team was captained by a railwayman. Facilities for games and athletics are provided at the larger stations and workshop centres and tournaments are organised periodically. For this purpose, railway administrations have established a number of railway institutes at large stations providing them with free buildings and playgrounds.

Accidents

There were four major accidents during 1950-51: 1. No. 10 Down Kumaon Express, 12 April 1950, between Bitroi and Kachhla on the ex-Oudh Tirhut Railway, engine and seven coaches derailed, 36 killed and 143 injured, damage Rs. 4,37,500, track tampered by unknown persons. 2. No. 5 Up Punjab Mail, 7 May 1950, between Jasidih and Lahabone on ex-E.I.R., engine and six coaches derailed, 92 killed and 178 injured, damage Rs. 1,89,000, track tampered by unknown persons. 3. No. 320 Down Goods, 13 Aug. 1950, between Karnasa and Durganti on the ex-E.I.R., engine and 12 wagons derailed; 7 Up Toofan Express ran into two wagons, engine and five coaches derailed; 29 killed and 113 injured, damage Rs. 1,77,750, track tampered by unknown persons (Bihar police said track faulty, later judicial enquiry found sabotage as cause). 4. No. 321 Up Kashmir Mail, 3 Sept. 1950, between Dinanagar and Gurdaspur, on ex-E.P.R., engine and four coaches derailed, 12 killed and 65 injured, damage Rs. 1,01,000, undermining of bank due to flow of flood water.

The total number of accidents (derailments, fires, collisions, landslips, floods, etc.) were 22,415 as against 22,406 in 1949-50. The total number of persons killed was 4,117 as against 4,299 in 1949-50, and those injured was 31,712 as against 28,424. Out of those killed 589 were passengers and 199 railway servants. Of those injured 4,209 were passengers and 25,370 were railway servants. The total number of cattle run over was 7,447 as against 7,821.

HISTORY

Indian railways were an out-come of British initiative. Thus railway enterprise in India did not start until experience in England proved that they were a definite national asset. Even so a further test had to be made to find if they would suit Indian conditions. Accordingly three experimental lines were sanctioned in 1845. These were from Calcutta to Raniganj (120 miles), the East Indian Railway; Bombay to Kalyan (32 miles), Great Indian Peninsula Railway; and Madras to Arkonam (39 miles), Madras Railway.

Indian Railway building on a serious scale dates from Lord Dalhousie's great minute of 1853; wherein, after dwelling upon the great social, political and commercial advantages of connecting the chief cities by rail, he suggested a great scheme of trunk lines linking the Presidencies with each other and the inland regions with the principal ports. This reasoning commended itself to the Directors of the East India Company, and it was powerfully reinforced when, during the 1857 flare-up the barriers imposed on free communication were severely felt by the authorities. As there was no private capital in the sub-continent readily available for railway contruction, English Companies, the interest on whose capital was guaranteed by the State, were formed for the purpose.

By the end of 1850 contracts had been entered into with eight companies for the construction of 5,000 miles of line, involving a guaranteed capital of £52 millions. These companies were (1) the East Indian; (2) the Great Indian Peninsula; (3) the Madras; (4) the Bombay, Baroda and Central India; (5) the Eastern Bengal; (6) the Indian Branch, later the Oudh and Rohilkund State Railway and later part of the East Indian Railway; (7) the Sind, Punjab and Delhi, later merged in the North-Western Railway; and (8) the Great Southern of India, later the South Indian Railway. The scheme laid the foundations of the whole railway system of the sub-continent as it exists today.

EARLY DISAPPOINTMENTS

The main principle in the formation of these companies was a Government guarantee on their capital, for this was the only condition on which investors would come forward. This guarantee was a five per cent. return coupled with the free grant of all the land required; in return the companies were required to share the surplus profits with the Government, after the guaranteed interest had been met: the interest charges were calculated at 22*d.* to the rupee; the Railways were to be sold to Government on fixed terms at the close of twenty-five years and the Government were to exercise close control over expenditure and working.

The early results were disappointing. While the Railways greatly increased the efficiency of the civil administration, the mobility of the troops, the trade of the country, and the movement of the population, they failed to make profits sufficient to meet the guaranteed interest. Some critics attributed this to the unnecessarily high standard of construction adopted, and to the engineers' ignorance of local conditions. The result was that by 1869 the deficit on the Railway budget was Rs. 16½ lakhs. Seeking for some more economical method of construction, the Government secured sanction to the building of lines by direct State Agency, and funds were allotted for the purpose, the metre-gauge being adopted for cheapness.

Funds soon lapsed and the money available had to be diverted to converting the Sind and Punjab lines from metre to broad-gauge for strategic reasons. Government had therefore again to resort to the system of guarantee, and the Indian Midland (1882-85), since absorbed by the Great Indian Peninsula; the Bengal-Nagpur (1883-87); the Southern Mahratta (1882); and the Assam-Bengal (1891) were constructed under guarantees, but on easier terms than those offered to the first group of companies. Their total length was over 4,000 miles.

In 1879, embarrassed by famine and by the fall of the exchange value of the rupee, Government again endeavoured to enlist unaided private enterprise. Four companies were promoted:—the Nilgiri, the Delhi-Ambala-Kalka, the Bengal Central, and the Bengal and North-Western. The first became bankrupt, the second and third received guarantees, and the Tirhut Railway had to be leased to the fourth.

A step of even greater importance was taken when the former Indian States were invited to undertake construction in their own territories, and the Nizam's Government guaranteed the interest on 330 miles of line in the State of Hyderabad. This was the first of the large system of Indian State Railways. In the first period up to 1870, 4,255 miles were opened, of which all save 45 were on the broad-gauge; during the next ten years there were opened 4,239, making the total 8,494 (on the broad-gauge 6,562, the metre 1,865, and narrow 67).

Then ensued a period of financial ease which was broken by the fall in exchange and the costly lines built on the Frontier. The Penjdeh incident, which brought Great Britain and Russia to the verge of war, necessitated the connection of British outposts at Quetta and Chaman with the main trunk lines. The sections through the desolate Harnai and Bolan Passes were enormously costly; it is said that they might have been ballasted with rupees; the long tunnel under the Khojak Pass added largely to this necessary, but unprofitable, outlay.

REBATE TERMS ESTABLISHED

This induced the fourth period—the system of rebates. Instead of a gold subsidy, companies were offered a rebate on the gross earnings of the traffic interchanged with the main line, so that the dividend might rise to four per cent., but the rebate was limited to 20 per cent. of the gross earnings. Under these conditions, there were promoted the Ahmedabad-Prantej, the South Bihar, and the Southern Punjab, although only in the case of the first were the terms strictly adhered to.

The Barsi Light Railway, on the two feet six inches gauge, entered the field without any guarantee, and with rolling stock designed to illustrate the carrying power of this gauge. The rebate terms being found unattractive in view of the competition of 4 per cent. trustee stocks they were revised in 1896 to provide for an absolute guarantee of 3 per cent. with a share of surplus profits; or rebate up to the full extent of the main line's net earnings in supplement of their own net earnings, the total being limited to 3½ per cent. on the capital outlay. Under these terms, a considerable number of feeder line companies was promoted, though in none were the conditions arbitrarily exacted. As these terms did not at first attain their purpose, they were further revised, and in lieu was substituted an increase in the rate of guarantee from 3 to 3½ per cent. and of rebate from 3½ to 5 per cent. with equal division of surplus profits over 5 per cent. in both cases. At last, the requirements of the market were met, and there was for a time a mild boom in feeder railway construction and the stock of all the sound companies promoted stood at a substantial premium.

Conditions changed after the First World War and the Acworth Committee so far from approving of this system, considered that the aim of the Government should be to reduce by amalgamation the number of existing companies and that only in cases where the State could not or would not provide adequate funds should private enterprise in this direction be encouraged.

The Branch Line Companies had ceased for some time to raise additional capital for capital requirements. They had either obtained overdrafts from various Banks for this purpose at heavy rates of interest or issued debentures at special rates of interest (usually about 7 per cent.) or in several cases asked for money to be advanced to them by the Railway Board. So far, therefore, from reducing the amount that the Government of India had to raise in the open market, they were increasing the amount. For the above reasons, the Government of India abolished this system and prepared themselves to find the capital required for the construction of extensions or branches to existing main line systems. They also announced their readiness to consider the question of constructing branch or feeder lines which were not expected to be remunerative from the point of view of railway earnings upon a guarantee against loss from a Local Government or local authority which might desire to have such lines constructed for purely local reasons or on account of administrative advantages likely to accrue in particular areas.

This proposal was put forward as affording a suitable method of reconciling the interests of the Central and the Local Governments and of providing for local bodies and for Local Governments a method of securing the construction of railways which might be required for purely local reasons and which, while not likely to prove remunerative on purely railway earnings, were likely to give such benefits to Local Governments and local bodies as would more than repay the amounts paid under the guarantee. Some such arrangements were made with Local Governments in Madras, the Punjab area, Assam and Bombay.

RAILWAYS BEGIN TO PAY

Meantime a much more important change was in progress. The gradual economic development of the sub-continent vastly increased the traffic, both passenger and goods. The development of irrigation in the Punjab area and Sind transformed the North-Western Railway. Owing to the burden of maintaining the unprofitable Frontier lines this was the Cinderella of the Railways in the sub-continent—it had become the chief target of the critics who protested against the unwisdom of constructing railways from borrowed capital. But with the completion of the Chenab and Jhelum Canals, the North-Western became one of the great grain lines of the world, choked with traffic at certain seasons of the year and making a large profit for the State. In 1900 the railways for the first time showed a small gain to the State. In succeeding years the net receipts grew rapidly. In the four years ended 1907-08 they averaged close upon £ 2 millions a year.

In the following year there was a relapse. Bad harvests in India, accompanied by the monetary panic caused by the American financial crisis, led to a great falling off in receipts just when working expenses were rising, owing to the general increase in prices. Instead of a profit, there was a deficit of £1,240,000 in the railway accounts for 1908-09. But in the following year again there was a reversion to a profit, and the net railway earnings continued to increase steadily till they reached a figure of over £10 millions in 1918-19. This era of profits ended with the close of the year 1920-21 and in 1921-22 there was a loss of over £6 millions.

These changes in the fortunes of the railways affected the budget of the Central Government rather seriously and in 1924-25 the Railway finances were separated from the General Budget.

CONTRACTS REVISED

One factor which helped to improve the financial position was the revision of the original contracts under which the guaranteed lines were constructed. The five per cent. dividend guaranteed at 22*d.* per rupee, and the half-yearly settlements made these companies a drain on the State at a time when their stock was at a high premium. The first contract to fall in was the East Indian, the great line connecting Calcutta with Delhi and U.P. and Bihar. When the contract lapsed, the Government exercised their right of purchasing the line, paying the purchase-money in the form of terminable annuities, derived from revenue, carrying with them a sinking

fund for the redemption of capital. The railway thus became a State line: but it was re-leased to the Company which actually worked it.

Under these new conditions the East Indian Railway Company brought to the State in the ten years ended 1909 after meeting all charges, including the payments on account of the terminable annuity by means of which the purchase of the line was made, and interest of all capital outlay subsequent to the date on purchase, a clear profit of about ten millions. No other railway shows results quite equal to the East Indian, because, in addition to serving a rich country by an easy line, it possesses its own collieries and enjoys cheap coal.

But with allowance for these factors, all the other guaranteed companies which have been acquired under similar conditions as their contracts expired, have proportionately swelled the revenue and assets of the State. It is difficult to estimate the amount which must be added to the capital debt of the sub-continent's railways in order to counter-balance the loss during the period when the revenue did not meet the interest charges. Whatever the figure Government have a magnificent asset in their railway property.

These changes induced a corresponding change in railway policy. Up to 1900 the great work had been the provision of trunk lines. But with the completion of the Nagda-Muttra line, providing an alternative broad-gauge route from Bombay to Delhi through eastern Rajasthan, the trunk system was virtually complete.

The next step was to bring the open lines up to their traffic requirements and providing them with feeders. The sudden increase in the trade of the sub-continent, however, found the main lines totally unprepared. Costly works were necessary to double the lines, improve the equipment, provide new and better yards and terminal facilities and to increase the rolling stock. Consequently the demands on the open lines altogether overshadowed the provision of new lines. Even then the railway budget was found totally inadequate for the purpose, and a small Committee sat in London, under the Chairmanship of Lord Inchcape, to consider ways and means. This Committee found that the amount which could be remuneratively spent on railway construction was limited only by the capacity of the money market. They fixed the annual allotment at £12,000,000 a year. Even this reduced sum could not always be provided.

RAILWAY BOARD

As the original contracts carried a definite Government guarantee of interest, it was necessary for Government to exercise strong supervision and control over the expenditure during construction, and over management and expenditure after the lines were open for traffic. For these purposes a staff of Consulting Engineers was formed, and a whole system of checks and counter-checks established, leading up to the Railway Branch of the Public Works Department of the Government of India. As traffic developed, the railways outgrew this dry nursing, and when the original contracts expired, and the interests of Government and the Companies synchronised, it became not only vexatious but unnecessary.

Accordingly in 1901-02 an official was deputed by the Secretary of State to examine the whole question of the organization and working of the Indian Railways. The official recommended that the existing system should be replaced by a Railway Board, consisting of a Chairman and two members with a secretary. A Board was accordingly constituted in March 1905. The Board was made subordinate to the Government of India in which it was represented by the Department of Commerce and Industry. It prepared the railway programme of expenditure and considered the greater questions of policy and economy affecting all the lines. Its administrative duties included the construction of new lines by State agency, the carrying out of new works on open lines, the improvement of railway management with regard both to economy and public convenience, the arrangements for through traffic, the settlement of disputes between lines, the control and promotion of the staff on State lines, and the general supervision over the working and expenditure of the Company lines.

Certain minor changes have taken place from time to time since the constitution of the Railway Board. In 1908, to meet the complaint that the Board was subjected to excessive control by the Department of Commerce and Industry, the powers of the Chairman were increased and he was given the status of a secretary to Government with the right of independent access to the Viceroy; he usually sat in the central Legislative Council as the representative of the Railway interest. In 1912 in consequence of complaints of the excessive interference of the Board with the Companies, an informal mission was undertaken by Lord Inchcape to reconcile differences. Various changes were introduced during the years 1912-1920 such as the modification of the rule that the President and members of the Railway Board should all be men of large experience in the working of railways due to the importance of financial and commercial considerations in connection with the control of railway policy. This decision was, however, revised in 1920 and an additional appointment of Financial Adviser to the Railway Board created instead. The question of the most suitable organization was further fully examined by the Acworth Committee in 1921 and a revised organization which is described later was introduced on 1st April 1924.

Some Difficulties.—Some of the difficulties involved in the constitution of a controlling authority for the railways may be realized from a study of the "Notes on the Relation of the Government to Railways in India" which was printed as appendix 'B' to Volume I of the Annual Report by the Railway Board on Indian Railways upto the Report for the year 1938-39. These notes bring out the great diversity of conditions prevailing which involve the Railway Department in the exercise of the functions of—

(*a*) the directly controlling authority of the State-worked systems aggregating (at the time) 21,356 miles as on the 31st March 1943,

(*b*) the representative of the predominant owning partner in systems aggregating 19,169 miles,

(*c*) the guarantor of many of the smaller companies and

(*d*) the statutory authority over all railways in the country.

Moreover in all questions relating to railways or extra municipal tramways in which Provincial Governments were concerned, the Railway Department was called upon to watch the interests of the Central Government and was frequently asked to advise the Local Governments.

Its duties did not end there. The future development of railways depended largely on the Government of India and the Railway Department was therefore called upon to plan out schemes of development, to investigate and survey new lines and to arrange for financing their construction.

CHIEF COMMISSIONER

The evolution of a satisfactory authority for the administration of these varied functions proved extremely difficult and the question was one of those referred to the Railway Committee (1920-21) presided over by Sir William Acworth who recommended the early appointment of a Chief Commissioner of Railways whose first duty was to prepare a definite scheme for the reorganization of the Railway Department. C. D. M. Hindley, previously an Agent of the East Indian Railway and Chairman of the Calcutta Port Trust, was appointed Chief Commissioner on November 1st, 1922.

The principal constitutional change involved in this appointment was that the Chief Commissioner who took the place of the President of the Railway Board was solely responsible—under the Government of India—for arriving at decisions on technical matters and for advising the Government of India on matters of railway policy and was not, as was the President, liable to be out-voted and overruled by his colleagues on the Board. The detailed reorganization of the Railway Board in accordance with the Chief Commissioner's proposals required careful consideration but one of the most important of his recommendations namely the appointment of a Financial Commissioner was considered of particular urgency and the Secretary of State's sanction was therefore obtained to the appointment with effect from 1st April 1923.

The Railway Board as then reconstituted consisted of the Chief Commissioner, the Financial Commissioner and two members. The proposal of the Acworth Committee that the Indian Railways should be sub-divided into 3 territorial divisions with a Commissioner in charge of each was not accepted and the work of the Members of the Board was divided on the basis of subjects.

The reorganization carried out in 1924 had for one of its principal objects the relief to the Chief Commissioner and the Members from all but important work so as to enable them to devote their attention to larger questions of railway policy and to enable them to keep in touch with Local Governments, railway administrations and public bodies by touring to a greater extent than they had been able to do in the past.

This object was effected by a series of new posts which in some cases supplemented the existing ones and in other cases replaced them —Directors of Civil Engineering, Mechanical Engineering, Traffic, Establishment and Finance and 11 Deputy Directors and 2 Assistant Directors.

SUBSIDIARY BODIES

The necessity of some central organisation to co-ordinate the publicity carried out on railways and to undertake work on the many forms of railway publicity which could be best organised by one central body led to the inauguration of the Central Publicity Bureau under a Chief Publicity Officer in 1927. The Bureau was a great success and the organisation was made permanent from January 1st, 1929. In the slump which came in the thirties however, it was found difficult to maintain the organisation. The war of 1939 also presented its own problems. The Central Publicity Bureau was ultimately shifted to Calcutta on 1st July, 1940, and amalgamated with the Publicity Offices of the East Indian and Eastern Bengal (now the B. & A.) Railways.

The growing importance of labour questions necessitated the organisation of a new branch in the Railway Board's office and to the appointment in 1929 of a third member whose main duties were connected with the satisfactory solution of labour problems and the improvement of the conditions of service of the staff generally and of the lower paid employees in particular.

During the economic depression of the thirties it was decided to hold in abeyance many superior posts including those of Member, Traffic; Member, Engineering; Director, Civil Engineering and Director, Mechanical Engineering. Some of these posts have since been revived and on the recommendations of the Indian Railway Enquiry Committee—presided over by Sir Ralph Wedgewood—the Central Accounts organisation of railways was taken over by the Railway Board. The present superior staff in the Railway Board, therefore, consists of the Chief Commissioner, the Financial Commissioner, 3 Members, 12 Directors (including Joint Directors), a Secretary and 26 Deputy Directors and assistants.

Under the Railway Board's policy of progressive standardisation, a Central Standardisation Office (now called Central Standards Office) was established in 1930 under a Chief Controller of Standardisation to provide the means whereby such standardisation would be progressively effected in accordance with changing conditions and as the result of practical experience. The technical Officer under the Railway Board was transferred to this office as a Deputy Controller. This office was made permanent in 1935.

ACCOUNTS

The transfer of the supervision of railway accounts of State Railways from the Finance Department to the Railway Board began in accordance with a resolution adopted by the Legislative Assembly in September 1925: with the transfer of the supervision of railway accounts on the East Indian Railway. At the same time a separate Audit Staff was appointed reporting directly to the Auditor-General. As it was found that the separation of Audit from Accounts led to greater efficiency, a similar organisation was introduced on other State-managed railways during 1929. The supervision of Accounts Officers was placed under a Controller of Railway Accounts reporting to the Financial Commissioner of Railways and that of Audit Officers under a Director of Railway Audit reporting to the Auditor-General. These two duties were previously combined under the Accountant-General, Railways, reporting to the Auditor-General. The Chief Accounts Officers on railways are now under the General Managers and the Controller of Railway Accounts has been made a Director under the Railway Board.

There are two important systems of administration organisation, on the Railways—the Divisional system and the Departmental system. In the divisional system the railway is divided into divisions, each under a Divisional Superintendent, who in turn has officers of all departments like Civil Engineering, Transportation, Commercial, Accounts, Stores, the running and operation portion of Mechanical Engineering and on some railways even the Medical, working under him in his division. In the departmental system the railway is divided into smaller portions called districts by each department (and districts of the various departments need not be co-terminus) and each of these districts is under a District Officer reporting direct to the head of his department in the Headquarters Office.

A Clearing Accounts Office, with a Statutory Audit Office attached thereto, was opened in December 1926 to take over work relating to the check and apportionment of traffic interchanged between State-managed Railways. The work of the different railways was gradually transferred to this office, the North-Western Railway being taken over first on the 1st January 1927, the East Indian Railway following on the 1st April, the Eastern Bengal Railway on the 1st January 1928, and the Great Indian Peninsula and B. B. & C. I. Railways later.

In order to facilitate the adjustment of domestic questions, the Railway Conference was instituted as early as 1876. This Conference was consolidated into a permanent body in 1903 under the title of the Indian Railway Conference Association. It is under the direct control of the railways, it elects a President from among the members, and has generally done much useful work.

THE GAUGES

The standard gauge is five feet six inches. When construction was started the broad-gauge school was strong, and it was thought advisable to have a broad-gauge in order to resist the influence of cyclones. But in 1870, when the State system was adopted it was decided to find a more economical gauge, for the open lines had cost £17,000 a mile. After much deliberation, the metre-gauge of 3 feet 3⅜ inches was adopted, because at that time the idea of adopting the metric system for India was in the air. The original intention was to make the metre-gauge lines provisional; they were to be converted into broad-gauge as soon as the traffic justified it; consequently they were built very light. But the traffic expanded with surprising rapidity, and it was found cheaper to improve the carrying power of the metre-gauge lines than to convert them to the broad-gauge. So, except in the Indus Valley, where the strategic situation demanded an unbroken gauge, the metre-gauge lines were improved and they became a permanent feature of the railway system.

Now there is a great metre-gauge system north of the Ganges connecting Assam with Rajasthan lines and Saurashtra and another system in Southern India serving large tracts of the Bombay, Madras, Hyderabad, Mysore and Travancore-Cochin States. These two systems are not yet connected, but the necessary link from Khandwa by way of the Nizam's State Railway, cannot be long delayed.

Certain feeder and hill railways have been constructed on the 2'-6" and 2'-0" gauges and since the opening of the Barsi Light Railway which showed the possible capacity of the 2'-6" gauge, there has been a tendency to construct feeder lines on this rather than on the metre-gauge.

RAILWAY MANAGEMENT

The relative advantages and disadvantages of State and Company management of the railways owned by Government which comprise the great bulk of the railway mileage in the sub-continent were the subject of discussion in official circles and the public press for many years. Here the question was complicated by the fact that the more important companies had not been the owners of the railways which they managed and the headquarters of their Boards were in London.

The subject was perhaps the most important of the terms of reference of the Acworth Railway Committee. That Committee was unable to make a unanimous recommendation on this point, their members being equally divided in favour of State management and Company management. They were, however, unanimous in recommending that the system of management by Boards of Directors in London should not be extended beyond the terms of the existing contracts and this recommendation met with general public acceptance. During the year 1922-23, the question was again referred to certain Local Governments and public bodies and opinions collected and discussed.

The subject was also discussed on many occasions in the Central Legislature. The old undivided Government of India, however, followed a uniform policy of increasing the scope of direct State-management. The East Indian Railway was taken over for State-management on 1st January, 1925, and from then on the policy continued, the latest additions to State-management being the Bengal and North-Western and Rohilkund and Kumaon Railway which were taken over on the 1st January 1943. From the same date the two were amalgamated and the combined system named as the Oudh and Tirhut Railway.

At the end of 1929-30 the Nizam's Guaranteed State Railways system which was the property of a Company, was acquired and its management taken over by the Nizam's Government and was renamed His Exalted Highness the Nizam's State Railway.

SEPARATE FINANCES

The question of the separation of the railway from the general finances had been under consideration for some time and as a result of the recommendations of the Acworth Committee in 1921, the question was further examined by the Railway Finance Committee and the Legislative Assembly but it was decided to postpone a definite decision.

The question was examined afresh in connection with the recommendation of the Retrenchment Committee in 1923, that the railways should be so worked as to yield an average return of at least 5½ per cent on the capital at charge and it was decided that a suitable time had arrived when this separation could be carried out. A resolution was accordingly introduced in the Assembly in March 1924, recommending to the Governor-General in Council:—that in order to relieve the general budget from the violent fluctuations caused by the incorporation therein of the railway estimates and to enable the railway to carry out a continuous railway policy based on the necessity of making a definite return over a period of years to the State on the Capital expended on railways:—

(1) The railway finances shall be separated from the general finances of the country and the general revenues shall receive a definite annual contribution from railways which shall be the first charge on railway earnings.

(2) The contribution shall be a sum equal to five-sixths of 1 per cent. on the capital at charge of the railways (excluding capital contributed by Companies and Indian State and Capital expenditure on strategic Railways) at the end of the penultimate financial year *plus* one-fifth of any surplus profits remaining after payment of this fixed return, subject to the condition that if any year railway revenues are insufficient to provide the percentage of five-sixths of 1 per cent. on the capital at charges surplus profits in the next or subsequent years, will not be deemed to have accrued for purposes of division until such deficiency has been made good. From the contribution so fixed will be deducted the loss in working, and the interest or capital expenditure on strategic lines.

(3) Any surplus profits that exist after payment of these charges shall be available of the Railway administration to be utilised in—

(*a*) forming reserves for,

(*i*) equalising dividends, that is to say, of securing the payment of the percentage contribution to the general revenue in lean years,

(*ii*) depreciation,

(*iii*) writing down and writing off capital,

(*b*) the improvement of services rendered to the public,

(*c*) the reduction of rates.

(4) The railway administration shall be entitled, subject to such conditions as may be prescribed by the Government of India, to borrow temporarily from capital or from the reserves for the purpose of meeting expenditure for which there is no provision or insufficient provision in the revenue budget subject to the obligation to make repayment of borrowings out of the revenue budgets of subsequent years.

(5) In accordance with present practice the figures of gross receipts and expenditure of railways will be included in the Budget Statement. The proposed expenditure will, as at present, be placed before the Legislative Assembly in the form of a demand for grants and on a separate day or days among the days allotted for the discussion of the demands for grants the Member in charge of the Railways will make a general statement on railway accounts and working. Any reductions in the demand for grants for railways resulting from the votes of the Legislative Assembly will not ensure to general revenues, *i.e.*, will not have the effect of increasing the fixed contribution for the year.

(6) The Railway Department will place the estimate of railway expenditure before the Standing Finance Committee for Railways on some date prior to the date for the discussion of the demand for grants for railways.

STANDING FINANCE COMMITTEE

This resolution was examined by the Committee appointed by the Legislative Assembly in March 1924 to examine the proposals for the separation of railway from general finances. The final resolution agreed to by the Assembly in September 1924, and accepted by Government differed from the original resolution in that the yearly contribution was placed at 1 per cent. instead of 5/6th per cent. on the capital at charge and if the surplus remaining after this payment to General Revenues should exceed 3 crores only; of the excess over 3 crores were to be transferred to the Railway Reserve and the remaining ⅓rd was to accrue to General Revenues.

At the same time a Standing Finance Committee for Railways was to be constituted to examine the estimate of railways expenditure and the demand for grants, the programme revenue expenditure being shown under a depreciation fund. This committee was to consist of one nominated official member of the Legislative Assembly as Chairman and 11 members elected by the Legislative Assembly from that body. This would be in addition to the Central Advisory Council which would include the Members of the Standing Finance Committee and certain other official and non-official members from the Legislative Assembly and Council of State.

These arrangements were to be subject to periodic revision but to be provisionally tried for at least 3 years. They would, however, only hold good as long as the E. I. Railway and the G. I. P. Railway and existing State Managed Railways remained under State-management and if any contract for the transfer of any of the above to Company management was concluded against the advice of the Assembly, the Assembly would be at liberty to terminate the arrangements in this resolution.

The Assembly in an addendum recommended that the railway services and the Railway Board should be rapidly Indianised and that the stores for the State Managed Railways should be purchased through the organisation of the Indian Stores Department.

The principal allocation of surplus laid down in the above resolution was later amended by a subsequent resolution passed by the Legislative Assembly in March 1943 which provided, *inter alia* that from 1st April 1943 so much of the convention as provided for the contribution and allocation of surplus to general revenues ceased to be in force and until a new Convention was adopted by the Assembly, the allocation of the surplus on commercial lines between the railway reserve and general revenues should be decided each year on consideration of the needs of the railways and general revenues, the loss, if any, on strategic lines being recovered from general revenues.

THE POPE COMMITTEE

The growing complexity of railway administration and the evolution of new methods of controlling traffic have given a stimulus to the efforts of various railways to revise their organisations. The general direction in which this reorganisation is being considered is that of consolidation into one department of the operating or transportation work of the railways, including the provision of power. This system is invariably in existence on those railways which have adopted the Divisional organisation. It is also being adopted by some railways where the general organisation is still on the Departmental basis.

When the railway finances were in a bad way, a Committee under the Chairmanship of F. A. Pope, General Executive Assistant to the President of the L. M. S. Railway, was formed to investigate and inaugurate a detailed analysis of every important achievement of railway operation. The Committee started work during 1932-33 and among other things, perfected a system of detailed investigation into individual items of railway working which came to be known as 'Job Analysis.'

Mr. Pope returned to India in 1933-34 and prepared a second report based upon the progress of the work and on further possibilities of economy.

The most important recommendations of the second report related to :—

1. Intensive use of locomotives. 2. Intensive use of coaching stock. 3. Intensive use of machinery and plant. 4. Disposal of uneconomical wagons. 5. Combining resources between railways. 6. Handling and transport of small traffic and of traffic to be transhipped at break of gauge stations. 7. Ticketless travel. 8. Methods of increasing earnings.

As a result of the 1st report of the Pope Committee, special 'Job Analysis' Organisations were set up on most of the important Railways. Their main purpose was to investigate in detail by special methods individual aspects of railway working and suggest means whereby economies might be achieved or the efficiency of operation increased.

When the methods of working on the railways were overhauled these organisations were abolished.

KUNZRU REPORT

The Kunzru Report was released on 19th March 1950 along with the Government of India's comments. The report was thorough and painstaking and touched every aspect of the situation. The Government accepted most of the recommendations concerning technical and reorganizational points but rejected two of the main recommendations, namely, to close down the grain shops and to postpone reorganization of Indian railways for five years.

The report was concerned in all with 155 items of which 58 concerned individual railway administrations while the rest, 97, involved the initiation of action by the Railway Board. The recommendations of the Committee applied among others to the following questions :

Rationalization of administration, improvement of operational and technical efficiency, research, promotion of cordial relations between management and employees, and the administration and the public, abolition of the railway grain shops organization, postponement of reorganization of railways for five years, shortage of passenger coaches, experiments on the behaviour of all-steel coaches, central workshops for the production of all-steel coaches, the high percentage of wagons immobilized for repairs, policy in respect of replacement of locomotives, modification of the Pacific type of locomotive, elimination of wagon delay, job analysis of workshops to find the extent of surplus staff, the speed with which grievances are dealt with, personal contact between men and officers, delay in the issue of passes, sanction of leave, spreading of literacy among railway workers, electrification of railways and the introduction of electrification into the Calcutta suburban railway, punctuality and speed of passenger trains, enhancement of fares on the suburban trains, co-ordination of rail-road and rail-water transport and the development of inland waterways.

SHROFF COMMITTEE REPORT

Th Railway Stores Enquiry Committee (under the chairmanship of Mr. A. D. Shroff) appointed in September 1950 reported to Government in April 1951. A summary of the recommendation (given below) was published on June 18, 1951.

The findings of the Committee seem—in summary—to be strongly critical of the present system of stores purchase and usage, particularly in view of the fact that expenditure on stores represents roughly one-third of the annual revenue and capital budget of the railways.

In 1949-50 this figure was Rs. 86 crores, while during the financial year 1950-51 the closing balances under Stores had risen from Rs. 36 to Rs. 46 crores.

The recommendations of the Committee will result in "substantial" and "immediate" economies which will increase in time as a more even and balanced flow of supplies of requisite standardised quality begins to reach the railways.

The scheme for rationalisation includes the establishment of a high-powered central stores organisation under the Railway Board.

According to official figures already published, of the total value of stores of Rs. 81·59, Rs. 100·44 and Rs. 86 crores purchased in the last three years a growing amount of Rs. 7·59, Rs. 14·43 and Rs. 19·42 crores respectively, has been given to purchasing stores from abroad.

The Committee expresses the view that the present arrangements for obtaining supplies of railway stores, through agencies working under Ministries other than the Railway, introduces unhealthy features in the running of railways.

After assessing the position in all its aspects, the Committee recommends that the present arrangement should be radically altered and the responsibility for obtaining supplies of items peculiar to railways and for which there were no other users in India as also of other items vital for uninterrupted workshop production and efficient railway operation should be placed on the railways themselves, the remaining common-user items being obtained through existing Government agencies.

Target Reduction

In order to attain an effective reduction in stores balances, the Committee has proposed a target reduction of Rs. 10 crores by the end of the current year. Immediate action has also been proposed for the liquidation and better utilisation of heavy stocks on some railways.

The Committee urges that greater attention should be paid to standardisation of the large numbers of stores and equipment in general use on railways, as also to the curtailment of the multiplicity of non-standard forms and books.

The Committee recommends substantial expansion of research facilities on railways by making available to potential manufacturers results of their research and also by providing tests and laboratory facilities which cannot be normally provided by individual manufacturers.

In selecting alternatives for purchases the Committee stresses that considerations of utility, usage and lasting quality of different brands must be taken into account.

The Committee also recommends a technical examination of the existing workshop capacity to increase the range of manufactures to include items of stores and spare parts, at present, imported from abroad.

There is in fact considerable scope for meeting a part of the imported supplies from indigenous production in the railway workshops and outside.

Government have already issued instructions for implementing these recommendations to the railways which have begun to submit returns of stocks of all categories in excess of 12 months' requirements. Action is to be taken on the basis of these returns to remove the imbalance as between the railways and for the disposal of stocks not required.

Mr. Santhanam, then Minister of State for Railways, who spoke about the report said that the 1952-53 rolling stock programme for Indian railways was estimated to cost over Rs. 41·78 crores, of which over Rs. 26·22 crores was expected to be spent in India and the rest abroad.

This programme, which was approved recently by the Standing Finance Committee included provision for a total of 227 locomotives, of which 157 were expected to be produced in India and 70 would be purchased abroad.

Coaching stock was the largest item on the programme and expenditure on passenger carriages accounted for almost Rs. 18·5 crores. One thousand four hundred carriages of various types and gauges had been included and of this number, over 1,000 would be manufactured in India, the remaining 380 being obtained from abroad.

Of about 9,000 wagons included in the programme, nearly 7,000, most of them broad-gauge, would be manufactured in India, and the remaining 2,000, mainly metre gauge and narrow-gauge, would be obtained from abroad.

POSTS AND TELEGRAPHS

THE control of the Posts and Telegraphs of India is vested in an officer designated Director-General of Posts and Telegraphs whose office is attached to the Ministry of Communications of the Government of India. For financial and budget matters there is a Joint Secretary, Ministry of Finance (Communications). The superior staff of the Directorate in addition to the Director-General himself, consists on the postal side of one Senior Deputy Director-General, 3 Directors, 4 Assistant Directors-General and 4 Assistant Deputy Directors-General.

For postal purposes, India is divided into ten circles, namely, West Bengal, Bihar, Bombay, Central, Madras, Punjab, Uttar Pradesh, Assam, Orissa and Delhi. Each of the first seven is in charge of a Postmaster-General and the Assam and Orissa Circles are controlled by a Director, Posts and Telegraphs. The Delhi circle is controlled by a Director of Postal Services. The Central Circle comprises roughly the Madhya Pradesh, the Rajasthan, Madhya Bharat and Vindhya Pradesh Unions.

The Postmasters-General and D.S.P. & T., are responsible to the Director-General for the whole of the postal arrangements in their respective circles, including those connected with the conveyance of mails by railways, inland steamers, and air services. All the Postmasters-General are provided with Directors of Postal Services, Assistant Postmasters-General and Assistant Directors while in the Assam and Orissa Circles the Director is assisted by a Deputy Director and an Assistant Director. The Postal Circles are divided into Divisions, each in charge of a Superintendent of Post Offices or Railway Mail Service as the case may be and each Superintendent is assisted by a certain number of officials styled Inspectors.

Generally there is a head post office at the headquarters of each revenue district and other post offices in the same district are usually subordinate to the head office for purposes of accounts. The Presidency Postmasters of the Calcutta, Bombay and Madras General Post Offices, are directly under Directors of Postal Services. When the duties of the Postmaster of a head office become so onerous that he is unable to perform them fully himself, a Deputy Postmaster is appointed to relieve him of some of them, and if still further relief is required, one or more Assistant Postmasters are employed.

The more important of the offices subordinate to the head office are designated sub-offices and are usually established only in towns of some importance. Sub-offices transact all classes of postal business with the public, submit accounts to the head offices to which they are subordinate incorporating therein the accounts of their branch offices, and frequently have direct dealings with Government local sub-treasuries. The officer in charge of such an office works it either single-handed or with the assistance of one or more clerks according to the amount of business.

Branch offices are small offices with limited functions ordinarily intended for villages, and are placed in charge either of departmental officers on small pay or of extraneous agents, such as school-masters, shop-keepers, land-holders or cultivators who perform their postal duties in return for a small remuneration.

The audit and accounts work of the Post Office is entrusted to the Accountant-General, Posts and Telegraphs, who is an officer of the Indian Audit Department and is not subordinate to the Director-General. The Accountant-General is assisted by Deputy Accountant-General, all of whom, with the necessary staff of clerks, perform at separate headquarters the actual audit and accounts work of a certain number of postal circles.

In accordance with an arrangement which has been in force since 1883, a large number of sub-post offices and a few head offices perform telegraph work in addition to their postal work and are known as combined offices. The policy is to increase telegraph facilities everywhere and especially in towns by opening a number of cheap telegraph branches of sub-post offices.

INLAND TARIFF

Inland Tariff is applicable to Aden, Pakistan, Nepal, Ceylon and Portuguese India except as ndicated below and is as follows :—

	When the postage is prepaid	When the postage is wholly unpaid	When the postage is insufficiently prepaid
Letters	Annas Pies		
Not exceeding one tola	2 0		
And every additional tola	1 0		
Book and pattern packets.			
For the first five tolas or fraction thereof	0 9	Double the pre-paid rate (chargeable on delivery)	Double the deficiency (chargeable on delivery)
For every additional two and a half tolas, or fraction thereof, in excess of five tolas	0 3		

Letter-cards Annas Pies

Letter-card 1 6

(Letter-cards are restricted to inland transmission only, and hence cannot be sent to Aden, Ceylon, Nepal, Pakistan or Portuguese India.)

Post-cards

Single .. .. .. 9 pies

Reply .. .. .. 1½ annas

(The postage on cards of private manufacture must be prepaid in full. Reply post-cards cannot be sent to Nepal.)

Local : post-cards .. .. .. 6 pies

Parcels (prepayment compulsory)

Parcels not exceeding 12½ seers (1,000 tolas) in weight :—

Rs. a.

Not exceeding 40 tolas 0 6

For every additional 40 tolas or part of that weight 0 6

Registration is compulsory in the case of parcels weighing over 440 tolas.

All parcels to Aden and Pakistan should be registered. There is no parcel service to Nepal. These rates are not applicable to parcels for Ceylon and Portuguese India.

Registration fee Rs. a.

For each letter, letter-card, post-card, book or pattern packet, or parcel to be registered 0 4½

Ordinary Money Order fees

Amount specified for remittance to sender :

Rs. a.

Not exceeding Rs. 5 .. .. .. 0 2

Exceeding Rs. 5 but not exceeding Rs. 10 0 3

Exceeding Rs. 10 but not exceeding Rs. 15 0 4

Exceeding Rs. 15 but not exceeding Rs. 25 0 6

Exceeding Rs. 25.

Six annas for each complete sum of Rs. 25 and six annas for the remainder, provided that, if the remainder does not exceed Rs. 5 the charge for it shall be only two annas, if the remainder does not exceed Rs. 10 the charge for it shall be only three annas and if the remainder does not exceed Rs. 15 the charge for it shall be only four annas.

In the case of money orders for Ceylon and Portuguese India, the rates prescribed for foreign rupee money orders are applicable. There is no money order service to Nepal.

Telegraphic Money Order fees.—The same as the fees for ordinary money orders *plus* a telegraph charge calculated at the rates for inland (the cost of the telegraphic advice to Aden and Ceylon in respect of those countries) telegrams for the actual number of words used in the telegram advising the remittance, according as the telegram is to be sent as an "Express" or as an "Ordinary" message. In addition to the above a supplementary fee of two annas is levied on each telegraphic money order.

There is no telegraphic money order service to Nepal or Portuguese India. In the case of Ceylon the telegraph charge is calculated at the rates shown below :—

Express.—Rs. 2-8-0 for the first 12 words and 3 annas for each additional word.

Ordinary.—Re. 1-4-0 for the first 12 words and 2 annas for each additional word.

V.P. Articles.—All inland V.P. articles excepting V. P. Packets and also V. P. letters containing articles of no intrinsic value such as Railway receipts, bills of lading, invoices, etc., on which the amount specified for recovery exceeds Rs. 25 are required to be compulsorily insured for at least the actual amount required to be recovered from the addressee. The sender of a V.P. article will also be required to pay a posting fee at the following scale in addition to the postage, registration fee and insurance fee where leviable. V.P. articles so insured should conform to all the rules governing inland insured articles.

(*i*) Posting fee of 1 anna when the amount required to be recovered from the addressee is Rs. 25 or less.

(*ii*) Posting fee of 2 annas when the amount required to be recovered from the addressee exceeds Rs. 25.

The total charges to be paid by the senders of V.P. articles will thus be :—

(*a*) For V.P. articles on which the amount specified for recovery does not exceed Rs. 25—

(*i*) Postage at the letter, packet or parcel rate as the case may be ;

(*ii*) Registration fee of 4½ annas ;

(*iii*) Posting fee of 1 anna ;

(*iv*) Insurance fee in case the article is insured.

(*b*) For V. P. articles on which the amount specified for recovery exceeds Rs. 25—

(*i*) Postage at letter, packet or parcel rate as the case may be ;

(*ii*) Registration fee of 4½ annas ;

(*iii*) Posting fee of 2 annas ;

(*iv*) Insurance fee according to value insured except for V.P. Packets and for V.P. letters containing articles of no intrinsic value (in the case of V.P. Parcels insurance is compulsory at least for the value-specified for recovery).

Insurance fees.

The scale of fees chargeable for the insurance of all inland postal articles, and for the insurance of letters and parcels to Aden or Ceylon and of letters to Portuguese India is as follows :—

Rs. a.

Whether value insured does not exceed Rs. 100 .. .. 0 4

For every additional Rs. 100 or fraction thereof over Rs. 100 upto Rs. 5,000 .. 0 2

The maximum value for which an article can be insured is Rs. 5,000.

As regards Aden, Ceylon and Portuguese India see Foreign Tariff.

Acknowledgment fee.—For each registered or insured article 1 anna.

Multiple Address Telegrams.—Multiple address telegrams with identical messages may be sent to two or more addresses in the same delivery area on payment of a supplementary fee of annas four for hundred words or less for every copy beyond the first.

Reply Paid Telegrams.—A reply may be prepaid to any inland telegram but the amount so paid should not be less than the minimum charge for ordinary telegram. The sender should write the words "Reply Paid" when the minimum charge is prepaid or "Reply Paid" followed by the amount if more than the minimum charge is paid.

Express Telegrams

Arrangements are made for telegrams to receive priority in transmission and delivery on payment of double the charges for ordinary telegrams.

Phonocom Service

"Phonocom Service" means an inland telegram written in certain Indian language and accepted at certain specified telegraph offices for transmission to destination over new telephone system. These telegrams are charged at inland express rates. "Phonocom Service" is at present available in the following Indian language and between the telegraph offices specified against them :—

Language	*Between Telegraph Offices.*
Gujarati	Bombay and Ahmedabad.

Such telegrams are accepted at inland express rates.

Priority Human Life Telegrams.—With effect from 1st November 1950, a special class of priority telegrams relating to human life in road, railways, fire, floods, electrocution, building collapse, factory, etc., etc., accidents and to serious illness or death of a person are accepted at inland express rates provided they bear the indication "PTY" written by the sender immediately before the address of the telegrams.

These telegrams obtain priority in transmission over all express and urgent telegrams.

Greetings Telegrams

Greeting telegrams at specially reduced rates may be sent on the following festive occasions from or to any Telegraph Office in India and Jammu & Kashmir State but not Licensed (Railway and Canal) and Portuguese Government Telegraph offices :—

(1) New Year
(2) Christmas
(3) Diwali
(4) Birthday
(5) Id
(6) Conferment of title
(7) Marriage
(8) Examination
(9) Bijoya
(10) Journeys
(11) Elections
(12) Acknowledgment for greetings
(13) Miscellaneous.

These greetings telegrams are sent out for delivery in specially printed pictorial forms and envelopes. If tendered on Sundays and Telegraph holidays and during the period when the booking of ordinary telegrams is suspended, they are accepted at Express rates and on payment of Late fees, when due.

The sender of a greeting telegram selects a suitable phrase from the list of stock phrases and writes it on an inland telegram form either in full or the corresponding number in words (not in numerals) and tenders the same to the telegraph office. The number denoted by the sender is signalled and at the office of destination the corresponding phrase is reproduced on the special form and delivered to the addressee.

The sender of a greeting telegram should write the words "Greetings telegram" in some conspicuous place on the telegram form.

A multiple greeting telegram is accepted at the rate specified above *plus* a copying fee of 4 annas for each address after the first.

Greetings telegrams are accepted by telephone for onward transmission but will not be delivered by telephone. If the address contains a telephone number, the telegram is delivered according to the address given against the number in the Telephone *Directory*.

Greetings telegram forms and envelopes are also available for sale in all Government Telegraph Offices at a cost of annas two a form and an envelope for transmission through the post as letters or as book packets if the conditions laid down in Clause 57(a) of the Post & Telegraph Guide, including the restriction about five words in manuscript, are fulfilled.

Number of words	Rate Express	Rate Ordinary
	Rs. a. p.	Rs. a. p.

Seventeen	.. Wish you both a happy and prosperous wedded life.
Eighteen	.. Kind remembrances and all good wishes for the Independence Day.
Nineteen	.. Sincere greetings for the Republic Day. Long live the Republic.
Twenty	.. My heartiest Holi greetings to you.

Inland De Luxe Telegrams.

Senders of Greetings telegrams to or from offices in India may use their own phraseology in such telegrams on payment of 2 annas in addition to the charge appropriate to the class of message (Express or Ordinary).

These telegrams will be delivered in specially printed artistic forms and envelopes.

This DE LUXE service is not applicable to telegrams for Burma.

The sender of a DE LUXE telegram should write before the address the special instruction "LX" which will not be charged for.

Hindi Telegrams

With the declaration of Hindi as the State language of India, transmission of telegrams in Hindi and other Indian languages in the Devnagri script (Press and Private) was introduced with effect from 1st June 1949.

In this service, telegrams in Hindi and other Indian languages written in the Devnagri script are transmitted by means of a special Hindi Morse Code devised by the Indian P. & T. Department. Greetings telegrams in standard texts in Hindi are also admitted.

It was made available at first in 1949 between Agra, Allahabad, Banaras, Gaya, Jabalpore, Kanpur, Lucknow, Nagpur and Patna. In 1950 it was extended to Ajmer, Bareilly, Indore, Jaipur, Muzaffarpur, New Delhi and Ranchi and in 1951 it was further extended to Belgaum, Bhusawal, Bombay, Calcutta, Poona and Sholapur.

The service is now available between the following 22 stations, *viz.* :—

Agra, Ajmer, Allahabad, Banaras, Bareilly, Bombay, New Delhi, Gaya, Indore, Jabalpore, Jaipur, Kanpur, Lucknow, Muzaffarpur, Nagpur, Patna, Ranchi, Bhusawal, Belgaum, Poona, Sholapur and Calcutta.

FOREIGN SERVICES

The International Telegraph Regulations were completely revised at the Conference of the International Telecommunication Union at Paris in 1949. The new Regulations have come into force from 1st July 1950, resulting in certain changes in the rates and conditions of services, *viz.*, CDE Telegrams, urgent CDE Telegrams, Deferred Telegrams (LC) and Greetings Telegrams (GTG and XLT) have been abolished and Night Letter Telegram (NLT) and Daily Letter Telegram (DLT) have been merged into a single class, *viz.*, Letter Telegram (LT). "Empire Social Telegram (GLT)" has been changed to "Commonwealth Social Telegram (GLT)."

Foreign Tariff

The charges for foreign telegrams vary with the countries to which they are addressed. The rates per word for telegrams to countries in Europe, America, etc., are as follows :—

	Ordy. Rs. a.	L.T. Rs. a.
Europe *via* I. R. C.—		
Great Britain and Northern Ireland	0 12	0 6
Ireland	0 12	0 6
Belgium	0 15	0 7½
Holland	0 15	0 7½
Germany	1 0	0 8
Switzerland	1 0	0 8
Spain	1 2	0 9
France	0 15	0 7½
Italy, City of the Vatican	1 1	0 8½
Norway	1 0	0 8
Bulgaria	1 2	0 9
Russia	1 1	0 8½
Turkey	1 1	..
Czechoslovakia	1 1	0 8½
Union of South Africa and S. W. Africa	0 12	0 6
Canada (all Zones) ..	0 12	0 6
United States of America	1 3	0 9½
South America :		
Argentina	2 8	1 4
Brazil	2 4	1 2
Chile	2 8	1 4
West Indies :		
Jamaica	0 12	0 6
Havana	1 13	0 14½

Telegrams are accepted at all Government Telegraph Offices.

Usual rules apply regarding Registration of abbreviated addresses, etc.

Full lists published in Post and Telegraph Guide.

Foreign Services Available

Ordinary telegrams may be expressed in plain or secret language or any combination of them. There will be a minimum charge as for five words to any destination beyond India, Burma, Pakistan and Ceylon.

Urgent telegrams are accepted on similar conditions as above but are charged for at double the rate for ordinary telegrams.

Letter telegrams are accepted in plain language only and charged for at half the rate for ordinary telegram subject to the minimum charge as for 22 words. Both private, individual and Government Official can send such telegrams. They are delivered on the morning of the day following the day of booking.

Radio Telegrams

For radio-telegrams addressed to ships at sea from offices in India and transmitted *via* the coast stations at Bombay, Calcutta or Madras the charge is thirteen annas per word (ordinary) in nearly all cases.

The following are the charges (excluding supplementary charges) for radio-telegrams from offices in India transmitted to ships at sea through the coast stations mentioned in the preceding paragraph :—

	Total charge per word. Ordinary. Rs. a.
(1) All Government or Private Radio-telegrams, excepting those mentioned in (2) and (3) below ..	0 13
(2) Radio-telegrams to British Ships of War or Ships of the Indian Navy	0 8
(3) Radio-telegrams to Spanish or Swedish ships ..	0 12

All radio-telegrams in secret language (code or cypher) are chargeable at the same rates as those in plain language.

The sender of a radio-telegram may prepay a reply. He must insert before the address, the instruction "R.P." followed by mention in Rupees and annas of the amount prepaid, *e.g.* R.P. 7-8. This expression counts as one word.

The following Services are not admitted in radio-telegrams :—

(*a*) Telegraphic money orders.
(*b*) Telegrams to follow the addressee.
(*c*) Paid Service telegrams asking for a reply by post or for repetition or for information, except as regards transmission over the ordinary telegraph system.
(*d*) Urgent telegrams, except as regards transmission over the telegraph systems of those Administrations which accept such telegrams.
(*e*) Letter telegrams.
(*f*) Greetings telegrams or other telegrams at reduced rates.
(*g*) Telegrams without text.
(*h*) Radio-maritime letters.
(*i*) Press telegrams.
(*j*) Collated radio-telegrams.
(*k*) Radio-telegrams to be delivered to the addressee in person.
(*l*) Radio-telegrams to be delivered in an open cover.

Commonwealth Social Telegrams

Commonwealth Social Telegrams (GLT) conveying solely greetings, family news or non-commercial personal affairs can be availed of throughout the year at special reduced rates, for all Commonwealth countries except Sudan.

Commonwealth Social Telegrams (GLT) for the purpose of transmission and delivery to a territory or place to which the service is available is deferred and delivered on the second day following the day of acceptance or as soon as possible thereafter. Minimum charge for a Commonwealth Social Telegram is Rs. 3-12 for the first 10 words (excluding the Special Instruction (GLT) which will not be charged) and 6 annas for every additional word.

The only Special Services admitted in Commonwealth Social Telegrams are "Reply Paid" and "De Luxe."

De Luxe Telegrams

Telegrams relating to happy events or greetings may be sent to certain foreign countries for delivery on an artistic form in an envelope of the same character. A supplementary charge of four annas per telegram in addition to the charge at the appropriate rate according to the class (*i.e.*, Urgent, Ordinary, LT., etc.), is charged for such telegrams.

Phototelegrams

Phototelegrams are accepted at all large telegraph offices in India for Great Britain, U.S.A. (New York), San Francisco, Australia, Egypt, Montreal (Canada) and Union of South Africa in rectangular shape bearing an address written on ordinary foreign telegram form or on the phototelegram forming part of the phototelegram to be transmitted. Phototelegrams are charged according to chargeable number of square centimetres shown below :—

Area in sq. centimetre	From India to Great Britain: Press	Private	Government	All classes	From India to U.S.A.
	Rs. a.	Rs. a.	Rs. a.	Rs. a.	
0—150 ..	40 8	67 8	33 12	95 4	
151—250 ..	54 0	87 12	43 14	142 14

451—575.. ..	141 12	222 12	111 6

The following special services are admitted in phototelegrams :—

X address	TMx
X copies in addition to the first to be delivered to the addressee ..	Kx

Reply paid telegrams—The service indication "RP....."(amount) is to be inserted by the sender before the address of destination. The charge paid for reply must not be less than the minimum charge for ordinary telegrams.

Cancellation of outward telegrams is entertained before transmission of the telegram to the next telegraph office. The charge for the telegram is refunded less a fee of 12 annas except in the case of press telegrams.

Press telegrams are accepted at reduced rates to registered newspaper, news agencies and so on. The minimum charge is made as for 10 words.

Urgent Press telegrams are charged at same rates as for ordinary full rate telegrams except for Commonwealth countries for which the charges are equal to half the charges for ordinary telegrams. The minimum charge is made as for 10 words.

GROWTH OF TELEGRAPHS

At the end of 1897-98 there were 50,306 miles of line and 155,088 miles of wire and cable. Compared to this, there were about 110,283 miles of line including cable and 1,435,123 miles of wire including conductors on the 31st March 1951. The number of departmental telegraph offices were 257 and 86 respectively, while the number of combined Post and Telegraph offices rose from 1,634 to 3,506 in 1951. The decrease in the number of departmental Telegraph offices is due to the conversion of these offices into combined Posts and Telegraph offices.

The increase in the number of paid telegrams dealt with is shown by the following figures :—

		1897-98.	1950-51.
Inland	Private ..	4,107,270	20,448,167
	State ..	860,382	2,612,872
	Press ..	35,910	166,039
Foreign	Private ..	735,679	4,571,816
	State ..	9,896	56,879
	Press ..	5,278	64,279
		5,754,415	27,920,052

The outturn of the workshops during 1950-51 represented a total value of Rs. 2,09,00,000.

The number of messages handled during the year 1950-51 by departmental wireless stations in India was nearly 585,000.

On 31st March 1951, there were 3,700 exchanges and 168,397 Telephones operated by the department and licensed systems. About 7.1 million trunk telephone calls were handled during the year 1950-51.

The total interest bearing capital outlay of the Indian Posts and Telegraphs Department upto the end of the year 1950-51 was over Rs.49 crores. The receipts for the year ended 31st March 1951 amounted to Rs. 36,14,04,366 and charge (including interest on capital outlay) to Rs. 32,11,82,038, the result being a net gain of Rs. 4,02,22,928.

FOREIGN TARIFF

Foreign-Tariff is not applicable to Aden, to Ceylon, to Nepal, to Pakistan or to Portuguese India except as indicated below and is as follows:—

Letters.—To Aden, Pakistan, Ceylon, Nepal and Portuguese India—Indian inland rates.

To all other countries { 4 annas for the first ounce and 2½ annas for each additional ounce or part of that weight.

Post-cards, Single .. .. ..2½ annas.

	Annas
Where the value insured does not exceed Rs. 460	12
For every additional Rs. 460 or fraction thereof	12

Note.—Insurance service to Burma and British Somaliland has been temporarily suspended.

For insurance of letters and parcels to Great Britain and Northern Ireland and to British Possessions and foreign countries (other than those mentioned above) to which insurance is available.

	Annas
Where the value insured does not exceed £35	12
For every additional £35 or fraction thereof	12

Acknowledgment fee.—3 annas for each registered article. 1 anna in the case of registered article addressed to Aden, Ceylon or Portuguese India.

AIR MAILS

Letters, Letter-cards, Post-cards and Money Orders are, as a general rule, sent by air wherever air transmission is available and is advantageous without payment of any special air surcharge. Packets and Parcels can be sent by air in the inland post and letters, post-cards and packets can be sent by air to all foreign countries for which an air mail service is available on payment of special air mail fee. Such articles can be registered. Insured letters are carried at present by air mail in the inland post only. The inland air fee for packets is half anna for each tola or part thereof in addition to ordinary postage.

For Air Fees to Foreign Countries see the Post and Telegraph Guide.

Registered and unregistered parcels can also be sent by air mail in the inland service. The charges are 10 annas for every 20 tolas or fraction thereof inclusive of ordinary postage. A registration fee of 4½ annas has to be paid in addition in the case of registered parcels. Air Parcel service to foreign countries is not available except to Ceylon and to Afghanistan. There is a uniform rate of Rs. 2 per lb. for air parcels to Ceylon, while for air parcels to Afghanistan there is a varying scale of charges which can be ascertained from the Foreign Post Directory Section of the P. & T. Guide.

Concessional Air Surcharge for Assam and Kashmir Mails.—A cheap air mail service for parcels and registered newspapers providing for a limited air transmission between Calcutta and Gauhati or Silchar and *vice versa*, and surface transmission for the rest of the route is available. Such articles, in addition to the blue air mail label should bear a superscription in bold letters just below the air mail label.

"By air between————and————only."

The air fees which are payable in addition to ordinary postage are as follows:—

Registered Newspapers	3 pies for every 2½ tolas or fraction thereof in addition to ordinary postage.
Parcels	4½ Annas for every 40 tolas or part thereof in addition to ordinary postage.

A similar service is available between Amritsar on the one hand and Srinagar or Jammu-Tawi on the other; the air surcharge being as follows:—

Registered Newspapers and Packets.	3 pies for every 2½ tolas or fraction thereof in addition to ordinary postage.
Parcels	3 annas for every 40 tolas or fraction thereof in addition to ordinary postage.

Air Letter Service.—A light weight "Air Letter" service is available for writing to all countries served by the air mail. The postage rates are 3 annas to Ceylon and Pakistan, 5 annas to Afghanistan and Burma, 6 annas to rest of Asia and to Europe, 8 annas to Africa and to Oceania (that is, Australia, New Zealand, Fiji, etc.) and 10 annas to North and South America. Special Air Letter forms in several denominations are available from Post Offices. Similar forms of private manufacture, bearing an indication that they have been approved by the Head of a Circle, can also be used, but they should be prepaid with the prescribed charge.

Air Letters cannot be registered or insured, nor are any enclosures permitted. No other facility, such as express delivery, is available.

Special Air Mail Service for Second Class Mail.—The special air mail service for second class mail, which was so far available only to a few foreign countries (*viz.*, Great Britain and Northern Ireland, Switzerland, Egypt, Iraq, Malaya, Indonesia and Australia) has been extended to all foreign countries served by air mail with the exception of Ceylon and Pakistan. Under this special service, printed papers, newspapers, business papers, sample packets, mixed packets and literature for the blind can be sent at reduced air mail rates varying from 2½ annas to 8 annas per ½ oz. according to the destination. Printed papers, newspapers, business papers, sample packets, mixed packets and blind literature packets sent by air as second class mail must conform to the general regulations for such packets set out in the Post & Telegraph Guide and should be clearly superscribed at the upper left hand corner of the cover or wrapper with the nature of the contents, *e.g., Printed Papers, Business Papers, Sample Packet*, etc., as the case may be. They must not contain anything in the nature of a current letter *nor be sealed against inspection*. The minimum charges of 4 annas applicable to Business Papers and to Mixed Packets containing Business Papers sent by surface route apply also to Business Papers, and Mixed Packets containing Business Papers sent by air mail. For second class air mail to Ceylon and Pakistan an air surcharge of 1½ annas per tola is chargeable in addition to the ordinary inland postage for Book, Pattern and Sample Packets.

The rate of postage including air fee per ½ oz. for second-class mail to the various destinations is 2½ annas (subject to a minimum charge of 4 annas for packets containing Business Papers) for Afghanistan and Burma, 4 annas for the rest of Asia and for Europe, 6 annas for Africa and for Oceania (that is, Australia, New Zealand, Fiji, etc.), and 10 annas for North and South America.

AMOUNT OF BUSINESS

At the close of the year 1950-51, there were 143,974 permanent and 50,781 temporary officials in the Department; 36,094 post offices and 169,105 miles of mail lines. During the year 2,270 million articles including 76.5 million registered articles were posted; stamps worth Rs. 18.1 crores (excluding service postage stamps worth Rs. 3.2 crores) were sold; about 51.3 million of money orders of the total value of Rs. 2 crores were issued; and about 2.2 million Indian Postal Orders to the value of Rs. 73 lakhs were sold, a sum of Rs. 40 crores was collected for tradesmen on V.P. articles, about 3.7 million insured articles valued at Rs. 157 crores were handled. Customs duty aggregating to about Rs. 75 lakhs was realised on parcels and letters from abroad; pensions amounting to about Rs. 2.7 crores was paid to Indian Military pensioners and about 2,700 pounds of quinine and substitutes of the total value of Rs. 1.3 lakhs were sold to the public. On 31st March, 1951, there were 4,090,020 Savings Bank accounts with a total balance of Rs. 185 crores and 99,056 postal life insurance policies with an aggregate sum assured of Rs. 21.8 crores.

TELEGRAPHS

Up to 1912 the telegraph system in the sub-continent was administered as a separate department by an officer designated Director-General of Telegraphs who worked in subordination to the Government of India in the Department of Commerce and Industry. In that year it was decided to vest the control of Posts and Telegraphs in a single officer as an experimental measure with a view to the eventual amalgamation of the two Departments.

In pursuance of this policy an experimental amalgamation of the two services was introduced in the Burma and Central Circles on the 1st July 1912. The fundamental principles of this scheme were that the traffic and engineering work of the Telegraph Department should be separated, the former branch of work in each Circle being transferred to the Postmaster-General assisted by a Deputy Postmaster-General and a suitable number of attached officers and the engineering branch being controlled by a Director of Telegraphs. Subordinate to this officer there were several Divisional Superintendents who were assisted by a number of attached officers.

Amalgamation.—In 1914 the complete amalgamation of the two Departments was sanctioned by the Secretary of State and introduced on 1st April. The superior staff of the Direction, in addition to the Director-General himself, now consists on the engineering (including wireless) side of a Chief Engineer, Posts and Telegraphs, with two Deputy Chief Engineers, one Director of Wireless and five Asstt. Chief Engineers. For traffic work there is a Deputy Director-General with one Controller of Telegraph Traffic and one Assistant Deputy Director-General. To assist in Telephone work there is one Director (Telephones) and two Assistant Deputy Directors-General, Telephones. There are also one Assistant Deputy Director-General (Maintenance) and one Asstt. Engineer, Telegraphs under the Deputy Chief Engineer (Maintenance).

In the Circles the scheme which has been introduced follows closely on the lines of the experimental one referred to above. For telegraph engineering purposes the sub-continent was formerly divided up into five Circles, each in charge of a Director. These five Circles were divided into eighteen Divisions each in charge of a Divisional Engineer. On the 31st March 1924 there were 7 Circles and 20 Divisions. With a view to complete fusion of the three branches of work, the engineering work of the Bombay and Central Circles was brought under the control of the respective Postmaster-General in 1925 and this unification was gradually extended to other Circles. The fusion was completed in March 1930. In 1946 the Bengal and Assam Circle was divided into two Circles, namely Bengal Circle and Assam Circle, in charge of a Postmaster-General, and a Director, with headquarters at Calcutta and Shillong respectively. The telegraph traffic and the engineering branches in the Circle are controlled by the Postmaster-General, Calcutta and the Director of Posts and Telegraphs, Shillong the former officer now having under his control the West Bengal P. & T. Circle, which lies within the Indian Republic. There is also one Deputy Director of Telegraph Traffic each at Bombay, Calcutta and Madras to look after the speedy disposal of traffic. There are now 25 Engineering Divisions including those which have been created as a result of the integration of ex-States Telecommunication systems with the Indian Union P. & T. telecommunication Network. With effect from 1st July 1939, the Superior Telegraph Engineering and Wireless Branches have been amalgamated into a Single Service, *viz.*—Telegraph Engineering Service—Class I.

There has been much expansion on the Telephones side of the Department consequent on the acquisition of the telephone systems at Bombay, Calcutta, Madras, and Ahmedabad by Government. Separate Telephone Districts which are quite independent of the respective Postmasters-General were created at Bombay, Calcutta and Madras with effect from 1st April 1943. The Ahmedabad Telephone system has been placed under the administrative charge of the Bombay District. The Chief Officers of the Bombay and Calcutta Districts are designated General Managers, Telephones and that of Madras District as District Manager, Telephones. Recently a new Telephone District has also been formed at Delhi where there has been considerable telephone expansion during the war.

The audit and accounts work of the Telegraph Department is, like that of the Post Office, entrusted to the Accountant-General, Posts and Telegraphs, assisted by a staff of Deputy and Assistant Accountants-General.

INLAND TARIFF

Telegrams sent to or received from places in India, Burma, Ceylon or Pakistan are classed as Inland telegrams. The tariff for Inland telegrams is as follows:

	For delivery in India *Private and State* Express. Rs. a.	Ordinary. Rs. a.
Minimum charge	1 8	0 12
Each additional word over 8 ..	0 2	0 1

	For delivery in Burma & Pakistan *Private and State* Express. Rs. a.	Ordinary. Rs. a.

Note.—Ordinary Press Telegrams for Ceylon and Burma are not accepted at present.

Ordinary Telegrams

Ordinary telegrams may be written in plain or secret language.

BROADCASTING

FOR several years limited broadcasting services were maintained by radio clubs in Calcutta, Bombay and Madras. Although the transmitting sets employed by them were of very low power, the broadcasts were popular. The clubs were assisted financially by a government contribution based upon the revenue from licence fees, but this did not suffice to cover the cost of the transmissions, and great credit is due to the members of those clubs for the sporting manner in which they provided additional funds and undertook the entire responsibility for the programmes.

After negotiations extending over several years, an Indian Broadcasting Company was granted a licence to establish broadcasting services upon lines similar to those of the British Broadcasting Corporation, and transmitting stations were erected at Bombay and Calcutta, the service from the former being inaugurated by the Viceroy in July 1927 and the latter by the then Governor of Bengal a month later. These stations had each an aerial input of one and a half kilowatts, the same as that of the 2LO station in London, of which they were practically duplicates. The programmes were so arranged that both Indian and European music were broadcast daily and the news bulletins and market and weather reports were read in two languages.

Owing to financial difficulties the Indian Broadcasting Company went into liquidation with effect from March 1, 1930. Since then the Government of India have been controlling broadcasting in this country. Government for this purpose formed an Indian State Broadcasting Service, now called All-India Radio, and instituted a Central Broadcasting Advisory Committee.

In 1934, Government felt justified in embarking on a policy of development and, as a first step, a sum of Rs. 2,50,000 was granted for a 20-kW mediumwave station to be established at Delhi. This station was actually opened on January 1, 1936.

In the year 1936 a special fund of Rs. 40,00,000 was created for the development of Broadcasting in India.

Orders for extensive new equipment for implementing the scheme of expansion were placed in January 1937. It included 8 transmitters which were put into operation as follows:—

Delhi 10-kW shortwave: December 16, 1937; Bombay 10-kW shortwave: February 4, 1938; Lucknow 5-kW mediumwave: April 2, 1938; Delhi 5-kW shortwave: June 1, 1938; Madras 10-kW shortwave: June 16, 1938; Madras 0.2-kW mediumwave: June 16, 1938; Calcutta 10-kW shortwave: August 16, 1938; Tiruchirapalli 5-kW mediumwave: May 16, 1939.

In the year 1942, the Government of India decided to install a high power shortwave transmitter which would be capable of providing broadcasting service to foreign countries.

A 100-kW transmitter was opened on May 1, 1944 forming an important landmark in A.I.R.'s development programme.

Later at the request of the Government of the U.K. five shortwave transmitters including one 100-kW shortwave transmitter were installed as an urgent war measure. These were subsequently taken over by A.I.R.

All India Radio.—All-India Radio is a department of the Ministry of Information and Broadcasting, of the Government of India. Its head is the Director-General, All-India Radio, whose office is located in Broadcasting House, Parliament Street, New Delhi. Other officers at headquarters are: Chief Engineer, two Deputy Directors-General, one Deputy Chief Engineer, Director of Programmes, Director of Programme Planning, Director of Public Relations, Assistant Director of Listener Research, Deputy Director of Administration and two Assistant Directors of Administration.

AIR Stations.—The broadcasting stations are situated at Delhi, Lucknow, Patna, Calcutta, Cuttack, Madras, Tiruchirapalli, Bombay, Shillong-Gauhati, Nagpur, Vijayawada, Baroda, Allahabad, Jullundur, Ahmedabad, Dharwar, Mysore, Kozhikode, Trivandrum, Hyderabad and Aurangabad. Each regional centre consists of studios and office buildings, transmitter installations and receiving centre installations. The technical facilities at the studios provide for simultaneous programme transmissions, channels for rehearsals and tests, listening rooms, recording facilities, etc. The studios at Delhi, Bombay, Madras and Calcutta are air-conditioned. All the centres are equipped with medium-wave transmitters which furnish a first-grade service in their vicinity and second-grade service in the State n which they are. At Delhi, Bombay, Madras and Calcutta, short-wave transmitters have also been provided for serving areas within a radius of about 500 miles from the centres. The receiving centre at each station is the link between the News Service Division at Delhi and the station itself, and is used for relaying news bulletins and important broadcasts from Delhi.

The stations transmit for about five to ten hours a day. This is generally split up into three transmissions, morning, afternoon and evening. Programmes are planned by Station Directors with the assistance of the Programme Executives and Programme Assistants. Details are worked out well in advance of their schedule dates and are published in the journals of All-India Radio. Programmes are broadcast in 15 major Indian languages and in English. The general programme consists of music, talks, plays, feature programmes and programmes for women and children. Rural programmes are broadcast from all stations. Educational broadcasts are radiated from Bombay, Calcutta, Tiruchirapalli, Delhi, Lucknow, Madras, Vijayawada, Trivandrum and Patna.

Broadcasting House.—Probably the largest centre of broadcasting activity in the East, Broadcasting House was completed in 1943. Architecturally, it is one of Delhi's newest and most striking sights. It represents from the point of view of equipment, the latest practice in radio engineering. With its air-conditioned studios, each with an individual acoustic pattern to suit every variety of sound reproduction, its control room—a model of scientific efficiency—its dramatic control panels and effects and echo rooms it constitutes a landmark in every sense of the word in the history of India. broadcasting.

News Services Division.—This occupies a wing of Broadcasting House in Delhi and puts out 72 news bulletins in 23 languages (15 Indian and 8 foreign) occupying about 14 hours daily. All the news bulletins are prepared in the News Service Division and broadcast from the transmitters at Delhi set apart for news. Each station relays the bulletins suitable for its listening areas. A few minutes are set apart at each station for local announcements. This period accommodates news of purely local interest.

External Services.—The broadcasts from the External Services Division consist of daily services to the Middle East, East & South Africa, West Indies, East Indies, South-East Asia and Europe. The languages used are Hindi, Tamil, Gujarati, English, Burmese, Kuoyu, Cantonese, Indonesian, Pushtu, Afghan, Persian and Arabic. All these are radiated from Delhi but they are distinct from the programmes of the Delhi (regional) station. Altogether 24 news bulletins a day in twelve languages—nine foreign and three Indian—are broadcast.

The total output of the External Services is 21 hours daily.

EXTERNAL SERVICES

Language	Area covered
English	South-East Asia, East & South-East Africa, Mauritius, Europe, West Indies.
Hindi	South-East Asia, East and South-East Africa, Mauritius, West Indies.
Tamil	South-East Asia.
Gujarati	East & South Africa, Madagascar and Mauritius.
Pushtu	North-West Frontier.
Afghan-Persian ..	Afghanistan, North-West Frontier.
Persian	Iran and Iraq.
Arabic	Persian Gulf, Saudi Arabia, Iraq, Syria, Lebanon, Palestine, Transjordan, Egypt; East Africa, Southern Coast of Arabia.
Burmese ..	Burma.
Indonesian ..	Indonesia & Malaya.
Kuoyu	Central and East China.
Cantonese ..	South China.

Research and Maintenance Departments.—These two departments are located in New Delhi. The Research Department deals with all technical problems concerning reception and transmission. Special studies are undertaken on ionospheric data and forecasting transmission conditions, field strengths of short and medium wave stations, atmospheric noise levels prevalent in various parts of India, studio and recording characteristics and development of cheap receivers. The Department also maintains a field station at Todapur near Delhi where the frequencies of All-India Radio Stations are constantly checked. The Maintenance Department handles problems which arise in the upkeep and day-to-day operation of the engineering equipment used by All-India Radio in addition to maintaining Central Stores Depot.

Radio Journals.—A.I.R. publishes programme journals in English (Indian Listener), Urdu (Awaz), Hindi (Sarang), Bengali (Betar Jagat), Tamil (Vanoli), Gujarati (Nabhovani) and Telugu (Vani). Their total circulation is about 84,000 copies per issue.

The External Services Division publishes *India Calling* and two other journals in Arabic and Persian.

Monitoring Office.—The Monitoring Service (Simla) keeps a round-the-clock watch on transmissions from all the main broadcasting systems of the world, monitors news commentaries and selected talks transmitted from those stations in English, in Indian languages and in some foreign languages, totalling 12 different languages from as many as 30 different countries.

Public Relations.—For establishing and maintaining contact between All-India Radio and its listeners there is a Director of Public Relations at Headquarters and a Public Relations Officer attached to some stations.

Listener Research.—The primary purpose of Listener Research is to determine the listening habits and programme preferences of radio listeners by ascertaining from time to time their reactions to programmes broadcast. This information is necessary for planning programmes calculated to have the maximum listening appeal. Collection of authentic information on this subject is the task which the Listener Research Department of AIR has to fulfil. Although Listener Research in this country is still in its infancy, a good deal of information on the listening audience and on trends of listening has already been collected and more light is constantly being shed on this absorbing subject. For this purpose, contact with listeners is maintained through listeners' letters, press reactions, field surveys and questionnaire studies of listeners' preferences and reactions to programme broadcast. By utilising all recognised methods of assessing listener reactions, AIR is trying its best to provide programmes suited to the needs of its listening audience. There is one Assistant Director of Listener Research at Headquarters and one Listener Research Officer at regional stations in charge of this work.

Advisory Committees, established at the broadcasting centres in consultation with the State Governments, keep the Director-General, All-India Radio, in touch with local public opinion in the matter of programme construction and advise him on such matters.

Licences.—Broadcast receiver licences are issued at all head and sub-post offices at a fee of fifteen rupees per year, and cover the use of receiving sets throughout India.

Broadcast Receiver Licences are issued to Municipalities or other public bodies for the reproduction of broadcast programmes in public places by the Postmaster-General of the State. A licence issued for this purpose covers the use of one wireless receiver and any number of loudspeakers at one place only but does not cover any external wiring erected outside the premises of the licensee.

A separate Broadcast Receiver Licence is, however, necessary in the case of clubs, institutions, messes, etc., for reproducing broadcast programmes at subscriptions, dances, concerts-bazaars, etc., to which the public are admitted.

This licence is also issued by the Postmaster-General at a fee of Rs. 50 and is valid for one year. The number of wireless receiver Licencees in India has increased, the total for India, upto end of 1951, being 6,19,394.

The growth of broadcast receiver licences at the end of each year beginning with 1937 is given below:

Year	Licences	Year	Licences	Year	Licences
1937	50,680	1942	1,65,675	1947	2,58,274
1938	64,480	1943	1,76,061	1948	2,86,046
1939	92,772	1944	1,93,585	1949	3,79,365
1940	1,19,417	1945	2,02,829	1950	5,57,264
1941	1,47,121	1946	2,32,368	1951	6,19,394

It would be seen from the above that the 15 years between 1937 and 1951 saw an increase in the licence figures from 50,680 to 6,19,394. The rate of increase might have been even higher but for the limited supplies during the war and production bottlenecks and import restrictions in the post-war years.

ALL INDIA RADIO

Effective from the 16th March 1952.

BRITISH BROADCASTING CORPORATION

THE British Broadcasting Corporation maintains a small office in New Delhi, to act as a liaison point between its broadcasting headquarters in London and the broadcasting organisations in India and Pakistan, as well as to maintain contact with listeners in these countries to the B.B.C.'s Overseas Programmes.

Its function is purely one of liaison. No transmitting of programmes takes place outside London.

The office in New Delhi was first established in 1942 with the then primary object of conducting listener research for the B.B.C.'s Overseas Programmes broadcast from London, in both English and five Eastern languages.

Early in 1943, the scope of the office was slightly expanded with the appointment of a senior B.B.C. Representative from London, to handle all matters of co-operation, interchange of ideas and material and public relations, between the B.B.C. and its sister broadcasting organisations in India.

In August 1947 Pakistan was added to the scope of its contacts, but the general shape of the office remained the same, with, as its two main strands of work, Listener Research and Public Relations.

With Listener Research, the office helps to form a liaison between listeners to the B.B.C. Programmes in these countries and the broadcasting planners and artists working in London. It aims to ensure that the B.B.C.'s Eastern Service—which is broadcast especially for the Dominion of Pakistan and the Indian Republic and which can be heard daily between 6-45 p.m. and 9 p.m. satisfies the needs of its audience; keeps up-to-date with changing opinions and requirements. It aims to keep listeners in touch with news and trends of thought in the Western countries; and by reporting back to London the views of listeners, helps to introduce new features and programmes which meet with the interests and needs of the listeners in these communities.

It aims also to maintain a similar contact between the planning departments in London and the listeners in these countries to the B.B.C.'s General Overseas Service broadcast in English over the twenty-four hours daily and which is directed to India and Pakistan every day from 4-15 p.m. to 11-45 p.m.

In carrying out this work, the B.B.C. Office has been enquiring at first hand into the reception of the programmes and assessing from suggestions, appreciations and frank criticisms, how far they are fulfilling the listeners' needs.

At the end of 1951 Mr. L. V. Deane, the B.B.C.'s Pakistan Programme Organiser in London, made a tour of Pakistan, holding 'listening parties', meeting listeners throughout that country, and seeking their suggestions and reactions to the B.B.C.'s Programmes in Urdu and Bengali. Early in 1952, Mr. J. Linton, the Programme Organiser of the B.B.C.'s Hindi, Marathi, Bengali and Tamil Programmes, made a similar tour of India.

EXCHANGE OF IDEAS

One method of promoting cordial relations is by a constant interchange of ideas, scripts and through reciprocal arrangements for the rebroadcasting of news, cultural items and great public occasions. In two very conspicious ways among others, the B.B.C. Office in Delhi has been able to promote good relations. The first was in arranging for the Indian National Anthem Jana Gana Mana, to be orchestrated by a British Composer—Herbert Murrill—who has now become Head of the B.B.C.'s Music Department in London. The second was in the arrangement of Discussion Programmes between India and London; and sometimes even inter-Commonwealth discussions have taken place. In these programmes men and women of high standing have free discussions with each other over the air on politics and other subjects.

In April 1951 a four-way discussion took place on 'What Next in Korea' in the B.B.C. series 'London Forum'. The speakers were Mr. B. Shiva Rao from Delhi, Professor Copland from Canberra in Australia, Blair Fraser from Ottawa in Canada, and Christopher Mayhew from London. In May 1951 there was a two-way discussion between All India Radio and the B.B.C. on 'Technical Education'. The speakers from India were Dr. K. S. Krishnan and Mr. J. A. Taraporevala, with Dr. Narayana Menon as Chairman, and the London speakers were Sir John Sargent and Mr. J. C. Jones, with Mr. Edgar Lustgarten as Chairman. In January 1952 there was an interesting three-way exchange programme in the B.B.C. series 'Serious Argument', in which India, France and Britain participated. Discussing the question, 'How Can Western Europe Best Co-operate with Asia' were Mr. Frank Moraes, Editor of the *Times of India*, Monsieur Pierre Frederix and Sir Frederick Whyte.

Also, by means of recordings made by the B.B.C. Transcription Service, of programmes broadcast in London on any of the Home or Overseas Services, the B.B.C. can offer broadcasting concerns all over the world, records of outstanding items such as concerts of Western music, or talks given by authorities on matters of general, cultural and educational interest. Being in recorded form, other broadcasting concerns can use them in their programmes at times best suited to the habits of their audiences and without fear of shortwave atmospheric disturbances.

'So a link can be formed between the East and the West especially in the spheres of thought and culture.

Similarly through the co-operation of such broadcasting organisations as All-India Radio the B.B.C. Office can also send recordings of the Indian scenes back to London for broadcast to the English people and so foster and maintain an exchange of ideas between the Commonwealth countries and Great Britain.

The B.B.C. also maintains a News Correspondent in New Delhi whose work is to report to London for inclusion in B.B.C. News Bulletins, news items from India and Pakistan. The present holder of this post is Richard Williams. The present B.B.C. Representative is William Ash.

The address of the B.B.C. Office is: Post Box 109, New Delhi.

A radical improvement in carriage of mails by air was made with effect from the 30th January 1949 when scheduled night air mail services commenced operation on the routes Bombay-Nagpur-Calcutta and Madras-Nagpur-Delhi. Shortly afterwards the "All Up Airmail Scheme" was introduced which aimed at carriage of all mails, as far as possible, by scheduled air services. The operation of night air mail services was temporarily suspended during the monsoon period (from 9th June 1949 to 14th October 1949). These services were resumed with effect from the 15th October 1949 and have since continued to operate uninterrupted even during the monsoon season. On the 1st March 1950 a night service carrying passengers, freight and mail was inaugurated on the Delhi-Bombay (direct route). This service also continued to operate during the monsoon season. The night air services have proved to be very popular with the public and their operation has been fully justified from the economic point of view. The night mail service was taken over on June 1, 1951 by the Deccan Airways. The Government continued to give subsidy in the financial year 1950-51 to Indian Air Transport Companies and Flying Clubs. The grant of subsidy to non-scheduled operators has, however, been discontinued with effect from the 1st October 1951.

TRAFFIC STATISTICS

Some interesting statistics relating to scheduled air services operated by Indian Air Transport Companies during 1950 and 1951 are given below :—

Particulars	1950	1951
SCHEDULED SERVICES		
Miles flown	18,896,139	19,335,753
Number of passengers carried	452,869	448,674
Mail carried in lbs.	8,356,144	7,153,711
Freight carried in lbs.	80,006,755	86,860,661
Capacity Ton-Miles operated	52,251,865	56,939,587
Load Factor	65.8%	68.5%

EXTERNAL AIR SERVICES

The first concrete step was taken about the end of 1947, when the Government approved a scheme for the establishment of an Indian air service between India and the United Kingdom. A new company was formed for this purpose under the name of Air-India International Ltd. The Government of India hold 49 per cent. of the share capital with an option to increase this to 51 per cent. at any time. On the Board of Directors of this company, Government have their own nominee as a "Special Director" who has certain over-riding powers. During an initial period of five years any losses incurred by this company will be made good by Government but any payment so made shall have to be repaid out of subsequent profits made by the company. The India-United Kingdom service, equipped with the most modern type of Lockheed Constellation 40-seater aircraft, commenced operation on June 8, 1948 on the route Bombay-Cairo-Geneva-London when the 'Malabar Princess' took off from the Santa Cruz airport with 35 passengers, and 164 bags containing about 1,700 lbs. of letter mail.

Having established external air services to the West the question of operation of air services of the East was taken up during the year 1949 and on the 28th May 1949 Bharat Airways Ltd. commenced operation of an air service on the route Calcutta-Bangkok-Hongkong with the Skymaster type of aircraft. Subsequently, operation on the Bangkok-Hongkong sector was suspended and the service was restricted to the Calcutta-Bangkok sector with a once weekly frequency. With effect from 6th October 1950 the service has been extended upto Singapore.

Air India International Ltd. also increased the scope of their operations by introducing a scheduled service to East Africa with one fortnightly frequency on the route Bombay-Aden-Nairobi with effect from the 21st January 1950. The frequency of the service was increased to one weekly from 1st May 1950. An intermediate stop at Karachi between Bombay and Aden was introduced with effect from 26th July 1950.

Yet another mile-stone in the progress of Civil Aviation in India was reached on the 5th December 1951 when an Indian air transport company commenced operation of a scheduled air service between India and Afghanistan.

The need for establishment of an air link with Afghanistan had been felt for a long time but its fulfilment was delayed due to difficulty encountered in obtaining transit facilities through Western Pakistan. A service, however, was commenced by Himalayan Aviation Ltd. on the route Ahmedabad-Jamnagar-Zahidan-Kandhar-Kabul with effect from the 5th December 1951 avoiding Pakistan territory altogether. The Government of Pakistan has now agreed to the operation of a scheduled air service between India and Afghanistan on the route Delhi - Ahmedabad - Karachi - Jiwani - Zahidan - Rahdu Chah-Kandhar-Kabul, without traffic rights at Karachi. The service was started on the route from Ahmedabad *via* Karachi with effect from the 27th February 1952. Due to bad weather, the service was temporarily suspended with effect from the 1st March 1952.

As a result of air transport agreements with the various countries, foreign services passing through India have largely increased in number. At present, services to and across India are operated by the following Airlines :—Air Ceylon, Air France, British Overseas Airways Corporation, Iranian Airways Co., Pan American World Airways System, Philippine Air Lines, Inc., Qantas Empire Airways Ltd., Siamese Airway Co., Transcontinental and Western Air Inc., Orient Airways Ltd., K. L. M. Royal Dutch Airlines, Braathens South American and Far East Air Transport A. S., Scandinavian Airlines System and Union of Burma Airways.

AERODROMES

At the close of the year 1951, seventy-five aerodromes were maintained by the Civil Aviation Department. These comprised of 3 International, 8 Major, 27 Intermediate and 37 Minor aerodromes.

Twenty aerodromes are at present equipped for regular night flying operations.

For Air Traffic Control purposes India is divided into four Flight Information Regions with flight information centres at Delhi, Calcutta, Bombay and Madras. Flight Information Centres act as Rescue Co-ordination Centres also.

AERONAUTICAL COMMUNICATION ORGANIZATION

This branch of the Civil Aviation Department was organised in 1946 and had established by the end of 1951, 57 aeronautical communication stations.

For purposes of organization, India has been divided into four regions, each under the charge of a Controller of Communication, who is responsible for maintenance and operation of the communication stations in his region.

The communication organisation has the following ancillary units :—

The Radio Construction Unit; The Radio Development Unit; The Radio Stores Depot.

The new installations and major repairs to technical equipment are carried out by the construction unit. The Radio Development unit, which came into existence in January, 1948, is engaged in carrying out research and development work on problems pertaining to Aeronautical Communications. The Radio Stores Depot is the central stores organization responsible for the stocking and distribution of all equipment and spares to the stations.

The fifty-seven aeronautical communication stations provide facilities for air ground communication, radio aid to navigation, point to point communications and Met broadcasts for the benefit of aviators. The International airports have been equipped with facilities in accordance with the recommendations of the International Civil Aviation Organisation. At other airfields, essential facilities to ensure the safety and regularity of flights have been provided. Point to point links have also been provided for communication between the terminal stations in India as well as between the international airports in India and those in the adjacent countries.

AIR TRAINING

Facilities for training in flying, aircraft engineering, communications and air traffic control are available at the Civil Aviation Training Centre, Allahabad which comprises the following four wings, *viz* :—

(1) Flying School; (2) Aerodrome Officers' Training School; (3) Engineering School; (4) Communication School.

In addition a Repair and Overhaul Organisation is also attached to the Centre for carrying out repairs and overhaul of the Centre's aircraft.

Allahabad Training Centre, 1951

Courses	*In-take*	*Out-put*
Radio Technicians (Refresher Course)	4	4
Radio Technicians (Advanced Refresher Course)	35	24
Radio Operators (Advanced Refresher Course) ..	28	13
Refresher Course for Officers (Communications)	40	40
Probationary Officers' Course (Communication)	8	8
Course in Radio Communication for students from Guindy Engg. College	4	4
Long Range Tel. Channels Course	8	8
Junior Airline Pilots ..	14	20
Pilots Ground Training Course	47	47
Ground Engineering Course	40	3
Air Traffic Control Officers' Course	37	26
Control Operators' Course	16	—

The Centre has acquired the reputation of being the best of its kind in the East.

Flying Clubs :—Flying Clubs provide facilities for training at concessional rates. There are at present ten subsidised flying clubs with headquarters at Bombay, Delhi, Madras, Calcutta, Nagpur, Bhubaneswar, Patna, Jullundur Cantonment (with a satellite centre at Patiala), Lucknow (with satellite centres at Allahabad and Kanpur).

* Ceased on October 1, 1951.

India is a member of the International Civil Aviation Organisation and has been elected to its Council. Mr. K. M. Raha was the first Representative of India on the Council of I.C.A.O. followed by Mr. B. M. Gupta, Mr. D. Chakravarti and Mr. M. G. Pradhan. India took part in all the Assembly meetings and was represented in important Committee and Division meetings.

At the invitation of the Government of India, the I.C.A.O South-East Asia Regional Air Navigation meeting was held in New Delhi during November/December, 1948. Over two hundred delegates from 14 States and two International Organisations, *viz.* the International Meteorological Organisation and International Air Transport Association, attended.

The Government of India have concluded bilateral air transport agreements with U.S.A., Netherlands, France, Sweden, Pakistan, Ceylon, Australia, Switzerland, Philippines, U.K. and Afghanistan.

AIRCRAFT OVERHAUL AND MANUFACTURING FACILITIES

In the prewar period overhaul facilities in the country were extremely limited. However, considerable progress has been made during the postwar period. Most of the air transport companies now have overhaul facilities which cover the airframe, the engine and its accessories.

The need for aircraft manufacturing was keenly felt immediately on the outbreak of the War and the Hindustan Aircraft Company was established in the year 1940. Aircraft, aeromaterials, accessories and parts are now being manufactured in the country.

RESEARCH AND DEVELOPMENT

A Research and Development Branch, proposed in the post-war plans of the Civil Aviation Department in 1945, was created in April 1946.

A Technical Centre has been established in New Delhi. Research and Development work concerning problems of aircraft design, construction, modification and repair, development of aircraft materials and processes, development and use of safety devices, analysis of technical problems of air transportation and, in general, such scientific and advanced technical work considered necessary for the promotion of Civil Aviation is carried out at this Centre.

An aeroplane load adjuster intended for ensuring safe loading of aircraft has been developed in the Laboratory.

During the last two years, data on the gust conditions prevailing in our domestic air routes has been collected using V-G Recorders covering a period of approximately 1,000 flight hours. The results of these investigations have significance in the determination of fatigue life of aeroplane structures.

The Technical Centre is also engaged in the development of designs for gliders. Two single seater Primary Training Gliders, Model PT-GI, utilising indigenous materials in many major components have already been constructed and successfully test flown. A complete set of drawings for an Intermediary Glider, Model IT-GI, has also been prepared and the prototype is now under construction.

Another activity of the Centre is concerned with the design approval of prototype aircraft for Type Certification. The prototype, acrobatic trainer aircraft model HT-2 designed by the Hindustan Aircraft Ltd., Bangalore, was certified for initial flight trials after checking the major structural aerodynamic and strength test reports on this aircraft.

CIVIL AVIATION DEPARTMENT

In view of the economic situation in the country, the development programme of this Department has been considerably curtailed. The budget estimates for the year 1952-53 under the two demands, Revenue and Capital pertaining to Civil Aviation are as follows :—

Revenue	Rs.	2,80,28,000
Capital	Rs.	1,50,00,000

ROADS

THE country's road system may be briefly described as follows :—

There exist four great trunk roads, stretching diagonally across the country which form the framework with which most of the important subsidiary roads are linked. These trunk roads have been in existence for a very long period and are rich in historical association. The most famous is the ancient marching route—known as the Grand Trunk Road—which stretches right across the northern part of the country from Delhi to Calcutta; the other three connect Calcutta with Madras, Madras with Bombay and Bombay with Delhi, and the four of them together account for about 5,000 out of the 91,857 miles of metalled roads in the country.

None of these roads however can be considered safe "all weather" roads according to modern standards. The Madras-Calcutta Road in particular is far from being bridged throughout its entire length. The other three roads also require a great deal of improvement. Work is however steadily in progress towards the removal of the present handicaps.

As regards the subsidiary roads, the best and most numerous are to be found in South India. As one would expect, the worst served regions are Rajasthan and parts of the Punjab on the one hand, and Orissa and West Bengal on the other, the former owing to its aridity and sparse population, and the latter because of the numerous unbridged and mostly unbridgeable waterways which dissect it. In addition there are numerous other parts of the country, such as the lower Himalayas, which suffer from a dearth of communications owing to the difficult terrain. Besides surfaced roads, there is a very large mileage of "kutcha" roads amounting to approximately 163,000 miles, some of which are good for motor traffic during the dry weather.

DEVELOPMENT COMMITTEE

On the whole it is reasonable to say that the country's road system, even before the advent of motor transport, was altogether insufficient for its needs and it is the increasing realisation of this fact that led to the appointment of the special Road Development Committee in 1927 whose functions were to examine the question of the development of road communications in view of the increasing use of motor transport and suggest ways and means of financing it.

The recommendations put forward by the Committee were carefully considered by the Government of India, whose conclusions upon them were embodied in a resolution and provided that the increase from four to six annas per gallon in the import and excise duties on motor spirit, which had been effected in March 1929, should be maintained for a period of five years in the first instance, and that the additional duty should be allotted as a block grant for expenditure on road development, and credited to a separate Road Development Account, whose unexpended balances should not lapse at the end of the financial year.

Allocation to States.—The original resolution dealing with the disposal of the Road Development Account has since been amended from time to time, the resolution at present in force in India having been passed by the Indian Parliament in 1950. Its main features may be described as follows: The special tax on petrol introduced in 1929 shall continue to be levied for road development, the proceeds of which, after retaining a reserve of 20 per cent. for administration, research and special grants-in-aid, shall be allocated for expenditure in the different States in the ratio of the petrol consumption in the various areas. These sums may be spent on the construction, reconstruction or substantial improvement of roads and bridges including the cost of preparation of road schemes—but not for ordinary road upkeep or maintenance—on interest and amortization charges on road loans sanctioned hitherto by the Government of India and also on administration of State Boards of Communications and establishment connected with the control of motor transport.

With the levy of a surcharge on petrol, the share of the petrol duty available for the Road Fund was increased from 2 annas to 2½ annas per gallon with effect from October 1, 1931. Upto the end of March 1951 the Fund had financed road schemes to the value of Rs. 14½ crores, apart from amounts spent in the Pakistan area, prior to partition, leaving an unspent balance of Rs. 8 crores in the hands of State Governments. This is exclusive of expenditure from the Road Fund Reserve.

Feeder Roads.—Upto the introduction of the Road Fund in 1929, all State Roads were financed exclusively from the general revenues of the States and local roads from local revenues supplemented by State grants. The object of creating the Road Fund in 1929 was to supplement and not to replace the normal expenditure from State and local revenues, but unfortunately the ten years following the introduction of the Fund were marked by acute financial stringency, with the result that State Governments and local bodies had to make drastic curtailments in the allotments made for roads from their revenue.

The effect of these curtailments was to starve the construction and development of feeder roads, as the Road Fund was originally being used exclusively for roads of inter-State and inter-district importance. The Government of India, however, subsequently laid down that at least 25 per cent. of the State shares in the Road Fund should be used on Feeder Roads and that not more than 25 per cent. can be used on roads which compete with the Railways.

ROAD MILEAGE

On the administrative side roads except for the small mileage of National Highways described later are a State subject and may be divided into two main classes, State Roads under the Public Works Department and Local Roads in charge of local bodies. The extent to which the administration of roads has been delegated to local bodies varies considerably from State to State but in the country as a whole about 80 per cent of the extra-municipal mileage is under the charge of District Boards or District Councils, including a certain mileage, mainly in Madhya Pradesh which is termed "Provincial" but maintained under their agency. Within Municipal areas, all roads, other than sections of main roads passing through the towns, are controlled by the respective Municipalities.

The grand total of the mileage of extra-municipal roads maintained by public authorities in the Indian Union is 255,459. Of this total, the mileage for the area which formerly constituted British Indian Provinces and minor Administrations is 185,328 and for Indian States 70,131.

The total mileage of roads with modern surfaces, either bituminous or cement roads, is 11,375 and the total mileage of water-bound macadam roads is 80,482, making a total mileage of roads which is either modern surfaced or water-bound macadam of 91,857. The total mileage of lower types of roads is 163,602.

The State with the greatest road mileage is Madras with 37,851, out of which however, only 635 is modern surfaced, while the State with the greatest mileage of modern roads is the Punjab, with 2,217 miles out of a total State mileage of 9,105.

India's road system is grossly inadequate for the country's needs and a comparison with other advanced countries will show how great is the leeway that has to be made up. For example, the road mileage per 100 square miles of area are 202 in the United Kingdom, 184 in France, 103 in the U.S.A., 95 in Germany, 89 in Italy and 70 in Ceylon. India's road mileage for the same area is 22, representing less than one-ninth of the U.K. and one-third of Ceylon.

THE NAGPUR PLAN

The Central Road Fund could, at best, increase the annual road expenditure by roughly 15 per cent at a time when motor transport was steadily on the increase, calling for more and better roads. It was however not until the importance of roads to the country was brought home forcibly by the impact of the Second World War that a fresh examination of the problem was stimulated. Following persistent representations from the Indian Roads and Transport Development Association of Bombay, the need for an extensive programme of road development both for the purpose of assisting the transition from war to peace and for fostering the economic advancement of the country was accepted by the Government of India. In December 1943 the Chief Engineers of the various States met in conference at Nagpur and evolved a road plan based on the minimum needs of the country. Adopting as their objective the very modest proposition that no village in a well-developed agricultural area should remain more than 5 miles from a metalled road, the Chief Engineers recommended the increase of Indian Union's road mileage to 335,000 of which 290,000 miles would be motorable. The nett increase in road mileage under this Plan, now known as the famous Nagpur Plan works out at 50 per cent.

FIVE-YEAR PROGRAMME

While the Government of India as well as the State Governments endorsed these recommendations in general terms, there was no general acceptance of a time-limit for the accomplishment of the plan. However five-year programmes for commencement from April 1947 and representing varying proportions of the Nagpur scheme were prepared by the States for their respective areas in 1945-46. These Programmes, exclusive of National Highways (i.e., main arterial roads of national importance) were estimated to cost nearly Rs. 120 crores over the five-year period, the following being the allotments (in crores of rupees) proposed by the individual States: U.P. 30.72; W. Bengal 12.00; Bombay 20.80; Madras 20.77; Bihar 13.60; East Punjab 4.00; Madhya Pradesh 7.00; Assam (before detachment of part of Sylhet) 5.32 and Orissa 4.00. The Programmes embraced the construction or improvement of 80,000 miles of roads as under:

State & District Roads.

Mileage improvement	.. ..	33,393
Mileage, new construction	.. ..	17,509

Village Roads.

New construction & improvement	..	30,093

Some of the States, particularly Bombay and Madras, have since revised and reduced their 5-year programmes to roughly Rs. 8 crores each.

Progress in the implementation of the Nagpur Plan is however most disappointing. For the first two years there was no dearth of funds but owing to shortage of steel, cement and other materials as also shortage of rail transport facilities and delay in land acquisition, added to inadequate administrative arrangements, the majority of the States except the U.P. could report hardly any progress. Thereafter the Central Government which had undertaken to bear half the cost of all reconstruction schemes had to discontinue such assistance. Moreover the loans which the Centre had promised were also severely curtailed. The result is that the Uttar Pradesh, the Punjab and Orissa and many of the remaining States had to abandon large portions of their plans. A few States in addition failed to create adequate administrative arrangements for the execution of the programme with the result that portions of the grants made in the budget at the beginning of each year consistently lapsed at the close of the year, to the detriment of road development.

The 5-year period covered by these Plans ended on 31st March 1952 and inclusive of Parts B and C States, the total expenditure is estimated at Rs. 50 crores representing less than half of what the States planned to accomplish.

NATIONAL HIGHWAYS

The Central Government, as part of their contribution towards post-war development in the State's field and as part of a concerted plan for the co-ordinated development of land transport as a whole, accepted liability for the construction and maintenance of the National Highways with effect from 1st April 1947. Of the 18,000 miles of National Highways originally delineated in pre-partition India, 10,000 miles are now being maintained by the Central Government in the Indian Union.

The five-year plan for the development of National Highways was originally estimated to cost Rs. 36 crores but was reduced to Rs. 23½ crores subsequently. Although financed by the Centre, the actual execution of the work is carried out through the State P.W.Ds. It was expected that as a result of this expenditure, about 5,421 miles of National Highways would be improved and 787 miles of new National Highways constructed in the former Governors' Provinces.

Reduced allotment of funds during the past three years however have belied these expectations. In the Five-year period, the total expenditure on development and construction of National Highways is now expected not to exceed Rs. 9 crores. Within the limited funds granted, satisfactory progress in the development of National Highways has however been made during these 5 years. Out of about 1,080 miles of missing links in the National highway system about 130 miles have since been constructed at a cost of Rs. 1·42 crores and 285 miles are under construction. Fifteen major bridges have been constructed at a cost of about Rs. 2 crores and 47 more bridges estimated to cost Rs. 3·4 crores are under construction. In addition 1,200 miles of highways have been improved and upgraded while work on 580 miles is at present in progress.

THE NEW PLAN

The second Five-year Plan of National Development which has now been adopted under the Planning Commission's recommendations makes an even smaller provision for Roads than the first Five-year Plan which, in view of the large arrears of work left over from the earlier Plan, has been criticised as totally inadequate. The provision for the next 5 years under this Plan is as under:—

	(Rs. In Crores)
National Highways	23·00
Other Roads:	
West Bengal	13·85
Bombay	11·64
Bihar	8·00
U.P.	5·22
Madras	5·00
Assam	2·13
Madhya Pradesh	2·00
Orissa	2·00
East Punjab	0·75
Parts B & C States	20·15
Total ..	93·74

REVENUE AND EXPENDITURE

The expenditure of Rs. 9 crores on National Highways and Rs. 50 crores on other Roads during the past few years works out at an average annual expenditure of Rs. 12 crores on road development. At present nearly Rs. 13 crores is being spent in addition on Road Maintenance, making a total road expenditure of Rs. 25 crores. As against this, the Governments at the Centre and in the States are now realizing a revenue of over Rs. 43 crores annually from motor transport, as under:—

	Revenue, approx. 1950-51 Rs. In Crore
Central Revenues.	
Motor Spirit Duties	21·87
Tyre Excise ,, ...	4·05
Vehicle Import ,, ...	9·44
	35·36
State Revenue.	
Vehicle Taxes	5·35
Petrol Sales Taxes	3·10
	43·81

Vehicles:—Civilian motor vehicles on the country's roads in 1950 numbered 293,662 made up of 28,193 motor cycles, 149,476 cars, 8,407 taxis, 29,443 passenger buses, 74,471 trucks and 8,672 miscellaneous vehicles as shown in the statement attached. There are also 8 million bullock carts in use.

INLAND WATER-WAYS

IN pre-railway days inland navigation played an important role in the transport system of the country. The decline began with the construction of railways in 1855. While the railways received every assistance from the Government to expand, the water transport which was then only in its initial stages of mechanisation, and was thus not in a position to provide the security, safety, and speed comparable with the railways, was allowed to languish. Almost simultaneously, it received another blow when big irrigation schemes were taken up and consequently large scale withdrawals of water from the already meagre supplies of the rivers were effected. To add to these adverse circumstances there was no central co-ordinating authority to improve and maintain the water-ways and provide the appropriate navigational facilities as inland navigation has always been a provincial subject.

It has come to be recognised that the most rational way to deal with a river is to treat it as a unit from the source to the mouth irrespective of administrative boundaries. Also the utilisation of the water resources of a river should, as far as possible, be on a multi-purpose basis including irrigation, generation of hydro-electric power and navigation, in order to secure the most economic exploitation. The present constitution, therefore, provides for the control of the Central Government on navigation on inter-state rivers and national water-ways. Besides, a Central Water and Power Commission has been set up to assist in the co-ordinated multi-purpose development of the water resources of the country. It is consequently expected that inland navigation in the country will before long play its due role in the transport system of the country. Further, this year the Government has set up the Ganga Brahmaputra Water Transport Board, which will co-ordinate and stimulate the navigational activities of the States of U.P., Bihar, West Bengal and Assam situated on this river system.

Looking back on the state of navigation on the main rivers about a hundred years ago, it is noticed that large steamers plied on the Brahmaputra upto Dibrugarh; on the Ganga as far as Garmukteshwar, over 700 miles above Patna, and Kanpur, *en-route*, presented the appearance of a large port; on the Yamuna as far as Agra; and on the Ghagra, only 30 years ago, a regular service was maintained upto Ayodhya, 200 miles upstream of its confluence with the River Ganga. A number of canals constructed for irrigation included provision for navigation.

PRESENT POSITION

At present steamers ply regularly on the Brahmaputra river upto Dibrugarh but on the Ganga as far as Patna only with feeder services upto Buxar on the Ganga and Barhaj on the Ghagra. There are other parts of the sub-continent where canal navigation is still active. In the Madras State for instance, the Godavari Canals, including the Dummagudan Canal, the Kistna Canals, the Buckingham Canal, the Kurnool-Cudappah Canal, the West-Coast Canals and the Vedaraniyam Canals are important highways for water-borne traffic. The Godavari and Kistna Delta canals are indeed the chief means of transport in that region and afford a cheap and ready mode of access to all markets. The Buckingham Canal has played an important part in the trade of the country traversed by it, and in particular during the last war when the traffic was heavy it afforded considerable relief to the railways. On the West Coast the backwaters form the chief means of communication and transport. In Orissa, too, there are some 200 miles of navigable canal in constant use.

Then there are the important water-ways of West Bengal, comprising besides the delta river system, also the canals around Calcutta. The records of imports and exports into and from Calcutta show the extent to which the largest seaport in India depends upon its water-way communications. Post-partition figures show that 12 per cent of the trade of the port arrives and leaves by water-ways.

As by far the greater proportion of the water-borne traffic of the country is carried by the unorganised country-boats, reliable figures are not available as to the total ton-miles of traffic thus moved. It has been estimated, however, that this would amount to only about one per cent of the total railway traffic of the country.

The approximate length of navigable water-ways at present in India is as follows:—Uttar Pradesh, 745 miles; Bihar, 715 miles; West Bengal, 777 miles; Assam, 920 miles; Orissa, 287 miles; Madras, 1,700 miles; Total, 5,144 miles.

The above mileages are approximate and take into account only the main water-ways navigable by steamers and large country-boats. They do not include the numerous tidal creeks on the coasts which are not connected to an inland water-ways system. Out of this, 1,762 miles are navigated by steamers, details of which are given below:—

	Miles
River Ganga—Patna to Lalgola (Border)	315
Patna to Buxar (Feeder service)	100
River Ghagra—Confluence Ganga/Ghagra to Barhaj	97
River Hooghly—Calcutta to Sundarbans (Border)	150
River Brahmaputra—Dibrugarh to Dhubri (Border)	400
(Feeder services on tributaries)	375
(Feeder service on Surma Valley)	85
River Bhagirathi—Calcutta to Ganga River (during rains only).	180
River Brahmaputra—Dibrugarh to Sadiya (during rains only)	60
Total	1,762

Statistics of water-borne traffic are not maintained in this country. Detailed figures are available only for traffic carried on the navigation canals, which are maintained for the purpose of assessing tolls.

The tonnage of goods carried on the canals are given below as available:—

Uttar Pradesh, 24,441 tons (1945-46); Bihar, 69,795 tons (1939-40); West Bengal, 1,278,870 tons (1938-39); 547,637 tons (1948-49) (Circular and New Cut Canals in Tollys Nullah only); Orissa, 185,947 tons (1948-49); Madras, 1,493,751 tons (1947-48).

It is interesting to note that the two of the largest Steamer Companies, The India General Navigation and Railway Co., Ltd., and the River Steam Navigation Co., Ltd., who operate over 5,000 miles of the Ganga and Brahmaputra system of rivers in India and East Pakistan, and who carry about 75 per cent. of the total goods handled by power craft, carry about 2 million tons of goods and 10 million passengers per annum. (Separate figures for India and Pakistan are not available.)

FUTURE

Conservation of water resources on a multi-purpose basis and/or river training works or resuscitation of old ones offer the following potential new navigable water ways.

1. **Uttar Pradesh:** (*a*) Revival of navigation of the Ganga river Patna-Buxar-Allahabad. (*b*) Revival of navigation on the Ghagra river upto Bahram Ghat.

2. **Bihar:** (*a*) Navigation on the Kosi river is included in the programme of the Kosi Dam Project, under investigation. (*b*) Development of navigation on the Ganduk river. (*c*) Development of navigation on the Son river, feasible with the construction of the Rihand Dam, investigations on which have almost been completed.

3. **West Bengal:** (*a*) The construction of a navigation canal from Durgapur to the Hooghly river to connect the coal fields in West Bengal and Bihar with the port of Calcutta, is included in the programme of the Damodar Valley Project. (*b*) Resuscitation of the Bhagirathi route affording a direct and much shorter navigation connection from the port of Calcutta to Bihar and U.P. by the construction of a barrage on the Ganga river. This is being investigated under the Ganga barrage project.

4. **Orissa:** (*a*) Resuscitation of the Orissa coast canal to restore the connection between the Hooghly and Dhamra rivers. (*b*) The Mahanadi Valley Project provides for the navigation on the Mahanadi river upto Hirakud dam, about 300 miles from the sea.

5. **Assam:** The various tributaries of the Brahmaputra offer great scope for development of navigation.

6. **Madhya Pradesh:** (*a*) Provision for navigation of the Narmada river is aimed at in the investigations in progress on the Narmada Valley projects. (*b*) Conditions are favourable to obtain a navigation link between the East and West Coasts *via* the Narmada river and the Johita-Son rivers or Bearma-Yamuna rivers.

7. **Bombay:** The construction of dams on the Narmada and Tapi rivers will provide navigational facilities on these rivers.

8. **Madras** Development of the Kistna, and Godavari rivers could also provide navigational facilities.

A priority list has been drawn up in accordance with which it is proposed to develop navigation. In the first stage it is proposed to extend navigation on the Ganga river above Patna as far as Allahabad.

Mr. Otto Popper an Inland Navigation Expert and former Member of the International Danube Commission, visited India on behalf of the E.C.A.F.E. in February 1950. In his report he has suggested a scheme for better organisation and running of country-boat services. The scheme visualises the registration of all country-boats with a carrying capacity of 10 tons or more and issue of certificates of river worthiness, provision of shallow draught tugs for towing the boats, issue of transport documents for goods carried, etc.

The E.C.A.F.E. have recommended that the improvements suggested by Mr. Popper should be given effect to, and have proposed that a pilot project of shallow draught tugs towing country-boats and barges, operated under the auspices of the U.N. Technical Assistance Programme be initiated. The Government of India has approved of the planned project and is in correspondence with the U.N. Technical Assistance Administration to sponsor the same.

During the year 1951, the U.N. Technical Assistance Administration and E.C.A.F.E. organised a tour for the study of technological advances in inland water transport methods abroad. Accordingly a group of twelve members were drawn from India, Pakistan and other countries of the E.C.A.F.E. region, which made a tour of their own region, and Europe and U.S.A. On completion of the tour, the group has submitted to the U.N. a comprehensive report on the observations made. The report, which is yet in its interim state, when finalised, will serve as a useful document to assist in the advancement of water transport in eastern countries.

PORTS*

BOMBAY

THE Port of Bombay is over 75 square miles in extent and is a comparatively modern creation. The decision of Government to constitute a Trust to administer the affairs of the Port originated in the apprehension of Government that the interests of trade were being seriously endangered by the monopoly of landing and shipping facilities being acquired by private companies holding large tracts of foreshore land, most notably the Elphinstone Land and Press Company, which was accordingly purchased by Government in the year 1869 and placed in the hands of a public trust.

During the first few years of its existence, however, the Board was faced with increasing deficits owing to competition from private wharf-owners holding the remainder of the foreshore land. The rights of these private wharf-owners were also, therefore, acquired by Government and vested in the Board in 1879, since when the Port of Bombay has been progressively developed and expanded.

The Board consists of a whole-time Chairman appointed by Government, and twenty-four members, of whom two are elected by the Bombay Chamber of Commerce, eight by the Indian Merchants' Chamber, two by the Bombay Municipality, one by the Millowners' Association, one by the Maharashtra Chamber of Commerce and the remaining ten, which include two representatives of labour, are nominated by Government.

The entire administration of harbour conservancy and lighting, pilotage, docks, bunders, railway and land estates is vested in this Board and is subject to the provisions of the Bombay Port Trust Act, 1879.

Harbour.—Bounded on the north and east by the mainland of India and on the west by a narrow peninsula which forms a natural breakwater, the harbour is naturally protected from the violence of the south-west monsoon and provides secure and ample shelter for shipping at all seasons of the year. It is about 12 miles long, 4 to 6 miles wide with a minimum of 32 feet at low water in the entrance fairway. Spring rise above datum is 14 feet 1 inch and the range between mean low and mean high water spring tides is 11 feet 6 inches so that the Port is well-endowed by Nature to accommodate deep-draft shipping.

The Port and its approaches are well-lighted, being served by the Prongs, Kennery and Sunk Rock Light Houses, an unattended Floating Light Vessel, the South Entrance and Prongs Reef Light Buoys, and other subsidiary lights, the more important of which are the Dolphin Rock and Tucker Beacon Lights. The first two light-houses are directly connected by wireless with the Pilot Vessels and the Port Signal Station on the tower of Ballard Pier, while the Wireless Beacon installed on Kennery Island enables ships fitted with direction-finding gear to take bearings from its signals when approaching Bombay.

Passenger Facilities.—Trans-oceanic passenger traffic is mostly dealt with at the Ballard Pier Station. Coastal and Harbour Passenger traffic is dealt with at the New Ferry Wharf.

The total number of overseas passengers embarking and disembarking at Bombay in 1950-51 exceeded 135,000 while the number of passengers carried by the coastal services was over 887,000.

* See also *Shipping* for further details.

Wet Docks.—There are three wet docks, the main features of which are as follows :—

Name and date of completion	Width of entrance	Maximum available depth on sil at M.H.W.N.	Water area	Lineal feet quayage	Number of Berths
Prince's Dock (1880) ..	60′-0″	24′-9″	30 acres	6,910	9
Victoria Dock (1888) ..	80′-0″	26′-9″	25 ,,	7,805	13
Alexandra Dock (1914) ..	100′-0″	33′-0″	49¼ ,,	13,125*	20 (plus 6 berths for ferry steamers.)

* Does not include Ballard Pier.

Movement into and from Alexandra Dock is not restricted, ships being able to pass through an entrance lock 750′-0″ by 100′-0″ at all states of the tide.

The Victoria and Prince's Docks are connected by a communication passage. These Docks which were affected by the fires and explosions of April 1944 are in the course of reconstruction and are being provided with modern transit sheds.

The three Docks together have a water area of 101¼ acres and about 6 miles of quayage; extensive open storage and shed and warehouse accommodation for the reception and storage of goods, exists.

Dry Docks.—The main features of the two Dry Docks are as follows :—

Name of Dry Dock and date of completion	Length	Width	Depth on sill at mean high water neaps	Remarks
Hughes Dry Dock (1914).	1000′-0″	100′-0″	32′-9″	Divisible into two compartments so that 2 ships can be accommodated at a time.
Merewether Dry Dock (1891).	525′-0″	65′-6″	24′-9″	....

Bunders and Timber Ponds.—Beyond the Docks are the "bunders" or open wharves and basins, where coasting and country craft traffic and overside cargo from the Docks and stream are handled. These bunders have an aggregate quayage of nearly 5 miles and are equipped with cranes, sheds and other facilities for loading, unloading and storing cargo, but the labour for handling cargo at the bunders is not provided by the Port Trust and so the wharfage charges are much lower than in the Docks.

The bunder traffic is an important item in the trade of the Port, over 13½ lakhs tons or roughly one-fifth of the total tonnage of the Port being handled annually over the bunder wharves.

Adjoining the bunders are the Timber Ponds covering an area of over 60 acres, where every facility for storage and handling of timber is provided.

Bulk Oil Depots.—There are three groups of bulk oil installations, one each for liquid fuel and lubricating oil, kerosene oil, and petrol, all on land, aggregating 83 acres in extent, leased by the Port Trust.

Ample storage space is available within the Port area for grain (80 acres), cotton (127 acres, 1,000,000 bales), and manganese ore (30 acres, 300,000 tons). Large areas have also been reserved for the landing and storage of other commodities such as Coal, Bricks and Tiles, Building Stones and Iron.

Port Trust Railway

The Port maintains its own railway system which handles nearly 50 per cent of the rail-borne goods traffic of Bombay. Its yearly traffic to and from the trunk Railways amounts to over 2,000,000 tons, and its local station-to-station traffic is approximately the same in volume. The principal commodities carried are cotton, grain and seeds, oil-cake, manganese ore, sugar, kerosene and other bulk oils, coal, charcoal and china clay.

Though only 7¼ miles in actual length, it comprises over 130 miles of main lines and sidings all directly linked with the inter-railway exchange yard at Wadala, the various storage depots and the Docks and Wharves.

REVENUE AND EXPENDITURE FOR THE YEAR 1950-51

——	General Account	Pilotage Account	Special Receipts or Special Expenditure
Revenue	5,46,18,303	12,31,723	99,65,488
Expenditure	4,95,57,792	9,38,697	99,65,488
Surplus	50,60,511	2,93,026	....
Deficit	....	....	....

STATISTICS SHOWING CARGO HANDLED DURING THE PERIOD
1941-42 to 1950-51

Year	Imports	Exports	Total

Board of Trustees

Nominated by Government: Chairman, L. T. Gholap, I.C.S., H. P. Hira, K. P. Mushran, Commodore R. M. T. Taylor, R.N., M. M. Chudasama, I.P., A. N. Sattanathan, Brig. K. K. Varma, S. Jagannathan, I.C.S., Dinkar Desai, Prof. Bidesh Kulkarni, B. K. Patel., I.C.S.

Elected by the Bombay Chamber of Commerce: R. W. Bullock, M. Paspatti.

Elected by the Indian Merchants' Chamber: M. A. Master, Ramdas Kilachand, Vallabhdas V. Mariwala, Tulsidas Mulji Vishram, P. M. Chinai, Murarji J. Vaidya.

Elected by the East India Cotton Association Ltd.: Madanmohan R. Ruia.

Elected by the Indian National Steamship Owners' Association: S. N. Haji.

Elected by the Maharashtra Chamber of Commerce: M. L. Dahanukar.

Elected by the Municipal Corporation: Asoka R. Mehta, V. B. Gandhi.

Elected by the Millowners' Association: Krishnaraj Madhavjee Damodar Thackersey.

ADMINISTRATION

Secretary, A. S. Bakre.
Deputy Secretary, E. H. Simoes.
Chief Accountant, I. B. Das Gupta.
Deputy Chief Accountants, J. V. Talcherkar, R. B. C. Cour-Palais.
Chief Engineer, P. E. Golvala.
Deputy Chief Engineer, S. B. Dalal.
Docks Manager, F. Seymour-Williams.
Deputy Docks Managers, G. K. Dukes, V. Vaz, A. M. Shaikh, V. A. Kashikar, M. H. Sayani.
Railway Manager, H. A. Gaydon.
Deputy Manager, Commercial, M. E. A. Kizilbash.
Deputy Conservator, R. C. Vint.
Harbour Master, H. W. L. T. Davies.
Manager, Land and Bunders Department, E. M. Blacka.
Deputy Manager, Vacant.
Controller of Stores, P. V. Thadani.
Deputy Controller of Stores, M. R. Nanjundiah.
Chief Medical Officer, Dr. N. V. Nene.
Health Officer, Dr. A. J. Mhatre.
Chief Labour Officer, Batuk H. Mehta.
Legal Adviser, S. D. Nariman.

CALCUTTA

The Port of Calcutta is situated on the left bank of the River Hooghly which is formed by the uniting of the three offtakes from the parent River Ganges. The port is about 80 miles from the mouth of the river and 126 miles from the Western Channel Light Vessel at Sandheads. The Port is administered by a Port Commission with jurisdiction under the Calcutta Port Act from Budge Budge to Konnagar.

Calcutta is both a receiving and distributing centre for Assam and the northern and central parts of India. It is fed by products brought by a network of railways as well as by the water-borne traffic of the River Ganges. The chief exports are Coal, Tea, Jute, Gunnies, Shellac, Linseed, Manganese Ore, Pig Iron, Hides and Mica. The principal imports are Salt, food-grains, machinery, provisions, hardware, spirits and petroleum.

The total tonnage of sea-borne traffic passing through the port during the year 1950-51 was 7,501,499 tons as compared with 8,774,821 tons during 1949-50. The total tonnage of exports during 1950-51 was 4,460,927 tons and the total tonnage of imports during the same year was 3,040,572 tons. The income of the Port during the financial year 1950-51 was Rs. 6,91,29,336.

The River Hooghly is subject to strong tides and sudden alterations in the depths on the bars and pilotage is compulsory. Pilots board vessels at the Sandheads from the Pilot Brigs which are fitted with W/T and D.F. Gear. The largest vessel to enter the Port was 16,736 tons gross tonnage but speaking generally the ideal ship for the Port is a ship of under 550 feet in length, broad in beam and loading to a maximum of about 26 feet.

The Commissioners maintain a permanent River Survey Service and in addition to the daily publication of charts, maintain Tidal Semaphores and Track Boards to indicate the latest depths available. The bars are sounded to the nearest 3 inches. Local rules governing pilotage of the river are subject to change to meet alterations in the channel and to avoid interruption in the work of the Dredgers.

Navigation for small craft is not difficult as the Channel is well marked but ignorance of the local rules may cause grave danger to sea-going vessels using the Channel. Certain shallow draft craft are piloted by Inland Masters who have certificates for the River Hooghly.

The maximum and minimum depths available on the principal bars below datum during 1951 were :—

	Max.	Min.
Beaumont's Gut	17′-6″	16′-3″
Auckland	16′-6″	15′-6″
Balari	14′-6″	13′-0″
Eastern Gut	10′-6″	8′-0″
Royapur Crossing ..	17′-3″	13′-9″
Mayapur	18′-0″	13′-0″
Poojali Crossing ..	23′-6″	17′-6″
Pir Serang Crossing ..	25′-0″	16′-6″
Munikhali Crossing ..	26′-6″	16′-9″
Sankral Reach	23′-6″	16′-6″
Panchpara Crossing ..	22′-0″	18′-0″

Berths and Anchorages.—Anchorages are available at Saugor Roads, Haldia, Kalpi, Diamond Harbour, Ulubaria and Garden Reach of which Haldia, Ulubaria and Garden Reach are available only for ships on passage to and from the Port or in emergency.

In the port ships lie to moorings when in the stream or alongside jetties with cables forward and aft. The largest man-of-war so far accepted in the Port has been 10,000 tons cruiser class and one berth is available for this class of ship.

Accommodation (Kidderpore Docks).—These consist of Nos. 1 and 2 Docks and Turning Basin. There is a lock entrance 580 feet long by 80 feet wide from the river which gives access to the Dock system. Dock No. 1 is 2,700 feet in length by 600 feet wide, with a depth of 30 feet of water and has eleven berths serving single-storey cargo sheds. Dock No. 2 has a length of 4,500 feet by 400 feet and also provides a depth of 30 feet of water. It has eight general berths serving single and double storeyed sheds and six coal berths including two mechanical loading berths. Another of the coal berths is now being fitted with a mechanical coal loading plant.

King George's Dock.—This Dock comprises a lock entrance 700 feet long by 90 feet wide, five import berths, one export berth and a berth for the discharge of non-dangerous petroleum in bulk which can also be used as a laying up berth. Three of the import berths are served by three-storeyed sheds, and the other two by single-storeyed shed. The export berth is served by a two-storeyed shed. Each berth is 600 feet long and can accommodate vessels drawing up to 33 feet of water. One laying up berth 500 feet long with a depth of water of 17 feet is provided. Three lighter berths, total length 900 feet with a depth of water of 8 feet, are situated on the south bank and these berths are complete and in use. One heavy lift berth for Lighters, 400 feet long with a depth of water of 7 feet is close by.

Dry Docks.—Five dry docks, owned by the Port Commissioners, are available for the use of shipping, three in Kidderpore Docks and two in King George's Dock. In the Kidderpore Dry Docks, one 4-ton crane is located between Nos. 1 and 2 Dry Docks. Breakdown cranes of 15 tons capacity can be brought close to No. 2 Dry Dock. In the King George's Dry Docks four 3-ton cranes are available two on each side of the dry docks.

DIMENSIONS OF DRY DOCKS

	Width of entrance at coping	Width at sill level	Width across blocks	Length overall	Length on blocks	Depth over blocks at 21 feet in Dock
K. P. Docks						
Dry Dock No. I ..	69′-8″	66′-11″	67′-0″	547′-0″	507′-0″	23′-0″
Dry Dock No. II ..	69′-8″	67′- 6″	66′-2″	497′-6″	463′-0″	24′-0″
Dry Dock No. III ..	60′-0″	57′- 3″	50′-2″	350′-0″	321′-0″	20′-6″
K. G. Dock						
*Dry Dock No. I ..	87′-9″	80′- 0″	90′-9″	581′-3″	500′-0″	32′-0″
*Dry Dock No. II ..	87′-9″	80′- 0″	90′-9″	596′-4″	500′-0″	32′-0″

*These docks are arranged in tandem and can be used as one dock.

Jetties.—The Garden Reach Jetties consist of a coaling jetty for ships up to 460 feet in length and three jetties for ships up to 600 feet, the transit sheds are double storeyed. Calcutta Jetties are situated on the riverside below Howrah Bridge. There are nine jetties with a total length of 4,735 feet, but only five of them are available for ocean-going steamers. Three of the berths have two-storeyed transit shed and the remaining two single-storeyed transit sheds.

Wharves.—Petroleum Wharves at Budge are situated some 14 miles below the entrances to the docks. There are seven pontoon jetties for ocean-going vessels and one for flats and barges at which non-dangerous petroleum and its products are discharged. Of the seven pontoon jetties, one is reserved for the discharge of dangerous petroleum.

The storage installations which have a total capacity of over 50,000,000 gallons are owned by various companies who rent sites on land owned by the Port Commissioners.

Warehouses.—The Commissioners provide extensive warehouse accommodation consisting of two Tea Warehouses having a storage area of 304,000 sq. ft., a grain and seeds depot at Kantapukar comprising 37 sheds with a storage area of about 1,053,168 sq. ft., two sheds at Jhinjerapul with a storage area of 70,200 sq. ft., A and B Sheds at Kidderpore, and the Fairlie, Clive, Canning and Strand Warehouses situated close to the Calcutta Jetties with a total floor area of about 292,200 sq. ft.

Coal.—There are at present six coaling berths at Kidderpore Dock No. 2 and one at Garden Reach Jetty. Two of the Dock berths are fitted with mechanical coal loading gear, a third berth is now being so fitted.

Capacity of Coal Dumps in the Port is as follows :—

Kidderpore Docks	20,000 tons
Garden Reach Jetty	30,000 tons
Sonai Depot	100,000 tons
Total ..	150,000 tons

Water Supply.—At Kidderpore Docks there is a hydraulic system encircling Nos. 1 and 2 Main Docks, all Dry Docks, the 60 ft. Lock repairing basin and the Tidal Basin. The pressure is 750 lbs. per sq. inch. Between Nos. 1 and 2 Dry Docks there is a supply of dock water for cooling and testing at about 15 tons per hour.

A supply of water for fire fighting is available to all 3 dry docks at a rate of 85 tons per hour at a pressure of 100 lbs. per sq. inch. Unfiltered water for cooling at Nos. 1 and 2 Dry Docks at the rate of 100 tons per hour to each dock is available.

At King George's Dock a hydraulic main at 800 lbs. per sq. inch is available at all berths and alongside the downstream side of both dry docks. An additional supply is also available of 100 tons per hour at each dry dock.

Drinking water is supplied in the stream and in Kidderpore Docks, King George's Dock and at the Jetties in the river. The responsibility of supplying filtered water rests with the Calcutta Corporation under the Municipal Act. Direct supplies from quays and jetties where hydrants are available are controlled by the Port Commissioners on behalf of the Calcutta Corporation. These supplies are obtained partly from Corporation mains and partly from tube wells in the Dock Area and operated by the Commissioners.

Overall Capacity of Port.—Calcutta with the existing facilities has handled a sea-borne traffic of nearly 11 million tons a year without congestion or delay.

The total number of cargo boats licensed in the Port is 6,963, of which about 2,106 are steel lighters with a carrying capacity of about 130,825 tons.

The Port Trust Railway.—Communication between the various points in the Docks and Jetties including all the Commissioners' warehouses is maintained by the Commissioners' Railway which has 192.815 miles of permanent way and connects with the two main railway systems serving Calcutta. Goods can therefore be railed from any point on the Commissioners' premises to any part of India.

Post-War Development Schemes.—The Port Commissioners have extensive post-war development schemes many of which have already made satisfactory progress. The following are the more important schemes :—

1. Improvement to port approaches :—Research work is being carried out at the Indian Waterways Research Station, Poona and a model has been constructed there with a view to finding out whether it is possible to deepen the navigable channel by river training works. In case of this not proving feasible, the Commissioners have an alternate plan of cutting a ship canal from Diamond Harbour to the head of the Dock system which will short-circuit the use of the river itself. 2. Extension of King George's Dock. 3. Electrification of Quay cranes in Kidderpore Docks. 4. Construction of new marshalling yards. 5. Construction of new roads and land reclamation in Docks estate. 6. Construction of modern grain warehouses. 7. Provision of a mechanical coal loading plant. 8. Installation of a heavy lift crane capable of lifting upto 200 tons. 9. Purchase of new dredgers and other craft and locomotives. 10. Housing for staff.

Commissioners for the Port of Calcutta.—N. M. Ayyar, I.C.S., *Chairman*; A. N. Puri, B.A., LL.B.; K. B. Mathur; Capt. (E) T. B. Bose, I. N.; Brig. H. S. Randhawa; R. S. Trivedi, I.C.S.; S. K. Chattarjee, I.C.S.; N. K. Jalan; K. M. Naik, G.D.A., A.C.A.; D. P. Goenka; D. C. Driver; P. Mukherjee; P. R. Sarkar; S. C. Gupta; N. Roy; B. P. Singh Roy; E. J. Pakes; G. A. S. Sim; J. K. Mitter; S. K. Ghosh.

Principal Officers.—*Secretary.*—P. C. Mitter; *Traffic Manager.*—K. Mitter (on deputation), J. M. Majumdar (Offg.); *Chief Accountant.*—T. Eastment; *Chief Engineer.*—G. S. Madan, B.Sc. (Hons.), M.I.E. (India), A.M.I., C.E.; *Controller of Stores.*—T. M. Farrel; *Chief Mechanical Engineer.*—R. R. Clegg; *Deputy Conservator.*—Comdr. C. J. Mohan, I.N. (*Offg.*); *Harbour Master.*—R. T. Ware; *Port Pilotage Officer.*—A. R. Davies. *Surveyor,* U. P. Brann. *Medical Officer.*—Dr. K. Bhaduri, M.B.; *River Consulting Engineers and London Agents.*—Messrs. Rendel Palmer & Tritton.

COCHIN

The Port of Cochin, one of the five major ports in India is a natural harbour lying on the direct route to Australia and the Far East from Europe. It is open for deep-water traffic in the worst monsoons and provides a splendid anchorage at all times of the year. Any ship passing through the Suez Canal can enter the port even in the roughest weather. It serves a vast hinterland of industrial planting areas comprising the State of Travancore-Cochin and the southern districts of the Madras State and a portion of Mysore State. Foreign and coastal steamer lines touch the Port regularly and Cochin is the passenger port for the United Kingdom, etc., in South India.

The Port consists of an extensive area of sheltered backwaters behind an opening, 440 yards wide. Its location is lat. 9° 58′ and long. 76° 14′ E.

The Cochin Harbour Railway is connected with the Broad Gauge system of the Southern Railway. There is a project to connect Cochin with Quilon and Trivandrum in the south by rail. Willingdon Island aerodrome situated in the port area is a place of halt for Air Services between Madras and Trivandrum and between Bombay and Cochin. A regular public ferry service connects the neighbouring towns of Mattancherry, Fort Cochin and Ernakulam with the Island.

The development of the harbour involved the cutting of a passage through the bar which blocked the entrance from the sea to an extensive backwater. The first cut through the bar of a wide and deep channel was made in 1928. The entrance channel is 450 ft. wide and about 4 miles long, buoyed on both sides according to regulations. The activities of the port are mainly centred in Willingdon Island which has been reclaimed from the back waters by dredged soil from the inner channels. Since 1930 the harbour has been in regular use. A well equipped hotel run by Spencer & Co. has been constructed by the Port to provide accommodation for passengers and other visitors to the Port.

Inside the harbour there are sixteen stream berths. One is a swinging berth capable of accommodating vessels upto 650 ft. overall in length and 30 ft. draft. There are three tanker berths in the Ernakulam channel, two of which can accommodate tankers of 525 ft. overall in length while the third one can take tankers of 450 ft. overall with a draft of 30 ft.

The deep water wharf which is 2,200 ft. long can accommodate at a time 4 vessels of 450 ft. in length. The construction of an R.C. frontage throughout this length which will eliminate the fender pontoons now used between the ship and the wharf is in progress and is expected to be completed in September 1952. 12 electric level luffing travelling cranes have been provided at the wharf capable of lifting weights upto 3 and 10 tons. These will be shifted to the frontage and in addition ships will be able to use their derricks freely for handling the wharf cargo. A floating crane for lifts upto 30 tons is also available. Sailing craft are moored with their own gear in a separate anchorage. One warehouse and eight sheds in Willingdon Island are available for storage of goods. It is proposed to construct two more ware-houses shortly. There are three sheds at the main wharf for the handling of goods in transit and a fourth is under construction. Vessels are brought into or taken out of harbour at practically any state of tide, day or night. There is a customs wharf with one 5-ton and three 2-ton hand cranes. A low wharf with lighterage jetties has been provided mainly for the handling of rail-borne goods traffic with one 10-ton hand crane and four 2-ton hand derricks. There is a dry dock 240 ft. long and 44 ft. wide, suitable for vessels of less than 14½ ft. draft; this is mainly intended for docking craft belonging to the Harbour Authority; there is also a fitting out wharf 200 ft. long with 11 ft. deep, close to Dry Dock. A well equipped workshop is available for carrying out the normal running and hull and engine repairs. Bunker coal, diesel and fuel oil are available. A scheme for the construction of bunker oil installations on the Willingdon Island is also under examination. Fresh water from tank barge is supplied at the rate of Rs. 2 per ton during day, night or holiday, with a minimum of Rs. 40 per vessel, per day, delivered on board.

The principal imports are foodgrains, mineral oils, coal, cashewnuts, hardware, metals and provisions.

The principal exports are coir and coir products, tea, rubber, cashew kernels, ginger, pepper and spices.

Statistics showing the growth of the Port from 1945-46 to 1950-51.

Years	Imports	Exports	Total
	Tons	Tons	Tons
1945-46 ..	380,564	111,991	492,555
1946-47 ..	970,312 (Dead weight)	296,026 (Dead weight)	1,266,338 (Dead weight)
1947-48 ..	850,995	316,315	1,167,310
1948-49 ..	991,353	250,932	1,242,285
1949-50 ..	1,003,338	226,732	1,230,070
1950-51 ..	1,098,214	248,964	1,347,178

The administration of the Port is in the hands of an Administrative officer working directly under the Ministry of Transport of the Government of India. He is assisted by an Advisory Committee consisting of the representatives of the Government of India, the Government of the State of Travancore-Cochin, and the local Chambers of Commerce and Municipalities.

Administrative Officer.—M. S. Venkataraman, B.A.; *Chief Engineer.*—C. V. Venkateswaran, B.E.; *Executive Engineer.*—Madan Gajanan Pai, B.E., A.M.I.E.; *Port Officer.*—H. G. Fletcher, J.P.; *Harbour Master.*—B. Brook; *Traffic Manager.*—Topen Bhose, B.A.; *Chief Accountant.*—A. N. Ayyaswami, M.A.; *Port Health Officer.*—Dr. A. N. Sinha, M.B.B.S., D.P.H.; *Mechanical Superintendent.*—R. Bazely; *Secretary and Statistical Officer.*—J. Cyril Raj, M.A.

MADRAS

The Madras Harbour is an artificial one formed by two arms projecting from a low, sandy coast. There is a lighter fleet consisting of 53 crafts which include licensed and unlicensed crafts owned by firms and others. Two tugs are available for assisting vessels and one for towing the lighter fleet. Loading and discharging by means of lighters are effected on a frontage of about 5/8 of a mile partly ferro concrete wharves and partly at the west quay equipped with steam, and electric cranes. There are about 8.2 acres of transit shedding alongside the quays for the accommodation of all types of cargo and also 12.90 acres of warehouses for lease to exporters or importers. There is a slipway for the repairs of small craft up to 965 tons. Ships get their water alongside the quays or from water boats. Large passenger vessels habitually use the quays which have direct railway connection with the neighbouring railway. Coal for bunkers and oil fuel are always available. There is a fumigatorium for fumigating American cotton.

The affairs of the Port are administered by a Board of Trustees which function under the Madras Port Trust Act. The Chairman is the Chief Executive Officer of the Board.

The Port is about 3/5 mile square (excluding boat basin, etc.) with an area of approximately 200 acres.

There is accommodation for 18 vessels inside the harbour, 9 at Moorings and 9 at Quays. The depth at moorings ranges from 30 ft. to 31 ft. 6″ and at quays from 26 ft. to 30 ft. Pilotage is compulsory. There are no navigational difficulties and the Port is approached direct from the open sea.

The Income and Expenditure for the year 1950-51 were Rs. 1,20,93,682 and Rs. 76,14,446 respectively.

The chief imports are coal and coke, food grains, mineral oils, metals, timber, textiles, building materials, cement, etc., Government stores, machinery, hardware, hides and skins, paper and stationery, tanning substances including wattle bark and chemical manures. Seeds and nuts, hides and skins, vegetables and provisions, textiles, turmeric, ores and tobacco are the principal exports.

The export of groundnut oil is also an important item and three oil tanks have been erected.

Statistics showing the growth of the Port from 1941-42 to 1950-51

Years	Imports	Exports	Total
	Tons	Tons	Tons
1941-42 ..	573,296	297,372	870,663
1942-43 ..	337,188	158,591	495,778
1943-44 ..	696,007	374,079	1,070,080
1944-45 ..	2,053,606	511,461	2,582,279
1945-46 ..	1,833,496	658,332	2,519,428
1946-47 ..	1,400,229	336,674	1,736,908
1947-48 ..	1,382,795	278,369	1,661,164
1948-49 ..	1,664,881	240,011	1,904,892
1949-50 ..	1,592,249	191,321	1,783,570
1950-51 ..	1,925,152	248,976	2,174,128

Trustees of the Port: *Appointed by Government.*—G. Venkateswara Ayyar, I.C.S., *Chairman.*—R. K. Vaish, M.A., Collector of Customs; M. T. Raju, I.C.S., Director of Industries and Commerce; C. Narasimham, M.A., B.L., Commissioner, Corporation of Madras; T. Berry, Principal Officer, Mercantile Marine Department, Madras; Maj.-General H. M. Mohite, Area Commander, Madras; S. Guruswami and B. S. Murthy, M.L.A., Representatives of Labour.

Elected by Commercial Bodies, etc.—(Representing Corporation of Madras): S. Ramaswami Naidu; (Representing Madras Chamber of Commerce, Madras): J. R. Galloway and R. E. Castell; (Representing Southern India Chamber of Commerce): V. M. P. Muthuswamy, T. K. Singaram, M.A., B.Com., Narandas J. Dutia, Janab M. M. Syed Mohamed Rowther, P. Lakshmipathy, V. Pandurangiah; (Representing the Andhra Chamber of Commerce): G. Srinivasa Reddi, P. V. Rama Rao Guptha.

Principal Officers.—*Port Engineer.*—S. Nagabushanam, B.A., M.E., A.I.E.E.; *Deputy Port Conservator.*—L. J. Whitlock; *Chief Accountant and Financial Adviser.*—G. Venkataraya Pai, M.A., F.I.A.C., M.I.R.A.; *Traffic Manager.*—L. A. Abraham, B.A., F.C.I.; *Executive Engineer.*—K. N. Srinivasan, B.E., A.M.I.E.; *Mechanical and Electrical Engineer.*—F. G. Cooper; *Medical Officer.*—Dr. T. S. Subramaniam, M.B., B.S., F.R.F.P.S., D.T.M., D.T.H.; *Secretary.*—T. K. Parameswaran Nambiar, B.A.

VIZAGAPATAM

Vizagapatam Harbour was created in order to supply an outlet for a large area of fertile country adjacent to the east coast of India, with considerable mineral resources and no alternative access to the outside world. The scheme was first formulated many years ago in the days of the East India Company, but was not actually taken up before 1925. In 1933, the harbour was first opened for sea-going vessels, and it now, provides the following facilities:—

An Entrance Channel, sheltered by hills, with a minimum depth sufficient to admit vessels drawing 28½ feet of water on any day of the year, gives access to a completely sheltered inside harbour, provided with three quay berths, each 500 feet long, and equipped with fully portal electric cranes, transit sheds, and railway lines, both behind and on the quay-side of the transit sheds. Two of these berths are specially equipped for the rapid shipment of manganese ore in bulk; one of them is also equipped as an auxiliary coal bunkering berth. In addition, two special coal bunkering berths (one of which is constructed of concrete piles) are provided. The conversion of the 2nd jetty to concrete piling is on hand. Four mooring berths are also provided, at which vessels are served by a fleet of lighters operated by the port. A timber jetty berth for bunkering fuel oil has been provided. Behind this, oil storage tanks are installed. A second oil berth to be constructed of concrete piles for the proposed new oil installation is under consideration.

Storage Sheds, for lease to import and export merchants, are provided with water frontage and rail service in the rear. From these sheds, export cargo can be carried directly alongside vessels by means of lighters.

The hauling equipment of the Harbour consists of five tugs of 1050, 900, 600, 450 and 400 H.P.

A graving dock with an entrance 60 feet 6 inches wide is provided; but in view of the fact that its length is at present limited to 366 feet, it is used principally for docking the craft of the Port, although it is also used by a certain number of small size vessels of other ownership. The construction of a Dry Dock to take ships upto 600 ft. in length is contemplated. The port has a floating crane and can deal with lifts upto 50 ton capacity.

There is a special railway connection, linking it with Madhya Pradesh. Additional railway lines for the development of the hinterland have been surveyed.

Income and Expenditure of the Port for the year 1950-51

	Receipts. Rs.	Expenditure. Rs.
Port Fund ..	53,91,615-2-4	54,54,375-6-6
Pilotage Fund ..	1,34,099-1-7	98,964-15-5

Statistics showing the growth of the Port from 1947-48 to 1950-51

Year	Imports	Exports	Total
	Tons	Tons	Tons
1947-48 ..	170,447	545,994	716,441
1948-49 ..	140,463	546,859	687,322
1949-50 ..	170,889	768,552	939,441
1950-51 ..	67,334	878,469	945,803

The Port is administered by the Government of India, Ministry of Railways (Railway Board), through the Eastern Railway.

Principal Officers.—*Port Conservator.*—K. B. Mathur, General Manager, Eastern Railway, Calcutta; *Port Administrative Officer & Port Engineer.*—S. Nanjundiah; *Deputy Port Conservator and Harbour Master.*—E. H. Glassup; *Superintendent, Traffic.*—A. K. Chakravarti; *Superintendent, Mechanical.*—A. W. De Lima; *Chief Accountant.*—P. T. Mathew.

Other Ports

ALLEPPEY

Alleppey, the second port and commercial centre in the State of Travancore-Cochin, is situated about 50 miles north of Quilon, and 35 miles south of Cochin. Alleppey is an open port. There forms a mud bank occasionally off and near the pier which affords smooth water for shipping operations. A canal connects the port with the interior backwaters. Its warehouses are a convenient depot for the storage and disposal of all fresh produce, and it possesses a roadstead affording safe anchorage during the greater part of the year.

Port dues are 9 pies per registered ton.

The chief exports are copra, cocoanuts, coir fibre and matting, cardamoms, ginger and pepper.

Principal Port Officer.—M. Raja Raja Varma, B.A.

BALASORE

Balasore, situated on the right bank of the Burabalang river and headquarters of the district of that name, was the only port of which Orissa could boast until the opening up of the country after the great famine of 1866. It was frequented at that time by vessels with cargoes of rice from Madras and with cowries, then largely used for currency, from the Laccadives and Maldives. The port is of historical interest as being one of the earliest European Settlements in India, factories having been established here in the 17th century by English, Dutch, French, Danish and Portuguese Merchants.

Balasore as a port is practically defunct. Foreign ships have ceased to visit since 1904 and coastal ships since 1910. An occasional country craft of negligible tonnage enters during the cold weather season for paddy, but beyond that there is no seaborne trade either import or export.

BHAVNAGAR

Bhavnagar city, the administrative headquarters of Gohilwad Division of the State of Saurashtra, lies near the head of the Gulf of Cambay in Lat. 21° 47′ N., Long. 72° 08′ E.

The port facilities comprise a deep water anchorage at Ghogo, a concrete jetty capable of berthing two ocean-going vessels and complete with modern crane and rail facilities five miles north-west of the anchorage, and a fully equipped steel jetty for small coasting vessels 8 miles further up the Bhavnagar creek from concrete jetty.

There is ample warehouse accommodation and direct rail connection between the jetties and the metre gauge system of India.

BIMLIPATAM

Bimlipatam is 22 miles north-west of Waltair. It is connected by good roads with Vizianagram and Vizagapatam. The harbour is an open roadstead and ships lie about a mile off the shore and loading and unloading is effected by lighters. There are considerable exports from here of jute, hemp, myrobalans, niger seeds to foreign ports.

Coastwise imports and exports are of little importance except import of jute from Chittagong.

Foreign and coasting steamers call at this port since December 1947. Vessels anchor from 5 to 8 fathoms abreast the river Gousthani during the south-west monsoon, and a little further to north in the north-east monsoon. (Bearings are different). Bottom is sandy and rocky.

Dues are to be paid according to schedule; overtime fees, ground rent, and boat license fees are also charged.

CALICUT

Calicut, the capital of the Malabar District, is some 42 miles south of Tellicherry and about 90 miles north of Cochin. It is 413 miles by rail from Madras. The port is practically closed during the south-west monsoon from the end of May until the latter half of August. The sea is very shallow and steamers anchor about three miles from the shore, connection being maintained by lighters and small boats. Sailing vessels of 150 tons and below lie about 800 yards off the shore.

Beypore, seven miles to the south of the mouth of the river of that name, is regarded as a wharf of Calicut Port. It has a number of wharves along the river bank and native craft of 150 tons burthen are able to anchor half a mile from the mouth.

The principal exports are coir, coir fibre, copra, coffee, tea, pepper, ginger, coconuts, tiles, timber and fish-manure. The foreign import trade, consists chiefly of general merchandise.

CHANDBALI

Chandbali situated on the left bank of the Baitarani River, is a port of some importance on the Orissa Coast. It has a flourishing coasting trade with Calcutta but there is no direct foreign trade as in former days. The exports consist mainly of rice and the imports are cotton twist, piecegoods, kerosene oil, salt and gunny bags.

Port Officer.—J. P. David.

CUDDALORE

Cuddalore is situated about 15 miles south of Pondicherry. Steamers anchor about a mile off-shore. The harbour wharves are situated on the western bank of the Uppanar Backwater and have been provided with a quay wall to facilitate the loading and unloading of cargo boats therefrom. It is connected to the main line by railway.

The export trade normally consists of groundnut kernels, oils, cement and coloured piece-goods in small quantities. The coastal import trade consists mainly of grain, pulse and coal. The foreign import trade is chiefly in boiled betelnuts from the Malay Straits.

There is a flagstaff and a Signal Station at the lighthouse.

KUTCH MANDVI

The harbour situated in the Gulf of Kutch, is protected against westerly winds by the Albert Edward Breakwater, 1,850 feet long, and craft of from 9 to 10 feet draught can enter the harbour at High Water Neaps. There is also a pier and pitched slope where country craft can secure alongside and work cargo.

The Port is unfortunately exposed to the full blast of the south-west monsoon gales, and is closed for maritime traffic from about the end of April until the month of September.

During the fairweather season coastal steamers of the B.S.N. Co. call regularly and anchor about 1½ miles south of the port every week. passengers and cargo being discharged into small craft for conveyance between steamers and shore.

Kutch Mandvi Lighthouse: A light is exhibited at an elevation of 115 feet from a white masonry tower 56 feet in height situated on the south-west bastion of Mandvi Fort. A light is also exhibited at an elevation of 39 feet from the end of the breakwater.

The trade of the Port amounts to Rs. 135 lakhs annually. Recent commercial undertakings include a Match Factory, Oil Mills and Metal Works.

CUTTACK

Cuttack, is situated 253 miles from Calcutta at the apex of a triangle formed by the Mahanadi and Katjuri rivers. It is on the main line of railway running between Madras and Calcutta and is connected by canal with Chandbali between the two of which inland steamer trade exists. The canal links Cuttack with Calcutta. A short distance up the coast from Cuttack lies the port of False Point which has been closed since 1924, as the seaborne trade had entirely disappeared.

The decline of the smaller Orissa ports is due to a variety of reasons and usually the chief reason quoted is that the ports have silted up but this is not actually the case. The ports have declined for two main reasons namely the coastal railway has automatically cut out the sea trade since. It cannot assist it and secondly that larger deep draft steamers have taken the place of the smaller coasting steamers and sailing ships of 30 years ago. The long and deeper draft steamers cannot enter such small ports as Balasore, Chandbali and False Point and hence the trade which at one time found its way by sea has now been caught by the railway and carried to the larger ports like Calcutta from where it is distributed elsewhere

DHANUSHKODI

Dhanushkodi is the terminus of the Southern Railway on the south-east extremity of the Island of Rameswaram at the junction of Palk Strait with the Gulf of Mannar. It is connected with Talaimannar in Ceylon by steamer service, the journey being made in about two hours. The port is equipped with a pier belonging to the Southern Railway. Cargo is loaded direct from the railway trucks on the pier into steamer hatches.

The Port is an open roadstead. The ferry steamers of the Southern Railway are moored at their own pier. No other steamers call here.

There are no channels or anchorages at the Port.

Port dues are collected on the net tonnage of vessels calling under the Indian Ports Act XV of 1908.

Average annual receipts of the Port are Rs. 1,200 and charges Rs. 3,000.

The chief exports are fish (dry and salted), cotton piece-goods, chillies, onions and turmeric and imports—arecanuts, and hides and skins.

Imports & Exports during 1950-51

	Tons
Imports	4,881
Exports	13,998

The Port Conservator, Dhanushkodi, is the principal Officer of administration of the Port.

DWARKA

Just below Port Okha is Dwarka, a famous place of pilgrimage. After the development of Port Okha, Dwarka has lost its importance as a port. Consequently the ocean-going steamers between Bombay and Karachi at present generally do not touch at Dwarka but at Port Okha. Steamers lie off at some distance from the shore and the traffic is chiefly local.

GOPALPUR

Gopalpur in the Ganjam District is situated ten miles from Berhampur on the B.N.Rly. It lies between Lat. 19°13'N., Long. 84°52'E.; R of T. Sp. 6½ ft., Neap 4½ ft.

At present there is no shipping and trade at the Port. But usually the chief imports are provisions, grain, tobacco, corriander seeds, soap, nuts, empty bottles, potatoes, ginger, matches, coconut oil; and the exports are paddy, pigs, rice, gingelly seeds, dry leaves, horse grain, prawns, skins, and chuva oil. There is passenger trade with Burma.

The port is an open roadstead. Cargoes are landed and shipped on beach. Anchorage in 6 to 7 fathoms, sand and mud.

Port dues: Foreign vessels 3 annas per ton per voyage; coasting vessels, 1 anna per ton once in 30 days.

The Port 'Aga' Light gives out a white flash every 5 seconds. Visibility:—16.5 miles. Position:—N 53° W(T), 5 cables from the shore and Height:—148.87 feet above the M. Sea Level.

There is a Steel Flagstaff and International code flags only are used. Storm signals are also hoisted from the flagstaff, and the "General System" is in force.

Port Conservator: A. D. Bhavanasi.

KAKINADA

Kakinada, is situated on the Kakinada Bay, just north of the Godavari River, about 80 miles south of Visakhapatnam and 270 miles north of Madras. It ranks third in importance among the minor ports of the Madras State. Large steamers anchor about 5 miles from landing and shipping operations and service is maintained with lighters which land cargo at the numerous small wharves and jetties constructed on the banks of the Kakinada Canal.

Foreign Export trade consists of tobacco, palmyra fibre, castor oil, crushed bones, horns, castor seed, etc. and Import trade includes paints, jute, gunnies, tea, paper and condensed milk from Calcutta.

Foreign Import trade consists of wheat.

Coastal trade at present consists of turmeric, pulses, castor and groundnut oil, tamarind seed, gingelly seed and rice.

Port Officer:—W. A. Don Sainter.

KANDLA

Kandla Creek forms a natural harbour with good anchorage and sufficient depth of water for large ocean-going cargo steamers. The Port was opened for traffic in 1931 and has been recognised in Admiralty Chart No. 43 in the Gulf of Kutch.

The present facilities at the port consist of a flue concrete jetty with 30 feet depth at M.L.W.O.S. and is capable of taking one steamer upto 500 feet length alongside. Ships can also anchor in deep water in the Creek for loading and unloading cargo by lighters. The drafts of the incoming and outgoing ships are limited by the bar at the entrance to the Creek which has a minimum depth of 12 feet at M.L.O.W.S. Ships upto 26 feet draft at Neap tides and 31 feet draft at Springs can cross the bar near high water times.

The Pilot meets the ships at the outer Tuna buoy in position 22°-50'-42" N. 70° – 07' -04" E. The channel is temporarily well marked by unlighted conspicuous buoys Red to Port and Black to Star-board but it is intended to mark the channel all the way by lighted buoys according to the Lateral System of the Uniform System of Maritimé Buoyage. Any change in position on system of buoys and/or navigational marks is notified in Notices to Mariners.

There is a timber jetty which is used for embarking and disembarking passengers by ferry launches to and from Navlakhi.

There is 36,000 sq. ft. of covered godown area available and also 24,000 sq. ft. open area for storage of cargoes in fair season.

The Port was taken over by the Government of India, Ministry of Transport on 1st April, 1950. The surveys and investigations are under way and the work of constructing the main harbour is expected to be started very shortly. The work of connecting Kandla and Deesa by a M.G. railway is also progressing.

The figures of imports and exports from the Kandla Port during recent years have been as follows:—

Year	Imports in tons.	Exports in tons.
1948–49	39,162	65,857
1949–Nov.'49 ..	27,204	60,497
1950–1951 (Nov.) (Oct.)	52,886	68,842

The income and expenditure of the Kandla Port has been as follows:—

Year	Income Rs.	Expenditure Rs.
1948–49	1,54,832	7,34,279
1949–to Jan. 1950	1,88,352	1,52,682
1950–51	3,25,808	3,04,949

MANGALORE

To the south of Goa lies the Madras district of South Kanara whose district headquarters is Mangalore, open to the coasting and foreign trade. Mangalore is situated at the junction of the Gurpur & Netravati Rivers, about 170 miles south of Mormugao. It is a tidal port served chiefly by backwater communication with the hinterland. It is the north-western terminus of the Southern Railway.

It is an open roadstead, steamers anchor about 2 miles off the shore in 5 to 6 fathoms of water. Native craft of small draft enter the backwater at all states of the tides and anchor in the inner anchorage. Vessels of low tonnage berth at the wharves. Vessels below 100 tons anchor in backwater, and the cargo is conveyed by lighters from the anchorage to the wharves. The length of the landing and shipping wharves at present is 3,156 ft. and an extension of 880 ft. opposite the Railway Goods shed has been completed to facilitate rail-cum-sea traffic. There are three hand cranes at this Port; one of 5 tons within Customs enclosures and the other two 1½ tons at South and 2 tons at North reclamation respectively. For the use of 5 tons crane a fee of Re. 1-2-0 per ton lift, is charged by this department.

Motor Launch 'Mangalore' and Steam Tug 'Charles Henderson' are available for towing lighters and vessels from backwater to sea and *vice versa* and conveying passengers and ship's papers to and from the steamers at the outer anchorage. In addition there are also 3 private launches available at the Port.

The chief exports to Europe are pepper, tea, cardamun and cashew kernels (exported also to the United States) from neighbouring areas, coffee and sandalwood from Mysore, tiles, salt fish, and fish manures to Ceylon, Goa and the Persian Gulf. The foreign import trade is steadily increasing.

Mangalore is the favourite port on the coast for the Laccadive and Amindivi Islanders, who bring their coir and other coconut produce there for sale.

MASULIPATAM

Masulipatam is the principal port in the delta of the Kistna River. It is an open roadstead. A flashing light is exhibited. There is a conical buoy 4 miles eastward of the Lighthouse marking the position for boats to wait outside the bar in order to communicate with vessels approaching the Port. The roadstead is capacious and holding ground good. A convenient anchorage is in depths of 5½ fathoms, about 5½ miles east-south-eastward of the Lighthouse.

Port dues are at Re. 0-4-0 per ton for coasting steamers, and Re. 0-6-0 per ton for foreign steamers. Landing or shipping fees are charged at Re. 0-12-0 per ton of cargo.

Normal annual income is about Rs. 20,000 and expenditure is Rs. 18,000.

Port Conservator.—E. Sriramamurti.

NAVLAKHI

Navlakhi is one of the chief ports of the State of Saurashtra and has a fine situation on the coast of Saurashtra. Ships anchor from about 1 to 3 miles from pier. Navlakhi is the terminus on the metre-gauge line of the Morvi section, Western Railway, and is thus directly connected with Delhi, Rajasthan and Gujarat. The port is open throughout the year and has been greatly developed in the last decade. It has ample godown space for storage purposes.

There is a Ferry Service running daily between Navlakhi and Kandla. It is the safest and shortest route connecting Kutch with rest of India.

NAGAPATTINAM

Nagapattinam, the chief port in the Tanjore District is about 13 miles south of Karikal. The harbour is equipped with wharves and other facilities for the landing and shipment of goods and the considerable foreshore to the north is utilized for the storage of timber. Nagore is the eastern terminus of a branch of the Southern Railway and a siding runs into the harbour

premises at the Nagapattinam Beach Station. The port is further connected by river and canal with the tobacco growing areas to the south. The harbour is situated at the junction of the Kaduvaiyar River with the sea. Nagore, 5 miles to the north, a great place of pilgrimage for Muslims, is a wharf of Nagapattinam. Steamers anchor in the roads about a mile off from the shore and cargo is transported between ship and shore by country crafts of which abundant supply is available locally. The depth on the bar varies from 1½ feet to 3½ feet L.W.O.S.T. according to season.

Port dues two to six annas per ton. Landing and shipping dues 9 annas to Rs. 1-2-0 per ton.

The principal exports from Nagapattinam are jaggery, onions, beedies, turmeric, tamarind and coloured cotton piece-goods, tobacco and fresh vegetables for Penang, Singapore and Colombo, the port being the chief provisioning centre for the coolies who are constantly leaving by this route to work on rubber and tea estates in Ceylon and the Federated Malaya States.

The principal imports are betelnuts and scrap iron.

Port Officer.—M. L. Advani.

PORBANDAR

Porbandar is situated half way between the ports of Bombay and Karachi. Ocean-going steamers anchor at about 1.2 mile from the shore. Port of Porbandar is an important regular port of call for the B.I.S.N.Co. Ltd.'s steamers to embark and disembark passengers to and from Africa. It has been so for the last 25 years. The cargo is discharged into lighters at the open roadstead which are towed to the creek by Port tugs. The length of the quay wall, which runs throughout the length of the creek, is about 1,000 yards. The wharf area is more than one square mile. There is a metre-gauge railway line running right along the quay wall, which connects the port of Porbandar with various important business centres in the interior of India, such as Delhi, Ahmedabad, Bombay. The port being an open roadstead is closed for steamship traffic between 15th May and 15th September, being the period of high seas and monsoon on this coast.

The principal imports at this port are wet and dry dates, timber, coal, sugar, machinery, petrol, kerosene, coconuts, jaggery, etc. The exports are salt, cement, ghee, white clay powder and stone.

During the war the trade of Porbandar was chiefly coast-wise.

Port Officer.—T. N. Oza; *Dy. Supdt. of Customs.*—R. M. Bhatt.

PORT OKHA

Port Okha is situated at the extreme point of Saurashtra Peninsula. It is under the authority of Bombay Government, and lies in a strategic position readily accessible to all steamers trading along that coast.

The port is approached by the channel which is buoyed to the east of Samiani Island. D. at 19 feet at L.W.O.S.T. Pier of reinforced concrete 400 feet. One steamer can be berthed at pier and two steamers at moorings in the harbour working into lighters. D. at pier 27 feet; depth at mooring 20 feet at L.W. Ships with deeper drafts are worked in roadstead, depending on weather conditions and Port's convenience. Two steam cranes 2 tons each, 16 steel barges Equipment: capacity about 1000 tons; Twin Screw Steam Tug 850 I.h.p. fitted with fire extinguishing and salvage apparatus. The Port has railway connections with Delhi and central India. Bunker coal and oil and fresh water can be obtained from the pipeline on the pier.

Imports include manufactured iron, hardware, machinery, sugar, soap, perfumes, medicine, dates, coal, glassware, petroleum, fuel oil, kerosene, mill store and general goods and grains.

Exports are salt, bye products of salt, chemicals and cement.

Port dues are 0-1-6 per N.R.T. once in 30 days for ocean-going steamers and sailing ships. For vessels working less than 200 tons the rates are half of normal. Pier dues are Rs. 50, mooring buoy Rs. 25 per day.

Pilotage.—Rs. 100 per attendance per service. Tug Charges.—Rs. 150 for each service.

Port Officer.—Capt. S. K. Gupta; *Harbour Master.*—Capt. S. K. Gupta; *Harbour Engineer.*—M. M. Mehta, and *Traffic Supervisor.*—G. K. Nighoskar.

QUILON

Quilon, the "Coilum" of Marco Polo, has been a trading centre from very early times. It is connected with Alleppey by backwater and road transport, and is on the Shencottah-Quilon-Trivandrum branch of the Southern Railway. Vessels anchor about ½ mile from the shore.

The chief exports are coconut oil, coir mats, canoes, timber, fish, ilmenite and cashew kernel. The export of cashew kernel in steamers bound for U.S.A. ports is carried on during the seasonal months—August to May—by means of floating docks. Raw cashew nuts from Portuguese East Africa is the chief item of import from foreign countries through this port. During seasonal months, food grains and sundry cargo are also imported. Since steamers can anchor in deep waters (7 to 8 fathoms) quite close to the shore the port has got facilities for improving the trade.

SURAT

Surat is situated 14 miles from the sea with which it is connected by a river negotiable only by small country craft. Surat was one of the earliest and most important of the East India Company's factories, and its trade was very considerable in agricultural produce and cotton, the value of which was estimated in 1801 at over £1,000,000. A hundred years later this total had contracted to £200,000 and in the last fifteen years the decrease has been even more marked, most of the trade being now transferred to Bombay owing to the linking up of the two ports by the Western Railway.

TELLICHERRY

Tellicherry is situated on the Madras-Mangalore line of the Southern Railway and is about 94 miles south of Mangalore and 14 miles south of Cannanore, a town of about the same size with much smaller foreign trade.

Steamers which anchor about two miles off the shore can work at Tellicherry even during the monsoon when all the other Ports on the coast are closed, owing to the natural backwater provided by the rocky approaches to the Port. Facilities for landing and shipping of cargo are provided. There is a pier with 4 one-ton cranes and one five-ton crane, wharf wall extending to nearly 600 feet on either side of the pier. Port dues leviable on steamers vary from 4 annas to 6 annas a ton according to the character of the voyage of the steamer.

The principal exports are coffee and pepper brought down from interior areas by road, also copra, ooconuts, sandalwood, tea, ginger, timber, rosewood, and the chief imports are grains and pulses, salt, kerosene oil, piece-goods, metals and glassware.

TUTICORIN

Tuticorin, an important port of southern India, is situated near the southern edge of the Coromandel Coast. It has the largest trade in South India next to Madras and Cochin. The port is open all through the year and ships have to anchor in open roadstead 5 to 6 miles off the shore. Hare Island upon which one lighthouse is situated affords considerable protection to lighters and other craft used for landing and shipping and the work is seldom interrupted by bad weather. The port commands a very large import and export trade and is a direct link to Colombo, other coastal ports in India and foreign ports.

The chief articles of export are cotton, senna leaves, onions, chillies and livestock. The Southern Railway runs alongside the landing and shipping wharves from which goods can be transhipped to launches and lighters.

The port has an area of 15.7 acres.

Vessels anchor in open roadstead 5 or 6 miles from shore. There is a boat channel 400' wide from shore to deep water with depth of 11'-0" L.W.O.S.T. For handling the cargo from cargo boats, there are five piers of lengths 315', 478', 138', 238' and 328'. Cargoes upto 5 tons can be handled by cranes.

The port is safe for ships all through the year. There are two lighthouses one at Hare Island and the other at Devil's point. The light at Hare Island is an Aga white light 1 second, eclipse 9 seconds, visibility 14 miles and candle power 1,000 British candles. The light at Devil's point is a flash light giving 30 flashes per minute, visibility 11 miles and candle power 207 British candles.

Landing and shipping dues of Rs. 1-1-6 per ton are charged generally. Foreign steamers—3 annas per ton; coasting steamers—2 annas per ton; sailing vessels—1 anna per ton.

The income and expenditure as per the Administration Report for 1950-51 were Rs. 5,56,922 and Rs. 4,97,227 respectively.

The port stands first in rank among minor ports and third in the State of Madras in trade next to Madras and Cochin.

A total 2,88,582 tons of goods were imported in 1950-51, the chief imports being grains, coal, cotton, machinery, firewood, palmyrah, Eakel baskets. 2,24,582 tons of goods were exported in 1950-51, the principal exports being onions, chillies, cotton, yarn, fibre, salt, sheep, dry fish, cotton piece-goods, cotton waste and cement.

The port is administered by a Board of seventeen trustees.

Chairman, Port Trust.—P. C. Alexander, I.A.S.; *Port Officer, Secretary and Traffic Manager, Port Trust.*—A. Mudle.

OVERSEAS COMMUNICATIONS SERVICE

OVERSEAS Communications Service is a recently acquired State activity working directly under the Ministry of Communications on commercial lines, with Head Office at Bombay. Its functions are provision, operation and development of all facilities for communication between India and the outside world.

Just as speedy transport commenced only after the discovery of steam power, so had long distance communications to await the discovery and applications of electricity. Till early this century the electric telegraph and its counterpart the submarine cable remained the only means of national and international contacts. Electric power in the shape of radio did not much come into civilian use till after the first war.

As for India, submarine cables owned and operated by the Eastern Telegraph Co., Ltd., London, remained the country's only means of foreign communications till 1927 when the late Indian Radio Telegraph Co., Ltd., of Bombay, started a radio telegraph service with the U.K. under an agreement with Government of India. The service was based on the short wave "Beam" principle enabling radiated power to be confined to a narrow cone or "Beam", sharply directed towards the destination, in this case the U.K.

The Beam could handle messages at over 150 words per minute and meant great economy in power. Consequently, "Beam" telegraphy proved cheaper and more expeditious. So wherever the Beam services started, such as U.K./Canada, U.K./South Africa and U.K./Australia, they meant severe competition to the existing submarine cables. It must be mentioned that by the time the Beams came into service, there had already come into being a large network of submarine cables with millions of pounds of both private and Government capital invested in them. Hence unbridled competition between the radio beam and the cable, would have resulted in chaos and ruin in international communications. Besides, defence services long accustomed only to the cable, saw safety and secrecy in it and would not allow the cable to go under. For these and other reasons, a merger of cable and radio interests took place all over the Commonwealth. In India the merger became effective in 1932; the I.R.T., while still operating the radio beam, became Indian Radio & Cable Communications Co. Ltd., by acquiring the operating rights on the cables landed at Bombay and Madras. As stated earlier the Company continued to be responsible for the entire foreign communications of India until the Government of India acquired them on 1st January, 1947.

On the eve of nationalisation the I.R.C.C. Co. owned and operated the Indian ends of the following services:—Two direct radio-telegraph services to the U.K., one each to China, Australia and the U.S.A. and one radio-telephone service to the U.K. From Bombay one cable-chain circuit to the West, viz., Bombay-Aden-Port Said-Alexandria up to London. Also from Bombay a second chain circuit, Bombay-Aden-Mombasa-Zanzibar-Seychelles. From Madras two cable chain-circuits; *viz.*, Madras-Penang-Singapore. Only the radio stations in India were the property of I.R.C.C. Co. the cables and relative operating gear remained the property of Cable and Wireless with a *modus operandi* with the I.R.C.C.

The radio telephone service was primarily to the U.K., calls could be extended to other countries and some ocean liners but only *via* London. Similarly the Chinese, Australian and the U.S.A. direct radio services carry only terminal traffic, *i.e.*, messages confined to these countries and their possessions; it is not permissible for them to handle messages in "transit" destined to places outside their territorial jurisdiction.

All the European States, most of Africa and the Middle East are reached only *via* London, through the circuits of Messrs. Cable and Wireless Ltd., London, acting as the clearing house for most of India's foreign traffic. This arrangement has its own advantages and limitations.

The requirements of the last war, with India as a forward base of operations in the East, demanded additional circuits, such as Delhi/London, circuits to China, Australia and U.S.A.

POST-NATIONALISATION

In 1947 the service suffered the loss of some very senior members of the staff. Conferences were also held on the development of Commonwealth communications.

In 1948, O.C.S. inaugurated from Bombay radio-photo services between India/U.K. and India/U.S.A. Radio-telephony was extended to embrace the more important cities of the world, of course, *via* London. Thereafter upto the end of 1949, attention was concentrated towards expediting foreign communications by providing a radio link between Delhi and Bombay, teleprinter working Bombay/Calcutta.

A service of very considerable importance operating since September, 1948, is the transmission by slow W/Telegraphy of Government communiques, explanations on political, financial and trade policies and such other matter issuing from Government quarters. This service is for the benefit of India's representatives abroad who are thus supplied with the latest happenings in India and their significance.

Early in January 1950 a direct radio telegraph service with the neighbouring country of Afghanistan was inaugurated from Bombay.

Other items of interest are as follows:

As a result of an approach to SCAP the India/Japan radio circuit which was closed during the war, was reopened on August 17, 1950.

As a result of agreement reached between India and Indonesia a direct radio-telephone service was inaugurated on October 2, 1950 and a radio-telegraph service on February 1, 1951.

A direct wireless telegraph circuit to Thailand was opened on March 15, 1951.

India and Russia were connected by direct wireless telegraph circuit on June 18, 1951.

A second radio channel to the United States of America, operated by the Radio Corporation of America at the other end, was opened on July 2, 1951.

Successful radio-telephone tests having been completed with Egypt, a direct radio-telephone circuit was opened on July 2, 1951.

India is thus connected by direct wireless circuits to 10 countries, *viz.*, U.K.; U.S.A.; Australia; China; Afghanistan; Japan; Indonesia; Thailand; Russia; Egypt.

A five-year plan costing a crore of rupees for the development of India's external telecommunication services has been approved by the Government of India.

The plan envisages the opening of a new wireless station at Calcutta and expansion and modernisation of the existing stations at Delhi, Bombay and Madras.

The new Calcutta station is expected to provide direct wireless links from India to China, the Philippines, Indonesia, Thailand, Indo-China, Australia and America. It will also provide a second radio-telephone channel between India and the U.S. The setting up of the station will facilitate India's commerce greatly, as Calcutta provides about 30 per cent. of the total traffic handled by the Overseas Communications Service.

Successful radio tests have also been completed with Siam; Iran; and many other countries.

The future requirements of India in the field of foreign communication facilities are in fact incredibly vast. The submarine cable as a medium of long distance communications has shown limitations both on grounds of prime cost and technical aspects. Despite continuous loading under-sea repeaters and similar efforts at improving performance it may be unable to help where man wants photographs to illustrate the news from the other continents and where he wants not only to talk but also to see the person at the other end.

If the cable were the only means of inter-continental communication a ship out of sight would have remained as good as a ship lost until she made the next port, the mobility of modern warfare would be impossible and aviation would have remained the adventure of a few with chance at the helm, instead of becoming a means of scheduled daily transport. The future in these fields of communication must lie with Radio.

The communication requirements of a country which is seventh in world trade, shelters 1/6 of the world's population, is undergoing rapid industrialisation, will be very vast indeed. During the last 22 years only the fringe of the problem has been touched. India must expect an expansion in this field commensurate with her status in world affairs.

GRANT MEDICAL COLLEGE 1955 LIBRARY

INDUSTRIAL STRUCTURE

INDUSTRIAL production in India has been maintaining an upward trend in many directions since independence in August 1947. The interim index of industrial production, with 1946 as the base, advanced from 97·5 in 1947 to 108·9 in 1948, slightly receded to 106·9 in the following year and further to 105·2 in 1950 mainly because of the heavy fall in the output of cotton textiles, but it advanced sharply to 116·6 in 1951.

More than the increase in the actual production is the remarkable rise in the industrial capacity of many industries thus indicating that they are in a position to meet the existing domestic needs. Thus between 1948 and 1951 the installed capacity of sewing machines was up by 60 per cent, that of diesel engines advanced from 4,000 to 12,000, sulphuric acid by 50 per cent to over 150,000 tons, dry batteries from 142 million to 285 million, electric lamps from 14·3 million to 25 million and cement from 2·1 million tons to 3·5 million tons.

Two groups of industries have made particularly remarkable progress. One is the chemical group and the other electrical. Equally notable progress has been noted in the engineering industries. The production of finished steel increased from 856,000 tons in 1948 to 1·1 million tons in 1951. Coal output has been stepped up from 29·8 million tons in 1948 to 33 million tons and the production of cement has nearly doubled.

An elaborate census of Indian manufactures covering 29 groups of industries has been in progress since 1946. The industries covered by the census are wheat flour, rice milling, biscuit making, fruit and vegetable processing, sugar, distilleries and breweries, starch, vegetable oils, paints and varnishes, soap, tanning, cement, glassware, ceramics, plywood, paper and paper-board, matches, cotton textiles, woollen textiles, jute textiles, chemicals, drugs and pharmaceuticals, non-ferrous metals, iron and steel, bicycles, sewing machines, producer gas plants, electric pumps, electric fans and general and electrical engineering.

The latest report covers these industries for 1949. About 7,000 factories located in 17 States are included in the census and the data for 6,300 factories was available. On that basis, the following picture has emerged:—

	1946	1949
Fixed Capital (Rs. Crores)	163	228
Raw Materials (Rs. Crores)	135	172
Finished Products (Rs. Crores)	69	110
No. of employees (million)	1·5	1·7
Wages and Salaries (Rs. Crores)	1·2	178
Materials Consumed (Rs. Crores)	391	704
Value of Products (Rs. Crores)	603	964
Value added by manufacture (Rs. Crores)	211	260

The overall progress of industries is indicated in the following table:—

Details.	Unit	1946	1949
No. of Factories.			
No. registered	No.	5,013	6,753
No. of returns received	"	4,027	6,257
Fixed Capital.			
Total	Rs. crores	163	228
Land and building	"	62	83
Plant and machinery	"	93	131
Inventory.

(of which) Wage earners	"	1·4	1·5
Salary earners	"	·1	·2
Average No. of days worked	No. of days	264	240
No. of man-hours (total)	Man-hours (crores)	321	335
Wages and Salaries.			
Total	Rs. crores	102	178
Wages	"	82	146
Salaries	"	17	29
Value of materials consumed.			
Total	"	391	704
Raw materials, chemicals, etc.	"	355	650
Fuel, electricity, etc.	"	23	34
Depreciation	"	11	16
Value of products.			
Total value	"	603	964
Value added by manufacture	"	211	260

Of the 5,875 factories existing in 1949 for which returns were included after eliminating closed factories, 83 per cent constituted what is classified as small-sized factories and 12 were medium-sized factories. The details are given below :—

Name of Industry.	Small		Medium		Large	
	No. of factories.	Average No. employed per factory.	No. of factories.	Average No. employed per factory.	No. of factories.	Average No. employed per factory.
Wheat flour	52	49	8	162	6	300
Rice milling	1,029	31	214	79	22	143
Biscuit making	43	39	5	179	7	352

Industries have been further divided into durable and non-durable ones. Of the 6,257 factories for which returns were received in 1949 (including closed factories), 2,112 belong to the former category and 4,145 to the latter. The following industries belong to the former class : iron and steel, sewing machines, electric lamps, electric fans, general and electrical engineering, bicycles, non-ferrous metals, plywood and tea-chests, cement, glass and glassware and ceramics. The structure of these types of industrial units was as follows in 1949 :—

	Durable.	Non-Durable.
Number of factories	2,112	4,145
Fixed capital (Rs. crores)	72	136
No. of employees (lakhs)	3·13	1,379
Wages, salaries, etc (Rs. crores)	36	142
Value of materials consumed	88	618
Value of products	149	814
Value added to manufacture	68	199

Industrial Control

Down to 1918 the attitude of the Government towards industry was one of *laissez faire*. Towards the end of the Great War it became evident that the State had to play a more active role and following the recommendations of the Indian Fiscal Commission, a policy of discriminating protection was accepted. A land-mark was the policy statement in 1945. This envisaged Government control of 20 major industries and the nationalisation of important industries like aircraft, automobiles, chemicals, iron and steel, prime movers, transport vehicles, electrical machinery, machine tools, electro-chemical and non-ferrous metals provided adequate private capital was not forthcoming. The subsequent political developments, however, made it impossible for this policy to be implemented.

On April 6, 1948 the Government of India outlined their industrial policy in a resolution which *inter alia* stated :—

(1) The manufacture of arms and ammunition, the production and control of atomic energy, and the ownership and management of railway transport should be the exclusive monopoly of the Central Government.

(2) The State will be responsible for the establishment of new undertakings in the field of coal, iron and steel, aircraft manufacture, ship-building, manufacture of telephone, telegraph and wireless apparatus excluding radio receiving sets and mineral oils. Existing undertakings will be allowed to develop for a period of ten years and Government will give all assistance for such development. At the end of the period their position will be reviewed.

(3) Control by the State over the generation and distribution of electric power will continue.

(4) Rest of the industries will normally be open to private enterprise with varying degrees of control over location.

(5) The Central Government would investigate the extent to, and the manner in which cottage and small scale industries could be co-ordinated and integrated with large scale industries.

Under the terms of the Resolution, Government have set up a Central Advisory Council of Industries with representatives of industry, labour, trade, State Government and members of legislature to advise them generally on industrial policy, allocation of raw materials and review of production trends. The details of control over individual industries are given in the chapters dealing separately with each industry.

Towards the end of 1951 Parliament passed the Industries (Development and Regulation) Bill. The Act is now in force. The most important provision is the establishment of Development Councils which will deal with the problem of productivity and service to the community. On the top will be the Central Advisory Council for Industries which will advise Government on rules, directions to industrial undertakings and taking over the management of industrial concerns.

The Act provides for the registration of existing industrial undertakings and licensing of new ones. It also empowers Government to investigate into the causes of any possible fall in the production of any concern or any deterioration in the quality of the product, and to take action. The Act contains provisions for direct control by the Central Government in certain cases.

TRADE AND INDUSTRY

INDIA is essentially an agricultural country with farming regarded by the people as a tradition rather than as business. During the past quarter of a century, however, there has been a persistent trend towards industrialisation. The National income for 1948-49 was estimated at Rs. 6,968 crores and though more than 70 per cent. of the population in that year was in the rural area and mainly engaged in agriculture, income from this source amounted to only Rs. 1,770 crores as against Rs. 2,107 crores from urban areas. Agriculture consequently plays an important part in shaping the course of the country's foreign trade.

Agriculture.—The general index of agricultural production showed a rise of 9 per cent. in 1949-50 and a fall of 4·2 per cent. in 1950-51 as compared with the respective preceding years. The fall in 1950-51 was mainly due to a reduction of 5·7 per cent. in production under the group of commodities for ultimate consumption, even though there was an improvement of 2·6 per cent. in the production of goods for immediate consumption. The general level of domestic supply of agricultural commodities recorded a fall of 3·5 per cent. in 1950-51 over the previous year, as a result mainly of a decline of 4·2 per cent. in the total production and of a substantial fall in the imports of grain, pulse and flour. A fall in production accompanied by a reduction in imports of foodgrains resulted in the deterioration in domestic supply position of commodities for ultimate consumption by 7·9 per cent. despite the substantial improvement to the extent of 21·8 per cent. in the supply position of tea and coffee. As regards commodities for intermediate consumption, the overall index showed a rise of 13·2 per cent. in 1950-51 as compared to the earlier year though in the sub-group oilseeds there was a fall. The exports of almost all the commodities in the main group were heavily curtailed in 1950-51.

In the case of fibres, the heavy contraction of exports, coupled with the increases in production and imports, brought about an improvement in the domestic supply position in 1950-51.

The following table gives the trend of imports, exports and production for 1949-50 and 1950-51 :

Food Grain.	1949-50.			1950-51.		
(000 tons)	Imports.	Production.	Per cent.	Imports.	Production.	Per cent.
Rice	472	22,981	2·1	441	20,328	2·2
Wheat	1,706	6,110	27·9	1,014	6,496	15·6
Millets	16	8,495	0·2	9	7,559	0·1
Maize	77	2,009	3·8	..	1,682	..
Barley	149	2,153	6·9	6	2,264	0·3

Fibres.	1949-50.			1950-51.		
(000 bales)	Imports.	Production.	Per cent.	Imports.	Production.	Per cent.
Cotton	708	2,628	26·9	959	2,926	32·8
Jute	1,350	3,089	43·7	2,094	3,292	63·6
Rubber	1,282	15,587	8·2	5,348	15,599	34·3

Seeds.	1949-50			1950-51.		
	Exports.	Production.	Per cent.	Exports.	Production.	Per cent.
(000 tons)						
Groundnuts	126	3,379	3·7	36	3,331	1·1
Linseed	72	411	17·5	67	385	17·4
Castor seed	5	128	3·9	78	106	73·6

Fibres.	1949-50.			1950-51.		
(000 bales).	Exports.	Production.	Per cent.	Exports.	Production.	Per cent.
Cotton	330	2,628	12·6	84	2,926	2·9
Jute	649	3,089	21·0	2	3,292	..
Rubber (tons)	429	15,587	2·8	945	15,599	6·1

Industry.—The downward trend of industrial production noticed in 1949 persisted in the following year, when the index number was reduced to 94. The fall was mainly in respect of commodities for ultimate consumption, cotton cloth and yarn and jute accounting for a reduction of 6·2 per cent. and 13·3 per cent. and 10·9 per cent. respectively. On the other hand, the output of iron and steel, chemicals, non-ferrous metals and cement rose by 5·3 per cent. 18·8 per cent., 6 per cent. and 22·2 per cent. respectively. Several minor industries excepting paints and varnishes also recorded improvement. The general index of domestic supply recorded a fall of 3·8 per cent. in 1949 and 6·9 per cent. in 1950 as compared with the corresponding preceding years. The index of mineral production recorded a rise of one per cent. and 6·2 per cent. in 1949-50 respectively.

TRENDS OF FOREIGN TRADE

The impact of industrial revolution is most pronounced on India's foreign trade during the past 50 years. In 1920-21 imports of finished goods accounted for 84 per cent. of imports into India including Burma and Pakistan. On the other hand exports of raw materials represented 45 per cent. of the total shipments. The industrial expansion received a stimulus after 1927 following the introduction of a policy of discriminate protection. Since then though the value of trade has grown the volume is more or less unchanged and the composition of trade has witnessed a rapid change. In the main, the terms of trade have moved against India mainly because of her primary products being highly sensitive to trade cycles. The outstanding developments are, however, the separation of Burma from India in 1936 and the creation of Pakistan in 1947.

Food, drink and tobacco, have shown a continuous increase under imports while exports are fast shrinking. The percentage share of imported raw material has moved up from 9·3 per cent. in the five years ended 1929-30 to 35·1 per cent. in 1950–51 while their exports have dropped from 49·5 per cent. to 20·8 per cent. On the other hand, imports of manufactured goods have dropped from 72·6 per cent. of the total imports in the quinquennium ended 1929-30 to 45·7 per cent. in 1950-51 while exports of finished goods have risen from 26·6 per cent. of the total exports to 55 per cent.

Countrywise, the United Kingdom enjoyed a key position in India's trade until the outbreak of the First War when imports from Britain were around 60 to 70 per cent. of the total and exports 23 per cent. to 30 per cent. By the time the world depression set in, the United Kingdom's share in India's imports declined to 38 per cent. but exports were higher at 28 per cent. This was the position in the five years ended 1934-35. During the subsequent five years, the overall share of Britain in India's trade dropped to 32 per cent. In the post-war period, this trend became more perceptible and imports from Britain represented only one-fifth of the total value of import trade in 1950-51.

The United States now ranks second in India's trade. About 18 per cent. of the Indian exports go to America despite difficulties in trading. Pakistan now occupies a third place in our foreign trade and is responsible for 7·2 per cent. of India's imports and 5·3 per cent. of her exports. A feature of the recent development is the expansion of trade with Australia, South-East Asia and the Middle East. A slow recovery of the pre-second World War flourishing trade with Japan is noticeable in the past three years.

IMPORT CONTROL

Import Trade Control was first instituted in May 1940 for conserving the limited tonnage and hard currency exchange during the war period. Its scope was, however, extended to cover all imports by the beginning of 1942. After the end of the war, the control was kept alive on grounds of currency difficulties and the policy underlying it was frequently adjusted to the changing views of Government on inflation and the prospects of releases of sterling balances.

In July 1950, an Enquiry Committee was appointed to review the method of import control, and following its recommendations, the Government decided at the beginning of January 1951 that (1) commercial imports should generally be around Rs. 400 crores a year, (2) the O.G.L. should not cover commodities sufficiently available in the country at a reasonable price, but should include basic raw materials in short supply, (3) licensing should be on a half-yearly basis and (4) the actual licensing procedure should be decentralised. The Government of India did not, however, accept the committee's recommendation in respect of the order of priorities and, instead, fixed the following order:

(1) Raw materials for essential industries, spare parts and accessories of capital goods for industries essential for the life of the community; (2) Other raw materials and capital goods; (3) Other essential goods; (4) Non-essential goods.

The year 1951 was started with over 16,000 applications outstanding from the preceding year and 112,000 applications were received in the first half of 1951. At the end of the period, however, only 5,186 applications were to be disposed of. The improvement was attributable to the procedural changes. These included the practice of granting licences as multiples of licences and the permission to actual users to submit one consolidated application in respect of all their needs. The process of decentralisation was also completed before mid-1951 and the bulk of import licensing is now done at ports. Import controls cover practically all articles. The Commerce Ministry has brought out the Import Trade Control Handbook of Rules and Procedure.

Policy for January-June 1952.—The import policy for the first half of 1952 remains fundamentally unchanged. For a large number of items licences will be given to established importers on the basis of the first half or second half of 1951 licences. A more liberal policy has been followed in respect of iron and steel, expanding reamers, precision and measuring tools, electric lamps of certain types, wires and cables and sanitary fitting. On the other hand, cuts have been imposed on imports of articles the indigenous production of which has risen. All licensing will be provisional in the first instance and confirmed only if within two months the importer can produce evidence of the contract being concluded with an overseas supplier.

EXPORT CONTROL

In the field of export Government's policy in the pre-war period was one of export promotion subject to an adequate supply for domestic consumption. Immediately after the war, export control was relaxed; but it was again tightened in 1948 following the aggravation of inflationary pressures at home. After the rupee was devalued in September 1949, the Government of India resorted to a policy of raising export duties on certain items of exports and levying export duties on others in order to appropriate a good portion of the shippers' excessive profits. This method gained fresh momentum following the world boom in raw materials after the outbreak of the Korean War. Since September 1951, however, the world boom began to taper off and the Government of India followed a progressive policy of lowering or abolishing the export duties and raising the export quotas or withdrawing destinational restrictions on exports.

Various measures have been adopted to promote exports. These include bilateral trade pacts, special inducements to export specific commodities, investigation of the problem of export promotion and implementation of the recommendations, publicity to Indian products in overseas markets through exhibitions, show rooms, etc., making available commercial information both in India and abroad, expanding raw material production ensuring the quality of export goods and facilitating imports of raw materials required by exporting industries.

In order to secure an adequate supply of essential domestic raw materials, special steps have been taken to raise the production of such commodities. The chief instances are raw cotton and raw jute. In regard to hides, export of raw hides has been banned to conserve supply for the indigenous leather industry.

Progressive measures are being taken to ensure the quality of articles both agricultural and manufactured, exported to foreign markets. The Indian Standards Institute is engaged in the work of fixing proper standards in important export commodities such as lac, seedlac, shellac, mica, manganese, and wool. The question of enacting legislation in enforcing the Indian Standards fixed by the Indian Standards Institute for manufactured goods is under consideration. Steps have also been taken to introduce standard forms of contracts with a clause for arbitration for certain commodities. Complaints about bad quality are investigated by the chief controller of Exports and the Director-General of Commercial Intelligence and Statistics.

Among the more positive measures may be mentioned the transport facilities in carrying export goods under a high priority. The Chief Controller also helps export industries in regard to the allocation of raw materials, issue of import licences and supply of packing materials. Export licensing has been centralised as far as possible in the office of the Chief Controller of Exports and India's representatives abroad have been authorised to grant entry visas to foreigners wishing to proceed to India for short business visits without prior reference to the Government of India. Another method adopted to promote exports has been to facilitate the recouping of the raw materials which it might be necessary to import for meeting such exports. During 1950-51 Government officially participated in six international exhibitions abroad and organised six other wholly Indian exhibitions in important world trade centres. Show rooms have been organised at some centres.

TRADE PACTS

Bilateral trade agreements with the object of establishing direct trade contacts were either concluded or renewed during 1950-51 with Afghanistan, Czechoslovakia, Germany, Switzerland, Austria, Japan (along with the sterling area), Norway, Spain, Sweden, Hungary, Finland and Poland.

A trade delegation was deputed to South-East Asia to explore possibilities of exporting Indian goods to that area. This has resulted in the conclusion of a trade agreement with Indonesia. Among other countries with which India has concluded trade agreements may be mentioned Ceylon, Burma and Australia. In the Middle East an understanding over the trade has been reached with Egypt, while Iraq has indicated its desire to have a trade pact.

Broad details of some of the more important trade agreements are given below. It may, however, be noted that in most cases Government's commitments are usually limited to the grant of export and import licences, the transactions provided for in the schedules of the agreements being conducted through the normal trade channels. Commodities which are not subjected to trade restrictions in either of the two countries are not normally included in the agreements.

Burma.—Under a five-year agreement, Burma agreed to sell 240,000 tons rice, half on cash basis and half on a barter basis. India, in turn, agreed to deliver 25,000 tons gunnies, 10,000 tons groundnut oil, 2,000 bales of cotton yarn, and 3,000 tons galvanised iron sheets. From 1952-53 onward Burma would sell on an inter-governmental basis 230,000 tons rice with a further option to India to buy 120,000 tons from trade. In return India undertook to supply 15,000 tons gunnies, 8,000 tons groundnut oil, 2,000 bales cotton yarn and 4,000 tons iron and steel.

Egypt.—Both countries agreed under a pact concluded on March 17, 1951 to accord to each other most favoured nation treatment. For a year Egypt would supply 300,000 bales of Egyptian cotton, 550 tons of cotton yarn, 50,000 tons rock phosphates, 107,000 tons gypsum and 6,500 tons flax. India, on her part, undertook to sell tea (4,000 tons), unmanufactured tobacco (2,000 tons), groundnut oil (1,000 tons), groundnut (1,000 tons), linseed (1,000 tons), linseed oil (100 tons), castor oil (500 tons), shellac (100 tons), coffee (200 tons), tanned hides (100 tons), cotton grey cloth (500 tons), iron and steel and products thereof (£10,000), cutlery and electrical goods (£5,000 each), sanitaryware (£4,000), rubber tyres and tubes (£20,000), Woollen goods (£10,000), drugs and medicines (£9,500) and a variety of other goods.

Australia.—A new agreement was concluded whereunder Australia was to supply, in addition to wheat and wheat flour, 10,000 tons lead, 7,000 tons zinc, 3,000 tons tallow, 75 tons stearine and 350 tons casein against 120,000 tons jute manufactures, 61 million yards cotton piecegoods and 5,000 bales cotton yarn.

West Germany.—The new agreement broadened the basis of the trade. The Bonn Government undertook to lift the restrictions on 333 Indian commodities and fixed quotas for 26 other Indian articles.

Russia.—By a trade agreement signed in June 1951 India secured one lakh ton wheat against "freely sold Indian goods."

Japan.—A treaty has been concluded by the Government of India with Japan terminating the State of war with that country and resuming normal diplomatic relations. The treaty which is formally expected to be announced in June will have a provision relating to trade between the two countries.

U.S.A.—Negotiations with the U.S.A. for a treaty of friendship, trade and navigation have been going on for the past three years and a draft acceptable to both the countries is expected to emerge shortly.

Italy.—In the first week of April 1952 the first trade agreement after the war was signed between India and Italy. Both Governments have agreed to afford facilities for the promotion of trade.

Ceylon.—The Indo-Ceylonese trade agreement signed in February 1952 covered no less than 58 commodities on the Indian side including coal (4 lakh tons), foundry coke (600 tons), jute goods (2,500 tons), jute twine (400 tons), teek seed (5,000 lbs.), fishing nets (8 tons), breeding bulls (24), dried chillies (10,000 tons), onion (2,700 tons), cotton yarn (3,500 bales), crushed bones (500 tons), cotton waste (400 tons), metalware (600 tons), castor oil (200 tons), jaggery (3,000 tons), linseed oil (150 tons), mill-made cotton textiles (44 million yards), handloom cloth (22 million yards), mixed piecegoods (23 million yards), hemp twine (100 tons), steel (100 tons), dried fish (12,000 tons), blankets (128,000) and tea-chests (150,000). On the other hand, India will import from Ceylon copra and coconut oil (50,000 tons), hides and skins (375 tons), graphite (400 tons), unmanufactured tobacco (1¼ million lbs.), rubber sheets and crepe (5,000 tons) and unmidella logs (1,500 tons).

The Ceylonese Government undertook to reduce the import duty on hand-made towels from 60 per cent. to 15 per cent. and give 1,500 tons of catamaran logs required for building India's countrycraft. India, on her part, agreed to place goraka, a fish preservative, on O.G.L. to promote salt-fish trade and waive the licensing system for import of barrels except on the first entry.

Recently the trade agreement with Poland was renewed. At the time of writing negotiations for trade agreements are being conducted by the Commerce Ministry with seven countries, namely, Austria, Finland, Hungary, Norway, Sweden, Switzerland and Egypt. In all cases, the trade is governed by bilateral agreements.

INDO-PAKISTAN TRADE RELATIONS

On August 15, 1947 when the Indian sub-continent was partitioned, it had been decided that until February 1948 there would be no restrictions on the free flow of goods between the two countries and no trade or custom barriers would be set up. During the currency of the Standstill Agreement, however, Pakistan imposed an export duty on raw jute and on March 1, 1948 the normal licensing and tariff restrictions on trade between the two countries came into force. Two months later an agreement was reached between the two countries for exchange of certain commodities during the year. The agreement did not work satisfactorily and the understanding reached later over long-term arrangements for production, manufacture and sale of jute and cotton could not be incorporated in the fresh agreement signed on June 24, 1949.

Following the devaluation of the Indian rupee in September 1949 the trade between the two countries was completely stopped but on April 21, 1950 a short-term agreement was concluded up to July 31, 1950 for limited resumption of trade. Its pivot was a deal between the Indian Jute Mills Association and the Pakistan Jute Board for the sale by Pakistan of 8 lakh bales of certain types of raw jute in terms of Indian rupees the proceeds of which would be made available to Pakistan by buying jute goods (20,000 tons), cotton textiles (45,000 bales), mustard oil (7,000 tons), steel (5,000 tons), etc. Since Pakistan could not adhere to the time schedule in regard to the deliveries of raw jute, the agreement was extended up to September 1950. The total value of trade between the two countries during this period amounted to Rs. 43 crores (imports Rs. 24 crores and exports Rs. 19 crores).

Until February 25, 1951 the trade remained suspended. It was then that India accepted the official par value of the Pakistan rupee and entered into a fresh trade agreement. India has secured a quota of 35 lakh bales of raw jute upto July 1952. Pakistan would also sell to India 7·7 lakh tons of foodgrains, deliveries extending upto October 1952. Among India's exports to Pakistan may be mentioned coal (2·1 million tons), mill-made cloth (75,000 bales), cotton yarn (15,000 bales) and jute manufactures (62,500 tons). Another feature of the agreement is the list of commodities placed on O.G.L. for both imports and exports by the two Governments.

A list of the more important commodities where quantities or monetary limits have been specified is as follows :—

—	Upto end of June 1951	From 1st July 1951 to 30th June 1952
1. FROM INDIA TO PAKISTAN		
Coal	6,00,000 tons	1,500,000 tons
Hard Coke	10,000 tons	Upto December 1951 and nothing afterward
Soft Coke	5,000 tons	20,000 tons
Pig Iron	6,400 tons	20,000 tons
Ferro Silicon	nil	100 tons
Ferro Manganese	nil	100 tons
Galvanised Sheets	nil	12,000 tons
Black Sheets	nil	8,000 tons
Iron and Steel Products	7,000 tons	36,000 tons
M. G. Crossings	120 tons	nil
Mills loose jaws for M. G. steel sleepers in silico manganese steel	200,000 numbers by October 1951	nil
Keys for M. G. steel sleepers	50,000 numbers by July 1951	nil
Aluminium circles and sheets	nil	100 tons
High alumina fire brick	150 tons	500 tons
Soft wood (junglewood) from Malabar, Assam, etc.	5,000 tons	20,000 tons
Hard timber (other than teak)	2,500 tons	10,000 tons
Cement	nil	nil
Stone and Ballast	25,000 tons	75,000 tons
Paper	As much as tra	nsport can stand
Linseed Oil	1,000 tons	5,000 tons
Mustard Oil	750 tons	2,500 tons
Chlorine	50 tons	nil
Rubber tyres and tubes (other than cycle tyres and tubes and giant and non-standard tyres and tubes)	Rs. 5,00,000	Rs. 20,00,000
Handloom Cotton Cloth (Loongis, towels and furnishing fabrics, etc.)	..	15,000 bales
Millmade Cotton Cloth	..	75,000 bales
Cotton Yarn	..	15,000 bales
Hard Cotton Waste	200 tons	500 tons
Jute Manufactures	12,500 tons	50,000 tons
Shellac	Quantity to be	settled later
2. PAKISTAN TO INDIA		
Raw Jute	1·0 million bales	2·5 million bales
Raw Cotton	Any quantity	Any quantity
Hides and Skins		
Cow Hides	2,50,000 pieces	10,00,000 pieces
Sheep Skins	2,00,000 pieces	6,00,000 pieces

TRENDS IN 1951-52

In contrast with the trading conditions during the year ended March 31, 1951 were the economic trends in the following year. The world boom in raw materials began to taper off since May and by September conditions became worse following import restrictions imposed by several countries and the decision to spread over the rearmament drive in the U.S., the U.K. and the continent. Early in 1952 the business recession gained a fresh momentum from consumer resistance and by the end of February, commodities slumped heavily. In India the process was hastened by the credit squeeze and the budgetary policy of building up substantial revenue surpluses.

The heavy demand from abroad for Indian goods in the first quarter of the financial year tempted the Government of India to put up export duties. Thus, from June 1, 1951 the export duty on cloth, medium and coarse, was raised from 10 per cent. to 25 per cent. and the shipments of kardi and niger seed and oil were brought under control. In July the export duty on groundnut kernel was raised from Rs. 80 to Rs. 150 per ton and on oil to Rs. 300; the duty on linseed and linseed oil was fixed at Rs. 100 and Rs. 200; and oilseeds and oils not specified were subjected to an export duty of Rs. 150 and Rs. 300 per ton respectively.

India had achieved in 1950 the status of being the world's leading cloth exporter; but in 1951 Government reduced the export quota to 950 million yards in order to ensure more supplies for home consumption. Out of this, 190 million yards were marked out for soft currency countries and the quotas were distributed in a manner which favoured uneconomic mills and post-war mills. This system hampered the activities of established shippers and by the end of 1951 the sales of Indian cloth abroad became difficult.

To conserve supplies of raw wool for the domestic industry, exports were drastically curtailed while shipments of hides, buffalo and cow, were banned with effect from April 6, 1951. This policy of export restriction raised the domestic supply and with the change in the world economic situation, a glut of stock was in evidence at the end of 1951.

Following the slump in commodity markets, the Government of India was obliged to take a series of measures to relieve the distress. The process began with the halving of the export duty on hessian from Rs. 1,500 and the lifting of the export control relaxation in respect of the frontier trade with Burma in the middle of November 1951. Then followed the allotment of additional export quotas of jute goods for 50 countries and ultimate abolition of all restrictions on export of jute manufactures. A month later, the export duty on mustard oil was reduced from as. 8 to as. 3 per lb. and the import duty on coconut oil from 42½ per cent. to 31¼ per cent. In February 1952 the export duty on raw cotton was halved to Rs. 200, that on soft cotton waste was reduced from 50 per cent. to 30 per cent. and those on groundnut, kardi, niger and raw wool were totally abolished. Simultaneously, quotas for exports were also raised. In the import field the emphasis was on securing larger supplies, specially of raw materials.

India's foreign trade in the first nine months of 1951-52 rose by nearly 50 per cent. to a new high level at Rs. 1,151·99 crores, exports rising by Rs. 158·55 crores to Rs. 534·22 crores and imports by Rs. 201·49 crores to Rs. 606·07 crores. Re-export trade was, however, lower. The deficit in the sea-borne trade consequently widened from Rs. 25·47 crores in the nine months of 1950-51 to Rs. 68·24 crores in the corresponding period of the following year. The main items of imports and exports during the period have been presented below :—

IMPORTS AND EXPORTS OF MERCHANDISE

DURING APRIL–DECEMBER, 1951

(Rs. in Lakhs)

Imports	
Grain, Pulse and Flour	1,54,53
Provisions and oilman's stores	7,72
Spices	6,98
Cotton, raw and waste	87,47
Wool, raw	1,37
Silk, raw and cocoons	2,48
Other Textile raw material	7,71
Wood and Timber	4,56
Oils	59,55
Metals and Ores	32,35
Machinery	75,07
Vehicles	22,69
Cotton yarn and manufactures	5,04
Woollen yarn and manufactures	6,51
Artificial Silk yarn and manufactures	16,42
Chemicals, Drugs and Medicines	25,37
Cutlery and Hardware	14,49
Dyes and Colours	15,59
Exports	
Jute yarns and manufactures	2,12,81
Cotton yarns and manufactures	41,81
Tea	70,61
Spices	18,97
Tobacco	13,82
Metals, Ores and Coal	24,53
Fodder, Bran and Pollards	13,37
Oils and Seeds	23,22
Cotton, raw and waste	19,06
Wool and Woollens	8,16
Hides and Skins	21,03

1950-51 TRADE REVIEW

India's total foreign trade, sea, airborne and landborne, amounted to Rs. 1,204·4 crores as compared with Rs. 1,106·26 crores during 1949-50. Imports into India in 1950-51 amounted to Rs. 607·88 crores and exports from India to Rs. 592·01 crores. Re-exports excluding transit trade were valued at Rs. 4·55 crores. Consequently, the deficit balance in 1950-51 was reduced further to Rs. 11·32 crores in the year under review as against Rs. 94·48 crores in 1949-50.

The decline in the adverse trade balance in 1950-51 as compared with the preceding two years was mainly attributable to a large increase in exports of cotton manufactures, oils, tea, gums, resins and lac, raw and manufactured wool, tobacco, fruits and vegetables.

There was a gradual decline in imports into India by sea from 1948-49 to 1950-51. Imports of capital goods sagged from Rs. 124·09 crores in 1948-49 to Rs. 116·17 crores in 1950-51, but those of raw materials advanced from Rs. 232·91 crores to Rs. 286·79 crores. On the other hand, arrivals of consumer goods fell from Rs. 185·92 crores to Rs. 162·50 crores.

Exports from India by sea during 1950-51 (excluding supplementary returns from Madras port amounting to Rs. 15·12 crores) recorded a substantial increase of Rs. 87·14 crores over the previous year. Significant changes were the large increases in exports of cotton manufactures and mica and a fall in the exports of jute manufacture.

Balance of Trade :—India's visible balance of trade in merchandise and treasure on the basis of the recorded data with (*i*) all countries except Pakistan and (*ii*) Pakistan separately during the twelve months, April to March, 1949-50 and 1950-51 is shown in the following table. As these statistics relate to Sea and Airborne trade only, the trade figures for Pakistan given below are incomplete.

	TWELVE MONTHS, APRIL TO MARCH			
	1949-50		1950-51	
	All overseas countries, except Pakistan	Pakistan	All overseas countries, except Pakistan	Pakistan
	Rs. (lakhs)	Rs. (lakhs)	Rs. (lakhs)	Rs. (lakhs)
Exports of merchandise ..	+4,57,82	+14,12	+5,45,69	+13,38

Total visible balance of Trade	—85,08	+5,68	—10,27	+8,94

* Figures exclude transit trade of foreign countries on India's borders.

Direction of Trade :—Distribution of trade according to States shows that West Bengal's share in imports declined further from Rs. 157 crores to Rs. 136 crores, but that of Madras and Bombay improved further. West Bengal registered a spectacular recovery in the re-export trade. In regard to the export trade, West Bengal's share of export trade dwindled from Rs. 246¼ crores in 1949-50 to Rs. 238·6 crores in the year under review. The Madras exports from Madras rose to Rs. 126 crores in 1950-51. In Bombay, the rise in export trade was spectacular having advanced to Rs. 180 crores in 1950-51.

The direction of India's trade continued to be influenced by the control policies of the Government of India based mainly on foreign exchange considerations. Out of a total export trade of Rs. 559 crores, the share of the commonwealth countries was Rs. 289 crores representing 52 per cent. of the total exports as against 54 per cent. in the preceding year. In the re-export trade, the Commonwealth accounted for 25 per cent. of the trade out of a total of nearly Rs. 28 crores as against 47 per cent. in the preceding year. In the import trade, however, the commonwealth countries lost the ground rather sharply. During 1950-51, the commonwealth countries supplied goods to India worth Rs. 244 crores out of a total imports of Rs. 565 crores representing 43 per cent. of the total as against 45 per cent. in 1949-50.

Exports of Indian merchandise and also re-exports to the United Kingdom moved upwards, but imports received a further setback to Rs. 122·74 crores in the year under review.

Australia maintained her exports to India around Rs. 33 crores, and shipments from India to Australia rose by Rs. 3 crores to Rs. 30 crores. India's exports to Canada sought a fresh higher level at Rs. 13¾ crores compared to Rs. 11 crores in the preceding year, but imports of Canadian goods rose sharply from Rs. 12 crores to Rs. 18 crores. India maintained her exports to Kenya colony at Rs. 6¼ crores but imports rose more sharply to Rs. 18¼ crores compared to Rs. 15 crores in 1949-50. Imports from Hong Kong recorded a moderate fall, but exports, which had risen spectacularly from Rs. 3 crores to Rs. 13 crores dropped to Rs. 10 crores in 1950-51. Trade with New Zealand was more or less steady. Dealings with Ceylon showed a moderate improvement both under imports and exports. Singapore increased its purchases from India from Rs. 12¼ in 1949-50 to Rs. 30 crores 1950-51. Compared to the exports, imports from Singapore improved moderately from Rs. 12·64 crores in 1949-50 to 15·79 crores in the year under review.

Foreign countries accounted for nearly half the exports from India and 57 per cent. of the imports. Out of a total export of Rs. 559 crores the United States of America accounted for Rs. 106 crores showing a rise of 33 per cent. over the preceding year and became India's second best customer. Imports of American goods were also higher at Rs. 115·8 crores out of a total of Rs. 565 crores as against Rs. 87·9 crores in the preceding year. On the import side the next important source of supply was Egypt, mainly on account of its cotton. Otherwise, both import and export trade with non-Commonwealth countries was spread over a very extensive area.

The following table gives the picture of the direction of the sea-borne trade of India (private and Government) :—

DIRECTION OF SEA-BORNE TRADE

(Rs. in lakhs)

	1948-49			1949-50			1950-51

COMPOSITION OF TRADE

The table below gives the composition of India's imports and exports (including re-exports) according to the main commodity groups since 1947-48 :—

Imports

	1947-48		1948-49		1949-50		1950-51	
	Rs. crores	% of total	Rs. crores	% of total	Rs. crores	% of total	Rs. crores	% of total
Food, etc.	46·93	11·8	112·95	20·8	122·76	21·8	106·67	18·9
Raw materials	92·27	23·1	127·65	23·5	144·30	25·7	198·33	35·0
Manufactured Goods	252·90	63·4	297·75	54·9	288·66	51·5	258·25	45·7

Exports (including re-exports)

Food, etc.	76·99	19·1	87·55	20·6	117·76	24·3	132·95	22·7
Raw materials	126·47	31·3	98·59	23·0	111·86	23·1	139·89	23·8
Manufactured Goods	196·63	43·8	235·66	55·7	253·38	52·4	311·45	53·0

Although imports of manufactured goods stood at a high level, the growing industrialisation of the country and the Government's policy of restricting imports of finished goods of which an adequate indigenous supply was available at reasonable prices had an adverse impact on imports of goods in that category. Imports of manufactured goods which constituted 63·4 per cent. of the total in 1947-48 fell steadily to 45·7 per cent. On the other hand, the anxiety to have an adequate supply of raw materials and articles mainly unmanufactured, accompanied by an upward trend in prices, was reflected in the growing share of their arrivals in the total import trade which jumped up to 35 per cent. in 1950-51, a period marked by an unprecedented boom in raw materials throughout the world under the stimulus of the Korean War and the rearmament drive. Food imports continued to rise in the three years ended March 1950 but were reduced to 18·9 per cent. of the total following Government's decision early in the year to curtail imports of food as a part of the drive for self-sufficiency.

Due to partition, the share of raw materials in the export trade fell in the subsequent years owing to reduced supplies from 31·3 per cent. to 23 per cent. in 1948-49 and was stabilised around that level in the following years. The sharp rise in the proportion of food exports to the total value in 1949-50 could be attributed to the boom in tea and spices and if their share was slightly lower in the year under review, that was because of a greater demand for manufactured goods. Out of a total increase of a little over Rs. 100 in the export trade during 1950-51, shipments of manufactured goods were up by Rs. 58 crores as against a gain of Rs. 15 crores in food exports and of Rs. 28 crores under raw materials. The proportion of manufactured goods to total exports (including re-exports) slipped back to 52·4 per cent. as the result of a fall in industrial production. The recovery in the year under review to 53 per cent. was mainly due to the spectacular rise in the shipments of cotton goods which conferred on India the honour of being the world's number one piece goods exporter in that year.

IMPORTS OF MERCHANDISE

India's sea-borne imports reached an all-time high level at Rs. 565·46 crores in 1950-51 though the gain over the previous year was hardly of the order of Rs. 5 crores. Besides, the period was marked by a sharp rise in world commodity prices following the Korean war with the result that the actual volume of imports was substantially lower. On the basis of 1948-49 import costs, the price index showed a marked rise of 12 per cent. in 1950-51 over the preceding year. The prices of food, drink and tobacco were more or less unchanged but the raw material group registered a smart rise of 22 per cent. and manufactured articles 19 per cent.

The quantity index on the other hand slumped heavily from 94 in 1949-50 to 77 in 1950-51. Thanks to the heavy arrival of industrial raw materials like raw cotton, chemicals and drugs and mineral oil in the first half of the year, the index number of the volume of raw materials showed a small rise of a point at 82. The increase was mainly due to higher quantitative imports of raw cotton. The volume of receipts of food, drink and tobacco also slumped. The volume of manufactured goods also recorded a decline of the same magnitude, the higher arrival of metals, paper and pasteboard, dyes and colours and chemicals having been more than offset by a drastic reduction in the quantity of cutlery, electrical goods, machinery, vehicle and textiles.

Imports moved in a zig-zag fashion from Rs. 38·44 crores in April 1950 to Rs. 54·19 crores by August. The highest value was recorded in March when imports totalled 56·62 crores, a record unbroken since October 1949.

The bulk of heavy imports during the six months, April—September 1950, comprised industrial raw material like raw cotton, chemicals and drugs and mineral oil. Imports of raw cotton became steadily difficult as the year advanced. The imports of mineral oil showed a certain increase in the quarter, July—September 1950, as a result of deration ing of petrol in July 1950. The effects of the liberalisation of imports of drug and medicine in the first quarter of the year were reflected in the higher figures for the subsequent quarter. Imports of machinery and electrical plant did not increase in spite of free licensing because of non-availability, while imports of non-ferrous metals which were liberalised in July 1950 showed increases in the following two quarters.

Out of a total import of Rs. 555·46 crores in 1950-51 textile raw materials accounted for an intake of Rs. 111·15 crores, as against Rs. 67 crores in the preceding year. Machinery imports occupied a second place in the import trade after declining from Rs. 103·08 crores to Rs. 82·42 crores. Thus, nearly a third of the import trade was monopolised by two items. Though higher imports of food became necessary as a result of shortages brought about by the earthquake and floods in Assam in August 1950 and the near-famine conditions in Bihar and Madras developed later, their full impact was not felt in the year under review during which imports of food, drink and tobacco totalled Rs. 106·67 crores as against Rs. 122·76 crores in 1949—50. Yet another important item vitally necessary for sustaining the economic activity was oil, imports of which were maintained at Rs. 59 crores. Vehicles accounted for Rs. 24 crores as against Rs. 23·46 crores in 1949—50.

The following table shows the comparative importance of the principal items imported into India in thousands of rupees during the past three years :—

Item.	1948-49.	1949-50.	1950-51.	Per cent of Total Imports.
Cotton, raw and waste	64,23,46	63,23,72	100,76,27	17·820
Machinery	81,51,52	105,52,18	84,39,51	14·925

Fodder, Bran and Pollards	49,75	38,18	45,32	0·080
Miscellaneous	22,11,19	24,38,11	24,27,66	4·340
	542,91,84	560,51,35	565,45,60	100·000

Machinery and Millwork (Rs. 84.90 crores).—Imports of machinery and millwork received a sharp setback in 1950-51 mainly because of the difficulties in locating supplies, and accounted for 14·93 per cent. of the total imports. The United Kingdom continued to be the main supplier accounting for deliveries valued at Rs. 53 crores. The next best supplier was the United States whose share was hardly one-sixth.

Imports of prime-movers for locomotives other than electricals dropped to Rs. 5·18 crores from Rs. 5·45 crores in 1949-50. The total imports of oil engines, however, recorded a more substantial fall from Rs. 8·74 crores in 1949-50 to Rs. 6·93 crores in the year under review. Nearly two-thirds of the supply was from the United Kingdom while Japan was the next best source.

Imports of electrical machinery were also lower at Rs. 11·69 crores in 1950–51. Control and switch gear accounted for one-fourth of the imports, while another one-third was almost equally divided between motors and transformers. The United Kingdom was the main supplier having delivered electrical machinery worth Rs. 8·88 crores in 1950-51 and the U.S.A. Rs. 1·06 crores.

Despite a general fall in the imports of machinery, the growing popularity of measures for mechanisation of agriculture pushed up the imports of agricultural machinery to a new higher level in 1950-51. The United Kingdom and the U.S.A. accounted for deliveries valued at Rs. 2·14 crores and Rs. 2·45 crores respectively, the balance being from a number of other countries. Imports of boilers dropped in the year under review to Rs. 4·35 crores.

Aerated water making machinery accounted for hardly Rs. 1½ lakhs and leather tanning and curing machinery for Rs. 3 lakhs. On the other hand, the boot and shoe manufacturing industry appeared to have embarked on a major programme of modernisation since imports of the machinery moved up from Rs. 8·9 lakhs to Rs. 9·6 lakhs. Imports of metal working machinery dropped from Rs. 4·20 crores in 1949-50 to Rs. 2·49 crores in the year under review.

The mining industry dropped down to an intake of Rs. 99 lakhs in 1950-51. A similar trend was noticeable in respect of oil crushing and refining machinery, thanks to the controversy over the future of the Vanaspati industry. Consequently, its imports dropped precipitately to Rs. 13 lakhs from Rs. 42 lakhs in 1949-50. Due to the boom in the paper industry, its imports moved up sharply to Rs. 225 lakhs. Imports of pumping machinery were fairly well maintained at Rs. 156 lakhs in the year under review. Two-thirds of the pumping machinery was received from the United Kingdom with the United States ranking second with a share of Rs. 39 lakhs. Arrivals of refrigerating machinery were valued at Rs. 108 lakhs.

Partly because of the growth of the domestic industry and partly because of the slackness of the demand, imports of rice and flour mills machinery were halved from Rs. 38 lakhs to Rs. 18 lakhs while arrivals of saw-mill and wood-working machinery were lower at Rs. 41½ lakhs. A downward trend was persistent in respect of sewing and knitting machines and parts thereof imports of which were valued at Rs. 172 lakhs in 1949-50 and Rs. 163 lakhs in 1950-51.

Imports of sugar machinery dropped to Rs. 99·9 lakhs while those of tea machinery showed a sustained improvement from Rs. 70 lakhs to Rs. 77 lakhs.

Thanks to the restriction on imports of certain types of textile machinery in which the indigenous enterprise had shown progress, imports of textile machinery received a sharp setback in the year under review when they totalled Rs. 12·44 crores after advancing from Rs. 15·06 crores to Rs. 19·87 crores in the preceding year. The drop was wholly attributable to cotton machinery in respect of which Government has followed a policy of encouraging the Indian industry. More than half the imports were of spinning machinery. The changing fortune of the jute industry accounted for a reduction in the imports of jute machinery from Rs. 2·68 crores to Rs. 2·02 crores and further to Rs. 1·91 crores. On the other hand, imports of wool machinery were fully held around Rs. 14 lakhs.

The receipts of typewriters and accessories declined steadily. The United States was responsible for two-thirds of the trade.

The setback to the printing and lithographing resses following the shortage of paper and estrictions on its use accounted for a fall in nports of the machinery from Rs. 2·19 crores 1 1949-50 to Rs. 1·66 crores. Imports of elting for machinery after falling from Rs. 212 akhs to Rs. 101 lakhs recovered to Rs. 116 akhs. Of this, a little over a third was of leather hile hair and cotton belting accounted for the aterial worth only Rs. 23 lakhs. The rapid rowth of bobbin manufacture in the country educed its imports from Rs. 120 lakhs in 1949-50 o Rs. 34½ lakhs in the year under review.

Grain, Pulse and Flour (Rs. 80.26 crores).—nports of grain, pulse and flour, which had sen from Rs. 87·31 crores to Rs. 99·54 crores eceived a setback in the year under review and mounted to Rs. 80·26 crores following Governent's decision to curtail import of food as a art of the programme for achieving self-fficiency. These import figures are, however, y no means complete.

According to the published data the total uantity imported by sea was 2·083 million tons 1950–51 as against 2·226 million tons in 949-50. The value of which, dropped to s. 37·14 crores from Rs. 46·40 crores.

Argentina which had supplied wheat valued Rs. 5·17 crores in 1949-50 did not send any heat to India in the year under review following sharp contraction in its exportable surplus. n the other hand, Australian purchases reached new high level at Rs. 23·47 crores in the year nder review. Canada, was the second best urce of supply whose value rose from Rs. 2·95 ores to Rs. 7·10 crores in 1950-51. The .S.A. accounted for wheat valued at only s. 5·67 crores as against Rs. 6·80 crores in 949-50. Soviet Russia had delivered wheat India to the tune of Rs. 9·66 crores in 1949-50, it imports therefrom were nil in the year under view.

Imports of wheat flour sought a fresh lower vel at Rs. 3·39 crores in the year under review against Rs. 6·35 crores in 1949-50. During e year under review almost the whole of the pply came from Australia, and the U.S.A. and nada which were important sources in the eceding year did not figure in the trade.

Imports of rice declined further from Rs. 26·77 ores in 1949-50 to Rs. 22·95 crores in 1950-51. irma rice recovered from Rs. 9·98 crores to s. 15·33 crores. On the other hand, Thailand duced the deliveries to Rs. 7·40 crores in 50-51. The third important country, namely, gypt, disappeared from the list. Pakistani e was received only to the extent of Rs. 17 khs.

Arrivals of pulses were valued at Rs. 2·86 ores in the year under review as compared with s. 0·83 crores in 1949-50. Out of this Western kistan and Burma accounted for Rs. 76 lakhs, d Rs. 61 lakhs respectively, the balance being ceived from a number of countries. In the o previous years, imports of barley were mparatively heavier, their value being Rs. 5·28 ores in 1949-50. In the year under review, wever, imports totalled less than Rs. 20 khs. Australia and Iraq, which had delivered rley of the value of Rs. 2 crores in 1949-50 ld it in the year under review to the extent Rs. 19½ lakhs, while Argentina and other untries did not sell anything. Imports of ier grain moved up from Rs. 8·09 crores to . 11·53 crores and totalled Rs. 13·43 crores in 50-51.

Oils (Rs. 59.28 crores).—Imports of oils, getable and mineral, were maintained at . 59·28 crores in 1950-51 as against Rs. ·19 crores in 1949-50.

Out of this vegetable oils accounted for only . 3·32 crores as against Rs. 4·84 crores in 49-50. The bulk of the deliveries represented oanut oil whose value, after advancing from . 1·02 crores to Rs. 4·33 crores dropped to . 3·15 crores. Singapore, which had registered mart increase to Rs. 3·01 crores in 1949-50 counted for Rs. 1·88 crores in the year under view. On the other hand, Ceylon, imports from which had fallen from Rs. 65 lakhs to Rs. 63 lakhs recorded a recovery at Rs. 1·06 crores. Quantitatively, imports of cocoanut oil dropped sharply from 7·435 million gallons in 1949-50 to 4·375 million gallons in 1950-51.

Imports of minerals maintained an upward trend during the past three years, having stepped up to 793·6 million gallons valued at Rs. 54·81 crores in the year under review. Imports of mineral grease including petroleum jelly, after declining from 9·3 million lbs. valued at Rs. 53 lakhs to 5·4 million lbs. valued at Rs. 29 lakhs, appreciated to 7·1 million lbs. valued at Rs. 40 lakhs in the year under review.

Receipts of kerosene showed a spectacular rise from 198·8 million gallons valued at Rs. 15·11 crores in 1949-50 to 227·2 million gallons valued at Rs. 17·52 crores. Two-thirds of the supply were received from Iran whose deliveries had advanced from 72 million gallons valued at Rs. 4·32 crores to 124 million gallons valued at Rs. 9·68 crores and 156 million gallons valued at Rs. 12·31 crores in the three successive years. Bahrain Islands were the second best source having accounted for 44 million gallons valued at Rs. 3·14 crores in the year under review. Among other sources were Singapore, Sumatra, and Saudi Arabia, the first two figuring in the list only in the past two years.

Imports of motor spirit also showed an upward trend and totalled 193·48 million gallons valued at Rs. 17·87 crores. Iran alone accounted for 146·8 million gallons valued at Rs. 13·91 crores as against 133·8 million gallons valued at Rs. 12·48 crores in 1949-50. Bahrain Islands shipped 16·1 million gallons and 22·5 million gallons valued at Rs. 1·54 crores and 1·76 crores respectively in the following two years. Singapore and Sumatra sold a little over 9 million gallons each while Saudi Arabia delivered 4·2 million gallons. Petroleum other than motor spirit totalled 0·682 million gallons valued at Rs. 8¼ lakhs as against 0·354 million gallons valued at 4¾ lakhs in 1949-50.

A substantial contraction in imports was noted under fuel oils and lubricating oils. Imports of fuel oil dropped to 329·3 million gallons valued at Rs. 11·70 crores in the year under review. Arrivals of diesel oils, however, showed a comparatively small decline from 136·6 million gallons in 1949-50 to 134·1 million gallons but the value remained unchanged at Rs. 6·84 crores.

Fuel oils from Iran recorded a fresh high level at 230 million gallons valued at Rs. 7·73 crores as against 225·3 million gallons valued at Rs. 7·60 crores in 1949-50. On the other hand, imports from Singapore dropped from 48·8 million gallons to 34·4 million gallons while those from the U.S. were reduced to a tenth of the quantum.

After moving up from 50·8 million gallons valued at Rs. 8·38 crores to 57·4 million gallons valued at Rs. 8·95 crores lubricating oils dropped to 40·5 million gallons valued at Rs. 6·94 crores. Batching oils dropped to 13·8 million gallons valued at Rs. 88 lakhs after advancing from 7·97 million gallons valued at Rs. 51 lakhs to 17·9 million gallons valued at Rs. 1·19 crores. The bulk of the supplies were from Iran. Other lubricating oils showed a sharper contraction in trade, their import being 42·8 million gallons valued at Rs. 7·87 crores, 39·5 million gallons valued at Rs. 6·96 crores and 26·7 million gallons valued at Rs. 6·06 crores in the year under review. Nearly 90 per cent. of the supplies were of American origin.

Textile Raw Materials (Rs. 111·15 crores).—The shortage of textile raw materials following the partition of the country and the dislocation of trade with Pakistan in the post-devaluation period drove the Government of India to arrange for higher imports of textile raw materials in 1950-51 in order to enable the Indian textile industry to augment its production. As a result, imports of textile raw materials which had amounted to Rs. 67·01 crores in 1949-50 jumped up by 65 per cent to Rs. 111·15 crores. Out of an increase of Rs. 44 crores over the preceding year Rs. 37½ crores were under raw cotton, while imports of raw wool and raw silk rose by Rs. 2·25 crores and Rs. 2·16 crores respectively. Imports of staple fibre and yarn recorded a sharp increase and reached a spectacularly high level at 13·9 million lbs. valued at Rs. 2·2 crores. Out of this, staple fibre accounted for 12·59 million lbs. valued at Rs. 1·90 crores as against 0·45 million lbs. valued at only Rs. 6¼ lakhs in 1949-50.

Raw Cotton (Rs. 100.76 crores).—Imports of raw cotton amounted to 214,886 tons valued at Rs. 100·76 crores in the year under review as against 158,578 tons valued at Rs. 63·22 crores in 1949-50. The United States from which hardly a few thousand tons of cotton used to be imported shipped 100,858 tons valued at Rs. 40·56 crores in the year under review. Egypt and Kenya colony supplied 49,231 tons valued at Rs. 32·35 crores and 41,201 tons valued at Rs. 16·38 crores respectively. In 1949-50, both these countries had delivered 76,182 tons valued at Rs. 34 crores and 35,647 tons valued at Rs. 13·74 crores respectively. Arrivals from Anglo-Egyptian Sudan were also higher at 13,551 tons valued at Rs. 7 crores, as against 4,582 tons valued at Rs. 1·92 crores in 1949-50. Receipts from Pakistan dropped progressively from 61,898 tons valued at Rs. 16 crores to 22,489 tons valued at Rs. 6·41 crores and reached 809 tons valued at Rs. 27 lakhs in the year under review. Imports from Peru rose from 2,945 tons to 7,564 tons in volume and from Rs. 1·11 crores to Rs. 2·79 crores in value but in 1950-51 the quantity slumped heavily to 4,359 tons while the fall in value was only Rs. 53 lakhs.

Cotton Manufactures (Rs. 2.36 crores).—Imports of cotton manufactures including twist and yarn declined precipitately in the year 1950-51 to Rs. 2·36 crores after showing a small improvement from Rs. 17·17 crores in 1949-50 to Rs. 18·41 crores in the following year.

Receipts of cotton piecegoods contracted to 5·734 million yards valued at Rs. 130 lakhs during the year under review from 73·333 million yards valued at Rs. 10·70 crores in 1949-50. Imports of grey cloth fell sharply to 0·69 million yards valued at Rs. 6·6 lakhs in 1950-51. The bulk of the supply was plain grey and came from several countries including Japan which supplied a little over a lakh yards. Arrivals of white goods dropped to one-tenth at 1·95 million yards in 1950-51 from 19·66 million yards valued at Rs. 334 lakhs in 1949-50.

Printed piecegoods fared comparatively better. After maintaining the imports at a little over 10 million yards valued at Rs. 197 lakhs, the figure fell only to a little over two lakh yards valued at Rs. 4½ lakhs. Dyed goods accounted for 2·8 million yards valued at Rs. 72 lakhs as against 13·9 million yards valued at Rs. 295 lakhs in 1949-50, while woven coloured goods were reduced to 50,445 yards valued at Rs. 1·35 lakhs in the year under review.

The recovery in the import of cotton twist and yarn from 11 million lbs. valued at Rs. 450 lakhs to 14 million lbs. valued at Rs. 577 lakhs in the previous year was followed by a sharp contraction to a less than half a million lbs. valued at Rs. 30 lakhs in the year under review.

Wool, Raw (Rs. 5.58 crores).—Imports of raw wool showed a rise of nearly 80 per cent. in value from Rs. 3·03 crores to Rs. 5·58 crores but were reduced in volume from 11·78 million lbs. to 11·71 million lbs. In 1948-49 India had imported 14·54 million lbs. of wool at a cost of Rs. 3·17 crores. A little over half the supply was from the U.K., while a third came from Australia and New Zealand. Deliveries from Pakistan were nil.

Woollen Manufactures (Rs. 1.65 crores).—The downward trend of woollen manufactures from Rs. 724 lakhs to Rs. 597 lakhs became more pronounced in the year under review when imports sank to Rs. 165 lakhs. Arrivals of yarn and knitting wool, which had been stepped up from 1·9 million lbs. valued at Rs. 154 lakhs to

2·9 million lbs. valued at Rs. 192 lakhs, dropped to 0·9 million lbs. valued at Rs. 109 lakhs in 1950-51. Imports of blankets and rugs fell by half in quantity to a little over two lakhs; but the value shrank by a third to Rs. 3·79 lakhs. Carpets and floor rugs were reduced to one-fifth of the previous year's figure of 95,337, while imports of hosiery recovered to 87,218 lbs.

Silk, Raw and Manufactures (Rs. 2.54 crores).—Imports of silk, raw and manufactures, recovered, to Rs. 254 lakhs from Rs. 54 lakhs. Receipts of raw silk totalled 1·38 million lbs. valued at Rs. 171 lakhs, 1·7 lakh lbs. valued at Rs. 21 lakhs and 1·28 million lbs. valued at Rs. 237 lakhs respectively in the three consecutive years. Japan supplied a little over 40 per cent. of the material and Hongkong about 35 per cent. while China accounted for a little over 2 lakh lbs. Imports of silk yarn amounted to a few hundred lbs. in the preceding two years but were stepped up to 65,967 lbs. valued at Rs. 87 lakhs in the year under review. Silk piece-goods accounted for an intake of ¾ lakh yards valued at Rs. 2 lakhs after being pushed up from 0·46 million yards to 1·13 million yards.

Other Textile Material (Rs. 18.01 crores).—The shortage of cotton yarn for the handloom industry necessitated the more extensive use of other textile materials and this, together with higher imports of artificial silk goods, sent up the value of imports of this group from Rs. 15·22 crores to Rs. 16·55 crores and further to Rs. 18·01 crores in the year under review.

Imports of artificial silk yarn downtrended to 35·28 million lbs.; but their value rose sharply from Rs. 10·46 crores to Rs. 14·71 crores. Nearly half the quantity was received from Italy. Arrivals of piece-goods made entirely of artificial silk shrank from 14·25 million yards valued at Rs. 315 lakhs to 1·8 million yards valued at Rs. 41·7 lakhs. The following are some of the other more important items :—

	1948-49	1949-50	1950-51
Flax, raw and manufactures (Rs. lakhs) ..	28	11	7
Haberdashery and Millinery (Rs. lakhs) ..	7·5	13	21
Hemp, raw (cwts. in 000) ..	9	64	45
Staple Fibre, raw (000 lbs.) ..	53	449	12,586
Staple Fibre, Yarn (000 lbs.) ..	752	2,758	1,251

Metals and Ores (Rs. 48.78 crores).—Imports of metals and ores sought a high level at Rs. 48·78 crores in 1950-51 after recording a small fall of Rs. 2·10 crores in the preceding year when they amounted to Rs. 35·28 crores. Out of these, iron and steel and manufactures thereof accounted for Rs. 17·65 crores and other metals and their manufacture for Rs. 27·75 crores. Non-metallic mining and quarry products represented an intake of Rs. 2·96 crores as against Rs. 2·71 crores in 1949-50. The value of imported metallic ores and scrap was higher though negligible at Rs. 43 lakhs.

Imports of aluminium were stepped up from 133,458 cwts. valued at Rs. 184 lakhs in 1949-50 to 193,600 cwts. valued at Rs. 277 lakhs in the following year. The increase was more pronounced under unwrought varieties whose receipts totalled 57,033 cwts. valued at Rs. 52 lakhs as against 300 cwts. in 1949-50.

Arrivals of brass material remained almost unchanged at 2·9 lakh cwts. The bulk of the receipts represented wide varieties of items imported in small quantities.

Imports of copper excluding ore made a feeble recovery from 0·69 million cwts. valued at Rs. 640 lakhs to 0·75 million cwts. valued at Rs. 849 lakhs. Unwrought copper represented nearly two-thirds of the supply and amounted to 0·6 million cwts. valued at Rs. 687 lakhs as against 0·57 million cwts. valued at Rs. 540 lakhs in the preceding year. Nearly half the supply was from the U.S. and Canada. Arrivals of copper wrought recovered from 24,087 cwts. valued at Rs. 33 lakhs to 27,902 cwts. valued at Rs. 40 lakhs. In the midst of a worldwide scarcity, India succeeded in securing 125,040 cwts. of old copper valued at Rs. 122 lakhs in the year under review compared to 89,410 cwts. valued at Rs. 67 lakhs in the preceding year.

German silver, which had risen in volume from 38,715 cwts. valued at Rs. 109 lakhs to 44,463 cwts. valued at Rs. 85 lakhs following the fall in price, recorded a fall at 19,130 cwts. at Rs. 20½ lakhs in the year under review. The rise in the import of quicksilver was phenomenal. Against 0·13 million lbs. valued at Rs. 5 lakhs in 1949-50, arrivals reached 3·1 million lbs. valued at Rs. 97 lakhs in the year under review.

Imports of lead were higher at 311,738 cwts. valued at Rs. 220 lakhs as against 148,109 cwts. valued at Rs. 112 lakhs in 1949-50. Pig lead alone accounted for 279,037 cwts. valued at Rs. 196 lakhs being double in volume and value compared to the previous year.

After declining from 66,566 cwts. valued at Rs. 233 lakhs to 61,394 cwts. valued at Rs. 169 lakhs, imports of tin jumped up to 85,792 cwts. valued at Rs. 381 lakhs in the year under review. Unwrought tin totalled 84,864 cwts. of which nearly two-thirds came from Singapore.

Zinc or spelter recovered almost wholly the ground it had lost in the preceding year and totalled 748,275 cwts. valued at Rs. 579 lakhs in the year under review. The U.S. and Australia were important suppliers but several other countries also participated in the trade.

Imports of iron and steel and manufactures thereof covered a very wide field and the main items are detailed below :—

—	1948-49		1949-50		1950-51	
	Tons	Rs. in lakhs	Tons	Rs. in lakhs	Tons	Rs. in lakhs
Beams, Girders, etc.	2,775	15·60	4,716	23·50	5,788	28·17
Bolts and Nuts	4,880	09·85	2,914	39·23	4,824	64·02
Fencing Material	1,084	13·14	356	4·16	2,870	22·46
Hoops and Strips	13,702	88·43	5,200	30·87	2,984	21·16
Nails, Rivets and Washers ..	8,084	96·47	3,606	47·17	4,580	50·25
Rails, Fish plates, etc. ..	21,229	70·69	38,935	83·17	33,823	120·00
Pipes and Fittings.. ..	876	12·90	905	13·96	1,030	15·80
Screws	2,374	62·84	1,345	25·94	1,093	23·48
Sheets and Plates	36,361	269·00	46,601	329·00	33,154	313·00
Tubes, Pipes and Fittings	10,426	119·00	30,002	299·00	35,548	308·00
Wire Nails	10,308	97·55	503	4·01	382	3·67
Wire Rope	3,626	41·30	3,748	49·54	4,713	64·54
Iron, excluding ore ..	479	2·44	1,025	3·97	640	2·89
Steel—Angle and Tee ..	518	2·66	6,877	28·85	8,767	40·02
Spring	22	0·77	77	1·95	47	1·47
Bars	11,008	69·10	23,271	120·24	45,625	188·27
Cast	189	3·56	250	4·71	1,238	8·48

Anchors and Cables	853	9·85	1,026	11·94	510	6·87
Total of Iron & Steel	140,962	11,63	167,401	11,79	171,826	13,19

Vehicles (Rs. 23.93 crores).—After rising to Rs. 33·15 crores in 1948-49, imports of vehicles excluding locomotives for railways dropped to Rs. 23·46 crores in 1949-50 and were slightly higher at Rs. 23·93 crores in the year under review. The bulk of the imports represented mechanically propelled vehicles.

Imports of motor omnibuses, motor vans and motor lorries dropped progressively from 21,241 valued at Rs. 9·45 crores to 11,455 valued at Rs. 6·09 crores in 1949-50 and sank further to only 4,807 valued at Rs. 3·08 crores in the year under review. The supplies mainly came from the United Kingdom and the U. S. A. Imports of motor cars including taxi cabs had dropped from 18,005 valued at Rs. 7·64 crores to 7,056 valued at Rs. 3·17 crores but recovered to 8,349 valued at Rs. 3·19 crores in 1950-51. The bulk of the supply came from the U. K.

The downward movement of imported motor cycles gained fresh momentum in the year under review, when only 2,196 motor cycles valued at Rs. 24¼ lakhs were received as compared to 2,466 valued at Rs. 24·9 lakhs in 1949-50. Wagons and parts of railways accounted for an intake of Rs. 1·81 crores in 1950-51 as against Rs. 1·40 crores in 1949-50.

Imports of tram cars during the year were not recorded but 28 tram cars were imported in the previous year at a cost of Rs. 7 lakhs. Parts of aircraft showed an upward trend from Rs. 1·58 crores to Rs. 1·91 crores and further to Rs. 2·43 crores. On the other hand, imports of aircraft dropped from 7 valued at Rs. 3·7 lakhs in the year under review. Carriages and parts of railways were reduced by half to Rs. 52 lakhs.

Imports of cycles and parts thereof dropped sharply to Rs. 2·43 crores. Imports of cycles complete were reduced from 268,148 valued at Rs. 2·52 crores in 1949-50 to 165,461 valued at Rs. 1·48 crores following the expansion of the domestic industry. Imports of carriages not mechanically propelled had risen from Rs. 21 lakhs to Rs. 30 lakhs, but the recovery proved temporary, arrivals during 1950-51 being valued at Rs. 21 lakhs. The bulk of the imports represented carriages and carts not mechanically propelled and their parts. Perambulators and children's go-carts and their parts accounted for only Rs. 50,000.

Instruments, Apparatus and Appliances (Rs. 17.46 crores).—Imports of instruments, apparatus and appliances were at the lowest level of Rs. 17·46 crores in the year under review as against Rs. 20·72 crores in 1949-50. After falling from Rs. 1·50 crores to Rs. 95 lakhs, imports of electric wires and cable, were pushed up to Rs. 1·24 crores. On the other hand, insulations other than rubber which had advanced from Rs. 2·68 crores to Rs. 4·14 crores, dropped to Rs. 1·96 crores. Telegraph and telephone wires and cables recorded a five-fold rise from Rs. 16·5 lakhs to Rs. 80·5 lakhs. A partial recovery was noticeable under bare copper wire with the result that the aggregate imports of electric wires and cables stood at Rs. 4·03 crores in 1950-51 as against Rs. 5·27 crores in 1949-50.

Arrivals of telegraph and telephone instruments and apparatus were doubled to Rs. 1·04 crores and were three times the value recorded during 1948-49. After a substantial rise from Rs. 26·7 lakhs to Rs. 32·3 lakhs imports of gas-filled electric bulbs were reduced to Rs. 6·3 lakhs. Arrivals of vacuum electric bulbs had remained steady in value during the previous two years around Rs. 12·4 lakhs but imports in 1950-51 were worth only Rs. 0·67 lakhs. The number imported of the two categories was 403,787 and 132,271 respectively in the year under review as against 3·4 million and 2·5 million in the preceding year. Electric bulbs for automobiles declined in 1949-50 to Rs. 4·5 lakhs at which they were unchanged in the year under review. Imports of electric bulbs for torches declined progressively from 26·6 million valued at Rs. 16·5 lakhs to 20·4 million valued at Rs. 21 lakhs and further to 15·9 million valued at Rs. 11·8 lakhs. Electric lamps of other sorts dropped to 1·8 million valued at Rs. 28 lakhs.

During 1950-51 imports of batteries were lower valued at Rs. 17 lakhs as against Rs. 40 lakhs in 1949-50. Accumulators were valued at Rs. 24 lakhs as against Rs. 29 lakhs in the preceding year while electric carbon rose from Rs. 20 lakhs to Rs. 35 lakhs. Importers of electric condenser were lower at Rs. 2 lakhs but those of electric bell operators improved by Rs. ½ lakh to Rs. 3½ lakhs.

Electric lighting accessories and fittings steadily declined to Rs. 21 lakhs in the year under review, and electrical instruments to Rs. 64 lakhs. Imports of electro-medical apparatus hovered around Rs. 34 lakhs. Electrical switchboards accounted for an intake of Rs. 15 lakhs and electrical porcelainware for Rs. 2½ lakhs. Electrical goods and apparatus not enumerated showed a downward trend. The aggregate imports of electrical instruments were valued at Rs. 11·4 crores, Rs. 13·07 crores and Rs. 9·38 crores in the three consecutive years.

Imports of musical instruments downtrended from Rs. 14·7 lakhs in 1949-50 to Rs. 5·1 lakhs in the year under review. Optical instruments dropped to Rs. 30 lakhs after remaining steady around Rs. 44 lakhs in the previous two years. Cinema projecting apparatus and accessories remained unchanged at Rs. 61 lakhs, while sound-recording apparatus showed a progressive fall to Rs. 9½ lakhs in the year under review. On the other hand, a steady rise was recorded under cinematograph films from 193·4 million feet valued at Rs. 1·33 crores in 1949-50 and further to 223·1 million feet valued at Rs. 1·61 crores in the year under review.

Imports of scientific and surgical instruments recorded a sharp increase from Rs. 40 lakhs and Rs. 105 lakhs in the year under review. On the other hand, wireless apparatus, dropped to Rs. 1·36 crores. A little over half the supplies represented component parts of wireless receivers. Other kinds of instruments were valued at Rs. 1·43 crores as against Rs. 1·43 crores in 1949-50.

Chemicals, Drugs and Medicines (Rs. 19.30 crores).—The post-war development of the chemical and pharmaceutical industry has been responsible for a progressive reduction in the imports of commodities under this group. In the year under review, however, Government pursued a liberal policy about their imports owing to the Korean War with the result that the trade after falling from Rs. 28·91 crores to Rs. 16·14 crores recovered to Rs. 19·30 crores.

Nearly half the imports represented drugs and medicines which after remaining almost steady around Rs. 7·90 crores, were pushed up to Rs. 9·93 crores. Supply covered a wide field. Arrivals of quinine salts were reduced from 243,246 lbs. in 1948-49 to only 284 lbs. in the year under review while their value slumped from Rs. 94 lakhs to Rs. 14·808. Imports of proprietary and patent medicines were halved from Rs. 43 lakhs and Rs. 46 lakhs in the two preceding years to Rs. 20 lakhs in 1950-51. The heavy receipts of cocaine in the preceding year proved a temporary phase and preparations of opium and morphia were reduced to Rs. 309.

Imports of cod-liver oil which had doubled to Rs. 9·75 lakhs in 1949-50 were the lowest at Rs. 2·34 lakhs in the year under review and those of asafœtida shrank progressively to 1,969 cwts. valued at Rs. 3 lakhs. On the other hand, the intake of camphor and saccharine broadened rather substantially. Imports of camphor moved up from 1·239 million cwts. valued at Rs. 23·38 lakhs to 1·34 million cwts. valued at Rs. 23·96 lakhs and further to 1·359 million cwts. valued at Rs. 29·53 lakhs. Those of saccharine mounted up to 316,042 lbs. valued at Rs. 22 lakhs after falling sharply from 149·407 lbs. valued at Rs. 12 lakhs to 48,955 lbs. valued at Rs. 3·7 lakhs.

A similar trend was noticeable in respect of chemicals whose imports recovered to Rs. 9·11 crores after registering a fall from Rs. 20·55 crores to Rs. 7·63 crores. Supply of sulphur was augmented from 766,637 cwts. to 819,107 cwts. and further to 1·1 million cwts., their respective value being Rs. 62 lakhs, Rs. 70 lakhs and Rs. 113 lakhs. Nearly two-thirds of the material came from the U.S.A. Caustic soda staged a recovery from 0·26 million cwts. valued at Rs. 59 lakhs to 0·44 million lbs. valued at Rs. 103 lakhs. Almost the whole of the supply came from the United Kingdom.

Imports of sodium carbonate improved from 245,903 cwts. to 596,338 cwts. in volume and from Rs. 28 lakhs to Rs. 66 lakhs in value.

Sodium hydrosulphite accounted for 68,122 cwts. valued at Rs. 87 lakhs in the year under review as against 24,576 cwts. valued at Rs. 25 lakhs in 1949-50 : but other chemicals in the group were substantially lower. Among lead compounds imports of litharge were unusually high, being 100 times the 1948-49 value. In the group of potassium compounds, arrivals of chlorate rose three times the previous year and imports of copper sulphate were up by a third. Zinc compounds were almost steady; but a variety of other chemicals displayed a downward trend.

Imports of acids were reduced from 52,649 lbs. in 1949-50 to 45,181 lbs. in the following year, but rose in value from Rs. 45 lakhs to Rs. 48. Bleaching materials steadied at 112,662 cwts. valued at Rs. 21 lakhs.

Manures (Rs. 12·29 crores).—The growing popularity of manures in the post-war period was reflected in the continuously sharp increase in imports of manures during the three years ended March 1951. Imports reached a new high level at 442,489 tons valued at Rs. 12·29 crores in the year under review. Sulphate of ammonia was the single largest item whose imports rose from 133·183 tons valued at Rs. 3·94 crores to 170,839 tons valued at Rs. 5·05 crores and amounted to 370,024 cwts. valued at Rs. 11·44 crores in the year under review. On the other hand, imports of nitrate of soda, superphosphate and ammonium phosphate displayed a downward movement. The U.S.A. and Belgium supplied between them nearly two-third of the volume of imported sulphate of ammonia, while the Soviet Russia which had delivered half the supply in the previous year was totally absent.

Dyes and Colours (Rs. 14.60 crores).—After three years of a downward trend imports of dyes and colours recovered from Rs. 11·11 crores in 1949-50 to Rs. 14·60 crores in the year under review. The bulk of the imports continued to represent coal-tar dyes. After a 50 per cent. fall in the volume of imports, it recovered to 13·95 million lbs. in 1950-51, valued at Rs. 11·08 crores. A little over a third of the supply came from the United Kingdom with Germany and Switzerland accounting for 23 per cent and 16 per cent. respectively. Imports of saffron steadily declined and totalled only 516 lbs. valued at Rs. 0·87 lakhs in the year under review. Other dyes including lac-dye showed a small fall in 1950-51 when they were valued at Rs. 79 lakhs, the quantity being 213,248.

The following table gives the details of coal-tar dyes :

(In lbs.)

—	1948-49	1949-50	1950-51
Alizarine ..	632,448	104,609	75,438
Congo red ..	1,376,778	937,925	1,412,601
Coupling dyes—			
Rapid Salts	126,809	171,723	263,577
Bases	510,909	668,666	959,496
Napthols	1,231,041	1,280,434	1,205,587
Vats—			
Indigo ..	932,998	292,331	348,170
Carbazole blue .	19,110	6,345	15,492
Paste & powder .	1,394,662	805,905	1,071,060
Sulphur, black ..	3,314,179	502,576	3,812,729
Aniline Salts ..	197,354	169,319	538,119
Metanil, yellow ..	292,929	266,972	228,165

Imports of tanning substances revealed a mixed trend. Imports of barks for tanning were reduced to one-half of 1949-50 and totalled 83,856 cwts. valued at Rs. 21 lakhs. On the other hand, Cochineal recovered to Rs. 16,761 after a fall from Rs. 36,700 while Cutch and Gambier rose to 47,145 cwts. valued at Rs. 52 lakhs after a fall from 42,220 cwts. valued at Rs. 30 lakhs to 22,928 cwts. valued at Rs. 11 lakhs in 1949-50.

Paper, Pasteboard, Stationery and Paper-making materials (Rs. 10.81 crores).—Imports in this group recovered to Rs. 10·81 crores in 1950-51, after recording a fall to 10·35 crores in 1949-50. Out of this, paper-making materials amounted to 124,010 cwts. valued at Rs. 41 lakhs as compared to 279,354 cwts. valued at Rs. 64 lakhs in 1949-50. Almost the whole of the imports were on account of pulp of wood. Arrivals of pasteboard, millboard and cardboard came to 65,696 valued at Rs. 42 lakhs in the year under review.

Imports of paper totalled 1·20 million cwts. valued at Rs. 9·49 crores. Imports of printing paper accounted for an intake of 1·6 million cwts. valued at Rs. 6·08 crores. One-fifth of the supply came from Norway, while Finland accounted for about 17 per cent. the balance being spread over a number of countries. Imports of newsprint alone reached a new high level at 1·5 million cwts. valued at Rs. 5·37 crores.

There was a sharp drop in imported writing paper and envelopes. Imports of blotting paper and old newspaper were reduced drastically in the year under review, while other kinds of paper showed a 100 per cent. rise.

Imports of stationery were down from Rs. 105 lakhs in 1949-50 to Rs. 50 lakhs, the bulk of the supplies being from the United Kingdom. The fall was noted in pencils, while imports of fountain-pens and fountain-pen ink figured in the trade returns after a break of two years.

Fruits and Vegetables (Rs. 9.50 crores).—The imports of the articles under this group rose to Rs. 9·50 crores in the year under review. Exclusive of the imports of canned materials, the rest of the group recorded a smart rise and reached 0·15 million tons valued at Rs. 9·41 crores in the year under review.

More than half the imports were of dates, arrivals of which totalled 80,544 tons valued at Rs. 4·26 crores as against 52,191 tons valued at Rs. 2·69 crores in the preceding year. Next in importance was cashew-nuts whose imports moved up from 53,351 tons valued at Rs. 2·16 crores to 53,956 tons valued at Rs. 2·85 crores. Imports of almonds amounted to Rs. 1·15 crores as against Rs. 82 lakhs in the preceding year, the respective quantity being 3,880 tons and 4,224 tons. Countrywise, Iraq sold dates worth Rs. 3·62 crores and Portuguese East Africa cashew-nuts worth Rs. 2·08 crores.

162459

Hardware and Cutlery (Rs. 14.40 crores).—Imports of cutlery, hardware, implements and minor instruments steadily declined from Rs. 14·40 crores in the year under review. Of this, hardware accounted for an intake of Rs. 4·56 crores compared to Rs. 6·14 crores in 1949-50. Agricultural implements and builders' hardware accounted for imports to the extent of Rs. 24 lakhs each while implements and tool claimed Rs. 128 lakhs. Lamps imports were valued at Rs. 27 lakhs and stoves Rs. 3 lakhs, the rest of the imports being spread over a very wide range. Imports of cutlery, which had risen from Rs. 43 lakhs to Rs. 52 lakhs slipped back to Rs. 28 lakhs. Of this, blades alone represented Rs. 18 lakhs as against Rs. 7 lakhs in the preceding year.

Provisions and Oilman's Stores (Rs. 5.80 crores).—After expanding from Rs. 7·11 crores to Rs. 7·69 crores imports of provisions and oilman's stores declined to Rs. 5·80 crores in the year under review. Out of this, farinaceous and patent foods accounted for Rs. 1·61 crores as against Rs. 2·25 crores in the preceding year, but the quantity fell from 0·29 million cwts. to 0·10 million cwts. Milk imports were higher at 0·35 million cwts. valued at Rs. 3·10 crores as against 0·29 million cwts. valued at Rs. 2·49 crores in the preceding year. Butter accounted for an intake of Rs. 33 lakhs as against Rs. 35 lakhs in 1949-50, while imports of bacon and hams and biscuits and cakes dropped precipitately to a negligible level.

Receipts of canned and bottled provisions were the lowest for three years at Rs. 26 lakhs though the quantity rose to 42,378 cwts. in the year under review. Imports of cheese were halved in volume. Supplies of cocoa and chocolate as well as confectionery were reduced drastically in the year under review.

Spices (Rs. 5.49 crores).—Imports of spices rose by more than 50 per cent to Rs. 5·49 crores in the year under review. The increase was mostly due to the boom in the spice market while the quantity showed a gain of less than 83,000 cwts. and amounted to 1·01 million cwts. in 1950-51 as against 0·93 million cwts. in 1949-50. Betelnuts alone accounted for Rs. 3·43 crores while cloves represented Rs. 1·57 crores.

Imports of betelnuts rose steadily and Singapore delivered bulk of the goods. On the other hand, imports of cloves recovered to 0·091 million cwts. after registering a fall in 1949-50. Almost the whole of the supply came from Zanzibar and Pembak.

Imports of Cassia also downtrended. In the year under review, while the volume fell to 34,500 cwts. their value was up at Rs. 42 lakhs. Hong Kong was the main source of supply. Nutmegs were valued at Rs. 2½ lakhs and ginger at Rs. 5,033, while imports of pepper dropped to Rs. 2·93 lakhs.

Seeds (Rs. 2.28 crores).—Imports of seeds were upward during the past three years and reached Rs. 2·05 crores in the year under review after reporting a hundred per cent. increase to Rs. 1·59 crores in the preceding year. Essential oilseeds accounted for an intake of Rs. 23 lakhs as against Rs. 34 lakhs in the previous year but the volume more precipitately from 9,424 tons in 1949-50 to 1,503 tons in 1950-51.

The total arrivals of seeds improved to 43,163 tons in the year under review. Out of these non-essential seeds totalled 41,580 tons valued at Rs. 205 lakhs in 1950-51 as against 28,937 tons valued at Rs. 159 lakhs in the preceding year. Imports of copra, after rising from 3,442 tons valued at Rs. 31 lakhs to 12,417 tons valued at Rs. 102 lakhs, dropped in volume to 8,627 tons in the year under review but their value advanced to Rs. 114 lakhs following the Korean War boom. Most of the supply came from Ceylon.

Tobacco (Rs. 2.76 crores).—After a sharp fall from Rs. 3·63 crores to Rs. 2·41 crores, imported tobacco recovered in value to Rs. 2·76 crores but the quantity declined from 12·345 million lbs. to 8·517 million lbs. and reached 6·163 million lbs., unmanufactured tobacco dropped from 11·5 million lbs. to 8·4 million lbs. and then to 6·0 million lbs., the respective value being Rs. 295 lakhs, Rs. 228 lakhs and Rs. 259 lakhs. Almost the whole supply came from the U.S. with the result that the rise in its import costs was heavy in the post-devaluation period. Imports of cigarettes steadied after falling from 309·6 million to 49·7 million and those of cigars reverted to the 1948-49 level after reaching a four-fold level in 1949-50.

Liquors (Rs. 1.45 crores).—As a result of the policy of prohibition introduced in certain States, imports of liquors dropped from 1·86 million gallons to 1·34 million gallons reaching 1·21 million gallons in the year under review, the value also declined progressively from Rs. 213 lakhs to Rs. 180 lakhs and further to Rs. 145 lakhs. Out of this, drugs, medicines and chemicals containing spirit and perfumed and denatured spirit represented 0·89 lakhs gallons valued at Rs. 44 lakhs, 1·79 lakhs gallons valued at Rs. 72 lakhs and 0·57 lakhs gallons valued at Rs. 26 lakhs in three consecutive years.

Paints and Painters' Materials (Rs. 1.08 crores).—Imports dropped from Rs. 177 lakhs in 1949-50 to Rs. 108 lakhs in the year under review. The value of painters' materials other than paints and colours downtrended to Rs. 26 lakhs. Turpentine and turpentine substitutes represented one-third of the cost of imports under this group.

Paints and colours fell in volume and in value. More than half the imports in value were coloured dry, while lithophone dry and coloured moist accounted for another 25 per cent. Three-fifths of the material was of British origin.

Rubber, Raw and Manufactures (Rs. 3.33 crores).—Imports recorded a sharp rise from Rs. 49 lakhs to Rs. 333 lakhs following the world boom in the commodity. Arrivals of raw rubber totalled 12 million lbs. and amounted to Rs 301 lakhs as against Rs. 102 lakhs and Rs. 17 lakhs in the two previous years. Receipts of rubber manufactures were almost unchanged at Rs. 32 lakhs of which Rs. 18 lakhs represented pneumatic motor covers.

Arms and Ammunition (Rs. 2·26 crores).—After hovering between Rs. 110 lakhs and Rs. 125 lakhs in the preceding two years imports of arms and ammunition went up to Rs. 226 lakhs in the year under review. Explosives accounted for nearly two-fifths of the trade with imports valued at Rs. 93·5 lakhs in 1950-51 as against Rs. 56 lakhs in the preceding year. Firearms and their parts formed the second major group with imports at Rs. 57 lakhs in the year under review showing a gain of Rs. 25 lakhs over 1949-50. Receipts of cartridge cases settled down at Rs. 7½ lakhs after rising sharply from Rs. 8¾ lakhs to Rs. 21 lakhs.

Gums and Resins (Rs. 0·79 crores).—The volume of imports steadily declined during the past three years from 310,137 cwts. to 133,975 cwts. and then to 111,642 cwts. On the other hand, the value rose by Rs. 19 lakhs to Rs. 79 lakhs in the year under review. The following are the details of imports in thousand lbs.

—	1948-49.	1949-50.	1950-51.
Arabic	159	59	65
Benjamin	9	4	4
Dammer	52	40	31
Olibanum	4	4	2
Rosin	64	16	4
Other sorts ..	23	11	6
Total ..	331	134	112

The following are some of the more important items not detailed above :—

(Rs. in lakhs)

—	1949-50.	1950-51.
Asbestos	110·3	1,48·5
Books	76·4	67·5
Boots and shoes	4·0	0·7
Building and Engineering materials	425·3	125·2
Buttons	33·1	3·8
Canes and Rattans	10·2	11·6
Clocks and watches	142·4	134·1
Cork manufactures	27·2	34·6
Fish	20·1	22·4
Fodder, bran and pollards	38·2	45·3
Mica	6·4	34·3
Plastic material and manufactures	—	161·4
Polishes	41·8	19·8
Precious stones and pearls.	77·2	57·2
Salt	136·3	75·0
Soap	5·8	1·9
Tea-chests	126·6	50·9
Earthenware and porcelain	59·1	26·5
Glass and glassware	191·4	57·4
Hides and skins, raw ..	34·3	47·2
Leather, hides and skins, tanned	71·9	56·2
Ivory	25·1	31·8
Lac	69·2	65·2
Essential oils	45·8	72·8
Sugar	0·2	62·9
Tallow	43·0	70·7
Umbrella fittings	52·7	49·6

EXPORTS OF MERCHANDISE

The upward trend of exports of Indian merchandise witnessed since the end of the war continued unabated. During the year under review, the export trade received a fresh momentum from the world boom in commodities as the result of the Korean war and the rearmament drive. India's export trade consequently sought a new high level at Rs. 559·08 crores as against Rs. 479·94 crores in the preceding year. On the basis of 1948-49, the price index of exports showed a rise from 103 in 1949-50 to 118 in the following year. The rise was most pronounced in respect of raw materials whose combined price index advanced by 25 per cent. to 132 in the year under review. The next in order was the food group to record a rise of about 15 per cent. Manufactured articles, on the other hand, recorded an advance of about 12 per cent.

The year started with a discouraging outlook and exports in the first quarter averaged Rs. 32 crores. The outbreak of the war in June, however, provided a fresh stimulant and exports began to look up continuously until they reached Rs. 52·40 crores in November 1951. December was once again a bad month when export earnings dropped to Rs. 49·70 crores, but the recession proved temporary and the subsequent recovery lifted up the trade month by month until it reached a record high level of Rs. 66·93 crores in March 1951. Throughout the year, the trade was subjected to export control having regard to the need for meeting the domestic requirements and at the same time aiming at earning a larger foreign exchange.

For the first time in the history of India, jute surrendered its leadership to cotton in the export field. The value of exports of oils, oilseeds, spices, tea and a variety of other commodities also recorded a substantial rise. On the other hand, manganese ore and mica reported a decline. Out of the total exports, cotton raw and manufactured, accounted for a little over 27 per cent. while jute, raw and manufactured, represented one-fifth of the value of the total shipments. Though the value of tea advanced further, its percentage to the total trade dropped from 15·65 per cent. to 13·97 per cent. On the other hand, the importance of tobacco, metals, ores and minerals and total was enhanced in the year under review.

In the pre-war years, 46 per cent. of exports of undivided India was accounted for by three commodities, namely; jute manufacture, raw cotton and tea. Oilseeds, raw jute, grain, pulses and flour, cotton manufactures and tanned hides and skins accounted between them for 30 per cent. of the export trade. Eleven more commodities absorbed another 15 per cent. of the trade, leaving 9 per cent. to be distributed over a wide range of articles. In other words, the pre-war pattern of trade was such that the export demand depended on the tempo of industrial activity in other parts of the world. In 1950-51, 46 per cent. of the exports were of textile yarns and fabric and export of textile raw materials was less than 5 per cent. of the total.

The growing industrialisation, followed by the partition of the country changed the pattern of trade and new commodities such as chemicals, drugs and medicine, dyes and colours and rubber manufactures, assumed a greater importance in the trade returns. In the case of jute goods and oils India was in a strong bargaining position which prompted Government to impose export duty during the year under review.

The following details of India's export trade, exclusive of re-exports, are in thousands of rupees :—

(Rs. in 000s).

—	1948-49	1949-50	1950-51	% of Total Exports
Jute, Raw and Manufactures	171,51,50	143,72,17	113,94,66	20·383
Cotton, Raw and Manufactures	59,00,79	93,12,74	151,62,93	27·126
Wool and Woollens	4,12,90	7,37,18	13,89,80	2·486

Cotton, Raw and Manufactures (Rs. 151.63 crores).—Exports of cotton, raw and manufactures, advanced by nearly 60 per cent. from Rs. 93·13 crores to Rs. 151·63 crores. Out of this exports of raw cotton amounted to only Rs. 4·94 crores as against Rs. 10·60 crores in 1949-50. Quantitatively, shipments of raw cotton were reduced from 329,680 bales in 1949-50 to 83,788 bales in the year under review. Stoppage of trade with Pakistan resulted in a shortage of cotton for the domestic industry and the Government was obliged not only to restrict the level of exports but to regulate the destination. In issuing the licences, the dollar countries naturally got the preference and consequently, shipments to the U.S. were comparatively higher at 5,769 tons valued at Rs. 2·19 crores as against 3,865 tons to the U.K. On the other hand, exports to continental countries were drastically pruned down.

Exports of cotton waste rose in volume from 1·02 million cwts. to 1·51 million cwts. and then declined to 1·30 million cwts. in the year under review. Despite the fall in volume, the value of exports rose by nearly 50 per cent. to Rs. 12·38 crores in 1950-51 as against Rs. 8·22 crores in the preceding year. A little over one-third of the exports went to the U.K., while the U.S.A. took 0·29 million cwts. and Italy 0·12 million cwts.

Exports of cotton manufactures were pushed up to Rs. 74·31 crores in 1949-50 and were later lifted up smartly to reach an all-time record level of Rs. 134·31 crores in the year under review. Shipments of twist and yarn stood at 73·65 million lbs. valued at Rs. 10·78 crores. Almost the whole of exports were in respect of grey, singles. Hong Kong alone bought yarn to the tune of 21·97 million lbs., Singapore took 5 million lbs. and Pakistan 1·6 million lbs., the rest of the shipments having gone to several countries. Hosiery recovered to Rs. 86 lakhs as against Rs. 79 lakhs in 1949-50.

After a 100 per cent. increase from 340·03 million yards to 700·86 million yards, exports of cotton piece-goods were lifted up by 80 per cent. to 1,269 million yards thereby conferring on India the honour of being the world's biggest exporter of cloth. The total value of exports stood at Rs. 114·57 crores in 1950-51 as against Rs. 59·11 crores in 1949-50. Handloom cloth accounted for an export of a little over 54 million yards valued at Rs. 9·42 crores in the year under review.

Exports of mill-made grey were doubled to 564·5 million yards valued at Rs. 42·73 crores. A little less than one-fifth of the value was paid by Singapore, while Aden and dependencies increased their purchases from 46·16 million yards in 1949-50 to 66·16 million yards in the year under review. Burma increased its imports of Indian cloth by nine times the volume recorded in 1949-50 to 37·2 million yards valued at Rs. 286 lakhs. Hong Kong and Kenya stood next in order with Pakistan standing fifth along with Tanganyika. Italian East Africa also doubled its purchases to 27·58 million yards valued at 2·60 crores.

Shipments of white (bleached) cloth were nearly double in the two consecutive years, reaching 250·7 million yards valued at Rs. 23·14 crores in the year under review. Singapore was the best customer with an intake of 68·88 million yards valued at Rs. 658 lakhs with Burma standing second having purchased 50·69 million yards valued at Rs. 473 lakhs. Aden and Pakistan along with Australia came next in order. The rest of the supplies were distributed over a very wide area.

Exports of coloured, printed and dyed goods rose by 100 million yards each in the past two years touching 399·9 million yards valued at Rs. 39·29 crores in 1950-51. Singapore was again the best customer, having bought a little over 100 million yards at a cost of Rs. 10 crores. Burma stood second by purchasing 49 million yards at a cost of Rs. 4·83 crores, while Afghanistan, Pakistan, Ceylon and Arabia stood next in order as India's best customers.

The following table gives the more important details about the destination of exports of all types of cotton piece-goods :—

(In million yards)

	1948-49	1949-50	1950-51
Singapore ..	5	90	273
Burma	15	30	137

Arabia	9	30	38
Malaya	6	43	33
Hong Kong ..	0	24	25
Anglo-Egyptian Sudan	8	55	48

Jute, Raw and Manufactures (Rs. 113.95 crores).—Shipments of jute, raw and manufactures, maintained their downward trend from Rs. 171·52 crores in 1948-49 to Rs. 113·95 crores in 1950-51. Consequently, the group lost its leadership in the Indian export trade and accounted for only one-fifth of the total value of exports as against 31 per cent. in the preceding year. The decline was noted under both raw and manufactured jute and is mainly attributable to the difficulty in getting raw jute from Pakistan, thereby necessitating the increased consumption of Indian jute in the industry.

The year, however, began well with a short-term trade agreement with Pakistan and the trade was helped by the boom in both hessian and sacking. To bridge the gap between the control prices in India and the free prices abroad the export duty on hessian was increased in stages to Rs. 1,500 per ton and on sacking to Rs. 150 and later to Rs. 350 per ton. The directional control on shipments of jute goods had been removed temporarily in October 1950, but it was restored again after a month. Exports of jute goods to soft currency countries were on a quota basis.

Fruits and Vegetables (Rs. 10.77 crores).—A sharp increase of over 35 per cent. was registered by exports of fruits and vegetables which rose from Rs. 7·92 crores in 1949-50 to Rs. 10·77 crores in the following year. Export of onions rose in volume by 50 per cent. from 7·3 lakh cwts. to 11·3; but the value showed a small gain of Rs. 1¼ lakhs at Rs. 13 lakhs in 1950-51 compared to Rs. 11¼ lakhs in 1949-50.

Cashew kernels constituted the major item and accounted for almost the whole of the increase in exports under this group. Their shipments rose from 18,973 tons in 1949-50 to 25,176 tons in the year under review, while their value went up from Rs. 5·61 crores to Rs. 8·46 crores. More than three-fourths of the trade was with the U.S.

Coir, Manufactures (Rs. 10.76 crores).—The export trade in coir, manufactures rose from 1·424 million cwts. valued at Rs. 7·21 crores in 1949-50 to 1·552 million cwts. valued at Rs. 10·76 crores.

Coir yarn was mainly responsible for the major share of the gain. Its exports were stepped up from 0·928 million cwts. valued at Rs. 3·50 crores in 1949-50 to 1·115 million cwts. valued at Rs. 7·20 crores in the year under review. Netherlands stepped up its purchases to 0·304 million cwts. in 1950-51; but the U.K. and Western Germany reduced their intake from 0·187 million cwts. and 0·193 million cwts. in 1949-50 to 0·164 million cwts. and 0·168 million cwts. in the following year.

Exports of coir mats and mattings had shown a smart rise in the preceding year from 0·160 million cwts. valued at Rs. 1·34 crores to 0·391 million cwts. valued at Rs. 2·76 crores. In the year under review, however, while the quantity shipped was higher by about 12,000 cwts. the value was up by Rs. 44 lakhs over 1949-50. The U.K. was the chief customer. Other sorts of coir and unmanufactured formed only a fraction of the trade.

Rubber and Rubber Goods (Rs. 1.86 crores).—Exports of rubber and rubber manufactures were nearly doubled from Rs. 0·97 crores in 1949-50 to Rs. 1·86 crores in 1950–51. Exports of raw rubber represented only a fraction of the total shipments but the trade tended to broaden from 0·96 lakh lbs. to 2·117 million lbs., the value rising from Rs. 1·27 lakhs to Rs. 19·87 lakhs.

Exports of rubber goods declined from Rs. 161 lakhs to Rs. 96 lakhs before advancing to Rs. 166 lakhs. Pneumatic covers and tubes accounted for Rs. 30 lakhs and Rs. 43 lakhs respectively. Ceylon and Burma bought rubber goods valued at Rs. 27 lakhs and Rs. 28 lakhs respectively and Afghanistan Rs. 7 lakhs. The rest of the shipments were widely distributed.

The following table gives the deals of important items in the export trade not reviewed earlier :—

(Rs. in 000s)

	1949-50.	1950-51.
Bones for manufacturing purposes	66,31	116,07
Boots and shoes	53,00	65,49

Gross output of agriculture and animal husbandry	5,146
Net output of agriculture and animal husbandry	4,123

(a) Includes gur, molasses and bagasse. (b) Includes seed and sticks. (c) Includes among other things, straw.

INSURANCE

LIFE insurance business in 1951 has not shown much progress though a few big offices registered increase over their 1950 figures. In general insurance an appreciable fall is feared particularly in fire due to various Government controls and transport restrictions.

The year was notable for the completion of the process of eliminating raw-jute from India's foreign trade in the post-partition period. During 1948-49, India had shipped 213,603 tons of raw jute valued at Rs. 23·95 crores. In the following year exports were reduced to 147,450 tons valued at Rs. 16·74 crores, and in the year under review, only 526 tons were shipped for Rs. 6 lakhs.

Shipments of jute manufactures including twist and yarn dropped progressively from Rs. 126·99 crores in 1949-50 to Rs. 113·89 crores in the year under review. Quantitatively, the decline was more precipitate, exports in 1950-51 being only 649,635 tons as against 786,657 tons in 1949-50. Exports of twist and yarn shrank from 14·7 million lbs. valued at 125 lakhs to 10·6 million lbs. valued at Rs. 104 lakhs in the year under review. Shipments of canvas dropped by one-fifth to 2·5 million yards. Exports of rope and twine and miscellaneous goods were comparatively steady around 0·74 million cwts. valued at Rs. 505 lakhs in 1950-51.

Export of sacking gunny bag slipped down to 325,788 tons valued at Rs. 51·76 crores in the year under review. Out of a total of 309·5 million bags, Australia bought 61·1 million with Cuba ranking second having taken 35·1 million bags. China, Burma, Thailand, Porto Rico and Kenya were the next best customers.

Shipments of hessian gunny bags were slightly higher at 18,072 tons valued at Rs. 342 lakhs in 1950-51. Nearly 40 per cent. of the shipments went to Egypt and 20 per cent. each were for the U.K. and Hawaii. The total exports of gunny bags, hessian and sacking, fell from 433,564 tons valued at Rs. 63·78 crores in 1949-50 to 343,860 tons valued at Rs. 55·18 crores in 1950-51.

The decline in exports of gunny cloth was sharper sinking to 263,328 tons valued at Rs. 52·53 crores in the year under review. Exports of sacking gunny cloth representing a fraction of the trade were reduced progressively from 14,050 tons valued at Rs. 195 lakhs to 10,533 tons valued at Rs. 168 lakhs and to 9,436 tons valued at Rs. 159 lakhs in the year under review. On the other hand, exports of hessian gunny cloth were reduced to 253,892 tons valued at Rs. 50·95 crores in the year under review. 61 per cent. of the shipments of hessian gunny cloth went to the United States which continued to be the most important market. Argentina took 166·9 million yards of cloth out of a total of 1,003 million yards in the year under review as against 128·7 million yards in 1949-50. The third best customer was Canada which maintained its purchases at 76½ million yards.

Tea (Rs. 78.09 crores).—Following the increase in the production of tea from 585 million lbs. in 1949 to 600 million lbs. in 1950, India secured a higher export quota under the international tea arrangements. Nevertheless, exports of tea, which had risen from 405·9 million lbs. valued at Rs. 63·69 crores to 441·5 million lbs. valued at Rs. 72·44 crores, dropped in volume to 430·3 million lbs. in the year under review, but the value sought a fresh higher level at Rs. 78·09 crores. The United Kingdom maintained her purchases at 278·1 million lbs. costing Rs. 46·65 crores as against 276·3 million lbs. valued at Rs. 42·26 crores in 1949-50.

A significant feature was the increase in the export of Indian tea to the United States, which bought 37·6 million lbs. at a cost of Rs. 7·95 crores as against 37·5 million lbs. in the following year valued at Rs. 3·75 crores and Rs. 6·81 crores respectively. After doubling her purchases in the preceding year, Canada, which was the third best customer, reduced her buying from 26·9 million lbs. valued at Rs. 4·70 crores to 20·98 million lbs. valued at Rs. 4·29 crores. Australia accounted for an intake of 16·9 million lbs. while Iran purchased 11·4 million lbs. The rest of the supplies were distributed over a wide field.

Leather, Hides and Skins (Rs. 29.77 crores).—The boom in the commodity was responsible for lifting up the value of exports from Rs. 27·92 crores in 1949-50 to Rs. 29·77 crores in the year under review. Out of this, hides and skins (raw) accounted for Rs. 9·35 crores compared to Rs. 6·96 crores in 1949-50.

The growing demand for raw hides and skins by the domestic leather industry affected exports in the year under review. After a sharp contraction, from 85 tons valued at Rs. 1·7 lakhs to 25 tons valued at Rs. 0·5 lakhs exports of buffalo hides recovered to 274 tons valued at Rs. 9·6 lakhs. Equally smart was the recovery in respect of cow hides whose exports were doubled from 718 tons in 1948-49 to 1,484 tons in the following year and were short by 417 tons compared to the returns for 1948-49. The value of exports recovered to Rs. 49 lakhs. The proportion of hides, to the total exports was, however, negligible. Exports totalled 783 tons valued at Rs. 21 lakhs in 1949-50 and 1,830 tons valued at Rs. 62 lakhs in 1950-51.

Exports of raw skins were slightly lower at 12,228 tons compared to 12,948 tons in the preceding year but their value rose by Rs. 2 crores to 8·60 crores. Goat skins had recorded a rise of 25 per cent. in volume and 45 per cent. in value to 12,723 tons valued at Rs. 6·42 crores in 1949-50, but only 11,716 tons were shipped in the year under review, the export proceeds however rising to Rs. 7·99 crores. More than half the quantity went to the U.S. and another one-fifth to the United Kingdom.

Exports of raw sheep skins sought a fresh lower level at 60 tons valued at Rs. 6·5 lakhs. An upward trend was, however, noticeable in respect of other skins whose exports moved up from 84 tons valued at Rs. 10 lakhs to 158 tons valued at Rs. 11 lakhs in 1949-50, reaching 452 tons valued at Rs. 54 lakhs in the year under review. Cuttings of hides and skins, raw, were the lowest for three years at 3,262 tons valued at Rs. 11 lakhs, but though exports were higher at 4,744 tons in 1949-50, the value realised was less than Rs. 5 lakhs.

Exports of leather and leather manufactures had recorded only a slightly lower level at Rs. 20·42 crores in the year under review. Shipments of buffalo hides were down by 284 tons to 1,102 tons but the value was maintained at Rs. 53 lakhs. The bulk of the exports went to the U.S.A. In the year under review, the quantity of cowhides dropped to 11,906 tons but the value rose further to 750 lakhs. Shipments of calf skins were more or less steady at a little over 1,500 tons, but the value rose by Rs. 36 lakhs to Rs. 139 lakhs.

The exports of skins, and tanned or dressed, slipped back to 5,758 tons valued at Rs. 1,056 lakhs. Sheep skins accounted for an export of 2,388 tons valued at Rs. 437 lakhs. Shipments of goat skins were lower than 1949-50 by 1,334 tons in volume and Rs. 28 lakhs in value at 3,215 tons valued Rs. 538 lakhs. The bulk of the exports of skins went to the United Kingdom with several continental countries and the U.S. buying the balance. Unwrought hides and skins were lower by 3,144 tons in volume and Rs. 26 lakhs in value at Rs. 2,717 tons and Rs. 32 lakhs. Exports of leather goods were down and their total value was around Rs. 11 lakhs.

Spices (Rs. 24.44 crores).—The post-war boom in spices following the loss of the traditional sources of supply was primarily responsible for a price inflation in this commodity with the result that exports of spices from India while amounting to 621,075 cwts. were valued at Rs. 24·44 crores in the year under review compared to 702,046 cwts. valued at Rs. 19·18 crores in 1949-50.

Pepper alone contributed Rs. 20·04 crores in the year under review as against Rs. 14·50 crores in 1949-50, the quantity shipped in the three consecutive years being 141,036 tons, 312,627 tons and 302,617 tons. Nearly 42 per cent of the exports went to the United States which bought 209,795 cwts. at a cost of Rs. 13·96 crores, while 33,931 cwts. valued at Rs. 2·28 crores were shipped to the United Kingdom.

Exports of turmeric were higher at 200,880 cwts. valued at Rs. 123 lakhs as against 172,867 cwts. valued at Rs. 110 lakhs in the preceding year. Exports to Iran, and Arabia, totalled 44,000 cwts. while Pakistan accounted for 47,000 cwts. Shipments of cardamoms progressively declined in volume from 17,506 cwts. to 16,333 cwts. and further to 12,352 cwts. but rose in value from Rs. 73 lakhs to Rs. 125 lakhs and then to Rs. 146 lakhs in the year under review. One-third of the quantity went to Arabia, while Sweden accounted for 2,783 tons.

Exports of betel-nuts had declined in the preceding year from 6,082 cwts. valued at Rs. 5·8 lakhs to 2,941 cwts. valued at Rs. 4·7 lakhs but recovered to 4,601 cwts. valued at Rs. 5·9 lakhs. Shipments of chillies were reduced to a third in volume from 166,481 cwts. to 56,231 cwts. Ginger exports had lost ground in 1949-50 when the quantity had fallen from 41,218 cwts. to 30,139 cwts., but the year under review recorded the recovery at 43,308 cwts., the value rising from Rs. 25·5 lakhs to Rs. 41·7 lakhs and further to Rs. 91·2 lakhs.

Seeds (Rs. 16.98 crores).—After an advance from 104,394 tons valued at Rs. 7·05 crores in 1949-50, exports of seeds dropped from 214,311 tons valued at Rs. 14·80 crores to 202,821 tons but rose in value to Rs. 16·98 crores in the year under review. Out of this, essential oilseeds accounted for 6,406 tons valued at Rs. 91 lakhs as against 7,187 tons valued at Rs. 56 lakhs in 1949-50. Coriander alone amounted to 2,854 tons valued at Rs. 44 lakhs in 1950-51. Seeds other than oilseeds rose three times in volume and nearly 100 per cent. value from 1,162 tons to 3,312 tons and from Rs. 17·6 lakhs to Rs. 32·9 lakhs. The following is the trend of other oilseeds which constituted the bulk of the shipments :—

	1948-49		1949-50		1950-51	
	Tons	Rs. (in lakhs)	Tons	Rs. (in lakhs)	Tons	Rs. (in lakhs)
Castor	..	..	6,245	28	78,315	590
Copra	101	0·97	..	..	..	..
Groundnuts	38,272	313	126,016	904	36,210	337
Linseed	25,024	139	71,666	456	67,099	562
Moura	728	4	..	..	..	..
Mustard	137	0·74	30	0·40	85	1·07
Poppy	25	0·43	18	0·31	18	0·38
Rape	..	..	..	..	100	1·25
Sesamum	33	·25	85	1·30	928	12·2
Other Sorts	29,766	178	2,902	17	10,350	72

Export trade in the above oilseeds was regulated by quotas and licences. About one-fifth of castor was shipped to the U.K. In regard to groundnuts, one-fourth of the quantity was sold to Canada and Switzerland and France bought 8,445 tons and 6,906 tons respectively. A little over one-fourth of the trade in linseed was with Australia. The U.S.A. happened to be the best customer for sesamum.

Oils (Rs. 21.44 crores).—During 1950-51 India shipped 24·5 million gallons of oils valued at Rs. 21·44 crores compared to 11·1 million gallons valued at Rs. 8·79 crores in 1949-50. The bulk of the supply represented non-essential vegetable oils amounting to 24·2 million gallons valued at Rs. 19·02 crores in the year under review. The trade was regulated by the quota system for which the bilateral trade agreements were the main base. The following table gives the details.:—

	1948-49		1949-50		1950-51	
	Quantity in million	Rs. in lakhs	Quantity in million	Rs. in lakhs	Quantity in million	Rs. in lakhs
ESSENTIAL—						
Sandalwood (lbs.)	0·031	10·97	0·114	43·89	0·118	62·70
Lemongrass (,,)	0·761	24·08	0·788	46·62	1·149	132·64
Palmarosa oil (,,)	0·072	10·05	0·128	23·88	0·167	39·49
Other sorts (,,)	0·039	1·81	0·031	1·33	0·049	4·65
Mineral (gallons)	0·080	2·11	0·048	0·81	0·122	3·34
VEGETABLE						
NON-ESSENTIAL—						
Castor (gallons)	3·009	218	1·138	69	5·848	433
Groundnut (,,)	8·951	646	7·049	521	15·553	12,80
Linseed (,,)	2·281	148	1·773	128	1·359	110
Mustard (,,)	0·223	18·5	0·061	5·44	0·029	2·91
Other sorts (,,)	1·020	56	0·877	38	1·396	76

Nearly 40 per cent. of castor oil went to the United Kingdom. France absorbed 4·1 million gallons of groundnut oil out of a total of 15·6 million gallons and Burma 2·5 million gallons. Half the volume of linseed exports found its way into Australia. In the case of mustard Pakistan absorbed most of the shipments.

Metals, Ores and Minerals (Rs. 19.35 crores).—Exports under this group broadened rather sharply during the past three years thanks to the rearmament drive and the Korean War and were valued at Rs. 19·35 crores in 1950-51 as against Rs. 16·56 crores in 1949-50. Non-metallic mining and quarry products accounted for half the value of trade with metallic ores and scrap iron ranking second at one-third of the exports. Metals and their manufactures totalled Rs. 2·53 crores only.

Exports of metallic ores rose from 345,058 tons valued at Rs. 2·18 crores to 1·01 million tons, valued at Rs. 7·15 crores and then slipped back to 0·82 million tons valued at Rs. 6·87 crores. Out of these manganese alone accounted for 0·53 million tons valued at Rs. 5·20 crores as against 0·74 million tons valued at Rs. 5·85 crores in 1949-50. The U.S.A. alone absorbed 0·35 million tons valued at Rs. 3·40 crores in the year under review. The trend of metals and other ores is given below :—

	1948-49		1949-50		1950-51	
	Qty. 000s	Rs. in lakhs	Qty. 000s	Rs. in lakhs	Qty. 000s	Rs. in lakhs
Chromite (cwts.)	2·6	2·35	5·2	2·55	3·6	3·47
Iron ore (tons)	..	..	4·3	1·23	84·5	22·21
Copper (cwts.)	0·6	1·29	1·5	3·18	4·0	6·90
Pig Iron (tons)	45	63	62	86	54	86
Iron Manufactures (tons)	1·5	4·97	3·6	13·50	0·4	1·56
Steel Manufactures (tons)	13	58	11·3	49	10·5	49
Zinc (cwts.)	0·2	0·09	8·5	0·72	74·2	7·28

Shipments of non-metallic mining and quarry products other than coal moved up to Rs. 9·91 crores in the year under review. Mica formed the main item of export. Shipments of mica recovered to 0·383 million cwts. valued at Rs. 9·61 crores after declining from 0·340 million cwts. valued at Rs. 5·94 crores rose to 0·298 million cwts. valued at Rs. 6·85 crores. The U.S.A. bought 0·252 million cwts. at a cost of Rs. 6·73 crores in the year under review. Other ores included stone and marble and a variety of products.

Coal and Coke (Rs. 3.41 crores).—After improving from 1·14 million tons valued at Rs. 3·85 crores to 1·25 million tons valued at Rs. 4·22 crores, exports of coal and coke slipped back to 0·98 million tons valued at Rs. 3·41 crores in the year under review. Shipments of coke were negligible at 8,814 tons valued at Rs. 5 lakhs. The fall in coal exports was due to Pakistan having stopped purchases and Ceylon reducing its intake by half a million tons. This cut of 1½ million tons was partly offset by higher purchases, in small quantities, by several countries.

Tobacco (Rs. 14.53 crores).—Indian tobacco appeared to be getting increasing popularity in the overseas markets partly because of the currency difficulties in buying American tobacco and the result and need for greater mixing of the inferior type. Export mounted up to 95·20 million lbs. valued at Rs. 14·53 crores in the year under review. Unmanufactured tobacco forming the bulk of the trade rose from 82·38 million lbs. to 90·06 million lbs., their respective value being Rs. 10·55 crores and Rs. 12·44 crores. Most of the shipments were from the Madras port. The United Kingdom, which had increased her purchases from 26·89 million lbs. to 45·62 million lbs. in the previous year, bought only 36·53 million lbs. in 1950-51 following the conclusion of a long-term agreement by her to buy Rhodesian tobacco. Exports to Denmark, Egypt and Kenya showed a downward trend, while Pakistan, Netherlands, Belgium and Sweden extended their patronage.

Exports of manufactured tobacco recovered the ground after falling from 4·98 million lbs. valued at Rs. 2·49 crores to 4·27 million lbs. valued at Rs. 1·41 crores and totalled 5·13 million lbs. valued at Rs. 2·08 crores in 1950-51. Cigars and cigarettes formed less than a fifth of the volume of exports, the bulk being of other sorts and three-fifth of the trade in value and half in volume was from Bombay. More than half the shipments went to Pakistan with Ceylon ranking next with 0·83 million lbs.

Wool and Woollens (Rs. 13.90 crores).—Export trade in wool and woollens was buoyant during the past three years owing to the rearmament and stock piling demand and touched Rs. 13·90 crores in 1950-51. Shipments of woollen manufactures registered a spectacular rise to Rs. 6·03 crores in the year under review. The bulk represented carpets and rugs valued Rs. 5·53 crores in the year under review. Nearly 80 per cent. of the material went to the United Kingdom and the bulk of the trade was handled by West Bengal.

Shipments of raw wool, however, dropped in volume to 25·35 million lbs. after recording a smart advance from 8·66 million lbs. to 27·36 million lbs. This was a sequel to Government restricting the exports in order to conserve supplies in the domestic industry. The boom in prices, however lifted the value from Rs. 3·71 crores to Rs. 7·87 crores as compared to Rs. 1·09 crores in 1948-49. The United Kingdom bought a slightly larger quantity at 14·65 million lbs.; but shipments to the U.S. fell from 10·27 million lbs. to 8·86 million lbs. A little over a third of the trade was handled by Bombay and 60 per cent by Saurashtra.

Gums, Resins and Lac (Rs. 13.61 crores).—Exports of gums, resins and lac, which were lower at Rs. 8·92 crores in 1949-50 recovered sharply to Rs. 13·61 crores in the year under review. Shipments of gums and resins doubled from Rs. 84 lakhs in 1949-50 to Rs. 173 lakhs in 1950-51, while the quantity rose from 88,175 cwts. to 119,213 cwts. Most of the exports were of other sorts, arabic and resin forming only a fraction.

Shipments of lac rose by 50 per cent. in volume from 455,304 cwts. in 1949-50 to 660,758 cwts. in the following year, the value moving up from Rs. 808 lakhs to Rs. 11,88 lakhs. Buttons displayed an upward trend. Seed, however, showed a mixed trend, totalling 152,019 cwts. valued at Rs. 240 lakhs.

Lac in shell, jumped up to 430,928 cwts. valued at Rs. 860 lakhs in the year under review. The U.S. and U.K. bought 135,466 cwts. and 126,609 cwts. respectively, the value being Rs. 277 lakhs and Rs. 242 lakhs.

GENERAL BACKWARDNESS

Though during the period of the last war, Life Insurance business in the sub-continent registered a great progress over the past, when we compare the present position of Life Insurance business in the sub-continent with that of the other more advanced countries of the world we realise that India has yet a long way to go. The figures published in the Insurance Year Book, show that at the end of the year 1935 the total Life Insurance business in force amounted to Rs. 235 crores distributed over 11 lakhs policies, whereas the total Life Insurance business at the end of the year 1951 amounted to Rs. 745 crores distributed over 33 lakh policies. As the country holds within its borders 360 million people constituting one-sixth of the total population of the world, these figures appear altogether insignificant. On an average taking 4 members in a family there should be 90 million families in India, over which are distributed 30 lakh policies of Life Insurance. Thus only 3 per cent of families can claim protection of Life Insurance, while 97 per cent of the families are without such protection. This backwardness in the progress of Life Insurance in this country can only be attributed to the lack of development in the commercial, industrial, agricultural and other allied fields, the lack of education and literacy in the masses, and above all the poverty of the Indian people.

The three main factors on which the life insurance business depends are (1) mortality experience, (2) interest yield and (3) expenses. Mortality experience of Indian companies is very satisfactory on the whole. The same however could not be said of the other two factors. In the year 1938 the average yield realised on the funds of life insurance companies was 5·15 per cent while in 1950 it was reduced to 3·16 per cent which is likely to show further reduction in 1951 owing to general economic conditions in India and elsewhere.

While the paucity in the number of well-managed Indian companies prior to and in the immediate first post-war period, say upto 1935 might be one of the main reasons why Indian companies did not capture the field, one can notice that when this vacuum began to be filled up, it was done with such startling rapidity that within a short time the saturation point in the flotations of new companies was reached. There were as many as 113 new flotations between 1931 and 1949.

The first consideration in regulating the investments of funds of Life Offices should be to safeguard capital. Without jeopardising the safety of capital, insurance companies can earn better interest yield, if more investments are permitted by Law in Securities other than the Government Approved Securities under Sections 27 and 27A of the Insurance Act, 1938.

INSURANCE AMENDMENT ACT

The year 1951 was an important milestone in the history of Indian insurance. The Insurance Amendment Act 1950 virtually came into force in 1951. The income-tax rate for insurance companies made a remarkable leap by as much as 10 pies, from 54 pies to 64 pies in the rupee. Late in the year, the Bank Rate was raised by ½ per cent from 3 per cent to 3½ per cent, which served as a signal for the end of the cheap money policy of the Government. All these had and are still having far-reaching repercussions on the progress of insurance in India.

The Act is a comprehensive piece of legislation, purporting to safeguard the interests of the policy-holders, by making insurance a "Central" subject and endowing the Central Government with very wide powers, even to take over the management of any insurance company, if deemed necessary, to put its affairs in order. The new Act applies to the whole of India, in consequence of which the various insurance laws promulgated by several Part 'B' States have all been repealed.

A decade's experience of administering the Insurance Act of 1938, revealed its defects, which had promptly been taken advantage of by not very scrupulous insurers. Broadly speaking, the evil trends that crept in were—

(*a*) Control over Insurance Funds by individuals or a small group of individuals.

(*b*) Misuse of this control, for personal interest by (*i*) interlocking concerns in which these individuals had high stakes, (*ii*) speculating with the funds in dubious deals for personal gains.

(*c*) Extravagant management and excessive procuration cost.

The 1950 Act, democratises controlling power by restricting capital to one class of shares, *i.e.*, ordinary, and limiting the holdings and voting rights of individuals to 5 per cent of the total capital. To stop misuse of funds and interlocking of concerns, the Act has elaborate regulations, preventing common management in banking or investment companies and in insurance concerns, and limiting the amount and choice of investments of insurance funds. The evil of extravagant management is sought to be remedied by specifying the nature of the management and its remuneration. The Central Government is empowered to interfere in cases where the management is excessively remunerated disproportionate to the resources of the insurer. As regards excessive procuration cost, the Central Government, as empowered by the Act, has framed certain rules setting out maximum rates of commission allowable to insurance agents. Regulations regarding the contract of employment of such field staff are also contained in these rules. All members of such field staff have to buy licences from the Government, before they are entitled to collect their commission.

A statutory body called the "Insurance Association of India" has been incorporated with compulsory membership of all insurers including Provident Societies registered in India—insurers incorporated or domiciled in India being members with full voting rights and insurers incorporated or domiciled outside India being associate members with no voting rights.

The Association functions through two Councils —the Life Insurance Council (L.I.C.) consisting of all members and associate members carrying on life insurance business, and the General Insurance Council (G.I.C.) consisting of all members and associate members carrying on general insurance business. Each council has an Executive Committee of 16 members, half of whom are elected by the members of the corresponding Council and half nominated by the Central Government. In addition to the Executive Committee, the G.I.C. functions through a Central Tariff Committee and four Regional Councils with headquarters at Bombay, Calcutta, Madras and Delhi. All these various bodies help insurers in setting up standards of conduct and sound practice for rendering effective service to their policy-holders. They periodically frame tariff rates of premiums for various types of insurance covers and for different regions. These bodies also render advice to the Central Government in administering the Act.

In short, the Act has ushered in a new era for Indian insurance. While the Government retains in its hands firm hold on the general conduct of the insurers, it has created a semi-democratic body like the Insurance Association of India with its various councils and committees, comprising the insurers' representatives, to help attain a healthy and speedy progress of the industry.

The effects of the new Act have already been observed in the very first year. Government has taken over direct administration of four large insurance companies. Some uneconomically running and small companies have been taken over by stronger and bigger units. A few have not found it possible to renew their registration for the year 1952. It is generally felt that the overall effect of the new Act has been conducive to the healthy progress of Indian insurance. Foreign insurers appear to have felt increased confidence in Indian insurance market. Representatives of quite a number of foreign offices were busy during the year going round in the country either for improving their existing reinsurance connections or building up new ones.

But there are also grievances. The Bill visualizes a Company working through Chief Agents or Branches and licensed Agents. The present system of organisation adopted by a few big companies who have large resources consists of branches, under which there are Inspectors paid on a salary basis and licensed agents. Medium sized and small companies not being sure of the turnover of the business, have got in the place of paid-inspectors, special agents, *i.e.* (Employer of Agents other than Chief Agents who are paid on the basis of commission). The provision in the Bill prohibiting the employment of intermediaries, either inspector or organiser or special agents, on terms other than on a salary basis, will hamper the working of companies by Chief Agencies and as a consequence the costs will go up. Such a provision will also place a handicap on companies at a time when companies will be required to make great efforts to reduce their costs to the limits stipulated in the Bill. It is suggested that Insurance Companies should be allowed the freedom to employ intermediaries like Inspectors or Organisers or Special Agents on the basis of commission or fixed remuneration or both. Such a provision would considerably assist Insurance Companies both in building up their business and in complying with the provision of the Bill as regards the restriction of over-all costs.

INCOME-TAX

One of the most important factors that influence the working of a life insurance company is its interest earning capacity. The net interest yield a company can earn depends on three things—the general economic conditions of the country in which it is operating, its own capacity for choosing wisely and judiciously good interest yielding investments commensurate with the security of the invested capital and lastly the tax on this earned income, levied by the Government. Sections 27 and 27A, of the Insurance Act do not permit much scope to life insurance companies for choice of investments. For the last decade or so, and particularly after the Central Government's conversion of the 1986 loan from 3½ to 3 per cent in 1946, money market rate has steadily sagged. A table below shows a steady fall in the interest rate earned by insurance companies—from 5·93 per cent in 1924 to 3·04 per cent in 1942 and to 3·05 per cent in 1949. There is a slight improvement in 1950, probably due to some concessions in income-tax rate, allowed to insurance offices, *viz.*, a reduction from 60 pies to 54 pies in the rupee.

Unfortunately for the industry, this concession was virtually withdrawn in 1951. Although the ceiling for standard rate was kept at 48 pies, the rebate of annas two so far allowed in the Corporation Tax was reduced to 1½ annas, 5 per cent surcharge was added, as well as 3 pies more as super-tax. In effect, in the place of 54 pies, the final figure came to over 64 pies. However, in assuming the taxable income on the basis of "income less expenses," the maximum limit for the allowable expenses was raised from 12 per cent to 15 per cent of the renewal premiums and in assessing taxable income on the basis of valuation surplus, the portion of the surplus distributed among the policy-holders that would be exempted from income-tax has been raised from one-half to two-thirds.

On the 15th of November, the Reserve Bank of India announced enhancement of its rate from 3 per cent to 3½ per cent. Prior to this, the Bank of England also had raised its rate from 2 per cent to 2½ per cent. The Reserve Bank also announced the withdrawal of its guaranteed support to Gilt-edged Market. Ostensibly, these measures taken by the Bank, were meant to bring down inflation through restrictions in the Credit Market.

An immediate result of these two steps of the Bank was a heavy depreciation in the Government Securities and appreciable drop in the Equity Market. The 3 per cent. Conversion Loan particularly, dropped to Rs. 80·4. Insurance Offices have a fairly good part of their securities in this Loan, it being one of the few long-dated securities generally preferred by life insurance companies. A number of insurers were considerably affected by this sudden and heavy capital depreciation. In their balance sheets at the year ending 1951, the deficit in the market value of their gilt-edged holdings would be considerable.

The raising of the Bank Rate, however, ushered in an era of high interest rates, a most welcome feature to life offices, for their current and future investments. Besides, with the slump in gilt-edged securities and with the prices written down in their books, the interest yield on the written down values would naturally increase, allowing thereby a more favourable interest basis for future valuations, thus lowering policy liabilities and offsetting the shrinkage in the assets due to depreciation in the gilt-edged securities. The general actuarial opinion, therefore, regarding the investment market slump, has been that life offices need not be perturbed by such slump.

DISTRIBUTION OF COMPANIES

The total number of insurers registered under the Insurance Act, 1938, up to 7th October, 1951 was 334 of which 230 insurers were Indian insurers and 104 were non-Indian insurers.

Of the 230 Indian insurers 92 had their head offices in Bombay State, 52 in the West Bengal, 33 in the Madras State, 4 in the Punjab, 22 in Delhi State, 7 in Uttar Pradesh, 4 in Saurashtra, 3 each in Hyderabad, Madhya Pradesh and Mysore, 2 in Orissa, and one each in Ajmer-Merwara, Assam, Bihar Madhya Bharat and Rajasthan.

Of the 104 non-Indian insurers 65 (including 2 insurers holding standing contracts with Lloyds) were constituted in the United Kingdom, 21 in the British Dominions and Colonies, 9 in the United States of America, 3 each in Pakistan and Switzerland and one each in France, Italy and Java.

Most of the Indian insurers carry on life insurance business only. They are 127 in number, and of the remaining 103 Indian insurers, 49 carry on life business along with other insurance business, and 54 carry on insurance business other than life only. Of the Indian insurers, 35 are either Mutual Insurance Companies or Co-operative Insurance Societies. Further there are a few pension funds, mostly connected with Government services, and the Postal Insurance Fund which are exempt from the operation of the Insurance Act.

As regards non-Indian insurers, most of them carry on insurance business other than life, 4 carry on life business only, and 14 carry on life business along with other insurance business.

LIFE INSURANCE BUSINESS

The total net new life insurance business effected in India during the year 1950 amounted to 498,000 policies insuring a sum of Rs. 13,208 lakhs and having an annual renewal premium of Rs. 7·28 crores, of which the new business done by Indian insurers amounted to 479,000 policies insuring a sum of Rs. 118·38 crores and having a yearly renewal premium income of Rs. 6·46 crores. The new life business effected by non-Indian insurers amounted to 19,000 policies insuring a sum of Rs. 13.7 crores and having a yearly renewal premium income of 0·82 crores.

The average sum insured per policy under the new policies issued in India by Indian insurers was Rs. 2,471 and under those issued by non-Indian insurers about Rs. 7,224.

The total net life insurance business effected in India and remaining in force at the end of 1950 amounted to 3,280,000 policies insuring a total sum of Rs. 744·65 crores including bonus additions and having an annual premium income of Rs. 37·70 crores. Of this the share of Indian insurers is represented by 3,049,000 policies insuring a sum of Rs. 635·81 crores and having an annual premium income of Rs. 31·59 crores. The share of non-Indian insurers is represented by 231,000 policies insuring a sum of Rs. 108·84 crores and having an annual premium income of Rs. 6·11 crores.

Some Indian Life Offices have been operating outside India also. The total new sums insured by these offices outside India in 1950 amounted to 21,000 policies insuring Rs. 7·53 crores. The total business remaining in force at the end of 1950 amounted to 232,000 policies insuring Rs. 56·65 crores and having an annual premium income of Rs. 2·86 crores.

The following table shows the New Sums Insured by Indian Life Offices, the Average Sum Insured per policy and the Total Sums Insured in force at the end of the year:—

Year	New Sums Insured.		Total Sums Insured in Force.
	Sum insured (in crores).	Average sum insured per policy.	Sum insured including bonus additions (in crores).
	Rs.	Rs.	Rs.
1935	32·81	1,565	151·63
1936	37·80	1,532	174·67
1937	41·74	1,520	196·74
1938	46·68	1,498	218·86
1939	45·96	1,511	232·42
1940	35·23	1,685	243·91
1941	36·68	1,841	256·43
1942	37·89	2,193	266·60
1943	65·24	2,258	310·95
1944	95·20	2,206	366·15
1945	122·78	2,128	459·43
1946	131·43	2,205	514·50
1947	114.06	2,177	547.17
1948	107·68	2,306	566·38
1949	123·13	2,341	636·95
1950	118·38	2,471	635·81

The total new annuity business effected during the year 1950 was for the amount of Rs. 8·03 crores, of which the share of Indian Insurers was Rs. 2·44 crores. The total annuity business remaining in force at the end of the year was Rs. 73·05 crores, of which the amount payable by Indian Insurers was Rs. 31·27 crores, and by non-Indian Insurers Rs. 41·78 crores.

The total income of Indian and non-Indian Insurers during 1950, in respect of their life Insurance business amounted to Rs. 41·44 crores, while the total outgo was Rs. 29·21 crores.

The total income of Indian and non-Indian Insurers during the year 1950, in respect of their life insurance business was made up of:—

(In lakhs of rupees.)

Particulars of Income.	Indian Insurers.	Non-Indian Insurers.
	Rs.	Rs.
Premium	35,27	6,09
Interest, Dividend and Rents	5,36	1,28
Other Receipts	81	47
Total	41,44	7,84

The total outgo of these insurers during the year in respect of the life insurance business was made up of:—

(In lakhs of rupees.)

Particulars of Outgo.	Indian Insurers.	Non-Indian Insurers.
	Rs.	Rs.
Claims by death	3,80	90
Claims by Maturity	5,55	2,12
Annuities	11	11
Surrender value	1,09	88
Expenses of Management	10,29	1,33
Depreciation and Transfer to Investment Reserves, etc.	1,89	11
Miscellaneous	22	80
Transfer to Shareholders' Reserves and dividends	8	2
Total	29,94	6,27

INTEREST RATE & EXPENSE RATIO

The net rate of interest earned on the mean life insurance funds during the year 1950 by Indian Insurers was 3·16 per cent. Non-Indian Insurers realized 3·11 per cent. The net rates of interest realized on mean life insurance funds by the Indian Insurers in each of five years were as follows:—

Year.	1946	1947	1948	1949	1950
Rate of Interest per annum	3·20	3·03	3·02	3·05	3·16

The total expenses of management of Indian Insurers in respect of life insurance business, expressed as a percentage of the Premium income during each of five years was as follows:—

Year.	1946	1947	1948	1949	1950
Expense Ratio	31·2	30·4	29·0	29·2	28·9

For non-Indian Insurers the figure was 21·8.

If the figures of half a dozen Insurers having the largest premium income are excluded, the expense ratio in the case of remaining Insurers would be as under:—

Year.	1946	1947	1948	1949	1950
Expense Ratio	37·8	35·1	32·4	33·2	32·5

The net rates of interest realised in India on mean life insurance funds by the non-Indian Insurers in each of five years were as follows:—

Year.	1946	1947	1948	1949	1950
Rate of Interest per annum	3·18	3·10	3·15	3·01	3·11

The total expenses of management of non-Indian Insurers in respect of life insurance business in India expressed as a percentage of the premium income during each of five years was as follows:—

Year.	1946	1947	1948	1949	1950
Expense Ratio	20·2	20·0	21·1	22·0	21·8

NON-LIFE BUSINESS

The premium income of insurers doing fire and other classes of business showed an increase, though there was a small decrease in the premiums of miscellaneous business.

The net premium income of all insurers under insurance business other than life insurance during 1950 was Rs. 16·63 crores (Rs. 16·30 crores in 1948) of which the Indian Insurers' share was Rs. 10·56 crores and that of the non-Indian Insurers Rs. 6·07 crores. The total amount was composed of Rs. 8 crores from Fire, Rs. 3·83 crores from Marine, and Rs. 4·80 crores from Miscellaneous Insurance business.

The Indian Insurers received Rs. 5·55 crores from Fire, Rs. 2·03 crores from Marine, and Rs. 2·98 crores from Miscellaneous Insurance business.

The expense ratio for Fire, Marine, Miscellaneous were higher in 1950—28, 24 and 27 per cent. respectively. Losses were also up by 2 and 7 per cent. respectively in Fire and Miscellaneous but less by 10 per cent. in Marine.

Some Indian Insurers who transact fire, marine and miscellaneous insurance business also operate outside India. These insurers had a net premium income of Rs. 48·4 crores in 1950 from business outside India showing an increase of Rs. 90 lakhs over last year.

ASSETS OF INSURERS

The assets of all the Indian Insurers amounted to Rs. 225.81 crores on 31st December 1950, which were held invested in :—

(In lakhs of rupees.)

Particulars.	Amount.
	Rs.
Indian Government Securities ..	1,12,74
Securities of Part "B" States ..	4,68
British, Colonial and Foreign Government Securities	3,87
Municipal, Port Trust and Improvement Trust Securities	10,97
Mortgages on Property	7,68
Loans on Policies	12,17
Loans on Stocks and Shares	58
Other Loans	1,03
Shares in Indian Companies, Co-operatives	33,20
Land and House Property	9,59
Agents' Balances, outstanding Premium and Interest, etc.	11,02
Deposit, Cash and Stamps	12,22
Miscellaneous	6,06
Total ..	2,25,81

The following table shows the assets in India of non-Indian Insurers :—

(In lakhs of rupees.)

Insurers constituted in	Total Assets in India of	
	Life or composite companies.	Non-life companies.
United Kingdom ..	20,69	3,62
Dominions and Colonies	21,39	1,84
U.S.A.	..	54
Switzerland	59	5
Italy	..	5
Total ..	42,67	6,10

PROVIDENT INSURANCE SOCIETIES

On September 30, 1951 there were in existence 92 Provident Societies. Of these 35 were in West Bengal, 24 in Bombay State, 15 in Madras, the rest distributed over the other States.

The total new business effected by the societies during the year 1950 amounted to 15,842 policies, insuring a sum of Rs. 1,11,37,600. The premium income received during the year on these policies amounted to Rs. 4,06,200. The business in force at the end of the year amounted to 70,404 policies, insuring a total sum of Rs. 3,52,86,000 including bonuses.

The total life insurance fund of these societies at the end of 1950 amounted to Rs. 82,11,000.

The net rate of interest realized on mean life funds of the societies in the year was 2·90 per cent., and the total expenses of management expressed as a percentage of the premium income was 40·7.

INSURANCE AGENTS

Insurance agents constitute an important pillar of the insurance structure. The rapid increase in their number during the last few years, as indicated by the table below, naturally raises the question whether the growth has kept within healthy limits or whether the evil of over-crowding is present in this profession as well.

Year.	1946	1947	1948	1949	1950
Number of Agents	156,992	174,169	170,016	180,737	172,936

Of the 1,72,936 licences issued in 1950, 71,614 were fresh and 1,01,322 were renewals. Of the agents, 79,415 did not renew their licences.

With the amendment of Section 42 of the Act, which came into force as from September 1, 1950 licences will be issued for a period of three years as against one year which was the practice followed till then. The fees for fresh licences as well as for renewals have been increased to Rs. 5.

Sec. 42A enjoins employers of insurance agents (Principal, Chief, Special) to be registered. Certificates are issued to them, renewable annually. During the period Sept. 1 to Dec. 31, 1950 the number of certificates issued were Principal Agents 448, Chief Agents 26, Special Agents 430.

TARIFF COMMISSION

UNTIL 1919 India had no authority to shape her fiscal policy without the approval of the Secretary of State for India. Following the introduction of the Montford Reforms a Fiscal Commission was appointed on October 7, 1921. The Commission recommended "a policy of protection to be applied with discrimination." The acceptance of this recommendation has really paved the way for industrialisation in this country during the past thirty years.

In accordance with the recommendation of the Commission, the Government of India set up the First Tariff Board in July 1923 for a period of one year and its life was extended from time to time though its personnel was revised every now and then. The Board was guided by three principles, namely, (1) the industry must have natural advantages, (2) the industry is such that without protection it is not likely to develop at all or so rapidly as is desirable in the interest of the country, and (3) the industry must be one which will eventually be able to face world competition without protection.

The work of the Tariff Board in the inter-war period has been reviewed in the previous editions. During the second world war, the need for starting new industries to fill in the gap created by the cessation of imports prompted the Government of India to promise protection after the end of the war. Accordingly, Government in its statement on industrial policy issued on April 21, 1945 announced the decision to adopt a short-term measure pending the formulation of a permanent tariff policy.

This paved the way for the second stage in the evolution of the tariff policy. On November 3, 1945 the Interim Tariff Board was constituted with Mr. R. K. Shanmukham Chetty as Chairman. The Board was expected to keep in view the fundamental objectives of Government's industrial policy which was "to encourage and promote rapid industrialisation of the country to the fullest extent possible." Before recommending protective measures, it was expected to satisfy itself that (1) it was established and conducted on sound business lines, (2) it was likely within a reasonable time to develop sufficiently to be able to carry on successfully without protection or State assistance or it was an industry which it was desirable in the national interest to grant protection or assistance and the probable cost of protection or assistance to the community was not excessive, and (3) due weight was given to the interest of the consumer in the light of the prevailing conditions. In effect the new policy was a considerable advance over the pre-war policy of protection with discrimination.

The third stage began with the reconstitution of the Board in November 1947 with Mr. G. L. Mehta as President, and Dr. H. L. Dey and Dr. B. V. Narayanswamy Naidu as members. Apart from re-assigning the functions hitherto exercised by the Interim Tariff Board, the reconstituted Board was entrusted with two additional functions, namely, (1) to report to Government as and when required factors that lead to increase in the cost of production of Indian manufactured goods as against imported articles and (2) to advise Government, as and when required, on measures whereby internal production may be secured on the most economical cost basis.

The next development took place on August 6, 1948 when Government entrusted the Board with the following new functions besides those already enumerated :—

(1) To enquire, as and when required by Government, into the cost of production of a commodity produced in the country and to determine its wholesale, retail or other prices and to report on the same.

(2) To recommend to Government, as and when necessary, measures necessary for the protection of India's industries from dumping from abroad.

(3) To undertake studies, as and when necessary, on the effects of the *ad valorem* and specific duties and tariff valuations on various articles and the effects of the tariff concessions granted to other countries.

(4) To report to Government, as and when necessary, on the combinations, trusts, monopolies and other restraints on trade, which may tend to affect the industries enjoying protection by restricting production or maintaining or raising prices and to suggest ways and means of preventing such practices.

(5) To maintain a continuous watch over the progress of protected industries by conducting enquiries on the effect of protective duties or other means of assistance and to keep a careful watch to ensure that the conditions attached to the grant of protection were fully implemented and that the protected industries were being run efficiently.

The question of evolving a new tariff policy of the Indian Republic was entrusted to the Fiscal Commission in April 1949 which recommended the establishment of a permanent Tariff Commission with enlarged powers and functions. It came to the conclusion that protection should continue to be granted on the following basis : (1) Defence and other strategic industries irrespective of cost on national considerations, (2) Basic and key industries on the recommendations of the Tariff Authority, (3) Other industries having regard to the economic advantages consistent with the cost of protection.

TARIFF COMMISSION ACT

The Tariff Commission Act passed by Parliament received the assent of the President on September 12, 1951 and became immediately effective. Its main provisions are given below :

A.—(1) The Central Government will establish a Tariff Commission consisting of not less than three, but not exceeding five, whole-time members and one of them will be nominated by the Central Government as its Chairman.

(2) They shall be men of ability and standing who have shown capacity in dealing with problems relating to commerce or industry or in administration or have special knowledge which renders them suitable for appointment on the Commission.

(3) No member of a legislature will be eligible for appointment unless he ceases to be such member within one month of the date of his appointment.

(4) The member of the Commission shall hold office for three years but shall be eligible for re-appointment for a second period of three years.

(5) On ceasing to hold office, he shall not hold any appointment in any private industry for a period of three years without the consent of the Central Government.

B.—The functions of the Commission will be to report to the Central Government, when asked, on (*a*) the grant of protection for the encouragement of any industry in India, (*b*) the changes in the protective duties, (*c*) action to be taken in relation to the dumping of goods, (*d*) action to be taken where an industry is taking undue advantage of the tariff protection such as charging unnecessarily high prices or acting or omitting to act in a manner which leads to high prices being charged or acting in restraint of trade to the detriment of the public, (*e*) the effect of protection on the price structure, living costs and the different sectors of the national economy, (*f*) the effect of tariff concessions under trade agreements on the development of any specified industry and (*g*) anomalies resulting from the working of duties.

C.—It shall be the duty of the Commission, at such intervals as may be prescribed, (*a*) to investigate into the manner in which protection in relation to any industry has been working, (*b*) to investigate into any special conditions that may have been imposed on a protected industry and (*c*) to make a report thereon to the Central Government.

D.—For the purpose of conducting any inquiry under the Act, the Commission shall have all the powers of a civil court while trying a suit under the Code of Civil Procedure and to require any person to furnish information on the subject matter of any inquiry.

E.—Upon receipt of a report made to it by the Commission, the Central Government may take such action as it considers fit in respect of any of the matters dealt with in the report. A copy of every final report made to the Central Government, together with a report of the action taken thereon by the Central Government shall be laid on the table of Parliament within three months of the submission of the report if Parliament is then sitting and, if Parliament is not then sitting, within seven days of its re-assembly. When the report cannot be so laid, a statement explaining the reasons therefor shall also be laid on the table of Parliament.

On January 7, 1952, the Government of India announced that the first Tariff Commission will be composed of Mr. G. L. Mehta as Chairman and Dr. B. V. Narayanaswamy Naidu and Mr. B. N. Adarkar as members. Mr. Mehta would also continue to be a member of the Planning Commission.

RECENT WORK

The policy of granting protection to industries continued to be the keynote of the more important work of the Tariff Board in 1951. Claims for protection on behalf of several industries poured during the year but a few of them lost their case. Government also referred the question of fair selling prices for certain industries including iron and steel, rubber and superphosphates. The reports of the Tariff Board on major industries have been referred to under appropriate chapters. Out of the rest a summary of the more important ones is given below.

The Tariff Board recommended in the case of electric brass lamp holders industry (1) a protective duty of 45 per cent. *ad valorem* on those of British make and (2) continuance of purchases of Indian make by Government departments. It also pointed out that the labour charges were high. The Government converted the existing revenue duties into protective duties and decided to watch the quantity and prices of imports.

In the case of oil pressure lamp industry Government decided, on the recommendations of the Board, in January 1951 to convert the then existing revenue duty of 30 per cent. into a protective duty. The position was reviewed by the Board towards the end of 1951 and the Board recommended that while the protection should be continued to the end of 1953, the industry could apply for a revision of the duties if the c.i.f. price of imported lamps fell appreciably below Rs. 30-2-6 per lamp. Government accepted the recommendations.

The claim of the cotton textile machinery referred to the Board at the beginning of January 1951 was investigated by the Board which recommended continuance of the 10½ per cent. *ad valorem* duty on fluted roller and tin rollers.

In regard to aluminium the Board came to the conclusion that no change in the rates of duties was necessary. As regards the subsidy Government decided to reduce it from Rs. 129-8 per ton, as recommended by the Board, to Rs. 120 per ton. Protection to the alloy and tool industry was continued for a further period of three years on the recommendation of the Board.

The Central Government accepted the recommendations for continuing the existing protective duty of 10 per cent. *ad valorem* on pickers up to March 31, 1953. In the case of the machine tools industry Government decided to impose a protective duty of 31½ per cent. on iron and steel machine tools for a period of three years instead of the existing maximum duty of Rs. 46-9 per ton. The Board stressed the need for expanding the indigenous production by regulating the quantum of imports and by Government purchasing indigenous material provided the quality was satisfactory and the price reasonable.

In regard to photographic chemicals the protection is to be continued up to December 31, 1954. Government also accepted the Board's recommendations that the manufacturers of sodium thiosulphate, sodium sulphite and sodium bisulphite might apply for revision of duty if the import control was liberalised and their prices warranted higher rates of duty. The need for improving the quality was also stressed.

The zip fastener industry received protection for a period of three years from February 1952. For this purpose the existing revenue duty of 31½ per cent. *ad valorem* was converted into a protective duty. The industry was also asked to apply for a revision in the event of the landed cost without duty of the imported products falling below 11 as. 5 ps. per foot for 'lightening' zip fasteners of 12" length and 8 as. per foot for 'flash' zip fasteners.

The pencil industry had been granted protection for two years up to the end of 1952. The continuance of protection, however, depended on the review of the progress at the end of the first year. The Tariff Board, after undertaking it, recommended that the continuance of protection was justified. It also recommended to Government to inquire into the complaint about illicit imports of foreign pencils across the land frontier.

The protective duty-cum-subsidy scheme in respect of the indigenous soda ash industry came up for review in 1951. The Board came to the conclusion that the subsidy should be discontinued and either the rates of duty should be reduced to 30 per cent. preferential and 40 per cent. standard keeping the tariff value unchanged at Rs. 13-8 per cwt. or the tariff value should be valued to Rs. 9-12 and the rates should be unchanged. It also recommended that salt used in its manufacture should be exempted from the salt cess. Government decided to reduce the duty instead of lowering the tariff value and rejected the recommendation about exemption from salt cess.

A revenue duty on imported hydro-quinone was converted into a protective duty for a period of two years. The Board recommended that the question of protection should be reviewed within two years in view of the present uncertainty regarding future costs.

In regard to the milk powder industry the Tariff Board was of the opinion that indigenous production was negligible in relation to demand and there was no early prospect of sufficient improvement in the supply of milk in the scarcity areas. It, therefore, came to the conclusion that there was no justification for increasing the burden on the consumer by granting protection.

The same decision was taken on the claim for protection from canned and bottled vegetables industry. In that connection the Board observed that the fair selling prices of indigenous products exceeded the landed cost by an amount equal to the existing revenue duty. The fair selling price of indigenous copper sulphate being lower than the landed cost without duty, the Board came to the conclusion that the copper sulphate industry in India was not in need of protection. Following an inquiry into the electric fans industry the Board concluded that there was neither any case for protection of the industry nor for reduction in the import duties on raw materials.

After the Tariff Commission was constituted, the question of continuing the protection to batteries for motor vehicles was referred to it for inquiry. The woollen hosiery industry, ball bearings and steel balls manufacturers, and transformers industry applied for protection for the first time. Initial protection was also sought by manufacturers of flax goods and small tools. Towards the end of March the automobile industry made an application to Government for granting protection in view of the slump and the application was referred to the Commission for inquiry. During 1951 the Board had to inquire into the price structure of rubber and steel. The Commission has been entrusted with the price inquiry in respect of registered rollers of steel and retention prices of steel plates.

LAWS AND ADMINISTRATION OF JUSTICE

IT may be supposed that the system of Laws and administration of Justice as it has prevailed in British India in the past is now only a matter of historical interest. The political revolution, the change of Government and the emergence of India as a Sovereign Democratic Republic, would naturally involve a fundamental change in the foundations of the legal and judicial system, which can no longer depend on the British Crown and Parliament for its authority and stability. The laws and the-law-courts in India now derive their authority from the Constitution of India which was passed on 26th November 1949. The writs which for generations ran over the length and breadth of the country in the name of the British Sovereign, will now run in the name of the President of the Republic of India. Nevertheless, notwithstanding a complete severence in fact and in form of India's political and legal relation with England, all the existing laws continue to operate in India as before. Article 372 of the Constitution provides *inter alia* that, subject to the other provisions of the Constitution, all the laws in force in the territory of India immediately before the commencement of the Constitution shall continue in force therein until altered, repealed or amended by a competent Legislature or other competent authority. For the purpose of bringing the provisions of any law in force in the territory of India into accord with the provisions of the Constitution, it is further provided that the President may by order make such adaptations and modifications of such law as may be necessary or expedient. Article 13 of the Constitution provides that all laws in force in the territory of India immediately before the commencement of the Constitution, in so far as they are inconsistent with the provisions of the Constitution relating to Fundamental Rights (Part III) shall to the extent of such inconsistency be void. The State is also debarred from making any law which takes away or abridges the Fundamental Rights conferred by this Part, and any law made in contravention shall be void to the extent of such contravention (Art. 13 (2)). Article 14 ensures to all persons equality before the law by providiug that the State shall not deny to any person equality before the law or the equal protection of the laws within the territory of India. The continuity of the existing laws and legal procedure is further ensured by Article 375 under which all courts of civil, criminal and revenue jurisdiction and all authorities and officers continue to exercise their respective functions subject to the provisions of the Constitution.

It is therefore, necessary to give a brief survey of the laws and the legal and judicial system as they prevailed in the past in British India.

The indigenous law of India s personal and divisible twith reference to the two great classes of the population, Hindu and Muslim. Both systems claim divine origin and are inextricably interwoven with religion, and each exists in combination with a law based on custom. At first the tendency of the British was to make their law public and territorial, and on the establishment of the Supreme Court at Calcutta in 1773 and the advent of English lawyers as judges, they proceeded to apply it to Europeans and Indians alike. This error was rectified by the Declaratory Act of 1780, by which Parliament declared that as against a Hindu the Hindu law and usage, and as against a Muslim the laws and customs of Islam should be applied. The rules of the Shastras and the Koran have been in some cases altered and relaxed. Instances can be found in the Bengal Sati Regulation Act of 1829, the Indian Slavery Act, 1843, the Caste Disabilities Removal Act of 1850, the Hindu Widows' Remarriage Act, 1856, and some other Acts and Codes. To quote the Imperial Gazetteer, "A certain number of the older English statutes and the English common law are to a limited extent still in force in the Presidency Towns as applicable to Europeans, while much of the old Hindu and Muslim law is everywhere personal to their native fellow-subjects; but apart from these, and from the customary law, which is as far as possible recognised by the Courts, the law of British India is the creation of statutory enactments made for it either at Westminster or by the authorities in India to whom the necessary law-giving functions have from time to time been delegated."

As regards codification of Hindu law it is interesting to note that Mill pleaded for a Code in 1832, and a Committee was appointed by the House of the Commons to report upon its possibility. The Committee recommended the appointment of a Royal Commission to codify both the Hindu and the Mahomedan laws. Lord Macaulay was entrusted with the work. However in 1855 the Law Commission abandoned the effort.

During recent years, however, there has been a determined demand on the part of social reformers, and various women's organisations in India for an amendment of the Hindu Law so as to bring it into line with progressive social opinion, in consonance with the spirit of the times. The Draft Hindu Code that was before the Indian Parliament aimed at abolishing the archaic principles of the ancient system of law, the removal of sex and caste disabilities, and generally simplifying, secularising, and modernising the law governing all Hindus, including Lingayats, Buddhists, Jains and Sikhs. But the Code will lapse on account of the dissolution of the provisional Parliament. A new Code will have to be brought before the new Parliament. In the meanwhile, an opposite tendency has been observable among the Muslims, who by recent legislation have sought to revert to the law of the Shariat, discountenancing the application of Hindu Law and custom to the sections of the Muslim community who as converts from Hinduism had retained Hindu Law in matters of inheritance and succession. Apart from this, the entire legal system which has hitherto prevailed in the country is in course of time bound to undergo a profound transformation by reason of the withdrawal of British rule and the partition of India. A demand for a uniform civil code for all Indians is being made by some people.

CODIFICATION

Before the transfer of India to the Crown the law was in a state of great confusion. Sir Henry Cunningham described it as "hopelessly unwieldy, entangled and confusing." The first steps toward general codification were taken in 1833, when a Commission was appointed, of which Lord Macaulay was the moving spirit, to prepare a penal code. Twenty-two years elapsed before it became law, during which period it underwent revision from his successors in the Law Membership, and especially from Sir Barnes Peacock, the last Chief Justice of the Supreme Court of Calcutta. The Penal Code, which became law in 1860, was followed in 1861 by a Code of Criminal Procedure. Substantially the whole criminal law of India and Pakistan is contained in these two Codes. One of the most eminent lawyers who ever came to India, Sir James Stephen, said "The Indian penal code may be described as the criminal law of England freed from all technicalities and superfluities, systematically arranged and modified in some few particulars (they are surprisingly few) to suit the circumstances of British India. It is practically impossible to misunderstand the Code."

The Indian Penal Code has from time to time been amended. The rules of Civil Procedure have been embodied in the Code of Civil Procedure. The Code of Civil Procedure was remodelled in 1908 and the Code of Criminal Procedure in 1898. These Codes as amended from time to time are now in force. The years between 1870 and 1885 saw a great deal of legislative activity in British India, and important branches of the law, like Evidence, Contract, Transfer of Property, Trusts, Negotiable Instruments, etc., were codified in the form of Acts of the Indian Legislature applicable to the whole of British India. These, amended from time to time and supplemented by rules derived from English decisions, constitute the bulk of the law administered in India today.

A Federal Court is a necessary element of any Federal Constitution. It is at once the guardian and interpreter of the Constitution, and arbiter of the disputes between the Federal Units. The Government of India Act of 1935 accordingly provided (Sections 200-218) for the constitution of a Federal Court.

As a result of the Indian Independence Act of 1947 and the orders passed under that Act, India was split up into two Dominions and provisions were made for the establishment of two separate Federal Courts for the two Dominions.

The Federal Court under the Government of India Act of 1935 continued to be the Federal Court of the Dominion of India until the establishment of the Supreme Court of India under the Constitution of India on January 26, 1950.

SUPREME COURT OF INDIA

Art. 124 of the Constitution provides for the establishment of a Supreme Court of India consisting of a Chief Justice of India, and, until Parliament by law prescribes a larger number, of not more than seven judges. Every judge of the Supreme Court shall be appointed by the President and shall hold office until he attains the age of sixty-five years. In the course of appointment of a Judge the Chief Justice shall always be consulted. Only a citizen of India who has been for at least 5 years a judge of a High Court, or for 10 years an advocate of a High Court, or in the opinion of the President a distinguished jurist, is qualified to be appointed judge of the Supreme Court. A judge of the Supreme Court is not liable to be removed from his office except by an order of the President passed after an address by each House of Parliament, supported by a majority of the total membership of that House, and by a majority of not less than two-thirds of the members of that House present and voting, has been presented to the President in the same session for such removal, on the ground of proved misbehaviour or incapacity. No person who has held office as a judge of the Supreme Court shall plead or act in any court or before any authority within the territory of India. The Supreme Court is a court of record with all the powers of such a court including the power to punish for contempt. The seat of the Court is to be in Delhi or such other place as the Chief Justice with the approval of the President may from time to time appoint.

The Supreme Court has exclusive original jurisdiction in any dispute (*a*) between the Government of India and one or more States; (*b*) between Government of India and one or more States on one side and one or more other States, on the other; (*c*) between two or more States, if and in so far as the dispute involves any question (whether of law or fact) on which the existence or extent of a legal right depends. (Article 131). The Appellate jurisdiction of the Supreme Court extends over all appeals from any judgment, decree or final order of a High Court, in civil, criminal or other proceedings, if the High Court certifies that the case involves a substantial question of law as to the interpretation of the Constitution. If the High Court refuses such a certificate the Supreme Court may grant special leave to appeal in a proper case (Art. 132). An appeal shall also lie to the Supreme Court from a High Court in civil matters, when the amount or value of the subject matter in dispute is not less than

ts. 20,000 or the High Court certifies the case to be a fit one for appeal to the Supreme Court (Art. 33). In criminal matters under Art. 134 an appeal lies to the Supreme Court from any judgment, final order or sentence of a High Court, if the High Court has (*a*) on appeal reversed an order of acquittal of an accused person and sentenced him to death; or (*b*) has withdrawn for trial before itself any case from subordinate court and has in such trial convicted the accused person and sentenced him to death; or (*c*) the High Court has certified that the case is a fit one for appeal. For purposes of appeals to the Supreme Court, the Judicial Commissioners' Courts are to be considered as High Courts. Under Art. 136 discretion is given to the Supreme Court to grant special leave to appeal from any judgment, decree, sentence or order, in any matter passed by any Court or Tribunal in the territory of India. The jurisdiction and powers of the Federal Court under the existing law are also exercisable by the Supreme Court (Art. 135) including the advisory power to give its opinion on questions of law or fact referred to it by the President (Art. 143). The law declared by the Supreme Court shall be binding on all courts in the territory of India. Parliament has the power to legislate on the constitution, organisation, jurisdiction and powers of the Supreme Court.

Article 32 of the Constitution guarantees the right to move the Supreme Court by appropriate proceedings for the enforcement of Fundamental Rights; and for the enforcement of such rights the Supreme Court has power to issue directions or orders or writs, including writs in the nature of Habeas Corpus, mandamus, prohibition, *quo warranto* and *Certiorari* whichever may be appropriate. Power is given to Parliament to enlarge the jurisdiction of the Supreme Court by appropriate legislation (Art. 138). The jurisdiction of the Judicial Committee of His Britannic Majesty's Privy Council over appeals from India in all matters is now abolished. The royal prerogative to grant pardons, reprieves, respites or remissions of punishments now resides in the President (Art. 72).

The Judges of the Federal Court holding office immediately before the commencement of the Constitution become automatically judges of the Supreme Court, and all suits, appeals and proceedings, pending in the Federal Court shall stand removed to the Supreme Court.

Under Art. 348, all proceedings in the Supreme Court and in every High Court in India and the authoritative text of all Bills and Acts of Parliament and the State Legislatures and of all Ordinances promulgated by the President or Governors or Rajpramukhs of States, and of all orders, rules and regulations issued under the Constitution or any law shall be in the English language. If this language is to be replaced by any other language, Parliament must legislate to that effect.

HIGH COURTS

High Courts of Judicature were constituted by the Indian High Courts Act of 1861 for Bengal, Bombay and Madras, and later for Uttar Pradesh and the Punjab (old, undivided) superseding the old supreme and Sudder Courts. Later still High Courts were constituted for other States.

The Judges were appointed by the Crown; they held office until they attained the age of 60 years; formerly one-third of their number were barristers, one third were recruited from the judicial branch of the Indian Civil Service, the remaining places being available for persons who held certain Judicial Offices in the country or were lawyers qualified in the country. This fixed proportion of Barrister and Civilian Judges was later abolished by the Government of India Act, 1935. Trial by jury is the rule in original criminal cases before the High Courts, but juries are never employed in civil suits.

Articles 214-237 of the Indian Constitution of 1950 make provision for the establishment of High Courts and subordinate courts in the States. The High Court exercising jurisdiction in relation to any State immediately before the commencement of the Constitution is to be deemed to be the High Court for the corresponding State. Every High Court is to be a court of record and shall have all powers of such court including the power to commit for contempt of itself. Every judge of a High Court shall be appointed by the President after consultation with the Chief Justice of India, the Governor of the State and the Chief Justice of the particular High Court; and he shall hold office until he attains the age of sixty years. A person is not qualified to be appointed a judge of a High Court unless he is a citizen of India and has either held judicial office or practised as an advocate for 10 years in any of the States. A High Court judge is not liable to be removed from his office except in the manner provided in Art. 124 (4) for the removal of a judge of the Supreme Court of India. No person who has held office of a Judge of a High Court can plead or act in any court or before any authority in the territory of India. The Chief Justice of a High Court may with the previous consent of the President, request a retired High Court Judge to sit and act as the Judge of the High Court of that State. Power is given to the President in consultation with the Chief Justice of India to transfer a judge from one High Court to any other High Court in India (Art. 222). Article 225 preserves the jurisdiction and powers of the High Courts as they existed immediately before the commencement of the Constitution. Restrictions on the exercise of the original jurisdiction in revenue matters are removed. Art. 226 gives to every High Court in India power throughout its jurisdiction to issue to any person or authority including Government directions, orders, writs, including writs in the nature of Habeas Corpus, mandamus, prohibition, *quo warranto* and *Certiorari* for the enforcement of Fundamental Rights and for any other purpose. (Art. 226). The High Courts have powers of superintendence over all subordinate Courts within their respective jurisdiction. Legislation affecting Constitution and Organisation of the High Courts can be passed by Parliament alone.

LOWER COURTS

The Code of Criminal Procedure provides for the constitution of inferior criminal courts styled courts of session and courts of magistrates. Every State, outside the towns of Madras, Bombay and Calcutta, is divided into sessions divisions consisting of one or more districts, and every sessions division has a court of session and a sessions judge, with assistants if need be. These stationary sessions courts are like the English Assizes, and are competent to try all accused persons duly committed, and to inflict any punishment authorised by law, but sentences of death are subject to confirmation by the highest court of criminal appeal in the State.

Magistrates' courts are of three classes with descending powers. Provision is made and largely utilised in the towns, for the appointment of honorary magistrates; in the towns of Madras, Bombay and Calcutta Presidency magistrates deal with magisterial cases and benches of Justices of the Peace or honorary magistrates dispose of the less important cases. In Bombay honorary magistrates or Justices of the Peace do not try cases. Article 50 of the Constitution lays down that the States shall take steps to separate the judiciary from the executive in the public service of the States. Such a separation was already in vogue in the State of Hyderabad. In the State of Madras this system has been introduced in two Districts. The legislature of the State of Bombay has passed an Act to put into effect separation of the judiciary from the executive.

The constitution and jurisdiction of the inferior civil courts varies. Broadly speaking one district and sessions judge is appointed for each district. As District Judge he presides in its principal civil court of original jurisdiction. His functions as Sessions Judge have already been described. For these posts members of the Indian Civil Service were mainly selected though some appointments were made from the Provincial Service. Next come the Subordinate Judges and Munsiffs, the extent of whose original jurisdiction varies in different parts of the country.

There are in addition a number of Courts of Small Causes, with jurisdiction to try money suits up to Rs. 500. In the towns of Madras, Bombay and Calcutta where the Chartered High Courts have original jurisdiction, Small Causes Courts dispose of money suits up to Rs. 2,000. In Bombay and Madras there are City Civil Courts. The City Civil Court in Bombay has a pecuniary jurisdiction of Rs. 25,000. As Insolvency Courts the Chartered High Courts of Calcutta, Bombay and Madras have jurisdiction in the Presidency towns. In the mofussil similar powers were conferred on the District Courts by the Provincial Insolvency Act of 1920.

Coroners are appointed only for the Presidency Towns of Calcutta and Bombay. Elsewhere their duties are discharged by the ordinary staff of magistrates and police officers unaided by jurors.

LEGAL PRACTITIONERS

Legal practitioners in India were divided into Barristers-at-Law, Advocates of the Federal and the High Courts; Vakils and Attorneys (Solicitors) of High Courts and Pleaders, Mukhtiars and revenue agents. Advocates of the Federal Court were divided into two classes, senior Advocates and Advocates. All Advocates in the Supreme Court must be instructed by Agents on the Rolls of the Supreme Court Agents and no Senior can appear without a Junior. Every Advocate of the Supreme Court is entitled to practise in any High Court whether or not he is an Advocate of that High Court. Barristers and Advocates are admitted by each High Court to practise in it and its subordinate courts; and they alone are admitted to practise on the original side of some of the Chartered High Courts. (But this distinction has recently been abolished in the Bombay High Court). Vakils were persons duly qualified who were admitted to practise on the appellate side of the chartered High Courts and in the Courts subordinate to the High Courts. Attorneys are required to qualify before admission to practise in much the same way as in England. **The rule that a solicitor must instruct counsel** prevails only on the original side of the Bombay and Calcutta High Courts. Pleaders practise in the subordinate courts in accordance with rules framed by the High Courts. The Bar Councils Act of 1926 aims at abolishing the various grades of practitioners, and under it each of the High Courts maintains a roll of advocates entitled to practise within its jurisdiction. The Government of India have appointed a Committee called 'All India Bar Committee' for investigating the feasibility of creating a completely unified bar for the whole of India.

The Government of India have their own law colleague in the Law Minister of the Union Cabinet. All Government measures are drafted in his department after their substance is decided upon by the administrative departments concerned. Outside the Cabinet the principal law officers of the Government of India are the Attorney-General and Solicitor-General appointed by the President. At Bombay and Calcutta the Government of India have their own solicitors. Each of the State Governments has its own Advocate-General.

Article 76 of the Constitution of India says that for the post of Attorney-Generalship the President shall appoint a person qualified to be appointed a Judge of the Supreme Court. It shall be the duty of the Attorney-General to give advice to the Govt. of India upon such legal matters and to perform such other duties of a legal character as may be referred or assigned to him by the President, and to discharge the functions conferred upon him by the Constitution. In the performance of his duties the Attorney-General shall have right of audience in all Courts in the territory of India. The Attorney-General has a right to take part in the proceedings of Parliament and address it. Under Article 165 the Governor of each State is authorised to appoint a person qualified to be appointed a Judge of a High Court to be Advocate-General for the State.

The State Governments have usually their own Legal Remembrancers and professional lawyers as Government Advocates and Assistant Government Advocates.

Sheriffs are attached to the High Court of Calcutta, Madras and Bombay. They are appointed by Government, selected from non-officials of standing, the detailed work being done by deputy sheriffs, who are officers of Court.

LAW REPORTS

The official State Law reports were published in six series—Calcutta, Madras, Bombay, Allahabad, Patna and Nagpur under the authority of the State Governments concerned. They contained cases determined by the High Court and by the Federal Court and the Judicial Committee on appeal from the High Courts. These appeals raised questions of very great importance and the Council of Law Reporting for England and Wales showed their appreciation by printing the Indian Appeals in a separate volume and also compiled a digest of Indian Appeals covering the period 1874-1923. The other States had series of reports issued under the authority either of the Judiciary or the State.

In addition to these reports a separate series was published under the authority of the Federal Court of India containing reports of the decision of that Court and of the Judicial Committee on appeal from the Federal Court. Now the series is published under the authority of the Supreme Court of India and contains reports of the decisions of that Court. Besides these official reports there are a number of private agencies that also bring out reports of the decisions of the High Courts and the Supreme Court.

Assam Judicial Department

The Hon'ble Mr. Justice T. V. Thadani, B.Sc. (Bom.), B.A. (Cantab.), Bar-at-Law	Chief Justice.
The Hon'ble Rai Sahib Justice Ram Labhaya, LL.B.	Puisne Judge.
The Hon'ble Mr. Justice H. Deka, M.A., B.L.	Do.
B. N. Choudhury, B.A. (Hons.), B.L.	Registrar.
D. N. Choudhury, B.Sc.	Asstt. Registrar.

LAWS OF 1951

Act 1. The Code of Criminal Procedure (Amendment) Act.—This Act amends the code of criminal procedure for certain purposes such as rules for prosecution of Rulers of former Indian States.

S. 2 makes a general amendment in the code of criminal Procedure by substituting "India" for "States".

S. 4 lays down that "High Court" in relation to the Andaman and Nicobar Islands means the High Court of Calcutta, and omits clause (*ii*) of the same section.

S. 9 lays down special rules regarding processes in certain cases.

S. 11 lays down rules for prosecution of Rulers of former Indian States. Previous sanction of the Central Government is required, before any Court can take cognizance of any offence alleged to have been committed by a Ruler.

S. 18 lays down that when an accused is sentenced to death and an appeal lies from such judgment as of right, the Court shall inform him of the period within which the appeal should be preferred.

S. 20 omits the words "penal servitude" from section 426.

S. 21. Sec. 503 lays down rules about attendance of witnesses and when it may be dispensed with and commission issued. S. 504 lays down rules as regards officers to whom the commission is to be issued. Rules about execution of commission are laid down in section 505. S. 506 empowers parties to examine witnesses. S. 507 provides for return of commission, and S. 508 for adjournment of proceedings. S. 508-A lays down rules for execution of foreign commissions.

S. 25 provides for repeals and savings.

Act 2. The Code of Civil Procedure (Amendment) Act.—This Act amends the Code of Civil Procedure. Some of the amendments were necessitated on account of the Constitution of Part B States and a few others because of the position of Ambassadors in India of other countries.

S. 2 lays down details about the application of the Code.

S. 3 substitutes the word "India" for the "States" in the code.

S. 6 lays down rules as regards service of foreign summonses.

S. 8 provides for execution of decrees passed by civil courts in places to which the code does not extend.

S. 9 lays down rules for execution of decrees passed by revenue courts in places to which the code does not extend.

S. 11. Rules about commissions issued by foreign courts are laid down.

S. 12 lays down detail rules about suits by aliens and by or against Foreign rulers, Ambassadors and Envoys. S. 83 lays down that alien enemies cannot sue without permission of the Central Government. Section 84. A foreign state may sue in any competent Court. S. 85. The Central Government may appoint any person to prosecute or defend any suit on behalf of a foreign ruler. S. 86. No ruler of a foreign state may be sued except with the consent of the Central Government. Rules about giving permission are laid down. No ruler of a foreign State shall be arrested under the Code except with the consent of the Central Government. These provisions apply to any Ambassador or Envoy, any High Commissioner and to any such member of the staff of the Ruler, etc. as the Central Government may specify. S. 87. The Ruler of a Foreign State may sue and shall be sued in the name of his State. S. 87-A lays down definitions of 'foreign State' and 'Ruler'. S. 87-B lays down provisions for suits against Rulers of former Indian States.

S. 14. For the words "Chartered High Courts" the words and letters "High Courts for Part A States and Part B States" shall be substituted.

S. 19 lays down special provisions that explain the operation of Civil Procedure (Amendment) Act of 1922.

S. 20 contains repeals and savings.

Act 3. The Part B States (Laws) Act.—This Act extends certain Acts in force in Part A States to Part B States. This is done to secure uniformity of law throughout India.

S. 3 lays down that the Acts and Ordinances specified in the Schedule shall be amended in the manner and to the extent therein specified. It also lays down rules for territorial extent.

S. 4 lays down rule as regards construction of references to laws not in force in Part B States.

S. 5 provides for construction of references to authorities where new authorities have been constituted.

S. 6. Rules about repeals and saving of any corresponding law in force in that State are laid down. Action taken under the old Acts shall be valid.

S. 7. The Central Government is authorised to remove difficulties that might arise in giving effect to the provisions of this Act. In particular, it may provide for the transfer of any matter pending before any Court to any corresponding Court.

Act 4. Preventive Detention (Amendment) Act.—The Preventive Detention Act 1950 (IV of 1950) was due to expire on the 1st April 1951. This Act extends the life of the original Act for one year more. It also liberalises the provisions regarding reference to Advisory Boards by making a reference to such Boards compulsory in all cases of detentions. Another important amendment in the Act is an express provision enabling Government to release detained persons on parole.

S. 5 provides for execution of detention order.

S. 6 makes provision for 'power to regulate place and condition of detention' and lays down the grounds which will not render the detention orders invalid or inoperative.

Sections 9 and 10 lay down details about reference to Advisory Boards.

S. 11 provides for action that is to be taken on the report of the Advisory Boards.

S. 12 makes provision for temporary release of persons detained.

S. 13 repeals the Transfer of Detained Persons Act 1949.

Act 5. The Employers Liability (Amendment) Act.—This Act makes minor amendments in the Employers' Liability Act, 1951.

S. 3 inserts a new section 3-A with respect to contracting out. Any such agreement shall be void.

Act 6. The Appropriation (Railways) Act, 1951.—The Act provides for the appropriation out of the Consolidated Fund of India of the moneys required to meet the Supplementary Grants made by Parliament for expenditure of the Central Government on Railways for 1950-51. The amount is Rs. 24,16,57,000.

Act 7. The Appropriation Act, 1951.—The Act provides for the appropriation out of the Consolidated Fund of India of the moneys required to meet the supplementary expenditure charged on the Consolidated Fund of India and the Grants made by Parliament for expenditure of the Central Government, excluding Railways, for 1950-51. The amount is Rs. 33,18,05,000, out of which the amount of Rs. 9,90,73,000 is charged expenditure.

Act 8. The Appropriation (Railways) No. 2 Act, 1951.—The Act provides for the appropriation out of the Consolidated Fund of India of the moneys required to meet the Grants made by Parliament for expenditure of the Central Government on Railways for 1951-52. The Act authorises issue of Rs. 346,28,35,000.

Act 9. The Requisitioned Land (Continuance of Powers) Amendment Act.—Rule 75-A of the Defence of India Rules 1939, empowered the Central and the Provincial (now State Governments) to requisition lands and buildings for specific purposes. These rules expired on the 30th of September 1946, but as the retention of requisitioned properties for a further period was necessary, an ordinance, known as the Requisitioned Land (Continuance of Powers) Ordinance 1946, was issued. This was later replaced by an Act in 1947 which was in turn extended for a period of one year ending on the 31st March 1951. This Act makes provision for continuance of Powers for certain purposes.

S. 2 lays down that the Act shall cease to have effect in Part 'C' States on the 1st day of April 1952. It also makes provisions as regards Part 'A' States.

Act 10. The Delhi and Ajmer-Merwara Rent Control (Amendment) Act.—The Delhi and Ajmer-Merwara Rent Control Act was enacted in 1947. It was to be effective for an initial period of two years, which was further extended by two years. The period was due to expire on 23rd March 1951. This Act extends the original Act for a further period of two years.

S. 2 amends section 1 of the original Act and extends the life of the original Act.

Act 11. Taxation on Income (Investigation Commission) Amendment Act.—The Income-tax Investigation Commission was set up under the Taxation on Income (Investigation Commission) Act, 1947. Under the Act a time-limit was laid down on the term of the appointment of the Commission. This encouraged many persons to adopt dilatory tactics in the hope that the investigation of their cases would lapse by efflux of time. The Act removes the statutory limit (which was the 31st day of March 1951) to the Commission's term of appointment and enables the Central Government to extend its term from time to time.

S. 2 enables the Central Government to extend the term of appointment.

Act 12. Appropriation (Vote on Account) Act, 1951.—This Act provides for the appropriation out of the Consolidated Fund of India of the moneys required to meet the expenditure charged on the Consolidated Fund of India and the grants made in advance by Parliament in respect of the estimated expenditure of the Central Government, excluding Railways, for a part of the financial year 1951-52.

S. 2 authorises withdrawal of the amount of Rs. 74,18,44,000 out of the Consolidated Fund of India. The amount of Rs. 39,16,68,000 is voted by Parliament, the remaining amount of Rs. 35,01,76,000 being charged on the consolidated Fund of India.

Act 13. The Indian Tariff (Amendment) Act, 1951.—The Act empowers Government to impose protective duties by notification in emergent circumstances. It also amends the First Schedule to the Act with a view to extending beyond the 31st March 1951 the period of protection. It also amends the Indian Tariff (Amendment) Act, 1949.

S. 2 empowers the Central Government to levy protective duties in certain cases upon the recommendation made by the Tariff Board. Notification of the Government, in this behalf, must be placed before Parliament. This power is for two years.

S. 4 amends the Indian Tariff (Amendment) Act of 1949 by substituting the figures 1954 for the figures 1951.

Act 14. The Appropriation (Railways) (No. 3) Act, 1951.—The Act provides for the appropriation out of the Consolidated Fund of India of the moneys required to meet the supplementary grant made by Parliament for expenditure of the Central Government on Railways for 1950-51.

S. 2 authorises issue of the amount of Rs. 30,00,000 out of the Consolidated Fund of India.

S. 3 authorises the appropriation of the same amount.

Act 15. The Appropriation (No. 2) Act, 1951.—The Act provides for the appropriation out of Consolidated Fund of India of the moneys required to meet the expenditure charged on the Consolidated Fund of India and the grants made by Parliament for expenditure of Central Government, excluding Railways for 1951-52. The details are laid down in the Schedule to the Act.

Act 16. The Minimum Wages (Amendment) Act.—Some of the State Governments had not been able to fix minimum wages, before the 15th March 1951, as required by the Minimum Wages Act. This Act extends the time-limit upto the 31st March 1952. The Act also allows some discretion to State Governments in fixing minimum wages with respect to employment in agriculture. It further empowers appropriate Governments to notify the date of enforcement for fixation of minimum rates of wages.

Act 17. The Coal Mines Safety (Stowing) Amendment Act.—This Act makes a very minor amendment in the original Act of 1939.

S. 2 amends section 5 of the original Act by substituting the words "three annas" in section 5 in the place of the words "nine annas."

Act 18. The Supreme Court Advocates (Practice in High Courts) Act.—This Act is a first step in the direction of constituting a United Bar for the whole of India. It entitles all Advocates of the Supreme Court, to plead as well as to act in any High Court, including a Judicial Commissioners' Court.

S. 2 gives a right to Supreme Court Advocates to practise in any High Court. However this does not mean that a person, who was a judge of a High Court and who had given an undertaking not to practise therein after retirement can practise in that High Court, by virtue of his being a Supreme Court Advocate.

Act 19. The Code of Civil Procedure (Second Amendment) Act.—This Act amends rule 25 of Order V of the Code of Civil Procedure in order to enable the courts in India to transmit a summons to a defendant residing in Pakistan to the appropriate court in Pakistan, and where the defendant is a public servant in Pakistan to route the summons through such officer or authority in Pakistan as the Central Government may specify.

S. 2 makes the necessary provision for achieving the purposes of the Act.

Act 20. The Indian Tariff (Second Amendment) Act.—This Act amends the First Schedule to the Indian Tariff Act, 1934 in order to extend the period of protection to certain industries, as recommended by the Tariff Board, certain minor amendments of formal character are also made.

Act 21. The Coal Mines Provident Fund and Bonus Schemes (Amendment) Act.—This Act makes provision for compelling the employers to make their own contribution to the provident fund of the employees. It also makes provision for the manner in which employers' contributions are to be recovered in case they fail to do so or refuse to pay.

S. 2 inserts a new section 10A in the original Act and lays down the mode of recovery of money due from an employer.

Act 22. The Administration of Evacuee Property (Amendment) Act.—This Act amends the Administration of Evacuee Property Act 1950 for certain purposes.

S. 3 exempts evacuee property from processes of court. And if any such property had been sold in execution of a decree, etc. the sale shall be set aside if an application is made by the Custodian to such Court.

Act 23. The Finance Act.—The object of the Act is to give effect to the financial proposals of the Government of India for the financial year and to provide for certain connected matters. The Act also increases the then existing surcharges in certain cases.

S. 2 prescribes rates of Income-tax and Super-tax, and detail rules for assessment of the taxes. Distribution is made between companies, local authorities, etc. and other bodies. Definition of 'total income' is also laid down.

S. 3 amends section 17 of the Income-tax Act. Rules for levying income-tax on a person who is not a resident in the taxable territories, are laid down.

S. 7 lays down rules for taxing tobacco.

S. 8 lays down that additional duties of excise shall be levied on certain goods, till the 31st March 1952.

S. 9 discontinues salt duty.

The First Schedule lays down the rates of Income-tax in Part I and rates of Super-tax in Part II. The Second Schedule mentions the goods on which additional duty of customs is not to be levied. The Third Schedule mentions the goods on which additional duty of customs at 5 per cent. is leviable.

Act 24. The Code of Civil and Criminal Procedure (Amendment) Act.—In a number of cases the subordinate courts took upon themselves the grave responsibility of declaring enactments of the legislature to be void under the constitution. This led to the ludicrous spectacle of an inferior magistrate having merely police or other limited jurisdiction assuming to pass judgment upon the legislation of a State or a Country and declare it void. It is necessary that the responsible duty of declaring an enactment invalid and thereby overruling the solemn decision of the legislature, should be discharged only by the superior courts of the country. The Act makes provision for this. It amends section 113 of the Code of Civil Procedure and section 432 of the Code of Criminal Procedure and makes it obligatory on the part of the subordinate courts to make a reference to the High Court in every case where the subordinate court is satisfied.

(*a*) that the case before it involves a question as to the validity of an enactment, the determination of which is necessary for the disposal of the case;

(*b*) that the enactment has not been authoritatively declared to be invalid; and

(*c*) that in its opinion the enactment is invalid or inoperative.

S. 3 lays down that a court shall state a case and refer it for decision to the High Court if it is satisfied that it involves a question as to validity of any law, etc.

Act 25. The Jalianwala Bagh National Memorial Act.—This Act provides for the erection and management of a National Memorial to perpetuate the memory of those killed on the 13th day of April 1919 in Jalianwala Bagh.

S. 6 states that all property and funds shall be vested in the trustees.

S. 7. The Trustees have power to appoint Committee of Management.

S. 8. No Act of the Trustees shall be deemed to be invalid merely by reason of any vacancy in the body of the Trustees.

S. 9. The Central Government have power to make rules.

S. 10. The Trustees may make regulations consistent with the Act. The Schedule to the Act has got two parts which lay down details of the property. Part I refers to Immoveable properties, while Part II to Moveable properties.

Act 26. The Inland Steam-Vessels (Amendment) Act.—The Inland Steam Vessels Act, 1917 does not provide for the registration of inland steam-vessels. All that a steam-vessel required under the Act, was a certificate of survey in force and applicable to voyage or service. The present Act makes it obligatory for all inland steam-vessels to be registered before they can be permitted to proceed on a voyage or service.

S. 3 lays down provisions for certificates of registration to be secured by an inland steam-vessel before proceeding on voyage. S. 19B lays down rules for place of registry and registering authorities. S. 19C states details in the Book of Registration. S. 19D mentions the procedure for application for registration. S. 19E provides for places of registration. S. 19F lays down rules for grant of certificate of registration. S. 19G lays down that inland steam-vessels, registered under the Merchant Shipping Act, 1894 will be automatically registered under the present Act. S. 19H provides for marking of inland steam-vessels. S. 19I lays down prohibition against transfer of certificate of registration. S. 19J provides for registration on alteration of the inland vessel. S. 19K provides that registry of an inland vessel may be transferred from one place to another. S. 19L lays down rules to be adopted when the owner of a vessel changes his residence or place of business. S. 19M provides for prohibition against the transfer of ownership of registered vessel without the previous approval of the appropriate Government. S. 19N lays down that under certain circumstances, certificates of registration may be suspended. S. 19O provides for cancellation of registration under certain circumstances. S. 19P. Provision for appeals are stated. S. 19Q. Rules about reciprocity are mentioned. S. 19R empowers State Government to make rules to carry out the objects of this Chapter.

S. 6 provides for penalty for neglect or refusal to deliver up or surrender certificates of survey or registration.

S. 7 provides for punishment of offences not otherwise provided for.

S. 9 refers to repeals and savings.

Act 27. The Representation of the People (Amendment) Act.—This Act amends the Representation of the People Act of 1950. The amendment was necessary in order to make provision for reservation of seats in the House of People for Scheduled Castes and Scheduled Tribes in certain Part 'C' States.

S. 2 provides that one seat shall be reserved from certain Part 'C' States for the Scheduled Caste and one for the Scheduled Tribes in certain other States.

S. 3 adds sixth and seventh schedules to the Act of 1950. Sixth Schedule mentions the Scheduled Castes in Part 'C' States. Seventh Schedule mentions the Scheduled Tribes.

Act 28. The Tax on Newspapers (Sales and Advertisements) Repeal Act.—This Act provides for the repeal of certain State laws in so far as they sanctioned the levy of taxes on the sale or purchase of newspapers and on advertisements published therein.

S. 2 lays down that the Madras General Sales Tax Act (Act IX of 1939) shall be deemed to have been repealed, to the extent to which it authorises the levy of a tax on the sale of newspapers.

S. 3 repeals Part VII of the Bombay Finance Act, 1932.

Act 29. The Vishwa-Bharati Act.—

S. 2 declares that Vishwa-Bharati is an institution of national importance.

S. 4 makes provision for incorporation of the University.

S. 5 mentions the effect of incorporation in certain cases.

S. 6 lays down powers of the University. They are mentioned in detail under 11 heads.

S. 7. The territorial jurisdiction of the University will be restricted to the areas specified in the Second Schedule.

S. 8. The University will be open to all races, creeds and classes.

S. 9. All teaching of the University shall be conducted by and in the name of the University.

S. 10 makes provision for *Paridarshaka i.e.* visitor. The President of India shall be the visitor. He will have the right to cause the inspection and control the affairs of the University.

S. 11 lays down that the Governor of West Bengal shall be *Pradhan, i.e.* the Rector.

S. 12 officers of the University shall include the *Acharya* (Chancellor), the *Upacharya* (Vice-Chancellor) and the *Karma Sachiva* (Registrar).

S. 13 lays down that the Acharya shall be elected by the *Samsad* (Court) and shall hold office for three years.

S. 14. The *Upacharya* shall be the principal academic and executive officer.

S. 15. The *Artha Sachiva* shall exercise general supervision over the funds of the University.

S. 16. The *Karma Sachiva* shall be the Secretary to the Court and the Executive Council.

S. 17 enables the University to make provision by statutes for other officers.

S. 18 lays down that the authorities of the University shall be the *Samsad* (Court), the *Karma Samiti* (Executive Council), the *Shikshan Samiti* (Academic Council) etc.

S. 19 states the composition of the Court, it will consist of ex-Officio members, life members and other members.

S. 20 provides for the meeting of the *Samsad* (Court).

S. 21 states powers and duties of the *Samsad* (Court).

S. 22. The *Karma Samiti* shall be the executive body.

S. 23 states powers and duties of the *Karma Samiti.* This is the principal executive body.

S. 24 lays down provisions as regards the *Shiksha Samiti.*

S. 25 makes provision for other authorities of the University.

S. 26 lays down that the University shall have an association called an *Alumni Association* which will be open to past students.

S. 28 lays down the procedure of making statutes.

S. 30 lays down the procedure to be followed by the *Karma Samiti* in making ordinances, and the restrictions on its powers in making ordinances.

S. 31 empowers the authorities of the University to make regulations, consistent with this Act, the Statutes and the Ordinances.

S. 32 lays down that the University shall be a residential University.

S. 33 makes provision for admission to the University.

S. 34 states that all arrangements for the conduct of examination shall be made by the *Karma Samiti.*

S. 35 lays down that annual report of the University shall be prepared and submitted to the Samsad.

S. 37 provides for the conditions of service of officers and teachers of the University.

S. 38 provision is made for constituting a Tribunal of Arbitration for giving decision in any dispute that might arise.

S. 39. Provision is made for pension and provident funds.

S. 40. Rules for filling of casual vacancies are laid down.

S. 41 states that any person may be removed from membership of any authority or board of the University if he has committed a serious offence involving moral turpitude.

S. 42. The *Paridarshaka* will decide any dispute as to constitution of any University authority or body.

S. 43. Rules about Constitution of Committees are laid down.

S. 44. Proceedings of the University authorities not to be invalid because of vacancies.

S. 45. The *Paridarshaka* has power to remove difficulties.

The First Schedule mentions the objects for which the late Rabindranath Tagore founded the Vishwa-Bharati at Santiniketan. One of them is to strengthen the fundamental conditions of world peace.

The Second Schedule mentions the territorial limits of the University.

Act 30. The Presidents Pension Act.—This Act provides for payment of pensions to retiring Presidents of India. Such a provision is necessary considering the status and dignity of the office.

S. 2 provides that a pension of fifteen thousand rupees per annum will be paid to every retiring President for the remainder of his life.

S. 3 makes section 2 applicable to the last Governor-General of India.

S. 4 states that the pensions shall be a charge on the Consolidated Fund of India.

Act 31. The Hyderabad Public Companies (Limitation of Dividends) Repealing Act.—This Act repeals the Public Companies (Limitation of Dividends) Regulation 1358F of Hyderabad. The Regulation was made by the Military Governor of Hyderabad.

S. 1 lays down that the Act shall come into force on the 1st day of April 1950.

S. 2 repeals the Regulation with a proviso. Section 6 of the General Clauses Act applies to such repeal.

Act 32. The Reserve Bank of India (Amendment) Act.

S. 2 makes a formal amendment by substituting 'India' for 'States.'

S. 5 amends section 7 of the Original Act, and empowers the Governor-General superintendence and direction of the affairs of the Bank.

S. 8 substitutes the word 'Bank' for 'the Central Board.'

S. 12 empowers the Bank to transact business of Part B States on agreement.

S. 16 makes a very important amendment in the Act, by substituting a new sub-section (2) of section 42 for the original one. Every Scheduled Bank is bound to send a return giving various details to the Reserve Bank. A new sub-section (7) is inserted in the Act. The sub-section empowers the Reserve Bank to exempt any Bank from the operation of section 42 as amended.

S. 18 substitutes the words 'Comptroller and Auditor-General' for the words 'Auditor-General.'

Act 33. The Finance Commission (Miscellaneous Provisions) Act.—Article 280 of the Constitution of India lays down that the President of India shall within two years from the commencement of the Constitution constitute a Finance Commission. The details about the Commission are to be provided by Parliament by law. Accordingly this Act is passed. It determines the qualifications requisite for appointment as members of the Finance Commission and also the manner in which they are to be selected. It also prescribes their powers.

S. 3 lays down qualifications for appointment as, and the manner of selection of members of the Commission.

S. 4 states that the person to be appointed shall not have financial interest that is likely to affect prejudicially his functions as a member of the Commission.

S. 5 lays down the disqualifications for being a member of the commission.

S. 6 states the term of office of members and their eligibility for reappointment.

S. 7 provides that the conditions of service and salaries and allowances of members will be determined by the President.

S. 8 lays down the powers of the Commission and the procedure to be followed by them.

Act 34. The Assam Rifles (Amendment) Act.—This Act amends the Assam Rifles Act of 1941 for certain purposes.

S. 3 mentions classes and ranks of riflemen specified in the Table.

Act 35. The Port Trusts and Ports (Amendment) Act.—This Act amends the Bombay Port Trust Act, 1879, the Calcutta Port Act, 1890, the Madras Port Trust Act, 1905 and the Indian Ports Act, 1908 for certain purposes and also makes consequential amendments in the Calcutta Port (Pilotage) Act, 1948. Chapter I of the Act is preliminary and lays down short title and amendment. Chapter II amends Bombay Act VI of 1879.

S. 3 lays down the requirements as to publication of notification orders, etc. in the Official Gazette.

S. 6 lays down term of office of nominees and elective trustees. S. 10 states the manner of filling vacancies in the office of trustees. S. 11 mentions that the Chairman shall be appointed by the Central Government. S. 11A provides for resignation of the trustees.

S. 8 lays down saving provisions for appointment of nominee-trustees and elective trustees after the prescribed period.

S. 12 provides for salary and allowances of the Chairman and fees payable to trustees other than the Chairman.

S. 14 lays down powers of Board to enter into Contract.

S. 19 provides for gratuity, etc. for Chairman. S. 20B permits the Chairman to join Provident Fund.

S. 21 substitutes new clauses 6A and 6B for the original ones. They deal with contribution to welfare fund or to special fund. A new clause 9 is substituted for the original clause No. 9.

S. 22 repeals section 22A of the Bombay Act.

S. 23 lays down that the Chairman of the Board shall have power of making appointments, etc. in certain cases. S. 23A provides for disposal of fines.

S. 24 lays down under what circumstances sanction of Central Government is necessary.

S. 25 repeals section 25 of the Act.

S. 27 repeals section 32 of the Act.

S. 30 lays down that the Board has power to repay debts, etc. S. 41E states that loans are to be raised in India and in Indian currency only.

S. 31 substitutes many new sections for sections 42A to 42E of the Bombay Act. S. 42A states the right of survivors of joint or several payees of debentures and securities. S. 42B states that one of two or more joint holders has power to grant receipts. S. 42C lays down prohibition of endorsements elsewhere other than on the debenture or security. S. 42D states that endorser of debenture or security is not liable for amendment thereof. S. 42E lays down provision for impression of signature on debentures and securities. S. 42F states that under certain circumstances duplicate debentures or securities may be issued. S. 42G lays down rules for issue of converted debentures and securities. S. 42H states that the Board shall be discharged from all liability in certain cases. S. 42I. The Board may issue stock certificates in some cases

S. 42J empowers the Board to make rules which may be cancelled by the Central Government if it thinks it necessary to do so. S. 42K lays down that the Board may borrow by means of temporary overdraft or otherwise by pledging the debentures. S. 42L. The Board has power to raise loans under the local Authorities Loans Act.

S. 34 empowers the Central Government to cancel scale of tolls.

S. 35 empowers the Board to levy concessional rate of charges on coastal cargo.

S. 36 repeals sections 46 and 47 of the Act.

S. 39 empowers the Board to transfer money from the general account to pilotage account and *vice-versa.*

S. 40 repeals section 50 of the Act.

S. 43 authorises the Board to re-appropriate any unspent money to meet any excess in any authorised expenditure.

S. 44 lays down that no expenditure above fifteen thousand is to be incurred unless sanctioned in estimates.

S. 45 deals with Capital Expenditure while S. 56B lays down rules for writing off losses.

S. 47 lays down that the Board shall remedy the defects and irregularities pointed out in the audit report and the final orders are to be passed by the Central Government. S. 58B states that the Board shall submit the accounts to the Central Government.

S. 48 lays down rules about responsibility of Board for loss, etc. of goods.

S. 51 lays down that the Chairman has power to issue directions for the execution of work. S. 68B empowers the Central Government to order survey or examination of work. S. 68C states that the Central Government has power to restore or complete works at the cost of the Board.

S. 53 states that all moneys received by the Board as Conservator of Port or as body appointed under section 36 of the Indian Ports Act 106, shall be deemed to be a portion of the income of the Board. It also states that the provisions of this Act shall apply to any work undertaken by the Board in the capacity as the Conservator of Port.

S. 56 states that persons employed under this Act shall be public servants for certain purposes such as for sections 161 to 171 of Indian Penal Code, etc.

S. 58 states that provisions of sections 43, 43A, 45, 66, 67, 68, 73, 83, 84 and 87 shall apply in relation to all aircraft making use of the port while on water.

S. 59 lays down that the Board has power to evict certain persons from the premises of the Board. If the person ordered to evict refuses to obey the order, police assistance will be available to the Board. S. 89 states that the Board shall submit to the Central Government a detailed report of the administration of the Port for the preceding year, as soon as may after the 1st of April every year. S. 90. The Central Government may by notification supersede the Board for such period, not exceeding six months at a time. Before issuing such a notification reasonable opportunity must be given to the Board to represent its own case. The section also states the consequences that will follow the superseding of the Board, and what is to be done on the expiration of the period of supersession.

S. 61 lays down requirements as to publication of notifications, order, etc. in the official Gazette.

S. 62 refers to the appointment of Commissioners.

S. 63 provides for appointment of Chairman and Deputy Chairman.

S. 64 repeals section 9 of the Act.

S. 65 refers to the term of office of Commissioners. It will be two years.

S. 66 provides for resignation of Commissioners.

S. 69 lays down rules for gratuity, etc. for the Chairman or Deputy Chairman.

S. 70 permits the Chairman and the Deputy Chairman to join provident fund.

S. 71 lays down rules for filling of vacancies in the office of Commissioners.

S. 72 makes minor amendments and inserts a new sub-section (No. 3).

S. 73 lays down rules for filling of casual vacancies.

S. 74 provides saving, provisions for appointment or election of Commissioners after the prescribed period.

S. 75 lays down in detail the disqualifications of Commissioners. S. 17A further lays down that a Commissioner shall not vote on or take part in the discussion of any question coming up for consideration if he has any direct or indirect interest in it.

S. 80 lays down rules about debentures, securities, etc. in favour of the Commissioners.

S. 82 lays down right of survivors of joint or several payees of debentures or securities. S. 27B lays down that one of two or more joint holders may grant receipts. S. 27C states rules as regards endorsements to be made on debentures or security itself. S. 27D lays down that endorser of debentures or securities is not liable for amount thereof. S. 27E lays down rules about signature on debenture and securities. S. 27F authorises the Commissioner to issue duplicate debentures and securities in case the original ones are lost. S. 27G provides for issue of converted debentures and securities. S. 27H states the circumstances under which the Commissioner shall be discharged from all liability in respect of debentures or securities. S. 27I lays down that Commissioners have powers to make rules. The section mentions in detail the items with respect to which the rules may be made by the Commissioners. S. 27J lays down rules of limitation in case of claims against sinking fund trustees in respect of debentures. S. 27K empowers the Commissioners to borrow by means of temporary overdraft or by pledging the debentures, etc. S. 27L lays down that the Commissioners have power to raise loan under the local Authorities Loans Act, 1914.

S. 83 substitutes the words 'employees, etc.' for 'officers and servants, etc.' in sections 30, 30A, 31, 32, 33, 54, 75, 104A, 105, 117 and 135 of the Act.

S. 87 lays down rules as regards appointments of the employees. The power is vested in the Commissioners and Chairman.

S. 89 repeals section 33 of the Act.

S. 90 lays down that certain orders of the Commissioners are subject to previous sanction of the Central Government.

S. 92 lays down that the Central Government has power to supersede the Commissioners for such period not exceeding six months at a time. Reasonable opportunity will be given by the Central Government to Commissioners to represent their own case. The section also lays down the consequences of the supersession. A report of the action taken by the Central Government under this section shall be presented to Parliament.

S. 93 repeals section 39 of the Act.

S. 100 lays down mode of executing contracts or agreements.

S. 103 repeals section 64 of the Act.

S. 104 deals with disposal of Funds. S. 64B lays down rules as regards application of moneys belonging to the Commissioners. There are nine heads mentioned in the section which further state that the Commissioner shall have power to apply moneys in payment of other charges too.

S. 105 lays down detail rules about capital expenditure. S. 75B lays down rules for writing off of losses. The Commissioner may sanction such writing off with the previous sanction of the Central Government.

S. 106 lays down rules about audit and examination of accounts. The accounts shall be audited by the Comptroller and Auditor-General of India. The audited accounts shall be forwarded to the Central Government.

S. 107 authorises the Commissioners to remedy defects and irregularities pointed out in the audit report and the Central Government to pass the final orders.

S. 109 lays down that Commissioners shall submit the accounts to the Central Government. The accounts shall also be open to inspection of the public on payment of fees.

S. 113 lays down that without the express sanction of the Commissioner, no goods shall be landed or shipped from or upon any sea-going vessel within the port save at the docks, wharves, etc. erected under the Act.

S. 115 refers to the power to levy concessional rate of charges on coastal cargo.

S. 117 deals with the power of Commissioners to remit tolls, dues, rates of charges, etc. under certain circumstances.

S. 119 lays down detail rules about disposal of goods not removed from the premises of the Commissioners within time limited. The Commissioner may sell goods under certain circumstances.

S. 121 empowers the Commissioner to recover by suit any tolls, dues, rates, rents, charges, etc.

S. 122 lays down that moneys received by the Commissioner as Conservator of Port, etc. shall be deemed to be a portion of the income of the Commissioners. It further lays down that all the powers, authorities, etc. contained in this Act in respect of works, authorised by the Act, shall also apply to the works which may be executed by the Commissioners as such Conservator.

S. 123 repeals section 124 of the Act.

S. 125 lays down an obligation on the Chairman to furnish to the Central Government reports, returns, etc. S. 134B provides for the submission of Annual administration report of the Port.

S. 126 lays down that the persons employed under this Act will be deemed to be public servants for certain purposes, S. 136A empowers the Commissioners to evict certain persons from the premises belonging to them. The explanation to the section lays down definition of 'premises' and the mode of serving 'notice'.

S. 127 lays down that certain sections of this Act shall apply in relation to all aircraft making use of the Port while on water as they apply in relation to vessels.

S. 129 lays down the requirements as to publication of notifications, orders, etc. in the official Gazette.

S. 131 refers to the appointment of Trustees by the Central Government and publication of names of elected Trustees.

S. 133 provides for the term of office of Chairman and other Trustees.

S. 134 lays down rules about resignation of Trustees. S. 11B lays down rules for filling of vacancies in the office of Trustees.

S. 136 refers to filling of casual vacancies in the office of Trustees. S. 13A lays down saving provisions for appointment and election of Trustees after the prescribed period.

S. 137 lays down rules for appointment of acting Trustees.

S. 139 provides for gratuity, etc. for the Chairman, while S. 21B gives permission to the Chairman to join Provident Fund.

S. 143 substitutes the words 'employees, etc., for the words 'officers and servants, etc., in various sections.

in service of another State cannot be appointed without the permission of the Government of the State, if an election to Legislative Assembly of former State is challenged and the Tribunal is being constituted for deciding the issue. Even if a member is required to leave the Tribunal in the middle of a trial, a new member may be appointed and the Trial to be continued.

S. 87 lays down that connected petitions are to be referred to the same Tribunal.

S. 88. The Trial may be held at such place as the Election Commission may appoint.

S. 89. The Tribunal may require either Attorney-General or the Advocate-General or their nominee as the case may be, to attend at the trial.

S. 90 lays down the procedure before the Tribunal. It shall not be necessary for the Tribunal to take down evidence in writing at length. The Tribunal may refuse to examine any witness. The Tribunal may dismiss any election petition if it does not comply with the provisions either of section 81 or 83 or 117.

S. 91. Appearance before the Tribunal may be in person or through a pleader.

S. 92 lays down powers of the Tribunal. It shall be deemed to be a Civil Court within the meaning of section 480 and 482 of the Code of Criminal Procedure.

S. 93. No document shall be inadmissible in evidence on the ground that it is not duly stamped or registered.

S. 94. No witness shall be required to state for whom he has voted at an election.

S. 95 states that even incriminating questions must be answered by the witness who however will be entitled to get a certificate of indemnity. Such an answer will not be used against him for other cases. The certificate of indemnity shall be full and complete defence in any other case.

S. 96. Reasonable expenses may be allowed to a witness by the Tribunal.

S. 97 lays down rules to what is to be done by a returned candidate when his election is challenged.

S. 99. The Tribunal has to make an order, at the conclusion of the Trial.

S. 100. The Tribunal must make other consequential orders too. Such orders may refer to costs or naming any person as guilty of corrupt practices.

S. 101 mentions grounds for declaring election to be void. They include corrupt practices, not being a fair election, etc. Explanation to the section explains the meaning of coercion or intimidation. It also further mentions the circumstances which render the election void, and circumstances on the strength of which the Tribunal may decide that the election of the returned candidate is not void.

S. 101A mentions the grounds for which a candidate other than the returned candidate may be declared to have been elected.

S. 102 states the procedure in case of an equality of votes. Resort is to be made to drawing lots.

S. 103 states that the Tribunal shall communicate the orders to the Election Commission and also the records of the case to the District Judge or Chief Judge of Small Causes Court.

S. 104. In case of difference of opinion among the members of the Tribunal, the majority opinion shall prevail.

S. 105 states that the orders of the Tribunal shall be final and conclusive.

S. 108. An election petition may be withdrawn before appointment of Tribunal.

S. 109. An election petition may be withdrawn only by leave of the Tribunal if the Tribunal is already constituted.

S. 110 lays down procedure for withdrawal of petitions before the Election Commission or the Tribunal.

S. 111 states the Tribunal must report the withdrawal to the Election Commission.

S. 112 states under what circumstances an election petition shall abate.

S. 113 refers to abatement of petition before the appointment of Tribunal.

S. 114 refers to abatement of petition after the appointment of Tribunal.

S. 115. Another petitioner may be substituted for the original Petitioner in certain cases.

S. 116 lays down as to what happens on abatement or substitution or death of respondent.

S. 117. Every petitioner must deposit an amount of Rs. 1,000.

S. 118. The Tribunal may call upon the petitioner to give further security.

S. 119. Security for costs may be demanded from a respondent.

S. 121 lays down rules for payments of costs out of security and return of such deposits.

S. 122 lays down rules with regard to execution of orders as to costs.

S. 123 defines major corrupt practices. Such practices include bribery, undue influence, procuring or abetting or attempting to procure, the application by a person for a ballot paper in the name of any other person, the removal of a ballot paper from the Polling Station, the publication of any statement which is false in relation to the character of any candidate, the hiring of any vehicle for the conveyance of any elector, the incurring or authorising any expenditure in contravention of the Act or the obtaining any assistance for the purposes of candidates election from a person serving under the Government. They will also include any threat of divine displeasure or of excommunication.

S. 124 lays down minor corrupt practices. They include receiving any gratification, making return of election expenses which is false, etc.

S. 125 lays down illegal practices. They will include the hiring as committee room for the purpose of holding an election meeting, where intoxicating liquor is sold, etc.

S. 126 lays down that no public meeting shall be held on the election day.

S. 127 states that persons creating disturbances at a lawful meeting may be punished and fined Rs. 250.

S. 128 lays down that strict secrecy of voting must be maintained. Any one guilty of this may be punished and imprisoned for three months.

S. 129 lays down that officers at elections will not act for candidates or influence voting. Any person guilty of contravening these provisions shall be punishable with imprisonment which may extend to six months.

S. 130 prohibits canvassing in or near polling stations.

S. 131 lays down penalty for disorderly conduct in or near polling stations.

S. 132 lays down penalty for misconduct at the polling Station.

S. 133 states penalty for illegal hiring or procuring of conveyances for elections.

S. 134 lays down penalty for breaches of official duty in connection with elections.

S. 135 states that removal of ballot papers from polling station is an offence.

S. 136 mentions other offences in connection with elections and penalties therefor.

S. 137 lays down rules about prosecution regarding certain offences.

S. 138 amends a few sections of Code of Criminal Procedure and Indian Penal Code.

S. 139 mentions offences that would entail disqualifications.

S. 140 mentions corrupt and illegal practices that would entail disqualifications.

S. 141 mentions disqualifications arising out of conviction and corrupt practices.

S. 142 lays down disqualifications arising out of illegal practices.

S. 143 mentions disqualification arising out of failure to lodge return of election expenses.

S. 144 disqualifications may be removed by the Election Commission.

Chapter III refers to other disqualifications.

S. 145 lays down disqualification for being an election agent.

S. 146 lays down disqualification for holding certain offices such as a judicial officer or a trustee of a public trust, etc.

Part IX refers to Bye-elections.

S. 153 states that the Election Commission may extend time for completion of election.

S. 154 lays down rules regarding the term of office of members of the Council of States.

S. 155 states rules regarding commencement of the term of office of members of the Council of States.

S. 156 lays down rules regarding the term of office of the members of State Legislative Councils.

S. 157 states rules regarding commencement of the term of office of members of the Legislative Councils.

S. 158 lays down rules regarding the return or forfeiture of deposits. Deposit is to be forfeited if the Candidate gets less than one-sixth of the total number of votes polled.

S. 159 states that the staff of every local authority must be made available for election work.

S. 160 empowers the State Government to requisition the premises or vehicles, etc. for election purposes. Detail rules about requisitioning are laid down.

S. 161 states that compensation will be paid whenever the State Government have requisitioned premises or vehicles, etc. The Section also lays down detail rules in this behalf.

S. 162. The State Government has power to obtain information for the sake of requisitioning.

S. 163 empowers State Governments to enter into and inspect any premises.

S. 164 authorises the Government to evict persons from requisitioned premises.

S. 165 states rules as regards release of premises from requisition.

S. 166 lays down that State Government may delegate the function of requisitioning to any officer.

S. 167 mentions penalty for contravention of any order regarding requisitioning.

S. 168 lays down special provisions with respect to Rulers of former Indian States.

Part XI lays down general provisions.

S. 169 lays down that the Central Government may after consulting the Election Commission make rules for carrying out the purposes of this Act. The section mentions special topics with respect to which rules may be made.

S. 170 lays down that jurisdiction of the Civil Courts is barred.

S. 171 repeals the Indian Elections Offences and Inquiries Act, 1920.

Act 45. The Opium and Revenue Laws (Extension of Application) Amendment Act.—This Act amends the Opium and Revenue laws (Extension of Application) Act XXXIII of 1950. The amendment is of procedural importance.

Act 46. The Sea Customs and the Central Excises and Salt (Amendment) Act.—The Act seeks to amend the Sea Customs Act (Act VIII of 1878) and the Central Excises and Salt Act (Act I of 1944) in order to restore position authorising the levy of Customs duties and

Central Excise duties on all goods which are used for the purposes of trade or business carried on by or on behalf of the Government of a Part 'A' State or a Part 'B' State. Such a legislation was necessary in view of Article 289 of the Constitution.

S. 2 authorises the levy of Customs duties on goods of Governments.

S. 3 lays down the presumption as regards the date on which a vessel sails.

S. 6 authorises the levy of duty on Government goods also.

Act 47. The Punjab State Legislature (Delegation of Powers) Act.—By virtue of the proclamation issued by the President on the 20th June 1951 under Article 356 of the Constitution of India, the powers of the Legislature of the State of Punjab became exercisable by or under the authority of Parliament. Article 357 (1) (*a*) of the Constitution provides for Parliament enacting a law, conferring on the President the powers of the Legislature of the State and authorising him to delegate this, subject to such conditions as he may think fit to impose, to any other authority specified by him in that behalf. This Act seeks during the period of emergency to confer on the President the power of the Legislature of the State of Punjab.

S. 3 confers on the President the power of the Punjab State Legislature. Every Act of the President must be laid before Parliament which may modify it, if necessary.

Act 48. The Assam (Alteration of Boundaries) Act.—By Article 4 of the Indo-Bhutan Treaty of Friendship concluded on the 8th August 1949 and subsequently ratified, the Government of India undertook to cede to the Government of Bhutan a strip of territory measuring 32 : 81 square miles known as Dewangiri on the border of Kamrup district in the State of Assam. The territory had not been surveyed or demarcated and it could not therefore be handed over to Bhutan immediately. Under the provisions of Article 3 of the Constitution the implementation of that undertaking requires an Act of Parliament. The views of the State were ascertained and the legislative Assembly of the State of Assam had passed a resolution to that effect.

S. 2 alters the boundaries of Assam.

S. 3 amends the First Schedule to the Constitution of India. The Schedule to the Act gives details of the strip of land.

Act 49. The Employment of Children (Amendment) Act.—This Act amends the Employment of Children Act (Act XXVI of 1938) for certain purposes.

S. 4 lays down child under 15 will not work in any occupation connected with transport of passengers, etc. Sub-section 2 lays down further that if the child is under seventeenth year of age it must get rest for at least twelve consecutive hours.

S. 5 refers to maintenance of register showing the names and dates of birth of every employed child, the period of work and rest and the nature of work. S. 3E lays down rules about display of notice containing abstracts of section 3 and 4.

S. 6 lays down rules about penalty.

Act 50. The Government of Part 'C' States Act.—The Constitution of India does not lay details of the administrative machinery for Part 'C' States. It has left it to Parliament. Accordingly Parliament passed the law. This Act provides Legislative Assemblies, Council of Ministers and Council of Advisers for Part 'C' States.

Part I is preliminary.

S. 2 lays down interpretation of the various terms in the Act. Part II lays down details about Legislative Assemblies.

S. 3 states rules about constitution of Assemblies and their composition. It lays down that the composition of the Assemblies shall be as specified in the Schedule. As regards Sta es not mentioned in the Schedule, the section says, the President may specify about them, by order.

S. 4 lays down rules about delimitation of constituencies. The President has to determine delimitation in consultation with the Election Commission.

S. 5 states that the duration of Legislative Assemblies will be five years which period may be extended in case of emergency.

S. 6 provides for electoral rolls for Assembly constituencies.

S. 7 lays down qualification for membership of the Legislative Assembly.

S. 8 states that the provisions of Part I and Part III to XI of the Representation of the Peoples Act, 1951 shall apply in relation to the elections to the Legislative Assembly.

S. 10 provides for the Speaker, Deputy Speaker of the Assembly, and lays down rules about their election and tenure of office.

S. 11 lays down that the Speaker and the Deputy Speaker shall not preside while a resolution for his removal from office is under consideration.

S. 12 states that the Chief Commissioner has the right to address and send messages to the Assembly.

S. 13 lays down rights of the Chief Commissioner and Ministers as respects the Assembly.

S. 15 lays down rules about voting in Assembly and further states that an Assembly can function, notwithstanding vacancies and quorum.

S. 16 lays down rules about vacation of seats.

S. 17 lays down rules about disqualification for membership.

S. 19 lays down powers, privileges, etc. of members.

S. 20 provides for salaries and allowances of members.

S. 21 lays down extent of legislative power of the Assemblies. These items are mentioned under seven heads.

S. 22 lays down rules for removing inconsistency between laws made by Parliament and laws made by the Legislative Assembly of a State.

S. 23 states that sanction of the Chief Commissioner is required for certain legislative measures, such as the Constitution and organisation of the court of the Judicial Commissioner, State Public Service Commission, etc.

S. 24 lays down special provisions as to Financial Bills.

S. 25 mentions rules as regards lapsing of Bills.

S. 26 provides for assents to Bills.

S. 27 states that requirements as to sanction and recommendations are to be regarded as matters of procedure only.

S. 28 lays rules about the Annual Financial Statement. The statement shall show separately the charged expenditure from other expenditure.

S. 29 lays down procedure in Legislative Assembly with respect to estimates.

S. 30 provides for Appropriation Bills.

S. 31 lays down rules about supplementary, additional or excess grants.

S. 34 states that no discussion shall take place in the Assembly with respect to the conduct of any Judicial Commissioner or any Judge of the Supreme Court or of a High Court.

S. 35 states that Courts shall not inquire into proceedings of the Legislative Assembly.

S. 36 states that there shall be a Council of Ministers in each State with the Chief Minister at the head to aid and advise the Chief Commissioner in the exercise of his functions. In case of difference of opinion, the Chief Commissioner shall refer the matter to the President and act according to his decision. In case of New Delhi the Chief Commissioner's decision shall be final. The Chief Commissioner shall preside at the meeting of the Council of Ministers.

S. 37 lays down other provisions as to Ministers, such as the Council of Ministers shall be collectively responsible to the Legislative Assembly of the State.

S. 39 lays down that there shall be a Consolidated Fund of a State and all revenue received shall be deposited in the Fund. The custody of the Consolidated Fund of a State, the payment of moneys into such Fund, the withdrawal of moneys therefrom and all other matters connected with or ancillary to these matters shall be regulated by rules made by the Chief Commissioner with the approval of the President.

S. 40 states that the Chief Commissioner and the Ministers shall be under the general control of the President.

S. 41 lays down provisions in case of failure of constitutional machinery.

S. 42 provides for constitution of Council of Advisers in case of the States of Kutch, Manipur and Tripura.

S. 43 empowers the President to take any step to remove difficulties.

S. 44 states that the enactments specified in the Fifth Schedule are amended to the extent as in the manner mentioned therein.

Act 51. The Tariff Commission Act.—The Tariff Board came into existence in November 1945 and sanction to its extention existed up to the 2nd May 1951. The Act replaces the Board by a permanent statutory Tariff Commission.

Chapter I is preliminary.

S. 3 lays down constitution of the Tariff Commission and appointment of Chairman thereof. The Commission shall consist of not less than three members and not exceeding five. The members shall be whole-time members. The Chairman shall be appointed by the Central Government.

S. 4 lays down qualification for membership of the Commission. The members must be men of ability, integrity, etc.

S. 5 mentions disqualifications. No member of legislature can be appointed as a member of the Commission.

S. 6 lays down conditions of service of members of the Commission. A member of the Commission ceasing to hold office as such shall not hold any appointment in any private industry or undertaking for a period of three years from ceasing to hold office save with the consent of the Central Government.

S. 7 empowers the Central Government to remove members from office in certain cases. The removal shall be reported to Parliament as soon as possible.

S. 8 lays down rules as regards appointment of officers and other employees of the Commission.

S. 9 states that the Commission may hold sitting in any part of India.

S. 10 states that vacancy in the Commission shall not invalidate the proceedings.

S. 11 states that matters relating to protection of industries will be generally referred to the Commission. Such matters may include, increase or decrease in Custom duties, charging unnecessarily high prices for goods, etc.

S. 12. The Central Government may also refer to the Commission any matter relating to the effect of protection on the general level of prices in the country, the effect of tariff concessions, under trade or commercial agreements on the development of any specified industry, etc.

S. 13. The Commission has power to make inquiries *suo motu*.

S. 144 refers to contribution to welfare fund and clause 8 lays down rules as regards matters relating to terms and conditions of service not covered by other clauses.

S. 146 lays down rules as regards persons who are to make appointments under the Act. S. 29A lays down rules for disposal of fines realised under section 29.

S. 147 lays down under what circumstances sanction of the Central Government is necessary for making orders under sections 27 or 28 of the Act.

S. 150 lays down that the Board will have powers as Conservator of Port or as body appointed under section 36 of the Indian Ports Act, 1908.

S. 153 empowers the Board to levy concessional rate of charges on coastal cargo.

S. 155 lays down that moneys received by the Board as Conservator of Port or as body appointed under section 36 of the Indian Ports Act shall be deemed to be the income of the Board.

S. 156 refers to disposal of goods not removed from the premises of the Board within time limited. Such goods may be sold by public auction. The Central Government may exempt any goods from the operation of this Section.

S. 158 refers to the right of survivors of first or several payees of securities. Law laid down by section 45 of Indian Contract Act is modified. S. 64B lays down that one of the two or more joint holders has power to grant receipts. S. 64C states that endorsement must be made on the security itself. S. 64D lays down that endorser of security is not liable for the amount thereof. S. 64E lays down rules about impression of signature on securities. S. 64F provides that the Board may issue duplicate securities in case of loss or theft or destruction of any Port Trust security. S. 64G refers to the issue of converted, etc. securities. S. 64H lays down that the Board shall be discharged from all liability in respect of certain securities, notwithstanding anything in section 10 of Indian Limitation Act. S. 64L states that the Board has power to make rules on certain matters. The matters are mentioned in detail. However this power to make rules is subject to certain conditions. S. 64J states that no claim shall lie against the trustees of sinking fund in respect of any security issued by the Board after the lapse of six years from the date on which demand could have been made.

S. 162 empowers the Board to borrow by means of temporary overdraft or otherwise by pledging the securities. Limitations on this power are also stated.

S. 165 authorises the Board to invest in its own securities. Detailed rules about such investment are stated. S. 74C empowers the Board to transfer moneys from the general account to the pilotage account and *vice-versa*.

S. 168 refers to the powers of Chairman as to the execution of works, the cost of which does not exceed five thousand rupees.

S. 169 repeals sections 77 and 78 of the Act.

S. 171 lays down that the Board has to remedy defects and irregularities pointed out in the audit report and the Central Government to pass final orders.

S. 174 refers to re-appropriation of amounts in estimate. S. 86B lays down that the Board shall submit statements of its receipts and disbursements to the Central Government. S. 86C states that no expenditure above five thousand rupees to be incurred unless sanctioned in the estimate. If any sum exceeding five thousand rupees is expended in emergency, the circumstances shall be forthwith reported to the Central Government.

S. 176 lays down that the Chairman has power to enter into contract whereof the value or amount shall not exceed five thousand rupees.

S. 178 refers to writing off of losses. The Board may sanction writing off with the previous sanction of the Central Government.

S. 180 repeals sections 93 and 94 of the Act.

S. 181 refers to the rules about approval and publication of bye-laws.

S. 182 lays down that the persons employed under this Act shall be public servants for certain purposes.

S. 184 lays down that certain provisions of the Act shall apply in relation to all aircraft making use of the Port while on water.

S. 185 lays down that the Board has power to evict certain persons from the premises of the Board. The word 'premises' is explained in detail. The section further lays down that police help may be obtained to evict a person who fails to comply with the orders. S. 111B states that the Board shall submit to the Central Government a detailed report of the administration of the Board.

S. 187 empowers the Central Government to supersede the Board for such period, not exceeding six months at a time. Before issuing such a notification the Central Government shall give reasonable time to the Board to show cause why the Board should not be superseded. The consequences of publication of such a notification are also mentioned, and also as to what would happen on the expiration of the period of supersession.

S. 191 lays down that all fees charged for pilotage etc. shall be credited to a distinct account to be called pilotage account of the Port. Sub-section 5-b mentions the purposes for which the sum so credited to the pilotage account may be applied.

S. 192 lays down that certain provisions of this Act are applicable to air-craft.

S. 193 lays down that pilotage fees and fines are penalties levied under the Act shall be accounted for and expended by the Commissioners in accordance with the provisions of section 36 of the Indian Ports Act.

S. 194 repeals section 8 of the Act.

S. 196 lays down that certain provisions of the Bengal Act III of 1890 are incorporated in the Act subject to a few modifications.

Act 36. The Delhi Laws (Amendment) Act.—The Act is a short one. It amends the Delhi Laws Act of 1915.

S. 2 lays down that on and from the day on which the United Provinces Tenancy Act, 1939 is extended by notification to the territory specified in schedule I to the Delhi Laws Act, the Agra Tenancy Act, 1901 shall in its application to the territory so specified stand repealed and schedule III of the said Act shall stand amended as shown in the present Act.

Act 37. The Constitution (First Amendment) Act.—During the fifteen months of the working of the Constitution certain difficulties were brought to light by judicial decisions and pronouncements specially in regard to the Chapter on fundamental rights. The citizen's right to freedom of speech and expression guaranteed by article 19 (1) (*a*) had been held by some courts to be so comprehensive as not to render a person culpable even if he advocated murder and other crimes of violence. The validity of agrarian reform measures passed by the State Legislatures had formed the subject matter of dilatory litigation inspite of the provision of clauses (4) and (6) of article 31. As a result of this implementation of these important measures had been held up. The Act therefore amends article 19 for the purpose mentioned above and inserts provisions fully securing the constitutional validity of zamindari abolition laws. The Act also suitably amends article 15 (3) in order that any special provision that the State may make for the educational, economic or social advancement of any backward class of citizens may not be challenged on the ground of being discriminating.

S. 2 entitles a State to make any special provision for the advancement of any socially and educationally backward classes of citizens, etc.

S. 3. The State can lay down by law reasonable restriction in the interest of friendly relations with foreign States or in relation to incitement to an offence. Sub-clause (*b*) of clause 6 is also amended. The amendment enables the State legislatures to pass any scheme of nationalisation.

S. 4 saves laws providing for acquisition of estates. The article lays down definitions of 'estate' and rights. Acquisition of property even without payment of compensation is legalised by this article.

S. 5 validates certain Acts and regulations mentioned in the ninth schedule, even if these Acts had been declared void by Courts.

S. 6 refers to sessions of Parliament, prorogation and dissolution.

S. 8 refers to sessions of the State Legislature, prorogation and dissolution.

S. 14 contains 11 Acts and 2 regulations of the Hyderabad Government. This schedule is to be read along with article 31B.

Act 38. The Scheduled Areas (Assimilation of Laws) Act.—This Act assimilates certain laws in force in the scheduled areas to the laws, in force in the districts of Darrang and Lakhimpur of the State of Assam.

S. 4 provides for transitional provision.

S. 5 refers to savings of laws.

S. 6 makes provision for removal of difficulties.

The schedule to Act specifies the scheduled areas. The schedule contains three long paragraphs.

Act 39. The Indian Boilers (Amendment) Act.—The Act exempts the Armed Forces from the operation of the Indian Boilers Act, 1923. This is necessary because the Armed Forces may be required to use at a very short notice various types of latest boilers manufactured abroad.

S. 2 exempts the boilers of the Armed Forces.

Act 40. The Marking of Heavy Packages Act.—This Act gives effect to the International Convention drawn up in Geneva on the 30th day of May 1929 for the marking of weight on heavy packages transported by sea or inland water-ways.

S. 3 casts obligation on every concerned person to make weight on heavy packages.

S. 4 states the penalty. The fines may extend to five hundred rupees.

S. 5. The Centra Government has power to make rules under this Act.

Act 41. The Industrial Disputes (Amendment and Temporary Provisions) Act.—This Act amends the Industrial Disputes Act of 1947 and makes certain temporary provisions relating to pay and allowances of certain workmen.

S. 3 deals with the composition of the Tribunal.

S. 4 lays down rules for filling of vacancies occurring in the office of the Chairman or any other member of the Board or Tribunal.

S. 5 states that a settlement or an award shall not be invalid by reason only of the casual and unforeseen absence of any of the members of the Board or Chairman, provided other technicalities have been observed.

S. 7 lays down temporary provisions relating to scales of pay, etc. of workmen in banking companies. It prohibits the employer in relation to any banking company, from altering to the prejudice of workmen the scale of pay or rate of allowances or from recovering from any such workmen any amount already paid to him. The explanation to section 14, explains the meaning of the term "allowances." It is also laid down that retrospective adjustments may be made.

S. 8. Any money due from an employer under the provisions of section 7 may be recovered in the same manner as an arrear of land revenue, etc.

Act 42. The Rajghat Samadhi Act.—The object of this Act is to ensure the proper maintenance, preservation and administration of the Rajghat Samadhi the shrine built in memory of Mahatma Gandhi. A statutory Committee is set up because an *Ad hoc* Committee depends too much upon personal factors and in a crisis the responsibility devolves upon Magistracy and the police.

S. 3 lays down the powers of the Rajghat Samadhi Committee.

S. 4 states the composition of the Committee. It will consist of the President of the local Municipal Committee, three officials and the non-officials nominated by the Central Government, two members of Parliament renominated by the Speaker.

S. 5 lays down powers and duties of the Committee. It shall administer the affairs of the Samadhi, organise and regulate periodical functions at the Samadhi, etc.

S. 6. The Central Government has power to make rules to carry out the object of the Act.

S. 7. The Committee has power to make bye-laws.

S. 8. No Act or proceeding of the Committee shall be deemed to be invalid merely by reason of any vacancy in it.

The Schedule to the Act lays down the extent of the Samadhi area.

Act 43. The Indian Merchant Shipping (Amendment) Act.—This Act makes a few amendments in the Indian Merchant Shipping Act of 1923. They are with reference to Medical examination of Seamen.

S. 2 lays down that no person shall engage any seaman to work unless the seaman is in possession of a certificate to the effect that he is physically fit to be employed in that capacity. The Central Government is empowered to make rules in this behalf. S. 26B lays down qualifications for seamen.

Act 44. The Representation of the Peoples Act.—This Act provides for the conduct of elections to the Houses of Parliament and to the House or Houses of the Legislature of each State, the qualifications and disqualifications for membership of those houses, the corrupt and illegal practices and other offences at or in connection with such elections and the decisions of doubts and disputes arising out of or in connection with such elections.

S. 3 lays down qualifications for membership of the Council of States.

S. 4 states qualifications for membership of the House of the People.

S. 5 states qualifications for membership of a Legislative Assembly.

S. 6 lays down qualifications for membership of a Legislative Council.

S. 7 mentions disqualifications for membership of Parliament or of a State Legislature.

S. 8 refers to savings and is a kind of exception to section 7. It mentions circumstances under which the disqualifications laid down in section 7 will not work.

S. 10 lays down qualifications for membership of electrol colleges for certain Part 'C' States.

S. 12 lays down rules for the purpose of filling the seats of members retiring on their respective terms of office in every second year after the constitution of the Council of States.

S. 18 provides for filling the seats of members retiring on the expiration of their respective terms of office in every second year after the constitution of the Legislative Council of a State.

S. 23 lays down that references to Returning Officers in this Act shall be deemed to include Assistant Returning Officers unless otherwise meant.

S. 24 states the general duty of Returning Officer.

S. 28 mentions the duties of a polling officer.

S. 29 mentions special provisions in case of certain elections such as an election to the Legislative Council.

S. 31. The Returning Officer shall give public notice of the intended election.

S. 32 lays down rules for nomination of candidates for election.

S. 33 lays down rules as regards presentation of nomination paper and requirements for a valid nomination. Every nomination paper must be proposed and seconded. Every nomination paper must be accompanied by a declaration as regards appointment of his agent for election. In case of a candidate belonging to the Scheduled Caste or the Scheduled Tribes, the nomination paper must be accompanied by a declaration to that effect. The section also lays down the procedure to be followed by the Returning Officer on the presentation of the nomination paper.

S. 34. A deposit of Rs. 500 must be deposited in case of election to Parliament. The amount is Rs. 250 in case of election to the State legislature.

S. 35 lays down rules about notice of nominations and the time and place for their scrutiny.

S. 36 states in detail the rules for scrutiny of nominations. The grounds for rejection of nominations are laid down. No nomination shall be rejected on a technical defect not of substantial character. The Returning Officer has to endorse on each nomination paper his decision.

S. 37. Rules about withdrawal of candidature are mentioned.

S. 38. The Returning Officer shall publish a list of valid nominations.

S. 39. Rules about nomination of candidates at other elections, such as an election to fill a seat in the Council of States, etc. are laid down.

S. 40. An election agent shall be appointed by each candidate.

S. 41. Persons disqualified under section 145 cannot be election agents.

S. 42. Rules about revocation of the appointment of an election agent are laid down. The section also states what happens in case the election agent dies.

S. 43. If no new election agent is appointed the candidate shall be deemed to have been appointed an election agent.

S. 44. The election agent must keep accounts.

S. 46 states that a candidate may appoint polling agents. Notice of appointment must be given to the prescribed authority.

S. 47. A candidate may appoint counting agents.

S. 48 states what happens on revocation of the appointment or death of a polling agent or counting agent.

S. 49 lays down functions of polling agents and counting agents.

S. 50 states rules about attendance of a candidate or his election agent at polling stations and performance by him of the functions of a polling agent or counting agent.

S. 51 non-attendance of a polling agent or a counting agents will not invalidate any act which is otherwise valid. Chapter III lays down general procedure at elections.

S. 52. If a candidate dies before the poll the Returning Officer shall countermand the poll and report the matter to the Election Commission.

S. 53 lays down procedure to be followed in contested and uncontested elections.

S. 54 lays down special procedure to be adopted at elections in constituencies where seats are reserved for Scheduled Castes or Scheduled Tribes.

S. 55 lays down that members of the Scheduled Castes or Scheduled Tribes are eligible to hold seats even if they are not reserved for them.

S. 57. If the poll is interrupted or obstructed by any riot or open violence, the presiding officer is authorised to adjourn the poll. Such adjournment must be reported to the Election Commission.

S. 58 states that if ballot boxes are destroyed or tampered with, the election shall be void and fresh poll will be taken.

S. 59 states the manner of voting at elections.

S. 60 lays down special procedure for voting by members of the Armed Forces; Government employees outside India and persons subjected to preventive detention.

S. 61. Provision may be made by rules for making with indelible ink of the thumbs for preventing personation of elections.

S. 62. Every qualified person whose name is entered on the electoral roll is entitled to vote. However, a convict cannot vote.

S. 63. Methods of voting in plural constituency and single member constituency are laid down.

S. 64 votes shall be counted under the supervision of the Returning Officer.

S. 65. In case of equality of votes, lot will be drawn.

S. 66. On the completion of the counting the Returning Officer shall forthwith declare the results.

S. 67. Results shall be reported to the Election Commission and the Appropriate authority which will publish them in the official Gazette.

S. 68 lays down rules as regards vacation of seats if a person is elected to both Houses of Parliament. If he does not intimate his choice, his seat in the Council of State shall become vacant.

S. 69 states rules as regards vacation of seats if persons already members of one House is elected to the other House of Parliament.

S. 70 states that if a person is elected to more than one seat, then unless within the prescribed period, he resigns all but one of the seats, all the seats shall become vacant.

Chapter VII deals with publication of election results and nominations.

S. 76. A return of the election expenses must be lodged with the Returning Officer within the prescribed time. The return must be in the prescribed form and must be signed either by the Candidate or his agent.

S. 77 states that maximum election expenses may be prescribed by rules.

S. 78. The provisions of this Chapter shall not apply to an election to the Council of States or to Legislative Councils of States in certain cases.

S. 80 takes away all election disputes from the jurisdiction of ordinary Courts.

S. 81. An election petition may be presented to the Election Commission challenging the election of any candidate.

S. 82. All candidates who were duly nominated must be made respondents in the petition.

S. 83 lays down contents of petition. It must contain details of corrupt or illegal practices alleged by the petitioner. Permission may be given by the Tribunal to amend the petition.

S. 84. The petitioner may claim any one of the declarations mentioned in the section.

S. 85. The petition shall be dismissed if the provisions of sections 81, 83 or 117 are not complied with. Proviso to the section lays down that failure may be condoned by the Commission.

Chapter III lays down rules for trial of election petitions.

S. 86. An election Tribunal shall be appointed for the trial. Such a Tribunal shall consist of a Chairman and two other members. A person

S. 14 lays down the principles to be taken into account in making any inquiry under section 11. The section lays down all possible details.

S. 15 mentions duties of the Commission. The Commission shall investigate into the manner in which protection in relation to any industry has been working, unto any special conditions that may have been imposed on a protected industry, etc. and make a report thereon to the Central Government.

S. 16. The Government may take such action on report as it considers fit.

S. 18 lays down that assessors may be appointed to help the Commission in discharge of its functions.

S. 20 states the powers of the Commission for the purposes of conducting any inquiry. It shall have the powers of a Civil Court in respect of the summoning and enforcing the attendance of any person, receiving evidence, requisitioning any public record from any office, etc. Any proceeding before the Commission shall be deemed to be judicial proceeding.

S. 21. No statement made by a person before the Commission while giving evidence shall be used against him.

S. 22 lays down that no information relating to industry shall be disclosed by the Commission without the previous consent in writing of the owner of the industry. Such information however can be used for legal proceedings.

S. 23 extends protection to every action taken in good faith.

Act 52. The Railway Companies (Emergency Provisions) Act.—Though major Railways in India were under the control of the Government, a few narrow-gauge light Railways were being managed by private companies. The Government had no power to ensure that day today administration of the Railways by the companies was in best interest of the public. Many complaints were taken to the Government against these companies. Hence it became imperative for the Government to take powers to intervene in cases where in the opinion of the Government a situation has arisen in the affairs of a Railway Company which prejudicially affects the convenience of the persons using Railways. An ordinance entitled the Railway Companies (Emergency Provisions) Ordinance 1951 was promulgated on the 14th July 1951. The present Act replaces the ordinance and places it on statute book as permanent legislative measure.

S. 3 empowers the Central Government to apply this Act to any Railway Company and appoint directors thereof.

S. 4 states the effects of notified order appointing directors or managing agents. Such an order results in vacation of offices by the old directors. Any contract of management shall be deemed to have terminated.

S. 5 states powers and duties of directors. The directors can delegate their powers to the Chairman of the Board of Directors. The directors may raise funds, etc.

S. 6 states that on the issue of a notified order the person or persons holding office as a director of the Company must make and submit a statement of affairs to the new directors. Failure to do so is made punishable.

S. 7 lays down that beneficial owners of shares in the Railway Company must submit a statement of his interest in the share.

S. 8 empowers the new directors of the Company to institute proceedings against past directors for damages, etc.

S. 10 provides for filling up of vacancies among directors.

S. 11 states that no managing agent shall be entitled to compensation for termination of contract of managing agent or any other agent.

S. 12. The Central Government may cancel the appointment of new directors at any time or reconstitute by fresh appointment a new body of directors.

S. 13 lays down the extent to which the Companies Act shall not be applicable to a Railway Company with respect to which a notification has been issued.

S. 15 states that directors appointed under this Act shall be public servants within the meaning of section 21 of Indian Penal Code.

S. 16 authorises delegation of powers.

S. 17 protects every director for action taken under this Act.

S. 18 empowers the Central Government to acquire Railway or Railways under certain circumstances.

S. 19. The Central Government has power to make rules under the Act.

S. 20 repeals the Ordinance II of 1951. Proviso to the section saves certain actions already taken.

Act 53. The Indian Companies (Amendment) Act.—Trafficking in managing agency rights and cornering of shares in the open market with a view to acquiring control over the management of well-established and reputable companies for anti-social purposes had reached such proportions as to make it necessary for the Government to take immediate steps to check the evils arising therefrom. The Government of India appointed an Expert Committee to make recommendations on the amendments to be made in the Company law. Before the committee could submit its report, the Government of India found that malpractices had become very serious. Hence an Ordinance III of 1951 was promulgated. The Act replaces the Ordinance.

S. 2 lays down restrictions on appointment, reappointment and number of managing directors and their remunerations. All actions concerning these shall be void after the 21st day of July unless approved by the Central Government.

S. 3 lays down restrictions on the extension of term of office of managing agents, such an extension must be approved by the Central Government.

S. 4 lays down that a transfer of office by the managing agent shall be void unless approved by the Central Government.

S. 5 lays down restrictions on the change in the constitution of managing agent. Such a change must be approved by the Central Government. Explanation to the section removes from the scope of this section immaterial changes in managing agencies.

S. 6 lays down restrictions on amendment of articles or agreement relating to appointment or remuneration of managing agents. The section prohibits the payment of excessive remuneration to the managing agents or managing directors.

S. 7 lays down alternative remedy to winding up in cases of mismanagement or oppression. S. 153C empowers the Court concerned to act when company acts in a prejudicial manner or oppresses any part of its members. The Central Government may make an application under the above mentioned circumstances. The section lays down detail rules as to when a member can make an application. When such an application is received by a Court, it may make such order as it thinks fit. The section further mentions in details the items for which provision may be made by the Court in the order. The provisions of this section are analogous to section 210 of the Companies Act, 1948 of the United Kingdom and affords sufficient safeguards against unnecessary harassment from individual shareholders. S. 153D states the effect of termination of managing agency agreement under S. 153C. No managing agent shall be entitled to claim damages or compensation.

S. 8 empowers the Central Government to appoint advisory commissions and to make rules in respect of certain matters. It shall be the duty of the Commission to inquire into and advise the Central Government on all applications made to the Central Government under sections 86J and 87AA, etc.

S. 9 repeals Ordinance III of 1951.

Act 54. The Employees State Insurance (Amendment) Act.—The Employees State Insurance Act, 1948 was to be implemented by stages. Many practical difficulties were felt in its implementation. The employers in Delhi and Kanpur and the Uttar Pradesh Government pointed out the difficulties. This Act minimises the contribution leviable from the employers and spreads the incidence of the cost of the scheme equitably. A few other minor amendments are also made.

S. 8 lays down rules as regards the membership of the Corporation, the Standing Committee etc. of the profession.

S. 12 lays down that employees must furnish return and maintain registers in certain cases.

S. 14 lays down daily rate.

S. 73A lays down rules about employer's special contribution. It will not exceed five per cent. of the total wage bill. That will be fixed by the Central Government. It further lays down that the employer's special contribution shall fall due as soon as the liability of the employer to pay wages accrues.

S. 73B special tribunals shall be constituted for decision of disputes or questions under the Chapter where there is no employer's Insurance Court.

S. 73C. Benefits under Chapter V will depend upon employees' contribution.

S. 73D lays down the mode of recovery of employee's special contribution.

S. 73E. The Corporation has got power to call for additional information or return, for the purpose of determining whether the employee's special contribution is payable under the Act or not.

S. 73F lays down that the Central Government may exempt any factory or establishment from the payment of the employee's special contribution.

S. 73G lays down that certain provisions of the Act such as section 72, etc., will apply to employee's special contribution.

S. 73H. The Central Government is empowered to remove difficulties.

S. 73I. The Central Government may direct that provisions of the Chapter shall cease to have effect on such date as may be specified.

S. 24 lays down that the Corporation may delegate its powers to any officer or authority subordinate to it.

S. 25 lays down rules about submission of returns, etc.

S. 26 omits section 98 of the Act.

S. 27 refers to repeals and savings.

Act 55. The Companies (Donations to National Funds) Act.—Certain Chambers of Commerce wanted to make donations to the Sardar Vallabhbhai National Memorial Fund. But there were legal difficulties, as the articles of association did not authorise such payments. This Act is passed to authorise such contributions, to make donations to Sardar Vallabhbhai National Memorial Fund. The donations can be made if the general body of the Companies have met at a special meeting and approved of making such gifts by passing an extra-ordinary resolution in the manner required by the Companies Act.

S. 3 empowers the Companies to make donations to National Funds by passing an extraordinary resolution.

S. 4 repeals the Gandhi National Memorial Fund Donation (Companies) Act, 1948.

Act 56. The Banaras Hindu University (Amendment) Act.—This Act amends the Banaras Hindu University Act of 1915.

S. 3 lays down that the University shall be open to persons of either sex and of whatever race, creed, caste or class. However, it does not take away the right to give religious instruction. S. 4A lays down powers of the University. They are described under 15 heads. S. 5 states that the President of India shall be the Visitor of the University. He shall have right to cause an inspection of the University. The executive Council must take action on whatever is reported after the inspection. In case it fails to do so, the President may issue such directions as he thinks fit. S. 6. The Governor of the State of Uttar Pradesh shall be the Chief Rector of the University. Provision may be made for appointments of additional Rectors.

S. 4 lays down the officers and authorities of the University. The officers of the University shall be, the Chancellor, the Pro-Chancellor, the Vice-Chancellor, the Pro-Vice-Chancellor, the Treasurer, the Registrar, the Deans of the Faculties, etc. The authorities shall be, the Court, the Executive Council, the Academic Council, the Standing Committee of the Academic Council, the Finance Committee and the Faculties, etc.

S. 8 refers to the Standing Committee of the Academic Council.

S. 9 lays down that the accounts of the University shall be audited by the Comptroller and Auditor-General of India.

S. 13 lays down the lists of items with reference to which statutes may be passed. It also substitutes sub-sections 3, 4 and 5. All these sub-sections lay down the procedure to be followed in passing statutes.

S. 14 mentions the items with respect to which ordinances may be framed. The ordinances may be amended, repealed or added to at any time by the executive council. Sub-sections 4, 5, 6, 7 and 8 of section 18 lay down detail rules about framing of the ordinances. S. 19 refers to the power to make regulations. Every authority of the University has power to make regulations. S. 19A lays down conditions of service of officers and teachers.

S. 15 lays down temporary provisions for amendments of Statutes.

S. 16 lays down transitional provisions.

Act 57. The Press (Objectionable Matter) Act.—The Provisions of this Act are directed against the encouragement of violence of sabotages and certain other very grave offences and against the publication of scurrilous matter. All existing laws that are against the provisions of the Fundamental Rights are specifically repealed. No pre-censorship will be enforced on any newspaper. No action will be taken in anticipation. Security will be demanded only when the freedom of Press is abused and forfeited only by an order of Judicial authority.

S. 1 lays down short title, extent and commencement. It further lays down that the Act shall remain in force for a period of two years from the date of its commencement.

S. 3 defines objectionable matter. The definition is given under six heads and is accompanied by three explanations. One explanation makes it clear that the intention of the keeper of the Press or the publisher shall not be taken into account.

S. 4 lays down that a Sessions Judge on making an inquiry may direct the keeper of the Press that has published objectionable matter, to deposit security within twenty-one days from the date of the order. The Sessions Judge may instead of demanding security record warning.

S. 5. The Sessions Judge, if satisfied can order forfeiture of security to the Government or direct the Press to deposit further security.

S. 6 mentions the consequences of failure to deposit security as required by the Sessions Judge. The declaration made by the keeper of the Press shall be cancelled and the Press shall not be able to print any document. If in contravention of this Order, the Press is used for printing purposes, any Magistrate may declare the press or any part thereof to be forfeited to the Government, after making an inquiry.

S. 7 lays down that a Sessions Judge may demand security from newspapers and newssheets in certain cases.

S. 8. A Sessions Judge may demand further security from the newspaper or forfeit the security of the newspaper, if he is satisfied that there are sufficient grounds, for making such an order.

S. 9 mentions consequences of failure to deposit security as required under section 7 or section 8. The declaration of the newspaper shall be deemed to be annulled and no press shall be used for the printing or publishing of such newspaper. In certain cases such a Press may be forfeited to the Government.

S. 10 lays down that the amount of security shall be fixed with due regard to the circumstances of the case.

S. 11 empowers Government to declare certain publications as forfeited. Such a declaration will be made after a certificate either from the Attorney-General or the Advocate-General of the State is obtained.

S. 12. The Chief Customs Officer may detain any package containing objectionable matter. A person wronged by such an action may apply to the State Government for review.

S. 13 lays down that certain matters such as forfeited newspaper, etc. cannot be transmitted by post. The post authorities are empowered to detain such matter.

S. 14 lays down that any police officer may seize any unauthorised newspaper or unauthorised news-sheet. Power of search is also given by the section.

S. 15 empowers a Magistrate to authorise any police officer to seize and forfeit undeclared presses producing unauthorised newspapers and unauthorised news-sheets. The section also lays down the procedure to be followed by the police officer and the Magistrate after such a seizure.

Chapter III lays down the procedure of inquiry before Sessions Judges.

S. 19 lays down the procedure to be followed in case the respondent does not appear.

S. 20 provides for jury. Jurors will be selected from amongst persons who have journalistic experience or experience in public affairs or who have connection with presses or newspapers.

S. 21. If the Sessions Judge disagrees with the Jury, he may submit the case to the High Court, recording the grounds for his opinion.

S. 22 lays down that previous and subsequent issues of the newspapers will be admitted in evidence.

S. 23 provides for appeal to High Court against orders of Sessions Judges.

S. 24 provides for an application to High Court against orders for forfeiture.

S. 25 mentions the procedure to be followed in High Court.

S. 26 lays down penalty for keeping press or publishing newspaper without making deposit.

S. 27 lays down penalty for disseminating unauthorised newspapers and unauthorised newssheets.

S. 28 lays down details about service of notices.

S. 29 provides for issue of search warrants in certain causes.

S. 30 lays down rules for conduct of searches.

S. 31. A case under this Act may be transferred from one Sessions Judge to another Sessions Judge.

S. 32 mentions cases when security may be returned.

S. 33 bars jurisdiction of other Courts.

S. 34 lays down a bar on double penalty.

S. 35. Offences under this Act are cognizable and bailable.

S. 37 repeals the Acts mentioned in the First Schedule. The section also repeals provisions contained in any of the Provincial or State Act, in so far as it imposes any restriction on the printing, publication or distribution of any newspaper, etc.

Act 58. The Punjab Appropriation Act.—This Act authorises payment and appropriation of certain sums from and out of the Consolidated Fund of the State of Punjab. It was introduced in Parliament because the administration of Punjab was taken over by the President and there was no legislature in the Punjab.

S. 2 authorises issue of Rs. 14,22,820 out of the Consolidated Fund of the State of Punjab for the year 1951-52.

S. 3 authorises appropriation of the sum mentioned above for the purposes expressed in the Schedule.

Act 59. The Appropriation (Railways) No. 4 Act.—This Act provides for the appropriation out of the Consolidated Fund of India of the moneys required to meet the supplementary Grants made by Parliament for expenditure of the Central Government or Railways for 1951-52.

S. 2 authorises issue of Rs. 8,64,22,000 out of the Consolidated Fund of India for the year 1951-52.

S. 3 authorises appropriation of the amount mentioned above for the purposes laid down in Schedules to the Act.

Act 60. The Delhi Premises (Requisition and Eviction) Amendment Act.—This Act amends the Delhi Premises (Requisition and Eviction) Act for certain purposes.

S. 2 inserts a new section 10A in the Act. It lays down that the competent authority may recover rent or damages in respect of public premises as arrears of land revenue.

Act 61. The Appropriation (No. 3) Act.—This Act authorises payment and appropriation of certain further sums from and out of the Consolidated Fund of India for the services of the year ending on the 31st day of March 1952.

S. 2 authorises the issue of Rs. 28,75,82,000 out of the Consolidated Fund of India for the year 1951-52.

S. 3 authorises the appropriation of the same amount for the services and purposes expressed in the Schedule.

Act 62. The All-India Services Act.—It was felt necessary that Parliament should provide statutory authority to enable the Government of India to carry on the day-to-day management of the two All-India Services, *i.e.*, the Indian Administrative Service and the Indian Police Service and to take and promulgate decisions on matters relating to the recruitment and the Conditions of Service from time to time. The present Act fills the constitutional lacuna without proceeding to incorporate any detail provisions.

S. 3 lays down that the Central Government after consultation with the Government of the States concerned may make rules for the regulation of recruitment and the conditions of service of persons appointed to an All-India Service. All such rules shall be placed before Parliament.

S. 4 continues the existing rules, as rules framed under this Act.

Act 63. The Aligarh Muslim University (Amendment) Act.—This Act amends the Aligarh Muslim University Act of 1920 with a view to giving effect to the recommendations made by the University Education Commission. It removes disqualification imposed on non-Muslims from being members of the Court of the University. It abolishes the provision for a Visiting Board.

S. 5 lays down that the University is open to all classes, castes and creeds. This however does not mean that religious instruction shall not be imparted.

S. 6 omits section 9 of the Act.

S. 7 lays down rules about teaching in the University.

S. 8 empowers the University to establish and maintain High Schools and other instituitons whose objects fall within the powers of the University.

S. 9 empowers the University to recognise colleges and institutions.

S. 10 empowers the Visitor to annul any proceeding of the University, which is not in conformity with the Act, the Statutes or the Ordinances.

S. 11 omits section 14 of the Act.

Act 64. The State Financial Corporations Act.—This Act provides for the establishment of State Financial Corporations.

S. 3. The State Government may establish a Financial Corporation which shall be a Corporate body.

S. 4 lays rules about issue of shares and who can be shareholders. The authorised capital cannot be less than fifty lakhs of rupees and more than five crores of rupees. Unsubscribed shares shall be subscribed by the State Government.

S. 5 lays down restrictions on transfer of shares.

S. 6 states that the shares shall be guaranteed by the State Government and shall be deemed to be approved securities.

S. 7. The Financial Corporation may raise additional capital by issue and sale of bonds and debentures. These shall also be guaranteed by the State Government.

S. 8. The Financial Corporation may accept deposits.

S. 9. The Management of Financial Corporation shall vest in a Board of Directors which will be assisted by an Executive Committee.

S. 10 lays down the composition of the Board of Directors.

S. 11 lays down the rules for the term of office and retirement of directors.

S. 12 mentions the disqualifications for being a director.

S. 13 states that the State Government may remove a director from his office under certain circumstances.

S. 14 lays down rules about resignation by a director and the method of filling up casual vacancies.

S. 15 states that the Chairman of the Board shall be appointed by the State Government. He shall hold office for two years.

S. 16. Remuneration of directors shall be fixed by the State Government.

S. 17 provides for a managing director.

S. 18 lays down the composition of the Executive Committee.

S. 19 lays down rules about the meetings of the Board of Directors and the Executive Committee.

S. 20 states the powers of the Executive Committee.

S. 21. The Financial Corporation may appoint an Advisory Committee.

S. 22 lays down rules about offices and agencies.

S. 23. The Financial Corporation may appoint officers, advisors and employees, etc.

S. 24 states that the Board shall pay due regard to the interest of industry, commerce and general public.

S. 25 lays down a list of items in which the Corporation may transact business.

S. 26 states that the Corporation shall not enter into any arrangement with a single industrial concern for an amount exceeding ten lakhs of rupees.

S. 27. The Corporation may impose such conditions as it thinks necessary while accommodating any industrial concern.

S. 28 lays down that certain businesses such as granting loan on its own securities are prohibited.

S. 29 states the right of the Corporation in case of default. It can take over the industrial concern. Consequences of such taking over are mentioned in details.

S. 30 states that the Corporation has power to call for repayment before the agreed period.

S. 31 makes special provisions for enforcement of claims by Financial Corporation. A property authorised officer may apply to the District Judge for appropriate relief in case there is any breach of agreement on the part of the Industrial concern.

S. 32 lays down the procedure which the District Judge has to follow when any application is made to him under section 31. Elaborate rules are provided for this.

S. 33 states that every Financial Corporation shall have its own fund.

S. 34. The Fund may be deposited in Government securities.

S. 35 lays down that a reserve fund shall be established. It may declare a dividend the rate of which shall not exceed five per cent per annum.

S. 36 provides for annual general meeting of all the shareholders who will be entitled to discuss the annual accounts, the report of the Board, etc.

S. 37 provides for audit of the accounts of the Corporation. The auditors shall be appointed by the State Government. Detail rules about auditing are laid down. A copy of every report of the Auditors shall be sent to the Comptroller and Auditor-General of India.

S. 38 lays down rules about returns of assets and liabilities of the Corporation and other items.

S. 39 empowers the State Government to give instructions to the Board in discharge of its functions.

S. 40. Every director shall make a declaration of fidelity and secrecy before entering upon the office.

S. 41 provides for indemnity of the directors against all losses and expenses incurred by him in discharge of his duties.

S. 42 lays down a list of offences under the Act.

S. 43. The Financial Corporation shall be liable to pay income-tax and super tax with some exceptions.

S. 44 states that the Financial Corporation shall be a bank for the purposes of the Bankers Books Evidence Act of 1891.

S. 45. Financial Corporation can be liquidated only by an order of the State Government.

S. 46 empowers the Central Government to apply the provisions of this Act to certain other financial institutions.

S. 47 empowers the State Government to make rules under this Act.

S. 48 empowers the Board to make regulations. A list of the items with respect to which regulations may be made is laid down. The Schedule to the Act gives the form of declaration of fidelity and secrecy.

Act 65. The Evacuee Interest (Separation) Act.—This Act makes special provisions for the separation of the interests of evacuees from those of other persons in property in which such other persons are also interested. Such a provision was necessary for the following reason. The Custodian of India declared the interest of Evacuees in immovable property as evacuee property under the Administration of Evacuee Property Act, 1950, where such evacuee interest was found to be intermixed with non-evacuee interest in one and the same property, it became difficult to determine the exact property or value thereof which vests in the Custodian. This act provides an expeditious method for assessment and separation of evacuee and non-evacuee interests in such property. As some of the provisions relate to certain matters in the State List, the Parliament was empowered in this behalf in pursuance of a Resolution passed under Article 249 of the Constitution. Chapter I is preliminary.

S. 3. The provisions of the Act will override other laws, save or otherwise expressly provided.

Chapter II lays down provisions for separation of evacuee interest in Custodian Property.

S. 4 empowers the State Government to appoint competent officers with the permission of the Central Government.

S. 5 lays down jurisdiction of competent officers.

S. 6. Any competent officer may issue a general notice requiring all persons who claim interest in such property to submit claims, if any, in respect of such evacuee property.

S. 7 states that claims ought to be submitted within sixty days from the date of the issue of the notice. It further lays down that the statement of the claims will be drawn up in the form of pleadings. The details are also mentioned in the section. The claims must be accompanied by true copies of all relevant documents.

S. 8 lays down that the competent officer after holding an inquiry shall pass an order determining the interest in the property of the claimant. If the claim has been decided earlier by the Custodian, the decision shall be binding on the competent officer. The competent officer shall decide the dispute even if it is with respect to mortgage of the property.

S. 9 mentions certain reliefs in respect of mortgaged property of evacuees. The rate of interest cannot be more than five per cent.

S. 10 states that the competent officer may take all such measures as necessary for the purpose of separating the interest of the evacuees from those of the claimant in any composite property. The section lays down various alternatives open to the competent officer in this behalf. The competent officer may partition or sell the property if he thinks it necessary to do so.

S. 11 lays down that the evacuee interest in the property, thus separated under section 10 when vested in the Custodian shall be free from all encumbrances and liabilities and any payment made shall be a full and valid discharge of all claims in respect of that property.

S. 12 states that rights of claimants *inter se* and by other persons against claimants will not be affected by any provision of this Chapter.

S. 13 empowers the State Government to appoint with the approval of the Central Government appellate officers.

S. 14 lays down the period of limitation for preferring an appeal. It is thirty days.

S. 15 gives power of revision to the appellate officers.

S. 17 lays down powers and procedure of competent officers and appellate officers.

S. 18 orders passed by either the competent officer or appellate officer shall be final.

S. 19. The Central Government may transfer a case or an appeal from one officer to another officer.

S. 20 lays down that jurisdiction of civil courts is barred in certain matters such as a claim to composite property.

S. 22 protects the officers from action taken in good faith.

S. 23. The Central Government has power to make rules to carry out the purposes of the Act. The section also mentions the items with respect to which in particular the rules may be made.

Act 66. The Industries (Development and Regulation) Act.—This Act provides for the development and regulation of certain Industries. While enacting the Bill, the Parliament took into consideration the views of the industrialists and the representatives of labour and also of the Planning Commission. The view of the Planning Commission that the Development Councils on the lines envisaged in the British Industrial Organisation and Development Act 1947, should be established has been accepted. The suggestion that there should be a full-time statutory Central Industries Board was not accepted.

S. 2 declares that it is expedient in the public interest that the Union should take under its control the industries specified in the First Schedule.

S. 4 saves certain industries from the application of this Act.

S. 5 provides for the establishment and constitution of Central Advisory Council and lays down its functions. The Council shall consist of a Chairman and members not exceeding thirty in number. The Council will advise the Central Government on matters concerning the development and regulation of scheduled industries.

S. 6 provides for the establishment and constitution of Development councils and lays down their functions. The Central Government may establish for any industry Development Council. It will also lay down the manner of appointing the members, their functions and the procedure they have to follow in discharge of their functions. Every Development Council shall be a corporate body. The functions of the Development Council are mentioned in the second Schedule. The section also lays down the qualification for being member of the Development Council.

S. 7 provides for reports and accounts of Development Councils. There will be an annual report to the Central Government. The accounts of the Council shall be audited and a copy of the Report and of the audited accounts shall be laid before Parliament.

S. 8 provides for dissolution of Development Councils. The Central Government may dissolve Development Councils. On such dissolutions the assets of the Council shall vest in the Government.

S. 9 authorises the Central Government to impose cess on Scheduled industries, but the rate of the cess cannot exceed two annas per cent of the value of the goods. The cess collected by the Government may be handed over to the Development Council, established for that industry. The section also lays down the purposes for which the proceeds may be utilised by the Council.

S. 10 lays down that the owner of every industrial undertaking shall register the undertaking in the prescribed manner.

S. 11. No new industry can be established except under and in accordance with a licence issued by the Central Government.

S. 12 states that the licences may be revoked by the Central Government under certain circumstances. A licence may be amended or varied if necessary.

S. 13 states that provisions of sections 11 and 12 shall apply in relation to the effecting of any substantial expansion of an industrial undertaking.

S. 14 lays down the procedure for the grant of licence or permission.

S. 15 empowers the Central Government to cause investigation to be made into scheduled industries or industrial undertakings, under certain circumstances.

S. 16 lays down the powers of the Central Government on completion of investigation under section 15. These powers include regulating the production, controlling the prices, etc.

S. 17 lays down that in certain cases the Central Government may take the direct control of industries. If the industry fails to carry out the directions of the Government, the Government may authorise the Development Council or any other body of persons to take over the management of the industry. The section further lays down the duties of the authorised person after taking over the industry. The order may be cancelled by the Central Government.

S. 18 empowers the authorised person to call for assistance in any investigation, persons possessing special knowledge.

Chapter IV contains miscellaneous provisions.

S. 19 lays down that the Central Government may authorise any person to enter and inspect any premises etc. for ascertaining the position and working of any industrial undertaking. Such an authorised person shall be deemed to be a public servant within the meaning of section 20 of the Indian Penal Code.

S. 20 lays down general prohibition of taking over and management of control of industrial undertakings under any other law except this Act.

S. 21 lays down that certain administrative expenses of Development Councils are to be paid from moneys provided by Parliament.

S. 22 empowers the Central Government to issue directions to Development Councils.

S. 23 lays down that the questions relating to amount of capital invested in an undertaking are to be decided by the Central Government.

S. 24 provides for penalties.

S. 25 empowers the Central Government to delegate the functions and powers to any person.

S. 26 lays down that no prosecution for any offence punishable under section 24 shall be instituted except with the previous sanction of the Central Government.

S. 27 states that no court inferior to that of a first class Magistrate shall try any offence punishable under section 24.

S. 28 empowers the Central Government to exempt any industry from the operation of all or any of the provisions of this Act.

S. 29 protects every person for action taken in good faith.

S. 30 authorises the Central Government to make rules for carrying out the purposes of this Act. The section mentions in detail the items with respect to which rules should be made.

S. 31 states that the provisions of the Act shall be in addition to and not, save as otherwise expressly provided in this Act, in derogation of any other Central Act for the time being in force, relating to any of the scheduled industries.

Act 67. The Part 'C' States (Miscellaneous Laws) Repealing Act.—Section 2 of the Part 'C' States (Laws) Act, 1950 enables the Central Government to extend to any Part 'C' States (other than Coorg and the Andaman and Nicobar Islands) or to any part of such State any enactment which is in force in Part 'A' State with such restrictions and modifications as it thinks fit and provisions may be made in any enactment so extended for the repeal or the amendment of any corresponding law (other than a Central Act) which is for the time being applicable to that Part 'C' State. The Government issued the notification. The Supreme Court on a reference made by the President under Article 143 of the Constitution has given the opinion that the Second portion of Section 2 of the Part 'C' States (Laws) Act, 1950, namely, "provision may be made in any enactment so extended for the repeal or amendment of any corresponding law (other than a Central Act) which is for the time being applicable to Part 'C' States" is *ultra vires*. The effect of the opinion is that all provisions made in the notifications extending the Acts for the repeal of the corresponding laws were likely to be invalid. This Act regularises the position by validating the various provisions relating to repeal of the corresponding law in force in Part 'C' States.

Act 68. The Representation of the People (Second Amendment) Act.—Under the Constitution of India, the Tribal Areas specified in Part 'B' of the Table appended to paragraph 20 of the Sixth Schedule thereto are comprised within the State of Assam but their administration is carried on by the President through the Governor of Assam as an agent. These areas have been accordingly taken out of the purview of clause (1) of article 81 and article 170 of the Constitution so far as Assam is concerned by the Constitution (Removal of Difficulties) Order No. VIII made by the President under article 392 of the Constitution. Clause (2) of article 81 and article 82 of the Constitution were also amended by said order so as to confer power on Parliament to provide for the representation of these areas in the House of the People. No provision was however made in the Representation of the People Act, 1950 for the representation of these areas in the House of the People. The present Act does that and also makes a few other changes.

S. 10 lays down that where a polling station has more than one polling booths and any such ballot box as aforesaid was used at one of such polling booths, the election to which such ballot box relates shall be void only in respect of the polling at the polling booth at which such box was used and no further.

Act 69. The Parliament Prevention of Disqualification Act.—Article 102(1) (*a*) of the Constitution of India lays down that a person shall be disqualified for being chosen as and for being a member of Parliament if he holds any office of profit under the Government of India or the Government of any State, other than an office declared by Parliament by law not to disqualify its holder. There were certain committees or boards set up by Government both before and after the commencement of the Constitution to which members of Parliament had been appointed and were in receipt of certain allowances and/or fees (like subsistence allowance, daily allowance and travelling allowances) in connection with their duties as members of such committees or boards. As it was felt that in these cases the question as to disqualification for membership of Parliament was not free from doubt, this Act makes provision to remove such disqualification retrospectively.

S. 2 lays down prevention of disqualification for membership of Parliament in certain cases. The Section mentions the offices of profit under Government, that shall not disqualify and shall be deemed never to have disqualified for being chosen as or for being a member of Parliament. The offices are mentioned under 8 heads.

Act 70. The Plantations Labour Act.—In spite of the fact that the plantation industry provides employment to more than a million workers, there was no comprehensive legislation regarding the conditions of labour in the industry. The various Acts, such as the Tea Districts Emigrant Labour Act, 1932, Workmen's Compensation Act, 1923, the Payment of Wages Act, 1946 or the Industrial Disputes Act, 1947, no doubt benefited the plantation labour to a certain extent, but they did not meet all the needs. The Labour Investigation Committee observed "that as the conditions of life and employment on plantations were different from those of other Industries, it would be even difficult to fit plantation labour in the general framework of the Industrial labour, legislation without creating serious anomalies" and recommended a plantation labour code covering all plantation areas. The present Act seeks to regulate the conditions of plantation labour

generally. It applies in the first instance to tea, coffee, rubber, and cinchona plantations, but the State Government may apply it to any other plantation. Chapter I is preliminary.

S. 4 authorises the State Government to appoint Chief Inspectors and Inspectors, who shall be deemed to be public servants.

S. 5 lays down the powers and functions of inspectors.

S. 6 states that every employer shall afford the inspector all reasonable facilities to inspect.

S. 7 empowers the State Governments to appoint qualified medical practitioners as certifying surgeons. The section lays down the duties of such surgeons.

S. 8 states that effective arrangements must be made to provide a sufficient supply of wholesome drinking water for all workers.

S. 9 lays down rule about conservancy.

S. 10 provides for medical facilities.

S. 11 authorises the State Governments to make rule requiring every plantation wherein 150 workers are ordinarily employed to have one or more canteens.

S. 12 compels every owner of plantation to provide for the use of children of women-workers suitable rooms.

S. 13 provides for recreational facilities.

S. 14 provides for educational facilities.

S. 15 lays down that it shall be the duty of every employer to provide necessary housing accommodation.

S. 16 authorises the State Government to make rules for the purpose of giving effect to the provisions of Section 15.

S. 17 authorises the State Government to make rules requiring the employer to provide the workers with such number and type of umbrellas, blankets, rain coats, etc.

S. 18 lays down that employers must employ welfare officers.

S. 19 lays down the maximum number of hours in a week for an adult worker shall be 54 and for a child 40 hours.

S. 20 provides for weekly holidays.

S. 21 lays down rules for daily intervals for rest.

S. 22 provides for spreading over the hours of work.

S. 23 lays down rules about notice of period of work.

S. 24 prohibits the employment of children under twelve.

S. 25 states that ordinarily women and children shall not be employed during night-time.

S. 26 states that non-adult workers must carry tokens.

S. 27 lays down rules about certificate of fitness.

S. 28 empowers the Inspector to cause any young person to be examined by a certifying surgeon.

S. 29 lays down rules as regards application of this chapter.

S. 30 lays down rules as regards annual leave with wages.

S. 31 states rules as regards wages, during leave-period.

S. 32 lays down rules as regards leave in the period of sickness and maternity benefits.

S. 33 punishment for obstructing the inspector in discharge of his duties is laid down.

S. 34 Penalty for use of false certificate of fitness is mentioned.

S. 35 lays down punishment for contravention of provisions regarding employment of labour.

S. 36 provides punishment for other offences.

S. 37 provides for enhanced penalty after previous conviction.

S. 38 states that in certain cases the employer may be exempted from liability.

S. 39 lays down rules about cognizance of offences.

S. 40 states rules as regards limitation to prosecution.

S. 41 empowers the Central Government to give directions.

S. 42 empowers the State Government to exempt any employer or class of employers from all or any of the provisions of the Act.

S. 43 states that the State Government has general power to make rules.

Act 71. The Displaced Persons (Debts Adjustment) Act.—The Act is designed mainly to give relief to displaced debtors in respect of liabilities incurred by them prior to their displacement from West Pakistan, though remission of court fees has also been allowed to displaced creditors. A certain amount of relief was afforded to them by the Acts XLVII of 1948 and XXV of 1949, but that was found to be inadequate. A Committee was appointed by the Central Government to make recommendations as regards the types of reliefs to be given to the displaced persons. The Act incorporates many of the recommendations. The Act makes it clear that no stigma of insolvency will be applicable to any one seeking relief under this law. Special provisions are also made to enable displaced persons to be absolved for a period of ten years, from further liability in respect of calls on shares in companies, an opportunity being given to them to have their partly paid up shares converted into a proportionate number of fully paid up shares. The Act also gives the insured an opportunity of getting compensation for the losses which he has suffered. A special provision has also been made to enable the displaced banks to have their existing scheme of arrangements sanctioned by the High Courts under section 153 of the Indian Companies Act, 1913.

S. 3 states that ordinarily the provisions of the Act shall have effect notwithstanding anything inconsistent in any other law for the time being in force.

S. 4 empowers the State Governments to specify the tribunals competent to exercise jurisdiction under the Act.

Chapter II lays down debt adjustment proceedings.

S. 5 empowers a displaced person to make an application for the adjustment of his debts to the relevant tribunal, within one year after the date on which the Act comes into force. The section lays down the details of the application.

S. 6 authorises the Tribunal either to reject the application because not properly filled or give further time.

S. 8 provides for objections by respondents.

S. 9 lays down the proceedings to be followed after service of notice on respondents.

S. 10 lays down rules as regards claims by creditors against displaced debtors.

S. 11 states procedure to be followed on creditor's petition.

S. 12 provides rules enabling the creditor to raise objections to schedule of assets submitted by the debtor.

S. 13 lays down rules as regards claims by displaced creditors against persons who are not displaced debtors.

S. 14 lays down procedure to be followed when a claim is made under section 13.

S. 15 mentions the consequences of application made by a displaced debtor.

S. 16 lays down rules as regards debts secured on immoveable property.

S. 17 provides rules for debts secured on moveable property.

S. 18 lays down rules and procedure for claims against insurance companies, provided the property was insured before the 15th day of August 1947 with any Insurance Company.

S. 19 lays down rules about calls on shares in a company or a Co-operative Society. It states that even if a call remained unpaid on the 15th day of August 1947, the interest of the shareholder shall not be forfeited and if there was any forfeiture before the commencement of this Act, it shall be deemed to have no effect. Partly paid up shares may be turned into fully paid up shares at the request of the share holder. The provisions of this section shall have effect for a period of ten years from the 15th day of August 1947.

S. 20 states that no calls are to be made on displaced persons or bank when company or co-operative society is in liquidation.

S. 21 empowers the Tribunal to revise certain decrees and settlements. The section lays down detail rules in this behalf.

S. 22 lays down the rules which the Tribunal has to follow where a debt is due from a displaced person jointly with another person, in apportionment of the debt.

S. 23 states that in certain cases simplified procedure is to be followed.

S. 24 states that it shall be presumed that any registered document has been proved.

S. 25 states that proceedings under this Act shall be regulated by the Civil Procedure Code.

S. 26 lays down rules as regards signing and verification of application and written statements.

S. 29 lays down that on and from the 15th day of August 1947, no interest shall accrue or be deemed to have accrued in respect of any debt owed by a displaced person. The section has two provisos.

S. 30 states that no displaced person shall be liable to arrest or imprisonment in execution of any decree.

S. 31 mentions further reliefs in the matter of attachment of property. A few changes are made in some provisions of the Civil Procedure Code for the purposes of the Act.

S. 32 lays down rules for scaling down of debts.

S. 33 mentions matters to be taken into account by the Tribunal in directing payment by instalments.

S. 34 states that if a displaced debtor has been ordered to pay maintenance allowance, the Tribunal may vary the rate at which the allowance is payable, if the Tribunal thinks that such variation is necessary.

S. 35 lays down rules as regards taxation of lawyer's fees. It shall not be more than one-half of what the cost before the Civil Court would have been.

S. 36 lays down rules as regards extension of period of limitation.

S. 37 states that the period of limitation may be curtailed for execution of certain decrees.

S. 38 lays down rules as regards sale of immoveable property in execution of decree for the recovery of a debt against a displaced person.

S. 39 lays down that the Tribunal in certain cases should encourage settlements.

S. 40 states the general provisions relating to appeals.

S. 41 lays down restrictions on right of appeal, if the subject matter relates to an amount which is less than five thousand rupees.

S. 42 mentions who can be parties to appeals.

Chapter V contains miscellaneous provisions.

S. 43 lays down rules for registration in India under Indian law of Societies and companies that were registered in territory now in West Pakistan and where members are now residing in the territory of India.

S. 44. If an application of displaced debtor is dismissed, no further application shall lie.

S. 45 applications may be amended by the Tribunal.

S. 46 lays down rules as regards service of notices.

S. 47 states the effect of failure on the part of displaced debtor to disclose certain matters.

S. 48 lays down that proceedings shall not abate on the death of the debtor.

S. 49 states that past transactions of the displaced debtor in the form of payment of the debt shall not be affected by anything in this Act.

S. 50. A displaced person who applies to get his debts adjusted under this Act, shall not be deemed to be insolvent.

S. 51 states that compromises or arrangements between banks and their debtors are not to be reopened in certain cases.

S. 52 states that every Tribunal shall communicate to the prescribed authority, the amount of the prior charges and the decree passed on the application of a displaced debtor. The prescribed authority shall scale down the debts in accordance with the provisions of section 32. Any amount paid by the prescribed authority to any decree-holder under the provisions of the Section shall be a valid discharge of the debts.

S. 53 lays down rules as regards application of the Limitation Act, 1908.

S. 54 states order XXXVIII of the First Schedule of the Civil Procedure Code will not be applicable to proceeding under this Act.

S. 55 protects every authorised person for action taken in good faith.

S. 56 authorises the Central Government to delegate its powers under this Act to any officer or authority.

S. 57 states that the Central Government has power to make rules to carry out provisions of this Act.

S. 59 empowers the State Governments to make rules.

S. 60 states that the Displaced Persons (Institution of Suits) Act, 1948 and the Displaced Persons (legal Proceedings) Act, 1949 shall cease to apply to displaced persons as defined in this Act.

Act 72. The Ancient and Historical Monuments and Archaeological Sites and Remains (Declaration of National Importance) Act.—In the Constitution of India the subject matter relatable to the Ancient Monuments Preservation Act, 1904 has been distributed as follows :—List I entry 67, List II entry 12 and List III entry 40. In view of entry 12 in list II it was essential that legislation should be promoted in terms of entry 67 in List I as otherwise the supervision and control exercised by the Central Government in respect of important ancient monuments could have been appropriated by the States under laws that might have been made by the State legislature in terms of entry 12 of List II. Such an Act was necessary for taking necessary action for the protection and care of monuments in Part 'B' States. The Act declares certain ancient and historical monuments and archæological sites and remains in Part 'A' States and Part 'B' States to be of national importance and provides for certain other matters connected therewith.

Part I of the Schedule mentions the Ancient and Historical Monuments. It includes all Ancient and Historical Monuments in Part 'A' and Part 'B' States which before the commencement of this Act have either been declared by the Central Government, to be protected monuments within the meaning of the Act of 1904 or which have been taken possession of by the Central Government as protected monuments. It further states in details other monuments in various Part 'B' States. Part II similarly first mentions the archæological sites and remains already declared as protected and then further states other monuments in Part 'B' States.

In addition to the above Act, there are ten Ordinances promulgated by the President. Some of these Ordinances were afterwards placed before Parliament in the form of Bills and became afterwards Acts of 1951.

GOVERNMENT OF INDIA

INDIA, that is Bharat, is a sovereign democratic Republic. It is a union of 28 States. These States are: Assam, Bihar, Bombay, Madhya Pradesh, Madras, Orissa, Punjab, Uttar Pradesh, West Bengal, Hyderabad, Jammu and Kashmir, Madhya Bharat, Mysore, Patiala and East Punjab States Union, Rajasthan, Saurashtra, Travancore-Cochin, Vindhya Pradesh, Ajmer, Bhopal, Bilaspur*, Coorg, Delhi, Himachal Pradesh, Kutch, Manipur, Tripura, Andaman and Nicobar Islands. Chandranagar which was French territory at the commencement of the Constitution has now become a part of the territory of India. Sikkim a small State in the Himalayas has become a protectorate of India as a result of a treaty signed by the Governments of India and Sikkim. The number of these administrative units is liable to change as smaller units are sometimes absorbed by larger ones.

The distribution of power between the centre and the local administrations follows the accepted principle that subjects which for convenience and efficiency ought to be administered on an all-India basis are vested in the Union Government, while others (of the nation-building sort) which can be conveniently administered on a local basis are vested in the State Governments. Thus, defence, foreign affairs, transport and communications, currency and coinage, banking, customs and export duties, and the administration of justice at the higher level are all central subjects, while State powers include those over police, public health, education, agriculture, forests and so on. There is a third group of subjects that fall betwixt and between such as economic and social planning, social security and insurance, labour welfare, price control and vital statistics. On these subjects both the Centre and the State can freely legislate, it being understood that whenever there is conflict between Union and State legislation the Union laws prevail. Three detailed lists of subjects are drawn up, the Union List, the State List and the Concurrent List, and the residuary power rests with the Union. That is to say, if at any time, a subject which does not figure in any of the three lists, comes up for consideration the power of dealing with it lies with the Union Government. Thus the constitution of India is a federation in which the Centre is the dominating partner. It may be pointed out here that while the relations between the Centre and each of the States are substantially the same, the Centre has a higher responsibility in the affairs of some States than in others. Thus while in regard to a State like Bombay the Centre can intervene only in case of grave emergency, in regard to a State like Madhya Bharat the Centre has the right to issue directives (for ten years) on day to day administration.

In the Indian Union the rights of Indian citizenship are given to 1. One who is born in India, 2. Either of whose parents were born in India, and 3. Who has been a resident of India for five years. Provision is also made for persons who are affected by the partition of the sub-continent. Certain fundamental rights are guaranteed to every citizen for the first time in India. All citizens are equal before the law and no discrimination is made on grounds of religion, sex, caste, etc. All citizens have equal opportunities. Untouchability is abolished. Freedom of speech and expression, is guaranteed, and the right to hold meetings (without arms), to form unions and associations, to move freely in India and to reside in any part, to acquire property and to practise any profession are also assured under the Constitution; the legislature can pass only reasonable legislation with respect to these rights. Life and personal liberty are protected under the law, and there will not be punishment for the same offence more than once. Preventive detention is also forbidden except in certain cases. Children under the age of 14 will not be allowed to be employed in factories and forced labour like *begar* is prohibited. India is a secular State and as such there is freedom of conscience. Citizens are allowed to profess, practise and propagate any religion; and the State will not ordinarily interfere in religious institution. The minorities are assured of cultural and educational rights. The State can acquire compulsorily property for public purposes, but compensation must be paid to the owner of the property concerned. But property may also be acquired without compensation in certain cases. All titles, except military or academic, are also abolished.

These fundamental rights can be enforced by the Supreme Court which has the authority to issue prerogative writs such as *habeas corpus, certiorari, prohibition*, etc. Parliament has power to legislate with respect to these fundamental rights in their application to the Armed Forces. It must be pointed out that some of these fundamental rights can be suspended in case of emergency, and the remedies available for their enforcement may also be suspended by an order of the President.

The State has to direct its policy in accordance with certain principles called 'Directive Principles'. These principles are of a recommendatory character and cannot be enforced in a court of law. However the State is expected to look upon them as a kind of touch-stone for its policy and action. The principles include organization of village panchayats, provision for just and humane conditions of work, maternity relief, a uniform civil code for the citizens, provision for compulsory and free education of children and separation of judiciary from executive.

UNION EXECUTIVE

The executive head of the Indian Union is the President. He is elected by the elected members of the Houses of Parliament and the Legislative Assemblies of all the States. His term of office is five years, and he is eligible for re-election. Only a person who is a citizen of India and has completed the age of thirty-five years is qualified to contest the election. The President is entitled to the use of an official residence without payment of rent, and a salary of Rs. 10,000 per month and allowances. Provision has also been made by an Act of Parliament for a pension of Rs. 15,000 per annum. The President has to take an oath to preserve, protect and defend the Constitution of the Union. The President has power to grant pardons or remissions of punishment or commute the sentence of any person convicted of any offence. The supreme command of the Defence Forces of the Union is also vested in the President. The President has the power of summoning, proroguing and dissolving Parliament. At the commencement of each session he addresses both Houses of Parliament assembled together. He has the right of sending messages to Parliament and sending back a Bill presented to him for his consent. This power however can be used by him only once.

The President has legislative powers under certain circumstances. When neither of the Houses of Parliament is in session and the President is satisfied that circumstances exist which make immediate action necessary he may promulgate an ordinance. Such ordinance must be put before both the Houses of Parliament and will cease to operate at the expiration of six weeks from the reassembly of Parliament. The President can also declare emergency if he is satisfied that the security of India or any part thereof is threatened either by war or internal disturbances when the legislature is in session. Such a proclamation would give additional powers to the Union executive and the Legislature.

The judges of the Supreme Court and the High Courts, the Attorney-General of India and the Comptroller and Auditor-General of India are all appointed by the President. The heads of the various States, *i.e.*, Governors and Rajpramukhs are also appointed by the President. He has the power of appointing ambassadors abroad and receiving diplomatic representatives of foreign States.

The President places a number of annual reports before Parliament: the Annual Financial Statement, the report of the Auditor-General of India relating to the accounts of the Government of India, the recommendations of the Finance Commission, the annual report of the Union Public Services Commission and the report of the special officer for minorities.

In exercise of his functions, the President has the aid and advice of a Council of Ministers with the Prime Minister at the head of it. The President appoints the Prime Minister and other Ministers are appointed on the advice of the Prime Minister. The Council of Ministers is collectively responsible to the House of the People. Every Minister must be a member of either House of Parliament, and he is required to take an oath of office and secrecy. The salaries and allowances of Ministers are determined by Parliament.

Provision is made for the impeachment of the President, by the Parliament, for violation of the Constitution. If a resolution to that effect is passed by a majority of not less than two-thirds of the total membership, such a resolution has the effect of removing the President from office.

There is to be a Vice-President of India, who is ex-officio chairman of the Council of States. The Vice-President is to act as President during casual vacancy in the office of the President. He is to be elected by the members of both Houses of Parliament and his term of office is five years.

All executive action of the Government of India is taken in the name of the President and it is the duty of the Prime Minister to communicate to the President all decisions of the Council of Ministers.

UNION PARLIAMENT

The Parliament is to consist of the President and two Houses to be known as the Council of States and the House of the People. It must meet at least twice a year. The maximum strength of the two Houses is to be 250 and 500 respectively. The allocation of seats in the House of the People is as follows:—Assam, 12; Bihar, 55; Bombay, 45, Madhya Pradesh, 29; Madras, 75; Orissa, 20; Punjab, 18; Uttar Pradesh, 80; West Bengal, 34; Hyderabad, 25; Jammu and Kashmir, 6; Madhya Bharat, 11; Mysore, 11; Patiala and East Punjab States Union, 5; Rajasthan, 20; Saurashtra, 20; Travancore-Cochin, 12; Ajmer, 2; Bhopal, 2; Bilaspur, 1; Coorg, 1; Delhi, 4; Himachal Pradesh, 3; Kutch, 2; Manipur, 2; Tripura, 2; Vindhya Pradesh, 6; Andaman and Nicobar Islands, 1. In the Council of States 12 members are to be nominated by the President, from among persons who are known for their eminence in literature, science or art, or for their record of social service. The Council of States is to be a permanent body with one-third of its members renewed on the expiration of every second year. The Council of States is to be elected by the members of the Legislative Assemblies of the States, while those of the House of the People will be elected by the voters in the States. The elections are to be based on adult suffrage and joint electorates. There is to be no reservation of seats for any group except Scheduled Castes and Scheduled Tribes. The House of the People continues for five years, ordinarily. There is a Speaker and a Deputy Speaker of the House both of whom are elected by its members. The Chairman of the Council of States is the Vice-President of the Union. All these posts carry a salary and allowances. Under certain circumstances, the members can be disqualified and their seats declared vacant. Money Bills can be introduced only in the House of the People. Bills passed by Parliament will be submitted to the President for his assent. Only on such assent being given does the Bill become law. The language used in Parliament is either Hindi or English. (For composition of the Council of States see Fourth Schedule under the Constitution of India.)

* A proposal to merge Bilaspur into Himachal Pradesh is under consideration (May 1952)

UNION JUDICIARY

The Supreme Court of India consists of a Chief Justice of India and not more than seven other Judges. The appointments are made by the President. The salary of the Chief Justice is Rs. 5,000 per month and of the other Judges Rs. 4,000 per month. Qualifications for appointment are (*a*) Judge of a High Court for at least five years, (*b*) Advocate of any High Court of ten years standing, (*c*) Jurist of distinction. Retired Judges are not allowed to practise in any court in India, and they may be required to attend the Court if the Chief Justice of India makes a request to that effect. The Supreme Court sits in Delhi. It is also a Court of Record and has the power of issuing writs, in addition to the original, appellate and advisory jurisdiction. Law declared by the Supreme Court is binding on all courts in the Indian Union.

An Attorney-General for legal advice and a Comptroller and Auditor-General of India for audit and accounts are appointed by the President. The Attorney-General has the right to appear in all courts in India.

THE STATES

There are three types of State (1) Nine States, that have a Governor as the executive head. They are Assam, Bihar, Bombay, Madhya Pradesh, Madras, Orissa, Punjab, Uttar Pradesh and West Bengal. (2) Eight having a Rajpramukh at the head. They are Hyderabad, Jammu and Kashmir, Madhya Bharat, Mysore, Patiala and East Punjab States Union, Rajasthan, Saurashtra and Travancore-Cochin. (3) Ten States having a Chief Commissioner or a Lieutenant-Governor at the head and controlled by the Union Government. They are, Ajmer, Bhopal, Bilaspur, Coorg, Delhi, Himachal Pradesh, Kutch, Manipur, Tripura, and Vindhya Pradesh. And (4) The Andaman and Nicobar Islands is in a class by itself.

Of the third type of State those which have a Lieutenant-Governor are Himachal Pradesh and Vindhya Pradesh.

The Governor of a State is appointed by the President. And a Rajpramukh is appointed or recognized by the President. Executive power is vested in the Governor who is appointed for a term of five years, ordinarily. Only a citizen of India and one who has completed 35 years of age, is eligible for such an appointment. The Governor, like the President has power to grant pardon, etc. He will have a Council of Ministers to aid and advise him. The Governor also appoints an Advocate-General for the State. Seven States (Bihar, Bombay, Madras, Mysore, Punjab, Uttar Pradesh, West Bengal) have two Houses of Legislature, the others, only one. The two Houses are called the Legislative Assembly and the Legislative Council. The former has a duration of five years, while the latter is a permanent body with one-third of the members retiring every second year. The minimum strength of the Council is 40, and the maximum one-fourth of the State Assembly. The Legislature must meet at least twice a year. While the Assembly consists of members who are directly elected from territorial constituencies, the Council consists of members nominated by the Governor, elected by the Assembly and of representatives of local bodies and special interests.

The total number of seats in the Legislative Assemblies and the Legislative Councils are as follows:—

Name of State	Total number of Seats in the Assembly	Total number of Seats in the Council
Assam	108	—
Bihar	330	72
Bombay	315	72
Madhya Pradesh	232	—
Madras	375	72
Orissa	140	—
Punjab	128	40
Uttar Pradesh ..	430	72
West Bengal ..	238	51
Hyderabad ..	175	—
Madhya Bharat..	99	—
Mysore	99	40
Patiala & East Punjab States Union ..	60	—
Rajasthan ..	160	—
Saurashtra ..	60	—
Travancore-Cochin ..	108	—
Ajmer	30	—
Bhopal	30	—
Coorg	24	—
Delhi	48	—
Himachal Pradesh	36	—
Vindhya Pradesh	60	—

(1)—Indicates that these States have no Legislative Councils.

(2) Provision for Jammu and Kashmir is not made because of its peculiar constitutional position.

The right of summoning, proroguing and dissolving the Legislature is vested in the Governor, who addresses the legislature at the commencement of each session. Like the Parliament there is a Speaker, a Deputy Speaker, a Chairman and a Deputy Chairman for the Legislative Assembly and the Legislative Council respectively. These officers of the legislatures are entitled to salary and allowances. Members of the legislature are required to take an oath and they can be disqualified. The language in the legislature can be either Hindi or English or any other language allowed by the Speaker. The State Legislatures cannot discuss the conduct of any judge of the Supreme Court or of a High Court in the discharge of his duties.

As the Governor is a part of the legislature, he has certain legislative powers. He can promulgate ordinances during the recess of the legislature; such ordinances must be placed before the legislature and cease to operate at the expiration of six weeks from the reassembly of the legislature. The salary of the Governor is Rs. 5,500 per month and he is also entitled to certain allowances.

As the Constitution has a federal structure, the Union Parliament can legislate on items included in the Union list (97 in all), the concurrent list (47 in all) and on the residue. It can also legislate on items included in State list under certain circumstances. The State legislature however has power to legislate only on the items included in the State list (66 in all) and in the concurrent list.

If the Government of the State cannot be carried on in accordance with the provisions of the Constitution, and the Governor or the Rajpramukh makes a report to that effect to the President, the President may by proclamation assume to himself all or any of the functions of the Government of the State. He may also declare that the powers of the State legislatures shall be exercised by the Parliament, and may suspend any provision of the constitution relating to the State. However, he cannot assume to himself, or suspend any of the provisions of the Constitution relating to High Courts.

There is a High Court for each State. The Chief Justice gets Rs. 4,000 per month, while the other judges Rs. 3,500. The High Court is also a court of record and has power to punish for contempt of itself. Judges of the High Court are appointed by the President after consultation with the Chief Justice of India, the Governor of the State and the Chief Justice of the High Court concerned. A retired High Court Judge is not allowed to plead or act in any court or before any authority within the territory of India. A Judge from one High Court can be transferred to another High Court by the President, after consultation with the Chief Justice of India. The Chief Justice of any High Court may, with the previous consent of the President, request any retired High Court Judge to sit and act as a judge of the High Court.

The administration of the States in group two, *e.g.* Hyderabad, is carried out in accordance with the provisions laid down with reference to the States in group one. Instead of a Governor, these States have a Rajpramukh.

The constitution of Part C States is governed by the Government of Part C States Act (Act XLIX of 1951). By this Act all States except Bilaspur, Kutch, Manipur and Tripura have a legislature called the Legislative Assembly. Provisions as regards duration, sessions and officers, etc. of the Assemblies, are similar to those laid down for Part A States. The extent of the legislative power is specifically mentioned in Section 21. There will be a Council of Ministers in each State to aid and advise the Chief Commissioner. In case the Chief Commissioner disagrees with the Council, he may refer the matter to the President and act according to his directions. The Chief Commissioner and the Council of Ministers will be under the general control of and comply with such particular directions, as may from time to time be given by the President. Special provision is made for the State of Delhi. Provision is also made to meet any situation created by the failure of the constitutional machinery in the Part C States. The President may constitute Council of Advisers for the purpose of assisting the Chief Commissioners in the States of Kutch, Manipur and Tripura: Lieutenant-Governors are appointed for Vindhya Pradesh and Himachal Pradesh. The salary is fixed as Rs. 3,000 per month.

As regards Andaman and Nicobar Islands, the President makes rules and regulations for the peace and good government of the State, and may appoint a Chief Commissioner for administration. The President has the power of making regulations which have the effect of amending or repealing an Act of Parliament.

The Indian Constitution is not completely federal. The Union Government controls the State governments in certain cases. Hence it is quasi-federal. The Union has also the power to confer additional powers on the States. Provision is made for removing differences between the various States by empowering the President to establish an Inter-State Council.

FINANCE

The financial relations between the Union and the States are as follows:—There is a Consolidated Fund of India and a Consolidated Fund of each State, and all money received is credited to the public account of India or the public account of the State as the case may be. Provision is also made for the establishment of a 'Contingency Fund of India' and a 'Contingency Fund of the State.' Certain duties and taxes are levied and collected by the Government of India, such as duties in respect of succession to property, terminal taxes, taxes on railway fares and freights, etc. But the net proceeds are assigned to the States, in accordance with such principles of distribution as formulated by Parliament. Certain other taxes, like income-tax are levied and collected by the Government of India, but are distributed between the Union and the States. Surcharges, however go into the Union exchequer. Parliament may fix for the year grants-in-aid to the States, that need help. No moneys can be appropriated

out of the Consolidated Fund of India or of a State except in accordance with an Appropriation Act by the appropriate legislature. There is a Finance Commission which is to make recommendations to the President as to the distribution of net proceeds of taxes between the Union and the States, and the allocation among the States of the proceeds of the tax. It is also to make recommendations as regards the principles that should govern the grants-in-aid out of the Consolidated Fund of India. The property of the Union is exempt from the taxes imposed by a State, and the property and income of State are exempt from Union taxation. The privy purse sums of the Rulers are a charge on the Consolidated Fund of India, and these sums are to be exempt from taxes on income.

SERVICES

The legislatures are empowered to regulate the recruitment and conditions of service of persons appointed to public service. Members of civil and defence services hold office during the pleasure of the President. Reasonable opportunity is given to persons in the service to defend themselves, in case they are to be removed or dismissed. Generally speaking, there is a Public Service Commission for the Union and also for each State. Two or more States may agree to have only one Commission for the group. Appointment of members of the Commission are made by the President or the Governor or Rajpramukh as the case may be. The Commission conducts examinations for appointments to the services of the Union or the State. The Union Commission submits an annual report to the President.

ELECTIONS

All elections are directed and controlled by an Election Commission. Elections to the House of the People and the Legislative Assemblies of the States are on the basis of adult suffrage. Seats are reserved in the House of the People for the scheduled castes and the scheduled tribes. The President may nominate not more than two members of the Anglo-Indian community to the House of the People if he thinks that the community is not adequately represented. Similar power is given to the Governor or the Rajpramukh of a State. The claims of the schedule castes and the scheduled tribes are to be considered in making appointments to services, and for two years after the commencement of the Constitution the Anglo-Indians are to have the same proportion in the services as they had immediately before 15th August 1947. This reservation is to be progressively reduced by 10 per cent every two years in such a way that it is to cease completely ten years after the commencement of the Constitution. In fact all reservations including reservation of seats for scheduled and tribal classes are to cease ten years after the commencement of the Constitution.

A special officer for the scheduled castes and the schedule tribes has been appointed.

OFFICIAL LANGUAGE

Hindi in the Devanagari script is the official language of the Union and the form of numerals is the international form of the Indian numerals. The English language, however will continue to be the official language for a period of not more than fifteen years from the commencement of the Constitution. The States have been given the liberty of adopting any one or more languages used in their territory or Hindi as the official language of the State. The official language of the Union, *i.e.*, English will be used for communication between the Union and a State or between one State and another. However if two States agree Hindi may be used instead of English between them. A commission is to be appointed by the President, at the expiration of five years from the commencement of the Constitution, to make recommendations to him, as regards the progressive use of the Hindi language for official purposes of the Union, and other allied matters. All proceedings in the Supreme Court and High Courts, the texts of Bills and Acts passed by the legislatures and ordinances promulgated by the appropriate authorities are to be in the English language, until Parliament by law provides otherwise. By previous consent of the President proceedings in a High Court may be conducted in Hindi or any recognised State language but judgments, decrees or orders passed by the court must be in English.

It is the duty of the Union Government to promote and spread the Hindi language. The vocabulary for the development of the language is to be drawn primarily from Sanskrit. The following languages are recognised by the Constitution : (1) Assamese, (2) Bengali, (3) Gujarati, (4) Hindi, (5) Kannada, (6) Kashmiri, (7) Malayalam, (8) Marathi, (9) Oriya, (10) Punjabi, (11) Sanskrit, (12) Tamil, (13) Telugu, (14) Urdu.

EMERGENCY PROVISIONS

If the President is satisfied that a grave emergency exists, and the security of India or any part thereof is threatened either by war or internal disturbance, he may make a declaration to that effect. Such proclamation must be approved by both the Houses of Parliament, before the expiration of two months, otherwise it ceases to operate at the end of that period. As a result of this proclamation the Parliament will be authorised to legislate on items included in the State list and the President, to issue directions either to the Governor or the Rajpramukh as the case may be. A request may also come from a State authority. And if on the receipt of a report from a Governor or a Rajpramukh the President is satisfied that a situation has arisen in which the Government of the State cannot be carried on in accordance with the provisions of the Constitution, he may by proclamation assume to himself all or any of the functions of the Government of the State. This however would not be applicable to the functions of the High Courts. Somewhat similar provision is also made for financial emergency. The proclamation of the President must be approved by Parliament, otherwise after two months it will cease to operate. Parliament can also validate a proclamation for a period of three years which is the maximum.

AMENDMENT OF THE CONSTITUTION

For purposes of amendment the items are divided into three classes with a different procedure for each class. For amendment of the provisions with respect to the Supreme Court and the High Courts, the distribution of legislative powers between the Centre and the States, the representation of the States in Parliament, etc., the amendment must be passed by both the Houses of Parliament by a majority of the total membership of the House and by a majority of two-thirds of the members present and voting, and must further be ratified by the legislatures of not less than one-half of the States. In other cases no reference to the State legislatures is necessary. Parliament by itself can amend the Constitution in the manner mentioned above. In some cases amendments can be effected by a bare majority such as is required for the passing of any ordinary law. The amendments contemplated in Articles 4, 169 and 240 fall within this class.

HISTORICAL SURVEY

The impulse which drove the British to the sub-continent was not conquest but trade. The Government of India represents the slow evolution from conditions established to meet trading requirements. On September 24; 1599, a few years before the deaths of Queen Elizabeth and Akbar, the merchants of London formed an association for the purpose of establishing direct trade with the East and were granted a charter of incorporation. The government of this Company in England was vested in a Governor with a General Court of Proprietors and a Court of Directors. The factories and affairs of the Company on the east and west coasts of the sub-continent, and in the Bengal area, were administered at each of the principal settlements of Madras (Fort St. George), Bombay and Calcutta (Fort William), by a President or Governor and a Council consisting of the senior servants of the Company. The three "Presidencies" were independent of each other and subordinate only to the Directors in England.

The collapse of government in the sub-continent consequent on the decay of Moghul power and the presence of the French on the east coast forced the officers of the Company to assume territorial responsibility in spite of their own desires and the insistent orders of the Directors. Step by step the Company became first the dominant, then the paramount power.

In these changed circumstances the system of Government by mutually independent and unwieldy councils of the merchants at the Presidency towns gave rise to grave abuses. Parliament intervened, and under the Regulating Act of 1773, a Governor-General and four councillors were appointed to administer the Presidency of Fort William (Bengal); and the supremacy of that Presidency over Madras and Bombay was for the first time established. The subordinate Presidencies were forbidden to wage war or make treaties without the previous consent of the Governor-General of Bengal in Council, except in cases of imminent necessity.

Pitt's Act of 1784, which established the Board of Control in England, vested the administration of each of the three Presidencies in a Governor and three councillors, including the Commander-in-Chief of the Presidency Army. The control of the Governor-General-in-Council was somewhat extended again by the Charter Act of 1793.

Under the Charter Act of 1833 the Company was compelled to close its commercial business and it became a political and administrative body holding its territories in trust for the Crown. The same Act vested the direction of the entire civil and military administration and sole power of legislation in the Governor-General-in-Council, and defined more clearly the nature and extent of the control to be extended over the subordinate governments.

After the outbreak of 1857, there was passed, in 1858, an Act transferring the Government of India from the Company to the Crown. This Act made no important change in the administration in the sub-continent, but the Governor-General, as representing the Crown, became known as the Viceroy. The Governor-General was the sole representative of the Crown; he was assisted by a Council, composed of high officials, each of whom was responsible for a special department of the administration.

The distribution of these great functions between the Central Government and the provincial administrations fluctuated from time to time. It was definitely regulated by the Reform Act of 1919, and the democratic principle then widely implanted was further developed in the constitutions for the Provinces and the Centre enacted by the British Parliament in 1935.

Great changes were made in the system of government in British India by the Government of India Act, 1919, which, together with the rules framed under it—almost as important in their provisions as the Act itself—came into general operation in January 1921, having received the Royal Assent on 23rd December 1919. (For detailed treatment see *The Indian Year Book*, 1936-37 and preceding years).

Still vaster changes in the direction of Indian self-government and of Dominion Status were brought about by the Government of India Act, 1935, which received the Royal Assent on 2nd August 1935. The new Act embodied two main principles—(1) Provincial Autonomy, with a Government responsible to an elected Legislature in every Province, and (2) at the centre a dyarchic form of Government, based on a federation of British Indian Provinces and Indian States. Detailed provisions for the whole scheme were made in the Act of 1935, which included 321 sections and 10 schedules and was the largest and most complex legislative enactment of the kind ever negotiated on to a statute book till that time.

Formally inaugurated in April 1937, the provincial part of the new constitution of 1935 functioned for about two and a half years with a fair amount of smoothness, but at the end of that period it broke down in seven out of the eleven provinces because of the resignation of their office by the Congress Ministries on the war issue. Thereupon the Governors of those provinces assumed sole charge of the Administration aided by Advisers responsible to them. The constitution remained virtually suspended in those provinces.

At the end of the war Congress Ministries were reestablished in eight provinces and in another (the Punjab) the Congress participated in a coalition.

The federal part of the constitution could not be inaugurated according to plan owing to diverse factors—the difficulties experienced by the Princes in acceding to Federation except on the fulfilment of certain conditions, the internal, political and communal differences in British India and, above all, by the declaration of war which militated against any major changes in the governmental machinery at the Centre.

The Viceroy offered to increase the size of the Executive Council, in August 1940, with a view to including additional popular representatives. But it was not accepted by the major political parties. However the Executive Council was reorganised in July 1941. As a result of this, the official majority disappeared and the principle of joint responsibility for all the business that came before it was introduced.

CABINET MISSION PLAN

Soon after the Labour Government took office in 1945 it initiated measures to end the political deadlock. They first sent out a Parliamentary Delegation consisting of eight members to ascertain the views of Indian leaders and convey to them the broad general attitude of the political parties in Britain. Later the British Government sent out a Cabinet Mission consisting of Lord Pethwick-Lawrence, Sir Stafford Cripps and A. V. Alexander who were authorised by the Cabinet to negotiate and settle within the broad framework of the British Government's policy the constitutional and political problems of India in association with the Viceroy.

After prolonged consultations which showed that there was no agreement among the two major political parties on such fundamental issues as one State or two, the Cabinet Mission formulated its own proposals for the setting up of a machinery to draw a constitution for the sub-continent.

At the outset the mission flatly declared that they were against the division of the sub-continent into two independent States but at the same time recognized the need for meeting the point of view of the Muslim League.

Inevitably the proposals took the form of a compromise both as regards the nature of the final constitution as well as of the machinery for drafting it. Broadly speaking, the Mission suggested what has been called a three-tier constitution consisting of a Union centre, the Provinces, and an intermediate authority formed by grouping contiguous Provinces according to a certain pattern.

The procedure for drafting such a constitution was also outlined.

INTERIM GOVERNMENT

India also needed a new Government having popular support to carry through some of the heavy tasks with which the Administration was faced. So the Cabinet Mission also proposed that while the Constitution-making proceeded, an interim Government consisting of leaders drawn from the major political parties was to be immediately formed.

Such, in outline were the main recommendations of the Cabinet Mission to help solve the political problem. Neither the Congress nor the League gave these recommendations wholehearted acceptance. After prolonged negotiations conducted by the Viceroy, however, the Congress agreed to accept office and an Interim Government was formed on Sept. 2 (1946). But the League continued to stand out and violent demonstrations occurred all over the country. The Viceroy followed up with further negotiations and, at last the League too agreed to join the Government (October 15), but refused to co-operate with the work of the Constituent Assembly on the ground that the Congress had not really accepted the Mission proposals in regard to certain points in the procedure.

One way of trying to make the two sides agree was for Britain to declare that she would leave India by a certain fixed time regardless of whether the two sides had come to an agreement or not by then. This Britain at last did through an announcement made by the Prime Minister in Parliament. The date fixed by the British Government for withdrawal was June, 1948.

PARTITION

This declaration did not by any means put an end to conflict. For though the British offered to withdraw they did not say to whom power was to be transferred in any particular area in case no agreement had meanwhile been reached among the major parties in the country. Worse still, there followed a mad struggle for power through mass movement in such of those Provinces as had a Muslim majority and a non-Muslim League Government. A mass movement in Assam too appeared to be imminent. Matters had undoubtedly come to a head and if an explosion was to be avoided yet another attempt had to be made to bring the two parties together and agree on a common solution. The instrument through which a common solution was at last reached was the person of Lord Mountbatten who had meanwhile taken the place of Lord Wavell as Viceroy and Governor-General (March 24, 1947). As soon as he assumed office Lord Mountbatten opened fresh negotiations with the Congress and the League and after prolonged talks with both sides succeeded in bringing about an agreement based on the division of India, the partition of the Punjab, Bengal and Assam, and the early transfer of complete power on the basis of Dominion Status. The procedure to be followed for dividing the country was simultaneously announced in London and in India on June 3.

CONSTITUENT ASSEMBLY

The terms relating to independence announced by Lord Mountbatten were embodied in an Act called the Indian Independence Act which was introduced into Parliament on July 5, passed on July 15 and became law at 10.45 A.M. on July 18.

The Act established two independent Dominions, called India and Pakistan as from August 15, 1947 and transferred all power and authority in the respective areas to the Constituent Assembly of India which was already in existence and the Constituent Assembly of Pakistan which was yet to be formed.

The Constituent Assembly of India was to exercise the powers of the Legislature of the Dominion, in addition to the work of constitution-making. The Government of India Act, 1935 was to be amended either by the Governor-General by order or by the Constituent Assembly which became a sovereign body on August 15, 1947. The administration was to be carried on in accordance with the provisions of this amended Act. Paramountcy lapsed and the Princes were free, either to accede to one of the two Dominions or to remain independent. The parliamentary system of Government was introduced in the provinces and at the Centre. The Governor-General and the Governors became constitutional heads and the cabinet became responsible to the Legislature.

During all this period the Constituent Assembly, which had first met on December 9, 1946 (and later joined by representatives from States), was busy framing a constitution for India. A Draft containing 243 Articles and 13 Schedules was prepared by the Constitutional Adviser, Sir B. N. Rau. However, subsequently a Drafting Committee was appointed by the Constituent Assembly with Dr. B. R. Ambedkar as Chairman. Besides the Chairman the Committee consisted of the following : Mr. N. Gopalaswamy Ayyangar, Mr. K. M. Munshi, Saiyid Mohamed Saadula, Mr. N. Madhava Rao and D. P. Khaitan, The Committee was asked to submit a draft, consistent with the resolutions passed and recommendation made by the Constituent Assembly. This the Committee did on February 21, 1948. The Assembly then under the Presidentship of Dr. Rajendra Prasad went into the draft constitution clause by clause. There were in all eleven sessions of the Assembly, which sat for 165 days. It took 2 years, 11 months and 18 days to complete the work. The Draft Constitution had contained 315 Articles and 8 Schedules, and as many as 2,473 amendments were moved before the Constitution was finally adopted on 26th November 1949. The new Constitution contained 395 Articles and 8 Schedules. It was inaugurated on January 26, 1950.

Two new Articles (31A and 31B) and one Schedule (No. 9) were afterwards inserted by an amendment.

While working the Constitution some of its provisions particularly those with respect to fundamental rights proved an obstacle in implementing certain measures of reform. The Legislatures of Uttar Pradesh, Bihar and Madhya Pradesh enacted agrarian laws which the zamindars challenged on the ground that they contravened the fundamental rights conferred on them. Similarly certain orders of the Madras Government were also challenged on the same ground. Hence a bill was brought forward to amend the Constitution. It was passed in the form of the Constitution (First Amendment) Act of 1951. The main object of the Act was to secure Constitutional validity of the Zamindari Abolition Laws, to prevent abuse of freedom of speech and expression involving the security of the State and friendly relations with foreign powers, and thirdly to promote the educational and economic interests of the backward classes. The validity of this Act was also challenged. But the Supreme Court decided that the Amendment was valid.

The full text of the new Constitution is given overleaf.

THE CONSTITUTION OF INDIA

[The following is the full text of the Constitution of the Indian Union as passed by the Indian Constituent Assembly on November 26, 1949 and as amended by the provisional Parliament in June 1951.

The number at the head of a paragraph is the number of the article as it appears in the Constitution.]

PREAMBLE

WE, THE PEOPLE OF INDIA, having solemnly resolved to constitute India into a SOVEREIGN DEMOCRATIC REPUBLIC and to secure to all its citizens:

JUSTICE, social, economic and political;

LIBERTY of thought, expression, belief, faith and worship;

EQUALITY of status and of opportunity; and to promote among them all

FRATERNITY assuring the dignity of the individual and the unity of the Nation.

IN OUR CONSTITUENT ASSEMBLY this twenty-sixth day of November, 1949, DO HEREBY ADOPT, ENACT AND GIVE TO OURSELVES THIS CONSTITUTION.

PART I
THE UNION AND ITS TERRITORY

1. (1) India, that is Bharat, shall be a Union of States.

(2) The States and the territories thereof shall be the States and their territories specified in Parts A, B and C of the First Schedule.

(3) The territory of India shall comprise—

(*a*) the territories of the States;

(*b*) the territories specified in Part D of the First Schedule; and

(*c*) such other territories as may be acquired.

2. Parliament may by law admit into the Union, or establish, new States on such terms and conditions as it thinks fit.

3. Parliament may by law—

(*a*) form a new State by separation of territory from any State or by uniting two or more States or parts of States or by uniting any territory to a part of any State;

(*b*) increase the area of any State;

(*c*) diminish the area of any State;

(*d*) alter the boundaries of any State;

(*e*) alter the name of any State:

Provided that no Bill for the purpose shall be introduced in either House of Parliament except on the recommendation of the President and unless, where the proposal contained in the Bill affects the boundaries of any State or States specified in Part A or Part B of the First Schedule or the name or names of any such State or States, the views of the Legislature of the State or, as the case may be, of each of the States both with respect to the proposal to introduce the Bill and with respect to the provisions thereof have been ascertained by the President.

4. (1) Any law referred to in article 2 or article 3 shall contain such provisions for the amendment of the First Schedule and the Fourth Schedule as may be necessary to give effect to the provisions of the law and may also contain such supplemental, incidental and consequential provisions (including provisions as to representation in Parliament and in the Legislature or Legislatures of the State or States affected by such law) as Parliament may deem necessary.

(2) No such law as aforesaid shall be deemed to be an amendment of this Constitution for the purposes of article 368.

PART II
CITIZENSHIP

5. At the commencement of this Constitution, every person who has his domicile in the territory of India and—

(*a*) who was born in the territory of India; or

(*b*) either of whose parents was born in the territory of India; or

(*c*) who has been ordinarily resident in the territory of India for not less than five years immediately preceding such commencement,

shall be a citizen of India.

6. Notwithstanding anything in article 5, a person who has migrated to the territory of India from the territory now included in Pakistan shall be deemed to be a citizen of India at the commencement of this Constitution if—

(*a*) he or either of his parents or any of his grand-parents was born in India as defined in the Government of India Act, 1935 (as originally enacted); and

(*b*) (*i*) in the case where such person has so migrated before the nineteenth day of July, 1948, he has been ordinarily resident in the territory of India since the date of his migration, or

(*ii*) in the case where such person has so migrated on or after the nineteenth day of July, 1948, he has been registered as a citizen of India by an officer appointed in that behalf by the Government of the Dominion of India on an application made by him therefor to such officer before the commencement of this Constitution in the form and manner prescribed by that Government:

Provided that no person shall be so registered unless he has been resident in the territory of India for at least six months immediately preceding the date of his application.

7. Notwithstanding anything in articles 5 and 6, a person who has after the first day of March, 1947, migrated from the territory of India to the territory now included in Pakistan shall not be deemed to be a citizen of India:

Provided that nothing in this article shall apply to a person who, after having so migrated to the territory now included in Pakistan, has returned to the territory of India under a permit for resettlement or permanent return issued by or under the authority of any law and every such person shall for the purposes of clause (*b*) of article 6 be deemed to have migrated to the territory of India after the nineteenth day of July, 1948.

8. Notwithstanding anything in article 5 any person who or either of whose parents or any of whose grand-parents was born in India as defined in the Government of India Act, 1935 (as originally enacted), and who is ordinarily residing in any country outside India as so defined shall be deemed to be a citizen of India if he has been registered as a citizen of India by the diplomatic or consular representative of India in the country where he is for the time being residing on an application made by him therefor to such diplomatic or consular representative, whether before or after the commencement of this Constitution, in the form and manner prescribed by the Government of the Dominion of India or the Government of India.

9. No person shall be a citizen of India by virtue of article 5, or be deemed to be a citizen of India by virtue of article 6 or article 8, if he has voluntarily acquired the citizenship of any foreign State.

10. Every person who is or is deemed to be a citizen of India under any of the foregoing provisions of this Part shall, subject to the provisions of any law that may be made by Parliament, continue to be such citizen.

11. Nothing in the foregoing provisions of this Part shall derogate from the power of Parliament to make any provision with respect to the acquisition and termination of citizenship and all other matters relating to citizenship.

PART III
FUNDAMENTAL RIGHTS
GENERAL

12. In this Part, unless the context otherwise requires, "the State" includes the Government and Parliament of India and the Government and the Legislature of each of the States and all local or other authorities within the territory of India or under the control of the Government of India.

13. (1) All laws in force in the territory of India immediately before the commencement of this Constitution, in so far as they are inconsistent with the provisions of this Part, shall, to the extent of such inconsistency, be void.

(2) The State shall not make any law which takes away or abridges the rights conferred by this Part and any law made in contravention of this clause shall, to the extent of the contravention, be void.

(3) In this article, unless the context otherwise requires—

(*a*) "law" includes any Ordinance, order, bye-law, rule, regulation, notification, custom or usage having in the territory of India the force of law;

(*b*) "laws in force" includes laws passed or made by a Legislature or other competent authority in the territory of India before the commencement of this Constitution and not previously repealed, notwithstanding that any such law or any part thereof may not be then in operation either at all or in particular areas.

RIGHT TO EQUALITY

14. The State shall not deny to any person equality before the law or the equal protection of the laws within the territory of India.

15. (1) The State shall not discriminate against any citizen on grounds only of religion, race, caste, sex, place of birth or any of them.

(2) No citizen shall, on grounds only of religion, race, caste, sex, place of birth or any of them, be subject to any disability, liability, restriction or condition with regard to—

(*a*) access to shops, public restaurants, hotels and places of public entertainment; or

(*b*) the use of wells, tanks, bathing ghats, roads and places of public resort maintained wholly or partly out of State funds or dedicated to the use of the general public.

(3) Nothing in this article shall prevent the State from making any special provision for women and children.

(4) Nothing in this article or in clause (2) of article 29 shall prevent the State from making any special provision for the advancement of any socially and educationally backward classes of citizens or for the Scheduled Castes and the Scheduled Tribes.

16. (1) There shall be equality of opportunity for all citizens in matters relating to employment or appointment to any office under the State.

(2) No citizen shall, on grounds only of religion, race, caste, sex, descent, place of birth, residence or any of them, be ineligible for, or discriminated against in respect of, any employment or office under the State.

(3) Nothing in this article shall prevent Parliament from making any law prescribing, in regard to a class or classes of employment or appointment to an office under any State specified in the First Schedule or any local or other authority within its territory, any requirement as to residence within that State prior to such employment or appointment.

(4) Nothing in this article shall prevent the State from making any provision for the reservation of appointments or posts in favour of any backward class of citizens which, in the opinion of the State, is not adequately represented in the services under the State.

(5) Nothing in this article shall affect the operation of any law which provides that the incumbent of an office in connection with the affairs of any religious or denominational institution or any member of the governing body thereof shall be a person professing a particular religion or belonging to a particular denomination.

17. "Untouchability" is abolished and its practice in any form is forbidden. The enforcement of any disability arising out of "Untouchability" shall be an offence punishable in accordance with law.

18. (1) No title, not being a military or academic distinction, shall be conferred by the State.

(2) No citizen of India shall accept any title from any foreign State.

(3) No person who is not a citizen of India shall, while he holds any office of profit or trust under the State, accept without the consent of the President any title from any foreign State.

(4) No person, holding any office of profit or trust under the State shall, without the consent of the President, accept any present, emolument, or office of any kind from or under any foreign State.

RIGHT TO FREEDOM

19. (1) All citizens shall have the right—

(*a*) to freedom of speech and expression;

(*b*) to assemble peaceably and without arms;

(*c*) to form associations or unions;

(*d*) to move freely throughout the territory of India;

(*e*) to reside and settle in any part of the territory of India;

(*f*) to acquire, hold and dispose of property;

(*g*) to practise any profession, or to carry on any occupation, trade or business.

(2) Nothing in sub-clause (*a*) of clause (1) shall affect the operation of any existing law or prevent the State from making any law in so far as such law imposes reasonable restrictions on the exercise of the right conferred by the said sub-clause in the interest of the security of the State, friendly relations with foreign States, public order, decency or morality, including in particular, any existing or other law relating to contempt of court, defamation or incitement to an offence.

(3) Nothing in sub-clause (*b*) of the said clause shall affect the operation of any existing law in so far as it imposes, or prevent the State from making any law imposing, in the interests of public order, reasonable restrictions on the exercise of the right conferred by the said sub-clause.

(4) Nothing in sub-clause (*c*) of the said clause shall affect the operation of any existing law in so far as it imposes, or prevent the State from making any law imposing, in the interests of public order or morality, reasonable restrictions on the exercise of the right conferred by the said sub-clause.

(5) Nothing in sub-clauses (*d*), (*e*) and (*f*) of the said clause shall affect the operation of any existing law in so far as it imposes, or prevent the State from making any law imposing, reasonable restrictions on the exercise of any of the rights conferred by the said sub-clauses either in the interests of the general public or for the protection of the interests of any Scheduled Tribe.

(6) Nothing in sub-clause (*g*) of the said clause shall affect the operation of any existing law in so far as it imposes, or prevent the State from making any law imposing, in the interests of the general public, reasonable restrictions on the exercise of the right conferred by the said sub-clause, and, in particular, nothing in the said sub-clause shall affect the operation of any existing law in so far as it relates to, or prevents the State from making any law relating to—

(*i*) the professional or technical qualifications necessary for practising any profession or carrying on any occupation, trade or business, or

(*ii*) the carrying on by the State, or by a corporation owned or controlled by the State, of any trade, business, industry or service, whether to the exclusion, complete or partial, of citizens or otherwise.

No law in force in the territory of India immediately before the commencement of the constitution which is consistent with the provisions of article 19 as amended shall be deemed to be void, or ever to have become void, on the ground that, being a law which takes away or abridges the right conferred by sub-clause (*a*) of clause (1) of the said article, its operation was not saved by sub-clause (2) of that article as originally enacted.

Explanation—In this clause the expression 'law in force' has the same meaning as in clause (1) of article 13 of the constitution.

20. (1) No person shall be convicted of any offence except for violation of a law in force at the time of the commission of the act charged as an offence, nor be subjected to a penalty greater than that which might have been inflicted under the law in force at the time of the commission of the offence.

(2) No person shall be prosecuted and punished for the same offence more than once.

(3) No person accused of any offence shall be compelled to be a witness against himself.

21. No person shall be deprived of his life or personal liberty except according to procedure established by law.

22. (1) No person who is arrested shall be detained in custody without being informed, as soon as may be, of the grounds for such arrest nor shall he be denied the right to consult, and to be defended by, a legal practitioner of his choice.

(2) Every person who is arrested and detained in custody shall be produced before the nearest magistrate within a period of twenty-four hours of such arrest excluding the time necessary for the journey from the place of arrest to the court of the magistrate and no such person shall be detained in custody beyond the said period without the authority of a magistrate.

(3) Nothing in clauses (1) and (2) shall apply—

(*a*) to any person who for the time being is an enemy alien; or

(*b*) to any person who is arrested or detained under any law providing for preventive detention.

(4) No law providing for preventive detention shall authorise the detention of a person for a longer period than three months unless—

(*a*) an Advisory Board consisting of persons who are, or have been, or are qualified to be appointed as, Judges of a High Court has reported before the expiration of the said period of three months that there is in its opinion sufficient cause for such detention:

Provided that nothing in this sub-clause shall authorise the detention of any person beyond the maximum period prescribed by any law made by Parliament under sub-clause (*b*) of clause (7); or

(*b*) such person is detained in accordance with the provisions of any law made by Parliament under sub-clauses (*a*) and (*b*) of clause (7).

(5) When any person is detained in pursuance of an order made under any law providing for preventive detention, the authority making the order shall, as soon as may be, communicate to such person the grounds on which the order has been made and shall afford him the earliest opportunity of making a representation against the order.

(6) Nothing in clause (5) shall require the authority making any such order as is referred to in that clause to disclose facts which such authority considers to be against the public interest to disclose.

(7) Parliament may by law prescribe—

(*a*) the circumstances under which, and the class or classes of cases in which, a person may be detained for a period longer than three months under any law providing for preventive detention without obtaining the opinion of an Advisory Board in accordance with the provisions of sub-clause (*a*) of clause (4);

(*b*) the maximum period for which any person may in any class or classes of cases be detained under any law providing for preventive detention; and

(*c*) the procedure to be followed by an Advisory Board in an inquiry under sub-clause (*a*) of clause (4).

RIGHT AGAINST EXPLOITATION

23. (1) Traffic in human beings and *begar* and other similar forms of forced labour are prohibited and any contravention of this provision shall be an offence punishable in accordance with law.

(2) Nothing in this article shall prevent the State from imposing compulsory service for public purposes, and in imposing such service the State shall not make any discrimination on grounds only of religion, race, caste or class or any of them.

24. No child below the age of fourteen years shall be employed to work in any factory or mine or engaged in any other hazardous employment.

RIGHT TO FREEDOM OF RELIGION

25. (1) Subject to public order, morality and health and to the other provisions of this Part, all persons are equally entitled to freedom of conscience and the right freely to profess, practise and propagate religion.

(2) Nothing in this article shall affect the operation of any existing law or prevent the State from making any law—

(*a*) regulating or restricting any economic, financial, political or other secular activity which may be associated with religious practice;

(*b*) providing for social welfare and reform or the throwing open of Hindu religious institutions of a public character to all classes and sections of Hindus.

Explanation I.—The wearing and carrying of *kirpans* shall be deemed to be included in the profession of the Sikh religion.

Explanation II.—In sub-clause (*b*) of clause (2), the reference to Hindus shall be construed as including a reference to persons professing the Sikh, Jaina or Buddhist religion, and the reference to Hindu religious institutions shall be construed accordingly.

26. Subject to public order, morality and health, every religious denomination or any section thereof shall have the right—

(*a*) to establish and maintain institutions for religious and charitable purposes;

(*b*) to manage its own affairs in matters of religion;

(*c*) to own and acquire movable and immovable property; and

(*d*) to administer such property in accordance with law.

27. No person shall be compelled to pay any taxes, the proceeds of which are specifically appropriated in payment of expenses for the promotion or maintenance of any particular religion or religious denomination.

28. (1) No religious instruction shall be provided in any educational institution wholly maintained out of State funds.

(2) Nothing in clause (1) shall apply to an educational institution which is administered by the State but has been established under any endowment or trust which requires that religious instruction shall be imparted in such institution.

(3) No person attending any educational institution recognised by the State or receiving aid out of State funds shall be required to take part in any religious instruction that may be imparted in such institution or to attend any religious worship that may be conducted in such institution or in any premises attached thereto unless such person or, if such person is a minor, his guardian has given his consent thereto.

CULTURAL AND EDUCATIONAL RIGHTS

29. (1) Any section of the citizens residing in the territory of India or any part thereof having a distinct language, script or culture of its own shall have the right to conserve the same.

(2) No citizen shall be denied admission into any educational institution maintained by the State or receiving aid out of State funds on grounds only of religion, race, caste, language or any of them.

30. (1) All minorities, whether based on religion or language, shall have the right to establish and administer educational institutions of their choice.

(2) The State shall not, in granting aid to educational institutions, discriminate against any educational institution on the ground that it is under the management of a minority, whether based on religion or language.

RIGHT TO PROPERTY

31. (1) No person shall be deprived of his property save by authority of law.

(2) No property, movable or immovable, including any interest in, or in any company owning, any commercial or industrial undertaking, shall be taken possession of or acquired for public purposes under any law authorising the taking of such possession or such acquisition, unless the law provides for compensation for the property taken possession of or acquired and either fixes the amount of the compensation, or specifies the principles on which, and the manner in which, the compensation is to be determined and given.

(3) No such law as is referred to in clause (2) made by the Legislature of a State shall have effect unless such law, having been reserved for the consideration of the President, has received his assent.

(4) If any Bill pending at the commencement of this Constitution in the Legislature of a State has, after it has been passed by such Legislature, been reserved for the consideration of the President and has received his assent, then, notwithstanding anything in this Constitution, the law so assented to shall not be called in question in any court on the ground that it contravenes the provisions of clause (2).

(5) Nothing in clause (2) shall affect—

(*a*) the provision of any existing law other than a law to which the provisions of clause (6) apply, or

(*b*) the provisions of any law which the State may hereafter make—

(*i*) for the purpose of imposing or levying any tax or penalty, or

(*ii*) for the promotion of public health or the prevention of danger to life or property, or

(*iii*) in pursuance of any agreement entered into between the Government of the Dominion of India or the Government of India and the Government of any other country, or otherwise, with respect to property declared by law to be evacuee property.

(6) Any law of the State enacted not more than eighteen months before the commencement of this Constitution may within three months from such commencement be submitted to the President for his certification; and thereupon, if the President by public notification so certifies, it shall not be called in question in any court on the ground that it contravenes the provisions of clause (2) of this article or has contravened the provisions of sub-section (2) of section 299 of the Government of India Act, 1935.

31A. (1) Notwithstanding anything in the foregoing provisions of this Part, no law providing for the acquisition by the State of any estate or of any rights therein or for the extinguishment or modification of any such rights shall be deemed to be void on the ground that it is inconsistent with, or takes away or abridges any of the rights conferred by, any provisions of this Part.

Provided that where such law is a law made by the legislature of a State, the provisions of this article shall not apply thereto unless such law, having been reserved for the consideration of the President, has received his assent.

(2) In this article—

(*a*) The expression 'estate' shall, in relation to any local area, have the same meaning as that expression or its local equivalent has in the existing law relating to land tenures in force in that area, and shall also include any Jagir, Inam or muafi or other similar grant;

(*b*) the expression "rights" in relation to an estate, shall include any rights vesting in proprietor, sub-proprietor, under-proprietor, tenure-holder or other intermediary and any rights or privileges in respect of land revenue.

31B. Without prejudice to the generality of the provisions contained in article 31A, none of the Acts and Regulations specified in the Ninth Schedule nor any of the provisions thereof shall be deemed to be void, or ever to have become void, on the ground that such Act, Regulation or provision is inconsistent with, or takes away or abridges any of the rights conferred by any provisions of this Part, and notwithstanding any judgement, decree or order of any court or tribunal to the contrary, each of the said Acts and Regulations shall, subject to the power of any competent Legislature to repeal or amend it, continue in force.

RIGHT TO CONSTITUTIONAL REMEDIES

32. (1) The right to move the Supreme Court by appropriate proceedings for the enforcement of the rights conferred by this Part is guaranteed.

(2) The Supreme Court shall have power to issue directions or orders or writs, including writs in the nature of *habeas corpus*, *mandamus*, prohibition, *quo warranto* and *certiorari*, whichever may be appropriate, for the enforcement of any of the rights conferred by this Part.

(3) Without prejudice to the powers conferred on the Supreme Court by clauses (1) and (2), Parliament may by law empower any other court to exercise within the local limits of its jurisdiction all or any of the powers exercisable by the Supreme Court under clause (2).

(4) The right guaranteed by this article shall not be suspended except as otherwise provided for by this Constitution.

33. Parliament may by law determine to what extent any of the rights conferred by this Part shall, in their application to the members of the Armed Forces or the Forces charged with the maintenance of public order, be restricted or abrogated so as to ensure the proper discharge of their duties and the maintenance of discipline among them.

34. Notwithstanding anything in the foregoing provisions of this Part, Parliament may by law indemnify any person in the service of the Union or of a State or any other person in respect of any act done by him in connection with the maintenance or restoration of order in any area within the territory of India where martial law was in force or validate any sentence passed, punishment inflicted, forfeiture ordered or other act done under martial law in such area.

35. Notwithstanding anything in this Constitution—

(*a*) Parliament shall have, and the Legislature of a State shall not have, power to make laws—

(*i*) with respect to any of the matters which under clause (3) of article 16, clause (3) of article 32, article 33 and article 34 may be provided for by law made by Parliament; and

(*ii*) for prescribing punishment for those acts which are declared to be offences under this Part;

and Parliament shall, as soon as may be after the commencement of this Constitution, make laws for prescribing punishment for the acts referred to in sub-clause (*ii*);

(*b*) any law in force immediately before the commencement of this Constitution in the territory of India with respect to any of the matters referred to in sub-clause (*i*) of clause (*a*) or providing for punishment for any act referred to in sub-clause (*ii*) of that clause shall, subject to the terms thereof and to any adaptations and modifications that may be made therein under article 372, continue in force until altered or repealed or amended by Parliament.

Explanation.—In this article, the expression "law in force" has the same meaning as in article 372.

PART IV
DIRECTIVE PRINCIPLES OF STATE POLICY

36. In this Part, unless the context otherwise requires, "the State" has the same meaning as in Part III.

37. The provisions contained in this Part shall not be enforceable by any court, but the principles therein laid down are nevertheless fundamental in the governance of the country and it shall be the duty of the State to apply these principles in making laws.

38. The State shall strive to promote the welfare of the people by securing and protecting as effectively as it may a social order in which justice, social, economic and political, shall inform all the institutions of the national life.

39. The State shall, in particular, direct its policy towards securing—

(*a*) that the citizens, men and women equally, have the right to an adequate means of livelihood;

(*b*) that the ownership and control of the material resources of the community are so distributed as best to subserve the common good;

(*c*) that the operation of the economic system does not result in the concentration of wealth and means of production to the common detriment;

(*d*) that there is equal pay for equal work for both men and women;

(*e*) that the health and strength of workers, men and women, and the tender age of children are not abused and that citizens are not forced by economic necessity to enter avocations unsuited to their age or strength;

(*f*) that childhood and youth are protected against exploitation and against moral and material abandonment.

40. The State shall take steps to organise village panchayats and endow them with such powers and authority as may be necessary to enable them to function as units of self-government.

41. The State shall, within the limits of its economic capacity and development, make effective provision for securing the right to work, to education and to public assistance in cases of unemployment, old age, sickness and disablement, and in other cases of undeserved want.

42. The State shall make provision for securing just and humane conditions of work and for maternity relief.

43. The State shall endeavour to secure, by suitable legislation or economic organisation or in any other way, to all workers, agricultural, industrial or otherwise, work, a living wage, conditions of work ensuring a decent standard of life and full enjoyment of leisure and social and cultural opportunities and, in particular, the State shall endeavour to promote cottage industries on an individual or co-operative basis in rural areas.

44. The State shall endeavour to secure for the citizens a uniform civil code throughout the territory of India.

45. The State shall endeavour to provide, within a period of ten years from the commencement of this Constitution, for free and compulsory education for all children until they complete the age of fourteen years.

46. The State shall promote with special care the educational and economic interests of the weaker sections of the people, and, in particular, of the Scheduled Castes and the Scheduled

Tribes, and shall protect them from social injustice and all forms of exploitation.

47. The State shall regard the raising of the level of nutrition and the standard of living of its people and the improvement of public health as among its primary duties and, in particular, the State shall endeavour to bring about prohibition of the consumption except for medicinal purposes of intoxicating drinks and of drugs which are injurious to health.

48. The State shall endeavour to organise agriculture and animal husbandry on modern and scientific lines and shall, in particular, take steps for preserving and improving the breeds, and prohibiting the slaughter, of cows and calves and other milch and draught cattle.

49. It shall be the obligation of the State to protect every monument or place or object of artistic or historic interest, declared by Parliament by law to be of national importance, from spoliation, disfigurement, destruction, removal, disposal or export, as the case may be.

50. The State shall take steps to separate the judiciary from the executive in the public services of the State.

51. The State shall endeavour to—

(*a*) promote international peace and security;

(*b*) maintain just and honourable relations between nations;

(*c*) foster respect for international law and treaty obligations in the dealings of organised peoples with one another; and

(*d*) encourage settlement of international disputes by arbitration.

PART V—THE UNION
CHAPTER I—THE EXECUTIVE
THE PRESIDENT

52. There shall be a President of India.

53. (1) The executive power of the Union shall be vested in the President and shall be exercised by him either directly or through officers subordinate to him in accordance with this Constitution.

(2) Without prejudice to the generality of the foregoing provision, the supreme command of the Defence Forces of the Union shall be vested in the President and the exercise thereof shall be regulated by law.

(3) Nothing in this article shall—

(*a*) be deemed to transfer to the President any functions conferred by any existing law on the Government of any State or other authority; or

(*b*) prevent Parliament from conferring by law functions on authorities other than the President.

54. The President shall be elected by the members of an electoral college consisting of—

(*a*) the elected members of both Houses of Parliament; and

(*b*) the elected members of the Legislative Assemblies of the States.

55. (1) As far as practicable, there shall be uniformity in the scale of representation of the different States at the election of the President.

(2) For the purpose of securing such uniformity among the States *inter se* as well as parity between the States as a whole and the Union, the number of votes which each elected member of Parliament and of the Legislative Assembly of each State is entitled to cast at such election shall be determined in the following manner:—

(*a*) every elected member of the Legislative Assembly of a State shall have as many votes as there are multiples of one thousand in the quotient obtained by dividing the population of the State by the total number of the elected members of the Assembly;

(*b*) if, after taking the said multiples of one thousand, the remainder is not less than five hundred, then the vote of each member referred to in sub-clause (*a*) shall be further increased by one;

(*c*) each elected member of either House of Parliament shall have such number of votes as may be obtained by dividing the total number of votes assigned to the members of the Legislative Assemblies of the States under sub-clauses (*a*) and (*b*) by the total number of the elected members of both Houses of Parliament, fractions exceeding one-half being counted as one and other fractions being disregarded.

(3) The election of the President shall be held in accordance with the system of proportional representation by means of the single transferable vote and the voting at such election shall be by secret ballot.

Explanation.—In this article, the expression "population" means the population as ascertained at the last preceding census of which the relevant figures have been published.

56. (1) The President shall hold office for a term of five years from the date on which he enters upon his office:

Provided that—

(*a*) the President may, by writing under his hand addressed to the Vice-President, resign his office;

(*b*) the President may, for violation of the Constitution, be removed from office by impeachment in the manner provided in article 61;

(*c*) the President shall, notwithstanding the expiration of his term, continue to hold office until his successor enters upon his office.

(2) Any resignation addressed to the Vice-President under clause (*a*) of the proviso to clause (1) shall forthwith be communicated by him to the Speaker of the House of the People.

57. A person who holds, or who has held, office as President shall, subject to the other provisions of this Constitution, be eligible for re-election to that office.

58. (1) No person shall be eligible for election as President unless he—

(*a*) is a citizen of India,

(*b*) has completed the age of thirty-five years, and

(*c*) is qualified for election as a member of the House of the People.

(2) A person shall not be eligible for election as President if he holds any office of profit under the Government of India or the Government of any State or under any local or other authority subject to the control of any of the said Governments.

Explanation.—For the purposes of this article, a person shall not be deemed to hold any office of profit by reason only that he is the President or Vice-President of the Union or the Governor or Rajpramukh or Uparajpramukh of any State or is a Minister either for the Union or for any State.

59. (1) The President shall not be a member of either House of Parliament or of a House of the Legislature of any State, and if a member of either House of Parliament or of a House of the Legislature of any State be elected President, he shall be deemed to have vacated his seat in that House on the date on which he enters upon his office as President.

(2) The President shall not hold any other office of profit.

(3) The President shall be entitled without payment of rent to the use of his official residences and shall be also entitled to such emoluments, allowances and privileges as may be determined by Parliament by law and, until provision in that behalf is so made, such emoluments, allowances and privileges as are specified in the Second Schedule.

(4) The emoluments and allowances of the President shall not be diminished during his term of office.

60. Every President and every person acting as President or discharging the functions of the President shall, before entering upon his office, make and subscribe in the presence of the Chief Justice of India or, in his absence, the seniormost Judge of the Supreme Court available, an oath or affirmation in the following form, that is to say—

"I, A. B., do $\frac{\text{swear in the name of God}}{\text{solemnly affirm}}$ that I will faithfully execute the office of President (or discharge the functions of the President) of India and will to the best of my ability preserve, protect and defend the Constitution and the law and that I will devote myself to the service and well-being of the people of India."

61. (1) When a President is to be impeached for violation of the Constitution, the charge shall be preferred by either House of Parliament.

(2) No such charge shall be preferred unless—

(*a*) the proposal to prefer such charge is contained in a resolution which has been moved after at least fourteen days' notice in writing signed by not less than one-fourth of the total number of members of the House has been given of their intention to move the resolution, and

(*b*) such resolution has been passed by a majority of not less than two-thirds of the total membership of the House.

(3) When a charge has been so preferred by either House of Parliament, the other House shall investigate the charge or cause the charge to be investigated and the President shall have the right to appear and to be represented at such investigation.

(4) If as a result of the investigation a resolution is passed by a majority of not less than two-thirds of the total membership of the House by which the charge was investigated or caused to be investigated, declaring that the charge preferred against the President has been sustained, such resolution shall have the effect of removing the President from his office as from the date on which the resolution is so passed.

62. (1) An election to fill a vacancy caused by the expiration of the term of office of President shall be completed before the expiration of the term.

(2) An election to fill a vacancy in the office of President occurring by reason of his death, resignation or removal, or otherwise shall be held as soon as possible after, and in no case later than six months from, the date of occurrence of the vacancy; and the person elected to fill the vacancy shall, subject to the provisions of article 56, be entitled to hold office for the full term of five years from the date on which he enters upon his office.

VICE-PRESIDENT

63. There shall be a Vice-President of India.

64. The Vice-President shall be *ex-officio* Chairman of the Council of States and shall not hold any other office of profit:

Provided that during any period when the Vice-President acts as President or discharges the functions of the President under article 65, he shall not perform the duties of the office of Chairman of the Council of States and shall not be entitled to any salary or allowance payable to the Chairman of the Council of States under article 97.

65. (1) In the event of the occurrence of any vacancy in the office of the President by reason of his death, resignation or removal, or otherwise, the Vice-President shall act as President until the date on which a new President elected in accordance with the provisions of this Chapter to fill such vacancy enters upon his office.

(2) When the President is unable to discharge his functions owing to absence, illness or any other cause, the Vice-President shall discharge his functions until the date on which the President resumes his duties.

(3) The Vice-President shall, during, and in respect of, the period while he is so acting as, or discharging the functions of, President, have all the powers and immunities of the President and be entitled to such emoluments, allowances

and privileges as may be determined by Parliament by law and, until provision in that behalf is so made, such emoluments, allowances and privileges as are specified in the Second Schedule.

66. (1) The Vice-President shall be elected by the members of both Houses of Parliament assembled at a joint meeting in accordance with the system of proportional representation by means of the single transferable vote and the voting at such election shall be by secret ballot.

(2) The Vice-President shall not be a member of either House of Parliament or of a House of the Legislature of any State, and if a member of either House of Parliament or of a House of the Legislature of any State be elected Vice-President, he shall be deemed to have vacated his seat in that House on the date on which he enters upon his office as Vice-President.

(3) No person shall be eligible for election as Vice-President unless he—

(*a*) is a citizen of India;

(*b*) has completed the age of thirty-five years; and

(*c*) is qualified for election as a member of the Council of States.

(4) A person shall not be eligible for election as Vice-President if he holds any office of profit under the Government of India or the Government of any State or under any local or other authority subject to the control of any of the said Governments.

Explanation.—For the purposes of this article, a person shall not be deemed to hold any office of profit by reason only that he is the President or Vice-President of the Union or the Governor or Rajpramukh or Uparajpramukh of any State or is a Minister either for the Union or for any State.

67. The Vice-President shall hold office for a term of five years from the date on which he enters upon his office:

Provided that—

(*a*) a Vice-President may, by writing under his hand addressed to the President, resign his office;

(*b*) a Vice-President may be removed from his office by a resolution of the Council of States passed by a majority of all the then members of the Council and agreed to by the House of the People; but no resolution for the purpose of this clause shall be moved unless at least fourteen days' notice has been given of the intention to move the resolution;

(*c*) a Vice-President shall, notwithstanding the expiration of his term, continue to hold office until his successor enters upon his office.

68. (1) An election to fill a vacancy caused by the expiration of the term of office of Vice-President shall be completed before the expiration of the term.

(2) An election to fill a vacancy in the office of Vice-President occurring by reason of his death, resignation or removal, or otherwise shall be held as soon as possible after the occurrence of the vacancy, and the person elected to fill the vacancy shall, subject to the provisions of article 67, be entitled to hold office for the full term of five years from the date on which he enters upon his office.

69. Every Vice-President shall, before entering upon his office, make and subscribe before the President, or some person appointed in that behalf by him, an oath or affirmation in the following form, that is to say—

"I, A.B., do swear in the name of God / solemnly affirm that I will bear true faith and allegiance to the Constitution of India as by law established and that I will faithfully discharge the duty upon which I am about to enter."

70. Parliament may make such provision as it thinks fit for the discharge of the functions of the President in any contingency not provided for in this Chapter.

DOUBTS, DISPUTES

71. (1) All doubts and disputes arising out of or in connection with the election of a President or Vice-President shall be inquired into and decided by the Supreme Court whose decision shall be final.

(2) If the election of a person as President or Vice-President is declared void by the Supreme Court, acts done by him in the exercise and performance of the powers and duties of the office of President or Vice-President, as the case may be, on or before the date of the decision of the Supreme Court shall not be invalidated by reason of that declaration.

(3) Subject to the provisions of this Constitution, Parliament may by law regulate any matter relating to or connected with the election of a President or Vice-President.

72. (1) The President shall have the power to grant pardons, reprieves, respites or remissions of punishment or to suspend, remit or commute the sentence of any person convicted of any offence—

(*a*) in all cases where the punishment or sentence is by a Court Martial;

(*b*) in all cases where the punishment or sentence is for an offence against any law relating to a matter to which the executive power of the Union extends;

(*c*) in all cases where the sentence is a sentence of death.

(2) Nothing in sub-clause (*a*) of clause (1) shall affect the power conferred by law on any officer of the Armed Forces of the Union to suspend, remit or commute a sentence passed by a Court Martial.

(3) Nothing in sub-clause (*c*) of clause (1) shall affect the power to suspend, remit or commute a sentence of death exercisable by the Governor or Rajpramukh of a State under any law for the time being in force.

73. (1) Subject to the provisions of this Constitution, the executive power of the Union shall extend—

(*a*) to the matters with respect to which Parliament has power to make laws; and

(*b*) to the exercise of such rights, authority and jurisdiction as are exercisable by the Government of India by virtue of any treaty or agreement:

Provided that the executive power referred to in sub-clause (*a*) shall not, save as expressly provided in this Constitution or in any law made by Parliament, extend in any State specified in Part A or Part B of the First Schedule to matters with respect to which the Legislature of the State has also power to make laws.

(2) Until otherwise provided by Parliament, a State and any officer or authority of a State may, notwithstanding anything in this article, continue to exercise in matters with respect to which Parliament has power to make laws for that State such executive power or functions as the State or officer or authority thereof could exercise immediately before the commencement of this Constitution.

COUNCIL OF MINISTERS

74. (1) There shall be a Council of Ministers with the Prime Minister at the head to aid and advise the President in the exercise of his functions.

(2) The question whether any, and if so what, advice was tendered by Ministers to the President shall not be inquired into in any court.

75. (1) The Prime Minister shall be appointed by the President and the other Ministers shall be appointed by the President on the advice of the Prime Minister.

(2) The Ministers shall hold office during the pleasure of the President.

(3) The Council of Ministers shall be collectively responsible to the House of the People.

(4) Before a Minister enters upon his office, the President shall administer to him the oaths of office and of secrecy according to the forms set out for the purpose in the Third Schedule.

(5) A Minister who for any period of six consecutive months is not a member of either House of Parliament shall at the expiration of that period cease to be a Minister.

(6) The salaries and allowances of Ministers shall be such as Parliament may from time to time by law determine and, until Parliament so determines, shall be as specified in the Second Schedule.

THE ATTORNEY-GENERAL FOR INDIA

76. (1) The President shall appoint a person who is qualified to be appointed a Judge of the Supreme Court to be Attorney-General for India.

(2) It shall be the duty of the Attorney-General to give advice to the Government of India upon such legal matters, and to perform such other duties of a legal character, as may from time to time be referred or assigned to him by the President, and to discharge the functions conferred on him by or under this Constitution or any other law for the time being in force.

(3) In the performance of his duties the Attorney-General shall have right of audience in all courts in the territory of India.

(4) The Attorney-General shall hold office during the pleasure of the President, and shall receive such remuneration as the President may determine.

CONDUCT OF GOVERNMENT BUSINESS

77. (1) All executive action of the Government of India shall be expressed to be taken in the name of the President.

(2) Orders and other instruments made and executed in the name of the President shall be authenticated in such manner as may be specified in rules to be made by the President, and the validity of an order or instrument which is so authenticated shall not be called in question on the ground that it is not an order or instrument made or executed by the President.

(3) The President shall make rules for the more convenient transaction of the business of the Government of India, and for the allocation among Ministers of the said business.

78. It shall be the duty of the Prime Minister—

(*a*) to communicate to the President all decisions of the Council of Ministers relating to the administration of the affairs of the Union and proposals for legislation;

(*b*) to furnish such information relating to the administration of the affairs of the Union and proposals for legislation as the President may call for; and

(*c*) if the President so requires, to submit for the consideration of the Council of Ministers any matter on which a decision has been taken by a Minister but which has not been considered by the Council.

CHAPTER II—PARLIAMENT

GENERAL

79. There shall be a Parliament for the Union which shall consist of the President and two Houses to be known respectively as the Council of States and the House of the People.

80. (1) The Council of States shall consist of—

(*a*) twelve members to be nominated by the President in accordance with the provisions of clause (3); and

(*b*) not more than two hundred and thirty-eight representatives of the States.

(2) The allocation of seats in the Council of States to be filled by representatives of the States shall be in accordance with the provisions in that behalf contained in the Fourth Schedule.

(3) The members to be nominated by the President under sub-clause (*a*) of clause (1) shall consist of persons having special knowledge or practical experience in respect of such matters as the following, namely:—

Literature, science, art and social service.

(4) The representatives of each State specified in Part A or Part B of the First Schedule in the Council of States shall be elected by the elected members of the Legislative Assembly of the State in accordance with the system of proportional representation by means of the single transferable vote.

(5) The representatives of the States specified in Part C of the First Schedule in the Council of States shall be chosen in such manner as Parliament may by law prescribe.

81. (1) (*a*) Subject to the provisions of clause (2) and of articles 82 and 331, the House of the People shall consist of not more than five hundred members directly elected by the voters in the States.

(*b*) For the purpose of sub-clause (*a*), the States shall be divided, grouped or formed into territorial constituencies and the number of members to be allotted to each such constituency shall be so determined as to ensure that there shall be not less than one member for every 750,000 of the population and not more than one member for every 500,000 of the population.

(*c*) The ratio between the number of members allotted to each territorial constituency and the population of that constituency as ascertained at the last preceding census of which the relevant figures have been published shall, so far as practicable, be the same throughout the territory of India.

(2) The representation in the House of the People of the territories comprised within the territory of India but not included within any State shall be such as Parliament may by law provide.

(3) Upon the completion of each census, the representation of the several territorial constituencies in the House of the People shall be readjusted by such authority, in such manner and with effect from such date as Parliament may by law determine:

Provided that such readjustment shall not affect representation in the House of the People until the dissolution of the then existing House.

82. Notwithstanding anything in clause (1) of article 81, Parliament may by law provide for the representation in the House of the People of any State specified in Part C of the First Schedule or of any territories comprised within the territory of India but not included within any State on a basis or in a manner other than that provided in that clause.

83. (1) The Council of States shall not be subject to dissolution, but as nearly as possible one-third of the members thereof shall retire as soon as may be on the expiration of every second year in accordance with the provisions made in that behalf by Parliament by law.

(2) The House of the People, unless sooner dissolved, shall continue for five years from the date appointed for its first meeting and no longer and the expiration of the said period of five years shall operate as a dissolution of the House.

Provided that the said period may, while a Proclamation of Emergency is in operation, be extended by Parliament by law for a period not exceeding one year at a time and not extending in any case beyond a period of six months after the Proclamation has ceased to operate.

84. A person shall not be qualified to be chosen to fill a seat in Parliament unless he—

(*a*) is a citizen of India;

(*b*) is, in the case of a seat in the Council of States, not less than thirty years of age and, in the case of a seat in the House of the People, not less than twenty-five years of age; and

(*c*) possesses such other qualifications as may be prescribed in that behalf by or under any law made by Parliament.

85. (1) The President shall from time to time summon each house of Parliament to meet at such time and place as he thinks fit, but six months shall not intervene between its last sitting in one session and the date appointed for its first sitting in the next session.

(2) The President may from time to time—

(*a*) prorogue the Houses or either House;

(*b*) dissolve the House of the People.

86. (1) The President may address either House of Parliament or both Houses assembled together, and for that purpose require the attendance of members.

(2) The President may send messages to either House of Parliament, whether with respect to a Bill then pending in Parliament or otherwise, and a House to which any message is so sent shall with all convenient despatch consider any matter required by the message to be taken into consideration.

87. (1) At the commencement of the first session after each general election to the House of the People and at the commencement of the first session of each year the President shall address both Houses of Parliament assembled together and inform Parliament of the causes of its summons.

(2) Provision shall be made by the rules regulating the procedure of either House for the allotment of time for discussion of the matters referred to in such address.

88. Every Minister and the Attorney-General of India shall have the right to speak in, and otherwise to take part in the proceedings of, either House, any joint sitting of the Houses, and any committee of Parliament of which he may be named a member, but shall not by virtue of this article be entitled to vote.

OFFICERS OF PARLIAMENT

89. (1) The Vice-President of India shall be *ex-officio* Chairman of the Council of States.

(2) The Council of States shall, as soon as may be, choose a member of the Council to be Deputy Chairman thereof and, so often as the office of Deputy Chairman becomes vacant, the Council shall choose another member to be Deputy Chairman thereof.

90. A member holding office as Deputy Chairman of the Council of States—

(*a*) shall vacate his office if he ceases to be a member of the Council;

(*b*) may at any time, by writing under his hand addressed to the Chairman, resign his office; and

(*c*) may be removed from his office by a resolution of the Council passed by a majority of all the then members of the Council:

Provided that no resolution for the purpose of clause (*c*) shall be moved unless at least fourteen days' notice has been given of the intention to move the resolution.

91. (1) While the office of Chairman is vacant, or during any period when the Vice-President is acting as, or discharging the functions of, President, the duties of the office shall be performed by the Deputy Chairman, or, if the office of Deputy Chairman is also vacant, by such member of the Council of States as the President may appoint for the purpose.

(2) During the absence of the Chairman from any sitting of the Council of States the Deputy Chairman, or, if he is also absent, such person as may be determined by the rules of procedure of the Council, or, if no such person is present, such other person as may be determined by the Council, shall act as Chairman.

92. (1) At any sitting of the Council of States, while any resolution for the removal of the Vice-President from his office is under consideration, the Chairman, or while any resolution for the removal of the Deputy Chairman from his office is under consideration, the Deputy Chairman, shall not, though he is present, preside, and the provisions of clause (2) of article 91 shall apply in relation to every such sitting as they apply in relation to a sitting from which the Chairman, or, as the case may be, the Deputy Chairman, is absent.

(2) The Chairman shall have the right to speak in, and otherwise to take part in the proceedings of, the Council of States while any resolution for the removal of the Vice-President from his office is under consideration in the Council, but, notwithstanding anything in article 100, shall not be entitled to vote at all on such resolution or on any other matter during such proceedings.

SPEAKER, DEPUTY SPEAKER

93. The House of the People shall, as soon as may be, choose two members of the House to be respectively Speaker and Deputy Speaker thereof and, so often as the office of Speaker or Deputy Speaker becomes vacant, the House shall choose another member to be Speaker or Deputy Speaker, as the case may be.

94. A member holding office as Speaker or Deputy Speaker of the House of the People—

(*a*) shall vacate his office if he ceases to be a member of the House of the People;

(*b*) may at any time, by writing under his hand addressed, if such member is the Speaker, to the Deputy Speaker, and if such member is the Deputy Speaker, to the Speaker, resign his office; and

(*c*) may be removed from his office by a resolution of the House of the People passed by a majority of all the then members of the House:

Provided that no resolution for the purpose of clause (*c*) shall be moved unless at least fourteen days' notice has been given of the intention to move the resolution:

Provided further that, whenever the House of the People is dissolved, the Speaker shall not vacate his office until immediately before the first meeting of the House of the People after the dissolution.

95. (1) While the office of Speaker is vacant, the duties of the office shall be performed by the Deputy Speaker or, if the office of Deputy Speaker is also vacant, by such member of the House of the People as the President may appoint for the purpose.

(2) During the absence of the Speaker from any sitting of the House of the People the Deputy Speaker or, if he is also absent, such person as may be determined by the rules of procedure of the House, or, if no such person is present, such other person as may be determined by the House, shall act as Speaker.

96. (1) At any sitting of the House of the People, while any resolution for the removal of the Speaker from his office is under consideration, the Speaker, or while any resolution for the removal of the Deputy Speaker from his office is under consideration, the Deputy Speaker, shall not, though he is present, preside, and the provisions of clause (2) of article 95 shall apply in relation to every such sitting as they apply in relation to a sitting from which the Speaker, or, as the case may be, the Deputy Speaker, is absent.

(2) The Speaker shall have the right to speak in, and otherwise to take part in the proceedings of, the House of the People while any resolution for his removal from office is under consideration in the House and shall, notwithstanding anything in article 100, be entitled to vote only in the first instance on such resolution or on any other matter during such proceedings but not in the case of an equality of votes.

97. There shall be paid to the Chairman and the Deputy Chairman of the Council of States, and to the Speaker and the Deputy Speaker of the House of the People, such salaries and allowances as may be respectively fixed by Parliament by law and, until provision in that behalf is so made, such salaries and allowances as are specified in the Second Schedule.

98. (1) Each House of Parliament shall have a separate secretarial staff:

Provided that nothing in this clause shall be construed as preventing the creation of posts common to both Houses of Parliament.

(2) Parliament may by law regulate the recruitment and the conditions of service of persons appointed, to the secretarial staff of either House of Parliament.

(3) Until provision is made by Parliament under clause (2), the President may, after consultation with the Speaker of the House of the People or the Chairman of the Council of States, as the case may be, make rules regulating the recruitment, and the conditions of service of persons appointed, to the secretarial staff of the House of the People or the Council of States, and any rules so made shall have effect subject to the provisions of any law made under the said clause.

CONDUCT OF BUSINESS

99. Every member of either House of Parliament shall, before taking his seat, make and subscribe before the President, or some person appointed in that behalf by him, an oath or affirmation according to the form set out for the purpose in the Third Schedule.

100. (1) Save as otherwise provided in this Constitution, all questions at any sitting of either House or joint sitting of the Houses shall be determined by a majority of votes of the members present and voting, other than the Speaker or person acting as Chairman or Speaker.

The Chairman or Speaker, or person acting as such, shall not vote in the first instance, but shall have and exercise a casting vote in the case of an equality of votes.

(2) Either House of Parliament shall have power to act notwithstanding any vacancy in the membership thereof, and any proceedings in Parliament shall be valid notwithstanding that it is discovered subsequently that some person who was not entitled so to do sat or voted or otherwise took part in the proceedings.

(3) Until Parliament by law otherwise provides, the quorum to constitute a meeting of either House of Parliament shall be one-tenth of the total number of members of the House.

(4) If at any time during a meeting of a House there is no quorum, it shall be the duty of the Chairman or Speaker, or person acting as such, either to adjourn the House or to suspend the meeting until there is a quorum.

DISQUALIFICATIONS OF MEMBERS

101. (1) No person shall be a member of both Houses of Parliament and provision shall be made by Parliament by law for the vacation by a person who is chosen a member of both Houses of his seat in one House or the other.

(2) No person shall be a member both of Parliament and of a House of the Legislature of a State specified in Part A or Part B of the First Schedule, and if a person is chosen a member both of Parliament and of a House of the Legislature of such a State, then, at the expiration of such period as may be specified in rules made by the President, that person's seat in Parliament shall become vacant, unless he has previously resigned his seat in the Legislature of the State.

(3) If a member of either House of Parliament—

(*a*) becomes subject to any of the disqualifications mentioned in clause (1) of article 102, or

(*b*) resigns his seat by writing under his hand addressed to the Chairman or the Speaker, as the case may be,

his seat shall thereupon become vacant.

(4) If for a period of sixty days a member of either House of Parliament is without permission of the House absent from all meetings thereof, the House may declare his seat vacant:

Provided that in computing the said period of sixty days no account shall be taken of any period during which the House is prorogued or is adjourned for more than four consecutive days.

102. (1) A person shall be disqualified for being chosen as, and for being, a member of either House of Parliament—

(*a*) if he holds any office of profit under the Government of India or the Government of any State, other than an office declared by Parliament by law not to disqualify its holder;

(*b*) if he is of unsound mind and stands so declared by a competent court;

(*c*) if he is an undischarged insolvent;

(*d*) if he is not a citizen of India, or has voluntarily acquired the citizenship of a foreign State, or is under any acknowledgment of allegiance or adherence to a foreign State;

(*e*) if he is so disqualified by or under any law made by Parliament.

(2) For the purposes of this article a person shall not be deemed to hold an office of profit under the Government of India or the Government of any State by reason only that he is a minister either for the Union or for such State.

(Under the Act XIX of 1950 it is declared: following offices shall not disqualify any one from being a member of Parliament: (*a*) the office of a Minister of State or a Deputy Minister or a Parliamentary Secretary or a Parliamentary Under Secretary; (*b*) an office which is not a whole-time office remunerated either by salary or fees. See also Act LXVIII of 1951).

103. (1) If any question arises as to whether a member of either House of Parliament has become subject to any of the disqualifications mentioned in clause (1) of article 102, the question shall be referred for the decision of the President and his decision shall be final.

(2) Before giving any decision on any such question, the President shall obtain the opinion of the Election Commission and shall act according to such opinion.

104. If a person sits or votes as a member of either House of Parliament before he has complied with the requirements of article 99, or when he knows that he is not qualified or that he is disqualified for membership thereof, or that he is prohibited from so doing by the provisions of any law made by Parliament, he shall be liable in respect of each day on which he so sits or votes to a penalty of five hundred rupees to be recovered as a debt due to the Union.

POWERS, ETC. OF PARLIAMENT, MEMBERS

105. (1) Subject to the provisions of this Constitution and to the rules and standing orders regulating the procedure of Parliament, there shall be freedom of speech in Parliament.

(2) No member of Parliament shall be liable to any proceedings in any court in respect of anything said or any vote given by him in Parliament or any committee thereof, and no person shall be so liable in respect of the publication by or under the authority of either House of Parliament of any report, paper, votes or proceedings.

(3) In other respects, the powers, privileges and immunities of each House of Parliament, and of the members and the committees of each House, shall be such as may from time to time be defined by Parliament by law, and, until so defined, shall be those of the House of Commons of the Parliament of the United Kingdom, and of its members and committees, at the commencement of this Constitution.

(4) The provisions of clauses (1), (2) and (3) shall apply in relation to persons who by virtue of this Constitution have the right to speak in, and otherwise to take parts in the proceedings of, a House of Parliament or any committee thereof as they apply in relation to members of Parliament.

106. Members of either House of Parliament shall be entitled to receive such salaries and allowances as may from time to time be determined by Parliament by law and, until provision in that respect is so made, allowances at such rates and upon such conditions as were immediately before the commencement of this Constitution applicable in the case of members of the Constituent Assembly of the Dominion of India.

LEGISLATIVE PROCEDURE

107. (1) Subject to the provisions of articles 109 and 117 with respect to Money Bills and other financial Bills, a Bill may originate in either House of Parliament.

(2) Subject to the provisions of articles 108 and 109, a Bill shall not be deemed to have been passed by the Houses of Parliament unless it has been agreed to by both Houses, either without amendment or with such amendments only as are agreed to by both Houses.

(3) A Bill pending in Parliament shall not lapse by reason of the prorogation of the Houses.

(4) A Bill pending in the Council of States which has not been passed by the House of the People shall not lapse on a dissolution of the House of the People.

(5) A Bill which is pending in the House of the People, or which having been passed by the House of the People is pending in the Council of States, shall, subject to the provisions of article 108, lapse on a dissolution of the House of the People.

108. (1) If after a Bill has been passed by one House and transmitted to the other House—

(*a*) the Bill is rejected by the other House; or

(*b*) the Houses have finally disagreed as to the amendments to be made in the Bill; or

(*c*) more than six months elapse from the date of the reception of the Bill by the other House without the Bill being passed by it,

the President may, unless the Bill has lapsed by reason of a dissolution of the House of the People, notify to the Houses by message if they are sitting or by public notification if they are not sitting, his intention to summon them to meet in a joint sitting for the purpose of deliberating and voting on the Bill:

Provided that nothing in this clause shall apply to a Money Bill.

(2) In reckoning any such period of six months as is referred to in clause (1), no account shall be taken of any period during which the House referred to in sub-clause (*c*) of that clause is prorogued or adjourned for more than four consecutive days.

(3) Where the President has under clause (1) notified his intention of summoning the Houses to meet in a joint sitting, neither House shall proceed further with the Bill, but the President may at any time after the date of his notification summon the Houses to meet in a joint sitting for the purpose specified in the notification and, if he does so, the Houses shall meet accordingly.

(4) If at the joint sitting of the two Houses the Bill, with such amendments, if any, as are agreed to in joint sitting, is passed by a majority of the total number of members of both Houses present and voting, it shall be deemed for the purposes of this Constitution to have been passed by both Houses:

Provided that at a joint sitting—

(*a*) if the Bill, having been passed by one House, has not been passed by the other House with amendments and returned to the House in which it originated, no amendment shall be proposed to the Bill other than such amendments (if any) as are made necessary by the delay in the passage of the Bill;

(*b*) if the Bill has been so passed and returned, only such amendments as aforesaid shall be proposed to the Bill and such other amendments as are relevant to the matters with respect to which the Houses have not agreed;

and the decision of the person presiding as to the amendments which are admissible under this clause shall be final.

(5) A joint sitting may be held under this article and a Bill passed thereat, notwithstanding that a dissolution of the House of the People has intervened since the President notified his intention to summon the Houses to meet therein.

MONEY BILLS

109. (1) A Money Bill shall not be introduced in the Council of States.

(2) After a Money Bill has been passed by the House of the People it shall be transmitted to the Council of States for its recommendations and the Council of States shall within a period of fourteen days from the date of its receipt of the Bill return the Bill to the House of the People with its recommendations and the House of the People may thereupon either accept or reject all or any of the recommendations of the Council of States.

(3) If the House of the People accepts any of the recommendations of the Council of States, the Money Bill shall be deemed to have been passed by both Houses with the amendments recommended by the Council of States and accepted by the House of the People.

(4) If the House of the People does not accept any of the recommendations of the Council of States, the Money Bill shall be deemed to have been passed by both Houses in the form in which it was passed by the House of the People without any of the amendments recommended by the Council of States.

(5) If a Money Bill passed by the House of the People and transmitted to the Council of States for its recommendations is not returned to the House of the People within the said period of fourteen days, it shall be deemed to have been passed by both Houses at the expiration of the said period in the form in which it was passed by the House of the People.

110. (1) For the purposes of this Chapter, a Bill shall be deemed to be a Money Bill if it contains only provisions dealing with all or any of the following matters, namely—

(*a*) the imposition, abolition, remission, alteration or regulation of any tax;

(*b*) the regulation of the borrowing of money or the giving of any guarantee by the Government of India, or the amendment of the law with respect to any financial obligations undertaken or to be undertaken by the Government of India;

(*c*) the custody of the Consolidated Fund or the Contingency Fund of India, the payment of moneys into or the withdrawal of moneys from any such Fund;

(*d*) the appropriation of moneys out of the Consolidated Fund of India;

(*e*) the declaring of any expenditure to be expenditure charged on the Consolidated Fund of India or the increasing of the amount of any such expenditure;

(*f*) the receipt of money on account of the Consolidated Fund of India or the public account of India or the custody or issue of such money or the audit of the accounts of the Union or of a State; or

(*g*) any matter incidental to any of the matters specified in sub-clauses (*a*) to (*f*).

(2) A Bill shall not be deemed to be a Money Bill by reason only that it provides for the imposition of fines or other pecuniary penalties, or for the demand or payment of fees for licences or fees for services rendered, or by reason that it provides for the imposition, abolition, remission, alteration or regulation of any tax by any local authority or body for local purposes.

(3) If any question arises whether a Bill is a Money Bill or not, the decision of the Speaker of the House of the People thereon shall be final.

(4) There shall be endorsed on every Money Bill when it is transmitted to the Council of States under article 109, and when it is presented to the President for assent under article 111, the certificate of the Speaker of the House of the People signed by him that it is a Money Bill.

111. When a Bill has been passed by the Houses of Parliament, it shall be presented to the President, and the President shall declare either that he assents to the Bill, or that he withholds assent therefrom:

Provided that the President may, as soon as possible after the presentation to him of a Bill for assent, return the Bill if it is not a Money Bill to the Houses with a message requesting that they will reconsider the Bill or any specified provisions thereof and, in particular, will consider the desirability of introducing any such amendments as he may recommend in his message, and when a Bill is so returned, the Houses shall reconsider the Bill accordingly, and if the Bill is passed again by the Houses with or without amendment and presented to the President for assent, the President shall not withhold assent therefrom.

PROCEDURE

112. (1) The President shall in respect of every financial year cause to be laid before both the Houses of Parliament a statement of the estimated receipts and expenditure of the Government of India for that year, in this Part referred to as the "annual financial statement".

(2) The estimates of expenditure embodied in the annual financial statement shall show separately—

(*a*) the sums required to meet expenditure described by this Constitution as expenditure charged upon the Consolidated Fund of India; and

(*b*) the sums required to meet other expenditure proposed to be made from the Consolidated Fund of India,

and shall distinguish expenditure on revenue account from other expenditure.

(3) The following expenditure shall be expenditure charged on the Consolidated Fund of India—

(*a*) the emoluments and allowances of the President and other expenditure relating to his office;

(*b*) the salaries and allowances of the Chairman and the Deputy Chairman of the Council of States and the Speaker and the Deputy Speaker of the House of the People;

(*c*) debt charges for which the Government of India is liable including interest, sinking fund charges and redemption charges, and other expenditure relating to the raising of loans and the service and redemption of debt;

(*d*) (*i*) the salaries, allowances and pensions payable to or in respect of Judges of the Supreme Court;

(*ii*) the pensions payable to or in respect of Judges of the Federal Court;

(*iii*) the pensions payable to or in respect of Judges of any High Court which exercises jurisdiction in relation to any area included in the territory of India or which at any time before the commencement of this Constitution exercised jurisdiction in relation to any area included in a Province corresponding to a State specified in Part A of the First Schedule;

(*e*) the salary, allowances and pension payable to or in respect of the Comptroller and Auditor-General of India;

(*f*) any sums required to satisfy any judgment, decree or award of any court or arbitral tribunal;

(*g*) any other expenditure declared by this Constitution or by Parliament by law to be so charged.

113. (1) So much of the estimates as relates to expenditure charged upon the Consolidated Fund of India shall not be submitted to the vote of Parliament, but nothing in this clause shall be construed as preventing the discussion in either House of Parliament of any of those estimates.

(2) So much of the said estimates as relates to other expenditure shall be submitted in the form of demands for grants to the House of the People, and the House of the People shall have power to assent, or to refuse to assent, to any demand, or to assent to any demand subject to a reduction of the amount specified therein.

(3) No demand for a grant shall be made except on the recommendation of the President.

APPROPRIATION BILLS

114. (1) As soon as may be after the grants under article 113 have been made by the House of the People, there shall be introduced a Bill to provide for the appropriation out of the Consolidated Fund of India of all moneys required to meet—

(*a*) the grants so made by the House of the People; and

(*b*) the expenditure charged on the Consolidated Fund of India but not exceeding in any case the amount shown in the statement previously laid before Parliament.

(2) No amendment shall be proposed to any such Bill in either House of Parliament which will have the effect of varying the amount or altering the destination of any grant so made or of varying the amount of any expenditure charged on the Consolidated Fund of India, and the decision of the person presiding as to whether an amendment is inadmissible under this clause shall be final.

(3) Subject to the provisions of articles 115 and 116, no money shall be withdrawn from the Consolidated Fund of India except under appropriation made by law passed in accordance with the provisions of this article.

115. (1) The President shall—

(*a*) if the amount authorised by any law made in accordance with the provisions of article 114 to be expended for a particular service for the current financial year is found to be insufficient for the purposes of that year or when a need has arisen during the current financial year for supplementary or additional expenditure upon some new service not contemplated in the annual financial statement for that year, or

(*b*) if any money has been spent on any service during a financial year in excess of the amount granted for that service and for that year,

cause to be laid before both the Houses of Parliament another statement showing the estimated amount of that expenditure or cause to be presented to the House of the People a demand for such excess, as the case may be.

(2) The provisions of articles 112, 113 and 114 shall have effect in relation to any such statement and expenditure or demand and also to any law to be made authorising the appropriation of moneys out of the Consolidated Fund of India to meet such expenditure or the grant in respect of such demand as they have effect in relation to the annual financial statement and the expenditure mentioned therein or to a demand for a grant and the law to be made for the authorisation of appropriation of moneys out of the Consolidated Fund of India to meet such expenditure or grant.

VOTING OF GRANTS

116. (1) Notwithstanding anything in the foregoing provisions of this Chapter, the House of the People shall have power—

(*a*) to make any grant in advance in respect of the estimated expenditure for a part of any financial year pending the completion of the procedure prescribed in article 113 for the voting of such grant and the passing of the law in accordance with the provisions of article 114 in relation to that expenditure;

(*b*) to make a grant for meeting an unexpected demand upon the resources of India when on account of the magnitude or the indefinite character of the service the demand cannot be stated with the details ordinarily given in an annual financial statement;

(*c*) to make an exceptional grant which forms no part of the current service of any financial year;

and Parliament shall have power to authorise by law the withdrawal of moneys from the Consolidated Fund of India for the purposes for which the said grants are made.

(2) The provisions of articles 113 and 114 shall have effect in relation to the making of any grant under clause (1) and to any law to be made under that clause as they have effect in relation to the making of a grant with regard to any expenditure mentioned in the annual financial statement and the law to be made for the authorisation of appropriation of moneys out of the Consolidated Fund of India to meet such expenditure.

117. (1) A Bill or amendment making provision for any of the matters specified in sub-clauses (*a*) to (*f*) of clause (1) of article 110 shall not be introduced or moved except on the recommendation of the President and a Bill making such provision shall not be introduced in the Council of States:

Provided that no recommendation shall be required under this clause for the moving of an amendment making provision for the reduction or abolition of any tax.

(2) A Bill or amendment shall not be deemed to make provision for any of the matters aforesaid by reason only that it provides for the imposition of fines or other pecuniary penalties, or for the demand or payment of fees for licences or fees for services rendered, or by reason that it provides for the imposition, abolition, remission, alteration or regulation of any tax by any local authority or body for local purposes.

(3) A Bill which, if enacted and brought into operation, would involve expenditure from the Consolidated Fund of India shall not be passed by either House of Parliament unless the President has recommended to that House the consideration of the Bill.

RULES OF PROCEDURE

118. (1) Each House of Parliament may make rules for regulating, subject to the provisions of this Constitution, its procedure and the conduct of its business.

(2) Until rules are made under clause (1), the rules of procedure and standing orders in force immediately before the commencement of this Constitution with respect to the Legislature of the Dominion of India shall have effect in relation to Parliament subject to such modifications and adaptations as may be made therein by the Chairman of the Council of States or the Speaker of the House of the People, as the case may be.

(3) The President, after consultation with the Chairman of the Council of States and the Speaker of the House of the People, may make rules as to the procedure with respect to joint sittings of, and communications between, the two Houses.

(4) At a joint sitting of the two Houses the Speaker of the House of the People, or in his absence such person as may be determined by rules of procedure made under clause (3), shall preside.

119. Parliament may, for the purpose of the timely completion of financial business, regulate by law the procedure of, and the conduct of business in, each House of Parliament in relation to any financial matter or to any Bill for the appropriation of moneys out of the Consolidated Fund of India, and, if and so far as any provision of any law so made is inconsistent with any rule made by a House of Parliament under clause (1) of article 118 or with any rule or standing order having effect in relation to Parliament under clause (2) of that article, such provision shall prevail.

120. (1) Notwithstanding anything in Part XVII, but subject to the provisions of article 348, business in Parliament shall be transacted in Hindi or in English:

Provided that the Chairman of the Council of States or Speaker of the House of the People, or person acting as such, as the case may be, may permit any member who cannot adequately express himself in Hindi or in English to address the House in his mother tongue.

(2) Unless Parliament by law otherwise provides, this article shall, after the expiration of a period of fifteen years from the commencement of this Constitution, have effect as if the words "or in English" were omitted therefrom.

121. No discussion shall take place in Parliament with respect to the conduct of any Judge of the Supreme Court or of a High Court in the discharge of his duties except upon a motion for presenting an address to the President praying for the removal of the Judge as hereinafter provided.

122. (1) The validity of any proceedings in Parliament shall not be called in question on the ground of any alleged irregularity of procedure.

(2) No officer or member of Parliament in whom powers are vested by or under this Constitution for regulating procedure or the conduct of business, or for maintaining order, in Parliament shall be subject to the jurisdiction of any court in respect of the exercise by him of those powers.

CHAPTER III—LEGISLATIVE POWERS OF THE PRESIDENT

123. (1) If at any time, except when both Houses of Parliament are in session, the President is satisfied that circumstances exist which render it necessary for him to take immediate action, he may promulgate such Ordinances as the circumstances appear to him to require.

(2) An Ordinance promulgated under this article shall have the same force and effect as an Act of Parliament, but every such Ordinance—

(*a*) shall be laid before both Houses of Parliament and shall cease to operate at the expiration of six weeks from the re-assembly of Parliament, or, if before the expiration of that period resolutions disapproving it are passed by both Houses, upon the passing of the second of those resolutions; and

(*b*) may be withdrawn at any time by the President.

Explanation.—Where the Houses of Parliament are summoned to reassemble on different dates, the period of six weeks shall be reckoned from the later of those dates for the purposes of this clause.

(3) If and so far as an Ordinance under this article makes any provision which Parliament would not under this Constitution be competent to enact, it shall be void.

CHAPTER IV—THE UNION JUDICIARY

124. (1) There shall be a Supreme Court of India consisting of a Chief Justice of India and, until Parliament by law prescribes a larger number, of not more than seven other Judges.

(2) Every Judge of the Supreme Court shall be appointed by the President by warrant under his hand and seal after consultation with such of the Judges of the Supreme Court and of the High Courts in the States as the President may deem necessary for the purpose and shall hold office until he attains the age of sixty-five years:

Provided that in the case of appointment of a Judge other than the Chief Justice, the Chief Justice of India shall always be consulted:

Provided further that—

(*a*) a Judge may, by writing under his hand addressed to the President, resign his office;

(*b*) a Judge may be removed from his office in the manner provided in clause (4).

(3) A person shall not be qualified for appointment as a Judge of the Supreme Court unless he is a citizen of India and—

(*a*) has been for at least five years a Judge of a High Court or of two or more such Courts in succession; or

(*b*) has been for at least ten years an advocate of a High Court or of two or more such Courts in succession; or

(*c*) is, in the opinion of the President, a distinguished jurist.

Explanation I.—In this clause "High Court" means a High Court which exercises or which at any time before the commencement of this Constitution exercised, jurisdiction in any part of the territory of India.

Explanation II.—In computing for the purpose of this clause the period during which a person has been an advocate, any period during which a person has held judicial office not inferior to that of a district judge after he became an advocate shall be included.

(4) A Judge of the Supreme Court shall not be removed from his office except by an order of the President passed after an address by each House of Parliament supported by a majority of the total membership of that House and by a majority of not less than two-thirds of the members of that House present and voting has been presented to the President in the same session for such removal on the ground of proved misbehaviour or incapacity.

(5) Parliament may by law regulate the procedure for the presentation of an address and for the investigation and proof of the misbehaviour or incapacity of a Judge under clause (4).

(6) Every person appointed to be a Judge of the Supreme Court shall, before he enters upon his office, make and subscribe before the President, or some person appointed in that behalf by him, an oath or affirmation according to the form set out for the purpose in the Third Schedule.

(7) No person who has held office as a Judge of the Supreme Court shall plead or act in any court or before any authority within the territory of India.

SALARIES, ETC.

125. (1) There shall be paid to the Judges of the Supreme Court such salaries as are specified in the Second Schedule.

(2) Every Judge shall be entitled to such privileges and allowances and to such rights in respect of leave of absence and pension as may from time to time be determined by or under law made by Parliament and, until so determined, to such privileges, allowances and rights as are specified in the Second Schedule:

Provided that neither the privileges nor the allowances of a Judge nor his rights in respect of leave of absence or pension shall be varied to his disadvantage after his appointment.

126. When the office of Chief Justice of India is vacant or when the Chief Justice is, by reason of absence or otherwise, unable to perform the duties of his office, the duties of the office shall be performed by such one of the other Judges of the Court as the President may appoint for the purpose.

127. (1) If at any time there should not be a quorum of the Judges of the Supreme Court available to hold or continue any session of the Court, the Chief Justice of India may, with the previous consent of the President and after consultation with the Chief Justice of the High Court concerned, request in writing the attendance at the sittings of the Court, as an *ad hoc* Judge, for such period as may be necessary, of a Judge of a High Court duly qualified for appointment as a Judge of the Supreme Court to be designated by the Chief Justice of India.

(2) It shall be the duty of the Judge who has been so designated, in priority to other duties of his office, to attend the sittings of the Supreme Court at the time and for the period for which his attendance is required, and while so attending he shall have all the jurisdiction, powers and privileges, and shall discharge the duties, of a Judge of the Supreme Court.

128. Notwithstanding anything in this Chapter, the Chief Justice of India may at any time, with the previous consent of the President, request any person who has held the office of a Judge of the Supreme Court or of the Federal Court to sit and act as a Judge of the Supreme Court, and every such person so requested shall, while so sitting and acting, be entitled to such allowances as the President may by order determine and have all the jurisdiction, powers and privileges of, but shall not otherwise be deemed to be, a Judge of that Court:

Provided that nothing in this article shall be deemed to require any such person as aforesaid to sit and act as a Judge of that Court unless he consents so to do.

129. The Supreme Court shall be a court of record and shall have all the powers of such a court including the power to punish for contempt of itself.

130. The Supreme Court shall sit in Delhi or in such other place or places, as the Chief Justice of India may, with the approval of the President, from time to time, appoint.

ORIGINAL JURISDICTION

131. Subject to the provisions of this Constitution, the Supreme Court shall, to the exclusion of any other court, have original jurisdiction in any dispute—

(*a*) between the Government of India and one or more States; or

(*b*) between the Government of India and any State or States on one side and one or more other States on the other; or

(*c*) between two or more States,

if and in so far as the dispute involves any question (whether of law or fact) on which the existence or extent of a legal right depends:

Provided that the said jurisdiction shall not extend to—

(*i*) a dispute to which a State specified in Part B of the First Schedule is a party, if the dispute arises out of any provision of a treaty, agreement, covenant, engagement, *sanad* or other similar instrument which was entered into or executed before the commencement of this Constitution and has, or has been, continued in operation after such commencement;

(*ii*) a dispute to which any State is a party, if the dispute arises out of any provision of a treaty, agreement, covenant, engagement, *sanad* or other similar instrument which provides that the said jurisdiction shall not extend to such a dispute.

APPELLATE JURISDICTION

132. (1) An appeal shall lie to the Supreme Court from any judgment, decree or final order of a High Court in the territory of India, whether in a civil, criminal or other proceeding, if the High Court certifies that the case involves a substantial question of law as to the interpretation of this Constitution.

(2) Where the High Court has refused to give such a certificate, the Supreme Court may, if it is satisfied that the case involves a substantial question of law as to the interpretation of this Constitution, grant special leave to appeal from such judgment, decree or final order.

(3) Where such a certificate is given or such leave is granted, any party in the case may appeal to the Supreme Court on the ground that any such question as aforesaid has been wrongly decided and, with the leave of the Supreme Court, on any other ground.

Explanation.—For the purposes of this article, the expression "final order" includes an order deciding an issue which, if decided in favour of the appellant, would be sufficient for the final disposal of the case.

133. (1) An appeal shall lie to the Supreme Court from any judgment, decree or final order in a civil proceeding of a High Court in the territory of India if the High Court certifies—

(*a*) that the amount or value of the subject-matter of the dispute in the court of first instance and still in dispute on appeal was and is not less than twenty thousand rupees or such other sum as may be specified in that behalf by Parliament by law; or

(*b*) that the judgment, decree or final order involves directly or indirectly some claim or question respecting property of the like amount or value; or

(*c*) that the case is a fit one for appeal to the Supreme Court;

and, where the judgment, decree or final order appealed from affirms the decision of the court immediately below in any case other than a case referred to in sub-clause (*c*), if the High Court further certifies that the appeal involves some substantial question of law.

(2) Notwithstanding anything in article 132, any party appealing to the Supreme Court under clause (1) may urge as one of the grounds in such appeal that a substantial question of law as to the interpretation of this Constitution has been wrongly decided.

(3) Notwithstanding anything in this article, no appeal shall, unless Parliament by law otherwise provides, lie to the Supreme Court from the judgment, decree or final order of one Judge of a High Court.

134. (1) An appeal shall lie to the Supreme Court from any judgment, final order or sentence in a criminal proceeding of a High Court in the territory of India if the High Court—

(*a*) has on appeal reversed an order of acquittal of an accused person and sentenced him to death; or

(*b*) has withdrawn for trial before itself any case from any court subordinate to its authority and has in such trial convicted the accused person and sentenced him to death; or

(*c*) certifies that the case is a fit one for appeal to the Supreme Court:

Provided that an appeal under sub-clause (*c*) shall lie subject to such provisions as may be made in that behalf under clause (1) of article 145 and to such conditions as the High Court may establish or require.

(2) Parliament may by law confer on the Supreme Court any further powers to entertain and hear appeals from any judgment, final order or sentence in a criminal proceeding of a High Court in the territory of India subject to such conditions and limitations as may be specified in such law.

OTHER FUNCTIONS

135. Until Parliament by law otherwise provides, the Supreme Court shall also have jurisdiction and powers with respect to any matter to which the provisions of article 133 or article 134 do not apply if jurisdiction and powers in relation to that matter were exercisable by the Federal Court immediately before the commencement of this Constitution under any existing law.

136. (1) Notwithstanding anything in this Chapter, the Supreme Court may, in its discretion, grant special leave to appeal from any judgment, decree, determination, sentence or order in any cause or matter passed or made by any court or tribunal in the territory of India.

(2) Nothing in clause (1) shall apply to any judgment, determination, sentence or order passed or made by any court or tribunal constituted by or under any law relating to the Armed Forces.

137. Subject to the provisions of any law made by Parliament or any rules made under article 145, the Supreme Court shall have power to review any judgment pronounced or order made by it.

138. (1) The Supreme Court shall have such further jurisdiction and powers with respect to any of the matters in the Union List as Parliament may by law confer.

(2) The Supreme Court shall have such further jurisdiction and powers with respect to any matter as the Government of India and the Government of any State may by special agreement confer, if Parliament by law provides for the exercise of such jurisdiction and powers by the Supreme Court.

139. Parliament may by law confer on the Supreme Court power to issue directions, orders or writs, including writs in the nature of *habeas corpus*, *mandamus*, prohibition, *quo warranto* and *certiorari*, or any of them, for any purposes other than those mentioned in clause (2) of article 32.

140. Parliament may by law make provision for conferring upon the Supreme Court such supplemental powers not inconsistent with any of the provisions of this Constitution as may appear to be necessary or desirable for the purpose of enabling the Court more effectively to exercise the jurisdiction conferred upon it by or under this Constitution.

141. The law declared by the Supreme Court shall be binding on all courts within the territory of India.

ENFORCEMENT OF DECREES

142. (1) The Supreme Court in the exercise of its jurisdiction may pass such decree or make such order as is necessary for doing complete justice in any cause or matter pending before it, and any decree so passed or order so made shall be enforceable throughout the territory of India in such manner as may be prescribed by or under any law made by Parliament and, until provision in that behalf is so made, in such manner as the President may by order prescribe.

(2) Subject to the provisions of any law made in this behalf by Parliament, the Supreme Court shall, as respects the whole of the territory of India, have all and every power to make any order for the purpose of securing the attendance of any person, the discovery or production of any documents, or the investigation or punishment of any contempt of itself.

143. (1) If at any time it appears to the President that a question of law or fact has arisen, or is likely to arise, which is of such a nature and of such public importance that it is expedient to obtain the opinion of the Supreme Court upon it, he may refer the question to that Court for consideration and the Court may, after such hearing as it thinks fit, report to the President its opinion thereon.

(2) The President may, notwithstanding anything in clause (*i*) of the proviso to article 131, refer a dispute of the kind mentioned in the said clause to the Supreme Court for opinion and the Supreme Court shall, after such hearing as it thinks fit, report to the President its opinion thereon.

144. All authorities, civil and judicial, in the territory of India shall act in aid of the Supreme Court.

RULES OF COURT

145. (1) Subject to the provisions of any law made by Parliament, the Supreme Court may from time to time, with the approval of the President, make rules for regulating generally the practice and procedure of the Court including—

(*a*) rules as to the persons practising before the Court;

(*b*) rules as to the procedure for hearing appeals and other matters pertaining to appeals including the time within which appeals to the Court are to be entered;

(*c*) rules as to the proceedings in the Court for the enforcement of any of the rights conferred by Part III;

(*d*) rules as to the entertainment of appeals under sub-clause (*c*) of clause (1) of article 134;

(*e*) rules as to the conditions subject to which any judgment pronounced or order made by the Court may be reviewed and the procedure for such review including the time within which applications to the Court for such review are to be entered;

(*f*) rules as to the costs of and incidental to any proceedings in the Court and as to the fees to be charged in respect of proceedings therein;

(*g*) rules as to the granting of bail;

(*h*) rules as to stay of proceedings;

(*i*) rules providing for the summary determination of any appeal which appears to the Court to be frivolous or vexatious or brought for the purpose of delay;

(*j*) rules as to the procedure for inquiries referred to in clause (1) of article 317.

(2) Subject to the provisions of clause (3) rules made under this article may fix the minimum number of Judges who are to sit for any purpose, and may provide for the powers of single Judges and Division Courts.

(3) The minimum number of Judges who are to sit for the purpose of deciding any case involving a substantial question of law as to the interpretation of this Constitution or for the purpose of hearing any reference under article 143 shall be five:

Provided that, where the Court hearing an appeal under any of the provisions of this Chapter other than article 132 consists of less than five Judges and in the course of the hearing of the appeal the Court is satisfied that the appeal involves a substantial question of law as to the interpretation of this Constitution the determination of which is necessary for the disposal of the appeal, such Court shall refer the question for opinion to a Court constituted as required by this clause for the purpose of deciding any case involving such a question and shall on receipt of the opinion dispose of the appeal in conformity with such opinion.

(4) No judgment shall be delivered by the Supreme Court save in open Court, and no report shall be made under article 143 save in accordance with an opinion also delivered in open Court.

(5) No judgment and no such opinion shall be delivered by the Supreme Court save with the concurrence of a majority of the Judges present at the hearing of the case, but nothing in this clause shall be deemed to prevent a Judge who does not concur from delivering a dissenting judgment or opinion.

OFFICERS OF COURT

146. (1) Appointments of officers and servants of the Supreme Court shall be made by the Chief Justice of India or such other Judge or officer of the Court as he may direct:

Provided that the President may by rule require that in such cases as may be specified in the rule, no person not already attached to the Court shall be appointed to any office connected with the Court, save after consultation with the Union Public Service Commission.

(2) Subject to the provisions of any law made by Parliament, the conditions of service of officers and servants of the Supreme Court shall be such as may be prescribed by rules made by the Chief Justice of India or by some other Judge or officer of the Court authorised by the Chief Justice of India to make rules for the purpose:

Provided that the rules made under this clause shall, so far as they relate to salaries, allowances, leave or pensions, require the approval of the President.

(3) The administrative expenses of the Supreme Court, including all salaries, allowances and pensions payable to or in respect of the officers and servants of the Court, shall be charged upon the Consolidated Fund of India, and any fees or other moneys taken by the Court shall form part of that Fund.

147. In this Chapter and in Chapter V of Part VI, references to any substantial question of law as to the interpretation of this Constitution shall be construed as including references to any substantial question of law as to the interpretation of the Government of India Act, 1935 (including any enactment amending or supplementing that Act), or of any Order in Council or order made thereunder, or of the Indian Independence Act, 1947, or of any order made thereunder.

COMPTROLLER AND AUDITOR-GENERAL OF INDIA

148. (1) There shall be a Comptroller and Auditor-General of India who shall be appointed by the President by warrant under his hand and seal and shall only be removed from office in like manner and on the like grounds as a Judge of the Supreme Court.

(2) Every person appointed to be the Comptroller and Auditor-General of India shall, before he enters upon his office, make and subscribe before the President, or some person appointed in that behalf by him, an oath or affirmation according to the form set out for the purpose in the Third Schedule.

(3) The salary and other conditions of service of the Comptroller and Auditor-General shall be such as may be determined by Parliament by law and, until they are so determined, shall be as specified in the Second Schedule:

Provided that neither the salary of a Comptroller and Auditor-General nor his rights in respect of leave of absence, pension or age of retirement shall be varied to his disadvantage after his appointment.

(4) The Comptroller and Auditor-General shall not be eligible for further office either under the Government of India or under the Government of any State after he has ceased to hold his office.

(5) Subject to the provisions of this Constitution and of any law made by Parliament, the conditions of service of persons serving in the Indian Audit and Accounts Department and the administrative powers of the Comptroller and Auditor-General shall be such as may be prescribed by rules made by the President after consultation with the Comptroller and Auditor-General.

(6) The administrative expenses of the office of the Comptroller and Auditor-General, including all salaries, allowances and pensions payable to or in respect of persons serving in that office, shall be charged upon the Consolidated Fund of India.

DUTIES AND POWERS

149. (1) The Comptroller and Auditor-General shall perform such duties and exercise such powers in relation to the accounts of the Union and of the States and of any other authority or body as may be prescribed by or under any law made by Parliament and, until provision in that behalf is so made, shall perform such duties and exercise such powers in relation to the accounts of the Union and of the States as were conferred on or exercisable by the Auditor-General of India immediately before the commencement of this Constitution in relation to the accounts of the Dominion of India and of the Provinces respectively.

(2) Nothing in clause (1) shall apply in relation to the accounts for the period beginning on the twenty-sixth day of January 1950 and ending on the thirty-first day of March 1950 of any State specified in Part B of the First Schedule, and the provisions relating to the audit of the accounts of such State in force immediately before the commencement of the Constitution shall continue to have effect in relation to the accounts for the said period of such State.

(3) In its application to the Patiala and East Punjab States Union clause (2) shall have effect as if for the reference therein to the thirty-first day of March 1950, there was substituted a reference to the twelfth day of April 1950. (Clauses (2) & (3) shall remain in force for a period of two years only from the commencement of the Constitution.)

150. The accounts of the Union and of the States shall be kept in such form as the Comptroller and Auditor-General of India may, with the approval of the President, prescribe.

151. (1) The reports of the Comptroller and Auditor-General of India relating to the accounts of the Union shall be submitted to the President, who shall cause them to be laid before each House of Parliament.

(2) The reports of the Comptroller and Auditor-General of India relating to the accounts of a State shall be submitted to the Governor or Rajpramukh of the State, who shall cause them to be laid before the Legislature of the State.

PART VI—THE STATES IN PART A OF THE FIRST SCHEDULE

CHAPTER I—GENERAL

152. In this Part, unless the context otherwise requires, the expression "State" means a State specified in Part A of the First Schedule.

CHAPTER II—THE EXECUTIVE

THE GOVERNOR

153. There shall be a Governor for each State.

154. (1) The executive power of the State shall be vested in the Governor and shall be exercised by him either directly or through officers subordinate to him in accordance with this Constitution.

(2) Nothing in this article shall—

(*a*) be deemed to transfer to the Governor any functions conferred by any existing law on any other authority; or

(*b*) prevent Parliament or the Legislature of the State from conferring by law functions on any authority subordinate to the Governor.

155. The Governor of a State shall be appointed by the President by warrant under his hand and seal.

156. (1) The Governor shall hold office during the pleasure of the President.

(2) The Governor may, by writing under his hand addressed to the President, resign his office.

(3) Subject to the foregoing provisions of this article, a Governor shall hold office for a term of five years from the date on which he enters upon his office:

Provided that a Governor shall, notwithstanding the expiration of his term, continue to hold office until his successor enters upon his office.

157. No person shall be eligible for appointment as Governor unless he is a citizen of India and has completed the age of thirty-five years.

158. (1) The Governor shall not be a member of either House of Parliament or of a House of the Legislature of any State specified in the First Schedule, and if a member of either House of Parliament or of a House of the Legislature of any such State be appointed Governor, he shall be deemed to have vacated his seat in that House on the date on which he enters upon his office as Governor.

(2) The Governor shall not hold any other office of profit.

(3) The Governor shall be entitled without payment of rent the use of his official residences and shall be also entitled to such emoluments, allowances and privileges as may be determined by Parliament by law and, until provision in that behalf is so made, such emoluments, allowances and privileges as are specified in the Second Schedule.

(4) The emoluments and allowances of the Governor shall not be diminished during his term of office.

159. Every Governor and every person discharging the functions of the Governor shall, before entering upon his office, make and subscribe in the presence of the Chief Justice of the High Court exercising jurisdiction in relation to the State, or, in his absence, the seniormost Judge of that Court available, an oath or affirmation in the following form, that is to say—

"I, A.B., do swear in the name of God / solemnly affirm

that I will faithfully execute the office of Governor (or discharge the functions of the Governor) of ———— (*name of the State*) and will to the best of my ability preserve, protect and defend the Constitution and the law and that I will devote myself to the service and well-being of the people of ———— (*name of the State*)."

160. The President may make such provision as he thinks fit for the discharge of the functions of the Governor of a State in any contingency not provided for in this Chapter.

161. The Governor of a State shall have the power to grant pardons, reprieves, respites or remissions of punishment or to suspend, remit or commute the sentence of any person convicted of any offence against any law relating to a matter to which the executive power of the State extends.

162. Subject to the provisions of this Constitution, the executive power of a State shall extend to the matters with respect to which the Legislature of the State has power to make laws:

Provided that in any matter with respect to which the Legislature of a State and Parliament have power to make laws, the executive power of the State shall be subject to, and limited by, the executive power expressly conferred by this Constitution or by any law made by Parliament upon the Union or authorities thereof.

COUNCIL OF MINISTERS

163. (1) There shall be a Council of Ministers with the Chief Minister at the head to aid and advise the Governor in the exercise of his functions, except in so far as he is by or under this Constitution required to exercise his functions or any of them in his discretion.

(2) If any question arises whether any matter is or is not a matter as respects which the Governor is by or under this Constitution required to act in his discretion, the decision of the Governor in his discretion shall be final, and the validity of anything done by the Governor shall not be called in question on the ground that he ought or ought not to have acted in his discretion.

(3) The question whether any, and if so what, advice was tendered by Ministers to the Governor shall not be inquired into in any court.

164. (1) The Chief Minister shall be appointed by the Governor and the other Ministers shall be appointed by the Governor on the advice of the Chief Minister, and the Ministers shall hold office during the pleasure of the Governor:

Provided that in the States of Bihar, Madhya Pradesh and Orissa, there shall be a Minister in charge of tribal welfare who may in addition be in charge of the welfare of the Scheduled Castes and backward classes or any other work.

(2) The Council of Ministers shall be collectively responsible to the Legislative Assembly of the State.

(3) Before a Minister enters upon his office, the Governor shall administer to him the oaths of office and of secrecy according to the forms set out for the purpose in the Third Schedule.

(4) A Minister who for any period of six consecutive months is not a member of the Legislature of the State shall at the expiration of that period cease to be a Minister.

(5) The salaries and allowances of Ministers shall be such as the Legislature of the State may from time to time by law determine and, until the Legislature of the State so determines, shall be as specified in the Second Schedule.

ADVOCATE-GENERAL

165. (1) The Governor of each State shall appoint a person who is qualified to be appointed a Judge of a High Court to be Advocate-General for the State.

(2) It shall be the duty of the Advocate-General to give advice to the Government of the State upon such legal matters, and to perform such other duties of a legal character, as may from time to time be referred or assigned to him by the Governor, and to discharge the functions conferred on him by or under this Constitution or any other law for the time being in force.

(3) The Advocate-General shall hold office during the pleasure of the Governor, and shall receive such remuneration as the Governor may determine.

CONDUCT OF GOVERNMENT BUSINESS

166. (1) All executive action of the Government of a State shall be expressed to be taken in the name of the Governor.

(2) Orders and other instruments made and executed in the name of the Governor shall be authenticated in such manner as may be specified in rules to be made by the Governor, and the validity of an order or instrument which is so authenticated shall not be called in question on the ground that it is not an order or instrument made or executed by the Governor.

(3) The Governor shall make rules for the more convenient transaction of the business of the Government of the State, and for the allocation among Ministers of the said business in so far as it is not business with respect to which the Governor is by or under this Constitution required to act in his discretion.

167. It shall be the duty of the Chief Minister of each State—

(*a*) to communicate to the Governor of the State all decisions of the Council of Ministers relating to the administration of the affairs of the State and proposals for legislation;

(*b*) to furnish such information relating to the administration of the affairs of the State and proposals for legislation as the Governor may call for; and

(*c*) if the Governor so requires, to submit for the consideration of the Council of Ministers any matter on which a decision has been taken by a Minister but which has not been considered by the Council.

CHAPTER III—LEGISLATURE

168. (1) For every State there shall be a Legislature which shall consist of the Governor, and

(*a*) in the States of Bihar, Bombay, Madras, Punjab, the Uttar Pradesh and West Bengal, two Houses;

(*b*) in other States, one House.

(2) Where there are two Houses of the Legislature of a State, one shall be known as the Legislative Council and the other as the Legislative Assembly, and where there is only one House, it shall be known as the Legislative Assembly.

169. (1) Notwithstanding anything in article 168, Parliament may by law provide for the abolition of the Legislative Council of a State having such a Council or for the creation of such a Council in a State having no such Council, if the Legislative Assembly of the State passes a resolution to that effect by a majority of the total membership of the Assembly and by a majority of not less than two-thirds of the members of the Assembly present and voting.

(2) Any law referred to in clause (1) shall contain such provisions for the amendment of this Constitution as may be necessary to give effect to the provisions of the law and may also contain such supplemental, incidental and consequential provisions as Parliament may deem necessary.

(3) No such law as aforesaid shall be deemed to be an amendment of this Constitution for the purposes of article 368.

170. (1) Subject to the provisions of article 333, the Legislative Assembly of each State shall be composed of members chosen by direct election.

(2) The representation of each territorial constituency in the Legislative Assembly of a State shall be on the basis of the population of that constituency as ascertained at the last preceding census of which the relevant figures have been published and shall, save in the case of the autonomous districts of Assam and the constituency comprising the cantonment and municipality of Shillong, be on a scale of not more than one member for every seventy-five thousand of the population:

Provided that the total number of members in the Legislative Assembly of a State shall in no case be more than five hundred or less than sixty.

(3) The ratio between the number of members to be allotted to each territorial constituency in a State and the population of that constituency as ascertained at the last preceding census of which the relevant figures have been published shall, so far as practicable, be the same throughout the State.

(4) Upon the completion of each census, the representation of the several territorial constituencies in the Legislative Assembly of each State shall be readjusted by such authority, in such manner and with effect from such date as Parliament may by law determine:

Provided that such readjustment shall not affect representation in the Legislative Assembly until the dissolution of the then existing Assembly.

COMPOSITION

171. (1) The total number of members in the Legislative Council of a State having such a Council shall not exceed one-fourth of the total number of members in the Legislative Assembly of that State:

Provided that the total number of members in the Legislative Council of a State shall in no case be less than forty.

(2) Until Parliament by law otherwise provides, the composition of the Legislative Council of a State shall be as provided in clause (3).

(3) Of the total number of members of the Legislative Council of a State—

(*a*) as nearly as may be, one-third shall be elected by electorates consisting of members of municipalities, district boards and such other local authorities in the State as Parliament may by law specify;

(*b*) as nearly as may be, one-twelfth shall be elected by electorates consisting of persons residing in the State who have been for at least three years graduates of any university in the territory of India or have been for at least three years in possession of qualifications prescribed by or under any law made by Parliament as equivalent to that of a graduate of any such university;

(c) as nearly as may be, one-twelfth shall be elected by electorates consisting of persons who have been for at least three years engaged in teaching in such educational institutions within the State, not lower in standard than that of a secondary school, as may be prescribed by or under any law made by Parliament;

(d) as nearly as may be, one-third shall be elected by the members of the Legislative Assembly of the State from amongst persons who are not members of the Assembly;

(e) the remainder shall be nominated by the Governor in accordance with the provisions of clause (5).

(4) The members to be elected under sub-clauses (a), (b) and (c) of clause (3) shall be chosen in such territorial constituencies as may be prescribed by or under any law made by Parliament, and the elections under the said sub-clauses and under sub-clause (d) of the said clause shall be held in accordance with the system of proportional representation by means of the single transferable vote.

(5) The members to be nominated by the Governor under sub-clause (e) of clause (3) shall consist of persons having special knowledge or practical experience in respect of such matters as the following, namely:—

Literature, science, art, co-operative movement and social service.

172. (1) Every Legislative Assembly of every State, unless sooner dissolved, shall continue for five years from the date appointed for its first meeting and no longer and the expiration of the said period of five years shall operate as a dissolution of the Assembly:

Provided that the said period may, while a Proclamation of Emergency is in operation, be extended by Parliament by law for a period not exceeding one year at a time and not extending in any case beyond a period of six months after the Proclamation has ceased to operate.

(2) The Legislative Council of a State shall not be subject to dissolution, but as nearly as possible one-third of the members thereof shall retire as soon as may be on the expiration of every second year in accordance with the provisions made in that behalf by Parliament by law.

173. A person shall not be qualified to be chosen to fill a seat in the Legislature of a State unless he—

(a) is a citizen of India;

(b) is, in the case of a seat in the Legislative Assembly, not less than twenty-five years of age and, in the case of a seat in the Legislative Council, not less than thirty years of age; and

(c) possesses such other qualifications as may be prescribed in that behalf by or under any law made by Parliament.

SESSIONS

174. (1) The Governor shall from time to time summon the House or each House of the Legislature of the State to meet at such time and place as he thinks fit, but six months shall not intervene between its last sitting in one session and the date appointed for its first sitting in the next session.

(2) The Governor may from time to time—

(a) prorogue the House or either House;

(b) dissolve the Legislative Assembly.

175. (1) The Governor may address the Legislative Assembly or, in the case of a State having a Legislative Council, either House of the Legislature of the State, or both Houses assembled together, and may for that purpose require the attendance of members.

(2) The Governor may send messages to the House or Houses of the Legislature of the State, whether with respect to a Bill then pending in the Legislature or otherwise, and a House to which any message is so sent shall with all convenient despatch consider any matter required by the message to be taken into consideration.

176. (1) At the commencement of the first session after each general election to the Legislative Assembly and at the commencement of the first session of each year, the Governor shall address the Legislative Assembly or, in the case of a State having a Legislative Council, both Houses assembled together and inform the Legislature of the causes of its summons.

(2) Provision shall be made by the rules regulating the procedure of the House or either House for the allotment of time for discussion of the matters referred to in such address.

177. Every Minister and the Advocate-General for a State shall have the right to speak in, and otherwise to take part in the proceedings of, the Legislative Assembly of the State or, in the case of a State having a Legislative Council, both Houses, and to speak in, and otherwise to take part in the proceedings of, any committee of the Legislature of which he may be named a member, but shall not, by virtue of this article, be entitled to vote.

SPEAKER, DEPUTY SPEAKER

178. Every Legislative Assembly of a State shall, as soon as may be, choose two members of the Assembly to be respectively Speaker and Deputy Speaker thereof and, so often as the office of Speaker or Deputy Speaker becomes vacant, the Assembly shall choose another member to be Speaker or Deputy Speaker, as the case may be.

179. A member holding office as Speaker or Deputy Speaker of an Assembly—

(a) Shall vacate his office if he ceases to be a member of the Assembly;

(b) may at any time by writing under his hand addressed, if such member is the Speaker, to the Deputy Speaker, and if such member is the Deputy Speaker, to the Speaker, resign his office; and

(c) may be removed from his office by a resolution of the Assembly passed by a majority of all the then members of the Assembly:

Provided that no resolution for the purpose of clause (c) shall be moved unless at least fourteen days' notice has been given of the intention to move the resolution:

Provided further that, whenever the Assembly is dissolved, the Speaker shall not vacate his office until immediately before the first meeting of the Assembly after the dissolution.

180. (1) While the office of Speaker is vacant, the duties of the office shall be performed by the Deputy Speaker or, if the office of Deputy Speaker is also vacant, by such member of the Assembly as the Governor may appoint for the purpose.

(2) During the absence of the Speaker from any sitting of the Assembly the Deputy Speaker or, if he is also absent, such person as may be determined by the rules of procedure of the Assembly, or, if no such person is present, such other person as may be determined by the Assembly, shall act as Speaker.

181. (1) At any sitting of the Legislative Assembly, while any resolution for the removal of the Speaker from his office is under consideration, the Speaker, or while any resolution for the removal of the Deputy Speaker from his office is under consideration, the Deputy Speaker, shall not, though he is present, preside, and the provisions of clause (2) of article 180 shall apply in relation to every such sitting as they apply in relation to a sitting from which the Speaker or, as the case may be the Deputy Speaker, is absent.

(2) The Speaker shall have the right to speak in, and otherwise to take part in the proceedings of, the Legislative Assembly while any resolution for his removal from office is under consideration in the Assembly and shall, notwithstanding anything in article 189, be entitled to vote only in the first instance on such resolution or on any other matter during such proceedings but not in the case of an equality of votes.

CHAIRMAN, DEPUTY CHAIRMAN

182. The Legislative Council of every State having such Council shall, as soon as may be, choose two members of the Council to be respectively Chairman and Deputy Chairman thereof and, so often as the office of Chairman or Deputy Chairman becomes vacant, the Council shall choose another member to be Chairman or Deputy Chairman, as the case may be.

183. A member holding office as Chairman or Deputy Chairman of a Legislative Council—

(a) shall vacate his office if he ceases to be a member of the Council;

(b) may at any time by writing under his hand addressed, if such member is the Chairman, to the Deputy Chairman, and if such member is the Deputy Chairman, to the Chairman, resign his office; and

(c) may be removed from his office by a resolution of the Council passed by a majority of all the then members of the Council:

Provided that no resolution for the purpose of clause (c) shall be moved unless at least fourteen days' notice has been given of the intention to move the resolution.

184. (1) While the office of Chairman is vacant, the duties of the office shall be performed by the Deputy Chairman or, if the office of Deputy Chairman is also vacant, by such member of the Council as the Governor may appoint for the purpose.

(2) During the absence of the Chairman from any sitting of the Council the Deputy Chairman or, if he is also absent, such person as may be determined by the rules of procedure of the Council, or, if no such person is present, such other person as may be determined by the Council, shall act as Chairman.

185. (1) At any sitting of the Legislative Council, while any resolution for the removal of the Chairman from his office is under consideration, the Chairman, or while any resolution for the removal of the Deputy Chairman from his office is under consideration, the Deputy Chairman, shall not, though he is present, preside, and the provisions of clause (2) of article 184 shall apply in relation to every such sitting as they apply in relation to a sitting from which the Chairman or, as the case may be, the Deputy Chairman is absent.

(2) The Chairman shall have the right to speak in, and otherwise to take part in the proceedings of, the Legislative Council while any resolution for his removal from office is under consideration in the Council and shall, notwithstanding anything in article 189, be entitled to vote only in the first instance on such resolution or on any other matter during such proceedings but not in the case of an equality of votes.

SALARIES, ETC.

186. There shall be paid to the Speaker and the Deputy Speaker of the Legislative Assembly, and to the Chairman and the Deputy Chairman of the Legislative Council, such salaries and allowances as may be respectively fixed by the Legislature of the State by law and, until provision in that behalf is so made, such salaries and allowances as are specified in the Second Schedule.

187. (1) The House or each House of the Legislature of a State shall have a separate secretarial staff.

Provided that nothing in this clause shall, in the case of the Legislature of a State having

gislative Council, be construed as preventing creation of posts common to both Houses ich Legislature.

) The Legislature of a State may by law late the recruitment, and the conditions of ice of persons appointed, to the secretarial of the House or Houses of the Legislature ie State.

) Until provision is made by the Legislature ie State under clause (2), the Governor may, consultation with the Speaker of the slative Assembly or the Chairman of the slative Council, as the case may be, make regulating the recruitment, and the condi- of service of persons appointed, to the tarial staff of the Assembly or the Council, any rules so made shall have effect subject he provisions of any law made under the clause.

CONDUCT OF BUSINESS

8. Every member of the Legislative mbly or the Legislative Council of a State before taking his seat, make and subscribe re the Governor, or some person appointed hat behalf by him, an oath or affirmation rding to the form set out for the purpose ie Third Schedule.

9. (1) Save as otherwise provided in this titution, all questions at any sitting of a se of the Legislature of a State shall be rmined by a majority of votes of the members ent and voting, other than the Speaker or rman, or person acting as such.

ie Speaker or Chairman, or person acting ich, shall not vote in the first instance, but have and exercise a casting vote in the of an equality of votes.

A House of the Legislature of a State have power to act notwithstanding any ncy in the membership thereof, and any eedings in the Legislature of a State shall alid notwithstanding that it is discovered equently that some person who was not led so to do sat or voted or otherwise took in the proceedings.

Until the Legislature of the State by law wise provides, the quorum to constitute eeting of a House of the Legislature of a shall be ten members or one-tenth of the number of members of the House, whichever ater.

If at any time during a meeting of the lative Assembly or the Legislative Council State there is no quorum, it shall be the of the Speaker or Chairman, or person g as such, either to adjourn the House or spend the meeting until there is a quorum.

DISQUALIFICATIONS OF MEMBERS

). (1) No person shall be a member of Houses of the Legislature of a State and sion shall be made by the Legislature of tate by law for the vacation by a person is chosen a member of both Houses of his n one House or the other.

No person shall be a member of the latures of two or more States specified in First Schedule and if a person is chosen a ber of the Legislatures of two or more such s, then, at the expiration of such period ay be specified in rules made by the Presi- that person's seat in the Legislatures of ich States shall become vacant, unless he previously resigned his seat in the Legisla- of all but one of the States.

If a member of a House of the Legislature State—

becomes subject to any of the disqualifications mentioned in clause (1) of article 191; or

resigns his seat by writing under his hand addressed to the Speaker or the Chairman as the case may be,

eat shall thereupon become vacant.

(4) If for a period of sixty days a member of a House of the Legislature of a State is without permission of the House absent from all meetings thereof, the House may declare his seat vacant:

Provided that in computing the said period of sixty days no account shall be taken of any period during which the House is prorogued or is adjourned for more than four consecutive days.

191. (1) A person shall be disqualified for being chosen as, and for being, a member of the Legislative Assembly or Legislative Council of a State—

(a) if he holds any office of profit under the Government of India or the Government of any State specified in the First Schedule, other than an office declared by the Legislature of the State by law not to disqualify its holder;

(b) if he is of unsound mind and stands so declared by a competent court;

(c) if he is an undischarged insolvent;

(d) if he is not a citizen of India, or has voluntarily acquired the citizenship of a foreign State, or is under any acknowledgment of allegiance or adherence to a foreign State;

(e) if he is so disqualified by or under any law made by Parliament.

(2) For the purposes of this article, a person shall not be deemed to hold an office of profit under the Government of India or the Government of any State specified in the First Schedule by reason only that he is a Minister either for the Union or for such State.

DISPUTES

192. (1) If any question arises as to whether a member of a House of the Legislature of a State has become subject to any of the disqualifications mentioned in clause (1) of article 191, the question shall be referred for the decision of the Governor and his decision shall be final.

(2) Before giving any decision on any such question, the Governor shall obtain the opinion of the Election Commission and shall act according to such opinion.

193. If a person sits or votes as a member of the Legislative Assembly or the Legislative Council of a State before he has complied with the requirements of article 188, or when he knows that he is not qualified or that he is disqualified for membership thereof, or that he is prohibited from so doing by the provisions of any law made by Parliament or the Legislature of the State, he shall be liable in respect of each day on which he so sits or votes to a penalty of five hundred rupees to be recovered as a debt due to the State.

POWERS, ETC. OF MEMBERS

194. (1) Subject to the provisions of this Constitution and to the rules and standing orders regulating the procedure of the Legislature, there shall be freedom of speech in the Legislature of every State.

(2) No member of the Legislature of a State shall be liable to any proceedings in any court in respect of anything said or any vote given by him in the Legislature or any committee thereof, and no person shall be so liable in respect of the publication by or under the authority of a House of such a Legislature of any report, paper, votes or proceedings.

(3) In other respects, the powers, privileges and immunities of a House of the Legislature of a State, and of the members and the committees of a House of such Legislature, shall be such as may from time to time be defined by the Legislature by law, and, until so defined, shall be those of the House of Commons of the Parliament of the United Kingdom, and of its members and committees, at the commencement of this Constitution.

(4) The provisions of clauses (1), (2) and (3) shall apply in relation to persons who by virtue of this Constitution have the right to speak in and otherwise to take part in the proceedings of, a House of the Legislature of a State or any committee thereof as they apply in relation to members of that Legislature.

195. Members of the Legislative Assembly and the Legislative Council of a State shall be entitled to receive such salaries and allowances as may from time to time be determined by the Legislature of the State by law and, until provision in that respect is so made, salaries and allowances at such rates and upon such conditions as were immediately before the commencement of this Constitution applicable in the case of members of the Legislative Assembly of the corresponding Province.

LEGISLATIVE PROCEDURE

196. (1) Subject to the provisions of articles 198 and 207 with respect to Money Bills and other financial Bills, a Bill may originate in either House of the Legislature of a State which has a Legislative Council.

(2) Subject to the provisions of articles 197 and 198, a Bill shall not be deemed to have been passed by the Houses of the Legislature of a State having a Legislative Council unless it has been agreed to by both Houses, either without amendment or with such amendments only as are agreed to by both Houses.

(3) A Bill pending in the Legislature of a State shall not lapse by reason of the prorogation of the House or Houses thereof.

(4) A Bill pending in the Legislative Council of a State which has not been passed by the Legislative Assembly shall not lapse on a dissolution of the Assembly.

(5) A Bill which is pending in the Legislative Assembly of a State, or which having been passed by the Legislative Assembly is pending in the Legislative Council, shall lapse on a dissolution of the Assembly.

197. (1) If after a Bill has been passed by the Legislative Assembly of a State having a Legislative Council and transmitted to the Legislative Council—

(a) the Bill is rejected by the Council; or

(b) more than three months elapse from the date on which the Bill is laid before the Council without the Bill being passed by it; or

(c) the Bill is passed by the Council with amendments to which the Legislative Assembly does not agree,

the Legislative Assembly may, subject to the rules regulating its procedure, pass the Bill again in the same or in any subsequent session with or without such amendments, if any, as have been made, suggested or agreed to by the Legislative Council and then transmit the Bill as so passed to the Legislative Council.

(2) If after a Bill has been so passed for the second time by the Legislative Assembly and transmitted to the Legislative Council—

(a) the Bill is rejected by the Council; or

(b) more than one month elapses from the date on which the Bill is laid before the Council without the Bill being passed by it; or

(c) the Bill is passed by the Council with amendments to which the Legislative Assembly does not agree,

the Bill shall be deemed to have been passed by the Houses of the Legislature of the State in the form in which it was passed by the Legislative Assembly for the second time with such amendments, if any, as have been made or suggested by the Legislative Council and agreed to by the Legislative Assembly.

(3) Nothing in this article shall apply to a Money Bill.

MONEY BILLS

198. (1) A Money Bill shall not be introduced in a Legislative Council.

(2) After a Money Bill has been passed by the Legislative Assembly of a State having a

Legislative Council, it shall be transmitted to the Legislative Council for its recommendations, and the Legislative Council shall within a period of fourteen days from the date of its receipt of the Bill return the Bill to the Legislative Assembly with its recommendations, and the Legislative Assembly may thereupon either accept or reject all or any of the recommendations of the Legislative Council.

(3) If the Legislative Assembly accepts any of the recommendations of the Legislative Council, the Money Bill shall be deemed to have been passed by both Houses with the amendments recommended by the Legislative Council and accepted by the Legislative Assembly.

(4) If the Legislative Assembly does not accept any of the recommendations of the Legislative Council, the Money Bill shall be deemed to have been passed by both Houses in the form in which it was passed by the Legislative Assembly without any of the amendments recommended by the Legislative Council.

(5) If a Money Bill passed by the Legislative Assembly and transmitted to the Legislative Council for its recommendations is not returned to the Legislative Assembly within the said period of fourteen days, it shall be deemed to have been passed by both Houses at the expiration of the said period in the form in which it was passed by the Legislative Assembly.

DEFINITION

199. (1) For the purposes of this Chapter, a Bill shall be deemed to be a Money Bill if it contains only provisions dealing with all or any of the following matters, namely—

(*a*) the imposition, abolition, remission, alteration or regulation of any tax;

(*b*) the regulation of the borrowing of money or the giving of any guarantee by the State, or the amendment of the law with respect to any financial obligations undertaken or to be undertaken by the State;

(*c*) the custody of the Consolidated Fund or the Contingency Fund of the State, the payment of moneys into or the withdrawal of moneys from any such Fund;

(*d*) the appropriation of moneys out of the Consolidated Fund of the State;

(*e*) the declaring of any expenditure to be expenditure charged on the Consolidated Fund of the State, or the increasing of the amount of any such expenditure;

(*f*) the receipt of money on account of the Consolidated Fund of the State or the public account of the State or the custody or issue of such money; or

(*g*) any matter incidental to any of the matters specified in sub-clauses (*a*) to (*f*).

(2) A Bill shall not be deemed to be a Money Bill by reason only that it provides for the imposition of fines or other pecuniary penalties, or for the demand or payment of fees for licences or fees for services rendered, or by reason that it provides for the imposition, abolition, remission, alteration or regulation of any tax by any local authority or body for local purposes.

(3) If any question arises whether a Bill introduced in the Legislature of a State which has a Legislative Council is a Money Bill or not, the decision of the Speaker of the Legislative Assembly of such State thereon shall be final.

(4) There shall be endorsed on every Money Bill when it is transmitted to the Legislative Council under article 198, and when it is presented to the Governor for assent under article 200, the certificate of the Speaker of the Legislative Assembly signed by him that it is a Money Bill.

ASSENT TO BILLS

200. When a Bill has been passed by the Legislative Assembly of a State or, in the case of a State having a Legislative Council, has been passed by both Houses of the Legislature of the State, it shall be presented to the Governor and the Governor shall declare either that he assents to the Bill or that he withholds assent therefrom or that he reserves the Bill for the consideration of the President:

Provided that the Governor may, as soon as possible after the presentation to him of the Bill for assent, return the Bill if it is not a Money Bill together with a message requesting that the House or Houses will reconsider the Bill or any specified provisions thereof and, in particular, will consider the desirability of introducing any such amendments as he may recommend in his message and, when a Bill is so returned, the House or Houses shall reconsider the Bill accordingly, and if the Bill is passed again by the House or Houses with or without amendment and presented to the Governor for assent, the Governor shall not withhold assent therefrom:

Provided further that the Governor shall not assent to, but shall reserve for the consideration of the President, any Bill which in the opinion of the Governor would, if it became law, so derogate from the powers of the High Court as to endanger the position which that Court is by this Constitution designed to fill.

201. When a Bill is reserved by a Governor for the consideration of the President, the President shall declare either that he assents to the Bill or that he withholds assent therefrom:

Provided that, where the Bill is not a Money Bill, the President may direct the Governor to return the Bill to the House or, as the case may be, the Houses of the Legislature of the State together with such a message as is mentioned in the first proviso to article 200 and, when a Bill is so returned, the House or Houses shall reconsider it accordingly within a period of six months from the date of receipt of such message and, if it is again passed by the House or Houses with or without amendment, it shall be presented again to the President for his consideration.

ANNUAL FINANCIAL STATEMENT

202. (1) The Governor shall in respect of every financial year cause to be laid before the House or Houses of the Legislature of the State a statement of the estimated receipts and expenditure of the State for that year, in this Part referred to as the "annual financial statement."

(2) The estimates of expenditure embodied in the annual financial statement shall show separately—

(*a*) the sums required to meet expenditure described by this Constitution as expenditure charged upon the Consolidated Fund of the State; and

(*b*) the sums required to meet other expenditure proposed to be made from the Consolidated Fund of the State;

and shall distinguish expenditure on revenue account from other expenditure.

(3) The following expenditure shall be expenditure charged on the Consolidated Fund of each State—

(*a*) the emoluments and allowances of the Governor and other expenditure relating to his office;

(*b*) the salaries and allowances of the Speaker and the Deputy Speaker of the Legislative Assembly and, in the case of a State having a Legislative Council, also of the Chairman and the Deputy Chairman of the Legislative Council;

(*c*) debt charges for which the State is liable including interest, sinking fund charges and redemption charges, and other expenditure relating to the raising of loans and the service and redemption of debt;

(*d*) expenditure in respect of the salaries and allowances of Judges of any High Court;

(*e*) any sums required to satisfy any judgment, decree or award of any court or arbitral tribunal;

(*f*) any other expenditure declared by this Constitution, or by the Legislature of the State by law, to be so charged.

PROCEDURE

203. (1) So much of the estimates as relates to expenditure charged upon the Consolidated Fund of a State shall not be submitted to the vote of the Legislative Assembly, but nothing in this clause shall be construed as preventing the discussion in the Legislature of any of those estimates.

(2) So much of the said estimates as relates to other expenditure shall be submitted in the form of demands for grants to the Legislative Assembly, and the Legislative Assembly shall have power to assent, or to refuse to assent, to any demand, or to assent to any demand subject to a reduction of the amount specified therein.

(3) No demand for a grant shall be made except on the recommendation of the Governor.

204. (1) As soon as may be after the grants under article 203 have been made by the Assembly, there shall be introduced a Bill to provide for the appropriation out of the Consolidated Fund of the State of all moneys required to meet—

(*a*) the grants so made by the Assembly; and

(*b*) the expenditure charged on the Consolidated Fund of the State but not exceeding in any case the amount shown in the statement previously laid before the House or Houses.

(2) No amendment shall be proposed to any such Bill in the House or either House of the Legislature of the State which will have the effect of varying the amount or altering the destination of any grant so made or of varying the amount of any expenditure charged on the Consolidated Fund of the State, and the decision of the person presiding as to whether an amendment is inadmissible under this clause shall be final.

(3) Subject to the provisions of articles 205 and 206, no money shall be withdrawn from the Consolidated Fund of the State except under appropriation made by law passed in accordance with the provisions of this article.

EXCESS GRANTS

205. (1) The Governor shall—

(*a*) if the amount authorised by any law made in accordance with the provisions of article 204 to be expended for a particular service for the current financial year is found to be insufficient for the purposes of that year or when a need has arisen during the current financial year for supplementary or additional expenditure upon some new service not contemplated in the annual financial statement for that year, or

(*b*) if any money has been spent on any service during a financial year in excess of the amount granted for that service and for that year,

cause to be laid before the House or the Houses of the Legislature of the State another statement showing the estimated amount of that expenditure or cause to be presented to the Legislative Assembly of the State a demand for such excess, as the case may be.

(2) The provisions of articles 202, 203 and 204 shall have effect in relation to any such statement and expenditure or demand and also to any law to be made authorising the appropriation of moneys out of the Consolidated Fund of the State to meet such expenditure or the grant in respect of such demand as they have effect in relation to the annual financial statement and the expenditure mentioned therein or to a demand for a grant and the law to be made for the authorisation of appropriation of moneys out of the Consolidated Fund of the State to meet such expenditure or grant.

EXCEPTIONAL GRANTS

206. (1) Notwithstanding anything in the foregoing provisions of this Chapter, the Legislative Assembly of a State shall have power—

(*a*) to make any grant in advance in respect of the estimated expenditure for a part of any financial year pending the completion of the procedure prescribed in article 203 for the voting of such grant and the passing of the law in accordance with the provisions of article 204 in relation to that expenditure;

(*b*) to make a grant for meeting an unexpected demand upon the resources of the State when on account of the magnitude or the indefinite character of the service the demand cannot be stated with the details ordinarily given in an annual financial statement;

(*c*) to make an exceptional grant which forms no part of the current service of any financial year;

and the Legislature of the State shall have power to authorise by law the withdrawal of moneys from the Consolidated Fund of the State for the purposes for which the said grants are made.

(2) The provisions of articles 203 and 204 shall have effect in relation to the making of any grant under clause (1) and to any law to be made under that clause as they have effect in relation to the making of a grant with regard to any expenditure mentioned in the annual financial statement and the law to be made for the authorisation of appropriation of moneys out of the Consolidated Fund of the State to meet such expenditure.

207. (1) A Bill or amendment making provision for any of the matters specified in sub-clauses (*a*) to (*f*) of clause (1) of article 199 shall not be introduced or moved except on the recommendation of the Governor, and a Bill making such provision shall not be introduced in a Legislative Council:

Provided that no recommendation shall be required under this clause for the moving of an amendment making provision for the reduction or abolition of any tax.

(2) A Bill or amendment shall not be deemed to make provision for any of the matters aforesaid by reason only that it provides for the imposition of fines or other pecuniary penalties, or for the demand or payment of fees for licences or fees for services rendered, or by reason that it provides for the imposition, abolition, remission, alteration or regulation of any tax by any local authority or body for local purposes.

(3) A Bill which, if enacted and brought into operation, would involve expenditure from the Consolidated Fund of a State shall not be passed by a House of the Legislature of the State unless the Governor has recommended to that House the consideration of the Bill.

RULES OF PROCEDURE

208. (1) A House of the Legislature of a State may make rules for regulating, subject to the provisions of this Constitution, its procedure and the conduct of its business.

(2) Until rules are made under clause (1), the rules of procedure and standing orders in force immediately before the commencement of this Constitution with respect to the Legislature for the corresponding Province shall have effect in relation to the Legislature of the State subject to such modifications and adaptations as may be made therein by the Speaker of the Legislative Assembly, or the Chairman of the Legislative Council, as the case may be.

(3) In a State having a Legislative Council the Governor, after consultation with the Speaker of the Legislative Assembly and the Chairman of the Legislative Council, may make rules as to the procedure with respect to communications between the two Houses.

209. The Legislature of a State may, for the purpose of the timely completion of financial business, regulate by law the procedure of, and the conduct of business in, the House or Houses of the Legislature of the State in relation to any financial matter or to any Bill for the appropriation of moneys out of the Consolidated Fund of the State, and, if and so far as any provision of any law so made is inconsistent with any rule made by the House or either House of the Legislature of the State under clause (1) of article 208 or with any rule or standing order having effect in relation to the Legislature of the State under clause (2) of that article, such provision shall prevail.

LANGUAGE

210. (1) Notwithstanding anything in Part XVII, but subject to the provisions of article 348, business in the Legislature of a State shall be transacted in the official language or languages of the State or in Hindi or in English:

Provided that the Speaker of the Legislative Assembly or Chairman of the Legislative Council, or person acting as such, as the case may be, may permit any member who cannot adequately express himself in any of the languages aforesaid to address the House in his mother-tongue.

(2) Unless the Legislature of the State by law otherwise provides, this article shall, after the expiration of a period of fifteen years from the commencement of this Constitution, have effect as if the words "or in English" were omitted therefrom.

211. No discussion shall take place in the Legislature of a State with respect to the conduct of any Judge of the Supreme Court or of a High Court in the discharge of his duties.

212. (1) The validity of any proceedings in the Legislature of a State shall not be called in question on the ground of any alleged irregularity of procedure.

(2) No officer or member of the Legislature of a State in whom powers are vested by or under this Constitution for regulating procedure or the conduct of business, or for maintaining order, in the Legislature shall be subject to the jurisdiction of any court in respect of the exercise by him of those powers.

CHAPTER IV—LEGISLATIVE POWER OF THE GOVERNOR

213. (1) If at any time, except when the Legislative Assembly of a State is in session, or where there is a Legislative Council in a State, except when both Houses of the Legislature are in session, the Governor is satisfied that circumstances exist which render it necessary for him to take immediate action, he may promulgate such Ordinances as the circumstances appear to him to require:

Provided that the Governor shall not, without instructions from the President, promulgate any such Ordinance if—

(*a*) a Bill containing the same provisions would under this Constitution have required the previous sanction of the President for the introduction thereof into the Legislature; or

(*b*) he would have deemed it necessary to reserve a Bill containing the same provisions for the consideration of the President; or

(*c*) an Act of the Legislature of the State containing the same provisions would under this Constitution have been invalid unless, having been reserved for the consideration of the President, it had received the assent of the President.

(2) An Ordinance promulgated under this article shall have the same force and effect as an Act of the Legislature of the State assented to by the Governor, but every such Ordinance—

(*a*) shall be laid before the Legislative Assembly of the State, or where there is a Legislative Council in the State, before both the Houses, and shall cease to operate at the expiration of six weeks from the reassembly of the Legislature, or if before the expiration of that period a resolution disapproving it is passed by the Legislative Assembly and agreed to by the Legislative Council, if any, upon the passing of the resolution or, as the case may be, on the resolution being agreed to by the Council and

(*b*) may be withdrawn at any time by the Governor.

Explanation.—Where the Houses of the Legislature of a State having a Legislative Council are summoned to reassemble on different dates, the period of six weeks shall be reckoned from the later of those dates for the purposes of this clause.

(3) If and so far as an Ordinance under this article makes any provision which would not be valid if enacted in an Act of the Legislature of the State assented to by the Governor, it shall be void:

Provided that, for the purposes of the provisions of this Constitution relating to the effect of an Act of the Legislature of a State which is repugnant to an Act of Parliament or an existing law with respect to a matter enumerated in the Concurrent List, an Ordinance promulgated under this article in pursuance of instructions from the President shall be deemed to be an Act of the Legislature of the State which has been reserved for the consideration of the President and assented to by him.

CHAPTER V—THE HIGH COURTS IN THE STATES

214. (1) There shall be a High Court for each State.

(2) For the purposes of this Constitution the High Court exercising jurisdiction in relation to any Province immediately before the commencement of this Constitution shall be deemed to be the High Court for the corresponding State.

(3) The provisions of this Chapter shall apply to every High Court referred to in this article.

215. Every High Court shall be a court of record and shall have all the powers of such a court including the power to punish for contempt of itself.

216. Every High Court shall consist of a Chief Justice and such other Judges as the President may from time to time deem it necessary to appoint:

Provided that the Judges so appointed shall at no time exceed in number such maximum number as the President may, from time to time, by order fix in relation to that Court.

APPOINTMENT, CONDITIONS

217. (1) Every Judge of a High Court shall be appointed by the President by warrant under his hand and seal after consultation with the Chief Justice of India, the Governor of the State, and, in the case of appointment of a Judge other than the Chief Justice, the Chief Justice of the High Court, and shall hold office until he attains the age of sixty years:

Provided that—

(*a*) a Judge may, by writing under his hand addressed to the President, resign his office;

(*b*) a Judge may be removed from his office by the President in the manner provided in clause (4) of article 124 for the removal of a Judge of the Supreme Court;

(*c*) the office of a Judge shall be vacated by his being appointed by the President to be a Judge of the Supreme Court or by his being transferred by the President to any other High Court within the territory of India.

(2) A person shall not be qualified for appointment as a Judge of a High Court unless he is a citizen of India and—

(*a*) has for at least ten years held a judicial office in the territory of India; or

(*b*) has for at least ten years been an advocate of a High Court in any State specified in the First Schedule or of two or more such Courts in succession.

Explanation.—For the purposes of this clause—

(*a*) in computing the period during which a person has been an advocate of a High Court, there shall be included any period during which the person has held judicial office after he became an advocate;

(*b*) in computing the period during which a person has held judicial office in the territory of India or been an advocate of a High Court, there shall be included any period before the commencement of this Constitution during which he has held judicial office in any area which was comprised before the fifteenth day of August, 1947, within India as defined by the Government of India Act, 1935, or has been an advocate of any High Court in any such area, as the case may be.

218. The provisions of clauses (4) and (5) of article 124 shall apply in relation to a High Court as they apply in relation to the Supreme Court with the substitution of references to the High Court for references to the Supreme Court.

219. Every person appointed to be a Judge of a High Court in a State shall, before he enters upon his office, make and subscribe before the Governor of the State, or some person appointed in that behalf by him, an oath or affirmation according to the form set out for the purpose in the Third Schedule.

220. No person who has held office as a Judge of a High Court after the commencement of this Constitution shall plead or act in any court or before any authority within the territory of India.

SALARIES, ETC.

221. (1) There shall be paid to the Judges of each High Court such salaries as are specified in the Second Schedule.

(2) Every Judge shall be entitled to such allowances and to such rights in respect of leave of absence and pension as may from time to time be determined by or under law made by Parliament and, until so determined, to such allowances and rights as are specified in the Second Schedule:

Provided that neither the allowances of a Judge nor his rights in respect of leave of absence or pension shall be varied to his disadvantage after his appointment.

222. (1) The President may, after consultation with the Chief Justice of India, transfer a Judge from one High Court to any other High Court within the territory of India.

(2) When a Judge is so transferred, he shall, during the period he serves as a Judge of the other Court, be entitled to receive in addition to his salary such compensatory allowance as may be determined by Parliament by law and, until so determined, such compensatory allowance as the President may by order fix.

223. When the office of Chief Justice of a High Court is vacant or when any such Chief Justice is, by reason of absence or otherwise, unable to perform the duties of his office, the duties of the office shall be performed by such one of the other Judges of the Court as the President may appoint for the purpose.

224. Notwithstanding anything in this Chapter, the Chief Justice of a High Court for any State may at any time, with the previous consent of the President, request any person who has held the office of a Judge of that Court or of any other High Court to sit and act as a Judge of the High Court for that State, and every such person so requested shall, while so sitting and acting, be entitled to such allowances as the President may by order determine and have all the jurisdiction, powers and privileges of, but shall not otherwise be deemed to be, a Judge of that High Court:

Provided that nothing in this article shall be deemed to require any such person as aforesaid to sit and act as a Judge of that High Court unless he consents so to do.

JURISDICTION

225. Subject to the provisions of this Constitution and to the provisions of any law of the appropriate Legislature made by virtue of powers conferred on that Legislature by this Constitution, the jurisdiction of, and the law administered in, any existing High Court, and the respective powers of the Judges thereof in relation to the administration of justice in the Court, including any power to make rules of Court and to regulate the sittings of the Court and of members thereof sitting alone or in Division Courts, shall be the same as immediately before the commencement of this Constitution:

Provided that any restriction to which the exercise of original jurisdiction by any of the High Courts with respect to any matter concerning the revenue or concerning any act ordered or done in the collection thereof was subject immediately before the commencement of this Constitution shall no longer apply to the exercise of such jurisdiction.

226. (1) Notwithstanding anything in article 32, every High Court shall have power, throughout the territories in relation to which it exercises jurisdiction, to issue to any person or authority, including in appropriate cases any Government, within those territories directions, orders or writs, including writs in the nature of *habeas corpus*, *mandamus*, prohibition, *quo warranto* and *certiorari*, or any of them, for the enforcement of any of the rights conferred by Part III and for any other purpose.

(2) The power conferred on a High Court by clause (1) shall not be in derogation of the power conferred on the Supreme Court by clause (2) of article 32.

SUPERINTENDENCE

227. (1) Every High Court shall have superintendence over all courts and tribunals throughout the territories in relation to which it exercises jurisdiction.

(2) Without prejudice to the generality of the foregoing provision, the High Court may—

(*a*) call for returns from such courts;

(*b*) make and issue general rules and prescribe forms for regulating the practice and proceedings of such courts; and

(*c*) prescribe forms in which books, entries and accounts shall be kept by the officers of any such courts.

(3) The High Court may also settle tables of fees to be allowed to the sheriff and all clerks and officers of such courts and to attorneys, advocates and pleaders practising therein:

Provided that any rules made, forms prescribed or tables settled under clause (2) or clause (3) shall not be inconsistent with the provision of any law for the time being in force, and shall require the previous approval of the Governor.

(4) Nothing in this article shall be deemed to confer on a High Court powers of superintendence over any court or tribunal constituted by or under any law relating to the Armed Forces.

228. If the High Court is satisfied that a case pending in a court subordinate to it involves a substantial question of law as to the interpretation of this Constitution the determination of which is necessary for the disposal of the case, it shall withdraw the case and may—

(*a*) either dispose of the case itself, or

(*b*) determine the said question of law and return the case to the court from which the case has been so withdrawn together with a copy of its judgment on such question, and the said court shall on receipt thereof proceed to dispose of the case in conformity with such judgment.

229. (1) Appointments of officers and servants of a High Court shall be made by the Chief Justice of the Court or such other Judge or officer of the Court as he may direct:

Provided that the Governor of the State in which the High Court has its principal seat may by rule require that in such cases as may be specified in the rule no person not already attached to the Court shall be appointed to any office connected with the Court save after consultation with the State Public Service Commission.

(2) Subject to the provisions of any law made by the Legislature of the State, the conditions of service of officers and servants of a High Court shall be such as may be prescribed by rules made by the Chief Justice of the Court or by some other Judge or officer of the Court authorised by the Chief Justice to make rules for the purpose:

Provided that the rules made under this clause shall, so far as they relate to salaries, allowances, leave or pensions, require the approval of the Governor of the State in which the High Court has its principal seat.

(3) The administrative expenses of a High Court, including all salaries, allowances and pensions payable to or in respect of the officers and servants of the Court, shall be charged upon the Consolidated Fund of the State, and any fees or other moneys taken by the Court shall form part of that Fund.

EXTENSION, RESTRICTION OF POWER

230. Parliament may by law—

(*a*) extend the jurisdiction of a High Court to, or

(*b*) exclude the jurisdiction of a High Court from,

any State specified in the First Schedule other than, or any area not within, the State in which the High Court has its principal seat.

231. Where a High Court exercises jurisdiction in relation to any area outside the State in which it has its principal seat, nothing in this Constitution shall be construed—

(*a*) as empowering the Legislature of the State in which the Court has its principal seat to increase, restrict or abolish that jurisdiction;

(*b*) as empowering the Legislature of a State specified in Part A or Part B of the First Schedule in which any such area is situate, to abolish that jurisdiction; or

(*c*) as preventing the Legislature having power to make laws in that behalf for any such area, from passing, subject to the provisions of clause (*b*), such laws with respect to the jurisdiction of the Court in relation to that area as it would be competent to pass if the principal seat of the Court were in that area.

232. Where a High Court exercises jurisdiction in relation to more than one State specified in the First Schedule or in relation to a State and an area not forming part of the State—

(*a*) references in this Chapter to the Governor in relation to the Judges of a High Court shall be construed as references to the Governor of the State in which the Court has its principal seat;

(*b*) the reference to the approval by the Governor of rules, forms and tables for subordinate courts shall be construed as a reference to the approval thereof by the Governor or the Rajpramukh of the State in which the subordinate court is situate, or if it is situate in an area not forming part of any State specified in Part A or Part B of the First Schedule, by the President; and

(*c*) references to the Consolidated Fund of the State shall be construed as references to the Consolidated Fund of the State in which the Court has its principal seat.

CHAPTER VI—SUBORDINATE COURTS

233. (1) Appointments of persons to be, and the posting and promotion of, district judges in any State shall be made by the Governor of the State in consultation with the High Court exercising jurisdiction in relation to such State.

(2) A person not already in the service of the Union or of the State shall only be eligible to be appointed a district judge if he has been for not less than seven years an advocate or a pleader and is recommended by the High Court for appointment.

234. Appointments of persons other than district judges to the judicial service of a State shall be made by the Governor of the State in accordance with rules made by him in that behalf after consultation with the State Public Service Commission and with the High Court exercising jurisdiction in relation to such State.

235. The control over district courts and courts subordinate thereto including the posting and promotion of, and the grant of leave to, persons belonging to the judicial service of a State and holding any post inferior to the post of district judge shall be vested in the High Court, but nothing in this article shall be construed as taking away from any such person any right of appeal which he may have under the law regulating the conditions of his service or as authorising the High Court to deal with him otherwise than in accordance with the conditions of his service prescribed under such law.

236. In this Chapter—

(*a*) the expression "district judge" includes judge of a city civil court, additional district judge, joint district judge, assistant district judge, chief judge of a small cause court, chief presidency magistrate, additional chief presidency magistrate, sessions judge, additional sessions judge and assistant sessions judge;

(*b*) the expression "judicial service" means a service consisting exclusively of persons intended to fill the post of district judge and other civil judicial posts inferior to the post of district judge.

237. The Governor may by public notification direct that the foregoing provisions of this Chapter and any rules made thereunder shall with effect from such date as may be fixed by him in that behalf apply in relation to any class or classes of magistrates in the State as they apply in relation to persons appointed to the judicial service of the State subject to such exceptions and modifications as may be specified in the notification.

PART VII
STATES IN PART B OF FIRST SCHEDULE

238. The provisions of Part VI shall apply in relation to the States specified in Part B of the First Schedule as they apply in relation to the States specified in Part A of that Schedule subject to the following modifications and omissions, namely:—

(1) For the word "Governor" wherever it occurs in the said Part VI, except where it occurs for the second time in clause (*b*) of article 232, the word "Rajpramukh" shall be substituted.

(2) In article 152, for the word and letter "Part A" the word and letter "Part B" shall be substituted.

(3) Articles 155, 156 and 157 shall be omitted.

(4) In article 158,—

(*i*) in clause (1), for the words "be appointed" the word "becomes" shall be substituted;

(*ii*) for clause (3), the following clause shall be substituted, namely:—

"(3) The Rajpramukh shall, unless he has his own residence in the principal seat of Government of the State, be entitled without payment of rent to the use of an official residence and shall be also entitled to such allowances and privileges as the President may, by general or special order, determine;"

(*iii*) in clause (4), the words "emoluments and" shall be omitted.

(5) In article 159, after the words "seniormost Judge of that Court available" the words "or in such other manner as may be prescribed in that behalf by the President" shall be inserted.

(6) In article 164, for the proviso to clause (1) the following proviso shall be substituted, namely:—

"Provided that in the State of Madhya Bharat there shall be a Minister in charge of tribal welfare who may in addition be in charge of the welfare of the Scheduled Castes and backward classes or any other work."

(7) In article 168, for clause (1) the following clause shall be substituted, namely:—

"(1) For every State there shall be a Legislature which shall consist of the Rajpramukh and—

(*a*) in the State of Mysore, two Houses;

(*b*) in other States, one House."

(8) In article 186, for the words "as are specified in the Second Schedule" the words "as the Rajpramukh may determine" shall be substituted.

(9) In article 195, for the words "as were immediately before the commencement of this Constitution applicable in the case of members of the Legislative Assembly of the corresponding Province" the words "as the Rajpramukh may determine" shall be substituted.

(10) In clause (3) of article 202—

(*i*) for sub-clause (*a*), the following sub-clause shall be substituted, namely:

"(*a*) the allowances of the Rajpramukh and other expenditure relating to his office as determined by the President by general or special order;"

(*ii*) for sub-clause (*f*) the following sub-clause shall be substituted, namely:

"(*f*) in the case of the State of Travancore-Cochin, a sum of fifty-one lakhs of rupees required to be paid annually to the Devaswom fund under the covenant entered into before the commencement of this Constitution by the Rulers of the Indian States of Travancore and Cochin for the formation of the United State of Travancore and Cochin;

(*g*) any other expenditure declared by this Constitution, or by the Legislature of the State by law, to be so charged."

(11) In article 208, for clause (2), the following clause shall be substituted, namely:—

"(2) Until rules are made under clause (1), the rules of procedure and standing orders in force immediately before the commencement of this Constitution with respect to the Legislature for the State or, where no House of the Legislature for the State existed, the rules of procedure and standing orders in force immediately before such commencement with respect to the Legislative Assembly of such Province as may be specified in that behalf by the Rajpramukh of the State, shall have effect in relation to the Legislature of the State subject to such modifications and adaptations as may be made therein by the Speaker of the Legislative Assembly or the Chairman of the Legislative Council as the case may be."

(12) In clause (2) of article 214, for the word "Province" the words "Indian State" shall be substituted.

(13) For article 221, the following article shall be substituted, namely:—

"221. (1) There shall be paid to the Judges of each High Court such salaries as may be determined by the President after consultation with the Rajpramukh.

(2) Every Judge shall be entitled to such allowances and to such rights in respect of leave of absence and pension as may from time to time be determined by or under law made by Parliament and, until so determined, to such allowances and rights as may be determined by the President after consultation with the Rajpramukh:

Provided that neither the allowances of a Judge nor his rights in respect of leave of absence or pension shall be varied to his disadvantage after his appointment."

PART VIII
STATES IN PART C OF FIRST SCHEDULE

239. (1) Subject to the other provisions of this Part, a State specified in Part C of the First Schedule shall be administered by the President acting, to such extent as he thinks fit, through a Chief Commissioner or a Lieutenant-Governor to be appointed by him or through the Government of a neighbouring State:

Provided that the President shall not act through the Government of a neighbouring State save after—

(*a*) consulting the Government concerned; and

(*b*) ascertaining in such manner as the President considers most appropriate the views of the people of the State to be so administered.

(2) In this article, references to a State shall include references to a part of a State.

240. (1) Parliament may by law create or continue for any State specified in Part C of the First Schedule and administered through a Chief Commissioner or Lieutenant-Governor—

(*a*) a body, whether nominated, elected or partly nominated and partly elected, to function as a Legislature for the State; or

(*b*) a Council of Advisers or Ministers,

or both with such constitution, powers and functions, in each case, as may be specified in the law.

(2) Any such law as is referred to in clause (1) shall not be deemed to be an amendment of this Constitution for the purposes of article 368 notwithstanding that it contains any provision which amends or has the effect of amending the Constitution.

(*The Government of Part C States Act—Act XLIX of* 1951—*makes detailed provisions for the Administration of Part C States.*—Editor).

241. (1) Parliament may by law constitute a High Court for a State specified in Part C of

the First Schedule or declare any court in any such State to be a High Court for all or any of the purposes of this Constitution.

(*By Act No. XV of* 1950 *the courts of Judicial Commissioners in Part C States are declared as High Courts for the purposes of Articles* 132, 133 *and* 134.—Editor.)

(2) The provisions of Chapter V of Part VI shall apply in relation to every High Court referred to in clause (1) as they apply in relation to a High Court referred to in article 214 subject to such modifications or exceptions as Parliament may by law provide.

(3) Subject to the provisions of this Constitution and to the provisions of any law of the appropriate Legislature made by virtue of powers conferred on that Legislature by or under this Constitution, every High Court exercising jurisdiction immediately before the commencement of this Constitution in relation to any State specified in Part C of the First Schedule or any area included therein shall continue to exercise such jurisdiction in relation to that State or area after such commencement.

(4) Nothing in this article derogates from the power of Parliament to extend or exclude the jurisdiction of a High Court in any State specified in Part A or Part B of the First Schedule to, or from, any State specified in Part C of that Schedule or any area included within that State.

242. (1) Until Parliament by law otherwise provides, the constitution, powers and functions of the Coorg Legislative Council shall be the same as they were immediately before the commencement of this Constitution.

(2) The arrangements with respect to revenues collected in Coorg and expenses in respect of Coorg shall, until other provision is made in that behalf by the President by order, continue unchanged.

PART IX

TERRITORIES IN PART D OF FIRST SCHEDULE AND OTHER TERRITORIES NOT SPECIFIED IN THAT SCHEDULE

243. (1) Any territory specified in Part D of the First Schedule and any other territory comprised within the territory of India but not specified in that Schedule shall be administered by the President acting, to such extent as he thinks fit, through a Chief Commissioner or other authority to be appointed by him.

(2) The President may make regulations for the peace and good government of any such territory and any regulation so made may repeal or amend any law made by Parliament or any existing law which is for the time being applicable to such territory and, when promulgated by the President, shall have the same force and effect as an Act of Parliament which applies to such territory.

PART X

SCHEDULED AND TRIBAL AREAS

244. (1) The provisions of the Fifth Schedule shall apply to the administration and control of the Scheduled Areas and Scheduled Tribes in any State specified in Part A or Part B of the First Schedule other than the State of Assam.

(2) The provisions of the Sixth Schedule shall apply to the administration of the tribal areas in the State of Assam.

PART XI

RELATIONS BETWEEN UNION AND STATES

CHAPTER I.—LEGISLATIVE RELATIONS

DISTRIBUTION OF LEGISLATIVE POWERS

245. (1) Subject to the provisions of this Constitution, Parliament may make laws for the whole or any part of the territory of India, and the Legislature of a State may make laws for the whole or any part of the State.

(2) No law made by Parliament shall be deemed to be invalid on the ground that it would have extra-territorial operation.

246. (1) Notwithstanding anything in clauses (2) and (3), Parliament has exclusive power to make laws with respect to any of the matters enumerated in List I in the Seventh Schedule (in this Constitution referred to as the "Union List").

(2) Notwithstanding anything in clause (3), Parliament, and, subject to clause (1), the Legislature of any State specified in Part A or Part B of the First Schedule also, have power to make laws with respect to any of the matters enumerated in List III in the Seventh Schedule (in this Constitution referred to as the "Concurrent List").

(3) Subject to clauses (1) and (2), the Legislature of any State specified in Part A or Part B of the First Schedule has exclusive power to make laws for such State or any part thereof with respect to any of the matters enumerated in List II in the Seventh Schedule (in this Constitution referred to as the "State List").

(4) Parliament has power to make laws with respect to any matter for any part of the territory of India not included in Part A or Part B of the First Schedule notwithstanding that such matter is a matter enumerated in the State List.

247. Notwithstanding anything in this Chapter, Parliament may by law provide for the establishment of any additional courts for the better administration of laws made by Parliament or of any existing law with respect to a matter enumerated in the Union List.

248. (1) Parliament has exclusive power to make any law with respect to any matter not enumerated in the Concurrent List or State List.

(2) Such power shall include the power of making any law imposing a tax not mentioned in either of those Lists.

CENTRE AND STATE LIST

249. (1) Notwithstanding anything in the foregoing provisions of this Chapter, if the Council of States has declared by resolution supported by not less than two-thirds of the members present and voting that it is necessary or expedient in the national interest that Parliament should make laws with respect to any matter enumerated in the State List specified in the resolution, it shall be lawful for Parliament to make laws for the whole or any part of the territory of India with respect to that matter while the resolution remains in force.

(2) A resolution passed under clause (1) shall remain in force for such period not exceeding one year as may be specified therein:

Provided that, if and so often as a resolution approving the continuance in force of any such resolution is passed in the manner provided in clause (1), such resolution shall continue in force for a further period of one year from the date on which under this clause it would otherwise have ceased to be in force.

(3) A law made by Parliament which Parliament would not but for the passing of a resolution under clause (1) have been competent to make shall, to the extent of the incompetency, cease to have effect on the expiration of a period of six months after the resolution has ceased to be in force, except as respects things done or omitted to be done before the expiration of the said period.

250. (1) Notwithstanding anything in this Chapter, Parliament shall, while a Proclamation of Emergency is in operation, have power to make laws for the whole or any part of the territory of India with respect to any of the matters enumerated in the State List.

(2) A law made by Parliament which Parliament would not but for the issue of a Proclamation of Emergency have been competent to make shall, to the extent of the incompetency, cease to have effect on the expiration of a period of six months after the Proclamation has ceased to operate, except as respects things done or omitted to be done before the expiration of the said period.

INCONSISTENCIES

251. Nothing in articles 249 and 250 shall restrict the power of the Legislature of a State to make any law which under this Constitution it has power to make, but if any provision of a law made by the Legislature of a State is repugnant to any provision of a law made by Parliament which Parliament has under either of the said articles power to make, the law made by Parliament, whether passed before or after the law made by the Legislature of the State, shall prevail, and the law made by the Legislature of the State shall to the extent of the repugnancy but so long only as the law made by Parliament continues to have effect be inoperative.

252. (1) If it appears to the Legislatures of two or more States to be desirable that any of the matters with respect to which Parliament has no power to make laws for the States except as provided in articles 249 and 250 should be regulated in such States by Parliament by law, and if resolutions to that effect are passed by all the Houses of the Legislatures of those States, it shall be lawful for Parliament to pass an Act for regulating that matter accordingly, and any Act so passed shall apply to such States and to any other State by which it is adopted afterwards by resolution passed in that behalf by the House or where there are two Houses, by each of the Houses of the Legislature of that State.

(2) Any Act so passed by Parliament may be amended or repealed by an Act of Parliament passed or adopted in like manner but shall not as respects any State to which it applies, be amended or repealed by an Act of the Legislature of that State.

253. Notwithstanding anything in the foregoing provisions of this Chapter, Parliament has power to make any law for the whole or any part of the territory of India for implementing any treaty, agreement or convention with any other country or countries or any decision made at any international conference, association or other body.

254. (1) If any provision of a law made by the Legislature of a State repugnant to any provision of a law made by Parliament which Parliament is competent to enact, or to any provision of an existing law with respect to one of the matters enumerated in the Concurrent List, then subject to the provisions of clause (2), the law made by Parliament, whether passed before or after the law made by the Legislature of such State, or, as the case may be, the existing law shall prevail and the law made by the Legislature of the State shall, to the extent of the repugnancy, be void.

(2) Where a law made by the Legislature of a State specified in Part A or Part B of the First Schedule with respect to one of the matters enumerated in the Concurrent List contains any provision repugnant to the provisions of an earlier law made by Parliament or an existing law with respect to that matter, then, the law so made by the Legislature of such State shall, if it has been reserved for the consideration of the President and has received his assent, prevail in that State:

Provided that nothing in this clause shall prevent Parliament from enacting at any time any law with respect to the same matter including a law adding to, amending, varying or repealing the law so made by the Legislature of the State.

255. No Act of Parliament or of the Legislature of a State specified in Part A or Part B of the First Schedule, and no provision in any such Act, shall be invalid by reason only that some recommendation or previous sanction required by this Constitution was not given, if assent to that Act was given—

(*a*) where the recommendation required was that of the Governor, either by the Governor or by the President;

(*b*) where the recommendation required was that of the Rajpramukh, either by the Rajpramukh or by the President;

(*c*) where the recommendation or previous sanction required was that of the President, by the President.

CHAPTER II.—ADMINISTRATIVE RELATIONS

RIGHT TO ISSUE DIRECTIONS

256. The executive power of every State shall be so exercised as to ensure compliance with the laws made by Parliament and any existing laws which apply in that State, and the executive power of the Union shall extend to the giving of such directions to a State as may appear to the Government of India to be necessary for that purpose.

257. (1) The executive power of every State shall be so exercised as not to impede or prejudice the exercise of the executive power of the Union, and the executive power of the Union shall extend to the giving of such directions to a State as may appear to the Government of India to be necessary for that purpose.

(2) The executive power of the Union shall also extend to the giving of directions to a State as to the construction and maintenance of means of communication declared in the direction to be of national or military importance

Provided that nothing in this clause shall be taken as restricting the power of Parliament to declare highways or waterways to be national highways or national waterways or the power of the Union with respect to the highways or waterways so declared or the power of the Union to construct and maintain means of communication as part of its functions with respect to naval, military and air force works.

(3) The executive power of the Union shall also extend to the giving of directions to a State as to the measures to be taken for the protection of the railways within the State.

(4) Where in carrying out any direction given to a State under clause (2) as to the construction or maintenance of any means of communication or under clause (3) as to the measures to be taken for the protection of any railway, costs have been incurred in excess of those which would have been incurred in the discharge of the normal duties of the State if such direction had not been given, there shall be paid by the Government of India to the State such sum as may be agreed, or, in default of agreement, as may be determined by an arbitrator appointed by the Chief Justice of India, in respect of the extra costs so incurred by the State.

CONFERRING POWER ON STATE

258. (1) Notwithstanding anything in this Constitution, the President may, with the consent of the Government of a State, entrust either conditionally or unconditionally to that Government or to its officers functions in relation to any matter to which the executive power of the Union extends.

(2) A law made by Parliament which applies in any State may, notwithstanding that it relates to a matter with respect to which the Legislature of the State has no power to make laws, confer powers and impose duties, or authorise the conferring of powers and the imposition of duties, upon the State or officers and authorities thereof.

(3) Where by virtue of this article powers and duties have been conferred or imposed upon a State or officers or authorities thereof, there shall be paid by the Government of India to the State such sum as may be agreed, or, in default of agreement, as may be determined by an arbitrator appointed by the Chief Justice of India, in respect of any extra costs of administration incurred by the State in connection with the exercise of those powers and duties.

259. (1) Notwithstanding anything in this Constitution, a State specified in Part B of the First Schedule having any Armed Forces immediately before the commencement of this Constitution may, until Parliament by law otherwise provides, continue to maintain the said Forces after such commencement subject to such general or special orders as the President may from time to time issue in that behalf.

(2) Any such Armed Forces as are referred to in clause (1) shall form part of the Armed Forces of the Union.

EXTRA-TERRITORIAL JURISDICTION

260. The Government of India may by agreement with the Government of any territory not being part of the territory of India undertake any executive, legislative or judicial functions vested in the Government of such territory, but every such agreement shall be subject to, and governed by, any law relating to the exercise of foreign jurisdiction for the time being in force.

261. (1) Full faith and credit shall be given throughout the territory of India to public acts, records and judicial proceedings of the Union and of every State.

(2) The manner in which and the conditions under which the acts, records and proceedings referred to in clause (1) shall be proved and the effect thereof determined shall be as provided by law made by Parliament.

(3) Final judgments or orders delivered or passed by civil courts in any part of the territory of India shall be capable of execution anywhere within that territory according to law.

262. (1) Parliament may by law provide for the adjudication of any dispute or complaint with respect to the use, distribution or control of the waters of, or in, any inter-State river or river valley.

(2) Notwithstanding anything in this Constitution, Parliament may by law provide that neither the Supreme Court nor any other court shall exercise jurisdiction in respect of any such dispute or complaint as is referred to in clause (1).

CO-ORDINATION BETWEEN STATES

263. If at any time it appears to the President that the public interests would be served by the establishment of a Council charged with the duty of—

(*a*) inquiring into and advising upon disputes which may have arisen between States;

(*b*) investigating and discussing subjects in which some or all of the States, or the Union and one or more of the States, have a common interest; or

(*c*) making recommendations upon any such subject and, in particular, recommendations for the better co-ordination of policy and action with respect to that subject,

it shall be lawful for the President by order to establish such a Council, and to define the nature of the duties to be performed by it and its organisation and procedure.

PART XII.—FINANCE, PROPERTY, CONTRACTS, SUITS

CHAPTER I.—FINANCE

264. In this Part, unless the context otherwise requires,—

(*a*) "Finance Commission" means a Finance Commission constituted under article 280;

(*b*) "State" does not include a State specified in Part C of the First Schedule;

(*c*) references to States specified in Part C of the First Schedule shall include references to any territory specified in Part D of the First Schedule and any other territory comprised within the territory of India but not specified in that Schedule.

265. No tax shall be levied or collected except by authority of law.

CONSOLIDATED FUNDS

266. (1) Subject to the provisions of article 267 and to the provisions of this Chapter with respect to the assignment of the whole or part of the net proceeds of certain taxes and duties to States, all revenues received by the Government of India, all loans raised by that Government by the issue of treasury bills, loans or ways and means advances and all moneys received by that Government in repayment of loans shall form one consolidated fund to be entitled "the Consolidated Fund of India", and all revenues received by the Government of a State, all loans raised by that Government by the issue of treasury bills, loans or ways and means advances and all moneys received by that Government in repayment of loans shall form one consolidated fund to be entitled "the Consolidated Fund of the State."

(2) All other public moneys received by or on behalf of the Government of India or the Government of a State shall be credited to the public account of India or the public account of the State, as the case may be.

(3) No moneys out of the Consolidated Fund of India or the Consolidated Fund of a State shall be appropriated except in accordance with law and for the purposes and in the manner provided in this Constitution.

CONTINGENCY FUNDS

267. (1) Parliament may by law establish a Contingency Fund in the nature of an imprest to be entitled "the Contingency Fund of India", into which shall be paid from time to time such sums as may be determined by such law, and the said Fund shall be placed at the disposal of the President to enable advances to be made by him out of such Fund for the purposes of meeting unforeseen expenditure pending authorisation of such expenditure by Parliament by law under article 115 or article 116.

(2) The Legislature of a State may by law establish a Contingency Fund in the nature of an imprest to be entitled "the Contingency Fund of the State" into which shall be paid from time to time such sums as may be determined by such law, and the said Fund shall be placed at the disposal of the Governor or Rajpramukh of the State to enable advances to be made by him out of such Fund for the purposes of meeting unforeseen expenditure pending authorisation of such expenditure by the Legislature of the State by law under article 205 or article 206.

DISTRIBUTION OF REVENUES

268. (1) Such stamp duties and such duties of excise on medicinal and toilet preparations as are mentioned in the Union List shall be levied by the Government of India but shall be collected—

(*a*) in the case where such duties are leviable within any State specified in Part C of the First Schedule, by the Government of India, and

(*b*) in other cases, by the States within which such duties are respectively leviable.

(2) The proceeds in any financial year of any such duty leviable within any State shall not form part of the Consolidated Fund of India, but shall be assigned to that State.

UNION TAXES ASSIGNED TO STATES

269. (1) The following duties and taxes shall be levied and collected by the Government of

charged on the Consolidated Fund of India or the Consolidated Fund of a State, then, if—

(*a*) in the case of a charge on the Consolidated Fund of India, the court or Commission serves any of the separate needs of a State, or the person has served wholly or in part in connection with the affairs of a State; or

(*b*) in the case of a charge on the Consolidated Fund of a State, the court or Commission serves any of the separate needs of the Union or another State, or the person has served wholly or in part in connection with the affairs of the Union or another State,

there shall be charged on and paid out of the Consolidated Fund of the State or, as the case may be, the Consolidated Fund of India or the Consolidated Fund of the other State, such contribution in respect of the expenses or pension as may be agreed, or as may in default of agreement be determined by an arbitrator to be appointed by the Chief Justice of India.

RULERS' PRIVY PURSES

291. (1) Where under any covenant or agreement entered into by the Ruler of any Indian State before the commencement of this Constitution, the payment of any sums, free of tax, has been guaranteed or assured by the Government of the Dominion of India to any Ruler of such State as privy purse—

(*a*) such sums shall be charged on, and paid out of, the Consolidated Fund of India; and

(*b*) the sums so paid to any Ruler shall be exempt from all taxes on income.

(2) Where the territories of any such Indian State as aforesaid are comprised within a State specified in Part A or Part B of the First Schedule, there shall be charged on, and paid out of, the Consolidated Fund of that State such contribution, if any, in respect of the payments made by the Government of India under clause (1) and for such period as may, subject to any agreement entered into in that behalf under clause (1) of article 278, be determined by order of the President.

CHAPTER II—BORROWING

292. The executive power of the Union extends to borrowing upon the security of the Consolidated Fund of India within such limits, if any, as may from time to time be fixed by Parliament by law and to the giving of guarantees within such limits, if any, as may be so fixed.

293. (1) Subject to the provisions of this article, the executive power of a State extends to borrowing within the territory of India upon the security of the Consolidated Fund of the State within such limits, if any, as may from time to time be fixed by the Legislature of such State by law and to the giving of guarantees within such limits, if any, as may be so fixed.

(2) The Government of India may, subject to such conditions as may be laid down by or under any law made by Parliament, make loans to any State or, so long as any limits fixed under article 292 are not exceeded, give guarantees in respect of loans raised by any State, and any sums required for the purpose of making such loans shall be charged on the Consolidated Fund of India.

(3) A State may not without the consent of the Government of India raise any loan if there is still outstanding any part of a loan which has been made to the State by the Government of India or by its predecessor Government, or in respect of which a guarantee has been given by the Government of India or by its predecessor Government.

(4) A consent under clause (3) may be granted subject to such conditions, if any, as the Government of India may think fit to impose.

CHAPTER III—PROPERTY, CONTRACTS, RIGHTS, ETC.

294. As from the commencement of this Constitution—

(*a*) all property and assets which immediately before such commencement were vested in His Majesty for the purposes of the Government of the Dominion of India and all property and assets which immediately before such commencement were vested in His Majesty for the purposes of the Government of each Governor's Province shall vest respectively in the Union and the corresponding State, and

(*b*) all rights, liabilities and obligations of the Government of the Dominion of India and of the Government of each Governor's Province, whether arising out of any contract or otherwise, shall be the rights, liabilities and obligations respectively of the Government of India and the Government of each corresponding State,

subject to any adjustment made or to be made by reason of the creation before the commencement of this Constitution of the Dominion of Pakistan or of the Provinces of West Bengal, East Bengal, West Punjab and East Punjab.

SUCCESSION TO PROPERTY, ETC.

295. (1) As from the commencement of this Constitution—

(*a*) all property and assets which immediately before such commencement were vested in any Indian State corresponding to a State specified in Part B of the First Schedule shall vest in the Union, if the purposes for which such property and assets were held immediately before such commencement will thereafter be purposes of the Union relating to any of the matters enumerated in the Union List, and

(*b*) all rights, liabilities and obligations of the Government of any Indian State corresponding to a State specified in Part B of the First Schedule, whether arising out of any contract or otherwise, shall be the rights, liabilities and obligations of the Government of India, if the purposes for which such rights were acquired or liabilities or obligations were incurred before such commencement will thereafter be purposes of the Government of India relating to any of the matters enumerated in the Union List,

subject to any agreement entered into in that behalf by the Government of India with the Government of that State.

(2) Subject as aforesaid, the Government of each State specified in Part B of the First Schedule shall, as from the commencement of this Constitution, be the successor of the Government of the corresponding Indian State as regards all property and assets and all rights, liabilities and obligations, whether arising out of any contract or otherwise, other than those referred to in clause (1).

ACCRUAL OF PROPERTY

296. Subject as hereinafter provided, any property in the territory of India which, if this Constitution had not come into operation, would have accrued to His Majesty or, as the case may be, to the Ruler of an Indian State by escheat or lapse, or as *bona vacantia* for want of a rightful owner, shall, if it is properly situate in a State, vest in such State, and shall, in any other case, vest in the Union:

Provided that any property which at the date when it would have so accrued to His Majesty or to the Ruler of an Indian State was in the possession or under the control of the Government of India or the Government of a State shall, according as the purposes for which it was then used or held were purposes of the Union or of a State, vest in the Union or in that State.

Explanation.—In this article, the expressions "Ruler" and "Indian State" have the same meanings as in article 363.

297. All lands, minerals and other things of value underlying the ocean within the territorial waters of India shall vest in the Union and be held for the purposes of the Union.

298. (1) The executive power of the Union and of each State shall extend, subject to any law made by the appropriate Legislature, to the grant, sale, disposition or mortgage of any property held for the purposes of the Union or of such State, as the case may be, and to the purchase or acquisition of property for those purposes respectively, and to the making of contracts.

(2) All property acquired for the purposes of the Union or of a State shall vest in the Union or in such State, as the case may be.

CONTRACTS, SUITS

299. (1) All contracts made in the exercise of the executive power of the Union or of a State shall be expressed to be made by the President, or by the Governor or the Rajpramukh of the State, as the case may be, and all such contracts and all assurances of property made in the exercise of that power shall be executed on behalf of the President or the Governor or the Rajpramukh by such persons and in such manner as he may direct or authorise.

(2) Neither the President nor the Governor nor the Rajpramukh shall be personally liable in respect of any contract or assurance made or executed for the purposes of this Constitution, or for the purposes of any enactment relating to the Government of India heretofore in force, nor shall any person making or executing any such contract or assurance on behalf of any of them be personally liable in respect thereof.

300. (1) The Government of India may sue or be sued by the name of the Union of India and the Government of a State may sue or be sued by the name of the State and may, subject to any provisions which may be made by Act of Parliament or of the Legislature of such State enacted by virtue of powers conferred by this Constitution, sue or be sued in relation to their respective affairs in the like cases as the Dominion of India and the corresponding Provinces or the corresponding Indian States might have sued or been sued if this Constitution had not been enacted.

(2) If at the commencement of this Constitution—

(*a*) any legal proceedings are pending to which the Dominion of India is a party, the Union of India shall be deemed to be substituted for the Dominion in those proceedings; and

(*b*) any legal proceedings are pending to which a Province or an Indian State is a Party, the corresponding State shall be deemed to be substituted for the Province or the Indian State in those proceedings.

PART XIII
TRADE, COMMERCE

301. Subject to the other provisions of this Part, trade, commerce and intercourse throughout the territory of India shall be free.

302. Parliament may by law impose such restrictions on the freedom of trade, commerce or intercourse between one State and another or within any part of the territory of India as may be required in the public interest.

303. (1) Notwithstanding anything in article 302, neither Parliament nor the Legislature of a State shall have power to make any law giving, or authorising the giving of, any preference to one State over another, or making, or authorising the making of, any discrimination between one State and another, by virtue of any entry relating to trade and commerce in any of the Lists in the Seventh Schedule.

(2) Nothing in clause (1) shall prevent Parliament from making any law giving, or authorising the giving of, any preference or making, or authorising the making of, any discrimination if it is declared by such law that it is necessary to do so for the purpose of dealing with a situation arising from scarcity of goods in any part of the territory of India.

RESTRICTIONS ON TRADE, ETC.

304. Notwithstanding anything in article 301 or article 303, the Legislature of a State may by law—

(*a*) impose on goods imported from other States any tax to which similar goods manufactured or produced in that State are subject, so, however, as not to discriminate between goods so imported and goods so manufactured or produced; and

(*b*) impose such reasonable restrictions on the freedom of trade, commerce or intercourse with or within that State as may be required in the public interest:

Provided that no Bill or amendment for the purposes of clause (*b*) shall be introduced or moved in the Legislature of a State without the previous sanction of the President.

305. Nothing in articles 301 and 303 shall affect the provisions of any existing law except in so far as the President may by order otherwise provide.

306. Notwithstanding anything in the foregoing provisions of this Part or in any other provisions of this Constitution, any State specified in Part B of the First Schedule which before the commencement of this Constitution was levying any tax or duty on the import of goods into the State from other States or on the export of goods from the State to other States may, if an agreement in that behalf has been entered into between the Government of India and the Government of that State, continue to levy and collect such tax or duty subject to the terms of such agreement and for such period not exceeding ten years from the commencement of this Constitution as may be specified in the agreement:

Provided that the President may at any time after the expiration of five years from such commencement terminate or modify any such agreement if, after consideration of the report of the Finance Commission constituted under article 280, he thinks it necessary to do so.

307. Parliament may by law appoint such authority as it considers appropriate for carrying out the purposes of articles 301, 302, 303 and 304, and confer on the authority so appointed such powers and such duties as it thinks necessary.

PART XIV
THE SERVICES
CHAPTER I

308. In this Part, unless the context otherwise requires, the expression "State" means a State specified in Part A or Part B of the First Schedule.

309. Subject to the provisions of this Constitution, Acts of the appropriate Legislature may regulate the recruitment, and conditions of service of persons appointed, to public services and posts in connection with the affairs of the Union or of any State:

Provided that it shall be competent for the President or such person as he may direct in the case of services and posts in connection with the affairs of the Union, and for the Governor or Rajpramukh of a State or such person as he may direct in the case of services and posts in connection with the affairs of the State, to make rules regulating the recruitment, and the conditions of service of persons appointed, to such services and posts until provision in that behalf is made by or under an Act of the appropriate Legislature under this article, and any rules so made shall have effect subject to the provisions of any such Act.

TENURE

310. (1) Except as expressly provided by this Constitution, every person who is a member of a defence service or of a civil service of the Union or of an all-India service or holds any post connected with defence or any civil post under the Union holds office during the pleasure of the President, and every person who is a member of a civil service of a State or holds any civil post under a State holds office during the pleasure of the Governor or, as the case may be, the Rajpramukh of the State.

(2) Notwithstanding that a person holding a civil post under the Union or a State holds office during the pleasure of the President or, as the case may be, of the Governor or Rajpramukh of the State, any contract under which a person, not being a member of a defence service or of an all-India service or of a civil service of the Union or a State, is appointed under this Constitution to hold such a post may, if the President or the Governor or the Rajpramukh, as the case may be, deems it necessary in order to secure the services of a person having special qualifications, provide for the payment to him of compensation, if before the expiration of an agreed period that post is abolished or he is, for reasons not connected with any misconduct on his part, required to vacate that post.

DISMISSAL, REMOVAL, ETC.

311. (1) No person who is a member of a civil service of the Union or an all-India service or a civil service of a State or holds a civil post under the Union or a State shall be dismissed or removed by an authority subordinate to that by which he was appointed.

(2) No such person as aforesaid shall be dismissed or removed or reduced in rank until he has been given a reasonable opportunity of showing cause against the action proposed to be taken in regard to him:

Provided that this clause shall not apply—

(*a*) where a person is dismissed or removed or reduced in rank on the ground of conduct which has led to his conviction on a criminal charge;

(*b*) where an authority empowered to dismiss or remove a person or to reduce him in rank is satisfied that for some reason, to be recorded by that authority in writing, it is not reasonably practicable to give to that person an opportunity of showing cause; or

(*c*) where the President or Governor or Rajpramukh, as the case may be, is satisfied that in the interest of the security of the State it is not expedient to give to that person such an opportunity.

(3) If any question arises whether it is reasonably practicable to give to any person an opportunity of showing cause under clause (2), the decision thereon of the authority empowered to dismiss or remove such person or to reduce him in rank, as the case may be, shall be final.

ALL-INDIA SERVICES

312. (1) Notwithstanding anything in Part XI, if the Council of States has declared by resolution supported by not less than two-thirds of the members present and voting that it is necessary or expedient in the national interest so to do, Parliament may by law provide for the creation of one or more all-India services common to the Union and the States, and, subject to the other provisions of this Chapter, regulate the recruitment, and the conditions of service of persons appointed, to any such service.

(2) The services known at the commencement of this Constitution as the Indian Administrative Service and the Indian Police Service shall be deemed to be services created by Parliament under this article.

313. Until other provision is made in this behalf under this Constitution, all the laws in force immediately before the commencement of this Constitution and applicable to any public service or any post which continues to exist after the commencement of this Constitution, as an all-India service or as service or post under the Union or a State shall continue in force so far as consistent with the provisions of this Constitution.

314. Except as otherwise expressly provided by this Constitution, every person who having been appointed by the Secretary of State or Secretary of State in Council to a civil service of the Crown in India continues on and after the commencement of this Constitution to serve under the Government of India or of a State shall be entitled to receive from the Government of India and the Government of the State, which he is from time to time serving, the same conditions of service as respects remuneration, leave and pension, and the same rights as respects disciplinary matters or rights as similar thereto as changed circumstances may permit as that person was entitled to immediately before such commencement.

CHAPTER II—PUBLIC SERVICE COMMISSIONS

315. (1) Subject to the provisions of this article, there shall be a Public Service Commission for the Union and a Public Service Commission for each State.

(2) Two or more States may agree that there shall be one Public Service Commission for that group of States, and if a resolution to that effect is passed by the House or, where there are two Houses, by each House of the Legislature of each of those States, Parliament may by law provide for the appointment of a Joint State Public Service Commission (referred to in this Chapter as Joint Commission) to serve the needs of those States.

(3) Any such law as aforesaid may contain such incidental and consequential provisions as may be necessary or desirable for giving effect to the purposes of the law.

(4) The Public Service Commission for the Union, if requested so to do by the Governor or Rajpramukh of a State, may, with the approval of the President, agree to serve all or any of the needs of the State.

(5) References in this Constitution to the Union Public Service Commission or a State Public Service Commission shall, unless the context otherwise requires, be construed as references to the Commission serving the needs of the Union or, as the case may be, the State as respects the particular matter in question.

APPOINTMENT, TERM

316. (1) The Chairman and other members of a Public Service Commission shall be appointed, in the case of the Union Commission or a Joint Commission, by the President, and in the case of a State Commission, by the Governor or Rajpramukh of the State:

Provided that as nearly as may be one-half of the members of every Public Service Commission shall be persons who at the dates of their respective appointments have held office for at least ten years either under the Government of India or under the Government of a State, and in computing the said period of ten years any period before the commencement of this Constitution during which a person has held office under the Crown in India or under the Government of an Indian State shall be included.

(2) A member of a Public Service Commission shall hold office for a term of six years from the date on which he enters upon his office or until he attains, in the case of the Union Commission, the age of sixty-five years, and in the case of a State Commission or a Joint Commission, the age of sixty years, whichever is earlier;

India but shall be assigned to the States in the manner provided in clause (2), namely :—

(*a*) duties in respect of succession to property other than agricultural land ;

(*b*) estate duty in respect of property other than agricultural land ;

(*c*) terminal taxes on goods or passengers carried by railway, sea or air ;

(*d*) taxes on railway fares and freights ;

(*e*) taxes other than stamp duties on transactions in stock-exchanges and futures markets ;

(*f*) taxes on the sale or purchase of newspapers and on advertisements published therein.

(2) The net proceeds in any financial year of any such duty or tax, except in so far as those proceeds represent proceeds attributable to States specified in Part C of the First Schedule, shall not form part of the Consolidated Fund of India, but shall be assigned to the States within which that duty or tax is leviable in that year, and shall be distributed among those States in accordance with such principles of distribution as may be formulated by Parliament by law.

UNION TAXES DISTRIBUTED

270. (1) Taxes on income other than agricultural income shall be levied and collected by the Government of India and distributed between the Union and the States in the manner provided in clause (2).

(2) Such percentage, as may be prescribed, of the net proceeds in any financial year of any such tax, except in so far as those proceeds represent proceeds attributable to States specified in Part C of the First Schedule or to taxes payable in respect of Union emoluments, shall not form part of the Consolidated Fund of India, but shall be assigned to the States within which that tax is leviable in that year, and shall be distributed among those States in such manner and from such time as may be prescribed.

(3) For the purposes of clause (2), in each financial year such percentage as may be prescribed of so much of the net proceeds of taxes on income as does not represent the net proceeds of taxes payable in respect of Union emoluments shall be deemed to represent proceeds attributable to States specified in Part C of the First Schedule.

(4) In this article—

(*a*) " taxes on income " does not include a corporation tax ;

(*b*) " prescribed " means—

(*i*) until a Finance Commission has been constituted, prescribed by the President by order, and

(*ii*) after a Finance Commission has been constituted, prescribed by the President by order after considering the recommendations of the Finance Commission ;

(*c*) " Union emoluments " includes all emoluments and pensions payable out of the Consolidated Fund of India in respect of which income-tax is chargeable.

271. Notwithstanding anything in articles 269 and 270, Parliament may at any time increase any of the duties or taxes referred to in those articles by a surcharge for purposes of the Union and the whole proceeds of any such surcharge shall form part of the Consolidated Fund of India.

272. Union duties of excise other than such duties of excise on medicinal and toilet preparations as are mentioned in the Union List shall be levied and collected by the Government of India, but, if Parliament by law so provides, there shall be paid out of the Consolidated Fund of India to the States to which the law imposing the duty extends sums equivalent to the whole or any part of the net proceeds of that duty, and those sums shall be distributed among those States in accordance with such principles of distribution as may be formulated by such law.

GRANTS FROM EXPORT DUTY

273. (1) There shall be charged on the Consolidated Fund of India in each year as grants-in-aid of the revenues of the States of Assam, Bihar, Orissa and West Bengal, in lieu of assignment of any share of the net proceeds in each year of export duty on jute and jute products to those States, such sums as may be prescribed.

(2) The sums so prescribed shall continue to be charged on the Consolidated Fund of India so long as any export duty on jute or jute products continues to be levied by the Government of India or until the expiration of ten years from the commencement of this Constitution, whichever is earlier.

(3) In this article, the expression " prescribed " has the same meaning as in article 270.

PRIOR RECOMMENDATION OF PRESIDENT

274. (1) No Bill or amendment which imposes or varies any tax or duty in which States are interested, or which varies the meaning of the expression " agricultural income " as defined for the purposes of the enactments relating to Indian income-tax, or which affects the principles on which under any of the foregoing provisions of this Chapter moneys are or may be distributable to States, or which imposes any such surcharge for the purposes of the Union as is mentioned in the foregoing provisions of this Chapter, shall be introduced or moved in either House of Parliament except on the recommendation of the President.

(2) In this article, the expression " tax or duty in which States are interested " means—

(*a*) a tax or duty the whole or part of the net proceeds whereof are assigned to any State ; or

(*b*) a tax or duty by reference to the net proceeds whereof sums are for the time being payable out of the Consolidated Fund of India to any State.

GRANTS TO STATES

275. (1) Such sums as Parliament may by law provide shall be charged on the Consolidated Fund of India in each year as grants-in-aid of the revenues of such States as Parliament may determine to be in need of assistance, and different sums may be fixed for different States :

Provided that there shall be paid out of the Consolidated Fund of India as grants-in-aid of the revenues of a State such capital and recurring sums as may be necessary to enable that State to meet the costs of such schemes of development as may be undertaken by the State with the approval of the Government of India for the purpose of promoting the welfare of the Scheduled Tribes in that State or raising the level of administration of the Scheduled Areas therein to that of the administration of the rest of the areas of that State :

Provided further that there shall be paid out of the Consolidated Fund of India as grants-in-aid of the revenues of the State of Assam sums, capital and recurring, equivalent to—

(*a*) the average excess of expenditure over the revenues during the two years immediately preceding the commencement of this Constitution in respect of the administration of the tribal areas specified in Part A of the table appended to paragraph 20 of the Sixth Schedule ; and

(*b*) the costs of such schemes of development as may be undertaken by that State with the approval of the Government of India for the purpose of raising the level of administration of the said areas to that of the administration of the rest of the areas of that State.

(2) Until provision is made by Parliament under clause (1), the powers conferred on Parliament under that clause shall be exercisable by the President by order and any order made by the President under this clause shall have effect subject to any provision so made by Parliament :

Provided that after a Finance Commission has been constituted no order shall be made under this clause by the President except after considering the recommendations of the Finance Commission.

TAXES ON PROFESSIONS, ETC.

276. (1) Notwithstanding anything in article 246, no law of the Legislature of a State relating to taxes for the benefit of the State or of a municipality, district board, local board or other local authority therein in respect of professions, trades, callings or employments shall be invalid on the ground that it relates to a tax on income.

(2) The total amount payable in respect of any one person to the State or to any one municipality, district board, local board or other local authority in the State by way of taxes on professions, trades, callings and employments shall not exceed two hundred and fifty rupees per annum :

Provided that if in the financial year immediately preceding the commencement of this Constitution there was in force in the case of any State or any such municipality, board or authority a tax on professions, trades, callings or employments the rate, or the maximum rate, of which exceeded two hundred and fifty rupees per annum, such tax may continue to be levied until provision to the contrary is made by Parliament by law, and any law so made by Parliament may be made either generally or in relation to any specified States, municipalities, boards or authorities.

(3) The power of the Legislature of a State to make laws as aforesaid with respect to taxes on professions, trades, callings and employments shall not be construed as limiting in any way the power of Parliament to make laws with respect to taxes on income accruing from or arising out of professions, trades, callings and employments.

277. Any taxes, duties, cesses or fees which, immediately before the commencement of this Constitution, were being lawfully levied by the Government of any State or by any municipality or other local authority or body for the purposes of the State, municipality, district or other local area may, notwithstanding that those taxes, duties, cesses or fees are mentioned in the Union List, continue to be levied and to be applied to the same purposes until provision to the contrary is made by Parliament by law.

SPECIAL AGREEMENTS

278. (1) Notwithstanding anything in this Constitution, the Government of India may, subject to the provisions of clause (2), enter into an agreement with the Government of a State specified in Part B of the First Schedule with respect to—

(*a*) the levy and collection of any tax or duty leviable by the Government of India in such State and for the distribution of the proceeds thereof otherwise than in accordance with the provisions of this Chapter ;

(*b*) the grant of any financial assistance by the Government of India to such State in consequence of the loss of any revenue which that State used to derive from any tax or duty leviable under this Constitution by the Government of India or from any other sources ;

(*c*) the contribution by such State in respect of any payment made by the Government of India under clause (1) of article 291,

and, when an agreement is so entered into, the provisions of this Chapter shall in relation to such State have effect subject to the terms of such agreement.

(2) An agreement entered into under clause (1) shall continue in force for a period not exceeding ten years from the commencement of this Constitution :

Provided that the President may at any time after the expiration of five years from such commencement terminate or modify any such agreement if after consideration of the report of the Finance Commission he thinks it necessary to do so.

MEANING OF 'NET PROCEEDS'

279. (1) In the foregoing provisions of this Chapter, " net proceeds " means in relation to any tax or duty the proceeds thereof reduced by the cost of collection, and for the purposes of those provisions the net proceeds of any tax or duty, or of any part of any tax or duty, in or attributable to any area shall be ascertained and certified by the Comptroller and Auditor-General of India, whose certificate shall be final.

(2) Subject as aforesaid, and to any other express provision of this Chapter, a law made by Parliament or an order of the President may, in any case where under this Part the proceeds of any duty or tax are, or may be, assigned to any State, provide for the manner in which the proceeds are to be calculated, for the time from or at which and the manner in which any payments are to be made, for the making of adjustments between one financial year and another, and for any other incidental or ancillary matters.

FINANCE COMMISSION

280. (1) The President shall, within two years from the commencement of this Constitution and thereafter at the expiration of every fifth year or at such earlier time as the President considers necessary, by order constitute a Finance Commission which shall consist of a Chairman and four other members to be appointed by the President.

(2) Parliament may by law determine the qualifications which shall be requisite for appointment as members of the Commission and the manner in which they shall be selected.

(3) It shall be the duty of the Commission to make recommendations to the President as to—

(*a*) the distribution between the Union and the States of the net proceeds of taxes which are to be, or may be, divided between them under this Chapter and the allocation between the States of the respective shares of such proceeds ;

(*b*) the principles which should govern the grants-in-aid of the revenues of the States out of the Consolidated Fund of India ;

(*c*) the continuance or modification of the terms of any agreement entered into by the Government of India with the Government of any State specified in Part B of the First Schedule under clause (1) of article 278 or under article 306 ; and

(*d*) any other matter referred to the Commission by the President in the interests of sound finance.

(4) The Commission shall determine their procedure and shall have such powers in the performance of their functions as Parliament may by law confer on them.

281. The President shall cause every recommendation made by the Finance Commission under the provisions of this Constitution together with an explanatory memorandum as to the action taken thereon to be laid before each House of Parliament.

282. The Union or a State may make any grants for any public purpose, notwithstanding that the purpose is not one with respect to which Parliament or the Legislature of the State, as the case may be, may make laws.

(*Act XXXIII of* 1951 *lays down detailed provisions as regards the manner of selection and the powers of the members of the Finance Commission.*—Editor.)

CUSTODY OF FUNDS

283. (1) The custody of the Consolidated Fund of India and the Contingency Fund of India, the payment of moneys into such Funds, the withdrawal of moneys therefrom, the custody of public moneys other than those credited to such Funds received by or on behalf of the Government of India, their payment into the public account of India and the withdrawal of moneys from such account and all other matters connected with or ancillary to matters aforesaid shall be regulated by law made by Parliament, and, until provision in that behalf is so made, shall be regulated by rules made by the President.

(2) The custody of the Consolidated Fund of a State and the Contingency Fund of a State, the payment of moneys into such Funds, the withdrawal of moneys therefrom, the custody of public moneys other than those credited to such Funds received by or on behalf of the Government of the State, their payment into the public account of the State and the withdrawal of moneys from such account and all other matters connected with or ancillary to matters aforesaid shall be regulated by law made by the Legislature of the State, and, until provision in that behalf is so made, shall be regulated by rules made by the Governor or Rajpramukh of the State.

284. All moneys received by or deposited with—

(*a*) any officer employed in connection with the affairs of the Union or of a State in his capacity as such, other than revenues or public moneys raised or received by the Government of India or the Government of the State, as the case may be, or

(*b*) any court within the territory of India to the credit of any cause, matter, account or persons,

shall be paid into the public account of India or the public account of the State, as the case may be.

285. (1) The property of the Union shall, save in so far as Parliament may by law otherwise provide, be exempt from all taxes imposed by a State or by any authority within a State.

(2) Nothing in clause (1) shall, until Parliament by law otherwise provides, prevent any authority within a State from levying any tax on any property of the Union to which such property was immediately before the commencement of this Constitution liable or treated as liable, so long as that tax continues to be levied in that State.

RESTRICTIONS ON SALES, ETC., TAXES

286. (1) No law of a State shall impose, or authorise the imposition of a tax on the sale or purchase of goods where such sale or purchase takes place—

(*a*) outside the State ; or

(*b*) in the course of the import of the goods into, or export of the goods out of, the territory of India.

Explanation.—For the purposes of sub-clause (*a*), a sale or purchase shall be deemed to have taken place in the State in which the goods have actually been delivered as a direct result of such sale or purchase for the purpose of consumption in that State, notwithstanding the fact that under the general law relating to sale of goods the property in the goods has by reason of such sale or purchase passed in another State.

(2) Except in so far as Parliament may by law otherwise provide, no law of a State shall impose, or authorise the imposition of, a tax on the sale or purchase of any goods where such sale or purchase takes place in the course of inter-State trade or commerce:

Provided that the President may by order direct that any tax on the sale or purchase of goods which was being lawfully levied by the Government of any State immediately before the commencement of this Constitution shall, notwithstanding that the imposition of such tax is contrary to the provisions of this clause, continue to be levied until the thirty-first day of March, 1951.

(3) No law made by the Legislature of a State imposing, or authorising the imposition of, a tax on the sale or purchase of any such goods as have been declared by Parliament by law to be essential for the life of the community shall have effect unless it has been reserved for the consideration of the President and has received his assent.

EXEMPTION FROM TAXES

287. Save in so far as Parliament may by law otherwise provide, no law of a State shall impose, or authorise the imposition of, a tax on the consumption or sale of electricity (whether produced by a Government or other persons) which is—

(*a*) consumed by the Government of India, or sold to the Government of India for consumption by that Government ; or

(*b*) consumed in the construction, maintenance or operation of any railway by the Government of India or a railway company operating that railway, or sold to that Government or any such railway company for consumption in the construction, maintenance or operation of any railway,

and any such law imposing, or authorising the imposition of, a tax on the sale of electricity shall secure that the price of electricity sold to the Government of India for consumption by that Government, or to any such railway company as aforesaid for consumption in the construction, maintenance or operation of any railway, shall be less by the amount of the tax than the price charged to other consumers of a substantial quantity of electricity.

288. (1) Save in so far as the President may by order otherwise provide, no law of a State in force immediately before the commencement of this Constitution shall impose, or authorise the imposition of, a tax in respect of any water or electricity stored, generated, consumed, distributed or sold by any authority established by any existing law or any law made by Parliament for regulating or developing any inter-State river or river-valley.

Explanation.—The expression " law of a State in force " in this clause shall include a law of a State passed or made before the commencement of this Constitution and not previously repealed, notwithstanding that it or parts of it may not be then in operation either at all or in particular areas.

(2) The Legislature of a State may by law impose, or authorise the imposition of, any such tax as is mentioned in clause (1), but no such law shall have any effect unless it has, after having been reserved for the consideration of the President, received his assent ; and if any such law provides for the fixation of the rates and other incidents of such tax by means of rules or orders to be made under the law by any authority, the law shall provide for the previous consent of the President being obtained to the making of any such rule or order.

289. (1) The property and income of a State shall be exempt from Union taxation.

(2) Nothing in clause (1) shall prevent the Union from imposing, or authorising the imposition of, any tax to such extent, if any, as Parliament may by law provide in respect of a trade or business of any kind carried on by, or on behalf of, the Government of a State, or any operations connected therewith, or any property used or occupied for the purposes of such trade or business, or any income accruing or arising in connection therewith.

(3) Nothing in clause (2) shall apply to any trade or business, or to any class of trade or business, which Parliament may by law declare to be incidental to the ordinary functions of government.

ADJUSTMENT OF EXPENSES, ETC.

290. Where under the provisions of this Constitution the expenses of any court or Commission, or the pension payable to or in respect of a person who has served before the commencement of this Constitution under the Crown in India or after such commencement in connection with the affairs of the Union or of a State, are

Provided that—

(*a*) a member of a Public Service Commission may, by writing under his hand addressed, in the case of the Union Commission or a Joint Commission, to the President, and in the case of a State Commission, to the Governor or Rajpramukh of the State, resign his office;

(*b*) a member of a Public Service Commission may be removed from his office in the manner provided in clause (1) or clause (3) of article 317.

(3) A person who holds office as a member of a Public Service Commission shall, on the expiration of his term of office, be ineligible for re-appointment to that office.

REMOVAL, SUSPENSION

317. (1) Subject to the provisions of clause (3), the Chairman or any other member of a Public Service Commission shall only be removed from his office by order of the President on the ground of misbehaviour after the Supreme Court, on reference being made to it by the President, has, on inquiry held in accordance with the procedure prescribed in that behalf under article 145, reported that the Chairman or such other member, as the case may be, ought on any such ground to be removed.

(2) The President, in the case of the Union Commission or a Joint Commission, and the Governor or Rajpramukh, in the case of a State Commission, may suspend from office the Chairman or any other member of the Commission in respect of whom a reference has been made to the Supreme Court under clause (1) until the President has passed orders on receipt of the report of the Supreme Court on such reference.

(3) Notwithstanding anything in clause (1), the President may by order remove from office the Chairman or any other member of a Public Service Commission if the Chairman or such other member, as the case may be—

(*a*) is adjudged an insolvent; or

(*b*) engages during his term of office in any paid employment outside the duties of his office; or

(*c*) is, in the opinion of the President, unfit to continue in office by reason of infirmity of mind or body.

(4) If the Chairman or any other member of a Public Service Commission is or becomes in any way concerned or interested in any contract or agreement made by or on behalf of the Government of India or the Government of a State or participates in any way in the profit thereof or in any benefit or emolument arising therefrom otherwise than as a member and in common with the other members of an incorporated company, he shall, for the purposes of clause (1), be deemed to be guilty of misbehaviour.

318. In the case of the Union Commission or a Joint Commission, the President and, in the case of a State Commission, the Governor or Rajpramukh of the State may by regulations—

(*a*) determine the number of members of the Commission and their conditions of Service; and

(*b*) make provision with respect to the number of members of the staff of the Commission and their conditions of service:

Provided that the conditions of service of a member of a Public Service Commission shall not be varied to his disadvantage after his appointment.

HOLDING FUTURE OFFICE

319. On ceasing to hold office—

(*a*) the Chairman of the Union Public Service Commission shall be ineligible for further employment either under the Government of India or under the Government of a State;

(*b*) the Chairman of a State Public Service Commission shall be eligible for appointment as the Chairman or any other member of the Union Public Service Commission or as the Chairman of any other State Public Service Commission, but not for any other employment either under the Government of India or under the Government of a State;

(*c*) a member other than the Chairman of the Union Public Service Commission shall be eligible for appointment as the Chairman of the Union Public Service Commission or as the Chairman of a State Public Service Commission, but not for any other employment either under the Government of India or under the Government of a State;

(*d*) a member other than the Chairman of a State Public Service Commission shall be eligible for appointment as the Chairman or any other member of the Union Public Service Commission or as the Chairman of that or any other State Public Service Commission, but not for any other employment either under the Government of India or under the Government of a State.

FUNCTIONS

320. (1) It shall be the duty of the Union and the State Public Service Commissions to conduct examinations for appointments to the services of the Union and the services of the State respectively.

(2) It shall also be the duty of the Union Public Service Commission, if requested by any two or more States so to do, to assist those States in framing and operating schemes of joint recruitment for any services for which candidates possessing special qualifications are required.

(3) The Union Public Service Commission or the State Public Service Commission, as the case may be, shall be consulted—

(*a*) on all matters relating to methods of recruitment to civil services and for civil posts;

(*b*) on the principles to be followed in making appointments to civil services and posts and in making promotions and transfers from one service to another and on the suitability of candidates for such appointments, promotions or transfers;

(*c*) on all disciplinary matters affecting a person serving under the Government of India or the Government of a State in a civil capacity, including memorials or petitions relating to such matters;

(*d*) on any claim by or in respect of a person who is serving or has served under the Government of India or the Government of a State or under the Crown in India or under the Government of an Indian State, in a civil capacity, that any costs incurred by him in defending legal proceedings instituted against him in respect of acts done or purporting to be done in the execution of his duty should be paid out of the Consolidated Fund of India, or, as the case may be, out of the Consolidated Fund of the State;

(*e*) on any claim for the award of a pension in respect of injuries sustained by a person while serving under the Government of India or the Government of a State or under the Crown in India or under the Government of an Indian State, in a civil capacity, and any question as to the amount of any such award,

and it shall be the duty of a Public Service Commission to advise on any matter so referred to them and on any other matter which the President, or, as the case may be, the Governor or Rajpramukh of the State, may refer to them:

Provided that the President as respects the all-India services and also as respects other services and posts in connection with the affairs of the Union, and the Governor or Rajpramukh, as the case may be, as respects other services and posts in connection with the affairs of a State, may make regulations specifying the matters in which either generally, or in any particular class of case or in any particular circumstances, it shall not be necessary for a Public Service Commission to be consulted.

(4) Nothing in clause (3) shall require a Public Service Commission to be consulted as respects the manner in which any provision referred to in clause (4) of article 16 may be made or as respects the manner in which effect may be given to the provisions of article 335.

(5) All regulations made under the proviso to clause (3) by the President or the Governor or Rajpramukh of a State shall be laid for not less than fourteen days before each House of Parliament or the House or each House of the Legislature of the State, as the case may be, as soon as possible after they are made, and shall be subject to such modifications, whether by way of repeal or amendment, as both Houses of Parliament or the House or both Houses of the Legislature of the State may make during the session in which they are so laid.

321. An Act made by Parliament or, as the case may be, the Legislature of a State may provide for the exercise of additional functions by the Union Public Service Commission or the State Public Service Commission as respects the services of the Union or the State and also as respects the services of any local authority or other body corporate constituted by law or of any public institution.

EXPENSES, REPORTS

322. The expenses of the Union or a State Public Service Commission, including any salaries, allowances and pensions payable to or in respect of the members or staff of the Commission, shall be charged on the Consolidated Fund of India or, as the case may be, the Consolidated Fund of the State.

323. (1) It shall be the duty of the Union Commission to present annually to the President a report as to the work done by the Commission and on receipt of such report the President shall cause a copy thereof together with a memorandum explaining, as respects the cases, if any, where the advice of the Commission was not accepted, the reasons for such non-acceptance to be laid before each House of Parliament.

(2) It shall be the duty of a State Commission to present annually to the Governor or Rajpramukh of the State a report as to the work done by the Commission, and it shall be the duty of a Joint Commission to present annually to the Governor or Rajpramukh of each of the States the needs of which are served by the Joint Commission a report as to the work done by the Commission in relation to that State, and in either case the Governor or Rajpramukh, as the case may be, shall, on receipt of such report, cause a copy thereof together with a memorandum explaining, as respects the cases, if any, where the advice of the Commission was not accepted, the reasons for such non-acceptance to be laid before the Legislature of the State.

PART XV
ELECTIONS

324. (1) The superintendence, direction and control of the preparation of the electoral rolls for, and the conduct, of all elections to Parliament and to the Legislature of every State and of elections to the offices of President and Vice-President held under this Constitution, including the appointment of election tribunals for the decision of doubts and disputes arising out of or in connection with elections to Parliament and to the Legislatures of States shall be vested in a Commission (referred to in this Constitution as the Election Commission).

(2) The Election Commission shall consist of the Chief Election Commissioner and such number of other Election Commissioners, if any, as the President may from time to time fix and the appointment of the Chief Election Commissioner and other Election Commissioners shall, subject to the provisions of any law made in that behalf by Parliament, be made by the President.

(3) When any other Election Commissioner is so appointed the Chief Election Commissioner shall act as the Chairman of the Election Commission.

(4) Before each general election to the House of the People and to the Legislative Assembly of each State, and before the first general election and thereafter before each biennial election to the Legislative Council of each State having such Council, the President may also appoint after consultation with the Election Commission such Regional Commissioners as he may consider necessary to assist the Election Commission in the performance of the functions conferred on the Commission by clause (1).

(5) Subject to the provisions of any law made by Parliament, the conditions of service and tenure of office of the Election Commissioners and the Regional Commissioners shall be such as the President may by rule determine:

Provided that the Chief Election Commissioner shall not be removed from his office except in like manner and on the like grounds as a Judge of the Supreme Court and the conditions of service of the Chief Election Commissioner shall not be varied to his disadvantage after his appointment.

Provided further that any other Election Commissioner or a Regional Commissioner shall not be removed from office except on the recommendation of the Chief Election Commissioner.

(6) The President, or the Governor or Rajpramukh of a State, shall, when so requested by the Election Commission, make available to the Election Commission or to a Regional Commissioner such staff as may be necessary for the discharge of the functions conferred on the Election Commission by clause (1).

SINGLE ELECTORAL ROLL

325. There shall be one general electoral roll for every territorial constituency for election to either House of Parliament or to the House or either House of the Legislature of a State and no person shall be ineligible for inclusion in any such roll or claim to be included in any special electoral roll for any such constituency on grounds only of religion, race, caste, sex or any of them.

326. The elections to the House of the People and to the Legislative Assembly of every State shall be on the basis of adult suffrage; that is to say, every person who is a citizen of India and who is not less than twenty-one years of age on such date as may be fixed in that behalf by or under any law made by the appropriate Legislature and is not otherwise disqualified under this Constitution or any law made by the appropriate Legislature on the ground of non-residence, unsoundness of mind, crime or corrupt or illegal practice, shall be entitled to be registered as a voter at any such election.

327. Subject to the provisions of this Constitution, Parliament may from time to time by law make provision with respect to all matters relating to, or in connection with, elections to either House of Parliament or to the House or either House of the Legislature of a State including the preparation of electoral rolls, the delimitation of constituencies and all other matters necessary for securing the due constitution of such House or Houses.

[*Parliament has passed the following laws for the purposes of election.*:—(*i*) *The Representation of the People Act* (*Act XLIII of* 1950); (*ii*) *The Representation of the People* (*Amendment*) *Act* (*Act LXXIII of* 1950); (*iii*) *The Representation of the People* (*No.* 2) *Act*, 1951 (*Act* XLIII *of* 1951).—Editor.]

328. Subject to the provisions of this Constitution and in so far as provision in that behalf is not made by Parliament, the Legislature of a State may from time to time by law make provision with respect to all matters relating to, or in connection with, the elections to the House or either House of the Legislature of the State including the preparation of electoral rolls and all other matters necessary for securing the due constitution of such House or Houses.

329. Notwithstanding anything in this Constitution—

(*a*) the validity of any law relating to the delimitation of constituencies or the allotment of seats to such constituencies, made or purporting to be made under article 327 or article 328, shall not be called in question in any court;

(*b*) no election to either House of Parliament or to the House or either House of the Legislature of a State shall be called in question except by an election petition presented to such authority and in such manner as may be provided for by or under any law made by the appropriate Legislature.

PART XVI
SPECIAL PROVISIONS FOR CERTAIN CLASSES

330. (1) Seats shall be reserved in the House of the People for—

(*a*) the Scheduled Castes;

(*b*) the Scheduled Tribes except the Scheduled Tribes in the tribal areas of Assam; and

(*c*) the Scheduled Tribes in the autonomous districts of Assam.

(2) The number of seats reserved in any State for the Scheduled Castes or the Scheduled Tribes under clause (1) shall bear, as nearly as may be, the same proportion to the total number of seats allotted to that State in the House of the People as the population of the Scheduled Castes in the State or of the Scheduled Tribes in the State or part of the State, as the case may be, in respect of which seats are so reserved, bears to the total population of the State.

331. Notwithstanding anything in article 81, the President may, if he is of opinion that the Anglo-Indian community is not adequately represented in the House of the People, nominate not more than two members of that community to the House of the People.

SCHEDULED CASTES, TRIBES

332. (1) Seats shall be reserved for the Scheduled Castes and the Scheduled Tribes, except the Scheduled Tribes in the tribal areas of Assam, in the Legislative Assembly of every State specified in Part A or Part B of the First Schedule.

(2) Seats shall be reserved also for the autonomous districts in the Legislative Assembly of the State of Assam.

(3) The number of seats reserved for the Scheduled Castes or the Scheduled Tribes in the Legislative Assembly of any State under clause (1) shall bear, as nearly as may be, the same proportion to the total number of seats in the Assembly as the population of the Scheduled Castes in the State or of the Scheduled Tribes in the State or part of the State, as the case may be, in respect of which seats are so reserved, bears to the total population of the State.

(4) The number of seats reserved for an autonomous district in the Legislative Assembly of the State of Assam shall bear to the total number of seats in that Assembly a proportion not less than the population of the district bears to the total population of the State.

(5) The constituencies for the seats reserved for any autonomous district of Assam shall not comprise any area outside that district except in the case of the constituency comprising the cantonment and municipality of Shillong.

(6) No person who is not a member of a Scheduled Tribe of any autonomous district of the State of Assam shall be eligible for election to the Legislative Assembly of the State from any constituency of that district except from the constituency comprising the cantonment and municipality of Shillong.

333. Notwithstanding anything in article 170, the Governor or Rajpramukh of a State may, if he is of opinion that the Anglo-Indian community needs representation in the Legislative Assembly of the State and is not adequately represented therein, nominate such number of members of the community to the Assembly as he considers appropriate.

TEN YEAR PERIOD

334. Notwithstanding anything in the foregoing provisions of this Part, the provisions of this Constitution relating to—

(*a*) the reservation of seats for the Scheduled Castes and the Scheduled Tribes in the House of the People and in the Legislative Assemblies of the States; and

(*b*) the representation of the Anglo-Indian community in the House of the People and in the Legislative Assemblies of the States by nomination,

shall cease to have effect on the expiration of a period of ten years from the commencement of this Constitution:

Provided that nothing in this article shall affect any representation in the House of the People or in the Legislative Assembly of a State until the dissolution of the then existing House or Assembly, as the case may be.

SPECIAL CLAIMS IN SERVICES

335. The claims of the members of the Scheduled Castes and the Scheduled Tribes shall be taken into consideration, consistently with the maintenance of efficiency of administration, in the making of appointments to services and posts in connection with the affairs of the Union or of a State.

336. (1) During the first two years after the commencement of this Constitution, appointments of members of the Anglo-Indian community to posts in the railway, customs, postal and telegraph services of the Union shall be made on the same basis as immediately before the fifteenth day of August, 1947.

During every succeeding period of two years, the number of posts reserved for the members of the said community in the said services shall as nearly as possible, be less by ten per cent. than the numbers so reserved during the immediately preceding period of two years:

Provided that at the end of ten years from the commencement of this Constitution all such reservations shall cease.

(2) Nothing in clause (1) shall bar the appointment of members of the Anglo-Indian community to posts other than, or in addition to, those reserved for the community under that clause if such members are found qualified for appointment on merit as compared with the members of other communities.

ANGLO-INDIAN EDUCATION

337. During the first three financial years after the commencement of this Constitution, the same grants, if any, shall be made by the Union and by each State specified in Part A or Part B of the First Schedule for the benefit of the Anglo-Indian community in respect of education as were made in the financial year ending on the thirty-first day of March, 1948.

During every succeeding period of three years the grants may be less by ten per cent. than those for the immediately preceding period of three years:

Provided that at the end of ten years from the commencement of this Constitution such grants, to the extent to which they are a special concession to the Anglo-Indian community, shall cease:

Provided further that no educational institution shall be entitled to receive any grant under this article unless at least forty per cent. of the annual admissions therein are made available to members of communities other than the Anglo-Indian community.

SPECIAL OFFICER

338. (1) There shall be a Special Officer for the Scheduled Castes and Scheduled Tribes to be appointed by the President.

(2) It shall be the duty of the Special Officer to investigate all matters relating to the safeguards provided for the Scheduled Castes and Scheduled Tribes under this Constitution and report to the President upon the working of those safeguards at such intervals as the President may direct, and the President shall cause all such reports to be laid before each House of Parliament.

(3) In this article, references to the Scheduled Castes and Scheduled Tribes shall be construed as including references to such other backward classes as the President may, on receipt of the report of a Commission appointed under clause (1) of article 340, by order specify and also to the Anglo-Indian community.

UNION CONTROL OVER SCHEDULED AREAS

339. (1) The President may at any time and shall, at the expiration of ten years from the commencement of this Constitution by order appoint a Commission to report on the administration of the Scheduled Areas and the welfare of the Scheduled Tribes in the States specified in Part A and Part B of the First Schedule.

The order may define the composition, powers and procedure of the Commission and may contain such incidental or ancillary provisions as the President may consider necessary or desirable.

(2) The executive power of the Union shall extend to the giving of directions to any such State as to the drawing up and execution of schemes specified in the direction to be essential for the welfare of the Scheduled Tribes in the State.

340. (1) The President may by order appoint a Commission consisting of such persons as he thinks fit to investigate the conditions of socially and educationally backward classes within the territory of India and the difficulties under which they labour and to make recommendations as to the steps that should be taken by the Union or any State to remove such difficulties and to improve their condition and as to the grants that should be made for the purpose by the Union or any State and the conditions subject to which such grants should be made, and the order appointing such Commission shall define the procedure to be followed by the Commission.

(2) A Commission so appointed shall investigate the matters referred to them and present to the President a report setting out the facts as found by them and making such recommendations as they think proper.

(3) The President shall cause a copy of the report so presented together with a memorandum explaining the action taken thereon to be laid before each House of Parliament.

SPECIFYING SCHEDULED CASTE, TRIBE

341. (1) The President may with respect to any State and where it is a State specified in Part A or Part B of the First Schedule after consultation with the Governor or Rajpramukh thereof, by public notification, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of this Constitution be deemed to be Scheduled Castes in relation to that State.

(2) Parliament may by law include in or exclude from the list of Scheduled Castes specified in a notification issued under clause (1) any caste, race or tribe or part of or group within any caste, race or tribe, but save as aforesaid a notification issued under the said clause shall not be varied by any subsequent notification.

342. (1) The President may with respect to any State, and where it is a State specified in Part A or Part B of the First Schedule, after consultation with the Governor or Rajpramukh thereof, by public notification, specify the tribes of tribal communities or parts of or groups within tribes or tribal communities which shall for the purposes of this Constitution be deemed to be Scheduled Tribes in relation to that State.

(2) Parliament may by law include in or exclude from the list of Scheduled Tribes specified in a notification issued under clause (1) any tribe or tribal community or part of or group within any tribe or tribal community, but save as aforesaid a notification issued under the said clause shall not be varied by any subsequent notification.

PART XVII—OFFICIAL LANGUAGE

CHAPTER I—LANGUAGE OF THE UNION

343. (1) The official language of the Union shall be Hindi in Devanagari script.

The form of numerals to be used for the official purposes of the Union shall be the international form of Indian numerals.

(2) Notwithstanding anything in clause (1), for a period of fifteen years from the commencement of this Constitution, the English language shall continue to be used for all the official purposes of the Union for which it was being used immediately before such commencement:

Provided that the President may, during the said period, by order authorise the use of the Hindi language in addition to the English language and of the Devanagari form of numerals in addition to the international form of Indian numerals for any of the official purposes of the Union.

(3) Notwithstanding anything in this article, Parliament may by law provide for the use, after the said period of fifteen years, of—

(*a*) the English language, or

(*b*) the Devanagari form of numerals,

for such purposes as may be specified in the law.

COMMISSION

344. (1) The President shall, at the expiration of five years from the commencement of this Constitution and thereafter at the expiration of ten years from such commencement, by order constitute a Commission which shall consist of a Chairman and such other members representing the different languages specified in the Eighth Schedule as the President may appoint, and the order shall define the procedure to be followed by the Commission.

(2) It shall be the duty of the Commission to make recommendations to the President as to—

(*a*) the progressive use of the Hindi language for the official purposes of the Union;

(*b*) restrictions on the use of the English language for all or any of the official purposes of the Union;

(*c*) the language to be used for all or any of the purposes mentioned in article 348;

(*d*) the form of numerals to be used for any one or more specified purposes of the Union;

(*e*) any other matter referred to the Commission by the President as regards the official language of the Union and the language for communication between the Union and a State or between one State and another and their use.

(3) In making their recommendations under clause (2), the Commission shall have due regard to the industrial, cultural and scientific advancement of India, and the just claims and the interests of persons belonging to the non-Hindi speaking areas in regard to the public services.

(4) There shall be constituted a Committee consisting of thirty members, of whom twenty shall be members of the House of the People and ten shall be members of the Council of States to be elected respectively by the members of the House of the People and the members of the Council of States in accordance with the system of proportional representation by means of the single transferable vote.

(5) It shall be the duty of the Committee to examine the recommendations of the Commission constituted under clause (1) and to report to the President their opinion thereon.

(6) Notwithstanding anything in article 343, the President may, after consideration of the report referred to in clause (5), issue directions in accordance with the whole or any part of that report.

CHAPTER II—REGIONAL LANGUAGES

345. Subject to the provisions of articles 346 and 347, the Legislature of a State may by law adopt any one or more of the languages in use in the State or Hindi as the language or languages to be used for all or any of the official purposes of that State:

Provided that, until the Legislature of the State otherwise provides by law, the English language shall continue to be used for those official purposes within the State for which it was being used immediately before the commencement of this Constitution.

346. The language for the time being authorised for use in the Union for official purposes shall be the official language for communication between one State and another State and between a State and the Union:

Provided that if two or more States agree that the Hindi language should be the official language for communication between such States, that language may be used for such communication.

347. On a demand being made in that behalf, the President may, if he is satisfied that a substantial proportion of the population of a State desire the use of any language spoken by them to be recognised by that State, direct that such language shall also be officially recognised throughout that State or any part thereof for such purpose as he may specify.

CHAPTER III—LANGUAGE OF THE SUPREME COURT, HIGH COURTS, ETC.

348. (1) Notwithstanding anything in the foregoing provisions of this Part, until Parliament by law otherwise provides—

(*a*) all proceedings in the Supreme Court and in every High Court,

(*b*) the authoritative texts—

(*i*) of all Bills to be introduced or amendments thereto to be moved in either House of Parliament or in the House or either House of the Legislature of a State,

(*ii*) of all Acts passed by Parliament or the Legislature of a State and of all Ordinances promulgated by the President or the Governor or Rajpramukh of a State, and

(*iii*) of all orders, rules, regulations and bye-laws issued under this Constitution or under any law made by Parliament or the Legislature of a State,

shall be in the English language.

(2) Notwithstanding anything in sub-clause (*a*) of clause (1), the Governor or Rajpramukh of a State may, with the previous consent of the President, authorise the use of the Hindi language, or any other language used for any official purposes of the State, in proceedings in the High Court having its principal seat in that State:

Provided that nothing in this clause shall apply to any judgment, decree or order passed or made by such High Court.

(3) Notwithstanding anything in sub-clause (*b*) of clause (1), where the Legislature of a State has prescribed any language other than the English language for use in Bills introduced in, or Acts passed by, the Legislature of the State or in Ordinances promulgated by the Governor or Rajpramukh of the State or in any order, rule, regulation or bye-law referred to in paragraph (*iii*) of that sub-clause, a translation of the same in the English language published under the authority of the Governor or Rajpramukh of the State in the Official Gazette of that State shall be deemed to be the authoritative text thereof in the English language under this article.

PROVISION FOR CHANGE

349. During the period of fifteen years from the commencement of this Constitution, no Bill or amendment making provision for the language to be used for any of the purposes mentioned in clause (1) of article 348 shall be introduced or moved in either House of Parliament without the previous sanction of the President, and the President shall not give his sanction to the introduction of any such Bill or the moving of any such amendment except after he has taken into consideration the recommendations of the Commission constituted under clause (1) of article 344 and the report of the Committee constituted under clause (4) of that article.

CHAPTER IV
SPECIAL DIRECTIVES

350. Every person shall be entitled to submit a representation for the redress of any grievance to any officer or authority of the Union or a State in any of the languages used in the Union or in the State, as the case may be.

351. It shall be the duty of the Union to promote the spread of the Hindi language, to develop it so that it may serve as a medium of expression for all the elements of the composite culture of India and to secure its enrichment by assimilating without interfering with its genius, the forms, style and expressions used in Hindustani and in the other languages of India specified in the Eighth Schedule, and by drawing, wherever necessary or desirable, for its vocabulary, primarily on Sanskrit and secondarily on other languages.

PART XVIII
EMERGENCY PROVISIONS

352. (1) If the President is satisfied that a grave emergency exists whereby the security of India or of any part of the territory thereof is threatened, whether by war or external aggression or internal disturbance, he may, by Proclamation, make a declaration to that effect.

(2) A Proclamation issued under clause (1)—

(*a*) may be revoked by a subsequent Proclamation;

(*b*) shall be laid before each House of Parliament;

(*c*) shall cease to operate at the expiration of two months unless before the expiration of that period it has been approved by resolutions of both Houses of Parliament:

Provided that if any such Proclamation is issued at a time when the House of the People has been dissolved or the dissolution of the House of the People takes place during the period of two months referred to in sub-clause (*c*), and if a resolution approving the Proclamation has been passed by the Council of States, but no resolution with respect to such Proclamation has been passed by the House of the People before the expiration of that period, the Proclamation shall cease to operate at the expiration of thirty days from the date on which the House of the People first sits after its reconstitution unless before the expiration of the said period of thirty days a resolution approving the Proclamation has been also passed by the House of the People.

(3) A Proclamation of Emergency declaring that the security of India or of any part of the territory thereof is threatened by war or by external aggression or by internal disturbance may be made before the actual occurrence of war or of any such aggression or disturbance if the President is satisfied that there is imminent danger thereof.

EFFECTS OF PROCLAMATION

353. While a Proclamation of Emergency is in operation, then—

(*a*) notwithstanding anything in this Constitution, the executive power of the Union shall extend to the giving of directions to any State as to the manner in which the executive power thereof is to be exercised;

(*b*) the power of Parliament to make laws with respect to any matter shall include power to make laws conferring powers and imposing duties, or authorising the conferring of powers and the imposition of duties, upon the Union or officers and authorities of the Union as respects that matter, notwithstanding that it is one which is not enumerated in the Union List.

354. (1) The President may, while a Proclamation of Emergency is in operation, by order direct that all or any of the provisions of articles 268 to 279 shall for such period, not extending in any case beyond the expiration of the financial year in which such Proclamation ceases to operate, as may be specified in the order, have effect subject to such exceptions or modifications as he thinks fit.

(2) Every order made under clause (1) shall, as soon as may be after it is made, be laid before each House of Parliament.

355. It shall be the duty of the Union to protect every State against external aggression and internal disturbance and to ensure that the government of every State is carried on in accordance with the provisions of this Constitution.

BREAKDOWN IN STATES

356. (1) If the President, on receipt of a report from the Governor or Rajpramukh of a State or otherwise, is satisfied that a situation has arisen in which the government of the State cannot be carried on in accordance with the provisions of this Constitution, the President may by Proclamation—

(*a*) assume to himself all or any of the functions of the Government of the State and all or any of the powers vested in or exercisable by the Governor or Rajpramukh, as the case may be, or any body or authority in the State other than the Legislature of the State;

(*b*) declare that the powers of the Legislature of the State shall be exercisable by or under the authority of Parliament;

(*c*) make such incidental and consequential provisions as appear to the President to be necessary or desirable for giving effect to the objects of the Proclamation, including provisions for suspending in whole or in part the operation of any provisions of this Constitution relating to any body or authority in the State:

Provided that nothing in this clause shall authorise the President to assume to himself any of the powers vested in or exercisable by a High Court, or to suspend in whole or in part the operation of any provision of this Constitution relating to High Courts.

(2) Any such Proclamation may be revoked or varied by a subsequent Proclamation.

(3) Every Proclamation under this article shall be laid before each House of Parliament and shall, except where it is a Proclamation revoking a previous Proclamation, cease to operate at the expiration of two months unless before the expiration of that period it has been approved by resolutions of both Houses of Parliament:

Provided that if any such Proclamation (not being a Proclamation revoking a previous Proclamation) is issued at a time when the House of the People is dissolved or the dissolution of the House of the People takes place during the period of two months referred to in this clause, and if a resolution approving the Proclamation has been passed by the Council of States, but no resolution with respect to such Proclamation has been passed by the House of the People before the expiration of that period, the Proclamation shall cease to operate at the expiration of thirty days from the date on which the House of the People first sits after its reconstitution unless before the expiration of the said period of thirty days a resolution approving the Proclamation has been also passed by the House of the People.

(4) A Proclamation so approved shall, unless revoked, cease to operate on the expiration of a period of six months from the date of the passing of the second of the resolutions approving the Proclamation under clause (3):

Provided that if and so often as a resolution approving the continuance in force of such a Proclamation is passed by both Houses of Parliament, the Proclamation shall, unless revoked, continue in force for a further period of six months from the date on which under this clause it would otherwise have ceased to operate, but no such Proclamation shall in any case remain in force for more than three years:

Provided further that if the dissolution of the House of the People takes place during any such period of six months and a resolution approving the continuance in force of such Proclamation has been passed by the Council of States, but no resolution with respect to the continuance in force of such Proclamation has been passed by the House of the People during the said period, the Proclamation shall cease to operate at the expiration of thirty days from the date on which the House of the People first sits after its reconstitution unless before the expiration of the said period of thirty days a resolution approving the continuance in force of the Proclamation has been also passed by the House of the People.

POWERS OF PARLIAMENT

357. (1) Where by a Proclamation issued under clause (1) of article 356, it has been declared that the powers of the Legislature of the State shall be exercisable by or under the authority of Parliament, it shall be competent—

(*a*) for Parliament to confer on the President the power of the Legislature of the State to make laws, and to authorise the President to delegate, subject to such conditions as he may think fit to impose, the power so conferred to any other authority to be specified by him in that behalf;

(*b*) for Parliament, or for the President or other authority in whom such power to make laws is vested under sub-clause (*a*), to make laws conferring powers and imposing duties, or authorising the conferring of powers and the imposition of duties, upon the Union or officers and authorities thereof;

(*c*) for the President to authorise when the House of the People is not in session expenditure from the Consolidated Fund of the State pending the sanction of such expenditure by Parliament.

(2) Any law made in exercise of the power of the Legislature of the State by Parliament or the President or other authority referred to in sub-clause (*a*) of clause (1) which Parliament or the President or such other authority would not, but for the issue of a Proclamation under article 356, have been competent to make shall, to the extent of the incompetency, cease to have effect on the expiration of a period of one year after the Proclamation has ceased to operate except as respects things done or omitted to be done before the expiration of the said period, unless the provisions which shall so cease to have effect are sooner repealed or re-enacted with or without modification by Act of the appropriate Legislature.

358. While a Proclamation of Emergency is in operation, nothing in article 19 shall restrict the power of the State as defined in Part III to make any law or to take any executive action which the State would but for the provisions contained in that Part be competent to make or to take, but any law so made shall, to the extent of the incompetency, cease to have effect as soon as the Proclamation ceases to operate, except as respects things done or omitted to be done before the law so ceases to have effect.

359. (1) Where a Proclamation of Emergency is in operation, the President may by order declare that the right to move any court for the enforcement of such of the rights conferred by Part III as may be mentioned in the order and all proceedings pending in any court for the enforcement of the rights so mentioned shall remain suspended for the period during which the Proclamation is in force or for such shorter period as may be specified in the order.

(2) An order made as aforesaid may extend to the whole or any part of the territory of India.

(3) Every order made under clause (1) shall, as soon as may be after it is made, be laid before each House of Parliament.

THREAT TO FINANCIAL STABILITY

360. (1) If the President is satisfied that a situation has arisen whereby the financial stability or credit of India or of any part of the territory thereof is threatened, he may by a Proclamation make a declaration to that effect.

(2) The provisions of clause (2) of article 352 shall apply in relation to a Proclamation issued under this article as they apply in relation to a Proclamation of Emergency issued under article 352.

(3) During the period any such Proclamation as is mentioned in clause (1) is in operation, the executive authority of the Union shall extend to the giving of directions to any State to observe such canons of financial propriety as may be specified in the directions, and to the giving of such other directions as the President may deem necessary and adequate for the purpose.

(4) Notwithstanding anything in this Constitution—

(*a*) any such direction may include—

(*i*) a provision requiring the reduction of salaries and allowances of all or any class of persons serving in connection with the affairs of a State;

(*ii*) a provision requiring all Money Bills or other Bills to which the provisions of article 207 apply to be reserved for the consideration of the President after they are passed by the Legislature of a State;

(*b*) it shall be competent for the President during the period any Proclamation issued under this article is in operation to issue directions for the reduction of salaries and allowances of all or any class of persons serving in connection with the affairs of the Union including the Judges of the Supreme Court and the High Courts.

PART XIX

MISCELLANEOUS

PROTECTION OF PRESIDENT, ETC.

361. (1) The President, or the Governor or Rajpramukh of a State, shall not be answerable to any court for the exercise and performance of the powers and duties of his office or for any act done or purporting to be done by him in the exercise and performance of those powers and duties:

Provided that the conduct of the President may be brought under review by any court, tribunal or body appointed or designated by either House of Parliament for the investigation of a charge under article 61:

Provided further that nothing in this clause shall be construed as restricting the right of any person to bring appropriate proceedings against the Government of India or the Government of a State.

(2) No criminal proceedings whatsoever shall be instituted or continued against the President, or the Governor or Rajpramukh of a State, in any court during his term of office.

(3) No process for the arrest or imprisonment of the President, or the Governor or Rajpramukh of a State, shall issue from any court during his term of office.

(4) No civil proceedings in which relief is claimed against the President, or the Governor or Rajpramukh of a State, shall be instituted during his term of office in any court in respect of any act done or purporting to be done by him in his personal capacity, whether before or after he entered upon his office as President, or as Governor or Rajpramukh of such State, until the expiration of two months next after notice in writing has been delivered to the President or the Governor or the Rajpramukh as the case may be, or left at his office stating the nature of the proceedings, the cause of action therefor, the name, description and place of residence of the party by whom such proceedings are to be instituted and the relief which he claims.

RIGHTS, ETC. OF RULERS

362. In the exercise of the power of Parliament or of the Legislature of a State to make laws or in the exercise of the executive power of the Union or of a State, due regard shall be had to the guarantee or assurance given under any such covenant or agreement as is referred to in clause (1) of article 291 with respect to the personal rights, privileges and dignities of the Ruler of an Indian State.

363. (1) Notwithstanding anything in this Constitution but subject to the provisions of article 143, neither the Supreme Court nor any other court shall have jurisdiction in any dispute arising out of any provision of a treaty, agreement, covenant, engagement, *sanad* or other similar instrument which was entered into or executed before the commencement of this Constitution by any Ruler of an Indian State and to which the Government of the Dominion of India or any of its predecessor Governments was a party and which has or has been continued in operation after such commencement or in any dispute in respect of any right accruing under or any liability or obligation arising out of any of the provisions of this Constitution relating to any such treaty, agreement, covenant, engagement, *sanad* or other similar instrument.

(2) In this article—

(*a*) "Indian State" means any territory recognised before the commencement of this Constitution by His Majesty or the Government of the Dominion of India as being such a State; and

(*b*) "Ruler" includes the Prince, Chief or other person recognised before such commencement by His Majesty or the Government of the Dominion of India as the Ruler of any Indian State.

MAJOR PORTS, AERODROMES

364. (1) Notwithstanding anything in this Constitution, the President may by public notification direct that as from such date as may be specified in the notification—

(*a*) any law made by Parliament or by the Legislature of a State shall not apply to any major port or aerodrome or shall apply thereto subject to such exceptions or modifications as may be specified in the notification, or

(*b*) any existing law shall cease to have effect in any major port or aerodrome except as respects things done or omitted to be done before the said date, or shall in its application to such port or aerodrome have effect subject to such exceptions or modifications as may be specified in the notification.

(2) In this article—

(*a*) "major port" means a port declared to be a major port by or under any law made by Parliament or any existing law and includes all areas for the time being included within the limits of such port;

(*b*) "aerodrome" means aerodrome as defined for the purposes of the enactments relating to airways, aircraft and air navigation.

365. Where any State has failed to comply with, or to give effect to, any directions given in the exercise of the executive power of the Union under any of the provisions of this Constitution, it shall be lawful for the President to hold that a situation has arisen in which the government of the State cannot be carried on in accordance with the provisions of this Constitution.

DEFINITIONS

366. In this Constitution, unless the context otherwise requires, the following expressions have the meanings hereby respectively assigned to them, that is to say—

(1) *agricultural income* means agricultural income as defined for the purposes of the enactments relating to Indian income-tax;

(2) *an Anglo-Indian* means a person whose father or any of whose other male progenitors in the male line is or was of European descent but who is domiciled within the territory of India and is or was born within such territory of parents habitually resident therein and not established there for temporary purposes only;

(3) *article* means an article of this Constitution;

(4) *borrow* includes the raising of money by the grant of annuities, and "loan" shall be construed accordingly;

(5) *clause* means a clause of the article in which the expression occurs;

(6) *corporation tax* means any tax on income, so far as that tax is payable by companies and is a tax in the case of which the following conditions are fulfilled:—

(*a*) that it is not chargeable in respect of agricultural income;

(*b*) that no deduction in respect of the tax paid by companies is, by any enactments which may apply to the tax, authorised to be made from dividends payable by the companies to individuals;

(*c*) that no provision exists for taking the tax so paid into account in computing for the purposes of Indian income-tax the total income of individuals receiving such dividends, or in computing the Indian income-tax payable by, or refundable to, such individuals;

(7) *corresponding Province*, *corresponding Indian State* or *corresponding State* means in cases of doubt such Province, Indian State or State as may be determined by the President to be the corresponding Province, the corresponding Indian State or the corresponding State, as the case may be, for the particular purpose in question;

(8) *debt* includes any liability in respect of any obligation to repay capital sums by way of annuities and any liability under any guarantee, and "debt charges" shall be construed accordingly;

(9) *estate duty* means a duty to be assessed on or by reference to the principal value, ascertained in accordance with such rules as may be prescribed by or under laws made by Parliament or the Legislature of a State relating to the duty, of all property passing upon death or deemed, under the provisions of the said laws, so to pass;

(10) *existing law* means any law, Ordinance, order, bye-law, rule or regulation passed or made before the commencement of this Constitution by any Legislature, authority or person having power to make such a law, Ordinance, order, bye-law, rule or regulation;

(11) *Federal Court* means the Federal Court constituted under the Government of India Act, 1935;

(12) *goods* includes all materials, commodities, and articles;

(13) *guarantee* includes any obligation undertaken before the commencement of this Constitution to make payments in the event of the profits of an undertaking falling short of a specified amount;

(14) *High Court* means any court which is deemed for the purposes of this Constitution to be a High Court for any State and includes—

(*a*) any Court in the territory of India constituted or reconstituted under this Constitution as a High Court, and

(*b*) any other Court in the territory of India which may be declared by Parliament by law to be a High Court for all or any of the purposes of this Constitution;

(15) *Indian State* means any territory which the Government of the Dominion of India recognised as such a State;

(16) *Part* means a Part of this Constitution;

(17) *pension* means a pension, whether contributory or not, of any kind whatsoever payable to or in respect of any person, and includes retired pay so payable, a gratuity so payable and any sum or sums so payable by way of the return, with or without interest thereon or any other addition thereto, of subscriptions to a provident fund;

(18) *Proclamation of Emergency* means a Proclamation issued under clause (1) of article 352;

(19) *public notification* means a notification in the Gazette of India, or, as the case may be, the Official Gazette of a State;

(20) *railway* does not include—

(*a*) a tramway wholly within a municipal area, or

(*b*) any other line of communication wholly situate in one State and declared by Parliament by law not to be a railway;

(21) *Rajpramukh* means—

(*a*) in relation to the State of Hyderabad the person who for the time being is recognised by the President as the Nizam of Hyderabad;

(*b*) in relation to the State of Jammu and Kashmir or the State of Mysore, the person who for the time being is recognised by the President as the Maharaja of that State; and

(*c*) in relation to any other State specified in Part B of the First Schedule, the person who for the time being is recognised by the President as the Rajpramukh of that State,

and includes in relation to any of the said States any person for the time being recognised by the President as competent to exercise the powers of the Rajpramukh in relation to that State;

(22) *Ruler* in relation to an Indian State means the Prince, Chief or other person by whom any such covenant or agreement as is referred to in clause (1) of article 291 was entered into and who for the time being is recognised by the President as the Ruler of the State, and includes any person who for the time being is recognised by the President as the successor of such Ruler;

(23) *Schedule* means a Schedule to this Constitution;

(24) *Scheduled Castes* means such castes, races or tribes or parts of or groups within such castes, races or tribes as are deemed under article 341 to be Scheduled Castes for the purposes of this Constitution;

(25) *Scheduled Tribes* means such tribes or tribal communities or parts of or groups within such tribes or tribal communities as are deemed under article 342 to be Scheduled Tribes for the purposes of this Constitution;

(26) *securities* includes stock;

(27) *sub-clause* means a sub-clause of the clause in which the expression occurs;

(28) *taxation* includes the imposition of any tax or impost, whether general or local or special, and "tax" shall be construed accordingly;

(29) *tax on income* includes a tax in the nature of an excess profits tax;

(30) *Uparajpramukh* in relation to any State specified in Part B of the First Schedule means the person who for the time being is recognised by the President as the Uparajpramukh of that State.

INTERPRETATION

367. (1) Unless the context otherwise requires, the General Clauses Act, 1897, shall subject to any adaptations and modifications that may be made therein under article 372, apply for the interpretation of this Constitution as it applies for the interpretation of an Act of the Legislature of the Dominion of India.

(2) Any reference in this Constitution to Acts or laws of, or made by, Parliament, or to Acts or laws of, or made by, the Legislature of a State specified in Part A or Part B of the First Schedule, shall be construed as including a reference to an Ordinance made by the President or, to an Ordinance made by a Governor or Rajpramukh, as the case may be.

(3) For the purposes of this Constitution "foreign State" means any State other than India:

Provided that, subject to the provisions of any law made by Parliament, the President may by order declare any State not to be a foreign State for such purposes as may be specified in the order.

PART XX

AMENDMENT OF THE CONSTITUTION

368. An amendment of this Constitution may be initiated only by the introduction of a Bill for the purpose in either House of Parliament and when the Bill is passed in each House by a majority of the total membership of that House and by a majority of not less than two-thirds of the members of that House present and voting, it shall be presented to the President for his assent and upon such assent being given to the Bill, the Constitution shall stand amended in accordance with the terms of the Bill:

Provided that if such amendment seeks to make any change in—

(*a*) article 54, article 55, article 73, article 162 or article 241, or

(*b*) Chapter IV of Part V, Chapter V of Part VI, or Chapter I of Part XI, or

(*c*) any of the Lists in the Seventh Schedule, or

(*d*) the representation of States in Parliament, or

(*e*) the provisions of this article,

the amendment shall also require to be ratified by the Legislatures of not less than one-half of the States specified in Parts A and B of the First Schedule by resolutions to that effect passed by those Legislatures before the Bill making provision for such amendment is presented to the President for assent.

PART XXI

TEMPORARY AND TRANSITIONAL PROVISIONS

369. Notwithstanding anything in this Constitution, Parliament shall, during a period of five years from the commencement of this Constitution, have power to make laws with respect to the following matters as if they were enumerated in the Concurrent List, namely:—

(*a*) trade and commerce within a State in, and the production, supply and distribution of, cotton and woollen textiles, raw cotton (including ginned cotton and unginned cotton or *kapas*), cotton seed, paper (including newsprint), foodstuffs (including edible oilseeds and oil), cattle fodder (including oil-cakes and other concentrates), coal (including coke and derivatives of coal), iron, steel and mica;

(*b*) offences against laws with respect to any of the matters mentioned in clause (*a*), jurisdiction and powers of all courts except the Supreme Court with respect to any of those matters, and fees in respect of any of those matters but not including fees taken in any court;

but any law made by Parliament, which Parliament would not but for the provisions of this article have been competent to make, shall, to the extent of the incompetency, cease to have effect on the expiration of the said period, except as respects things done or omitted to be done before the expiration thereof.

JAMMU AND KASHMIR STATE

370. (1) Notwithstanding anything in this Constitution,—

(*a*) the provisions of article 238 shall not apply in relation to the State of Jammu and Kashmir;

(*b*) the power of Parliament to make laws for the said State shall be limited to—

(*i*) those matters in the Union List and the Concurrent List which, in consultation with the Government of the State, are declared by the President to correspond to matters specified in the Instrument of Accession governing the accession of the State to the Dominion of India as the matters with respect to which the Dominion Legislature may make laws for that State; and

(*ii*) such other matters in the said Lists as, with the concurrence of the Government of the State, the President may by order specify.

Explanation.—For the purposes of this article the Government of the State means the person for the time being recognised by the President as the Maharaja of Jammu and Kashmir acting on the advice of the Council of Ministers for the time being in office under the Maharaja's Proclamation dated the fifth day of March, 1948;

(*c*) the provisions of article I and of this article shall apply in relation to that State;

(*d*) such of the other provisions of this Constitution shall apply in relation to that State subject to such exceptions and modifications as the President may by order specify:

Provided that no such order which relates to the matters specified in the Instrument of Accession of the State referred to in paragraph (*i*) of sub-clause (*b*) shall be issued except in consultation with the Government of the State:

Provided further that no such order which relates to matters other than those referred to in the last preceding proviso shall be issued except with the concurrence of that Government.

(2) If the concurrence of the Government of the State referred to in paragraph (*ii*) of sub-clause (b) of clause (1) or in the second

proviso to sub-clause (*d*) of that clause be given before the Constituent Assembly for the purpose of framing the Constitution of the State is convened, it shall be placed before such Assembly for such decision as it may take thereon.

(3) Notwithstanding anything in the foregoing provisions of this article, the President may by public notification, declare that this article shall cease to be operative or shall be operative only with such exceptions and modifications and from such date as he may specify:

Provided that the recommendation of the Constituent Assembly of the State referred to in clause (2) shall be necessary before the President issues such a notification.

371. Notwithstanding anything in this Constitution, during a period of ten years from the commencement thereof, or during such longer or shorter period as Parliament may by law provide in respect of any State, the Government of every State specified in Part B of the First Schedule shall be under the general control of, and comply with such particular directions, if any, as may from time to time be given by, the President:

Provided that the President may by order direct that the provisions of this article shall not apply to any State specified in the order.

EXISTING LAWS

372. (1) Notwithstanding the repeal by this Constitution of the enactments referred to in article 395 but subject to the other provisions of this Constitution, all the laws in force in the territory of India immediately before the commencement of this Constitution shall continue in force therein until altered or repealed or amended by a competent Legislature or other competent authority.

(2) For the purpose of bringing the provisions of any law in force in the territory of India into accord with the provisions of this Constitution, the President may by order make such adaptations and modifications of such law, whether by way of repeal or amendment, as may be necessary or expedient, and provide that the law shall, as from such date as may be specified in the order, have effect subject to the adaptations and modifications so made, and any such adaptation or modification shall not be questioned in any court of law.

(3) Nothing in clause (2) shall be deemed—

(*a*) to empower the President to make any adaptation or modification of any law after the expiration of three years from the commencement of this Constitution; or

(*b*) to prevent any competent Legislature or other competent authority from repealing or amending any law adapted or modified by the President under the said clause.

Explanation I.—The expression "law in force" in this article shall include a law passed or made by a Legislature or other competent authority in the territory of India before the commencement of this Constitution and not previously repealed, notwithstanding that it or parts of it may not be then in operation either at all or in particular areas.

Explanation II.—Any law passed or made by a Legislature or other competent authority in the territory of India which immediately before the commencement of this Constitution had extra-territorial effect as well as effect in the territory of India shall, subject to any such adaptations and modifications as aforesaid, continue to have such extra-territorial effect.

Explanation III.—Nothing in this article shall be construed as continuing any temporary law in force beyond the date fixed for its expiration or the date on which it would have expired if this Constitution had not come into force.

Explanation IV.—An Ordinance promulgated by the Governor of a Province under section 88 of the Government of India Act, 1935, and in force immediately before the commencement of this Constitution shall, unless withdrawn by the Governor of the corresponding State earlier, cease to operate at the expiration of six weeks from the first meeting after such commencement of the Legislative Assembly of that State functioning under clause (1) of article 382, and nothing in this article shall be construed as continuing any such Ordinance in force beyond the said period.

373. Until provision is made by Parliament under clause (7) of article 22, or until the expiration of one year from the commencement of this Constitution, whichever is earlier, the said article shall have effect as if for any reference to Parliament in clauses (4) and (7) thereof there were substituted a reference to the President and for any reference to any law made by Parliament in those clauses there were substituted a reference to an order made by the President.

PRIVY COUNCIL APPEALS

374. (1) The Judges of the Federal Court holding office immediately before the commencement of this Constitution shall, unless they have elected otherwise, become on such commencement the Judges of the Supreme Court and shall thereupon be entitled to such salaries and allowances and to such rights in respect of leave of absence and pension as are provided for under article 125 in respect of the Judges of the Supreme Court.

(2) All suits, appeals and proceedings, civil or criminal, pending in the Federal Court at the commencement of this Constitution shall stand removed to the Supreme Court, and the Supreme Court shall have jurisdiction to hear and determine the same, and the judgments and orders of the Federal Court delivered or made before the commencement of this Constitution shall have the same force and effect as if they had been delivered or made by the Supreme Court.

(3) Nothing in this Constitution shall operate to invalidate the exercise of jurisdiction by His Majesty in Council to dispose of appeals and petitions from, or in respect of, any judgment, decree or order of any court within the territory of India in so far as the exercise of such jurisdiction is authorised by law, and any order of His Majesty in Council made on any such appeal or petition after the commencement of this Constitution shall for all purposes have effect as if it were an order or decree made by the Supreme Court in the exercise of the jurisdiction conferred on such Court by this Constitution.

(4) On and from the commencement of this Constitution the jurisdiction of the authority functioning as the Privy Council in a State specified in Part B of the First Schedule to entertain and dispose of appeals and petitions from or in respect of any judgment, decree or order of any court within that State shall cease, and all appeals and other proceedings pending before the said authority at such commencement shall be transferred to, and disposed of by, the Supreme Court.

(5) Further provision may be made by Parliament by law to give effect to the provisions of this article.

LAW COURTS

375. All courts of civil, criminal and revenue jurisdiction, all authorities and all officers, judicial, executive and ministerial, throughout the territory of India, shall continue to exercise their respective functions subject to the provisions of this Constitution.

376. (1) Notwithstanding anything in clause (2) of article 217, the Judges of a High Court in any Province holding office immediately before the commencement of this Constitution shall, unless they have elected otherwise, become on such commencement the Judges of the High Court in the corresponding State, and shall thereupon be entitled to such salaries and allowances and to such rights in respect of leave of absence and pension as are provided for under article 221 in respect of the Judges of such High Court. Any such Judge shall, notwithstanding that he is not a citizen of India, be eligible for appointment as Chief Justice of such High Court, or as Chief Justice or other Judge of any other High Court.

(2) The Judges of a High Court in any Indian State corresponding to any State specified in Part B of the First Schedule holding office immediately before the commencement of this Constitution shall, unless they have elected otherwise, become on such commencement the Judges of the High Court in the State so specified and shall, notwithstanding anything in clauses (1) and (2) of article 217 but subject to the proviso to clause (1) of that article, continue to hold office until the expiration of such period as the President may by order determine.

(3) In this article, the expression "Judge" does not include an acting Judge or an additional Judge.

AUDITOR-GENERAL

377. The Auditor-General of India holding office immediately before the commencement of this Constitution shall, unless he has elected otherwise, become on such commencement the Comptroller and Auditor-General of India and shall thereupon be entitled to such salaries and to such rights in respect of leave of absence and pension as are provided for under clause (3) of article 148 in respect of the Comptroller and Auditor-General of India and be entitled to continue to hold office until the expiration of his term of office as determined under the provisions which were applicable to him immediately before such commencement.

PUBLIC SERVICE COMMISSION

378. (1) The members of the Public Service Commission for the Dominion of India holding office immediately before the commencement of this Constitution shall, unless they have elected otherwise, become on such commencement the members of the Public Service Commission for the Union and shall, notwithstanding anything in clauses (1) and (2) of article 316 but subject to the proviso to clause (2) of that article, continue to hold office until the expiration of their term of office as determined under the rules which were applicable immediately before such commencement to such members.

(2) The members of a Public Service Commission of a Province or of a Public Service Commission serving the needs of a group of Provinces holding office immediately before the commencement of this Constitution shall, unless they have elected otherwise, become on such commencement the members of the Public Service Commission for the corresponding State or the members of the Joint State Public Service Commission serving the needs of the corresponding States, as the case may be, and shall, notwithstanding anything in clauses (1) and (2) of article 316 but subject to the proviso to clause (2) of that article, continue to hold office until the expiration of their term of office as determined under the rules which were applicable immediately before such commencement to such members.

PARLIAMENT, SPEAKER

379. (1) Until both Houses of Parliament have been duly constituted and summoned to meet for the first session under the provisions of this Constitution, the body functioning as the Constituent Assembly of the Dominion of India immediately before the commencement of this Constitution shall be the provisional Parliament and shall exercise all the powers and perform all the duties conferred by the provisions of this Constitution on Parliament.

Explanation.—For the purposes of this clause, the Constituent Assembly of the Dominion of India includes—

(*i*) the members chosen to represent any State or other territory for which representation is provided under clause (2), and

(*ii*) the members chosen to fill casual vacancies in the said Assembly.

(2) The President may by rules provide for—

(*a*) the representation in the provisional Parliament functioning under clause (1) of any State or other territory which was not represented in the Constituent Assembly of the Dominion of India immediately before the commencement of this Constitution,

(*b*) the manner in which the representatives of such States or other territories in the provisional Parliament shall be chosen, and

(*c*) the qualifications to be possessed by such representatives.

(3) If a member of the Constituent Assembly of the Dominion of India was, on the sixth day of October, 1949, or thereafter at any time before the commencement of this Constitution, a member of a House of the Legislature of a Governor's Province or of an Indian State corresponding to any State specified in part B of the First Schedule or a Minister for any such State, then, as from the commencement of this Constitution the seat of such member in the Constituent Assembly shall, unless he has ceased to be a member of that Assembly earlier, become vacant and every such vacancy shall be deemed to be a casual vacancy.

(4) Notwithstanding that any such vacancy in the Constituent Assembly of the Dominion of India as is mentioned in clause (3) has not occurred under that clause, steps may be taken before the commencement of this Constitution for the filling of such vacancy, but any person chosen before such commencement to fill the vacancy shall not be entitled to take his seat in the said Assembly until after the vacancy has so occurred.

(5) Any person holding office immediately before the commencement of this Constitution as Speaker or Deputy Speaker of the Constituent Assembly when functioning as the Dominion Legislative under the Government of India Act, 1935, shall on such commencement be the Speaker or, as the case may be, the Deputy Speaker of the provisional Parliament functioning under clause (1).

PRESIDENT, MINISTERS

380. (1) Such person as the Constituent Assembly of the Dominion of India shall have elected in that behalf shall be the President of India until a President has been elected in accordance with the provisions contained in Chapter I of Part V and has entered upon his office.

(2) In the event of the occurrence of any vacancy in the office of the President so elected by the Constituent Assembly of the Dominion of India by reason of his death, resignation, or removal, or otherwise, it shall be filled by a person elected in that behalf by the provisional Parliament functioning under article 379, and until a person is so elected, the Chief Justice of India shall act as President.

381. Such persons as the President may appoint in that behalf shall become members of the Council of Ministers of the President under this Constitution, and, until appointments are so made, all persons holding office as Ministers for the Dominion of India immediately before the commencement of this Constitution shall on such commencement become, and shall continue to hold office as, members of the Council of Ministers of the President under this Constitution.

LEGISLATURES OF STATES

382. (1) Until the House or Houses of the Legislature of each State specified in Part A of the First Schedule has or have been duly constituted and summoned to meet for the first session under the provisions of this Constitution, the House or Houses of the Legislature of the corresponding Province functioning immediately before the commencement of this Constitution shall exercise the powers and perform the duties conferred by the provisions of this Constitution on the House or Houses of the Legislature of such State.

(2) Notwithstanding anything in clause (1), where a general election to reconstitute the Legislative Assembly of a Province has been ordered before the commencement of this Constitution, the election may be completed after such commencement as if this Constitution had not come into operation, and the Assembly so reconstituted shall be deemed to be the Legislative Assembly of that Province for the purpose of that clause.

(3) Any person holding office immediately before the commencement of this Constitution as Speaker or Deputy Speaker of the Legislative Assembly or President or Deputy President of the Legislative Council of a Province shall on such commencement be the Speaker or Deputy Speaker of the Legislative Assembly or the Chairman or Deputy Chairman of the Legislative Council, as the case may be, of the corresponding State specified in Part A of the First Schedule while such Assembly or Council functions under clause (1):

Provided that where a general election has been ordered for the reconstitution of the Legislative Assembly of a Province before the commencement of this Constitution and the first meeting of the Assembly as so reconstituted is held after such commencement, the provisions of this clause shall not apply and the Assembly as reconstituted shall elect two members of the Assembly to be respectively the Speaker and Deputy Speaker thereof.

GOVERNORS, MINISTERS

383. Any person holding office as Governor in any Province immediately before the commencement of this Constitution shall on such commencement be the Governor of the corresponding State specified in Part A of the First Schedule until a new Governor has been appointed in accordance with the provisions of Chapter II of Part VI and has entered upon his office.

384. Such persons as the Governor of a State may appoint in that behalf shall become members of the Council of Ministers of the Governor under this Constitution, and, until appointments are so made, all persons holding office as Ministers for the corresponding Province immediately before the commencement of this Constitution shall on such commencement become, and shall continue to hold office as, members of the Council of Ministers of the Governor of the State under this Constitution.

INDIAN STATES LEGISLATURES

385. Until the House or Houses of the Legislature of a State specified in Part B of the First Schedule has or have been duly constituted and summoned to meet for the first session under the provisions of this Constitution, the body or authority functioning immediately before the commencement of this Constitution as the Legislature of the corresponding Indian State shall exercise the powers and perform the duties conferred by the provisions of this Constitution on the House or Houses of the Legislature of the State so specified.

386. Such persons as the Rajpramukh of a State specified in Part B of the First Schedule may appoint in that behalf shall become members of the Council of Ministers of such Rajpramukh under this Constitution, and, until appointments are so made, all persons holding office as Ministers for the corresponding Indian State immediately before the commencement of this Constitution shall on such commencement become, and shall continue to hold office as, members of the Council of Ministers of such Rajpramukh under this Constitution.

387. For the purposes of elections held under any of the provisions of this Constitution during a period of three years from the commencement of this Constitution, the population of India or of any part thereof may, notwithstanding anything in this Constitution be determined in such manner as the President may by order direct, and different provisions may be made for different States and for different purposes by such order.

VACANCIES IN LEGISLATURES

388. (1) Casual vacancies in the seats of members of the provisional Parliament functioning under clause (1) of article 379, including vacancies referred to in clauses (3) and (4) of that article, shall be filled, and all matters in connection with the filling of such vacancies (including the decision of doubts and disputes arising out of, or in connection with, elections to fill such vacancies) shall be regulated—

(*a*) in accordance with such rules as may be made in that behalf by the President, and

(*b*) until rules are so made, in accordance with the rules relating to the filling of casual vacancies in the Constituent Assembly of the Dominion of India and matters connected therewith in force at the time of the filling of such vacancies or immediately before the commencement of this Constitution, as the case may be, subject to such exceptions and modifications as may be made therein before such commencement by the President of that Assembly and thereafter by the President of India:

Provided that where any such seat as is mentioned in this clause was, immediately before it became vacant, held by a person belonging to the Scheduled Castes or to the Muslim or the Sikh community and representing a Province or, as the case may be, a State specified in Part A of the First Schedule, the person to fill such seat shall, unless the President of the Constituent Assembly or the President of India, as the case may be, considers it necessary or expedient to provide otherwise, be of the same community:

Provided further that at an election to fill any such vacancy in the seat of a member representing a Province or a State specified in Part A of the First Schedule, every member of the Legislative Assembly of that Province or of the corresponding State or of that State, as the case may be, shall be entitled to participate and vote.

Explanation.—For the purposes of this clause—

(*a*) all such castes, races or tribes or parts of or groups within castes, races or tribes as are specified in the Government of India (Scheduled Castes) Order, 1936, to be Scheduled Castes in relation to any Province shall be deemed to be Scheduled Castes in relation to that Province or the corresponding State until a notification has been issued by the President under clause (1) of article 341 specifying the Scheduled Castes in relation to that corresponding State;

(*b*) all the Scheduled Castes in any Province or State shall be deemed to be a single community.

(2) Casual vacancies in the seats of members of a House of the Legislature of a State functioning under article 382 or article 385 shall be filled, and all matters in connection with the filling of such vacancies (including the decision of doubts and disputes arising out of, or in connection with, elections to fill such vacancies) shall be regulated in accordance with such provisions governing the filling of such vacancies and regulating such matters as were in force immediately before the commencement of this

Constitution subject to such exceptions and modifications as the President may by order direct.

BILLS, MONEYS

389. A Bill which immediately before the commencement of this Constitution was pending in the Legislature of the Dominion of India or in the Legislature of any Province or Indian State may, subject to any provision to the contrary which may be included in rules made by Parliament or the Legislature of the corresponding State under this Constitution, be continued in Parliament or the Legislature of the corresponding State, as the case may be, as if the proceedings taken with reference to the Bill in the Legislature of the Dominion of India or in the Legislature of the Province or Indian State had been taken in Parliament or in the Legislature of the corresponding State.

390. The provisions of this Constitution relating to the Consolidated Fund of India or the Consolidated Fund of any State and the appropriation of moneys out of either of such Funds shall not apply in relation to moneys received or raised or expenditure incurred by the Government of India or the Government of any State between the commencement of this Constitution and the thirty-first day of March, 1950, both days inclusive, and any expenditure incurred during that period shall be deemed to be duly authorised if the expenditure was specified in a schedule of authorised expenditure authenticated in accordance with the provisions of the Government of India Act, 1935, by the Governor-General of the Dominion of India or the Governor of the corresponding Province or is authorised by the Rajpramukh of the State in accordance with such rules as were applicable to the authorisation of expenditure from the revenues of the corresponding Indian State immediately before such commencement.

FIRST AND FOURTH SCHEDULES

391. (1) If at any time between the passing of this Constitution and its commencement any action is taken under the provisions of the Government of India Act, 1935, which in the opinion of the President requires any amendment in the First Schedule and the Fourth Schedule, the President may, notwithstanding anything in this Constitution, by order, make such amendments in the said Schedules as may be necessary to give effect to the action so taken, and any such order may contain such supplemental, incidental and consequential provisions as the President may deem necessary.

(2) When the First Schedule or the Fourth Schedule is so amended, any reference to that Schedule in this Constitution shall be construed as a reference to such Schedule as so amended.

392. (1) The President may, for the purpose of removing any difficulties, particularly in relation to the transition from the provisions of the Government of India Act, 1935, to the provisions of this Constitution, by order direct that this Constitution shall, during such period as may be specified in the order, have effect subject to such adaptations, whether by way of modification, addition or omission, as he may deem to be necessary or expedient:

Provided that no such order shall be made after the first meeting of Parliament duly constituted under Chapter II of Part V.

(2) Every order made under clause (1) shall be laid before Parliament.

(3) The powers conferred on the President by this article, by article 324, by clause (3) of article 367 and by article 391 shall, before the commencement of this Constitution, be exercisable by the Governor-General of the Dominion of India.

PART XXII
REPEALS

393. This Constitution may be called the Constitution of India.

394. This article and articles 5, 6, 7, 8, 9, 60, 324, 366, 367, 379, 380, 388, 391, 392 and 393 shall come into force at once, and the remaining provisions of this Constitution shall come into force on the twenty-sixth day of January, 1950, which day is referred to in this Constitution as the commencement of this Constitution.

395. The Indian Independence Act, 1947 and the Government of India Act, 1935, together with all enactments amending or supplementing the latter Act, but not including the Abolition of Privy Council Jurisdiction Act, 1949, are hereby repealed.

FIRST SCHEDULE
(ARTICLES 1, 4 AND 391)
STATES AND TERRITORIES

PART A

Names of States	*Names of corresponding Provinces*
1. Assam	Assam
2. Bihar	Bihar
3. Bombay	Bombay
4. Madhya Pradesh	The Central Provinces and Berar
5. Madras	Madras
6. Orissa	Orissa
7. Punjab	East Punjab
8. Uttar Pradesh	The United Provinces
9. West Bengal	West Bengal

TERRITORIES OF STATES

The territory of the State of Assam shall comprise the territories which immediately before the commencement of this Constitution were comprised in the Province of Assam, the Khasi States and the Assam Tribal Areas but shall not include the territories specified in the Schedule to the Assam (Alteration of Boundaries) Act, 1951.

The territory of each of the other States in this Part shall comprise the territories which immediately before the commencement of this Constitution were comprised in the corresponding Province and the territories which, by virtue of an order made under section 290A of the Government of India Act, 1935, were immediately before such commencement being administered as if they formed part of that Province.

PART B

Names of States.

1. Hyderabad
2. Jammu and Kashmir
3. Madhya Bharat
4. Mysore
5. Patiala and East Punjab States Union
6. Rajasthan
7. Saurashtra
8. Travancore-Cochin

TERRITORIES OF STATE

The territory of each of the States in this Part shall comprise the territory which immediately before the commencement of this Constitution was comprised in or administered by the Government of the corresponding Indian State, and in the case of the State of Madhya Bharat, shall also comprise the territory which immediately before such commencement was comprised in the Chief Commissioner's Province of Panth Piploda.

PART C

Names of States.

1. Ajmer
2. Bhopal
3. Bilaspur
4. Coorg
5. Delhi
6. Himachal Pradesh
7. Kutch
8. Manipur
9. Tripura
10. Vindhya Pradesh

TERRITORIES OF STATES

The territory of each of the States of Ajmer, Coorg and Delhi shall comprise the territory which immediately before the commencement of this Constitution was comprised in the Chief Commissioners' Provinces of Ajmer-Merwara, Coorg and Delhi, respectively.

The territory of each of the other States in this Part shall comprise the territories which, by virtue of an order made under section 290A of the Government of India Act, 1935, were immediately before the commencement of this Constitution being administered as if they were a Chief Commissioner's Province of the same name.

PART D

The Andaman and Nicobar Islands.

SECOND SCHEDULE
[ARTICLES 59(3), 65(3), 75(6), 97, 125, 148(3), 158(3), 164(5), 186 AND 221]

PART A

Provisions as to President, Governors of States specified in Part A of First Schedule.

1. There shall be paid to the President and to the Governors of the States specified in Part A of the First Schedule the following emoluments per mensem, that is to say:—

The President	..	..	10,000 rupees
The Governor of a State	..		5,500 rupees

2. There shall also be paid to the President and to the Governors of the States so specified such allowances as were payable respectively to the Governor-General of the Dominion of India and to the Governors of the corresponding Provinces immediately before the commencement of this Constitution.

3. The President and the Governors of such States throughout their respective terms of office shall be entitled to the same privileges to which the Governor-General and the Governors of the corresponding Provinces were respectively entitled immediately before the commencement of this Constitution.

4. While the Vice-President or any other person is discharging the functions of, or is acting as, President, or any person is discharging the functions of the Governor, he shall be entitled to the same emoluments, allowances and privileges as the President or the Governor whose functions he discharges or for whom he acts, as the case may be.

PART B

Provisions as to the Ministers for Union and States in Part A and Part B of First Schedule.

5. There shall be paid to the Prime Minister and to each of the other Ministers for the Union such salaries and allowances as were payable respectively to the Prime Minister and to each of the other Ministers for the Dominion of India immediately before the commencement of this Constitution.

6. There shall be paid to the Ministers for any State specified in Part A or Part B of the First Schedule such salaries and allowances as were payable to such Ministers for the corresponding Province or the corresponding Indian State, as the case may be, immediately before the commencement of this Constitution.

PART C

Provisions as to Speaker, Deputy Speaker of House of People, Chairman, Deputy Chairman of Council of States, Speaker, Deputy Speaker of Legislative Assembly of State in Part A of First Schedule, Chairman, Deputy Chairman of Legislative Council of any such State.

7. There shall be paid to the Speaker of the House of the People and the Chairman of the Council of States such salaries and allowances as were payable to the Speaker of the Constituent Assembly of the Dominion of India immediately before the commencement of this Constitution, and there shall be paid to the Deputy Speaker of the House of the People and to the Deputy Chairman of the Council of States such salaries and allowances as were payable to the Deputy Speaker of the Constituent Assembly of the Dominion of India immediately before such commencement.

8. There shall be paid to the Speaker and the Deputy Speaker of the Legislative Assembly of a State specified in Part A of the First Schedule and to the Chairman and the Deputy Chairman of the Legislative Council of such State such salaries and allowances as were payable respectively to the Speaker and the Deputy Speaker of the Legislative Assembly and the President and the Deputy President of the Legislative Council of the corresponding Province immediately before the commencement of this Constitution and, where the corresponding Province had no Legislative Council immediately before such commencement, there shall be paid to the Chairman and the Deputy Chairman of the Legislative Council of the State such salaries and allowances as the Governor of the State may determine.

PART D

Provisions as to Judges of Supreme Court, High Courts in States in Part A of First Schedule.

9. (1) There shall be paid to the Judges of the Supreme Court, in respect of time spent on actual service, salary at the following rates per mensem, that is to say:—

The Chief Justice	..	..	5,000 rupees
Any other Judge	..	..	4,000 rupees

Provided that if a Judge of the Supreme Court at the time of his appointment is in receipt of a pension (other than a disability or wound pension) in respect of any previous service under the Government of India or any of its predecessor Governments or under the Government of a State or any of its predecessor Governments, his salary in respect of service in the Supreme Court shall be reduced by the amount of that pension.

(2) Every Judge of the Supreme Court shall be entitled without payment of rent to the use of an official residence.

(3) Nothing in sub-paragraph (2) of this paragraph shall apply to a Judge who, immediately before the commencement of this Constitution,—

(*a*) was holding office as the Chief Justice of the Federal Court and has become on such commencement the Chief Justice of the Supreme Court under clause (1) of article 374, or

(*b*) was holding office as any other Judge of the Federal Court and has on such commencement become a Judge (other than the Chief Justice) of the Supreme Court under the said clause,

during the period he holds office as such Chief Justice or other Judge, and every Judge who so becomes the Chief Justice or other Judge of the Supreme Court shall, in respect of time spent on actual service as such Chief Justice or other Judge, as the case may be, be entitled to receive in addition to the salary specified in sub-paragraph (1) of this paragraph as special pay an amount equivalent to the difference between the salary so specified and the salary which he was drawing immediately before such commencement.

(4) Every Judge of the Supreme Court shall receive such reasonable allowances to reimburse him for expenses incurred in travelling on duty within the territory of India and shall be afforded such reasonable facilities in connection with travelling as the President may from time to time prescribe.

(5) The rights in respect of leave of absence (including leave allowances) and pension of the Judges of the Supreme Court shall be governed by the provisions which, immediately before the commencement of this Constitution, were applicable to the Judges of the Federal Court.

10. (1) There shall be paid to the Judges of the High Court of each State specified in Part A of the First Schedule, in respect of time spent on actual service, salary at the following rates per mensem, that is to say:—

The Chief Justice	..	..	4,000 rupees
Any other Judge	..	..	3,500 rupees

(2) Every person who immediately before the commencement of this Constitution—

(*a*) was holding office as the Chief Justice of a High Court in any Province and has on such commencement become the Chief Justice of the High Court in the corresponding State under clause (1) of article 376, or

(*b*) was holding office as any other Judge of a High Court in any Province and has on such commencement become a Judge (other than the Chief Justice) of the High Court in the corresponding State under the said clause,

shall, if he was immediately before such commencement drawing a salary at a rate higher than that specified in sub-paragraph (1) of this paragraph, be entitled to receive in respect of time spent on actual service as such Chief Justice or other Judge, as the case may be, in addition to the salary specified in the said sub-paragraph as special pay an amount equivalent to the difference between the salary so specified and the salary which he was drawing immediately before such commencement.

(3) Every Judge of a High Court shall receive such reasonable allowances to reimburse him for expenses incurred in travelling on duty within the territory of India and shall be afforded such reasonable facilities in connection with travelling as the President may from time to time prescribe.

(4) The rights in respect of leave of absence (including leave allowances) and pension of the Judges of the High Court of any State shall be governed by the provisions which, immediately before the commencement of this Constitution, were applicable to the Judges of the High Court in the corresponding Province.

11. In this Part, unless the context otherwise requires,—

(*a*) the expression "Chief Justice" includes an acting Chief Justice, and a "Judge" includes an *ad hoc* Judge;

(*b*) "actual service" includes—

(*i*) time spent by a Judge on duty as a Judge or in the performance of such other functions as he may at the request of the President undertake to discharge;

(*ii*) vacations, excluding any time during which the Judge is absent on leave; and

(*iii*) joining time on transfer from a High Court to the Supreme Court or from one High Court to another.

PART E

Provisions as to Comptroller and Auditor-General of India.

12. (1) There shall be paid to the Comptroller and Auditor-General of India a salary at the rate of four thousand rupees per mensem.

(2) The person who was holding office immediately before the commencement of this Constitution as Auditor-General of India and has become on such commencement the Comptroller and Auditor-General of India under article 377 shall in addition to the salary specified in sub-paragraph (1) of this paragraph be entitled to receive as special pay an amount equivalent to the difference between the salary so specified and the salary which he was drawing as Auditor-General of India immediately before such commencement.

(3) The rights in respect of leave of absence and pension and the other conditions of service of the Comptroller and Auditor-General of India shall be governed or shall continue to be governed, as the case may be, by the provisions which were applicable to the Auditor-General of India immediately before the commencement of this Constitution and all references in those provisions to the Governor-General shall be construed as references to the President.

THIRD SCHEDULE
[ARTICLES 75(4), 99, 124(6), 148(2), 164(3), 188 AND 219]

TOTAL OF ALL SEATS ..	204

FIFTH SCHEDULE
[ARTICLE 244 (1)]
Scheduled Areas and Tribes

PART A

1. *Interpretation.*—In this Schedule, unless the context otherwise requires, the expression "State" means a State specified in Part A or Part B of the First Schedule but does not include the State of Assam.

2. *Executive power of a State in Scheduled Areas.*—Subject to the provisions of this Schedule the executive power of a State extends to the Scheduled Areas therein.

3. *Report by the Governor or Rajpramukh to the President regarding the administration of Scheduled Areas.*—The Governor or Rajpramukh of each State having Scheduled Areas therein shall annually, or whenever so required by the President, make a report to the President regarding the administration of the Scheduled Areas in that State and the executive power of the Union shall extend to the giving of directions to the State as to the administration of the said areas.

PART B

4. *Tribes Advisory Council.*—(1) There shall be established in each State having Scheduled Areas therein and, if the President so directs, also in any State having Scheduled Tribes but not Scheduled Areas therein, a Tribes Advisory Council consisting of not more than twenty members of whom, as nearly as may be, three-fourths shall be the representatives of the Scheduled Tribes in the Legislative Assembly of the State :

Provided that if the number of representatives of the Scheduled Tribes in the Legislative Assembly of the State is less than the number of seats in the Tribes Advisory Council to be filled by such representatives, the remaining seats shall be filled by other members of those tribes.

(2) It shall be the duty of the Tribes Advisory Council to advise on such matters pertaining to the welfare and advancement of the Scheduled Tribes in the State as may be referred to them by the Governor or Rajpramukh, as the case may be.

(3) The Governor or Rajpramukh may make rules prescribing or regulating, as the case may be,—

(*a*) the number of members of the Council, the mode of their appointment and the appointment of the Chairman of the Council and of the officers and servants thereof ;

(*b*) the conduct of its meetings and its procedure in general ; and

(*c*) all other incidental matters.

5. *Law applicable to Scheduled Areas.*—(1) Notwithstanding anything in this Constitution, the Governor or Rajpramukh, as the case may be, may by public notification direct that any particular Act of Parliament or of the Legislature of the State shall not apply to a Scheduled Area or any part thereof in the State or shall apply to a Scheduled Area or any part thereof in the State subject to such exceptions and modifications as he may specify in the notification and any direction given under this sub-paragraph may be given so as to have retrospective effect.

(2) The Governor or Rajpramukh, as the case may be, may make regulations for the peace and good government of any area in a State which is for the time being a Scheduled Area.

In particular and without prejudice to the generality of the foregoing power, such regulations may—

(*a*) prohibit or restrict the transfer of land by or among members of the Scheduled Tribes in such area ;

(*b*) regulate the allotment of land to members of the Scheduled Tribes in such area ;

(*c*) regulate the carrying on of business as money-lender by persons who lend money to members of the Scheduled Tribes in such area.

(3) In making any such regulation as is referred to in sub-paragraph (2) of this paragraph, the Governor or Rajpramukh may repeal or amend any Act of Parliament or of the Legislature of the State or any existing law which is for the time being applicable to the area in question.

(4) All regulations made under this paragraph shall be submitted forthwith to the President and, until assented to by him, shall have no effect.

(5) No regulation shall be made under this paragraph unless the Governor or the Rajpramukh making the regulation has, in the case where there is a Tribes Advisory Council for the State, consulted such Council.

PART C

6. *Scheduled Areas.*—(1) In this Constitution, the expression "Scheduled Areas" means such areas as the President may by order declare to be Scheduled Areas.

(2) The President may at any time by order—

(*a*) direct that the whole or any specified part of a Scheduled Area shall cease to be a Scheduled Area or a part of such an area ;

(*b*) alter, but only by way of rectification of boundaries, any Scheduled Area ;

(*c*) on any alteration of the boundaries of a State or on the admission into the Union or the establishment of a new State, declare any territory not previously included in any State to be, or to form part of, a Scheduled Area ;

and any such order may contain such incidental and consequential provisions as appear to the President to be necessary and proper, but save as aforesaid, the order made under sub-paragraph (1) of this paragraph shall not be varied by any subsequent order.

PART D

7. *Amendment of the Schedule.*—(1) Parliament may from time to time by law amend by way of addition, variation or repeal any of the provisions of this Schedule and, when the Schedule is so amended, any reference to this Schedule in this Constitution shall be construed as a reference to such Schedule as so amended.

(2) No such law as is mentioned in sub-paragraph (1) of this paragraph shall be deemed to be an amendment of this Constitution for the purposes of article 368.

SIXTH SCHEDULE
[ARTICLES 244 (2) AND 275 (1)]
TRIBAL AREAS IN ASSAM

1. *Autonomous districts and autonomous regions.*—(1) Subject to the provisions of this paragraph, the tribal areas in each item of Part A of the table appended to paragraph 20 of this Schedule shall be an autonomous district.

(2) If there are different Scheduled Tribes in an autonomous district, the Governor may, by public notification, divide the area or areas inhabited by them into autonomous regions.

(3) The Governor may, by public notification,—

(*a*) include any area in Part A of the said table,

(*b*) exclude any area from Part A of the said table,

(*c*) create a new autonomous district,

(*d*) increase the area of any autonomous district,

(*e*) diminish the area of any autonomous district,

(*f*) unite two or more autonomous districts or parts thereof so as to form one autonomous district,

(*g*) define the boundaries of any autonomous district :

Provided that no order shall be made by the Governor under clauses (*c*), (*d*), (*e*) and (*f*) of this sub-paragraph except after consideration of the report of a Commission appointed under sub-paragraph (1) of paragraph 14 of this Schedule.

CONSTITUTION OF COUNCILS

2. *Constitution of District Councils and Regional Councils.*—(1) There shall be a District Council for each autonomous district consisting of not more than twenty-four members, of whom not less than three-fourths shall be elected on the basis of adult sufferage.

(2) There shall be a separate Regional Council for each area constituted an autonomous region under sub-paragraph (2) of paragraph 1 of this Schedule.

(3) Each District Council and each Regional Council shall be a body corporate by the name respectively of "the District Council of (*name of district*)" and "the Regional Council of (*name of region*)", shall have perpetual succession and a common seal and shall by the said name sue and be sued.

(4) Subject to the provisions of this Schedule, the administration of an autonomous district shall, in so far as it is not vested under this Schedule in any Regional Council within such district, be vested in the District Council for such district and the administration of an autonomous region shall be vested in the Regional Council for such region.

(5) In an autonomous district with Regional Councils, the District Council shall have only such powers with respect to the areas under the authority of the Regional Council as may be delegated to it by the Regional Council in addition to the powers conferred on it by this Schedule with respect to such areas.

(6) The Governor shall make rules for the first constitution of District Councils and Regional Councils in consultation with the existing tribal Councils or other representative tribal organisations within the autonomous districts or regions concerned, and such rules shall provide for—

(*a*) the composition of the District Councils and Regional Councils and the allocation of seats therein ;

(*b*) the delimitation of territorial constituencies for the purpose of elections to those Councils ;

(*c*) the qualifications for voting at such elections and the preparation of electoral rolls therefor ;

(*d*) the qualifications for being elected at such elections as members of such Councils ;

(*e*) the term of office of members of such Councils ;

(*f*) any other matter relating to or connected with elections or nominations to such Councils ;

(*g*) the procedure and the conduct of business in the District and Regional Councils ;

(*h*) the appointment of officers and staff of the District and Regional Councils.

(7) The District or the Regional Council may after its first constitution make rules with regard to the matters specified in sub-paragraph (6) of this paragraph and may also make rules regulating—

(*a*) the formation of subordinate local Councils or Boards and their procedure and the conduct of their business ; and

(*b*) generally all matters relating to the transaction of business pertaining to the administration of the district or region, as the case may be :

Provided that until rules are made by the District or the Regional Council under this sub-paragraph the rules made by the Governor under sub-paragraph (6) of this paragraph shall have effect in respect of elections to the officers and staff of, and the procedure and the conduct of business in each such Council :

Provided further that the Deputy Commissioner or the Sub-Divisional Officer, as the case may be, of the North Cachar and Mikir Hills shall be the Chairman *ex-officio* of the District Council in respect of the territories included in items 5 and 6 respectively of Part A of the table appended to paragraph 20 of this Schedule and shall have power for a period of six years after the first constitution of the District Council, subject to the control of the Governor, to annul or modify any resolution or decision of the District Council or to issue such instructions to the District Council, as he may consider appropriate, and the District Council shall comply with every such instruction issued.

POWERS OF COUNCILS

3. *Powers of the District Councils and Regional Councils to make laws.*—(1) The Regional Council for an autonomous region in respect of all areas within such region and the District Council for an autonomous district in respect of all areas within the district except those which are under the authority of Regional Councils, if any, within the district shall have power to make laws with respect to—

(*a*) the allotment, occupation or use, or the setting apart, of land, other than any land which is a reserved forest, for the purposes of agriculture or grazing or for residential or other non-agricultural purposes or for any other purpose likely to promote the interests of the inhabitants of any village or town :

Provided that nothing in such laws shall prevent the compulsory acquisition of any land, whether occupied or unoccupied, for public purposes by the Government of Assam in accordance with the law for the time being in force authorising such acquisition ;

(*b*) the management of any forest not being a reserved forest ;

(*c*) the use of any canal or water-course for the purpose of agriculture ;

(*d*) the regulation of the practice of *jhum* or other forms of shifting cultivation ;

(*e*) the establishment of village or town committees or councils and their powers ;

(*f*) any other matter relating to village or town administration, including village or town police and public health and sanitation ;

(*g*) the appointment or succession of Chiefs or Headmen ;

(*h*) the inheritance of property ;

(*i*) marriage ;

(*j*) social customs.

(2) In this paragraph, a "reserved forest" means any area which is a reserved forest under the Assam Forest Regulation, 1891, or under any other law for the time being in force in the area in question.

(3) All laws made under this paragraph shall be submitted forthwith to the Governor and, until assented to by him, shall have no effect.

ADMINISTRATION OF JUSTICE

4. *Administration of justice in autonomous districts and autonomous regions.*—(1) The Regional Council for an autonomous region in respect of areas within such region and the District Council for an autonomous district in respect of areas within the district other than those which are under the authority of the Regional Councils, if any, within the district may constitute village councils or courts for the trial of suits and cases between the parties all of whom belong to Scheduled Tribes within such areas, other than suits and cases to which the provisions of sub-paragraph (1) of paragraph 5 of this Schedule apply, to the exclusion of any court in the State, and may appoint suitable persons to be members of such village Councils or presiding officers of such courts, and may also appoint such officers as may be necessary for the administration of the laws made under paragraph 3 of this Schedule.

(2) Notwithstanding anything in this Constitution, the Regional Council for an autonomous region or any court constituted in that behalf by the Regional Council or, if in respect of any area within an autonomous district there is no Regional Council, the District Council for such district, or any court constituted in that behalf by the District Council, shall exercise the powers of a court of appeal in respect of all suits and cases triable by a village council or court constituted under sub-paragraph (1) of this paragraph within such region or area, as the case may be, other than those to which the provisions of sub-paragraph (1) of paragraph 5 of this Schedule apply, and no other court except the High Court and the Supreme Court shall have jurisdiction over such suits or cases.

(3) The High Court of Assam shall have and exercise such jurisdiction over the suits and cases to which the provisions of sub-paragraph (2) of this paragraph apply as the Governor may from time to time by order specify.

(4) A Regional Council or District Council, as the case may be, may with the previous approval of the Governor make rules regulating—

(*a*) the constitution of village councils and courts and the powers to be exercised by them under this paragraph ;

(*b*) the procedure to be followed by village councils or courts in the trial of suits and cases under sub-paragraph (1) of this paragraph ;

(*c*) the procedure to be followed by the Regional or District Council or any court constituted by such Council in appeals and other proceedings under sub-paragraph (2) of this paragraph ;

(*d*) the enforcement of decisions and orders of such Councils and courts ;

(*e*) all other ancillary matters for the carrying out of the provisions of sub-paragraphs (1) and (2) of this paragraph.

CONFERMENT OF POWERS

5. *Conferment of powers under the Code of Civil Procedure, 1908, and the Code of Criminal Procedure, 1898, on the Regional and District Councils and on certain courts and officers for the trial of certain suits, cases and offences.*—(1) The Governor may, for the trial of suits or cases arising out of any law in force in any autonomous district or region being a law specified in that behalf by the Governor, or for the trial of offences punishable with death, transportation for life, or imprisonment for a term of not less than five years under the Indian Penal Code or under any other law for the time being applicable to such district or region, confer on the District Council or the Regional Council having authority over such district or region or on courts constituted by such District Council or on any officer appointed in that behalf by the Governor, such powers under the Code of Civil Procedure, 1908, or, as the case may be the Code of Criminal Procedure, 1898, as he deems appropriate, and thereupon the said Council, court or officer shall try the suits, cases or offences in exercise of the powers so conferred.

(2) The Governor may withdraw or modify any of the powers conferred on a District Council, Regional Council, court or officer under sub-paragraph (1) of this paragraph.

(3) Save as expressly provided in this paragraph, the Code of Civil Procedure, 1908, and the Code of Criminal Procedure, 1898, shall not apply to the trial of any suits, cases or offences in an autonomous district or in any autonomous region to which the provisions of this paragraph apply.

PRIMARY SCHOOLS

6. *Powers of the District Council to establish primary schools, etc.*—The District Council for an autonomous district may establish, construct, or manage primary schools, dispensaries, markets, cattle pounds, ferries, fisheries, roads and waterways in the district and, in particular, may prescribe the language and the manner in which primary education shall be imparted in the primary schools in the district.

FUNDS

7. *District and Regional Funds.*—(1) There shall be constituted for each autonomous district, a District Fund and for each autonomous region, a Regional Fund to which shall be credited all moneys received respectively by the District Council for that district and the Regional Council for that region in the course of the administration of such district or region, as the case may be, in accordance with the provisions of this Constitution.

(2) Subject to the approval of the Governor, rules may be made by the District Council and by the Regional Council for the management of the District Fund or, as the case may be, the Regional Fund, and the rules so made may prescribe the procedure to be followed in respect of payment of money into the said Fund, the withdrawal of moneys therefrom, the custody of moneys therein and any other matter connected with or ancillary to the matters aforesaid.

LAND REVENUE, TAXES

8. *Powers to assess and collect land revenue and to impose taxes.*—(1) The Regional Council for an autonomous region in respect of all lands within such region and the District Council for an autonomous district in respect of all lands within the district except those which are in the areas under the authority of Regional Councils, if any, within the district, shall have the power to assess and collect revenue in respect of such lands in accordance with the principles for the time being followed by the Government of Assam in assessing lands for the purpose of land revenue in the State of Assam generally.

(2) The Regional Council for an autonomous region in respect of areas within such region and the District Council for an autonomous district in respect of all areas in the district except those which are under the authority of Regional Councils, if any, within the district, shall have power to levy and collect taxes on lands and buildings, and tolls on persons resident within such areas.

(3) The District Council for an autonomous district shall have the power to levy and collect all or any of the following taxes within such district, that is to say—

(*a*) taxes on professions, trades, callings and employments;

(*b*) taxes on animals, vehicles and boats;

(*c*) taxes on the entry of goods into a market for sale therein, and tolls on passengers and goods carried in ferries; and

(*d*) taxes for the maintenance of schools, dispensaries or roads.

(4) A Regional Council or District Council, as the case may be, may make regulations to provide for the levy and collection of any of the taxes specified in sub-paragraphs (2) and (3) of this paragraph.

EXTRACTION OF MINERALS

9. *Licences or leases for the purpose of prospecting for, or extraction of, minerals.*—(1) Such share of the royalties accruing each year from licences or leases for the purpose of prospecting for, or the extraction of, minerals granted by the Government of Assam in respect of any area within an autonomous district as may be agreed upon between the Government of Assam and the District Council of such district shall be made over to that District Council.

(2) If any dispute arises as to the share of such royalties to be made over to a District Council, it shall be referred to the Governor for determination and the amount determined by the Governor in his discretion shall be deemed to be the amount payable under sub-paragraph (1) of this paragraph to the District Council and the decision of the Governor shall be final.

TRADING BY NON-TRIBALS

10. *Power of District Council to make regulations for the control of money-lending and trading by non-tribals.*—(1) The District Council of an autonomous district may make regulations for the regulation and control of money-lending or trading within the district by persons other than Scheduled Tribes resident in the district.

(2) In particular and without prejudice to the generality of the foregoing power, such regulations may—

(*a*) prescribe that no one except the holder of a licence issued in that behalf shall carry on the business of money-lending;

(*b*) prescribe the maximum rate of interest which may be charged or be recovered by a money-lender;

(*c*) provide for the maintenance of accounts by money-lenders and for the inspection of such accounts by officers appointed in that behalf by the District Council;

(*d*) prescribe that no person who is not a member of the Scheduled Tribes resident in the district shall carry on wholesale or retail business in any commodity except under a licence issued in that behalf by the District Council:

Provided that no regulations may be made under this paragraph unless they are passed by a majority of not less than three-fourths of the total membership of the District Council:

Provided further that it shall not be competent under any such regulations to refuse the grant of a licence to a money-lender or a trader who has been carrying on business within the district since before the time of the making of such regulations.

(3) All regulations made under this paragraph shall be submitted forthwith to the Governor and, until assented to by him, shall have no effect.

11. *Publication of laws, rules and regulations made under the Schedule.*—All laws, rules and regulations made under this Schedule by a District Council or a Regional Council shall be published forthwith in the Official Gazette of the State and shall on such publication have the force of law.

APPLICATION OF ACTS

12. *Application of Acts of Parliament and of the Legislature of the State to autonomous districts and autonomous regions.*—(1) Notwithstanding anything in this Constitution—

(*a*) no Act of the Legislature of the State in respect of any of the matters specified in paragraph 3 of this Schedule as matters with respect to which a District Council or a Regional Council may make laws, and no Act of the Legislature of the State prohibiting or restricting the consumption of any non-distilled alcoholic liquor shall apply to any autonomous district or autonomous region unless in either case the District Council for such district or having jurisdiction over such region by public notification so directs, and the District Council in giving such direction with respect to any Act may direct that the Act shall in its application to such district or region or any part thereof have effect subject to such exceptions or modifications as it thinks fit;

(*b*) the Governor may, by public notification, direct that any Act of Parliament or of the Legislature of the State to which the provisions of clause (*a*) of this sub-paragraph do not apply shall not apply to an autonomous district or an autonomous region, or shall apply to such district or region or any part thereof subject to such exceptions or modifications as he may specify in the notification.

(2) Any direction given under sub-paragraph (1) of this paragraph may be given so as to have retrospective effect.

FINANCIAL STATEMENT

13. *Estimated receipts and expenditure pertaining to autonomous districts to be shown separately in the annual financial statement.*—The estimated receipts and expenditure pertaining to an autonomous district which are to be credited to, or is to be made from, the Consolidated Fund of the State of Assam shall be first placed before the District Council for discussion and then after such discussion be shown separately in the annual financial statement of the State to be laid before the Legislature of the State under article 202.

14. *Appointment of Commission to inquire into and report on the administration of autonomous districts and autonomous regions.*—(1) The Governor may at any time appoint a Commission to examine and report on any matter specified by him relating to the administration of the autonomous districts and autonomous regions in the State, including matters specified in clauses (*c*), (*d*), (*e*) and (*f*) of sub-paragraph (3) of paragraph 1 of his Schedule, or may appoint a Commission to inquire into and report from time to time on the administration of autonomous districts and autonomous regions in the State generally and in particular on—

(*a*) the provision of educational and medical facilities and communications in such districts and regions;

(*b*) the need for any new or special legislation in respect of such districts and regions; and

(*c*) the administration of the laws, rules and regulations made by the District and Regional Councils;

and define the procedure to be followed by such Commission.

(2) The report of every such Commission with the recommendations of the Governor with respect thereto shall be laid before the Legislature of the State by the Minister concerned together with an explanatory memorandum regarding the action proposed to be taken thereon by the Government of Assam.

(3) In allocating the business of the Government of the State among his Ministers the Governor may place one of his Ministers specially in charge of the welfare of the autonomous districts and autonomous regions in the State.

ANNULMENT, ETC. OF REGIONAL ACTS

15. *Annulment or suspension of acts and resolutions of District and Regional Councils.*—(1) If at any time the Governor is satisfied that an act or resolution of a District or a Regional Council is likely to endanger the safety of India, he may annul or suspend such act or resolution and take such steps as he may consider necessary (including the suspension of the Council and the assumption to himself of all or any of the powers vested in or exercisable by the Council) to prevent the commission or continuance of such act, or the giving of effect to such resolution.

(2) Any order made by the Governor under sub-paragraph (1) of this paragraph together with the reasons therefor shall be laid before the Legislature of the State as soon as possible and the order shall, unless revoked by the Legislature of the State, continue in force for a period of twelve months from the date on which it was so made:

Provided that if and so often as a resolution approving the continuance in force of such order is passed by the Legislature of the State, the order shall unless cancelled by the Governor continue in force for a further period of twelve months from the date on which under this paragraph it would otherwise have ceased to operate.

DISSOLUTION OF COUNCIL

16. *Dissolution of a District or a Regional Council.*—The Governor may on the recommendation of a Commission appointed under paragraph 14 of this Schedule by public notification order the dissolution of a District or a Regional Council and—

(*a*) direct that a fresh general election shall be held immediately for the reconstitution of the Council, or

(*b*) subject to the previous approval of the Legislature of the State assume the administration of the area under the authority of such Council himself or place the administration of such area under the Commission appointed under the said paragraph or any other body considered suitable by him for a period not exceeding twelve months:

Provided that when an order under clause (*a*) of this paragraph has been made, the Governor may take the action referred to in clause (*b*) of this paragraph with regard to the administration of the area in question pending the reconstitution of the Council on fresh general election:

Provided further that no action shall be taken under clause (*b*) of this paragraph without giving the District or the Regional Council, as the case may be, an opportunity of placing its views before the Legislature of the State.

17. *Exclusion of areas from autonomous districts in forming constituencies in such districts.*—For the purposes of elections to the Legislative Assembly of Assam, the Governor may by order declare that any area within an autonomous district shall not form part of any constituency to fill a seat or seats in the Assembly reserved for any such district but shall form part of a constituency to fill a seat or seats in the Assembly not so reserved to be specified in the order.

18. *Application of the provisions of this Schedule to areas specified in Part B of the table appended to paragraph* 20.—(1) The Governor may—

(*a*) subject to the previous approval of the President, by public notification, apply all or any of the foregoing provisions of this Schedule to any tribal area specified in Part B of the table appended to paragraph 20 of this Schedule or any part of such area and thereupon such area or part shall be administered in accordance with such provisions, and

(*b*) with like approval, by public notification, exclude from the said table any tribal area specified in Part B of that table or any part of such area.

(2) Until a notification is issued under sub-paragraph (1) of this paragraph in respect of any tribal area specified in Part B of the said table or any part of such area, the administration of such area or part thereof, as the case may be, shall be carried on by the President through the Governor of Assam as his agent and the provisions of Part IX shall apply thereto as if such area or part thereof were a territory specified in Part D of the First Schedule.

(3) In the discharge of his functions under sub-paragraph (2) of this paragraph as the agent of the President the Governor shall act in his discretion.

TRANSITIONAL PROVISIONS

19. (1) As soon as possible after the commencement of this Constitution the Governor shall take steps for the constitution of a District Council for each autonomous district in the State under this Schedule and, until a District Council is so constituted for an autonomous district, the administration of such district shall be vested in the Governor and the following provisions shall apply to the administration of the areas within such district instead of the foregoing provisions of this Schedule, namely:—

(*a*) no Act of Parliament or of the Legislature of the State shall apply to any such area unless the Governor by public notification so directs; and the Governor in giving such a direction with respect to any act may direct that the Act shall, in its application to the area or to any specified part thereof, have effect subject to such exceptions or modifications as he thinks fit;

(*b*) the Governor may make regulations for the peace and good government of any such area and any regulations so made may repeal or amend any Act of Parliament or of the Legislature of the State or any existing law which is for the time being applicable to such area.

(2) Any direction given by the Governor under clause (*a*) of sub-paragraph (1) of this paragraph may be given so as to have retrospective effect.

(3) All regulations made under clause (*b*) of sub-paragraph (1) of this paragraph shall be submitted forthwith to the President and, until assented to by him, shall have no effect.

TRIBAL AREAS

20. (1) The areas specified in Parts A and B of the table below shall be the tribal areas within the State of Assam.

(2) The United Khasi-Jaintia Hills District shall comprise the territories which before the commencement of this Constitution were known as the Khasi States and the Khasi and Jaintia Hills District, excluding any areas for the time being comprised within the cantonment and municipality of Shillong, but including so much of the area comprised within the municipality of Shillong as formed part of the Khasi State of Mylliem:

Provided that for the purposes of clauses (*e*) and (*f*) of sub-paragraph (1) of paragraph 3, paragraph 4, paragraph 5, paragraph 6, sub-paragraph (2), clauses (*a*), (*b*) and (*d*) of sub-paragraph (3) and sub-paragraph (4) of paragraph 8, and clause (*d*) of sub-paragraph (2) of paragraph 10 of this Schedule, no part of the area comprised within the municipality of Shillong shall be deemed to be within the District.

(3) Any reference in the table below to any district (other than the United Khasi-Jaintia Hills District) or administrative area shall be construed as a reference to that district or area at the commencement of this Constitution:

Provided that the tribal areas specified in Part B of the table below shall not include any such areas in the plains as may, with the previous approval of the President, be notified by the Governor of Assam in that behalf.

TABLE

Part A

1. The United Khasi-Jaintia Hills District.
2. The Garo Hills District.
3. The Lushai Hills District.
4. The Naga Hills District.
5. The North Cachar Hills.
6. The Mikir Hills.

Part B

1. North East Frontier Tract including Balipara Frontier Tract, Tirap Frontier Tract, Abor Hills District and Misimi Hills District.
2. The Naga Tribal Area.

AMENDMENT OF SCHEDULE

21. (1) Parliament may from time to time by law amend by way of addition, variation or repeal any of the provisions of this Schedule and, when the Schedule is so amended, any reference to this Schedule in this Constitution shall be construed as a reference to such Schedule as so amended.

(2) No such law as is mentioned in sub-paragraph (1) of this paragraph shall be deemed to be an amendment of this Constitution for the purposes of article 368.

SEVENTH SCHEDULE

[ARTICLE 246]

LIST I—UNION LIST

1. Defence of India and every part thereof including preparation for defence and all such acts as may be conducive in times of war to its prosecution and after its termination to effective demobilisation.

78. Constitution and organisation of the High Courts except provisions as to officers and servants of High Courts; persons entitled to practise before the High Courts.

79. Extension of the jurisdiction of a High Court having its principal seat in any State to, and exclusion of the jurisdiction of any such High Court from, any area outside that State.

80. Extension of the powers and jurisdiction of members of a police force belonging to any State to any area outside that State, but not so as to enable the police of one State to exercise powers and jurisdiction in any area outside that State without the consent of the Government of the State in which such area is situated; extension of the powers and jurisdiction of members of a police force belonging to any State to railway areas outside that State.

81. Inter-State migration; inter-State quar- antine.

82. Taxes on income other than agricultural income.

83. Duties of customs including export duties.

84. Duties of excise on tobacco and other goods manufactured or produced in India except—

(*a*) alcoholic liquors for human consumption;

(*b*) opium, Indian hemp and other narcotic drugs and narcotics,

but including medicinal and toilet preparations containing alcohol or any substance included in sub-paragraph (*b*) of this entry.

85. Corporation tax.

86. Taxes on the capital value of the assets, exclusive of agricultural land, of individuals and companies; taxes on the capital of com- panies.

87. Estate duty in respect of property other than agricultural land.

88. Duties in respect of succession to property other than agricultural land.

89. Terminal taxes on goods or passengers, carried by railway, sea or air; taxes on railway fares and freights.

90. Taxes other than stamp duties on transac- tions in stock exchanges and futures markets.

91. Rates of stamp duty in respect of bills of exchange, cheques, promissory notes, bills of lading, letters of credit, policies of insurance, transfer of shares, debentures, proxies and receipts.

92. Taxes on the sale or purchase of news- papers and on advertisements published therein.

93. Offences against laws with respect to any of the matters in this List.

94. Inquiries, surveys and statistics for the purpose of any of the matters in this List.

95. Jurisdiction and powers of all courts, except the Supreme Court, with respect to any of the matters in this List; admiralty jurisdiction.

96. Fees in respect of any of the matters in this List, but not including fees taken in any court.

97. Any other matter not enumerated in List II or List III including any tax not men- tioned in either of those Lists.

LIST II—STATE LIST

1. Public order (but not including the use of naval, military or air forces or any other armed forces of the Union in aid of the civil power).

2. Police, including railway and village police.

3. Administration of justice; constitution and organisation of all courts, except the Su- preme Court and the High Court; officers and servants of the High Court; procedure in rent and revenue courts; fees taken in all courts except the Supreme Court.

4. Prisons, reformatories, Borstal institutions and other institutions of a like nature, and persons detained therein; arrangements with other States for the use of prisons and other institutions.

5. Local government, that is to say, the constitution and powers of municipal corpora- tions, improvement trusts, district boards, mining settlement authorities and other local authorities for the purpose of local self-govern- ment or village administration.

6. Public health and sanitation; hospitals and dispensaries.

7. Pilgrimages, other than pilgrimages to places outside India.

8. Intoxicating liquors, that is to say, the production, manufacture, possession, transport, purchase and sale of intoxicating liquors.

9. Relief of the disabled and unemployable.

10. Burials and burial grounds; cremations and cremation grounds.

11. Education including universities, subject to the provisions of entries 63, 64, 65 and 66 of List I and entry 25 of List III.

12. Libraries, museums and other similar institutions controlled or financed by the State; ancient and historical monuments and records other than those declared by Parliament by law to be of national importance.

13. Communications, that is to say, roads, bridges, ferries, and other means of communica- tion not specified in List I; municipal tram- ways; ropeways; inland waterways and traffic thereon subject to the provisions of List I and List III with regard to such waterways; vehicles other than mechanically propelled vehicles.

14. Agriculture, including agricultural educa- tion and research, protection against pests and prevention of plant diseases.

15. Preservation, protection and improve- ment of stock and prevention of animal diseases; veterinary training and practice.

16. Pounds and the prevention of cattle trespass.

17. Water, that is to say, water supplies, irrigation and canals, drainage and embank- ments, water storage and water power subject to the provisions of entry 56 of List I.

*18. Land, that is to say, rights in or over land, land tenures including the relation of landlord and tenant, and the collection of rents; transfer and alienation of agricultural land; land improvement and agricultural loans; colonization.

19. Forests.

20. Protection of wild animals and birds.

21. Fisheries.

22. Courts of wards subject to the provisions of entry 34 of List I; encumbered and attached estates.

23. Regulation of mines and mineral develop- ment subject to the provisions of List I with respect to regulation and development under the control of the Union.

24. Industries subject to the provisions of entry 52 of List I.

25. Gas and gas-works.

26. Trade and commerce within the State subject to the provisions of entry 33 of List III.

27. Production, supply and distribution of goods subject to the provisions of entry 33 of List III.

28. Markets and fairs.

29. Weights and measures except establish- ment of standards.

*30. Money-lending and money-lenders; relief of agricultural indebtedness.

31. Inns and inn-keepers.

32. Incorporation, regulation and winding up of corporations, other than those specified in List I, and universities; unincorporated trading, literary, scientific, religious and other societies and associations; co-operative societies.

33. Theatres and dramatic performances; cinemas subject to the provisions of entry 60 of List I; sports, entertainments and amusements.

34. Betting and gambling.

35. Works, lands and buildings vested in or in the possession of the State.

36. Acquisition or requisitioning of property, except for the purposes of the Union, subject to the provisions of entry 42 of List III.

37. Elections to the Legislature of the State subject to the provisions of any law made by Parliament.

38. Salaries and allowances of members of the Legislature of the State, of the Speaker and Deputy Speaker of the Legislative Assembly and, if there is a Legislative Council, of the Chairman and Deputy Chairman thereof.

39. Powers, privileges and immunites of the Legislative Assembly and of the members and the committees thereof, and, if there is a Legisla- tive Council, of that Council and of the members and the committees thereof; enforcement of attendance of persons for giving evidence or producing documents before committees of the Legislature of the State.

40. Salaries and allowances of Ministers for the State.

41. State public services; State Public Service Commission.

42. State pensions, that is to say, pensions payable by the State or out of the Consolidated Fund of the State.

43. Public debt of the State.

44. Treasure trove.

45. Land revenue, including the assessment and collection of revenue, the maintenance of land records, survey for revenue purposes and records of rights, and alienation of revenues.

46. Taxes on agricultural income.

47. Duties in respect of succession to agri- cultural land.

48. Estate duty in respect of agricultural land.

49. Taxes on lands and buildings.

50. Taxes on mineral rights subject to any limitations imposed by Parliament by law relating to mineral development.

51. Duties of excise on the following goods manufactured or produced in the State and countervailing duties at the same or lower rates on similar goods manufactured or produced elsewhere in India:—

(*a*) alcoholic liquors for human consumption;

(*b*) opium, Indian hemp and other narcotic drugs and narcotics;

but not including medicinal and toilet prepara- tions containing alcohol or any substance in- cluded in sub-paragraph (*b*) of this entry.

52. Taxes on the entry of goods into a local area for consumption, use or sale therein.

53. Taxes on the consumption or sale of electricity.

54. Taxes on the sale or purchase of goods other than newspapers.

55. Taxes on advertisements other than advertisements published in the newspapers.

56. Taxes on goods and passengers carried by road or on inland waterways.

57. Taxes on vehicles, whether mechanically propelled or not, suitable for use on roads including tramcars subject to the provisions of entry 35 of List III.

58. Taxes on animals and boats.

59. Tolls.

60. Taxes on professions, trades, callings and employments.

61. Capitation taxes.

62. Taxes on luxuries, including taxes on entertainments, amusements, betting and gambling.

63. Rates of stamp duty in respect of documents other than those specified in the provisions of List I with regard to rates of stamp duty.

64. Offences against laws with respect to any of the matters in this List.

65. Jurisdiction and powers of all courts, except the Supreme Court, with respect to any of the matters in this List.

66. Fees in respect of any of the matters in this List, but not including fees taken in any court.

*A resolution empowering the Centre to legislate on certain items in the State List with a view to separating the admixture of non-evacuee interest in evacuee property has been passed by Parliament.

These rights relate to Entries 18 and 30 in the State List and comprise rights in or over land, transfer and alienation of agricultural land, money-lending, and money-lenders and relief of agricultural indebtedness.

Such separation of non-evacuee interest in evacuee property, would allow more accurate definition of the "dimensions" of evacuee property. Admixture existed in cases where evacuee property was mortgaged to a non-evacuee and *vice versa* and where only a part-share of a number of co-sharers was declared evacuee property.

Since evacuee property was scattered all over the country, individual investments by States under Entries 18 and 30 would result in a lack of uniformity.

LIST III—CONCURRENT LIST

1. Criminal law, including all matters included in the Indian Penal Code at the commencement of this Constitution but excluding offences against laws with respect to any of the matters specified in List I or List II and excluding the use of naval, military or air forces or any other armed forces of the Union in aid of the civil power.

2. Criminal procedure, including all matters included in the Code of Criminal Procedure at the commencement of this Constitution.

3. Preventive detention for reasons connected with the security of a State, the maintenance of public order, or the maintenance of supplies and services essential to the community; persons subjected to such detention.

4. Removal from one State to another State of prisoners, accused persons and persons subjected to preventive detention for reasons specified in entry 3 of this List.

5. Marriage and divorce; infants and minors; adoption; wills, intestacy and succession; joint family and partition; all matters in respect of which parties in judicial proceedings were immediately before the commencement of this Constitution subject to their personal law.

6. Transfer of property other than agricultural land; registration of deeds and documents.

7. Contracts, including partnership, agency, contracts of carriage, and other special forms of contracts, but not including contracts relating to agricultural land.

8. Actionable wrongs.

9. Bankruptcy and Insolvency.

10. Trust and Trustees.

11. Administrators-general and official trustees.

12. Evidence and oaths; recognition of laws, public acts and records, and judicial proceedings.

13. Civil procedure, including all matters included in the Code of Civil Procedure at the commencement of this Constitution, limitation and arbitration.

14. Contempt of court, but not including contempt of the Supreme Court.

15. Vagrancy; nomadic and migratory tribes.

16. Lunacy and mental deficiency, including places for the reception or treatment of lunatics and mental deficients.

17. Prevention of cruelty to animals.

18. Adulteration of foodstuffs and other goods.

19. Drugs and poisons, subject to the provisions of entry 59 of List I with respect to opium.

20. Economic and social planning.

21. Commercial and industrial monopolies, combines and trusts.

22. Trade Unions; industrial and labour disputes.

23. Social security and social insurance; employment and unemployment.

24. Welfare of labour including conditions of work, provident funds, employers' liability, workmen's compensation, invalidity and old age pensions and maternity benefits.

25. Vocational and technical training of labour.

26. Legal, medical and other professions.

27. Relief and rehabilitation of persons displaced from their original place of residence by reason of the setting up of the Dominions of India and Pakistan.

28. Charities and charitable institutions, charitable and religious endowments and religious institutions.

29. Prevention of the extension from one State to another of infectious or contagious diseases or pests affecting men, animals or plants.

30. Vital statistics including registration of births and deaths.

31. Ports other than those declared by or under law made by Parliament or existing law to be major ports.

32. Shipping and navigation on inland waterways as regards mechanically propelled vessels, and the rule of the road on such waterways, and the carriage of passengers and goods on inland waterways subject to the provisions of List I with respect to national waterways.

33. Trade and commerce in, and the production, supply and distribution of, the products of industries where the control of such industries by the Union is declared by Parliament by law to be expedient in the public interest.

34. Price control.

35. Mechanically propelled vehicles including the principles on which taxes on such vehicles are to be levied.

36. Factories.

37. Boilers.

38. Electricity.

39. Newspapers, books and printing presses.

40. Archæological sites and remains other than those declared by Parliament by law to be of national importance.

41. Custody, management and disposal of property (including agricultural land) declared by law to be evacuee property.

42. Principles on which compensation for property acquired or requisitioned for the purposes of the Union or of a State or for any other public purpose is to be determined, and the form and the manner in which such compensation is to be given.

43. Recovery in a State of claims in respect of taxes and other public demands, including arrears of land-revenue and sums recoverable as such arrears, arising outside that State.

44. Stamp duties other than duties or fees collected by means of judicial stamps, but not including rates of stamp duty.

45. Inquiries and statistics for the purposes of any of the matters specified in List II or List III.

46. Jurisdiction and powers of all courts, except the Supreme Court, with respect to any of the matters in this List.

47. Fees in respect of any of the matters in this List, but not including fees taken in any court.

13. The Hyderabad Jagirs (Commutation) Regulation, 1359 F. (No. XXV of 1359, Fasli).

ASSAM STATE

THE State of Assam is composed of eleven districts—Sibsagar, Lakhimpur, Nowgong, Darrang, Kamrup, Goalpara, K. & J. Hills, Naga Hills, Cachar, Lushai Hills and Garo Hills.

Population—The total population of the State according to the 1951 census is 9,129,442. In 1941 the population was a little over 10 millions, of which nearly 4½ millions were Hindus, over 3½ millions Muslims; 2½ millions belonged to tribal groups.

With the partition, the whole of the District of Sylhet except four thanas became part of East Bengal. Hence the area as well as the population have been correspondingly reduced. The following is the 1951 census estimate of the present position: area in square miles 54,084 (Frontier Agency excluded which is 31,697); total population 9,129,442 out of which 4,869,878 are males and 4,259,564 are females. The number of Hindus is estimated at 2,947,989, of Muslims 1,710,423, of Sikhs 3,742, of Christians 35,724. The density of the population is 149.53.

40 per cent of the population are recorded as speaking Assamese and about 24 per cent Bengali. Other languages spoken in the State are Hindi, Uriya, Mundari, Nepali and a great variety of languages classified under the general heading of the Tibeto-Burman languages. (See detailed note on population at the end of the article.)

Agricultural Products—The river basins are naturally fertile and present in the main few difficulties to the cultivator. Rice is the staple food crop, nearly 4,003,543 acres in 1947-48 being devoted to this crop. Rainfall being high, the problem in general is to dispose of the surplus water and to control the action of floods rather than irrigation in the usual sense. Tea and jute are the most important crops grown for export. The area under tea and jute in 1949-50 was 400,000 and 231,310 acres respectively. About 60,042 acres are devoted to sugarcane. Besides, potatoes are also cultivated in Assam. The area under this crop was in the neighbourhood of 60,824 acres during 1949-50. A good deal of short staple cotton is grown in the hills.

During the year 1950-51 the area under the main crops was as follows: Rice, 4,048,378 acres; Tea, 382,199; Jute, 248,969; Pulses, 221,280; All kinds of oil seeds, 346,446; Potato, 59,382.

Meteorological Conditions—Rainfall is everywhere abundant, and ranges from 50 to 258 inches a year leaving aside the highest recorded rainfall in this part of India with the maximum reached at Cherrapunji in the Khasi Hills (569·50); this is one of the wettest places in the world. Temperatures are moderate.

Earthquakes of considerable severity have taken place. By far the worst was that which occurred in 1950 August, one of the world's five biggest recorded tremors. Lakhimpur district and North-East Frontier Agency were the worst hit by the earthquake. In all, 112,000 persons were badly affected in Lakhimpur district and 350,000 in the North-East Frontier Agency.

In the whole of Assam, about 1,000 persons were killed, 100,000 houses destroyed or partially damaged or washed away, 50 lakhs of people rendered homeless and thousands of cattle destroyed.

Areas were sunk, rivers changed courses and thousands of acres of land were inundated. The Central Brahmaputra valley sunk in level between eight and twelve feet. Mountain chains vanished. Fortunately only about six tea gardens out of 900 have been damaged and thus only one per cent of crop was written off.

The loss to both the State and Central Governments as a result of destruction of Government properties might exceed five crores of rupees while the whole State had suffered a loss of about ten crores of rupees in damage to immovable property and cattle according to unofficial estimates.

Mines and Minerals—The only minerals in Assam worked on a commercial scale are coal, limestone and petroleum oil. Petroleum output during 1946-47 was 6,48,77,535 gallons; coal output 3,22,942 tons; and limestone output 9,84,677 tons. The most extensive coal measures hitherto worked are in the Naga Hills and the Lakhimpur district. Important deposits also exist in the Garo Hills. Limestone is quarried in the Khasi and Jaintia Hills. Petroleum is worked only in Lakhimpur and Cachar, and refined only in Lakhimpur.

Accounts of the occurrence of petroleum in Assam have been published in the memoirs of the Geological Survey of India. The petroleum localities in this State are confined to a curved belt of country along the basins of the Brahmaputra and the Surma. This belt is traceable over a distance of some 800 miles from N.-E. Assam through Cachar and Chittagong to the Arakan coast, where it has a S. S. E. trend.

MANUFACTURES AND TRADE

Silk is manufactured in the Assam valley; also cotton weaving prevails as a cottage industry, women playing a predominant part. In this valley there are no caste weavers. In the Surma Valley weavers carry on a brisk manufacture on a commercial scale. These handloom products find a ready market on account of the great scarcity of mill made goods. Tea is of course the main industry, but there is a large petroleum mining concern and also some coal-mines. There is a big match manufacturing concern at Dhubri. Boat-building, brass and metal and earthenwares, and limestone burning, cane and bamboo work, furniture making, sola hat, smithy, brick making, mustard oil pressing, rice and saw mills are other industries but agriculture employs about 80 per cent of the population. Assam carries on a considerable trade with the adjoining hill tribes and countries.

Communications—Much of the trade of Assam is carried by river. The extensive system of river communications makes the State less dependent upon roads than other parts of India but there has been much advance in recent years in road communication. A fleet of steamers maintained by the India General Navigation Company and the Rivers Steam Navigation Company plies on the rivers in both Valleys. There is a day service of passenger-boats between Tezpur and Neamati.

The open mileage of railway has also shown a steady improvement and several branch lines to the railway system in Assam have been added in recent years including the new Railway joining Assam directly with the rest of India. A branch of the line runs from Badarpur to Silchar at the eastern end of the Surma Valley and another runs west down the Assam Valley from Lumding to Pandu.

The first direct link by air between Calcutta and Gauhati was established on December 14, 1947. This air service was originally on a non-scheduled basis but very soon it became a daily service which has since been extended to Dibrugarh.

The Assam Government have undertaken an experiment in transport organization with the nationalisation of motor transport on a 75-mile long road connecting Gauhati and Nowgong.

ROAD IMPROVEMENT

Post-war road improvement programme envisages an expenditure of Rs. 5 crores over a period of 5 years. It covers not only construction of new roads but also includes improvement of existing roads to a better standard. The scheme also embraces a large bridging programme.

Approximately 919 miles of roads classified as village roads and 210 miles of District roads were taken up for improvement upto 1948-49. A stretch of 230 miles of road classified as strategic, connecting Shillong with Silchar without touching Pakistan territory had been taken up and this work has been almost completed during the year 1951. Another motorable road from Medhipara to Phulbari and Phulbari to Tura has been constructed to connect them to the headquarter station of the Garo Hills, and the road is now motorable. A motorable road is also being constructed from Silchar to Aijal in the Lushai Hills. In the beginning of 1948 the construction of a new road from the Assam boundary to Agartala (Tripura) was also undertaken at the instance of the Government of India. The total length of this road is about 125 miles. It was planned to be jeepable by the end of 1949 thus giving direct access to Agartala from Assam. Yet another achievement of the Government of Assam is the construction of a very important road connecting Assam with the rest of India through Cooch Behar, without going through Pakistan.

The curtailment of post-war grant by the Government of India has rendered the completion of a large portion of new roads impossible on the part of the State Government due to their unsatisfactory financial position. A length of 607 miles of roads which could not be completed due to the said curtailment of post-war grant are being completed from the State Petrol Tax Fund at a rough cost of Rs. 56,00,000. The construction of many other new roads and improvement of old ones has been taken up from State Revenue Fund, Motor Vehicles Fund and Cess Procurement Fund.

The road programme has its special significance in that it is being designed with a view to making Assam self-sufficient in the matter of having its export and import to and from other parts of the Indian Republic transported quickly without having to pass through the Pakistan Dominion. At the same time communications within the State have also been improved by provision of necessary feeder roads from and to the arterial road system of the State with a view to securing good market for the surplus produce of certain localities.

ADMINISTRATION

The State of Assam was originally formed in 1874 in order to relieve the Lieutenant-Governor of Bengal of part of the administration of the huge territory then under him. In 1905, as a result of further deliberations, it was decided to add to the small Province of Assam the eastern portion of its unwieldy neighbour and to consolidate those territories under a Lieutenant-Governor. The Province of Eastern Bengal and Assam as then constituted was again broken up on the 1st of April, 1912; the Eastern Bengal Districts were united with the Bengal Commissionerships of Burdwan and the Presidency to form the Presidency of Bengal under a Governor-in-Council. Bihar, Chota-Nagpur and Orissa were formed into a separate province, while the old Province of Assam was reconstituted under a Chief Commissioner.

Under the Indian Reforms Act of 1919 the State was raised in status to that of administration by a Governor-in-Council and was thereby ranked with the older major States of India.

After Independence the State was administered according to the Government of India Act of 1935 as modified by subsequent Governors' ordinances under the Indian Independence Act and now under the Constitution of India.

The capital of Assam is Shillong, which has for a number of years been growing rapidly and is now in parts overcrowded. The town has grown up on somewhat rustic lines in very beautiful country, on the slopes of the Shillong Range which rises to a height of 6,450 feet above the sea. It was destroyed in the earthquake of 1897 and was rebuilt with methods of construction more fitted to withstand the shocks of earthquake.

THE BUDGET OF ASSAM

The financial position for 1952-53 is set out in the following table:—

Heads of Revenue.	Budget Estimates for 1952-53. (*In thousands of Rupees.*)
A—Principal heads of Revenue—	
I—Customs	..
IV—Taxes on Income other than Corporation Tax	2,22,53
VII—Land Revenue	1,65,47
VIII—State Excise	76,45
IX—Stamps	25,55
X—Forests	40,18
XI—Registration	4,29
XII—Receipts under the Motor Vehicles Taxation Act	29,67
XIII—Other taxes and duties	87,86

1951 CENSUS

The provisional population figures for Assam, as revealed by the 1951 census, show an increase of 20·2 per cent over that of 1941. The population increased by 1,536,405 persons in these 10 years and now stands at 9,129,442.

The above total includes 276,824 displaced persons. If this figure be deducted from the total, the population of Assam will be only 8,852,618 the increase over that of 1941 being only 16·6 per cent.

The total increase naturally leads to the increase in density figure, which is now 169 persons per square mile. The density in 1941 was 141.

An interesting phenomenon in the present provisional census figures is that Assam shows a definite decline in the number of females per thousand males. The ratio was 888·8 females per thousand males in 1941; now it has come down to 874·9.

The following are explanatory notes on the provisional population figures for Assam.

The population of the state of Assam now stands at 9,129,442: males 4,869,878; females 4,259,564. This total includes 276,824 displaced persons (males 151,531, females 125,293) that is, those who came away from East Pakistan on or after the 15th October, 1946, and West Pakistan on or after the 1st March, 1947. Excepting the vast unadministered areas of the North-East Frontier Agency, the area of the State comes to 54,084 square miles.

The population of the State shows an overall increase of 1,536,405 persons, that is, an increase of 20·2 per cent over the 1941 population. Every district has shared in this increase.

Excepting the Balipara Frontier Tract involving very small populations, Nowgong has registered the largest increase, namely, 34·1 per cent. Then comes Lushai Hills with 27·4 per cent and Cachar 23·9 per cent, closely followed by Darrang and Kamrup, each showing 23·7 per cent and 23 per cent increase respectively.

Among the plains districts of Assam, Goalpara and Sibsagar have registered the least increases, 9·1 per cent and 15·9 per cent respectively.

REFUGEES

The population increase of various districts in this census should be considered with special reference to the influx of refugees. The largest number of displaced persons—93,349—are found in Cachar, with Nowgong a distant second—44,096, closely followed by Goalpara—43,019 and Kamrup—42,390.

The population of Assam minus displaced persons will, therefore, be only 8,852,618, showing a net increase of 16·6 per cent over the 1941 figure.

The density of Assam is 169 persons per square mile, whereas the density in 1941 was 141, showing an increase of 28 persons per square mile.

The density per square mile varies from 404·6 in Kamrup, 324 in Darrang, 278 in Goalpara and 253 in Cachar, as against 24 in Lushai Hills, 48 in Naga Hills, 63 in United Khasi and Jaintia Hills and 78 in Garo Hills.

If North Cachar Hills sub-division is taken out of consideration, the density of Cachar plains is the greatest, with 416 persons per square mile.

Assam shows along with its neighbour State of West Bengal a definite, although small, decline in the number of females per thousand males. The ratio was 888·8 females per thousand males in 1941; we have now only 874·9 females per thousand males. It means a decrease of 14 females for every thousand males in Assam.

In the provisional population figures for Assam are already given the figures for those areas of Mishmi Hills, Abor Hills, Tirap Frontier Tract and Balipara Frontier Tract, which are under regular administration and which were regularly enumerated. Apart from these, there are other vast unadministered areas of the North-East Frontier Agency, which cover an additional area of 31,697 square miles. No census could be taken in this area, but its total population as estimated by the Political Officers in charge is 561,000 at a rough approximation, giving a density as low as 19 persons per square mile.

	Area (in sq. mile).	Unadministered Population.
Balipara	11,496	238,000
Abor Hills	7,957	184,000
Mishmi Hills	7,432	60,000
Tirap Frontier Tract	1,997	6,000
Naga Hills Tribal Area	2,815	73,000
Total ..	31,697	561,000

Tables

ASSAM LEGISLATIVE ASSEMBLY

(For list of Members of Assembly see under article General Elections.)

Chota Nagpur Circle with their headquarters at Muzaffarpur, Patna and Ranchi. The Assistant Directors of Public Health act as reporting and inspecting officers of Government on matters pertaining to the health and sanitation of their respective circles. They also inspect and supervise the working of the public health administration under the local bodies.

There are sixteen districts in the State; each one of them is provided with a Health Officer, who is in direct charge of the Health Administration of the District. Local bodies are responsible for health administration in their own areas. Out of fifty-four Municipalities, eight are provided with Health Officers.

A senior officer of this department known as Senior Executive Medical Officer is placed in charge of the flood affected areas of the Kosi where a special scheme of medical and public health relief has been introduced.

The other public health services, maintained by the department are the offices of the Chemical Analyst, Nutrition Department, Bacterio-phage and that of Excise Chemist, which are all located in the Public Health Laboratory.

All supplies of vaccine lymph are manufactured at the Vaccine Institute, Namkum. The department hitherto maintained two depots, main one at Patna and the sub-depot at Ranchi where anti-malarial drugs, vaccines, disinfectants and equipment were stocked for supply to local bodies in the State. Government abolished the sub-depot at Ranchi with effect from March 1, 1950. The department takes special measures for control of epidemics and malaria and kala-azar.

For the medical inspection of schools, four School Medical Officers, one in charge of each of the four divisions of the State are maintained. A lady School Medical Officer for the inspection of girls schools is also employed.

The Department carry out Public Health Propaganda by means of leaflets, pamphlets, posters, health exhibitions, slides and films.

The budget of the Public Health Department is about Rs. 40 lakhs every year.

1952-53 Budget

The budgetary position for 1952-53 is indicated as follows :—

	(Rupees in Crores)
Opening balances	2
Revenue	28
Revenue expenditure	30
Revenue deficit	2
Capital expenditure (including loans)	9
Loans from Government of India	4
Deficit in Capital expenditure	5
Total deficit	7
Transfer from P.W.R. Fund	3
Uncovered deficit	2

The budget contains no fresh taxation.

ADMINISTRATION

GOVERNOR.

His Excellency Sri R. R. Diwakar.

PERSONAL STAFF.

Secretary to Governor, Pushkar Thakur, I.A.S.
Military Secretary to Governor, Major R. D. Chandavarkar.
Aide-de-Camp, Captain N. G. Kulkarni.
Honorary A. D. Cs., Risaldar Major and Hony. Capt. Abdul Latif, Khan Bahadur, O.B.I., I.D.S.M., late 2nd Royal Lancers (Gardner's Horse).

CABINET MINISTERS.

Chief Minister and Minister for Political and Appointment, Sri Krishna Sinha.
Finance, Agriculture, Labour, Anugraha Narain Sinha.
Irrigation and Electricity, Ram Charitra Singh.
Education, Acharya Badrinath Varma.
Land Revenue, Forests, Excise, Krishna Ballabh Sahai.
Co-operative and Veterinary, Dip Narayan Sinha.
Industries, Transport, Information, Mahesh Prasad Sinha.
Public Works, Muhammad Shafi.
Jails, Relief and Rehabilitation, Shah Md. Ozair Munemi.
Judicial and Legislative, Shivanandan Mandal.
Medical and Public Health, Devasharan Singh.
Local Self-Govt. and Welfare (Harijan, Aboriginal etc.), Bhola Paswan.
Civil Supplies, Harinath Mishra.

SECRETARIAT.

Chief Secretary to Government, Political and Appointment Departments, L. P. Singh, I.C.S.
Secretary to Government, Finance Department, B. D. Pande, I.C.S.
Secretary to Government, Supply & Price Control Dept., S. K. Aikat.
Secy. to Govt., Rev. Dept., K. N. Singh, I.A.S.
Secretary to Government, Judicial Department, Kanhaiya Singh.
Secretary to Govt., P.W.D., S. V. Sohoni, I.C.S.
Secretary to Government, Labour Department, S. C. Mukherjee.
Secretary to Government, Education Department, J. C. Mathur, I.C.S.
Secretary to Government, Local Self-Government Department, P. K. J. Menon, I.A.S.
Secretary to Government, Legislative Department, Khalilur Rahman.
Secy. to Govt., Development Dept., Qamrul Hudai, I.A.S.
Secy. to Govt., Welfare Dept., Jamuna Prasad, I.A.S.
Secy. to Govt., Relief & Rehabilitation Dept., Shiva Prasad Singh, I.A.S.
Member, Board of Revenue, N. Baksi, I.C.S.

PUBLIC SERVICE COMMISSION (FOR BIHAR)

Chairman, Rajandhari Singh, C.I.E.
Members, Bihundeo Narayan Singh, Anant Narayan Prasad.
Secretary, R. K. Chaudhuri.

GOVERNORS OF BIHAR

Lord Sinha of Raipur, P.C., K.C.	1920

Sir Hugh Dow, K.C.S.I., C.I.E., I.C.S.	1946
Shri Jairamdas Daulatram	1947
Shri M. S. Aney	1948

1951 CENSUS

The total population of the State increased from 36,545,575 in 1941 to 40,218,916 in 1951. There has, thus, been a net increase of 3,673,341 in 10 years.

District-wise, Darbhanga has the largest population with a total of 3,767,791 and Muzaffarpur with 3,516,595 is next. Saran and Gaya districts are also now in the over three millions group. Monghyr has 28½ lakhs, and Shahabad, Purnea, Patna, Champaran and the Santal Parganas are all in the over two millions category. Purulia, Singhbhum, Bhagalpur and Saharsa come in the one million to 1½ million group. Only two units, namely, the Palamau district and the Dhanbad sub-district have less than one million each.

The population of the State as a whole has increased by 10.05 per cent since 1941. District-wise, Dhanbad's increase of 25.51 per cent is the highest. This is no doubt due more to immigration than to natural increase. Patna with 16.57 per cent increase comes next. Here also the increase is largely attributable to the influx of persons from other places into the Patna urban area. The highest natural increase has been achieved by the Saharsa sub-district which shows 15 per cent increase over the 1941 total. Seven districts, namely, Bhagalpur (South), Ranchi, Shahabad, Monghyr, Gaya, Hazaribagh and Saran show more than 10 per cent increase. Singhbhum's rate of increase is about 10 per cent. Darbhanga has recorded 9 per cent increase. Muzaffarpur and Palamau have shown about 8 per cent increase. The rate of increase in Purnea, Champaran and the Santal Parganas varies from 6.71 per cent to 4.20 per cent. Besides Supaul, there are five sub-divisions namely, the Kishanganj and Araria sub-divisions of the Purnea district, the Rajmahal and Pakaur sub-divisions of the Santal Parganas district, and the Chatra sub-division of the Hazaribagh district, in which actual decrease has been recorded.

Patna remains the most populous city in the State with a total of 282,057. Of the total population 248,684 live in the area under the Patna City Municipality and 33,373 in the Patna Administration Committee. In 1941, the population of the Patna City Municipal area was 175,706 plus 17,456—193,162 and the population of the Patna Administration Committee was 20,709. There has been a net increase in the population of the Patna City Municipality and the Patna Administration Committee by 55,522 and 12,664 respectively. The net increase in the population of the two together is 68,186. The percentage increase is a little below 32. Jamshedpur (including Jugsalai) the second largest city in Bihar has now a population of 219,377 as compared with 184,395 in 1941 which means a net increase of 54,982. The rate of increase here is slightly below 34 per cent. Gaya comes next with a population of 134,120 now against 105,223 in 1941. The population of Ranchi town including Doranda has increased from 62,562 in 1941 to 105,500 which means a net increase of 42,938. The rate of increase comes to more than 68 per cent.

Literates now form 12.83 per cent of the population which means, that roughly 87 persons per hundred are illiterate at present. The ratio has improved somewhat as compared with 1941 when it was only 9.27 per cent but the total number of illiterate persons now is 350 lakhs as compared with 330 lakhs in 1941. It may be mentioned, that the literacy test (ability to read and write a simple letter in any language) is itself rather low as compared with Western countries. As between the sexes literacy among females is still very low being only 4.14 per cent. District-wise, Patna with a ratio of 22.06 per cent is the most advanced in literacy. Dhanbad with 17.08, Singhbhum with 16.33 and Shahabad with 15.85 are second, third and fourth respectively. Purulia, Bhagalpur, Gaya and Monghyr are also above the State average. Saran, Darbhanga, Muzaffarpur and Ranchi, more or less, approximate to the average. The remaining districts are below the average, Champaran, Santal Parganas and Palamau being at the bottom of the list with 8.43 per cent, 8.23 per cent and 7.84 per cent, respectively. Literacy among males is most advanced in Patna, Shahabad, Purulia, Dhanbad, Singhbhum, Bhagalpur, Monghyr and Saran. In female literacy, Patna, is first with 7.64 per cent. Singhbhum comes next with 6.87 per cent, Dhanbad is third with 6.86 per cent, Bhagalpur fourth with 5.09 per cent, Ranchi fifth with 4.95 per cent, Monghyr sixth with 4.12 per per cent and Muzaffarpur seventh with 4.06 per cent. The remaining districts are below the State average; Champaran, Saharsa and Palamau being at the bottom of the list with less than 2 per cent literate females in each case.

The total number of displaced persons in the State is 78,641. Purnea has the largest number 18,075. Patna comes next with 11,932. Chaibassa, Ranchi and Dhanbad have each more than 7,000 displaced persons.

District Population Totals

Name of District	Area in sq. miles	Provisional population total			Percentage variation 1941-51	Density per sq. mile 1951	No. of females per thousand males 1951
		Total	Males	Females

BIHAR LEGISLATIVE COUNCIL

(For list of members see under General Elections).

BIHAR LEGISLATIVE ASSEMBLY

(For list of members see under General Elections).

BIHAR STATE

BIHAR lies between 20°30′ and 27°30′ N. latitude and between 82°31′ and 88°26′ E. longitude and includes the former States of Seraikella and Kharsawan. It is bounded on the north by Nepal and the Darjeeling District of West Bengal; on the east by West Bengal and East Pakistan; on the south by the State of Orissa; and on the west by Uttar Pradesh and Madhya Pradesh.

The area of the territories which constitute the Governorship of Bihar is 70,368 square miles. The State comprises the plateau-land of Chota Nagpur and the valley of the Ganges from the spot where it issues from the territories of the Governor of Uttar Pradesh till it enters West Bengal near Rajmahal. Following the main geographical lines, there are four Civil Divisions with headquarters at Patna, Muzaffarpur, Bhagalpur and Ranchi. The headquarters of Government are at Patna. The new capital which lies between the Military Cantonment of Dinapore and the old civil station of Bankipore is known as "Patna," the old town being called "Patna City."

THE PEOPLE

The State has a population of 40,218,916 (provisional total according to 1951 census) persons. Even so with 574 persons per square mile, Bihar is more thickly populated than Germany. There are only five towns, which can be classed as cities, namely, Patna, Gaya, Jamshedpur, Bhagalpur and Ranchi. During the last ten years the population of Patna has been steadily increasing. Hindus form an overwhelming majority of the population. Though Muslims form about one-tenth of the total population they constitute more than one-fifth of urban population of the State. Animists account for 6·7 per cent. These are inhabitants of the Chota Nagpur plateau and the Santal Parganas, the latter district being a continuation of the plateau in a north-easterly direction.

AGRICULTURE

Although there is a great deal of mineral wealth in Chota Nagpur and important industries are developing in connection with it, still for the bulk of the population of the State agriculture continues to be the basic occupation. Over 80 per cent. of the population depends wholly on agriculture, while only 7·8 depends on industries.

The soil throughout the whole of that portion of the Indo-Gangetic plain lying within the State boundaries is extremely fertile, particularly in North Bihar, in parts of which the density of the population is more than 900 people to the square mile. The State occupies a transitional position between Ganges delta with its damp climate so suitable for the paddy crop and the States to the north and west where large irrigation schemes have had to be provided to enable the soil to produce its bounty. As in the delta of the Ganges, rice is by far the most important crop as it occupies normally an area of approximately 12 million acres or about 52 per cent. of the net cropped area of the State. As canal irrigation is available only in the Sone valley and to a moderate extent in Champaran District, the importance of the south-west monsoon to the State of Bihar cannot be over-estimated.

In addition to the rice crop, however, other grain crops are grown on a tolerably large scale. Of the monsoon cereals, maize is grown in a normal area of about 18 lakhs of acres while in the cold weather wheat and barley are extensively grown and occupy approximately 26 lakhs of acres. The cultivation of oilseeds like castor, mustard and linseed forms a large and important part of the agriculture of Bihar, the normal area under spring oilseeds being estimated at more than 17 lakhs of acres. The areas under maize, wheat, barley and spring oilseeds are about 18 lakh acres, 16 lakh acres, 10 lakh acres and 1,504,300 acres respectively.

After Uttar Pradesh, Bihar is the most important white sugar area in India, some 23 per cent. of the total production of white sugar in the country being turned out in Bihar factories. The number of factories in the State has risen from 12 in 1931-32 to 30 at the present time.

Jute is also an important crop and is confined almost entirely to the Purnea District on the West Bengal border where about 95 per cent. of the total crop in the State is produced. The total area under jute crop is about 3 lakh acres but little of the produce is manufactured within the State.

Tobacco is a crop of increasing importance in the State and one which is likely to expand in importance. The area under the crop is about 55,000 acres. There are two factories at present in the State.

MANUFACTURES

At Monghyr the Peninsular Tobacco Company have erected one of the largest cigarette factories in the world and as a result tobacco is being grown much more extensively. The Tata Iron and Steel Works at Jamshedpur in Singhbhum District are also one of the largest in the world and numerous subsidiary industries are springing up in their vicinity. The population of Jamshedpur has increased to 219,377 and it consumes over 1½ million tons of coal annually. This part of the State has also some of the richest and most extensive iron mines in the world and supplies the iron and steel works in both West Bengal and Bihar with raw materials, but the raising of coal is still the most important of the mineral industries in the State The coalfields in the Manbhum District have undergone an extraordinary development in the past twenty years, while valuable new fields are being developed at Ramgarh, Rokaro and Karanpura in Hazaribagh. This same District is the most important mica mining centre in the world both on account of the quality as well as the size of its output. Manbhum, Palamau, Ranchi, the Santal Parganas and Gaya are also the chief centres for the production of lac and the manufacture of shellac, the latter of which is exported from India to the value of ten crores annually. Cement is the other important industry of the State which is produced from the limestones available in Palamau and Shahabad.

ADMINISTRATION

The State on first constitution was administered by a Lieutenant-Governor-in-Council, thus being unique in India as the only Lieutenant Governorship with a Council. It was raised to the status of a Governorship, with an Executive Council and Ministers under the Reform Act of 1919. Further constitutional progress was marked by the enforcement in 1937 of the Govt. of India Act, 1935, and the Constitution of India which commenced on the 26th January 1950, has given birth to the 'State' of Bihar under the Union of Sovereign Democratic Republic of India. The principles of the State administration are fully explained elsewhere.

PUBLIC WORKS

The Public Works Department and Irrigation Department are now separate Departments of Government. There are five Chief Engineers, viz. Chief Engineer (Roads & Buildings), Chief Engineer (Irrigation), Chief Engineer (Gandak Valley), Chief Engineer (Public Health Engineering Department) and Chief Electrical Engineer & Chief Electric Inspector, Bihar.

Chief Engineer (Buildings & Roads), is in charge of the Buildings and Roads; Chief Engineer (Irrigation), is in charge of the Irrigation and Lift Irrigation; Chief Engineer, Gandak Valley is in charge of North Bihar Tube-well Schemes and Gandak Valley Schemes. Chief Engineer (Public Health Engineering Department) is in charge of the Public Health Engineering Department. This post was created on a temporary basis for 3 years from 1949. A new post of Chief Electrical Engineer and Chief Electric Inspector, Bihar, was also created and the Chief Electrical Engineer is in charge of the Electrical Department. In addition to the Chief Engineers who are now heads of Departments, the following officers are attached to the offices of the Chief Engineers Irrigation and Buildings and Roads:—

Roads and Buildings.—Special Officer (Communications); Special Officer & Inspector of Local Works; Government Architect & Town Planner, Bridge Designing Officer.

A personal Assistant to each of the Chief Engineers (Buildings and Roads) and Chief Engineer (Irrigation) of Executive Engineer's rank has also been sanctioned.

The whole organisation of the Public Works Department and Irrigation Department is now under a non-technical Secretary to Government who is assisted by a Deputy Secretary (Non-technical), Under-Secretary (Technical) and Additional Under-Secretary (Non-technical) in his Secretariat work.

JUSTICE

The administration of justice is controlled by the High Court of Judicature at Patna. In the administration of civil justice below the High Court are the District Judges as Courts of Appeal, the Subordinate Judges and the Munsiffs. The jurisdiction of a District Judge or Subordinate Judge extends to all original suits cognizable by the Civil Courts. It does not, however, include the powers of a Small Causes Court, unless these be specially conferred. The ordinary jurisdiction of a Munsiff extends to all suits in which the amount or value of the subject matter in dispute does not exceed Rs. 1,000 though the limit may be extended to Rs. 4,000. On the criminal side the Sessions Judge hears appeals from Magistrates exercising first class powers while the District Magistrate is the appellate authority for Magistrates exercising second and third class powers. The District Magistrate can also be, though in point of fact he very rarely is, a court of first instance. It is usual in most districts for a Joint Magistrate or a Deputy Magistrate to receive complaints and police reports, more important or complicated cases being referred to the District Magistrate who is responsible for the peace of the District. In the Santal Parganas and in the Chota Nagpur Division the Deputy Commissioners and their subordinates hear rent suits. In the Santal Parganas the Deputy Commissioner and his subordinates also exercise civil powers. During 1950, an experiment towards separation of executive and judiciary was tried in the Patna, Gaya and Shahabad districts and during 1951 it was extended to Monghyr and Saran districts.

LAND TENURE

The Bihar Abolition of Zamindaris Bill, 1948 which was passed by both Houses of the Provincial Legislature subsequently received the assent of the Governor-General in 1949 and was published as an Act. It was however later on decided to replace this Act by more comprehensive legislation embodying certain principles of land reform. This Act was accordingly repealed and replaced by the Bihar Land Reforms Act, 1950 which received the assent of the President on September 11, 1950, and was subsequently brought into force. This legislation not only lays down the procedure for abolition of zamindaris and assessment of compensation but also contains provisions for collection of rent and management of forests, waste lands, etc., through the agency of village panchayats, and the appointment of a Land Commission for advising Government on the agrarian policy to be pursued by them. The Act provides for the payment of compensation in the shape of bonds also which shall be either negotiable or non-negotiable and non-transferable. The whole of

the land tenure system will be completely changed by this enactment. The Act seeks to provide for the transference to the crown of interests of proprietors and tenure holders in land including their interests in trees, forests, fisheries, 'Jalkars', ferries, 'hats' and 'Bazars'.

Certain estates with gross annual income exceeding Rs. 50,000 were notified under the Act but the actual possession of the estate could not be taken over due to injunctions issued by the Patna High Court. Subsequently the High Court declared the Act to be invalid by reason of Contravention of Part III of the Constitution. The Constitution (Amendment) Act, 1951 however provides that notwithstanding any judgment, decree or order of any Court or tribunal to the contrary, the Act or any of its provisions will not be deemed to be void or to have ever become void on the ground that it is inconsistent with or takes away or abridges any of the rights conferred by any provisions of Part III of the Constitution. Thereafter the matter was taken up by the landlords to the Supreme Court. As the validity of the Act has been upheld by the Supreme Court, the State Government propose to take over at the first instance all estates and tenures having gross annual income exceeding Rs. 50,000 and thereafter the other estates will be taken over as quickly as possible, subject to administrative convenience.

A number of estates are held direct by Government, having come into the direct management of Government in various ways. Other estates are managed temporarily by the Board of Revenue under the Court of Wards Act, while in Chota Nagpur a number of estates are managed by Managers appointed under the Chota Nagpur Encumbered Estates Act. There are two Tenancy Acts in force in the State. In Bihar the Bihar Tenancy Act is in force. This is the same as the Bengal Tenancy Act, 1885, with a number of important differences consequent on recent amendments of the Act. In Chota Nagpur, which is largely inhabitated by aboriginal peoples, the Chota Nagpur Tenancy Act, 1908, an Act specially adapted to their requirements, is in force. It has also recently undergone several important amendments beneficial to the people of Chota Nagpur. There is a third tenancy system in the Santal Parganas where the tenancy law is contained in Regulation III of 1872 and II of 1886 and the record-of-rights prepared in the settlement. A new tenancy law known as the Santal Parganas Tenancy (Supplementary Provisions) Act, 1949 has now been enacted for the District of Santal Parganas. Finally in a small part of South Bihar where there is a large aboriginal population a special chapter of the Bihar Tenancy Act designed to prevent alienation of land by aborigines is in force.

Throughout the State a system of periodic settlements is in vogue. In these settlements the maps and cadastral ledgers are revised and fair rents settled. In many districts the settlement records are now out of date and in one or two it is nearly 40 years since the last settlement was undertaken.

In the greater part of the Santal Parganas and in many parts of Chota Nagpur the headman system prevails. The usual practice is that the headmen are responsible for the collection of the rents and their payment to landlords after deduction of a percentage as their remuneration. Special steps have been taken in the settlements to record the rights and duties of the headmen, and the special rights and privileges of certain privileged classes of tenants among the aboriginals.

POLICE

The Departments of Police, Prisons and Registration are each under the general direction of Government, supervised and inspected by an Inspector-General with a staff of assistants. The Commissioner of Excise is also Inspector-General of Registration.

Under the Inspector-General of Police are six Deputy Inspectors-General and 29 Superintendents. There are also 16 Assistant Superintendents of Police and 50 Deputy Superintendents. The force is divided into the District Police, the Railway Police and the Military Police. There is a college for the training of officers and one school for the training of recruit constables. Both the institutions have selected police officers on their staff. A Criminal Investigation Department has also been formed for the collection and distribution of information relating to professional criminals and criminal tribes whose operations extend beyond a single district and to control, advise, and assist in investigations of crime of this class and other serious action when its assistance may be invoked. Under this department three Bureaux are working, *i.e.*, Finger Print Bureau, Photo Bureau and the Handwriting Bureau. There are six battalions of Unmounted Military Police and seven troops of Mounted Military Police which are maintained as reserves to deal with serious and organised disturbances and perform no ordinary civil duties. The battalions of Unmounted Military Police are under the charge of commandants who hold the rank of Superintendents of Police.

EDUCATION

The total expenditure on general education (excluding technical education) from Government funds is up from Rs. 88,15,348 in 1945-46 to Rs. 3,85,23,611 bringing the expenditure per student to Rs. 22-8-11 as against Rs. 7-1-10 of 1945-46. There has also been a remarkable increase in the number of institutions and pupils; the State has now two Universities, four research institutions, 44 Colleges, 643 High Schools, 26,000 Middle and Primary (including Basic Schools) Schools and 72 training institutions. 16 Girls' High Schools and 33 Girls' Middle Schools are being run entirely at State expense and two new training schools for women have also been opened. Since April 1949, Government has been bearing the cost of increasing the salaries of the teachers of all categories throughout the State, which amounts to a total of Rs. one crore per annum, apart from the cost of living allowance. Grants-in-aid are also being given to all the Schools that stood recognised in April 1949, for such items as contingencies, libraries, repairs of building, etc. Fees have been abolished for all school children in the Primary stage.

The State has made striking progress in Basic education, there being now 570 Basic institutions of all categories as against 28 in 1945-46. Some of these institutions are meeting part of their cost out of the production and as much as five thousand acres of land have been donated free to Government by the people for the use of the Basic institutions.

In backward districts, 840 new Primary Schools were opened, 21 High Schools were subsidised and several hostels and training centres were also opened by the Government.

On January 2, 1952, the old Patna University was replaced by a purely teaching University comprising the Colleges within the limits of Patna City and the Patna Administration Committee, and another University of Bihar, a teaching-cum-affiliating body comprising the rest of the Colleges in the State. Substantial grants have been guaranteed to the two Universities under the Acts and with their establishment a new chapter has been opened in the history of higher education in Bihar.

Two institutions for higher research and post-graduate studies have been started, one at Nalanda for Pali and another at Darbhanga for Sanskrit, their foundation stones having been laid by the President of India in November 1951. The K. P. Jaiswal Research Institute has been started for advanced research in History and the Bihar Rashtra Bhasha Parishad has also been set up at State cost as the State Academy of letters.

In the sphere of social education, a new scheme at an annual cost of nearly Rs. 7 lakhs has been in progress. Substantial grants are also given to libraries in the form of books. In order to foster and develop music, dance and drama and other stage arts, the State Government has sponsored the Bihar Academy of music, dance and drama, which was inaugurated on 27th January 1952. A cultural grants committee has also been set up.

The first rural College in India has been established at Turki in Muzaffarpur District and promises to be a successful experiment. A Women's Training College for graduates has also been started from 1951 at Patna.

A College of Physical Education and Health was established in 1950-51.

MEDICAL

The Medical Department is under the control of the Inspector-General of Civil Hospitals. Under him there are 16 Civil Surgeons and one Senior Executive Medical officer of the rank of Civil Surgeon at Saharsa Sub-District who are responsible for the medical work of the districts at the headquarters of which they are stationed. Sixty-two hospitals and dispensaries are maintained by Government in addition to 694 hospitals and dispensaries maintained by Local Bodies, Railways, private persons, etc. About 5,500,000 patients including 115,000 in-patients are treated in all the dispensaries every year. The total expenditure on the hospitals and dispensaries maintained by Government and Local Bodies including that of the private aided institutions amounts to about Rs. 1,00,50,390.

There is a large mental hospital named Hospital for Mental Diseases at Ranchi receiving patients from Assam, Bihar, W. Bengal, Madhya Pradesh, Orissa, Punjab, Uttar Pradesh, etc., who are prepared to pay for their maintenance charges and another similar institution known as Indian Mental Hospital for the treatment of mental patients from Bihar, Orissa and West and East Bengal. A sanatorium has been established at Itki in the District of Ranchi for the treatment of tuberculosis. Another T.B. Sanatorium has been started by the R.K. Mission at Dungri in the District of Ranchi in which 10 beds—five free and five paying—have been reserved for the nominees of the State Government who has sanctioned suitable R. and N.R. grants for the sanatorium. An Anti-T.B. Demonstration centre has also been established at Patna. The question of the transfer of patients belonging to Pakistan undergoing treatment at the two Mental Hospitals at Ranchi was taken up by the Government of India and the exchange of mental patients between India and Pakistan took place at the Wagah border (Amritsar) on December 6, 1950. Still several non-Muslim patients belonging to Pakistan have been left at the Indian Mental Hospital, Ranchi. There is a Medical College at Patna with a large and well equipped hospital attached to it including an institute for radium treatment. There is a Medical College at Darbhanga which also has a large hospital attached to it. Centres for anti-rabic treatment have been opened at Patna and other suitable places in the State.

The State has a laboratory for the preparation of cholera-phage and bacterio-phage which are supplied to other State Governments for use in the prevention of epidemics.

PUBLIC HEALTH

The Public Health Department aims at the promotion of the well being and the health of the people by the prevention of epidemic diseases, improvement in sanitation, and the nutritional state of the people. All factors that have a bearing on health come within the purview of this department. The department is under the control of the Director of Public Health, Bihar. For purposes of efficient public health administration the State has been divided into three circles, known as North Bihar, South Bihar and

BOMBAY STATE

BOMBAY State stretches along the west coast of India, from Gujarat in the north to Kanara in the south. It has an area of 115,570 square miles and a population of 35,956,150* according to the census of 1951. These figures are inclusive of the area and population of the former Deccan States, the Gujarat States and Kolhapur and Baroda which have all merged with Bombay State. The density is 323.

The State embraces a wide diversity of soil, climate and people. In the State there are the rich plains of Gujarat, watered by the Narmada and the Tapti, whose fertility is so marked that it has long been known as the Garden of India. South of Bombay City the State is divided into two sections by the Western Ghats, a range of hills running parallel to the coast. Beyond the Ghats are the Deccan Districts; south of these come the Karnatak districts. On the sea side of the Ghats is the Konkan, a rice-growing tract, intercepted by creeks which make communication difficult.

The rainfall of the State is derived chiefly from the south-west monsoon between June and October. The amount of rainfall varies widely in different areas from 20" to about 250".

THE PEOPLE

The population varies as markedly as soil and climate. The people of Gujarat although softened by prosperity, are among the keenest trading races in the world. The Deccan peasant has been seasoned by adversity; the saying goes that the Deccan expects a famine one year in every three, and gets it. The population of the Deccan is much more homogeneous than that of Gujarat, thirty per cent. being Mahrattas. The Karnatak is the land of the Lingayets, a Hindu reforming sect of the twelfth century, and in the Konkan there is a large proportion of Christians. Three main languages are spoken. Gujarati, Marathi and Kannada with Hindi a rough *lingua franca*. Hindi in the Devanagari script is recognized by the Government as one of the regional languages of the State.

AGRICULTURE

The principal occupation is agriculture, which supports sixty-four per cent. of the population. In Gujarat the soils are of two classes, the black cotton soil, which yields the famous Broach cottons, the finest in India, and alluvial, which under careful cultivation in Ahmedabad and Kaira makes, splendid garden land. The dominant soil characteristic of the Deccan is black soil, which produces cotton, wheat, gram and millet, and in certain tracts rich crops of sugar-cane. The Konkan is a rice land, where the crop is grown under the abundant rains of the submontane regions, and in the south the Dharwar cotton vies with Broach as the best in India. There are no great perennial rivers suitable for irrigation, and the harvest is largely dependent upon the seasonal rainfall; supplemented by well irrigation. A chain of irrigation works, consisting of canals fed from great reservoirs in the region of unfailing rainfall in the Ghats, is gradually nearing completion, and this will ultimately make the Deccan immune to serious drought.

More than any other part of India, Bombay State is scourged by famine. The evils have not been unmixed, for tribulation has made the people more self-reliant, and the rise in the values of all produce, synchronising with a certain development of industry, has induced a considerable rise in the standard of living. The land is held on what is known as the ryotwari tenure, that is to say, each cultivator holds his land direct from the Government under a moderate assessment, and as long as he pays this assessment he cannot be dispossessed.

The area actually under cultivation is about 41 million acres of which 1 million acres bear more than one crop.

Details of the acreage under different crops for the total cropped area for 1948-49 are as shown below :—

Food Crops.	*Acreage* (Figures in thousands).
Jowari	8,447
Bajri	4,310
Rice	1,950
Wheat	1,434
Gram	663
Ragi	522
Maize	215
Other food-grains including pulses	3,170
Fruits and vegetables	236
Sugar-cane and other sugars	145
Miscellaneous	6

Non-Food Crops.	*Acreage* (Figures in thousands).
Cotton	1,631
Groundnut	1,807
Condiments and Spices	218
Tobacco	125
Sesame	140
Linseed	67
Coconut	25
Castor seed	41
Rape and Mustard	2
Other oilseeds	558
Fibres other than cotton	61
Drugs and Narcotics, other than tobacco	28
Miscellaneous	64
Fodder	912

FISHING

Bulk of the fish caught in the Bombay State is obtained from an area in the immediate proximity to the coastline. The frail, deckless fishing craft are, however, being gradually mechanised by installation of marine diesel engines. So far 20 such craft have been mechanised. Use of powered craft have enabled fishermen to range as far as 35 miles from the coast and to land larger catches, which have averaged twice, at times thrice, as much as those of sailing craft.

Pomfrets, mackerel, ghol, dara and Bombay ducks provide the greatest and most remunerative turnover to the fishermen of this State.

(For more details see under 'Fisheries').

LIVESTOCK

Information as available with regard to the number and classification of livestock in Bombay State for 1948-49 is as under :—

Bulls and Bullocks	4,361,604
Cows	2,825,604
Calves (young stock)	2,587,716
Male buffaloes	285,837
Cow buffaloes	1,819,605
Buffalo calves (young stock)	1,237,765
Sheep	2,598,817
Goats	3,486,548
Horses and Ponies	not available
Mules, Donkeys, Camels, etc.	do.

Per head of bulls and bullocks in the State there are 8.6 acres of net cultivated land and per head of cow buffaloes and cows in the State there are 7.1 persons.

The main burden of milk supplies falls on the buffalo.

Bombay is now an important forest State being next only to Madhya Pradesh and Madras. The total area under forest is 18,469 sq. miles or about 11.8 million acres.

BOMBAY MILK SCHEME

The problem of ensuring a cheap and adequate supply of milk to Bombay City has been tackled by formulating the "Bombay Milk Plan" and the Milk Commissioner is in charge of the establishment of the Model Milk Colony at Aarey, near Goregaon, about 22 miles to the north of the city. The first batch of cattle from the city was taken to the Colony in March 1949 and now there are 13,000 milch cattle there; all removed from the Bombay City stables.

The Milk Scheme is one of the important schemes launched by the Government for the benefit of a large section of the middle class and poor people and can rank among some of the largest undertakings in any part of the world. Under this Scheme good quality pasteurised milk is supplied in sealed bottles at reasonable cost, to over 6 lakh persons daily.

Large quantity of milk is also brought from Anand, which helps to supplement the supply at Bombay.

INDUSTRY

The State of Bombay is not only the leading State in commerce and trade but is industrially perhaps the most advanced State in India. Bombay State claims to have in all over 7,000 factories registered under the Factory Act, 1948. The textile, food and engineering industries form respectively 34, 22 and 17 per cent. of the above number.

Large scale industry is concentrated in large cities such as Bombay, Ahmedabad, Poona and Sholapur. Several important industries are carried on, on a cottage scale, all over the State. Chief among them are (1) Cotton, silk and woollen and handloom industry, (2) Industries connected with processing of hides and skins and manufacture of leather goods, (3) Industries connected with brass and copper and other metal ware, (4) Bamboo, rope and cordage, and (5) Artistic Products, etc.

The major items are textiles, soap, toilet and dress, wood, building, ceramics, metals, chemical products, food industries, hides and skins, furniture industries, edible oils, glass and glassware, leather goods, heavy and light engineering, industries connected with building materials, production and transmission of mechanical force, and construction of means of transport.

The State is also richly supplied with resources of hydro-electric power. There is considerable scope for developing production of electric energy in the State.

Besides electricity, gas, steam and oil are also used for generating power. The use of gas is confined to Bombay City. In the mofussil, oil and steam engines are generally used.

With the exception of building stones, salt, china clay and manganese ore, this State does not possess any minerals of commercial importance. There are three mines of bauxite which is important in the manufacture of aluminium.

The major port is Bombay; other ports of major and minor importance are Marmugoa (Portuguese territory), Broach, Surat, Bulsar on the Gujarat coast and Ratnagiri, Dabhol, Malwan, Vengurla and Honavar on the Konkan coast.

The following form the important items of export through and import to, the Bombay port.—

Export.	
Cotton.	Glass and Glassware.
Hides and Skins.	Instruments—Apparatus.
Twist and Yarn.	Spirits.
Oils, seeds.	Iron and Steel (including ore).
Myrabolans.	Kerosene.
Import.	
Chemicals and Chemical preparations.	Cotton (raw).
Drugs and Medicines.	Motor cars, motor cycles and motor wagons.
Aniline.	Hardware.
	Machinery.

* There is a slight variation in the figure under All-India census.

The total mileage of railway in the State is over 2,500 miles, which is a little less than 6 per cent. of the total mileage in India.

All over the State motor transport has made very rapid progress. The State Transport Corporation covers 24,500 miles.

Textile Industry

The textile industry is the most important industry of the State. Nearly 60 per cent of the total number of cotton textile mills in the Indian Union are situated in this State. The number of looms in 1949 in Greater Bombay was over 67,000 and in the rest of the State 66,000. The woollen mills in Bombay State generally produce woollen worsted piece-goods, woollen worsted yarn, knitting yarn and hosiery. The handlooms in the State generally produce coarse blankets, i.e., Kambalis.

All textile matters are dealt with by Government in the Civil Supplies Department and the State Textile Controller is the head of the department entrusted with the administration of textile control in the State.

The S.T.C. has his head office in Bombay and sub-offices at the other manufacturing centres of Ahmedabad and Sholapur.

Engineering Industries

Amongst the important Engineering and Metal Industries in the State are factories which produce ordinary and special steel. Production of special steel and mild steel can be taken up on a large scale only with the availability of hydro-electric power at reasonable rates.

There are few re-rolling mills, the capacity of which is estimated at about 60,000 tons a year. Several foundries have been established in the State and a few organised concerns in Bombay City specialise in structural engineering. A number of factories produce sheet and wrought scrap. Some of the factories making semi-finished and finished products such as utensils have a fairly large capacity.

Considerable progress has been made by two well organised concerns in Satara District in the manufacture of Diesel-oil engines, machine tools and agricultural implements. One big unit has been set up in Thana District for the manufacture of textile machine parts. Bombay has also made good progress in the manufacture of batteries, incandescent lamps, bicycles, steel safes, cabinets and other steel furniture. Large units have already been put up for assembling motor cars.

Chemical Industries

The Chemical Industries are fairly well developed in this State, there being variety in production ranging from commercial chemicals to fine chemicals. In fact so far as commercial chemicals are concerned Bombay State is perhaps the only State engaged in their manufacture. This is so possibly because the consuming industries mainly the Textile Industry which requires a variety of chemicals for dyeing, bleaching and printing is located in this State.

Bombay has an up-to-date plant for producing sulphuric acid, a heavy chemical most essential for the manufacture of various other commercial chemicals. The production is of the order of ten to twelve thousand tons per year.

Bombay and Ahmedabad being the main industrial centres for the textile industry a number of chemical concerns are concentrated at these places. In other places too the industry has been developed on modern lines mainly for supplying the local requirements.

Fine Chemicals such as are required in industries are made only on a moderate scale mainly at Bombay, Baroda and Barajadi near Ahmedabad.

Manufacture of salt from sea water by solar evaporation is another industry which exists at a number of centres in this State.

Industries depending upon the use of salt such as caustic soda, chlorine, soda ash, etc., have also been established.

Tanning and Leather

The State has a fairly large number of tanneries mostly located in the City of Bombay. The production is mostly half-tanned leather from goat and sheep skins and cow hides. Except 8 large tanneries where the chrome tanning process is used, the other tanneries adopt the vegetable tanning method.

The tanning and leather working industries are mostly carried on a cottage scale in the State. There is a large scope for the production of pit tanned leather, chromeuppers, glaze-kid and mock chamois. Production of hides is not sufficient to meet the demands of the tanners and cottage workers. Therefore, hides have to be imported from other States.

The quality of hides and skins tanned by village tanners is fast improving. A good number of Co-operative Tanners' Societies, organised and managed by village tanners have been started and the number is slowly increasing. This will ultimately increase the production and improve the quality of leather produced. The important tanning centres in this State are: Bombay City, Ahmedabad, Godhra, Sholapur, Ahmednagar and Hubli.

The following types of leather goods are manufactured :—Footwear; Travelling requisites and fancy leather goods; Leather goods requirements for Services, viz., Posts, Police, Railway and Defence, and Industrial leather goods for textile mills. There are no large-scale factories for the manufacture of footwear and other goods but the industry is carried on everywhere in the State on a cottage scale. There are also about 32 factories in the cities of Bombay and Ahmedabad manufacturing industrial leather goods such as pickers and buffers for textile and jute mills, leather belting, picking bands, washers, leather gloves for industrial purposes and various other mill and gin store items.

Other Industries

The glass industry has made considerable progress in this State during the last five or six years. Most of the requirements of other industries for glass containers have been met from indigenous production. In fact during the war some of the factories were engaged in supplying the requirements of the Defence Department, Railways, etc. They have supplied glass bottles in thousands to the pharmaceutical industry which is now fast becoming one of the leading industries of the State.

The production capacity of the hollow-ware is so large that the State may soon be in a position to export bottles, and other hollow-ware to other States.

There are a few firms of repute which have been manufacturing toilet and washing soaps the quality of which compares favourably with soap of foreign origin.

From the inedible oils paints have been manufactured in large quantities in the Bombay factories. The Industry has grown quickly during war-time and has supplied the requirements of P.W.D. and the Railways. Good quality varnishes have also been manufactured in fairly large quantities by utilising mainly the linseed oil available in the State.

Edible oils are also manufactured in Bombay State on a large scale. The industry received an impetus during war-time. Bombay is a surplus State in respect of vanaspati. The combined production of nearly a dozen units is over 60,000 tons per annum.

During war-time owing to the shortage of supply of pharmaceutical preparations a number of concerns undertook to produce a variety of medical preparations including vaccines, sulpha drugs, liver extracts, injections, etc.

The Rayon Industry has also been established in Bombay State. A large unit has recently been set up in Thana District for the manufacture of rayon, which has already started production.

A large factory in Bombay City manufactures rubber tyres and tubes of various kinds, the production being large enough to meet not only the requirements of the State but also of the country to a considerable extent. Several concerns manufacture rubber, rubber sole shoes, sole rubber products and latex articles.

There are 15 sugar mills in the State and a few more units are likely to be set up shortly. Most of the sugar factories are located in Ahmednagar District.

There are about ten important organised biscuit factories and an equal number of confectionery factories.

There are ten match factories in the State. The paper industry although established in the State over 50 years ago has not made sufficient progress. There are nearly a dozen factories and their production is confined mainly to paper and board.

COTTAGE INDUSTRIES

A post of the Joint Registrar of Industries, Co-operatives and Village Industries created to deal with the whole subject of cottage industries is continuing.

The important cottage industries which are carried on practically in every District of the State are, cotton textiles, tanning and leather working, mechanical engineering, metal work, carpentry, wood-work, bamboo and cane work, vegetable oils and pottery, etc.

Schemes for the development of sericulture and sericulture industries have been undertaken as there is scope for their development.

Eighteen cotton weaving peripatetic schools are maintained by the Department for the development of the handloom industry.

Eight institutions, viz., one wool weaving institute and 7 peripatetic wool weaving schools are maintained for the development of the cottage wool industry.

At the end of June 1950, there were 35 weavers' societies including societies of wool weavers with a membership of 47,704. The working capital of these societies was Rs. 61,64,823.

Eight Dyeing and Printing Demonstration (seven peripatetic and one stationary) are conducted by this Department to impart training in modern methods of dyeing and printing of yarn, silk and cloth.

The Dyeing and Printing Laboratory at Poona sanctioned by Government is in the process of organisation.

The number of co-operative societies so far organised for dyeing and printing is 6. Several weavers' societies and district industrial co-operative associations have also established their own dye houses.

Next in importance to the weaving industry is the tanning and leather working industry in this State.

14 tanning peripatetic schools and 8 leather working peripatetic schools are maintained by this Department.

The number of tanners and leather workers societies at the end of June 1950 was 143. Their membership was 3,800 and their working capital Rs. 9,08,891.

As a result of research an improved type of ghani called Nutan Ghani was designed. The cost of this ghani is less than that of the old Haskell ghani. A training class in Nutan Ghani covering a period of one month is conducted at the Village Industries Experimental Workshop, Poona.

The number of oilmen's societies was 39 at the end of June 1950. Their membership was 1,603 and their working capital was Rs. 3,35,462. The societies supplied their members with oil seeds valued at Rs. 11,19,629 during the year and assisted them in selling their oil. The value of the oil sold by the societies amounted to Rs. 4,84,448.

With a view to utilising the available coconut husk and develop the coir industry in Kanara District, one coir factory and 3 coir extraction and spinning institutions have been sanctioned out of which 3 coir extraction and spinning institutions have already started functioning in this district. In addition to this, 19 production centres in fibre, manufacture of agricultural and other household implements, flaying industry, etc. have been sanctioned by Government. Out of this, one centre in sann hemp industry has been organised in Ratnagiri District. The remaining centres are in the process of organisation.

Efforts are being made to organise workers in cottage industries such as bee-keeping, cane and bamboo work, carpentry and smithy, metal work, pottery, sandalwood carving, etc. on co-operative lines. The total number of industrial co-operatives other than weavers' societies at the end of June 1950 was 529 with a total membership of 30,528. The working capital of these societies was Rs. 65,04,875 and their turnover amounted to Rs. 98,29,107.

Industrial primaries have affiliated themselves with district industrial associations which supply them with raw materials, tools, etc. and which help them in the marketing of their finished products. District Industrial Co-operative Associations in their turn have joined the Provincial Industrial Co-operative Association which is the apex organisation of industrial co-operatives in the State.

At the end of 1950 there were 58 forest labourers' societies with a total membership of 6,920. 80 forest coupes were allotted to these societies, the upset price of the coupes being Rs. 9,63,821. The value of forest produce sold by these societies amounted to Rs. 17,93,583. The labour and transport charges paid by the societies during 1950 were Rs. 6,85,271 and Rs. 4,01,124 respectively. These societies are sponsored by social service organisations in the State.

Government has sanctioned organisation of 9 Rehabilitation Production Centres at 3 relief camps, *viz.*, Kalyan, Pimpri and Valivade for the purpose of providing training and work in various cottage industries to the displaced persons in the camps as an aid to their eventual rehabilitation.

Government of Bombay has appointed a Village Industries Committee a non-official body which prepares and executes schemes pertaining to cottage industries in the State. The schemes prepared and executed by the Committee aimed at making the village people self-sufficient in regard to their needs for food and clothing. The food schemes include bee-keeping, palm gur making, oil pressing, manufacture of salt, etc., while the schemes for clothing consist of khadi self-sufficiency work, carding, spinning and weaving of wool, etc.

The problem of ensuring a cheap and adequate supply of milk to Bombay City has been tackled by formulating the "Bombay Milk Plan" and the Milk Commissioner is in charge of the establishment of the Model Milk Colony at Aarey, near Goregaon, about 22 miles to the north of the city. The idea is to reorganise the milk supply of the city.

The Government have also launched allied schemes for adequate supply of milk, namely, (1) Cattle Colonisation Scheme at the Aarey village, (2) Anand-Bombay Milk Scheme and (3) the Government Toned Milk Dairy at Worli.

ADMINISTRATION

The State is divided into three Divisions (each comprising a group of Districts), *viz.*, the Northern, Central and the Southern. The way the Districts are grouped into Divisions is shown below:

Northern Division:—Ahmedabad; Kaira; Panch Mahals; Broach; Surat; Thana; Greater Bombay District; Banas Kantha; Sabar Kantha; Dangs; Baroda; Mehsana; Amreli.

Central Division:—East Khandesh; West Khandesh; Nasik; Ahmednagar; Poona; Satara North; Sholapur; Kolaba.

Southern Division:—Belgaum; Bijapur; Dharwar; Kanara; Ratnagiri; Kolhapur; Satara South.

In the legislative sphere Bombay has a bicameral legislature. One house is known as the Bombay Legislative Assembly and the other as the Bombay Legislative Council.

The headquarters of the Government are at Bombay. However, the Ministers with a skeleton staff move to Poona for the Poona session of the Legislature. The Secretariat always remains in Bombay.

Each District is under a Collector who has under him one or more Assistant Collectors, and or Deputy Collectors. A collectorate contains on an average from ten to twelve talukas, each consisting of from one to two hundred villages whose revenue belongs to the State. The village officers are the patil, who is the head of the village; the talati or kulkarni, clerk and accountant; the messenger and the watchman. Over each taluka or group of villages is the mamlatdar, who is also a subordinate magistrate. The charge for the Assistant or Deputy Collector contains three or four talukas. The Collector and Magistrate has jurisdiction over the whole District.

JUSTICE

The administration of justice is entrusted to the High Court sitting in Bombay, and comprising a Chief Justice, who is a barrister, and ten puisne judges, either Civilians, Barristers or Lawyers. The administrative side of the High Court is managed by the Registrar on the Appellate side and by the Prothonotary and Senior Master on the Original side. Of the lower civil courts, the court of the first instance is that of the Civil Judge recruited from the ranks of local lawyers. The Court of first appeal is that of the District or Assistant Judge, or of a civil judge (Senior Division) with special powers. District and Assistant Judges are Indian Civilians or members of the State Service or the Bar. The District Judge supervises the courts of the Assistant Judges and Civil Judges of both the Divisions. In cases exceeding Rs. 10,000 in value an appeal from the decision of the Civil or Assistant Judge and from the decision of the District Judge in all original suits lies to the High Court. District and Assistant Judges exercise criminal jurisdiction throughout the State but original criminal work is chiefly disposed of by the Executive District Officers and Resident and City Magistrates. Capital sentences are subject to confirmation by the High Court.

The Small Causes Courts are located at Bombay, Poona, Ahmedabad and Baroda. The Judges presiding over these Courts are invested with powers to try only civil suits the value of which does not exceed Rs. 2,000 in Bombay City and Rs. 1,000 in Poona, Ahmedabad and Baroda.

In some of the principal cities a group of 22 Special Magistrates exercise summary jurisdiction. In Greater Bombay, there are 23 Presidency Magistrates who try all criminal cases within the limits of Greater Bombay. The Chief Presidency Magistrate controls these courts and is assisted in his administrative duties by a Registrar who himself is an ex-officio Presidency Magistrate.

In the Greater Bombay area two new courts have been established from 16th August 1948, *viz.* the Bombay City Civil Court and the Sessions Court for Greater Bombay. The City Civil Court tries civil suits from the Greater Bombay area of value not exceeding Rs. 25,000 while the Sessions Court for Greater Bombay area cases arising from that area which were formerly tried by the High Court. Appeals from the decisions of those courts lie to the Bombay High Court.

The Criminal Courts in the District are, the Court of the District Magistrate, the Courts of the Sub-Divisional Magistrates, the Courts of the Resident and City Magistrates, and the Courts of First, Second and Third Class Magistrates. The District Magistrate supervises all the other Courts and is the highest Magisterial authority in a District. He also enjoys certain appellate powers. The other Magistrates are, except in the case of the Resident and City Magistrates, Revenue Officers and do the double role of a Revenue Officer and a Magistrate. They are invested with I, II or III Class powers according to standing and necessity.

The Honorary Presidency Magistrates, Honorary Magistrates and Justices of the Peace are Honorary officers who do mere attestation work. They have ceased to exercise their Magisterial powers now and do not try any cases.

The Inspector-General of Prisons is the head of the Jail Department. He is stationed at Poona.

There are five Central Prisons located at Yeravda (Poona), Ahmedabad, Belgaum, Nasik Road and Baroda and five District prisons at Dhulia, Thana, Bijapur, Kolhapur and Sangli.

The Arthur Road Prison, Bombay, the House of Correction, Bombay, and the Female Jail, Yeravda, are Special Prisons and are used more or less as District Prisons.

Every Taluka and Mahal headquarter town has a sub-jail.

There are Civil Jails for Civil prisoners and one Borstal School at Dharwar for adolescents detained under the Bombay Borstal Schools Act.

The Committee appointed to consider Jail reforms has submitted its report to Government and the recommendations have been accepted by Government and are being implemented.

LOCAL SELF-GOVERNMENT

Local control over certain branches of the administration is secured by the constitution of local boards and municipalities, the former exercising authority over a district and the latter over a city or town. These bodies are composed of members elected by the people, who are empowered to expend the funds at their disposal on education, sanitation, the construction of roads and tanks, and general improvement. Their funds are derived from cesses on the land revenue, the toll, ferry funds, local taxes and Government grants. Larger and larger grants are made from the general revenues for water-supply and drainage.

Grants are also paid by Government to Municipalities on account of dearness allowance and grants equal to 75 per cent of non-agricultural assessment and 15 per cent. of land revenue excluding non-agricultural assessment are also paid.

Municipalities in this State are governed by two Acts, *viz.*, the Bombay Municipal Boroughs Act, 1925 which governs about 33 of the larger Municipalities and the Bombay District Municipal Act, 1901 which governs about 205 smaller municipalities including the municipalities in the merged States areas.

The Bombay Municipal Boroughs Act of 1925 made a great advance in the matter of local Self-Government in the State. The larger municipalities are now styled as Municipal Boroughs. The executives of these Borough Municipalities are invested with larger powers than before. The basis of franchise for voting and electing councillors to local bodies has now been liberalised by passing the Bombay Local Authorities Adult Franchise and Removal of Reservation of Seats Act, 1950. The practice of reserving seats in the local bodies for Anglo-Indians, Muslims and Christians has also been abolished by the above-mentioned Act.

Cities like Ahmedabad and Poona have grown enormously during the last few years.

A Corporation for the city of Poona was established from 15th February 1950, in accordance with the Bombay Provincial Municipal Corporation Bill. To start with, the area of the Corporation was limited to the Poona City and the Poona Suburban Municipal boroughs. The Ahmedabad Borough Municipality was converted into a Corporation with effect from 1st July 1950.

In 1945, the Greater Bombay area comprising the city of Bombay and some surrounding suburbs was brought under uniform judicial and police administration by the Greater Bombay Laws and the Bombay High Court (Acceleration of Limits) Act, 1945.

District Local Boards in this State are governed by the Bombay District Local Boards Act, 1923 which governs the twenty-six District Local Boards. The Village Panchayats, which are the smallest unit of Local Self-Government in this State, are governed by the Bombay Village Panchayats Act, 1933 which governs about 4,000 village panchayats existing upto now.

Mention must be made here of the amendment of the Bombay Village Panchayat Act, 1938 by which each village panchayat is now entitled to a grant equal to 15 per cent. of the land revenue, or 25 per cent. of the local Fund cess whichever is greater provided the panchayat levies one or other of a list of special taxes. The power of the Nyaya Panchayats which dispense justice to villages have also recently been widened. It is hoped that in the next few years 5,000 self-sufficient and self-reliant village panchayats would come into being to play their proper role in the life of the nation.

The Government of Bombay with a view to nationalising passenger bus service in rural areas in this State by stages, started services in the Poona-Ahmednagar sector from 1st June 1948. The administration of the nationalised road transport services has been taken over by the State Government pending the revival of the stationary corporation by fresh legislation. The State has been divided into 14 Divisions for administrative convenience consistent with the homogeneity of traffic flow.

POLICE

The Police Force is divided into 3 categories, *viz.*, District Police, Railway Police and the Bombay City Police. The District and Railway Police in the State proper are for the purpose of control under the Inspector-General of Police who is assisted by three Deputy Inspectors-General, of whom two are in charge of Ranges and the third is in charge of the Criminal Investigation Department and the Finger Print Bureau. Each District has at least one District Superintendent of Police, who is in charge of the District and there are two Superintendents for Police forces on the Railways.

For purposes of effective supervision over the investigation and prevention of crime some of the larger districts are divided into one or more sub-divisions each under a Sub-Divisional Officer who is either an Assistant Superintendent of Police, or an Inspector of Police, or a Deputy Superintendent of Police. Sub-Inspectors are the officers in charge of Police Stations and are primarily responsible under the law, for the investigation of offences reported at the Police Stations. Officers appointed directly to the posts of Assistant Superintendents of Police, Deputy Superintendents of Police, Inspectors and Sub-Inspectors undergo a course of training at the Central Police Training School at Nasik before being posted to Districts for executive duty. The Office of the District Superintendent of Police is at the Headquarters of the District which is governed through the various Police Stations and Outposts. The Bombay City Police is a separate force under the Commissioner of Police who is administratively under the control of the Inspector-General of Police.

The Post-War Reconstruction Programme of the Police Department consisting of the construction of buildings for quarters for police officers and men, police stations and other buildings, is being given top priority by the Government.

The Criminal Investigation Department consists of two sections—Criminal and Intelligence. The former deals with detection of crime while the latter is concerned with Political and Labour questions, etc.

The Anti-Corruption Branch forms a part of the Criminal Investigation Department but works independently under the direct supervision of Honourable Minister but is generally under the control of the Inspector-General of Police. An Additional Assistant to the Inspector-General of Police is in charge of the Anti-Corruption Branch.

In order to make the State of Bombay as self-sufficient as possible in the matter of internal security during times of emergency, a special force known as State Reserve Constabulary is recruited. The strength of this force is 2,000 for Bombay City and 3,000 for the districts.

The Greater Bombay Police Force has got its own Anti-Corruption Branch and it is in charge of a Deputy Commissioner of Police for functions similar to those of the mofussil Anti-Corruption Branches. The Criminal Investigation Department of the Greater Bombay Police Force is in charge of a Deputy Commissioner of Police. As in the mofussil, this Department is also split up into branches dealing with investigation of crime and with political and labour surveillance, etc.

HOME GUARDS

A sort of voluntary auxiliary police force to help in the maintenance of law and order during difficult times has been formed in several places in Bombay State, particularly in the City of Bombay and in Ahmedabad. This force is popularly known as Home Guards. During the communal disturbances towards the end of 1946 and the early months of 1947 it was found that the normal strength of the police was not sufficient to cope with the situation, and to permanently enlarge the force would mean placing a heavy burden on the revenues of the province. The answer to the situation appeared to be the formation of a voluntary body who can be called upon to help the police in moments of grave disorder. Thus the Home or Civic Guards organization was formally constituted in November 1947 in Bombay with headquarters at Churchgate Reclamation, 'E' Road.

The Home Guards Ordinance was later on replaced by the Bombay Home Guards Act, 1947. The organisation was next extended to all the Districts of the State. The strength of the Home Guards in Greater Bombay is about 2,500.

The organisation consists of a Commandant-General in charge of the whole force in the State, a commandant, for each district and such other staff officers as the Commandant-General may consider necessary. The appointment of the Commandants is made by Government from among suitable public men and the posts are purely honorary carrying no remuneration. The Home Guards is a non-political and non-communal organisation. All members have, on enrolment, to sign a pledge to the effect that 'they will, well and truly, serve the Government without favour or affection, malice or ill-will or communal or political bias, and will assist to the best of their abilities in the maintenance of peace and prevention of crime against persons and property.'

Any person who is between the ages of 20 and 50 and who has studied upto the IV Standard in any of the regional languages is eligible for recruitment to the organisation.

Home Guards are trained in squad drill, lathi drill, use of arms, control of traffic, elementary law, mob fighting, unarmed combat and guard and escort drill. In addition to these, Home Guards are also trained in First-Aid and Fire Fighting. The Guards are encouraged to take up social work and lectures are arranged for those who show an aptitude for such type of work.

The Home Guards when called out on duty under Section 4 of the Bombay Home Guards Act, have the same powers, privileges and protection as an officer of police appointed under any Act for the time being in force. The functions of Home Guards mainly consist of guarding public buildings, patrolling for the prevention of crime and assisting the Police in their ordinary duties. Home Guards are issued with uniforms consisting of two khaki shirts, two trousers, two caps, one pair of shorts, ankle boots, anklets, etc. A women's section of Home Guards has been formed in various parts of the State, and a different type of uniform is prescribed for Women Home Guards.

Although the Home Guards Organisation is a purely voluntary body the members of it are paid a duty allowance of Rs. 2-8-0 per diem whenever they are called on duty under Section 4 of the Act. They are also given a conveyance allowance upto Rs. 5 p.m. for attending parades, etc. in big cities like Bombay, Ahmedabad and Poona, and return bus and rail fare in other places. Arrangements are made for washing of uniforms at Government cost.

The present strength of Home Guards in the State is about 16,230. Half of these have received training in foot and arms drill and in the use of all kinds of weapons such as rifles, sten guns, etc. More attention is paid to the quality of the men recruited and to thorough and efficient training than to the numerical strength of the organisation. A large number of men have been trained in the regulation of traffic, First-Aid and Fire Fighting.

The work hitherto done by the Prohibition Guards is now transferred to the Home Guards.

EDUCATION

Education is imparted partly through direct Government agency, and partly through the medium of grants-in-aid. Government maintain Arts Colleges at Bombay, Andheri, Ahmedabad, Kolhapur, Dharwar and Visnagar. Other Colleges and Institutions maintained by Government are the Institute of Science, Bombay, the Grant Medical College, Bombay, the Medical Colleges at Poona, Ahmedabad and Baroda, the Poona and Ahmedabad Colleges of Engineering, the Agriculture Colleges at Poona and Dharwar, Secondary Training Colleges at Bombay, Kolhapur and Belgaum, Veterinary College, J. J. School of Arts, Law College and Sydenham College of Commerce all in Bombay. Most of the secondary schools are in private hands. There are 92 Primary Training Colleges including Basic Training Colleges. The primary schools are maintained by Local Authorities, with a grant-in-aid. The Bombay Municipality is responsible for primary education in Bombay City.

The total number of institutions at the end of the year 1950-51 was 40,110. The total number of pupils in recognised intitutions was 4,160,162. The recognised institutions consisted of 66 Arts and Science Colleges including Departments of Universities and other Research Institutions, 49 Professional Colleges, 1,206 Secondary Schools, 28,554 Primary Schools and 9,746 Special Schools.

There is an Agricultural College at Anand which receives a grant-in-aid of Rs. 2,40,000 from Government. The College imparts training in the theory of Agriculture to about 200 students annually.

A Forestry College is being run at Dharwar for the training of Forest Rangers. A Foresters' Class is also being run at Bordi for training Foresters.

There are 35,733 towns and villages in this State of which 20,720 possessed Primary Schools; of the remaining villages, the requirements of 2,896 villages were served by schools in the neighbouring villages. The area served by a town or village with a primary school was 4.0 square miles.

Altogether there were 4,177,723 pupils under instruction at the end of the year 1950-51. The percentage of pupils in recognised institutions to the total population of the State was 11·6.

The total expenditure on public institutions in 1950-51 was Rs. 21,63 lakhs. Out of this amount 58 per cent was met from State Revenues, 8.7 per cent from Local Funds, 22.5 per cent from fees and 10.8 per cent from other sources.

The Education Department is administered by a Director, with an Inspector and two assistant Inspectors in each of the 6 Divisions and a Deputy Inspector in each district. Technical education is administered by a Director of Technical Education with Inspectors to assist him.

Higher education in the State is controlled by the Bombay University which was established in 1857 and by other Regional Universities, *viz.*, Poona University ; Gujarat University, Ahmedabad ; Karnatak University, Dharwar ; M.S. University, Baroda and the S. N. D. T. Women's University, Bombay.

MEDICAL

The Surgeon-General is the head of the Medical organization which is essentially a hospital organization designed to render medical relief to the general population with ancillary specialist sections providing for medical relief, medical education, laboratory assistance and research. The medical organization which is the framework of the scheme is based on the district, as the primary unit excluding Bombay City and Suburbs. There is at every district headquarters a hospital styled the 'Civil Hospital' which is owned, staffed, financed and controlled by Government. The Civil Hospital is in charge of a Civil Surgeon or a District Medical Officer and is the centre of the official organization of medical relief and caters to the needs of the population of the whole district. Subsidiary to it, are some Government cottage hospitals and State-aided dispensaries which are scattered throughout the districts. The total number of hospitals and dispensaries in Bombay State is 467 rural and 317 urban.

Government is particularly anxious to promote medical relief in rural areas. In all 372 centres of Subsidised Medical Practitioners have been opened and more and more centres are started as and when the requisite medical personnel becomes available.

Government has opened a T.B. Hospital at Aundh which is provided with about 125 beds.

Formerly there was only one Government Medical College in this State. With the up-grading of the two Government Medical Schools at Ahmedabad and Poona which formerly prepared students for a Licentiate Diploma into full-fledged colleges, preparing students for the M.B.B.S. and post-graduate medical degrees of the University, and with the addition of the Medical College at Baroda, there are now four Government medical colleges—admitting in all 260 students every year. There are six Government Mental Hospitals and six Government Leprosy Hospitals in Bombay State.

Provision also exists for the training of nurses. There are Schools for the training of nurses at most of the Government Hospitals.

Under the Medical Department is also the Haffkine Institute which is the main centre for medical research and of essential biological products in this State. The Institute has very well equipped departments for anti-toxins, sera and chemotherapy and also well-organised sections for the manufacture of vitamin tablets and solutions for intravenous use, such as Casein Hydrolysate and glucose saline. It also provides for anti-rabic treatment, and clinical pathological service, and serves as the principal laboratory for testing drugs.

The Government of Bombay issued the Bombay Drugs Control Order in 1949 under which the maximum retail selling prices of essential drugs have been fixed. Amendments to the Schedule to the Order containing the names of the essential drugs and their maximum retail selling prices have been issued from time to time by Government. The Bombay Penicillin Control Order was issued in May 1950 and Government has under the provisions of the Order taken over the distribution and sale of Penicillin. This has resulted in Penicillin being freely available and at cheap rates.

The provisions of the Drugs Act, 1940 and the Rules framed thereunder are also enforced in this State with the help of a separate organization sanctioned by Government.

PUBLIC HEALTH, WORKS

The Public Health Department is under the Director of Public Health. For purposes of administration, the State is divided into 3 Registration Districts, comprised of 9 to 10 revenue districts. Each Registration District is under the charge of an Assistant Director of Public Health. In addition to the three regional Assistant Directors of Public Health, there are four functional Assistant Directors of Public Health, *viz.*, one each for Malaria, Plague, Public Health, Laboratory and Vaccine Institute. There are District Health Officers and subordinate staff under them for most of the revenue districts.

The Public Health Department is mainly concerned with taking adequate measures for safeguarding the health of the people of this State. To achieve this object, Subsidised Medical Practitioners are trained in sanitary and public health work ; facilities have been provided for training more Sanitary Inspectors. Mobile Hospital Units and Hygiene Units are maintained for facilitating measures needed to fight epidemics like Cholera, Plague, Smallpox, etc. ; combined Medical and Public Health Units have been opened in selected talukas to serve the needs of rural areas for providing maternity services and medical aid. Public Health Propaganda is also carried out by the P.H.D. staff through the medium of silent and talkie films, publicity vans, etc.

Scheme for malaria control has been sanctioned for the districts of West Khandesh, Panch Mahals, Dangs, Bijapur and Kaira. The scheme has also been extended to Sawantwadi town as well as to rural areas in Sawantwadi talukas and Kudal Mahal in Ratnagiri District.

The anti-malaria measures which were in operation in the District and Municipal areas in the former Baroda State before its merger have been continued by paying grants to local bodies concerned on the same basis.

The malaria control scheme by means of D.D.T. residual spraying, sanctioned for Kanara District, covered villages with a population of 100 and over. Though the scheme covered 70 per cent of the population which live in larger villages, about 30 per cent of the population staying in about 570 smaller villages with a total population of 50,000 in them were not receiving the benefit of the scheme. The scheme has, therefore, been extended to the smaller villages by combining the public health and malaria measures in the District for the purpose of serving all the villages in the district.

The P.W.D. is under the control of an I.C.S. Secretary to Government who is assisted by a Chief Engineer, a Deputy Chief Engineer and a Chief Engineer for Electric Grid. Under them there are Superintending Engineers and Executive Engineers who are in charge of Circles and Divisions respectively. The Secretary to Government, the Chief Engineer and the Deputy Chief Engineer have also the following officers under them : the Electrical Engineer to Government, the Public Health Engineer to Government and the Architect to Government.

There is a chain of protective irrigation works originating in reservoirs in the Ghat regions. The principal works are the Nira Canals fed by Lake Whiting impounded by the Lloyd Dam at Bhatgar, the Pravara Canals fed by Lake Arthur Hill, impounded by Wilson Dam at Bhandardara, the Mutha canals fed by Lake Fife at Khadakvasla, the Godavari Canals fed by Lake Beale at Darna, the Girna Canal fed by Chankapur and the Gokak Canal fed by the Dupdhal Lake.

The Mutha Canals and the Gokak Canal were completed in 1896-97, the Nira Left Bank Canal in 1905-06, the Godavari Canals in 1915-16, and the Pravara Canals in 1926-27. The Nira Right Bank Canal was completed in 1937-38 and the Girna Canal in 1909-10. The Wilson Dam at Bhandardara, the second highest yet constructed by engineers the world over, was opened in 1926. The Lloyd Dam at Bhatgar which is 5,333 feet in length, 190 feet in height and 124 feet in width was opened in 1928. It cost Rs. 172 lakhs. It is remarkable as being the largest Dam in volume hitherto constructed and contains 21½ million cubic feet of masonry. The Assuan Dam in Egypt is popularly supposed to be the largest Dam in existence but it contains only 19 million cubic feet. It cost also nearly 50 per cent. more than the Lloyd Dam. An idea of the magnitude of the Lloyd Dam can be gathered from the fact that if a wall 6 feet high and 15 inches thick were constructed from the masonry in the Dam it would stretch to a distance of 520 miles, say from Bombay to Nagpur. These projects irrigate certain tracts most liable to famine.

A number of major irrigation projects are at different stages of construction, investigation and preparation. The projects that have been taken up for execution are mentioned below :—

The Meshwa Canal Project estimated to cost Rs. 50 lakhs and irrigate 18,000 acres in Kaira District has been completed. It is likely to produce an amount of 3,600 tons of additional food grains.

The Gangapur Storage Project on the Godavari River estimated to cost Rs. 470 lakhs will store 5,500 million cubic feet of water and will irrigate nearly 50,000 acres of land in Nasik District. The Project is expected to produce 6,000 tons of food grains.

The Ghataprabha Left Bank Canal Scheme (Stage I) is estimated to cost Rs. 545 lakhs and irrigate 1,25,000 acres in Belgaum and Bijapur Districts. It is expected to produce about 25,000 tons of food.

The Mahi Canal Project (Stage I) is estimated to cost Rs. 425 lakhs and will irrigate an area of 1,05,000 acres in Kaira District including parts of former Baroda and Cambay States. Preliminary work such as land acquisition, construction of staff quarters and approach roads and alignment of canals has been started. The work when completed, is likely to produce about 21,000 tons of food crops.

The most important of all these works is the Kakrapar Project (Stage I of the Tapi Valley Project) which is undertaken by the Government of India on behalf of the Bombay Government. Work has been started on the project which is estimated to cost Rs. 626 lakhs and will irrigate nearly 600,000 acres of land in Surat District. Full development of the project will be reached in 1957 when the additional food grains that will be produced is likely to be 120,000 tons.

SELF-SUFFICIENCY IN FOOD

The Bombay State had an obligation assigned to it by the Government of India in the matter of making the country self-sufficient in food by the end of 1951-52 crop year. The Central plan of achieving self-sufficiency in food did not envisage the making of each individual State self-sufficient, but it allocated the overall deficit between the various States and the share allocated to Bombay was 3 lakh tons. The attempt to fulfil this obligation may be summarised as follows : the additional production in 1947-48 was one lakh tons. It rose to 1,10,000 tons in 1948-49. Though results for 1950-51 had not yet been assessed, it is estimated that the additional production would be 1,81,000 tons. The target for 1951-52 is 3 lakh tons. However, it has now been reduced to 2·55 lakh tons as a result of failure to achieve the target of production under the scheme for the multiplication of Akola bajri due to adverse seasonal condition and the discontinuance of subsidy for distribution of manure mixture.

A large number of schemes have been put into operation under the Grow More Food campaign. They could be classified roughly into four groups. The first group consists of schemes for increasing the area under cultivation, improving natural fertility and moisture-conserving capacity of the soil by soil conservation measures and eradication of deep-rooted weeds, which reduce productivity by deep ploughing with tractors. The total result of the implementation of the schemes in this group could be estimated at 37,000 tons of additional food grains.

In the second group fall the various schemes for increasing the area under irrigation. The irrigation schemes would add another 37,000 tons to the food production by 1951-52.

The third group consists of schemes designed to increase the use of manures. The estimates for extra food obtainable in this way are 68,000 tons. The last and most important group consists of schemes for the multiplication and distribution of seeds of improved varieties of crops. Improved seed gives, on an average, 10 per cent. more yield and the net result of the implementation of these schemes would be 1,13,000 tons of additional food grains by 1951-52.

In some areas, the cultivable waste land is covered with jungles and is not habited. Such areas have to be colonised. The Government has undertaken such colonisation schemes in Kanara, Ratnagiri, Banas Kantha, and Baroda districts covering a total area of 18,000 acres.

So far, about 5,93,000 acres of waste land have been brought under cultivation out of which about 50,000 acres have been disposed of permanently, about 5,40,000 acres disposed of temporarily, *i.e.*, on eksali basis and about 3,000 acres of private waste lands taken over under the B.T. and A.L. Act and leased out to cultivators.

Soil conservation measures consist of bunding, trenching, gully plugging, strip cropping, etc. So far, over 7,50,000 acres have been usefully bunded by the Department of Agriculture. Eight lakh acres have been surveyed for undertaking new bunding works. Under the scheme for survey and classification of cultivable waste lands, an area of about 5,94,276 acres was inspected, out of which 2,24,562 acres were found to be fit for cultivation.

At present, the Government has 256 tractors as ancillary equipment. In 1947-48, 44,325 acres were ploughed, 3,136 acres were harrowed and grading work was done for 986 hours. In 1948-49, 66,770 acres were ploughed, 6,341 acres were harrowed and grading was done for 3,184 hours. In 1949-50, 70,383 acres were ploughed, 10,933 acres were harrowed and grading was done for 17,644 hours. Up to February 1950, 25,100 acres were ploughed, 3,272 acres were harrowed and grading work was done for 14,794 hours.

In regard to irrigation so far about 13,160 wells have been newly constructed and 7,055 wells have been repaired. These 20,215 wells are estimated to have brought at least 67,000 acres under irrigation.

At present about 2,100 katcha bandharas are built every year irrigating about 23,000 acres of land. During the last three years, 42 pucca bandharas and tanks have been undertaken at a cost of about rupees one crore ; they are nearly complete and will bring under irrigation about 44,000 acres. A loan of a crore of rupees has been taken from the Government of India for repairing and constructing minor irrigation works during the next two years. In addition to this, the Government has undertaken the construction of 16 pumping stations on rivers. Fifteen of these works have been completed. About 26,000 acres have already been brought under command.

The Government is operating 54 boring machines in the State. So far they have bored 700 wells. To sum up, about 1,64,000 acres have already been brought under irrigation.

In the field of manures the digging of compost pits is encouraged. So far, cultivators have dug about 4,85,000 pits with the aid of Government subsidy. 1,53,000 tons of groundnut cake and 85,000 tons of mixed manure have been distributed at subsidised prices. In 1950-51 over 29,000 tons of sulphate of ammonia was distributed.

As regards improved seeds, in 1950-51 about two lakh maunds of seed were distributed to cover an area of about 43 lakh acres.

In 1948, the State started observing the Tree Planting Days and Weeks. In that year eight lakh trees were planted. In 1949-50 and 1950-51, 18 lakh trees and 34 lakh trees respectively were planted.

The policy of full fledged controls which was reintroduced in 1948-49 was continued during the year 1951-52.

LABOUR WELFARE

Apart from legislation and other State activities to improve the lot of workers, the Government of Bombay has been alive to the importance of workers' welfare both inside and outside the factory premises. A number of schemes for the improvement of living conditions, educational opportunities, etc. have been drawn up.

A network of 54 labour welfare centres with recreational and instructional facilities for workers and their families spread over the whole State providing among others, entertainment by visual aid, exhibitions, dramas, music, indoor and outdoor games, and instruction on accident prevention, first aid and hygiene and anti-drink propaganda.

On the educational side, the programme drawn up is a comprehensive one including (1) general education, (2) special education and (3) technical education. 25,000 workers have been made literate so far under the Scheme of Literacy among workers. For giving training in weaving, chemicals and leather goods manufacturing a workshop is being started soon at Ahmedabad. A similar workshop providing facilities for training in smithy, fitting, carpentry, spray-painting is being set up in Bombay.

Between 1947 and the end of March 1951 Government have constructed about 1,547 tenements at a total cost of about Rs. 117 lakhs to provide accommodation to purely industrial workers and 5,313 tenements for other low-income group people at a cost of Rs. 251 lakhs in the industrial centres of this State, *viz.*, Bombay, Ahmedabad, Sholapur and Hubli.

In addition to providing housing facilities to industrial workers and low-income groups, Government has also encouraged co-operative Housing Societies to undertake building activity for the middle classes, by grant of aid in the matter of lands and for loans.

RELIEF & REHABILITATION OF DISPLACED PERSONS

Government had to solve the problem of rehabilitating about two lakhs of displaced persons from Pakistan, who sought shelter and were reaccommodated in 23 Relief Camps opened by Government in various parts of the State. Shelter is the primary need of the displaced and Government have naturally given it the first priority in their scheme of rehabilitation. The housing problem is being handled in two ways, *viz.*, by the construction of new townships and colonies, etc., and by the grant of financial assistance for the construction of private buildings. Townships and colonies are in process of being set up at Kalyan (Ulhasnagar Township), Ahmedabad (Sardarnagar Township), Chembur and Mulund near Bombay, Pimpri near Poona, Valivade near Kolhapur and Waroshia near Baroda. The total expenditure envisaged so far on the entire construction programme is about Rs. 15 crores.

The agricultural colonisation schemes sanctioned so far envisage settlement of over 1,500 displaced families on land. Other forms of rehabilitation assistance are the grant of business and industrial loans, provision of shops, stalls and hawking facilities, reservation of posts in Government and semi-Government service, promotion of co-operative enterprise, assistance for secondary and college education, and the opening of special Homes for unattached destitutes.

From the number of persons who have received loans or secured employment and the large number who live outside on their own, it can be assumed that nearly 50 per cent. of the displaced persons in this State have secured economic security in some form or other.

BUDGET 1952-53*

Estimated Revenue for 1952-53—(in thousands of Rupees).

	PRINCIPAL HEADS OF REVENUE.	Rs.
IV	Taxes on Income other than Corporation tax	10,60,08
VII	Land Revenue.. ..	6,30,49
VIII	State Excise	1,07,19
IX	Stamps	4,36,22
X	Forest	3,51,90
XI	Registration	31,91
XII	Receipts under Motor Vehicles Acts ..	1,48,85
XIII	Other Taxes and Duties	19,03,30
	Total ..	46,69,94
	Civil Administration.	Rs.
XXI	Administration of Justice	91,78

	Closing balance ..	—3,09,73
	Grand Total ..	3,95,83,03

* Was due to take charge as Commissioner of the Bombay Corporation in September.

It may be mentioned here that a second five-year post-war Development Plan for Bombay State at an estimated cost of Rs. 150 crores and drawn up by Government has been approved by the National Planning Commission. The programme was a continuation and consolidation of a Rs. 75 crores first five-year plan launched in 1946-47. The new plan would be for the period of 1951-52 to 1956-57.

The total outlay on the second five-year plan was twice that of the first because of the merger of the areas of the old Princely States and the adoption of several essential schemes like the expansion of the Chola Power House and the Tapi Irrigation Works. About 15 to 20 per cent. of the total cost on the plan would be utilised for the development of merged territories.

ADMINISTRATIVE PERSONNEL

Governor

His Excellency Girja Shankar Bajpai.

Personal Staff.

Secretary to H.E. the Governor—S. B. Kulkarni.
Comptroller of the Household of H.E. the Governor—Major C. Mohan Lal, A.S.C.
Hon. Surgeon—Dr. S. B. Cooper, F.R.C.S. (England).
Aides-de-Camp—Capt. K. Srinivasan; P. K. Chaubal.

Council of Ministers

Chief Minister, Home, Political and Services, Morarji Desai.
Revenue, Agriculture, Forests, B. S. Hiray.
Education, Law, Dinkarrao Desai.
Finance, Prohibition, Industries, Dr. Jivraj N. Mehta.
Local Self-Govt. and Co-operation, M. P. Patil.
Public Works, M. M. Naik-Nimbalkar.
Rehabilitation, Fisheries, Backward Classes, G. D. Tapase.
Labour, Public Health, Shantilal Shah.
Civil Supplies, Y. B. Chavan.

DEPUTY MINISTERS

Education, Indumati Chimanlal.
Public Works, Babubhai J. Patel.
Backward Classes, D. N. Wandrekar.
Agriculture, Forests, K. F. Patil.
Public Health, B. D. Jatti.
Local Self-Govt., Co-operation, B. D. Deshmukh.
Prohibition, Dr. T. R. Naravane.
Revenue, M. G. Fakhi.
Civil Supplies, V. K. Sathe.

SECRETARIES TO GOVERNMENT

Chief Secretary, Political and Services Department.—M. D. Bhansali, I.C.S.
Home Department.—D. S. Joshi, I.C.S. (Act.)
Revenue Department.—D. S. Bakhale, I.C.S.
Public Health & Local Self-Govt. Dept.—B. A. Bambavale, I.C.S.
Education Department.—P. R. Nayak, I.C.S.*
Finance Department.—V. T. Dehejia, I.C.S.
Legal Department.—P. M. Lad, I.C.S.
Public Works Department.—G. V. Bedekar, I.C.S.
Labour and Housing Department.—N. K. Dravid, I.C.S.
Civil Supplies Department.—A. L. Dias, I.C.S.
Development Department.—K. L. Punjabi, I.C.S.
Agriculture and Forests Department.—D. N. Mahta.
Rehabilitation Department.—U. M. Mirchandani.
Legislature Deptt. Secretary.—S. K. Sheode.

PUBLIC SERVICES COMMISSION FOR THE STATE OF BOMBAY.

Chairman.—Dr. K. B. Bharucha.
Members.—M. S. Patil, R. N. Welinkar, R. B. Ghorpade.
Secretary.—B. J. Israel.

MISCELLANEOUS APPOINTMENTS

Commissioner of Income-Tax.—V. V. Chari.
Director of Veterinary Services.—L. Sahai.
Advocate-General.—M. P. Amin.
Inspector-General of Police.—N. M. Kamte.
Director of Education.—D. C. Pavate.
Surgeon-General.—Dr. R. B. Dixit, M.B., B.S., D.P.H. (Cal.), M.R.C.P. (Edin.), PH.D. (Edin.).
Oriental Translator.—J. H. Dave, M.A.
Chief Conservator of Forests.—G. S. Singh, M.A. (Oxon.).
Inspector-General of Registration and Director of Land Records and Settlement Commissioner.—V. A. Athani.
Director of Agricultural Engineering.—D. A. Gadkary.
Director of Civil Supplies.—R. N. Samarth.
Director of Agriculture.—Dr. B. N. Uppol.
Registrar of Co-operative Societies.—P. J. Chinmulgund, I.C.S.
Municipal Commissioner, Greater Bombay.—B. K. Patel, I.C.S.
Municipal Commissioner, Poona.—L. M. Nadkarni, I.C.S.
Vice-Chancellor, Bombay University.—N. J. Wadia.
Vice-Chancellor, Poona University.—Rt. Hon. Dr. M. R. Jaykar.
Vice-Chancellor, Karnatak University.—C. C. Hulkoti.
Vice-Chancellor, Gujarat University.—H. V. Diwatia.
Vice-Chancellor, Baroda University.—Shrimati Hansaben Mehta.
Vice-Chancellor, S.N.D.T. U.W. University.—K. M. Zaveri.
Registrar, Bombay University.—S. R. Dongerkery.
Commissioner of Police, Bombay.—M. M. Chudasama, I.P.
Director of Public Health.—E. Benjamin, M.B., B.S.
Accountant-General.—V. N. Adavi.
Inspector-General of Prisons.—T. S. Vyas, B.A. (Cantab.), Bar-at-Law.
Director of Excise and Prohibition.—V. L. Gidwani, I.C.S.
Consulting Surgeon to Government.—G. J. Desai, B.E., F.R.I.C.S., M.T.P.I. (London).
Director of Publicity.—M. H. Shah.
Commissioner of Labour.—P. N. Damry, I.A.S.
Sheriff.—R. A. Podar.

GOVERNORS OF BOMBAY

Baron Northcote, C.B.		1900
Sir James Monteath, K.C.S.I. (*Acting*) ..		1903
Baron Lamington, G.C.M.G., G.C.I.E. ..		1903
J. W. P. Muir-Mackenzie, C.S.I. (*Acting*).		1907
Sir George Sydenham Clarke, G.C.M.G., G.C.I.E. (*a*).		1907
Baron Willingdon, G.C.I.E.		1913
Sir George Ambrose Lloyd, G.C.I.E., D.S.O. (*b*).		1918
Sir Leslie Orme Wilson, P.C., G.C.I.E., C.M.G., D.S.O.		1923
Sir Henry Staveley Lawrence, K.C.S.I., I.C.S., acted for two months and twenty-two days for Sir Leslie Wilson.		
Sir Frederick Hugh Sykes, P.C., G.C.I.E., G.B.E., K.C.B., C.M.G.		1928
Sir Ernest Hotson, K.C.S.I., O.B.E., I.C.S., acted for six months for Sir F. H. Sykes.		
The Rt. Hon. Michael Herbert Rudolf Knatchbull, Lord Brabourne, G.C.I.E., M.C.		1933
(*a*) Afterwards (by creation) Baron Sydenham.		
(*b*) Afterwards (by creation) Baron Lloyd.		
Sir Robert Bell, K.C.S.I., C.I.E., I.C.S., acted for four months for Lord Brabourne.		
Sir Lawrence Roger Lumley, G.C.I.E., T.D.		1937
Sir John Colville, G.C.I.E., T.D.		1943
Sir Andrew Clow, K.C.S.I., C.I.E., I.C.S., acted for 3 months for Sir John Colville.		
Sir Vepa Ramamurthi acted for Sir John Colville, 19th May 1947—2nd June ..		1947
Raja Maharaj Singh		1947

1951 CENSUS

The population totals compiled as a result of the 1951 Census operations show that the population of Bombay State is now 35,956,150. This means an average density of 323 persons per square mile and represents an increase of 23·23 per cent over the population in 1941.

The population of the City of Greater Bombay is 2,839,270. The 1941 figure for Bombay City was 1,489,883, while the population of Bombay Suburban district in 1941 was 205,285. The population of these two areas which today comprise the limits of Greater Bombay has risen in 1951 to 2,329,020 and 510,250 respectively, making a total population of 2,839,270. This means an increase of 67·49 per cent in the past ten years.

The total number of displaced persons in Greater Bombay is 83,964 comprising 44,947 males and 39,017 females. The total number of displaced persons in the State of Bombay is 338,096, comprising 179,770 males and 158,326 females.

Practically every district in Bombay State has recorded a population increase. The boundaries of most districts have changed since 1941, due to the merger of State areas, and territorial changes made for administrative convenience. The 1951 population figures are shown below by districts:

District	Males	Females	Total
Greater Bombay	1,779,259	1,060,011	2,839,270
Banaskantha	384,082	364,714	748,796
Sabarkantha	346,774	337,243	684,017
Mehsana	738,528	733,134	1,471,662
Ahmedabad	911,869	773,761	1,685,630
Kaira	843,250	769,176	1,612,426
Panch Mahals	593,521	554,911	1,148,432
Baroda	624,359	570,387	1,194,746
Broach	363,145	342,890	706,035
Surat	918,277	909,565	1,827,842
Amreli	160,974	156,229	317,203
West Khandesh	581,140	564,884	1,146,024
East Khandesh	746,452	724,899	1,471,351
Dangs	25,196	22,086	47,282
Nasik	730,927	698,989	1,429,916
Ahmednagar	715,763	695,110	1,410,873
Poona	1,006,201	944,775	1,950,976
Satara North	572,967	602,342	1,175,309
Satara South	508,240	491,901	1,000,141
Kolhapur	623,421	604,126	1,227,547
Sholapur	773,809	731,507	1,505,316
Belgaum	882,278	844,030	1,726,908
Bijapur	705,526	690,659	1,396,185
Dharwar	804,476	770,910	1,575,386
Thana	796,007	722,043	1,518,050
Kolaba	445,580	463,503	909,083
Ratnagiri	769,635	942,329	1,711,964
Kanara	263,206	254,574	517,780
Total	18,614,862	17,341,288	35,956,150

The population of the areas which today form the State of Bombay was about 29,178,512 in 1941. The population would appear to have increased by 23·23 per cent in the past ten years. Excluding displaced persons the population has increased by 22·07 per cent. While increase of population has characterised almost every decade in Bombay State since 1900, the increase has varied from dfeade to decade. The influenza epidemic after the first world war took a heavy toll. The percentage increase or decrease of population in Bombay State was +5·23 per cent from 1901 to 1911, +0·12 per cent from 1911-1921, +12·93 per cent from 1921 to 1931 and +15·60 per cent from 1931-1941.

In Bombay State as a whole there are 932 females for every 1,000 males. In 1941 the proportion was 935 females to every 1,000 males. The difference is accentuated in the big population centres. In Greater Bombay for instance, there are 1,779,259 males but only 1,060,011 females. This is primarily due to migration of male workers to Bombay City without their families.

This phenomenon finds its counterpart in the excess of females found in certain districts of the State. These districts are Ratnagiri, Satara North and Kolaba, where emigration of a section of the male population has left a preponderance of females in the districts. The same phenomenon was found in 1941 in the same districts.

The major cities of Bombay State are Bombay, Ahmedabad, Poona, Sholapur, Surat, Baroda and Hubli. All these cities have recorded increases of population. The 1941 and 1951 figures of population are given for comparison below:

City	Population		Percentage increase
	1941	1951	
Greater Bombay	1,695,168	2,839,270	67·49
Ahmedabad	591,267	788,333	33·33
Poona	278,165	480,982	72·91
Sholapur	212,620	277,087	30·32
Surat	171,443	223,182	30·18
Baroda	153,301	211,407	37·90
Kolhapur	93,032	136,835	47·08
Hubli	95,512	129,609	35·70

Here are a few more particulars:

Urban, 11,170,340, *i.e.* 31.07 per cent, an increase of 39.86 per cent since 1941; Agricultural classes 61.46 per cent, non-Agricultural 38.54 per cent; Of the non-Agricultural production other than cultivation 13.76 per cent, commerce 7.61 per cent, transport 2.23 per cent and other services 14.94 per cent; Of the total population self-supporting 27.24 per cent, non-earning dependents 57.19 per cent, earning dependents 15.57 per cent; Hindus form 88.40 per cent of the total, Muslims 8.09, Jains 1.59, Christians 1.46, Zoroastrians 0.27, Sikhs 0.10, Jews 0.06, Others 0.03; Scheduled Castes form 8.35 per cent of the total, Scheduled Tribes 9.34 per cent, backward classes 12.49 per cent; Marathi speaking 44.07 per cent, Gujarati 31.74, Kannada 12.11, Urdu 5.33, Konkani 0.87; For Greater Bombay the percentages are Marathi 43.56, Gujarati 18.42, Urdu 9.93, Hindi 7.44, Konkani 4.58, Telugu 2.75, Sindhi 2.35, Tamil 2.09, Kannada 1.83, Kachchi 1.51, English 1.25, Punjabi 1.11, Malayalam 1.11, Rajasthani 0.56; Literacy 24.56 per cent, among males 34.86, among females 12.56; Percentage of literacy among population above the age of 10 is 30.32; Literacy in the urban area 40.61, in the rural area 16.86.

BOMBAY LEGISLATIVE COUNCIL.

(For list of members see under General Elections).

BOMBAY LEGISLATIVE ASSEMBLY

(For list of members see under General Elections)

MADHYA PRADESH

THE Madhya Pradesh composes a great triangle of country midway between Bombay and Bengal. Its area is 130,323 sq. miles. The total population is 21,327,898.

With the taking over of the Makrai State (Hoshangabad) and the 14 Chhattisgarh States the area of the State increased by 31,698 sq. miles, the population by about 4 million and the revenue by about 1½ crores.

THE COUNTRY

The State may roughly be divided into three tracts of upland, with two intervening ones of plain country. In the north-west, the Vindhya plateau is broken country, covered with poor and stunted forest. Below its precipitous southern slopes stretches the rich wheat growing country of the Nerbudda valley. Then comes the high Satpura plateau, characterised by forest-covered hills and deep water-cut ravines. Its hills decline into the Nagpur plain, whose broad stretches of "deep" black cotton soil make it one of the most important cotton tracts of India and the wealthiest part of the State proper. The Eastern half of the plain lies in the valley of the Wainganga and is mainly a rice growing country. Its numerous irrigation tanks have given it the name of the "lake country" of Nagpur. Farther east is the far-reaching rice country of Chhattisgarh, in the Mahanadi basin. The south-east of the State is again mountainous, containing 24,000 square miles of forest and precipitous ravines, and mostly inhabited by jungle tribes. Berar lies in the south-west of the State and its chief characteristic is its rich black cotton-soil plains.

THE PEOPLE

The population of the State is a comparatively new community. Before the advent of the Aryans, the whole of it was peopled by Gonds and other primitive tribes and these aboriginal inhabitants fared better from the Aryans than their like in most parts of India because of the rugged nature of their home. But successive waves of immigration flowed into the State from all sides. The early inhabitants were driven into the inaccessible forests and hills, where they form nearly a quarter of the whole population of Madhya Pradesh being found in large numbers in all parts of the State particularly in the south-east. The main divisions of the new-comers are indicated by the language divisions of the State. Hindi brought in by the Hindustani-speaking peoples of the North, prevails in the north and east, Marathi in Berar and the west and centre of Madhya Pradesh. Hindi is spoken by 56 per cent. of the population and is the *lingua franca*. Marathi by 31 per cent. and Gondi 7 per cent.

The effects of invasion are curiously illustrated in Berar, where numbers of Muslims have Hindu names, being descendants of former Hindu officials who on the Muslim invasion adopted Islam rather than lose their positions. The last census shows that a gradual Brahmanising of the aboriginal tribes is going on. The tribes are not regarded as impure by the Hindus and the process of absorption is more or less civilising.

INDUSTRIES

When Sir Richard Temple became first Chief Commissioner of the C. P., the only road was that leading in from Jabalpur to Nagpur. The British administration constructed roads in all directions. The two trunk railways between Bombay and Calcutta run across the State and in the last few years a great impetus has been given to the construction of subsidiary lines. These developments have caused a steady growth of trade and have led to vigorous progress in every department of life.

The prime industry is, of course, agriculture, which is assisted by an agricultural department which is now receiving additional strength by a phenomenal growth in the co-operative credit movement. The malguzari or landlord system has been abolished. The ex-landlords have become plot-proprietors of the lands under their personal cultivation and their tenants have become tenants of the State. Berar is settled on the Bombay ryotwari system. Fixity of tenure and protection against rack-renting has been given to lessees of land in Berar. Land revenue exemptions given to holders of muafis and inams have been revoked by legislation.

36,393 square miles of the Madhya Pradesh is Government Reserved forest; in Berar the forest area is about 3,339 square miles, the total forest area being two-sevenths of the whole State. The rugged nature of the greater part of the country makes forest conservation difficult and costly. Excluding forest and waste, 67·7 per cent. of the total land is under cultivation; for the two most advanced districts in Madhya Pradesh the proportion averages 81·6 per cent., while the average figure for the Berar District is 78·4 per cent. The cultivated area has extended almost continuously except for the temporary checks caused by bad seasons. Rice is the most extensive single crop of Madhya Pradesh, covering nearly 34·6 per cent. of the cropped area. Juar comes next with about 10·4 per cent. and then wheat with over 6·3 per cent. Pulses and other cereals used for food and oil-seeds cover nearly 42·1 per cent. and cotton nearly 2·8 per cent. In Berar cotton is 33.6 per cent. and juar 37.1 per cent., respectively. And then come pulses and other cereals and oil-seeds of the cropped area. More than half the working population engaged in agriculture is female.

COMMERCE AND MANUFACTURES

Madhya Pradesh is rich in several raw materials and articles of commerce such as cotton, oil seeds, minerals, food grains and pulses, forest produces, oranges, etc. In spite of these and the favourable central position of the State, the industrial development is still in the initial stages. Among the industries already taken up mention may be made of Cotton, Jute and Vegetable Oil Mills, Mining of minerals such as Coal, Manganese, Limestone, etc., Cement and Asbestos, Glass and Ceramics, Cotton ginning and pressing factories, Beedi factories, and Handloom weaving.

The largest numbers engaged in any of the modern industrial concerns are employed in the textile industry which in 1948 employed 32,633 persons. Then follows the cotton ginning and pressing industry which employed 22,612 persons in 1948. Among the mining industries coal mining comes first which in 1947 employed 19,663 persons and raised 1,489,762 tons. Then comes manganese mining with an output of 274,432 tons and 13,795 persons employed, the Jabalpur marble quarries and allied works, the lime stone quarries and the mines for pottery clay, soap stones, etc.

The total number of factories of all kinds legally so described was 1,261 and 1,313 in 1947 and 1948 respectively, the latest period for which returns are available and the number of people employed in them 97,219 and 101,646 respectively. The same economic influences which are operative in every progressive country during its transition stage are at work in Madhya Pradesh, gradually sapping the strength of the old village industries; as communications improve, village industries fade away, and a large development of trade takes place.

ADMINISTRATION

The administration of Madhya Pradesh is conducted by a Governor who is appointed by the President of India. He is assisted by 18 Secretaries (including Deputy Secretaries) and 16 Under-Secretaries. Under the provisions of the Constitution of India, the administration is conducted by the Governor with a Council of Ministers, chosen and summoned by him and sworn as members of the council.

This State, which has a unicameral Legislature, consists of 233 members inclusive of one nominated by the Governor under Article 333 of the Constitution of India. Of these, seats 32 are reserved for the Scheduled Castes and 27 for the Scheduled Tribes.

Till the 15th of August 1947 the Legislative Assembly of the State consisted of 112 elected members but from the 15th of August the strength was reduced to 111 members, the European constituency having been abolished as a result of constitutional changes. With the complete merger of the Chhattisgarh and Makrai States the number of members rose to 128 until the General Elections in 1951-52.

Madhya Pradesh is divided for administrative purposes into twenty-two districts, each of which is controlled by a Deputy Commissioner. The principal heads of State departments are the Commissioner of Settlements and Director of Land Records, the Chief Conservator of Forests, the Director of Health Services, the Inspector-General of Police, the Inspector-General of Prisons, the Director of Public Instruction, the Excise Commissioner and Superintendent of Stamps and Inspector-General of Registration and Registrar-General of Births, Deaths and Marriages, the Director of Agriculture, the Registrar of Co-operative Societies,

the Director of Industries, the Director of Veterinary Services and a Chief Engineer, Public Works Department, Buildings and Roads and Irrigation Branches, Director of Food and Civil Supplies.

The Deputy Commissioners of districts are the chief revenue authorities and District Magistrates and they exercise the usual powers and functions of a district officer. The district forests are managed by a forest officer, over whom the Deputy Commissioner has certain powers of supervision, particularly in matters affecting the welfare of the people. Each district has a Civil Surgeon (except Mandla, and Balaghat where there are Assistant Surgeons), who is generally also Superintendent of the District Jail except at Central Jails at Nagpur and Jabalpur and District Jails at Raipur, Narsimhapur, Amravati and Akola where there are whole time Superintendents and whose work is also in various respects supervised by the Deputy Commissioner. The Deputy Commissioner is also the Marriage Registrar provided he is of the Christian faith and manages the estates of his district which are under the Court of Wards. In his revenue and criminal work the Deputy Commissioner is assisted by (*a*) one or more Assistant Commissioners, or members of the Indian Administrative Service; (*b*) one or more Extra Assistant Commissioners, or members of the State Civil Service and (*c*) by Tahsildars and Naib Tahsildars, or members of the Subordinate service.

The district is divided for administrative purposes into tahsils, the average area of which is 1,500 square miles. In each village a lambardar or representative of the proprietary body is executive headman and the patwari is the village accountant who maintains the land records papers of the village on behalf of Government.

The High Court of Judicature at Nagpur, which was established in January 1936, is the highest court of appeal in civil cases, and also the highest court of criminal appeal and revision for Madhya Pradesh including proceedings against European British subjects and persons jointly charged with European British subjects.

Subordinate to the High Court are the District and Sessions Judges (11 in number) each of whom exercises civil and criminal jurisdiction in a Civil and Sessions district comprising one or more Revenue districts. The civil staff below the District and Sessions Judge consists of civil Judges of the first and second class.

LOCAL SELF-GOVERNMENT

Municipal Administration was first introduced under the Punjab Municipal Act and the Municipality of Nagpur dates from 1864. Several revising Acts extended its scope and the C. P. Municipalities Act passed towards the end of the year 1922 considerably increased the powers of the Municipal Committees. The C. P. Municipalities Act was also extended to Berar. Viewed generally, municipal self-government is considered to have taken root successfully. The larger towns have municipalities, there being 110 such bodies in the State including 12 Municipal Committees in the merged States. Corporations have been established at Jabalpur and Nagpur from 1st June 1950 and 2nd March 1951 respectively.

The Central Provinces and Berar Village Panchayats Act, 1920 has now been repealed and its place is taken by the Central Provinces and Berar Panchayats Act, 1946 (I of 1947). Under this Act the Village Panchayat is designed to be made a centre of all social, economic and development activities. 5,436 Gram Panchayats and 1,234 Nyaya Panchayats have been established in the State. In the place of Village Panchayat Officer a Director of Panchayats, Madhya Pradesh has been appointed with effect from the 10th October 1947. A Deputy Director of Panchayats, has also been appointed with effect from 1st May 1951.

Under the Central Provinces and Berar Local Self-Government Act of 1920 the units of Local Self-Government administration in the rural areas were District Councils; generally one District Council for one district and a local Board for each tahsil. With the passing of the Central Provinces and Berar Local Government Act of 1948 in the middle of 1948 the District Councils and Local Boards have been abolished and they have been replaced by Janapada Sabhas—one Janapada Sabha for each tahsil or taluq which is now the administrative unit called Janapada under the new Janapada scheme of Local Self-Government. 14 Janapada Sabhas under the new Act were constituted in the integrated Madhya Pradesh States from 1st July 1948 and 82 in the remaining State areas from the 15th August 1948.

A brief description of the constitution and functions of Janapada Sabhas is given below:—

The jurisdiction of a Janapada Sabha will be confined to a tahsil or taluq—roughly an area of 1,500 to 2,000 square miles and a population of about 2 to 3 lakhs. Big tahsils may be divided into smaller units. A Janapada Sabha will consist of 20 to 40 councillors roughly on the basis of one councillor for 10,000 people. The councillors will be elected both from rural and urban areas of the Janapada on the basis of adult franchise. The Act also provides for securing representation for Harijans, and aboriginals. The first constituted Janapada Sabhas are however nominated bodies. The Sabha will be only a deliberative body and concern itself with important matters. There will be six small standing committees formed out of the councillors of the Sabha. These committees will deal with administrative matters. There will be a Chief Executive Officer for each Sabha through whom the actual execution of the Janapada work or measures will be carried out. He will be a Government servant and will be paid by Government. He will be the Chief Revenue Officer and Chief Magistrate of the Janapada area. He has been invested with the powers of the Additional District Magistrate and Additional Deputy Commissioner. He will have under him a Deputy Chief Executive Officer in the person of the local Tahsildar—also a Government servant paid by Government. The Chief Executive Officer will have the advice and assistance of other Government officers under various departments of Government serving in the Janapada area as far as possible.

The former District Councils had certain compulsory and optional functions to perform. These functions have been considerably enlarged in the new Janapada set up. In addition the State Government would gradually entrust to the Sabhas most of the varied governmental functions pertaining to the local area except matters of law and order, police and revenues of Government. In respect of entrusted Governmental subjects the Sabhas will act as the agents of Government and will be bound to carfy out Government policy and instructions.

Janapada Sabhas will have close association with other local authorities in the Janapada area namely the Gram Panchayats, Municipal Committees, regulated Market Committees. These will work independently in their own spheres but the Sabhas will have certain supervisory functions in relation to these. The village Panchayats are actually an integral part of the Janapada scheme and the Sabha will have general powers of inspection, supervision and control over them.

PUBLIC WORKS

The Public Works Department, which comprises Buildings and Roads and Irrigation Branches, is under the control of the Chief Engineer. There are three permanent and two temporary Superintending Engineers who between them supervise the work of both branches. The State is fairly well served by a network of roads, but in a number of cases they are not fully bridged and are therefore impassable to traffic at times during the rains.

State irrigation was introduced early in the present century mainly as a result of the recommendations of the Irrigation Commission (1901-03). During the last forty-six years a sum of Rs. 7·38 crores has been expended on the construction of irrigation works, of which the more important are the Wainganga, Tandula, Mahanadi, Kharung and Manlari canals and also Murram Nalla tank, Arec and Chinchbund projects. The last two are nearing completion.

Three works, *viz.*, the Mahanadi and Wainganga Canals and the Asola Mendha tank, were sanctioned originally as productive works and the remainders were all sanctioned as unproductive works. The three works sanctioned as productive all failed to justify their classification in that category and were transferred to the unproductive list. The conditions in the State are such that irrigation works cannot be expected to be productive and their construction is justified only on account of their value as a protection against famine. The normal area of annual irrigation is at present about 782,741 acres, mainly rice and the income from these works covers more than the expenditure incurred on their maintenance and management.

POLICE

The police force was constituted on its present basis on the formation of the State, the whole of which including the Cantonments and the Municipalities, is under one force. The strength is equal to one man per 5·8 square miles of area. The superior officers comprise an Inspector-General, four Deputy Inspectors-General, for assistance in the administrative control and supervision of the Police force, including the Criminal Investigation Department, and the usual cadre of District Superintendents of Police, Assistant and Deputy Superintendent and subordinate officers.

On railways, special Railway Police are employed under the control of two Superintendents of Railway Police with headquarters at Raipur and Hoshangabad. There is a Police College under the control of a Superintendent of Police at Sagar and Constables' Schools under the control of Deputy Superintendents at Nagpur and Jabalpur. A special Armed Force of 3,595 men is distributed over the headquarters of eight districts, for use in dealing with armed disturbers of the peace in whatever quarter they may appear. There is a small force of Mounted Police consisting of 1 Head Constable and 7 Constables for the escort of His Excellency the Governor.

Madhya Pradesh has no rural police as the term is understood in other parts of India. The village watchman is the subordinate of the village headman and not a police official and it is considered very desirable to maintain his position in this respect.

During the war there was an expansion of the District Police and the special Armed Force and the formation of a battalion of special armed constabulary.

EDUCATION

The Education Department of Madhya Pradesh is administered by a Director of Public Instruction assisted at headquarters by 4 Deputy Directors of Public Instruction, an Accounts Officer, a Personal Assistant, a Radio Engineer, an Educational Publicity Officer, 4 Field Workers, a Librarian, a Radio Assistant and 2 Artists.

In the Divisions, he is assisted by 8 Divisional Superintendents of Education, 3 Inspectresses of Schools, 22 District Inspectors, 22 Additional District Inspectors of Schools, 7 District Inspectresses of Schools, 8 Radio Assistants, 150 Assistant District Inspectors of Schools, and 22 Assistant District Inspectresses of Schools.

The Secretary to Government and the Under-Secretary to Government in the Education Department are officers of the Madhya Pradesh Educational Service.

Schools.—The main division of schools for general education is into Primary and Secondary. In the Primary Schools teaching is conducted wholly in recognised Indian languages of the State. The Secondary Schools are divided into Middle and High Schools. The former may be either Middle Schools in which instruction is given (*a*) mainly in a recognised Indian language or (*b*) mainly in a recognised Indian language with the option of English as an additional language, or Indian English Middle Schools in which instruction is given in a recognised Indian language but English is a compulsory subject. In the High School classes instruction has been and is being given through the recognised Indian languages since 1922 but for the convenience of pupils whose mother tongue is not the regional language as also for those who otherwise desire to learn through English, a few English medium sections are still maintained in non-Government High Schools.

Primary Education is mostly under the control of Janapadas, Municipal Committees and Notified Area Committees. The Primary Education Act empowers local authorities to introduce compulsion and this is in force in several areas.

Technical Education.—Among the schools for Technical education are the Government Engineering School, Nagpur; Kalaniketan, Jabalpur; and five Government Schools of Handicraft and five aided Industrial Schools and one Reformatory School. The Engineering School teaches upto the diploma standard in Civil, Automobile and Mechanical Engineering, Electrical Engineering, Art and Architecture and is affiliated to the Nagpur University. The Schools of Handicrafts and Industrial Schools, teach carpentry, blacksmithy, tailoring, shoe-making, cotton-weaving, carpet and durrie making, toy making and lacquer work, cane and basket manufacturing. All these institutions (except the Government Engineering School, Nagpur) are under the administrative control of the Director of Public Instruction, who is assisted by a Deputy Director of Public Instruction (Technical). There is also a Government Engineering College at Jabalpur which is under the direct administrative control of the Secretary to Government, Madhya Pradesh Education Department.

The College teaches civil, mechanical and electrical engineering.

There are also two special industrial schools Leather Tanning School, Nagpur and Deaf, Dumb and Blind Industrial School.

The Kala Niketan Technical High School was started in July 1947 at Jabalpur. The present enrolment in the school is 350. It has been planned with the intention, of providing three separate courses of instruction *viz.*, technical high school, trade school, pre-engineering course. A three storeyed building at a cost of Rs. 10 lakhs has been constructed for the purpose of housing the school.

Government have taken over the Berar Victoria Memorial Technical Institute at Amravati.

Higher Education is under the control of the Nagpur University, Nagpur, and the University of Sagar, Sagar. The following are the constituent colleges of the Nagpur University:—at Nagpur: Morris College (Nagpur Mahavidyalaya), National College, College of Science, Hislop College, Laxmi Narayan Technological Institute, S. B. City College, University College of Law, Central College for Women and University Training College (for teachers), G. S. College of Economics and Commerce, Shikshan Prasarak Mandal, College of Science, Agriculture College, Medical College, King Edward College, now known as Vidarbha Mahavidyalaya, Amravati; Shri Shivaji Arts College, Amravati; S. E. Law College, Amravati; S. S. Commerce College, Amravati; Rajasthan Aryan College, Washim; Sitabai Arts College, Akola; G. S. College of Science, Khamgaon; G. S. College of Commerce, Wardha.

The following Colleges are affiliated to the Sagar University: Robertson College, now known as Mahakoshal Mahavidyalaya, Jabalpur; Hitkarni City College, Jabalpur; Hitkarni Law College, Jabalpur; Shri Nilkantheshwar Arts College, Khandwa; S. B. R. Arts College, Bilaspur; Law College, Bilaspur; Govt. College of Science, Raipur; Chhattisgarh College, Raipur; Law College, Raipur; Spence Training College now known as Prantiya Shikshan Mahavidyalaya, Jabalpur; Training Institute for Women, Jabalpur; Veterinary College, Jabalpur; G. S. College of Economics and Commerce, Jabalpur; Government Engineering College, Jabalpur; D. N. Jain Arts College, Jabalpur and Dip. T. Institute for Men, Khandwa.

Three courses in social education known as Summer Course at camps, Monsoon Course and Winter Course are run each year in which the full syllabus is taught to adults. For the end of Monsoon Course which ended on November 30, 1951, 16,22,922 adults were enrolled and 7,01,445 succeeded in passing the A.E.C. Examination conducted at the end of each course. To prevent the relapse of the adults who had taken the course into illiteracy and ignorance and to further educate them, each of these courses is followed up by various reconstruction activities.

MEDICAL

The Medical and Public Health Services which were previously controlled by the Inspector-General of Civil Hospitals and Director of Public Health are now combined into one post designated 'Director of Health Services.' A medical college was opened at Nagpur in July 1947. The L.M,P. Course at the Robertson Medical School has been abolished. In order to provide medical relief in rural areas, a three years' Medical Course was started in November, 1948 in the Robertson Medical School for Matriculates. The principal medical institutions are the Medical College Hospital at Nagpur (opened in 1874) with accommodation for 222 in-patients; of these 126 beds have been transferred to the Medical College (100 for surgical and 26 for midwifery) for teaching purposes; the Victoria Hospital at Jabalpur (opened in 1886) with accommodation for 177 in-patients; the Daga Memorial (Dufferin) Hospital and the Mure Memorial Hospital at Nagpur and the Lady Elgin Hospital and the Crump Children's Hospital at Jabalpur; these last four are for women and children and can together accommodate 341 in-patients. In addition to these, hospitals for women exist at Chhindwara, Gondia, Sagar, Khandwa, Amravati, Murtizapur, Shegaon and Khamgaon; and at all district headquarters where no separate women's hospitals exist, sections have been opened at the main hospitals for the treatment of women by women doctors.

The women medical officers attached to six Dufferin Fund Hospitals at Nagpur, Jabalpur, Chhindwara, Akola, Amravati and Khamgaon have been taken on the State cadre.

The Medical College Hospital with accommodation for 250 temporary beds was opened on 2nd October 1949.

The Mayo Hospital at Nagpur was provincialised in 1923, the Irwin Hospital at Amravati in 1925, the Victoria Hospital at Jabalpur in 1926 and the Silver Jubilee Hospital at Raipur in 1928. In accordance with recent policy 182 out of 278 local fund dispensaries have been transferred to the administrative and executive control of local bodies or Janapada Sabhas concerned. With the object of bringing medical relief within easy reach of the rural population, Government have sanctioned (*i*) subsidising 22 medical practitioners (allopathic) one in each district (4); (*ii*) subsidising 83 vaidyas and hakims, one in each tahsil (14); (*iii*) establishment of 83 Ayurvedic and Unani dispensaries in each tahsil (62). (The figures in brackets indicate the number in actual operation at present.) In addition to the above Government have sanctioned four mobile dispensaries for the newly integrated State districts. The State has one Mental Hospital at Nagpur. Four tuberculosis clinics at Nagpur, Jabalpur, Raipur and Amravati exist, and 40 beds have been reserved at the Pendra Road Sanatorium for the treatment of patients sent by Government.

There is a great deal of eye disease in the State and the problem is receiving special attention. An eye mobile dispensary has been started in Nagpur. The Madhya Pradesh Blind Relief Association is doing propaganda work and helping the blind. So far, 25 Assistant Medical Officers have been given training in eye work for six months at the Mayo Hospital, Nagpur. These specially trained officers are posted to eye centres in the State. Anti-rabic treatment is now available at 15 centres in the State, *viz.*, Nagpur, Jabalpur, Raipur, Akola, Wardha, Hoshangabad, Sagar, Chanda, Chhindwara, Khandwa, Yeotmal, Amravati, Mungeli, Bilaspur and Burhanpur. Nurses' training schools exist in all hospitals in the State and these will be enlarged and improved when staff increases.

An ayurvedic school was started at Raipur in August, 1950.

PUBLIC HEALTH

The Public Health services of the State are controlled by the Director of Health Services. The principal institutions working under the Department are:—

1. The Madhya Pradesh Vaccine Institute which was founded in the year 1913. Here, small-pox vaccine lymph is manufactured for the whole State. Vaccinators are also trained at the Institute.

2. Public Health Institute established in the year 1928 undertakes the examination both chemical and bacteriological, of samples of water and food stuffs under the Food Adulteration Act. Facilities also exist for the examination of pathological specimens and clinical material of indigent cases of infectious diseases free of charge.

3. There is a Health School at Nagpur, where Health Visitors are trained.

4. The problem of leprosy is being energetically tackled in the State and the department has a leprosy specialist who is in charge of treatment, propaganda and survey work. There are 27 leprosy Assistant Health Officers who are running 22 leprosy centres. There are in addition 76 Leprosy Clinics attached to various hospitals and dispensaries, 5 Assistant Health Officers for survey work. The Leprosy Home and Hospital, Raipur which is taken over by the State Government from the Mission authorities has been re-equipped. It has accommodation for 250 patients. The State Government have constructed a Leprosy Sanatorium for Berar near Amravati and handed over the building to Maha Rogi Sewa Mandal, Wardha for management. The institution started functioning in July, 1950. It has accommodation for 120 patients.

5. A Nutrition Officer has been appointed. The first task of this Officer is to carry out diet surveys on standard lines, gauge the extent of malnutrition and to tackle other problems concerning nutrition. In addition he has been appointed temporarily as medical supervisor to carry out industrial surveys with a view to improving the health of men employed in the industrial concerns in the State.

6. The following sections have been opened under the Post-War Development Scheme:—

   Malaria Section to reduce the incidence of malaria in the State by carrying out malaria surveys and control measures. Eleven anti-malaria units are now operating in highly malarious parts in the State.

B.C.G. Vaccination Campaign as a preventive against tuberculosis was started in the State in February, 1951 under the auspices of the International Tuberculosis Campaign. Three B.C.G. Teams have so far been formed in the State. Each team consists of one Assistant Surgeon, one Health Visitor, one clerk and a peon.

Government have a scheme for training multi-purpose Government servants for work in rural areas.

The Public Health and Engineering Department looks after water supply and drainage of important towns, rural water supply and sinking wells, and water supply at fairs.

BUDGET 1952-53

The details of the budget are set out below, but some points of special interest may be mentioned here. The allotment for development and grow more food is Rs. 457.91 lakhs: displaced persons Rs. 5.35 lakhs: compensation to landlords on account of abolition of malguzari Rs. 196 lakhs; loans and advances ordinary *taccavi* Rs. 73 lakhs, to Electricity Board Rs. 166.79 lakhs, to Nepa Mills Rs. 82 lakhs, to displaced persons Rs. 37.75 lakhs, to Housing Board Rs. 10 lakhs, for colonization of Pandos Rs. 2.70 lakhs, for financing marketing of improved cotton Rs. 7.30 lakhs.

1952-53 Budget

	Estimated Revenue for 1952-53.
	Rs.
Principal Heads of Revenue.	
Taxes on Income other than Corporation Tax	3,02,88,000
Land Revenue	4,55,93,000

LEGISLATIVE ASSEMBLY

(For list of members see under General Elections)

MADRAS STATE

MADRAS State occupies the whole southern portion of the Peninsula, and with the merger of Banganapalle, Pudukottai, and Sandur has an area of 127,768 square miles. It has on the east, on the Bay of Bengal, a coast line of about 1,250 miles; on the south, on the Arabian Sea, a coast line of about 450 miles. In all this extent of coast, however, there is not a single natural harbour of any importance; the ports, with the exception of Madras, and perhaps of Cochin and Vizagapatam are merely open roadsteads. A plateau, varying in height above sea-level from about 1,000 to about 3,000 feet and stretching northwards from the Nilgiri Hills, occupies the central area of the State; on either side are the Eastern and the Western Ghats, which meet in the Nilgiris. The height of the western mountain-chain has an important effect on the rainfall. Where the chain is high, the intercepted rain-clouds give a heavy fall, which may amount to 150 inches on the seaward side, but comparatively little rain falls on the landward side of the range. Where the chain is low, rainclouds are not checked in their westward course. In the central tableland on the east coast the rainfall is small and the heat in summer excessive. The rivers, which flow from west to east, in their earlier course drain rather than irrigate the country; but the deltas of the Godavari, Krishna and Cavery are productive of fair crops even in time of drought and are the only portions of the east coast where agriculture is not dependent on a rainfall rarely exceeding 40 inches and apt to be untimely.

POPULATION

The population of Madras State according to the 1951 census is 56,952,332.

According to an estimate made in 1947 the urban population of the State was 8·53 millions and the rural 43·84 millions. On the 1941 census basis the Hindus accounted for 86·77 per cent of the population, Muslims 7·88 per cent, Christians 4·15 per cent and others 1·20 per cent. The vast majority of the people is of the Dravidian race, and the population on the linguistic basis is Tamil 19·96 millions, Telugu 18·78 millions, Malayalam 3·94 millions, Kanarese 1·78 millions and others 5·39 millions. Tamil and Telugu are spoken by 40 and 37·68 per cent respectively of the population.

The State's population of 56.9 millions represents an increase of 12 per cent. over the 1941 census figures.

The annual revenue of the State has risen from Rs. 16·13 crores in the pre-war year of 1938-39 to Rs. 63.48 crores in 1951-52. The annual expenditure for the same years were Rs. 16·09 crores and Rs. 63·57 crores respectively.

There are 25 districts in the State excluding Madras City. The addition of one more district is the result of bifurcation in 1950 of the Vizagapatam District into Vizagapatam and Srikakulam. For purposes of revenue each district is generally divided into three or more divisions; each division into one or more taluks. There is a Board of Revenue which is a statutory body normally consisting of three members, designated the Commissioner of Land Revenue, Commissioner of Excise, Separate Revenue and Commercial Taxes, and Commissioner of Land Revenue and Irrigation. The posts have usually been held by members of the Indian Civil Service.

Under the new Constitution the administration of Madras State is vested in the Governor assisted by a Council of Ministers with the Chief Minister at the head. The two Houses of the Legislature have been elected on the basis of the new Constitution. The Legislative Assembly has a membership of 375 and Legislative Council 72.

LAND

The net area sown and its percentage to the total area are 31,307,676 acres and 38·8 per cent respectively; Fallow 9,886,045 acres and 12·3 per cent; Other uncultivated lands 9,171,115 acres and 11·9 per cent; Land not available for cultivation being roads, rivers, etc. 14,347,108 acres and 18·3 per cent. The forests constitute 13,814,304 acres or 17·1 per cent of the total area of the land.

The distribution of agricultural population according to different categories is roughly as follows:

	Population	Percentage to total Population
Estimated agricultural population cultivating their own lands ..	20,601,120	57
Estimated agricultural population which has leased out lands ..	5,059,928	14
Estimated population of tenants who having no lands of their own cultivate lands of others	5,059,926	14
Estimated agricultural population of small holders who cultivate lands of others	5,421,349	15
Total estimated agricultural population of Madras State	36,142,332	100

The figures, which are from *Wealth and Welfare in Madras*, issued by Dr. B. Natarajan, Economic Adviser to the Madras Government, are based on the results of a survey of about 20 villages in each taluk.

The livestock census of December 1944 revealed the following position:—

Cattle 16,354,914; buffaloes 6,289,325; sheep 10,569,189; goats 6,087,650; horses and ponies 50,016; mules 259.

FOOD POSITION

The main food of the population is rice and millets. Madras has been a deficit State in regard to food for over 150 years. The loss of rice imports from Burma, Siam, and the Far East during the Second World War seriously affected the food position of the State. The urban population was put on statutory ration* which was gradually reduced from 16 ounces in 1943-44 to 10 ounces in 1948. By the middle of 1946, the entire population was brought under rationing in one form or other because of the deteriorating food situation. The quantum of ration in March 1951 for rice eaters was six ounces of rice plus six ounces of millets, wheat and or semolina, making a total of twelve ounces. For mixed diet eaters three ounces of rice plus six ounces of millets, wheat and or semolina; for millet eaters one ounce of rice plus eight ounces of millets, wheat or semolina.

Heavy manual labourers were to get extra four ounces.

In 1950, a total of 586,139 tons food grains were imported into the State; of these 266,139 tons were rice, 200,000 tons wheat and its products, and 120,000 tons millets. The quantities procured within the State were rice 1,023,599 tons and millets 90,877 tons.

The following statement shows the area under certain food crops and the yield in 1949-50:— Rice 10,598,646 acres, 6,045,080 tons; Millets 11,802,193 acres, 2,867,010 tons; Pulses 2,968,586 acres, 242,310 tons; Sugar-cane 181,386 acres, 500,260 tons in terms of gur; Potatoes 18,981 acres, 47,830 tons; Sweet potatoes 40,978 acres, 136,800 tons and Tapioca 51,947 acres, 94,410 tons.

The principal commercial crops of the State, in order of the acreage under cultivation in 1948-49, were as follows:—

	Area in acres	Yield in tons
Groundnut ..	3,767,123	1,567,040
Cotton	1,691,001	447,780
Gingelly (til) ..	759,359	89,390
Coconut	633,043	156,592
Tobacco	345,344	118,850
Pepper	98,568	7,960
Coffee	85,644	9,670

Bananas, mangoes and citrus are the most important fruits of the State. The average area for the three years ended 1948-49 under bananas was 159,790 acres with an yield of 1,150,490 tons; under mangoes 254,866 acres yielding 6,110,500 tons; under citrus fruits 55,703 acres yielding 72,400 tons.

PUBLIC HEALTH

The Medical and Public Health departments have been allotted Rs. 100 lakhs and Rs. 55 lakhs respectively for the year 1952-53. Medical relief, medical education and research are dealt with by the Medical Department. In regard to medical relief the department's responsibility is limited to the maintenance of the important hospitals in Madras City and at the headquarters of the districts, and special institutions such as mental hospitals, institutions in divisional centres, etc. Medical relief in the mofussil not covered by the above-mentioned institutions devolves on local bodies which are aided by Government. Rural medical practitioners are given a subsidy. Government maintain five medical colleges, two at Madras and one each at Vizagapatam, Guntur and Madura. Financial aid is given to the Christian Medical College for Women at Vellore.

A school of Indian Medicine, opened in Madras City in 1925 with a hospital attached to it, has been expanded into a college. Its strength in 1950 was 566.

There were 1,231 medical relief institutions of all classes in 1949—931 in rural and 300 in urban areas. Of these State (Public) institutions numbered 229, State (special) institutions 32, local fund institutions 507, private aided 55, private non-aided 67, maintained by railways 57 and subsidised rural dispensaries 284. They employed 2,004 doctors, 1,634 nurses, 1,063 midwives and 1,458 compounders. The total number of beds for both sexes was 19,618. The total numbers of in-patients and out-patients treated were 777,061 and 10,946,689 respectively. The number of labour cases conducted in all hospitals was 189,089.

Two well-known scourges are Tuberculosis and Leprosy. There were ten hospitals and sanatoria, both Government-owned and private, for the treatment of tuberculosis at the beginning of 1950. (Four new institutions were opened during 1949.) It is estimated that there are 1,21,174 T.B. patients in the State, and Madras city, Madura and Malabar Districts account for the largest number of patients. In Madras city alone, there are 27,818 T.B. patients representing over 20 per cent of the total in the State. The following are the deaths from T.B. for three years: 1947, 6,946; 1948, 6,995; 1949, 7,146. The Government Tuberculosis Institute at Madras which is well-equipped with X-ray and laboratory facilities, examines about 12,000 patients annually.

The entire work regarding the control of leprosy is entrusted to the Madras Branch of the British Empire Leprosy Association, which gets an annual grant of Rs. 21,000. The biggest institution for the treatment of leprosy, the Lady Willingdon Leprosy Sanatorium at Tirumani, Chingleput District, which was managed by the Church of Scotland Mission,

* Rationing has now been abolished.

has been taken over by Government. On the whole in 1949 there were 17 institutions for the treatment of leprosy, the total number of beds available being 3,225. The number of patients treated was 65,757. There are three mental hospitals at Madras, Waltair, and Calicut, the total number of patients being 3,787.

The mortality figures for 1949 for various diseases were Cholera 13,422; Smallpox 5,918; Plague 150; fevers 2,11,443; dysentery and diarrhœa 55,521; respiratory diseases 88,194; child birth 9,979 and other causes 536,746. The total number of deaths from diseases was 921,373. The number of births and birth rates in urban areas were 244,666 and 44.84 per thousand respectively. The respective figures for rural areas were 1,355,604 and 30.05 per thousand.

Deaths and death rates for urban areas were 130,754 and 23.97 per thousand respectively. The respective figures for rural areas were 739,824 and 16.40 per thousand. The infant mortality rate was 119.81 per thousand live births.

EDUCATION

The estimated expenditure on education (excluding that on buildings and specialised institutions under the control of departments other than education) for the 1952-53 budget is Rs. 1,139.5 lakhs. Of this primary education is allotted Rs. 695.3 lakhs; secondary education Rs. 138·7 lakhs; university Rs. 97.8 lakhs and special institutions like teachers' training, deaf and dumb, and lepers' institutions Rs. 71.2 lakhs. The allotment for scholarships was Rs. 4.17 lakhs, direction Rs. 5.0 lakhs and inspection Rs. 40.5 lakhs.

The following figures for 1950 give the number of institutions under the various categories:

	Number of Institutions		Total
	For Men	For Women	
Arts colleges (including Science and Oriental colleges).	78	13	91
Professional colleges	21	5	26
High schools	815	182	997
Middle schools	352	68	420
Primary schools	37,812	23	37,835
Special schools	945	22	967
Professional education schools	106	....	106
Unrecognised schools	106	....	106
Total ..	40,549	426	40,975

The expenditure on education from various sources in 1949-50 was as follows: (In thousands of rupees).

Source	Expenditure on Men	Expenditure on Women	Total	Percentage to total
	Rs.	Rs.	Rs.	
Government Funds	1,00,337	5,187	1,05,524	54·35
District Board	25,404	136	25,540	13·15
Municipal Funds	8,597	175	8,772	4·51
Fees	29,422	2,770	32,192	16·58
Endowments, etc.	18,705	3,416	22,121	11·39
Total ...	1,82,465	11,684	1,94,149	100·00

The number of pupils and students in the various educational institutions in 1950 were:

Institutions	Men	Women	Total
Annamalai University	2,439	182	2,621
Arts colleges	35,758	1,664	37,422
Professional colleges	5,626	444	6,070
Special Education, Music, Oriental studies, etc. ..	1,142	56	1,198
High schools	447,342	33,403	480,745
Middle schools	47,142	10,135	57,277
Primary schools	2,522,379	1,467,443	3,989,822
Professional Education	34,039	810	34,849
Special schools	29,796	1,404	30,800
Total ..	3,124,963	1,515,541	4,640,504

In 1951 there were 348 basic elementary schools, 48 basic training schools and 1,678 adult literacy schools. There were rural colleges for imparting higher education to those in rural areas who were already literate. The opening of a Central College of Carnatic Music in Madras City was a notable event in 1949. There are three universities, Madras, Andhra and Annamalai, the last being residential.

LAW AND ORDER

An important change in the administration of justice was introduced in 1949-50 when the Judiciary was separated from the Executive in some selected districts by a scheme based on executive instructions only. It is now in force in 16 districts, and the extension of the scheme to the remaining districts will be enforced in due course. Under the scheme, for discharging purely judicial work there is a separate hierarchy of magistrates, all qualified in law and under the administrative control of the High Court. The Collector of the District and his executive subordinates will have magisterial functions to the limited extent of the preservation of public order and the prevention of crime.

The superior court for civil and criminal judicial work is the High Court at Madras, which consists of a Chief Justice and 15 Puisne Judges. For the administration of criminal justice there are 31 sessions judges in the mofussil (including six for Agency Tracts), additional and assistant sessions judges being provided to assist courts in which there is heavy work. The administration of civil justice is carried on by 26 district judges, 39 subordinate judges and 141 district munsiffs. In Madras City there is a City Civil Court consisting of two judges and a Small Cause Court consisting of a Chief Judge and two other judges.

Madras is a litigious State, and the records for 1948 show one suit for every 208 persons.

The Police Department is under an Inspector-General who has six deputies, four in charge of ranges of the State, one in charge of the Railway Police and the Criminal Investigation Department and one in charge of the Madras City Police as Commissioner of Police. A Superintendent is stationed at each district. The sanctioned strength of the permanent Police force is 36,815 excluding the Malabar Special Police and the special armed police units.

CO-OPERATION

The number of all co-operative societies increased from 21,271 to 22,784, their membership from 28·81 lakhs to 31·22 lakhs, the working capital from Rs. 7,103·55 lakhs to Rs. 71·11 lakhs and the divisible profits from Rs. 38·88 lakhs to 168·31 lakhs (1949-50). The collections by Central Banks were satisfactory, and there was a reduction in the percentage of overdues in central banks, from 5·27 per cent. to 5 per cent. under principal—the lowest on record in the history of these banks. There was a reduction in the loan business of Land Mortgage Banks but an increase in that of the agricultural and non-agricultural credit societies.

The activities of the Co-operative Stores continued to expand. The sales turnover of both the primaries and the wholesales amounted to Rs. 48·9 crores. There were 1,746 primary stores with 1,843 branches or depots. Their purchases and sales amounted to Rs. 2,360·25 lakhs and Rs. 2,550.16 lakhs as against Rs. 2,198·70 lakhs and Rs. 2,307.37 lakhs, respectively in the previous year. The trade of the wholesale stores recorded a decrease, the purchases and sales amounting to Rs. 1,842·36 lakhs and Rs. 233·12 lakhs against Rs. 2,528·90 lakhs and Rs. 2,513·09 lakhs respectively in 1948-49. Some of the important features of the working of the stores were their participation in schemes of statutory rationing and procurement, their sales to non-members, formation of stores societies for the benefit of industrial labourers and extension of the consumers' movement in rural areas.

The total deposits and borrowings of the Madras Provincial Co-op. Bank decreased from Rs. 736·32 lakhs to 608·68 lakhs. There was an increase in its loan business (from Rs. 784·34 lakhs to Rs. 851·4 lakhs). By virtue of its position as the apex bank, the Provincial Bank continued to guide, supervise and control the financial policy of central banks. The working capital of central banks decreased from Rs. 1,744·56 to Rs. 1,737·66 lakhs. Their total profits increased from Rs. 16·70 lakhs to Rs. 18·49 lakhs.

Land Mortgage Bank—Loans issued by the Central Land Mortgage Bank during 1949-50 amounted to Rs. 72·24 lakhs which is less than last year by about Rs. 5·50 lakhs. The bank floated debentures to the value of Rs. 27 lakhs at 3 per cent. interest, the issue price being Rs. 99-8-0 per cent. Government guarantee for these debentures stood at Rs. 550 lakhs. The value of debentures in circulation was Rs. 439·32 lakhs. The total amount of loans outstanding at the end of the year was Rs. 388·32 lakhs as against Rs. 338·32 lakhs at the end of the previous year.

Co-operation played an increasingly useful part in the equal distribution of controlled commodities, in raising food production and the manufacture of handloom goods and cottage industrial products. Co-operative milk supply received an impetus where prohibition was introduced as a means of relieving unemployment among ex-toddy tappers. On 30th June 1950, there were 36 milk supply unions and 535 milk supply societies. The unions had 403 feeder societies and 3,126 individuals as members with a paid-up share capital of Rs. 2·77 lakhs. The milk supply societies had a membership of 49,952 individuals and a paid-up capital of Rs. 7·27 lakhs. The societies sold milk to the value of Rs. 83·68 lakhs. The total value of milk and milk products that reached the consumer through milk co-operatives amounted to Rs. 108·49 lakhs.

IRRIGATION, ELECTRIC POWER

In 1949, out of 31·035 million acres of cultivated land 9·850 million acres were under irrigation, the main sources being Government canals, private channels, tanks, wells, and spring channels. The irrigated area, which is widely distributed over the entire State, forms 31·73 per cent of the total cultivated area. The State has inherited from very ancient times about 35,000 irrigation tanks some of which were constructed nearly two thousand years ago by the Tamil kings, Chera, Chola and Pandya which was followed up by the Pallavas, Chalukyas and others. The P.W.D. of the Madras Government lays much store by these ancient tanks which by gradual silting through the ages have lost much of their original capacity. Under the Grow-More-Food drive it is proposed to renovate them. Twenty-one middle-sized irrigation schemes that would be completed by 1956 at an estimated cost of Rs. 2,739 lakhs are expected to bring under irrigation 488,000 acres. Besides, Government have a major irrigation programme consisting of four schemes. These are the Tungabhadra, Lower Bhavani, Krishna-Pennar and Rampadasagar. The first two are well under way and their completion is expected in 1952. Investigation on Ramapadasagar project however has been temporarily suspended.

The Madras Government are by far the largest operators in the field of electricity distribution, controlling about 60 to 70 per cent of distribution. The Government electricity system consists of the three hydro-electric plants of Pykara, Mettur and Papanasam and the ten thermal plants of Madras, Madurai, Sandur, Nellore, Kakinada, Vijayawada, Vishakapatnam, Cuddapah, Kurnool and Anantapur with a total installed capacity of 212,868·8 K.V.A. Besides there are seven licensees with generating plants with a total installed capacity of 2,841·85 K.V.A. In mileage the transmission lines aggregate more than 9,110 miles. And in 1950-51, 686·237 million units of energy were generated and distributed to 275,697 consumers.

In November 1949 the Legislature enacted a measure providing for Government acquisition of all undertakings supplying electricity. It has been decided to take over the concerns in five batches, the less efficient ones taking precedence. In 1950-51, seven licensees undertakings vested in the Government. The net revenue to Government from the electricity system has been steadily rising. In 1950-51 the net revenue realised from the Hydro-Electric Systems was Rs. 119·24 lakhs and the return on the capital out-lay was about 8 per cent. The budget allotment for 1951-52 for electricity was Rs. 385 lakhs on revenue account and Rs. 937 lakhs for capital out-lay. Among the major projects which have made progress are the Machkund and Moyar hydro-electric schemes.

INDUSTRIES, MINERALS

The State has a variety of mineral deposits and makes a good contribution to India's export trade in minerals. The mineral output is distributed as follows:—Mica 1,654 tons; limestone 356,258 tons; barytes 5,137 tons; China clay 4,424 tons; gypsum 23,251 tons; magnesite 51,673 tons and bauxite 1,368 tons.

Textiles, engineering, sugar, tobacco, matches, oil milling, bricks and tile manufacture are the chief industries. 166 cotton spinning mills were at work in 1949. In one centre alone Coimbatore there are 38 cotton mills. The other textile centres are Mathurai with 15 mills, Ramnad six mills and Tirunelveli 6 mills. The only mill in Madras City is one of the biggest in the country employing 15,981 workers. The textile industry is still the largest employer of labour in the State with 103,358 people working in it. The number of jute mills at work in 1951 was four. In 1947-48 jute manufactures to the value of Rs. 9·15 lakhs and raw jute to the value of Rs. 26·41 lakhs were exported to foreign countries. There are a number of match factories run on a cottage industry basis in the districts of Ramnad and Tirunelveli. Madras together with these two districts employs about 7,088 workers. There are 267 tanneries employing 9,417 workers, the annual value of the exports of tanned hides and skins to overseas markets being about Rs. 11 crores. Twelve cement factories in the State have a total output of 460,000 tons per year. There are four perennial and eight seasonal sugar factories employing 4,309 workers.

At the end of 1949 there were 593 trade unions. There were 56 strikes in 1949; of these 17 related to Textile Mills. Conciliation by the Labour Department proved successful in four cases, in which, they intervened.

COMMUNICATIONS

There are five classes of roads in the State totalling 38,047 miles. Of these national highways total 1,975 miles maintained entirely out of Union funds, provincial highways 3,114 miles, major district roads 10,312 miles, other district and village roads 22,646 miles. The State has 4,626 miles of railways.

The bus transport in Madras City is Government-owned. The transfer to public ownership was carried out in stages starting in October 1947 and ending in June 1948. Under private ownership there were only 17 bus routes, but by April 1950 Government were running buses on 45 routes with a daily mileage of 32,000. Government also own and operate eight suburban services and four moffusil services from Madras to Nellore and Tirupati. The fleet of buses continued to be 328, and the services during the year 1950 covered 121 lakh vehicle miles.

The main ports in the State are Madras, Vishakapatnam and Tuticorin, the first two being under the administrative control of the Government of India. The aggregate value of the seaborne trade of the State in 1947-48 amounted to Rs. 200.25 crores against the previous year's Rs. 170.65 crores. Of this imports accounted for Rs. 71.33 crores, exports Rs. 64.51 crores and coastal trade Rs. 64.41 crores. The value of foreign imports on private account was as follows:—

	Rs. in lakhs.
Grains, pulses and flour	2,039·59
Machinery and mill work ..	850·35
Cotton—raw	316·25
Mineral oils	697·72
Drugs and medicines	106·68
Instruments, apparatus, etc. ..	273·69
Manures	200·39
Provisions and oilman stores ..	203·94
Spices	68·56
Tobacco	92·13
Dyeing and Tanning substances	74·42
Paper and pasteboard	172·51

The value of private merchandise exported was as follows:—

	Rs. in lakhs.
Tea (black)	717·29
Groundnuts	179·69
Pepper	292·06
Cotton—raw	113·09
Groundnut oil	287·78
Leather	1,258·22
Coir, mats and mattings	171·01
Cashewnut kernels	406·93
Fish	132·30
Tobacco—raw	455·27

BUDGET FOR 1952-53

It was estimated that the year 1951-52 would close with a deficit of Rs. 9·62 lakhs. In 1952-53 there will be a deficit of Rs. 85·97 lakhs. The deficit has been left uncovered by resort to new taxation.

Total prohibition has been in full force in the State since October 2, 1948 involving a loss of excise revenue of Rs. 16·5 crores.

A provision of Rs. 20 lakhs has been made in the 1952-53 budget for the payment of advance compensation to zamindars whose estates were taken over on September 7, 1949 under the Zamindari Abolition Act 1948. The estates are being taken over in batches.

Government have decided to replace the present pension system for government servants by a new scheme of combined pension, provident fund and insurance. The aim is to provide for benefits to be paid to the family of an employee who dies while in service.

The following table shows the budget position at a glance:—

A. REVENUE AND EXPENDITURE ON REVENUE ACCOUNT.

(Figures in thousands of rupees.)

	Accounts, 1950-51.	Budget Estimate, 1951-52.	Revised Estimate, 1951-52.	Budget Estimate, 1952-53.

ADMINISTRATION

THE GOVERNOR

H. E. Shr Sri Prakasa.

THE GOVERNOR'S PERSONAL STAFF

Secretary, H. Sambamurthi, State Civil Service.
Military Secretary, Major Cattamanchi Sivananda Reddy, Mahratta Light Infantry.
Surgeon to His Excellency the Governor, Dr. Pakiam Samuel Dorai Raja, M.B.B.S.
Aides-de-Camp, Captain Rajkumar Dasu Bhagvandas, Engineers, and Captain O. K. Karunakaran, R.I.A.S.C.
Honorary Aide-de-Camp, Hony. Captain Madaswamy Govindaswamy, late of Army Service Corps.

THE MINISTRY

Chief Minister and Minister-in-Charge of Public and Police in Home Dept., The Hon'ble Shri C. Rajagopalachari.
Minister, Medical and Public Health, The Hon'ble Shri A. B. Shetty.
Minister, Finance, Food and Elections, The Hon'ble Shri C. Subramaniam.
Minister, Religious Endowments and Registration, The Hon'ble Shri K. Venkataswami Naidu.
Minister, Public Works, The Hon'ble Shri N. Ranga Reddi.
Minister, Education, Harijan Uplift and Information, The Hon'ble Dr. M. V. Krishna Rao.
Minister, Prohibition, The Hon'ble Shri V. C. Palaniswami Gounder.
Minister, Industries and Labour, Motor Transport, Settlement of Ex-Servicemen, Railways, Posts and Telegraphs and Civil Aviation, The Hon'ble Dr. U. Krishna Rao.
Minister, Agriculture, Forests, Veterinary and Fisheries, The Hon'ble Dr. R. Naganna Gouda.
Minister, Local Administration, The Hon'ble Shri N. Sankara Reddi.
Minister, Courts and Prisons and Legal Departments, The Hon'ble Shri K. P. Kuttikrishnan Nair.
Minister, Land Revenue, The Hon'ble Shri M. A. Manickavelu Naicker.
Minister, House Rent Control, The Hon'ble Raja Sir Shanmuga Rajeswara Sethupathi.
Minister, Rural Welfare and Commercial Taxes, The Hon'ble S. B. P. Pattabhi Rama Rao.
Minister, Co-operation and Housing, The Hon'ble Shri D. Sanjeevaya.

SECRETARIAT

Chief Secretary to Government, K. Ramunni Menon, I.C.S.
Secretary to His Excellency the Governor, H. Sambamurthi.
Secretary, Home Department, O. Pulla Reddy, I.C.S.
Secretary, Finance Department, T. A. Varghese, I.C.S.
Secretary, Revenue Department, S. K. Chettur, I.C.S.
Secretary, Local Administration Department, J. Sivanandam.
Secretary, Department of Public Health, S. R. Kaiwar, I.C.S.
Secretary, Education Department, K. M. Unnithan, I.C.S.
Secretary, Public Works Department, T. M. S. Mani, I.C.S.
Secretary, Development Department, J. M. Lobo Prabhu, I.C.S.
Secretary, Food and Agriculture Department, R. M. Sundaram, I.C.S.
Secretary, Legal Department, K. V. Rajagopalan.

PUBLIC SERVICE COMMISSION

Chairman, T. M. Narayanaswami Pillai.
Members, P. K. Gnanasundara Mudaliyar, P. V. Narasimha Raju.
Secretary, C. Krishnaswami Chetti.

BOARD OF REVENUE

First Member and Commissioner of Commercial Taxes, V. N. Kudva, I.C.S.
Second Member and Commissioner of Civil Supplies and Food Production, V. S. Hejmadi, I.C.S.
Third Member and Commissioner of Land Revenue, W. R. S. Satthianathan.
Fourth Member, T. N. S. Raghavan, I.C.S.
Secretary, N. S. Mani, I.C.S.

MISCELLANEOUS APPOINTMENTS

Economic Adviser to Government, Dr. B. Natarajan.
Director of Agriculture, Kantiraj (*Acting*).
Director of Controlled Commodities, V. V. Subrahmanyan, I.C.S.
Registrar of Co-operative Societies, J. C. Ryan.
Director of Public Instruction, D. Sadasiva Reddi.
Chief Engineer for Electricity, G. Sundaram.
Commissioner of Labour, C. G. Reddi.
Director of Fisheries, K. N. Anantaraman, I.C.S.
Chief Engineer, P.W.D., A. R. Venkata Acharya.
Chief Engineer, Highways, K. K. Nambiar.
Director of Industries, M. T. Raju, I.C.S.
Advocate-General, V. K. Tiruvenkatachari.
Director of Medical Services, Dr. P. Arunachalam.
Accountant-General, A. Balakrishnan.
Transport Commissioner, V. Hanumantha Rao Nayudu.
Inspector-General of Police, T. G. Sanjivi.
Commissioner of Police, Madras, J. Devasahayam.
Director of Public Health, K. S. Viswanathan.
Superintendent of Census Operations, S. Venkateswaran, I.C.S.
Collector of Central Excise, O. Krishnan.
Commissioner of Income-Tax, K. C. Khanna.
Postmaster-General, C. V. Rajan.
Sheriff of Madras, S. Anantaramakrishnan.
Vice-Chancellor, Madras University, Dr. A. Lakshmanaswami Mudaliar.
Registrar, R. Ravi Varma.

MADRAS LEGISLATIVE COUNCIL

(*For list of Members of the Council see under article General Elections.*)

MADRAS LEGISLATIVE ASSEMBLY

(*For list of Members of the Assembly see under article General Elections.*)

(*a*) Afterwards (by creation) Baron Carmichael of Skirling.

(*b*) Afterwards Earl of Willingdon.

ORISSA STATE

ORISSA was constituted a separate State on April 1, 1936, by the Government of India (Constitution of Orissa) Order, 1936. The new State of Orissa is the result of partial amalgamation of various Oriya-speaking peoples who had till then belonged to three separate States, *viz.*, Madras, Bihar and Orissa, and Madhya Pradesh.

The area of the State is 59,869 sq. miles and total population 14,644,293, of which 7,240,008 are males, and 7,404,285 females. This excludes the number of displaced persons in Orissa which comes to 20,926.

The State of Orissa consists of 13 districts namely Cuttack, Puri, Balasore, Ganjam, Koraput, Mayurbhanj, Phulbani, Dhenkanal, Sundargarh, Sambalpur, Kalahandi, Keonjhar and Bolangirpatna.

The Rulers of 24 States handed over their powers, jurisdiction and authority over their respective areas to the Government of India who in turn delegated the powers to administer these States to the State Government on 1st January, 1948. Later the States of Seraikella and Kharswan which were originally integrated with Orissa were transferred to Bihar. Before the integration of these States, Orissa was a small unit with scattered areas and limited resources. Now 6 more districts with 41 subdivisions have been added and the scattered bits of the State consolidated.

On the 1st August 1949 the ex-States areas were completely merged with the old districts thus becoming regular parts of Orissa. A new district, Kalahandi was created.

The Orissa High Court was inaugurated on 26th July 1948. It consist of 3 Puisne Judges besides a Chief Justice.

On the 1st April 1949 a separate Public Service Commission for Orissa with two members and a Chairman was also established.

ELECTIONS

Orissa has an unicameral legislature consisting of 140 members. The State has been divided into 74 single member and 33 double member Assembly Constituencies and 12 single member and 4 double member Parliamentary Constituencies. 21 seats for the scheduled castes and 28 for the scheduled tribes are reserved in respect of the State Legislative Assembly and 3 for scheduled castes and 4 for scheduled tribes in respect of the House of the People. The first general elections both to the State Assembly and Parliament took place about the middle of February 1952. 522 candidates from different parties including independents contested membership for the State Assembly and 57 for the House of People. The total number of votes polled is 3,661,777 out of the total number of voters 7,684,828.

ADMINISTRATION

The Indian Civil Service and the Indian Administrative Service have now been combined into one, the Indian Civil Administrative Service. The strength of cadre of the combined service for Orissa has been fixed at 71. Besides this there are 5 different categories of officers in the State—Orissa Administrative Service, Orissa Finance Service (Senior Branch), Orissa Police Service, Orissa Subordinate Administrative Service and Orissa Finance Service (Junior Branch). Common Recruitment Rules have been framed for appointment to these services. Government have thrown open all appointments to women as well. Two ladies have been appointed to the Subordinate Administrative Service.

Consequent on the decision of the Government of India not to include Judicial Posts in the Indian Administrative Service cadre, Government have created a "Superior Judicial Service" to fill up posts of District and Sessions Judges and other similar superior Judicial posts. The total strength of the Superior Judicial Service has been fixed at 12 and the members of this service draw the same scales of pay as senior I.A.S. officers. Recruitment to this service is made directly from the bar and by promotion of officers of the Orissa Judicial Service.

There is no uniform Land Revenue System in Orissa on account of diverse Land Revenue and Tenancy Laws in force in different places of the State. Prior to integration it had got three kinds of Revenue Laws, for South Orissa districts namely Ganjam and Koraput; North Orissa and Sambalpur District. With the integration of 24 Orissa States, 24 different Revenue Laws have been added as each State had separate revenue laws. The Government have felt the necessity of unifying the land laws, both for efficiency of administration and creating an urge among the peasants to devote their labour and capital to the land with a sense of security. Pending that, Government have taken different measures for immediate land reforms. The most important of them is the abolition of intermediaries that cropped up between the Government and the people. The legislation for the abolition of Orissa Estates was undertaken and having been passed by the last legislature has recently received the assent of the President of the Republic and is now on the Statute book. It is a measure of far reaching import and will revolutionise the entire agrarian economy of the State and bring the tiller of the soil and the Government into direct relationship. Estates in Ganjam and Koraput were to be taken over on July 1.

After the inception of the province of Orissa in April 1936 a Revenue Commissioner was appointed and he was charged with the functions of the Board of Revenue. Subsequent to the integration of the ex-States the province was divided into two divisions each under a commissioner who functioned as the highest revenue authority and the Board of Revenue within their respective jurisdictions. But the functioning of the said two independent officers as Board of Revenue did not work very satisfactorily. So a Board of Revenue with three members having Shri N. Senapati, I.C.S. as President and Shri B. Sivaraman, I.C.S. and Shri V. Ramanathan, I.C.S. as members was constituted which has started functioning from the 1st August 1951.

POLICE

During the year 1950-51 the Police had to control 387 riots of which 14 had a political background, 9 were results of religious dissensions, while 2 were due to communal trouble.

By the vigilance of the Railway Protection Police an attempt to derail the Bombay Mail was averted and preventive action was taken against the suspects.

Crime remained generally under control. The crimes reported during the year 1950 were as follows :—Murder 205, Dacoity 52, Robbery 176, Burglary 4,200, Theft 8,847.

Out of 205 murders 17 were due to intrigues, 19 to land disputes, 43 to revenge, 21 to suspected witch-craft and 88 to domestic and other quarrels while 4 were infanticides and 13 for grain.

Demands for augmentation of the police force continue to come in from several Districts, particularly from the industrial areas and the towns of Cuttack and Sambalpur. The establishment of several Refugee Camps in the State needed extra police for the different camps.

EDUCATION

The total number of literate persons in the State of Orissa as per census figures of 1951 is 2,311,832 including 329,938 women.

The number of colleges increased from 16 in 1947-48 to 19, in 1948-49 of which 14 were arts colleges, 3 oriental colleges and 2 professional colleges (medical and education). Of the 14 arts colleges 10 are first grade colleges and the remaining four second grade. Government maintain 9 arts colleges, 2 professional colleges and 2 oriental colleges. The remaining colleges are maintained by private agencies. The total number of students in all the colleges at present is 6,676 including 380 women students.

There are at present 11,366 recognised schools in the State, out of which 10,796 are for general education and the rest are special schools. The schools for general education include 153 High Schools (146 for boys and 7 for girls), 488 Middle English Schools (452 for boys and 36 for girls), and 10,155 Primary Schools (9,932 for boys and 223 for girls).

The schools for special education include 30 Training schools, one Engineering school, 30 Technical and Industrial schools, three Commercial schools, one Reformatory school, one Deaf and Dumb school, 328 schools for adults and four Madrasas, 131 Tols, one Gymnasium and 22 Ashram schools. Stress is laid on practical Basic Education. In so far as Secondary and University education are concerned, the recommendation of the University Commission to coordinate Secondary and University education is being implemented.

Hitherto the Utkal University was only an affiliating and examining body. With effect from 1949-50, it has taken over direct charge of teaching Law and foreign languages.

MEDICAL AND PUBLIC HEALTH

The Health Organisation under local bodies has been provincialised temporarily and its permanent retention with expansion of staff is under consideration of Government. Since the integration of the Orissa States an Assistant Director of Public Health has been appointed exclusively to be in charge of Public Health administration of States area. Besides this, there is one more Assistant Director of Public Health. All are attached to the office of the Director of Health and Inspector-General of Prisons, Orissa.

Malaria :—The problem of Malaria in this State is great, like that of other epidemic diseases like cholera and small pox. The Provincial Malaria Organisation and the Malaria Control Unit, Cuttack were allowed to continue. Due to present financial stringency the D.D.T. spray which was being carried out by Government in municipal areas has been suspended and the local authorities have been urged to carry out operation at their own cost.

To avail of the assistance of the World Health Organisation in the field of malaria, the State Government have sanctioned the establishment of a parallel team who were carrying on anti-malaria demonstration work in the hill tracts in Jeypore of the Koraput District in an area of about 700 sq. miles under the supervision of malaria experts deputed by the World Health Organisation. Besides this, sufficient quantity of paludrine tablets were obtained and distributed free of cost among deserving patients of flood-affected areas.

The 5 Mobile Field Hygiene Units, two for the district of Mayurbhanj and one for each of the districts of Cuttack, Ganjam and Sambalpur continued to operate. But due to present financial stringency 3 Mobile Field Hygiene Units have been abolished.

Filaria :—The Filaria Research Unit at Cuttack for conducting experiments to ascertain the efficacy of Hetrazan in the treatment of filaria under the auspices of the Indian Council of Medical Research, has continued investigation in selected areas of Cuttack and Sakhigopal under the personal direction of the Assistant Research Officer deputed by the Malaria Institute of India, Delhi. The estimated cost of the scheme is Rs. 40,800, half of it being met from the State revenue and the other half by the I.C.M.R.

Tuberculosis :—B.C.G. Vaccination Scheme which forms an important part in the Anti-Tuberculosis Campaign was in operation in Cuttack Town. A T.B. Hospital was opened at Uditnarayanpur on 9th June, 1949 in the district of Kalahandi with 25 beds. It has been provided with an X-ray plant and accessories. Introduction of Mass Miniature Radiography in the district of Mayurbhanj is under the consideration of Government. The T.B. clinic building at Sambalpur with six observation beds is now complete and arrangements are being made to equip it.

Leprosy :—Leprosy treatment is being carried on on a wide scale through a network of clinics managed by Leprosy Assistants under the supervision of the District Leprosy Officer. Financial assistance is being given to the State Hind Kustha Nirbana Sangha. A senior member of the Public Health Department has been appointed to supervise and co-ordinate the anti-leprosy work. There are at present 188 leprosy clinics, 7 leprosy colonies besides 3 leprosy asylums at Baripada, Cuttack and Puri.

Water Supply :—In order to ensure good drinking water supply in rural areas, State Government have made grants to the District Development Committees for sinking tube and deep masonry wells throughout the State.

Medical Relief :—The total number of hospitals and dispensaries in the State by the end of 1951 was 361. Taking into consideration the area and population of the State, one medical institution caters for an area of 141 sq. miles and a population of 33,718 on the average. In order to meet the growing needs of the State, a target has been fixed under the Post-War Scheme to have at least one institution for every 100 sq. miles or 20,000 population.

With a view to revive indigenous system of medicine Government have sanctioned the establishment of subsidised Ayurvedic Dispensaries throughout the State. The total number of such institutions are now 47 regular ones and 12 subsidised ones. Besides two Ayurvedic Hospitals one at Bolangir and the other attached to the Gopabandhu Ayurvedic Institute, Puri, are now functioning in the State.

Arrangement has also been made for distribution of some common medicines for treatment of minor ailments through the agency of the Rural Welfare staff in the areas predominantly inhabited by Adibasis.

Sriram Chandra Bhanj Medical College.—There was a Medical School at Cuttack started in 1885 which was preparing students for the L.M.P. Diploma. In 1944 the Medical School was converted into a Medical College with a 5 years degree (M.B.B.S.) course. The College is affiliated to the Utkal University. Recently a condensed M.B.B.S. course was introduced in the college for affording facilities to the licentiates to qualify themselves for the M.B.B.S. degree; so far 56 licentiates have taken the Degree.

A Midwifery Training School at Berhampur has been established. It is now proposed to expand it. The question of establishing a Health School is also under consideration. Four students are undergoing Senior Midwifery course at the Dufferin Hospital, Kanpur with a view to their being subsequently trained in the Health Visitors' Course at Delhi. Two more students are undergoing health visitors' course at the same hospital.

There are Maternity and Child Welfare Centres at Cuttack, Berhampur, Bargarh and Russelkonda managed by local committees with Government aid. The centre at Sambalpur and Puri have been provincialised. Two health visitors were posted to the centres at Puri and Berhampur. A nurse midwife was appointed to work as Health visitor at the Maternity and Child Welfare centre at Cuttack.

An infectious diseases hospital has been established at Puri.

A tuberculosis hospital with 25 beds has been opened at Uditnarayanpur in the district of Kalahandi, with the ultimate object of increasing the bed strength to 150 or 200.

Orissa has no separate mental hospital of its own but shares the one at Kanke with Bihar and W. Bengal. Government have since agreed to the reservation of a set of four beds in the Inter-Provincial Mental Hospital for the better class patient.

Forests :—The income from forests in Orissa was Rs. 70,24,000 in 1951-52.

Fisheries :—The production of fingerlings has increased from 2 lakhs to 40 lakhs. 450 acres of swamp lands have been brought under fish production, and it is estimated that by the end of 1952-53 the haul of fish from swamps will amount to 2,000 maunds per annum. From Chilka and Sar Lakes more than one hundred thousand maunds of fish are now being exported annually.

Veterinary Services :—There are 5 cattle-breeding farms, 79 Veterinary Dispensaries, 222 Stockmen Centres and 127 Bull Centres. Besides other items of improvement 1,372,150 cattle were protected from diseases in 1950-51.

LOCAL SELF-GOVERNMENT

The unification of laws governing the Local Bodies in the State has been achieved by the Orissa Local Government Act, 1950. In addition to the District Boards existing in the six old districts of the State, the Government are taking steps to establish District Boards in six other districts of the integrated area. The number of Municipalities in the State had increased from 8 in 1947 to 17 in 1951 and 3 more Municipalities are proposed to be established shortly. In addition to the existing two Notified Area Committees, Government have taken steps to form eight such Committees. 538 Grama Panchayats and 173 Adalti Panchayats have also been established since 1949.

CO-OPERATIVE ORGANISATIONS

The strength of Co-operative Societies in Orissa has now come to 5,508, Co-operative Banks to 72, Non-Credit Societies 844, Urban Banks 15, Petty Traders Societies to four, Multipurpose Co-operative Societies to 76 and Grain Banks to 273. The membership of the Co-operative Organisations had also increased from 175,932 to 3 lakhs in 1951 and the total working capital from Rs. 240 lakhs to Rs. 450 lakhs.

IRRIGATION AND PUBLIC WORKS

More than half of the Orissa coastal plains is formed by the combined deltas of the rivers Mahanadi, Brahmini and Baitarani, with their numerous branches and this area is partly exposed to damage through floods which are frequent. A flood protection policy has been carefully worked out by Government and is being gradually implemented. Orissa inherited a canal system, constructed in the latter half of the nineteenth century by a private company for combined navigation and irrigation purposes. The demand for water for cultivation is not so great as was anticipated at the time and the canal system has a very slight margin of profit now that the capital debt has been taken over by the Government of India. From the point of view of national food resources and famine insurance, however, it is most important.

Under the Grow More Food scheme many small irrigation projects have been put through in the State with partial financial assistance from the Centre.

In the post-war five-year plan an ambitious scheme has been prepared for a multi-purpose reservoir on the Mahanadi river at Hirakud near Sambalpur. This reservoir will control excess flooding in the Mahanadi delta, provide electric power and also be used for the irrigation of a considerable area. Further projects on the control and utilization of the Mahanadi river on the model of the Tennessee Valley Authority are the two multi-purpose reservoirs further downstream.

Hirakud Dam Project :—The project was originally approved by the Government of India at an estimated cost of Rs. 47.81 crores. The estimate is under revision. Expenditure upto the end of 1950-51 was Rs. 8.27 crores, and in the current year the expenditure is estimated to be Rs. 9 crores. The provision for the year 1952-53 is being made at Rs. 14 crores. All this money and so also the interest on it is being provided by the Government of India as loan to the State Government.

Machkund Hydro-Electric Scheme :—The scheme is a joint venture of the Governments of Orissa and Madras with equal rights to both Governments, but under the agreement this Government has to transfer 20 per cent of its right to the Government of Madras for a period of 99 years for which she gets compensation. On the expiry of this period this Government can resume its right to the extent transferred on payment of proportionate cost less depreciation. Thus in the initial stage the Government of Madras meets 70 per cent of the cost of the scheme and the Orissa Government 30 per cent. The total expenditure on the scheme upto the end of 1950-51 on account of Orissa's share has been Rs. 79.22 lakhs. The expenditure in the year 1951-52 is Rs. 52.63 lakhs and the provision for 1952-53 stands at Rs. 30.16 lakhs. Orissa's share of the total expenditure which initially computed at Rs. 232 lakhs is likely to rise upto Rs. 279 lakhs in ten years.

The new capital of Orissa is being constructed near the historic town of Bhubaneswar at an estimated cost of Rs. 5.4 crores. Dr. C. H. Koenigsberger, a well-known architect and town-planner, has prepared a master plan and the erection of buildings, the construction of roads, etc., is well in hand.

The new capital has been connected to Cuttack by means of bridges over Kathjuri and Kuakhai rivers.

The total mileage of the roads in the State maintained by the Public Works Department is 3,383-5-67 : metalled 2,200-0-411, and unmetalled 1,183-4-316. The open mileage of railways in the State is 818.24 miles, broad gauge (5'-5") 714.25 miles, and narrow gauge (2'-6") 103.99 miles.

AGRICULTURE

Agriculture is the main occupation of the people. The Director of Agriculture and Food Production is the head of the Department. He is assisted on the Food Production side by three Agricultural Engineers including one Drilling Engineer, one Biochemist, an Assistant Director of Agriculture for multiplication of improved seeds, a Fruit Development Officer, and a Fruit Technologist attached to the Headquarters office and District Food Production officers in the Districts. These officers attend to the subsidised distribution of seeds and manure, including hiring out of improved agricultural machines and implements to cultivators and sinking of tube-wells and also to general propaganda work. A staff of one Overseer or Sub-overseer and two fieldmen is maintained at every Police Station.

Schemes for the Grow More Food Drive have been taken up with the approval of the Government of India, who meet two-thirds of the expenditure and provide most of the loans required for financing schemes of a capital nature. Intensive cultivation schemes have been taken up over an extent of 630,000 acres located in compact blocks. The principal schemes are :—reclamation of waste lands, hiring out of tractors, extension of double and triple crop areas by the use of lift irrigation distribution of improved seeds, manures, agricultural implements, etc., extermination of monkeys and jackals to prevent damage to crops, plant protection schemes and minor and major irrigation. During the current year an additional area of 233,431 acres has been brought under cultivation which will add 25,688 tons to food production. During 1952-53 provision has been made to benefit an additional area of 392,940 acres which will add 48,594 tons to production.

During 1951-52, Rs. 48,75,000 were allotted for construction of minor irrigation works through the agency of the Revenue Department. The total acreage irrigated by these works up to June 1951 is estimated at 56,600 acres and the expected additional yield of foodgrains is 11,000 tons. In the Budget for 1952-53 the provision for minor irrigation works stands at Rs. 8.45 lakhs.

Major irrigation works are executed through the P.W.D. For the current year an expenditure of Rs. 3,58,533 has been sanctioned for this purpose and for the next year a provision of Rs. 25 lakhs has been made in the Budget. For these schemes, the Government of India contribute two-thirds of the unremunerative portion of the expenditure. The remunerative portion of the expenditure is treated as capital expenditure for which the Government of India provide a loan.

INDUSTRIES

The State Government aim at the development of large-scale industries by the promotion of Joint Stock Companies, and the development of small-scale cottage industries through encouragement of co-operative societies.

There are today 18 Technical and Industrial Schools in the State as against 8 in 1947. Expenditure on higher technical training rose from Rs. 88,200 in 1946-47 to Rs. 2,39,064 in 1951-52 and that on Industrial and Craft Schools from Rs. 1,79,611 to Rs. 3,35,112.

Among the main industrial concerns opened and established in the State are the Orissa Textile Mills at Choudwar, the Cement Factory at Rajgangpur, the Refrigerator Factory at Cuttack, a Vegetable Ghee Factory at Chhatrapur, and a Cold Storage Plant at Cuttack. The Orient Paper Mills at Brajarajnagar, a Glass Factory at Barrang and a Sugar Factory at Rayaghada have expanded their output. Two more Spinning and Weaving Mills are in the process of construction. The establishment of several other industrial units, for which there is ample scope in this State, has received the Government's most active and anxious consideration and their promotion is being pursued. Among them are a jute mill, a paper mill, a pipe-making plant, a sugar factory, an aluminium factory, a refractory plant and two ferro-manganese plants; also an iron and steel plant unit, the location of which in Orissa is under negotiation with the Central Government. Negotiations for the establishment of an aluminium plant have fairly far advanced.

Development of cottage industries has also received the attention of the Government. Production of hides has increased from 19,000 lbs. in 1949 to 58,000 lbs. in 1950-51. In the tile Factory taken over by Government in 1948 a new kiln has been constructed to improve the quality of tiles. Development of hand spinning and weaving has made satisfactory progress since 1948 under a regular scheme. Salt production has increased by about 7 lakh maunds since 1946.

The Government have done their best to subsidise cottage industries and also have given advances and loans and have taken shares in medium and large-scale industrial enterprises to the extent of Rs. 146 lakhs.

Mining :—Against 2 mining leases for coal and 7 for other minerals in 1947, there are at present 28 leases for manganese, 5 for iron, 4 for both manganese and iron, 1 for chromite, 5 for coal and 23 for other minerals. The annual income from mining leases now amounts to Rs. 7 lakhs.

TRIBAL AND RURAL WELFARE

A Tribes Advisory Council was set up on the 1st August 1950 in accordance with the provision in the Constitution. There are now 28 Ashram Schools, 490 Seveshrams, 57 Village Welfare Centres, 3 Training Centres and 24 Multipurpose Co-operative Societies for the welfare of the Adivasis.

In accordance with the instructions from the Government of India the State Government have further decided that as far as possible and without diluting the efficiency in administration 20 per cent of the vacancies in all services should be reserved for the Scheduled Castes and 15 per cent for Scheduled Tribes. The maximum age limit for candidates of these classes has been raised to 28 and the fees payable for examination for selection reduced to one-fourth.

1952-53 BUDGET

REVENUE RECEIPTS :—The principal sources of revenue are income-tax, land revenue, excise, stamps, forests, registration, motor vehicle taxation, sales-tax and other taxes. The total revenue for 1952-53 has been estimated at Rs. 11,78,07,000 against the revised estimate of Rs. 11,38,76,000 of 1951-52 thus showing an improvement of Rs. 93,31,000. The revenue estimated under different heads are shown below :—

(Budget estimate in thousands of Rupees)

Income-tax	1,66,44
Land Revenue, Excise, Stamps, Forest, Registration, Motor Vehicle taxation and other taxes and duties	5,81,91
Subvention from the Government of India	91,00
Extraordinary receipts	1,83,75
Other Items	1,54,97
Total	11,78,07

EXPENDITURE CHARGED TO REVENUE :—The total revenue expenditure for the year 1952-53 has been estimated at Rs. 12,06,91,000 against the revised estimate of 1951-52 of Rs. 11,48,33,000 thus showing an increase of expenditure by Rs. 58,58,000. The increase under the various heads are shown below :—

(Figures are in thousands of Rupees)

Land Revenue	6,16
Forest	7,83
Police	5,82
Education	12,47
Medical	3,32
Veterinary	3,57
Capital outlay on Industrial Development	3,50
Miscellaneous Deptts.	8,51
Civil Works	8,62

On the basis of the estimated revenue and expenditure the year 1952-53 will end with a revenue deficit of Rs. 28,84,000. Receipts under the capital head are estimated at Rs. 49,22,73,000 and expenditure under these heads at Rs. 48,85,95,000 thus disclosing a surplus of Rs. 36,83,000. The overall balance position at the close of the year 1952-53 will be as shown below :—

(Figures are in thousands of Rupees)

Opening balance 1952-53	+42,46
Deficit in Revenue Account	—28,84
Surplus in Capital Account	+36,83
Total	+50,45

CAPITAL ACCOUNT :—From 1943-44 upto 1951-52 the Government of India have sanctioned loans to the State Governments upto the extent of Rs. 1,39.09 lakhs for financing Grow More Food schemes. Of this amount Rs. 81.70 lakhs has been repaid upto the end of last year and the outstanding dues on the 1st April stood at Rs. 47.39 lakhs. For Development Schemes the Government of India have sanctioned upto the end of 1950-51 Rs. 10,29 lakhs that is 8,27 lakhs for Hirakud, Rs. 1,29 lakhs for electrical schemes, Rs. 23 lakhs for loans for displaced persons, Rs. 25 lakhs to the Orissa Textile Mills, Rs. 15 lakhs for State Transport Services and Rs. 10 lakhs for the Industrial Housing Scheme. Thus a total outstanding loan against the State Government on the 1st April 1951 stood at Rs. 10,86.39 lakhs. In the year 1951-52 the State Government have received or will be getting from the Centre as loans 900 lakhs for Hirakud, 68 lakhs for electrical schemes, 16 lakhs for Grow More Food Schemes, and 10 lakhs for Industrial Housing.

For the year 1952-53, the Government of India may sanction a loan of Rs. 1,400 lakhs for Hirakud, Rs. 71.6 lakhs for electrical schemes, Rs. 25 lakhs for Grow More Food Schemes and Rs. 17.83 lakhs for loans to displaced persons.

GRANTS IN ADVANCE :—The new legislature was under provisions of Art. 206 of the Constitution called upon to make grant in advance the money required by Government to meet the unavoidable expenditure during the three months following the 31st March 1952. The Assembly have sanctioned a sum of Rs. 2,49.87,000 to meet expenditure on revenue account and a sum of Rs. 2,01,59,000 to meet other expenditure for the said three months.

ADMINISTRATION

Governor.—His Excellency Sir Sayid Fazl Ali.

Chief Minister and Minister for Cabinet, Finance, Home, River Valley Development, Works, Public Relations and Relief and Rehabilitation.—Hon'ble Sri Nabakrishna Chaudhury.

Minister for Revenue, Supply, and Excise.—Hon'ble Sri Sadasiva Tripathi.

Minister for Law, Development, Education and Health.—Hon'ble Sri Dinabandhu Sahu, M.A., B.L.

Minister for Industry and Transport.—Hon'ble Sri Kishore Chandra Deo Dhanj.

Minister for Tribal and Rural Welfare, Labour and Commerce.—Hon'ble Sri Sonaram Soren, B.A., B.L.

Deputy Ministers.—Hon'ble Srimati Basanta Manjari Devi; Hon'ble Sri Bhairab Charan Mahanti, B.A.; Hon'ble Sri Nilamani Routray, B.A., LL.B.; Hon'ble Sri Anup Singh Deo; Hon'ble Sri Santanu Kumar Das; Hon'ble Sri Tirthabasi Pradhan; Hon'ble Sri Krupanjdhi Naik; Hon'ble Shri Radhanath Rath.

SECRETARIES.

Chief Secretary and Secretary, Cabinet, Finance and Relief and Rehabilitation.—B. Mukherji, I.C.S.

Secretary, Home Department.—S. N. Mahapatra, I.A.S.

Secretary, Supply Department.—P. K. Kapila, I.A.S.

Secretary, Education and Health Departments.—R. Sarangi, I.A.S.

Secretary, Law Department.—J. Mahanti, M.A., B.L.

Secretary, Industries, Commerce, Labour and River Valley Development Departments.—Dr. H. B. Mahanti, M.Sc., Ph.D.

Secretary, Development Department.—B. S. Mahanti, I.A.S.

Secretary, Works and Transport Department.—G. C. L. Jonaja, I.A.S.

Secretary, Tribal and Rural Welfare and Public Relations.—C. Misra, B.A.

Secretary to H.E. the Govenor.—B. Misra, I.A.S.

Secretary to H.C.M.—J. A. Dave, I.A.S.

PUNJAB STATE

THE Punjab is situated in the north-west of the Indian Union. It is in fact the Union's frontier State. Created in the middle of August 1947, it came into being as a result of the partition of the Punjab. The old Punjab was the land of the five rivers. Punjab (India) is the land of the two rivers, Sutlej and Beas.

The Punjab State is bounded on the north by the State of Kashmir. In the east it extends as far as the river Jamna. In the south it is bounded by Rajasthan.

Punjab now includes Jullundur and Ambala Divisions and the Amritsar District of Lahore Division and part of Gurdaspur and Lahore Districts. Altogether it contains 13 districts as compared with 29 in the old undivided Punjab. The names of the Districts are (in the Ambala Division) as follows: Hissar, Rohtak, Gurgaon, Karnal, Ambala and Simla, and in the Jullundur Division, Kangra, Hoshiarpur, Jullundur, Ludhiana, Ferozepur, Amritsar, Gurdaspur (excluding Shakargarh Tehsil) and certain portions of Kasur Tehsil which have also been allotted to Punjab (I).

The territory is not homogeneous. In the north-east lie the hill ranges of Shivalak and the Kangra Valley. The Jullundur Division contains rich alluvial soil while parts of Ambala Division or Hariana Prant are dry and waterless tracts. Linguistically too the State is not homogeneous. Punjabi, Western Hindi, Pahari and Rajasthani are all spoken in the different parts of the State.

The total area of Punjab is about 37,430 sq. miles and the total population according to the 1951 census figures is 12,638,611.

The main languages of the State are, as already mentioned, Punjabi and Western Hindi, that is to say, Hindustani with an accent. Punjabi is spoken in the whole of the Jullundur Division and part of Ambala District while Western Hindi is the chief language in the Ambala Division. Two minor languages are 'Eastern Pahari' spoken in the hill tracts of Gurdaspur, Kangra and Simla and Rajasthani spoken in the western parts of Hissar District bordering on Rajputana. All States in Punjab (India) have acceded to the Indian Union, and have merged together to form the Patiala and East Punjab States Union. Some States have merged into the Punjab State.

The thirteen districts of Punjab offer tremendous possibilities of development. It has been estimated that in the field of agriculture the famine-stricken areas of Rohtak, Hissar and Gurgaon will be turned into thriving and flourishing canal colonies with the construction of the Bhakra Dam at Bhakra on the Sutlej in Bilaspur (now a Chief Commissioner's State). In addition to irrigation, the project will also generate electric power. The Bhakra and Nangal schemes will open up the south-east parts of the State and provide scope for new industries.

A word about the capital of the new State will not be out of place here. The provisional capital is, of course, Jullundur. The permanent capital, however, it has been decided, will be located in the sub-mountainous area between Rupar and Chandigarh.

The selected site is about 20 miles from Ambala Cantonment on the south of the road which connects Panchkoola with Kharar a tehsil headquarters.

The nearest railway station is Chandigarh, at a distance of three miles on the Ambala-Kalka section of the Eastern Punjab railway.

According to an expert engineer, the completion of the capital will take about three years.

The climate of Punjab is one of extremes. The rainfall in most districts ranges from 15 inches to 25 inches and it is usually sufficient for cultivation without recourse to artificial irrigation. But in the greater part of Ambala Division the margin is so small that except where artificial means exist any material reduction in rainfall means famine.

AGRICULTURE

With the exchange of population, it is not possible to state what percentage of the population depends on agriculture. Similarly the position regarding the ownership, etc., of the land cannot be indicated unless definite decision is arrived at about the lands vacated by Muslims. The area preserved as forest land in the hills and elsewhere has been reduced to a large extent, being about 7.5 lakh acres.

Despite many changes due to partition, agriculture continues to be the staple industry of the State, affording the main means of subsistence to a large proportion of the population. Of the crops grown, wheat is the most important so far as production is concerned. Next in importance to wheat in the matter of total yield is gram.

According to village papers, the total area in the Punjab in the year 1948-49 was 23,235,800 acres, and its classification under various heads was as follows :—

	Acres
Forests	769,300
Not available for cultivation ..	6,172,100
Other uncultivated lands excluding current fallows	2,454,500
Current fallows	2,314,300
Net area sown during the year ..	11,525,600

The total area of crop sown in the State was 13,337,200 acres (irrigated 4,633,400 and unirrigated 8,703,800 acres). The area and outturn of principal crops was as shown below :—

	Area in acres.	Outturn in tons.
Rice	377,500	155,100 (unhusked)
Wheat	2,744,600	980,300
Barley	410,500	115,000
Jowar	456,300	61,400
Bajra	2,092,100	226,100
Maize	760,700	253,300
Gram	3,016,900	722,400
Rabi Oil-seeds ..	238,800	42,700
Sugar-cane ..	305,700	316,000
Cotton Cleaned—		
Desi ..	194,000	61,000 (in bales)
American ..	44,800	16,700 (in bales)

The area irrigated by various sources was as follows (in acres):—

Government canals 2,604,600; private canals 218,300; tanks 6,800; wells 1,653,900 and other sources 26,100.

The development of irrigation on the completion of Bhakra Dam is expected to lead to a great expansion of the area under wheat. Other important crops are bajra, maize, barley, rice, jowar, oil-seeds (sarson, taramira, toria, groundnut and sesamum), cotton and sugar-cane. The short-staple indigenous varieties predominate in the State the American cotton covering only about one-third of the total area under cotton.

LAND TENURE

The great mass of the landed property in the Punjab is held by small proprietors, who cultivate their own land in whole or part. The chief characteristic of the tenure generally is, that these proprietors are associated together in village communities, having, to a greater or lesser extent, joint interest; and under the present system of cash payments, limited so as to secure a certain profit to the proprietors, jointly responsible for the payment of the revenue assessed upon the village lands. It is an almost invariable incident of the tenure, that if any of the proprietors wishes to sell his rights, or is obliged to part with them in order to satisfy demands upon him, the other members of the same community have a preferential right to purchase them at the same price as could be obtained from outsiders.

In those communities with partial or entire separation of proprietary title, the measure of the rights and liabilities of the proprietors vary very much. It sometimes depends solely upon original acquisition and the operation of the laws of inheritance; in other cases definite shares in the land of a village or sub-division, different from these which would result from the law of inheritance, have been established by custom; in yet other cases, reference is made not to shares in lands, but to shares in a well or other source of irrigation; and there are also many cases in which no specified shares are acknowledged but the area in the separate possession of each proprietor is the sole measure of his interest.

In the Simla hills and in the more mountainous portions of Kangra district the present village communities consist of numerous small hamlets, each with its own group of fields and separate lands, and which had no bond of union until they were united for administrative purposes at the time of the Land Revenue Settlement.

In some cases the village communities, while holding and managing the land as proprietors, are bound to pay a quit rent to superior proprietors under whom they hold. The Settlement is made according to circumstances, either with the superior proprietor, who collects the Government revenue as well as his quit rent from the communities, or with the communities in actual possession of the land, who pay the land revenue to Government and the quit rent to the superior proprietor. In either case the amount which the superior proprietor is entitled to collect is determined at Settlement as well as the amount of land Revenue demand.

There are sometimes also proprietors holding lands within the estates of village communities, but who are not members of the communities, and are not entitled to share in the common profit nor liable for anything more than the revenue of their own lands. They are called "Malikan Qabza". They pay village charges as well as quit rent if any to the proprietary body of the village. The most common examples of this class are the holders of plots at present or formerly revenue free, in which the assignees were allowed to get proprietary possession in consequence of having planted gardens or made other improvements or because they had other claims to consideration in the part of the village community.

The official classification of village tenure is as below :—

(1)	Zamindari	(a) Landlord (Khalis or Wahid).
		(b) Communal (Mushtarka).
(2)	Pattidar	(a) Perfect (Mukamil).
		(b) Imperfect (Ghair Mukamil).
(3)	Bhaichara	(a) Perfect (Mukamil).
		(b) Imperfect (Ghair Mukamil).

The State being preponderantly agricultural, a considerable proportion of the wealth of the people lies in livestock. Large profits are derived from the cattle and dairy trades and wool is a staple product in Kangra district and throughout the plains generally. Though the trade in hides and skins has a bright future, for the State as a whole the industry is not likely to flourish in the new set-up.

INDUSTRY

The industrial economy of Punjab State received a serious set-back due to the partition of India. This was a result of the migration of skilled Muslims to Pakistan and migration of industrialists to India. The gap created by the migration of Muslims has been partly filled up by training of displaced persons in various industries. The training schemes, however, still continue. In order to rehabilitate the displaced industrialists, new industrial areas are being established at eight stations, where new factories will be set up.

The number of registered factories in Punjab (India) now stands at 1,473 as compared to 567 immediately after the partition.

The pride of place among the State's industries goes to the textile group. There are four cotton textile mills, about 150 cloth weaving factories, over 300 woollen factories and nearly 1,000 hosiery concerns in the Punjab, and the principal centres for this industry are Amritsar, Ludhiana, Dhariwal (District Gurdaspur), and Bhiwani (Dist. Hissar). Next in importance to the textile industry are the engineering industries which produce a wide miscellany of articles, *e.g.* agricultural implements, machine tools, band saws, bicycle components, sewing machine parts, wood and machine screws, bolts, nuts, hinges, water fittings, etc., etc. The State has also sixteen re-rolling mills located at Amritsar, Jullundur, Ludhiana, Batala, Kaithal and certain other centres. The sports goods industry at Jullundur and Batala is rapidly regaining the position of renown it occupied in international markets before the partition at Sialkot. The tea industry of Kangra is improving in quality as well as output. Considerable potentialities exist in the State for the development of Pharmaceutical industry in view of the abundant resources of herbs and crude drugs available in Kangra District. Certain cottage industries products of the State, *e.g.* Kulu Shawls, ivory wares of Amritsar and lacquer work of Hoshiarpur are marked by the distinctive genius of the Punjabi worker.

The State Government is showing keen interest in the industrialisation of the State. New industrial townships have been planned by the Government at Jullundur, Ludhiana, Jagadhri, Panipat, Sonepat and Bahadurgarh, where 71 new factories have already been set up. An industrial area has also been planned at Chandigarh, the new Capital of the State. The State Government have set up two Committees, each having a large non-official element in its membership, *viz.* the Standing Advisory Committee and the Cottage Industries' Board, which are consulted on important matters affecting the industrial development of the State. In order to ensure adequate planning and proper coordination, and to render the maximum possible assistance to the industrialists of the State, the department of Industries was reorganised in 1951.

HEALTH SERVICES

According to the constitution of the Health Directorate, the Director of Health Services is the Head of the unified department which is termed as the "Punjab Health Department". The Director of Health Services is assisted by one Deputy and one Assistant Director on the Medical side, the last being entrusted with health insurance and medical arrangements in connection with relief camps. He also has a non-technical personal assistant. On the Health side, he is assisted by one Deputy and one Assistant Director.

The Health Organisation which exists in each district of this State for the control of epidemic diseases, for the improvement of rural sanitation and for the promotion of public health in general comprises one District Medical Officer of Health with one Sub-Assistant Health Officer, a Sanitary Inspector for each tehsil, one Sanitary Supervisor, 12 Sanitary Beldars, one Superintendent of Vaccination and a contingent of Vaccinators (one per Thana) which may vary from 15-18 in a District, besides whole-time Municipal Medical Officers of Health employed by the Municipal Committees in 8 principal towns. The staff under the District Medical Officer of Health is reinforced as required to meet emergencies by two Divisional Public Health Corps Units each of which is provided with a motor truck to ensure prompt access to remote villages. In addition to the above there exists a separate organisation in the State for the investigation and control of malaria under the supervision of the Entomologist-cum-Malariologist, Punjab Health Department. The organisation consists of Headquarter's personnel (for conducting specialized investigation on malaria, insecticides and other entomological problems) and three Field Malaria Control Units for carrying out intensive anti-malaria operations in the worst affected areas of Karnal and Gurgaon Districts and in Amritsar town. For controlling malaria in the rural areas of the remaining districts of the State, routine measures are taken during the malaria season by the public health staff attached to each district. The District Medical Officers of Health and Municipal Medical Officers of Health also work as Additional Inspectors of Factories.

The problems of nutrition, hookworm disease, goitre, leprosy, tuberculosis and venereal diseases are also effectively tackled.

Suitable measures are undertaken to enforce the Punjab Pure Food Act for which purpose Government Food Inspectors are appointed in addition to those employed by Local Bodies. There are 75 Maternity and Child Welfare Centres throughout the State under the charge of fully trained Lady Health Visitors who attend to anti-natal and post-natal cases and train indigenous dais and supervise their work. These centres are controlled by an Inspectress, Health Centres, Punjab.

A number of rural social lady welfare workers have been appointed in the rural areas to teach the principles of environmental hygiene and the broad principles of maintaining health.

For curative measures 559 Hospitals and dispensaries are provided in the State including Maternity Hospitals, Tuberculosis Hospitals and Sanatoriums and various hospitals and sections under the charge of women doctors. Some of these hospitals provide all modern facilities for diagnosis and treatment according to the latest methods, *e.g.*, X-Ray, laboratory, radium treatment, etc. Hospitals at District and Tehsil Headquarters are being provincialised and modernised in order to bring them up to the standard obtaining in progressive countries by increasing hospital accommodation, augmenting staff and supplying additional equipment and modern facilities. Dental clinics for the treatment of persons suffering from dental diseases are also provided at selected District Headquarters Hospitals. In addition to the above there exists a Mental Hospital at Amritsar for the treatment of patients suffering from mental diseases.

There are one Medical College and two Medical Schools in this State for the training of both men and women students for the M.B.B.S. degree of the Punjab University which is recognized by the Medical Council of India and L.M.S., and L.S.M.F. diplomas of the Punjab State Medical Faculty, with up-to-date hospitals attached which form practical training ground for students. Facilities are also provided for post-graduate training at the Medical College, Amritsar, for diploma in tubercular diseases, and diploma in ophthalmology. Classes for the B. Pharmacy Degree of the Punjab University and for dispenser-dressers diploma are also held at the Medical College, Amritsar. Arrangements for research also exist at the Medical College, Amritsar and a well-equipped bacteriological laboratory is provided for the examination of pathological and bacteriological specimens and preparation of vaccines. A chemical laboratory exists at Kasauli for the examination of medico-legal exhibits, samples of water, articles of food, etc., besides a food and drugs laboratory at Ambala which examines samples of foods seized by food inspectors and of drugs by drug inspectors under the Punjab Pure Food Act and the Drugs Act, 1940.

A health School at Ludhiana has been established in association with the Women's Christian Medical College, Ludhiana, for the training of Lady Health Visitors in this State.

A class for imparting instruction for Sanitary Inspectors' Certificate has started functioning at Amritsar. Besides admitting candidates of the Punjab State, ten seats are reserved for the nominees of the PEPSU, Himachal Pradesh, Kashmir and Delhi State.

A Vaccine Institute exists at Amritsar. The manufacture of vaccine lymph has started from 4th January 1952.

EDUCATION

As a result of partition education in this State received a severe set-back; but now all the institutions are functioning normally. Some of the disrupted institutions have re-established themselves and quite a number of new institutions have been opened.

University classes in the Honours Schools in Physics and Chemistry as also M.A. in English have been started in the Government College, Hoshiarpur and additional facilities for the teaching of Science have been provided in some of the other colleges.

The majority of educational institutions are still under private control.

Government maintains 8 Arts colleges including 2 for women, 2 Training Colleges, one for men and the other for women, 1 Normal School for men, 81 Secondary Schools for boys and girls and many centres for vocational training. There is one first grade Medical College and in addition there are 32 Technical and Industrial Schools for boys and girls.

The Department of Education is under the charge of the Hon'ble Minister of Education, who is assisted in the work of administration by the Director of Public Instruction who is also Secretary to Government, Education Department.

POLICE

The Police force is divided into District Police, Railway Police, Criminal Investigation Department, Punjab Armed Police and Police Radio Section. The entire force is under the control of the Inspector-General, who has under him two Deputy Inspectors-General in charge of ranges comprising several districts. The Criminal Investigation Department is controlled by the Deputy Inspector-General, who is also in charge of the Finger Print Bureau at Phillaur. There is a Police Training School at Phillaur in charge of the Principal who is of the rank of Superintendent of Police. The Railway Police is under an Assistant Inspector-General. The Punjab Armed Police is controlled by a Commandant and the Police Radio Section by a Technical officer of the rank of Superintendent of Police. The District Police are controlled by Superintendents who are assisted by one or more Assistant Superintendents or Deputy Superintendents.

As a security measure a Punjab Volunteer Corps has also been created. It is under the control of a Provincial Commandant.

JUSTICE

The administration of Justice both Civil and Criminal in the Punjab and Delhi States is entrusted to the High Court of the Punjab.

The Court sits at Simla (with a Circuit Bench at Delhi) and is composed of a Chief Justice, six Puisne Judges (either Civilians, Barristers or Advocates). Subordinate to the High Court are the District and Sessions Judges (10 in number) each of whom exercises civil and criminal jurisdiction in one or more civil and sessions divisions.

GOVERNMENT

Prior to the amendment of the Government of India Act in 1919 the head of the administration then covering both the Punjabs, was a Lieutenant-Governor, drawn from the ranks of the Indian Civil Service. Under the Act of 1919 the province was raised to the status of a Governorship, with an Executive Council and Ministers, the Governor-in-Council being in charge of the Reserved Subjects and the Governor with his Ministers of the Transferred Subjects. With the introduction of part III of the Government of India Act, 1935, this Executive Council was substituted by a Council of Ministers and the Legislative Council by an enlarged Legislative Assembly with wide powers of legislation and control. With the passing of the Indian Independence Act of 1947, the Province was partitioned and thus the new State of Punjab (India) came into existence.

The business of Government as before is carried on through the usual Secretariat which consists of five Secretaries, designated (1) Chief, (2) Home, (3) Finance, (4) Medical and Local Government and (5) Civil Supply Department; five Under-Secretaries, and Assistant Secretaries. In the Public Works Department, there are five Chief Engineers, two in the Buildings and Roads Branch, one in the Electricity Branch and two in the Irrigation Branch while the Legal Remembrancer is also the Secretary to Government in the Legislative Department. The head of the Police Department is Joint Secretary and of the Education Department a Secretary to Government. Under the Governor the State is administered by two Commissioners for Jullundur and Ambala divisions, who exercise general control over the 13 Deputy Commissioners in districts.

The principal heads of Department in the State are given below.

A five-year plan has been prepared involving an expenditure of Rs. 21.67 crores.

ADMINISTRATION

GOVERNOR,: H. E. MR. CHANDULAL MADHAVLAL TRIVEDI, K.C.S.I., C.I.E., O.B.E., I.C.S.*

PERSONAL STAFF

Private Secretary, S. Jaswant Singh Basur, I.A.S.
Aide-de-Camp, Captain Laxman Sharma.

CABINET

Chief Minister, General Adm., Publicity, Law, Order, Jails, Justice, Bhimsen Sachar.

Land Revenue, Development, Agriculture, Forests, Veterinary, Co-operative Societies, Consolidation of Holdings, Sardar Pratap Singh Kairon.

Irrigation, Chaudhri Lehri Singh.

Capital Projects, P.W.D., Sardar Gurbachan Singh Bajwa.

Finance, Industries, Refugees and Rehabilitation, Sardar Ujjal Singh.

Local Self-Government, Food, Civil Supplies, Pandit Shriram Sharma.

Education, Health, Transport, Lala Jagat Narain.

Labour, Stationery, Printing, Excise, Taxation, Chaudhri Sunder Singh.

CIVIL SECRETARIAT

Chief Secretary—M. R. Sachdev, I.C.S.

Secretary, Health and Local Government Departments—Mangat Rai, I.A.S.

Secretary, Finance Department—E. N. Mangat Rai, I.C.S.

Home Secretary—Vishan Bhagwan.

Additional Secretary, Civil Supplies Department—S. Gyansingh Kahlon, I.C.S.

Financial Commissioner, Revenue and Development Departments—P. K. Kaul, I.C.S.

Financial Commissioner, Relief & Rehabilitation Departments—P. N. Thapar, C.I.E., I.C.S.

Additional Chief Secretary and Secretary, Development Department & Secretary, Industries Dept. —Nawab Singh, I.C.S.

Legal Remembrancer—I. M. Ismail, I.C.S.

PUBLIC WORKS DEPARTMENT

Irrigation Branch

Secretary—(Canals), D. D. Jain.

Secretary—(Projects), S. B. Sarder Sarup Singh.

Buildings and Roads Branch.

Secretary—R. B. Brij Mohan Lal, I.S.E.

Secretary, Electricity Dept., S. S. Kumar.

MISCELLANEOUS DEPARTMENTS

Director of Agriculture—B. S. Sawhney.

Director of Land Records—Mian Kushal Singh.

Director of Public Instruction—C. L. Kapur.

Inspector-General of Police—Sant Parkash Singh, I.P.

Chief Conservator of Forests—J. Singh, M.B.E., I.F.S.

Director of Health Services—Lt.-Col. P. C. Dutta.

Inspector-General of Prisons—R. B. B. C. Katoch.

Accountant-General—Karbar Singh Malhotra, I.A.A.S.

Postmaster-General—Maj. Lochan Singh.

Advocate-General, Sarv Mittar Sikri.

PUBLIC SERVICES COMMISSION

Chairman—Ram Chandra, I.C.S.

Members—S. S. Sant Singh, P.C.S. (Retd.); Ch. Bharat Singh, B.A., LL.B.

GOVERNORS OF THE PUNJAB

Sir Edward Maclagan, K.C.I.E., C.S.I. ..	1920

UTTAR PRADESH

UTTAR Pradesh lies in practically the centre of the sub-continent in the north. It is bounded on the north by Tibet, on the north-east by Nepal, on the east and south-east by Bihar, on the south by Madhya Pradesh, and on the west by the Unions of Rajasthan and Madhya Bharat and the States of Delhi and Punjab. Its total area amounts to 112,523 square miles, which includes the area of the three former Indian States of Rampur, Tehri-Garhwal and Banaras with a total area of 6,276 square miles. The total population according to the 1951 census is 6,32,54,118.

The State, originally termed the North-Western Provinces and so amalgamated in 1877, was named the United Provinces of Agra and Oudh in 1902 which was changed to United Provinces on April 1, 1937, and received its present designation on January 24, 1950. It includes four distinct tracts of country: portions of the Himalayas, including the Kumaun division which consists of three hill districts, two of which are entirely in the hills and one partly in the submontane belt; the sub-Himalayan tract; the great Gangetic plain; and portions of the hill systems of Central India including Bundelkhand. The Gangetic plain is protected by an extensive canal system, which though somewhat liable to run short of water in extremely dry years, is of great benefit in all ordinary years and years of limited drought.

The first two of these tracts are infertile and support a very sparse population and the Central Indian plateau is almost equally infertile, though more thickly populated. The soil of the Gangetic plain, however, possesses extreme fertility and here the density of population varies from 542 persons per square mile in the west to 555 in the centre and 753 in the east, which gives the State as a whole a greater population pressure on the soil than any other part of India save Delhi and the Bengal area. In the south there are low rocky hills, broken spurs of the Vindhya mountains, covered with stunted trees and jungle, and in the north the lower slopes of the Himalayas, clothed with dense forest, affording excellent big and small game shooting, and rising beyond in a tangled mass of ridges, ever higher and higher, until it reaches the line of the eternal snows, but the greater part of the State consists of level plain, teeming with highly-cultivated fields and watered by three rivers—the Ganga, Jamna and Gogra.

ADMINISTRATION

The State is administered by a Governor and a popular Ministry which aids and advises him in all matters. The Legislature consists of two Chambers, *viz.* Legislative Assembly which has a Speaker and a Deputy Speaker and the Legislative Council which has a Chairman and a Deputy Chairman.

The medium for the transaction of public business is the Secretariat, the staff of which consists of Secretaries (including Chief Secretary), Joint Secretaries, Deputy Secretaries, Under-Secretaries, Officers on Special Duty and Assistant Secretaries.

The Board of Revenue is the highest court of appeal in revenue and rent cases, being the chief revenue authority in the State. There are 51 Districts in U.P. and 10 Divisions. There are five Divisional Commissioners, each being in charge of two Revenue Divisions. Here is a list of the Districts and the Divisions into which they are grouped.

MEERUT-AGRA DIVISION

Meerut Division: Dehra Dun; Saharanpur; Muzaffarnagar; Meerut; Bulandshahr.

Agra Division: Aligarh; Mathura; Agra; Mainpuri; Etah.

ROHILKHAND-KUMAUN DIVISION

Rohilkhand Division: Bareilly; Bijnor; Budaun; Moradabad; Rampur; Shahjahanpur; Pilibhit.

Kumaun Division: Naini Tal; Almora; Garhwal; Tehri-Garhwal.

ALLAHABAD-JHANSI DIVISION

Allahabad Division: Farrukhabad; Etawah; Kanpur; Fatehpur; Allahabad.

Jhansi Division: Jhansi; Jalaun; Hamirpur, Banda.

BANARAS-GORAKHPUR DIVISION

Banaras Division: Banaras; Mirzapur; Jaunpur; Ghazipur; Ballia.

Gorakhpur Division: Gorakhpur; Basti; Azamgarh; Deoria.

LUCKNOW-FAIZABAD DIVISION

Lucknow Division: Lucknow; Unnao; Rae Bareli; Sitapur; Hardoi; Kheri.

Faizabad Division: Faizabad; Gonda; Bahraich; Sultanpur; Pratapgarh; Bara Banki.

Each District is under the charge of a District Officer, termed Magistrate and Collector in Agra, and Deputy Commissioner in Avadh and Kumaun.

The average area of each District is 2,213 square miles and the average population over a million.

Each Division has an average area of nearly 10,600 square miles and an average population of over 6 millions.

The districts are sub-divided into *Tahsils*, with an average area of 518 square miles and an average population of 236,000. Each *Taksil* is in charge of a *Tahsildar*, who is responsible for the collection of revenue, and also exercises judicial powers. *Tahsils* are divided into *parganas* which are units of some importance in the settlement of land revenue. Subordinate to the *Tahsildars* are *naib tahsildars* and *kanungos*. Ordinarily there are three *kanungos* and one *naib tahsildar* to a *tahsil*. The *Kanungos* supervise the work of the *patwaris*, or village accountants, check their papers and make such inquiries as may be entrusted to them by superior officers.

For judical purposes (revenue and criminal), the District Officer assigns a sub-division, consisting of one or more *tahsils*, as the case may be to each of his subordinates, who may be members of the Indian Administrative Service or U.P. Civil Service.

MANUFACTURES

The State is not rich in minerals. Iron and copper ore are found in the Himalayan districts. There were mines of importance, but owing to high cost of production and inaccessibility, most of them have been closed. Coalfields exist in the district of Mirzapur in Tehsil Sanghrauli. Gold is found in minute quantities by washing the sands in some of the rivers in the hills. Limestone is found in the Himalayas and in the districts of Etawah and Banda, and stone is largely quarried in the Mirzapur district. Other kinds of stone quarried, though in small quantities, are kankar and slates.

Cottage and artistic industries, however, abound in U.P. The total number of cottage workers is about 50 lakhs. They produce goods worth 170 crores a year. The most important of these industries are handloom and cloth-weaving, leather tanning and shoe-making, oil seed crushing, glass and bangle making and brassware. Cotton is ginned and spun throughout the western districts of the State as a home industry; and weaving by means of handlooms is carried on in most districts. Chief handloom weaving centres are Tanda (Faizabad), Banaras, Mau (Azamgarh), Mubarakpur (Azamgarh), Mau Aima (Allahabad), Gorakhpur, Maghar (Basti), Khalilabad (Basti), Bara Banki, Sandila (Hardoi), Etawah, Amroha, Bhojepur Pipalsana (Moradabad), Meerut, Sikandrabad (Bulandshahr), Deoband (Saharanpur), Sikandrarao (Aligarh), and Dhampur (Bijnor). Kanpur is the chief centre for cotton spinning and weaving mills. According to the latest figures available, 3,000 persons are employed in cotton ginning, cleaning and pressing factories and 72,000 in spinning and weaving mills. The number of actual handloom weavers is about 3,000,000. Natural and artificial silk weaving used to be confined to Banaras (where the famous 'Kimkhab' brocade is made), Sandila, Mau (Azamgarh) and Bisalpur (Pilibhit). Embroidery work is done at Lucknow, where the noted 'Chikan' work of cotton on muslins is produced, and in Banaras where gold and silver work is done on silk, velvet, crepe and georgette. Banaras uses local gold thread for embroidery work and 'Kimkhab' weaving. Gorakhpur has lately specialised in the manufacture of crepe and turkish towels. Mirzapur specializes in pile carpets. Farrukhabad, Lucknow, Mathura Tanda and Pilkhawa are noted for their print, on cotton cloth.

Agra, the principal centre of shoemaking, is rightly called the Northampton of India and produces shoes worth crores of rupees a year. Kanpur is next to it in importance.

Glass Industry.—The glass industry is important at Bahjoi, Balawali, Sasni, Harangau, Shikohabad, Naini (Allahabad), Ghaziabad and Banaras. Firozabad is the chief centre for manufacturing glass bangles in India.

There are in all about forty-one hollow-ware factories, and eighty glass bangle factories in the State. Out of the forty-one hollow-ware factories nine are large-scale factories and the others are comparatively small. The total amount of the goods produced in these hollow-ware factories is estimated at 25,000 tons per year valued at 4·5 crores of Rupees per year. The bangle factories at Firozabad produce about 10,000 tons of bangles per year, valued at Rs. 6 crores per year.

Besides, a cottage phial industry exists in the District of Bijnor and in the Aligarh district. There are about 120 cottage workshops having a total production amounting to rupees 20 lakhs per year. In the past the glass bead industry was developed in the State owing to the efforts of the Glass Technology Section, Department of Industries, U.P., and at present about 100 cottage workshops are engaged in this trade producing goods to the total value of 5 lakhs per year. The total labour engaged in the large-scale and cottage industry is estimated between 55,000 and 60,000.

Moradabad is noted for its lacquered brass work, Banaras for brassware engraving and repousse; Farrukhabad, Pilkhawa (in Meerut district) and Muttra for their calico prints and Agra for its durries and marble and alabaster articles; porcelain wares are now made at Kurja and glazed pottery at Chunar and Meerut; clay figures of men and fruits at Lucknow; woollen carpets at Mirzapur and Bhadohi (Banaras) and cotton carpets at Shahjahanpur and Agra.

The making of brass utensils at Mirzapur, Farrukhabad, Hathras, Moradabad, Shamli (Muzaffarnagar), Banaras, Bahraich and Oel (District Kheri), the carving and inlay work of Nagina and Saharanpur, the art silk industry of Tanda (Faizabad), the lock and brass fittings industry at Aligarh, cutlery at Kaimganj and Hathras, the copper utensil industry of Almora, the durries of Khairabad (Sitapur), Agra and Bareilly, the pottery at Nizamabad (District Azamgarh) and the ivory work of Lucknow and manufacture of scissors at Meerut also deserve mention.

As a result of World War II blanket making has developed on a large scale in the districts of Muzaffarnagar, Meerut, Najibabad (Bijnor), and the manufacture of locks, safety and split pins and other miscellaneous iron articles at Aligarh. The weaving of tweeds has developed as a new industry in Almora district.

Oils.—There are four factories manufacturing vegetable ghee with a capacity of about 150 tons per day. The oil crushing industry is well developed in the State since U. P. produces 2¼ crore maunds of oil-seeds. There are over 146 big oil mills registered under Factories Acts and over 250 small oil mills working with power. About half a dozen oil mills are equipped with refining plant. Oil crushing by bullock driven wooden ghanis is also well developed in the villages. Attempt is being made to replace the old type of ghany with the new Wardha type. There are about 25 big soap factories besides a large number of small manufacturers producing in all about 3 lakh maunds of toilet and washing soap annually. Paints and varnishes industry is being developed with the coming into existence of 6 paints and varnishes factories producing 3,500 tons of paints and 150,000 gallons of enamel and varnish annually. Boiled oil is already being manufactured by some firms producing about 450,000 gallons annually. Allied industries like textile auxiliaries and toilets are being manufactured at some places. Tin canisters are made at Agra, Hathras, Etawah, Mainpuri and Ghaziabad.

AGRICULTURE

The chief industry is agriculture, which is the principal source of livelihood of a little over 70 per cent of the population and a subsidiary source of income to a further 8 per cent. The soils of the State generally yield excellent crops of rice, millet, maize, linseed, mustard, cotton, wheat, barley, gram, sugarcane, pulses and potatoes, rice being grown mostly in low-lying heavy clays, and potatoes on the higher valleys.

The greater part of the State is highly cultivated. The rainfall varies from 50 to 70 inches in the hills, 40 to 50 inches in the Banaras and Gorakhpur Divisions, while the Agra Division receives only about 25 to 30 inches annually. Drought seriously affected Bundelkhand and the Agra Divisions in the past; better drainage and irrigation facilities have effected considerable improvement. In the latter area, however, shortage of water in the canals and the general lowering of the water level still continue to react against full agricultural returns. Steps are being taken to increase the amount of water passing down the canals.

The price of rice rose almost steadily till May 1950, when the maximum price was attained, but continued to decline thereafter with slight oscillations followed by an abrupt fall in the closing months. The price of wheat was at its peak in the month of March but continued to decline thereafter with some fluctuation till it recorded the lowest value in September followed by a rise upto November and a slight fall in December. The price of barley was highest in the month of February, followed by a steady fall till July when it recorded its lowest value but continued to rise afterwards with slight fluctuations. The price of gram showed an abrupt fall in the month of April and recorded the lowest value in May, followed by a sudden rise in June and an abrupt fall in July but continued to rise almost steadily in the succeeding months till it recorded the highest value at the end of the year. The price of Arhar rose till March but declined afterwards and recorded the lowest value in June followed by a steady rise in the subsequent months with slight oscillations, till it attained its peak value in December 1950.

There was decrease in the area under cotton, as compared with the corresponding figure of the previous year but a marked increase in the total outturn and consequently the average outturn also increased to a marked extent. The area under wheat decreased a little but the total outturn registered a moderate rise and so the average yield had a moderate increase. As for rice, the area increased to a slight extent but the total outturn registered a marked fall and hence there was a considerable decrease in the average outturn. There was a moderate increase in the area under sugarcane but only a slight increase in the total outturn and hence the average outturn decreased slightly.

Land is held on Zamindari tenure in Agra and Taluqdari tenure in Oudh. The principal land owners in Oudh are the Taluqdars, some of whom own very large estates. The area held in Taluqdari tenure amounts to 54 per cent of the total area in Oudh.

The State Legislative Assembly passed on August 8, 1946 a resolution accepting the principle of abolition of Zamindari system in the State. With this end in view the U.P. State Legislature passed the U.P. Zamindari Abolition and Land Reforms Bill, 1950. The Bill, as passed, has received the assent of the Governor of U.P. and the Indian President. The validity of certain sections of the Act was first challenged in the High Court of Judicature at Allahabad. The Supreme Court upheld the validity of the Act and on July 1, 1952 Government started taking over the Zamindaris.*

There is a Government College of Agriculture at Kanpur offering agriculture and allied sciences upto post-graduate standard and 4 Government Schools of Agriculture at Gorakhpur, Bulandshahr, Chirgaon (Jhansi) and Hawalbagh (Almora) offering a special two years' Diploma Course in Agriculture aiming at giving the students a practical training in Agriculture. In addition there are non-Government Agricultural Institutions, namely, Agricultural Institute, Allahabad; Balwant Rajput College, Agra; K.E.M.U. Jat College, Lakhauti (Bulandshahr) and Jat Vedic Agricultural College, Barauti (Meerut) teaching upto degree standard and several other Government and non-Government Agricultural institutions which impart instruction in agriculture upto High School and Intermediate standard. The Allahabad Agricultural Institute imparts training in agricultural engineering also upto degree standards.

THE PEOPLE

The population is mainly Hindu. The 1951 census disclosed slight variations in the communal percentages. The Hindus were 85·05 per cent as against 83·02 per cent in 1941, the Muslims numbering 14·28 per cent as against 15·54 per cent at the previous census. The total of all other communities was ·67 per cent comprising Indian Christians, Anglo-Indians, other Christians, Sikhs, Jains, Parsees, Buddhists, Jews, Tribes other than Scheduled Castes and of persons who declared themselves as belonging to no caste or religion. Among the Hindus are included Scheduled Castes, caste Hindus and Arya Samajists.

The three main physical types are Dravidian, Aryan and Mongoloid, the latter being confined to the Himalayan and sub-Himalayan districts and the former to south Mirzapur and Bundelkhand, whilst the high caste Aryans are frequent in the western districts of the State. Most of the people, however, show a mixed Aryan-Dravidian origin.

The spoken language of the State is Hindustani, written in Nagri and Persian characters. There are distinct literatures in the Hindi and Urdu languages respectively. But Hindi is the language of the vast majority of the people and Government have made Hindi written in the Devanagari script the State language of Uttar Pradesh.

LOCAL SELF-GOVERNMENT

The main units of local self-government are the district and municipal boards. They are elected bodies headed by non-officials. Most of the Municipal Boards have executive officers to whom certain administrative powers are reserved. The principal official functionary in the case of District Boards, is the Secretary to whom also certain powers are reserved. The administrative functions of the Municipal and District Boards are performed by the President and Executive Officer or the Secretary, but the Boards themselves are directly responsible for most of the administration. In the case of the District Boards the powers, etc. are shared to a larger extent by their executive committees installed after the general election of 1948. The constitution of Municipal and District Boards is now being liberalised, with direct election of chairman, widened franchise on the basis of adult franchise with reservation of seats for Scheduled Castes as the main features of the reform.

The general elections both of District and Municipal Boards on the above basis are expected to be held in 1952.

The District Boards obtain 54.28 per cent of their income from Government grants. The other chief sources of income are the local rate levied on land owners and the tax on property. The latter tax is levied so far by only 27 Boards out of a total of 49. The chief sources of municipal income are the octroi or terminal tax, toll and house-tax.

JUSTICE

The High Court of Judicature at Allahabad exercises jurisdiction over the whole of the State as one single unit. For the convenience of the public of Avadh and to avoid sudden dislocation, a Bench of this High Court works at Lucknow throughout the year. The sanctioned strength of the amalgamated High Court consists of 22 permanent Judges including the Chief Justice.

There are 37 posts of District and Sessions Judges of which eight are held by officers belonging to the Indian Civil Service, and the rest by U.P. Higher Judicial Service Officers and Officers of the U.P.C.S. (Judicial Branch). With effect from July 1, 1951, the strength of the U.P. Higher Judicial Service was fixed at 37 District and Sessions Judges and 45 Civil and Sessions Judges. The U.P. Judicial Service Rules have also been amended so that women are eligible for recruitment to the service and candidates are required to possess a thorough knowledge of Hindi. For future recruitment, candidates will be required to have put in at least three years' practice at the bar. Usually the Judges do the sessions work and exercise appellate jurisdiction in civil and criminal cases and in certain cases under the U.P. Tenancy Act.

The District Judges have under the Indian Companies Act been invested with the power to try company law cases in respect of companies whose subscribed capital does not exceed Rs. 50,000. Prior to this, such cases were decided only by the High Court and the District Judge, Kanpur. The Jurisdiction of the District Judge, Kanpur, has not been curtailed.

Some civil judges in the State have been invested with powers of Assistant Sessions Judges to try Sessions cases of lesser importance and some munsiffs have been invested with magisterial powers for trying criminal cases.

Appeals from munsiffs always lie to the District Judge while those from the Civil Judges go to the High Court except in cases of a value of Rs. 5,000 or less which are heard by the District Judge. Small cause court judges ordinarily try suits to the value of Rs. 500 but judges presiding over small causes courts are empowered to try suits of which the value does not exceed Rs. 1,000. There are also honorary munsiffs whose jurisdiction is limited to Rs. 200.

District Officers and their assistants including tahsildars, preside in criminal courts as Magistrates and as Collectors and Assistant Collectors, in rent and revenue courts and dispose of a good deal of the work. Honorary Magistrates who function in almost all the districts deal with criminal cases. Besides, magisterial powers had been conferred as an experimental measure for a period upto May 31, 1951 in the first instance, upon some suitable sub-Registrars of the State to enable them to assist in the disposal of criminal case work. Judicial officers have been appointed temporarily all over the State to assist in the disposal of rent and revenue cases. The number of Judicial Officers working at present is 175. Sixty Judicial Officers have been made permanent with effect from April 1, 1951 and the rest of them continue on a temporary basis.

A scheme for the separation of judicial and executive functions was introduced in the State in 8 districts in 1949. From July 1950, in view of the successful working of the scheme, it was extended to 10 more Districts. In these 18 Districts Additional District Magistrates (Judicial) have been appointed to do purely judicial work independently of the District Magistrates. Under this scheme the judicial side of the revenue work and criminal cases, which used to be done by ordinary magistrates, are now done by Judicial Officers. These Officers have no concern with the executive work of the Government. Appeals from the orders of all Magistrates now lie only to Sessions Judges.

Kumaun was brought under the civil jurisdiction of the High Court in 1926. The Deputy and Assistant Commissioners exercise inferior civil powers in this Division which has no separate civil courts. The Judicial Officers in Kumaun have powers to deal with civil suits upto a valuation of Rs. 5,000. They do purely Judicial (Criminal and Civil) work and take no part in the executive administration. In the rest of the State there are civil judges, judges of small cause courts and munsiffs who dispose of civil suits. The jurisdiction of a civil judge extends to all original suits without pecuniary limit and a munsiff can hear cases ordinarily of a value not exceeding Rs. 2,000 and if specially empowered up to Rs. 5,000.

The Judicial Reforms Committee, appointed by the Government to enquire into the administration of justice in this State, with particular reference to the causes accounting for the delay in disposal of the cases and other factors which encourage unnecessary litigation, has submitted its report. The Committee has recommended measures for simplification of the procedure, curtailment of unnecessary evidence, elimination of concurrent and overlapping jurisdiction of different classes of courts and securing greater efficiency in disposal of cases. The report is at present engaging the attention of the Government.

PUBLIC WORKS DEPARTMENT

The Public Works Department (Buildings, Roads and Irrigation Branches), is under the Hon'ble Minister for Communications and the post of Secretary to Government is held by a member of the Indian Civil Service.

The Buildings and Roads Branch is administered by one Chief Engineer, assisted by one Additional Chief Engineer. The State is divided into five circles and 22 divisions. Each circle is in the charge of a Superintending Engineer and each division is under an Executive Engineer. This Branch of P.W.D. is entrusted with the maintenance of all provincial metalled and unmetalled roads and the construction of all departmental buildings (except those of the Irrigation Branch) each costing more than Rs. 7,500.

COMMUNICATIONS

The road construction scheme was proposed to be spread over 10 years in two phases of 3 and 7 years respectively costing nearly 69 crores. On the completion of the first phase of the programme which was estimated to cost 15·5 crores the State would have had 9,631 miles of metalled roads, 5,611 miles of unmetalled roads and 508 miles of cement concrete tracks. On the completion of the second phase of the programme the State would have had 15,160 miles of metalled roads, 19,000 miles of unmetalled roads and 3,000 miles of cement concrete tracks.

The phase I post-war roads programme, the revised cost of which is about 21·5 crores and which was started in 1947 could not be continued during the year under review owing to financial stringency.

The programme achieved till the end of December 1951 is given as follows:—

	Proposed mileages.	*Completed mileages.*	
(1) Reconstruction:			
(a) local D. B. Roads	2,419	2,061	
(b) Cement concreting of Provincial Highway Roads	45	7¼	
(2) New Construction:			
(a) Metalled Roads:			
P. H's.	910		
M. D. Rs.	732		
	1,642	761	completed upto inter cost stage.
(b) Unmetalled Roads:			
O. D. Rs.	3,708		
V. Rs.	1,947		
	5,655	4,582	earth work only completed.
(c) C. C. Tracks	501	14¼	

The incomplete work of Phase I has now been merged with the National Five-Year Plan of the State in which a provision amounting to Rs. 522·36 lakhs, has been made for works on roads (other than National Highways) upto 1955-56.

BUILDINGS

Buildings costing about 151·73 lakhs were contemplated for construction during the year 1951-52. The more important buildings which have been under construction since 1949-50 are as follows:—Residences for members of Legislatures at Lucknow; Extension of Medical College, at Lucknow; Establishment of 103 additional dispensaries in rural areas; Construction of a new Government Press Building at Lucknow; Construction of Buildings in connection with the Government Occupational Institute, Lucknow; Construction of Government Precision Instrument Factory at Lucknow; Construction of a New Veterinary College at Mathura; Establishment of a Central School for the Preliminary Training of Nurses at Kanpur; Construction of quarters for 180 Nursing Orderlies at Branch Dispensaries in Uttar Pradesh; Construction of 20 Basic Seed Stores; Construction of buildings for Government Leather Working School and Hostel at Kanpur; Construction of buildings in connection with Ganga Khadir Colonization Scheme at Mowana; Construction of buildings in connection with the extension of Deoria town; Construction of Extension to the High Court Buildings at Allahabad; Establishment of a Drug Research Institute at Lucknow.

Besides these buildings, this department is also supervising the construction of cement factory buildings and the erection of the plant and machinery, etc. of the Cement Factory Project at Mirzapur.

IRRIGATION

The Irrigation Branch in Uttar Pradesh is divided into Circles and Divisions, covering all the existing irrigation schemes in the State namely the Ganga, the Eastern Yamuna, and the Agra Canals, the Sarda Canal, the Bundelkhand Canals and the Tube-wells, and is administered by the Chief Engineer, Irrigation Branch assisted by an Additional Chief Engineer. These State Irrigation Schemes can at present irrigate upto 78 lakh acres annually.

In Bundelkhand there are plans for the following Dams and Canals namely Lalitpur Dam, Nagwa Dam on Karamnasa River in Mirzapur District, Bundhis in Jhansi and Hamirpur Districts, Saprar Dam and Canal Project, Rangawan Dam and Belan Canal System. The following schemes also have been under construction *viz.*, Canal and Tube-well in Eastern Districts, Tube-wells in Deoria, Gorakhpur and Basti districts, Kumaun Irrigations Project, Sarda Hydel Scheme, Mohammadpur Power House, Pathri Power House, Rihand Dam Project and Yamuna Hydel Scheme.

ELECTRICITY

Hydro-electric schemes, namely, the Sarda Power House Construction Circle (for civil work), Ganga Hydro-electric Circle, and the Sarda Hydro-electric Circle, are under the administration of the Chief Engineers, Irrigation Branch and the Electricity Branch respectively.

The following schemes have also been investigated namely the Nayar Dam Project, Ramganga Dam Scheme, Kothri Dam Scheme, Pinder Hydro-Electric Development, Khoh River Project, Malin River Project and Power Potentialities on Bhagirathi River.

A preliminary report on the schemes has been submitted to Government for consideration.

POLICE

The Police Force is administered by an Inspector-General, assisted by eight Deputy Inspectors-General, including one Deputy Inspector-General, Headquarters and Railways, one Deputy Inspector-General, Criminal Investigation Department, one Deputy Inspector-General of State Armed Constabulary and Training and five Deputy Inspectors-General of Police for Ranges, an Assistant Inspector-General of Police, Railways, one Assistant to I.G. of Police, one Additional Assistant to I.G. of Police, 55 Superintendents of Police, 14 Assistant Superintendents and 186 (permanent and temporary) Deputy Superintendents. There is a Police Training College at Moradabad under one Superintendent of Police as Principal and two Deputy Superintendents of Police, one of whom is designated as Adjutant and the other as Assistant Principal. There is also a Police Training School at Sitapur under a Commandant. There is a Criminal Investigation Department with a Deputy Inspector-General in charge and 5 Superintendents of Police and 28 Deputy Superintendents of Police. There is a State Armed Constabulary with 10 Battalions comprising 60 Companies under the command of the Deputy Inspector-General of State Armed Constabulary and Training. In this force there are 10 Commandants of the rank of Superintendent of Police and 20 Assistant Commandants and 2 Staff Officers and 10 Adjutants of the rank of Deputy Superintendent of Police (all temporary). There is also a Wireless Telegraphy organization under a Wireless Officer of the rank of Superintendent of Police and three Assistant Wireless Officers of the rank of Deputy Superintendent of Police.

The Anti-Corruption Department now forms a part of the Investigation Branch of the Criminal Investigation Department.

Jails.—There are six central prisons including one Model Prison, 49 District Jails, a Juvenile Jail, a Sub-jail and a Reformatory School. The prison administration is under the charge of an Inspector-General of Prisons assisted by a Deputy Inspector-General. All central prisons, the first class district jails and the T.B. Concentration Jail at Sultanpur, have whole-time superintendents. There are at Lucknow a Jail Training School, the only institution of its kind in India, and a Jails Depot for the display and sale of jail-made goods.

The U.P. First Offenders Probation Act (Act 6 of 1938) which deals with the releases on probation of first offenders has been extended in its entirety to 16 districts. One Chief Probation Officer and 20 Probation Officers have been appointed under the Act.

EDUCATION

Education is maintained partly by the State and partly by means of grants-in-aid. There are six Universities, the four residential Univer-

* The Act applies to 6.02 crore acres out of 7.22 crores in the State (80 per cent.). The compensation is eight times the annual income, the total compensation amounting to between Rs. 125 and 150 crores. Compensations of Rs. 50,000 and less would be paid in cash; others in non-negotiable bonds at 2½ per cent interest redeemed in 40 years.

sities of Allahabad, Lucknow, Aligarh (Muslim) and Banaras (Hindu) and the affiliating University of Agra and one Engineering University at Roorkee.

Agra University has so far affiliated 46 Colleges.

There are 988 Higher Secondary Schools which prepare boys and girls for the High Schools and Intermediate Examinations conducted by the Board of High School and Intermediate Education, Uttar Pradesh, which prescribes Courses and controls examinations.

There are 81 Government Higher Secondary Schools and 108 Junior High Schools for boys and 37 Government Higher Secondary Schools and 55 Junior High Schools for girls. The new set-up removes all distinction between the Hindustani and Anglo-Hindustani Education and there is now one unified ladder from the beginning of the education of a child upto the higher secondary (pre-university) stage. The Isabella Thoburn College and Mahila Vidyalaya Colleges at Lucknow and the Women's Degree College at Aligarh impart university education to girls.

The St. Joseph College, Naini Tal, St. George Intermediate College, Mussoorie, Sherwood Inter College, Naini Tal and La Martinier College, Lucknow are among the best known "European schools", in the State which teach upto the Intermediate stage. All Saints Diocesan College, Naini Tal, has a teachers' training department for women teachers and also a Cambridge Higher Certificate Class. Besides these, there are many other "European" educational institutions both in the hills and plains, which are attended by students from all over India and open to all with no restriction of caste or creed.

Government maintain (L.T.) training colleges for male teachers in Lucknow, Allahabad, Agra and Banaras. Government also maintain a Central Pedagogical Research Institute with a Basic Section at Allahabad. There is also a (C.T.) College of Home Science and Craft for Women maintained by Government. Government have also a constructive Training College at Lucknow which gives training to graduates and under-graduates in constructive subjects for L.T. and C.T. diploma. Government also maintain Training Colleges for women—C.T. at Lucknow and Bareilly and L.T. at Agra. Besides this, a number of aided institutions run L.T. Classes. The Lucknow University also runs training classes for women at the Isabella Thoburn College.

The Allahabad University has started a course leading to M.Ed. degree but this is confined to those who have obtained the diploma of L.T. or B.T. elsewhere.

The Lucknow University has an L.T. Diploma for graduate teachers and an M.Ed. degree in Education which can be taken after passing L.T., C.T. or B.T.

The Banaras Hindu University has also a B.T. Degree for Graduate Teachers and also B.Ed. and M.Ed. Degrees in Education which can be taken after passing the B.T. of the University or L.T. of other Universities.

The Muslim University, Aligarh, has a B.T. Degree for Graduate Teachers and also M.Ed. Degree in Education, which can be taken after passing the L.T. or B.T.

Technical Education.—There is a Department of Mining and Metallurgy in the Banaras Hindu University where four years' courses of training are provided, leading to degrees in the two subjects. This is the only University in India where training in these two industrial subjects is available. There is a Technical Institute known as the Harcourt Butler Technological Institute and a Central Technical Institute at Kanpur; a school of Arts and Crafts at Lucknow; three Government Technical Institutes at Lucknow, Gorakhpur and Jhansi respectively; one Polytechnic Institute at Srinagar (Garhwal); five carpentry schools, one known as Central Wood Working Institute, Bareilly; others at Faizabad, Naini Tal and Dehra Dun; six weaving schools, one known as Central Weaving Institute at Banaras, others at Mau (Azamgarh), Kairabad (Sitapur), Amroha (Moradabad), Muzzaffarnagar, and Bulandshahr and one Metal Working School at Aligarh; two Leather Working Schools at Kanpur and Meerut, one Tanning School at Fatehpur; and one Brassware School at Banaras known as Batuk Prasad Khatri Industrial Institute. There is also a Technical College and Leather Working School at Dayalbagh, Agra.

There has been a Government Engineering College at Roorkee known as the Thomason College, which has been converted into an Engineering University with effect from November 25, 1949 known as the Roorkee University. There is a school of Arts and Crafts and two Civil Engineering Schools at Lucknow. At the Banaras Hindu University there is a five years' course in Mechanical and Electrical Engineering. There is a Government Agriculture College at Kanpur and 5 Government Agriculture schools at Gorakhpur, Bulandshahr, Ghazipur, Chiragaon (Dist. Jhansi) and Havalbagh (Dist. Almora). In addition, there are non-Government Agricultural institutions, namely Agricultural Institute, Allahabad, Balwant Rajput College, Agra, K.E.M.U. Jat College, Lakhauti (Dist. Bulandshahr) and Jat Vedic Agricultural College, Baraut (Dist. Meerut), teaching upto Degree standard and several other non-Government Agricultural institutions which impart instruction in Agriculture upto High School and Intermediate standard.

Law, Medical, Veterinary.—Education in Law is given at four residential Universities and at the Agra and Meerut Colleges and at the Dayanand Anglo-Vedic and Sanatan Dharma Colleges at Kanpur, and at the Bareilly College. Instruction in Commerce for the B.Com. degree of the Agra University is given in the Sanatan Dharma and the D.A.V. Colleges at Kanpur and in the St. John's College at Agra, Bareilly College, Bareilly, and Balwant Rajput College, Agra. A Commerce Department for the B.Com. degree is also attached to Allahabad, Banaras and Lucknow Universities.

The Gandhi Memorial Medical College, Lucknow, which is managed by the Lucknow University prepares candidates for the M.B.B.S. and higher degrees of the Lucknow University. There is also a Government Medical College at Agra which is affiliated to the Agra University. This College is known as the Sarojini Naidu Medical College, Agra. The Lucknow University has recently started an Ayurvedic College under a new faculty and has framed a six years' course of study leading to the degree of B.I.M.S. There is a college of Ayurveda attached to the Banaras Hindu University and a college of Unani Tib attached to the Muslim University, Aligarh. The Board of Indian Medicine, U.P., established by Government in 1926, prescribes courses and holds examinations for Ayurvedic and Unani Colleges affiliated to it.

The U.P. College of Veterinary Science and Animal Husbandry, Mathura, imparts training in Veterinary Science and Animal Husbandry and prepares students for the degree of B.V.S.C.

Public Schools.—There are five public schools in the State namely, (1) St. Joseph Academy, Dehra Dun, (2) Col. Brown's Cambridge School, Dehra Dun, (3) Colvin Taluqdars College, Lucknow, (4) Doon School, Dehra Dun, (5) Birla Vidya Mandir, Naini-Tal. These schools are run on the same or on a modified form of a British Public School in England to suit conditions in India and lay as much stress on extra-curricular activities both physical and literary as on the work in the class-room. Its main object is character building. The Bureau of Psychology make group tests of intelligence and the Central Pedagogical Institute, Allahabad finds new ways and means in child education.

MEDICAL AND HEALTH

The Director of Medical and Health Services controls Medical and Health Departments. He is assisted at headquarters by one Additional Director, three Deputy Directors (one for General duties, one for Women's Medical Services and one for Indian Medicine) and one Superintendent for Nursing Services. Regional Organisation exists only for Public Health work and consists of nine Assistant Directors—four for general Public Health duties in different areas, and five for the special subjects of Malaria, Epidemiology, Health Education, Maternity and Child Welfare and Laboratories. There is also an Assistant Drugs Controller, one officer for Medical Work concerning Employees State Insurance, a Nutrition Officer, a Public Analyst, a Chemical Examiner and an Industrial Hygiene Officer.

The Local Medical Organisation consists of a Civil Surgeon who controls all Medical Institutions in the District, viz., the District Headquarters Hospital, Jail and Police Hospitals, Women's Hospitals and Rural Dispensaries.

The Rural Health Organisation maintained by Government consists of one District Medical Officer of Health, one or more Epidemic Medical Officer and one Assistant Medical Officer of Health for each district and one or more Epidemic Assistants according to necessity. Each tehsil has also been provided with a disinfecting gang working under a Sanitary Inspector. There are Malaria and Kalazar units in districts where these diseases are prevalent in a greater measure. District Boards employ one Sanitary Inspector for each tehsil; one Assistant Superintendent of Vaccination and a number of Vaccinators according to size and density of population.

Out of 120 municipal towns 51 have wholetime Medical Officers of Health. Fourteen larger of these have also whole-time school Health Officers with a separate clinic for treatment of scholars. Subordinate staff in municipal towns comprises Sanitary Inspectors, Jamadars, Sweepers and Vaccinators, all maintained by Municipal Boards.

All District Hospitals, Jail and Police Hospitals and 276 out of 651 rural dispensaries are maintained by Government. The rest of the dispensaries numbering 375 are maintained by District and Municipal Boards, Trusts and other bodies. There are 287 maternity centres of which 213 are maintained by Government, 32 by Municipal Boards, 14 by District Boards and 27 by Red Cross and one by Cantonment Board.

There is a Health School for the training of Health Visitors and Midwives and an Institute for the training of Sanitary Inspectors. There are Nurses' Training centres at six places and Compounders' Training Classes at nine places.

Government maintain a Tuberculosis Sanatorium at Bhowali with accommodation for 196 beds. In addition to the T.B. Clinics run by the U.P. T.B. Association, there are eight more Sanatoria or T.B. Clinics in the State, namely, the Kasturba T.B. Clinic, Lucknow (24 beds); Hill Crest Sanatorium, Gathia District, Naini Tal, (43 beds); Sri Mangla Prasad Sanatorium, Banaras (12 beds); Karelabagh Sanatorium, Allahabad (20 beds); Mission Sanatorium, Almora (36 beds); Central T.B. Clinic, Kanpur (eight beds); Labour T.B. Clinic, Kanpur (four beds) and the T.B. Ward at the Lala Lajpat Rai Hospital, Kanpur (22 beds).

There are 15 leper hospitals and asylums in all maintained by Mission and other bodies, to which Government give aid. One touring unit for survey and treatment of leprosy has been started by Government for eastern districts.

The Eye Hospitals at Sitapur and Aligarh are run by public Trusts. They are doing excellent work and get substantial Government grant. The Manohar Das Eye Hospital, Allahabad, is a Government institution. An annual grant of Rs. 50,000 is sanctioned to the different hospitals for eye relief work in rural areas. Besides, this year a grant of Rs. 16,000 has been given to eight eastern districts for eye relief work. Also, the mobile units of the Aligarh Eye Hospital is doing eye relief work in the districts of Aligarh, Dehra Dun, Saharanpur, Muzaffarnagar, Meerut, Bijnor, Rampur, Budaun, Tehri Garhwal, Bulandshahr, Mathura, Etah and Moradabad. The Sitapur Eye Hospital works in the districts of Garhwal, Almora and Naini Tal.

Government continued their efforts towards the development and the reorganisation of the Ayurvedic and Unani systems of medicine. 519 State indigenous dispensaries including those taken over from the merged States and enclaves, are already working in the rural areas. In addition to these, 314 local Board dispensaries, 72 subsidized dispensaries and 54 subsidised practitioners are also working in the interior of the districts. They are under the charge of qualified vaids and hakims and under the administrative control of the Deputy Director (Ayurved). Fourteen Inspectors (qualified vaids and hakims) are employed under him for their inspection. The Board of Indian Medicine was established as a Statutory body, with wide powers with effect from July 1, 1947, and thereafter it kept extending its activities under the provisions of the U.P. Indian Medicine Act, 1939. The State Pharmacy established at Lucknow in 1949, to manufacture indigenous medicines of standard quality, has since made satisfactory progress. The production of medicines in the Pharmacy is expected to increase next year when it will start manufacturing medicines with the aid of modern machinery.

Government also run a depot at Patwadangar in Naini Tal District for the manufacture of small pox vaccines and have another organization at Lucknow which manufactures anti-cholera vaccine.

1952-53 BUDGET

	(In lakhs) Revised, 1951-52	(In lakhs) Estimate, 1952-53
Revenue Receipts	5,705·97	6,254·90
Revenue Expenditure	5,705·97	6,301·73
Deficit		46·83
Capital Expenditure	1,538·72	1,705·82

The grant for the Education Department stands at Rupees eight crores. Capital expenditure on irrigation schemes is now Rs. 336 lakhs; hydro-electric works Rs. 329 lakhs; industrial development Rs. 2 crores. Revenue and Capital expenditure incurred on the construction of new roads and buildings was Rs. 20 crores. The amount invested in nationalising transport in certain areas of the State exceeds Rs. 3 crores. No additional taxation has been proposed.

1951 CENSUS

The population of U.P. has gone up by nearly 11.8 per cent during the last decade. It stands at present at 632.54 lakhs as against 565.44 lakhs in 1941 representing an increase of 66.71 lakhs. It will be noted that during the last 30 years the population of U.P. has gone up by about 35.4 per cent while there was an actual decrease of about 4 per cent between 1901 and 1921.

Among the revenue Divisions the highest increase of population has been registered by Meerut Division (17.5) followed by Allahabad Division (15.7) and Banaras Division (14.2). The lowest increase is in the Jhansi Division (5.1).

Among the districts the largest increase has been registered by Dehra Dun (36.08) followed by Kanpur (24.7) and Meerut (20.28). The lowest increase was registered by Hamirpur (.7) followed by Shahjahanpur (2.1) and Pilibhit (2.8).

Along with the growth of the population the average density of population per square mile has increased from 498 in 1941 to 557 in 1951. The districts in which there is the largest density are Lucknow (1,156), Ballia (1,010), Banaras (1,007), while those with the lowest density are Tehri Garhwal (91), Garhwal (114), Naini Tal (127), Almora (141), Jhansi (225), Mirzapur (233), Hamirpur (243), Banda (267), Dehra Dun (302) and Jalaun (315).

It will appear that the rural population of U.P. increased by only 10.2 per cent as against an over-all increase of 11.8 per cent. Among the districts which registered a rural increase of over 15 per cent are Sultanpur, Naini Tal, Ghazipur, Meerut, Azamgarh, Kanpur and Muzaffarnagar. District Hamirpur actually registered a decrease of 0.7 per cent while the districts of Rampur, Pilibhit, Shahjahanpur, Jalaun, Kheri and Tehri Garhwal recorded an increase of under 5 per cent.

Among the districts the highest increase was registered by Dehra Dun (83.1) followed by Garhwal (63.9), Jalaun (43.6), Rampur (44.3), Kanpur (44.6), Meerut (38.3) and Banaras (39.8).

The urban population of U.P. increased by 22.9 per cent as against the general increase of 11.8 per cent.

Among the cities the highest increase was registered by Dehra Dun (84.4), followed by Ghaziabad (83.5), Ferozabad (61.3), Rampur (50.3), Kanpur (44.7), Faizabad (43.1), Meerut (37.7) and Hardwar (40.5). Lucknow registered an increase of 28.3 per cent, Agra of 32.2 per cent, Banaras of 35.2 and Allahabad of 27.4 per cent. The lowest increase among the cities were registered by Pilibhit (3.4%), Budaun (2.8%), Amroha (5.6%) and Bareilly (8.0%), while Shahjahanpur recorded a net decrease of 4.8 per cent.

The total number of displaced persons in the State is 4.8 lakhs. This includes both registered and unregistered displaced persons. The districts in which there is the highest population of displaced persons are Meerut 68,113, Saharanpur 65,684, Dehra Dun 48,080, Kanpur 45,251, Agra 44,695 and Lucknow 29,478 comprising 64 per cent of the total population of displaced persons.

The number of females per 1,000 of males shows a slight increase from 907 in 1941 to 910 in 1951. The highest female ratio is in the districts of Garhwal (1,123), followed by Tehri Garhwal (1,095), Ballia (1,040), Almora (1,036), Pratapgarh (1,038), Jaunpur (1,023), Azamgarh (1,016) and Deoria (1,003). The districts with the lowest female ratio are Dehra Dun (715), Naini Tal (716), Kanpur (796), Saharanpur (821), Muzaffarnagar (825) and Shahjahanpur (840).

WEST BENGAL STATE

IN accordance with the provisions of the Radcliffe Award, West Bengal consists of the whole of the Burdwan Division and part of the Presidency Division of old undivided Bengal. District-wise, the whole of Burdwan, Birbhum, Bankura, Hooghly, Howrah, Midnapore, Calcutta, 24-Parganas, Murshidabad and Darjeeling Districts and parts of Nadia, Malda, Jalpaiguri and Dinajpur Districts are in West Bengal. The 24-Parganas District includes the two P. S. of Jessore, Bongaon and Gaighata, that is 10.94 per cent of the area and 7.28 per cent of the population of Jessore. Of Nadia District 47.75 per cent of the population and 52.34 per cent of the area, of Malda 68.50 per cent of the population and 69.41 per cent of the area, of Jalpaiguri 77.62 per cent of the population and 81.57 per cent of the area, and of Dinajpur 30.28 per cent of the population and 35.14 per cent of the area are in West Bengal (percentage based on 1941 census).

Besides these, there is the State of Cooch Behar which has been merged with West Bengal since January 1950. The population of West Bengal according to the census of 1951 is 24,786,683, and the area 29,476 sq. miles.

According to the census figures of 1931, Bengali is spoken by about 84 per cent of the population and Hindi and Urdu by about 8 per cent including Cooch Behar.

AGRICULTURE

During 1950-51 the area under paddy in West Bengal (including Cooch Behar) was 9,802·6 thousand acres. In 1949-50 and 1950-51 the area and production of paddy in West Bengal (including Cooch Behar) were as follows :—

Year.	Area in thousand acres.				Production in thousand tons of cleaned rice.			
	Aus.	Aman.	Boro.	Total.	Aus.	Aman.	Boro.	Total.
1949–50 ..	1,286·3	8,442·9	38·4	9,767·6	396·0	3,269·5	16·1	3,681·6
1950–51 ..	1,124·3	8,637·2	41·1	9,802·6	335·9	3,559·1	15·5	3,910·5

The area and production of jute are given below :—

Year.	Area in '000 acres.	Production in '000 bales of 400 lbs. each.
1950	650·9	1496·0
1951	876·1	2339·4

INDUSTRY

Agriculture is the principal industry of West Bengal. In addition to this there are the jute mill industry, the tea industry (confined to the districts of Jalpaiguri including the Dooars and Darjeeling), the coal mining industry and the sugar industry. The jute mills in and around Calcutta and in the riparian tracts of the districts of Howrah and Hooghly constitute the principal manufacturing industry of the State.

In 1949 there were 197 textile mills with 338,700 workers, 94 jute mills with 301,047 workers, 635 engineering works with 92,812 workers, 1,365 other factories with 233,496 workers. The total number of factories was 2197 and the total number of workers 665,008.

TEA INDUSTRY

Items.	1949*	1950
Area under Tea (acres)	194,204	205,839
Number of factories	273	..
Average daily number of workers employed ..	24,922	..
Number of gardens	296	..
Number of Picked workers attended	230,000	..

* Excluding Cooch Behar.

The production of tea in thousands was as follows :—black 182,600 ; green 1,400 ; total 184,000.

EDUCATION

Educational institutions in West Bengal are controlled by the Department of Education, the University of Calcutta, district boards, municipalities, district school boards and a number of religious and philanthropic societies. The control of general education as also of engineering education is ultimately vested in the Minister of Education, whereas medical education is controlled by the Department of Local Self-Government, and agricultural, technical and industrial education by the Department of Agriculture and Industries.

The University of Calcutta established in 1857 is administered by the Chancellor (the Governor of W. Bengal), the Vice-Chancellor (appointed by Government) and a number of ex-officio, elected and nominated fellows. The University of Calcutta maintains a Law College, called University Law College, Calcutta. Calcutta University is mainly an examining body, but has now made itself responsible for advanced teaching for which purpose it employs an agency which is mainly distinct from the staffs of the affiliated Colleges.

In 1949-50 there were 77 arts and science colleges, 16 professional colleges, 7 colleges for fine arts and physical training, 1,150 high schools, 1,288 middle schools, 61 junior basic schools, 15,161 primary schools and 11 nursery schools. As for the number of students there were 57,636 students at the arts and science colleges, 7,612 students at the professional colleges, 271 at the fine arts colleges, 391,962 students at the high schools, 146,234 at middle schools, 5,179 at junior basic schools, 1,283,971 at primary schools, and 1,532 in the nursery schools.

There were 148 technological institutions with 10,064 students, 8 institutions for the mentally handicapped with 389 students, 2 reformatories with 129 inmates.

Progress in women's education may be gauged from the fact that there were 6,354 girl students at the arts and science colleges, 293 at the professional colleges, 66 at the fine arts colleges, 54,826 in high schools, 35,531 in middle schools, 1,260 in junior basic schools, 297,794 in primary schools, 808 in nursery schools, 2,333 in technological institutions, and 1,177 in schools teaching fine arts.

JUSTICE

The administration of justice is entrusted to the High Court of Calcutta. Below the High Court are the District and Additional Judges, the Small Causes Court and Subordinate Judges and Munsiffs. Of these officers, the District and Additional Judges and a certain number of Subordinate Judges are also endowed with the powers of a Criminal Court while the remainder have jurisdiction in Civil matters only.

In addition a number of Union Benches and Courts have been established in selected rural areas for the disposal by honorary agency of petty criminal cases and civil disputes.

LOCAL SELF-GOVERNMENT

The Municipal Government of Calcutta is governed by Act III of 1923. This Act, which replaces Act III of 1899, makes the Corporation paramount in matters relating to municipal administration. The Act provides for the appointment of a Mayor, who replaces the Chairman of the old Act, a Deputy Mayor, an Executive Officer, and two Deputy Executive Officers, all elected by the Corporation. The appointments of the Chief Executive Officer and the six other principal officers of the Corporation are subject to the approval of Government. In order to improve the insanitary and congested areas of the city, the Calcutta Improvement Trust has been created with extensive powers.

In the mofussil, district and local boards exercise considerable powers, with regard to public works, education and medical relief.

Bengal Act V of 1919 introduced a new system of self-government by the creation of village authorities vested with the powers and duties necessary for the management of village affairs and entrusted with powers of self-taxation. The new village authority, called the union board, which will replace gradually the old chaukidari panchayats and the union committees deals with the village police, village roads, water-supply, sanitation, primary schools and dispensaries. The Act also empowers Government to create out of the members of the union boards, village benches and courts for the trial of petty criminal and civil cases arising within the union. The Act has been extended to all districts in the State.

The Public Works Department consists of Public Works and Railway Departments and is under the charge of the Secretary to Government in the Department of Communications and Works and Buildings.

POLICE

The West Bengal Police force comprises the Military Police, the District Police and the Railway Police. The West Bengal Police are under the control of the Inspector-General of Police, the present Inspector-General being a member of the Indian Police. Under him are Deputy Inspectors-General for the Western Range, the Central Range and the Northern Range and also two Deputy Inspectors-General in charge of the I.B., C.I.D. and the Armed Forces.

Each District is in charge of a Superintendent, and some of the more important districts have one or more Additional Superintendents. The Railway Police is divided into two distinct charges each under a Superintendent. The cadre comprises Superintendents, Assistant Superintendents, Deputy Superintendents, Inspectors, Sub-Inspectors, Sergeants, Assistant Sub-Inspectors, Head Constables and Constables. There is also a Village Police, composed of daffadars and chowkidars, who receive a monthly salary which is collected from the villages or unions by the Panchayat or Union Board. The Calcutta City Police is a separate force maintained by Government under a Commissioner who is responsible direct to Government. The Commissioner has under him Deputy Commissioners, Assistant Commissioners, Inspectors, Sub-Inspectors, Sergeants, Assistant Sub-Inspectors, Head Constables and Constables. A school for the training of recruits for the Calcutta Police force has been established at Calcutta. The annual cost of the Police is about 5½ crores.

PUBLIC HEALTH

The head of the Medical Directorate is the Director of Health Services. In the districts the Civil Surgeons are responsible for medical work. The latest statistics available about the hospitals and dispensaries in West Bengal are given below :—

Hospitals and Dispensaries in West Bengal (excluding Cooch Behar).

1949.

Class of Hospital.	Calcutta.	Other Districts.	Total.
1. State ..	7	5	12
2. Provincialised Hospitals ..	1	36	37
3. A. G. Hospitals	3	142	145
4. F. R. E. ..	..	18	18
5. State Special ..	4	47	51
6. Local and Municipal (Hospitals and Dispensaries including Union Board and villages) ..	30	565	595
7. Private aided ..	13	50	63
8. Private non-aided ..	4	82	86
9. Railway Hospitals ..	6	30	36
Total ..	68	975	1,043

There are also 21 health centres.

The Government of West Bengal have sanctioned an expenditure of Rs. 1,10,76,000 for Public Health and Rs. 3,79,83,000 for Medical respectively in the 1952-53 Budget.

1952-53 BUDGET

The Budget of the State of West Bengal for 1952-53 shows a revenue deficit of Rs. 5 crores 20 lakhs and a deficit of Rs. 65 lakhs outside revenue account. The revenue receipts are estimated at Rs. 35 crores 91 lakhs and the revenue expenditure at Rs. 41 crores 11 lakhs.

The main features of the budget are as follows :

1. Under the terms of the Deshmukh award the grant to West Bengal has been fixed at Rs. 105 lakhs a year.

2. Under the same award the State's share of income tax is 13½ per cent. *i.e.* 6 crores 81 lakhs.

3. For food production schemes, expenditure Rs. 2 crores 3 lakhs, receipts Rs. 51 lakhs, subvention from centre Rs. 59 lakhs.

4. A grant of Rs. 12 lakhs from the centre on account of the revenue gap for Cooch Behar.

5. A provision of Rs. 4 crores and 36 lakhs for unproductive development schemes, and of Rs. 19 crores 44 lakhs for productive development for which a loan of Rs. 14 crores and 60 lakhs is available from the centre. The provisions include *a.* Rs. 11 crores 20 lakhs for Damodar Valley, *b.* Rs. 3 crores 40 lakhs for Mayurakshi Reservoir, *c.* Rs. 3 crores for State roads, *d.* Rs. 95 lakhs for land development, housing, *e.* Rs. 47 lakhs for road transport, *f.* Rs. 31 lakhs for electricity, Rs. 6 lakhs for industrial development and Rs. 5 lakhs for agricultural development.

6. Rs. 2 crores 6 lakhs for new schemes other than development projects (excluding continuation schemes of Rs. 19 lakhs).

7. Rs. 3 crores 61 lakhs for displaced persons (Central Government will reimburse Rs. 3 crores 23 lakhs) : besides Rs. 9 crores 13 lakhs for building houses and for loans for displaced persons.

8. The public debt at end of 1952-53 will be Rs. 3 crores 75 lakhs, and total debt to the Government of India Rs. 60 crores 52 lakhs, as follows :—

a. Rs. 2 crores 50 lakhs towards undivided Bengal's debt to Reserve Bank, *b.* Rs. 21 crores 47 lakhs on account of rehabilitation of displaced persons, *c.* Rs. 24 crores 19 lakhs Damodar Valley, *d.* Rs. 9 crores 77 lakhs Mayurakshi, *e.* Rs. 1 crore 64 lakhs food production, *f.* Rs. 95 lakhs for dispersal of displaced college students and development of Engineering College, Sibpur.

Here are the more important heads of revenue in the 1952-53 budget (thousands of Rupees) :

Land Revenue 20,668 ; Excise 59,192 ; Forest 5,803 ; Motor vehicles 11,190 ; other taxes duties 94,500 ; Irrigation navigation etc. 2,047 ; Justice 4,004 ; Agriculture 10,380 ; Grants-in-aid from Central Government 11,700.

Here are the main items in the debt position : Debt raised in India 30,000 ; Loans from Union Government 242,797 ; Famine insurance 1,230 ; civil deposits 523,811 ; Suspense Accounts 290,000 ; Cheques and bills 180,000 ; Loans and advances by State Governments 101,000.

Here are the more important heads of expenditure :—

General administration 25,486 ; Justice 10,502 ; Jails 10,006 ; Police 60,502 ; Scientific Dept. 97 ; Education 39,969 ; Medical 37,983 ; Public Health 11,076 ; Agriculture 22,584 ; Veterinary 1,909 ; Cooperation 2,025 ; Industries 8,408 ; Capital outlay on industrial development 1,500 ; Civil works 43,794 ; Interest on River Schemes 2,930 ; Outlay on electricity schemes 839 ; Famine 2,830 ; Privy Purses to Rulers 169 ; Superannuation allowances Pensions 11,032 ; Displaced persons 3,708.

Here are the main items in capital expenditure :

Irrigation, navigation, drainage 40 ; Agricultural improvement 480 ; Industrial development 600 ; Multi-purpose river schemes 145,964 ; Civil works 30,000 ; Electricity 3,354 ; Displaced persons 45,648 ; Road transport 5,222 ; State trading 14,940.

Here are the main items in debt and deposits :

Debts raised in India 10,000 ; Loans from Central Government 4,214 ; Famine Insurance 1,200 ; Education among Backward classes 1,172 ; Loans and Advances by State Governments 51,555.

ADMINISTRATION

The present form of administration in West Bengal dates from the 26th January, 1950 when India emerged as a Sovereign Democratic Republic.

As from 15th Aug. 1947 two independent Dominions known as India and Pakistan were set up in India under the provisions of the Indian Independence Act, 1947.

The Province of Bengal, as constituted under the Government of India Act, 1935, ceased to exist from that day and in lieu thereof two new Provinces, East Bengal and West Bengal were constituted of which only the latter came under the Dominion of India. Pending the framing of the new constitution of India by its Constituent Assembly, the Legislature of the new Province of West Bengal was made unicameral by an order of the Governor-General issued under the provisions of the Indian Independence Act, 1947. The administration of the Province was carried on under the Government of India Act, 1935 as adapted by orders of the Governor-General issued from time to time under the provisions of the said Independence Act. Under the adapted Government of India Act, the special responsibilities of the Governor as well as his individual judgment and discretionary powers ceased to exist.

PERSONNEL

GOVERNOR.

His Excellency Dr. Harendra Coomar Mookerjee.

MINISTRY.

Chief Minister, Home, Development, Medical and Public Health, Finance, Commerce and Industries, Dr. B. C. Roy.
Cottage and Small-Scale Industries, J. N. Panja.

Dy. Secys., Prafulla Mohan Das Gupta; Bankim Chandra Kundu.
Asstt. Secys., K. P. Das Gupta; Amiya Kumar Banerji.
Registrar, Apurba Chandra Mukharji.

LABOUR DEPARTMENT.

Joint Secy., Durga Shiva Prasad Mukharji, I.A.S.
Dy. Secy., Kulada Ranjan Das Sarkar.
Asstt. Secy., Nirmal Chandra Maitra.

CO-OPERATION, CREDIT, RELIEF AND REHABILITATION DEPARTMENTS.

Joint Secretary, S. M. Murshed, I.A.S.
Dy. Secy., M. A. Gani.
Asstt. Secy. (*Relief and Rehabilitation Branch*), M. R. Ayer.
Asstt. Secy. (*Co-operation and Credit Branch*), M. K. Ghosh.

REFUGEES REHABILITATION DEPT.

Relief Commr. and Secy., Hiranmay Banerjee, I.C.S. (*on leave*); N. Roy Chowdhury, I.C.S.
Dy. Secy., V. C. Dutt.
Deputy Relief Commrs., B. K. Lahiri; J. K. Ray.
Asstt. Secy., J. Elloy.
Ex-officio Asstt. Secy., J. K. Sanyal.

MISCELLANEOUS APPOINTMENTS.

Adm. Officer, Cal. Corporation, A. D. Khan, I.C.S.
Chairman, Cal. Improvement Trust, S. K. Gupta, I.C.S.
Chairman, Public Service Commission, S. Basu, I.C.S.
Inspector-General of Police, Hirendra Nath Sarkar, I.P.
Commissioner, Calcutta Police, H. S. Ghosh Chowdhury, I.P.
Director of Health Services, Dr. B. C. Das Gupta.
Collector of Customs, Calcutta, A. N. Puri, B.A., LL.B.
Chief Executive Officer, Cal. Corporation, R. S. Trivedi, I.C.S.
Accountant-General, K. C. Chowdhury.
Inspector-General of Prisons, Dr. P. K. Biswas.
Postmaster-General, N. N. Banerji.
Joint Chief Controller of Imports and Exports, Calcutta, Prem Chand.
Collector of Central Excise and Land Customs, J. W. Orr, I.C.S.
Inspector-General of Registration, Nirmal Chandra Chatterji.
Commissioner of Commercial Taxes, K. Pal Chowdhuri.
Labour Commissioner, S. K. Haldar, I.C.S.
Director of Agriculture, Dr. H. K. Nandi.
Director of Industries, D. N. Ghose.
Director of Fisheries, Balai Prashad, D.Sc., F.N.I.
Protector of Emigrants, D. C. Mukherji, M.Sc., D.T.
Conservator General of Forests, Sukumar Chowdhuri, I.F.S.
Commissioner of Excise, Ranjit Chandra Chaudhuri.
Superintendent, Indian Botanic Garden, Calcutta, Kalipada Biswas, M.A.
Curator of Herbarium, Indian Botanic Gardens, Dr. S. K. Mukerjee, M.Sc., Ph. D.
Director of Land Record and Surveys, Charu Chandra Sen.

LIEUTENANT-GOVERNORS OF BENGAL.

J. A. Bourdillon, C.S.I. (*Officiating*) ..	1902
Sir A. H. Leith Fraser, K.C.S.I.	1903
Lancelot Hare, C.S.I., C.I.E. (*Officiating*)	1906
F. A. Slacke (*Officiating*)	1906
Sir E. N. Baker, K.C.S.I. .. .. .. Retired 21st September 1911.	1908
F. W. Duke, C.S.I. (*Officiating*)	1911

The Office of Lieutenant-Governor of Bengal was abolished on April 1st, 1912, when Bengal was raised to a Governorship.

GOVERNORS OF THE PRESIDENCY OF FORT WILLIAM IN BENGAL.

The Rt. Hon. Baron Carmichael of Skirling, G.C.I.E., K.C.M.G.	1912
The Rt. Hon. Earl of Ronaldshay, G.C.I.E.	1917
The Rt. Hon. Lord Lytton	1922
The Rt. Hon. Sir Stanley Jackson, P.C., G.C.I.E.	1927
The Rt. Hon. Sir John Anderson, P.C., G.C.B., G.C.I.E.	1932
The Rt. Hon. Lord Brabourne, G.C.I.E., M.C.	1937
Sir John Ackroyd Woodhead, K.C.S.I. (Temporary)	1939
The Rt. Hon. Sir John Arthur Herbert, G.C.I.E.	1939
Sir Thomas Rutherford, K.C.S.I., C.I.E. (Temporary)	1943
The Rt. Hon. R. G. Casey, P.C., C.H., M.C., D.S.O.	1944
The Rt. Hon. Sir Frederick John Burrows, G.C.I.E.	1946
Mr. C. Rajagopalachari, 15, Aug. ..	1947
Sir B. L. Mitter (acting), 11, Oct.	1947
Mr. C. Rajagopalachari, 26, Nov. ..	1947
Dr. Kailashnath Katju, 21, June	1948
Dr. Harendra Coomar Mookerjee, 1st, Nov.	1951

NOTE ON 1951 CENSUS

Throughout this note all figures for 1951 must be regarded as provisional, although it is believed that the final figures will vary, if at all, within small limits from these provisional figures.

The population of the State of West Bengal now stands at 24,786,683 or 24.786 million, of which 13,319,941 are males and 11,466,742 females. The number of persons who came away from East Pakistan after 15th October 1946 or Western Pakistan after 1st March 1947 and have declared themselves as 'displaced persons' is 2,117,896 or 2.12 million of which 1,128,650 are males and 989,246 females. The total of displaced persons is included in the total of the State. The area of the State is 29,476 square miles subject to boundary demarcation along its border.

The density of population per square mile for the State as a whole is 839.3 persons. This is 111.7 persons per square mile more than the density in 1941 of the population in Great Britain and Wales which was 727.6. Density varies from district to district, the lowest being 363.8 in Jalpaiguri and the highest 77,263.3 in the city of Calcutta. The district with the next highest density is Howrah with 2,885.8 followed by Hooghly with 1,291 after which comes 24-Parganas with 1,144 persons per square mile. Burdwan and Murshidabad are 809 and 831 respectively, Nadia 700.7, Malda 680.6, Midnapore 635.7, Birbhum 613.2, West Dinajpur 509.7, Cooch Behar 507.4 and Darjeeling 373.6.

The Presidency Division claims 55.195 per cent of the State's population, while the Burdwan Division accounts for 44.805 per cent. 24-Parganas accounts for 18.542 per cent of the total population, Midnapore 13.527 per cent, Calcutta 10.286 per cent, Burdwan 8.829 per cent, Murshidabad 6.916 per cent, Howrah 6.531 per cent, Hooghly 6.281 per cent, Bankura 4.624 per cent, Birbhum 4.312 per cent, Malda 3.819 per cent, Jalpaiguri 3.052 per cent, West Dinajpur 2.856 per cent, Cooch Behar 2.698 per cent and Darjeeling 1.796 per cent.

The population of the State, as at present constituted, was 15.83 million in 1901, 16.79 million in 1911, 16.40 million in 1921, 17.66 million in 1931 and 21.83 million in 1941. The actual increase of population between 1931 and 1951 has been 7,125,133 or 7·12 million, or a percentage increase of 40·33 on the 1931 population. The mean rate of annual increase during the 20-year period 1931-51, leaving out of account 2,117,896 displaced persons recorded in 1951, has been 1.41 per cent per annum. This therefore represents the rate of natural growth of the population and immigration except of displaced persons during the 20-year period. The Burdwan Division has increased from 8,647,189 in 1931 to 11,105,746 in 1951 and the Presidency Division from 9,014,361 to 13,680,937 during the same period. Only the districts of Nadia and Cooch Behar have shown a decrease in population during 1931-51, provided we leave out of reckoning the immigration of displaced persons into these two districts; Nadia has recorded a mean rate of decrease of .07 per cent per annum and Cooch Behar a mean rate of decrease of 0.18 per cent per annum during 1931-51. If, however, the immigration of displaced persons into the two districts were taken into consideration they, too, would show an increase of population, during 1931-51, at the mean rate of 2.94 per cent per annum in the case of Nadia and 0.65 per cent in the case of Cooch Behar.

Rate of Increase

Every other district in West Bengal has registered a fairly steady mean rate of increase during 1931-51, and, except in Calcutta, 24-Parganas, Howrah and Hooghly where the rates of increase are understandably much higher, the rate has been fairly uniform also. Calcutta, with displaced persons, has shown a rate of increase of 6 per cent per annum and, without displaced persons, of 4.1 per cent, 24-Parganas, with displaced persons, a mean rate of increase of 3 per cent per annum, and, without displaced persons, of 2.09 per cent. The corresponding figures for Howrah are 2.3 per cent per annum and 2.1 per cent, while those for Hooghly are 2 per cent and 1.74 per cent. Burdwan, which has industrially grown in Asansol and added many more towns in 1951, has, with displaced persons, grown about 2 per cent per annum between 1931 and 1951, and 1.6 per cent without displaced persons. For similar reasons, perhaps, Darjeeling has increased at the mean annual rate of about 2 per cent (with displaced persons) and 1.71 per cent (without displaced persons) during 1931-51.

Leaving out of account the increase due to the immigration of displaced persons in every district, which if taken into account would appreciably but artificially swell the mean annual rate of increase, Birbhum has registered a mean rate of increase of 0.57 per cent per annum during 1931-51, Bankura 0.885 per cent, Midnapore of 0.925 per cent, Murshidabad of 1.0 per cent, Malda 1.15 per cent, West Dinajpur 0.62 per cent and Jalpaiguri 0.465 per cent during the same period.

A phenomenon which will be of considerable concern to sociologists and population experts is a definite although small decline in the number of females per 1,000 males in almost every district of West Bengal except Hooghly and Calcutta. The figures given in this paragraph in respect of 1951 leave out of account the males and females among displaced persons so that comparison with figures for 1931 may be more acceptable. There were 923.6 females to every 1,000 males in Bengal in 1931; in West Bengal today there are only 859.4 females to every 1,000 males. Taking into account the displaced population this figure stands at 860.8. From 941 for the Burdwan Division in 1931 it has fallen to 913, for Burdwan district from 933 to 884, in Birbhum from 1,004 to 977, in Bankura from 995 to 934, in Midnapore from 975 to 950, in Howrah from 834 to 812, from 846 for the Presidency Division in 1931 it has fallen to 811.6, in 24-Parganas from 852 to 845, in Nadia from 938 to 933, in Murshidabad from 1,005 to 932, in Malda from 998 to 973, in Jalpaiguri from 842 to 828.8, in Darjeeling from 872 to 860, in West Dinajpur to 911.8 and in Cooch Behar from 886 to 871. In Hooghly the ratio has increased very slightly from 881 in 1931 to 886·7 in 1951. Only in Calcutta where the unbalance between females and males is still as considerable as 521 females to 1,000 males in 1951, it has improved slightly from 468 in 1931, which seems to indicate that Calcutta has made definite progress towards domestication although its predominating characteristic still seems to be business, work and livelihood. This decline in the number of females in relation to males is regarded by sociologists as an alarming feature of a country's population, the full import of which will be brought home when the tables of individual ages, age groups, marital condition, education, occupations and structure of households are finally ready at the close of tabulation.

The ratio of males, and therefore of females to total population may be readily guessed from the above figures. Leaving out of consideration the entire displaced population from each district the percentage of males is between 50 and 51 in Birbhum, Bankura, Murshidabad and Malda, between 51 and 52 in Midnapore and Nadia, between 52 and 53 in Hooghly and West Dinajpur between 53 and 54 in Burdwan, Cooch Behar and Darjeeling, between 54 and 55 in 24-Parganas and Jalpaiguri, 55.18 in Howrah, and as high as 63.63 in Calcutta.

Displaced Persons

The population of Displaced Persons forms 8.54 per cent of the total population of West Bengal. There are 261,901 displaced persons in Burdwan Division and 1,847,955 in Presidency Division. The density of population of displaced person alone per square mile for the State as a whole is 71.71 and varies from 3.7 in Bankura to 13,039 in Calcutta, as against the overall densities of 498.6 and 77,266 respectively in those two districts. In Birbhum and Midnapore the density is 6·7, in Darjeeling 13.4, in Murshidabad 28.5, in Burdwan 36.5, in Jalpaiguri 39.1, in Malda and Hooghly 44.4, in Cooch Behar 75.3, in West Dinajpur 84.96, in Howrah 107.7, in 24-Parganas 132.9 and in Nadia 288.8. There are 430,290 displaced persons in Calcutta city and 531,301 in 24-Parganas, while in Calcutta Industrial Area (comprising six cities and 27 towns) there are 766,067 displaced persons. That is, more than 36 per cent of the displaced population is contained in 145 square miles of the State, and 1,497,000 or more than 70 per cent of the total displaced population are concentrated in Calcutta Industrial Area, 24-Parganas and Nadia. A few tentative deductions are permissible from this distribution of density of displaced persons. This population has not penetrated sufficiently the big agricultural districts of Bengal and therefore only a fraction of it may be assumed to have engaged itself in agriculture. There is a gravitation of this population in and around the capital city and the areas of greatest density offer attractions of petty trade, cottage craft, small industries, orchardry and vegetable-raising. By necessity this population must hug closely those areas which easily offer employment or help, and markets for produce and products. Penetration and settlement in big agricultural districts, comparatively unknown and distant from the border, unopened by good roads which might confer marketing facilities for produce, have not succeeded to any remarkable degree except in West Dinajpur, Cooch Behar and Malda which are purely agricultural and where the densities of this population are 84.96, 75·3, and 44·4 per sq. mile respectively. It must be remembered that Jalpaiguri, Hooghly, Howrah and 24-Parganas where the densities are high are predominantly industrial areas, and the density of Nadia has been considerably and artificially swelled by the population in transit camps. This may well indicate a further aggravation in West Bengal's agricultural economy and fresh and grave problems in suburban housing, water-supply, sanitation, transport, semi-urban cottage crafts, power and manual industry. This will cause a fresh severe stress and strain of masses of shifting population, if at all they shift when the Damodar

Valley and Mayurakshi projects are ready to offer benefits, and the growing pains that West Bengal may then suffer from the effects of population shifting from suburban industrial areas to new agricultural spaces are a thing to be anticipated and provided for long before the eventuality arrives.

Urban Areas

There were 84 towns in West Bengal in 1921, 91 in 1931, 99 in 1941. In 1951 there are 111. In 1921 the urban population was only 15 per cent of the total population in West Bengal. In 1931 it was 16 per cent. In 1951 it is 25 per cent. That is to say, for every three villagers one is a town-dweller. The total urban population of West Bengal is roughly 62 lakhs which is 2 1/5 times more than the urban population of 1931. This explains the congestion noticed in all towns of West Bengal and the difficulty of securing accommodation in even small towns, because building has not kept pace with the growth of population. There are 50 towns in the Burdwan Division and 61 towns in the Presidency Division. In 24-Parganas alone, there are 30 towns of which 4 are now cities.

In 1931 West Bengal had two cities Calcutta and Howrah, in 1941, with Bhatpara added, three. Today there are six cities in West Bengal each with a population of over 100,000 persons. These are Calcutta, Howrah, Tollyganj, Bhatpara, Garden Reach and South Suburbs (Behala) with populations of 2,549,790, 443,207, 150,527, 133,762, 110,194 and 102,801 respectively.

Surprise has been expressed by those who had imagined that the population of Calcutta would exceed forty lakhs to find that the census has revealed a population of 25.5 lakhs only. But a cursory examination will confirm the latter estimate. In 1931 the population of Calcutta was 11.63 lakhs. It was a one-night census in 1931 and persons who came from the suburbs of Calcutta to work for the day in this city were counted in the City and included within its population. At a conservative estimate this population could not have been less than 30,000. So the resident population of Calcutta in 1931, with which a comparison of that in 1951 is feasible, was about 11.3 lakhs. There has been an increase of 15.2 lakhs during 20 years, or as much again and a quarter more than in 1931. During the 20-year period Calcutta has grown and built considerably only in the south over a space of about six square miles. If we leave out of account the total surface area of the maidan, the roads, streets, lanes, parks, ponds and other public places, and remember that according to municipal regulations one-third and in some areas two-thirds of every plot of residential land must be left vacant, the built-on ground area shrinks very considerably so much so that the overall density of 77,266·3 persons per square mile or 514.3 persons per acre really rises to more than 750 persons per acre of land in the 31 square miles of Calcutta city. A closer calculation will probably put the figure at over 800 persons per acre. In the next place, more people than at any time before 1947 now come to Calcutta for a living from the suburbs which have overnight as it were produced four new cities (not to mention the growth of other towns), all of which inject into Calcutta for the day a large proportion of their population. The immediate suburbs of Calcutta, Barrackpore sub-division, Tollyganj, South Suburbs, Garden Reach and Vishnupur Thana contain the majority of the refugee population of 24-Parganas which is 531,301 and it is not unreasonable to assume that a great part of this population come into Calcutta daily in search of a living and swelled the city's traffic. In the next place more young men and women are now out on the streets in search of situations who even a few years ago would be studying in institutions.

Greater Calcutta or Calcutta Industrial Area includes Calcutta, Howrah, Bally, Budge Budge, South Suburbs, Garden Reach and Tollygunge, sixteen municipal towns of Barrackpore sub-division and ten municipal towns of Hooghly district along the river Hooghly. The total population of this tract of land is 4,550,117 in an area of 145 square miles and the density works out at 31,380 per square mile. The ratio of males to total population in this area is 62.25 and the number of females to every 1,000 males, therefore, as low as 606. The population of the cities and towns in the Calcutta Industrial Area is given below:

Cities & Towns.	Total Population.	Displaced Population.
Calcutta	2,549,790	430,290
Howrah	443,207	36,321
Tollyganj	150,527	65,108
Bhatpara	133,762	13,054
Garden Reach	110,194	2,959
South Suburbs	102,801	19,202
Baranagore	77,416	19,850
Kamarhati	75,548	18,873
Serampore	73,550	9,667
Titagarh	70,555	3,886
South Dum Dum ..	62,243	30,443
Bally	60,521	7,444
Kanchrapara	56,538	20,872
Hooghly Chinsurah ..	55,991	6,839
Naihati	55,180	8,894
Panihati	51,866	16,812
Champdany	37,555	485
Barrackpore	36,444	10,218
Halisahar	35,438	4,847
North Barrackpore ..	33,008	7,981
Bhadreswar	32,088	1,267
Budge Budge	31,731	684
Baidyabati	30,744	1,192
Bansberia	30,136	3,476
Rishra	27,462	764
Garalia	23,972	1,736
Konnagore	19,887	3,020
Khardah	17,494	4,368
Uttarpara	16,168	1,196
Barrackpore Cantt. ..	13,921	4,233
Kotrung	13,095	1,372
Dum Dum	11,683	4,187
North Dum Dum ..	9,602	4,527
GRAND TOTAL ..	4,550,117	766,067

Other points of interest are as follows:—

Literates 6,087,797 or 24·54 per cent. of the population, of these 4,628,581 were males (34·68 per cent.) and 1,459,216 females (12·73 per cent.). Population dependent on agriculture is 57·21 per cent. of the total, and on non-agriculture 42·79 per cent. share-croppers and agricultural labourers form 75 per cent. of the agricultural classes, the two groups being about equal in number.

Of the total population 31·50 per cent. is self-supporting, 65·32 fully dependent and 3·18 earning dependents. In the agricultural group which forms 57·21 per cent. of the total population 14·89 is self-supporting, 39·93 dependent and 2·39 earning dependents. In the non-agricultural group which forms 42·79 per cent. of the total population 16·61 is self-supporting, 25·39 dependent, 0·79 earning dependent.

Of the total population 308,418 were non-nationals. Out of the non-nationals 267,110 were Pakistani nationals, 12,563 British, 8,040 Chinese, 1,082 Americans.

Of the total population 78·69 is Hindu, 19·85 Muslim, 0·71 Christian, 0·33 Buddhist, 0·12 Sikh.

LEGISLATIVE ASSEMBLY

LEGISLATIVE COUNCIL

(For list of members see under General Elections.)

FORMER PRINCELY STATES

THE integration of what used to be called Princely India with the larger India was complete in 1950.

During 1949 and the first three months of 1950 Mayurbhanj, Kolhapur, Baroda, Sandur, Tehri Garhwal, Banares, Rampur and Cooch-Behar were merged. Bhopal, Tripura, Manipur and Vindhya Pradesh were taken over by the Centre. Jodhpur, Jaipur, Jaisalmer, Bikaner, Bharatpur, Dholpur, Alwar and Karauli joined the Rajasthan Union. The Union of Travancore-Cochin came into being. An agreement was signed with Sikkim. And a constitutional relationship was established between the Centre and Hyderabad.

The present position of the former 552 Princely States may be described as follows: 216 states with an area of 108,739 sq. miles and a population of 19,158,000 are merged with the Governors' States. 61 States with an area of 63,704 sq. miles and a population of 6,925,000 are converted into Centrally administered Chief Commissioners' States.* And 275 States with an area of 215,450 sq. miles and a population of 34,699,000 are merged into States Unions under Rajpramukhs. The number of Centrally administered units† formed out of the old Princely States is 7: Himachal Pradesh, Kutch, Bilaspur, Bhopal, Tripura, Manipur, and Vindhya Pradesh. The number of States Unions formed out of the old Princely States is 5: Saurashtra, Rajasthan, Madhya Bharat, Patiala and East Punjab States Union, and Travancore-Cochin. The total area affected in all is 387,893 sq. miles and the population 6,0783,000. There are only three former States which retain their old frontiers in the modern set-up: Hyderabad, Jammu and Kashmir and Mysore.

The process of welding over 500 diverse States into viable units is carried to its final conclusion. The present Constitution of India specifies only 8 such units in part B of the First Schedule of the Constitution Act.

Under the new constitution the former States are all full-fledged constituent units of the Indian Union. Thus a States Union like Madhya Bharat has exactly the same constitution as that of Madras or Bombay and also the same kind of relations with Centre except that the head of a States Union is called Rajpramukh and the head of Madras or Bombay State is called Governor. Also the Centre has the right for a period of ten years to exercise supervision over a Rajpramukh State through the issuing of directives, a right that it does not normally possess in the case of a Governor's State.

It is useful to review the stages through which the States passed before they reached the present position of complete integrity with the Union. In July 1947 after the Indian Independence Act was passed the States acceded to the Dominion transferring to the Dominion Government power over defence, foreign affairs and communications. Later when Unions of Princely States were formed it was decided that the Unions ought to concede to the Centre wider powers than before, powers in regard to the same subjects as the Governors' Provinces did. This covered all the federal and concurrent subjects except financial and taxation items.

Finance and taxation became the subject of a special enquiry by the Indian States Finance Enquiry Committee which submitted a report in July 1949. The committee came to three general conclusions. First, the Union must have authority in States over the same range of subjects as the Provinces. Second, the Union must exercise its powers through the same agency as in the Provinces. Third, the State must contribute to the finances of the Centre on the same basis as the Provinces do. And receive grants and financial aid from the Centre, also on the same basis. The committee produced its reports at intervals from 1st June 1949 to 31st July 1949. Integration, in fact, involved very difficult administrative and financial problems, such as bringing about merger of functions, resources and personnel, allocation of liabilities, and arranging the transfer of power in such a way as to avoid any sudden financial dislocation in the unions. The whole process of transfer was to be spread over a certain number of years, 3, 5 or 10 as the case required.

Simultaneously, in the political sphere a change was taking place in the general attitude to constitutional reform in the Princely States. When the States Unions were set up it was thought that the constitutions of the Unions would be framed by the Unions' Constituent Assemblies themselves within the frame-work of the covenants and the Constitution of India. Later it was realised that this might result in lack of uniformity leading in its turn to further complications. A committee was therefore set up under the chairmanship of Sir B. N. Rao to frame a constitution similar to that of the Provinces on which the States Unions' constituent assemblies could model their own constitution. Later still with closer contact between the Central Government and the States Unions it became clear that even this was not a satisfactory arrangement as the whole procedure smacked of an evil past when the Princes were considered independent. So a conference was called in 1949 May and it was decided with the concurrence of the Unions and States' Chief Ministers that the Indian Constituent Assembly should frame the Constitutions for the States Unions as part of the Constitution of India. A committee was then set up under the chairmanship of Mr. M. K. Vellodi to examine the draft constitution of India and propose amendments to bring the States Unions into line with the Provinces. The amendments so proposed were referred to States Unions' constituent assemblies wherever they existed (Saurashtra, Travancore-Cochin, Mysore). The Saurashtra Assembly adopted the draft constitution in its entirety. The other two proposed a few changes some of which were accepted and others rejected. The acceptance of the constitution by each of the States Unions was proclaimed by the Rajpramukh on the basis of a resolution adopted by the Constituent Assembly in Saurashtra, Travancore-Cochin and Mysore. Elsewhere the proclamation was made by the Ruler as in Hyderabad. The acceptance of the new constitution by the people of the Princely States was implicit in the fact that the people had their representatives in the Central Constituent Assembly where the constitution was drawn up after prolonged deliberations.

The instruments of merger and the covenants establishing the various Unions are in the nature of over-all settlements. While providing for the integration of States and for the transfer of power from the Rulers they also guarantee the Rulers privy purses, succession to *gadi* rights and privileges, full ownership use and enjoyment of all private property belonging to them as distinct from State property.

UNIFICATION

The unification of India was no doubt an achievement of which the Ministry of States is justly proud. But a number of baffling problems still remained to be solved. Unification implies that the different administrative Units have the same kind of internal structure and that they all stand in the same relation to the Central Government. For instance, the administrative machinery of a Union must be similar to that of a Province. A Union like a Province must also have an elected legislature and a ministry responsible to the legislature. In other words, the process of unification must be followed by a process of modernization and democratization. Besides most of the States are badly equipped for the administrative tasks which they are called upon to discharge. Hence the Government of India which was chiefly responsible for the formation of Unions and the merger of States into Provinces had a duty to perform to the people who belonged to the merged or integrated States. The Government of India has therefore legally acquired certain over-riding authority over the Governments of the States Unions. It has the right to give directions to the Rajpramukh and his Government about the way in which they are to discharge their duties.

PRIVY PURSE

It is worthwhile enlarging some of these items.

In the past there was hardly any distinction between the Rulers' personal expenses and State expenditure, and even in those States where such a thing as privy purse did exist no effective steps were taken to see that personal and State expenditure were in practice separately accounted for. Large amounts were thus spent on Rulers, the members of their families and on State ceremonies and functions. Today every Covenant contains a clause fixing the Rulers' privy purse which is calculated to cover the expenses of the Rulers and their families including such expenses as those on residence, marriage, ceremonies, etc. The privy purse is guaranteed by Article 291 of the Constitution, the money being a charge on the consolidated Fund of India, subsequently to be recovered wholly or partly from the States Governments.

The basis of calculation is the revenue of the State. For the first lakh the Ruler is allowed 15 per cent, for the next four he is allowed 10 per cent, above 5 lakhs 7½ per cent, the maximum being 10 lakhs. This maximum is exceeded only in the case of the Rulers of some of the major States recognized as viable, and even here it is agreed that the amount is to be paid only during the life-time of the present Ruler.

The total annual privy purse commitments amount to 5.8 crores at the present time. When the amounts guaranteed to certain rulers during their life-time are refixed the total annual expenditure on this account would be reduced to 4 crores. Then there are the savings resulting from fixing the privy purses which will, it is calculated, amount to about two crores exclusive of the savings in Vindhya Pradesh, Patiala and East Punjab States Union, Baroda and Kolhapur.

Here, for instance, is a list of the annual pensions which are to be paid to some of the Rulers of the former States during their life-time only: Jaipur, Rs. 18,00,000; Jodhpur, Rs. 17,50,000; Bikaner, Rs. 17,00,000; Patiala, Rs. 17,00,000; Baroda, Rs. 26,50,000††; Travancore, Rs. 25,00,000; Indore, Rs. 15,00,000; Hyderabad, Rs. 50,00,000; Mysore, Rs. 26,00,000.

PRIVATE PROPERTY

The question of private property was settled by the States Ministry on an *ad hoc* basis, mainly through discussion between the representatives of the Ministry, the Rulers concerned, and the representatives of the Governments of the States or Provinces. No uniform system was followed in settling the question. The criterion applied was that if a building, for instance, was used exclusively by the Ruler or his family, it was considered to be his private property and if it was used for public purposes, it automatically became the property of the State.

The main features of the settlement are: The Ruler is entitled to retain the palace in which he lives. He can also have one more residential building only, either at a sea-side resort or at a hill station. All buildings in excess of these are to be made over to the State.

In no case is the Ruler allowed to retain any land except where there is positive proof that the land is his ancestral property. Even here, he is subject to the tenancy laws of his State and has to pay taxes like any other landowner. Generally no forest areas have been given to Rulers; though limited rights of grazing and obtaining fuel have been recognized in some cases. Shooting rights are conceded in well-defined areas subject to the laws in force in the place. The principle involved in agricultural land

* Two of these Himachal Pradesh and Vindhya Pradesh now have Lieutenant-Governors.
† With the exception of four (Kutch, Bilaspur, Tripura, Manipur) all States have Legislatures.
†† Recognition was later withdrawn from original incumbent.

is that the Ruler is not entitled to any income besides the privy purse. In fact, wherever proprietary right over land is recognized it is done mainly on the ground that many ex-rulers have the time and the resources to undertake modern and mechanical methods of farming. The States Ministry has however restored to the States administrations thousands of acres of such land and in the case of one Ruler, 154 big villages have been taken away and handed over to the State.

The States Ministry declined to recognize the grant of lands made by Rulers to their relatives or others on the eve of integration or merger of their States. In cases where such assignments were made long before the integration, the property becomes subject to land assessment and tenancy laws of the Union or of the province.

Several Rulers are stated to have parted with their money and investments without demur. For example, the Maharaja of Gwalior made over to his Government Bombay Improvement Trust scrips bearing an annual interest of about Rs. 50 lakhs. Similarly, the Gangajali (reserve fund) of Rs. 1,62,37,000 was also given to the State. The Maharaja of Baroda agreed to create a trust with a corpus of Rs. 2 crores the income from which was to be available for works of public utility in the territory of the former Baroda State, and the advancement of education.

Jewellery—priceless sapphires, emeralds, diamonds and pearls were all divided into two categories. Those actually used by the Ruler himself and those used as regalia at State functions. A list was then made of the jewels falling into the latter category, and though the Ruler could keep this jewellery in his custody the Union Government or the Provincial Government, as the case may be, were given the right of inspection and check up.

The Rulers had a civil list reserve funds intended to relieve the State of the expenditure in connection with marriages, etc. This was allowed to be retained by the Rulers.

Temples and properties attached to them are constituted into trusts. Temples situated within the palaces were classed as personal property.

Half the number of cars of Rulers, some of whom maintained fleets of 50 and more, were assigned to the State and are now being used by Ministers and other State officials.

Some Rulers were generous enough to make over to the State larger slices of property than they were obliged to do under the terms of the agreement. The Maharaja of Travancore for instance granted to the State property to the extent of as much as 20,000 acres.

There are some 35 palaces and houses belonging to Rulers in Old and New Delhi about which no decision was taken. Some of the States administrations claim them as State property while the Rulers challenge the claim.

The States Ministry arranged for the payment of pensions "in deserving cases," which include the aged mothers of certain Rulers, widowed sisters and other near relatives having no personal property.

The final result of the award is that most of the Rulers have been left with one-fourth of what they considered as their private property, the rest going to their Government.

When the administration was taken over the new Governments inherited cash balances and investments of the value of nearly Rs. 70 crores. During the settlement of the private properties the Rulers gave up their claims to approximately another 4.5 crores. Other property given up includes palaces, buildings, stables, garages, shops and aeroplanes.

There is a clause in every Agreement which says that all the rights and dignities (enjoyed till then by the Princes) would continue under the new constitution. These Agreements are excluded from the jurisdiction of law courts by Article 363, while Article 362 requires every legislative or executive authority to give due regard to the clauses of the Agreement in the exercise of its functions. Some of these rights have already been outlined. Others may be mentioned here. The Princes are guaranteed succession according to law and custom. Then there are minor rights and dignities which vary from State to State and are exercisable both inside and outside the State. No exhaustive list has ever been drawn up of such privileges and dignities, though some like the use of red plates on cars, immunity from civil and criminal jurisdiction and exemption from customs duties are well known.

The merged States were represented in the Provincial Legislatures by members nominated by the Governor-General through an order passed by him on 27th July, 1949.* The number nominated for each Provincial Legislature was as follows: Madras Assembly, 2; Bombay Assembly, 40; Bombay Council, 21; Bihar Assembly, 1; Madhya Pradesh Assembly, 17; Punjab Legislative Assembly, 1; Orissa Legislative Assembly, 31; U.P. Legislative Assembly, 6; West Bengal Assembly, 2.

The final step in integration was the absorption by one State of enclaves belonging to another State lying within its administrative boundaries. The States which exchanged enclaves were: Madhya Pradesh and Vindhya Pradesh, Punjab and Himachal Pradesh, U.P. and Himachal Pradesh, U.P. and Vindhya Pradesh, Bombay and Rajasthan, Bombay and Saurashtra, Madhya Pradesh and Madhya Bharat, Punjab and PEPSU, Punjab and Rajasthan, Madras and Mysore, Madras and Travancore-Cochin, U.P. and Madhya Bharat, U.P. and Rajasthan, Bhopal and Madhya Bharat, Himachal Pradesh and PEPSU.

PROBLEMS FACING UNIONS

We may next pass in review some of the problems which the new Unions have had to face. These problems are mainly two, unification of administration and democratization. Both these problems present enormous difficulty. Let us take unification of administration first. Often the various states forming part of a Union have different types of administration. In some all authority is concentrated in a few hands. Such a thing as Department hardly exists. Neither does such a convenient unit of administration as 'District'. A District Officer as a person who is responsible for co-ordination in a particular area is also unknown. Thus whatever new administrative units are set up they will have to acquire the requisite cohesion and the necessary local tradition before the state machinery can begin to function smoothly. In some States modern organization of a sort does exist but it is not well enough developed—certainly not to the same degree as in a Governor's State. In many States the traditional form of rule flourishes with a peculiar strength. In some Unions large tracts of land are held under a system called the Jagirdar system with the holders performing a variety of administrative functions. There are also any number of systems of land tenure. Large parts indeed remain under feudal conditions; and anything like a modern system of revenue administration which includes settlement, record of rights, trained revenue staff is unknown over vast areas.

It is thus clear that the administrative personnel inherited by the Union is unequal to the tasks which the new Government have to face. In a great many States rules of recruitment, training, promotion do not exist. The principle of selection through a competitive examination is recognized only in a few States and even here to a very limited extent. Traditions of common service are hardly developed anywhere. In some areas the predominance of certain classes in the public services particularly the army and the police is a hindrance.

With the promulgation of the new constitution the administrative machinery has become identical in theory at any rate with that of the Governor's State. But it will be some time before it can become the same in practice.

The manner in which the States Unions are participating in the recruitment to the All-India Services may be described here. This was decided after a conference of Chief Secretaries in July 1949. For emergency recruitment to I.A.S. five independent cadres have been set up for Hyderabad, Rajasthan, Madhya Bharat, Mysore and Travancore-Cochin. Then there are joint cadres for Vindhya Pradesh and Madhya Pradesh, Bombay and Saurashtra, and for Punjab and the Patiala and East Punjab States Union. A similar scheme is ready for the Indian Police Service and is awaiting the approval of the various Governments.† The Scheme envisages the absorption of suitable officials already holding posts in the administrative services.

So much for administrative problems. When we pass to political problems we find the position is just as difficult. Not many States have had legislatures functioning in them. Even in the local sphere the number of representative institutions such as panchayats, district committees, municipal committees is very limited. Political parties with a well knit organisation and a well defined programme of action do not exist: whatever differences there are between parties are of a local or factional character. Thus the whole background from which a democratic and representative government arises is completely lacking. Respect for individual rights, the habit of arriving at decisions through discussion and compromise, loyalty to decisions already arrived at which are the quaintessence of democracy are yet to develop in all the State Unions.

It is with such poor equipment that the Unions have to set about their work of building a new State. The States are starting as if from scratch and there is much to do by way of reconstruction. Land systems have to be changed, vast irrigation works have to be established, mineral and industrial sources have to be developed. Then there are welfare activities like public health and education which have to be organized. In such of the Unions as lie on strategic border areas security measures have to be put through. All these are problems which are difficult enough to try the skill and experience of long established administrations.

It is precisely because the Central Government is fully conscious that the Union Governments are unequal to the tasks which they have to fulfil that it has acquired the power of control and supervision over the Union Governments. In many different ways the Central Government is helping the Union Governments to organize and re-equip the administrative machinery. For instance, it has made available to Unions the services of experienced officials as Advisers and have also deputed senior officials of All-India Services to fill certain key posts such as those of Chief Secretary, Finance Secretary and Inspector-General of Police. A senior official of the Indian Civil Service Mr. M. J. Desai was placed on deputation from July to September in 1948 to visit the various Unions, investigate their problems and make suggestions about how the Government of India could help the Unions in building up an efficient administrative service. Today the higher posts in certain key services are filled by men recruited by the Central Government on an All-India basis, just as in the Governors' States, as is already mentioned.

FINANCIAL INTEGRATION

Officials of the Indian Union Government took over the administration of customs, excise and income-tax in the former States on 1st April, 1950 except in Kashmir. The Union Government thus formally assumed the powers and functions assigned to it under the new constitution. Income-tax and customs and excise circles have been defined. Rajasthan and Madhya Bharat will come under the Income-tax commissioner of Delhi. The Income-tax Commissioner of the Punjab will have jurisdiction over Himachal Pradesh, PEPSU and Bilaspur, while Vindhya Pradesh is joined to Uttar Pradesh. For purposes of general excise and customs PEPSU is integrated with Delhi, the Travancore-Cochin Union is attached to Madras, Rajasthan and Madhya Bharat are constituted into a single unit with headquarters at Ajmer for purposes of Customs on the Indo-Pakistan border. Similarly Hyderabad and Mysore form a single unit with headquarters at Hyderabad.

Wherever the existing rates of income-tax are lower than the Central Government rates as in Saurashtra, Rajasthan, Madhya Bharat, Mysore, Hyderabad, the existing rates will prevail. They will, however, be brought up to the central level in a period ranging between two and five years. Elsewhere, in PEPSU and Travancore-Cochin, where the existing rates are practically the same as the central rates the central rates will come into force immediately.

This extension of the Central Government's jurisdiction will bring the Central Government a revenue of 9 crores as against an expenditure of 36 lakhs.

STATES FORCES

The Union Government assumed full financial responsibility for States forces on April 1, 1950. Till then financial responsibility had vested in the individual State. These forces have always been an integral part of the Indian Army in the sense that they had a definite part to play in any scheme of national defence. There was also an obligation to maintain their personal and technical efficiency at a certain minimum level, an obligation which carried with it the need for periodical inspection by the Centre.

Before August 15, 1947 there were 44 States which maintained troops. Of these the I.S.F. units of the States which merged with Governors' Provinces such as those of Kolhapur, Baroda, the Gujarat States and of the Simla Hill States (Himachal Pradesh) were integrated with the Indian Army. In case of others also this absorption is now almost complete. So far as the Forces of the State of Kashmir and Jammu are concerned, full control was assumed on September 1, 1949.

On April 1, 1950 the Government of India assumed full control, both administrative and operational over the forces of Travancore-Cochin, Mysore and Hyderabad.

In regard to the Forces of Rajasthan, Madhya Bharat, Saurashtra and PEPSU operational control rests with the Central Government, while the Rajpramukhs retain administrative control subject to any directions or instructions which may be issued from time to time by the Government of India. These Forces which will be commanded by officers from the Indian Army will immediately come under the operational command of the Indian Army commands in whose area the commands are located. The strength and constitution of these Forces will be determined by the Government of India. The future recruitment of officers as well as of men will also be the responsibility of the Government of India.

MERGERS, INTEGRATIONS

We may next pass in review some of the mergers and integrations that took place in 1949 and early 1950.

1. **Kolhapur.**—The Government of India had to intervene into the affairs of Kolhapur because of the serious disturbances which took place in that State after the assassination of Mahatma Gandhi. As a result of the discussions which the Secretary of the States Ministry had with the Maharaja of Kolhapur an Administrator was appointed by the Government of India. An enquiry was also made into the disturbances by a commission. Later when it became known that the finances of the State were unsatisfactory the Government of India advanced a loan. Finally a merger agreement was negotiated with the Maharaja and on March 1, 1949 the Government of India made over the administration of the State to the Government of Bombay with which State it is now merged.

2. **Baroda.**—Considerations of a different sort led to the merger of Baroda with Bombay State. Though Baroda was financially sound and had a very efficient and up-to-date administration it lacked geographical unity. Its territory was interspersed with that of Bombay and Saurashtra in many different places. The administrative inconvenience so caused was thrown into striking relief by the experience during the famine in Baroda State in February 1949. It was found that foodstuffs could not be despatched to Baroda owing to regulations restricting movement of food from one administrative area to another. Consequently the Maharaja of Baroda was advised by the States Ministry to merge Baroda with Bombay. When the Maharaja found that his Ministers also agreed with the advice given by the States Ministry he consented to merge his State. The merger took place on May 1, 1949.

3. **The United State of Rajasthan** formed in 1948 was obviously an incomplete State. Three major States Jaipur, Jodhpur, Bikaner and one minor State Jaisalmer remained outside the Union. Though considered viable all these States were from every point of view historical, cultural, economic an integral part of Rajasthan. Thus an expansion of the United State of Rajasthan embracing the four States mentioned above could not be delayed very long. This larger union materialized on March 30, 1949. Later on May 15, 1949 the United State of Matsya merged with this larger Union to form one consolidated Union of Rajasthan which thus became the biggest of the States Unions.

Alwar and Karauli of the Matsya Union were in favour of merging with Rajasthan, while in Dholpur and Bharatpur opinion was divided between merger with Rajasthan and merger with U.P. Some kind of enquiry was conducted into the state of public feeling in Dholpur and Bharatpur and eventually it was decided to merge them along with the other two Matsya States into Rajasthan.

4. **Bhopal.**—There was prolonged agitation in Bhopal for merger with an adjoining Governor's State or States Union. There were also serious differences of opinion in the Council of Ministers of the Bhopal State on the need for merger. An attempt was made by the Ministry to suppress the agitation in the State for merger. Eventually the Nawab of Bhopal after prolonged consultations with the States Ministry agreed to make over the administration to the Government of India. The Government of India took charge on June 1, 1949.

5. **The Travancore-Cochin Union** is generally expected to be the last of its kind. Public opinion was strongly in favour of such a Union. Among the benefits which it was believed would flow from the integration are large-scale social and economic development of the whole area. It was hoped the merger would also help to unify the Hindu community which is broken up into innumerable fragments, and facilitate the attainment of equality by the Harijans who are estimated to form about half the population of the Union. The Union came into being on July 1, 1949.

6. **Mysore.**—As regards Mysore the Maharaja signed the revised Instrument of Accession surrendering to the Centre legislative authority in respect of the federal and concurrent legislative lists enumerated in List I and List III of the Seventh Schedule of the Government of India Act on June 27, 1949. Mysore was the last big State to do so.

7. **Junagadh.**—The events in Junagadh which culminated in the Central Government's taking charge of the administration are recorded in the *Year Book* for 1948. Later there was a referendum in Junagadh and the adjoining States which resulted in an overwhelming vote in favour of accession to India. After that Junagadh was administered by an official appointed by the Government of India who was assisted in his duty by three representatives of the people. In 1948 December the representatives of Junagadh and the adjoining States of Mangrol, Manavadar, Sardargarh and Babariawad passed a resolution to the effect that the administrations of these States should be transferred to the Government of Saurashtra and also that the representatives of these States should take part in the framing of the constitution of the Union which was in progress at the moment. Accordingly a supplementary covenant was executed by the Rulers of Saurashtra giving effect to these resolutions. On January 20, 1949, Junagadh was integrated with Saurashtra; the other States were integrated a short time before.

8. **Sirohi.**—There was a difference of opinion whether the State should merge with Bombay or be integrated with Rajasthan. It was therefore decided that till the future was finally determined the Government of Bombay should administer the State on behalf of the Government of India. After the review that followed it was decided to break up the State, Abu Road tehsil and a part of Dilwara tehsil were to be joined to Bombay and the rest to Rajasthan.

9. **Tehri-Garhwal.**—This Himalayan State with an area of 4,516 sq. miles, a population of 397,000 and a revenue of Rs. 37,00,000 had no future except merger with U.P. Consequently the Ruler with the approval of the Ministry signed the merger agreement on May 18, 1949, and the administration was taken over by U.P. Government on August 1, 1949.

10. **Benares.**—This enclave in U.P. had an area of 866 sq. miles, a population of 450,000 and a revenue of Rs. 35,00,000. The Ruler signed the merger agreement subject to safeguard of rights at certain religious ceremonies at Kashi on Sept. 5, 1949 and U.P. took over on Oct. 15, 1949.

11. **Rampur.**—This State in U.P. had an area of 894 sq. miles, a population of 477,000 and a revenue of Rs. 10,00,000. It was first taken over by the Central Government partly because of the wishes of the Ruler and partly because of the special set-up of the State. This was done on July 1, 1949. The administration was carried on in the closest co-operation with U.P. Government. But for obvious reasons the State could not remain indefinitely under Central administration. So the State was made over to U.P. with the concurrence of the Ruler on December 1, 1949.

12. **Cooch-Behar.**—The State which is situated in the north-east of India lies between West Bengal, East Pakistan and Assam. It has an area of 1,321 sq. miles, a population of about 641,000 and a revenue of about Rs. 1 crore. The merger agreement was signed by the Ruler on August 30, 1949 and the Government of India took it over on September 12, 1949. Later the Government of India came to the conclusion that it would be best to merge the State with West Bengal. This was done on January 1, 1950.

13. **Tripura.**—This is another north-east border State which has great strategic importance. It has an area of 4,049 sq. miles and a population of over 5 lakhs. When the Regent Maharani signed the merger agreement the State was taken over by a Chief Commissioner on behalf of the Government of India on October 15, 1949.

14. **Manipur.**—This State on the far east has great strategic importance. It is surrounded for the most part by tribal hill areas in Assam. The Government of India decided to assume control chiefly for security reasons. The instrument of merger was signed by the Ruler on September 21, 1949 and the Chief Commissioner took charge on October 15.

15. **Khasi Hill States.**—These States were not affected by the process of assimilation till the new constitution came into force. Before the advent of Independence they were administered by the Crown Representative through the Governor of Assam. After August 15, 1947 the States formed a sort of union and acceded to the Dominion of India individually and jointly. The agreement empowered the Dominion Parliament to make laws on any subject. The Khasi Hill States were thus in the position of a Chief Commissioner's Province. In the new constitution the Khasi Hill States are included in the Sixth Schedule along with Assam hill tribes. The two areas together form a new district in Assam called 'United

* With the general elections they have, of course, become part of the general electorate.

† This has now gone through.

Khasi-Jaintia Hill District, with autonomous powers conceded to the Sixth Schedule areas.

16. **Vindhya Pradesh.**—This is really a union of two groups of States known as Bundelkhand and Baghelkand States. It was difficult to persuade them to unite to form one administrative unit, and jealousy and distrust were so deep-rooted that for some time after the formation of the Union there were two Governments functioning simultaneously, one in Rewa and the other in Bundelkhand. It was not till July 1948 that a single Government was formed. But this did not put an end to group dissentions so that the Ministry was compelled to resign on April 14, 1949 when an official administration was set up. Ultimately the Rulers got together and decided to ask the Central Government to take over by an agreement made in December 1949. On January 1, 1950 the Central Government took charge through a Chief Commissioner. This was probably the best solution as the State is rich in natural resources and very backward. It also occupies a strategic position as it lies in the very heart of the country.

17. **Hyderabad.**—The circumstances under which the Union Government took action against the old regime in Hyderabad are fully explained in the Year Book for 1949. The military Government headed by Maj-Gen. J. N. Chaudhury formally terminated in 1949 December when General Chaudhury handed over to Mr. K. M. Vellodi, the present Counsellor of Hyderabad. With the Nizam's proclamation of November 23, 1949 Hyderabad became a constituent unit of the Indian Union with the constitution as framed by the Constituent Assembly of the Indian Dominion. The proclamation accepting the new constitution makes it clear that the Nizam's decision is subject to the confirmation of the people, whose will as expressed through a Constituent Assembly of the State must finally determine the nature of the State's relationship with the Centre as also the constitution of the State itself.

18. **Kashmir.**—The position in regard to the State of Jammu and Kashmir as a subject of conflict between India and Pakistan is fully set out in the Year Book for 1949. Here we are concerned with Kashmir as a part of the Indian Union, which legally it is. The State is thus included in Part B States. But in view of the special problems involved and of the fact that the Government of India have given an assurance to the people that they would finally determine the future certain special provisions have been made in the constitution. The effect of these provisions is that the Union Parliament has jurisdiction to make laws for the State only on matters either specified in the Instrument of Accession or specified hereafter through later addition with the concurrence of the Government of the State. An order has already been declared enumerating the matters on which the Union Parliament can legislate, and the provisions of the Indian Constitution Act which apply to the State. The whole position was to be reviewed by a Constituent Assembly now in being. On the recommendations of this Assembly the President of the Union would take the appropriate action as directed.*

19. **Sikkim.**—A treaty was signed between India and Sikkim by which India was to assume control of the States' defence and foreign relations, leaving the State with full autonomous powers in internal matters.

DEPOSITION OF BARODA RULER

The formation of a Rulers Union in 1950 with the Maharaja of Baroda as the President led to a serious controversy between the Government of India and the Baroda Ruler. While the President of the Rulers Union maintained that the organisation had been established to safeguard the personal interests and privileges of the rulers, the States Ministry said that it had reason to believe that the Union's activities were directed towards undoing mergers, setting up jagirdari and zamindari elements against the established Government, and for fighting the elections for the capture of power. Strong exception was taken by Government to the speeches and statements of the Maharaja of Baroda challenging the validity of the merger of his State into Bombay. The Government of India, therefore, issued the following order against the Maharaja on April 12, 1951:

"The Government of India have for some time past been considering with grave concern the activities of His Highness Maharaja Sir Pratap Singh Gaekwar of Baroda. The activities in which he has been indulging since his installation on the *gaddi* in 1939 are well-known, especially to the people of Baroda. His dissipation of crores of rupees of public funds was the subject of discussion in the Dhara Sabha of Baroda, the members of which passed resolutions calling upon His Highness to abdicate in favour of his eldest son and requesting the Government of India to institute an enquiry into the circumstances relating to the misuse and misappropriation of public funds.

"His activities after the coming into force of the Constitution of India have been particularly objectionable. He challenged the Constitution of India and contended that the merger of Baroda with Bombay was brought about without his concurrence and was not warranted by the terms of his Agreement with the Government of India. The Government of India pointed out to him that, in challenging the validity of the merger and the Constitution of India, he had indulged in an act of disloyalty to the country and that the Government of India would have to consider whether he could continue to enjoy his present status and position which depended on his recognition by the President under the Constitution which he sought to repudiate.

"Undeterred by this warning, he has in subsequent correspondence defied the authority of the Government of India, even charging them publicly with 'malicious distortion of facts.' Furthermore, it has been brought to the notice of the Government of India, and they have every reason to believe, that His Highness is organising and financing various activities with a view to undoing the constitutional settlement arrived at with Rulers of Indian States. They have also reason to believe that he has been giving support generally to the reactionary and anti-national elements in the country.

"For these and other reasons, the President has regretfully come to the conclusion that the continued enjoyment by the Maharaja of his present position as the Ruler of Baroda is prejudicial to the interests of the country.

"Accordingly, in exercise of the powers vested in him under Article 366 (22) of the Constitution, the President hereby directs that, with effect from the date of this order, Major-General His Highness Maharaja Sir Pratap Singh Gaekwar, G.C.I.E., do cease to be recognised as the Ruler of Baroda and that his eldest son Yuvraj Fatehsinh be recognised as the Ruler of Baroda."

In announcing Government's decision to depose Maharaja Sir Pratap Singh Gaekwar of Baroda, in Parliament on April 14, the Prime Minister, Mr. Nehru, warned: "Any challenge to the Constitution of India or any other unconstitutional or anti-national activities on behalf of the rulers cannot be tolerated by Government and very prompt action has to be taken so that the very privileges and resources we have placed at their disposal may not become means for subversion of the Constitution and of the peace of the land, when we have so many difficulties and dangers to face."

Mr. Nehru also announced that Maharaja Sir Pratap Singh Gaekwar had been informed that, should he so wish, he could make any submission to the President within a month in regard to the order.

Eight days later on April 20 the Maharaja was reported to have made a submission to the President denying the charges made against him, professing loyalty to the Constitution and the Government and asking for reinstatement. He followed this up with interviews with Mr. Ayyangar and Mr. Nehru at which he was once again reported to have offered his apologies and given assurances of his loyalty.

The submission was, however, rejected by the President. The communique which announced this decision of the President said that the President was satisfied that the withdrawal of recognition of Sir Pratap Singh as the Ruler of Baroda was fully justified by facts. The communique explained:

"Any requests which the ex-Ruler may make in respect of allowances, residence, titles, privileges and the like, having regard to his altered status, will receive sympathetic consideration of the Government of India along with other outstanding matters arising out of the merger agreement."

The President decided as "a matter of courtesy" that the ex-Ruler be permitted the title of "His Highness".

The ex-Ruler "asked for sympathy and for being given another chance, but did not want any further inquiry into, or further particulars about, the charges against him."

This decision of the President automatically confirmed the earlier order naming the eldest son of the ex-Ruler, Yuvraj Fatehsinh, as the Ruler of Baroda.

The President also decided that Her Highness Maharani Shanta Devi, the first wife of the ex-Ruler, would continue to retain her titles, privileges and dignities.

How far the decision to recognise the title of "His Highness" conformed to the provisions of the Constitution which forbids recognition of titles except in the case of the existing titles of Rulers of States, was the subject of comment among legal circles.

REVIEW OF EVENTS IN 1951-52

The most outstanding event in Princely India during 1951 and the early part of 1952 was the constitutional reforms which were ushered in. Thus all Part 'B' and Part 'C' States which were once under the rule of Indian Princes participated in the first general elections with the rest of India.

Three other events of importance were the exemption granted to Mysore from the operation of Article 371, which provides for Central overall control and supervision over all Part 'B' States, the controversy that flared up in Travancore-Cochin over the appointment of a Counsellor and the virtual completion of extension of all-India services to Princely India.

Elections were held in Princely India on the same basis of adult franchise as in the former British Indian provinces. The Congress emerged as the largest single party in all Princely States except two. It did not succeed in obtaining an adequate majority in P.E.P.S.U. and Travancore-Cochin Unions with the result that ministerial stability in these two Part 'B' States could not be guaranteed.

The Congress and other political parties faced bitter opposition from Princes or the candidates belonging to royal families. Actually, the Congress suffered serious reverses in Rajasthan at the hands of Princes and other royal candidates. The late Maharaja of Jodhpur provided the spearhead of electoral opposition and the former Chief Minister of Rajasthan, Mr. Jai Narain Vyas, was defeated by the Maharaja in person in two constituencies. This provoked political agitation on the part of Congressmen and other candidates who alleged that the Princes had exploited their power, prestige and position for political advantage at the polls. It was even alleged that some of them had won elections by means of a campaign of terrorism against the voters.

Princely participation in the elections led to a more serious complication in Saurashtra. The Congress was returned with an overwhelming majority but after the elections the Congress Ministry had to carry out vigorous investigations into the manner in which some members belonging to royal families had supported Congress opponents. It was alleged that these Princes had helped and supported notorious dacoits of the State in launching a campaign of terrorism against the voters in a desperate effort to dislodge the Congress Ministry and take power. Among the Princes and members of royal families who were arrested in this connection were Prince Nirmal Kumar Sinhji of Bhavnagar, Prince Fatehsinhji of Limbdi, a Girasdar leader, Prince Kalika Prashad, younger brother of Maharaja of Morvi, Thakur Chandrasinhji of Dhrol, a member of the Saurashtra State Assembly and Mr. Harisingh Gohel, former president of Rajkot Municipality and Secretary of Girasdars Association.

In PEPSU also the Congress and other parties faced considerable opposition from princely candidates, prominent among them being the Nawab of Malerkotla but the Congress concern in this States Union was due to the fact that the Akali Dal and other opposition parties had reduced its chances of securing an absolute majority. Despite this, the Congress in PEPSU did better than was predicted and managed to form a ministry with the support of a few independents who came forward to support the Congress.*

If in PEPSU the Right Wing parties had snatched away a good number of seats from the Congress, in Travancore-Cochin Union it was the Left Wing parties that registered an unexpectedly large number of successes. The Congress itself was a divided house in Travancore-Cochin but it managed to emerge from the elections as the largest single party. With the support of a few independents the Congress formed a ministry though its tenure of office seemed very precarious.

A corollary to general elections was the setting up of Ministries in Vindhya Pradesh, Bhopal and Himachal Pradesh.

In the constitutional field, the exemption granted to Mysore from the operation of Article 371 of the Constitution was an important event. Article 371 says: "Notwithstanding anything in this Constitution, during a period of ten years from the commencement thereof, or during such longer or shorter period as Parliament may by law provide in respect of any State, the Government of every State specified in Part 'B' of the First Schedule shall be under the general control of, and comply with such particular directions, if any, as may from time to time be given by the President: Provided that the President may by order direct that the provisions of this article shall not apply to any State specified in the order."

The circumstances under which the President agreed to exclude Mysore from the operation of this article centred round an earlier directive requiring the transfer of what had come to be known as the L. S. Raju case to some court outside Mysore or to appoint a Sessions Judge from outside the State. The transfer of the case was suggested by the Government of India as the Chief Justice of the Mysore High Court figured as complainant and principal witness in it. The Mysore Government were not prepared to agree to either proposal of the Government of India because they felt it would impair the State's sovereignty. The issue was discussed at length in the State Assembly and the consensus of opinion was that the Government of India should be requested to exempt Mysore from the operation of the article. The view of the Government of India was that the demand for such exemption would be sympathetically considered provided the Mysore Government agreed to secure a judge from outside the State for the trial of the L. S. Raju case. The Mysore Chief Minister, Mr. K. C. Reddi, specially came to Delhi to persuade the Prime Minister, Mr. Nehru, to recommend exemption of the State from the operation of the Article 371 of the Constitution. Following Mysore's decision to agree to the Central demand, an order was issued by the President excluding Mysore from the purview of Article 371.

As was anticipated, the decision of the Government of India had repercussions elsewhere particularly in Travancore-Cochin whose leader represented to the Central Government that their States Union also should be exempted.

The demand was revived by Travancore Cochin after the elections when the State Ministry intimated its intention of appointing a Counsellor. The decision to appoint Counsellors to all Part 'B' States except Mysore was taken because these States would continue to face difficult problems in regard to the establishment of a stable and efficient administrative structure and introduction of a proper financial system including treasury arrangements and maintenance of law and order. It was therefore considered essential that for some time to come the Government of India should continue to help these States by lending them senior officers to advise on important administrative and financial matters. These officers were to be designated as Counsellors and were expected to function as observers on behalf of the Central Government to which only important matters including questions of major policy would be referred. The approval of the Government of India would also be necessary for filling certain important key appointments.

The leaders of Travancore-Cochin Union considered this as a retrograde step as they did not have any official from the Centre as adviser or regional commissioner to the States Union at any time since integration.

In the administrative field, the extension of the All-India services to all Part 'B' States was completed, thus achieving the administrative integration of Princely India in addition to political and fiscal integration accomplished in 1950. As far as it is known, 18 recruits from open competition, 34 candidates selected by the Special Recruitment Board and 82 who received special promotions, have been allocated to the I.A.S. cadre in Part 'B' States. The Indian Police Service cadre has also been constituted in all Part 'B' States in the same manner.

* The original Rajasthan State was formed on April 18, 1948; Jodhpur, Jaipur, Bikaner and Jaisalmer joined it, on April 7, 1949; the Matsya States of Alwar, Bharatpur, Dholpur and Karauli were integrated with it on May 15, 1949.

HYDERABAD STATE

THE Hyderabad State forms the eastern portion of the Deccan. The State lies between 15°10′ and 20°40′ N, and 70°40′ and 81°35′ E, covering an area of 82,313 square miles. The population according to the 1951 census is 18,652,994 which represents an increase of 14.24 per cent. The languages spoken are Telugu, Marathi, Kanarese and Urdu.

The State may be divided into two fairly definite regions, the western, generally called Marathwada and the eastern called Telingana, although the State contains some Kanarese-speaking population as well. If a line were drawn from the confluence of the Tungabhadra and the Krishna in the south to the confluence of the Manjera and the Godavery in the north, and extended right up to the Hyderabad-Berar boundary, this would serve as a good demarcation of the two tracts. These regions differ not only linguistically but also in their physical formation; for the Marathwada is covered by trappean rock, while the Telingana has granitic and calcareous formation. The western trap or black cotton soil region (which is continued northward in Berar) is the land of wheat and cotton, while the granitic Telingana is the land of rice and jowar. Moreover, the former is covered with luxuriant vegetation, cliffs, crags and undulating hills, while in the granite and limestone region the hills are bare of vegetation and the land is covered with huge fantastic rocks and boulders. Also in the east as the soil is sandy, the rivers dry up in hot weather, necessitating the storage of water in tanks and artificial lakes for purposes of irrigation.

Hyderabad is an important tourist centre. The Pitalkhota, Ajanta and Ellora caves are famous for their paintings, sculpture and architecture all over the world. Other famous places worth mentioning are the Bhadrachallam temple of Ramdas fame, the Pakhal Lake which has never known drought, the Darga of Khaja Bande Nawaz at Gulbarga important for Muslims, the reputed shrines of Thuljapur, Parli-Vaijnath and Aundh, the holy Gurudwara of Guru Govind at Nanded Kishkindha, important for Sikhs, the beautiful Barid Shahi tombs at Bidar, the Fort and Tombs at Golkonda, the great temple at Palampet, Hanamkonda and Ittagi, ruins of the famous Hindu King Nala at Naldurg and the great Fort and other ruins of the Kakatiyas at Warangal.

COMMUNICATIONS AND TRANSPORT

The City of Hyderabad is the railway communications centre. From here lines radiate east, south, west and north. The line which goes east passes through Warangal and joins the Madras-Calcutta line at Bezwada. The line which goes south connects with the Madras-Bombay line at Guntakal. The western line links up with the Madras-Bombay line at Wadi. The northern line goes north-west rather than north and joins the main Bombay-Bhusaval line at Manmad. The total mileage open for traffic is 139,566.

The Railways used to operate a Road Transport Service covering 5,116 miles, which has now been converted into a Road Transport Corporation. This includes suburban and district services. A large fleet of buses is maintained for this purpose. The State has 6,191 miles of road of which 4,500 miles are metalled.

There is also air service provided by a Company named the Deccan Airways Limited, now taken over by the Government of India, with an air mileage of 1,858. Hyderabad City is connected by air with Bombay, Nagpur, Madras and Bangalore. There are two major aerodromes in the State, *viz.* the Begumpet and Hakimpet aerodromes. There are also one intermediate aerodrome, four minor aerodromes and two landing strips.

There are two radio broadcasting stations, one at Hyderabad and the other at Aurangabad, the latter being a regional station. Both these are now controlled by the A.I.R.

Hyderabad City has an automatic telephone system with one main exchange and three satellite exchanges and with 1,834 connections in the City and in the suburbs.

Besides the above, there are Telephone Exchanges at Warangal, Jangaon, Bhongir, connected to Hyderabad by long distance lines. There are also Telephone Exchanges at Raichur, Jalna and Aurangabad, the latter two connected to each other by land lines. These exchanges have also been connected to All India Trunk to encourage business and thus enhance trade.

Twenty-five Public Call Offices are working in Hyderabad, Aurangabad, Bhongir, Beedar, Bhir, Jangaon, Jalna, Hyderabad, Kurnool, Kurnoolpeta, Narayanguda, Raichur, Trimulgherry, Warangal, G.T.O. Secunderabad, Kingsway Post Office, Bolarum Bazar Post Office, Trimulgherry Post Office, Gulberga, Jadcherla, Khammameth, Nizamabad, Sailoor-Nanded Peddappali, and Perbhani, these stations put through trunk calls, all over India and foreign countries.

Eighteen Radiophone Stations have been opened at Hyderabad, Munirabad, Aurangabad, Nalgonda, Raichur, Warangal, Khammahmet, Kothagudam, Miryalguda, Huzurnagar, Nizamabad, Nizamsagar, Nanded, Jedcherla, Bhir, Osmanabad, Latur and Bidar. These stations put through trunk calls, in addition to accepting messages from the public at cheap rates.

56 Combined Offices have also been opened in Hyderabad to facilitate the receiving and sending over of telegrams to all places. Besides this a Phonogram system has also been introduced in the State which enables telephone subscribers to send and receive their messages over their telephone.

MINERAL RESOURCES

The mineral wealth of the State is its greatest asset, and Hyderabad State has long been noted for its iron, gold and diamond mines. Modern mining in Hyderabad may be considered to have begun about the end of the last century, when the Hyderabad (Deccan) Co., Ltd. was granted mining concessions in the State. Coal is now being mined at Tandur, Yellandu, Sasti and Kothagudam and the output from all coal fields in 1950 was 1,213,803 tons.

Gold was being mined at Hutti in Raichur District and the Hutti (Nizam's) Gold Mines Ltd. which had a successful career for nearly 20 years, closed down its operation in 1920 after the First World War. Gold mining has been revived at Hutti and a new company, the Hyderabad Gold Mines Ltd., was formed to work the property. Production started in October 1948, and output of gold in 1950 was 7,320.1 fine ounces.

The world famous Golconda diamonds were mined along the Krishna valley, particularly round about Partial, in Warangal District which has been referred to by Tavernier in his "Travels" in the nineties of the last century. The Hyderabad Deccan Co., worked the Partial mines and collected about 3,444 stones weighing 2,085 carats. Since then, there has been no serious effort to prospect or mine for diamonds.

The iron ores of Hyderabad are mostly siliceous low grade ores, and are abundantly found in Adilabad, Karimnagar, Warangal and Raichur Districts. The quantity of iron ores available in these localities is estimated at about 40 million tons, ranging upto 40 per cent iron, the richer ores not occurring in large quantities in any one locality. The Hyderabad coals are non-coking and the exploitation of the iron ores has to wait modern developments in the technique of iron smelting.

There are abundant ceramic raw materials like Kaoline, white and refractory clays, felspar and quartz suitable for the manufacture of pipes, pottery, porcelain, sanitary ware, refractory bricks as well as glass. The clay deposits of Adilabad and Bidar Districts are supplying raw material for local consumption. About 2,221.5 tons of white clay was quarried in 1950.

The Muscovite (ruby) mica deposits of Kallur, and graphite mines in Paloncha in Warangal District, produce marketable quantities of the material. Abrasive materials like corrundum, garnet, staurolite and other valuable minerals like zircon, kyanite and andalusite are found in parts of Warangal District.

Stray deposits of chromite occur in Madria taluk while old working for copper have been noted in Raichur, Gulbarga, Warangal and Nalgonda Districts. Extensive old workings occur near Yellambailu not far from Kothlagudium collieries. Iron pyrites, a source for sulphur in the sulphuric acid manufacture, is found as thin layers and lenses in the coal seams at Tandur and Kothagudium but only about 30-40 tons of the mineral can be collected in a month from both the collieries.

Soapstone or steatite deposits in Karimnagar District are worked by Sirpur Paper Mills and they quarried 90 tons of the material in 1950, for use in their factory. Coloured clays, ochres, lithomarge and bole suitable for paints and distempers are found in commercial quantities in various parts of the State.

The building stones of Hyderabad are perhaps one of the most important and useful mineral assets of the State. The hard, durable and varied coloured granites yield unlimited supplies of excellent building material for heavy construction and decorative work. They take a smooth and fine polish. The limestone deposits supply any quantity of flag stones for flooring and roofing and also for construction purposes. These limestones are available in different colours, take a fine polish and provide excellent material for flooring and design work. The Government controlled limestone quarries produced about 1,74,754 tons of flag stones and 32,560 tons of building stones in 1950. Marbles, in white, grey, yellow, black and streaked varieties are obtained in large quantities in Warangal District. The quarries worked successfully in the recent past, and there is every scope for developing this industry on a large scale. About 136 tons of marble was extracted in 1950. Marble is also burnt for making superior quality lime.

The limestones are excellently suitable for cement manufacture. The Associated Cement Co., Ltd., at their Shahabad Works, use the locally available limestones and shals as raw material. In 1950 the output of cement was 1,61,066 tons and the company quarried 2,37,943 tons of limestone.

The State possesses 12,729.02 square miles of forest. The forests in the east are extensive, while in the west they are as good as non-existent.

There are in the State, 239 medical institutions with 3,736 beds. It has 15,077 Co-operative Societies having 14,74,914 members with a paid up capital of Rs. 2,56,33,452. There are 9,706 educational institutions with 23 Colleges, 117 High Schools, 191 Middle Schools, 8,961 Upper and Lower Primary Schools and 437 special schools. 7,17,271 pupils are studying in these institutions.

There are in all 23 constituent colleges including one for women and six professional colleges, besides four affiliated colleges. The Osmania University was founded in 1918. All its professional faculties teach through the medium of English, but in the faculties of Arts and Science, some colleges teach through the medium of English while a majority teach through the medium of Hindustani (with the option to use either the Devanagari or the Urdu script).

AGRICULTURE

Agricultural conditions differ considerably in the three main regions of the State. In the Telingana Division, which is generally full of hills and valleys, wet cultivation is carried on on a large scale, the water being supplied by tanks

and irrigation reservoirs. The number of major tanks is 7,881 and of minor 25,238. Conditions in the Marathwada country are quite different as the rainfall is less and the soil so rich that the ryots are never anxious to grow wet crops. In some places advantage has been taken of the water obtainable from rivers and wells, and garden crops which are more profitable than dry crops, are extensively grown. Conditions in the Karnatak Division are much the same as in the Marathwada, and the ryots are not anxious to grow rice. This is the reason why the Telingana people generally use rice and the Marathwada and Karnatak people use wheat or jowar for their food.

There are usually four crops in the year in the Telingana, namely, *kharif, rabi, abi* and *tabi*, but in the Marathwada, where irrigation sources are very limited, only two crops are raised, namely, *kharif* and *rabi*. These are known as 'dry crops' because they are cultivated without the help of artificial irrigation and depend on the monsoon rains. The principal *kharif* crops are yellow jowar, groundnut, cotton, bajra, moong, toor, kulti, castor, til, kangi, maize, urad, *Kodru*, Bengal-gram and Kulthi. The principal *rabi* crops are cotton, white jowar, gram, wheat, chillies, sugarcane, karad, alsi or linseed and tobacco. According to the latest statistics available, in all 24,364,000 acres are under cultivation in the State, of which 1,287,000 acres are under paddy, 448,000 acres under wheat, 7,252,000 acres under jowar, 1,668,000 under groundnut and 2,418,000 under cotton, 832,000 acres under castor, 89,000 acres under sugarcane and 28,000 acres under tobacco. Land under irrigation in the whole State is in the neighbourhood of 1,488,000 acres.

About 500,000 tenants, spread over 22,000 villages in Hyderabad State, became "protected tenants" on June 10, 1951 under the terms of the Hyderabad Tenancy and Agricultural Lands Act, 1950, with the option of becoming real owners of their land by paying to landlords three times the annual gross produce of the land.

To enable tenants to acquire lands, Government have decided to establish land mortgage banks throughout the State. These banks will advance loans, which will be repayable in easy instalments spread over a long period.

The Tenancy Act has also been amended with regard to maximum holding, which would now be five times the economic holding and not ten as it was before. Under the Act, an economic holding fetches a monthly income of Rs. 150 per family.

The State possess approximately (11,325,500) heads of cattle. It has excellent indigenous types of cattle, classified as the Krishna Valley type, the Deoni type, the Red Khandari type and the Malvi type. The improvement of cattle for milk and work qualities on a large-scale throughout the State is being attempted through the establishment of Cattle Breeding Farms and concentrated livestock improvement activities in certain breed zones. Cross Breeding with Bikaner Wool Type sheep is also under experimentation and the results so far obtained are very encouraging.

INDUSTRIES AND TRADE

There are within the State about 803 large-scale industrial organisations employing nearly 63,465 persons excluding railways and mines. The State has 6 cotton mills producing annually 1,92,71,566 pounds of cloth and 2,12,07,402 lbs. of yarn. The State collieries produce 12,13,803 tons of coal annually. The sugar factory at Bodhan in the Nizamsagar area produces annually 19,282 tons of sugar and the Sirpur Paper Mills produce 4,650 tons of paper. The production of cement amounts to 1,66,848 tons; of power alcohol 509,778 gallons; of glass 4,000 tons; and of cigarettes 3,885,864,500. The mica mines in the State produce 29 cwts. of finished mica per year and the graphite mines produce 35 tons of crude graphite annually. Electric power produced in the State amounts to 50,799,954 units. Thirteen cities and towns are supplied with electric power and the number of consumers of power and *lighting* is 31,189. There are 228 registered joint-stock companies with a total authorised capital of O. S. Rs. 42,51,34,595, issued capital of O. S. Rs. 19,87,17,017, subscribed capital of O. S. Rs. 16,46,99,023 and paid-up capital of O. S. Rs. 12,83,29,649.

Small-scale and cottage industries consist of yarn spinning, cloth weaving, Paithan industry of gold, embroidery, Aurangabad *Himru*, Mashru and Kamkhab; blanket making, cloth dyeing and printing, silk weaving, wool carpet and durry making, tussar work, hosiery, bidriware, silver filigree work, Nirmal toy works, hand-made paper metal industry, perfumery, tanning and paper, metal industries, brass industry, button industry, horn industry, soap manufacture, perfumery, tanning and leather industries, cane work, brush work, mat making, clay work, brick and tile making, bangle manufacture, carpentry, smithy, biscuit making, fruit and vegetable processing, and beedi making.

Handloom weaving is the most important cottage industry in the State. Next in importance and usefulness only to agriculture as a national occupation, this industry which is pursued by three per cent of the total population consumes imported yarn of the approximate value of Rs. 1,14,30,000 annually and clothes nearly half the population of the State.

Besides imported raw materials, it uses up local mill-spun yarn in value of nearly Rs. 25 lakhs and hand-spun yarn of nearly Rs. 4 lakhs. Of the 140,000 looms working in the State, nearly 45,000 are of the throw-shuttle type and 92,000 are equipped with flyshuttle slays. There are about 5,880 looms engaged in the silk weaving industry, and 14,000 looms in the kambal weaving industry from which kambals valued at Rs. 3,10,000 are exported.

The Commerce and Industries Department after a comprehensive survey of cottage industries has implemented the following schemes with a view to developing and improving the major cottage industries in the State. 1) Textile Training Centre; 2) Handloom Developing Scheme; 3) Hand-spinning Scheme; 4) Woollen Industry Scheme; 5) Textile Designing Scheme; 6) Home Industries Scheme; 7) Sericulture Scheme; 8) Tanning Scheme; 9) Palm Gur Development Scheme.

The principal imports are piece-goods, yarn, salt, sugar and jaggery, fruits and vegetables, gold, silver, livestock, betelnut, silk, timber, copper, brass sheets and utensils, cinema films, mineral oils, motor cars and other vehicles, machinery, chemicals, drugs and medicines, spices and tea. The principal exports are cotton, groundnuts, foodgrains, castor seed, linseed, sesamum, livestock, oils and oil-cakes, coal and building material, dyeing and tanning substances, hides and skins, matches and tobacco. Excluding the value of re-exports and re-imports and the value of silver and gold exported from Hyderabad State, the total trade of Hyderabad expressed in terms of the ascertained value of goods amounted to Rs. 194 crores in 1950-51. Of this export amounted to Rs. 41 crores, 18 lakhs and imports stood at about Rs. 52 crores 85 lakhs.

LABOUR

The Government appointed a Labour (Factory) Investigation Committee in June 1949, to investigate labour conditions in the State. The report of the Committee was accepted by the Government with some modifications, and the minimum earning of the lowest paid employee in Government factories was raised from Rs. 43 to Rs. 52. Employees of other Government concerns which are not factories, *viz.* those of Drainage Department, Water Works Department, State Agricultural Farms are also paid wages on a similar scale.

The Hyderabad Maternity Benefit Act 1349 Fasli has been amended to provide for payment of maternity benefit at Re. one per day six weeks before and six weeks after confinement. The Hyderabad Shops and Establishments Act 1951 has been promulgated to regulate the conditions of employees of shops and establishments in the State. The State Government sanctioned construction of about 1,000 houses for industrial workers in Hyderabad City under the Industrial Housing Scheme sponsored by the Ministry of Labour, Government of India. Work of construction is progressing steadily.

Local Boards.—All the Local bodies have been reorganized so as to be representative in character, consisting mostly of such members as are likely to be returned in the next elections.

The first Municipal Corporation for Hyderabad city consisting of 66 members formally came into being on April 16, 1951 and was inaugurated by the then Chief Minister Hon'ble Shri M. K. Vellodi. Similarly a Municipal Corporation was established for Secunderabad on 16th April 1951.

For purposes of Revenue administration the State is divided into 17 districts and 138 talugas including nine mahals. Each District is under a Collector assisted by a Deputy Collector.

FINANCE

As a result of constitutional changes after January 26,1950, *i. e.* the date of the coming into force of the new Constitution of India, the administration of such of the subjects in Hyderabad State as are included in the list of Union Subjects has with effect from 1st April, 1950 been taken over by the Central Government as falling within their functional ambit. The principal subjects which have been transferred to the control of Central Government are the following:—

(1) Taxes on Income; (2) Central Excise Duties (*i. e.*, duties on sugar, matches, tobacco, etc.); (3) Railways; (4) Posts; (5) Telephones; (6) Currency and Mint; (7) Army; (8) Audit and Accounts; (9) Aviation; (10) Broadcasting.

The year 1950-51 was the first financial year after the federal financial integration and, therefore, the budget estimates were very largely influenced by the transfer of several revenue earning and expenditure departments.

For the 1952-53 budget revenue receipts were estimated at Rs. 30,99 lakhs, and the expenditure at Rs. 31.52 lakhs, leaving a deficit of Rs. 53 lakhs. The budget provides Rs. 75 lakhs, for the first year's programme of the Five Year Plan.

The Indian Government currency had become legal tender in Hyderabad with effect from 26th January 1950, but Hyderabad Government currency will continue to be legal tender until it is demonetised. There is a State Bank with branches in the Union as well as in the Districts of the State. The Government Treasury is incorporated in the State Bank.

Customs import duties on all articles were abolished on Aug. 1, 1952.

JUDICIARY

There are one Chief Justice and 10 Puisne Judges in the High Court. There are 183 Judicial Officers administering criminal and civil justice including two Sessons Judges.

The Indian Civil and Criminal Procedure Codes have been extended to the Hyderabad State with effect from April 1, 1951, which necessitated certain changes in the set-up of the Subordinate Judiciary. Government therefore, decided to appoint a District and Sessions Judge and Sub-Judge and District Magistrate in each District, and a Munsiff Magistrate in each Taluqa who will exercise the powers of a First Class Magistrate, and will also have jurisdiction over specified Railway areas, as the posts of Railway Magistrates have been abolished. There is also a Special Magistrate for all the Districts.

General Elections on the basis of adult franchise were held for the first time in the State early this year, and a Legislative Assembly, consisting of 175 elected members was consequently inaugurated in March 1952. The former Ministry, which was formed by Mr. M. K. Vellodi in December 1949 was also dissolved, and in its place a new Ministry of 13 popular members has been formed with Mr. B. Ramakrishna Rao as the Chief Minister. The State has returned 25 members to represent the State in the House of the People.

COUNCIL OF MINISTERS

Chief Minister, General Administration, and Revenue, B. Ramakrishna Rao.
Home, D. G. Bindhu.
Excise, Forest and Customs, K. Venkat Ranga Reddy.
Commerce and Industries, Vinayakrao Vidyalankar.
Finance, G. S. Melkote.
Public Works, Nawab Mehdi Nawaz Jung.
Public Health and Education, Phoolchand Gandhi.
Labour, Rehabilitation, Planning and Information, V. B. Raju.
Supply and Agriculture, Dr. Chenna Reddy.
Local Government, Anna Rao.
Law, Jagannath Rao Chanderji.
Social Services, Shanker Dev.
Rural Reconstruction, Devi Singh Chauhan.

SECRETARIES AND HEADS OF DEPARTMENTS

Chief Justice, Ramchander S. Naik, M.A., Bar-at-Law.
Chief Secretary, L. G. Rajwade, I.C.S.
Vice-Chancellor, Osmania University, Dr. Sayed Hussain.
Chairman, Public Service Commission, N. B. Bonarji, I.C.S.
Secretary, Judicial, Police and Home Department and Evacuee Property, Nagendra Bahadur, I.A.S.
Secretary, Public Works, Planning and Development Department, I. Ramchander Rao, H.C.S.
Inspector-General and Secretary, Medical and Public Health Department, Maj.-Gen. S. L. Bhatia, I.M.S.
Secretary, Finance Department, C. Damodar Reddy, B.A., A.S.A.A.
Secretary, Revenue Department, Md. Abdulla, H.C.S.
Secretary, Legal Department, Salahuddin Mohd. Younus, M.A. (Oxon.), B.C.L., Bar-at-Law.
Secretary, Education Department and Jagir Administrator, L. N. Gupta, H.C.S.
Secretary, Commerce and Industries Department, Syed Naqi Bilgrami, B.Eng. (Sheffield).
Secretary, Supply, Labour and Rural Reconstruction Departments, I. Ramchander Rao, H.C.S.
Joint Secretary, Local Government Department, Mirza Najaf Ali Khan, B.A. (Leeds).
Accountant General, Zaheeruddin Ahmed, M.A., H.C.S.
Commissioner, Customs, Income Tax and Sales Tax Department, Rai Dilsukh Ram, B.A., LL.B., A.C.A. (London).
Inspector-General of Police, P. K. Monappa, I.P.
Commissioner, City Police, Shiv Kumar Lal, I.P.S.
Nazim Atiyat, Kaleemullah Qadri, H.C.S.
Chief Engineer, Irrigation Projects, P. Papiah.
Chief Engineer, Communications and Buildings, D. V. Rao, B.Sc. (London), A.M.I.E. (India).
Director of Public Instruction, T. Suryanarayan.
Chief Electrical Engineer, S. A. Qader.
Chief Conservator of Forests, Rai Dawlat Rai.
Director, Public Health, Dr. L. D. Khatri.
Director, Agriculture, P. D. Nair, L.A.G. (Hons.), M.A.
Director, Department of Information and Public Relations, Binod U. Rao.
Director, Commerce and Industries, M. Faridud-din.
Director, Printing and Stationery, Syed Asghar Hussain, H.C.S.
Director of Statistics and Commissioner of Census Department, C. K. Murthy.
Director, Veterinary, Syed Abdul Jabbar.
Director, Settlement and Land Records, Bahramji Darabjung.
Director, Mines, Syed Kazim.
Commissioner of Civil Supplies, P. V. Subba Rao.
Registrar, Co-operative Societies, Humayun Yar Khan.
Regional Director, Resettlement, N. K. Guruswamy, M.A.
Director, Central Laboratories, Dr. S. Hussain Zaheer.
Commissioner, Labour, Syed Abdul Lateef Razvi.
Mint Master, Yusuf Mirza.
Inspector-General, Registration and Stamps, Md. Naseer Khan.
Director, Postal Services, J. L. Sahgul.
Chief Electoral Officer, A. Krishnaswamy Ayengar, B.A. (Madras).
Inspector General of Prisons, Rao Bahadur C. J. Bhavanani.
Custodian, Evacuee Property, Nagendra Bahadur, I.A.S.
Director, Social Services Department, Khwaja Abdul Ghafoor, H.C.S.
Textile Commissioner, Vithal Rao.
Chief Marketing Officer, P. Dalal.
Director, Central Records, Syed Ali, H.C.S.
Director, Archæological Department, Dr. P. Srinivaschar.
Commissioner, Excise Department, Abid Ali Khan, H.C.S.
Director, Nizamiah Observatory, Dr. Akbar Ali.
Managing Director, H.C.C.C., Jag Jeevan Chand.
Director, Amera Department, Nasiruddin Hyder.
Secretary, Rationing Board and Transport Controller, Hamidnddin Rana.
Special Officer, Technical and Vocational Education, C. V. D. Moorthy.
Fisheries Officer, Wali Hyder Hussaini.
S.E., District W.W., Well-sinking and Local Government Department, P. R. Padukone.
Commissioner, Hyderabad Municipality, Ramappa.
Secretary, Legislative Assembly Department, Hanumanth Rao.
Secretary, Board of Revenue, N. Durgiah.
Curator, Asafia Library, Dr. Rahatullah Khan.
Director, Rationing and Civil Supplies, Govind Rao Kayamkhani.
Superintending Engineer, Hyderabad Water Works, J. Kumarji.
Superintending Engineer, Drainage Works, P. M. Reddy.
Chief Inspector of Factories and Boilers, Mehdi Ali Mirza.

1951 Census

The total population of Hyderabad State according to the 1951 Census is 18,652,964 consisting of 9,464,495 males and 9,188,469 females. The total number of displaced persons from Pakistan now residing in this State is 4,035 comprising 2,399 males and 1,636 females. The district-wise distribution of the present population is as follows:—

District	Population			Displaced Persons		
	Total	Males	Females	Total	Males	Females
Hyderabad* (including Hyderabad and Secunderabad Municipalities and Cantonments)	1,510,552	764,486	746,066	2,674	1,481	1,193
Mahboobnagar	1,185,539	596,263	589,276	7	7	..
Raichur	1,151,600	581,908	569,692	43	39	4
Gulbarga	1,447,999	729,737	718,262	27	16	11
Bidar	1,172,550	595,787	576,763	18	10	8
Osmanabad	805,289	415,267	390,022	58	33	25
Bhir	825,676	423,301	402,375	75	53	22
Aurangabad	1,196,747	625,437	571,310	556	367	189
Parbhani	1,009,945	511,698	498,247	156	106	50
Nanded	949,550	478,316	471,234	199	138	61
Adilabad	902,169	449,037	453,132	53	35	18
Nizamabad	773,077	383,812	389,265	115	75	40
Medak	1,027,648	518,002	509,646	2	2	..
Karimnagar	1,581,319	802,532	778,787	8	8	..
Warangal	1,581,292	812,425	768,867	40	26	14
Nalgonda	1,544,301	795,641	748,660	4	3	1
Total ..	18,665,253	9,487,744	9,177,509	4,035	2,399	1,636

There are 150 towns. Besides these, there are eight cities whose provisional total population according to the 1951 census exceeds 50,000. They are Hyderabad City (including Hyderabad and Secunderabad Municipalities and Cantonments) population 10,85,074; Gulbarga 77,191; Warangal City 1,30,080; Aurangabad (including Aurangabad Municipality and Cantonment) 66,333; Nanded 65,018; Jalna 58,423; Nizamabad 55,202; Raichur 53,858.

For the first time the State now returns two cities with a population of one lakh over. They are Hyderabad and Warangal.

The population of Hyderabad City is now 1,085,074 distributed as follows:—

1.	Hyderabad Municipality ..	802,464
2.	Hyderabad Cantonment ..	57,483
3.	Secunderabad Municipality	161,405
4.	Secunderabad Cantonment	63,722
	Total ..	1,085,074

In 1941 the population of Hyderabad City was 739,159. This represents an increase of about 47 per cent over the 1941 figures. In 1941 the population of a number of suburban areas and villages, some of which were as far away as 40 miles from the City, was included in the population of Hyderabad City. In this census Hyderabad City has been restricted to the four units mentioned above. In this connection it may, however, be recalled that the limits of Hyderabad and Secunderabad Municipalities and Hyderabad Cantonment have been considerably extended since the last census.

Warangal now emerges as the second city of the State. Its present population is 130,080 as against 92,808 in 1941—an increase of 40 per cent.

* The population of Hyderabad City, consisting of Hyderabad Municipality and Cantonment and Secunderabad Municipality and Cantonment, is 1,085,074. The rest of Hyderabad District accounts for 425,478 persons.

The population of the more important of the towns in the State, and the variation in their population since 1941 is indicated below :—

Town	Population in 1951	Population in 1941	Percentage variation
Gulbarga ..	77,191	53,551	+ 44·14
Aurangabad (Municipality and Cantonment). ..	66,725	50,924	+ 31·03
Nanded ..	65,018	36,689	+ 77·21
Jalna ..	58,423	38,096	+ 53·36
Nizamabad ..	55,202	32,741	+ 68·60
Raichur ..	53,858	34,972	+ 54·00

The present population of 18,665,253 for the State represents an increase of 14.24 per cent over the 1941 population of 16,338,534. The 1941 census had in turn recorded an increase of 13.2 per cent over the 1931 figures. In spite of the fact that the State population decreased in the decade 1911-21 by 6.8 per cent the present figures indicate an increase of 67.53 per cent as compared with the census held in the beginning of this century, *i.e.*, in 1901.

The density of population in the State is now about 226 persons per square mile as against 198 in 1941.

The increase in population is a general feature throughout the State. But the increase in Telangana districts as a whole is considerably more than in Marathwada and Karnatic districts. Approximately, the increase in the former is 17 per cent and in the latter 11 per cent. The south-east and middle-east portions of the State record the heaviest increase. The three most populous districts in the State are now in order of numbers Karimnagar, Warangal and Nalgonda with considerably over 15 lakhs of persons in each.

The disparity between the numbers of males and females in the State has again narrowed down. In 1921 there were 966 females for every 1,000 males. In 1931 as well as in 1941 the proportion of females had gone down to 958. The present figures indicate 967 females to every 1,000 males. Nizamabad district has the distinction of having more females than males, the proportion in that district being 1,014 females to every 1,000 males.

There are in all 4,035 displaced persons from Pakistan in this State. Over 66 per cent of them reside in Hyderabad and Secunderabad Municipalities and Cantonments. Over 22 per cent reside in Aurangabad, Nanded and Parbhani Districts. The remaining, *i.e.*, 11 per cent odd, are spread over the rest of the State. Another feature of the displaced persons is the disparity between the two sexes. There are only about 682 females for every 1,000 males among them.

LEGISLATIVE ASSEMBLY

(*For list of members see under General Election*).

JAMMU AND KASHMIR STATE

THE Jammu and Kashmir State constituting the extreme western section of the Himalayas, lies between 32°17′ and 36°58′ north latitude, and 73°26′ and 80°30′ east longitude. The total area of the State is 82,258 sq. miles—55 sq. miles less than the area of Hyderabad, and the population 4,021,616, with an average density of 48 per sq. mile. For administrative purposes, the State is divided into three provinces Kashmir, Jammu and the Frontier.

Non-Muslims form about 23 per cent of the total population—a percentage slightly higher than the one which Muslims formed in India before the partition. Culturally both Muslims and Hindus belong to the same group. Consequently, they speak the same language and have common customs and conventions, and sometimes even places of common worship.

About 10·3 per cent of the total population is urban. There are 2 cities, 37 towns and 8,740 villages in the whole State.

In recent years, the State has made all round progress. To give a fillip to State Trade, a network of Kashmir Arts & Crafts Emporia has been established in important cities in India. These account for Kashmir goods worth about 17 lakhs annually. The State owns a transport fleet of nearly 500 vehicles. Distribution of essential commodities within the State is made through multi-purpose co-operative societies. This has resulted in all areas of the State being fully served with essential supplies and elimination of the black market. The State runs two Radio Stations in Srinagar and Jammu. From the point of literacy, the State is well ahead of many former States in India, with a University of its own established in 1949. In 1951, there were 2,216 educational institutions in the State including seven colleges, one of them being exclusively for women. A Kashmiri script has been evolved for the first time in history. Text books in Kashmiri have been introduced in elementary schools.

The State occupies an important position in the political geography of India as it has common frontiers with China, the U.S.S.R., Pakistan and Afghanistan.

EARLY HISTORY

About the beginning of the 14th century Rentchen Shah, a Buddhist fugitive from Tibet happened to capture power and occupy the throne of Kashmir. He then wanted to change his religion and adopt Hinduism. The Brahmins of the State refused to accede to his request. He therefore embraced Islam, and started a regular campaign to kill the Brahmins.

After Rentchen Shah came a long succession of sultans who, for more than two centuries, ruled Kashmir with an iron hand. They were followed by the Mughals. Then the Afghans captured power in 1750. In 1819 the Afghans were ousted by the Sikhs.

Gulab Singh, the great great grandfather of the present ruler, Karan Singh, ascended the throne in 1846. Gulab Singh was one of the most important generals in Maharaja Ranjit Singh's army, and after Ranjit Singh's death, became the Prime Minister of the Sikh dominion. At the time he had absolute control over Jammu, Ladakh and other adjoining territories and had spread his conquests to Kashmir to the extent that by 1846 he was the virtual ruler of that land. That year, in return for his neutrality during the Sikh wars and also for the payment of a small sum of Rs. 75,00,000, the British signed a treaty with him whereby they recognized his sovereignty over Kashmir. This treaty is called the Treaty of Amritsar. It is against this treaty which is described as a sale deed that sentiment in Kashmir is very strong and that the present Prime Minister of Kashmir Sheikh Mohammad Abdulla led an agitation.

AGRICULTURE

Kashmir State has a delightful climate, though winter months are very cold. The maximum recorded temperature of the Kashmir Valley is 99·3 degrees and the minimum 11°. In Jammu the temperature in summer goes upto 115°, or sometimes even higher, but comes down to 30° and even to 20° during winter. The average rainfall for the whole of the State is 28·45".

Forests hold an important place in the economy of the State. They yield fine wood of many varieties, medicinal herbs and also provide game and fodder for the cattle. The forest operations do not extend to the Frontier Province which forms three-fourths of the total area of the State. In the two remaining provinces, 10,865 sq. miles or about 50 per cent of their total areas constitute forest land.

Agriculture is the main occupation of the people. But the soil is not very fertile. Only 5·6 per cent of the total area is cultivable, and the remaining portion is full of mountains and deserts. The total amount of land actually under cultivation in the State is about 2,300,000 acres. The main crops grown are rice and maize, and in Jammu wheat and maize. The State on the whole is deficit with regard to food supply to the extent of about 31,000 tons annually. A vigorous 'Grow More Food' campaign is launched which is expected to bring down this deficit substantially.

The Government passed the 'Big Landed Estates Abolition Act' in 1951, by virtue of which the right of ownership held by a landlord owning more than 22½ acres is extinguished and is thereafter vested in tillers of such lands. In pursuance of this Act, the Government has distributed the land held by big landlords (as defined in the Act) among the tillers and thus landlordism, to a large extent, has been abolished in the State without compensation.

INDUSTRY, MINERALS

Woollen textile manufacturing is the biggest single industry in the State. It gives employment to about 300,000 people, including both part-time and whole time workers. Kashmir woollens, such as shawls, carpets, namdas and gabbas have a world-wide popularity. During the 18th and 19th centuries especially Kashmir shawls had a wide demand in England, and, as it was expressed at the time, 'adorned the proudest beauties in Europe and the rest of the world.'

Next in importance comes the silk industry. Kashmir filatures are the largest in the world for a single unit of production, and produce one of the finest quality silks.

Papier-mache, silver-ware, and wood-carving are among the other minor industries of the State.

Woollen manufactures, silks, forest products such as timber, herbs, some chemicals, furs and skins, and fruit and vegetables are the main items of export, whereas foodstuffs, textiles, sugar and tea, spices and hardware form the main imports into the State.

The following is a list of the minerals found in the State : Coal, Lignite (possibilities of petroleum), Bauxite, Iron ore, Copper ore, Lead, Zinc, Nickel ore, Manganese, Gold, Arsenic, Chromite, Cohre, Gypsum, Graphite, Kaoline, Bentonite, Fuller's Earth, Marble, Slate, Steatite, Serpentine, Baryles, Corrundum (Sapphire and Ruby), Beryl and Aquamarine and Tour-mallin. There are other minerals too, suitable for glass manufacture. But it is not known, whether the exploitation of all these minerals is an economic proposition. Coal, Lignite and Iron ore and some other minerals are supposed to be in existence in fairly large quantities.

Tourist traffic is one of the main sources of income both to the State and the people. It is estimated that before the trouble started in Kashmir, about 40,000 people used to visit that place annually, spending about Rs. 1,50,00,000 during their stay of a few months in the Valley. Great efforts are now being made by the State to develop this traffic to the maximum possible extent.

To evolve an integrated plan for the progress and prosperity of the State, the Government has set up a Planning Committee. The Committee has done useful work in collecting some valuable data.

TRANSPORT

The total mileage of roads maintained by the P.W.D. is about 2,650, out of which 562 miles are metalled, 620 unmetalled and the remaining mileage bridle paths. Jammu is connected with Srinagar by a fine motorable road of 203 miles. Being navigable, the rivers in Kashmir Valley play a great part as means of transport.

The Pathankot-Jammu road, 65 miles long, built in three months at a cost of about Rs. 3,00,00,000, was opened for traffic by the Prime Minister of India, on July 7, 1948. Considering the sort of country in which it was built the road is regarded as a very remarkable feat of engineering. Three important bridges on the road, 2,800 ft., 2,000 ft., and 1,000 ft. long were also declared open on July 7, 1948.

For the 1952-53 budget receipts were estimated at Rs. 466·03 lakhs and expenditure at Rs. 607·78 lakhs. It was proposed to raise income tax and super tax by about 10 per cent. to bring them on a level with the provisions of the Indian Finance Act of 1951-52. No other taxes were envisaged.

A sum of Rs. 134·64 lakhs was provided for capital expenditure.

On the whole it is a deficit budget, the deficit amounting to Rs. 141·75 lakhs.

The main sources of income are customs, land revenue, forests, profits of silk reeling (which is a State monopoly), courts, etc., and the main items of expenditure are military, salaries, public utility works, education, sanitation, irrigation, electricity, etc.

POLITICAL SET-UP

Kashmir acceded to India on October 26, 1947. Simultaneously, to fulfil one of the conditions of the acceptance of accession by the Government of India, the Maharaja invited Sheikh Mohammad Abdulla, President of the All Jammu and Kashmir National Conference, to form an interim Government, and to carry on the administration of the State. The interim Government later changed into a full-fledged Cabinet, with Sheikh Abdulla as the first popular Prime Minister.

The Maharaja has temporarily withdrawn from the State and has handed over power to his 21 year old son who is to act during his absence as a constitutional ruler. The latter, Yuvraj Karan Singh, formally took over from his father on June 20, 1949.

For the first time in history, the people of Kashmir elected a sovereign Constituent Assembly which met in Srinagar in October-November 1951. The Constituent Assembly had before it four main tasks, (1) to devise a Constitution for the future governance of the country, (2) to decide the future of the ruling dynasty, (3) to decide whether or not compensation should be paid to the landlords whose lands had been transferred to the tillers and (4) to declare its mind on the future affiliations of the State.

On November 20, 1951 was promulgated the Jammu and Kashmir Constitution (Amendment) Act which amends 42 Sections of 78 clauses of the old constitution. By this the State attained complete and unfettered responsible democratic government.

The new enactment transfers power from the ruler to the popular Government and gives legal recognition to the principle of full, responsible Government which, in theory only, was enforced by the Maharaja's proclamation of March 5, 1948.

Independence of the judiciary has been fortified further by extending the normal tenure in keeping with the law in other parts of India. The Ruler's Board of Judicial Advisers will be retained.

The enactment also amends the oaths of office for Ministers and Judges. Unlike the old oath, under which one had to swear and owe allegiance to the Maharaja his heirs and successors, the new one specifies allegiance to "the Constitution of the State as by law established."

The amended Constitution authorises the Constituent Assembly to convert itself or set up another body to discharge the functions of the State Legislature until the new one is elected. The Government would be collectively responsible to that Assembly which would be unrestricted in its powers. The Legislature will have the right to legislate for all parts of the State, even Azad Kashmir. The Government has been given extra territorial jurisdiction not enjoyed by any other State in India.

Yuvraj Karan Singh's last act as absolute Ruler was to give assent to this enactment.

COUNCIL OF MINISTERS

Prime Minister, Sheikh Mohammad Abdulla.
Deputy Prime Minister, Ghulam Mohammad Bakshi.
Revenue Minister, Mirza Mohammad Afzal Beg.
Health and Development Minister, Pandit Shamlal Saraf.
Finance Minister, Pandit Girdhari Lal Dogra.

Deputy Ministers

Deputy Revenue Minister, Major Piar Singh.
Deputy Home Minister D. P. Dhar.
Deputy Development Minister, G. M. Hamdani.
Deputy Finance Minister, Mubarik Shah.

Parliamentary Secretaries

Chief Parliamentary Secretary, Mir Qasim.
Home Affairs, Harbans Singh Azad.
Finance Ministry, Moh'd Ayub Khan.
Revenue Ministry, Bagat Ram Sharma.
Development Ministry, Abdul Gani.

Secretaries

Chief Secretary, M. K. Kidwai.
Ministry of External Affairs, Ram Lal Nagpal.
Ministry of Law, Lala Badri Nath.
Ministry of Revenue & Rehabilitation, Kh. Sadur-ud-Din.
Ministry of Home Affairs, S. M. Aga.
Ministry of Finance, Habib Ullah Kamili.
Ministry of Health and Education, Syed Ahmad Aga.
Ministry of Development, Syed Mubarik Shah Naqashbandi.
Ministry of Planning, Pt. P. N. Chaku.
Private Secretary to Prime Minister, Pt. R. C. Raina.

Heads of Departments

Accountant General, Pirzada Ghulam Ahmad.
Director General, Information and Broadcasting, J. N. Zutshi.
Director General, Rural Departments, Pt. Kashyap Bandhu.
Director General, Food & Supplies, Col. Baldev Singh Samyal.
Director General, Tourism, Col. Ghulam Qadir.
Inspector General of Police, Sardar Prithvi Nandan Singh.
Inspector General Customs, Ch. Bhim Sain.
Chief Conservator of Forests, Thakur Harnam Singh.
Chief Electrical Engineer, Kanwar Ranjit Singh.
Chief Income Tax Officer, Pt. Sansar Chand Magotra.
Director of Public Health, Col. Sir R. N. Chopra.
Director of Industries, T. C. Wazir.
Director of Education, A. Kazimi.
Director of Agriculture, G. M. Butt.
Director of Civil Veterinary, V. L. Wazir.
Director of Sericulture, Jammu, G. H. Beg.
Director of Sericulture, Kashmir, Hakim Ali.
Director of Local Bodies, Som Nath Prohit.
Transport Controller, S. K. Raina.
Commissioner, Khwaja Ali Shah.
Constitutional Adviser, M. A. Shahmiri.
Chief Engineer, P.W.D., Jammu, D. N. Gupta.
Chief Engineer, P.W.D., Kashmir, Ghulam Hassan Khan.
Chief Engineer, Irrigation, Mir Ghulam Rasool.
Trade Commissioner, Khwaja Ahsan Ullah.
Controller, Stationery and Printing, J. N. Sharma.
Registrar, Co-operative Societies, Ghulam Qadir Beg.
Registrar, Jammu and Kashmir University, G. A. Ashai.

Other Officials

Director, Food Control, Ghulam Mohammad.
Director, Visitors' Bureau, Mian Ghulam Mohammad.
Principal Information Officer, B. P. Sharma.
Director of Supplies, Jammu, Major Pritam Singh.
Director of Supplies, Kashmir, G. M. Shah.
Chief Inspectress, Women's Education, Z. A. Begum.
Labour Commissioner, Ghulam Qadir Bande.
President, Municipality, Srinagar, Mirza Kamal-ud-Din.
President, Municipality, Jammu, Pt. Prem Nath Koul.
Custodian, Evacuees Property, Kashmir, Mir Ghulam Hassan.
Custodian, Evacuees Property, Jammu, Ch. Faiz Ullah Khan.
Deputy Inspector General of Police, Jammu, Khwaja Saif-ud-Din.
Deputy Inspector General of Police, Kashmir, Gopal Ram Thappa.
Tawaza Officer, Jammu, Ghulam Mohammad Khan.
Tawaza Officer, Kashmir, Sham Lal Koul.
Land Reforms Officer, Ram Chardra Raina.
Registrar, High Court, Ghulam Mohammad.
General Manager, Government Emporia, D. N. Saraf.
Deputy Inspector General of Police, Pt. Prem Nath.
Deputy Inspector General of Police, Shadi Lal Vadehra.
Conservator of Forests, Kashmir Circle, Shridhar Dhar.
Conservator of Forests, Working Plan and Research Circle, Ram Lal Khujuria.
Conservator of Forests, Soil Conservation and Forest Industries Circle, Ghulam Rasul.

High Court

Chief Justice, Hon'ble Janki Nath Wazir.
Judges, Hon'ble M. A. Shahmiri; Hon'ble Pandit Jia Lal Kilam.

CONSTITUENT ASSEMBLY

President, Hon'ble Khwaja Ghulam Mohammad Sadiq.
Secretary, Pandit Hiranand Raina.

Members: Mirza Mohammad Afzal Beg (*Anantnag*); Maulana Moh'd Saeed Masoodi (*Amira Kadal*); Pt. Ram Lal (*Akhnoor*); Mohammad Ayub Khan (*Aruas*); Sayed Abdul Qadus (*Biruwa*); Sayeed Mohammad Jalali (*Badgam*); S. Harbans Singh Azad (*Baramulla*); Kh. Abdul Kabir Khan (*Bandipora-Gurez*); Mahant Ram (*Basohli*); Pt. Ram Chand Khajuria (*Billawar*); Mahasha Nahar Singh (*Bishnah*); K. Chuni Lal (*Bhadarwah*); Abdul Gani Goni (*Bhatess-Bhunjwah*); Bakshi Abdul Rashid (*Chari-Shariff*); S. Chela Singh (*Chhamb*); Mir Qasim (*Daru-Shahabad*); Ghulam Ahmed Mir (*Dachin-pora*); Malik Ghulam Hussain (*Derasar*); Kh. Ghulam Nabi (*Darihgam*); Kh. Moti Ram (*Udhampur*); Mirwaiz Ghulam Nabi Hamdani (*Zaddibal*); Kh. Ghulam Mohi-ud-Din Hamdani (*Khanyar*).

THE STATE OF MADHYA BHARAT

THE constitution of the United State of Gwalior, Indore & Malwa (Madhya Bharat) after the attainment of freedom by India was one of the notable events in the integration of erstwhile Indian States into the body politic of India. Till the formation of Greater Rajasthan, Madhya Bharat was the biggest of the Unions. Madhya Bharat is also notable in that for the first time two viable units (Gwalior and Indore) merged their identity along with 23 other States.

The following are the 20 States that signed the Covenant which created the United State of Madhya Bharat:—Alirajpur, Barwani, Dewas (Senior), Dewas (Junior), Dhar, Gwalior, Indore, Jaora, Jhabua, Khilchipur, Narsingarh, Rajgarh, Ratlam, Sailana, Sitamau, Jobat, Kathiwara, Kurwai, Mathwar and Piploda. Besides these States the Rulers of Mohammadgarh and Pathari as also the Bhumats of Jamnia, Nimkheda and Rajgarh agreed to merge their territories in Madhya Bharat.

The Hon'ble Shri Jawaharlal Nehru, the Prime Minister of India, formally inaugurated the new Union at Gwalior on May 28, 1948. On June 16, the administrations of Gwalior and Indore, and on June 29 and 30 the administrations of the remaining States were taken over by the Raj Pramukh. Jaora came in after the dispute to its *Gaddi* was settled by the States Ministry in August 1948. On July 17, 1948 the Raj Pramukh executed the revised Instrument of Accession.

On November 25, 1949 H. H. the Raj Pramukh made a proclamation before a special session of the Legislature that the constitution of India adopted by the Constituent Assembly would be made applicable to Madhya Bharat from the same date.

The area of Madhya Bharat is 46,710 sq. miles and its total population enumerated on March 1, 1951 is 7,941,642.

The capital of Madhya Bharat is Gwalior for winter, and Indore for the summer months.

NATURAL REGIONS

The State is situated between 20°-20′ and 26°-50′ latitude and 74°-10′ and 78°-40′ longitude. The Chambal river in the north and north-east separates it from Rajasthan, and the Agra and Etawah Districts of Uttar Pradesh. To the east are Jhansi and Jalaun Districts of Uttar Pradesh and the Sagar District of the Madhya Pradesh. To the south are Bhopal, the Nimar District of Madhya Pradesh and East Khandesh. To the west are the Panch Mahals District and other portions of Gujerat.

Aravali, Vindhyachal and Satpura, the last two mainly are the chief mountain ranges in Madhya Bharat. Vindhyachal range lies to the north and the Satpura range lies to the south of the Narmada river. Among the more important rivers in the State are the Narmada, Kshipra, Chambal, Betwa and Kalisindh.

There is a varying amount of rainfall in different regions of the State, ranging from 15 to 50 inches. In the southern region of Madhya Bharat, known as Malwa, rainfall ranges from 30 to 50 inches; in the northern region it is higher. Malwa has black cotton soil and owing to enough rainfall, wheat and cotton are produced in abundance in this region.

From the climatic point of view, there is a great variation between the northern and southern regions. In the southern region, that is, Malwa the climate is temperate while most of Nimar which lies in the extreme south is hot in the summer but comparatively mild in the winter. The northern region has an extreme climate. Indore and Gwalior are 1,738 and 697 ft. respectively above sea-level, and their maximum temperature during the summer rises to 112° F. and 118° F.

AGRICULTURE

The mainstay of the people is agriculture in which 75 per cent of the population is engaged. Wheat, cotton, jawar, gram, bajra, rice, oilseeds, ground-nut, sugarcane, pulses and opium are among the important products of the land.

The area under wheat, gram, jawar, bajra, maize and rice is 74 lakh acres and under oilseeds and cotton 18 lakh acres. Mangoes, guavas, melons and lemons are among the important fruits of this region. The total land area is divided as under:—

		Acres.
1.	Cultivated land	8,955,943
2.	Current fallows	1,109,151
3.	Other uncultivated land excluding current fallows ..	6,668,866

Self-Sufficiency in Food

In common with other parts of India, Madhya Bharat has organised vigorous efforts for additional food production. During 1951, over 39,000 acres of kans-infested lands were reclaimed and 4,500 acres cleared of jungle with the help of tractors of the Central Tractor Organisation. So far nearly 75,000 acres of land has been made cultivable by Government tractors. 145,000 maunds of improved variety seeds and 66,173 tons of manures and fertilisers were distributed during the year. Eradication of 'Adhashishi' was done in an area of 28,000 acres this year. Nearly 1,040,000 acres have so far been cleared of Adhashishi.

Under the urban compost scheme about 50,000 tons and under the village compost scheme over 60,000 tons of compost were prepared during 1951.

The area under cane increased by 3,000 acres and under cotton by 150,000 acres. Cultivators were given "Taqavi loans" to the extent of over Rs. 60 lakhs for purchase of bullocks, seed, etc. Taqavi was also given for digging of well, construction of bunds, tanks and other agricultural purposes.

Madhya Bharat imported 70,000 and 19,000 tons of foodgrains during the first two years of its formation but in 1951 it exported more than 50,000 tons to the scarcity areas of Bihar, Madras. It brought an extra 181,370 acres under the plough.

Three agricultural-cum-rural development projects were started in Harsi, Bhilsa and Rajpur areas of the State while training classes for village level workers to man these projects were started at Gwalior, Indore and Agar.

An Agriculture College has been opened at Gwalior.

LAND TENURE AND ADMINISTRATION

The land tenure in Madhya Bharat is partly Ryotwari and partly Zamindari and there are over 1,300 Jagirs. For Ryotwari areas of different integrating States a uniform land revenue and tenancy law have been enforced. In order to abolish the prevailing disparities in the systems of land tenure and to eliminate all intermediaries between the tillers of the soil and itself, the Government has passed the Zamindari Abolition Act which has come into force from 25th June 1951, and the Zamindaris vested in Government from 2nd October 1951. This Act provides that Zamindars will be paid compensation equal to eight times of the net income spread over a period of ten years. Those Zamindars who wholly or mainly depend on agriculture and who do not pay more than Rs. 3,500 as Malguzari, will be paid a rehabilitation grant on a sliding scale. The Zamindars will also be paid interest on the compensation amount at 2½ per cent from the date of vesting till the date of payment. It is presently estimated that Zamindars will have to be paid an amount of Rs. 6 crores 20 lakhs as compensation, Rs. 3 crores and 60 lakhs as rehabilitation grant and about Rs. 85 lakhs as interest. As against this, it is estimated there would be an increase of Rs. 73 lakhs in Government income from land revenue with possibility of further year to year increase. The major portion of the rehabilitation grant will have to be paid in the first year as the number of Zamindars paying less than Rs. 3,500 as malguzari is very large. Land held by zamindars as *Khud-Kasht* and personally cultivated by them, as also lands in possession of their tenants, would be held by them on Pakka Tenancy, but the subtenants will be treated as Pakka Tenants if they paid a particular amount to be determined by the Tahsildar to the recorded tenant. Government has already sanctioned a number of posts of compensation officers and claims officers to deal with the compensation claims and has also appointed a Land Reforms Commissioner.

The Madhya Bharat Jagirs Abolition Act has also received assent of the President but its implementation has been stayed by a full bench of the Madhya Bharat High Court, pending decision of the application of Jagirdars challenging the validity of the enactment. This law provides that Jagirdars will be paid as compensation seven times their net income after deducting Government dues and management expenses.

The State is divided for administrative purposes into two Commissioners' Divisions, 16 Districts, which are again sub-divided into 80 Tehsils. The question of reducing the number of districts and Tehsils is under consideration of the Government

At the head of the revenue organisation of Government is a Board of Revenue consisting of a Senior Member and a Junior Member who are in charge of administrative and appellate work.

FORESTS

The total forest area is 12,000 sq. miles forming about 25 per cent of the total area of the Union. The annual revenue from forests is about Rs. 50,69,700. The forest area is divided into two main regions, northern and southern. In the northern region, there are 7 Divisions and 19 Ranges while in the southern region there are 5 Divisions and 19 Ranges. The forests of the northern circle are not very valuable whereas in the southern circles, forests of the Vindhyachal and Satpura ranges are comparatively dense and productive.

The Shivpuri Training School has been raised to the status of a Regional Training Centre for Foresters including those of the neighbouring States.

In 1949 when the neighbouring States were threatened with fodder famine, 20 million pounds of fodder were exported to Saurashtra, Baroda, Kutch and Ajmer-Merwara from the Madhya Bharat forests.

This year, grass operations on extensive scale were started at a cost of Rs. 7,60,000. Besides granting facilities of grazing to the cattle of Rajasthan and other neighbouring States, it is proposed to export 1½ crore lb. of grass and one lakh maunds of *Bhusa* to other deficit States.

Manganese, asbestos, clay for ceramics as well as bricks and tiles, soap stone, limestone, crystallines, slate, shales and ochres are are the main minerals available in Madhya Bharat. Others that are being developed are limestone, quartzile for glass manufacture, bauxite for aluminium industry and Galena.

COMMERCE AND MANUFACTURES

Government's industrial policy is to encourage private enterprise to the utmost so that the country's production might be stepped up. Facilities are provided for making available raw material with as little expense as possible and liberal concessions are allowed in matters of import and export tariffs and in other essential

respects—at least in the initial stages of a new industry. With regard to nationalization, the policy declared by the Central Government is generally being followed.

Textile, oil, sugar, cement, metal and engineering works are among the more important industries of this State. As many as 944 new industries, including the small industries were permitted during the year 1950. There are 17 textile mills, five sugar mills, 171 oil expellers, one woollen mill, one cement factory, three glass factories, 89 engineering works, 10 pharmaceutical and chemical works, besides starch, match, paints and varnishes, ginning and pressing factories, plastics, razor blade, cardboard, biscuit and ice. There are three Government owned Commercial concerns, *viz.*, Gwalior Engineering Works, Gwalior Potteries and Gwalior Leather Factory, Tannery and Tent Factory, besides the State-owned banks at Dhar and Barwani.

Special attention is being paid towards the development of cottage industries. There are about 35 Cottage Industries Production-cum-Demonstration centres the number of trainees and workers being 1,500.

There are 395,254 spindles and 10,630 looms in Madhya Bharat which produce 2,700 lakh yards of cloth per annum which comes to about 6 per cent of the All-India production.

Chanderi and Maheshwar are famous for the fine texture of their handloom cloth. Chanderi sarees interwoven with golden threads particularly are famous throughout India for their beauty and style. The Maheshwar handloom industry was established and promoted during the reign of the famous Devi Ahilyabai Holkar who had a Government shop established to import silk from China directly and sell it at cost to weavers. There are also two blanket-producing factories at Manasa and Mandsaur.

The number of sugar mills situated in Madhya Bharat is the largest among Part 'B' States with a crushing capacity of 2,400 tons of sugarcane daily.

Oil-seeds are grown on about 525,300 acres of land and the annual produce is 30,000,000 maunds.

LABOUR

A minimum wage of Rs. 26 a month has been fixed for the operatives of the textile mills and the standardisation of wages for different occupations has also been effected in the textile industry. A minimum wage has also been fixed in the sugar industry and partially in some of the smaller concerns though the latter having represented against this measure, the matter is under review. In regard to agricultural labour also, the required data is being collected in line with the All-India scheme and it is expected to form the basis of ameliorative measures contemplated for this class of workers especially fixation of their minimum wages, hours of work, holidays and so on. To achieve uniformity with the rest of India in respect of labour standards, all progressive labour laws have been adopted. At Indore two labour housing schemes are already under execution. Housing has been provided by the Management to a substantial number of workers at the Gwalior centre. In addition to what the employers themselves are doing as required by the Factories Act, Government have been spending yearly Rs. 12,000 in Indore for labour welfare. Extension of labour welfare activities at other centres is under active consideration. For settlement of major industrial disputes, an independent judiciary has been constituted with 3 Labour Courts and one Industrial Court. Besides, a beginning has been made in the direction of introducing what is called 'industrial democracy' by the constitution of Works Committees in most of the Textile Mills consisting of representatives of employers and employees in equal numbers. These Works Committees are non-statutory and are expected to tackle day to day complaints and problems of workers by mutual negotiations.

In Madhya Bharat there are 4,500 miles of roads on the maintenance of which Government spends about 35 lakhs.

The motor service, a portion of which is run by the Madhya Bharat Roadways, traverses 35 per cent of the existing routes of the State.

It operates daily both ways, the two longest passenger bus services in India, *viz.*, Gwalior-Indore (308 miles) and Gwalior-Ujjain (290 miles). As a preliminary step towards the nationalization of motor transport, a Transport Nationalization Committee was set up and its report is under consideration of the Government. The Roadways possess a fleet of 180 vehicles at present covering a daily mileage of 16,000 miles.

There are 1,100 miles of railway lines in the State.

FINANCIAL INTEGRATION

An agreement was signed by the representatives of the Government of India and the Government of Madhya Bharat on September 27, 1949, relating to the federal financial integration of the State with the Central Government. According to the recommendations of the Indian States Federal Financial Enquiry Committee, the transfer of Federal revenues and Federal expenditure to the Centre would result in a net gain of Rs. 45 lakhs to the Madhya Bharat Government and a corresponding net loss to the Centre. This is based on the estimates of the last year and not on actual income or expenditure. The Madhya Bharat Government suggested among other things certain modifications to the recommendations of the Committee. It was pointed out that the complete abolition of customs duties within one year would result in the dislocation of the finances of the State to a considerable extent, particularly when there was no likelihood of compensating the loss by the collection of sales tax within one year. It was also suggested that the abolition of customs duties should be spread over 3 to 5 years, and that the capital assets should be treated as interest bearing debt till such period as the Central Government were in a position to liquidate it.

In view of the political nature of the Privy Purses to Rulers, payments under this head, it was suggested, should be taken over by the Central Government without any condition of repayment by the State. The Madhya Bharat Government also did not agree that any surplus or liquid assets over liquid liabilities should be divided between the two Governments. The agreement lays down a gradual abolition of internal land customs duties to be extended over 3 years but not in any case beyond 5 years or the year in which the yield from sales tax came to Rs. 2 crores, whichever was earlier. Expenditure on Privy Purses according to the agreement was to be treated as Federal expenditure passing to the Centre. The Central Government was also, to take over, if feasible, the expenditure of Non-I.S.F. Military Units. The Central Government would make in each of the 10 years following the federal financial integration a contribution equal to 7½ per cent of the total amount of civil pensions payable on 31st March 1950. Particulars of the budget are given below.

BUDGET 1952-53

The Budget of Madhya Bharat for 1952-53, was presented to the Legislative Assembly on March 18, 1952. The Finance Minister estimated a small surplus of five lakhs in the Budget. The Budget, which is based on the existing level of taxation and the sanctioned scales of expenditure, anticipates revenue receipts of Rs. 1,096 lakhs and an expenditure on revenue account of Rs. 1,091 lakhs. No new taxation measures were proposed.

The Budget for 1952-53 provides for an increase in revenue of 30 lakhs over the revised estimates for 1951-52. The increase is attributed chiefly to additional land revenue arising out of the abolition of the Zamindari system.

In the capital section the increase of Rs. 77,85,00,000 compared with the revised estimate for 1951-52 is mainly due to the fact that the progress of the electricity schemes is expected to be accelerated.

The transactions in the debt and deposit section are expected to result in a net receipt of Rs. 205·27 lakhs. The opening balance for the year 1952-53 was estimated at Rs. 192·62 lakhs and the year is expected to close with a balance of Rs. 142·19 lakhs. The progressive attrition of the cash balance as compared to the one on April 1, 1951, was due primarily to the financing of the Chambal Hydel scheme from the State cash balance and also to the financing of the development schemes included in the Five-Year Plan for 1951-52.

The following items are included in the Five-Year Plan and the expenditure allocated for each of them is given below. Agriculture and Rural Development, Rs. 8·4 crores; Irrigation and Electricity, Rs. 6·07 crores; Industry, mainly cottage and small-scale, Rs. 55 lakhs. Communications (road construction), Rs. 1·89 crores; Education, including Basic, Primary, higher, Technical and Research, Rs. 3·68 crores; Medicine and Public Health, Rs. 30 lakhs; Housing, Rs. 14·42 lakhs; Labour welfare centres, Rs. 4·35 lakhs; Uplift of scheduled classes and tribes, Rs. 80 lakhs; Public works, Rs. 1 crore.

The total allocation by the Centre is Rs. 4 crores.

RELIEF AND REHABILITATION

The total number of displaced persons in Madhya Bharat according to the latest census is 63,500, their concentration being by far the biggest in towns like Indore, Gwalior, Ujjain, Ratlam, etc. The housing problem of the displaced persons, temporarily sheltered in camps, *Dharamshalas* and other public places in the three cities of Indore, Gwalior and Ujjain, was tackled with highest priority with the result that colonies having 600 tenements at Indore, 268 tenements at Gwalior and 350 tenements at Ujjain were built up at a cost of about 19 lakhs. The construction of 346 tenements at Morena, Shamgarh, Manasa, Tarana, Bhanpura and Neemuch is in hand and the work is expected to be completed before the financial year is out.

A sum of Rs. 63,51,203 was advanced to displaced persons for their rehabilitation in trade, business and industry. Loans to the extent of Rs. 24,436 were advanced to displaced students as well to help them pursue technical and higher education.

An area of land measuring 5,308 acres has been allotted to 250 displaced families for settlement on land. A sum of Rs. 69,400 was advanced to them as "Taqavi loan."

In the Industrial Workshop started in the year 1948 and the Central Technical Institute, Gwalior, about 108 displaced persons have been trained in vocational training in the trades like smithy, carpentry, moulding, fitting, etc. The Weaving and Spinning Centres at Indore and Gwalior have been working very satisfactorily and provided employment as well as opportunities for learning the trade to a considerable number of displaced persons.

A Destitute Home named 'Vanita Vishram' was started for the maintenance and care of old, infirm and destitute women and children. The inmates of this Home are imparted training in subsidiary vocations such as Sewing, Knitting and Tailoring. Special emphasis is laid on the principle of 'self-help.'

About 7,430 displaced students are receiving primary education and 1,214 secondary education. The number of students receiving higher education is 158.

750 shops have so far been constructed and allotted to displaced persons to provide for them business premises.

P. W. D. AND IRRIGATION

The total length of metalled roads in the State is 3,770 miles. Out of this, 27 miles are cement concreted and 33 miles asphalted. Agra-Bombay Road maintained by Madhya Bharat on an agency basis is 310 miles.

A development programme for construction of 1,119 miles of new roads in three priorities, has been chalked out and the construction of 315 miles is in progress.

There are 10 Government owned power houses at Indore, Gwalior, Ujjain, Shivpuri, Dhar, Dewas, Rajgarh, Narsingarh, Barwani, Kurwai, respectively, the total assets being of the value of about 60 crores. A Central Power House at an estimated cost of Rs. 1,20,00,000 is under construction. For the plant and for remodelling the Transmission and Distribution systems at Gwalior, Ujjain and Shivpuri, a scheme costing about Rs. 99 lakhs is being implemented. There are 15 private power houses.

Irrigation Canals cover a length of 1,000 miles. There are also more than 1,000 major and minor tanks. By bringing about an improvement in irrigation works, the total irrigated area has been increased by about 25 per cent.

Food Production Drive works, small and big, costing about 30 lakhs are in progress.

The Chambal Hydro-Electric Project, one of the outstanding nation building schemes, is well under way and will, when completed, generate 96,000 kilowatts and irrigate one million acres at a cost of about 14 crores of rupees. It will have a grid within 200 miles radius of the power generating station 18 miles from Bhanpura in Madhya Bharat. The reservoir which is named Gandhi Sagar will be the cheapest in the world and the fourth biggest.

Smaller projects are Khuj, Chiri, Lohagarh.

DEVELOPMENT DEPARTMENT

This department combines all the activities connected with rural uplift including co-operation and village Panchayats but excluding the technical work of the Veterinary and Agriculture Departments.

The number of co-operative societies in the State is 6,655 and that of Central Banks 25. Scheme regarding the organisation of a co-operative Central Apex Bank for the State, has been approved. A Co-operative Planning Committee has been appointed to suggest ways and means for the expansion of the co-operative movement in the State. A Co-operative Institute on the lines of Provincial Co-operative Institutes has also been organised.

A new Panchayat Act with Panchayats at Gram (Village), Kendra (Group) and Mandal (District) levels has been placed on the Statute Book. Elections were held on adult franchise basis, and 4,111 Village Panchayats, 223 Kendra, 223 Nyaya and 16 Mandal Panchayats have been formed and they have started functioning. The total number of 'Panchas' elected is 30,090.

Rural uplift activities include provision for drinking water wells, village approach roads, libraries and reading rooms. Adult education classes are encouraged, organised and subsidised by the department by grant of subsidy to the extent of 50 per cent of the expenditure, the other half being met by local contributions either in cash or kind the latter of which may include labour. 2,400 medicine chests are sent to remote corners of the State for medical relief to the rural population.

Harijans and Adivasis who together comprise very nearly one-third of the population of Madhya Bharat receive special facilities for their educational, social and economic uplift. Exemption from all tuition fees, grant of scholarships and books, special help to scholars sent outside the State, legal assistance through a Removal of Disabilities Bill, starting of industrial centres *e.g.*, handloom centres, tanneries, leather stitching centres etc., grants to institutions working in this cause are some of the means by which the Department gives help.

EDUCATION

About 14 per cent of the total revenue of the State is spent on education in Madhya Bharat. There are at present in Madhya Bharat, five degree Colleges, Victoria College, Gwalior; Holkar College, Indore; Madhav College, Ujjain; Kamalaraja Girls' College, Gwalior and Christian College, Indore, the last being Government aided; two Sanskrit Colleges, one Music College, 13 Intermediate Colleges (nine of them State owned), 36 Boys' High Schools (29 State owned), 11 High Schools for girls (nine Government owned), 279 Boys' Middle Schools (265 State owned), 3,851 Boys' Primary Schools (3,748 State owned), 55 Girls' Middle Schools (State 51+4) and 312 Girls' Primary Schools (303 State owned). Besides, a Rajkiye Hindi Vidyapeeth is also imparting education for courses in *Sahitya*. Government have exempted Harijans and Adivasis from tuition fees.

There are 22 Montessori schools of which 16 are Government run. Social education is making rapid strides. At present there are 565 centres of which 152 are run by Government. Grant-in-aid is given to centres run under non-official ægis. The number of adults taking advantage of these institutions is 16,193.

The Department has also devised a plan for arranging educational *melas* at various central places of the State in which adults of the vicinity come together and various programmes of social work and sports are arranged. Facilities for audio-visual education with the latest film strips are also provided at these *melas*. A small exhibition is also arranged to give the villagers useful information. The *melas* are proving to be very popular and a large number of people are attracted.

The National Cadet Corps Scheme, introduced by the Government of India, has been adopted; one Senior Division and three Junior Divisions are in operation. Compulsory Primary Education has been introduced in all the 16 district headquarters of Madhya Bharat and the results are encouraging. In Greater Gwalior, Ujjain and Indore, only selected wards have been covered.

Basic education has been introduced in two primary schools of each District. Basic Normal Training School has been started at Manipur.

For the training of teachers, there are one L. T. College at Dewas for graduate teachers and one C. T. College at Jaora for matriculates. For non-matrics, there are three normal schools for men, and one normal school for women. Refresher's courses are arranged during the summer vacation at these training institutions for the benefit of teachers.

There is also a Technical School at Lashkar for imparting preliminary technical education. Government is also starting an aided polytechnic institute shortly.

Government have established their own Board for Secondary Education, for conducting the High School and Intermediate examinations, which is working satisfactorily.

The question of establishment of a Semi-Government Arts Association on provincial basis for the encouragement and development of Art and Culture is under active consideration and as a first step prizes have been awarded on the best creation in different Arts.

Uniform Grant-in-aid Rules have been sanctioned and under them a sum of Rs. 5,50,000 has been given as aid to the private institutions for maintenance, building constructions and equipment, etc.

The responsibility of running all primary schools for refugees has been taken over by the Government. All schools hitherto run by Jagirdars have been taken over by the Government in order to give better scope of education to the students of Jagir areas.

MEDICAL AND PUBLIC HEALTH

The Department is in charge of a Director of Health Services assisted by two Deputy Directors in charge of northern and southern divisions of Madhya Bharat. There are 563 hospitals and dispensaries in Madhya Bharat including three big hospitals attached to Medical Colleges. One newly constructed female hospital, accommodating 350 beds, is to be opened shortly at Gwalior. A new hospital with 680 beds is under construction at Indore. A new Medical College building at Indore will be completed in a year's time. There are 10 District Hospitals and 31 big hospitals.

A few Travelling Dispensaries in Mobile Units have also been started.

With a view to increasing facilities of medical relief in rural areas, a scheme for providing 4,000 Medicine Chests, was launched and about 3,000 have already been supplied to the Gram Panchayat Centres. In order to provide recreation to patients, Radio sets and Head-phones have been installed at about half a dozen hospitals.

There are two Medical Colleges—one at Gwalior and the other at Indore. Condensed M.B.B.S. courses have been started at both the Colleges and Gwalior Medical College has been recognised for Post-graduate studies.

There are 47 Maternity Homes and 233 Ayurvedic and Unani dispensaries. A T.B. Sanatorium is located at Rau near Indore. There are two Mental Hospitals and three Leper Asylums in the State. There are touring Vaidyas who visit patients every day within a radius of five miles from their place of work. There is one Lymph Depot at Manpur.

There is an Ayurvedic College with an Ayurvedic Hospital with 12 beds and an Ayurvedic Pharmacy.

VETERINARY DEPARTMENT

The total cattle population of Madhya Bharat according to the 1950 cattle census is over 80 lakhs. At present, there are 13 A class, 18 B class and 118 C class hospitals and dispensaries in the State. The Veterinary Department has been integrated and has prepared a plan for creating one dispensary for every twenty-five thousand of the cattle population in accordance with the recommendations of the Royal Commission. Funds permitting, five new dispensaries will be started every year. Twenty dispensaries were started in 1949 and fifteen in 1950. A programme for training Veterinary Assistants to be posted at the dispensaries has also been formulated. A Veterinary Training School has been opened. The Vaccine Institute of the State has also been extended so as to produce goat-tissue vaccine and H.S. vaccine to meet all local requirements. 46,432 doses of serum and over three lakh doses of vaccine were prepared during the last nine months in 1951.

An Animal Husbandry section has also been created as part of the Veterinary Department. There are, at present, three bull-breeding farms for Malwi and Nimadi cattle. A Live-stock Development Officer and Gaushala Development Officer have also been appointed. A mobile unit has been organised for prevention of epidemics amongst the cattle. Six poultry farms have been opened in *adivasi* areas.

The State of Madhya Bharat has ample resources for fisheries development. There are three main rivers, *viz.* Chambal, Narmada and Betwa with their tributaries covering approximately 6,000 miles in length, 2,000 irrigation reservoirs and tanks, 1,865 miles of canals and 1,20,000 small pools.

Out of 35 species found so far all the four important fast-growing carps, *i.e.*, Mirgal, Rohu, Calbasu and Mahasheer are found in different waters. There are about 36,000 fishermen throughout Madhya Bharat.

During 1951-52 about 135,000 fries were raised and the total extraction was 30,000 maunds. The total area under pisciculture is about 84 acres. At present six centres for fish culture are working in Madhya Bharat.

ARCHÆOLOGY DEPARTMENT

Government took prompt measures in conserving and maintaining archæological monuments since the formation of the State. The most important monuments where conservation works were carried out are the Ater fort in Bhind District, the Tomb of Mohammad Ghaus at

Gwalior, the Jain temple at Badoh in Bhilsa District, the Koshak Mahal and the Rajput monuments at Chanderi, District Guna, and Jahaz Mahal at Mandu. In the field of upkeep and maintenance also considerable progress was made so that the Department has also taken over monuments at Pathari, Bihar Kotra and other places for purposes of regular maintenance.

Progress is being made in the field of exploration and survey as a result of which ancient places such as Sarangpur and Nagda in Dewas District, Bihar Kotra in Rajgarh, and Dharampuri, Kesur, Makai and Badnawar in Dhar were systematically surveyed and photographs and descriptive records prepared by the Department.

ADMINISTRATIVE SET-UP

The Raj Pramukh is the constitutional head of the State and a popular Ministry responsible to a Legislature is in charge of the administration. The Madhya Bharat Government has secured the services of senior and experienced officers from outside as Chief Secretary, Finance Secretary and Inspector-General of Police. The first task before the State was to establish an integrated administration in respect of each Department throughout Madhya Bharat abolishing the independent administrations of 25 States. A central secretariat was established by August 1948. The State has agreed to the constitution of the Indian Administrative and Police Services. Rules relating to discipline, conduct, absorption, retrenchment, promotion, punishment are already framed, while on the Report of the Mohan Rau Committee, Government have also passed orders regarding uniform pay scales for the State. Rules determining relative seniority as between officers of different States have also been framed and seniority is being determined accordingly. Several Departments have published their seniority lists.

LAW AND JUSTICE

During the year 1951-52, six ordinances and thirty-two Acts were brought into force. A large field of integration of laws of different covenanting States was thus covered. Of all the laws passed by the Madhya Bharat Government, those relating to abolition of Zamindari and Jagirdari require special mention. These laws to a very large extent ameliorate the condition of agriculturist class of people. At present most of the laws and rules of the various covenanting States forming Madhya Bharat have been replaced either by the State laws or by Central laws extended to Part 'B' States. However, there yet remain a few which are still in force in some of the covenanting States and efforts are being made to prepare equivalent laws for the whole of Madhya Bharat so that a uniform set of laws may prevail.

According to a new reorganization scheme there will now be for the whole of Madhya Bharat eight District and Sessions Judges (in which cadre three Administrative posts of Secretary, Law Department, Registrar, High Court and Deputy Secretary, Law Department will be included), six Additionals, three Small Cause Court Judges, 32 Civil Judges of the First Class (in which cadre two Administrative posts of Senior Deputy Registrar, High Court and Under Secretary, Law Department will be included) and 74 Civil Judges of the Second Class (in which cadre one Administrative Post of Junior Deputy Registrar, High Court will be included) and nine temporarily as leave reserve as against 14 District and Sessions Judges, six Additional, three Small Cause Court Judges, 38 Civil Judges of the First Class, 71 Civil Judges of the Second Class and 25 Munsiffs working at present.

The Madhya Bharat Government have always worked on the principle of separation of Judiciary from the Executive. It has provided two kinds of magistracy. The Executive Officers, *viz.* the Collector, the Deputy Collector, the Tahsildar, etc., are invested with the powers of First or Second Class Magistrates and are allowed to exercise powers only under chapter 8, 9 and 11 of the Code of Criminal Procedure whereas the Judicial Officers, *viz.* the Civil Judges of the First Class, the Civil Judges, Second Class and Munsiffs have been invested with the powers of I and II Class Magistrates and are required to exercise all powers under the Code of Criminal Procedure except those with which the Executive Officers have been invested.

The Madhya Bharat Government has also been keen to introduce Hindi as the medium of expression for all official purposes. It has enacted the Hindi Language Act whereby all Bills to be introduced and amendments thereto be moved in the Legislature and All Acts passed by it and all ordinances issued by the Raj Pramukh; and all orders, rules, regulations and by-laws issued under the Constitution of India or under any law made by the legislature of Madhya Bharat, shall be in Hindi written in the Devanagari script.

The Government have appointed one Advocate General, one Government Advocate and Deputy Government Advocate for each branch of the High Court at Gwalior and Indore.

The new State has been divided into 16 Districts breaking down old boundaries in several cases though this involved the difficult task of overcoming old attachments and loyalties. Here is a list of the 16 Districts.—Gird; Bhind; Morena; Shivpuri; Guna; Bhilsa; Rajgarh; Shajapur; Dewas; Indore; Mandsaur; Ratlam; Ujjain; Dhar; Nimar; Jhabua.

At the head of the District is the Collector, a member of the I.A.S. or the Madhya Bharat Administrative Service, who is not only the head of the District for revenue matters but also for general administration including the maintenance of law and order. There are 5 sub-divisions in charge of Deputy Collectors. In addition to this every Collector is assisted by one or more Deputy Collectors in his District. The Deputy Collectors are also members of the Madhya Bharat Administrative Service.

As for local self-government in rural areas there are in all 127 municipalities in Madhya Bharat.

The process of integration of the Police Force of Madhya Bharat and of organizing it on the pattern of Part 'A' States is making steady progress.

In spite of partial failure of crops in certain parts and feverish election activities of political parties, crime has not only been kept effectively under control but has actually registered further decrease over 1950.

The pilot project on crime prevention through special Panchayats in each village has made good progress. In one year (1951) it has covered one complete district with 1,625 villages.

ADMINISTRATIVE PERSONNEL

Rajpramukh, Lt.-Gen. H. H. the Maharaja Sir Jiwaji Rao Scindia, Alijah Bahadur, G.C.I.E., G.C.S.I., Maharaja of Gwalior.

Senior Up-Rajpramukh, Maj.-Gen. H. H. the Maharaja Sir Yeshwant Rao Holkar, G.C.I.E., LL.D., Maharaja of Indore.

Junior Up-Rajpramukhs, Lt.-Col. H. H. Maharaja Anand Rao Puar Bahadur of Dhar; H. H. Raja Rao Bahadur Yeshodhar Singh of Khilchipur.

Adviser to H.H. the Rajpramukh and Regional Commissioner, P. S. Rau, C.I.F., I.C.S.

Secretary to the Rajpramukh, Col. Eknath Rao Patil.

Military Secretary to the Rajpramukh, Col. S. K. Surve.

CABINET

Chief Minister (General Administration, Appointments, Finance, and Separate Revenue), Mishrilal Gangwal.

Minister for Revenue, P.W.D. and Food, Shyamlal Pandviya.

Minister for Home and Education, Manohar Singh Mehta.

Minister for Health, Tribal Welfare, Forest, Relief and Rehabilitation, Dr. Prem Singh.

Minister for Law, Industries and Commerce and Information, Sitaram Jajoo.

Minister for Development, Labour and Local Self-Government, V. V. Dravid.

SECRETARIAT

Chief Secretary, K. B. Lall, I.C.S.
Home Secretary, S. N. Bamru, I.A.S.
Finance Secretary, P. Mohan Rau.
Revenue Secretary, J. N. Garg.
Law Secretary, M. L. Mital.
Public Works Secretary, K. V. Kalewar.
Commerce, Industries, Food and Supplies Secretary, Y. Bhargava, I.A.S.
Education Secretary, Dr. Bool Chand, I.A.S.
Secretary, Development, J. K. Kaul.
Secy., Public Service Commission, N. M. Vyas.
Secy., Legislative Assembly, Raghunath Singh.

HEADS OF DEPARTMENTS

Economic Adviser, Dr. L. C. Jain.
Inspector-General of Police, Badan Singh, I.P.S.
Chief Engineer, P.W.D., P. V. Divatia.
Chief Conservator of Forests, N. R. Advani.
Commissioner, Jagirs and Land Reforms, C. G. Matkar.
Commissioner for Customs and Excise, K. M. Bapna.
Census Commissioner, Ranglal.
Development Commissioner, S. N. Dubey.
Agriculture Production Commissioner, P. S. Bapna, I.A.S.
Transport Commissioner, C. L. Gupta.
Labour Commissioner, A. S. Banawalikar.
Director of Public Health and Medical Services and Inspector-General of Prisons, Shankarlal Gargya.
Director of Agriculture, N. M. Deshmukh.
Director of Education, S. N. Chaturvedi.
Director of Industries, N. Swami.
Director of Land Records, K. N Phalke.
Director of Relief and Rehabilitation, D. C. Sahani.
Director of Civil Veterinary, Dr. H. K. Mehra.
Director of Information, A. M. Shastri.
Director of Civil Supplies and Textile Commissioner, M. G. Savant.
Director of Archæology, Dr. D. R. Patil.

HIGH COURT

Chief Justice, G. K. Shinde.
Judges, P. V. Dixit; V. M. Mehta; B. K. Chaturvedi; Abdul Hakim Khan.

PUBLIC SERVICE COMMISSION

Chairman, S. V. Kanungo.
Members, S. S. Gaur; C. W. Pandit.

BOARD OF REVENUE

Senior Member, Brij Raj Narain.
Junior Members, G. R. Garde; P. S. Apte.

LEGISLATIVE ASSEMBLY

(*For list of members see under General Election.*)

MYSORE STATE

MYSORE STATE is a table-land situated in the angle where the western and eastern ghats converge into the Nilgiris, and is surrounded on all sides by the Madras State except on the west and the north-west where it is bounded by the districts of North Kanara and Dharwar respectively and towards the south-west by Coorg. The capital of the State is Mysore, which is also the residence of the Maharaja, and the headquarters of the Mysore University. The administrative headquarters are at Bangalore.

The area of the State is 29,458 square miles, the population 9,071,678 (1951 census). The revenue for 1952-53 is Rs. 19,82,85,000. For administrative purposes the State is divided into nine Districts.

Agriculture forms the main occupation of more than three fourths of the population. The chief agricultural products are rice, ragi, sugarcane, coffee, cocoanut, areca, cotton and mulberry.

Physically, the State devides itself into two regions—the 'Maidan' or plain country, comprising roughly the districts of Bangalore, Tumkur, Chitaldrug, Kolar, Mandya and Mysore, and the 'Malnad' or hill country, comprising the districts of Chickmagalur, Hassan and Shimoga. Rainfall is heavy in the malnad tracts, and dense ever-green forests abounding in big game form their characteristic feature. The great part of the maidan country is cultivated.

INDUSTRY

The State abounds in valuable natural resources and basic raw materials for the expansion of key industries of the modern type. These resources have been systematically exploited and utilised for capital works of a productive nature calculated to enhance the prosperity of the people.

Industries manufacturing iron and steel, cement, paper, sugar, cotton and silk, soaps, chemicals and fertilisers, sandalwood oil, etc., thrive in the State. The only aircraft factory in India is situated in Bangalore. Mysore is the principal gold producing centre in India.

The State is recognised as the pioneer in Hydro-electric development in India. Mysore produces most of the world's sandal oil. The development of rural and cottage industries has been a special feature of the policy of the Government in recent years. The Mysore Government is perhaps unique in the development of the Khadi industry as one of the State's activities, and to give it a place among the key industries.

Plans for starting a fertiliser factory at Bhadravati and a Raw Films factory near Mysore are well on the road to accomplishment, and recently Government have sanctioned the expansion of the Government Electric Factory and the revival of the Drugget industry. Government have also ordered working out of details for the establishment of a rayon factory in the State. Other schemes under implementation are the setting up of a production-cum-training centre for the manufacture of glass bangles, the establishment of a coir industry centre, the manufacture of writing chalk on a cottage industry basis and the organisation of the oil ghana industry along the lines adopted at the oil ghana centre at Wardha.

Communications by road as well as by railway are well maintained throughout the State. There are 6,273 miles of road of which 5,051 miles are metalled. The State has 600 miles of metre gauge line and 102 miles narrow gauge line. Bangalore is also rapidly developing into an important airport. The State with its lovely cities, enriched by shrines and marvels of sculpture, is an ideal place of tourists. Travel is easy and pleasing. The climate is salubrious.

The State is devoting special attention to post-war planning for which many schemes have been formulated. So far Government have sanctioned 80 schemes relating to agriculture, veterinary and animal husbandry, electrical, railways and medical and public health.

BUDGET FOR 1952-53

The budget for 1952-53 was presented by the Finance Minister on March 21, 1952, disclosing a deficit of Rs. 83.95 lakhs. The deficit is proposed to be wiped out by effecting economy. It does not include the anticipated loss of Rs. 306 lakhs owing to food transactions at the existing level of issue prices.

Revenue for 1952-53 is estimated at Rs. 1,982.85 lakhs and expenditure at Rs. 2,066.80 lakhs. The following are the estimates for capital accounts. Working expenses Rs. 28,01,500, electricity Rs. 1,20,96,000, road transport schemes Rs. 42,08,000, construction of irrigation works outside revenue account Rs. 1,10,99,000, capital outlay on industrial development Rs. 1,18,24,500 and capital account on electricity schemes outside revenue account Rs. 2 crores.

On the basis of loans anticipated from the centre and public borrowings, estimates for 1952-53 provide for a capital programme as under: irrigation works Rs. 110.99 lakhs, industries Rs. 118.25 lakhs, and electricity (including Kanini reservoir) Rs. 200 lakhs.

Special attention has been devoted to the expansion and development of education in all its aspects. The State now spends annually about Rs. 3 crores on education. Tuition is free for the Depressed Classes. Hindi is being taught as a compulsory subject in the High Schools and as a second language in the Middle Schools, the Intermediate and the B.A. Classes.

The constitution of Mysore is as framed for States in Part B of the I Schedule in the Indian Constitution. The State is exempted from the operation of Article 371 of the Constitution.

ADMINISTRATION

The administration is carried on by the Maharaja as Rajpramukh, and a Council of Ministers, which functions on the basis of joint responsibility. The Council consists of a Chief Minister and five other Ministers.

Mysore State has been given under the constitution a bi-cameral legislature, namely, Mysore Legislative Assembly which consists of 99 elected members and the Mysore Legislative Council which consists of 40 elected members. The State is also enabled, under the constitution, to send 11 Representatives to the House of the People and six Members to the Council of States.

COUNCIL OF MINISTERS

Chief Minister, Finance, Politica Department, K. Hanumanthaiah.
Industries, Commerce, T. Siddalingiah.
Law, Education, Labour, Information, A. G. Ramachandra Rao.
Local Self Govt., Public Health, Forests, Excise, T. Channiah.
Home, Food, Agriculture, Road Transport, H. Siddaveerappa.
Revenue, Public Works, K. Manjappa.

MYSORE LEGISLATIVE ASSEMBLY

(*See under General Election.*)

MYSORE LEGISLATIVE COUNCIL

(*See under General Election.*)

SECRETARIAT

Chief Secretary, N. Puttarangaswami.
Financial Secretary, M. Shamanna.
Education Secretary, Nirvani Gowda.
Development Secretary, R. J. Rego.
Revenue Secretary, M. S. Swaminathan.
Law Secretary, N. R. Jaya Rao.
Home Secretary, G. N. Nagaraja Rao.
Secretary, Public Works, K. S. Gangadhara.
Secretary, Local-Self Govt., A. S. Khaleel.
Secretary, Stores Purchase, N. Lakshmana Rao.

HEADS OF DEPARTMENTS

Inspector General of Police, N. V. Babu Reddy.
Excise Commissioner, Mir Safdar Hussain.
Revenue Commissioner, K. Srinivasan.
Director of Public Instruction, J. B. Mallaradhya.
Chief Conservator of Forests, M. A. Muthanna.
Director of Industries and Commerce, E. V. Ganapthi Iyer.
Labour Commissioner, B. S. Puttuswamy.
Director of Agriculture, M. K. Appajappa.
Director of Food Supplies, N. S. Hiriannaiya.
Director of Sericulture, K. Shamshuddin.
Director of Geology, Dr. C. S. Pichamuthu.
Director of Animal Husbandry Services, Dr. P. M. Narainswamy Naidu.
Director of Horticulture, T. Maregowda.
Director, Anti-Corruption & Efficiency Audit, T. Appaji Gowda.
Director of Public Health, Dr. T. Chendrasekhariaya.
Senior Surgeon & Inspector-General of Prisons, Dr. V. Lakhsmana Rao Padke.
Registrar of Co-operative Societies, Thipperudriah.
Steel Controller, S. Muniranjappa.
Advocate General, A. R. Somanatha Iyer.
Chief Engineer, M. Neelakantappa.
Chief Electrical Engineer, George Chandy.
Principal Information Officer, Sathyan.

HIGH COURT

Chief Justice, P. Medappa, B.A., B.L.
Puisne Judges, R. Venkataramiaya, N. Balakrishniah, T. N. Mallappa, B. Vasudeva Murthy.
Registrar, T. Kempiah.

PUBLIC SERVICE COMMISSION

B. H. Gundappa Gowda (*Chairman*).
George Mathan.
H. M. Mallikarjunappa.
Director, Govt. Press, Stationery & Stamps, B. Krishnaswamy Chetty.

THE PATIALA AND EAST PUNJAB STATES UNION

THE Patiala and East Punjab States Union comprising Patiala, Kapurthala, Nabha, Jind, Faridkot, Malerkotla, Nalagarh and Kalsia States lies contiguous to the boundaries of the Punjab. It was inaugurated at Patiala by the late Sardar Vallabhbhai Patel on 15th July 1948.

Three of these seven, Patiala, Nabha and Jind make up the Phulkian group, the rulers of which trace their descent from the same progenitor from whom the name Phulkian is derived. The Raja of Faridkot who is descended from an ancestor of Chaudhry Phul also belongs to the same family group, as do the Houses of Nalagarh and Kalsia. Malerkotla is a Muslim State. But the fact that it survived the tumultuous period of the eighteenth century is enough testimony to the friendship which the neighbouring Phulkian States bear to it. Thus the Rulers and the States are bound together by blood ties of friendship and by historical antecedents.

The Union covers an area of 10,099 square miles, three-fifths of which form Patiala territory. The Union has a population of 3,468,631 according to the 1951 census. The population of the Union is homogenous. All the people speak the same language, namely Punjabi, and have the same kind of customs, etc., factors which make for political unity and solidarity. The Jats who form a major part of the population are among the finest peasantry in India. They are not only good cultivators but are also first class soldiers. The average annual revenue of the State is about Rs. 5 crores.

AGRICULTURE

The Patiala and East Punjab States Union like the rest of the country is essentially an agricultural area. The former Patiala State had a separate Agriculture Department for the purpose of educating the farmers in the art of modern cultivation and the use of improved varieties of seeds and modern implements. There was also a central farm about six miles from the capital. Similar farms exist at Nabha, Faridkot and Kapurthala.

The main crops of the Union are wheat, gram, sugar-cane and cotton in the plains and potatoes in the hills. In addition barley, oats, bajra, maize and other minor crops are also grown.

The Agriculture Department has a separate marketing section which looks to the proper marketing of agricultural produce and the introduction of standard weights and measures in the mandies. Grading stations for wheat, atta and eggs were established in the Patiala area and there is a ghee grading laboratory at Narnaul with an output of about 10,000 maunds of ghee per annum. The following Acts are in force in the Union :—1. The Agricultural Produce Markets Act ; 2. Standards of Weights Act ; and 3. The Agricultural Produce (Grading and Marketing) Act.

Veterinary hospitals exist practically in all important centres in the Union. The Patiala and East Punjab States Union has been an important centre for the famous breed of Hariana cattle and Murrah buffaloes and the services of the Veterinary Department have been in great demand. It is, therefore, proposed to open twenty-five hospitals every year and to start bull breeding farms for improving the indigenous breed of cattle and buffaloes.

Regular cattle fairs are held in important rural centres to encourage cattle breeding and facilitate the sale and purchase of cattle. The Agriculture Department provides various facilities which ensure that the fairs are widely patronized. Special shows are sometimes arranged for the entertainment of the visitors. Educational films are included in the show.

The Cattle Development Scheme jointly financed by the Indian Council of Agricultural Research and the Union Government for the purpose of improving the milk supply and encourage the cultivators to start mixed farming is making good progress.

A Five-year Plan costing Rs. 5 crores has been chalked out. A sum of Rs. 3,00,00,000 has been earmarked for the reclamation of eight lakhs acres of waste land. Nearly 20,000 acres have so far been reclaimed and this year it is proposed to reclaim another 38,000 acres of waste land. Loan amounting to 8.4 lakhs have been advanced for 300 tractors in the field. Government also maintains a fleet of tractors to be let out without profit.

Remodelling of irrigation system in the State to bring it to the level of the Punjab is in hand. The work will be spread over a period of five years with an annual expenditure of three lakhs. The Bein river irrigation project costing Rs. 90 lakhs and the Narnaul Bund irrigation project costing Rs. 6½ lakhs are being speeded up. The Governments of PEPSU and Rajasthan are partners with the Punjab in the Bhakra Nangal Project to the extent of 35 per cent. A five-year extension project under the Ford Foundation Scheme costing Rs. 30 lakhs is in operation on the lines of Etawa project in Uttar Pradesh with a view to bringing about 21,000 acres of culturable waste in 114 villages of Tehsil Nabha under cultivation.

The greater part of the union situated between the Jumna and the Beas has alluvial soil. Canal irrigation is resorted to in the southern part of the plains where rainfall is scarce. The major part of the union is fed by water from the Sirhind canal with its arterial branches. The State at present maintains 222 miles of new channels taken over from the Punjab.

The Government of India has granted a subsidy of Rs. 30 lakhs for the improvement of irrigation system and roads.

There is an up-to-date Horticulture Department whose experiments conducted in the hill territory over a decade are being made available to the general public. There are three separate zones according to elevation :—1. Pinjore—Representing about 2,000 ft., conducts experiments on mangoes, litchies, spotas, papayas and pine-apples ; 2. Kandaghat—Representing elevation ranging between 4,000 and 5,000 ft. above sea-level, conducts experiments on peaches, apricots, plums, prepes, brambles and persimmons ; and 3. Shellon—Ranging in elevation between 5,000 and 9,000 ft. is for apples, pears, cherries and chestnuts.

INDUSTRIES

Although agriculture is the main occupation of the people in the Union, the development of industries has not been lost sight of. There are at present 450 large and small scale industries in the State with a total productive capital invested in major industries alone of nearly Rs. 4 crores and they employ more than seven thousand workers and 20 per cent of the State population depends upon it for livelihood.

A five-year plan for industrial development costing Rs. 32.35 lakhs, has been chalked out. A technical institution imparting training in mechanical and electrical engineering is being set up at Nabha. It is also proposed to set up a Central Arts & Crafts Emporium at Patiala and an industrial school for women. Rs. 11 lakhs have been earmarked to subsidise industries in the five-year plan.

Two large-scale cement factories are functioning in the Union, one at Surajpur near Kalka and the other at Dadri. The former has a capacity of nine hundred tons of cement per day.

An up-to-date biscuit factory, one of the biggest of its kind in India is functioning at Rajpura where there are also factories for the manufacture of starch and chemicals.

A large sugar factory exists at Phagwara and another at Hamira. A distillery for the distillation of fine quality liquor is also functioning at Hamira. A textile mill with 25,000 spindles and 575 looms is functioning at Phagwara. It is the only big textile mill in PEPSU, Punjab or Himachal Pradesh.

A number of big and small iron and steel works, with foundries are situated at Kapurthala and Patiala and at other important towns in the Union. There are also two big roller flour mills at Patiala and Bhatinda.

Cotton ginning and pressing factories and oil mills are other industries found at a number of places.

EDUCATION

There are at present 12 Colleges including one teachers' training college and one commercial college and 55 High Schools in the Union. Besides, there are 101 upper-middle schools, 124 lower-middle schools and 806 primary schools as well as one normal school. As a drive against illiteracy 200 adult education centres have been opened in the State. The State Government is seriously contemplating starting a University of its own and a sum of Rs. 5 lakhs to serve as a nucleus for the University fund has already been provided in the current year's budget. The proposed university will be a residential and a teaching university and wholly secular in nature. A Committee of experts has already been set up to prepare the plans. The percentage of literacy is 5.21.

The provision for 1952-53 is Rs. 76·08 lakhs.

In addition to a Girls' College co-education facilities have been provided at the primary and university stages.

To encourage primary and women's education in the Union, primary education for boys upto the 4th class and for girls upto the 10th is made free in all schools in Patiala. Harijans and members of other backward classes are also given a free education upto the matriculation standard.

The PEPSU Government has succeeded in amicably settling the question of medium of instruction in the schools. For purposes of teaching, the State has been divided into two zones, the Hindi-speaking zone and the Punjabi-speaking zone. In the Hindi-speaking areas, Hindi would be the medium of instruction but Punjabi being the regional language would be a compulsory subject from the 4th primary class upward. Similarly in the Punjabi-speaking areas Punjabi would be the medium of instruction and Hindi being the federal language would be a compulsory subject from the 4th primary class upward.

The five-year plan envisages opening of 60 new primary schools every year and introduction of technical education and opening of libraries both stationary and mobile throughout the State.

For the 1952-53 budget revenue receipts were estimated at Rs. 522·36 lakhs (including a grant of Rs. 15 lakhs from the Central Government for the development of roads and irrigation) and the total expenditure at Rs. 492·98 lakhs, leaving a surplus of Rs. 29·38 lakhs which however turned into a net deficit of Rs. 62·69 lakhs by an additional expenditure of Rs. 92·04 lakhs provided during the current year on the five-year plan schemes. No new taxes were proposed.

PUBLIC HEALTH

An up-to-date and independent medical department exists in the Union with its headquarters at Patiala and all the different medical and health departments have been integrated into one and placed under the Director of Health and Medical Services.

For purposes of administration two districts have been combined to form a civil surgeoncy making four civil surgeons in all. Similarly there are four District Health Officers. All the hospitals are located in the urban areas, while the dispensaries serve the small towns and rural population.

The Rajindra and Lady Dufferin Hospitals are the main Hospitals of the Union which are managed by highly qualified doctors and specialists.

There are two health centres one at Patiala and the other at Kapurthala. The Union has maternity wards attached to Lady Dufferin Hospital, Patiala, Civil Hospital, Nabha and R.J. Hospital, Kapurthala.

There are three touring dispensaries which cover the entire rural area and bring medical aid to the very doors of the villagers. X-ray and laboratory facilities are available at Patiala, Nabha, Sangrur, Faridkot, Kapurthala and Dharampur. Arrangements for segregation of infectious disease cases exist in the hospitals at the District Headquarters.

There is a T. B. Hospital at Dharampur and T.B. Clinics at Patiala, Kapurthala and Faridkot. B.C.G. teams are functioning in the State on a mass scale and a three-year B.C.G. scheme costing Rs. 84,467 has been sanctioned. An independent V.D. Clinic on modern scientific lines has started at Kandhaghat (Simla Hills) as the disease is most prevalent in the hill areas.

Ayurvedic system of medicine has been patronised in the State. A regular department is functioning with 54 Ayurvedic aushadhalayas throughout the union and a Central Pharmacy in the centre. The opening of a full-fledged Ayurvedic College is contemplated. The registration of Unani and Ayurvedic practitioners has recently been enforced.

The total number of patients both indoor and outdoor treated in all the hospitals and dispensaries of the Union was 3,002,250 in 1950-51. The Union budget for Public Health & Medical Services at present stands at Rs. 38·43 lakhs. The Union Government maintains 139 hospitals and dispensaries.

RELIEF AND REHABILITATION

The Muslim migrants from PEPSU abandoned an area of 774,000 ordinary acres of land in the Patiala Union and this was temporarily allotted to the displaced persons who had taken shelter in the Union territory to provide them with immediate relief. Joint quasi-permanent allotment operations were started for allotting lands to the displaced persons both in the Punjab and the PEPSU at Jullundur. The allotment has since been completed. Out of 4,51,789 standard acres, allotment of 4,12,710 acres has been made and possession taken thereof. The allotments made were generally at a flat rate of 20 bighas per adult member of a family of the displaced person.

The Central Government made a provision of Rs. 50 lakhs for the financial assistance of the displaced persons in the year 1950 and a provision of Rs. 40 lakhs in the year 1951. Out of this amount about Rs. 35 lakhs have so far been advanced to the displaced agriculturists and about Rs. 36 lakhs to urban displaced persons including the Bahawalpuris. A sum of about Rs. 4,000 was loaned to the students. The unspent money having lapsed, the Central Government released only Rs. 4 lakhs for disbursement upto March 1952. A sum of Rs. 4,37,350 was spent towards flood relief out of a sum of Rs. 10 lakhs granted in this connection by the Central Government. As regards urban rehabilitation 1,90,000 displaced persons including 40,000 non-Punjabi refugees were rehabilitated. A sum of Rs. 1,72,300 was advanced towards industrial rehabilitation.

Seventy-five per cent of the rehabilitation staff has been retrenched. With effect from 1st March 1952 the posts of Assistant Commissioners of Rehabilitation have been abolished and the work has been entrusted to Assistant Commissioners of Revenue.

A proposal to build some model villages at an expense of about Rs. 10 lakhs is under active consideration of the State Government.

During 1950 two townships—one at Rajpura with 2,400 houses and the other at Tripuri near Patiala with 1,200 houses—were completed for settling more than 20,000 displaced persons from Kurukshetra Camp and are now being administered by PEPSU Development Board.

LOCAL SELF-GOVERNMENT

Each of the covenanting States had its own form of Local Self-Government, hence there was no homogeneity. The whole system of Local Self-Government is now being reorganized with a view to achieving uniformity throughout the Union, and the Local Self-Government Laws are also unified. Elections to various local bodies under the new system are now being held.

There are in all 22 Municipal Committees and 42 Small Town Committees in PEPSU. With a view to providing the boon of Local Self-Government to the rural population, the establishment of Panchayats in villages with extensive powers has been taken in hand. Side by side the formation of Panchayat Adalats with judicial powers and Reconciliation Boards is also envisaged.

The construction of new arterial roads connecting the rural area with important *mandis* and business centres has already been taken in hand. A 19-mile long metalled road connecting Rajpura with Kalka was constructed in the record time of three months. The capital of the State is not connected by road with Bhatinda—the most strategic city situated on the border—and with the district headquarters of Mohindergarh and Barnala districts. Some important towns and *mandis* like Mansa still remain to be connected. The Government of India has suggested that there should be a national highway between Ambala and Bhatinda. A sum of Rs. 39·34 lakhs has been provided in the 1952-53 budget for the construction of new roads and the repairing of existing ones.

Prior to the inauguration of the Union the individual States had their own separate administrations. The ruler was the source of all power and had absolute jurisdiction over his territory.

After the formation of the Union strong efforts were made both by His Highness the Rajpramukh and the late Vallabhbhai Patel to bring the three political parties of the States Union namely the Union Congress, the Shiromani Riyasti Akali Dal and the Lok Sewak Sabha together but the efforts failed. Sardar Patel in his inaugural address declared that no popular interim Government could be formed as the parties had failed to agree. On the day on which His Highness the Rajpramukh was to take charge of the covenanting States—August 20, 1948—the States Ministry constituted a Caretaker Government comprising S. Gian Singh Rarewala as Prime Minister, Sir Jai Lal as Adviser, S. Inderjit Singh as Finance Secretary and Shri B. R. Patel as Chief Secretary. This was only a temporary arrangement : the Government was to keep the administration going till an interim popular ministry was formed. It took about five months before an interim popular ministry could be formed. This Ministry which took office on January 13, 1949 was, however, dissolved on 19th November, 1949, and a Caretaker Government with Sardar Gian Singh Rarewala as Chief Minister and Shri M. R. Bhide as Minister took over the administration of the Union. A second Congress interim ministry headed by Colonel Raghbir Singh and including Shree Brish Bhan, Giani Zail Singh, Chaudhary Nihal Singh Takshak, S. Sampuran Singh Dhola and Lala Desraj was installed on May 23, 1951. The results of general elections in PEPSU have not ensured absolute majority to any political party. The Akali Assembly party has elected the former Chief Minister and the maternal uncle of the PEPSU Rajpramukh, S. Gian Singh Rarewala, as its leader. The party has named itself the United Front. The Congress, however, formed the first responsible ministry under the leadership of Colonel Raghbir Singh, but resigned afterwards and the United Front took office.

ADMINISTRATION

Rajpramukh, His Highness the Maharajadhiraj of Patiala.

Secretary to His Highness the Rajpramukh, S. Mathura Dass.

Counsellor for PEPSU, V. K. B. Pillai.

Chief Minister, Police, Jails, Justice, General Administration, Political, Planning, Archives, Sardar Gian Singh Rarewala.

Revenue, Rehabilitation, Medical, Law, Legislation, Chaudhri Ram Singh.

Finance, P.W.D., Transport, Provincial Taxation, Sales Tax, Excise, Sardar Bhupinder Singh Man.

Civil Supplies, Industries, Labour, Co-operation, Chaudhri Attar Singh.

Agriculture, Forests, Education, Local Self-Govt., Dharmarth, Punjabi, Backward Classes, Press, Information, Sardar Dara Singh.

Adviser to Government, B. R. Tandon, I.C.S.

Chief Secretary, V. Isvaran, I.C.S.

Finance Secretary, Krishna Swami.

Financial Commissioner (Rev.), S. Lal Singh.

Commissioner, S. Dhanna Singh.

LEGISLATIVE ASSEMBLY

(*For list of members see under General Election*).

1951 CENSUS

——	Total	Males	Females	Total. Displaced Persons	Males	Females
Patiala	511,865	276,425	235,440	127,665	67,980	59,685
Kapurthala	295,822	156,910	138,912	89,602	47,840	41,762

Total	3,468,631	1,873,205	1,595,426	380,003	203,813	176,190

RAJASTHAN STATE

THE Union of Rajasthan is comprised of the following former States: Banswara, Bundi, Dungarpur, Jhalawar, Kishengarh, Kotah, Partapgarh, Shahpura, Tonk, Udaipur, Bikaner, Jaipur, Jodhpur, Jaisalmer, Alwar, Karauli, Dholpur, Bharatpur and part of Sirohi. It is the biggest of the States Union, with an area of 123,424 sq. miles, a population of 15,297,979 (1951 census) and a revenue of about 18 crores. It has a common frontier of 730 miles with Pakistan.

When it was first formed on March 25, 1948 it comprised only Banswara, Bundi, Dungarpur, Jhalawar, Kishengarh, Kotah, Partapgarh, Shahpura and Tonk. On April 18, 1948 it was reconstituted to include Udaipur with the capital at Udaipur. On March 30, 1949 four other States Bikaner, Jaipur, Jodhpur and Jaisalmer joined it and the new Rajasthan came into being on April 7, 1949. It acquired its present size and composition when the four States of the Matsya Union, Alwar, Karauli, Dholpur and Bharatpur were merged into it on May 15, 1949. His Highness the Maharana of Udaipur became the Maharaj Pramukh and His Highness the Maharaja of Jaipur the Rajpramukh. Later still on January 15, 1950 part of Sirohi was joined to it.

The capital of the Union is Jaipur. Rajasthani in its various dialects is spoken all over the State. The common language is Hindi. Among castes and tribes the most numerous are the Brahmins, Jats, Mahajans, Chamars, Rajputs, Minas, Gujars, Bhils, Malis and Balais.

The State lies roughly between North Latitude 23°3′ and 30°12′ and East Longitude 69°30′ and 78°17′. It is bounded on the north by Delhi, the Punjab (I), the Patiala and East Punjab States Union and the West Punjab Province of Pakistan; on the east by U.P. and Madhya Bharat; on the south by Madhya Bharat and Bombay State; and on the west by the Pakistan Provinces of Sind and West Punjab. Enclosed in the Rajasthan Union is the Part C State of Ajmer.

NATURAL REGIONS

It may be useful to give a rough idea of the geographical position of the several States which merged to form the Union. Jaisalmer, Jodhpur and Bikaner form a homogeneous group in the north and west, while a part of Jaipur and the whole of Alwar lie in the north-east. Jaipur, Bharatpur, Dholpur, Karauli, Bundi, Kotah and Jhalawar may be grouped together as the eastern and south-eastern States. Those in the south are Partapgarh, Banswara, Dungarpur and Udaipur with Sirohi in the south-west. In the centre lie Kishengarh State and parts of Tonk.

The Aravalli mountains intersect the country from end to end by a line running north-east and south-west. The heights of Mount Abu are close to the south-western extremity of the range, while its north-eastern end may be said to terminate near Khetri almost on the borders of Delhi.

There are two main regions, one to the north-west of the hills and the other to the south-east. On the whole the north-west region is sandy, ill-watered and unproductive; it improves gradually as we move from west to east. In the extreme west it is mere desert, while towards the east it is comparatively fertile and habitable. The only river of any consequence here is the Luni. The great desert forming the whole of the frontier between Rajasthan and Sind is covered by sand-hills on which grows a kind of coarse grass in the dry season and in the rains slightly richer vegetation. The cultivation is everywhere poor and precarious. Along the base of the Aravalli range the land is well cultivated.

The region south-east of the Aravallis is higher, more fertile, and very diversified in character. It contains extensive hill ranges, long stretches of rocky wold and woodland. The region is traversed by many rivers and in some parts there are wide valleys, fertile table-lands and great stretches of excellent soil. The chief rivers are Banas and Chambal.

There are no natural fresh-water lakes in Rajasthan, the only considerable basin being the well-known salt lake at Sambhar. There are, however, numerous artificial sheets of water in the eastern half of the State. The oldest and the most famous are in Mewar, the Dhebar Lake, the Raj Samand and the Pichola Lake at Udaipur city.

AGRICULTURE

The most prominent constituent of the vegetation of Rajasthan is the scrub jungle; trees form quite a secondary feature. Among fruit trees are figs, mulberry, tamarind, mango, pomegranate, peach, custard apple and guava.

Rainfall is very unequally distributed throughout Rajasthan. The summers are very hot: hot winds and dust storms are common. The winters are very cold. The change of temperature between day and night is sudden, excessive and very trying.

The principal crops are bajra and jawar. Bajra is the chief crop in the western and northern parts, while jawar is commoner in Bundi, Jhalawar, Kotah, Tonk and parts of Partapgarh and Udaipur. Other Kharif crops are maize, moth, mung, cotton and a coarse kind of rice. The principal rabi crops are wheat, barley, gram, sugarcane, poppy, tobacco, san and indigo. Oilseeds consist of til, mustard, rape, linseed and castor. Among cultivated fruit are apricot, custard apple, guava, mango, mulberry, orange, peach, plantain, plum, pomegranate, pummelo, tamarind, lime, melon and several varieties of fig. Many kinds of vegetables are grown such as beet, cabbage, carrot, cauliflower, egg-plant, onion, parsnip, potato, radish, spinach, tomato, turnip, yam and several of the gourd and cucumber family.

The main wealth of the desert lands of the west and north consist in the vast herds of camels, horned cattle, and sheep. The horses of Marwar are renowned for their hardiness and ease of pace.

There are no large timber forests in Rajasthan, but the woodlands are quite extensive upon the south-western Aravallis. The southernmost parts comprising the former States of Banswara, Dungarpur and Partapgarh are in proportion to their size the best wooded of any in Rajasthan. Here teak and other valuable timber trees can thrive well. Small bamboos are very common. Minor forest produce consists of grass, fire-wood, bamboos, fruit, honey, lac and gum.

MINERALS, MANUFACTURES

The most important mineral in Rajasthan is coal, but it is of inferior quality. It is generally mixed with the Bengal variety before use. Other ores are copper, iron, cobalt but all are present in small quantity. The rocks of Rajasthan are rich in building material. Limestone is abundant. One variety is a fine-grained crystalline marble; another variety, the Jaisalmer marble as it is sometimes called is well adapted for fine carving. Sandstone is plentiful almost everywhere, varying greatly in texture and colour. Fuller's earth occurs in parts of Bikaner and gypsum in Jodhpur. Rajasthan has vast salt resources.

The more important industries are the weaving of muslin, dyeing and printing of cotton cloths, manufacture of carpets, rugs and other woollen fabrics, enamelling, pottery, and work in ivory, lac, brass, steel, stone, etc. Jaipur is preeminent for enamelling on gold. The best pottery is also produced in Jaipur. Brass and copper utensils of daily use are manufactured everywhere. Sword blades, daggers, knives are manufactured in Jhalawar.

Among the chief exports are salt, wool, woollen fabrics, raw cotton, oilseeds, opium, ghee, marble and sandstone, hides, printed cloths, camels, cattle, sheep and goats. The main imports include food grains, cotton goods, sugar, tobacco, metals, timber and kerosene oil. The principal trade centres are the capitals of the former States.

RECONSTRUCTION

The work of integrating various units into one administrative unit is almost complete. The following steps taken in this direction are noteworthy. (1) Establishment of Secretariat, one High Court, Public Service Commission and Board of Revenue for the entire State. (2) Integration of various executive, administrative, Police and Revenue Departments and Judicial courts existing in various covenanting States on all union basis. (3) Consolidation and amalgamation of various State treasuries (4) Reorganisation of accounts system on the basis of State system. (5) Verification and equalisation of the rates of customs duties prevailing in various covenanting States. (6) Abolition of inter-State customs barriers which stood in the way of trade and commerce, and (7) Pushing ahead of survey and settlement operations and examination of land tenure laws.

In spite of their preoccupation with the integration work, Government have found time to plan for the future all round development of the State. There is a short term one year development plan for the entire State according to which the State has been divided into 500 units, and at least one item on the reconstruction programme will be completed in each unit within a year. Work in all these units has already commenced. The plan is expected to cost the Government one crore of rupees.

A separate plan is under way for developing the water resources of the State with the twin purpose of ameliorating the condition of the Kisans who for centuries have lived in fear of famine in dry years, and keeping pace with the country-wide move to attain self-sufficiency by 1951. The plan is expected to cost over Rs. 400 lakhs out of which 115 lakhs have already been spent. The food production is likely to go up by one lakh tons starting with 60,000 tons in 1951-52 Rabi.

Progress achieved in other directions includes the abolition of judicial and administrative powers of Jagirdars, application of Central Government labour laws to Rajasthan, abolition of unlawful cesses, passing of anti-ejectment laws for agriculturists etc.

The appointment of 10 non-official Boards to deal with the development of all aspects of the life of the State, industrial, agricultural, social and educational, has added a new chapter to the administrative history of Rajasthan. These bodies, which include Boards for the welfare of Kisans, Harijans, Adivasis, Labourers and Refugees and the advancement of cottage industries, education, Ayurvedic system of medicine, the Sanskrit language, Local Self-Government etc. are non-official agencies for constructive service to the people and are presided over by the various Ministers of the Government. A sum of Rs. 30 lakhs had been placed at the disposal of the Boards for 1951.

The reorganisation of the educational system from July 1950, crowns the efforts of the Government towards nation-building. The new curriculum emphasises the principle of learning by doing and is closely related to the life of the pupils. Teaching of at least two handicrafts has been made compulsory which will enable the students to take to careers other than Government service and thus reduce the incidence of unemployment. Two subjects 'General Science' and 'Social Science' have been newly introduced so as to acquaint students with their environment and create among them interest in men and matters around them.

Eight training camps at a cost of 1½ lakhs were opened during the 1951 summer vacations to equip about 2,000 teachers to discharge the new responsibility which the curriculum places on them.

English will no more be compulsory at the primary stage, and has been made optional for the middle classes.

REFUGEE REHABILITATION

Since partition about 4 lakh displaced persons have come to Rajasthan from West Pakistan as detailed below:—1. According to All India Refugee Census report, 2,60,594 persons; 2. Displaced agriculturists, coming from other States, 5,000 families; Unsponsored refugees, 12,000 persons; Others, 13,000 families.

The refugees were lodged in camps at various centres, where medical and sanitary arrangements were made. Free warm clothes were supplied and arrangements were made for the education of refugee children. Subsequently lands and Taccavi loans were granted to the agriculturist families in rural areas and industrial loans were given to others engaging in trade or business individually or collectively.

Approximately 35,939 families were settled on 4,79,650 acres of land throughout Rajasthan. 1,26,882 acres of land was restored to the Meos in Matsya.

Agricultural loans amounting to Rs. 1,06,00,000 were granted to refugees, besides another 8 lakhs advanced to Meos to start life afresh. Loans of the tune of 42 lakhs were granted for business and industrial enterprises to individuals, groups of displaced persons, or to co-operative societies. Various schemes to employ displaced persons in trade by opening dairies, poultries, sericulture, silk weaving, metal rolling, carpentry, smithy, wool and mining industries have been sanctioned and are being given effect to. Electrical and mechanical training is also being imparted to refugees.

Housing colonies are being constructed at several places by co-operative societies who will be granted loans. 7,640 houses were expected to be constructed at a cost of 21 lakhs, besides the construction of townships and houses at various places. About 600 stalls have been constructed and allotted to refugee traders of various categories.

Special attention is paid to destitute and unattached women and children. Narishalas and Homes are opened at Divisional towns and each person is paid a sum of Rs. 15 per head for his maintenance.

1952-53 budget shows a deficit of Rs. 93·48 lakhs. The revenue is estimated at Rs.16,32,18,000 and expenditure Rs. 17,25,66,000.

Included in the revenue estimates is credit of Rs. 15 lakhs from agricultural income-tax which was to have been levied in 1951 and for which a Bill will shortly be introduced. Under capital expenditure, the budget provides for Rs. 82,30,000 for the Bhakra-Nangal Project, Rs. 46,30,000 for other irrigation projects including the Jawai project, Rs. 32,34,000 for the completion of roads, and buildings started in previous years, Rs. 17,30,000 for electricity schemes, and Rs. 11,40,000 for water supply schemes. The provision under Irrigation is inclusive of Rs. seven lakhs for the Chambal project.

ADMINISTRATION

The State has been divided into five administrative Divisions, namely, Jaipur, Jodhpur, Bikaner, Udaipur and Kotah with a Commissioner for each Division.

A striking point in the Covenant is that it gives the Government of India general controlling and directing power in the administration of the State. The Government of India appoints Advisers to the Government. For some of the more important posts in the State the service of Central Government officers have been borrowed.

The federal financial integration of the State was completed on April 1, 1950. Certain items of expenditure have been transferred to the Centre.

Maharajpramukh, The Maharana of Udaipur.
Rajpramukh, The Maharaja of Jaipur.
Uprajpramukh, Maharao of Kotah.
Regional Commissioner and Adviser, M. R. Bhide, I.C.S.
Adviser, Hari Sharma.

CABINET

Chief Minister, Home, Appointments, General Administration (except Devasthan), Political, Planning, Tika Ram Paliwal.
Agriculture, Revenue (except Forests and Co-operation), Famine Relief, Mohan Lal Sukhadia.
Public Works (except Irrigation), Separate Revenue, Refugee Relief and Rehabilitation, including Evacuee Property, Bhola Nath.
Food, Civil Supplies, Irrigation, Scheduled Castes, Scheduled Tribes, and Backward Classes, Devasthan, Bhogi Lal Pandya.
Commerce and Industries, Medical and Public Health, Judicial Department, Legal Remembrancer's Office and Law Department, Legislative Assembly and Elections, Urban Development, Ram Kishore Vyas.
Finance, Education, Nathu Ram Mirdha.
Forests, Co-operation, Amrit Lal Yadav.
Labour, Local Self-Government, Ramkaran Joshi.

SECRETARIAT.

Chief Secretary, S. W. Shiweshwarkar, I.C.S.
Additional Chief Secretary, V. Narayanan.
Home Secretary, Bhajan Lal Chaturvedi, I.A.S.
Revenue Secretary, Shyamlal, I.A.S.
Relief and Rehabilitation Secretary, Shyam Lal, R.A.S. (*Offg. & Temp.*).
Commerce and Industries Secretary, Chandrapal Singh, R.A.S.
Education Secretary, Jagan Nath Purohit, R.A.S. (*Offg.*).
Local Self-Govt. and Medical and Public Health Secretary, Chandradhar Issar, R.A.S. (*Offg.*).
Public Works and Separate Revenue Deptts. Secretary, Ganga Sahai Purohit, R.A.S. (*Offg.*).

LEGISLATIVE ASSEMBLY

(For list of members see under General Election.)

THE STATE OF SAURASHTRA

THE scheme for the formation of the State of Saurashtra was finalised in the last week of January 1948. A Covenant for the formation of the State of Saurashtra was signed by the Rulers of the Covenanting States on 21st January 1948, and the new State came into existence on 15th April 1948. The inauguration ceremony was performed by the late Sardar Vallabhbai Patel. The total number of States comprising the State of Saurashtra is 221. This includes the following 30 Jurisdictional States: Nawanagar, Bhavnagar, Porbandar, Dhrangadhra, Morvi, Gondal, Jafrabad, Wankaner, Palitana, Dhrol, Limbdi, Rajkot, Wadhwan, Lakhtar, Sayla, Chuda, Vala, Jasdan, Amarnagar (Thana-Devli), Vadia, Lathi, Muli, Bajana, Virpur, Maliya, Kotda-Sangani, Jetpur, Bilkha, Patdi, Khirasra.

Before the formation of the State of Saurashtra, Kathiawar as the area was formerly called was divided into about 860 different administrative units. With the merger of the former Junagadh State into the State of Saurashtra, by a supplementary Covenant, the State becomes a well-knit unit extending to the whole of Kathiawar.

The State of Saurashtra lies on the west coast of India between 20° 40′ and 23° 25′ North Latitude and 69° 5′ and 70° 20′ East Longitude. The State is bounded on the south and southwest by the Arabian Sea, on the north-west by the Gulf of Kutch and on the east by the Gulf of Cambay and the mainland of India. Further north is the little Rann of Kutch.

PHYSICAL FEATURES

Standing boldly out into the Arabian Sea between Kutch and the Gujarat coast, Saurashtra's physical features suggest that it may once have been an island or a group of islands of volcanic origin. The surface of Saurashtra is for the most part undulating with low ranges of hills running in very irregular directions. With the exception of the Thanga and Mandav hills, in the west of Jhalawar, and some unimportant hills in Halar the northern portion of the country is flat. But in the south from the neighbourhood of Gogha, the Gir range runs nearly parallel with the coast and at a distance of about 20 miles from it, along the north of Babariawad and Sorath to the neighbourhood of Girnar. The principal river is the Bhadar which rises in the Mandav hills and, flowing south-west, falls into the sea at Navibandar after a course of about 110 miles, everywhere marked by highly cultivated lands bordering its course. Other rivers in the Union are Mauj, Machhu, Ozat and Shetrunji, the last remarkable for wild and romantic scenery. There are a number of salt-water creeks. The State has a 600-mile coast line and a number of ports: Bedi Bunder, Navlakhi, Bhavnagar, Porbandar and Sica. Of these the first and chief port in the matter of import traffic from Europe is Navlakhi.

The State of Saurashtra has an area of about 21,062 sq. miles and a population of 4,136,005. It has a revenue of about Rs. 8 crores per year.

AGRICULTURE, INDUSTRY

Saurashtra is essentially an agricultural State. The main source of income of the State is land revenue. Agricultural produce of the State is made up of wheat, bajri, jawar, ground-nuts, cotton, and mace.

Industrial development is making rapid progress under the new regime. Saurashtra has at present 9 textile mills and 10 weaving factories producing in all about 5,000 bales of cloth and 15,000 bales of yarn per annum. Textiles is the most important industry of the State. Next in importance are the 18 salt works dotted all over the coast line including the salt works at Kuda situated inland. There are 14 State-owned and 44 private-owned ginning and pressing factories, 6 pottery works, 1 glass works, 9 match factories, 2 bone mills, 2 cement works (one of which is in territory belonging to Bombay State), 10 silicate factories, 2 chemical works manufacturing soda ash, 74 oil mills, 3 vegetable oil factories, 1 sugar mill, 1 magnesia works at Dhrangadhra. Over and above this, there are a good number of small-scale factories.

The main items in the export trade are cotton, ground-nuts, ground-nut oil, salt, soda ash, potteries, ghee, and wool.

Saurashtra is served by a net-work of railway lines with a total length of over 2,000 miles.

For the 1952-53 budget revenue receipts were estimated at Rs. 873·24 lakhs and expenditure at Rs. 871·94 lakhs, leaving a small surplus of Rs. 1·3 lakhs. No new taxation measures were proposed. A provision of Rs. 50·19 lakhs was made for famine relief and assistance to municipalities. A large provision was also made for the improvement of existing roads and the construction of bridges and causeways.

POLITICAL DEVELOPMENTS

There has been a certain lawlessness in the State since integration which was partly agrarian, partly political and partly pure dacoity. The dacoities were traced to well organized groups, one of which was led by a man whose name was given as Bhupat. It was believed that the three aspects of the agitation were interconnected, and the movement itself was brought under control in the early months of 1952. A noteworthy episode was the arrest of a number of highly placed persons connected with the former ruling families of Saurashtra.

The Home Minister gave a short account of the whole movement in the Saurashtra Assembly. Political agitation against the land reforms and the crimes ran parallel to each other. Only one murder was committed between the setting up of the Agrarian Commission on May 13, 1950 and the submission of the report on Dec. 15, 1950. Between the submission of the report and the introduction of the Land Reform Bills in the legislature on July 3, 1951 no less than 38 murders were committed. From Sep. 1951 till Jan. 21, 1952 elections and killings were associated and the number of murders committed was 28. The Home Minister revealed that from a letter written by one Kaly Wank a member of a gang, it was clear that there was a plot to murder the Chief Minister who was due to pay a visit to the village of Kharachia on Jan. 23.

In all 122 persons had been killed by dacoits up to March 29. Of these 89 were farmers. It looked as though that in every district Bhupat had one highly-placed protector who looked after his interests.

The Chief Minister described the situation as 'a socio-political crisis engineered by certain elements in the Princely order and among Girasdars in order to discredit the Congress Government and replace it by a non-Congress Fascist regime.' The Saurashtra Government was aware of the conspiracy months in advance but had to wait until sufficient evidence was gathered.

The names of some of the former Rulers, members of their families, and Girasdars who were arrested under the Preventive Detention Act are given below:—

Rani Kusumkuvarba of Sayla, Prince Fatesinhji of Limbdi, Prince Kalika Kumar of Morvi, Thakur Chandrasinha of Bhavda, Harisingha Gohel, secretary of the Girasdar Association, Gandvi Sankardan, an employee of the Rani of Sayla, the Maharaja of Palitana and the Thakore Saheb of Dhrol. The reason which the Government gave was in general conspiracy to overthrow the Government by helping Bhupat.

The Government alleged that the Rani of Sayla along with her employee had gone in her own car to a sugarcane farm of Durbar Digvijaysinha at the village of Natia in Saurashtra and met Bhupat and his gang and stayed with them in January. She was stated to have helped in providing shelter to the gang of dacoits. Similar reasons were given for Shankerdan.

It was stated that Harisingha Gohel had during the previous 15 months arranged all the activities of loot and murder that were conducted by Bhupat, procured for him arms and ammunition and helped him by giving shelter. It was also stated that he was a party to the conspiracy with Bhupat to murder Congress leaders in November, 1951, and to terrorise villagers. About ten villagers were killed in Kharachia in January 1952. A similar charge was made against Chandrasinha of Bhavda.

As regards Prince Fatesinhji of Limbdi it was stated that he supplied cartridges to Bhupat in February, 1951, and January, 1952. In December 1951 alone he distributed 500 cartridges, 303 having been given to Bhupat. It was alleged that Prince Kalika Kumar of Morvi had given 100 cartridges to Bhupat. He was also said to have given shelter to Bhupat in January, 1951.

Later the Prince of Morvi and the Maharaja of Palitana were freed.

ADMINISTRATION

Rajpramukh, His Highness Lieut.-General Maharaja Shri Sir Digvijaysinhji, G.C.S.I., G.C.I.E., A.D.C., Maharaja Jam Saheb of Nawanagar.

Uprajpramukh, Major His Highness Jhaladhip-Maharajadhiraj Maharana Shri Raj Mayurdhwaj Sinhji, Jhala-Makhwana, the Maharaja Raj Saheb of Halvad-Dhrangadhra.

Members of the Presidium, H. H. The Jam Saheb of Nawanagar (*President*); H. H. The Maharaja of Dhrangadhra (*Vice-President*); H. H. The Maharaja of Palitana; H. H. The Maharaja of Kotda-Sangani.

MINISTRY

Chief Minister, Cabinet and Co-ordination (Revenue, Registration and stamps, Integration of States, Services, Political), U. N. Dhebar.

Minister for Home, Information, Press, Road Transport, Provincial Excise, Ports & Communications, Rasiklal U. Parikh.

Collectors, R. K. Trivedi (*Gohilwad Division*); W. G. Subedar (*Zalawad Division*); D. M. Buch (*Halar Division*); K. S. Banesinhji (*Sorath Division*); J. L. Jobanputra (*Madhya Saurashtra Division*).

Comptroller, Shivram Krishnan.

Inspector-General of Police, V. G. Kanetkar, I.P.

Registrar of High Court, J. M. Pandya.

Executive Engineers, S. G. Mehta (*Gohilwad Division*); D. V. Pancholi (*Zalawad Division*); V. M. Bavishi (*Sorath Division*); R. T. Ghia (*Rajkot and Central Govt. Works*); D. G. Motivaras (*Halar Division*); A. P. Mehta (*Project Division*).

LEGISLATIVE ASSEMBLY

(*For list of members see under General Elections.*)

TRAVANCORE-COCHIN UNION

THE Union of Travancore & Cochin subsequently called the Travancore-Cochin State, was inaugurated on July 1, 1949: the Maharaja of Travancore is the Rajpramukh.

The total area of the State is 9,155 sq. miles; total population 9,264,943 and the total annual revenue over Rs. 14 crores.

The climate of the whole region is generally temperate and the rainfall heavy. The staple food of the people is rice, fish and tapioca. Agriculture forms the main occupation of the people. Among the important agricultural products grown in the State are rice, tapioca, yams, beans, gram, pepper, rubber, ginger, turmeric, tea and cardamom. There are also to be found in the State dense coconut plantations, together with fruit trees, such as areca, jack, tamarind, cashew and mango. The forests are well-wooded with teak, ebony, black-wood, rose-wood, jack and anjili. The fauna consists of the elephant, leopard, bison, bear, the sambur and a variety of small game.
